PART V: MEDICAL DISPUTE RESOLUTION REVIEW SUMMARY, METHODOLOGY, AND/OR EXPLANATION

This dispute relates to inpatient services provided in hospital setting with reimbursement subject to the provisions of Rule 134.401 (Acute Care Inpatient Hospital Fee Guideline). The hospital has requested additional reimbursement according to the stop-loss method contained in that rule. Rule 134.401(c)(6) establishes that the stop-loss method is to be used for "unusually costly services." The explanation that follows this paragraph indicates that in order to determine if "unusually costly services" were provided, the admission must not only exceed \$40,000 in total audited charges, but also involve "unusually extensive services."

After reviewing the information provided by the provider, it does **not** appear that this particular admission involved "unusually extensive services." The provider submitted an operative report indicating that a bilateral L5-S1 partial laminectomy and right discectomy was performed. The patient was taken to the recovery room in good condition and no complications were noted. Accordingly, the stop-loss method does not apply and the reimbursement is to be based on the per diem methodology described in the same rule.

The carrier made reimbursement for the 1-day stay in the amount of \$1,118.00.

Therefore, reimbursement based on per diem is \$1,118.00(1 x \$1,118.00), leaving no additional reimbursement recommended.

Therefore, based on the facts of this situation, the parties' positions, and the application of the provisions of Rule 134.401(c), we find that the health care provider is not entitled to additional reimbursement.
