## PART V: MEDICAL DISPUTE RESOLUTION REVIEW SUMMARY, METHODOLOGY, AND/OR EXPLANATION

This dispute relates to inpatient services provided in hospital setting with reimbursement subject to the provisions of Rule 134.401 (Acute Care Inpatient Hospital Fee Guideline). The hospital has requested reimbursement according to the stop-loss method contained in that rule. Rule 134.401(c)(6) establishes that the stop-loss method is to be used for "unusually costly services." The explanation that follows this paragraph indicates that in order to determine if "unusually costly services" were provided, the admission must not only exceed \$40,000 in total audited charges, but also involve "unusually extensive services."

After reviewing the documentation provided by both parties, it **does** appear that this particular admission involved "unusually extensive services." In particular, this admission resulted in a hospital stay of 4 days based upon anterior posterior lumbar fusion to L5-S1. Claimant spent 1 day in ICU and 3 days in surgical bed. Accordingly, the stop-loss method does apply and the reimbursement is to be based on the stop-loss methodology.

The requestor billed \$91,579.21 for the hospitalization. In determining the total audited charges, the requestor billed \$36,723.00 for the implantables. The carrier paid \$13,465.10 for the implantables based on a cost plus 10% approach. The key issue is what amount would represent the usual and customary charges for these implantables in determining the total audited charges. The requestor did not provide the Commission with any documentation on the actual cost of implantables or how their charges were derived.

Based on a reimbursement of \$13,465.10, it appears that the carrier found that the cost for the implantables was \$12,241.00. This amount multiplied by the average mark-up of 200% results in an audited charge for implantables equal to \$24,482.00.

The audited charges for this admission, excluding implantables, equals \$54,856.21. This amount plus the above calculated audited charges for the implantables equals \$79,338.21, the total audited charges. This amount multiplied by the stop-loss reimbursement factor

(75%) results in a workers' compensation in	reimbursement amount equal to \$59,503.65.
