PART V: MEDICAL DISPUTE RESOLUTION REVIEW SUMMARY, METHODOLOGY, AND/OR EXPLANATION

This dispute relates to inpatient services provided in hospital setting with reimbursement subject to the provisions of Rule 134.401 (Acute Care Inpatient Hospital Fee Guideline). The hospital has requested reimbursement according to the stop-loss method contained in that rule. Rule 134.401(c)(6) establishes that the stop-loss method is to be used for "unusually costly services." The explanation that follows this paragraph indicates that in order to determine if "unusually costly services" were provided, the admission must not only exceed \$40,000 in total audited charges, but also involve "unusually extensive services."

After reviewing the documentation provided by both parties, it **does** appear that this particular admission involved "unusually extensive services." In particular, this admission resulted in a hospital stay of 4 days based upon the claimant underwent a 360 degree spinal fusion from a posterior approach with complete L5 laminectomy, L5-S1 interbody arthrodesis, and stabilization from L4 to S1 with reduction of spondylolisthesis. Following surgery, he developed some vomiting and minimal upper GI bleeding. A gastroenterology consultation was obtained. He was thought to have postoperative ileus and gastritis. He required insertion of a nasogastric tube. His diet was advanced April 4, 2004. His NG tube was then removed. Accordingly, the stop-loss method does apply and the reimbursement is to be based on the stop-loss methodology.

The requestor billed \$91,140.55 for the hospitalization. The requestor billed \$45,707.00 for the implantables. The carrier paid \$12459.66 for the implantables based on a cost plus 10% approach. , it appears that the carrier found that the cost for the implantables was \$11,326.96 (reimbursed amount divided by 110%). This amount multiplied by the average mark-up of 200% results in an audited charge for implantables equal to \$22,653.92.

The audited charges for this admission, excluding implantables, equals \$45,433.55. This amount plus the above calculated audited charges for the implantables equals \$68,087.47, the total audited charges. This amount multiplied by the stop-loss reimbursement factor (75%) results in a workers' compensation reimbursement amount equal to \$51,065.60.

The insurance carrier paid \$16,931.66. The difference between amount paid and due = \$34,133.94.

Based on the facts of this situation, the parties' positions, and the application of the provisions of Rule 134.401(c), we find that the health care provider is entitled to a reimbursement amount for these services equal to \$34,133.94.

PART VI: COMMISSION DECISION AND ORDER

Based upon the review of the disputed healthcare services, the Medical Review Division has determined that the requestor is entitled to additional reimbursement in the amount of \$34,133.94. The Division hereby **ORDERS** the insurance carrier to remit this amount plus all accrued interest due at the time of payment to the Requestor within 20-days of receipt of this Order.
