### PART V: MEDICAL DISPUTE RESOLUTION REVIEW SUMMARY, METHODOLOGY, AND/OR EXPLANATION

Section 413.011(a-d) titled (Guidelines and Medical Policies), and Commission Rule 134.202 titled Medical Fee Guideline effective August 1, 2003, set out reimbursement guidelines.

According to the EOB provided by the Requestor, the carrier has made partial payment using payment exception code Z560- "The charge for this procedure exceeds the fee schedule or usual and customary values as established by Ingenix."

1. The HCPCS Level II Code E1399, Durable Medical Equipment, miscellaneous, is used to bill for DME items when a more specific code is not available. These items vary greatly in reimbursement. This code does not have an established value set by CMS nor the Division.

Division Rule 134.202 (c)(6), states that for products for which CMS or the Division does not set an amount, the carrier shall assign a relative value, which may be based on nationally recognized published relative value studies, published commission medical dispute decisions, and values assigned for services involving similar work or resource commitment. Although RS Medical has submitted product features and information, the manufacturer has not submitted manufacturing cost information on the product. RS Medical states that due to the unique features of the product, higher reimbursement from other muscle stimulators is warranted. RS Medical also provides EOBs from other carriers who have reimbursed the full amount bill at \$250.00 for rental. The EOBs provided by RS Medical

only illustrate the highest amount paid by carriers and do not show the full range of payments made by carriers.

Reimbursement of 100% of charges, gives the manufacturer sole control over the amount billed and reimbursed, this is not effective medical cost control for the workers' compensation system. The manufacturer has not provided convincing evidence to justify increased reimbursement. Unless the manufacturer provides convincing evidence to provide for reimbursement otherwise, the Division refers to the other values previously discussed. While the RS4i is not exactly the same as a TENS unit, the RS4i is similar to a TENS unit. Therefore, the Division will use the assigned relative value for a similar type product, E0745, Neuromuscular Stimulator, at a midpoint between the CMS national average payment (\$82.80) multiplied by 1.25 and the national average commercial reimbursement (\$180.01) for the E0745. The commercial reimbursement is used to recognize the unique features of the RS4i that make the RS4i different from the E0745, Neuromuscular Stimulator.

For date of service in calendar year 2004 the Division reimbursement for the RS4i is calculated as follows:  
 $\$82.80 \times 125\% = \$103.50 + \$180.01 \div 2 = \$141.76$ . The Respondent made a total payment in the amount of \$111.89. Therefore, additional reimbursement in the amount of \$59.74 ( $\$141.76 - \$111.89 \times \text{two DOS}$ ) is recommended.
