## PART V: MEDICAL DISPUTE RESOLUTION REVIEW SUMMARY, METHODOLOGY, AND/OR EXPLANATION

This dispute relates to inpatient services provided in hospital setting with reimbursement subject to the provisions of Rule 134.401 (Acute Care Inpatient Hospital Fee Guideline). In this particular admission, the principle diagnosis code was 800.66 related to trauma care for a fracture of the vault of skull, open with cerebral laceration and confusion, with loss of consciousness of unspecified duration. Pursuant to Rule 134.401(c)(5), the reimbursement for the entire admission shall be paid at a fair and reasonable rate (neither the per diem method nor the stop loss method apply to this case).

Determining the "fair and reasonable" reimbursement can be difficult. In this case, it appears that neither the requestor nor the respondent have persuasively shown that their position represents the appropriate amount. Therefore, an alternate approach is needed to determine the reimbursement amount.

Based on data contained in the Commission's medical billing database for dates of service in 2003, trauma admissions were reimbursed, on average, at 51.8% of the total charges (total payments divided by total charges). Applying this same formula to this specific case appears to be a sound method to determine the appropriate fair and reasonable reimbursement.

Accordingly, the health care provider is entitled to a total reimbursement amount of \$35,619.36. This was calculated by multiplying the total charges of \$68,763.24 by 51.8%.

Since the carrier has previously paid \$18,597.23, the health care provider is entitled to additional reimbursement in the amount of

\$17,022.13.
