Actual Performance for Output/Efficiency Measures with Updates

79th Regular Session, Performance Reporting

DATE: 1/12/2007

9:29:56AM

TIME:

Explanation of Variance: Historically, CBA has experienced an upward trend in the average cost per client which was primarily the result of increased usage of Personal Assistance Service hours. The average cost per client increased by 5.6% in FY 2003 (over FY 2002) and by 3.8% in FY 2004. For the FY 2006-2007 appropriations, the cost trend for FY 2005 was estimated to be 3.1%, and this trend was assumed to continue through FY 2006-2007. However, the actual increase in FY 2005 was only 1.0%, and the experience for FY 2006 as well as FY 2007 to date shows a reduction in the average cost per client from FY 2005.
