

RAILROAD COMMISSION OF TEXAS
OIL AND GAS DIVISION

www.rrc.state.tx.us

**EXPANDED PRODUCTION QUERY PREMIERS ON RAILROAD
COMMISSION WEB SITE!**

Now you can access more valuable Railroad Commission information from your home or business, 24 hours a day, seven days a week, through the Commission's web site. The most recent addition to the web site is the **Production Data Query**, or **PDQ**. **PDQ** will replace the current on-line production system, ACTI, in providing oil and gas production data from 1993 through the current production month. **PDQ** provides new, user-friendly interfaces, detailed help instructions, and enhanced query abilities. You can access the new and improved **online production system** from the Commission's home page at <http://www.rrc.state.tx.us> under the topic Interactive Data or directly from the Interactive Data home page at http://www.rrc.state.tx.us/interactive_data.html.

PDQ provides **enhanced features** such as the ability to view:

- production in multiple year date ranges;
- production disposition by codes and volumes;
- operator and field name changes over selected date ranges;
- common reservoir production data by selecting fields that contains the reservoir name;
- specific lease queries without going through the general menu.

Additional functionality provided by the upgraded online production system includes advanced search capabilities that provide production detail for lease, operator, field, district, or county with simple clicks of a button.

If you have any questions concerning PDQ please contact us at rrc.pdqinfo@rrc.state.tx.us.
