TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS
SELF-EVALUATION REPORT

I. AGENCY CONTACT INFORMATION.

Texas Department of Housing and Community Affairs Exhibit 1: Agency Contacts				
	Name	Address	Telephone & Fax Numbers	E-mail Address
Agency Head	Michael Gerber	221 East 11th Street; PO Box 13941, Austin, TX 78711-3941	512.475.3930 (o) 512.469.9606 (f)	michael.gerber@tdhca.state.tx.us
Agency's Sunset Liaison	Brooke Boston	221 East 11th Street; PO Box 13941, Austin, TX 78711-3941	512.475.1762 (o) 512.469.9606 (f)	brooke.boston@tdhca.state.tx.us

II. KEY FUNCTIONS AND PERFORMANCE.

A. Provide an overview of your agency's mission, objectives, and key functions.

The Texas Department of Housing and Community Affairs (TDHCA or the Department) is the affordable housing agency for the State of Texas. Through contract awards with for-profit, non-profit, and local government organizations, the Department supports local activities expanding homeownership, the development and preservation of quality affordable rental housing, poverty and homelessness prevention programs, the provision of weatherization and utility bill assistance, colonia housing programs, and the regulation of the state's manufactured housing industry. The Department is also the state's lead agency for housing recovery from hurricanes Rita, Dolly, and Ike. TDHCA's mission is "to help Texans achieve an improved quality of life through the development of better communities."

TDHCA accomplishes this mission by administering a variety of programs for households whose incomes are extremely low to moderate as determined by state and federal guidelines. A primary function of TDHCA is to act as a conduit for federal grant funds for housing and community services. Additionally, TDHCA operates as a housing finance agency.

More specific policy guidelines are provided in the Texas Government Code, Section 2306.002 of TDHCA's enabling legislation as excerpted below:

(a) The legislature finds that:

  (1) every resident of this state should have a decent, safe and affordable living environment;
  (2) government at all levels should be involved in assisting individuals and families of low income in obtaining a decent, safe and affordable living environment; and
  (3) the development and diversification of the economy, the elimination of unemployment or underemployment and the development or expansion of commerce in this state should be encouraged.

(b) The highest priority of the department is to provide assistance to individuals and families of low and very low income who are not assisted by private enterprise or other governmental programs so that they may obtain affordable housing or other services and programs offered by the department.

Funding sources to meet these legislative goals include the U.S. Department of Housing and Urban Development, U.S. Treasury Department, U.S. Department of Health and Human Services, U.S. Department of Energy, and State of Texas general revenue funds and program related fees. With this funding, TDHCA strives to promote sound housing policies; promote leveraging of state and local resources; and ensure the stability and continuity of services through a fair, nondiscriminatory and open process. Because of the great amount of need in proportion to the federal and state funding available, the Department works toward providing the most benefit by managing these limited resources to have the greatest impact.

As outlined in the agency's *Strategic Plan for Fiscal Years 2009-2013*, the Department's goals are:

(1) Increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families;

(2) Promote improved housing conditions for extremely low income, very low income, and low income households by providing information and technical assistance;

(3) Improve living conditions for the poor and homeless and reduce cost of home energy for very low income Texans;

(4) Ensure compliance with Department of Housing and Community Affairs federal and state program mandates;

(5) Protect the public by regulating the manufactured housing industry in accordance with state and federal laws; and

(6) Provide for indirect administrative and the allocation of support costs.

TDHCA offers a Housing Support Continuum for extremely low- to moderate-income Texans with services ranging from poverty and homelessness prevention to disaster recovery. The Housing Support Continuum can be divided into the following six categories:

(1) Poverty and Homelessness Prevention: For Texans who struggle with poverty or are currently homeless, TDHCA offers several programs that provide essential services to assist with basic necessities while encouraging eventual self-sufficiency.

(2) Rental Assistance and Multifamily Development: TDHCA offers a wide range of rental assistance, from subsidizing the rent payments of low-income Texans in market-rate units to subsidizing developments that provide reduced rent for low-income Texans.

(3) Homebuyer Assistance and Single-Family Development: After a low-income household has become self-sufficient, the household may be ready for homeownership.

(4) Rehabilitation and Weatherization: In the course of homeownership, there may come a time when substantial rehabilitation or reconstruction needs to take place.

(5) Foreclosure Relief: As a result of the national foreclosure crisis, TDHCA has undertaken several programs to mitigate foreclosure.

(6) Disaster Recovery: When natural and man-made disasters strike, low-income households are often the most dramatically affected. In an effort to reduce the recovery time, almost every department in TDHCA offers some sort of disaster assistance.

B. Do each of your key functions continue to serve a clear and ongoing objective? Explain why each of these functions is still needed. What harm would come from no longer performing these functions?

TDHCA's key functions continue to serve a clear, ongoing and ever-growing objective. According to the most recent data available on housing needs, approximately 25% of Texas households experience at least one type of housing need.[1] This represents approximately 2,149,000 households based on 2008 population estimates for the state. Types of housing needs defined by the U.S. Department of Housing and Urban Development (HUD) include (1) excessive housing cost burden (greater than 30% of income), (2) overcrowded housing conditions, or (3) living in a housing unit lacking complete kitchen and/or plumbing. Additionally, the U.S. Census Bureau estimates that there are 3,787,071 persons living in poverty in Texas. These families, earning less than the 2009 poverty limit of $22,050 per year for a family of four, have limited access to basic health and human services.

Data for the State of Texas indicates that renter households generally have a higher incidence of housing problems than owner households. Lower income groups have much higher rates of incidence of housing problems than higher income groups. Among household types, large related family households have the highest rates of housing problems. Affordability, or housing cost burden, is the most common housing problem with approximately 18% of all households showing a housing cost burden.

Long-term demographic projections suggest the demand for affordable housing and community services will increase in the coming years.[2]

- The state population is expected to surge to 50.4 million by 2040.
- The state population is becoming older. The median age will increase from 32.3 in 2000 to 38.3 in 2040. The percentage of the population 65 or older was 9.9% in 2000, but it will increase to 20% by 2040.
- Growth in the number of households, projected at 162.1% over the period 2000-2040, will outstrip population growth, projected to be 142.6% during the same period.

During FY2008, through the functions and activities noted above in Section A, TDHCA was able to provide funding to assist a total of 21,493 households with housing need. In addition, the Department assisted 71,996 households and 611,587 individuals with homeless services, energy assistance or supportive services. The objective of the Department, to serve low income Texans with housing and services, is clearly being met. TDHCA efficiently provides valuable, often critical, housing and community services to low and moderate income Texans.

C. What evidence can your agency provide to show your overall effectiveness and efficiency in meeting your objectives?

The Department's goals, as outlined in the *Strategic Plan for Fiscal Years 2009-2013,* and evidence of the Department's effectiveness are described below.

- Goal 1: Increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families.

---

[1] 2000 Comprehensive Housing Strategy (CHAS) Data, U.S. Department of Housing and Urban Development, http://www.huduser.org/datasets/cp.html.
[2] Texas A&M University, *A Summary of the Texas Challenge in the Twenty-First Century: Implications of the Population Change for the Future of Texas,* by Steve H. Murdock, Steve White, Md. Nazrul Hoque, Beverly Pecotte, Xiuhong You, and Jennifer Balkan (College Station, TX: Department of Rural Sociology, December 2002).

- During FY2008, TDHCA provided funding to assist a total of 21,493 households with housing need. More than 2,862 Texas families became first-time homebuyers through TDHCA's First Time Homebuyer and HOME Programs. TDHCA's 2008 awards through its Housing Tax Credit, HOME and Multifamily Bond Programs will support the development of 16,790 units of safe, decent and affordable rental housing. During the year, TDHCA placed in service 8,327 affordable rental housing units.

- Goal 2: Promote improved housing conditions for extremely low income, very low income, and low income households by providing information and technical assistance.
  - TDHCA's Housing Resource Center provided technical assistance and information to 6,109 households during FY2008 that covered issues relating to all Department programs and housing resource assistance. TDHCA Colonia Self-Help Centers provided extensive training and education for 8,666 colonia residents, including construction skills training, homeownership classes and financial literacy, computer skills training and other life skills.

- Goal 3: Improve living conditions for the poor and homeless and reduce cost of home energy for very low income Texans.
  - In FY2008, TDHCA's Community Services Programs transitioned 3,024 Texans out of poverty. Through the Weatherization Assistance Program, 4,000 Texas homes were weatherized, enhancing home affordability and decreasing energy demand. Community Services Programs assisted 500,296 Texans who were on the brink of, or in, poverty with critical necessities such as shelter, temporary housing, food, blankets and other essentials.

- Goal 4: Ensure compliance with Department of Housing and Community Affairs federal and state program mandates.
  - In FY2008, TDHCA's Compliance and Asset Oversight (formerly Portfolio Management and Compliance) staff oversaw a portfolio of 242,766 affordable housing units in Texas. Department staff conducted 1,046 on-site visits to affordable housing properties. TDHCA instituted newer, tougher compliance rules which provide for the assessing of administrative penalties of up to $1,000 per day per violation. TDHCA uses the Uniform Physical Conditions Standard to inspect its properties. This standard, one of the toughest in the nation, reviews all aspects of a property to ensure that it is being well managed and maintained for the benefit of its residents.

D. Does your agency's enabling law continue to correctly reflect your mission, objectives, and approach to performing your functions? Have you recommended changes to the Legislature in the past to improve your agency's operations? If so, explain. Were the changes adopted?

TDHCA's enabling statute, Texas Government Code, Chapter 2306, reflects the agency's mission, its objectives and the statutorily prescribed processes to accomplish its mission and objectives. On occasion the Legislature will seek TDHCA's input to identify areas of its enabling code in need of revision.

In the 81st Legislature, Regular Session, TDHCA staff worked with legislative staff to make minor changes to the statute enabling broader participation in TDHCA programs and giving the TDHCA Board and Executive Director more flexibility in administering funds.

SB 679 by Senator Lucio made substantial changes to the Texas Bootstrap Loan Program. Specifically, the bill changed the award caps and total loan amounts, as well as the sweat equity requirements of the owner-builder. This bill passed both chambers and was signed by the Governor on June 19, 2009. The provisions of this bill were effective immediately upon the Governor's signature.

HB 3430 by Representative Menendez would have made changes to the Texas Bootstrap Loan Program relating to loan amounts and lien position. This bill did not pass, but SB 679 contained similar provisions.

HB 3432 by Representative Menendez contained several minor changes to TDHCA's enabling law, as well as language creating a Public Housing Authority Board. This bill did not pass.

HB 4275 by Representative Menendez. The bill assisted in allowing TDHCA to have flexibility in the tax credit award process to take advantage of hundreds of millions of federal stimulus dollars that would not be available due to the restrictive statutory process for tax credits provided TDHCA the flexibility and rulemaking authority to provide relief to earlier awards. This bill passed both chambers and was signed by the Governor on June 19, 2009. The provisions of this bill were effective immediately upon the Governor's signature.

There are several parts of enabling law that are not entirely consistent with the Department's current organization or its current business practices. For example, staff positions noted in statute are not existing positions, references to organizational divisions are outdated, processes for administering funds are not reflective of more current practices of administration (requiring a uniform application cycle when some funding sources can operate more effectively on an open cycle; applying a regional allocation formula to amounts that, when so divided, are effectively unusable for applicants), and several programs or proposals included in statute which have been attempted but remain partially, or wholly, unsuccessful (i.e., the Colonia Model Subdivision Program and the Preservation assessment tools).

E. Do any of your agency's functions overlap or duplicate those of another state or federal agency? Explain if, and why, each of your key functions is most appropriately placed within your agency. How do you ensure against duplication with other related agencies?

TDHCA, as a conduit primarily of federal funds, includes functions that to some extent mirror those of the federal agencies from which funds are received. For example, HUD provides TDHCA funds to oversee and execute contracts with subgrantees much the way HUD oversees the contract with TDHCA. In such cases, with all federal funding entities, this is not considered an overlap but a delegation of program administration for efficiency purposes.

As it relates to state agencies, TDHCA has overlap and/or partnerships with the following agencies:

- Texas State Affordable Housing Corporation (TSAHC): TSAHC, as quasi-state housing nonprofit entity and as an issuer of bond authority, provides single and multifamily affordable housing to low income Texans just as TDHCA does but on a significantly reduced scale. There is duplication of programs, funding sources and clients served between this agency and TDHCA, particularly in the areas of homeownership and rental development. Additionally, TSAHC receives funds from TDHCA in several areas – foreclosure mitigation counseling and Neighborhood Stabilization Program funds. These key functions are most appropriate at TDHCA because a) the larger volume of funds released from TDHCA enables the State of Texas to take advantage of efficiencies by serving more Texans with better interest rates, and b) the centralized location of so many housing resources in one agency allows TDHCA to promote effective and efficient leveraging of funds, to promote innovation and collaboration among sources and recipients, and to provide a clear sole source of assistance for low-income Texans to access homebuyer resources. The primary differentiating purpose of TSAHC, the accessing of additional funding by virtue of its non-profit status, has not proven to be as effective.

- Office of Rural Community Affairs (Texas Department of Rural Affairs (TDRA) as of September 1, 2009): Both TDHCA and TDRA actively work to serve rural Texas – TDRA has a greater emphasis on infrastructure and health, while TDHCA focuses on rural housing issues. Generally, the agencies experience limited overlap, however at this time, overlap occurs in the following ways.

- TDRA and TDHCA partner closely on the administration of Community Development Block Grant (CDBG) funds received by Texas for Disaster Relief. In some cases, TDHCA is considered the primary recipient and non-housing contract work is designated for TDRA oversight. Conversely, in other cases, TDRA is considered the primary fund recipient and housing work is designated to TDHCA.
- TDRA also administers a portion of the Neighborhood Stabilization Program (NSP). NSP is funded by HUD and modeled after the CDBG program and is designed to stabilize communities by funding the purchase of foreclosed homes. TDRA administers those contracts awarded through NSP in rural areas of Texas.
- TDHCA and TDRA also partner on: a) jointly administering the rural set-aside of the Housing Tax Credit Program, and b) the use of non-disaster CDBG for the Colonia Self Help Center Program administered by the Office of Colonia Initiatives at TDHCA. (This is a dedicated amount in the Appropriations Bill.)
- These functions remain most effectively located at TDHCA because it allows each agency to promote their expertise in their given areas - TDHCA focusing on housing issues and TDRA focusing on rural infrastructure and health needs.

F. In general, how do other states carry out similar functions?

TDHCA is a Public Housing Authority, Federal Fund Administrator, and a Housing Finance Agency (HFA). Almost all states have HFAs; by 2003, 49 states, Puerto Rico, the U.S. Virgin Islands, and the District of Columbia established HFAs. Most HFAs administer Mortgage Revenue Bonds (MRB), Housing Credits, and the HOME Investment Partnership (HOME) Program. About eight states administer MRBs and Housing Credits through their HFA. Most states administer their HOME funds through a department of housing or other state entity. Furthermore, about half of the states regulate manufactured housing through their HFA. Other states either rely on the federal government or their department of motor vehicles to regulate manufactured housing. TDHCA, as Texas' HFA, administers MRB, Housing Credits and the HOME Program and regulates manufactured housing. Furthermore, because the Texas HFA combines the responsibility of providing housing assistance with community services, TDHCA uses a variety of programs to provide a continuum of services including rental assistance, multifamily development, homebuyer assistance, affordable single-family development, rehabilitation, weatherization, foreclosure relief and disaster recovery.

Take, for example, Florida, a state comparable to Texas as a southern state with the fourth largest population (Texas is the second largest state both in size and population). Florida has three agencies that provide equivalent services to TDHCA: a Division of Housing and Community Development (HCD), a Housing Finance Agency (HFA) and a Bureau of Mobile Home and Recreational Vehicle Construction. Florida's HCD administers the following programs that are similar to TDHCA's programs:

- Disaster Recovery
- Neighborhood Stabilization Program
- Community Service Block Grants
- Low-Income Home Energy Assistance Program
- Weatherization Assistance Program/Low-Income Home Energy Assistance Program[3]

Florida's HFA administers the following programs that are similar to TDHCA's programs:

- American Recovery and Reinvestment Act of 2009 programs, such as Tax Credit Assistance Program and the Tax Credit Exchange Program
- Homeownership Programs
- HOME Investment Partnership Programs
- Housing Credits

3 Florida Department of Community Affairs. (n.d.). Division of Housing and Community Development: Programs and Initiatives. Retrieved from http://www.dca.state.fl.us/fhcd/.

- Housing Trust Fund programs, such as preservation rehabilitation program and providing matching funds for federal programs
- Multifamily Bonds[4]

Florida's Bureau of Mobile Home and Recreational Vehicle Construction, under the Florida Department of Highway Safety and Motor Vehicles, regulates manufactured housing.[5]

Florida's HCD administers several programs that are not similar to TDHCA programs. Florida's HCD is a clearinghouse for building codes and standards and provides technical assistance for community planning as well as providing technical assistance and regulation for special districts[6] (i.e. local units of special purpose government as opposed to local units of general-purpose government such as cities or counties).[7] Florida's HFA has programs that focus on workforce housing, hurricane recovery specifically for farmworkers and people with special needs, a loan guarantee program for affordable housing, low-interest loans for apartment development, and funds to local governments as an incentive to create partnerships to produce low-income housing.

Another example, California, the third largest state in size and the largest in population, has a Department of Housing and Community Development (HCD) and a California Tax Credit Allocation Committee (CTCAC) that jointly perform the functions of TDHCA. California's HCD administers the state's funds for the following programs that are similar to programs administered by TDHCA:

- HOME Investment Partnership Program
- Housing Trust Fund Programs
- Homeless Prevention and Rapid Re-Housing Program
- Self-Help Housing Program similar to TDHCA's Bootstrap Program
- Federal Emergency Shelter Grants Program
- Section 8 Housing Assistance Program to rural areas of the state
- Neighborhood Stabilization Program
- Manufactured Housing Program similar to TDHCA's Manufactured Housing Division.[8]

Under the California State Treasurer, the CTCAC acts as the state's HFA and administers the following programs that are similar to programs administered by TDHCA:

- Low-Income Housing Tax Credit Programs
- Tax-Exempt Bond Financing [9]

California's HCD and CTCAC also administer funds for some programs that are not similar to TDHCA programs, such as Community Development Block Grants (CDBG), various programs related to Affordable Housing Innovation, and several programs that focus on the needs of the highly-populated areas (e.g. Transit Oriented Development Housing Program and Infill Infrastructure Grant Program). Moreover, California funds several of these programs with a state income tax which is not assessed in Texas. The CTCAC administers a program specifically to assist farm workers with housing needs and a program for businesses located in Renewal Communities to purchase, develop or renovate property for commercial use. In Texas, CDBG funds not related to disaster recovery or foreclosure mitigation are administered through the Texas Department of Rural Affairs. Because California has the largest state population in the country, its need for programs that

focus on highly populated areas is most likely greater than Texas' need for similar programs. Finally, TDHCA focuses on housing and housing-related supportive services, not on commercial development.

G. What key obstacles impair your agency's ability to achieve its objectives?

Given the large need for affordable housing and the limited supply of funding, the lack of sufficient funding to meet underserved housing needs in Texas is the one major obstacle TDHCA faces in meeting its objectives. Demographic characteristics of Texas as exhibited in the U.S. Census clearly indicate a shortage of affordable housing stock and funding sources to assist in the development and maintenance of affordable housing and to meet the poverty-related needs of low income families.

In urban areas of the state, the low income and poverty populations are large and their needs acute. The agency's urban business partners have access to direct federal resources, and often have local housing authorities, to help to address those needs. However, in spite of their greater capacity and access to funds, funds targeted to urban areas are insufficient to reach the greatest need.

Lack of funding limits the ability of service providers to provide direct housing or services, but TDHCA is also challenged in meeting its rural funding objectives because service providers may lack the ability to grow their organizational capacity. In rural Texas, because of their remote nature, many smaller communities, are not aware of public or private resources or do not know how to obtain them successfully. The service providers in these communities may not know when or where to apply for funding, have qualified staff, or have experience administering a successful housing program.

Even though lack of capacity may limit the success of obtaining funds and implementing housing programs, some communities have, the Department believes erroneously, decided that they have little incentive to build capacity because of the negative perception of affordable housing. This perception of affordable housing is another challenge to TDHCA in achieving its objectives. Public opposition acts as a barrier to affordable housing, especially in regards to affordable rental development. During every application cycle for affordable multifamily housing, significant public input is received and communities may submit letters to TDHCA in support or opposition to the proposed developments to the Department. When opposition is received, these complaints cite the communities' fear of falling property values or an increase in crime if a new affordable housing apartment is developed. However, direct association between affordable housing and crime or lower property values has not been proven by academic studies. These negative attitudes have been perpetuated by the "Not-In-My-Backyard" (NIMBY) mentality.

These perceptions notwithstanding, the affordable rental housing that is being developed with financial assistance allocated by the Department has been high quality housing that would be an asset to any community. This initial quality is upheld and maintained under the scrutiny of an exceedingly comprehensive compliance oversight function.

Performance reporting and analysis is another area of challenge for TDHCA. TDHCA's 15-plus programs' varying reporting requirements, report formats and data storage methods, as well as federal variations in program requirements, have made performance reporting and analysis difficult for the Department. Because of these differing requirements, TDHCA programs have maintained data in separate databases since the creation of the Department in 1991. On many programs, data that appears to reflect activity and performance may actually fail to portray the status accurately due to lags often necessitated by legal requirements, such as environmental review and permitting, between award and actual expenditure.

Another obstacle TDHCA encounters that provides a barrier to affordable housing can be difficulty in obtaining a clear title for low-income homeowners. Clear titles are required for homeowners to meet certain federal program eligibility requirements and to protect TDHCA's investment in providing affordable housing. Homeowners in need of housing repair or contract-for-deed conversions to traditional mortgages often have difficulty obtaining a clear title. Titles may not be in the homeowners' name because of divorce or widowing in which case the ex-spouse is also on the title. Titles with liens are a common challenge for contract-for-deed conversions. When clear title cannot be obtained, assistance is often delayed, or under some federal programs, not possible.

H. Discuss any changes that could impact your agency's key functions in the future (e.g., changes in federal law or outstanding court cases).

TDHCA is, as noted, a housing finance agency and as such its success and challenges are tied to the housing, finance and real estate markets. As an issuer of bonds, TDHCA is impacted by changes in the housing finance industry, which may limit the supply of bond proceeds that can be used to provide housing. Indirectly, as the housing, finance and real estate markets decline, developers and applicants for TDHCA resources are less able to pursue development activities. For these reasons, in 2008 and 2009, the economic and housing crises have had a damaging effect on TDHCA funding resources, interest in some programs, and capacity to leverage with private sources. TDHCA, because of its nature, will continue in the future to have its programs impacted by variations in the economic market.

Two other direct funding activities provide a significant impact on the current and future function of TDHCA; TDHCA is receiving significant amounts of disaster recovery and stimulus funds (further described under Program Description). The receipt of these two sources is causing a vast increase in funds being administered by the Department which impacts staffing, reporting systems and financial systems. The possibility of additional funding designed for housing activities will also impact TDHCA; as TDHCA pursues its mission to promote housing for low income Texans, it will continue to receive directly and apply competitively for resources. At present, TDHCA is seeking grant approval for an additional $100 million in Neighborhood Stabilization Program II (NSPII) funds, has obtained Board permission to apply for approximately 100 additional rental housing vouchers for persons with disabilities, and will likely in the next several years be a direct recipient of National Housing Trust Fund monies.

Because of TDHCA's role as a conduit for federal funds, federal law or rule changes are common to program administration at TDHCA. Staff is adept at staying apprised of, and trained on, new federal requirements.

TDHCA and its governing board are currently involved in one significant piece of litigation that could impact the governing statute. The case is being tried in federal court in the Northern District of Texas and is captioned *as Inclusive Communities Project, Inc. v. TDHCA, et al*. The suit is for injunctive relief to prevent the board from awarding any tax credits in the Dallas area due to Fair Housing Act violations. The suit reality seeks to set aside 26 USC §42 and parts of Chapter 2306 of the Texas Government Code related to funding of developments as related to scoring and how developments are provided credits associated with costs of construction. The case is set for trial February 1, 2010. TDHCA is currently represented by Looper, Reed and McGraw out of Dallas.

I. What are your agency's biggest opportunities for improvement in the future?

The Department's biggest opportunities for improvement will be the elimination of obstacles to affordable housing identified above. To reduce obstacles to affordable housing, TDHCA closely monitors affordable housing trends and issues and on occasion conducts its own research. For example, as a result of the identification of insufficient funding, the Department requested and was appropriated an increase in funding for the Housing Trust Fund by the 81st Legislature. In addition, through roundtable discussions and public hearings held throughout the state, TDHCA makes adjustments to its programs to address community input on affordable housing obstacles. To illustrate this point, the Housing Trust Fund is including several capacity-building components into its programs as a result of public input at a roundtable. The capacity-building components will focus on increasing the ability of self-help housing organizations to administer housing programs and on increasing the capabilities and access to funds for rural communities interested in affordable housing. Furthermore, to obtain independent information, the Department has funds available for market studies to identify housing needs in specific communities. These efforts, combined with public outreach and education, are part of TDHCA's commitment to overcome obstacles to affordable housing.

In order to meet evolving data compilation and reporting requirements, the Department has continued to expand the TDHCA Central Database, which is a suite of custom, Web-enabled systems used for contract management, compliance monitoring and reporting, and providing citizens online access to information about local assistance providers. Subrecipients login to the Central Database to report financial and performance data for the following programs: Comprehensive Energy Assistance Program, Community Services Block Grant, Disaster Recovery programs, Emergency Shelters Grants Program, HOME, Housing Trust Fund, and Weatherization Assistance Program. Development owners and on-site managers also access the Central Database to submit required compliance reports, such as the Housing Sponsor Report and Unit Status Report, for multifamily programs.

The Department is currently making major enhancements to Central Database systems to accommodate new and expanded Recovery Act and Disaster Recovery programs and to provide for online transmission of Recovery Act data to the Office of Management and Budget. In addition to these enhancements, the Department will continue to increase the usability and data sharing capabilities of the database.

A final opportunity for improvement lies in the access to funds the Department has; by having access to so many varied programs and resources, the Department is in a unique position to identify innovations and collaborations and pursue partnerships with private, state or federal entities.

J. In the following chart, provide information regarding your agency's key performance measures included in your appropriations bill pattern, including outcome, input, efficiency, and explanatory measures.

Texas Department of Housing and Community Affairs Exhibit 2: Key Performance Measures - Fiscal Year 2008			
Key Performance Measures	FY 2008 Target	FY 2008 Actual Performance	FY 2008 % of Annual Target
1.1. Outcomes			
Outcome 1: Percent of Households/Individuals of Very Low, Low, & Moderate Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Asst.	0.91%	0.70%	76.92%
Variance Explanation: For the HOME program, the Department postponed the publication of the 2008 Single Family Notice of Funding Availability (NOFA) due to delayed progress on current awards for owner-occupied housing assistance. The performance target for Section 8 was developed prior to a change in how the U.S. Department of Housing and Urban Development distributes funding. Consequently, the number of Section 8 households served will be below target. The Housing Tax Credit Program is a combination of 4% (multifamily bond-related) and 9% (competitive application cycle) rental development funding. The 4% credits are tied to the bond market which is experiencing a dramatic slowdown nationally due to the recession in the economy.			

Outcome 2: Percent of Households/Individuals of Very Low Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Asst.	0.28%	0.25%	89.29%
Variance Explanation: For the HOME program, the Department postponed the publication of the 2008 Single Family Notice of Funding Availability (NOFA) due to delayed progress on current awards for owner-occupied housing assistance. The performance target for Section 8 was developed prior to a change in how the U.S. Department of Housing and Urban Development distributes funding. Consequently, the number of Section 8 households served will be below target. The Housing Tax Credit Program is a combination of 4% (multifamily bond-related) and 9% (competitive application cycle) rental development funding. The 4% credits are tied to the bond market which is experiencing a dramatic slowdown nationally due to the recession in the economy.			
Outcome 3: Percent of Households/Individuals of Low Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Asst.	3.15%	2.29%	72.70%
Variance Explanation: For the HOME program, the Department postponed the publication of the 2008 Single Family Notice of Funding Availability (NOFA) due to delayed progress on current awards for owner-occupied housing assistance. The performance target for Section 8 was developed prior to a change in how the U.S. Department of Housing and Urban Development distributes funding. Consequently, the number of Section 8 households served will be below target. The Housing Tax Credit Program is a combination of 4% (multifamily bond-related) and 9% (competitive application cycle) rental development funding. The 4% credits are tied to the bond market which is experiencing a dramatic slowdown nationally due to the recession in the economy.			
Outcome 4: Percent of Households/Individuals of Moderate Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Asst.	0.10%	0.14%	140%
Variance Explanation: Loan originations through the Texas First Time Homebuyer Program were higher than originally anticipated as a result of increased market interest rates. The increased market interest rates generated higher demand for the Department's low-interest rate products.			

1.1.1. Strategy: Provide Mortgage Financing & Homebuyer Assistance through the Single Family Finance Division			
Output 1: Number of Single Family Loans and Mortgage Credit Certificates	2,016	2,034	100.89%
1.1.2. Strategy: Provide Funding through HOME for Affordable Single Family Housing			
Output 1: HOME Single Family Number of Households Served	1,255	935	74.50%
Variance Explanation: Due to the delayed progress on current awards for Owner-Occupied Housing Assistance, the Department postponed its publication of the 2008 Single Family Notice of Funding Availability (NOFA), which includes Owner-Occupied Housing Assistance, Tenant-Based Rental Assistance, and Homebuyer Assistance activities, until the 4th Quarter and anticipates awarding funds in FY 2009.			
1.1.3. Strategy: Provide Funding through the Housing Trust Fund for Affordable Single Family Housing			
Output 1: Housing Trust Fund Single Family Number of Households Served	228	559	249.18%
Variance Explanation: The Department received approximately $5.8 million in appropriations for the Housing Trust Fund for the 2008-2009 biennium. In accordance with the funding plan, the Department allocated new source of funds in the amount of, $1,000,000 for gap financing for the Disaster Recovery effort in Southeast Texas. Additionally, the Department was able to award $1,062,816 from local funds funded by loan repayments and investment earnings. During the second quarter, the Department also released a Homeownership SuperNOFA making available $1,000,000 from the annual appropriation. In June 2008, the Board approved an additional $1,000,000 in Housing Trust Fund loan repayments and investment earnings for the Homeownership SuperNOFA, increasing the total amount available to $2,000,000. The Department was able to exceed the target due to the lower amount of assistance provided per household for the gap financing for Disaster Recovery and Veteran's Housing Assistance programs.			
1.1.4. Strategy: Provide Section 8 Tenant-Based Rental Assistance (TBRA)			
Output 1: Section 8 TBRA Number of Households Served	1,494	1,036	69.34%
Variance Explanation: The targeted measure of 1,494 vouchers was developed when the U.S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on a specified number of vouchers. The methodology for the allocation of HAP funds has changed and the Department no longer receives funds based on a specified number of vouchers but rather receives a set amount of funding that limits the number of households served to approximately 1,100 a year. Consequently, the number of households served will be below target.			
1.1.5. Strategy: Provide Financing through the Housing Tax Credit (HTC) Program			
Output 1: Multifamily Finance (HTC) Number of Households Served	12,261	10,076	82.18%

Variance Explanation: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% (competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. The 4% credits are tied to the bond market which is experiencing a dramatic slowdown nationally due to the recession in the economy.			
1.1.6. Strategy: Provide Funding through HOME for Affordable Multifamily Housing			
Output 1: HOME Multifamily Number of Households Served	500	585	132.60%
Variance Explanation: The Department has made HOME funds available for this activity since October 2007 and awarded twenty awards in conjunction with the Housing Tax Credit awards at the July 31, 2008 board meeting. Additional HOME funds that were deobligated from single family activities were made available for this strategy. This allowed the Department to maintain a continuous, open-cycle NOFA and facilitated the timely commitment and expenditure of HOME funds in accordance with federal requirements.			
1.1.8. Strategy: Provide Financing through the Multifamily MRB Program			
Output 1: Multifamily MRB Program Number of Households Served	2,393	878	36.69%
Variance Explanation: This measure is tied to the bond market which is experiencing a dramatic slowdown nationally. Economic conditions in the equity markets have made it very difficult for developers to present financially feasible applications to the Department.			
2.1.1. Strategy: Provide Info. to the Public & Provide Tech. Asst. through the Housing Center			
Output 1: Number of Info. & Tech. Asst. Req. Completed	4,900	6,109	124.67%
The number of requests for information and technical assistance varies throughout the year. During this fiscal year, the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.			
2.1.2. Strategy: Provide Tech. Asst. to Colonias through Office of Colonia Initiatives Field Offices			
Output 1: Number of On-site Tech. Asst. Visits Conducted Annually from the Colonias Field Offices	800	904	113%
Variance Explanation: As the Department continues to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program OCI Field Staff continues to provide technical assistance to units of local governments and nonprofit organizations. The Texas Bootstrap Loan Program Reservation System has necessitated increased technical assistance. In addition, technical assistance visits have increased for the Colonia Self-Help Program due to environmental assessments and other related federal regulations.			
3.1.1. Strategy: Administer Homeless & Poverty-Related Funds through a Network of Community Action Agencies & Other Local Organizations			
Output 1: Number of Persons Assisted through Homeless & Poverty-Related Funds	512,244	539,436	105.31%

Variance Explanation: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds. Additionally, funding for the ESGP program was higher than anticipated when the measures were set.			
Output 2: Number of Persons Assisted that Achieve Incomes Above Poverty Level	2,200	3,024	137.45%
Variance Explanation: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG subrecipients will assist more persons to transition out of poverty.			
Output 3: Number of Shelters Assisted	73	78	106.85%
Variance Explanation: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.			
Outcome 1: Percent of Persons in Poverty that Received Homeless & Poverty-Related Asst.	12.32%	12.93%	98.79%
3.2.1. Strategy: Administer the State Energy Asst. Programs by Providing Grants to Local Organizations for Energy-Related Improvements			
Output 1: Number of Households Assisted through the Comprehensive Energy Asst. Program	51,502	49,833	96.76%
Output 2: Number of Units Weatherized by the Department	3,004	4,000	133.16%
Variance Explanation: Additional one-time funding for the program enabled the weatherization subrecipients to exceed their quarterly and annual targets for assistance.			
Outcome 1: Percent of Very Low Income Households Receiving Energy Asst.	4.12%	4.07%	98.79%
4.1.1. Strategy: To Monitor & Inspect for Federal & State Housing Program Requirements			
Output 3: Number of On-site Reviews	915	1,046	114.32%
Variance Explanation: There were more on-site reviews scheduled for the fiscal year than originally anticipated when the annual performance measure targets were set.			

4.1.2. Strategy: To Administer & Monitor Federal & State Subrecipient Contracts for Programmatic & Fiscal Requirements			
Output 1: Number of Monitoring Reviews Conducted	12,715	8,735	68.70%
Variance Explanation: During the reporting period, there were fewer new contracts which would result in contract administration activity. Additionally, a significant number of contracts have been deobligated within the past three reporting periods which has resulted in decreased pipeline activity. The numbers reported reflect activity on contracts pending from the previous years. The Department has released the 2008 HOME Single Family NOFA during the 4th quarter and anticipates an increase in the activities reported during the first quarter of FY 2009.			
5.1.1. Strategy: Provide Titling & Licensing Services in a Timely & Efficient Manner			
Output 1: Number of Manufactured Housing Titles Issued	90,000	62,384	69.32%
Variance Explanation: The measure is under the projected total because there were fewer applications received and there was an increase in incomplete applications that cannot be processed until the required information is received by the Department. The increase in incomplete applications is due to many sellers being unaware of the new requirement in §1201.206(g) of the Standards Act that became effective on 1/01/2008, which requires a seller to file a statement from the tax assessor-collector that no taxes are due on used homes sold that are not in a retailer's inventory. To educate the public and tax offices the Department posted notice of the requirement on the Department's website and mailed a notice letter in January 2008 to all tax assessor-collectors.			
Output 2: Number of Licenses Issued	4,000	3,601	90.03%
Variance Explanation: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.			
5.2.1. Strategy: Conduct Installation Inspections of Manufactured Homes in a Timely & Efficient Manner			
Output 1: Number of Routine Installation Inspections Conducted	6,000	3,632	60.53%
Variance Explanation: Although the measure is below the targeted number, the Department is meeting the program's statutory requirements to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 26%.			
Explanatory 1: Number of Installation Reports Received	20,000	13,984	69.92%
Variance Explanation: Performance is under the targeted projection due to receiving fewer installation reports than originally anticipated.			
5.3.1. Strategy: Process Complaints/Conduct Investigations/Take Administrative Actions			
Output 1: Number of Complaints Resolved	1,250	803	64.24%
Variance Explanation: The Department has received fewer complaints than expected, resulting in fewer complaints resolved.			

Efficiency 2: Avg. Time for Complaint Resolution	180	128.5	71.39%
Variance Explanation: The average time for complaint resolution is under target, which is desirable.			
Explanatory 1: Number of Jurisdictional Complaints Received	1,200	731	60.92%
Variance Explanation: The Department has received fewer complaints than originally expected.			
5.1.1 Outcomes			
Outcome 2: Percent of Consumer Complaint Inspections Conducted within 30 Days of Request	100%	100%	100%
Outcome 3: Percent of Complaints Resulting in Disciplinary Action	15%	12.08%	80.53%
Variance Explanation: The Department is under the projected target, which is desirable.			

III. HISTORY AND MAJOR EVENTS

Provide a timeline of your agency's history and key events, including:

- the date your agency was established;
- the original purpose and responsibilities of your agency;
- major changes in responsibilities or statutory authority;
- changes to your policymaking body's name or composition;
- significant changes in state/federal legislation, mandates, or funding;
- significant state/federal litigation that specifically affects your agency's operations; and
- key changes in your agency's organization.

Date Established, Original Purpose and Responsibilities.

The 72nd Texas Legislature created the Texas Department of Housing and Community Affairs through passage of SB 546, effective September 1, 1991. SB 546 merged the Texas Housing Agency, a quasi-state agency charged with administration of housing finance programs, with the Texas Department of Community Affairs, which administered poverty programs. SB 546 also established the Housing Trust Fund and authorized the agency to administer the new HOME Investment Partnerships Program. Other legislation passed that same session transferred additional programs, including the Texas Community Development Program and the Low Income Home Energy Assistance Program, to the new agency.

The Legislature established TDHCA in order to assist local governments overcome financial, social and environmental needs; address low and moderate income housing needs; contribute to the preservation of neighborhoods and communities; assist in coordinating state and federal programs affecting local government; and inform the state and the public regarding the needs of local government.

Programs placed with the new agency by the 72nd Legislature were as follows:

Texas Housing Agency Programs
Housing Tax Credit Program (federal)
Multifamily Bond Program (federal)
First-Time Homebuyer Bond Program (federal)

Texas Department of Community Affairs Programs
Section 8 Housing Assistance Payments Program (federal)
Community Services Block Grant (federal)
Community Food and Nutrition Program (federal)*
Emergency Community Services Homeless Grant Program (federal)*
Emergency Shelter Grants Program (federal)
Permanent Housing for Handicapped Homeless Persons Program (federal)*
Weatherization Assistance Program (federal)
Energy Crisis Program (federal. LIHEAP funded)
Local Government Services Program (state)*

Programs transferred from other agencies
Texas Community Development Program (federal)*
Utility Assistance Program (federal. LIHEAP funded)
Emergency Nutrition/Temporary Emergency Relief Program (state)*

New Programs
Housing Trust Fund (state)
HOME Investment Partnerships Program (federal)

**These programs are no longer active or have been transferred from TDHCA*

By creating the Department, the Legislature intended to enhance the state's ability to serve the needs of low income Texans and local government, especially as related to housing assistance to low income households. Programs administered established a virtual continuum of care, from the funding of homeless shelters and to the provision of homebuyer assistance.

<u>Major changes in responsibilities or statutory authority</u>.

In 1995, the 74th Texas Legislature transferred regulation of the manufactured housing industry from the Department of Licensing and Regulation to TDHCA.

In 2001, HB 7, 77th Texas Legislature, transferred the federal Texas Community Development Program and the state-funded Local Government Services Division to the newly created Office of Rural Community Affairs. Also that session, SB 322, TDHCA's sunset legislation, provided for a separate governing board and executive director for the Manufactured Housing Division; the new Division was to be administratively attached to TDHCA.

Since 2005, when Texas helped shelter Hurricane Katrina evacuees fleeing Louisiana and then was itself devastated by Hurricane Rita, the Governor assigned TDHCA a significantly larger role in the state's disaster recovery effort, administering funds appropriated by Congress to meet needs created by Hurricanes Katrina, Rita, Dolly and Ike.

<u>Significant changes in state/federal legislation, mandates, or funding</u>.

In 2001, the 77th Texas Legislature passed SB 322, TDHCA's sunset legislation. In addition to changes previously noted, the legislation made significant changes to board meeting requirements and the allocation of housing tax credits and other resources. The bill extended TDHCA for two years.

In 2003, the 78th Texas Legislature passed SB 264, TDHCA's sunset legislation, which extended the agency to 2011. Other changes enacted through the bill included the establishment of funding priorities for rural and urban/exurban areas in each region.

In 2005 and 2006, Governor Perry designated TDHCA, in conjunction with the Texas Department of Rural Affairs, to administer over $500 million in Community Development Block Grant funds allocated to assist the state recovery from the impact of Hurricanes Rita and Katrina, significantly increasing the agency role in state disaster recovery efforts.

In 2008 and 2009, the federal government provided over $2 billion to the state for disaster recovery related to Hurricanes Ike, Dolly, and Gustav. While TDRA is the lead agency for these funds, TDHCA will administer housing-related funds.

As a result of the passage of the Housing and Economic Recovery Act of 2008 and the American Recovery and Reinvestment Act of 2009 by Congress, TDHCA is currently administering over $800 million in additional federal funds. While most of these funds are in support of existing programs, some flow through new programs such as the Homelessness Prevention and Rapid Re-Housing Program and the Neighborhood Stabilization Program.

In 2009 the Texas Legislature increased appropriations for the Housing Trust Fund to approximately $20 million per biennium and provided $20 million over the biennium for homeless services in the state's eight largest cities.

Key changes in organization.

In 2003, TDHCA undertook a substantial reorganization, integrating programs and cross-program functions. This reorganization was undertaken with assistance of the State Auditor's Office.

In 2005, TDHCA established the Disaster Recovery Division to administer funds appropriated by Congress to help the state recover from Hurricanes Katrina and Ike. TDHCA planned to disband the Division when the funds had been largely expended.

In 2009, in response to the significant funding increases generated from the federal stimulus and Disaster Recovery funds, the Department reorganized once again. In order to capitalize on efficiencies and streamline internal processes. TDHCA created a new Program Services Division to allow for internal servicing of activities related to federally funded contracts, formalized the Emergency Housing & Disaster Recovery Division to position the Department strategically for emergency response, and divided the single "programs" division into housing-based programs and community based programs, which leveraged valuable housing experience toward the administration of stimulus-funded housing programs including an Office of ARRA Accountability and Oversight.

IV. POLICYMAKING STRUCTURE

A. Complete the following chart providing information on your policymaking body members.

Texas Department of Housing and Community Affairs Exhibit 3: Policymaking Body			
Member Name	Term/Appointment Dates/Appointed by (e.g., Governor, Lt. Governor, Speaker)	Qualification	City
C. Kent Conine	Appointed by Governor Perry on 2/10/1997 for a term to expire 1/31/2003. Reappointed 11/4/2003 for a term to expire 1/31/2009. Appointed Chair on 1/11/2008 Reappointed 3/13/2009 for term to expire 1/31/2015.	Public Member	Dallas
Gloria Ray	Appointed by Governor Perry on 9/20/2006 for a term to expire on 1/31/2011.	Public Member	San Antonio
Dr. Juan Sanchez Muñoz	Appointed by Governor Perry on 12/6/2007 for a term to expire 1/31/2011.	Public Member	Lubbock
Tom H. Gann	Appointed by Governor Perry on 3/13/2009 for a term to expire 1/31/2015.	Public Member	Lufkin
Leslie Bingham-Escareño	Appointed by Governor Perry on 1/15/2008 for a term to expire 1/31/2013.	Public Member	Brownsville
Lowell A. Keig	Appointed by Governor Perry on 8/26/2009 for a term to expire 1/31/2013.	Public Member	Austin

Note: The Department has a seven member Board. One of those seats is vacant.

B. Describe the primary role and responsibilities of your policymaking body.

The governing board of the agency provides general oversight and policy direction to the agency. It does this through a number of specific activities including the approval of:

a. adoption of plan documents that govern the agency's activities, including the state low income housing plan;
b. awards of program funds;
c. issuance of notices of funds availability;
d. the allocation and award of low income housing tax credits;
e. the inducement and issuance of bond indebtedness;
f. the review and approval of operating budgets, legislative appropriations requests, and strategic plans;
g. the review and adoption of rules and policies including the qualified allocation plan; and
h. the consideration of public input on any and all aspects of the agency's programs and operations.

C. How is the chair selected?

The chair is appointed by the Governor from the membership of the governing board.

D. List any special circumstances or unique features about your policymaking body or its responsibilities.

The awarding of agency-administered funds involves complex federal programs, including the low income housing tax credit program in adherence to the state's qualified allocation plan. Members of the governing board are required to become familiar with many of the details of these programs. Board members must also have a firm knowledge of detailed housing finance issues as well as local issues which play significant roles in development in all regions of the state. Matters involving various stakeholder groups also require that board members develop insight regarding the priorities of these groups while maintaining the perspective of service to all Texans and adherence to the law.

E. In general, how often does your policymaking body meet? How many times did it meet in FY 2008? In FY 2009?

The governing board of the agency meets approximately monthly, with two meetings in July. In FY 2008 the governing board met twelve times, and they are scheduled to meet twelve times in FY 2009.

F. What type of training do members of your agency's policymaking body receive?

As provided for in Texas Government Code, Chapter 2306, a new member of the governing board receives the following training:

Sec. 2306.028. TRAINING.

- (a) A person who is appointed to and qualifies for office as a member of the board may not vote, deliberate, or be counted as a member in attendance at a meeting of the board until the person completes a training program that complies with this section.
- (b) The training program must provide the person with information regarding:
  - (1) the legislation that created the department and the board;
  - (2) the programs operated by the department;
  - (3) the role and functions of the department;
  - (4) the rules of the department, with an emphasis on the rules that relate to disciplinary and investigatory authority;
  - (5) the current budget for the department;
  - (6) the results of the most recent formal audit of the department;
  - (7) the requirements of:
    - (A) the open meetings law, Chapter 551;
    - (B) the public information law, Chapter 552;
    - (C) the administrative procedure law, Chapter 2001; and
    - (D) other laws relating to public officials, including conflict-of-interest laws;
  - (8) the requirements of:
    - (A) state and federal fair housing laws, including Chapter 301, Property Code, Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §3601 et seq.), and the Fair Housing Amendments Act of 1988 (42 U.S.C. §§3601 et seq.);
    - (B) the Civil Rights Act of 1964 (42 U.S.C. §§2000a et seq.);
    - (C) the Americans with Disabilities Act of 1990 (42 U.S.C. §§12101 et seq.); and
    - (D) the Rehabilitation Act of 1973 (29 U.S.C. §§701 et seq.); and
  - (9) any applicable ethics policies adopted by the department or the Texas Ethics Commission.

The materials are compiled by the agency's General Counsel, and the training is provided by the Executive Director, the General Counsel, the Director of Internal Audit, and other appropriate members of management.

Due to the voluminous and highly technical nature of the materials presented to the governing board, additional training is held in conjunction with a new member's first several board meetings. Staff provides additional training on key topics that require refreshing, including ethics.

G. Does your agency have policies that describe the respective roles of the policymaking body and agency staff in running the agency? If so, describe these policies.

Yes. Consistent with Texas Government Code, Chapter 2306, the governing board exercises policy-making functions and the executive director and staff carry out management activities. (*Please refer to **Exhibit IV-G** for copy of governing board resolution number 02-056.)*

H. What information is regularly presented to your policymaking body to keep them informed of your agency's performance?

The governing board's primary focus is on overseeing the administration of large and complex programs; as such each time the governing board is asked to consider any program awards, it is provided with a detailed presentation that provides information about the specific award and about the status of the relevant program some of which is required by statute. The governing board is usually asked to provide policy direction in connection with the offering of program funds, done chiefly through the issuance of notices of funds availability ("NOFAs"). As NOFAs are presented for approval, the governing board is provided with updated information about the sources of funds and levels of activity. Levels of activity are described in terms of key benchmarks, chiefly commitment and expenditure rates and persons/households served.

The governing board receives management proposals and supporting information to consider and take action on annual operating budgets, legislative appropriation requests, strategic plans, consolidated programmatic plans, and the state low income housing plan. The governing board receives quarterly investment reports.

At each meeting the Board receives reports on the status of CDBG disaster recovery programs and programs under the American Recovery and Reinvestment Act of 2009. The governing board generally meets monthly and is able to direct management to provide additional reports as deemed necessary.

I. How does your policymaking body obtain input from the public regarding issues under the jurisdiction of the agency? How is this input incorporated into the operations of your agency?

The Department is committed to an open and transparent process in the administration of all programs and funds. The Department encourages public participation during every stage of program planning and implementation. Prior to the development of plans, rules or Notices of Funding Availability (NOFAs), especially for new programs, the Department hosts roundtables and public input sessions to discuss the program with potential applicants and stakeholders. Notices of the roundtables are sent to the Department's email list and posted on the Department's website. Staff considers all input from the roundtables and public input sessions.

In general, draft program rules and planning documents are approved by the Department's Board for a formal public comment period before final consideration and approval. In accordance with statute, all Department rule changes are published in the *Texas Register* in accordance with the Administrative Procedures Act. During the public comment period, both oral and written public input is welcomed. Staff summarizes all formal public comment and provides written responses indicating staff recommendations on proposed changes or rationale for not recommending changes. The public comment summaries and reasoned responses are presented to the Board during final consideration of the plans and rules.

The establishment of policies, plans and awards, and other matters to be considered and acted upon, by the TDHCA Board are posted, along with staff recommendations, to the Department's website at least three days before the Board meeting. The agenda is posted s required by the Open Meetings laws a week in advance. Public comment is accepted at all Board meetings at the beginning of the agenda and when the item is under consideration by the Board.

Throughout the year, the Department accepts oral and written comments and suggestions from the public on all of its programs. Public comment may be received at, but not limited to, Board of Directors meetings, various Department-sponsored or attended informational workshops, individual program and publication public comment periods and hearings, and application and implementation workshops.

J. If your policymaking body uses subcommittees or advisory committees to carry out its duties, fill in the following chart.

Texas Department of Housing and Community Affairs Exhibit 4: Subcommittees and Advisory Committees			
Name of Subcommittee or Advisory Committee	Size/Composition/How are members appointed?	Purpose/Duties	Legal Basis for Committee
Audit Committee	Generally three (3) members; the Audit Committee membership is appointed by presiding officer of the Governing Board from the board's membership.	*See Audit Committee Resolution 09-28, Exhibit IV.J-4a.*	Tex. Gov't. Code, §2306.056 (*See Exhibit IV.J-4f*)
Colonia Initiatives Advisory Committee (CIAC)	Seven members appointed by the Governor: one colonia resident; one representative of a non-profit that serves colonia residents; one representative of a political subdivision that contains all or part of a colonia; one person to represent private interests in banking or land development; one representative of a nonprofit utility; one representative of an engineering consultant firm involved in economically distressed areas programs projects under Subchapter K, Chapter 17, Tex. Water Code; and one public member.	*No members have ever been appointed, and therefore, this committee has never functioned.* To review the progress of colonia water and wastewater infrastructure projects managed by the Texas Water Development Board and the state agency responsible for administering the portion of the federal community development block grant non-entitlement program that addresses the infrastructure needs of colonias.	Tex. Gov't. Code, §2306.590 (*See Exhibit IV.J-4b)*

Texas Department of Housing and Community Affairs Exhibit 4: Subcommittees and Advisory Committees (continued)			
Name of Subcommittee or Advisory Committee	**Size/Composition/How are members appointed?**	**Purpose/Duties**	**Legal Basis for Committee**
Colonia Resident Advisory Committee (C-RAC)	Five members appointed by the Governing Board, who are residents of colonias to serve on the C-RAC. The C-RAC is composed of two (2) persons (Primary and Secondary members) for each county designated to have a Colonia Self-Help Center. A total of eight (8) counties are served through the Colonia Self-Help Center Program.	The C-RAC is required to advise the Department's Governing Board and evaluate the needs of colonia residents, review programs that are proposed or operated through the Colonia Self-Help Centers and activities that may be undertaken through the Colonia Self-Help Centers to better serve the needs of colonia residents. The C-RAC is required to meet 30 days before a contract is scheduled to be awarded by the Department's Governing Board and may meet at other times.	Tex. Gov't. Code, §2306.584 (*See Exhibit IV.J-4e*)
Executive Award and Review Advisory Committee (EARAC)	16 members, some directed by statute and others appointed by the Executive Director, includes representatives from the underwriting and compliance functions and from the divisions responsible for administering federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. §§12701, et seq.) and for administering low income housing tax credits.	To make recommendations to the board regarding funding and allocation decisions. The voting members of the Committee include: the Executive Director, the Chief of Staff, the Deputy Executive Directors of Programs (Housing and Community Based); the Chief of Agency Administration; the Chief of Compliance and Asset Oversight, the Director of Multifamily Finance Production; the Director of the Texas Homeownership Program; the Director of Community Affairs; The Director of the HOME Program; the NSP and HTF Managers; the Director of Real Estate Analysis; the Director of Office of Colonia Initiatives; the Director of Policy and Public Affairs; and the Director of Bond Finance.	Tex. Gov't. Code §2306.1112 (*See Exhibit IV.J-4c and Exhibit IV.J-4d)*

* *Please refer to* ***Exhibit IV.J_All Exhibits*** *for copies of: IV.Ja_Audit_Committee_Resolution_09-28; IV.Jb_2306.590_OCI_Advisory_Committee; IV.Jc_EARAC SOP; IV.Jd_2306.1112; IV.Je_2306.584_2306.585; IV.Jf_2306.056*

V. FUNDING

A. Provide a brief description of your agency's funding.

The Texas Department of Housing and Community Affairs is funded through a combination of general revenue funds, federal funds, and other funds including: appropriated receipts and interagency contracts.

The figure below depicts the major funding sources appropriated to the Department for the *2008-2009* biennium under HB 1, 80th Texas Legislature, Regular Session (General Appropriations Act).

	2008	2009
Article VII		
General Revenue Fund	$ 7,219,287	$ 7,262,372
Community Affairs Federal Fund No. 127	128,733,144	128,697,779
Appropriated Receipts	16,586,560	16,787,596
Interagency Contracts	68,255	68,255
Total Method of Financing	$ 152,607,246	$152,816,002
Other Direct and Indirect Costs Appropriated Elsewhere in this Act	$ 903,280	$ 947,807

The above includes approximately $5.8 per year in General Revenue in support of the Housing Trust Fund. Bond proceeds and tax credits issued through TDHCA programs do not flow through the Department's budget and therefore are not reflected in the bill pattern. Information on these is included in *Section VII, Guide to Agency Programs.*

The figure below depicts the major funding sources appropriated to the Department for the *2010-2011* biennium under SB 1, 81st Texas Legislature, Regular Session (General Appropriations Act).

	2010	2011
Article VII		
General Revenue Fund	22,377,856	22,377,856
Community Affairs Federal Fund No. 127	132,646,833	132,676,861
Appropriated Receipts	16,346,832	16,506,657
Interagency Contracts	68,255	68,255
Total Method of Financing	$ 171,439,776	$ 171,629,629
Article XII		
Federal American Recovery and Reinvestment Fund	$565,075,732	
Other Direct and Indirect Costs Appropriated Elsewhere in this Act	$1,017,780	$1,096,188

The above includes approximately $10.9 million per year in General Revenue in support of the Housing Trust Fund and $10 million per year in General Revenue to fund homelessness initiatives in the state's eight largest cities. TDHCA also received appropriation authority for 2009 federal stimulus funds. *Additional information on stimulus funding can be found in Section VII, Guide to Agency Programs* under "New Programs." Bond proceeds and tax credits issued through TDHCA programs do not flow through the Department's budget and therefore are not reflected in the bill pattern. *Information on these is included in Section VII, Guide to Agency Programs*.

B. List all riders that significantly impact your agency's budget.

SB 1, 81st Leg., Art. VII Rider 4. **Appropriations Limited to Revenue Collections.** Fees, fines, and other miscellaneous revenues as authorized and generated by the agency shall cover, at a minimum, the cost of the appropriations made above for the strategy items in Goal E, Manufactured Housing, the cost of the appropriations required for manufactured housing consumer claims payments according to the Occupations Code §1201, Manufactured Housing Standards Act, as well as the "other direct and indirect costs" associated with this goal, appropriated elsewhere in this Act. "Other direct and indirect costs" for Goal E, Manufactured Housing, are estimated to be $1,017,780 for fiscal year 2010 and $1,096,188 for fiscal year 2011. In the event that actual and/or projected revenue collections are insufficient to offset the costs identified by this provision, the Legislative Budget Board may direct that the Comptroller of Public Accounts reduce the appropriation authority provided above to be within the amount of revenue expected to be available.

SB 1, 81st Leg., Art. VII Rider 5. **Housing Assistance.** To the extent allowed by state and federal program guidelines the department shall adopt an annual goal to apply no less than $30,000,000 of the funds available from the Housing Trust Fund, HOME Program, Section 8 Program, and Housing Tax-Credit Program's total housing funds toward housing assistance for individuals and families earning less than 30% of the Area Median Family Income (AMFI). No less than 20% of the funds available from the Housing Trust Fund, HOME Program, Section 8 Program, and Housing Tax-Credit Program shall be spent for individuals and families earning between 31% and 60% of the area median family income. To the extent allowed by state and federal program guidelines in those counties where the area median family income is lower than the state average median family income, the department shall use the average state median income in interpreting this rider. The department shall provide an annual report to the Legislative Budget Board documenting its expenditures in each income category.

SB 1, 81st Leg., Art. VII Rider 6. **Conversions of Executory Contracts.**

a. Out of the funds appropriated above, the department shall spend not less than $4,000,000 for the biennium for the sole purpose of contract for deed conversions for families that reside in a colonia and earn 60% or less of the applicable area median family income. It is the intent of the Legislature that the department shall make a good-faith effort to complete at least 200 contract for deed conversions by August 31, 2011.

b. The Department of Housing and Community Affairs shall provide a quarterly report to the Legislative Budget Board detailing the number of, and cost for each, contract for deed conversion completed.

SB 1, 81st Leg., Art. VII Rider 7. **Bond Refinancing.** The department shall transfer any funds acquired through refinancing of bonds to the Housing Trust Fund. The first $3,000,000 each fiscal year in savings from the refinancing of any bonds shall be used to fund mortgage loans under the Bootstrap Self-Help Housing Loan Program.

SB 1, 81st Leg., Art. VII Rider 8. **Colonia Set-Aside Program Allocation.** The Office of Rural Community Affairs (Texas Department of Rural Affairs as of September 1, 2009) shall allocate 2.5% of the yearly allocation of Community Development Block Grant (CDBG) monies to support the operation of the Colonia Self-Help Centers and shall transfer such funds to the Department of Housing and Community Affairs on September 1 each year of the biennium.

Consistent with federal rules and regulations, the funds provided from TDRA to the Colonia Self-Help Center in El Paso county shall be used to provide internet access and training for parents and their children attending elementary schools in colonias, to establish technology centers within those elementary school libraries, to purchase wireless devices and laptop computers to loan out from the technology centers, and improve internet access for students and parents.

SB 1, 81st Leg., Art. VII Rider 9. Appropriation: Housing Trust Fund Interest Earnings and Loan Repayments. Interest earnings and loan repayments received from loans made through the Housing Trust Fund program from the General Revenue Fund are included above in Strategy A.1.3, Housing Trust Fund - Single Family, estimated to be $1,000,000 each year.

SB 1, 81st Leg., Art. VII Rider 10. Housing Trust Fund Deposits to the Texas Treasury Safekeeping Trust Company.

a. Out of funds appropriated above in Strategy A.1.3, Housing Trust Fund - Single Family, all funds above those retained for administrative purposes in fiscal year 2010 and fiscal year 2011 shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Texas Government Code, Chapter 2306, at the beginning of each fiscal year. The amounts to be transferred in fiscal years 2010 and 2011 include an estimated $1,000,000 in each fiscal year from interest earnings and loan repayments received, identified above in Rider 9, Appropriation: Housing Trust Fund Interest Earnings and Loan Repayments.
b. Out of funds appropriated above in Strategy A.1.7, Housing Trust Fund - Multifamily, all funds above those retained for administrative purposes in fiscal year 2010 and fiscal year 2011 shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Texas Government Code, Chapter 2306, at the beginning of each fiscal year.
c. Interest earnings and loan repayments received from loans made through the Housing Trust Fund program from the General Revenue Fund shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Texas Government Code, Chapter 2306, for the same purpose.
d. The Department of Housing and Community Affairs shall provide an annual report to the Legislative Budget Board, the House Appropriations Committee, and the Senate Finance Committee no later than October 1 detailing the agency's plan to expend funds from the Housing Trust Fund during the current fiscal year.
e. Notwithstanding limitations on appropriation transfers contained in the General Provisions of this Act, the Department of Housing and Community Affairs is hereby authorized to direct agency resources and transfer such amounts appropriated above, in excess of $3,000,000 set aside for the Owner-Builder (Bootstrap) Loan Program established under Texas Government Code, Chapter 2306, between Strategy A.1.3, Housing Trust Fund - Single Family and Strategy A.1.7, Housing Trust Fund - Multifamily. Prior to the agency making any transfers between these two strategies, they shall notify the Legislative Budget Board, and the Office of the Governor on the amounts being transferred and the reason for transferring funds between strategies.
f. Out of funds appropriated above in Strategy A.1.3, Housing Trust Fund - Single Family and Strategy A.1.7, Housing Trust Fund - Multifamily, all funds above those retained for administrative purposes in fiscal year 2010 and fiscal year 2011 and above amounts required in Sections (a) and (b) of this rider, shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Texas Government Code, Chapter 2306, no later than October 1 of each fiscal year.
g. At the end of each fiscal year, any unexpended administrative balances appropriated under Strategy A.1.3, Housing Trust Funds - Single Family and A.1.7, Housing Trust Fund - Multifamily shall be transferred to the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Texas Government Code, Chapter 2306.

SB 1, 81st Leg., Art. VII Rider 11. Mortgage Revenue Bond Program. The Department of Housing and Community Affairs shall operate the First-Time Homebuyer Mortgage Revenue Bond Program in a manner that maximizes the creation of very low-income single family housing by ensuring that at least 30% of the lendable bond proceeds are set aside for a period of one year for individuals and families at 80% and below the area median family income (AMFI), while assuring the highest reasonable bond rating. In an effort to facilitate the origination of single family mortgage loans to individuals and families at 80% and below the AMFI, the department shall utilize down payment and closing cost assistance or other assistance methods.

SB 1, 81st Leg., Art. VII Rider 12. Additional Appropriated Receipts.

a. Except during an emergency as defined by the Governor, no appropriation of appropriated receipts in addition to the estimated amounts above may be expended by the Department of Housing and Community Affairs unless:
   (1) the department's governing board files a finding of fact along with a written plan outlining the source, use, and projected impact of the funds on performance measures with the Legislative Budget Board and the Governor and indicating that additional appropriations are required to maintain adequate levels of program performance; and,
   (2) neither the Legislative Budget Board nor the Governor issue a written disapproval not later than 10 business days within receipt of the finding of fact and the written plan.

b. This provision does not apply to appropriated receipts included in the amounts appropriated above that are collected under Object Codes 3719 and 3802. Appropriated receipts collected under these revenue object codes are governed under provisions found in Article IX, Sec 8.03 and Article IX, Sec 12.02.

SB 1, 81st Leg., Art. VII Rider 13. Manufactured Homeowner Consumer Claims. Included above in Goal E, Manufactured Housing, the Manufactured Housing Division of the Department of Housing and Community Affairs is appropriated an amount required for the purpose of paying manufactured housing consumer claims from Appropriated Receipts according to the Occupations Code Chapter 1201, Manufactured Housing Standards Act, from Statement of Ownership and Location (SOL) issuance fees involving manufactured housing that are collected during the 2010-11 biennium. No General Revenue is appropriated for the payment of these claims.

SB 1, 81st Leg., Art. VII Rider 15. Affordable Housing Research and Information Program. Out of funds appropriated above in Strategy B.1.1, Housing Resource Center, the Department of Housing and Community Affairs shall conduct the Affordable Housing Research and Information Program with the assistance of the Texas Department of Rural Affairs, to the extent allowed by state law, in order to avoid a duplication of effort. It is the intent of the Legislature that no funds shall be transferred between the Department of Housing and Community Affairs and the Texas Department of Rural Affairs for this purpose.

SB 1, 81st Leg., Art. VII Rider 18. Homeless Housing and Services. Out of funds appropriated above in Strategy C.1.1, Poverty-Related Funds, $10,000,000 in each fiscal year in General Revenue is hereby appropriated to the Department of Housing and Community Affairs (TDHCA) for the purposes of assisting regional urban areas in providing services to homeless individuals and families, including services such as case management, and housing placement and retention. Pursuant to Texas Government Code, §2306.053, funding for this program shall be awarded by TDHCA through a competitive matching grant process whereby the eight largest cities may seek additional funding for this purpose. The agency shall distribute these funds to the eight largest cities with populations larger than 285,500 persons per the latest U.S. Census figures.

SB 1, 81st Leg., Art. VII Rider 19. Financial Assistance for Local Initiatives Regarding the Homeless. It is the intent of the Legislature that the Department of Housing and Community Affairs:
   (1) use funds appropriated to the department under this Act to provide financial assistance to political subdivisions, housing finance corporations, for-profit corporations, and nonprofit organizations to support local initiatives regarding homeless individuals and families; and
   (2) seek any federal funding available for the purpose of providing financial assistance described by subdivision (1).

SB 1, 81st Leg., Art. VII Rider 20. Travel Expenditures. Out of the funds appropriated to the Department of Housing and Community Affairs authorized for out-of-state travel. This limitation shall not apply to out-of-state travel associated with federal programs if the cost of such travel is paid for or reimbursed by the federal government.

Note: Riders found in SB1, 81st Legislature, Article XII, relating to the American Recovery and Reinvestment Act also apply to TDHCA.

C. Show your agency's expenditures by strategy.

Texas Department of Housing and Community Affairs Exhibit 5: Expenditures by Strategy - Fiscal Year 2008 (Actual)		
Goal/Strategy	Expenditures ($)	Contract Expenditures ($)
A. Goal: Affordable Housing:		
A.1.1. MRB Program - Single Family	$1,101,599	
A.1.2. HOME Program - Single Family	29,950,673	23,696
A.1.3. Housing Trust Fund - Single Family	10,896,350	74,305
A.1.4. Section 8 Rental Assistance	6,390,246	8,390

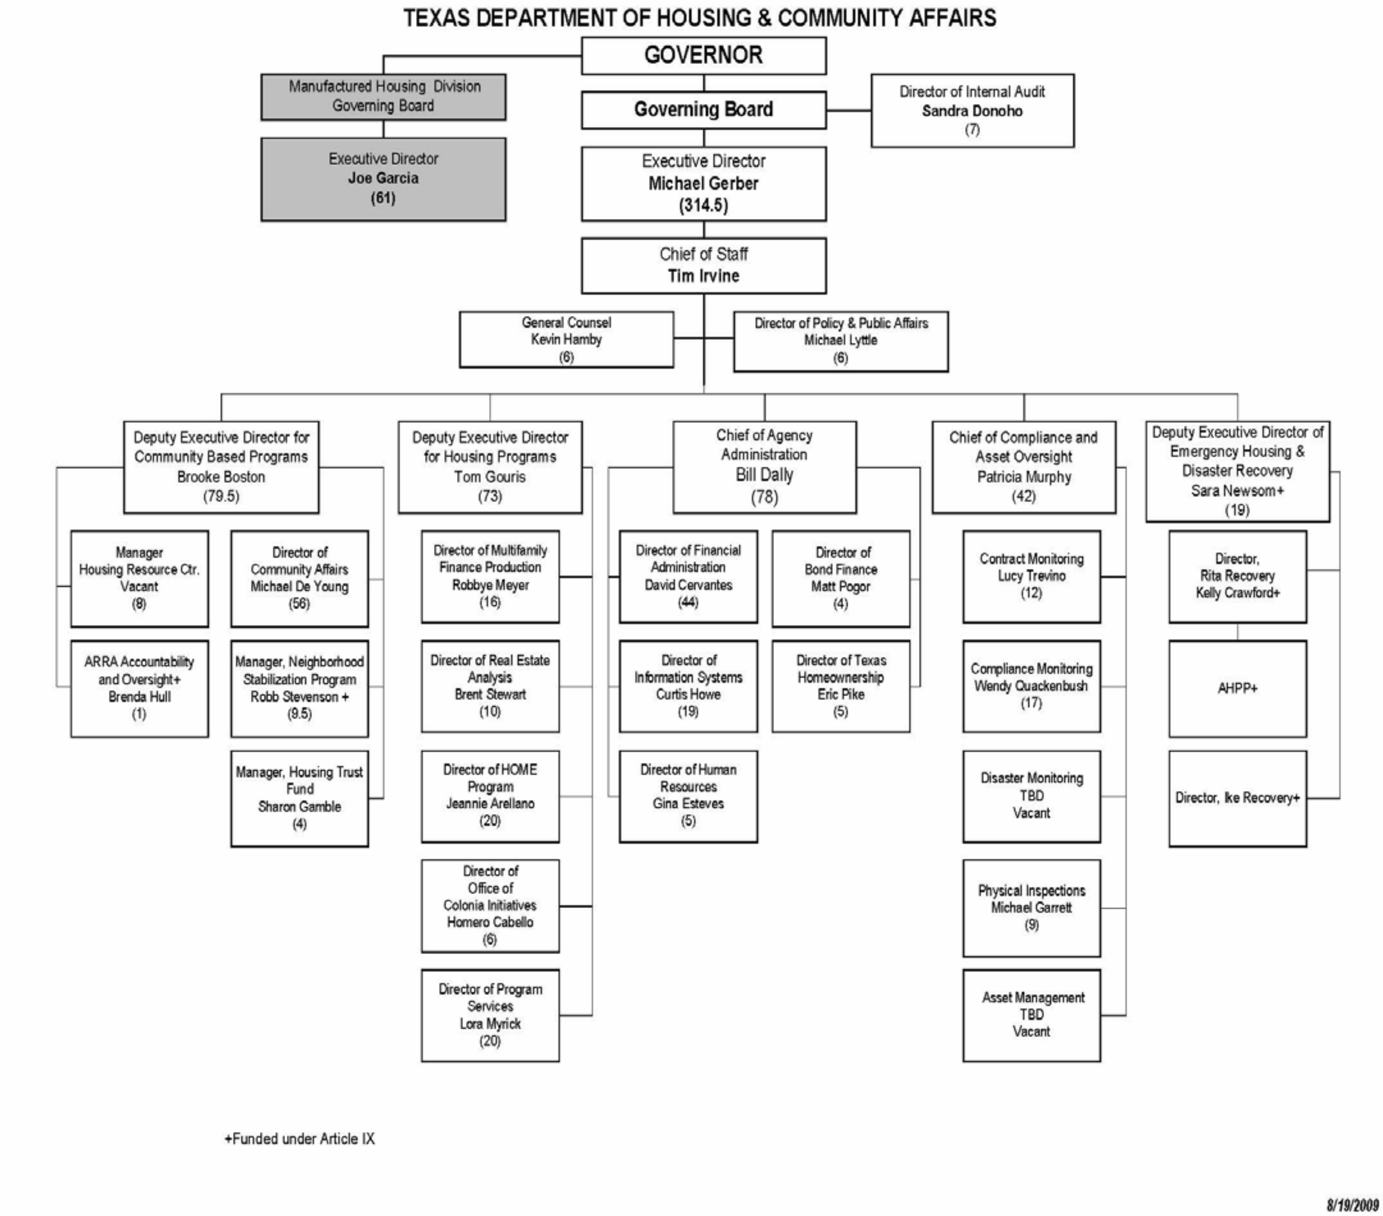
Tax Credit Inspection Fees – QAP §50.20(h)	$750/ development	31	$20,250	(TTSTC)

VI. ORGANIZATION

A. Provide an organizational chart that includes major programs and divisions, and shows the number of FTEs in each program or division.



B. If applicable, fill in the chart below listing field or regional offices.

Texas Department of Housing and Community Affairs Exhibit 10: FTEs by Location - Fiscal Year 2008			
Headquarters, Region, or Field Office	Location	Number of Budgeted FTEs FY 2008	Number of Actual FTEs as of August 31, 2008
Headquarters	Austin, TX	270	259
Office of Colonia Initiatives Field Office	Laredo, TX	1	1
Office of Colonia Initiatives Field Office	Edinburg, TX	1	1
Office of Colonia Initiatives Field Office	El Paso, TX	1	1
Disaster Recovery Field Office	Beaumont, TX	1	1
Disaster Recovery Field Office	Katy, TX	1	1
Manufactured Housing Field Office	Fort Worth, TX	2	2
Manufactured Housing Field Office	Lubbock, TX	3	3
Manufactured Housing Field Office	Tyler, TX	3	3
Manufactured Housing Field Office	Houston, TX	5	5
Manufactured Housing Field Office	Waco, TX	3	3
Manufactured Housing Field Office	San Antonio, TX	5	5
Manufactured Housing Field Office	Edinburg, TX	1	1
Manufactured Housing Field Office	Henrietta, TX	1	1
TOTAL		298	287

C. What are your agency's FTE caps for fiscal years 2008-2011?

FY 2008 – FTE CAP: 298
FY 2009 – FTE CAP: 298
FY 2010 – FTE CAP: 311
FY 2011 – FTE CAP: 311

It should be noted that Article IX notification letters have been submitted to the appropriate oversight agencies for disaster recovery FTEs and will be submitted in the near future for additional disaster recovery and federal stimulus program FTEs.

D. How many temporary or contract employees did your agency have as of August 31, 2008?

As of August 31, 2008, the agency employed five temporary employees. No FTEs counted as contract employees.

E. List each of your agency's key programs or functions, along with expenditures and FTEs by program

Texas Department of Housing and Community Affairs Exhibit 11: List of Program FTEs and Expenditures - Fiscal Year 2008		
Program	FTEs as of Aug 31, 2008	Total
Community Based Programs:		
Community Services Block Grant	11.0	32,649,613
Continuum Care		109,000
Emergency Shelter Grants Program	3.0	5,480,984
Weatherization Assistance Program	4.0	15,109,294
Comprehensive Energy Assistance Program	10.5	47,824,812
Housing Trust Fund	1.0	5,021,292
Bootstrap Loan Program		5,950,953
Section 8	7.0	6,390,246
Housing Resource Center	6.0	475,106
Total, Community Based Program	42.5	119,911,300
Housing Programs:		
Housing Tax Credit Program	8.5	621,967
Multifamily Bond Program	2.0	112,879
HOME Investments Partnership Program	20.0	41,227,889
Real Estate Analysis	9.5	592,513
Office of Colonia Initiatives	7.0	444,493
Total, Housing Programs	47.0	42,999,741
Bond Finance and Homeownership Programs:		
Single Family Bond Finance	10.0	680,581
First Time Homebuyer Program, Mortgage Credit Certificate Program	5.0	421,017
Texas Statewide Homebuyer Education Program	0.0	71,880
Total, Bond Finance and Homeownership Programs	15.0	1,173,478
Compliance:		
Portfolio Management and Compliance	29.0	2,980,558
Emergency Housing and Disaster Recovery:		
Community Development Block Grant Recovery Programs	12.0	423,990,007
FEMA	1.0	15,767,695
Total, Emergency Housing and Disaster Recovery	13.0	439,757,702
Grand Total, Department	146.5	605,922,702

NOTE: FTEs and expenditures identified for each program reflect staff and expenditure expensed to the program, including staff carrying out programmatic functions in other divisions. Loans funded through bond proceeds, mortgage credit certificates, and housing tax credits are not reflected above as these do not pass through the agency's budget. All expenditures are for Fiscal Year 2008 and Appropriation Year 2008 as of July 31 2009.

VII. Guide to Agency Programs

NOTE: FTEs and expenditures identified for each program reflect staff and expenditure expensed to each program, including staff carrying out programmatic functions in other divisions. FTEs and expenditures related to Central Administration are not reflected below. All expenditures are for Fiscal Year 2008 and Appropriation Year 2008, reflecting expenditures against 2008 funds as of July 31 2009. See Exhibit 11 for a summary of this information.

Community Based Programs

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Community Services Block Grant
Location/Division	Community Affairs Division, Community Services Section
Contact Name	Stuart Campbell, Manager of Community Services
Actual Expenditures, FY 2008	$32,649,613
Number of FTEs as of August 31, 2008	11

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Community Services Section administers the Community Services Block Grant (CSBG) Program with funding from the U.S. Department of Health and Human Services (USHHS). The Department's program allocates CSBG funds to forty-eight (48) eligible entities which serve all 254 counties of the State of Texas. An organization must meet the eligibility requirements established by the federal CSBG Act in order to receive an annual CSBG allocation and the Governor must approve any changes to the eligibility designation or service delivery area for the CSBG program. Entities receiving CSBG funds function as "umbrella" organizations which administer a myriad of programs that assist low income families. CSBG funds are used to cover the cost of program administration of CSBG eligible activities and other similar programs and also provides direct services to low-income clients. In addition to providing formula allocations statewide, the Department also reserves funds for organizations to address the needs of special low-income population groups, such as migrant and seasonal farm workers, Native Americans and those affected by disasters. Funds for special population groups and innovative demonstration projects are available on a competitive basis.

1. <u>Key services and functions:</u>
   - <u>Overall function of CSBG Program</u>: To provide for a wide range of services that have a positive and measurable impact on causes of poverty in communities throughout the state.
   - <u>Function of CSBG Demonstration Fund and Special Projects</u>: To support innovative programs and activities by community action agencies and other community based organizations to eliminate poverty, promote self-sufficiency and promote community revitalization.

2. <u>Eligible activities:</u>
   - Funding of administrative support for other community services programs;
   - Funding of services and programs directed at poverty populations. Services may include some or all of the following:
     a) assistance with finding and retaining employment,
     b) providing job training and training in budget and consumer skills,
     c) assistance in obtaining and maintaining adequate housing,

    d) assistance in the form of loans or grants to meet immediate and urgent needs, including the need for health services, nutritious food, housing and employment-related assistance,
    e) the removal of obstacles which block the clients' achievement of self-sufficiency.
- Examples of programs supported by CSBG include Meals-on-Wheels, transportation programs, Comprehensive Energy Assistance Program and Weatherization.

3. Major program activities performed by TDHCA:
- Development of the State Plan and annual reports
- Development of Program Rules and guidance
- Disbursement of funds to eligible entities
- Contract management
- Monitoring
- Training and technical assistance
- Program planning
- Preparation and release of Notice Of Funding Availability for discretionary funds

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

3.1.1. Strategy: Administer Homeless & Poverty-Related Funds through a Network of Community Action Agencies & Other Local Organizations	
Output 1: Number of Persons Assisted through Homeless & Poverty-Related Funds	539,436
Output 2: Number of Persons Assisted that Achieve Incomes Above Poverty Level	3,024
Efficiency 1: Avg. Agency Admin. Cost Per Person Assisted	$2.71
Explanatory 2: Total Number of Persons in Poverty	4,172,890
Outcome 1: Percent of Persons in Poverty that Received Homeless & Poverty-Related Assistance	12.35%
Outcome 3: Percent of Persons Assisted that Achieve Incomes Above Poverty Level	0.08%

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

- The Community Services Block Grant Program (CSBG) began as the Economic Opportunities Act (EOA) of 1964. Originally, the U.S. Department of Health, Education and Welfare administered the national program. The U.S Department of Health and Human Services (HHS) later took over administering this program. In 1981, Congress created CSBG to replace the EOA. CSBG was amended and reauthorized by Congress in 1998 through the Coats Human Services Reauthorization Act of 1998.
- Beginning in 1983, the Texas Department of Community Affairs assumed the responsibility for administering this program in Texas. The Texas Department of Housing and Community Affairs (the Department) now administers the CSBG Program in Texas.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Population served:

- Individuals and families with incomes at or below 125% of the current federal poverty guidelines
- Individuals and families needing assistance due to a natural or man-made disaster
- Migrant/seasonal farm workers
- Native Americans

Requirements/qualifications:

- Effective September 1, 2009, income eligibility has been increased to 200% of the Federal Poverty Income Guidelines during fiscal years 2009 and 2010. Eligibility for services is determined by comparing family income to the poverty income guidelines as provided by the U.S. Department of Health and Human Services.
- Eligible subrecipients must be governed by a tripartite board, with one third of its members elected public officials, at least one third of its members representatives of the poor in the area served, and one third members of business, labor, religious, education or other major groups in the community. The eligible recipient must also serve as an umbrella organization for other services.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Overview:

The Department receives a formula allocation annually from the U.S. Department of Health and Human Services (USHHS) to carry out CSBG program activities. The Department, in turn, distributes CSBG funds through a network of 48 "eligible entities," commonly referred to as community action agencies, or Subrecipients, who provide services to persons in all 254 counties in Texas. Most eligible entities are non-profits or organizations that have delivered CSBG-supported services since the program's inception. Additionally, the Governor has designated four cities, two counties, and three councils of government as eligible entities.

These subrecipients may use CSBG funds for any or all of the eligible activities enumerated in Section B. Subrecipients also use the CSBG funds disbursed by the Department for administrative support for existing programs. For example, CSBG funds can be used to pay the salary of a caseworker who coordinates various programs. Since many of the programs administered by subrecipients have limited administrative funds associated with them, CSBG funds provide administrative support to other programs.

The Department disburses not less than 90% of the Department's annual allocation of CSBG funds on a formula basis. A portion of the remaining funds are reserved for use in demonstration projects and to respond to disasters. TDHCA uses the balance of the funds, not more than 5%, to administer the program. The Department monitors the use of CSBG funds by the subrecipients and adheres to the CSBG Act, which requires that the Department monitor CSBG subrecipients at least once every three years.

Program Administration:

- The State Plan serves as the biennial application for CSBG funds. The Department produces a draft of the State Plan, outlining proposed use and distribution of CSBG funds.

- In accordance with the HHS requirement that the Department solicit public comment on the proposed program administration prior to submitting the State Plan, the Department posts notice of the availability of the State Plan and the schedule of public hearings in the Texas Register and on the Department's website. Hard copies are available upon request.
- Interested parties may submit comment on the posted State Plan by mail, electronically, or in person during the hearings. Based on these comments, the Department will consider making any changes to the State Plan that do not affect the intent of the program.
- As the head of the designated state lead agency for the administration of the CSBG program, the Department's Executive Director is authorized to approve and sign the State Plan. The finalized State Plan must be submitted to the USHHS by September 1 each year.
- The state's CSBG funds are made available after the USHHS has approved the State Plan.
- The Department makes the approved plan available to subrecipients.
- The Department extends subrecipient contracts and allocates the majority of funds by formula based on the poverty population and population density in a given service area. In addition, the Department funds Demonstration and Special Project programs throughout Texas.
- Each subrecipient submits monthly reports to TDHCA that include the number of persons served and the number of persons assisted that successfully transitioned out of poverty. They also report on the number of persons currently participating in self-sufficiency programs, and on the status of various community revitalization projects undertaken by the eligible entity.
- The Department monitors the subrecipients' contracts. The goal of the Department is to conduct at least one extensive, on-site monitoring review every three years for each CSBG subrecipient. The monitoring review includes evaluation of the subrecipient's program content, administrative procedures, and a financial review.
- The Department provides other training and technical assistance as needed.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding source:
U.S. Department of Health and Human Services' Community Services Block Grant.

2008 Funding: $31,311,981

Formulas:

- A federal formula based on poverty population determines each state's allocation.
- TDHCA utilizes the following formula to distribute not less than 90% of the state's CSBG allocation to subrecipients:
  a) CSBG funds are distributed by formula to forty-eight (48) eligible entities throughout the state. The planning allocation for each service area is calculated based on a formula which incorporates the following factors: (1) $50,000 base; (2) 98% weight to the number of persons at or below the poverty level; (3) 2% weight to the ratio of population density and (4) $150,000 floor.
  b) The formula is calculated as follows. All subrecipients are given the $50,000 base and then the formula is applied using the 98% poverty factor and the 2% inverse density ratio factor. Once the base and factors are applied, any subrecipient with an allocation below the floor of $150,000 will be brought up to this amount.
  c) Subrecipients receiving $150,000 will then be removed from the formula calculation process and the amount of money for those contractors is removed from the allocation pot.
  d) The remaining unallocated funds are then allocated to contractors that did not fall below the $150,000 floor.

Note: This formula does not apply to CSBG Demonstration and Special Project subrecipients. This portion of the funds is awarded on a competitive basis. TDHCA may also award CSBG funds to Subrecipients in communities affected by natural disasters.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs: None.

External programs: None. TDHCA receives the total CSBG allotment for the State of Texas, which it allocates to eligible entities or subrecipients. Communities may have different organizations that provide similar services. However, CSBG subrecipients ensure the coordination of community resources, especially in the rural areas of Texas.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

Not applicable.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with local governments:

- Four cities, two counties, and three councils of government currently contract with the Department to administer the CSBG Program. They are:
  - City of Austin
  - City of Lubbock
  - City of Fort Worth
  - City of San Antonio
  - Hidalgo County Community Action Agency
  - Webb County Community Action Agency
  - South Texas Development Council
  - South East Texas Regional Planning Commission
  - Texoma Council of Governments

K. If contracted expenditures are made through this program please provide:
- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

Fiscal Year 2008 Expenditures:

- Professional Services: $17,546 for two agency-wide audits (reflects the portion expenses to Strategy C.1.1. which includes the Emergency Shelter Grants Program described later in this document).
- 2008 Subrecipient Expenditures and Encumbrances: $31,885,100
- Number of CSBG contracts: 73 total contracts, including 25 discretionary contracts.
- General contract purpose: TDHCA contracts with subrecipients to operate programs in their individual communities that strive to ameliorate the causes of poverty and provide services and activities as specified in 42 U.S.C. §9907 (b).
- Accountability for funding and performance is ensured through the use of a needs-based funding formula for the allocation of funds, the Community Affairs Contract System (a Central Database system) to record the use of funds and performance of contract activities, and on-site monitoring reviews conducted by TDHCA staff of contracted operations. On-site reviews are scheduled based on an annual risk assessment conducted for all CSBG funded contracts. In compliance with the CSBG Act, the Department provides for fiscal controls through fund accounting procedures that are maintained at both the state and subrecipient levels. The Department's financial and other records are audited on an annual basis by the State Auditor's Office and a copy of the Audit is submitted to the Texas Legislature and the Secretary of the U.S. Department of Health and Human Services.
- No current contracting problems.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

The American Reinvestment and Recovery Act provides for approximately $48 million in additional CSBG funds for FY2009.

Program webpage: http://www.tdhca.state.tx.us/cs.htm#csbg

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities.

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information. The chart headings may be changed if needed to better reflect your agency's practices.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Emergency Shelter Grants Program
Location/Division	Community Affairs Division, Community Services Section
Contact Name	Stuart Campbell, Manager of Community Services
Actual Expenditures, FY 2008	$5,480,984
Number of FTEs as of August 31, 2008	3

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Emergency Shelter Grants Program (ESGP), administered by the Community Affairs Division, awards funding through a competitive process to subrecipients who provide services to the homeless and/or who undertake homelessness prevention activities. The program is funded through the federal Emergency Shelter Grants Program and administered at the federal level by the U.S. Department of Housing and Urban Development (HUD). Eligible applicants for ESGP funds are units of local government and private nonprofit organizations.

1. Key services and functions:
   The Emergency Shelter Grants Program provides funds for homeless shelters, services for the homeless, and homelessness prevention activities.

2. Eligible activities:
   - Local administration of programs for the homeless;
   - Rehabilitation of buildings to be used as emergency shelters;
   - Maintenance, operation, and furnishings for emergency shelters;
   - Provision of essential services such as healthcare, drug abuse treatment, employment, and education; and
   - Prevention of homelessness.

3. Major program activities:
   - Development of ESGP portion of Department's Consolidated Plan;
   - Development of NOFA;
   - Scoring of applications;
   - Awarding grants; and
   - Monitoring and technical assistance.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

3.1.1. Strategy: Administer Homeless & Poverty-Related Funds through a Network of Community Action Agencies & Other Local Organizations	
Output 1: Number of Persons Assisted through Homeless & Poverty-Related Funds	539,436
Output 3: Number of Shelters Assisted	78
Efficiency 1: Avg. Agency Admin. Cost Per Person Assisted	$2.71
Explanatory 2: Total Number of Persons in Poverty	4,172,890
Outcome 1: Percent of Persons in Poverty that Received Homeless & Poverty-Related Asst.	12.35%
Outcome 2: Percent of Emergency Shelters Assisted	8.34%

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

- ESGP was established by the Homeless Housing Act of 1986 in response to the growing number of homeless persons.
- In 1987, the ESG program was incorporated into Title IV of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. §§11371-11378), now known as the McKinney-Vento Homeless Assistance Act.
- ESGP funds are awarded to the state by the U.S. Department of Housing and Urban Development.
- Beginning in 1987, the Texas Department of Community Affairs assumed the responsibility of administering the program.
- Since 1991, when the Department of Housing and the Department of Community Affairs were merged, the Texas Department of Housing and Community Affairs has administered the program and, as the state's lead agency for homelessness issues, continues to administer the program.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Population served: Homeless individuals and families and those at-risk of homelessness.

Requirement/qualifications:

- The Emergency Shelter Grants Program (ESGP) serves homeless persons, as defined by the Stewart B. McKinney Homeless Assistance Act.
- The definition of "homeless" as defined in 42 U.S.C., Ch. 119, §11302 includes anyone who lacks a fixed, regular and adequate nighttime residence, and anyone whose primary nighttime residence is a public shelter or anyone whose primary nighttime residence is a public or private place not designed for or used as a regular sleeping accommodation for human beings.
- In addition, ESGP serves persons who are at-risk of becoming homeless. Persons are able to obtain ESGP assistance to avoid eviction, foreclosure or termination of utilities resulting in homelessness, when there is a reasonable prospect that the family will be able to resume payments within a reasonable period of time.
- Eligible applicants for ESGP funds are units of local government and private nonprofit organizations.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Overview:

- The Department receives ESGP funding from HUD through a formula allocation.
- The Community Affairs Division administers the Department's ESG program and funds.
- Planning for the program is done through the HUD-required Consolidated Plan.

Award process:

- Based on Consolidated Plan, the Department develops a NOFA for the program. The NOFA is published in Texas Register and a notice is sent to interested parties.
- Funding for each region is determined on a formula basis using poverty population in each region.
- Applicants in each of the state's 13 uniform service regions compete for funding reserved for their service region.
- Eligible applicants include units of general local government and private non-profit organizations.
- The Department scores the applications and makes final awards.
- The Department obligates funds to successful applicants.
- The Department monitors these contracts. The goal of the Department is to conduct at least one extensive, on-site monitoring review per year for ESGP subrecipients who rank 50 or higher in the annual ESGP Risk Assessment. The monitoring review includes a review of the program, administrative, and financial operations.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding source:
U.S. Department of Housing and Urban Development Emergency Shelter Grants Program (ESGP). TDHCA also receives state general revenue to fund technical assistance to aid rural communities in accessing federal Continuum of Care funds. These funds are included in this section.

2008 Funding: $5,261,641 in ESG; $109,000 in state general revenue.

Formulas (federal):
Formula allocation based on poverty population.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal Programs:
During the 81st Legislative Session, TDHCA received $20 million in state homelessness funding of which the agency will be responsible for its administration. This program, called the Homeless Housing and Services Program (HHSP), is to assist regional urban areas in providing services to homeless individuals and families, including services such as case management, and housing placement and retention, as well as construction needs. TDHCA will award funding through matching grant process to the eight largest cities with populations larger than 285,500 persons per the latest U.S. Census figures.

External Programs:

- Entitlement communities, typically metropolitan areas, receive ESGP funds directly from the federal government.
- There are some other state agencies, such as the Texas Department of Aging and Disability Services and the Texas Department of State Health Services that work to provide assistance to homeless persons, but funding is limited and assistance is restricted to specific sub-populations of homeless persons.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

Coordination efforts:

- The Texas Interagency Council for the Homeless, consisting of representatives from sixteen state agencies, designated representatives of the Governor, Lieutenant Governor, and Speaker of the House, and other advisory members meet regularly to discuss the delivery of services to homeless persons in Texas. This Council strives to give all state and federal funded programs that serve the homeless the opportunity to work together to optimize the use of limited funding. TDHCA holds a significant role on the Council as mandated by the Department's governing statute. The Department has two representatives on the council and provides clerical support and assistance for the Council.
- As part of the ESGP application process the Department also encourages collaboration and coordination of services at the local level.
- While there is some overlap in the function and uses of both ESGP and state homelessness funding, ESGP cannot be used for new construction while the state funding can be used for that purpose. Given the extremely small historical amount of state funding for this purpose and the significant scope of the homelessness problem, duplication of persons served is highly unlikely.

MOUs/contracts:

- This program has not entered into any MOUs. However, the program does contract with the Texas Homeless Network, units of local government, and other entities to administer the program.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with local governments:

Units of local government are among the eligible ESGP subrecipient organizations; they are also eligible to receive a portion of the $20 million in state homelessness funding provided that they are one of the state's eight largest cities.

K. If contracted expenditures are made through this program please provide:
- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

Fiscal Year 2008 expenditures:
- 2008 Subgrantee Expenditures and Encumbrances: $ 5,429,283
- Number of contracts: 77 that primarily support the operations of shelter providers and the provision of services.
- General contract purposes: TDHCA contracts with subrecipients to operate ESG programs in their respective communities that provide services to the homeless and to prevent homelessness.
- To ensure accountability for funding and performance, the Department uses a funding formula for the allocation of funds, the Community Affairs Contract System (a Central Database system) to record the use of funds and performance of contract activities, and on-site reviews of contracted performance. On-site reviews are scheduled based on an annual risk assessment conducted for all ESGP funded subrecipients. The Department also provides for fiscal controls through fund accounting procedures that are maintained at both the state and subrecipient levels. The Department also conducts in-house desk reviews of monthly performance and expenditure reports.
- Also includes contract for Continuum of Care Technical Assistance to aid rural communities access federal homeless funding.
- No current contracting problems.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

The list of state agency members of the Texas Interagency Council on the Homeless, Texas Government Code, §2307.002, includes state agencies that are no longer in existence.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Only 10% of the funds may be used by the subrecipients for operations administration, up to 30% for essential services and 30% for homeless prevention.

Program webpage: http://www.tdhca.state.tx.us/cs.htm#esgp

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities.

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information. The chart headings may be changed if needed to better reflect your agency's practices.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Weatherization Assistance Program
Location/Division	Community Affairs Division, Energy Assistance Section
Contact Name	Michael DeYoung, Director of Community Affairs
Actual Expenditures, FY 2008	$15,109,294
Number of FTEs as of August 31, 2008	4

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Energy Assistance Section administers the Weatherization Assistance Program (WAP). The program is funded through the federal Weatherization Assistance for Low Income Persons Grant from the U.S. Department of Energy (DOE), the federal Low Income Home Energy Assistance Program from the U.S. Department of Health and Human Services (HHS) and in limited areas of the state investor-owned utility contracts. Funds are passed through TDHCA to subrecipients that work with subcontractors to provide weatherization services on the local level.

1. <u>Key services and functions:</u>
   The WAP funds energy conservation measures for low income households in order to lower their utility burdens, make the home more affordable, and decrease the demand on existing energy resources.

2. <u>Eligible activities:</u>
   - caulking
   - weather-stripping
   - adding wall, floor and ceiling insulation
   - replacing and repairing doors and windows
   - patching holes in the building envelopes
   - insulating inefficient water heaters
   - repairing and replacing inefficient heating/cooling systems

3. <u>Major program activities:</u>
   - Preparation of State Plan
   - Disbursement of funds
   - Monitoring subrecipients
   - Providing technical assistance

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

3.2.1. Strategy: Administer the State Energy Asst. Programs by Providing Grants to Local Organizations for Energy-Related Improvements	
Output 2: Number of Units Weatherized by the Department	3,004
Efficiency 1: Avg. Cost Per Household Served	$24.85
Efficiency 2: Avg. Cost Per Home Weatherized	$3,499
Explanatory 1: Number of Very Low Income Households Eligible for Energy Asst.	1,324,059
Outcome 1: Percent of Very Low Income Households Receiving Energy Asst.	4.12%

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

- In 1995, Congress decreased WAP funding by 47%.
- In 1999, the 76th Texas Legislature passed SB 7, which provided a process for the deregulation of the electric utility industry. As a result, TDHCA contracts with investor owned utilities were discontinued in areas where the industry was deregulated. These contracts provided enhanced weatherization assistance to their low income costumers. SB 7 established such enhanced weatherization assistance as an allowable activity under the System Benefit Fund Program.
- In 2005, the 79th Texas Legislature passed SB 712, which required transmission distribution utilities (TDUs) to provide funding for enhanced weatherization if no such funding was provided through the System Benefit Fund. However, no appropriation was made for this bill. This funding is being provided directly to TDHCA subrecipients and does not flow through the Department's budget.
- In 2009, the Department of Energy received the largest funding allocation to date for the WAP through the American Recovery and Reinvestment Act of 2009 (ARRA). As a result, the State of Texas received $326,975,732, in addition to its annual funding award, to provide weatherization services to low income residents of Texas. As allowed under ARRA, the state has increased the maximum allowable income to 200% of the federal poverty line. Once the ARRA WAP funds have been expended, it may be appropriate to reassess this level.
- The intent of the WAP has not changed with the new ARRA funding.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Population served: Low income households who can reduce their energy burden through energy efficiency measures.

Requirements/qualifications:

- Effective September 3, 2009, income eligibility has been increased to 200% of the current Poverty Income Guidelines. This is a temporary increase due higher appropriations; historically the program has been restricted to persons at 125% of poverty.
- Priority is given to households with persons over 60 years of age, persons with disabilities, and households with children under six years of age.
- The structures must be able to benefit from being weatherized.
- Eligible subrecipients include Community Action Agencies, nonprofit entities and units of local government.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Overview:

- The Department uses funds received from the U. S. Department of Energy (DOE) and the U.S. Department of Health and Human Services (HHS) to administer the WAP. In limited areas of the state, contracts with investor-owned utilities provide for enhanced services.
- The Department passes these funds through to local subrecipients who deliver weatherization services, as described in Section B. The program serves every county in the state.
- DOE sets the rules for the WAP. DOE specifically prohibits any duplication of services so that states using DOE WAP funds must have only one state weatherization program regardless of the funding mechanisms employed.

WAP Planning Process and Disbursement of DOE Funds:

- The Department receives DOE grant guidance and attends a DOE grant guidance meeting.
- The Department prepares a draft grant application outlining proposed use of funds.
- The Department posts the draft application in the Texas Register and holds public hearings.
- The Weatherization Policy Advisory Council meets the same day as the public hearings to comment on draft.
- The Department considers public comment received and input from Weatherization Policy Advisory Council, finalizes the grant application and sends to DOE.
- Once DOE approves the application, the Department rewrites or amends contracts with WAP subrecipients as is appropriate and distributes funds on a formula basis.
- Subrecipients submit monthly reports to the Department
- The Department monitors the program, making at least one site visit per year.
- The Department provides technical assistance as needed.

WAP Planning Process and Disbursement of HHS Funds:

- *See entry for the Comprehensive Energy Assistance Program (CEAP), which is also funded through the HHS-administered Low Income Home Energy Assistance Program.*
- Investor Owned Utility Contracts are administered in accordance with contract language.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding sources:

- U.S. Department of Energy (DOE) Weatherization Assistance Program for Low Income Persons
- U.S. Department of Health and Human Services (U.S. HHS) Low Income Home Energy Assistance Program (up to 15% of HHS LIHEAP funds may be used for weatherization activities) (For some subrecipients: Investor Owned Utility Contracts.)

2008 Funding: $5,549,413 (DOE WAP); $8,106,656 (15% of LIHEAP); $1,272,000 (investor owned utility contracts)

Formulas:

Funds Received by Department or Subgrantees:

- LIHEAP and WAP are funded on the federal level through formulas.
- LIHEAP formula factors in target populations (poverty population, elderly poverty population, etc.), heating and cooling days. Federal formula tends to favor states whose major cost burdens are due to heating costs.
- Contracts with Investor Owned Utilities determined by rulings by Public Utility Commission.

Funds Disbursed by the Department:
The Department disburses both WAP and CEAP funds to subrecipients using a formula which takes into account the following factors based on counties served:

- County Non-Elderly Poverty Household
- County Elderly Poverty Household
- County Inverse Poverty Household Density
- County Median Income Factor
- County Weather Factor

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs: None.

External programs:
None. Currently in Texas, there are no other entities providing weatherization services for low income households other than WAP subrecipients. DOE rules preclude multiple statewide programs providing duplicative services, so there are no internal or external state programs providing weatherization services for residential use. Some subrecipients receive funding from Transmission Distribution Utilities as required under SB 712, 79th Legislature and may otherwise administer funds from other entities to enhance their WAP services.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

As previously discussed, DOE rules preclude multiple statewide programs providing duplicative services. Some subrecipients receive funding from other sources. These funds are used to enhance their WAP services, using these funds to reach households for which federal funding is insufficient or overly restrictive.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with Local Government:
Some WAP subgrantees are units of local government or Councils of Government (i.e., although most are Community Action Agencies, as described in the Community Services Block Grant Program Guide).

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

Fiscal Year 2008 Expenditures:

- Professional Services: $102,385 for two agency-wide audits. (Reflects portion expensed to Strategy C.1.2., which includes the Comprehensive Energy Assistance Program described elsewhere. Also, one audit focused primarily on Energy Assistance Programs and therefore largely expensed to this function.)
- 2008 Subrecipient Expenditures and Encumbrances: $ 14,868,854
- Number of 2008 WAP contracts: 71 total contracts. Each of the 34 WAP subrecipients required a separate contract for DOE funds and for HHS funds. TDHCA also had three Investor Owned Utility (IOU) contracts in place that year.
- General contract purpose: TDHCA contracts with subrecipients to provide low income weatherization assistance services in 254 counties. IOU contracts provide funding for subrecipients within service areas to provide enhanced WAP services to low income customers in IOU service areas.
- Accountability for funding and performance is ensured through the use of a needs-based funding formula for the allocation of funds, the Community Affairs Contract System (a Central Database system) to record the use of funds and performance of contract activities, and on-site monitoring reviews conducted by TDHCA staff of contracted operations. On-site reviews are scheduled based on an annual risk assessment conducted of all WAP funded contracts. TDHCA provides for fiscal controls through fund accounting procedures that are maintained at both the state and sub-grantee levels. The Department's financial and other records are audited on an annual basis by the State Auditor's Office and a copy of the Audit is submitted to the Texas Legislature and the Secretary of the U.S. Department of Health and Human Services and the U. S. Department of Energy.
- No current problems with entities who have executed contracts.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Program webpage: http://www.tdhca.state.tx.us/ea/wap.htm.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities.

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information. The chart headings may be changed if needed to better reflect your agency's practices.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Comprehensive Energy Assistance Program (CEAP)
Location/Division	Community Affairs Division, Energy Assistance Section
Contact Name	Michael DeYoung, Director of Community Affairs
Actual Expenditures, FY 2008	$47,824,812 (Reflects CEAP Program expenditures and both WAP and CEAP administrative expenditures funded through LIHEAP)
Number of FTEs as of August 31, 2008	10.5

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Department administers the Comprehensive Energy Assistance Program (CEAP) through its Energy Assistance Section. The program is funded through the Low Income Home Energy Assistance Program administered by the US Department of Health and Human Services. The Department passes funding through to subgrantees that provide direct services. The program serves all counties in the state.

1. Key services and functions: To assist low income households pay their energy bills and achieve energy self-sufficiency.

2. Eligible activities/components: There are four basic components, which can be interfaced to meet the customer's needs:
   a) The co-payment component helps households set goals for reducing utility bills, better manage household budgets and assists with utility bill payments for 6 to 12 months. The objective is energy self-sufficiency.
   b) A special component for the elderly and disabled provides financial assistance to those households most vulnerable to the high costs of energy.
   c) The heating and cooling systems component repairs and replaces equipment to increase efficiency.
   d) In addition, CEAP provides assistance during an energy crisis caused by the weather or by an energy supply shortage.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

3.2.1. Strategy: Administer the State Energy Asst. Programs by Providing Grants to Local Organizations for Energy-Related Improvements	
Output 1: Number of Households Assisted through the Comprehensive Energy Asst. Program	51,502
Efficiency 1: Avg. Cost Per Household Served	$24.85
Explanatory 1: Number of Very Low Income Households Eligible for Energy Asst.	1,324,059
Outcome 1: Percent of Very Low Income Households Receiving Energy Asst.	4.12%

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

- The Low Income Home Energy Assistance Act of 1981, Title XXVI of the Omnibus Budget Reconciliation Act of 1981, created the LIHEAP program for the purpose of assisting low-income persons pay their utility bills.
- From 1981-1992 the Texas Department of Human Services was the grantee agency, with the Texas Department of Community Affairs administering a portion of the funds.
- In 1992, the Texas Legislature made the TDHCA the administering agency.
- In 1994, TDHCA created CEAP. This replaced existing utility assistance programs and made use of flexibility provided at the federal level to tailor programs to local needs. The purpose of CEAP is to assist low-income people to pay their utility bills and become energy self-sufficient. The program includes strong consumer education component and local decision-making. Seventy-five percent (75%) of the LIHEAP funds received by TDHCA go to this program.
- The CEAP intent has not changed since program inception. The intent is to assist low-income households pay utility bills and promote energy self-sufficiency.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Population served: Very low income households.

Requirements/qualifications:
Effective September 3, 2009, income eligibility has been increased to 200% of the current Poverty Income Guidelines. This is a temporary increase due higher appropriations; historically the program has been restricted to persons at 125% of poverty.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Overview:

- The Department receives an annual formula allocation from the U.S. Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP).
- TDHCA applies 75% of LIHEAP for CEAP direct services. Of the remaining 25%, 15% of LIHEAP is used for WAP and 10% is used for state and local administration.
- The Department allocates funds to subgrantees that provide direct services.

CEAP/LIHEAP Planning Process:

- The Department prepares a State Plan and Intended Use Report. These are posted in the Texas Register and distributed to interested parties.
- The Department holds public hearings.
- The Department considers public comment and finalizes State Plan and Intended Use Report.
- Contracts with subgrantees are renewed based on acceptable level of performance.
- Funds are disbursed to subgrantees using formula allocations.
- The Department monitors contracts. At least one monitoring visit per contract is conducted each year.

- Regular workshops are held to provide technical assistance and training. Technical assistance is also provided as needed.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding source:
U.S. Department of Health and Human Services (USHHS); Low Income Home Energy Assistance Program (LIHEAP). TDHCA applies 75% of LIHEAP for CEAP direct services, 15% for WAP direct services, and 10% for state and local administration for both programs.

2008 Funding: In 2008, TDHCA received $50,598,812 in LIHEAP funds, reflecting $45,044,208 in regular formula allocation and $5,554,604 in emergency contingency funds.

Formulas:
Funds Received by Department or Subrecipients:

- The LIHEAP formula factors include target populations (poverty population, elderly poverty population, etc.) and heating and cooling days.
- This federal formula tends to favor states whose major cost burdens are due to heating costs; however, when national appropriations exceed approximately $2 billion for this program, a formula more favorable to Texas applies to a portion of the funds. Congress may make additional, contingency appropriations in response to energy crisis.

Funds Disbursed by the Department:
The Department disburses both WAP and CEAP funds to subgrantees using a formula which takes into account the following factors based on counties served:

- County Non-Elderly Poverty Household
- County Elderly Poverty Household
- County Inverse Poverty Household Density
- County Median Income Factor

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs:

- The Statewide Section 8 Housing Payment Program provides utility assistance to some clients.
- The Emergency Shelter Grants Program, the Community Services Block Grant Program, and the Homelessness Prevention and Rapid Re-Housing Program can all provide utility assistance to families facing homelessness.

External programs:

- Rental assistance programs such as Section 8 provide some clients with limited utility assistance.

- LITE-UP: This program provides low income electric utility customers in deregulated areas of the state a 20% discount on their electric bills for June, July, August and September. The program is funded through the System Benefit Program and administered by the Public Utility Commission. As with CEAP, the program is restricted to families earning no more than 125% of the poverty level, although the program also allows families enrolled in other programs, such as CEAP itself or TANF, automatic enrollment. Unlike CEAP, LITE-UP is an entitlement: all eligible households seeking assistance receive assistance. The utility assistance received under LITE-UP is much more modest than assistance received under CEAP. Also, while CEAP can also be used to replace energy inefficient appliances and includes an education component to help families reduce energy consumption and budget their limited funds, LITE-UP is strictly a utility bill discount program.

Local and private assistance:
Utility companies; municipal utilities, electrical cooperatives, and private charities, including faith-based organizations, often offer limited utility assistance to the indigent and those facing homelessness.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

CEAP contractors are extremely knowledgeable of other utility assistance programs and often administer these in addition to CEAP. As with many of TDHCA's programs, the need for the service far exceeds availability, so there is little concern of duplication. Typically, CEAP contractors enroll clients in LITE-UP if the client lives in a deregulated area of the state. Assistance from other programs such as LITE-UP or Section 8 utility assistance is taken into consideration when determining benefits under CEAP. Because of this, Section 8 recipients rarely receive CEAP assistance.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with local governments:
The Department has CEAP contracts with cities, counties, and Councils of Government.

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

Fiscal Year 2008 Expenditures:

- 2008 Subrecipient Expenditures and Encumbrances: $ 46,900,060
- Number of 2008 CEAP contracts: 50 total contracts.
- General contract purpose: TDHCA contracts with subrecipients to provide utility assistance, consumer counseling and other services to low income households in all 254 counties.
- Accountability for funding and performance is ensured through the use of a needs-based funding formula for the allocation of funds, the Community Affairs Contract System (a Central Database system) to record the use of funds and performance of contract activities, and on-site monitoring reviews conducted by TDHCA staff of contracted

operations.

- On-site reviews are scheduled based on an annual risk assessment conducted of all CEAP funded contracts. TDHCA provides for fiscal controls through fund accounting procedures that are maintained at both the state and sub-grantee levels. The Department's financial and other records are audited on an annual basis by the State Auditor's Office and a copy of the Audit is submitted to the Texas Legislature and the Secretary of the U.S. Department of Health and Human Services.
- No current contracting problems.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Program webpage: http://www.tdhca.state.tx.us/ea/detail.htm.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information. The chart headings may be changed if needed to better reflect your agency's practices.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Housing Trust Fund
Location/Division	Housing Trust Fund
Contact Name	Sharon Gamble, Manager
Actual Expenditures, FY 2008	$5,021,292
Number of FTEs as of August 31, 2008	1

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Housing Trust Fund (HTF) is the only state-funded affordable housing program. The Housing Trust Fund was established to expand affordable housing options for very low to low income Texans. This extremely flexible program provides funding for a variety of affordable housing activities, including homebuyer assistance, home repair, barrier removal for persons with disabilities, tenant-based rental assistance, and the new construction, rehabilitation, and acquisition of single family or mainly rural multifamily affordable housing projects. The program can also be used to enhance the capacity of nonprofit housing providers in the state.

<u>Key Services and Functions</u>. Currently, the primary services and functions provided by this program are:

- Homebuyer Assistance
- Home Repair Assistance
- Rental Assistance
- Development of Rental Units

<u>Major Program Activities</u>. The major activities the HTF program undertakes to administer this program include:

- Develop Administrative rules,
- Application preparation, including application workshops,
- Scoring and ranking of applications,
- Underwriting of the projects (by the Real Estate Analysis Division of the Department),
- Distribution of program funds to applicants,
- Technical assistance to program participants to ensure proper use of funds,
- Contract Management and
- Monitoring (performed by Compliance)

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

1.1.3. Strategy: Provide Funding through the HTF for Affordable Single Family Housing	
Output 1: HTF Single Family Number of Households Served (*Does not include Bootstrap*)	356
Efficiency 2: Avg. Amt. Per Households HTF Rehab	$ 13,452
Explanatory 2: HTF Rehab Number of Households Served	124
Explanatory 3: Number of Households Assisted through Other SF Activities:	232

Note: The performance measures above are not inclusive of loans made through the Texas Bootstrap Loan Program described in a separate entry and therefore differ from performance measures reported to the Legislative Budget Board and in other areas of this document. SFY 2010-2011 Single Family HTF Performance Measures segregate the Bootstrap and non-Bootstrap assistance.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

Important history.
The Housing Trust Fund was established by the 72nd Legislature through Senate Bill 546, the same legislation that created TDHCA. While the Trust Fund has always been used for a variety of activities, initially the majority of funding was directed towards multifamily activity. In recent years TDHCA has used the Housing Trust Fund to meet the required $3 million per year to the Bootstrap Loan Program (*refer to write-up for this program*), shifting the focus of the program to single family activities.

From 2004 to 2007, the HTF Program received roughly $3 million per year, allowing continuation of the HTF-supported Bootstrap Loan Program. As illustrated in the table below, funding for the Trust Fund was increased to almost $6 million per year by the 80th Texas Legislature and increased again to about $10 million per year by the 81st Texas Legislature.

Housing Trust Fund Appropriations, SFY 1993-2011

Year	New Funding and Loan Repayments (*May include Oil Overcharge Funds)*	Carryforward Authority for Committed But Unexpended Funds	Total Appropriation Per General Appropriations Act (GAA)	Year	New Funding and Loan Repayments (*May include Oil Overcharge Funds)*	Carryforward Authority for Committed But Unexpended Funds	Total Appropriation Per General Appropriations Act (GAA)
1993		*$6,620,624*	*$6,620,624*	2003	$6,468,325		*$6,468,325*
1994	$1,000,000	*(Associated with HOME Match)*	*$1,000,000*	2004	$3,247,460	*$6,000,000*	*$9,247,460*
1995	$4,936,336		*$4,936,336*	2005	$3,239,744		*$3,239,744*
1996	$1,760,153		*$1,760,153*	2006	$3,066,078	*$3,500,000*	*$6,566,078*
1997	$1,031,453		*$1,031,453*	2007	$3,049,869		*$3,049,869*
1998	$3,367,185		*$3,367,185*	2008	$5,844,397		*$5,844,397*
1999	$1,382,729		*$1,382,729*	2009	$5,847,461		*$5,847,461*
2000	$7,305,700		*$7,305,700*	2010	$10,963,875		*$10,963,875*
2001	$6,556,568		*$6,556,568*	2011	$10,963,875		*$10,963,875*
2002	$6,619,862		*$6,619,862*				

**As required by the Comptroller of Public Accounts, Committed but Unexpended Balances from previous biennium had to be reappropriated to TDHCA in SFY 2004 and SFY 2006.; to remove the necessity of this measure and simplify accounting for the HTF, language found in Rider 10 was added to TDHCA's bill pattern in SFY 2008. This requires TDHCA to move HTF General Revenue from the State Treasury to the Texas Treasury Safekeeping Trust Co. (TTSTC.)*

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Population served
To be eligible to benefit from the Housing Trust Fund, the persons served must have incomes at, or below, 80% of Area Median Family Income (AMFI) as determined by HUD. Additionally, rents charged on HTF assisted units cannot exceed the following limits:

- Low Income (80%-61% of AMFI) – Rents cannot exceed 30% of 80% AMFI
- Very Low Income (60%-31% AMFI) – Rents cannot exceed 30% of 65%AMFI

- Extremely Low Income (30% AMFI and below) – Rents cannot exceed 30% of 30%AMFI

Beneficiary eligibility:
Funded affordable housing activities must benefit low income persons earning no more than 80% of the area median family income. Funding may target special populations, such as persons with disabilities (PWD), veterans, homeless persons, or the elderly.

Subgrantees:
Eligible subgrantees include units of local government, nonprofit organizations, for profit organizations, public housing authorities (PHAs), and community housing development organizations. Most typically, nonprofits apply for these funds.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Major administrative duties associated with the program are as follows:
- Development of program funding plan, rules, and notices of funding availability.
- Review of applications; this may include site visits and underwriting.
- Workshops and technical assistance.
- Administration and monitoring of contracts, including approval of draw requests and otherwise ensuring adherence to program rules and proper use of funds.
- Processing of setup and draw requests including the review of participant eligibility and funding disbursements and documenting and maintaining contract files,
- As needed, loan servicing.
- As needed, long-term monitoring of rental developments. (*See Compliance and Asset Oversight Section*.)

Award process:
- TDHCA collects input from Legislature and stakeholders to draft funding plan
- After board approval of draft plan, TDHCA submits funding plan to Legislature
- The Department develops NOFAs for the program. The NOFAs are published in *Texas Register* and notices are sent to interested parties.
- Eligible applicants include units of local government, nonprofit organizations, for profit organizations, public housing authorities (PHAs), and community housing development organizations.
- Funding is generally made available through an open rather then a competitive cycle. This allows TDHCA to provide more extensive technical assistance during the application process and makes the program more accessible to the nonprofits seeking this funding.
- The Department scores the applications and makes final awards.
- The Department obligates funds to successful applicants.
- The Department monitors these contracts.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding Sources.
The Housing Trust Fund (HTF) is funded through state General Revenue. TDHCA has historically been able to apply residual bond funds and fees to the HTF; these transfers are referred to as "Local Funds," pursuant to §§2306.204 and 2306.205. As required by §2306.201, Texas Government Code, HTF Local Funds are maintained in an account in the Texas Treasury Safekeeping Trust. As required under Rider 10 TDHCA also transfers non-administrative HTF General Revenue to this account. This facilitates accounting for the program and removes the need to re-appropriate committed but unexpended fund from one biennium to another.

Funding Amounts, SFY 2008
General Revenue: SFY 2008: $5,994,395. This includes $1,050,004 in loan repayments and interest earnings from previous HTF loans funded through General Revenue.

(Note: The 81st Texas Legislature increased this appropriation to $10,963,875 per year. This includes an estimated $1 million loan repayments and interest earnings from previous HTF loans funded through General Revenue.)

Local Funds:
TDHCA receives approximately $300,000 per year in loan repayments and interest from previous contracts made using this funding source.

Funding formula/conventions.
At least $3 million per year is applied to the Texas Bootstrap Loan Program to meet requirements of §2306.7581(a-1), Texas Government Code. Remaining funds are allocated in accordance with §2306.111(d), Texas Government Code, relating to the application of the Regional Allocation Formula. If sufficient applications are not received after a specified time period, regional allocations are collapsed and funds made available statewide.

As required under Rider 10 (d), TDHCA must submit a HTF funding plan to the Legislature each year outlining use of funds. The recently awarded funding plan is for the SFY 2010-2011 but will be submitted annually in accordance with the Rider.

Current Funding: The 81st Legislature appropriated $21.9 million for the program for the FY2010-2011 biennium.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs.
- The HTF funds many of the same types of single family activities as the HOME program. However, the HTF focuses on serving the lowest income populations and is available statewide; HOME funds are limited primarily to rural areas.
- The HTF funds the same type of rental development activities as the Housing Tax Credits (LIHTC) and HOME program. However, the cost of multi-family projects can be a deterrent to development in rural areas, or for developments serving to hard to serve populations and the addition of HTF resources often is the extra source needed to bring these awards to fruition.
- Section 8 Housing Choice Voucher Program: This provides rental assistance to extremely low income households. While the HTF can only be used for short term rental assistance, Section 8 assistance can be renewed annually. TDHCA's Section 8 Program is available in only a few communities throughout the state.

External Programs.
Local: Some communities have local housing trust funds and receive direct federal housing funding through programs such as HOME, HOPE VI and CSBG. Local public housing authorities offer Section 8 rental assistance. Local Housing Finance Corporations can offer low interest mortgage loans and/or down-payment assistance and finance rental developments.

State: The Texas Department of Rural Affairs offers limited funds for home repair through the Texas Community Development Program. This is available only in rural areas of the state that do not receive direct CDBG funding from the federal government. The Veteran's Land Board offers low interest loans for home purchase and home repair.

HUD and USDA offer homeownership, home repair, and rental development programs directly to consumers and developers on a limited basis.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

To avoid duplication or conflict, program planning for the Housing Trust Fund takes into account input from other TDHCA programs. Public comment is accepted and incorporated into program planning. Because of the HTF's flexibility, TDHCA primarily utilizes HTF for activities more difficult to accomplish through existing federal programs or which are specifically prohibited by federal programs. These include Disaster Recovery Gap Finance, the Texas Bootstrap Program, and programs targeted as special populations. As is the case with Disaster Recovery Gap Finance and the Bootstrap Program, HTF funds can be used to leverage other funding. As these programs illustrate, due to the extensive need for affordable housing in the state, other internal and external programs tend to be complementary rather than duplicative.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with Local Governments. Local units of government are eligible for HTF funding but no specific agreements or relationships exist.

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

Contract Expenditures associated with professional services:

- $2,424 associated with two agency-wide audit contracts

Pass-through contracts and encumbrances as of August 18, 2009 against SFY 2008 HTF funds:

- $4,880,000 associated with 18 contracts for affordable housing services related to homeownership, multifamily rental development, and disaster gap financing. This is exclusive of the Texas Bootstrap Loan Program. TDHCA received additional revenue that fiscal year and was also able to reprogram deobligated funds from previous years to meet strong demand for some activities.

Note: These expenditures are exclusive of expenses associated with the Bootstrap Program and the Texas Statewide Homebuyer Education Program, which are funded through the Housing Trust Fund. See separate entries for these.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

The Regional Allocation Formula, required by statute to apply to Housing Trust Fund once a certain amount of funds is made available, poses challenges. While the formula has been very effective with larger programs of the Department in ensuring geographic dispersion, the limited activities of the HTF can be adversely affected when a small total of funds are divided into yet smaller amounts. Consequently, RAF distribution can render some HTF activities to be ineffective.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

The flexibility of the Housing Trust Fund allows TDHCA to meet needs that are difficult to address with more restrictive federal funding or for which federal funding is limited. This flexibility is critical to TDHCA's ability to respond to the emerging needs of low income Texans, communities, and affordable housing providers during the current financial crisis.

Program webpage: http://www.tdhca.state.tx.us/htf/index.htm

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information. The chart headings may be changed if needed to better reflect your agency's practices.

Not a regulatory program.

HOUSING PROGRAMS

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Bootstrap Loan Program
Location/Division	Office of Colonia Initiatives
Contact Name	Homero Cabello, Jr., Director
Actual Expenditures, FY 2008	$5,950,953 (Direct Services only)
Number of FTEs as of August 31, 2008	*See separate Program entry for Office of Colonia Initiatives*

B. What is the objective of this program or function? Describe the major activities performed under this program.

Identified as the Owner-Builder Loan Program in Texas Government Code 2306.751, the Texas Bootstrap Loan Program promotes and enhances homeownership for very low-income Texans by providing funds to purchase or refinance real property on which to build new residential housing, construct new residential housing or improve existing residential housing throughout Texas. Participants under this program provide a portion of the labor necessary for the construction or rehabilitation of their home and in return receive zero-interest loans from TDHCA. The projects may utilize additional funding for each house, but the total loan amount is limited. In the construction or rehabilitation of these homes, all applicable building codes must be adhered to under this program. By statute, TDHCA must apply a minimum of $3 million per year for this program. Two-thirds of the funds are reserved for Economically Distressed Areas while the remaining funds are available statewide. Loans are accessed through TDHCA-certified Nonprofit Owner-Builder Housing Providers (NOHP).

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

1.1.3. Strategy: Provide Funding through the HTF for Affordable Single Family Housing	
Efficiency 1: Avg. Amt. Per Households HTF New	$ 27,000
Explanatory 1: HTF New Constr. Number of Households Served	203

Note: The performance measures reflect only assistance through the Texas Bootstrap Loan Program. SFY 2010-2011 Single Family HTF Performance Measures segregate the Bootstrap and non-Bootstrap assistance.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

The Program was established by the 76th Texas Legislature through SB 1287 and significantly amended through SB 322 passed by the 77th Texas Legislature. TDHCA initially sought to fund the program through the federal HOME Program but found that the federal requirements were not compatible with state statutory requirements, more specifically the sweat equity (self-help) requirements. As available, TDHCA funded the program through bond-related funds. In recent years, the program has been funded through the state Housing Trust Fund.

Starting in fiscal year 2008, TDHCA began making Bootstrap funds available through a loan reservation system in lieu of awarding contracts with subgrantees. The reservation process allows the funds to be encumbered, but only when the nonprofit has an owner-builder ready to proceed with the program. This has resulted in a more efficient process of distributing Bootstrap funds to nonprofit owner-builder housing providers and has increased the expenditure rate for the program.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Beneficiary eligibility:
Households earning no more than 60% Area Median Family Income who are willing to provide at least 65% of the labor necessary to build or repair the home; in instances of the elderly or persons with disabilities, others can volunteer the labor. This program is an important tool in providing alternatives to substandard housing available in colonias and other areas of the state.

Provider eligibility:
Nonprofits and colonia self-help centers that have been certified by TDHCA as a Nonprofit Owner Builder Housing Provider. Certified nonprofits must be able to provide homeowners' education and assistance the building of the homes.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Major administrative duties associated with the program are as follows:

- Development of program funding plan, rules, and notices of funding availability.
- On-going certification and training of nonprofits. Certified nonprofits reserve funds on behalf households wishing to participate in the program and must submit an application within ten days of the reservation. To ensure wide disbursement of funds, each nonprofit may only reserve funds for up to ten households at any one time.
- TDHCA reviews application and approves as appropriate.
- Once the home is built or repaired, TDHCA or the nonprofit prepares mortgage loan documents to finalize the transaction.
- Homeowners receive Bootstrap Loan;
- TDHCA provides on-going loan servicing.

TDHCA administers this program through its Office of Colonia Initiatives.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding Source:
Each state fiscal year the Department is required to allocate at least $3 million to the Texas Bootstrap Loan Program in accordance to §2306.7581 of the Texas Government Code. Currently the Texas Bootstrap Loan Program is funded through the Housing Trust Fund.

State Fiscal Year 2008 Funding:
$6.5 million. This figure is comprised of $3 million from TDHCA's 2008 HTF General Revenue appropriations and $3.5 million associated with repayments of previous HTF loans and deobligated HTF funds from previous awards.

Note: The 2010-2011 HTF Plan allocates $5 million per year in new HTF GR for the program.

Funding formula:
State law requires that at least two-thirds (2/3) of total funds available be set-aside to owner-builders whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal Programs: HOME, non-Bootstrap Housing Trust Fund, the First Time Homebuyer Program, and the Mortgage Credit Certificate programs all promote homeownership but do not have a self-help component, therefore, the financial cost of homeownership is higher through these programs.

External Programs: Local HOME and Housing Finance Corporation programs promote homeownership but generally do not have a self-help component.

The U.S. Department of Agriculture (USDA) Rural Development also offers loans in support of self-help housing; these funds are often layered with Bootstrap funds.

Nonprofits such as Habitat for Humanity undertake similar initiatives with private funding; these funds are often layered with Bootstrap funds.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

Most nonprofits combine Bootstrap Loans with loans from other funding sources, such as USDA, in order to maximize assistance to families served. Over the years, changes have been made to the Bootstrap Loan Program to facilitate this, allowing nonprofits to use Bootstrap to leverage other funding more effectively.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

The NOHP must be a nonprofit organization or a Colonia Self-Help Center.

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

TDHCA has received reservations for 203 loans totaling $ 5,950,952 against 2008 Bootstrap Funds. These reservations were made through 23 providers.

Note: 2008 performance measures reflect actual loans made during the fiscal year and include loans made with funds from previous years.

A short summary of the general purpose of those contracts overall:
The purpose of the funding is to purchase land and build new residential or improve existing residential housing through self-help construction methodologies for very low and extremely low income individuals and/or families (Owner-Builders) including persons with special needs.

Since September 2007, the reservation system has resulted in a more efficient process of distributing Bootstrap funds to nonprofit owner-builder housing providers. The reservation process allows the funds to be encumbered, but only when the nonprofit has an owner-builder ready to proceed with the program. This is an improvement over the old application process where thousands of dollars were under contracts for up to two years or more by nonprofits even when they did not have owner-builders ready to proceed. In addition, nonprofit owner-builder housing providers that were able to complete their approved number of houses under the contract method had to wait until the next award cycle before applying for more funds. Under the reservation system, these nonprofit owner-builder housing providers can continue assisting up to ten applicants at a time without putting their program on hold. As a result, the implementation of the reservation system has dramatically increased the rate of expenditure for fiscal year 2008 compared to prior years.

The methods used to ensure accountability for funding and performances:
The Department has developed program rules, manuals, forms and internal standard operating procedures to ensure that requests for expenditures are adequately supported, comply with relevant laws, regulations and policies and are properly authorized and approved.

A short description of any current contracting problems:
Due to the limited amount of qualified nonprofit organizations within the 2/3 set-aside, expenditure of these funds is slow; unlike other set-asides, TDHCA does not have the authority to “collapse” the set aside after a period and allow the funds to serve families in need in other areas of the state. To attempt to address this issue, the Department has created a capacity building program to assist nonprofit organizations to utilize the funds within the 2/3 set-aside. Funding for this effort is included in the 2010-2011 Housing Trust Fund Plan.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

The two-thirds set-aside under §2306.753(d) of the Texas Government Code could be revised to permit a collapse of the funds into a single pool after a reasonable effort to expend the 2/3 priority funds. For example, statute could reflect that the collapse of funds be revised to assist other economically distressed areas of the state or collapse into the general pool (1/3) after certain period of time had lapsed. The Department will be creating a capacity building program, as part of the General Revenue funds committed to the Bootstrap Program, to assist nonprofit organizations with the two-thirds set-aside to utilize this program.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Review of the Texas Bootstrap Loan Program Rules will provide a solid understanding of this program.

Program webpage: http://www.tdhca.state.tx.us/oci/bootstrap.jsp

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information. the chart headings may be changed if needed to better reflect your agency's practices.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Section 8-Housing Choice Voucher Program
Location/Division	Community Affairs Division
Contact Name	Willie Faye Hurd, Program Manager
Actual Expenditures, FY 2008	6,390,246
Number of FTEs as of August 31, 2008	7

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Department's Community Affairs Division administers the Section 8 Housing Choice Voucher Program. The program currently contracts with units of local government, community action agencies and public housing authorities to assist with the administration of approximately 1,540 Housing Choice Vouchers. Financial assistance is provided through the program for safe, decent, sanitary and affordable housing to eligible households whose annual gross income does not exceed 50% of HUD's median income. Funds for the program are provided by the U.S. Department of Housing and Urban Development (HUD).

The Department administers the Section 8 program on the behalf of small cities and rural communities that usually lack a public housing authority but would like to participate in HUD's rental assistance program. The Section 8 program administers vouchers in 29 of the State's 254 counties. TDHCA also uses a portion of its Section 8 funding for Project Access, which helps persons with disabilities transition out of institutional settings.

<u>Key services and functions:</u>
The Section 8 Housing Choice Voucher Program provides rental assistance payments on behalf of low income individuals and families, including the elderly and persons with disabilities.

<u>Major program activities:</u>

- Coordination with local operators.
- Certification and recertification of tenants.
- Approval of units and leases.
- Payment of housing assistance to owners.
- Compliance with federal and local rules.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

1.1.4. Strategy: Provide Section 8 TBRA	
Output 1: Section 8 TBRA Number of Households Served	1,036
Efficiency 1: Avg. Adm. Amount Sec 8	$ 750

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

- On the federal level, the creation of the program signaled a shift from locally owned public housing to the use of privately owned rental housing as the federal government's primary vehicle for providing rental housing assistance to extremely low income households.
- In 2002, TDHCA began the Project Access Program to help non-elderly persons with disabilities transition out of institutional settings. TDHCA initially utilized vouchers provided by HUD through a pilot program but has now integrated the program into the broader Section 8 Housing Choice Voucher Program.
- In 2005, HUD changed the manner in which the Section 8 voucher program was funded. HUD now additionally takes into consideration historical expenditures when determining program funding.
- In 2007, HUD made a fundamental change in the manner the Section 8 voucher program was funded. Rather than receiving a set number of vouchers, TDHCA now receives funding based on historical activity.
- Services and functions have not changed since program inception.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

The Department administers the Section 8 program on the behalf of small cities and rural communities that usually lack a public housing authority but would like to participate in HUD's rental assistance program. The Section 8 program administers vouchers in 29 of the state's 254 counties.

Population served:

- Extremely low and very low income households in small cities and rural communities that usually do not have a local public housing authority
- The community must request the Department's assistance.

Requirements/qualifications:

- 50% AMFI, as determined by HUD

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Funding: TDHCA receives funding based program activity data for the prior fiscal year.

Overview:

- Section 8 is a rental assistance program. Through the program, the Department pays approved rent amounts directly to property owners on behalf of eligible households. Typically, the program participant pays no more than 30% of their monthly adjusted income towards rent and the Department pays the remaining rent. The client may also receive Section 8 utility assistance.
- Rental properties are privately owned and must meet HUD housing quality standards.
- The tenant and the property must be recertified on a yearly basis.

Administration:

- Working with local operators, the Department certifies and recertifies tenants and participating properties and disburses payments.
- The Department contracts with local governments, community action agencies and public housing authorities to assist with to the administration of the program. The contractor receives a minimal fee for this service.
- The unit of local government or CAA or PHA designates a local operator for each community. The local operator carries out duties associated with program administration.
- To receive Section 8 assistance, a household must be certified as eligible for assistance. This involves income verification and verification of other requirements. Likewise, the property to be rented must meet HUD's housing quality standards.
- Program documents are gathered during program intake to verify client and property eligibility. The local operator usually provides intake, property inspection, etc., and determines the appropriate level of assistance. If there is no local operator available, Department staff visits the community to perform intake and to conduct inspections. The Department makes technical assistance visits to the communities as needed.
- Documents are sent to the Department for verification and approval.
- Once documents have been verified, a contract is signed between the landlord and the Department on behalf of the tenant.
- On a monthly basis, the Department issues rent payments to the landlord, small payments to the local operators, and in some cases, utility assistance payments to the client.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding Source:
U.S. Department of Housing and Urban Development (HUD).

2008 Funding: $6,175,257

Funding formulas (federal):

- HUD renewal funding is based on the requirements of the Omnibus Appropriations Act.
- Actual funding depends on the number of vouchers leased from the prior year.
- HUD provides administrative funds for each voucher.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal Programs:

- While the Department's Housing Trust Fund (HTF) may provide program funds toward multifamily development or rental assistance, the programs are not typically similar to the HOME-sponsored activities and often fill a gap that is not served with the State's HOME allocation. The HTF does not currently fund owner-occupied housing rehabilitation, but has been utilized as gap-financing for HOME-funded owner-occupied housing assistance in areas affected by state or federally declared disaster. Major differences between the two programs include federal environmental requirements, federal labor standards, and federal match requirements for the utilization of HOME funds.

External Programs:

- Section 8 usually serves communities with no public housing authorities. Because this includes counties, there may be a municipality within a county that does have a public housing authority. This is generally not the case.
- The US Department of Agriculture Rural Development provides limited rental assistance to rural residents. Unlike the Statewide Section 8 Housing Assistance Program, the Rural Development program is project-based, applying to certain developments financed by the Rural Housing Service. Also, the program does not require administrators to maintain waiting lists.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

Coordination efforts:

- A resident living in a municipality with a public housing authority and in a county served by the Department could apply for assistance in both the city and the county. All vouchers and certificates serving the area are processed through the same HUD regional office so that duplication of service has not been a problem. In fact, due to the considerable waiting lists, most Section 8 programs participants are often encouraged to sign up for multiple waiting lists to increase their chances of receiving timely assistance.
- When communities apply for participation in the State program, the community must provide the Department with a resolution approved by the highest governing body.
- Entities applying for HOME rental assistance would similarly have to demonstrate an unmet need to receive HOME funds.

MOUs/contracts:

- Parties involved: The Department has contracts with four (4) community action agencies six (6) counties, four (4) housing authorities and ten (10) cities to assist in program administration.
- Purposes/activities:
  a) processing of application and required forms;
  b) interview with potential participants;
  c) securing signatures and required instruments;
  d) certification and recertification of tenants;
  e) housing quality inspections;
  f) enforcement and compliance with program rules and regulations.
- Duration: The contracts are renewed every five years.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with local governments:

- The Department contracts with local government entities that usually lack a public housing authority. The local entity may request to participate in the Section 8 Program.
- The Department may contract with local government to undertake certain administrative duties as further described in Sections K and M below.

K. If contracted expenditures are made through this program please provide:
- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

Professional fee expenditures: $8,390 for the program's portion of two agency-wide audits.
2008 Grant Expenditures and Encumbrances: $5,973,037 through local operators to provide rental assistance to very low income households in 29 counties.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Public housing authorities (PHAs): Federal Section 8 programs are generally administered at the local level through public housing authorities. Section 8 programs are generally the principal programs administered by public housing authorities.

- Kinds of federal Section 8 assistance:
  - Project-based assistance: This type of rental assistance is associated with a specific unit. Developments involved have generally received some kind of subsidy or incentive from HUD. While PHAs own properties offering project-based assistance, some project-based assistance involves a direct contract between a private owner and HUD.
  - Tenant-based assistance: A rental voucher or certificate associated with an eligible client not a project or multi-family development. All the Department's vouchers are tenant-based.

Participation by communities: To participate in the Statewide Section 8 Housing Choice Voucher Program, a community must submit a request to the Department. The local government must then submit a resolution to the Department before participation in the program. Resources available to the Department further limit the Department's participation. If the Department does not have sufficient funding, the Department may deny a community's request for participation.

Program webpage: http://www.tdhca.state.tx.us/oci/bootstrap.jsp

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Housing Resource Center
Location/Division	Housing Resource Center (HRC)
Contact Name	Elizabeth Yevich, Manager of the HRC
Actual Expenditures, FY 2008	$ 475,106
Number of FTEs as of August 31, 2008	6

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Housing Resource Center (HRC) provides educational material to, and answers inquiries from, housing advocates, sponsors, borrowers and tenants, and assists individuals, local organizations and local governments. The HRC also provides information on local housing needs, housing programs, available funding sources, and programs that affect the creation, improvement, or preservation of housing that is affordable to individuals and families of low-, very-low, and extremely-low incomes.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

During FY 2008, the Housing Resource Center responded to a total of 6,109 information and technical assistance requests.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

The Housing Resource Center (HRC) was created in 1993 to fulfill the mandate of Chapter 2306.252, Texas Government Code. The purpose of HRC is described below.

The HRC is intended to be a resource for individuals, local organizations, and local governments in providing for the housing needs of individuals and families in Texas communities by providing information to housing contractors, nonprofit housing sponsors, community-based organizations, and local governments on:

- local housing needs,
- housing programs,
- available funding sources, and
- programs that affect the creation, improvement, or preservation of housing affordable to individuals and families of low and very low income.

According to the statute reference above, the board is required to establish a housing resource center in the housing finance division. The center shall:

- provide educational material to housing advocates, housing sponsors, borrowers, and tenants,
- provide technical assistance to nonprofit housing sponsors, and
- assist in the development of housing policy, including the annual state low income housing plan and report and the consolidated plan.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Population Served: The Housing Resource Center serves the staff of the Department and the entire population of Texas.

Eligibility requirements: There are no eligibility requirements for people seeking information and assistance through the Housing Resource Center.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

The HRC responds to inquiries from individuals or organizations regarding housing issues. Answers are either provided over the phone, by electronic means or through correspondence. If the inquiry requires research, the HRC performs the necessary research and contacts the requestor. If necessary or requested, appropriate publications are provided.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding sources: The HRC supports all of the Department's activities programs. Its administrative costs are defrayed though federal HOME funds and Appropriated Receipts associated with housing program fees. The Division also administers General Revenue received in support of the market studies and other research.

In SFY 2008, the Division received the following funding:

General Revenue	$102,780
Appropriated Receipts:	$259,249
Federal HOME Program funds:	$113,077

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs: The Division of Policy and Public Affairs assists the HRC in answering and responding to informational requests from all sources.

External programs: There are other state agencies that have databases and provide information on local state and federal resources, such as the Business and Economic Clearinghouse in the Office of the Governor, Economic Development and Tourism Department. However, HRC's role is specific to housing issues and resources.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

The Division of Policy and Public Affairs (DPPA) and the HRC coordinate the agency's responses to public informational requests. Both divisions respond to general informational requests; DPPA responses to legislative and media requests and HRC responds to data and research requests. There are no MOUs.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

<u>Work with local governments</u>. Other than answering their requests for assistance, the HRC has no special relationship with local governments.

K. If contracted expenditures are made through this program please provide:

- **the amount of those expenditures in fiscal year 2008;**
- **the number of contracts accounting for those expenditures;**
- **a short summary of the general purpose of those contracts overall;**
- **the methods used to ensure accountability for funding and performance; and**
- **a short description of any current contracting problems.**

HRC contracted for the completion of three area-wide housing market studies during FY2008. The titles of the three studies were *Market Analysis of the McAllen-Edinburg-Pharr and Brownsville-Harlingen Metropolitan Statistical Areas, Overall Housing Needs Assessment for Parmer, Castro and Deaf Smith Counties and the Market Analysis of the Dallas-Plano-Irving Metropolitan Division*. These three contracts represent a total of $102,780.

The housing market analyses provide an assessment of the need for affordable housing based upon the identification and analysis of identified submarkets within the larger study area. The market analyses include a survey of the current housing stock, interviews with key stakeholders, a demand analysis indicating potential housing opportunities, and a general housing needs assessment. Experienced HRC staff provided oversight during the contractual period and reviewed draft documents and other deliverables to ensure fulfillment of contractual duties. There are no contracting problems.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

In addition to providing information and technical assistance to Department staff and the public, HRC is also responsible for the publication of major Department-wide planning and performance documents including the *State of Texas Low Income Housing Plan and Report*, the *State of Texas Consolidated Plan* documents for the U.S. Department of Housing and Urban Development, and the *Agency Strategic Plan*.

Program webpage: http://www.tdhca.state.tx.us/housing-center/index.htm.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Housing Tax Credit Program
Location/Division	Multifamily Finance Production
Contact Name	Robbye Meyer, Director
Actual Expenditures, FY 2008	$621,967
Number of FTEs as of August 31, 2008	8.5

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Housing Tax Credit (HTC) program is a federal housing program administered by the U.S. Treasury Department (Treasury) which provides tax incentives to encourage private investment in affordable housing. Through the program, TDHCA supports the new construction or rehabilitation of high quality rental housing affordable to working families. In return for the tax incentives, property owners agree to set aside a portion of a property's units for rental to persons and families of very low income and restrict the rent required on these units. The program is available statewide and is the primary vehicle for the development of affordable rental housing.

1. Key Services and Functions. The key function of this program is to provide tax incentives to investors and developers for the production of affordable housing. Investors in tax credit properties utilize the credits as a dollar-for-dollar reduction of their tax federal income tax liability. Tax credits are syndicated and sold as a form of equity for the development of the units. A tax credit can be used to reduce taxes paid by a company or individual. Once awarded, the tax credits are used each year of a 10 year period.

2. Major Program Activities. The major program activities the HTC program undertakes to administer this program include:
   - Development of the Qualified Allocation Plan and Administrative Rules;
   - Hold public hearings;
   - Application preparation;
   - Scoring and ranking of applications;
   - Site inspection;
   - Extensive public notifications done both electronically and written at various stages of the application process. Notifications are sent out for every Pre Application submitted, every Application submitted, prior to every Board Meeting, prior to every public hearing and subsequent to every award;
   - Financial feasibility analysis (completed by Real Estate Analysis Division);
   - Previous participation review and evaluation (completed by Compliance and Asset Oversight Division);
   - Make recommendations to Governing Board;
   - Post Award: Commitment, Notifications (both electronic and written), Carryover, 10% Test, Commencement of Construction, LURA, Cost Certification, Amendments, Extensions, Ownership Transfers, Right of First Refusal, Qualified Contract, IRS Reporting;
   - Monitoring (performed by Compliance); and
   - Assisting in the development, scoring, and awarding of CDBG disaster affordable rental housing set-aside Notice of Funds Availability.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or

function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

FY2008 performance measures:

1.1.5. Strategy: Provide Financing through the HTC Program	
Output 1: Multifamily Finance (HTC) Number of Households Served	10,076
Efficiency 1: Avg. Amt. Per Households HTC New	$ 6,757
Efficiency 2: Avg. Dvlp. Cost HTC New	$103,786
Efficiency 3: Avg. Amt. Per Households HTC Rehab	$ 4,863
Efficiency 4: Avg. Dvlp. Cost HTC Rehab	$ 75,311
Explanatory 1 : HTC Number New Constr. Units	7,365
Explanatory 2: HTC Number Rehab. Units	4,896

Note: Households served include units associated with developments awarded tax credits in previous years that required additional subsidy due to the economic downturn and increase costs. These same units were reported in previous years but would not have moved forward without additional credits.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

When the program was first authorized in 1986 and first utilized in 1987-1992, only half of the credits allocated to the state were allocated by the Department (and its predecessor). Allocating agencies nationwide experienced similar under-utilization of their programs. The primary reason was the program was subject to annual re-authorization by Congress, which created sufficient uncertainty to discourage investment in tax credit projects. In 1993, Congress made the program "permanent" by not requiring annual reauthorization. As a result, increasing the popularity of the program over the next few years as well as increasing the number of affordable units produced.

In 1999, SB 1112 76th Texas Legislature established use of the Regional Allocation Formula for TDHCA housing programs. This significantly increased the geographic distribution of the credits within the state.

In 2001, SB 322, 77th Texas Legislature and SB 264, 78th Texas Legislature, both of which were sunset legislation, made significant changes to the program, including changes related to prioritization scoring criteria, community input, and concentration issues.

In 2008, the market price of tax credits decreased substantially, eventually leading to a broad curtailment of the markets in all but the largest metropolitan areas as the credit crisis began to grip the nation. This lower valuation effectively decreased resources available to the state for affordable housing production. The same year, Congress authorized additional tax credits in response to both the economic crisis and affordable housing needs resulting from Hurricane Ike. In 2009, through the American Recovery and Reinvestment Act, Congress authorized the Tax Credit Exchange Program and the Tax Credit Assistance Program to further mitigate the impact of the credit crisis on affordable housing production. (*See discussion of both programs below under "Other Programs."*)

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Beneficiary eligibility:
The program serves tenants whose income does not exceed 50% or 60% of the area median family income (AMFI), depending on the set-aside election of the development owner. A portion of units must be accessible to persons with disabilities. Some developments are restricted to senior citizens.

Local Provider eligibility
Nonprofit and for-profit developers; these may include nonprofits affiliated with a public housing authority.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

TDHCA annually receives a per capita allocation of tax credits. These tax credits are typically referred to as "9%" credits and are allocated through a competitive process. TDHCA may also issue tax credits in support of developments being financed through certain types of tax-exempt bonds. These are commonly referred to as "4%" credits. These do not provide the same level of equity as 9% credits. Because the 4% credits are not awarded from a limited credit pool, the process is noncompetitive; the 4% credits are allocated through the year.

Major activities required in the administration of the Housing Tax Credit Program.

- Development of the Qualified Allocation Plan (QAP) and Administrative Rules for Board approval; the Governor must approve and sign the QAP.
- Development of Pre-Applications and Applications and reference materials; hold application workshops.
- Provision of extensive electronic and written public notifications at various stages of the application process. (Notification more extensive for 9% credits.)
- Public hearings on applications received. (9% credits)
- Review, score and rank applications. (For 4% credits, review to ensure meet threshold)
- Site inspection of proposed developments
- Financial feasibility analysis (*See separate entry for Real Estate Analysis Division)*
- Previous participation review and evaluation to determine if applicants have outstanding compliance issues (*See separate entry for Compliance and Asset Oversight Division*)
- Board recommendation based on threshold/scoring, financial feasibility, and compliance review.
- Undertake Post Award activities, including ensuring initial requirements met prior to issuance of tax credit.
- Long-term monitoring of development to ensure compliance with Land Use Restriction Agreement and IRS requirements (performed by Compliance).

Major Statutory Deadlines

- September 30 – Date by which Qualified Allocation Plan must be submitted to the Board for approval prior to publication for public comment.
- November 15 – Date by which Board must adopt Qualified Allocation Plan and submit to Governor for approval.
- December 1 – Date by which Governor must reject, or modify and approve Qualified Allocation Plan
- March 1 – Date by which an applicant seeking 9% credits within the calendar year must submit an application
- June 30 – Date by which staff must provide the board with a list of approved applications for 9% credits.
- July 31 – Date by which Board shall issue final commitment of 9% tax credits.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Competitive 9% Credits

TDHCA receives an annual per capita allocation of tax credits and can also access unused credits from other states known as the "National Pool." In 2008, Congress authorized additional credits for areas affected by Hurricane as well as credits to be used statewide as a part of the Housing and Economic Recovery Act of 2008 (HERA) Total competitive credits available to Texas in Calendar Year 2008 were as follows:

Per Capita ($2.00 x state population):	$47,808,760
Additional credits from National Pool and Carryover/returned from previous year:	$ 4,751,162
Disaster Recovery and HERA credits:	$19,687,036
Total Amount Available in Calendar Year 2008:	$72,246,958

Successful applicants will receive the tax credits annually over a ten-year period, for a total of $722,469,580. Tax credits received in 2008 were awarded in both SFY 2008 and SFY 2009. TDHCA allocates the credits competitively using the Regional Allocation Formula. In addition, TDHCA must meet following set-asides required by state or federal regulation: 10% Nonprofit; 20% for Rural; 10% At-Risk; 5% USDA, to be taken from At-Risk Set-Aside.

Non-Competitive or "4%" Tax Credits:

TDHCA allocates non-competitive "4%" credits to eligible developments financed using Private Activity Bonds (PABs). The amount of 4% tax credits allocated each year is therefore correlated to the portion of PAB authority utilized for multifamily. In SFY 2008, TDHCA approved $12,980,291 in 4% tax credits, a decrease from previous years that is reflective of the reduction in available credit in the general bond market. These credits supported developments financed by TDHCA, Texas State Affordable Housing Corporation, and local housing finance corporations.

Fee Revenue/ Appropriated Receipts

TDHCA collects fees to defray costs associated with the administration of this program. The Department estimates the fee revenue and includes it in it Legislative Appropriations Request as Appropriated Receipts (AR), which is then appropriated back to the Department through the General Appropriations Act. Rider 12 to TDHCA's bill pattern makes provisions to allow TDHCA to access additional AR under certain conditions. Program fees include Pre-Application Fees, Application Fees, and Commitment Fees. HB 1, 80th Texas Legislature, appropriated $1,049,704 to TDHCA in support of this program; this includes funding for Real Estate Analysis. (*See Strategy A.1.5 of TDHCA's bill pattern as found on p.VII-1 of HB 1, 80th Texas Legislature*.)

Fees collected can also be applied to activities in support of the program, such as the Housing Resource Center and Central Administration. *For information on Housing Tax Credit fees collected that year, see Schedule V - E.*

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

1. Internal programs. The HOME, Housing Trust Fund, and Tax-Exempt Multifamily Bond programs are also administered by the Department and can provide affordable rental housing to low-income Texans.
   - *See HOME sections for a discussion of these activities.*
   - *See the Housing Trust Funds sections for a discussion of these activities.*
   - *See the Tax Exempt Multifamily Bond sections for a discussion of these activities.*

2. External programs.
   - Local Public Housing agencies also administer affordable housing programs under the auspices of the U. S. Department of Housing and Urban Development. Some of these entities also apply for funding in the tax credit program.
   - Local Housing Finance Agencies also have the authority to issue tax-exempt multifamily mortgage revenue bonds which are subject to the same minimum 20/50 or 40/60 set-aside of the tax credit program. Such projects may also qualify for tax credits through the private activity bond authority (*Refer to the Multi-family Bond Program summary*) without going through the normal competitive application process.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

TDHCA is the state's only allocating agency for low income housing tax credits essentially nullifying any concern of duplication. However, affordable housing developments generally require funding from various public and private funding sources; it is not uncommon for applicants to seek funding from various TDHCA programs in support of the same development. This allows developers to reach communities and income groups for which increased subsidy is needed. TDHCA facilitates the layering of tax credit with other TDHCA funding programs such as HOME and HTF by making these funds available concurrently. The demand for affordable housing resources far outweigh supply and therefore duplication is not a concern.

<u>MOUs/contracts.</u>
The Department executed a Memorandum of Understanding with Texas Department of Rural Affairs (TDRA), an agency of the U.S. Department of Agriculture on March 23, 1999. The MOU allows for the sharing of information concerning projects under consideration for funding by Rural Housing that are also applying for an allocation of tax credits. As noted earlier in the document, TDHCA also has a MOU in place with TDRA to jointly administer the rural regional allocation as required by Section 2306.6723, Texas Government Code.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Local government officials must be notified regarding applications in their jurisdiction and can provide public comment on the development. Program rules require that proposed developments be consistent with any existing local, HUD-required Consolidated Plan. Preferential treatment is provided to developments that have local funding. Nonprofits associated with public housing authorities or another local government entity regularly apply for funding. In the case of 4% tax credits, developments supported may have received PAB financing through a local housing finance corporation.

K. If contracted expenditures are made through this program please provide:
- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

In SFY 2008, TDHCA reported awards totaling $61,022,672 in tax credits. Of this, $41,538,348 was in support of the new construction or rehabilitation of 48 developments for 5,164 units that had previously not received tax credits. The remaining balance of final awards were in support of developments which had received tax credit allocations in recent years but needed additional subsidy due to the economic downturn and increased construction costs. While TDHCA does not enter into contracts with tax credit awardees, awardees must meet certain qualifications to be "cost certified" and receive documentation for the tax credit. Also, as is done in other TDHCA programs, Land Use Restriction Agreements (LURAs) are put in place to ensure the long-term compliance with program requirements and other agreements. *See Compliance and Asset Management for more information on long term monitoring of these developments.*

No agency-related professional contracts were expensed to this program. However, fee revenue from the program defrays costs of agency-wide audits and other expenses incurred through Central Administration.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

See Section IX, Policy Issues.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

The Housing Tax Credit program is not only a significant generator of much-needed affordable rental housing but it also is an important economic development tool. In Fiscal Year 2008, TDHCA-funded affordable rental developments provided almost $1.2 billion in estimated local construction and development revenue and nearly the same amount in local tax returns for the communities in which they are located. The Housing Tax Credit Program is not a subsidy program as commonly thought by the general public; no funds are exchanged between developers and tenants or the Department and developers. Additionally, the majority of the developments are privately owned and managed with state oversight regarding the compliance with the rules and regulations under which the allocation was made.

Program webpage: http://www.tdhca.state.tx.us/multifamily/htc/index.htm.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Multifamily Bond Program
Location/Division	Multifamily Finance Production
Contact Name	Robbye Meyer, Director
Actual Expenditures, FY 2008	$112,879
Number of FTEs as of August 31, 2008	2

B. What is the objective of this program or function? Describe the major activities performed under this program.

This program helps finance the new construction or rehabilitation of high-quality, rent-restricted housing affordable to low income households. Through the program, TDHCA issues tax-exempt bonds which are then used to provide low-interest loans to nonprofit and for profit developers. Investors purchasing the bonds do not have to pay federal income tax on earnings associated with the bonds and therefore are willing to accept a lower interest rate, which is then passed on to the developer. In return for interest savings on the loans, developers agree to set aside a certain percentage of a property's units for rental to persons and families of very low, low and moderate income. An additional set-aside is mandated for persons with special needs. Tenant services, such as day care, youth programs, and job training, are also required of the developer.

TDHCA may issue tax-exempt mortgage revenue bonds through two federally authorized bond instruments administered by the U.S. Department of Treasury: Private Activity Bonds (PABs) and 501(c)(3) Multifamily Mortgage Revenue Bonds (501(c)(3) Bonds.)

PABs:
Annually, the IRS provides each state with a per capita amount of Private Activity Bond (PAB) Authority that can be utilized for various purposes, including mortgage loans in support of affordable rental housing. Developments financed through PAB authority that meet requirements for the Housing Tax Credit Program are eligible to receive "4%" tax credits. (*See Housing Tax Credit entry above to learn more about these credits.*)

501(c)(3) Bonds:
These are similar to private activity bond with the following important differences:

- While both nonprofit and for profit developers may receive PAB financing, 501(c)(3) bonds can only be issued in support of a nonprofit developers.
- Recipients of this financing are not eligible to receive "4%" tax credits.
- There is not limit to bond authority provided under this instrument.

This is not a currently active TDHCA program. The inability to receive tax credits through this program generally makes use of this instrument financially unfeasible.

Major program activities. The activities of the Multifamily Bond program include:

- Development of and administration of the program rules,
- Hold public hearings for each development,
- Application materials preparation,
- Scoring, ranking and evaluation of applications,
- Site inspection of each development,

- Extensive written and electronic public notifications at various stages of the application process,
- Notifications are sent out for every Pre Application submitted, every Application submitted, prior to every Board Meeting and prior to every public hearing
- Financial Feasibility Analysis for each development (completed by Real Estate Analysis Division),
- Previous Participation Review (completed Compliance and Asset Oversight Division),
- Review of all Bond documents,
- Make recommendations to Governing Board and Texas Bond Review Board (BRB),
- Bond Closing (review of all closing documents with Bond Counsel and Financial Advisor),
- Post Award: Determination Notice, Notifications (both electronic and written), Commencement Of Construction, LURA, Cost Certification, Amendments, Extensions, Ownership Transfers, Right of First Refusal, Qualified Contract, IRS Reporting
- Monitoring (performed by Compliance and Asset Oversight Division).

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

1.1.8. Strategy: Provide Financing through the Multifamily MRB Program	
Output 1: Multifamily MRB Program Number of Households Served	878
Efficiency 1: Avg. Amt. Per Household MF Bond	$ 63,636
Efficiency 2: Avg. Dvlp. Cost MF Bond	$106,340
Explanatory 1: MF Bond Number New Constr. Units	878

Note: Reflects funds awarded in State Fiscal Year. Subsequently, one applicant did not move forward, decreasing households served to 672 as noted in Section K

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

Production through the programs is highly dependent on the economy. In particular, the program depends on the bond market. The current bond crisis has had a significant impact on the program. Historically, TDHCA issues bonds in excess of a set-aside provided to TDHCA by state law, successfully applying for PAB authority returned by other issuers. However, in state fiscal year 2008, TDHCA was able to utilize only a portion of its statutorily reserved bond authority. Thus situation continues in SFY 2009 and will not improve until investors regain confidence in the market.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

- Population served: The program serves tenants whose income does not exceed 50% or 60% of the area median gross income (AMGI) depending on the set-aside election of the project owner.
- Both For-Profit and Nonprofit developers can access the PAB Bond Program. Only Non-Profit developers may access the 501(c)(3) Program.
- Because the programs are relatively expensive, Bond supported developments tend to be in more urban areas where higher rents and larger complexes help defray the costs.

The Department does not receive applications directly from households or individuals in need of housing. Applications are submitted to the Department by non-profit and for-profit developers.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Major activities required in the administration of the Multifamily Bond Program.

- Development and administration of program rules.
- Hold public hearings for each development.
- Prepare application material.
- Score, rank and evaluate applications,
- Site inspection of each development,
  Extensive public notifications done both electronically and written at various stages of the application process,
- Financial Feasibility Analysis for each development (completed by Real Estate Analysis Division),
- Previous Participation Review (completed Compliance and Asset Oversight Division),
- Review of all Bond documents,
- Make recommendations to Governing Board and Texas Bond Review Board,
- Bond Closing (review of all closing documents with Bond Counsel and Financial Advisor),
- Undertake Post Award activities, including ensuring initial requirements
- Long-term monitoring (performed by Compliance and Asset Oversight Division).

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

<u>Funding sources</u>
Chapter 1372 sets aside 22% of the state PAB authority for multifamily use. Of this, 20% is reserved for use by TDHCA. In SFY 2008, this translated to almost $90 million in PAB authority. Typically TDHCA issues PABs in excess of this authority by accessing PAB authority unused by other issuers. However, due to the economic crisis and its impact on the bond market, TDHCA issued only $41,122,400 in PAB multifamily bonds in FY 2008.

<u>Fee Revenue/ Appropriated Receipts</u>
The Department collects fees on the issuance of multifamily bonds to cover issuance costs, overhead and on-going administrative costs. The Department estimates the fee revenue and includes it in it Legislative Appropriations Request as Appropriated Receipts, which is then appropriated back to the Department through the General Appropriations Act. HB 1, 80th Texas Legislature, appropriated $305,256 to TDHCA in support of this program; this included funding in support of Real Estate Analysis. (*See appropriation for Strategy A.1.8 on page VII-2, HB 1, 80th Texas Legislature*.)

<u>Fees collected in SFY 2008</u>: $1,485,911. *For information on Multifamily Bond fees collected that year, see Schedule V - E.* As with Housing Tax Credit fees, these can also be applied to TDHCA's Real Estate Analysis and Housing Resource Center activities as well as Central Administration.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

1. Internal Programs. The single family bond program and the housing tax credit program are also administered by the Department to provide affordable housing to low income Texans.
   - *See Single Family Bond Program for a discussion of these activities.*
   - *See the Housing Tax Credit Program for a discussion of these activities.*

2. External programs.
   - Local housing finance corporations ("HFCs,") authorized by the Texas Local Government Code, also issue multifamily mortgage revenue bonds. Usually created by cities or counties, these entities provide various forms of housing assistance to their defined jurisdiction. Currently, there are approximately 80 HFCs that are located throughout the state. Additionally, the Texas State Affordable Housing Corporation (TSAHC) is authorized to issue multifamily mortgage revenue bonds statewide.
   - Local issuers typically do not impose the same affordability requirements and rent restrictions as imposed by the Department. However, many of the Applicants who have bonds issued through local HFCs apply for 4% housing tax credits allocated through the Department. The majority of the 4% housing tax credits allocated by the Department are associated with local HFC bond properties and TDHCA bond properties. Due to this, these properties will be monitored by the Department and will be required to comply with the appropriate HTC income and rent limits. Additionally, each property will file a Land Use Restriction Agreement (LURA) with the applicable county and will be monitored by that as well. Local HFCs service their geographic jurisdiction only and are not able to pool properties located across jurisdictional lines within a single bond issue (particularly important for making the issuance of 501(c)(3) bonds feasible). Some areas of the state are not serviced by a local HFC. These are typically smaller cities and rural areas of the state. Furthermore some local HFCs have no interest in issuing multifamily bonds due to lack of staff capacity to implement multifamily bond programs or for other policy reasons such as focusing on single-family home ownership, thus making the Department one of the only viable statewide issuers for multifamily bonds in these areas.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

<u>MOUs/contracts.</u>

- The 75th Legislature, through the passage of HB2577, required the Department to enter into a Memorandum of Understanding (the "MOU") with the Texas Bond Review Board with respect to the issuance of 501(c)(3) bonds (outlined in Chapter 2306.358, Texas Government Code). The MOU stipulates the maximum amount of 501(c)(3) bonds that can be issued each year (maximum of $250 million) as well as provides direction for the Department with respect to the types of transactions issued (new construction versus acquisition and rural versus metropolitan).

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Local government must be notified of applications in area and can also provide public comment.

K. If contracted expenditures are made through this program please provide:
- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

In SFY 2008, TDHCA issued $41,122,400 in multifamily bonds, supporting 3 developments and producing 672 affordable rental units. Developers participating in the program do not enter into a contract with the TDHCA. Rather, a Land Use Restriction Agreement (LURA) is put in place reflective of the owner's obligation under the program. Long-term monitoring for compliance is undertaken by the Office of Compliance and Asset Management as described further in the Program Area description for Compliance and Asset Oversight.

No agency-related professional contracts were expensed to this program. However, fee revenue from the program defrays costs of agency-wide audits and other expenses incurred through Central Administration. It should also be noted that professional contracts entered into in association with the issuance of mortgage revenue bonds are part of the Cost of Issuance (COI) for each bond and is paid through resulting bond proceeds. COI is part of the bond indenture and not reflected in the Department's budget.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

See Section IX, Policy Issues.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

- Current TDHCA PAB bond issuances all receive 4% credits.
- TDHCA issues bonds throughout the year as reservations are received from the Texas Bond Review Board.

Comments provided in Section M for the Housing Tax Credit Program apply here as well.
Program webpage: http://www.tdhca.state.tx.us/multifamily/bond/index.htm.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	HOME Investment Partnership Program
Location/Division	HOME Division
Contact Name	Jeannie Arellano, Director
Actual Expenditures, FY 2008	$41,227,889
Number of FTEs as of August 31, 2008	20

B. What is the objective of this program or function? Describe the major activities performed under this program.

The HOME Investment Partnerships Program (HOME) is funded by the U.S. Department of Housing and Urban Development (HUD). Authorized under the Cranston-Gonzalez National Affordable Housing Act, the purpose of the program is to expand the supply of decent, safe, affordable housing through partnerships with Units of General Local Governments and non-profit or for-profit entities.

To address local needs and housing conditions, the State of Texas HOME Program participates in four eligible activities:

- Owner-Occupied Housing Assistance provides eligible homeowners with funding to rehabilitate or reconstruct their existing home.
- Tenant-Based Rental Assistance offers rental subsidies to eligible tenants for up to 24 months; the household must participate in a self-sufficiency program.
- Homebuyer Assistance provides down payment and other assistance towards the purchase of a home. In addition to providing traditional homebuyer assistance, this category is used to support contract-for-deed conversions and other initiatives that combine homebuyer assistance with rehabilitation or accessibility modifications.
- Rental Housing Development activities assist eligible applicants with the acquisition, construction, and rehabilitation of affordable single-family or multifamily housing.

Community Housing Development Organization (CHDO) Housing Development activities assist these nonprofits with the acquisition, rehabilitation, or new construction of single-family or multifamily affordable housing.

By state law, 95% of HOME funds must be distributed to communities, typically rural, that do not receive HOME funds directly from the federal government; the remaining 5% must serve persons with disabilities and is available statewide.

Major Program Activities.
The major activities the HOME Program undertakes to administer this program include:

- Development of the One-Year Action Plan for HUD, which establishes the funding plan and program activities for the program year (assisted by the Housing Resource Center);
- Development of administrative rules in compliance with statutory changes and federal regulations;
- Preparation of funding notices, application preparation and marketing, including application workshops throughout the state;
- Review, assessment, and determination of applications for award;
- Review for financial feasibility (underwriting) of the proposed projects (assisted by the Real Estate Analysis Division);
- Award and program implementation training to awardees;
- Ongoing, technical assistance to program participants to ensure proper use of funds and compliance with state and

federal regulations through the completion of the contract including contract oversight & performance management;

- Processing of setup and draw requests including the review of participant eligibility and funding disbursements and documenting and maintaining contract files;
- Monitoring (assisted by the Compliance and Asset Oversight Division); and
- Maintaining and reviewing progress of the allocation and disbursement of funds through the HOME Fund Balance Report, and reporting outcomes and performance measurement to HUD through the Consolidated Plan Annual Performance Report (CAPER) and state Match Report (assisted by the Housing Resource Center).

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

1.1.2. Strategy: Provide Funding through the HOME for Affordable Single Family Housing		
Quarter	2008 Target	2008 Actual
Output Measures:		
1 # of Households Assisted with Single Family HOME Funds	1,255	935
Explanatory/Input Measures:		
1 # of Households Assisted through New Construction Activities	30	0
2 # of Households Assisted through Rehabilitation Activities	600	150
3 # Households Assisted through CHDO Mortg. Fin./HBA Assistance	30	0
4 # Households Assisted through Non-CHDO Mortg. Fin/HBA Assistance	445	538
5 # of Households Assisted through Tenant-based Rental Assistance	150	350
Efficiency Measures:		
1 Avg. Amount Per Household for New Construction	$33,000	$0
2 Avg. Amount Per Household for Rehabilitation	$60,000	$66,964
3 Avg. Amount for CHDO Mortgage Financing and Homebuyer Assistance	$10,000	$0
4 Avg. Amount for Non-CHDO Mortgage Financing & Homebuyer Assistance	$15,000	$14,068
5 Avg. Amount of Tenant-based Rental Assistance	$10,000	$10,048

1.1.6. Strategy: Provide Funding through the HOME for Affordable Multifamily Housing		
Quarter	2008 Target	2008 Actual
Output Measures:		
Output 1: HOME Multifamily Number of Households Served	500	663
Explanatory/Input Measures:		
Explanatory 1: HOME CHDO New Constr. Number of Households Served	175	116
Explanatory 2: HOME non-CHDO New Constr. Number of Households Served	125	118
Explanatory 3: HOME CHDO Rehab Number of Households Served	50	19
Explanatory 4: HOME non-CHDO Rehab Number of Households Served	150	410
Efficiency Measures:		
Efficiency 1: Avg. Amt. Per Household HOME CHDO New MF	$ 39,827	$75,378
Efficiency 2: Avg. Dvlp. Cost HOME CHDO New MF	$ 6,002	$150,339
Efficiency 3: Avg. Amt. Per Households HOME non-CHDO New MF	$ 33,703	$74,814
Efficiency 4: Avg. Dvlp. Cost HOME non-CHDO New MF	$ 22,955	$88,582
Efficiency 5: Avg. Amt. Per Household HOME CHDO Rehab MF	$ 5,394	$39,474
Efficiency 6: Avg. Dvlp. Cost HOME CHDO Rehab MF	$ 37,256	$14,309
Efficiency 7: Avg. Amt. Per Household HOME non-CHDO Rehab MF	$ 10,991	$12,258
Efficiency 8: Avg. Dvlp. Cost HOME non-CHDO Rehab MF	$ 60,519	$82,298

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

Important history: There have been no significant changes to the federal regulations governing the HOME program since their formal publication in 1992.

In 2001, the 77th Texas Legislature passed legislation requiring that at least 95% of HOME funds be expended in nonparticipating jurisdictions with the remaining funds serving people with disabilities in urban areas. In 2007, the 80th Texas Legislature amended this provision, requiring that precisely 95% of HOME funds be expended in participating jurisdictions and that 5% of the funds be used for persons with disabilities throughout the state.

The American Recovery and Reinvestment Act of 2009 committed additional HOME funds to the state in support of Housing Tax Credit awardees. (*See separate entry for the Tax Credit Assistance Program under New Programs*.)

While the HOME Program is administratively defined as a component of the Housing Finance Division and has programmatically been co-located with the Single-Family Finance Production Division (2003-2007), the HOME Program is currently administered through its own division.

After the reorganization of the Department in 2003, which placed the HOME program in the Single-Family Finance Production Division, there were a variety of challenges which affected the administration of the program. These challenges affected the program's commitment and expenditure rates and delayed overall progress on many contracts. To address these, state HOME program guidelines and requirements were thoroughly reviewed in 2005 by the TDHCA Governing Board and the HOME program rule was amended for Program Year 2006.

While there were several changes to improve the administration of the program, the most significant rule change included the implementation of zero percent and forgivable loans instead of grants to provide Housing Assistance. Loan documents provided the only method for the State of Texas to assure a state-imposed affordability period and the possibility of repayment and recycling of funds, if the intended recipient no longer owned the property. Additionally, the Department's loan documents provide the only method of successfully achieving an enforceable lien for construction activities on a homestead under the Texas Constitution.

The HOME Division was reconstituted in October 2007 with emphasis in two areas including oversight of the commitment of funds and expenditure rate and contract performance. To meet federal requirements for commitment and expenditure rates, the HOME Division reviews performance indicators monthly and re-allocates funds from non-performing (deobligated) contracts toward areas of greatest need (including Disaster Relief). In order to assist entities administering the HOME Program, a Performance Team was established within the new Division with the sole purpose of reviewing contract progress and providing technical assistance to help administrators meet program performance benchmarks. Additionally, state HOME rules were significantly revised in 2007.

There continue to be some structural changes in the Department and staff regularly reviews contract performance and makes recommendations to improve HOME program administration.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Beneficiary eligibility:
Assisted households cannot exceed 80% of the Area Median Family Income (AMFI), as determined by HUD. The program encourages the targeting of extremely low and very low income households and some activities such as Contract-for-Deed conversions, are restricted to these households.

Provider eligibility:
Units of General Local Government, non-profit and for-profit organizations; rural communities; persons with disabilities.

Since the establishment of the program in 1992, the Department has received approximately $640,082,673 in HOME funds. This investment has constructed 4,793 multifamily rental units, rehabilitated 7,470 owner-occupied homes, assisted 9,779 first-time homebuyers, and provided rental assistance for 6,425 Texas families. In 2008, HOME Investment Partnership Program Funds assisted approximately 1,598 low-income Texas families access safe, decent, affordable housing throughout the state.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Major administrative activities associated with the HOME Program:

- Development of the One-Year Action Plan for HUD, which establishes the funding plan and program activities for the program year (assisted by the Housing Resource Center);
- Development of administrative rules in compliance with statutory changes and federal regulations;
- Preparation of funding notices, application preparation and marketing, including application workshops throughout the state;
- Review, assessment, and determination of applications for award;
- Review for financial feasibility (underwriting) of the proposed projects (assisted by the Real Estate Analysis Division);
- Award and program implementation training to awardees;
- Ongoing, technical assistance to program participants to ensure proper use of funds and compliance with state and federal regulations through the completion of the contract including contract oversight & performance management;
- Processing of setup and draw requests including the review of participant eligibility and funding disbursements and documenting and maintaining contract files;

- Monitoring (assisted by the Portfolio Management & Compliance Division); and
- Maintaining and reviewing progress of the allocation and disbursement of funds through the HOME Fund Balance Report, and reporting outcomes and performance measurement to HUD through the Consolidated Plan Annual Performance Report (CAPER) and state Match Report (assisted by the Housing Resource Center).

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding Sources and Amounts
The State of Texas' HOME program receives an annual allocation of approximately $40,000,000 from the U.S. Department of Housing and Urban Development (HUD). For program year 2008, the Department received $40,043,225, which included an allocation of $266,637 for the American Dream Downpayment Initiative (ADDI) program—a separate homebuyer assistance program allocated in conjunction with the federal HOME allocation.

Funding Formulas.
Federal regulations require that the Department set-aside no less than fifteen percent (15%) of its annual allocation for Community Housing Development Organization (CHDO) activities. An additional set-aside of approximately five percent (5%) is deducted from the CHDO allocation and is to be utilized for CHDO operating funds. The Department also is permitted to set-aside ten percent (10%) of the general allocation for program administration. Typically, the Department retains six percent (6%) and shares the remaining four percent (4%) with contract administrators.

The Department's governing statute also establishes funding requirements. Chapter §2306.111(c), Texas Government Code, requires that the Department set-aside ninety-five (95%) of the state's annual HOME allocation for the benefit of non-participating small cities and rural areas that do not qualify for funding under Cranston-Gonzalez (non-PJs) and set-aside the remaining five percent (5%) for the benefit of persons with disabilities living in any area of the state. The Housing Programs for Persons with Disabilities allocation is calculated and set-aside annually as part of the funding plan.

In an effort to assist the Department in meeting its obligations for Rider 6 related to the Conversion of Executory Contracts, the Department has typically also set-aside $2,000,000 of the Department's annual HOME program allocation to assist with contract for deed activities. This amount is also set-aside annually in the HOME funding plan. The remaining balance of funds is programmed in accordance with the One-Year Action Plan, developed annually through a public process. Historically, the allocation of funds for multifamily has been $5,000,000 with the balance of funds allocated toward single-family activities.

Based on an approximate allocation of $40,000,000, below is an example of distribution of funds for HOME program activities:

Use of Funds	Estimated Available Funding	% of Total HOME Allocation
Administration Funds (10% of Allocation) *	$4,000,000	10%
CHDO Project Funds Set Aside (15% of Allocation)	$6,000,000	15%
CHDO Operating Expenses Set Aside (5% of CHDO Set Aside) *	$300,000	1%
State Mandated Funds for Contract for Deed Conversions *	$2,000,000	5%
Housing Programs for Persons with Disabilities *	$2,000,000	5%
Rental Housing Development Program	$5,000,000	13%
General Funds for Single Family Activities	$20,700,000	52%
Total HOME Allocation	$40,000,000	100%

** The funding for these activities is not subject to the Regional Allocation Formula.*

The General Funds for Single Family Activities are further distributed as follows:

Use of General Funds for Single Family Activities	Estimated Available Funding	% of Total SF HOME Allocation
Homebuyer Assistance	$3,105,000	15.0%
Owner Occupied Housing Assistance	$14,490,000	70.0%
Tenant Based Rental Assistance	$3,105,000	15.0%
Total General Funds for Single-Family Activities	$20,700,000	100%

Finally, as established in Texas Government Code, Chapter §2306.111(d), certain funds will be administered geographically by state uniform service region according to a Regional Allocation Formula determined by the Department.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs.
While the Department's Housing Trust Fund (HTF) may provide program funds toward multifamily development or rental assistance, the programs are not typically similar to the HOME-sponsored activities and often fill a gap that is not served with the State's HOME allocation. The HTF does not currently fund owner-occupied rehabilitation, but has been utilized as gap-financing for HOME-funded owner-occupied housing assistance in areas affected by a state or federally declared disaster. Major differences between the two programs include federal environmental requirements, federal labor standards, and federal match requirements for the utilization of HOME funds.

The Department's Housing Tax Credit (HTC) program provides tax credits for multifamily properties, but HOME funds are also utilized as a subsidy source for the HTC program. Major differences in the two programs include the set-aside of rent-restricted units, additional affordability requirements, environmental requirements, and federal labor standards. Additionally, while HOME funds are offered as below-market interest rate loans, the tax credit program does not provide direct funding toward the development of multifamily units but is used to attract equity investment into the project.

Finally, while the Department has a 'Texas First-Time Homebuyer' program administered by the Texas Homeownership Division, the program offers below market interest rate mortgage loans through a network of participating lenders and serves all areas of Texas. Generally this program is accessed by families living in metropolitan areas. Conversely, the HOME homebuyer assistance program is limited to the non-Participating Jurisdiction areas of the state and assistance is typically provided as a second or third-lien deferred, forgivable loan to the homebuyer for a defined period of time.

External programs.
As stated earlier, other Participating Jurisdictions in Texas receive HOME Investment Partnership program funding directly from HUD and some of the larger cities have housing programs from local revenue sources that fund activities similar to HOME. USDA Rural Development offers home improvement loans and affordable rental housing in rural areas.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

The HOME Division reviews Department programs and services gaps during the planning process to avoid duplication of an existing program or conflict with another Department program. While in limited instances some entities in local Participating

Jurisdictions are eligible to apply for state HOME funds, these entities are required to serve low-income persons with disabilities, as determined by statue. HOME funds can be combined with other programs as appropriate to serve households more effectively. The need for affordable housing in the state greatly outweighs supply so that programs are typically complementary rather then duplicative.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with Local Governments.
The HOME program works with numerous Units of General Local Governments including cities and counties that apply as local administrators for the program. As awardees of HOME Funds, Contract Administrators must enter into a written agreement with the state to administer the HOME program in accordance with all federal regulations and statutory requirements.

K. If contracted expenditures are made through this program please provide:
- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

- Professional Services Expenditures for State Fiscal Year 2008: $23,696 for two agency-wide audits. (Reflects portion expensed to HOME Program.)
- Grant expenditures and encumbrances for Appropriation Year 2008: $40,043,225. It should be noted that due to the late date when HOME funds are provided to the state, Appropriation Year funding is typically not applied to funds awarded within that fiscal year.
- Subrecipient contracts: TDHCA entered into 102 HOME contracts in SFY 2008 and administered approximately 300 existing grants; these were funded primarily through HOME funds received in previous Appropriation Years.
- General purpose of subrecipient contracts: Owner-Occupied Housing Assistance, Tenant-Based Rental Assistance, Homebuyer Assistance (with or without rehabilitation/modification), single family housing development, and multifamily rental development.
- Methods used to ensure accountability for funding and performance: During the application process an evaluation of the applicant's previous participation and review of current contract performance is utilized in determining an organization's capacity to continue to carry out HOME program activities. Once awards are approved, HOME Division staff reviews contract progress against performance benchmarks, offering technical assistance when necessary. In reviewing contract performance, TDHCA staff utilizes both an internal information management system and Contract Administrators who are unable to meet their contractual obligations are subject to having the unused funds deobligated. Deobligated funds are reprogrammed to disaster relief or another identified need.
- Current contracting challenges: There are two challenges currently impacting HOME contract performance. First, the economic downturn and events in the housing industry have impacted the homebuyer assistance program. Potential eligible applicants are either having difficulty meeting first-lien lender requirements to qualify to purchase a new home or are opting not to pursue buying a new home because of concerns regarding market conditions. A more significant challenge is the lack of clear title among potential home repair beneficiaries. The Owner-Occupied Housing Assistance program is the most affected through ownership issues, as real property may have encumbrances or hereditary disputes. The Contract for Deed program also has title issues, where liens on land in the name of the developer challenge the ability to convert the contract for deed arrangement into a warranty deed.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

Historically, the conversion of contract for deed with HOME program funds has been challenging to the Department due to federal HOME commitment and expenditure requirements and the arduous process for Contract Administrators to meet federal requirements in the colonias. Clarification of §2306.255, Texas Government Code, Contract for Deed Conversion Program, to allow any source of funds allocated to the Department to be used in meeting rider requirements for the Conversion of Executory Contracts would assist the Department in meeting its federal commitment requirements as established by HUD. Changes to Rider 6 to allow TDHCA to redirect unused Contract for Deed funds to other areas of need would also help address these issues.

The broadening of eligible subgrantees for the Colonia Model Subdivision Revolving Loan Fund would also be beneficial. Currently, §2306.785, Texas Government Code, limits program loans to (1) Colonia Self Help Centers and (2) Community Housing Development Organizations (CHDOs) certified by the Department. The current process for certifying CHDOs, limits access and opportunity for organizations that have the capacity to participate in the program because they have not received a CHDO designation from the Department and do not want to participate in the HOME program. In addition, the term "CHDO" assumes HOME Investment Partnership program as the source of funds. Federal regulations prohibit the use of HOME funds for revolving loan funds as intended by statute. By expanding the definition to include non-profit organizations with experience in the colonias or organizations that have received a local CHDO designation, the Department would likely be able to broaden its partnership and identify an alternative source of funds to administer this program as defined in statute.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Program webpage: http://www.tdhca.state.tx.us/overview.htm#home

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Real Estate Analysis
Location/Division	Real Estate Analysis
Contact Name	Brent Stewart, Director
Actual Expenditures, FY 2008	$592,513
Number of FTEs as of August 31, 2008	9.5

B. What is the objective of this program or function? Describe the major activities performed under this program.

The primary function of Real Estate Analysis (REA) is to complement the program areas by providing a comprehensive, independent, analytical review of proposed affordable housing developments to Department program staff, executive management and the governing board.

Key Services and Functions: REA provides analysis and support for proposed single and multifamily housing developments considered for funding through the following programs:

- HOME,
- Housing Trust Fund (HTF),
- Housing Tax Credit (HTC),
- Multifamily Bonds, and
- Community Development Block Grant (CDBG) housing programs.

Major Program Activities. The major activities that this area undertakes to perform this function are to:

- Build the technical and professional capacity of Department employees through formalized training of REA staff, which represent future program staff and managers. The training program encompasses all aspects of real estate development, financing, financial analysis, and project feasibility as well as comprehensive exposure to the variety of affordable housing programs administered by the Department.
- Perform written “Credit Underwriting Analysis Reports” that contain analysis and recommendations for all multifamily, single family infrastructure/development, lot acquisition and interim construction transactions funded through the Department. The overall purpose of the underwriting analysis is to determine the likelihood that a real estate project financed or assisted by the Department will be successful in fulfilling the purpose of the program providing the assistance. As part of this feasibility analysis, REA identifies and evaluates risk or potential problems associated with any proposed transaction and, where applicable, provides structuring recommendations to the program staff to mitigate those risks. The underwriting analyses are then used by program staff to make award recommendations to the governing board.
- Complete the Cost Certification review process to ensure proper completion and final viability check of Tax Credit awarded developments and issue IRS form 8609 to each tax credit building that passes this final allocation requirement

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

The chief evidence of the effectiveness of REA is the extremely low level of financial default of LIHTC transactions underwritten by REA. In addition, when measured by the amount of tax credit per unit of affordable housing, the Department has been one of the most efficient agencies that allocate low income housing tax credits in the country.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

Important history not listed.

- Fall, 1993: The Executive Director and Housing Programs Director determined there was a need for independent underwriting.
- May 1996: Internal formalized training program established.
- June 1997: Comprehensive analytical tool developed.
- Summer 2002: Industry workgroup helped to update and expand underwriting standards and establish 10 TAC rules
- August 2002: Began publishing underwriting reports on the Department's web site.
- March 2003: Cost Certification process revamped and transferred to REA
- June 2007: Substantial overhaul made to the design and content of the underwriting report.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

- REA is an internal support function that provides a service to all housing programs in the Department and is a means of gaining informal efficiencies for program support activities that otherwise would be redundant and inconsistent in that it would have to be performed by each program area. REA provides underwriting services specifically for the Housing Tax Credit Program (both the 9% program and the 4% program), the HOME Program, the Housing Trust Fund, Multifamily Tax-Exempt Bond Programs, and housing products offered through the CDBG program and housing development products offered through the Office of Colonia Initiatives.
- Underwriting the feasibility of a project also includes efficient allocation of funds which results in more housing. Without such analysis, funding decisions would be made more on qualitative factors, rather than having an evaluation of the effectiveness and larger effects of the proposed solution. REA also provides each applicant with an early and clear indication that the Department is serious about maintaining rent restrictions by evaluating the rent schedules provided in each application and later on by evaluating owner's financial certifications of projects already in existence and notifying the Compliance staff when abuses are discovered.
- Evaluating the completion documentation in the cost certification process for the Housing Tax Credit Program.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

As stated previously, REA performs services for many program areas of the Department. Each program area has an application and scoring process for determining potential applications that fit program criteria and purposes.

After soliciting applications and scoring for programmatic purposes, the program areas forward the application files to REA for analysis. The credit underwriting process consists of the following major stages:

- Site Inspection Analysis
- Initial Application File Review & Follow-up
- Analysis of the project's proforma, Development Costs, and financing structure.
- Preparation of Credit Underwriting Analysis Report (including recommendation for approval, approval with conditions or denial).
- The Credit Underwriting Analysis Report with conditions for award and improvement to the project is forwarded back to the program area with the application file, where a determination is made for recommendation for approval or denial. REA staff, including the Director of REA, is available at the relevant board meetings where the application will be considered for approval.
- If approved the development will be constructed and significant changes in the development plan will be re-evaluated by REA staff to ensure continued feasibility.
- For developments funded with tax credits and final REA Cost Certification evaluation is done at completion of construction prior to the execution and delivery of the IRS forms that grant official rights to use the tax credits.
- Not all applications are completely underwritten. Some programs, threshold and scoring criteria may eliminate an applicant from consideration. In addition, site inspections may result in a determination that further consideration is not warranted. Similarly, upon initial file review, substantial missing information may be requested and if not provided by the applicant, a report cannot be completed.
- REA is dependent upon the funding cycles of the programs it serves. Therefore, because federal allocations are difficult to predict because of the changing nature and resource allocation of each program, the workload of REA varies year to year.

Field offices. REA has no field offices.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding sources and amounts. REA is currently funded with appropriated receipts associated with TDHCA's housing programs. Total funding for 2008 was $592,513.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs.
None. The underwriting function is a unique support function to the housing programs administered by the Department.

External programs.
Lending institutions typically have a function similar to REA.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

REA is a support function to the program areas of the Department. Because it is independent and centralized, there is no duplication of underwriting activity with other areas in the Department. This centralization also provides for consistent underwriting across all programs of the Department. During the underwriting process the underwriting staff is in direct contact with program staff so that if obstacles to completing the underwriting analysis exist, they will be exposed and resolutions to the problems can be coordinated. While contact varies between program areas, initial missing information is generally reported to the program in memo form and it is their role to contact the applicant and follow-up. When conflicting information is discovered later in the underwriting process, the applicant is generally contacted by phone directly from a REA staff member, though conference calls with Program staff on difficult issues are not uncommon. Any issues remaining after underwriting has completed the report generally become conditions of the report and are either resolved by program staff or become conditions of the Board approval as well.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationship with local governments. The program is not mandated to work with other units of local government; however, it does provide technical assistance from time to time on a requested basis to local housing authorities and forms of government on areas outside of the local entities' expertise or in a capacity to provide independent analysis.

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

No contract expenditures were made through this program. However, REA assisted with the procurement of regional market studies in the past which have helped identify supply and demand of affordable housing in several markets across the state. The Department has had a limited budget for such studies the funding for which comes from fees on Multifamily Private Activity Tax-Exempt Bond administered through the Bond review Board. The amount of these fees available has diminished over the past year due to the downturn in financial institutions interest in funding Tax-Exempt Bond transactions.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

- REA is a unique support service for the Department that is not available to many smaller state housing agencies in other states.
- In addition, REA provides a unique opportunity for staff associates to efficiently learn "on the job" and develop an understanding of the inner workings of the Department and specific program job requirements. Moreover, internal training provides more continuity of staff resources for the Department.
- REA also continues to evolve to affect the more efficient allocation of public funds. REA maintains databases and information of comparable rent information, historical operating expenses of properties funded by the department, development cost information, and utility allowance information from across the state.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Generally not a regulatory program, however REA is responsible for maintaining the Department's rules for third party report providers including Market Studies, Appraisals, Environmental Site Assessments, and Property Condition Assessments. In addition the REA maintains a list of approved Market Study providers who may provide an acceptable Market Study for Tax Credit Developments in accordance with Internal Revenue Code Section 42 requirements.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Office of Colonia Initiatives
Location/Division	Office of Colonia Initiatives
Contact Name	Homero Cabello, Director
Actual Expenditures, FY 2008	$444,493
Number of FTEs as of August 31, 2008	7

Note: Expenditures reflect Administrative funding only.

B. What is the objective of this program or function? Describe the major activities performed under this program.

The fundamental goal of the Office of Colonia Initiatives (OCI) is to improve the living conditions and lives of border and colonia residents and to educate the public regarding the services offered through the Department. The OCI achieves this through administration of the Colonia Self-Help Centers Program and the previously described Texas Bootstrap Loan Program and by providing technical assistance to counties and self-help centers through its Austin office and three border field offices. These field offices, located in El Paso, Laredo and Edinburg help administer OCI programs and services and provide technical assistance to nonprofits, units of local governments, other community organizations and colonia residents along the Texas-Mexico border region regarding affordable housing program available to them. The OCI maintains a toll-free telephone line for similar purposes.

Colonia Self-Help Center Program

The Colonia Self-Help Center (SHC) Program is a statutorily required program that provides concentrated assistance to residents of specified colonias. As required by statute, TDHCA funds SHC in Cameron/Willacy, Hidalgo, Starr, Webb, and El Paso counties; TDHCA has also expanded the program to establish SHCs in Maverick and Val Verde counties. Examples of services provided include housing rehabilitation; new construction; surveying and platting; construction skills training; tool library access for self-help construction; housing finance; credit and debt counseling; grant writing; infrastructure constructions and access; contract for deed conversions; and capital access for mortgages. Five colonias in each county are identified to receive concentrated attention from its respective SHC.

<u>Key services and functions:</u>

The Colonia Self-Help Centers were created pursuant to Subchapter Z of Chapter 2306 of the Texas Government Code which dictates funding including the use and administration of all funds provided to TDHCA through the state's annual Community Development Block Grant allocation from the HUD. Colonia Self-Help Centers are designed to assist individuals and families of low-income and very low-income to finance, refinance, construct, improve, or maintain a safe, suitable home in the colonias' designated service area or in another area the Department has determined is suitable.

(a) A Colonia Self-Help Center's goal is to improve the living conditions of residents in the colonias designated by TDHCA according to the Texas Government Code within a four year period after a contract is awarded.
(b) A Colonia Self-Help Center may serve individuals and families of low-income and very low-income by:
(1) providing assistance in obtaining loans or grants to build, rehabilitate, repair or reconstruct a home;
(2) teaching construction skills necessary to repair or build a home;
(3) providing model home plans;
(4) operating a program to rent or provide tools for home construction and improvement for the benefit of property owners in colonias who are building or repairing a residence or installing necessary residential infrastructure;
(5) helping to obtain, construct, access, or improve the service and utility infrastructure designed to service residences in a

colonia, including potable water, wastewater disposal, drainage, streets, and utilities;
(6) surveying or platting residential property that an individual purchased without the benefit of a legal survey, plat, or record;
(7) providing credit and debt counseling related to home purchase and finance;
(8) applying for grants and loans to provide housing and other needed community improvements;
(9) providing other services that the Colonia Self-Help Center, with the approval of the Department, determines are necessary to assist colonia residents in improving their physical living conditions, including help in obtaining suitable alternative housing outside of a colonia's area;
(10) providing assistance in obtaining loans or grants to enable an individual or a family to acquire fee simple title to property that originally was purchased under a contract for a deed, contract for sale, or other executory contract;
(11) providing access to computers, the internet and computer training pursuant to the General Appropriations Act.
(12) providing monthly programs to educate individuals and families on their rights and responsibilities as property owners.

Major program activities

- The Department provides funding for services delivered at the local level through county government and nonprofits.
- The Department is responsible for:
  a) Development of contracts with affected counties to provide services within identified colonias.
  b) Oversight of program administration and compliance.
  c) Technical assistance.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

FY2008 performance measures

2.1.2. Strategy: Provide Tech. Asst. to Colonias through Office of Colonia Initiatives Field Offices	
Output 1: Number of On-site Tech. Asst. Visits Conducted Annually from the Colonias Field Offices	904
Output 2: Number of Colonia Residents Receiving Tech. Asst. Annually through the Colonia Field Offices	8,666
Output 3: Number of Entities and/or Individuals Receiving Info. Resources	2,987

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

In 1995, the Colonia Self-Help Center Program was established through SB1509, 74th Texas Legislature. Since its inception the program has been funded through a portion of the state's Community Development Block Grant allocation.

In 1996, TDHCA established the Office of Colonia Initiatives (OCI) Division to coordinate Department and legislative initiatives involving border issues and manage a portion of the Department's existing programs targeted for colonia residents.

In 2001 the 77thTexas Legislature created the Texas Department of Rural Affairs through HB 7, transferring the Texas Community Development Program to the new agency. Rider language relating to funding of the SHC Program was amended to require transfer of these funds to TDHCA for continued administration of the program.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

The TDHCA Office of Colonia Initiatives provides technical assistance and resources to units of local government and nonprofits in border communities, low income persons in border communities, colonia residents, and self-help housing providers. Underdeveloped areas outside the jurisdiction of a municipality in particular benefit from the housing and infrastructure improvement provided through the Self-Help Centers.

Colonia Self-Help Center Program:
Beneficiary eligibility
Residents of targeted colonias who earn no more than eighty percent (80%) of the area median family income.

Provider Eligibility
As required by statute, operation of the colonia SHCs is managed by a local nonprofit organization, local community action agency, or local housing authority. Because CDBG funds can only be awarded to units of local government, TDHCA contracts with the affected counties to administer each SHC. These counties subcontract with a nonprofit organization to administer the program in their respective jurisdiction.

Statistics
The Colonia Self-Help Center program serves 35 colonias in the eight counties; the counties have approximately 30,000 colonia residents who qualify as beneficiaries of the SHC Program services.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

The Department distributes Colonia Self-Help Center funds to Unit of Local Governments (Counties) from the 2.5% set-aside of the annual Community Development Block Grant allocation to the State of Texas. In accordance with a note referenced in §487.351 of the Texas Government Code (§2.15 of Acts 2001, Chapter 1367, 77^{th} Legislative Session), a Memorandum of Understanding (MOU) is executed between the Department and the Texas Department of Rural Affairs (TDRA) to transfer federal Community Development Block Grant (CDBG) funds from TDRA to TDHCA for the administration, operation and program activities of the Department's Border Field Offices and the Colonia Self-Help Centers (SHC) pursuant to the provisions of the General Appropriations Act and as authorized pursuant to Subchapter Z of Chapter 2306, Texas Government Code.

The Department allocates no more than $1.2 million per Colonia Self-Help Center award except as provided by Colonia Self-Help Center Rules. If there are insufficient funds available from any specific program year to fund a proposal fully, the awarded county may accept the amount available at that time and wait for the remaining funds to be committed upon the Department's receipt of the CDBG set-aside allocation from the next program year.

Major Administrative Activities Associated with the Colonia Self Help Center Program:

- Development of program rules and Requests for Proposals (if applicable).
- Review proposals received from counties.
- Administer and monitor resulting four-year contracts.

- As needed, coordinate with the Texas Water Development Board and Texas Department of Rural Affairs to eliminate delay in water and wastewater hookups.
- Provide technical assistance and training.

Border Field Offices activities:

- Provide workshops and other training to local officials regarding TDHCA and other affordable housing programs.
- Respond to requests for technical assistance related to affordable housing issues.
- Assist in administration of Bootstrap Home Loan Program, including training, technical assistance, and the servicing of loans.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding sources:
As required by current Rider 8 in TDHCA's bill pattern and Rider 7 in the Texas Department of Rural Affairs (TDRA) bill pattern, 2.5% of the state's annual allocation of Community Development Block Grant funds administered by TDRA must be directed to the Colonia Self-Help Centers. TDHCA receives these funds through an MOU as described in Section I. (Note: Funds used for direct program assistance are not reflected in TDHCA's bill pattern while limited funding transferred to TDHCA for administrative purposes in accordance to the MOU are reflected in TDHCA's bill pattern as an Interagency Contract.) TDHCA also utilizes Housing Trust Fund administrative funds, Appropriated Receipts, and HOME funds to support the OCI.

Total Funding Sources and SFY 2008 funding are as follows:

Federal Funds:
$1,377,276 in Community Development Block Grant Program Funds (This is 2.5% of the annual CDBG allocation and flows through TDRA; it is not reflected in TDHCA's bill pattern.)

$5,112 in HOME funds.

General Revenue:	$ 228,031
Appropriated Receipts:	$ 237,770
Interagency Contracts:	$ 68,069

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs

- The Department's various development and housing programs provide funding for some of the activities undertaken by self-help centers, but the concentrated and coordinated assistance to specific colonias which the program undertakes is unique.
- The Department maintains three field offices along the border that provide technical assistance to the region as well as support to the Colonia Self-Help Centers.
- Differences between border field offices and the Colonia Self-Help Centers.
  - Field offices work primarily with nonprofits and units of local government; whereas the Colonia Self-Help Centers work within the five targeted colonias.

- Field offices primarily provide technical assistance; whereas the Colonia Self-Help Centers also provide direct services.
- Field offices serve multi-county areas, whereas the Colonia Self-Help Centers concentrate on the five targeted colonias.

<u>External program</u>

- Colonias tend to be located outside of municipalities and therefore must rely on county resources. USDA Rural Development also offers housing funds to these areas. While other state agencies (e.g., Texas Water Development Board and Texas Department of Rural Affairs) provide some infrastructure funding statewide, activities funded tend to be complementary to rather than identical to activities funded through Department programs.
- There are other centers providing service to the colonias (e.g., the Texas A & M Community Service Centers), but these centers provide assistance with health and human services rather than housing and community development.
- The Texas Department of Rural Affairs operates field offices, however they are focused on community development specifically.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

<u>Coordination effort</u>

The Department regularly meets with other local, state and federal officials working to improve living conditions in colonias to ensure coordinated, non-duplicative services. This is necessary given the extensive need found in colonias and limited resources available. SHCs are eligible to apply for other TDHCA funding to complement their CDBG-funded activities.

<u>MOUs</u>

In accordance with a note referenced in §487.351 of the Texas Government Code (§2.15 of Acts 2001, Chapter 1367, 77th Legislative Session), a Memorandum of Understanding (MOU) is executed between the Department and the Texas Department of Rural Affairs (TDRA) to transfer federal Community Development Block Grant (CDBG) funds from TDRA to TDHCA for the administration, operation and program activities of the Department's Border Field Offices and the Colonia Self-Help Centers (SHC) pursuant to the provisions of the General Appropriations Act and as authorized pursuant to Subchapter Z of Chapter 2306, Texas Government Code.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

<u>Relationship with local governments.</u>

- The Department contracts with affected counties to oversee the operation of the Colonia Self-Help Centers.
- As requested, the OCI provides technical assistance to communities.

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

No professional contracts were expensed through this office.

As previously noted, funding made through the Colonia Self-Help Center Program flows through the budget of TDRA and not through TDHCA. While not reflected in the TDHCA's budget, TDHCA utilized SFY 2008 SHC funds to support three (3) contracts totaling $1,794,477.

A short summary of the general purpose of those contracts overall:
The Colonia Self-Help Centers are designed to assist individuals and families of low-income and very low-income to finance, refinance, construct, improve, or maintain a safe, suitable home in the colonias' designated service area.

The methods used to ensure accountability for funding and performance:
Internal Standard Operational Procedures ensures that more than one Office of Colonia Initiative employee reviews a draw request prior to final approval. The Department's environmental staff ensures that federal environmental regulations are cleared prior to release of funds for construction activities. The Department's monitoring division monitors each contract minimally two times to verify that all applicable state and federal laws and regulations are followed. The Department's Internal Audit division conducts program audits to determine if the internal processes are being utilized and followed.

A short description of any current contracting problem:
High staff turnover in county departments and nonprofits create a constant need to build the capacity of local partners who oversee the implementation of the Colonia Self Help Centers.

As previously noted, funding made through the Colonia Self-Help Center Program flow through the budget of the Texas Department of Rural Affairs and not through TDHCA. While not reflected in TDHCA's budget, TDHCA utilized SFY 2008 SHC funds to support three (3) contracts totaling $1,794,477.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

While statute specifies that a nonprofit must administer the SHC Program, Community Development Block Grant funds can only be awarded to units of local government. Therefore, TDHCA contracts with counties for the program. The counties subcontract with nonprofit organizations to administer the program.

The Colonia Self-Help Center Program Rules should be utilized to gain a better understanding of this program.

Program webpage: http://www.tdhca.state.tx.us/oci/index.jsp.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Single Family Bond Finance
Location/Division	Bond Finance Division
Contact Name	Matt Pogor, Director
Actual Expenditures, FY 2008	$680,581
Number of FTEs as of August 31, 2008	10

B. What is the objective of this program or function? Describe the major activities performed under this program.

The objective of this function is to maximize the benefits provided to low to moderate income homebuyers through the First Time Homebuyer and the Mortgage Credit Certificate Programs and ensure compliance of all bond covenants. Towards this end, Bond Finance is responsible for the following:

- Structuring and issuance of single family mortgage revenue bonds, the proceeds of which will be used for below market interest rate mortgage loans and down payment assistance to very low, low and moderate income first-time homebuyers. These low interest rate mortgages significantly lower the cost of financing a home.
- Structuring and issuance of mortgage credit certificates.
- Ongoing compliance and monitoring of all single family and multifamily mortgage revenue bonds relating to the bond trust indentures including the payment of bond principal, interest and related fees, including timely and ongoing disclosure notices to the Municipal Securities Rulemaking Board, as required by the Securities Exchange Commission.

Major activities of the Bond Finance Division

- Structure single family mortgage revenue bonds with underwriting syndicate, bond counsel and financial advisor.
- Structure and administer Mortgage Credit Certificate Programs.
- Oversee sale of bonds to investors (through underwriting syndicate) and allocation of proceeds received from the sale to qualifying lending institutions throughout Texas.
- Monitor single family and multifamily bonds to ensure compliance with bond indentures, supplemental bond indentures, investment agreements, continuing disclosure agreements, and other legal documents.
- Monitor single family variable rate bond and interest rate swap performance.
- Monitor and negotiate liquidity provider contracts.
- Monitor mortgage pipeline and performance of program funds. Implement buydown and down payment assistance programs as necessary.
- Disseminate annual operating data, annual financial information, and material event notices required by the Securities and Exchange Commission.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

TDHCA's bonds have historically had high ratings, allowing TDHCA to offer lower interest rates to the low and moderate income households served. TDHCA's strong portfolio and flexibility have thus far allowed the agency to weather the current financial crisis. While TDHCA was unable to issue single family bonds in SFY 2008, TDHCA is in the process of issuing

$102.6 million in bonds despite the continuing crisis. TDHCA is able to accomplish this through the cooperation of the Comptroller of Public Accounts, which is supporting TDHCA's single family bonds by serving as the "liquidity provider" for the portfolio. *(See discussion on this issue in Section IX, Policy Issues.)*

See entry related to the First Time Homebuyer for relevant performance measures.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

- Tax-exempt and taxable bonds have been issued by the Department and its predecessor agency since 1980.
- The Tax Reform Act of 1986, passed laws affecting the tax code, including placing a per capita ceiling cap on the amount of tax-exempt financing that could be issued for private-activity purposes.
- Due to the current credit crisis, TDHCA was not able to issue bonds in SFY 2008; TDHCA issued only mortgage credit certificates during this timeframe.
- Despite the continuing crisis, TDHCA's strong portfolio and the cooperation of the Comptroller of Public Accounts will allow the Department to issue bonds in SFY 2009.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

See entry for First Time Homebuyer Program to find information on borrower eligibility.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

<u>Major activities of the Bond Finance Division</u>

- Structure single family mortgage revenue bonds with underwriting syndicate, bond counsel and financial advisor.
- Structure and administer Mortgage Credit Certificate Programs.
- Oversee sale of bonds to investors (through underwriting syndicate) and allocation of proceeds received from the sale to qualifying lending institutions throughout Texas.
- Monitor single family and multifamily bonds to ensure compliance with bond indentures, supplemental bond indentures, investment agreements, continuing disclosure agreements, and other legal documents.
- Monitor single family variable rate bond and interest rate swap performance.
- Monitor and negotiate liquidity provider contracts.
- Monitor mortgage pipeline and performance of program funds. Implement buydown and down payment assistance programs as necessary.
- Disseminate annual operating data, annual financial information, and material event notices required by the Securities and Exchange Commission.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding sources.
Chapter 1372, Texas Government Code, sets aside 28% of the state PAB authority for single family use. Of this, one-third is reserved for use by TDHCA. TDHCA can utilize the authority to issue tax-exempt single family mortgage revenue bonds in support of the First Time Homebuyer Program or to issue Mortgage Credit Certificates. In accordance with federal law, TDHCA must reserve 20% of resulting bond proceeds and certificates for federally designated target areas. Additionally, Rider 11 of TDHCA's bill pattern requires that 30% of bond proceeds be reserved for down payment assistance for low income persons. Both set-asides are in place for one year, at which time funds become available to all groups.

Like other issuers, TDHCA can expand available resources by seeking additional PAB cap released by other issuers or by combining the tax-exempt bonds with taxable bonds. With the exception of the previously discussed set asides, funds are available statewide on a first come, first-serve basis through participating lenders.

SFY 2008 Funding
In SFY 2008, this translated to almost $190 million in PAB authority. Due to the economic crisis and its impact on the bond market, TDHCA issued no bonds in SFY 2008 but was able to make $15 million in MCC available; this utilized $60 million of TDHCA's single family Private Activity Bond authority.

Fee Revenue/Appropriated Receipts
Appropriated receipts defray administrative costs associated with the program and are derived from administrative fees received by the Department for its services to ensure compliance with covenants and agreements. Depending on the bond structure, the fees vary from ten basis points to thirty-five basis points on mortgage loans outstanding, paid semi-annually. (A basis point is one-tenth of one percent.) The Department also receives an administrative fee for its services in issuing each MCC. The Department estimates the fee revenue and includes it in it Legislative Appropriations Request as Appropriated Receipts, which is then appropriated back to the Department through the General Appropriations Act. HB 1, 80th Texas Legislature appropriates $1,160,906 in support of TDHCA's Single Family Mortgage Revenue Bond and Mortgage Credit Certificate programs under Strategy A.1.1. Single family fees also support other TDHCA areas involved in the promotion of homeownership or in support of these programs, including the Office of Colonia Initiatives, the Housing Resource Center, and Central Support. (*See Section V-E for information on fees collected*.)

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs
There are no internal programs that carry out the same activities as the FTHB Program. Homebuyer assistance currently available through the HTF and HOME programs strictly entails down-payment assistance.

External programs
- There are approximately 51 local Housing Finance Authorities (HFAs) throughout Texas. The local HFAs compete through the lottery system at the Texas Bond Review Board for two-thirds of the bond cap reserved for single family mortgage loans. Like the Department, local HFA's also have the authorization to issue Tax-Exempt Mortgage Revenue Bonds to provide low-interest rate mortgage loans to first time homebuyers. For the most part, the local HFAs' programs are identical in nature to the state's program with the exception of service area. Local HFAs may only originate loans in their designated service area, whereas TDHCA serves the entire State of Texas. Also, local

HFA programs do not have the same set-aside restrictions found in the Department's programs. For the first one-year period after bonds are issued, the Department is requiring that 30% of the funds made available for financing mortgage loans be set aside for individuals and families of very low income (60% of applicable median family income). The Department also requires set-asides for rural and underserved areas and areas struck by natural disaster.

- The Texas State Affordable Housing Corporation (TSAHC) is a nonprofit corporation engaging in single family and multifamily lending and is a statewide issuer of housing finance bonds. TSAHC offers first-time homebuyer programs to specific professionals working in the state of Texas. Currently the Corporation administers the Homes for Texas Heroes and Professional Educators Home Loan Programs. The programs are available statewide on a first-come, first-served basis, and may offer low interest mortgage loans and down payment assistance.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

Coordination efforts

The demand for Mortgage Revenue Bond financing in the State of Texas far outweighs the supply of funding afforded to both state and local Housing Finance Agencies. Local Mortgage Revenue Bond programs supplement the state's effort to provide affordable permanent financing.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

TDHCA and the Federal Housing Administration (FHA) entered into a Memorandum of Understanding (MOU) to promote safer, affordable government-insured mortgages in Texas. The MOU strengthens the partnership between the two governmental entities to assist each other to protect the financing process through adhering to underwriting rules for mortgages insured pursuant to the FHA's mortgage insurance programs; training lenders on FHA loan origination through a lender outreach and education plan; providing homeownership educator and counselor outreach and education; providing back-to-basics consumer homebuyer education; and helping lenders become familiar with, and understanding fair lending practices.

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

No agency-related professional contracts were expensed to this program. However, fee revenue from the program defrays costs of agency-wide audits and other expenses incurred through Central Administration.

It should also be noted that professional contracts entered into in association with the issuance of mortgage revenue bonds are part of the Cost of Issuance (COI) for each bond and is paid through resulting bond proceeds. COI is part of the bond indenture and not reflected in the Department's budget.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

Sections 2306.142(i) and 2306.142(l) of the Texas Government Code require the Department to allocate not less than 40% of the total single family mortgage revenue bond loan volume to meet the credit needs of borrowers in underserved economic and geographic submarkets in the state. The Department has determined it is unfeasible or will damage the financial condition of the Department to issue bonds with these restrictions. The Department currently is granted a waiver from this requirement by the Texas Bond Review Board with each bond issuance. Removal of these provisions would remove the necessity of requesting an annual waiver.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Program webpage: http://www.tdhca.state.tx.us/hf_bond_finance.htm.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	First Time Homebuyer Program, Mortgage Credit Certificate Program
Location/Division	Texas Homeownership Division
Contact Name	Eric Pike, Director
Actual Expenditures, FY 2008	$421,017
Number of FTEs as of August 31, 2008	5

B. What is the objective of this program or function? Describe the major activities performed under this program.

The objective through TDHCA's Texas Homeownership Division is to offer safe, conventional homeownership products to very low, low, and moderate income Texans who are ready for homeownership. Funds for this program are driven by a process where TDHCA receives a percentage of the state's tax-exempt private activity cap bond authority to finance below market interest loans, down payment assistance and mortgage credit certificates. The Department is responsible for issuing single-family mortgage bonds and mortgage credit certificates. The Department then distributes the resulting bond proceeds and mortgage credit certificates through a statewide network of private lenders who extend assistance to eligible households through the First Time Homebuyer and Mortgage Credit Certificate programs described in more detail below.

<u>First-Time Homebuyer Program</u>
The program is offered through a statewide network of participating lenders. The program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115% (this can reach 140% if the buyer is purchasing in a "targeted" area) of AMFI limitations, based on IRS adjusted income limits and the purchase price of the home must not exceed stipulated maximum purchase price limits. A minimum of 30% of program funds will be set aside to assist Texans earning 80% or less of program income limits.
The First Time Homebuyer Program may offer eligible homebuyers below market interest rate loans and/or down payment assistance. The First Time Homebuyer Program offers income eligible homebuyers a grant equal to 5% of the mortgage amount. To be eligible for that assistance, the buyer's income generally may not exceed 60% of the Area Median Family Income (AMFI) if purchasing a property in a Non-Targeted area. If purchasing in a Targeted area, which includes the Rita GO Zone, the buyer's income can go up to 140% AMFI based on family size. The program is available on a first-come, first served basis to individuals or families who meet income and home purchase requirements and have not owned a home as their primary residence in the past three (3) years. The program income and purchase price limits may be higher for eligible homebuyers purchasing in a targeted area or a disaster declared area. It should also be noted that homebuyers must complete a pre-purchase homebuyer education course prior to loan closing.

<u>Mortgage Credit Certificate Program</u>
TDHCA has the ability to issue Mortgage Credit Certificates (MCCs) through its bond authority. The program is offered through a network of approved lenders. An MCC provides a tax credit that reduces the federal income taxes, dollar-for-dollar, of qualified buyers purchasing a qualified residence. The credit cannot be greater than the annual federal income tax liability, after all other credits and deductions have been taken into account. MCC tax credits in excess of a borrower's current year tax liability may, however, be carried forward for use during the subsequent three years.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

Performance figures for 2008:

1.1.1. Strategy: Provide Mortgage Financing & HBA through the Single Family Finance Division	
Output 1: Number of SF Loans and MCCs	2,057
Efficiency 1: Avg. Amt. Per Households FTHB w/out DPA	$ 128,652
Efficiency 2: Avg. Amt. Per Household FTHB w/ DPA	$ 97,738
Efficiency 3: Avg. Amt. Per Household New Constr. SF Bond	$ 22,417
Efficiency 4: Avg. Amt. Per Household Rehab SF Bond	-
Efficiency 5: Avg. Mortgage Credit Cert. Amt.	$ 38,533
Explanatory 1: FTHB Number of Households Served w/out DPA	1,001
Explanatory 2: FTHB w/ DPA Number of Loans	1,015
Explanatory 3: New Constr. Number of Households Served	18
Explanatory 4: Rehab Number of Households Served	0
Explanatory 5: Number of MCCs	23

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

See Bond Finance entry.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Borrower eligibility.

- Program recipients in non-targeted areas can earn no more than 100% of area median family income (AMFI). Families of three or more can earn up to 115% AMFI. Program recipients in targeted areas can earn no more than 120% AMFI and families of three or more can earn up to 140% AMFI.
- Borrower(s) must be a first time homebuyer (no homeownership of principal residence within past three years), except for in targeted areas, disaster declared areas, or those who are qualified veterans.
- The acquisition cost of the property cannot exceed 90% of the Average Area purchase price for non-targeted areas; 110% of Average Area purchase price for targeted areas and disaster declared areas, as established by the Treasury Department.

Local Providers.

The programs are offered through participating for profit and nonprofit private lenders.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

The Texas Homeownership Division is responsible for the day-to-day administration of certain activities related to the lending of MRB loan funds and the issuance of mortgage credit certificates. While the actual issuance of the bonds is the responsibility of the Bond Finance Division, it is critical that the Bond Finance Division and the Texas Homeownership Division work in concert throughout the bond issuance process.

The duties that are the responsibility of the Texas Homeownership Division as they relate to the FTHB Program and Mortgage Credit Certificate Program include:

1. Review Preliminary and Final Bond Program and Mortgage Credit Certificate Program Documents; Homeownership Division provides important input to Bond Finance regarding current market needs.
2. Process Lender Invitations to Participate
3. Oversee Lender Approval Process
4. Public Notification of available funds (speaking at workshops and conferences)
5. Lender Training
6. Program Marketing/Advertising
7. Consumer Hotline Administration
8. Tax Compliance Review
9. Monitoring of Lenders, Allocations, and Program Deadlines

The Texas Homeownership Division also administers the Mortgage Advantage Program and the 90-Day Down Payment Assistance Program. TDHCA created the 2 down payment assistance programs in an effort to monetize the $8,000 federal first time homebuyer tax credit made available through the American Recovery and Reinvestment Act of 2009. The 90 Day Down Payment Assistance Program provides up to $7,000 for borrowers purchasing their first home. The 2nd lien loan is zero percent interest for 90 days; thereafter, it amortizes for 2 years at a 10% interest rate. The Mortgage Advantage Program provides up to $6,000 for down payment assistance and must be used in conjunction with the Department's Mortgage Revenue Bond or Mortgage Credit Certificate Programs. This 2nd lien loan program is also 0% interest for 120 days; thereafter, it amortizes for 5 years at a 7% interest rate.

Administration of the Mortgage Advantage Program and the 90 Day Down Payment Assistance Program include the following responsibilities:

1. Developing Lender Agreements
2. Process loan packages.
3. Review and approval of loan files to ensure Lender is in compliance with the program guidelines.
4. Prepare and issue 2nd lien loan documents.
5. Review loan closing packages for proper compliance and documentation upon funding of the loan.

As part of the public notification process, staff participates in numerous homebuyer fairs, housing summits and Realtor sponsored events around the state.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

See Bond Finance entry.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Internal programs
There are no internal programs that carry out the same activities as the FTHB Program; however, homebuyer assistance is also available through the Department's HOME and HTF programs. The Bootstrap Program offers mortgages, but only through self-help housing.

External programs

- There are approximately 51 local Housing Finance Authorities (HFAs) throughout Texas. The local HFAs compete through the lottery system at the Texas Bond Review Board for two-thirds of the Private Activity Bond cap reserved for single family mortgage loans. Like the Department, local HFA's also have the authorization to issue Tax-Exempt Mortgage Revenue Bonds to provide low-interest rate mortgage loans to first time homebuyers. For the most part, the local HFAs' programs are identical in nature to the state's program with the exception of service area: Local HFAs may only originate loans in their designated service area, whereas TDHCA serves the entire State of Texas. Also, local HFA programs do not have the same set-aside restrictions found in the Department's program. For a period of one-year after bonds are issued, the Department is required to set-aside 30% of its lendable proceeds to finance mortgage loans for individuals and families at 80% and below the area median family income. In an effort to facilitate the origination of these loans, the Department is also required to provide down payment and closing cost assistance.
- The Texas State Affordable Housing Corporation (TSAHC) is a quasi-governmental nonprofit corporation engaging in single family and multifamily lending and is a statewide issuer of housing finance bonds. TSAHC offers first-time homebuyer programs to specific professionals working in the state of Texas. Currently the Corporation administers the Homes for Texas Heroes and Professional Educators Home Loan Programs. The programs are available statewide on a first-come, first-served basis, and may offer low interest mortgage loans and down payment assistance.
- The Veteran's Land Board offers homebuyer assistance.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

Coordination efforts

- In December 2004, TDHCA entered into a partnership with the Texas Association of Realtors (TAR) as a means of helping more Texans become first time homeowners. This initiative, United Texas: Housing Initiatives That Work, included a major effort beginning in 2005 to train the 90,000 Realtors® in Texas on how to help first time homebuyers obtain low-cost mortgage financing. The 4-hour MCE course provides Realtors® with information on the mortgage loan process, real-estate statistics, as well as specific program information on TDHCA's affordable housing programs, Texas Veterans Land Board programs and USDA Rural Development programs. As of July 2009, division staff has participated in 79 classes, training approximately 3,400 Texas Realtors®.

- The demand for Mortgage Revenue Bond financing in the State of Texas far outweighs the supply of funding afforded to both state and local Housing Finance Agencies. Local Mortgage Revenue Bond programs supplement the state's effort to provide affordable permanent financing.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

TDHCA and the Federal Housing Administration (FHA) entered into a Memorandum of Understanding (MOU) to promote safer, affordable government-insured mortgages in Texas. The MOU strengthens the partnership between the two governmental entities to assist each other to protect the financing process through adhering to underwriting rules for mortgages insured pursuant to the FHA's mortgage insurance programs; training lenders on FHA loan origination through a lender outreach and education plan; providing homeownership educator and counselor outreach and education; providing back-to-basics consumer homebuyer education; and helping lenders become familiar with, and understanding fair lending practices.

K. If contracted expenditures are made through this program please provide:

- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems

See Bond Finance entry.

No contract expenditures were made through this division for fiscal year 2008; however, it should be noted that 2,057 households benefited from $232,874,750 in loans or mortgage credit certificates issued through a network of 95 lenders statewide (450 branch offices). These loans are funded through bond proceeds that are not reflected in the TDHCA budget.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Division webpage: http://www.tdhca.state.tx.us/homeownership/index.htm

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Texas Statewide Homebuyer Education Program
Location/Division	Texas Homeownership Division
Contact Name	Eric Pike, Director
Actual Expenditures, FY 2008	$71,880
Number of FTEs as of August 31, 2008	NA

B. What is the objective of this program or function? Describe the major activities performed under this program.

In 1997, the 75th Texas Legislature passed HB 2577, which charged the Department with the development and implementation of a statewide homebuyer education program, designed to provide information and counseling to prospective homebuyers about the home buying process. The Texas Statewide Homebuyer Education Program (TSHEP) was created to fulfill this mandate. TDHCA funds TSHEP and contracts with training professionals to offer certification training to nonprofit organizations including Texas Agriculture Extension Agents, units of local government, faith-based organizations, CHDOs, community development corporations, community-based organizations and other organizations with a proven interest in community building.

Key services and functions.
The program provides homebuyer educational training to nonprofit organizations located throughout the state.

Major program activities.

- Program development,
- Identifying and accessing funding sources,
- Development of Request for Proposals,
- Scoring of proposals and final award determination,
- Program monitoring,
- Coordination of TSHEP partnerships.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

Through TSHEP, approximately 560 organizations have been trained and to date a total of 26 workshops have been conducted.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

Important history.

- The 75th Texas Legislature directed TDHCA to develop a statewide homebuyer education referral list and make it available on the agency website and through a toll-free number to locate TSHEP providers. The Department willingly exceeded this mandate by expanding TSHEP to provide training to local providers and establishing the parameters of the current program.

- In response to the foreclosure crisis, TSHEP has significantly increased its training materials specific to this issue.

See discussion of Foreclosure Mitigation Counseling (FMC) Program under New Programs.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Population served.

- The program is designed to serve consumers interested in purchasing a home, especially underserved populations, including lower income persons/households, minority populations, persons with disabilities, and persons living in colonias.
- Recently, under the Mortgage Revenue Bond and Texas Mortgage Credit Programs administered through the Texas Homeownership Division, all homebuyers are required to complete a homebuyer education course and can use the TSHEP homebuyer education providers.
- Organizations eligible for training including Texas Agriculture Extension Agents, units of local government, faith-based organizations, CHDOs, community development corporations, community-based organizations and other organizations with a proven interest in community building.

Key services and functions. The program provides Homebuyer educational training to nonprofit organizations located throughout the state.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Major program activities.

- Program development,
- Identifying and accessing funding sources,
- Development of Request for Proposals,
- Scoring of proposals and final award determination,
- Program monitoring,
- Coordination of TSHEP partnerships.

On an annual basis, the Department contracts with its service provider, currently the nationally recognized Neighborhood Reinvestment Corporation dba NeighborWorks America, to conduct TSHEP sponsored workshop trainings within the state. The trainings generally consist of basic pre- and post purchase counseling trainings and continuing education courses.

- Entities eligible to receive training: Nonprofit organizations (e.g. units of local government, public housing authorities, faith-based organizations, Community Housing Development Organizations).
- Training Component: Through the workshops offered, local nonprofit organizations are taught the principles and applications of comprehensive pre- and post purchase homebuyer education and certified as homebuyer education providers. The priority of the program is to ensure that there are nonprofits trained and qualified to address the demand for homebuyer education in all areas of the state and underserved areas.

- Targeted Beneficiaries: All Texans interested in purchasing a home are eligible to attend classes provided by a certified organization. Homebuyer education providers are encouraged to market to underserved populations (e.g. persons with disabilities, minorities, and low-income populations) and underserved areas (those that do not already have easy access in their area).

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Funding sources.
Housing Trust Fund Single Family General Revenue - $71,880. (TDHCA uses HTF administrative funds for this purpose.)

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

External programs.
There are many organizations throughout the state that conduct homebuyer education classes. The intention of TSHEP is to increase the ability of the existing successful providers to reach potential homebuyers, as well as take a more comprehensive approach. While there are numerous organizations in many cities in Texas, there is no one organization that oversees the operations or assures quality of homebuyer education providers throughout the state.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

The goal of TSHEP is to bring comprehensive homebuyer education to all 254 Texas counties without duplicating the efforts of successful existing homebuyer education programs. The Department is not providing services directly but is using existing organizations to provide these services.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Relationships with local governments.
Units of local government are eligible to attend the TSHEP training seminars.

K. If contracted expenditures are made through this program please provide:
- the amount of those expenditures in fiscal year 2008;
- the number of contracts accounting for those expenditures;
- a short summary of the general purpose of those contracts overall;
- the methods used to ensure accountability for funding and performance; and
- a short description of any current contracting problems.

TDHCA expended $71,880 on a contract to provide training to homebuyer education counselors across the State of Texas. TDHCA was present during all training sessions and employs standard contract monitoring practices. TDHCA is not experiencing any contracting problems.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Division webpage: http://www.tdhca.state.tx.us/homeownership/tshep/index.htm

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:
- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

COMPLIANCE

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Compliance and Asset Oversight
Location/Division	Compliance and Asset Oversight
Contact Name	Patricia Murphy, Chief of Compliance and Asset Oversight
Actual Expenditures, FY 2008	$2,980,558
Number of FTEs as of August 31, 2008	29

B. What is the objective of this program or function? Describe the major activities performed under this program.

The Compliance and Asset Oversight (CAO) Division ensures compliance with federal and state housing programs through desk reviews and on-site monitoring visits. CAO monitors entities that receive funding under the Housing Tax Credit (HTC), Tax Exempt Bond, HOME Investment Partnerships Program, Housing Trust Fund (HTF), and Community Development Block Grant (CDBG) programs. The monitoring performed by the Compliance and Asset Oversight division is required by federal statues and laws. For example, Treasury Regulation 1.42-5 requires any agency that allocates Housing Tax Credits to monitor for compliance. Likewise, participating jurisdictions that allocate HOME funds must monitor for compliance.

Compliance and Asset Oversight is comprised of 3 sections:

- Contract Monitoring,
- Compliance Monitoring and
- Physical Inspections

<u>Contract Monitoring</u> – The Contract Monitoring section is responsible for monitoring HOME, HTF, CDBG Disaster Relief, and CDBG Self Help Center contracts. Contracts are selected for monitoring based on a risk assessment. Many of the contracts selected for monitoring are single family owner occupied rehabilitation and Tenant Based Rental Assistance contracts under the HOME and HTF programs. Rental contracts are monitored during the construction period for compliance with Davis Bacon Labor Standards and cost allowability. The Contract Monitoring section is also responsible for ensuring that all Department subrecipients are in compliance with federal and state Single Audit requirements.

Contract Monitoring also completes Previous Participation reviews to ensure that applicants are eligible to receive Department funds and are not affiliated with a property in material noncompliance in accordance with statutory requirements. Developers/Administrators found to be affiliated with property in material noncompliance or with outstanding issues of noncompliance are not eligible for funding through the Department.

<u>Major activities</u> -

- Conducts on-site program and financial review of subrecipient records to ensure compliance with applicable requirements.
- Performs physical inspections of single family homes to ensure compliance with applicable property standards.
- Conducts desk reviews of subrecipient records to ensure compliance with applicable requirements.
- Prepares and distributes monitoring reports to subrecipients.
- Reviews corrective action submitted by administrators in response to monitoring letters.

- Reviews Single Audit reports for all Department subrecipients to ensure compliance with OMB Circular A-133 requirements.
- Reviews applicant compliance history to ensure eligibility to receive new award.

Compliance Monitoring – The Compliance Monitoring section monitors the multifamily rental portfolio to ensure that units are leased to low income households, rents are properly restricted and for other requirements of their Land Use Restriction Agreement. Examples of additional requirements include, affirmative marketing, leasing to special needs households, and providing social services.

Compliance and Asset Oversight monitors the multifamily rental portfolio funded by the Department. The Division is divided into four sections:

Major activities -

- Provides training and technical assistance to owners and management companies.
- Conducts on-site monitoring reviews. While on-site, staff reviews at least 20% of the lease files to ensure compliance with program requirements.
- Provides written monitoring letters with required corrective action and deadlines.
- Reviews owner corrective action submitted in response to monitoring letters.
- Submits form 8823 (Report of Noncompliance) to the Internal Revenue Service to report noncompliance, whether or not corrected.
- Scores all noncompliance in the Department's Compliance Status System.
- Reviews the Annual Owner's Compliance Report for all rental properties funded by the Department
- Conducts quarterly desk reviews of HOME and HTF properties during lease up.
- Provides training to owners and management staff on an on-going basis.

Physical Inspection – The Physical Inspection section monitors during construction to ensure compliance with accessibility laws (§504 of the Rehabilitation Act of 1973 and the Fair Housing Act) and to ensure that amenities promised at the time of application are present. Once construction is complete and the property is operating, the Physical Inspections section also inspects to ensure that the properties are decent, safe, sanitary, in good repair and suitable for occupancy.

Major activities -

- Conducts physical inspections of rental housing using the Uniform Physical Condition Standards (UPCS) from the U.S. Department of Housing and Urban Development's Real Estate Assessment Center (HUD and REAC). While on-site, at least 20% of the low income units are physically inspected.
- Oversees contracts with outside vendors that conduct UPCS inspections on behalf of the Department.
- Evaluates and scores UPCS reports.
- Sends notices of noncompliance to owners, management agents, and site staff outlining noted UPCS violations.
- Reviews owner's corrective action submitted in response to notices of noncompliance.
- Submits form 8823 (Report of Noncompliance) to the Internal Revenue Service to report noncompliance, whether or not corrected.
- Scores all noncompliance in the Department's Compliance Status System.
- Reviews architectural plans for properties receiving HOME and HTF awards for conformance with program requirements including accessibility.
- Conducts on-site mid-construction inspections of HOME and HTF properties prior to 50% draw.
- Conducts and/or coordinates final construction inspection of all multifamily properties funded by the Department.
- Educates developers and owners in the UPCS inspection protocol, construction requirements and accessibility.
- Assists other Divisions and Sections in conducting physical inspections.

Other miscellaneous major activities performed by Compliance and Asset Oversight:

- Reviewing Land Use Restriction Agreements for all Housing Tax Credit properties prior to recording.
- Publishing income and rent limits.
- Calculating utility allowances.

The Compliance and Asset Oversight Division is also responsible for property on which the Department has foreclosed. Currently there are three assets owned by the Department.

Under any program, if owner/administrator fails to comply, the Compliance and Asset Oversight Division refers the entity to the Department's Administrative Penalties Committee with recommended financial penalties.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

4.1.1. Strategy: To Monitor & Inspect for Federal & State Housing Program Requirements	
Output 1: Number of Monitoring Reviews	5,931
Output 2: Number of Desk Rvws.	4,885
Output 3: Number of Onsite Rvws.	1,046
Output 4: Number of Tech. Asst & Public Info. Req. Completed	6,075
Output 5: Number of Application-Related Instruments Processed	977
Efficiency 1: Avg. Cost to monitor a rental property	$ 1,055
Explanatory 1: Total Number of Rental Developments in the Compliance Monitoring Portfolio	2,037
Explanatory 2: Total Number of Units Administered	240,135
Outcome 1: Percent of Multifamily and/or Single-Family Rental Properties Monitored Annually	100%
Outcome 2: Percent of Contracts Administered Annually	100%
Outcome 3: Percent of Rental Developments in Material Non-Compliance	11%

The Compliance and Asset Oversight Division always follows state and federal mandated monitoring requirements. The Texas Department of Housing and Community Affairs has been cited by the Internal Revenue Service as an agency with a model compliance program.

Although the process for administrative penalties is still in its infancy, it is proving to be a very effective means for resolving noncompliance. Likewise, the previous participation reviews have been highly successful in ensuring compliance.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

Contract Monitoring –

- An effort to ensure the independence of the monitoring functions from the program administration functions resulted in the creation of the Contract Monitoring section. Increased focus on monitoring and separation of duties within the Department has resulted in a more independent assessment of Administrator performance.
- Previous Participation Reviews are conducted on all applicants. These reviews have prevented non-performing Administrators from receiving additional funding from the Department.

Compliance Monitoring –

- In January 2007, the Internal Revenue Service released a Guide for Completing Form 8823 Low Income Housing Credit Agencies Report of Noncompliance. The 8823 guide had significantly impacted monitoring and reporting noncompliance under the HTC program.
- Treasury Regulation 1.42-10 was amended in July 2008 and created additional methodologies for calculating increased utility allowances and created new monitoring requirements. Calculating and approving utility allowances has had a significant impact on the workload of the Division.

Physical Inspection –

- Increasing concern over deteriorating physical condition of older properties has resulted in a strong emphasis on maintenance and property condition. The UPCS was incorporated as the inspection standard in 2005. Contracted UPCS inspections were initiated in the spring of 2005.
- In the summer of 2008, the Department created the Physical Inspection section of the Compliance Division. The new Inspection Section was officially constituted at the beginning of fiscal 2009.

The Federal changes have increased the scope of monitoring for the CAO Division. To ensure owners and management staff stay abreast of changes, the Division frequently provides training, holds roundtables presentations, posts memorandums on the Department website and releases email notifications.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

The two primary groups are affected by the Compliance and Asset Oversight Division: 1) the owners and managers of property funded by TDHCA and 2) the households that reside in the properties funded by TDHCA

Owners/administrators are impacted by the CAO division if they fail to comply. Owners cannot receive final allocation of funds if they do not clear construction inspections. In addition, noncompliance potentially leads to a prohibition from receiving additional funds and the assessment of administrative penalties. As of July 23, 2009 approximately 2,000 properties are being monitored. When properties are found to be in Material Noncompliance, the owners of those properties are not eligible for additional funding.

The low-income households residing in TDHCA properties are impacted by the requirement to provide proof of their income and assets. They also have the benefit of the rent restrictions. As of July 23, 2009, approximately 215,000 households are residing in properties funded by TDHCA.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Contract Monitoring –

Contract monitoring reviews are selected based on a risk assessment of all open contracts. Risk factors include amount of award, amount of expenditures, experience with program, and past performance. The level of risk determines if the contract will be monitored through a desk review or on-site review. Desk reviews are conducted on lower risk Administrators; on-site reviews are conducted on higher-risk Administrators. On-site reviews include inspections of the units and larger scope of work. Reports indicating results are provided to each Administrator. *Please refer to the flowchart illustrating the Contract*

Monitoring procedures found in Additional Exhibits.

Compliance Monitoring –
The frequency of on-site reviews for the Housing Tax Credit program and the HOME program is mandated by Federal laws. The Department has developed monitoring standards for programs that do not have a specified monitoring frequency. The chart below indicates the frequency and percentage of units that are monitored for each housing program. *Please refer to the flowchart illustrating the Compliance Monitoring procedures found in Additional Exhibits.*

Program	On-site Frequency (Years)	Percentage of Low-Income Units required to be reviewed*
HTC	3	20%
BOND	2	15%
HTF	3	15%
HOME	1-4 units = 3 5-25 units = 2 >25 units = 1	20%
Preservation	3	15%
CDBG	3	20%

* *The Division's standard operating procedures require that a minimum of 5 units be reviewed during an on-site monitoring review.*

Physical Inspection –
Physical inspections are conducted following on-site reviews by the Compliance Monitoring Section. *Please refer to the flowchart illustrating the Physical Inspections monitoring procedures found in Additional Exhibits.*

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Compliance activities are funded through the federal program being monitored. The Inspection and Compliance Monitoring section is primarily funded through the compliance fees collected from properties. The current Housing Tax Credit compliance monitoring fee is $40 per unit. The Division's functions are also funded through administrative funds under the HOME and CDBG programs.

Funding information is being provided through the various program sections.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

Contract Monitoring –

Internal programs:
During contract administration, Department program staff (i.e., HOME, CDBG, etc.,) provides technical assistance and may conduct limited monitoring to ensure the success of the administrator.

External programs:
Other state agencies (e.g., TDRA, TCADA, TWC, CJD, and TDHS) perform desk reviews of single audits received from their subrecipients. When a subrecipient receives federal funds from more than one state agency, it is possible that each state agency will perform its own desk review. Likewise, each state agency passing federal funds to subrecipients

will perform its own on-site monitoring, concentrating on their programs.

Compliance Monitoring –

External programs:

Many of the rental properties funded by TDHCA have more than one source of government financing. Southwest Housing Compliance Corporation (contractor for HUD), USDA, local tax exempt bond issuers and other HOME participating jurisdictions may be providing financing to and monitoring properties in the TDHCA portfolio. Each funding entity monitors in accordance with their rules and regulations.

Physical Inspection Section -

External programs:

- As with reviews of resident files or property operations, TDHCA properties with other government financing are inspected by more than one agency. Although there may be some overlap, each funding entity monitors in accordance with its rules and regulations.
- Lenders, syndicators, and Bond trustees may conduct inspections of properties they fund (outside or in conjunction with Departmental programs) especially during construction. These inspections do not use the UPCS.
- Some cities conduct periodic inspections for properties within their jurisdiction: Dallas and Fort Worth are examples.
- During construction, municipalities conduct inspections to ensure buildings meet applicable construction codes. In some municipalities, items inspected may overlap TDHCA's construction inspections.
- Local public housing authorities (PHA) issuing Section 8 Vouchers are required by HUD to inspect annually. The inspection standard used (Housing Quality Standards-HQS) differs from the UPCS and is not as inclusive. The PHA only inspects the units that are occupied by Voucher holders.
- The Civil Rights Division of the Texas Workforce Commission and HUD's Fair Housing and Economic Opportunity offices enforce accessibility regulations. The Department monitors and inspects for physical compliance with Fair Housing, §504, and other accessibility requirements, but cannot investigate complaints of discrimination based on these laws. Directing complainants to the state or federal investigators is the only avenue available to handle these issues.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

Contract Monitoring -

Internal:

HOME Program and Contract Monitoring staff meet monthly to coordinate. Program staff informs monitoring staff about any potentially troubled contracts. The Contract Monitoring staff provides feedback based on observations in monitoring about areas in need of additional technical assistance.

External:

- If another state agency has reviewed and accepted a subrecipient's single audit, the Department will accept another state agency's review in lieu of duplicating its own. Similarly, Audit Resolution staff provides copies of acceptance letters to other state agencies.
- Any information discovered either through an audit desk review or as a result of an on-site monitoring visit pertaining to another state agency's funds is communicated with the other agency as deemed necessary.

Compliance Monitoring -

External programs:

If another monitoring entity requests copies of a monitoring report, they are shared as appropriate.

Inspections –

External:

Most inspections conducted by external entities do not use the UPCS protocol or inspect the minimum number of units needed to meet the IRS requirements.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

No direct programmatic or functional relationship with other governmental entities.

K. If contracted expenditures are made through this program please provide:
- **the amount of those expenditures in fiscal year 2008;**
- **the number of contracts accounting for those expenditures;**
- **a short summary of the general purpose of those contracts overall;**
- **the methods used to ensure accountability for funding and performance; and**
- **a short description of any current contracting problems.**

Compliance Monitoring -
- Contract expenditures in fiscal year 2008 totaled $405,746 for long-term compliance monitoring of the Affordable Housing Disposition Program (AHDP). The Department terminated this contract effective August 31, 2008.
- Contract expenditures for fiscal year 2008 also included $69,999 for legal expenditures to develop rules for accessibility standards to be used for affordable housing programs administered by the Department.

Inspections -
- Contract expenditures in fiscal year 2008 totaled $279,474.
- Two separate contractors conducted physical inspections for the Department.
- Inspections were conducted to assess the physical condition of developments administered by the Department. These inspections supplemented the inspections performed by Compliance Monitoring staff.
- Use of the contract funding was tracked by staff through verification of invoiced inspections and by matching inspections reports to the corresponding invoices and assignments.
- The contracts were extended into fiscal 2009 for a reduced amount of $120,000 after the addition of four staff inspectors.
- Funds released from the termination of the AHDP monitoring contract were allocated to the Inspections section.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

None identified.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

The Compliance Monitoring Rules and IRS 8823 Audit Guide are attached.

Program webpage: http://www.tdhca.state.tx.us/pmcomp/

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not regulatory.

O. For each regulatory program, if applicable, provide the following complaint information.

Not regulatory.

EMERGENCY HOUSING AND DISASTER RECOVERY

A. Provide the following information at the beginning of each program description.

Name of Program or Function	Community Development Block Grant Disaster Recovery Programs
Location/Division	Emergency Housing and Disaster Recovery
Contact Name	Sara Newsom, Deputy Executive Director
Actual Expenditures, FY 2008	$439,757,702
Number of FTEs as of August 31, 2008	13

B. What is the objective of this program or function? Describe the major activities performed under this program.

Hurricane Rita: 1st Supplemental Funding (Round I)

TDHCA is the state agency designated by the Governor to administer the grant of $40,259,276 appropriated by Congress in an initial CDBG supplemental funding for recovery from hurricanes Rita and Katrina and allocated to the state by the US Department of Housing and Urban Development (HUD). The grant is for housing recovery efforts related to Hurricane Rita. Texas received a total of $74,523,000. TDRA is administering the non-housing portion of the grant in the amount of $32,144,815.

Round I funding was made available to TDHCA by HUD via the grant agreement on June 19, 2006.

Hurricanes Katrina and Rita: 2nd Supplemental Funding (Round II)

TDHCA is the state agency designated by the Governor to administer the grant of $428,671,849 appropriated by Congress in a second CDBG supplemental funding for recovery from hurricanes Rita and Katrina and allocated to the state by HUD. The grant is for recovery efforts related to Hurricane Rita. The funding also addresses needs arising from Katrina evacuees. TDHCA administers all housing related activity under the grant. The Office of Rural and Community Affairs ("TDRA") is the state agency designated to administer that portion of the grant relating to non-housing recovery activity.

Round II funding was made available to TDHCA by HUD via the grant agreement on May 12, 2007.

Hurricanes Ike and Dolly: 3rd Supplemental Funding (Round III)

TDRA is the state agency designated by the Governor to administer that portion of the $6,053,584,933 that was appropriated by Congress under a CDBG supplemental funding for recovery from a number of disasters, including hurricanes Ike and Dolly. HUD made an initial allocation to Texas of $1,314,990,193, of which TDHCA is administering $621,448,377 for housing recovery efforts related to hurricanes Ike and Dolly. HUD made a second allocation of $1,743,001,247 (Round IV). The total allocated to Texas under the grant for recovery from hurricanes Ike and Dolly is $3,057,991,440. The amount of the Round IV funds that will respectively be administered by TDRA and TDHCA has not been finalized at this time, but it is estimated that the housing funds, which will be administered by TDHCA, will be not less than $871,500,523.

The first portion of Round III funding was made available to TDHCA from HUD, via TDRA, on March 27, 2009. Round IV funding has not been made available HUD published guidance as to how it will be administered on August 14, 2009.

C. What evidence can you provide that shows the effectiveness and efficiency of this program or function? Provide a summary of key statistics and performance measures that best convey the effectiveness and efficiency of this function or program.

Hurricane Rita: 1st Supplemental Funding (Round I)

Under the 1st Supplemental CDBG Disaster Recovery Program (referred to as Round I), there are three Councils of Governments (COGs) responsible for administering housing contracts to help restore and rebuild in areas of the state most directly impacted by Hurricane Rita. Of the $74.5 million, the total funding allocation administered by the COGs is $40,324,845 broken down as follows:

- Deep East Texas Council Of Governments (DETCOG) - $6,745,034
- Houston-Galveston Area Council (H-GAC) - $7,015,70
- South East Texas Regional Planning Commission (SETRPC) - $26,564,105
    - SETRPC - $16,964,225
    - Beaumont - $4,199,680
    - Port Arthur - $5,400,200

Cumulatively, the COGs have completed assistance to 482 households, have another 12 homes under construction, and have 18 more homes under contract pending the onset of construction activities. Program efficiencies have allowed for a greater number to be served than was originally anticipated. All program activities were on track for completion in summer 2009, but the additional efficiency and the ability created thereby to serve more households has necessitated an extension of the program. All program activities should be complete by October 31, 2009.

Project Summary As of July 1, 2009

	* No. to be Served per Contract	No. out for Bid	** Units Under Contract	No. Site-built Under Construction	Total Rehabilitated/ Reconstructed	No. of MHUs Delivered	Total No. Constructed/ Delivered
DETCOG	96	0	0	0	13	115	128
H-GAC	103	0	5	2	23	73	96
SETRPC	228	0	13	10	205	53	258
SETRPC	127	0	8	6	105	53	158
Beaumont	55	0	3	2	50	0	50
Port Arthur	46	0	2	2	50	0	50
Total	427	0	18	12	241	241	482

** Based on the contractual number of households that the COGs are required to be served with the funding allocation*
*** Total of MHUs ordered but not yet delivered and construction contracts signed for site-built units*

Hurricanes Katrina and Rita: 2nd Supplemental Funding (Round II)

The 2nd Supplemental CDBG Disaster Recovery Funding (referred to as Round II) is the second of two appropriations of CDBG funding to help restore and rebuild in areas of the state most directly impacted by Hurricane Rita, but it also addresses needs arising from Hurricane Katrina evacuees. TDHCA administers several housing activities including a state administered Homeowner Assistance Program, a rental restoration program, local funds awarded to the City of Houston for Public Services and the Sabine Pass Restoration Program, which provides disaster assistance to the residents of Sabine Pass.

The total funding allocation is $428,671,849, broken down as follows:

TDHCA administers the Housing Assistance Program through a contract management firm, which provides housing rehabilitation, reconstruction, new construction and elevation in the 22 county region affected by Rita. The goal of the program is to restore housing for at least 2800 families that received damage from Hurricane Rita. The program is expected to expend all funds by December 2010. The program totals include the following:

2nd Supplemental CDBG Disaster Recovery Activity	Available Funding	Amount Contracted per Activity	Cumulative Expenditures	% of Expenditures Disbursed	Balance Remaining
Rental Housing Stock Restoration Program ("Rental")	$82,866,984	$82,779,333	$38,120,994.16	46.05%	$44,658,338.84
TDRA's Restoration of Critical Infrastructure Program (Infrastructure)	$42,000,000	$42,000,000	$14,178,461.34	33.76%	$27,821,538.66
City of Houston and Harris County Public Service and CDP ("Houston/Harris")	$60,000,000	$60,000,000	$32,044,926.50	53.41%	$27,955,073.50
Homeowner Assistance Program ("HAP")	$210,371,273	$210,371,273	$29,158,705.28	13.86%	$181,212,567.72
Sabine Pass Restoration Program ("SPRP")	$12,000,000	$12,000,000	$3,732,716.92	31.11%	$8,267,283.08
State Administration Funds (Used to Administer Funding)	$21,433,592	$21,433,592	$7,281,662.42	33.97%	$14,151,929.58
Total CDBG Round 2 Funding	$428,671,849	$426,952,198	$124,517,466.62	29.05%	$304,066,731.38

AS OF 6/30/09	HAP	SPRP	Total
Completed Applications	2,866	104	2,970
Eligibility Determined	1,854	106	1,960
Inspections Complete	1,701	111	1,812
Projects Assigned to Contractors	1,118	68	1,118
Benefit Selection Meetings Held	1,062	68	1,130
Closings	614	59	673
Construction Starts	490	46	536

Hurricanes Ike and Dolly: 3rd Supplemental Funding (Round III)

Under Hurricanes Ike and Dolly: 3rd Supplemental Funding (Round III), the councils of governments ("COGs") for the impacted counties were assigned the responsibility of determining how funds would be allocated through a Method of Distribution ("MOD") process. The objective of the MOD process was to have locals make the determinations as to the allocation amounts to each based public input and objective and verifiable data, and to determine the allocation between housing (TDHCA-administered) and non-housing (TDRA-administered) activities.

TDHCA is in the process of approving applications by the subrecipients identified in the MOD process to administer housing activities. Contracts must be executed between TDHCA and the each subrecipient before housing activities commence. Subrecipients include both COGs and COG-designated units of local government.

Six of the 11 affected COG regions have subrecipients that incurred FEMA-documented housing damage and, therefore, received housing allocations, and there will be 19 Subrecipients. The subrecipients and their allocation amounts are as follows:

Subrecipient	Amount of Housing Allocation
BVCOG	$0
Brazos Valley Affordable Housing Corporation	$948,929
DETCOG	$5,931,070
Subrecipient	Amount of Housing Allocation
ETCOG	$415,117
H-GAC	$11,077,719
Galveston	$160,432,233
Galveston County	$99,503,498
Harris County	$56,277,229
Houston	$87,256,565
Chambers County	$20,921,582
Liberty County	$8,878,923
Fort Bend County	$1,582,107
Montgomery County	$6,909,237.
LRGVDC	$0
Brownsville	$1,635,318
Cameron County	$3,093,750
Mission	$209,638
Hidalgo County	$2,000,000
Raymondville	$128,787
Willacy County	$412,500
SETRPC	$95,000,000
TOTAL	$562,614,202

Hurricanes Ike and Dolly: 4th Supplemental Funding (Round IV)

On June 10, 2009, HUD announced the allocation of the remaining $3.7 billion of the CDBG supplemental appropriation of disaster assistance to 11 states to help them recover from natural disasters that occurred in 2008. Texas received an additional allocation of approximately $1.7 billion. Allocation decisions as to housing and non-housing activities and local allocations within COG regions have not yet been made. TDHCA has been designated by the Governor to administer all housing activities under the allocation.

D. Describe any important history regarding this program not included in the general agency history section, including how the services or functions have changed from the original intent.

Hurricane Rita: 1st Supplemental Funding (Round I)

On December 30, 2005, President Bush signed legislation (HR 2863) providing $11.5 billion in disaster relief to five Gulf Coast states including $74.5 million for Texas. Through continued meetings since HR 2863 was signed, the state of Texas has identified over $1.5 billion in needed repairs related directly to Hurricane Rita.

The Texas Department of Housing and Community Affairs (TDHCA), at the direction of the Office of the Governor and in conjunction with the Texas Department of Rural Affairs (TDRA), has worked with the four affected Councils of Governments (COGs) to distribute funds under the CDBG Disaster Recovery Funds to Areas Most Impacted and Distressed by Hurricane Rita. The Department of Defense Appropriations Act, 2006 (Public Law 109-148, approved December 30, 2005) made a supplemental appropriation of $74,523,000 in CDBG funding to be used toward meeting unmet housing, infrastructure, public service, public facility, and business needs in areas of concentrated distress. TDHCA provides the state administration for housing, and TDRA provides the state administration for non-housing needs. TDHCA and TDRA used FEMA data to determine the distribution of housing and non-housing related damage across the eligible counties. The eligible applicants, per the State's Action Plan, are four Councils of Government (COGs) - Deep East Texas Council of Governments (DETCOG), East Texas Council of Governments (ETCOG), Houston-Galveston Area Council (HGAC), and the South East Texas Regional Planning Commission (SETRPC). These COGs applied on behalf of the eligible entitlement communities, non-entitlement communities, and federally recognized Indian Tribes within their region. The U.S. Department of Housing and Urban Development (HUD) has mandated that a minimum of fifty-five percent (55%) of the funds be allocated for housing. The availability of funds was announced February 13, 2006 in Volume 71, Number 29.

Pursuant to the notice, TDHCA staff began to craft an action plan and held public hearings to gather comment from the general public and the COGs. The application was made available on May 12, 2006, and application workshops were conducted. The COGs worked quickly to create a method of distribution for all of the jurisdictions in their respective areas. COG staff independently developed different methodologies basing their distribution on a variety of statistical information including FEMA, Texas Department of Insurance, and Census poverty data, as well as public input. Each COG attempted to define unmet needs specific to households below 80% of the area median family income.

Based on data from damage reports, three of the four COGs were eligible for an allocation of housing funds. In general, these COGs contracted with construction contractors to perform the proposed housing activities such as emergency repair, rehabilitation, reconstruction, demolition, etc. The Deep East Texas Council of Governments and The Houston-Galveston Area Council used this method to administer all of their housing funds. The Southeast Texas Regional Planning Commission also utilized this arrangement for the nonentitlement areas of their service region but made a direct allocation of funds to the entitlement cities of Beaumont, Port Arthur, and Orange.

Hurricanes Katrina and Rita: 2nd Supplemental Funding (Round II)

Congress recognized that the 1st Supplemental CDBG Disaster Recovery Funding authorized under PL 109-148 was not sufficient given the full impact that the 2005 hurricane season had on the entire gulf coast region. The 2nd Supplemental CDBG Disaster Recovery Funding authorized approximately $429 million to Texas to help restore and rebuild in areas most directly impacted by Hurricanes Rita and Katrina.

The 2nd Supplemental CDBG Disaster Recovery Funding (referred to Round II) is the second of two awards in CDBG funding to help restore and rebuild in areas of the state most directly impacted by Hurricane Rita, but it also addresses needs arising from Katrina evacuees. The total funding allocation is $428,671,849.

<u>General Funding Information by Activity:</u>
Restoration of Critical Infrastructure Program: The Texas Department of Rural Affairs (TDRA) administered activities awarded under this program through a contract with TDHCA and approved by TDHCA's Governing Board.

City of Houston: Funding of $20 million was allocated to the Houston Police Department for establishment of a Multi-Family Apartment Community Program. The funds were utilized to procure equipment and supplies to support the program and to staff the program with officers on overtime.

Funding of $20 million was also allocated to carry out rehabilitation of existing multi-family housing stock through the existing Apartment to Standards Program. These funds will provide rehabilitation of multi-family housing to the evacuee population.

Harris County: Funding of $20 million was allocated to provide services to the residents of Harris County among five different program components: Expanded Services to Hurricane Evacuees (Harris County Sheriff's Dept.), Evacuee Medical Services (Harris County Hospital District), Katrina Crisis Counseling Program (Mental Health and Mental Retardation Authority), Youth Offenders Services (Harris County Sheriff's Dept.) and the Disaster Housing Assistance Program Component (Harris County).

Multifamily Rental Housing Stock Restoration Program: On September 13, 2007, the TDHCA Board awarded $81.1 million to repair or rebuild seven Golden Triangle-area affordable multifamily rental properties damaged or destroyed by Hurricane Rita. An additional amount was subsequently awarded to Orange Navy Homes to address historical components of the development which also will result in additional affordable units. The construction work, once completed, will restore rental unit housing to 813 low-income individuals and families.

Homeowner Assistance Program (HAP) and Sabine Pass Restoration Program (SPRP): The Governor identified destruction done to individual homes as one of the most persistent and difficult issues to address in the aftermath of Hurricane Rita. To deal with this real need of Texans who have no other place to turn, the highest funding priority was the CDBG Homeowner Assistance Program (HAP), assisting homeowners whose family income was up to 80% of the area median family income. Funding in the amount of approximately $210 million was made available to serve homeowners of LMI income whose homes were damaged by Hurricane Rita. Part of this funding priority, $42 million (20% of the Homeowner Assistance Program funds), was targeted specifically for persons with special needs. There is a program goal to restore approximately 2800 homes.

In addition to HAP, there is the Sabine Pass Restoration Program (SPRP). While many communities in South East Texas were substantially impacted by Rita, the coastal community of Sabine Pass was nearly destroyed by the storm. To help address this extreme need, funding in the amount of $12 million was set aside to assist homeowners in the coastal community of Sabine Pass. Home rehabilitation and reconstruction assistance was made available for homeowners whose family income was up to 150% of the area median family income. Homeowners may also apply for assistance in an amount up to $30,000 to help defray the costs of elevating rehabilitated or reconstructed homes in accordance with FEMA advisory flood elevations or subsequent FEMA permanent maps. Additionally, a homeowner whose household includes a person with a disability or an elderly person may apply for an additional $15,000 in assistance for additional accessibility related costs.

E. Describe who or what this program or function affects. List any qualifications or eligibility requirements for persons or entities affected. Provide a statistical breakdown of persons or entities affected.

Hurricane Rita: 1st and 2nd Supplemental Funding Hurricanes Katrina and Rita:
Activities conducted by CDBG funds must meet one of three National Objectives. Those objectives are identified as: Benefiting Low and Moderate Income persons; Preventing or Eliminating Slum or Blight, and Meeting Urgent Needs. The federal regulations require that at least 50% of the expenditures must be used for the national objective of benefiting persons of low and moderate income.

Households must meet certain eligibility criteria to qualify under the Low or Moderate Income objective. Assistance can not be provided until eligibility is determined and documented. The eligibility determination process contains multiple tasks such as determination of annual income, documentation of ownership status, and evaluation to ensure there is no duplication of assistance. Additional elements to qualify for the Housing Assistance Program include:

- Requirement to own or rent a single family residence (including manufactured housing units, duplexes, or townhomes) on the date of the storm.
- The unit must have been the primary residence on the date of the storm.
- The damaged home was a single family residence (including manufactured housing units, duplexes, or condominiums).
- The home was damaged or destroyed on the date of the storm as a direct result of the specific Hurricane.
- The household income must be 80% or less of Area Median Family Income.

F. Describe how your program or function is administered. Include flowcharts, timelines, or other illustrations as necessary to describe agency policies and procedures. List any field or regional services.

Hurricane Rita: 1st Supplemental Funding (Round I)
Three COGs; Southeast Texas Regional Planning Commission (SETRPC), Deep East Texas COG (DETCOG) and Houston-Galveston Area Council (H-GAC) received funding for housing activities under Rita Round I. TDHCA monitored to ensure compliance with regulations, to ensure benchmarks were timely achieved, and to assure that homes were restored to meet construction standards and local codes. Funds under Rita I are expected to be expended and the program closed October 2009.

Hurricanes Katrina and Rita: 2nd Supplemental Funding (Round II)
The 2nd Supplemental CDBG Disaster Recovery Funding (referred to as Round II) is the second of two awards in CDBG funding to help restore and rebuild in areas of the state most directly impacted by Hurricane Rita. The total funding allocation is $428,671,849. As stated in previous questions, funding was broken down to fund $20 million to the Houston Police Department for establishment of the Housing Safety Component. An additional $20 million was allocated to carry out rehabilitation of existing multi-family housing stock through the existing Apartment to Standards Program in Houston. Funding of $20 million was allocated to provide services to the residents of Harris County among five different program components: Expanded Services to Hurricane Evacuees (Harris County Sheriff's Dept.), Evacuee Medical Services (Harris County Hospital District), Katrina Crisis Counseling Program (Mental Health and Mental Retardation Authority), Youth Offenders Services (Harris County Sheriff's Dept.) and the Disaster Housing Assistance Program Component (Harris County). These programs were administrated by Houston and Harris County. Amendments to Harris County's programs have been made to meet the changing needs of the Katrina evacuees. An apartment rehabilitation program component has most recently been added to utilize these funds to assist with recovery. TDHCA provides monitoring and oversight activities.

The TDHCA Board awarded $82.7 million to repair or rebuild seven Golden Triangle-area affordable multifamily rental properties damaged or destroyed by Hurricane Rita. TDHCA provides monitoring and oversight of the construction or rehabilitation of the developments through completion. Once construction is complete the assets will be monitored by the Compliance and Asset Oversight Division of TDHCA.

The remaining funds were allocated to the state administered Homeowner Assistance Program and Sabine Pass Restoration Program. TDHCA administers the program through a contractor manager procured in accordance with state requirements following the issuance of a Request for Proposals. ACS is the contract manager. Although ACS alone has direct responsibility to TDHCA for the full scope of its contract, it uses two subcontractors: Reznick for determining and documenting eligibility and Shaw for construction oversight.

A weekly meeting is held with ACS to update TDHCA with construction progress processes and expenditures and there are extensive daily interactions between TDHCA staff and ACS on all aspects of these programs. TDHCA staff also provides regional field office oversight and extensive on-site oversight and interaction with ACS, its procured subcontractors, local authorities, and individual benefit recipients. TDHCA staff also coordinates extensively with HUD oversight staff.

G. Identify all funding sources and amounts for the program or function, including federal grants and pass-through monies. Describe any funding formulas or funding conventions. For state funding sources, please specify (e.g., general revenue, appropriations rider, budget strategy, fees/dues).

Hurricane Rita: 1st Supplemental Funding (Round I)
HUD issued Community Development Block Grant (CDBG) funding associated with the Department of Defense Appropriations Act,2006 (Public Law 109-148, approved December 30, 2005) for disaster relief of unmet housing and infrastructure needs resulting from Hurricane Rita in the most impacted and distressed areas of Texas. Public law 109-148

Hurricanes Katrina and Rita: 2nd Supplemental Funding (Round II)
Public Law 109-234 (effective June 15, 2006) provided $5.2 billion supplemental appropriation of CDBG Disaster Recovery Funding for *"necessary expenses related to disaster relief, long-term recovery, and restoration of infrastructure in the most impacted and distressed areas related to the consequences of Hurricanes Katrina, Rita, or Wilma."* In reviewing the totality of the need in the five state region covered by the law, $428,671,849 was specifically allocated to Texas by the Secretary of HUD. As further provided for under the law, *"funds provided under this heading shall be administered through an entity or entities designated by the Governor of each State."* Governor Rick Perry designated TDHCA as this entity for the State of Texas.

Hurricanes Ike and Dolly (first allocation)
HUD issued CDBG funding associated with the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, (Public Law 110-329), enacted on September 30, 2008.

Hurricanes Ike and Dolly (second allocation) – pending
HUD issued a second appropriation of CDBG funding under Public Law 110-329, approved September 30, 2008. The "Second 2008 Act" appropriated $6.5 billion to remain available until expended for necessary expenses related to disaster relief, long term recovery and restoration of infrastructure, housing and economic revitalization in areas affected by disasters in 2008. The Action Plan is currently under development however it is anticipated that approximately $850 million will be allocated to housing activities administrated by TDHCA.

FEMA Alternative Housing Pilot Program
FEMA awarded TDHCA funds under the Alternative Housing Pilot Program to provide temporary and permanent panelized housing on single lots and a group site to allow FEMA to evaluate and test the long term characteristics of the housing model and the effects of housing on those displaced by disasters. The funding was authorized under the Homeland Security Act of 2002, H.R. 5005-8, P.L. 107-296, and public law 109-234, Emergency Supplemental Appropriations Act for Defense, The Global War on Terror, and Hurricane Recovery, 2006. Two-hundred and fifty thousand ($250,000) of state Housing Trust Funds were pledged to this program to provide assistance with accessibility and energy efficiency costs. None of the HTF funds have been expended.

Disaster Contingency Fund
HB 4409 (81st Legislature, regular session) amended Tex. Gov't. Code, Chapter 418, to require the Department to enter into prep positioned contracts for emergency temporary housing in the event of a declared disaster. The payment for any such procurement may be from the disaster contingency fund created by Tex. Gov't. Code, §418.073.

H. Identify any programs, internal or external to your agency, that provide identical or similar services or functions. Describe the similarities and differences.

The HOME program provides similar but not identical assistance through the owner occupied rehabilitation program and the development and/or rehabilitation of affordable rental properties. The low income housing tax credit program provides financing for the development and/or rehabilitation of affordable rural properties and is subject to augmentation and/or alternative funding via the tax credit assistance program and/or the tax credit exchange created by the American Recovery and Reinvestment Act of 2009. The Housing Trust Fund has the ability to provide similar assistance, but at present its appropriated funding is programmed for other uses.

I. Discuss how the program or function is coordinating its activities to avoid duplication or conflict with the other programs listed in Question H and with the agency's customers. If applicable, briefly discuss any memorandums of understanding (MOUs), interagency agreements, or interagency contracts.

The CDBG disaster recovery program administered under Rita Rounds I and II and Ike/Dolly's first allocation have specific policies and procedures in place to screen applicants for potential duplication of benefit issues. This will also be a feature of Ike/Dolly's second allocation programs.

J. If the program or function works with local, regional, or federal units of government include a brief description of these entities and their relationship to the agency.

Rita Round I is administered by the Councils of Government in the impacted area. They receive technical assistance and regular monitoring from Department staff.

K. If contracted expenditures are made through this program please provide: • the amount of those expenditures in fiscal year 2008; • the number of contracts accounting for those expenditures; • a short summary of the general purpose of those contracts overall; • the methods used to ensure accountability for funding and performance; and • a short description of any current contracting problems.

2008 Grant Expenditures and Encumbrances: $438,528,406, associated with the following:

1st Supplemental Funding (Rd I) – Public Law 109-148 appropriated $74,523,000 from the US Department of Housing and Urban Development (HUD) for housing recovery efforts related to Hurricane Rita. Please note that while TDHCA is the lead agency, only $1,579,820 associated with administrative expenses is reflected in TDHCA's budget because the funds flowed through Texas Department of Rural Affairs (TDRA). TDHCA administered the funds in conjunction with TDRA. TDHCA administered $40,259,276 associated with housing. TDRA administered the balance to address infrastructure damage.

2nd Supplemental Funding (Rd II) – Public Law 109-236 appropriated $428,671,849 from the US Department of Housing and Urban Development (HUD) for housing recovery efforts related to Hurricane Rita and to address the needs arising from Katrina evacuees. TDHCA is the lead agency; unlike the first supplemental, all funds flow through TDHCA. TDHCA directly administered $386,584,198 associated with housing needs. TDRA administered the balance to address infrastructure damage.

Alternative Housing Pilot Program (AHPP) – Federal Emergency Management Agency (FEMA) appropriated $16,471,725 to demonstrate an alternative housing solution to the FEMA trailer in the areas affected by the 2005.

<u>The number of contracts accounting for those expenditures;</u>

1st Supplemental Funding (Rd I) – Funding was allocated to Deep East Texas Council of Governments (DETCOG), Houston-Galveston Area Council (HGAC), and the South East Texas Regional Planning Commission (SETRPC). Collectively, the COGS are responsible for administering housing contracts to help restore and rebuild in areas of the state directly impacted by Hurricane Rita. A total of 3 contracts were executed to perform these activities.

2nd Supplemental Funding (Rd II) – Funding was allocated for the following activities: public service and multifamily rehabilitation (City of Houston); community development programs and multifamily rehabilitation (Harris County); multifamily restoration programs (Point North, Orange Navy Homes, Virginia Estates, Brittany Place I & II and Gulf Breeze I & II; Homeowner Assistance Programs/Sabine Pass Restoration Program (Affiliated Computer Services, Inc.). A total of 10 contracts were executed to perform these activities.

Alternative Housing Pilot Program (AHPP) – Funding was distributed only to the Heston Group, USA through a FEMA grant to demonstrate an alternative housing solution to the FEMA trailer for response to disasters.

A short summary of the general purpose of those contracts overall;

1st Supplemental Funding (Rd I)

In general, the three COGs contract with construction contractors to perform housing activities such as emergency repair, rehabilitation, reconstruction, demolition, etc. The Deep East Texas Council of Governments and The Houston-Galveston Area Council use this method to administer all of their housing funds. The Southeast Texas Regional Planning Commission also utilizes this arrangement for the nonentitlement areas of their service region but made a direct allocation of funds to the entitlement cities of Beaumont, Port Arthur and Orange. The State Action plan identifies 22 counties designated for Round I assistance.

2nd Supplemental Funding (Rd II)

The City of Houston allocated funds to the Houston Police Department for establishment of the Housing Safety Component, composed of civilian and officer personnel. Funding was also provided to the Apartment to Standards Program to carry out rehabilitation of existing multifamily housing stock to the evacuee population. Harris County was allocated funds to provide services through five different community development program components. Funding was allocated for Multifamily Rental Housing Stock Restoration Program to repair or rebuild seven affordable multifamily rental properties. The construction work, once completed, will restore rental unit housing to approximately 838 low-income individuals and families.

The largest share of the funding is provided to the CDBG Homeowner Assistance Program (HAP) for homeowners whose family income is up to 80% of the area median family income. Funding is made available in the form of a grant to homeowners of LMI income whose homes were damaged by Hurricane Rita. $42 million (20%) was targeted specifically for persons with special needs.

In addition to HAP, the Sabine Pass Restoration Program (SPRP) was developed to address the destruction to the coastal community of Sabine Pass. Twelve million dollars of home rehabilitation and reconstruction assistance was made available for homeowners whose family income is up to 150% of the area median family income.

Alternative Housing Pilot Program (AHPP) – FEMA solicited states to propose alternative housing pilot program proposals. Texas presented a number of such proposals to FEMA, and FEMA selected a design produced by the Heston Group, Italy. The product, referred to as a "Heston home," is a pre-fabricated, panelized solution which has been designed so that it can be deployed quickly and built to accommodate a diverse population in the areas affected by the 2005 Hurricanes.

TDHCA has determined that Heston USA has not met the requirements of its contract and has terminated the contract. This has been carefully coordinated with FEMA. *See the section on current contracting problems below*.

The methods used to ensure accountability for funding and performance

The Division's Disaster Recovery Monitoring Plan incorporates the following oversight controls, monitoring activities and testing methodologies, including the Fraud, Waste and Abuse Prevention and Detection Policy to meet oversight and monitoring responsibilities:

- Eligibility – Disaster Recovery programs assist low to moderate income families. In addition to the established eligibility controls and process at the subrecipient level, the Division will further minimize the potential for non-compliance, waste, fraud and abuse by independently monitoring eligibility criteria and, in particular, review of support documents used to establish program eligibility.
- Procurement & Contract– The majority of Disaster Recovery funds will be expended through services provided by general construction contractors. The Division will ensure compliance with federal contracting and procurement requirements through a review of files. Furthermore, each contractor's budget and expenditures will be tracked and analyzed to ensure expenditures meet contract and program requirements.

- **Disbursement and Transactions Testing** – Source and/or support documents are used to establish eligibility and allowability of program costs. The Division utilizes a three tier review methodology to determine allowability and validity of program expenditures. The first level review will occur during the reimbursement request process. The second level review will occur through expenditure sampling performed during desk reviews. The third level review will occur through sampling of expenditures performed during on-site monitoring reviews.
- Scheduled monitoring visits coupled with frequent interaction with contractors gives the Division the ability to address program and/or contract issues before they become systematic.

<u>A short description of any current contracting problems:</u>
There have been no significant problems with the 1st Supplemental Funding (Round I) and 2nd Supplemental Funding (Round II). Both internal and external monitoring and/or audit reviews have not identified any instances of ineligibility or disallowed costs. Issues that have arisen are a result of program criteria established to ensure assistance to the targeted population, which has impacted the speed with which assistance has been provided. TDHCA has continued to work diligently to minimize delays in assistance, meeting with ACS and its subcontractors, Reznick and Shaw, to streamline processes. The array of approved building contractors has been expanded. TDHCA staff has worked with local authorities, HUD, and others to remove bottlenecks. A major historical obstacle, the clearing of title for recipients, has been addressed by both TDHCA governing board policy and by recent legislation. All of these factors had combined to impede the efficiency of the ACS solution, but now that they have been largely addressed, the program is exhibiting greatly improved efficiency. As of August 5, 2009 for the HAP and SPRP programs, there were 525 of the anticipated 2,800 homes actually under construction and 190 homes actually completed.

Alternative Housing Pilot Program (AHPP) – The successful implementation of the AHPP, intended by FEMA to provide an extended test for the Heston home, has been frustrated by the inability of Heston USA to perform in accordance with its contract. After extended efforts to "re-set the contract," TDHCA, after conferring at length with FEMA, decided that it needed to terminate the contract and seek an alternative provider for the installation of these homes. TDHCA's partners for a required FEMA group site, first Harris County and then the City of Houston, have had difficulty in identifying and producing a site that will meet the FEMA requirements. These obstacles will necessitate obtaining an extension of the AHPP agreement with FEMA.

L. What statutory changes could be made to assist this program in performing its functions? Explain.

HB 4409 (81st Legislature, regular session) assigned to the Department the requirement that it arrange pre-positioned contracts for the delivery of emergency temporary housing in the event of a declared disaster, with such housing to be paid for from the disaster contingency fund created under Tex. Gov't. Code, Chapter 418.

Pursuant to direction from the Office of the Governor, the Department was already in the process of attempting to procure such pre-positioned contracts. Possible sources of emergency temporary housing might include travel trailers, manufactured homes, and park model homes. Far and away the most rapidly deployable choice would be travel trailers, but in responding to recent disasters FEMA has encountered issues with the formaldehyde levels in these units. FEMA has indicated that individual states should decide what levels of formaldehyde are acceptable, and the State of Texas, through the U.S. Department of Heath and Human Services (USHHS), has made its own determination in this regard. The problem is that existing inventory of travel trailers may not be constructed of materials that will meet the new standard. Therefore, any party responding must make a material capital investment to produce or acquire the necessary units (estimated by the Office of the Governor to be on the order of 3000 units) and incur holding costs until such time, if any, as there is a disaster requiring delivery. This has, so far, posed a barrier to the pre-positioned contract approach since there are no funds that can be accessed pre-disaster.

Other possible responses, such as manufactured homes and/or park models, cannot be delivered as quickly and are not self-contained units. They must be sited and installed on appropriate foundations and be connected to water, electricity, and sewage disposal. They are also subject to a number of local requirements and restrictions.

The Department is first and foremost a housing finance agency. It does not possess the requisite capabilities to address many of the intersecting issues involved with the delivery of emergency temporary housing, such as:

- Pre-arranged logistics with local officials;
- Providing and installing emergency connectivity such as above-ground water, electricity and sewage connection and portable sewage collection or disposal systems);
- Hardening and/or temporary removal provision in the event of threat of another disaster ; and
- Development of more extensive preparation for the likelihood that what was intended as short term emergency temporary housing may be deployed for 1-2 years.

The potential for confusion and gaps in the emergency response is significant, and it might be more effective to centralize the pre-positioned contracts under a single state unit, such as the Division of Emergency Management.

Another issue is raised by the fact that under the three major disaster allocations there have been three different program structures and a fourth is forthcoming. These have involved COGs, other units of local government, and the state as primary administrators. On two the Department has administered the HUD grant and on the third (and anticipated fourth) that role has been assigned to TDRA. Drawing on the past experiences it might be helpful to develop the parameters for a single "optimal" program and have it pre-positioned and ready for swift execution in the event of the need for a disaster recovery response.

M. Provide any additional information needed to gain a preliminary understanding of the program or function.

Program webpage: ttp://www.tdhca.state.tx.us/cdbg/index.htm.

N. Regulatory programs relate to the licensing, registration, certification, or permitting of a person, business, or other entity. For each regulatory program, if applicable, describe:

- why the regulation is needed;
- the scope of, and procedures for, inspections or audits of regulated entities;
- follow-up activities conducted when non-compliance is identified;
- sanctions available to the agency to ensure compliance; and
- procedures for handling consumer/public complaints against regulated entities

Not a regulatory program.

O. For each regulatory program, if applicable, provide the following complaint information.

Not a regulatory program.

OTHER PROGRAMS

This section provides information on Department programs not in existence during state fiscal year 2008 including programs recently authorized by the Texas Legislature, the Housing and Economic Recovery Act of 2008 (HERA), or the American Recovery and Reinvestment Act of 2009 (Recovery Act).

HOUSING AND ECONOMIC RECOVERY ACT OF 2008 (HERA)

Neighborhood Stabilization Program Round 1 (NSP 1)

The purpose of the Neighborhood Stabilization Program Round 1(NSP 1) is to redevelop into affordable housing, or acquire and hold, abandoned and foreclosed properties in areas that are documented to have the greatest need for declining property values as a result of excessive foreclosures. The program allows a grantee to purchase abandoned, foreclosed or vacant homes and residential properties to rehabilitate, reconstruct or redevelop and sell or rent those properties to households earning 120% AMFI or below.

NSP funds are available under two separate rounds of funding from the U.S. Department of Housing and Urban Development: NSP1 authorized by Housing and Economic Recovery Act of 2008 and NSP2 authorized by the American Recovery and Reinvestment Act of 2009.NSP 1 is as a supplemental allocation to the Community Development Block Grant Program through an amendment to the existing *2008 State of Texas Consolidated Plan One-Year Action Plan*.

Units of local governments and other entities with the consent of the local governments are eligible to apply for these funds. According to the NSP 1 Action Plan Substantial Amendment, each subrecipient will be required to target as a goal at least 35% of their non-administrative allocation to benefit households with incomes less than or equal to 50% of AMFI. Subrecipients who are conducting only land banking activities are exempt from this requirement as the end direct benefit may not be realized for up to ten years. All activities must benefit households earning 120% AMFI or below.

Texas identified two tiers of counties with need based on the numbers and percentages of home foreclosures, subprime mortgage loans and the homes in default. Counties with the greatest need are identified as “Direct Allocation” counties. Remaining counties with significant need are eligible to apply for a pool of NSP funds and are referred to as “Select Pool” counties. The program is administered through the Neighborhood Stabilization Program division.

The TDHCA Governing Board has approved award of $96,897,006 in NSP 1 funding to subrecipients across the state. The remainder, $5,099,842 or 5% of the entire $101,996,848 awarded to Texas from HUD was retained for state administrative expenses. Contracts between the Department and subrecipients are expected to be executed by the end of August, 2009; the contracts will have two to three year time periods depending upon the types of activities awarded. The State of Texas must expend the entire $101,996,848 (including program income) by March 3, 2013.

National Foreclosure Mitigation Counseling (NFMC) Program

The NFMC Program, administered through NeighborWorks America, provides funding to HUD-Approved Housing Counseling Agencies for foreclosure counseling with the goal of helping to prevent foreclosure and result in the long-term affordability of the mortgage or another positive outcome for the homeowner.

TDHCA, partnering with six non-profit agencies (sub-grantees) specializing in foreclosure prevention and utilizing the administrative services of the Texas State Affordable Housing Corporation (TSAHC), applied for Round 2 funding in October 2008 and was awarded $491,490. The one year grant agreement was executed January 14, 2009.

In addition to using NFMC grant funds for counseling services, the participating counseling organizations have also been able to use the funds for outreach events such as telethons, direct mailings and newspaper and radio advertising to help promote the availability of no-cost counseling for borrowers facing foreclosure.

As a result of recaptured funds from prior award recipients and additional appropriations, NeighborWorks is offering another application cycle. Based on the success of the Department's current grant award, TDHCA is qualified to apply for and submit a streamlined application. Successful applicants, on behalf of their sub-grantees will be awarded funds for reimbursement of counseling sessions completed between July 1, 2009 and June 30, 2010.

AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009 (ARRA)

Homelessness Prevention and Rapid Re-Housing Program (HPRP)

HPRP provides homelessness prevention and rapid re-housing of persons that have become homeless. This includes financial assistance limited to rental assistance; security deposits; utility deposits and payments; moving cost assistance; and motel and hotel vouchers. Housing relocation and stabilization services are also provided through HPRP, limited to case management; outreach and engagement; housing search and placement; legal services; and credit repair.

Eligible applicants include units of general local government and private nonprofit organizations. HPRP provides services and financial assistance to either prevent families and individuals from becoming homeless or help those who are experiencing homelessness to be quickly re-housed and stabilized. There are two target populations eligible to receive assistance: Populations eligible for homeless prevention include individuals and families who are currently in housing but are at risk of becoming homeless and individuals and families who are experiencing homelessness (e.g. residing in emergency or transitional shelters or on the street) and need temporary assistance in order to obtain housing and retain it. All households served must earn less than or equal to 50% AMFI.

The program is administered through the Community Services section in the Community Affairs division. Funding for HPRP, in the amount of $41,472,772, is provided through the U.S. Department of Housing and Urban Development. The Department awarded $40,435,953 to 57 subrecipients in July 2009; the balance of funds, $1,036,819, is reserved for state administration. Contracts are in the process of being executed. The State of Texas must expend the funds by July 16, 2012.

Weatherization Assistance Program (WAP)

The Recovery Act Weatherization Assistance Program is an expansion of TDHCA's WAP. The program helps low-income Texans control energy costs to ensure a healthy and safe living environment. Qualified households may receive weatherization materials installed in their residences and/or energy conservation education.

Eligible applicants for WAP funding are units of general local government and nonprofit organizations. For the Criteria Based Awards Pool (cities that exceed a $1,000,000 award), nonprofit organizations must secure a letter from an eligible city granting the nonprofit organization the authority to apply on their behalf. All individuals and households served must earn less than 200% of the national poverty guideline.

The Energy Assistance Section in the Department's Community Affairs division administers the program. Funding for the program, in the amount of $326,975,732, is made available through the U.S. Department of Energy. The Department awarded approximately $288 million to 66 subrecipients in July 2009, with the balance of funds being utilized for state administration and training and technical assistance. The State of Texas must expend the funds by March 31, 2012.

Community Services Block Grant (CSBG)

CSBG is an expansion of TDHCA's CSBG Program. CSBG assists local Community Action Agencies (CAA) and other eligible entities serving all 254 Texas counties to provide local essential services to those living in poverty. Activities typically allowed under the program include: Administrative support for poverty programs, such as Head Start, Weatherization Assistance and Meals on Wheels; and Direct services such as credit counseling, short-term rental assistance and transportation.

Entities eligible for Recovery Act CSBG funding are current recipients of CSBG funding. All individuals and households served must earn less than 200% of the national poverty guidelines.

The program is administered by the Department's Community Services Section within the Community Affairs. Funding for the program, in the amount of $48,148,071, is made available through the U.S. Department Health and Human Services. The Department has made available $47,666,590 to 48 subrecipients in August 2009. The balance of funds reflects one percent of the total amount awarded to TDHCA and will be used for benefit enrollment coordination as specified in the Recovery Act. The subrecipients must render services by September 30, 2010.

Tax Credit Assistance Program (TCAP)

TCAP supports the development or rehabilitation of affordable rental housing. Funding will be distributed according to the HTC Qualified Allocation Plan (QAP) and is subject to HTC rent and income and use restrictions.

TCAP provides HOME Program funds, in the amount of $148,354,769, through the U.S. Department of Housing and Urban Development for Housing Tax Credit (HTC) developments awarded in 2007, 2008 and 2009. Households served through the HTC program earn less than 60% AMFI.

TCAP awards will be finalized in October and November of 2009. All funds must be expended by February 17, 2012.

Housing Tax Credit Exchange

The Housing Tax Credit Exchange (HTC EX) program supports the development or rehabilitation of affordable rental housing. HTC EX allows Housing Tax Credit (HTC) allocating agencies, including TDHCA, to choose to receive a portion of their 2009 and returned 2008 HTCs in the form of a grant from the federal government rather than as tax credits. These funds will be available to assist 2007, 2008 and 2009 HTC developments.

HTC EX funds are made available through the U.S. Department of the Treasury. Households served through the HTC program earn less than 60% AMFI.

HTC EX awards will be finalized in October and November of 2009. All funds must be expended by January 2011, however as of the date of this publication federal officials are considering an extension of this deadline to December 31, 2011.

Down Payment Assistance Programs

The Texas Department of Housing and Community Affairs (TDHCA) has released two new down payment assistance programs - the Mortgage Advantage Program and the 90-Day Down Payment Assistance Program. Both programs are designed to monetize the Federal First Time Homebuyer Tax Credit enacted within the American Recovery and Reinvestment Act of 2009 by helping Texas families purchase their first home. The programs are intended to allow the borrower to take advantage of the legislation by receiving a short term loan prior to filing for and receiving the federal first time homebuyer tax credit. Program funds are available on home purchases prior to December 1, 2009.

Under the Mortgage Advantage Program, TDHCA has made available on a first come, first serve basis to participating mortgage lenders approximately $1 million in down payment assistance for use in conjunction with the 2009 Texas Mortgage Credit Program and approximately $1.5 million in down payment assistance for use in conjunction with The Texas First Time Homebuyer Program (Bond 70).

Under the 90-Day Down Payment Assistance Program, TDHCA has made available $5 million in down payment assistance to be used in conjunction with first lien mortgage loans originated by the lender.

Funds are available through the Department's network of participating lenders. A $250 administrative fee is charged to all borrowers. Borrowers sign a second lien note and deed of trust at closing that amortizes for a two to five year term depending on the program. Borrowers are offered a deferment period with zero percent interest to incentivize them to repay before the repayment period begins.

Funds to support these programs are derived from repayments from prior programs, fees from premium Private Activity Cap bonds and the Department's Mortgage Credit Certificate Programs.

Neighborhood Stabilization Program Round 2 (NSP 2)

The purpose of the Neighborhood Stabilization Program Round 2 (NSP 2), similar to NSP 1, is to redevelop into affordable housing or acquire and hold abandoned and foreclosed properties in areas that are documented to have the greatest need for declining property values as a result of excessive foreclosures. The program allows a grantee to purchase abandoned, foreclosed or vacant homes and residential properties to rehabilitate, reconstruct or redevelop and sell or rent those properties to households earning 120% AMFI or below.

The US Department of Housing and Urban Development (HUD) released a NOFA for NSP 2, as authorized by the American Recovery and Reinvestment Act of 2009. Unlike the initial Neighborhood Stabilization Program (NSP 1) created under HERA, which included a minimum allocation to all states, NSP 2 will be fully competitive on a national basis.

The Department submitted an application requesting $110 million in NSP 2 funds on July 16, 2009. The State of Texas is proposing a "balance of state" model to establish a statewide target geography without forcing direct competition with local and regional applicants who can otherwise compete successfully on a national scale. HUD announcements on NSP 2 awards are anticipated in December 2009.

OTHER PROGRAMS

Foreclosure Prevention Response

The Department for the past 10 years has administered the Texas Statewide Homebuyer Education Program (TSHEP), which provides instruction to local nonprofit organizations regarding the principles and applications of comprehensive pre- and post-purchase homebuyer education and to certify participants as providers.

The TSHEP curriculum includes basic foreclosure prevention training for counselors who work directly with homeowners in or facing foreclosure. The program is currently offering courses involving "Best practice" case studies, as well as developing and implementing an effective foreclosure program.

The Department is also a founding entity and active participant in the Texas Foreclosure Prevention Task Force (TFPTF), an association of more than 50 organizations representing government, the financial services and lending industry and the nonprofit sector working together to avert home mortgage foreclosures.

Ongoing TFPTF activities include:

- Raising awareness about the nationally endorsed Homeownership Preservation Foundation and its HOPE Hotline number 888-995-HOPE, connecting callers with HUD certified foreclosure prevention counselors
- Conducting outreach/public awareness campaigns in conjunction with existing foreclosure prevention efforts and initiatives
- Developing means for financial support for local counseling partners assisting distressed homeowners with home retention options
- Identifying and promoting foreclosure prevention related data/resources specific to Texas Identifying potential legislative recommendations that support homeownership retention

To help promote Task Force activities and the national HOPE Hotline, TDHCA coordinated a series of media events in six of the state's 10 largest television markets. The events occurred between March and June 2008, receiving a cumulative coverage totaling one hour, 35 seconds and reaching an estimated 4.5 million viewers.
The Department also added a comprehensive list of resources to the Department's website for Texans facing foreclosure to supplement and create synergy with its TFPTF activities. In additional to providing answers to frequently asked questions and practical steps to avoid foreclosure, the website also offers useful links to other sources of information that include HUD, FHA, Freddie Mac and the Federal Reserve Bank of Dallas, among others.

Additionally, TDHCA hosted a series of foreclosure prevention and continuing education trainings around the state. The trainings include *Beginning to Intermediate Foreclosure Prevention Training* in El Paso, McAllen, Houston and Dallas in March and April 2008; *Foreclosure Intervention and Default Counseling Part I* in San Antonio, October 2008; and *Advanced Foreclosure Case Study and Developing and Implementing Foreclosure Programs Part II*, in Houston, July 2009.

Homeless Housing and Services Program (HHSP)

The Homeless Housing and Services Program (HHSP) was created by the Texas Legislature during the 81st Legislative Session in response to a request from the eight largest urban cities in Texas for funds to provide services to homeless individuals and families, including services such as construction, case management, and housing placement and retention. The Legislature appropriated $20M over the 2010-2011 biennium to be administered by the Department to fund the HHSP. Funding for HHSP shall be awarded through a competitive matching grant process whereby the eight largest cities with populations larger than 285,500 persons per the latest U.S. Census figures may seek funding for this purpose.

Funds will be made available to political subdivisions, housing finance corporations, for-profit corporations and nonprofits organizations to support local homelessness initiatives.

VIII. STATUTORY AUTHORITY AND RECENT LEGISLATION

A. Fill in the following chart, listing citations for all state and federal statutes that grant authority to or otherwise significantly impact your agency. Do not include general state statutes that apply to all agencies, such as the Public Information Act, the Open Meetings Act, or the Administrative Procedure Act. Provide information on Attorney General opinions from FY 2005 – 2009, or earlier significant Attorney General opinions, that affect your agency's operations.

Texas Department of Housing and Community Affairs Exhibit 13: Statutes/Attorney General Opinions	
Statutes	
Citation/Title	Authority/Impact on Agency
Texas Government Code Chapter 2306	Provides creation of agency and authority to conduct programs.
SB 1 Article VII Section 1	Provides funding and has footnotes that require certain program practices and direct activities of the agency.
Texas Government Code Chapters 1371 and 1372	Authority for private activity bond program and certain issuance requirements.
26 USC §42	Enabling for Low Income Housing Tax Credit (HTC)
42 USC §9901, et seq.	Enabling for Community Services Block Grant (CSBG)
42 USC §§12701-12839	Enabling for HOME Investment Partnerships Program (HOME)
42 USC §6861	Enabling for Weatherization Assistance Program (WAP)
42 USC §1437f	Enabling for Section 8 Program
42 USC §8621, et seq.	Enabling for Comprehensive Energy Assistance Program (CEAP)
42 USC §11461	Enabling for Emergency Shelter Grants Program (ESGP)
26 USC §143	Enabling for Mortgage Revenue Bond Program
PL 109-148	Disaster Recovery – Hurricane Rita I
PL 109-234	Disaster Recovery – Hurricane Rita II
PL 110-329	Disaster Recovery – Hurricane Ike
PL 110-289	Housing and Economic Recovery Act of 2008 (HERA)
PL 111-5	American Recovery and Reinvestment Act of 2009 (ARRA)
Attorney General Opinions	
Attorney General Opinion No.	Impact on Agency
GA-0208	Provides certain restrictions on scoring of tax credit applications and development of the QAP.
GA-0497	Provides guidance on rule construction regarding limitations for inclusion of Public Housing Authorities Resident Councils for scoring of tax credit applications
GA-0455	Whether portions of §2306.6710, Texas Government Code, are unconstitutional because the legislative letters unduly influence the executive branch decisions.

B. Provide a summary of recent legislation regarding your agency by filling in the chart below or attaching information already available in an agency-developed format. Briefly summarize the key provisions. For bills that did not pass, briefly explain the key provisions and issues that resulted in failure of the bill to pass (e.g., opposition to a new fee, or high cost of implementation).

Texas Department of Housing and Community Affairs
Exhibit 14: 81st Legislative Session Chart

Legislation Enacted in the 81st Legislative Session

Bill Number	Author	Summary of Key Provisions/Intent
HB 434	Lucio III	Requires that any TDHCA application, form, and/or educational material from the Energy Crisis Intervention Program, the Weatherization Assistance Program, and the Low-Income Home Energy Assistance Program has to be provided in English, Spanish, and any "other appropriate language."
HB 492	Zerwas	Expands the state's current faith-and community-based health and human services network; pairs state agencies and stakeholders initiatives for increased partnership. Requires TDHCA executive director and other state agencies, in consultation with the Governor, designate one employee from each agency to serve as a liaison for faith-and community-based organizations.
HB 2275	Raymond	The bill creates a task force – includes TDHCA in that task force -- to develop uniform standards for subdivisions in the unincorporated areas of counties near the international border and in economically distressed counties.
HB 2450	Eiland	Bill directs TDHCA to draft rules that would allow the agency to establish clear title on a home whose owner is submitting an application for disaster recovery housing assistance. Bill also has TDHCA and GDEM establishing a pilot project to reconstruct or provide temporary housing for persons displaced by a natural disaster
HB 2840	Solomons	Adds TDHCA to the Residential Mortgage Fraud Task Force and also adds TDHCA to confidential information-sharing agreements with other agencies about mortgage fraud.
HB 4275	Menendez	Bill gives TDHCA flexibility and rulemaking authority to implement tax credit-related ARRA funds outside of existing statutory parameters.
HB 4409	Larry Taylor	Directs TDHCA to contract for temporary or emergency housing in the wake of a natural disaster
SB 679	Lucio	Bill makes substantial changes to the Texas Bootstrap Loan Program by changing award caps and total loan amounts, and sweat equity requirements of the owner-builder
SB 1717	West	Prohibits tax credit owners from locking out or threatening to lock out tenants unless through a judicial process or if construction/repair or an emergency is ongoing. Bill also prohibits owners from seizing personal property unless they earn the right through court or if the tenant abandons the unit. Bill also requires all housing sponsors of multifamily developments who get funds from the state or the feds must submit a quarterly unit vacancy report to TDHCA and that TDHCA must supply that report to members of the Legislature if requested.
SB 1878	Nelson	Creates a coordination council run by TDHCA with 15 members of various housing and health services agencies, groups. Contains various working tasks for the council and includes TDHCA staffing responsibilities. Based on LBB Govt Effectiveness and Efficiency Report.
SB 2064	West	The bill affects the duties and issuance procedures of bonds for the Bond Review Board. The bill also includes language about "construction-phase" financing for tax credit/bond deals in Section 18 of the bill

Legislation Not Passed in the 81st Legislative Session		
Bill Number	Author	Summary of Key Provisions/Reason the Bill Did Not Pass
HB 222	Menendez	Among other things the bill authorizes the state regulation of the game of poker and creates gaming revenue which is transferred to TDHCA: 50% used for homeless services, 50% in Housing Trust Fund. The bill made it out of committee but did not pass the House.
HB 261	Berman	Says that state agency may not adopt a rule or policy under which the agency will not fully enforce the laws of this state or federal law, including laws relating to immigrants or immigration. The bill was left in committee
HB 266	Berman	Statewide omnibus bill that discourages illegal immigration and immigrants in Texas as a matter of public policy. Requires state agencies to verify resident status of all new employees. The bill was left in committee.
HB 495	Zerwas	Dictates procedure for how state agencies are to distribute printed materials to Legislature. The bill was left in committee.
HB 547	Raymond	Pertains to civil actions filed against state agencies. The bill was left pending in committee.
HB 555	Menendez	Affects HTC program by expanding boundaries of area where neighborhood organizations can make comment on an application. Also requires TDHCA to award max points in category to applicants who have no neighborhood organizations in area where their application is. The bill was left in committee.
HB 563	Menendez	Same bill as HB 555 but adds provisions to change current point scoring system to a tiered system and also eliminates any scoring items not defined currently in statute. The bill passed out of its House committee and out of the House but was left in Senate committee.
HB 576	Sheffield	Defines how state agencies are to electronically seek Legislature approval prior to distributing publications. Passed out of House committee but left on House floor.
HB 581	Dukes	Places additional requirements, including required cost analyses, on state agencies seeking to outsource service(s). The bill was left in committee.
HB 703	Rose	Among other things bill directs DADS to incorporate fall prevention guidelines into state housing planning documents. The bill passed out of the House but was left in Senate committee.
HB 955	Villarreal	Directs TDHCA to create new program – Volunteer Income Tax Assistance Program to be funded through a small percentage of state TANF funds. Bill passed out of House committee but was left on House Local and Consent Calendar.
HB 1182	Turner	Reconstitutes System Benefit Fund and sets it up outside the Treasury and includes language mandating energy assistance programs through TDHCA. Passed by House but left in Senate committee.
HB 1412	Bohac	Expands notification requirements for housing tax credit developers and expands letters-for-scoring opportunities for neighborhood organizations to include any neighborhood organization that has boundaries either containing the proposed development site or within one-half mile of the site. The bill was left in committee.
HB 1429	Bohac	Adds new provision for housing tax credit applicants that all notification letters they send out must be done by certified mail. The bill was left pending in committee.

Legislation Not Passed in the 81st Legislative Session		
Bill Number	Author	Summary of Key Provisions/Reason the Bill Did Not Pass
HB 1553	Burnam	Would require TDHCA and 13 other state agencies to produce a climate adaptation plan and how each agency's programs would affect climate issues. The bill passed out of House committee but was never set on House calendar.
HB 1589	Rose	Comprehensive bill that directs HHSC to draft and implement a strategic plan that reforms state system for supports and services for persons with disabilities. TDHCA is mentioned as serving as a resource to the strategic plan's steering committee. The bill was left in committee.
HB 1627	Naishtat	Directs TDHCA to enter into an MOU with HHSC to provide $1 annually under LIHEAP to every family receiving food stamps if the household is not already receiving energy assistance benefits. The bill passed out of House committee but was never set on House calendar.
HB 1961	Brown	Requires the department by rule to adopt policies to ensure that each recipient and subrecipient who receives funds– including bond assistance – must be a citizen of the U.S. or authorized to be in the country by the federal agency for citizenship and immigration. The bill was left in committee.
HB 2121	Olivo	Expands notification requirements for housing tax credit developers and expands letters-for-scoring opportunities for neighborhood organizations to include any neighborhood organization that has boundaries either containing the proposed development site or within 500 feet of the site. Passed out of House but left in Senate committee.
HB 2296	Y. Davis	Bill makes substantial changes to the Texas Bootstrap Loan Program by changing award caps and total loan amounts, and sweat equity requirements of the owner-builder. The bill passed out of House committee but was never set on House calendar.
HB 2297	Y. Davis	Bill affects the housing tax credit program by raising the cap an applicant can receive in one single application round from $2 million to $3 million. The bill also ties the cap amount to a price index of sorts based on the Consumer Price Index from the US Bureau of Labor Statistics. This index is to be evaluated during even-numbered years starting on 1/1/12. The bill was left in committee.
HB 2308	Y. Davis	Essentially creates a single family loan program through TDHCA designed to serve low income families and designed to have extra protections against foreclosure. Passed House and passed Senate committee but not set on Senate calendar
HB 2309	Y. Davis	Creates forms to be filed by mortgage servicers with county clerks to contain extensive information on real property foreclosure sales and debtors associated with them. TDHCA is directed to collect and publish the data online. The bill was left pending in committee.
HB 2343	Menendez	Bill extends TDHCA's Sunset Date to from 2011 to 2015. The bill was left in committee.
HB 2629	Rodriguez	Bill directs TDHCA to add incentives in its QAP for applicants to use energy-saving devices and energy conservation measures in their developments. The bill was left in committee.

Legislation Not Passed in the 81st Legislative Session		
Bill Number	Author	Summary of Key Provisions/Reason the Bill Did Not Pass
HB 2674	Y. Davis	Bill directs the department to seek and administer federal funds that would support local homeless initiatives by political subdivisions, housing finance corporations, for profits and nonprofits. The bill was left in committee.
HB 2675	Y. Davis	Bill directs the department to create a foreclosure prevention program that offers information and assistance to homeowners in foreclosure or near to foreclosure due to adverse personal circumstances. Directs the department to seek federal funding to run the program. The bill was left in committee.
HB 2761	Martinez Fischer	Bill would direct TDHCA to work with the Finance Commission to develop a foreclosure prevention assistance form that would be provided to all homeowners when they close a loan, when they default, when they receive a delinquent notice, or a right to cure letter. The bill was left pending in committee.
HB 2827	Turner	Creates a new division within TDHCA dedicated to emergency housing. New division would have new ED and board per existing structure much like Manufactured Housing. The bill passed House and Senate committee but did not make Senate calendar.
HB 2888	Martinez	Bill would require that any development TDHCA funds reserve units for very low-income tenants and accept Section 8 or other rental voucher tenants. Bill also directs TDHCA to establish rules to enforce these measures. Bill also included language from HB 955. The bill passed the Legislature but was vetoed by the Governor.
HB 3161	Y. Davis	TDHCA is directed to conduct a study of the effectiveness of its SLIHP and to provide the results of the study to the Legislature by 12/1/10. Bill also contains language funding the HTF through a document recording fee. The bill made it out of House committee but not onto House calendar.
HB 3162	Y. Davis	Bill directs TDHCA to establish a long-range housing plan that covers at least six years and proscribes the contents of the plan. The bill made it out of House committee but not onto House calendar.
HB 3163	Y. Davis	Creates dedicated funding source for Housing Trust Fund by establishing document recording fee -- $10 per document and mandates that funds be sent to TDHCA for purposes identified in statutory language on the Housing Trust Fund. The bill made it out of House committee but not onto House calendar.
HB 3165	Y. Davis	Companion bill to SB 1717 which passed the Legislature and was signed into law by the Governor.
HB 3168	Y. Davis	Has TDHCA and GDEM establishing a pilot project to reconstruct or provide temporary housing for persons displaced by a natural disaster. The bill passed out of House committee but did not make onto House calendar. Language from bill was added to HB 2450 which passed Legislature and was signed into law by the Governor.
HB 3171	Y. Davis	Makes some minor tweaks to the administrative portion of TDHCA's enabling statute including encouraging maximum use of funds. The bill was left in committee.

Legislation Not Passed in the 81st Legislative Session		
Bill Number	Author	Summary of Key Provisions/Reason the Bill Did Not Pass
HB 3172	Y. Davis	Bill states that if another state agency receives funds from HUD and receives more than 50% of those program funds intended for the state, it must transfer that program to TDHCA. If it is less than 50%, it must enter into an MOU with TDHCA. The bill was left in committee.
HB 3219	Chavez	Companion bill to SB 1878 which passed Legislature and was signed into law by the Governor.
HB 3241	Martinez	Among other things, the bill creates a work group to discuss issues facing counties which contain colonias. A representative from TDHCA is to be on the work group. The bill was left pending in committee.
HB 3430	Menendez	Bootstrap bill that included language on loan amounts, lien position, etc. The bill was left in committee.
HB 3431	Menendez	Bill abolishes TSAHC and rolls it into TDHCA and provides direction to the department on how to use funds from transfer. The bill passed out of House committee but did not make it onto House calendar.
HB 3432	Menendez	Bill included some administrative clean-up language for Section 2306 of the Texas Government Code and included the creation of a public housing authority board within TDHCA's board. The bill was left in committee.
HB 3482	Coleman	TDHCA is to create a form sent by mortgage servicers to mortgagees prior to a foreclosure that informs the debtor they have a right to enter into mediation. The bill was left pending in committee.
HB 3535	Y. Davis	Bill exempts tax credit nonprofit set-aside from the regional allocation formula. The bill was left in committee.
HB 3536	Y. Davis	Requires TDHCA to collect statistical information on how many multifamily units are in each census tract and how many occupants are in each of these units and report this to the Census Bureau. The bill was left pending in committee.
HB 3540	Y. Davis	Large omnibus bill creating a Texas Housing Independence Campaign, task force, and various programs with multiple agencies. The bill passed out of House committee but did not make it onto House calendar.
HB 3928	Guillen	Bill attempts to solve current lien issue with disaster housing by providing new options for persons to prove ownership of a homestead. The bill was left pending in committee.
HB 4094	Y. Davis	A fair housing bill that creates a Governors Fair Housing Council with TDHCA and other state agencies and to be chaired by TDHCA. Responsibilities include programs reviews and an annual report on the council's progress. The bill was passed out of House committee but did not make it onto House calendar.
HJR 117	Turner	Joint resolution creating a constitutional amendment that would provide no more than $100 million to TDHCA to expend for temporary or emergency housing. The bill was left in committee.
SB 123	Ellis	Restricts any appropriation from the System Benefit Fund to only those purposes identified in Section 39.903 of the Utilities Code and no other law. The bill was left in committee.

Legislation Not Passed in the 81st Legislative Session		
Bill Number	Author	Summary of Key Provisions/Reason the Bill Did Not Pass
SB 265	Hinojosa	Amends Sec. 39 of the Utilities Code and directs PUC to adopt and enforce rules that electric utilities establish a system benefit fund outside the state treasury. Purpose of said fund is limited to what is described in this section of statute. The bill passed out of committee but was left on Senate calendar.
SB 464	Zaffirini	Re-constitutes System Benefit Fund with a number of measures dictating who is eligible and how funds are collected. The bill was left in committee.
SB 509	Carona	Bill states that no later than June 1st of each year, a state agency has to provide the agency's proposed publicity expenditures to its oversight committees in the Legislature. The bill goes on to say that on a vote of a majority of the committee, a statement either supporting or opposing a proposed expenditure may be sent to the agency. The bill was left in committee.
SB 744	Wentworth	Bill redefines the Community Housing Development Organization (CHDO) property tax exemption. The bill would: (1) permit certain limited partnerships to qualify for community housing development corporation (CHDO) property tax exemptions; and (2) delete the current-law requirement that housing projects must be built after December 1, 2001 in order to qualify for a CHDO exemption. The bill was left in committee.
SB 934	Lucio	Creates dedicated funding source for Housing Trust Fund by establishing document recording fee -- $10 per document and mandates that funds be sent to TDHCA for purposes identified in statutory language on the Housing Trust Fund. The bill was left in committee.
SB 950	West	Creates dedicated funding source for the Housing Trust Fund by establishing a document recording fee ($10) per documents dealing with real property. The bill was left pending in committee.
SB 980	Lucio	Creates forms to be filed by mortgage servicers with county clerks to contain extensive information on real property foreclosure sales and debtors associated with them. TDHCA is directed to collect and publish the data online. The bill was left in committee.
SB 990	Lucio	Creates a rural land bank program of which TDHCA is to develop the rules and guidelines for the program. The bill was left in committee.
SB 991	Lucio	Bill requires that TDHCA ensures that housing tax credit applications for rural developments considered small scale (< 33 units) are not placed at disadvantage in the QAP. The bill was left in committee.
SB 1060	Ellis	Comprehensive bill that directs HHSC to draft and implement a strategic plan that reforms state system for supports and services for persons with disabilities. TDHCA is mentioned as serving as a resource to the strategic plan's steering committee. The bill made it out of committee but not onto the Senate calendar.
SB 1375	West	Creates the Texas Savvy Homeowner Program for mortgage loans administered by TDHCA or TSAHC. Program is designed to educate homeowners on re-financing options and is mandatory. Program can be administered by TDHCA or a non-profit approved by HUD. The bill passed the Senate and made it out of House committee but did not make House calendar.

Legislation Not Passed in the 81st Legislative Session		
Bill Number	Author	Summary of Key Provisions/Reason the Bill Did Not Pass
SB 1861	Ellis	Creates an alternative weatherization program to be run by TDHCA on a pilot program basis using fed stimulus funds via ARRA. The bill passed the Senate and passed the House committee but did not make the House calendar.
SB 1943	West	A fair housing bill that creates a Governors Fair Housing Council with TDHCA and other state agencies and to be chaired by TDHCA. Responsibilities include programs reviews and an annual report on the council's progress. The bill passed out of Senate committee but not on Senate calendar.
SB 1944	West	Bill creates a tax credit for taxable entities providing charitable contributions to eligible nonprofit owner-builder loan programs (Bootstrap). The bill was left in committee.
SB 2169	Ellis	Creates a statewide policy workgroup on smart growth and adds TDHCA as a member. The bill passed the Legislature but was vetoed by the Governor.
SB 2280	Ellis	Creates a large state Re-entry Policy Council to help determine how to integrate inmates into the community after they have been released from jail/prison. TDHCA is a member. The bill passed out of Senate committee but did not make Senate calendar.
SB 2287	Lucio	Bill creates a Small Municipality and Rural Area Housing Development fund and program to be administered by TDRA. Bill directs TDHCA to work with TDRA in identifying possible additional funds for the program. The bill was left in committee.
SB 2288	Lucio	Large bill creates a Small Municipality and Rural Area Housing Development fund and program to be administered by TDRA. Directs TDHCA to work with TDRA in identifying additional available funds for program. Creates a new division within TDHCA to work this initiative, includes language from SB 991, SB 1026, and SB 990, including adding a farm worker housing pilot project. The bill passed the Senate and out of House committee but did not make House calendar.
SB 2289	Lucio	Bill is a funding mechanism for the Housing Trust Fund with the authorization to have TDHCA issue general obligation bonds to fund the HTF not to exceed $50 million in one year. Needs a constitutional amendment (see SJR 46 below). The bill was left in committee.
SB 2290	Lucio	Bill contains language of SB 2288 without language from SB 991, SB 1026, and SB 990. The bill was left in committee.
SB 2291	Lucio	Directs TDHCA to create a regional CDC for rural housing as a pilot program and a statewide CDC for migrant labor housing and the latter is to implement the findings from the TDHCA report issued in 2007 on migrant labor housing. The bill was left in committee.
SB 2292	Lucio	Creates a natural disaster housing reconstruction council and program of which TDHCA is an integral member both from a staffing and funding aspect. The bill passed the Senate and the House committee but did not make the House calendar.
SB 2294	Lucio	Affects the BRB rules and the state's PAB program and provides the BRB with flexibility to temporarily change rules to help the state facilitate federal legislation. The bill was left in committee.

Legislation Not Passed in the 81st Legislative Session		
Bill Number	Author	Summary of Key Provisions/Reason the Bill Did Not Pass
SJR 46	Lucio	Would provide the constitutional amendment to have TDHCA issue general obligation bonds to help fund the Housing Trust Fund. The bill was left in committee.

IX. POLICY ISSUES

POLICY ISSUE 1: HOUSING TRUST FUND AND BOOTSTRAP EXPENDITURES

A. Brief Description of Issue

The Housing Trust Fund, described earlier in this document, is an excellent source of flexible non-federal funds whose growth is critical to increasing the supply of affordable housing in Texas. However, there are several statutory requirements that pose challenges to the efficient and timely use of the funds. With funds not being expended promptly, the program may appear to not justify increases. As is, TDHCA is limited in the extent to which success can be measured and more funds requested.

B. Discussion

TDHCA, as the state agency responsible for providing affordable housing to low income Texans, strives to expand to the greatest extent possible the total resources available for those activities. As such, TDHCA has historically made, and will continue to make, requests for Housing Trust Fund resources during the Legislative Appropriation Request process. During that process it is critical that TDHCA be in a position to report clear successes with funds – in households served and in dollars expended timely. The TDHCA Board has been effective in programming HTF funds in ways that serve as many households as possible, while using the flexible funds to address very hard to serve populations. However, there are several statutory issues that make the timely expenditure of funds more challenging – both delaying assistance to Texans and indicating lack of effective programming of funds. Remedies to these issues would allow funds to move more quickly and enhance expenditure rates.

The primary delay in the use of funds is the “2/3 set-aside” requirement for the Owner-Builder Loan Program, more commonly known as the Texas Bootstrap Loan Program. As noted earlier in this report, TDHCA is statutorily required to fund the Texas Bootstrap Loan Program with a minimum of $3 million per year. Due to the success of this program, and the many benefits to very low income households, the program for the 2010-2011 biennium has been increased to $10 million. Section 2306.753(d), Texas Government Code, which requires that two-thirds (2/3) of the “dollar amount of loans made must be made to borrower whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code [Economically Distressed Areas.]” In order to accomplish this requirement, Texas Bootstrap Loan Program funds are reserved specifically for the 2/3 set-aside. Unfortunately, the 2/3 set-aside remains significantly undersubscribed each year due to limited number of nonprofit organizations which undertake self-help housing construction projects in those communities. The nonprofit organizations are required to qualify, organize and supervise groups of families in the construction of their own home. Because these funds cannot be collapsed together with the 1/3 set-aside, they continue to roll forward and remain uncommitted and unavailable to the balance of the state.

C. Possible Solutions and Impact

As it relates to the Bootstrap Program, TDHCA staff is currently instituting several possible solutions.

1. TDHCA has developed a Bootstrap Capacity Building Program specifically to build the capacity of nonprofit organizations in self-help housing construction located in Economically Distressed counties of Texas (2/3 set-aside). TDHCA hopes to accomplish this by providing intensive technical assistance, as well as facilitating mentoring partnerships between new or less experienced nonprofit organizations and more experienced nonprofits. These less experienced nonprofits will be able to benefit from their mentor nonprofit organization’s expertise in areas where additional training, technical and supervisory assistance is needed. Examples of this are: mortgage financing, on-site construction and program management. The goal is to increase acquisition, rehabilitation, reconstruction or new construction of affordable single family housing through self-help housing construction in accordance to the Texas Bootstrap Loan Program. Staff hopes that by helping develop nonprofits qualified to administer the program, they will increase participation in the program.

2. TDHCA is also educating and encouraging nonprofit organizations in counties not currently classified as Economically Distressed Areas (EDAs) to work with their counties to inform them of the benefits of and steps to becoming EDAs.

Unfortunately, these are both efforts that may not have an immediate or significant impact on the unexpended balance of funds. As such, an additional statutory solution may be needed. Ideally, the statute would be changed to allow the two-thirds set-aside to collapse into the general Bootstrap Loan Program funds if they are not requested after an initial period of time. TDHCA will continue capacity building and outreach efforts, but this change will allow the funds to be utilized throughout the state if the EDAs do not ultimately request the funds.

POLICY ISSUE 2: ASSET RESOLUTION

A. Brief Description of Issue

Asset resolution. Through the federal HOME Investment Partnerships (HOME) program, the Department provides funds for development of affordable housing, including affordable rental housing. As required by the federal rules and state program rules, multifamily housing developments funded under the HOME program are subject to a minimum affordability period, generally 30 years. Development owners must maintain records of compliance with state and federal rules and the Department provides ongoing compliance monitoring of all HOME funded properties to ensure compliance. Compliance requirements include documentation that tenants meet state and federal income qualifications, documentation that housing rents are restricted at affordable levels, and assurance that housing units are maintained over the affordability period.

The U.S. Department of Housing and Urban Development (HUD) oversees the HOME Investment Partnerships program and monitors the Department to ensure that all HOME funds are administered in accordance with federal program rules and requirements. When a property fails to remain in compliance with state and federal requirements the Department has several methods of enforcement. Those measures could include taking back the developments through foreclosure or agreement and either operating them directly as affordable rental properties or transferring them to other owners capable of operating them in compliance with the requirements of the HOME program. Once HOME funds have been awarded to assist a development, no more HOME funds may be invested for that project during the federal affordability period. The two most common forms of assistance are major rehabilitation and new construction. Either may be administered as either a loan or a grant.

B. Discussion

There are a number of different compliance problems that an affordable rental housing property may encounter. However, some of the more common ones include:

1) "Prior management" failed to complete rehabilitation and absconded with the funds.
2) Required records are not maintained and required reports are not filed.
3) Premises are leased to ineligible tenants.
4) The property does not produce cash flow as projected and is allowed to deteriorate because of inadequate funds for maintenance.
5) Subsequent owner does not participate in the program.

Further, on the older multifamily loans in the Department's HOME portfolio, the Department is in the second lien position and has limited solutions. In most of these instances, the Department will need to have a ready source of cash to fund related costs such as payment of prior lien indebtedness, correction of physical condition violations, and asset management costs. At times there are properties which simply cannot be viably operated as affordable rental housing under the HOME program, in which case the Department will need to repay HUD with non-federal funds.

C. Possible Solutions and Impact

The Department needs appropriate additional funds for use in addressing these issues. If such funding is not available, the Department's ability to restructure and address these properties is severely limited, potentially creating repayment liability to HUD of a greater magnitude.

POLICY ISSUE 3: SERVING THE LOWEST INCOME HOUSEHOLDS

A. Brief Description of Issue

Needs of persons at 30% of area median income (AMI) is acute. The majority of the funding tools available to the Department focus on the housing needs of households earning between 50% and 80% of the area median income particularly with regard to the production of new affordable housing. Subsidizing households below that level generally require ongoing financial support and linkages to other public and private services outside of the Department's control or sphere of influence.

B. Discussion

TDHCA receives federal and state funding sources for housing activities that primarily provide a one time or initial infusion to lower the burden of funds needed to start a housing development. Both single family ownership and multifamily rental housing has an ongoing operating and maintenance need for funds. These funds are required to pay for repairs and maintenance, utilities, taxes, insurance, management oversight and debt service. Even when a housing unit is delivered using 100% grant and equity funding sources with no debt service, households earning less than 30% to 40% of the area median income will have to spend a significantly disproportionate share of their income (more than 30%) to stay in the unit overtime. In addition senior households and households which have a member(s) with a disability face additional challenges that often require additional housing related services (e.g. physical access adaptations, communication enhancements, independent living assistance) which are not part of an initial housing budget. None of the funding sources currently available to the Department allow for their use to be in the form of a long term reserve to fund such ongoing needs. The tools currently available to address the ongoing cost of permanent housing issues are limited to emergency utility assistance through the Comprehensive Energy Assistance Program, short term tenant based rental assistance through the HOME Investment Partnership Program of HUD and Section 8 assistance for limited areas of the State that do receive a direct allocation of Section 8 assistance also through HUD. These existing tools are designed to be temporary and do not address the permanent housing related needs.

C. Possible Solutions and Impact

The creation of a dedicated trust that would commit annual funding up front for a more permanent period of a minimum ten but a maximum thirty year period would require a new state source of funds and statutory changes to obligate the Department to continue to subsidize units in a development beyond the two year biennium. In addition, legislation passed in the 2009 session, SB1878, provided for the creation of an interagency council to address issues involving service enriched housing particularly to assist elderly citizens age in place and housing related services to citizens with disabilities, this councils mandate could be expanded to oversee the implementation of funding to provide such integrated services as well as explore services needed more generally for the poorest of the poor, households at or below 30% of the area median income.

POLICY ISSUE 4: LACK OF FLEXIBILITY IN THE HOUSING TAX CREDIT PROGRAM

A. Brief Description of Issue

Efficiencies in administration are lost because of the highly proscribed regulations of the Low Income Housing Tax Credit (HTC) application cycle.

B. Discussion

Due to concerns that arose several sessions ago about lack of transparency in the award process, TDHCA's governing statute contains some very proscriptive parameters that can make Department operations difficult and put process over substance.

Several examples exist, but one of the most pressing is found in Texas Government Code, 2306.6724, "Deadlines for allocation in low income housing." For instance, the community has requested a two year Qualified Allocation Plan (QAP), but because subsection (a) of this section requires a plan be submitted each year by September 30, a two year plan would not be allowable.

Also because applications are due not later than March 1 of the application year, the TDHCA governing Board cannot provide any discretion or flexibility when unique circumstances arise. This past year, for example, the passage of ARRA made available additional funds on February 17, 2009. Unfortunately, because awarded credit applications are statutorily required and the tax credit cycle is limited to a single award round (combination of §2306.6702(4) and §2306.1111, Texas Government Code), there was no way to allow the relief provided under the federal law without a statutory change. Luckily, the Legislature happened to be in session this year, so such statutory change did occur (Texas Government Code, §2306.6736). Had the legislature not been in session, the Department would not have been able to maximize Recovery Act resources.

Another issue related to the proscribed deadlines is the requirement that Representatives and Senators be notified prior to the application deadline of March 1. Due to an error in mapping a rural area, the wrong Senator was recently notified of a development. Unaware of this error, this incorrect Senator sent the Department a letter of support. After the application deadline, the property owner discovered their error and contacted the correct Senator and obtained their support for the development. Unfortunately, because of the requirement that the Senator be notified in advance of the application deadline in statute, there was no way to allow the application to move forward as they did not meet the statutory notification deadline.

C. Possible Solutions and Impact

One possible solution to this lack of flexibility is to limit the number of hard dates in the statute and allow some Board discretion for providing changes in the rules for just cause or simple error. While all of the current statutory concepts could still be included - such as rule development, notification requirements and scoring - more flexibility could be built into how these concepts are developed, which would provide a more user-friendly system that focuses on substance of the applications and developments.

POLICY ISSUE 5: ROLE IN DISASTER RECOVERY

A. Brief Description of Issue

The Department has played a central role during the last five years in long-term disaster recovery, providing funding, to finance the repair, rehabilitation, and replacement of housing damaged by hurricanes. The primary source of this funding has been federal CDBG supplemental appropriations.

Through initiatives directed by the Office of the Governor and through statutory changes enacted by the 81st Texas Legislature, the Department has been called upon to expand its disaster recovery role to include emergency temporary housing in the immediate aftermath of declared disasters. In response to the gubernatorially mandated recovery work, TDHCA created a permanent Division of Disaster Recovery. Additionally, HB 4409 requires the Department to enter into pre-positioned contracts for emergency temporary housing following a disaster. As set forth in that bill, funding may be from the disaster contingency fund established under TEX. GOV'T. CODE, §418.073.

Historically the Department has acted as a housing finance agency providing funding for a variety of housing activities. The actual repair, restoration and replacement activities have been carried out by others with the Department providing funding only. Moving into the worlds of providing emergency temporary housing is an entirely different matter. It involves logistical demands, financial resources, and staffing expertise that are not available within the Department.

B. Discussion

Providing emergency temporary housing in the wake of a disaster presents extreme challenges in several areas:

1) Products. There are a very limited number of housing solutions that can be made available quickly. Each involves its own unique requirements and limitations.
   a. Shelter in existing structures (other homes and apartments, hotels and motels). A significant disaster will place huge demands on these sources. Typically people will identify and select these on their own and if they involve costs FEMA will provide vouchers or some other mechanism of payment or reimbursement. Although hotel and motel space might be made accessible quickly (if available), it is not well-suited to extended occupancy. This is a critical shortcoming because long term housing repair, restoration, or replacement solutions typically take a year or longer. The process is as follows: CDBG disaster funds are appropriated, HUD develops allocation plans, public hearings are held, state plans are developed, HUD program rules are published, then allocation occurs and grant agreements are executed, the logistics of the employed solution are put in place, and extensive state and federal requirements, including environmental review processes, are undertaken, all before construction can legally commence.
   b. Travel trailers. Following FEMA use of travel trailers in responding to emergency housing needs after recent Gulf Coast hurricanes, a significant issue with the formaldehyde levels in travel trailers was identified. Although the state has developed new formaldehyde standards, such units are generally not available. The cost to have a significant number of new, compliant units manufactured would be significant. The Department has no appropriated funds available for this activity. Although travel trailers might be delivered and made accessible quickly (if available), they are not well-suited to extended occupancy.
   c. Manufactured homes. Although these units may be installed relatively quickly and are more suited to long term use than hotels, motels, and travel trailers, they involve additional factors, such as site preparation, the need for skilled and licensed installers, and the need for utility, water and wastewater connections. Additionally, manufactured homes have been historically hard for urban areas to deal with in light of zoning restrictions and other requirements.
   d. Park model homes. While these present many of the same attributes as manufactured homes, they are smaller and less suited to greater numbers of occupants.

2) Logistics. For any of these solutions, other than hotel and motel space, there are a host of logistical challenges and critical decision points. The Department is not experienced or staffed in these areas. Some of the key issues involved are:
   a. Who makes the call that any or all of these possible types of units are needed, how many and of what sort, and where are they to be located and delivered?
   b. Will permitting and zoning issues be pre-cleared or addressed on a "blanket" basis? If not, what will the requirements be?
   c. How will utilities and water and wastewater hookups be handled?
   d. Will there be group sites? If so, what advance preparation will be done, if any? If nothing is done in advance, to whom will the responsibility fall?
3) Finances. Presumably reimbursement from FEMA will be pursued for all of these activities, should they occur. Pre-positioned contracts present a different issue, especially for travel trailers. Because inventory that meets new formaldehyde standards is generally non-existent, anyone committing to provide travel trailers for emergency housing purposes will require funds to have such trailers built. Furthermore, because there is an uncertainty as to when or where disaster may strike, anyone who has inventory will seek funding for the costs of storage, maintenance, and general readiness for delivery.

C. Possible Solutions and Impact

To deliver the optimal state government response to the logistical challenges of administering emergency temporary housing the state body tasked with such must have the trained and experienced staff, the relationships with local governmental decision-makers, ability to coordinate with other aspects of emergency response, and ability to access the non-housing essential resources such as site preparation, transportation, utility connection, etc. The Governor's Division of Emergency Management probably best fulfills these criteria, but whatever body oversees these activities needs to be provided with the essential funding to make possible the acquisition and storage of the necessary units. Absent this funding, the only possible solution requires placing reliance on existing retail sales and distribution networks for travel trailers (which likely will not meet the new formaldehyde standards), manufactured homes, and park models to commit to make their existing inventory available for emergency response.

POLICY ISSUE 6: RURAL HOUSING – UNIQUE NEEDS AND CAPACITY

A. Brief Description of Issue

As noted throughout this report, there is acute housing need across Texas. Rural Texas is no exception, and the challenges they face are unique.

B. Discussion

Rural Texas has several distinct housing demographics based on the most recent U.S. Census data analysis.

- Approximately 17% of all households in need of affordable housing in Texas are located in rural communities.
- The rate of substandard housing units is higher in rural areas for both renters and owners.
- The rates of cost burden and overcrowding are higher for rural homeowners than urban homeowners.
- The poverty rate is higher in rural areas than urban areas.
- The rate of cost burden for rural renters is similar to the rate for urban renters.
- Rural renters experience a lower rate of overcrowding than urban renters.

Additionally, there are several other factors, not directly correlated with data-based need, that add to rural housing challenges:

- Rural Texas appears to have higher rates of homeownership.
- Rural areas find it more challenging to attract developers of housing – either market rate or affordable – because of the more limited profitability of rural activities
- Rural areas are rarely direct recipients of federal housing funds, and have limited access to local funds, which makes leveraging funds more challenging than in urban areas
- Anecdotally, it is more expensive to develop housing in rural Texas because materials are harder to access, transportation costs for materials are higher, and skilled labor often has to be brought in
- Local governments and local nonprofits who would be typical applicants for affordable housing resources, often do not have the capacity (housing knowledge, financial resources, staff, etc.) to pursue housing activities
- Generally, in rental housing, market feasibility evaluations occur that indicate an amount of need that a proposed property could absorb. In rural areas, the need for a small community may not correlate to a sufficient number of units to make a development financially feasible.

C.Possible Solutions and Impact

TDHCA continues to develop solutions to these challenges which include:

1. Targeting of at least 95% of all HOME funds to rural Texas as is statutorily required. HOME funds allow a local community flexibility in addressing affordable housing needs.
2. Instituting the Capacity Building and Rural Expansion program under the Housing Trust Fund. This newly created HTF Program is designed to simultaneously provide funds to eligible rural applicants for both capacity building and construction. Many recipients of the Department's capacity building funds in the past have worked to expand construction program capacity, only to face challenges in locating resources. By partnering the two, the Department essentially provide "seed money" to fund their first affordable housing initiative, while committing the resources to building them as nonprofits/local governments with housing expertise.
3. Ensuring collaboration with several rural interest groups – including the Association of Rural Communities in Texas and Rural Rental Housing Association – to develop program changes that address their concerns and suggestions.

Other solutions could include marrying TDHCA funds with other state economic development funds so that the rural housing and economic development occur in tandem, and partnership with the manufactured housing industry to maximize creative affordable solutions with their products.

POLICY ISSUE 7: RESOURCES FOR HOMEOWNERSHIP AND THE BOND MARKET

A. Brief Description of Issue

Promoting responsible home-ownership is a high priority for the Department. One of the principal tools that TDHCA used to support this priority is offering first time homebuyer loans. The Department routinely issues bonds to finance first time homebuyer loans under the authority of TEX. GOV'T. CODE, §§2306.351 and 2306.352. In order to provide loan products that are financially attractive and prudently underwritten, the Department must take into account a host of factors, including prevailing market rates, interest rate markets and trends, and the market for bond investments. As provided for in TEX. GOV'T. CODE, §2306.351(b), the Department, in consultation with its underwriters and financial advisers, enters into necessary ancillary contracts tailored to the relevant factors at the time of issuance and, as markets conditions and other factors change, considers changes to these contracts. The Department's ability to meet the demands of the market and these contracts has a material bearing on the rating of the Department's bonded indebtedness and, therefore, the competitiveness of its pricing and the ability to place bonds. The market, and rating agencies in particular, have an expectation that an issuer such as the Department will have available financial resources commensurate with its overall position, including contracts of the sort described in TEX. GOV'T. CODE, §2306.351(b).

B. Discussion

The Department does not have specific, identified, and appropriated funds to address these market requirements. When each new bond issuance is structured, therefore, market conditions are assessed and the Department consults with its financial adviser to develop a specific plan for the ancillary contracts, such as hedges and liquidity facilities. Because the market takes into account not only the structure of the current issue but also the Department's overall posture (i.e. its bond indebtedness), the Department's challenges, and therefore its need for additional financial support, increases as its issued bonds increase.

While TDHCA's First Time Homebuyer Programs provide significant benefits to Texans, the function of offering home loans can be fraught with complexities and risks. The tendency is to think in terms of credit risks, but actually credit risks are generally among the easier risks to quantify and mitigate though the employment of well-developed and tested underwriting standards. This is exactly how TDHCA approaches that risk. However, far and away the hardest risks to manage are the interest rate risks. Mortgage loans are long term obligations. Even when they are made on a fixed rate basis they present interest rate risks because the ultimate borrowers may prepay at anytime, a feature known as "optionality." Investors in mortgage-related products typically have specific funding sources and desire to lock in a positive return or "spread" for the duration of their particular funding source. Variable rate mortgage loans simply compound this issue as rising loan prices often trigger prepayments, robbing the ultimate investor of their anticipated return.

In an effort to meet the many demands and parameters of both investors and borrowers, interest rate risk must be addressed, and the established approach, as reflected in TEX. GOV'T. CODE, §2306.351(b), is to employ hedging techniques. Hedges, however, are financial instruments and contractual obligations that carry costs and volatility themselves.

C. Possible Solutions and Impact

The Department has limited and generally inadequate sources of funds for these activities. The appropriation of additional funds specifically for this purpose would be one solution. An alternative would be to draw upon the resources of other state agencies, most notably the Comptroller of Public Accounts, to provide some or all of the contractual services required. Without such a solution the Department will have to continue to issue bond indebtedness that is not properly supported.

X. Other Contacts

A. Fill in the following chart with updated information on people with an interest in your agency, and be sure to include the most recent e-mail address.

TOTAL	$2,698,859	$1,498,976	55.5%	

C. Does your agency have a HUB policy? How does your agency address performance shortfalls related to the policy? (Texas Government Code, §2161.003; 34 TAC, Part 1, §20.15(b))

TDHCA has a HUB Plan that was established in 2000. TDHCA's percentages and the Statewide Goal are reviewed each year and any shortfalls are assessed with the HUB Plan to see what improvements could be made in that area. A Supplemental Letter is submitted to the Comptroller if a shortfall occurs and is part of the semiannual HUB reporting information.

D. For agencies with contracts valued at $100,000 or more: Does your agency follow a HUB subcontracting plan to solicit bids, proposals, offers, or other applicable expressions of interest for subcontracting opportunities available for contracts of $100,000 or more? (Texas Government Code, §2161.252; 34 TAC, Part 1, §20.14)

TDHCA includes the Historically Underutilized Business Subcontracting Plan (HSP) with every procurement solicitation over $100,000 or anticipated to be $100,000. All responses to these solicitations must include the HSP or the response is not considered responsive and is not considered for award.

E. For agencies with biennial appropriations exceeding $10 million, answer the following HUB questions.	
	Response / Agency Contact
1. Do you have a HUB coordinator? (Texas Government Code, §2161.062; 34 TAC, Part 1, §20.26)	Yes. Julie M. Dumbeck.
2. Has your agency designed a program of HUB forums in which businesses are invited to deliver presentations that demonstrate their capability to do business with your agency? (Texas Government Code, §2161.066; 34 TAC, Part 1, §20.27)	TDHCA does not have facility accommodations to host in-house forums, but the Department attends and co-hosts forums throughout each fiscal year.
3. Has your agency developed a mentor-protégé program to foster long-term relationships between prime contractors and HUBs and to increase the ability of HUBs to contract with the state or to receive subcontracts under a state contract? (Texas Government Code, §2161.065; 34 TAC, Part 1, §20.28)	TDHCA has had a mentor protégé contract in the past and is currently working on developing additional avenues of mentor protégé contracting for the agency.

F. Fill in the chart below detailing your agency's Equal Employment Opportunity (EEO) statistics.[10]

Texas Department of Housing and Community Affairs Exhibit 18: Equal Employment Opportunity Statistics							
FISCAL YEAR 2006							
Job Category	Total Positions	Minority Workforce Percentages					
		Black		Hispanic		Female

G. Does your agency have an equal employment opportunity policy? How does your agency address performance shortfalls related to the policy?

Yes, the Department's Workforce Diversity Program/Affirmative Action Plan, is excerpted below:

1.2. Workforce Diversity Program/Affirmative Action Plan

1. Preface

   The Department recognizes that full and equal participation of minorities, women, and disabled persons in all employment opportunities is a necessary component of any effective workforce diversity. However, the establishment of goals, objectives, responsibilities, action plans, and timetables to be implemented by management must comply with laws prohibiting employment discrimination.

2. Forward

   Equal opportunity is issued and protected by state and federal laws. In the public sector of our society this means that all persons, regardless of age, race, color, religion, sex, national origin, veteran status, and disability will have equal access to positions in public service limited only by ability to do the job.

   Voluntary Workforce Diversity Policies assure that equal employment opportunities are applicable to a variety of employment processes.

   When the Executive Director or Director of Human Resources has reason to believe that a particular personnel policy and procedural system has maintained the current effects of past discrimination, he/she should take steps to remedy the situation. Such policy will be changed as soon as possible.

3. Policy Statement

   The powers and duties exercised by the Commission on Human Rights Act were transferred to the Texas Workforce Commission civil rights division. Texas Labor Code, §21.001 states that the general purpose is to:

   - secure for all persons within the state, freedom from discrimination in certain transactions concerning employment, and thereby to protect their interest in personal dignity, and to make available to the state their full productive capacities, to secure the state against domestic strife and unrest, to preserve the public safety, health and general welfare, and to promote the interests, rights, and privileges of individuals within the state.

   In keeping with the spirit of this general purpose of the Act, the Department issues and affirms the following Affirmative Action Policy:

   - It is the policy of the Department to maintain a commitment to the principles of equal employment for all employees and to applicants for employment.
   - In order to fulfill this commitment, the Department has established and maintains this Workforce Diversity Policy to promote equality of employment treatment that conforms to federal and state law. This document is a written plan of action documenting the Department's commitment to assure an environment of equal opportunity for public employment. The plan includes goals and specific actions to be taken to reach the overall aim to be mindful of the diversity of the State of Texas. This plan however, does not create "set-aside" or establish "quotas" for any candidates. The plan will be reviewed annually and updated, as needed, by the Director of Human Resources and submitted to the Executive Director for approval.

4. Program Responsibilities

   The Department's Workforce Diversity Policy shall have the support of the Executive Director and other management or supervisory personnel. Therefore, specific responsibilities shall be assigned and delegated to the Department and management personnel to ensure that the necessary authority is available to implement the provisions of the plan.

The Executive Director shall have ongoing responsibility for establishing affirmative action policies and monitoring the implementation of the Workforce Diversity Policy through periodic program reports. Further, the Executive Director assigns responsibility to the Director of Human Resources to review annually for purposes of revision or modification the Workforce Diversity Policy, work force analysis, and personnel policy and procedural systems including but not limited to recruitment, selection, promotions, job descriptions, classifications, compensation, discipline or other terms and conditions affecting the equal employment opportunities of applicants for employment or employees because of race, color, national origin, religion, sex, age or disability status.

The Director of Human Resources shall be designated as the Affirmative Action Officer for the Department with the authority for directing the Workforce Diversity Policy. It shall be the responsibility of the Director of Human Resources to ensure that compliance with the Department's workforce diversity policies are implemented in an efficient and effective manner. The Director of Human Resources shall provide periodic progress reports to the Executive Director outlining workforce diversity accomplishments and provide the necessary information required by the Executive Director for purposes of the Plan's annual review.

5. Program Goals

To ensure objectivity, consistency, uniformity, and job relatedness through design and implementation of appropriate personnel policy and procedural systems that affects the equal employment opportunities of the Department's employees and applicants for employment.

To ensure the elimination of any current effects of past discrimination, the Department's Workforce Diversity Policy shall establish monitoring and reporting systems.

6. Action Programs

a. Policy Dissemination: The Department shall provide its Workforce Diversity Policy to statewide minority, disability, and women’s organizations for distribution to their respective members. The Department shall include, in notifications posted for vacant positions, information that it is an equal employment opportunity employer.

   As part of the orientation program, each new employee shall receive information on how to review the Department's Workforce Diversity Policy from the Department's intranet web site.

b. Recruitment: The Department is committed to an action oriented program of equal employment opportunity for all individuals regardless of age, race, color, religion, sex, national origin, or disability.

   To the extent possible, the Department shall utilize a wide range of recruiting sources to secure the maximum number of qualified minority, disabled, and female applicants for available positions within all classifications. Such sources may include statewide minority, disability, and female associated organizations, educational institutions, and newspapers. The Department shall continue to expand and update this list of such recruiting sources, including appropriate contact persons.

   Notices of vacant positions shall be posted in accordance with the regular posting policies. Such notices may be distributed to all recruitment sources previously identified. Where vacancies occur in classifications which have been identified as being underutilized, the Department shall target for purposes of recruitment minority, disability, and female applicant sources. An applicant flow record shall be maintained to determine the mix of candidates applying for vacant positions according to race, national origin, and sex.

   The Director of Human Resources is responsible for reviewing actions for EEO compliance.

c. Selection Procedures: The selection procedure which is in compliance with the Texas Commission on Human Rights Act should be based on three approaches:

   - Selection of qualified employees based on objective, job-related criteria which can be consistently applied, documented and measured;
   - The employer's workforce reflects equitable distribution within all job classification’s for those classes covered by anti-discrimination laws; and

- A Workforce Diversity Policy based on sound statutory and constitutional principles as well as judicial interpretations.

d. New Employee Selection: A selection procedure for new employees includes, but is not limited to, the following elements:

e. Job Qualifications: Generally, minimum job qualifications incorporate education and experience. When utilizing these two criteria, the employer should be able to demonstrate job relatedness. Also, the employer should be able to demonstrate that neither of these criteria have a statistically measurable disproportionate impact on covered classes included in laws prohibiting employment discrimination such as age, race, color, religion, sex, national origin, veteran status and disability.

f. Applications: Applicants applying for a posted job vacancy will submit a State of Texas standard application form (resumes may be attached). The application must be received by the closing date of the job vacancy notice. The accuracy of statements contained in applications or resumes shall be certified by signature of the applicant.

g. Applicant Log: All applicants applying for the vacant position shall be listed on an applicant log.

h. Screening Applications: Each application shall be screened using an applicant rating schedule. This rating schedule shall be based on quantified, job-related experience and educational qualifications as set forth in the job description. Applicants shall be ranked on the basis of their cumulative score. The applicants in the highest numerical scores shall receive an interview.

i. Interviewing: Interviews shall be confined to the applicant's responses to job-related questions or by performing job-related practical exercises which can be measured.

j. Final Selection: The applicant receiving the highest cumulative score based on the interview, job-related experience, educational qualifications, and positive references shall be selected for the position. In those instances where certain qualifications or work experiences may be preferred and the Department is attempting to maintain work force equity, these factors may be quantified and added to the total cumulative score.

k. Notification of Employment: Following the selection of the most qualified applicant, he/she shall be notified by telephone and may be confirmed in writing. Likewise, applicants interviewed and not recommended for the position shall be notified in writing at the earliest opportunity.

l. Upward Mobility: The Director of Human Resources shall compile reports on promotional opportunities and selection of candidates promoted. The reports shall identify race, national origin, and sex of candidates promoted and reason selected.

   In-service training programs shall be designed and implemented to increase promotional opportunities for employees. On-the-job training and cross-training programs shall be developed to expose employees to a broad range of job duties and experiences.

7. Discipline Procedures

The Department has a discipline system that is linked to specific policies and procedures with which Department employees are expected to comply. This disciplinary policy shall be adhered to in such a way as to ensure uniformity and consistency to conform to Department policies prohibiting discrimination. (Refer to Section 3.0 Disciplinary Policy)

8. Appeal Procedures

The Department has provided appeal procedures designed to resolve complaints of employment discrimination alleged by employees. These procedures shall provide aggrieved employees the opportunity to discuss their problems at several levels.

These procedures shall help to protect both the employee and the Department by providing both parties with the opportunity to have their position reviewed and considered by an impartial authority. These procedures shall provide safeguards against any and all occurrences of discrimination or any other preferential treatment which may adversely affect employees of the Department.

9. Monitoring the Workforce Diversity Policy Achievement

The Director of Human Resources shall be responsible for administering the Department's Workforce Diversity Policy and providing regular reports to the Executive Director. Utilizing such reports, the Executive Director shall monitor the implementation of the plan and identify any revisions necessary to assure effective application. Such reports may include the following:

Annual Workforce Diversity/EEO Progress Report: This narrative report shall include an itemized summary of the program's achievements, progress and shortcomings with accompanying recommendations.

Annual Workforce Analysis by Race, National Origin, Sex and EEO Category

The Department shall review the State of Texas Minority Hiring Reports (New Hire Detail and Work Force Detail) and the annual EEO-4 Report comparing EEO and job categories. These reports will provide a racial, ethnic, and gender profile of Department personnel by EEO category. EEO categories where minorities and females are under represented shall be identified. These work force profiles shall be compared to the percentages of otherwise qualified persons available in the relevant labor market (Texas Labor Code, §21.501).

10. Time Frame for Implementation

The Executive Director shall implement and review the action program previously identified in (§1.2.6) annually.

XII. AGENCY COMMENTS.

The agency is maximizing the delivery of services to those people targeted under statutory policies. There are obstacles to overcome to achieve even greater results, but the agency believes that it is making an impact on creating more safe decent and affordable housing. While the complexity of the federal programs and the limits on funding may not allow the agency to provide safe decent and affordable housing for all Texans, the Department produces more housing that other agencies across the country on a dollar for dollar basis. The Department's programs are governed by rules to provide transparency and the Department is very open to the public and advocates on how the Department awards funds and what is expected from the funds awarded.

Since the Department's last sunset review process, the agency has received new programs and seen an increase in funds that have required us to make changes because of the need to offer multiple funding streams for tax credits, HOME funds, weatherization and disaster recovery. This has changed the Department's look some, but also achieved increased administrative efficiencies allowing us to produce more housing with basically the same number of staff. Only recently, with the addition of disaster funding and HERA and ARRA funds, did the Department increase staff through Article IX requests.

The Department looks forward to working with the Sunset Commission to help make improvements, identify and eliminate anything extraneous to its mission, and make sure that Department programs and staff are dedicated to assisting those people identified by the legislature as needing housing assistance.

RESOLUTION NUMBER 02-056

RESOLUTION OF THE GOVERNING BOARD STATING BOARD POLICY ON THE SEPARATION OF BOARD AND STAFF RESPONSIBILITIES IN ACCORDANCE WITH CHAPTER 2306 OF THE TEXAS GOVERNMENT CODE

WHEREAS, the Texas Department of Housing and Community Affairs, a public and official governmental agency of the State of Texas, (the "Department") was created and organized pursuant to and in accordance with the provisions of Chapter 2306, Texas Government Code, as amended; and

WHEREAS, Texas Government Code, Section 2306.051 "Separation of Responsibilities" states: "The board shall develop and implement policies that clearly separate the policy-making responsibilities of the board and the management responsibilities of the director and staff of the department"; NOW, THEREFORE,

BE IT RESOLVED BY THE GOVERNING BOARD OF THE TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS:

Section 1 – Board Policy:

a) That it is the policy of the Governing Board that the Board exercises policy-making responsibilities and the director and staff of the Department exercise management responsibilities;

b) That Chapter 2306 of the Texas Government Code defines the separate powers and duties of the Governing Board, Director, and Department, including the following:

- i) Section 2306.052 Director's Powers and Duties;
- ii) Section 2306.0521 Organizational Flexibility of Department;
- iii) Section 2306.053 Department Powers and Duties;
- iii) Section 2306.1112 Executive Award and Review Advisory Committee;
- iv) Section 2306.112 Preparation and Content of Annual Budget;
- v) Section 2306.113 Board Consideration of Annual Budget;
- vi) Chapter 2306, Subchapter G. Housing Finance Division: General Powers and Duties of Board;
- vii) Chapter 2306, Subchapter H. Housing Finance Division: General Powers and Duties of Department;
- viii) Section 2306.67022 Qualified Allocation Plan; Manual; and
- ix) Section 2306.6724 Deadlines for Allocation of Low Income Housing Tax Credits.

Section 2 -- Effective Date. That this Resolution shall be in full force and effect from and upon its adoption.

Section 3 – Notice of Meeting. That written notice of the date, hour, and place of the meeting of the Board at which this Resolution was considered and of the subject of this Resolution was furnished to the Secretary of State and posted on the Internet for at least seven (7) days preceding the convening of such meeting; that during regular office hours a computer terminal located in a place convenient to the public in the office of the Secretary of State was provided such that the general public could view such posting; that such meeting was open to the public as required by law at all times during which this Resolution and the subject matter hereof was discussed, considered and formally acted upon, all as required by the Open Meetings Act, Chapter 551, Texas Government Code, as amended; and that written notice of the date, hour, and place of the meeting of the Board and of the subject of this Resolution was published in the *Texas Register* at least seven (7) days preceding the convening of such meeting, as required by the Administrative Procedure and Texas Register and Administrative Code Acts, Chapters 2001 and 2002, Texas Government Code, as amended. Additionally, all of the materials in the possession of the Department relevant to the subject of this Resolution were sent to interested persons and organizations, posted on the Department's website, made available in hard-copy at the Department, and filed with the Secretary of State for publication by reference in the *Texas Register* not later than seven (7) days before the meeting of the Board, as required by Section 2306.032, Texas Government Code, as amended.

PASSED AND APPROVED this 14th day of November, 2002.

AUDIT COMMITTEE - BOARD RESOLUTIONS

Resolution # 09-028 (As approved by the Board on February 5, 2009)

WHEREAS the original audit committee (Committee) members were appointed by the chairman of the governing board (Board) in April, 1992, pursuant to the Texas Government Code, Chapter 2306, *Texas Department of Housing and Community Affairs* (Department), section 2306.056, *Committees*, and whereas the Committee's authority and composition has not been specified, and whereas the Committee members' duties and responsibilities have not been previously enumerated, the Board hereby resolves the following:

RESOLVED, that the Committee shall have the authority to investigate any organizational activity as it deems necessary and appropriate, and shall have unrestricted access to all information, including documents and personnel, and shall have adequate resources in order to fulfill the oversight responsibilities it conducts on behalf of the Board, including full cooperation of Department employees. The Committee has the authority to pre-approve the annual audit plan, and to approve any non-audit services or requests for audits or investigations outside of the annual audit plan.

RESOLVED, that the Committee shall be composed of three board members appointed by the Board's chairperson who shall serve for two year terms each or until their respective successor shall be duly appointed and qualified. Audit committee members shall be free of any relationships that would interfere with their ability to exercise independent judgment as a member of the Committee.

RESOLVED, that a chairperson of the Committee shall be appointed by the Board's chairperson.

RESOLVED, that the Committee shall meet a minimum of three times each year, either in a separate meeting or as part of a larger Board meeting, or at such additional or special meetings as may be called as needed by the Board chairperson, the Committee chairperson, or the executive director; and that the Committee shall report on its proceedings and actions to the Board with such recommendations as the Committee deems appropriate.

RESOLVED, that the Committee's primary function is to assist the Board in carrying out its oversight responsibilities as they relate to financial and other reporting practices, internal control, and compliance with Board and ethics policies, and to ensure the independence of the internal audit function.

RESOLVED, that in fulfilling its function, the Committee's responsibility for (i) financial and other reporting practices is to provide assurance to the Board that financial and other reporting information reported by management reasonably portrays the circumstances or plans reported; (ii) internal control is to monitor the effectiveness of control systems and processes through the results of internal and external audits and reviews; (iii) compliance with Board and ethics policies is to periodically inquire of management, the internal audit director, and the independent accountant about significant risks or exposures and assess the steps management has taken to minimize such risk; (iv) the internal audit function is to support the internal audit division so that internal auditors can gain the cooperation of auditees and perform their work independently and free from interference and to provide reasonable assurance that the internal auditors perform their responsibilities.

PASSED AND APPROVED this 5th day of February, 2009

Exhibit IV.J-4b

Sec. 2306.590. COLONIA INITIATIVES ADVISORY COMMITTEE. (a) The Colonia Initiatives Advisory Committee is composed of seven members appointed by the governor as follows:

(1) one colonia resident;

(2) one representative of a nonprofit organization that serves colonia residents;

(3) one representative of a political subdivision that contains all or part of a colonia;

(4) one person to represent private interests in banking or land development;

(5) one representative of a nonprofit utility;

(6) one representative of an engineering consultant firm involved in economically distressed areas program projects under Subchapter K, Chapter 17, Water Code; and

(7) one public member.

(b) Each committee member, except the public member, must reside within 150 miles of the Texas-Mexico border.

(c) The secretary of state is an ex officio member of the committee.

(d) The committee shall:

(1) review the progress of colonia water and wastewater infrastructure projects managed by the Texas Water Development Board and the state agency responsible for administering the portion of the federal community development block grant nonentitlement program that addresses the infrastructure needs of colonias;

(2) present an update and make recommendations to the board and the Texas Water Development Board annually at the joint meeting required by Section 6.060(d), Water Code, regarding:

(A) efforts to ensure that colonia residents are connected to the infrastructure funded by state agencies;

(B) the financial, managerial, and technical capabilities of project owners and operators;

(C) the agencies' management of their colonia programs and the effectiveness of their policies regarding underperforming projects; and

(D) any other issues related to the effect of state-managed infrastructure programs on colonia residents;

(3) review public comments regarding the colonia needs assessment incorporated into the state low income housing plan under Section 2306.0721; and

(4) based on the public comments reviewed under Subdivision (3), recommend to the board new colonia programs or improvements to existing colonia programs.

Added by Acts 2001, 77th Leg., ch. 1234, Sec. 37, eff. Sept. 1, 2001.

Texas Department of Housing and Community Affairs
EXECUTIVE

Executive Award and Review Advisory Committee

1.0 Risks and Control Objectives

1.1 The risks associated with Standard Operating Procedures (SOPs) and the Control Objectives to ensure those risks are minimized are illustrated in the following table.

Risks	Control Objectives
Presentation of award recommendations or policies that are not thoroughly evaluated or may be inconsistent with statutes, directives or regulations.	Ongoing regular EARAC meetings pursuant to this SOP.

2.0 Policy

2.1 The "Executive Award and Review Advisory Committee" ("the Committee") as used herein means that committee of Department staff meeting the requirements of §2306.1112, Texas Government Code, and shall be subject to that section.

EARAC is established by §2306.1112, Texas Government Code, to serve as an executive award and review advisory committee to make funding and allocation recommendations to the Board. In conformance with the statute, EARAC is intended to ensure that these funding allocation recommendations are in full and strict compliance with state and federal law, TDHCA rules, requirements for financial feasibility and underwriting, etc. To the extent requested by the Executive Director the committee may provide input into rules and Notices of Funding Availability pertaining to the Department's programs specifically as it relates to the development of funding priorities.

2.2 The voting members of the Committee include: the Executive Director, the Chief of Staff, the Deputy Executive Directors of Programs (Housing and Community Based); the Chief of Agency Administration; the Chief of Compliance and Asset Oversight, the Director of Multifamily Finance Production; the Director of the Texas Homeownership Program; the Director of Community Affairs; The Director of the HOME Program; the NSP and HTF Managers; the Director of Real Estate Analysis; the Director of Office of Colonia Initiatives; the Director of Policy and Public Affairs; and the Director of Bond Finance.

One or more designees from the Legal Services Division shall attend meetings to provide information and counsel to the committee. In the absence of one of the voting members, a delegate determined by that member, or by the Executive Director, may attend on their behalf. The Executive Director has the authority to override a vote of the Committee.

The Executive Director or his designee shall be the chairman and is responsible for providing support and record keeping for the Committee. This support will include:

a) arranging for Committee meetings; and
b) providing the agenda; and
c) keeping minutes of the Committee meetings and copies of all documents discussed in the meetings.

However, the Executive Director exclusively retains the right to override a vote of the Committee, and this right may not be assigned to a designee.

2.3 The Committee shall meet at least one time prior to each Board meeting at the call of the Executive Director and at other times that the Executive Director determines are necessary.

2.4 The Committee will review the items on the Board Agenda within the scope of this SOP or other items as requested by the Executive Director.

2.5 A quorum shall be at least five members or delegates, provided the Executive Director or Chief of Staff and at least one Deputy Executive Director of Programs is present.

3.0 Responsibilities

3.1 The Executive Director is responsible for approving changes to this SOP, convening meetings as necessary and ensuring that recommendations of the Committee are properly presented to the Board.

3.2 The Executive Director and/or their designee is responsible for coordinating changes to this SOP and distributing them to the staff.

3.3 The Executive Director and/or their designee is responsible for:

a) All administrative matters related to:
   1. Committee meetings;
   2. Developing minutes that reflect final actions;
b) Maintaining an informational center consisting of Committee materials of:
   1. minutes;
   2. meeting materials;
   3. agendas.

3.4 The Committee Members are responsible for:

a) Providing agenda items to the Board Secretary and/or their designee;

b) Providing the Committee with necessary documents for agenda items relating to their area;
c) Reviewing all provided materials prior to the meeting;
d) Voting on all items;
e) Attending all meetings or providing alternative representation.

4.0 Procedures

4.1 Committee Meetings

A. Committee Meeting Date and Location – Based on the date of the Board meeting for each month, the Board Secretary, in coordination with the Executive Director, will schedule a Committee meeting date and time not later than eight (8) calendar days in advance of the proposed Board meeting. The Executive Director and/or their designee, will coordinate a meeting in Outlook, which will notify members of the meeting date, time, and location.

B. Committee Agenda(s) – Consistent with the SOP for Board Support, the Board Secretary will review the draft Board Agenda for the forthcoming Board meeting with the Executive Director to determine which Board agenda items must be on the Committee agenda. At least one (1) calendar day prior to a Committee meeting, the Executive Director and/or their designee will provide Committee members with a Committee Meeting agenda.

C. Meeting Materials

1. For each agenda item or project, the Director (or Directors) assigned to that item will be responsible for providing materials to the Committee that will facilitate the Committee's review and understanding of the issue. These documents should be provided to all Committee Members, and the Board Secretary, at the scheduled Committee meeting by the Director named as responsible for that item. Exhibits may include where applicable:

   a. Program staff narrative;
   b. Credit underwriting analysis;
   c. Resolutions;
   d. Written report on the compliance history of the applicant;
   e. Prior Board actions;
   f. Grids or Reports reflecting methodology for funding recommendations; or
   g. Other relevant material.

2. At the meeting, a determination of whether an item will be posted as a three (3) day posting will be confirmed and noted by the Executive Assistant. Three (3) day postings are rare and only warranted by unique circumstances and should not be used as a reason for delayed preparation.

3. Division Directors will be responsible for integrating changes to Board materials based on the final determination made in the Committee meeting.

D. Determinations on Items – For each item there will be a vote. Majority vote establishes the initial determination; however the Executive Director will be the tie-breaking vote in all cases and also has the right to override any vote made by the Committee.

E. Minutes of Committee Meeting - The Executive Director, and/or their designee, will take notes at meetings and prepare minutes.

4.2 Special Meetings - Special meetings of the Committee will be handled in a manner similar to that described above.

APPROVAL:

______________________________ 5/29/2009

Provide America's taxpayers top quality service by helping them understand and meet their tax responsibilities and by applying the tax law with integrity and fairness to all.

Small Business/Self-Employed Mission

The mission of the Small Business/Self-Employed (SB/SE) Division is to provide SB/SE customers top-quality service by educating and informing them of their tax obligations, developing educational products and services, and helping them understand and comply with applicable laws, and to protect the public interest by applying the tax law with integrity and fairness to all.

Chapter 1
Introduction

Background

State Agency Responsibilities

State and local housing credit agencies (herein referred to as "state agencies") are responsible for monitoring low-income housing credit (LIHC) properties for compliance with the requirements of Internal Revenue Code (IRC) §42; for example, health and safety standards, rent ceilings and income limits, and tenant qualifications. State agencies perform desk audits, inspect housing, and review tenant files.[1] When noncompliance is identified or there has been a disposition of a building (or interest therein), the state agencies are required to notify the Internal Revenue Service using Form 8823, Low-Income Housing Credit Agencies Report of Noncompliance or Building Disposition.

Briefly, a state agency performs a desk audit, conducts a site visit, or reviews the owner's tenant files and provides the owner with a summary report of its findings. If the report indicates noncompliance, the owner is expected to respond to the state agency within a maximum of 90 days to provide clarification or document that issues of noncompliance have been addressed. Then, the state agency determines whether the owner was always in compliance, has corrected the noncompliance, or remains out of compliance. The time to correct the noncompliance may be extended up to a total of 6 months with state agency approval. If the state agency determines that the owner either remedied the noncompliance or remains out of compliance, then a Form 8823 must be filed with the IRS.

If the state agency reports that the owner is out of compliance, the IRS sends a notification letter to the owner identifying the type of noncompliance reported on Form 8823. The notification letter also states that the owner should not include any nonqualified low-income housing units when computing the tax credit under IRC §42 and that the noncompliance may result in the recapture of previously claimed credits. The notification letter also instructs the owner to contact the state agency to resolve the issue.

Once the noncompliance is resolved, the state agency should file a "back in compliance" Form 8823. If the noncompliance is corrected within three years after the end of the correction period, the state agency must file a Form 8823.[2] See Exhibit 1 at the end of this chapter for a complete description of the process.

IRS Analysis of Forms 8823 Submitted by State Agencies

Forms 8823 are routinely analyzed by the IRS. Based on categories of noncompliance, and without regard to subsequent "back in compliance" Forms 8823, taxpayers are evaluated to determine whether an audit of the owner's tax return is needed.[3] The taxpayer's tax returns and all Forms 8823 filed for the property are evaluated. If it is determined that an audit is warranted, the complete file is sent to the appropriate IRS field office. The taxpayer is then notified that an audit has been scheduled. It should be noted that this is

[1] State agencies perform "desk audits" of information submitted to their office rather than inspecting the documents at the property site; e.g., annual reports required under Treas. Reg. §1.42-5(c).

[2] Treas. Reg. §1.42-5(e)(3).

[3] Forms 8823 are immediately analyzed for audit potential when received from the state agencies. Subsequent receipt of Forms 8823 noting correction of previously reported noncompliance do not impact the original evaluation. Under Treas. Reg. §1.42-5(e)(3), if the noncompliance is corrected within three years, the state agency is required to file another Form 8823 reporting the corrected noncompliance and documenting the date the taxpayer was back in compliance. From the owner's perspective, the best strategy is to address noncompliance identified by the state agency quickly so that the initial Form 8823 will indicate that the

not the only method for selecting for audit tax returns on which the low-income housing credit has been claimed and, at the examiner's discretion, the audit may be expanded to include additional issues or tax returns.

Purpose of Guide

The fundamental purpose of this guide is to provide standardized operational definitions for the noncompliance categories listed on Form 8823. It is important that noncompliance is consistently identified and categorized. Resulting benefits include:

1. Consistent interpretation and application of IRC §42 requirements among states;

2. Consistent reporting of noncompliance to the IRS; and

3. Enhanced program administration by the IRS; i.e., timely processing of the forms and identification of appropriate follow-up actions by the IRS.

Content of Guide

The guide includes instructions for completing Form 8823, and guidelines for determining noncompliance and reporting property dispositions. The guide reflects current rules under IRC §42, Treasury regulations under IRC §42, other guidance published by the Department of Treasury and the IRS, and IRS administrative procedures for the LIHC program.

Generally, the noncompliance categories listed on Form 8823 are addressed in separate chapters. There are three categories of noncompliance for which there are two chapters because multiple issues are reported under the same category. They are:

1. Category 11e, Changes in Eligible Basis or the Applicable Percentage

2. Category 11h, Project not available to the general public

3. Category 11q, Other

For convenience, the term "owner" in the singular is used, although low-income housing properties often have more than one owner and state agencies must identify each owner in a schedule attached to the Form 8823 when filing the form.

Depending on the problem, noncompliance may extend to one or more housing units within an LIHC building, may apply to the whole building, or may encompass the entire project. Units, buildings, or projects that are out of compliance with the requirements of IRC §42 are referred to as "nonqualified" units, buildings, or projects.

---

noncompliance was corrected. From the IRS' point of view, the owner's responsiveness is indicative of due diligence, but does not preclude initiating an audit.

Organization of Chapters

Generally (as applicable) each chapter includes the following sections.

Definitions - Brief descriptions are provided to explain the basic compliance issue being addressed. The intent is to sufficiently define the category of noncompliance so that state agencies will uniformly select the same category for the same issues.

In Compliance - Descriptions and examples are used to illustrate fundamental compliance with IRC §42 and its regulations.

Out of Compliance - Descriptions and examples are used to illustrate common noncompliance issues.

Back in Compliance - This section includes explanations and examples illustrating how noncompliance can be corrected. Treas. Reg. §1.42-5(e)(4) allows a corrective action period, not to exceed 90 days, for the owner to remedy the noncompliance. The state agency can extend this period for up to a total of 6 months if there is good cause. Suggested correction periods are noted in the discussions.

References - A list of references is included at the end of each chapter. Specific references or explanations of relevant rules under IRC §42, the Treasury regulations under IRC §42, or other published guidance, may be included in the text or identified in footnotes.

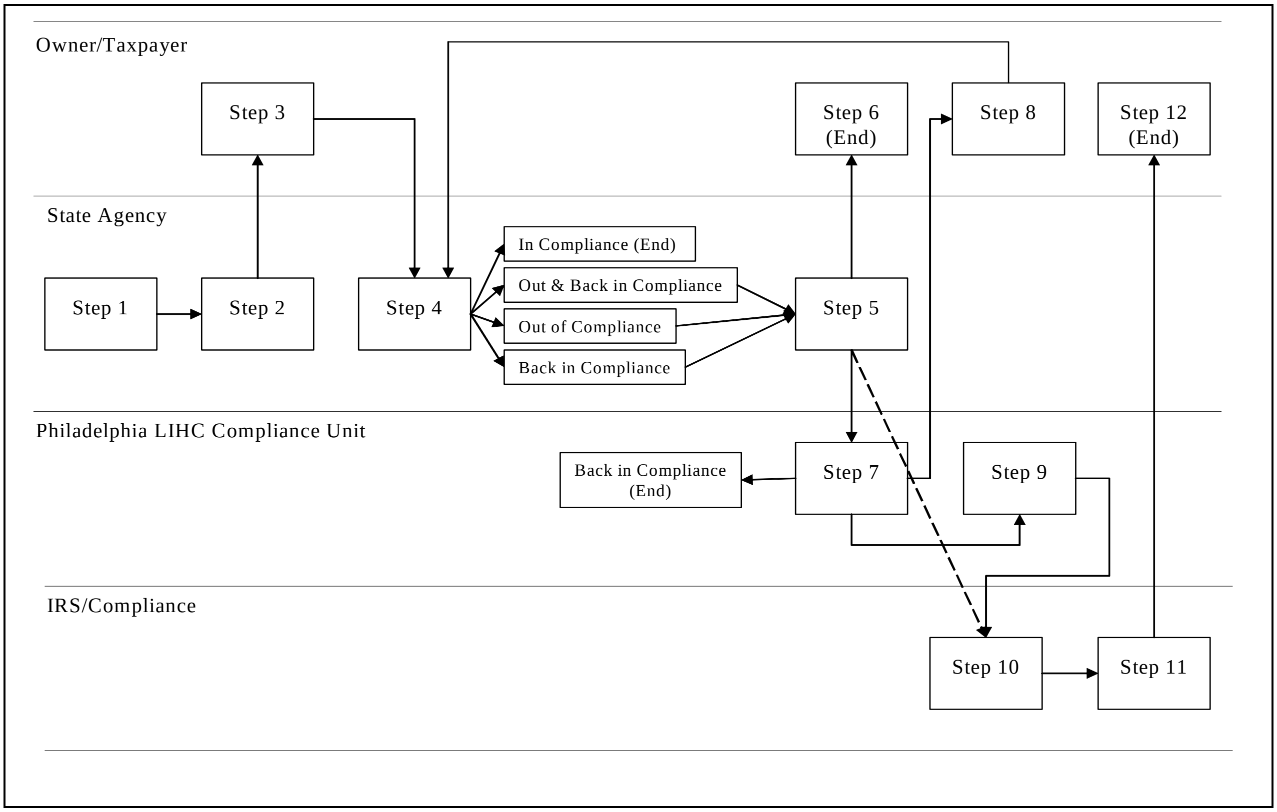
Treas. Reg. §1.42-5

Exhibit 1-1
Reports of Noncompliance (Form 8823)
Process Map & Explanations



Step 1 The state agency performs a desk audit, conducts a site visit, or reviews the owner's tenant files.

Step 2 The state agency prepares and promptly provides the owner with a summary report describing issues of noncompliance. The letter may also identify administrative or technical issues, recommend changes to improve future management of the property, or suggest corrective actions to remedy noted noncompliance issues.

Step 3 The owner responds to the state agency within a maximum of 90 days, which can be extend up to a total of 6 months with the state agency's approval. Generally, the state agency specifies a time period appropriate for the type of noncompliance. The owner's response may provide clarifications and document that corrective actions have been implemented; i.e., how the noncompliance issues have been addressed.

Step 4 When the owner's response is received, the state agency determines whether the owner provided:

1. clarification establishing that the owner was always in compliance,

2. documentation that issue(s) of noncompliance have been remedied within the correction period (out and back in compliance).

3. no documentation that issue(s) of noncompliance had been remedied within the correction period (out of compliance), or

4. documentation that issue(s) of noncompliance have been remedied, but the noncompliance was not corrected until after the end of the correction period. A Form 8823 had been submitted to the IRS only to report the correction of previously reported noncompliance (back in compliance).

Step 5 If the state agency determines that the owner was always in compliance, findings are not required to be reported to the IRS. However, the state agency should notify the owner that the issue is considered closed and no Form 8823 will be filed.

If the state agency determines that either the owner remedied the issue of noncompliance or remains out of compliance, then a Form 8823 must be filed with the Internal Revenue Service at the Philadelphia Service Center (PSC). As noted by the dashed line between steps five and ten, the state agency may send a copy of the Form 8823 directly to IRS Headquarters.

Step 6 The state agency sends the owner a copy of the Form 8823 concurrent to filing the Form 8823 with the IRS.

Step 7 Upon receipt of the Form 8823 at the PSC, the "back in compliance" Forms 8823 are processed without contacting the owner. The "out of compliance" Forms 8823 are assigned to technicians to prepare owner notification letters. The letters are specific to the type of noncompliance reported on Form 8823, and explain that noncompliance may result in the loss and recapture of the tax credit.

Step 8 The owner receives the notification letter. The letter instructs the owner to contact the state agency to resolve the issue (Step Four). If the noncompliance is resolved within three years, a "back in compliance" Form 8823 must be filed with the IRS and a copy sent to the owner concurrently. (Note: some issues of noncompliance cannot be remedied.)

Step 9 Simultaneous to notifying the owner, the PSC processes the Forms 8823 and transcribes the information into a database.

Step 10 Forms 8823 are immediately evaluated when received from the state agencies and IRS databases are routinely analyzed to determine whether an audit of the owner's tax return is needed. The taxpayer's three latest filed income tax returns and all Forms 8823 filed for the property are evaluated.

Step 11 If it is determined that an audit is warranted, the case file is sent to the appropriate field office for examination.

Step 12 The taxpayer is notified that an audit has been scheduled.

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

Housing credit agencies use Form 8823 to fulfill their responsibility under section 42(m)(1)(B)(iii) to notify the IRS of noncompliance with the low-income housing tax credit provisions **or** any building disposition.

The housing credit agency should also give a copy of Form 8823 to the owner(s).

Who Must File

Any authorized housing credit agency that becomes aware that a low-income housing building was disposed of or is not in compliance with the provisions of section 42 must file Form 8823.

When To File

File Form 8823 no later than 45 days after **(a)** the building was disposed of or **(b)** the end of the time allowed the building owner to correct the condition(s) that caused noncompliance. For details, see Regulations section 1.42-5(e).

Where To File

File Form 8823 with the:

Internal Revenue Service
P.O. Box 331
Attn: LIHC Unit, DP 607 South
Philadelphia Campus
Bensalem, PA 19020

Specific Instructions

Amended return. If you are filing an amended return to correct previously reported information, check the box at the top of page 1.

Item 2. Enter the building identification number (BIN) assigned to the building by the housing credit agency as shown on Form 8609.

Items 3, 4, 13b, and 13d. If there is more than one owner (other than as a member of a pass-through entity), attach a schedule listing the owners, their addresses, and their taxpayer identification numbers. Indicate whether each owner's taxpayer identification number is an employer identification number (EIN) or a social security number (SSN).

Both the EIN and the SSN have nine digits. An EIN has two digits, a hyphen, and seven digits. An SSN has three digits, a hyphen, two digits, a hyphen, and four digits and is issued only to individuals.

Item 7d. "Reviewed by agency" includes physical inspection of the property, tenant file inspection, or review of documentation submitted by the owner.

Item 8. Enter the date that the building ceased to comply with the low-income housing credit provisions. If there are multiple noncompliance issues, enter the date for the earliest discovered issue. **Do not** complete item 8 for a building disposition. Instead, skip items 9 through 12, and complete item 13.

Item 9. Enter the date that the noncompliance issue was corrected. If there are multiple issues, enter the date the last correction was made.

Item 10. Do not check this box unless the sole reason for filing the form is to indicate that previously reported noncompliance problems have been corrected.

Item 11c. Housing credit agencies must use either **(a)** the local health, safety, and building codes (or other habitability standards) or **(b)** the Uniform Physical Conditions Standards (UPCS) (24 C.F.R. section 5.703) to inspect the project, but not in combination. The UPCS does not supersede or preempt local codes. Thus, if a housing credit agency using the UPCS becomes aware of any violation of local codes, the agency must report the violation. Attach a statement describing either **(a)** the deficiency and its severity under the UPCS, i.e., minor (level 1), major (level 2), and severe (level 3) or **(b)** the health, safety, or building violation under the local codes. The Department of Housing and Urban Development's Real Estate Assessment Center has developed a comprehensive description of the types and severities of deficiencies entitled "Dictionary of Deficiency Definitions" found at *www.hud.gov/reac* under Library Section, Physical Inspections, Training Materials. Under Regulations section 1.42-5(e)(3), report all deficiencies to the IRS whether or not the noncompliance or failure to certify is corrected at the time of inspection. In using the UPCS inspection standards, report all deficiencies in the five major inspectable areas (defined below) of the project: (1) Site; (2) Building exterior; (3) Building systems; (4) Dwelling units; and (5) Common areas.

1. Site. The site components, such as fencing and retaining walls, grounds, lighting, mailboxes, signs (such as those identifying the project or areas of the project), parking lots/driveways, play areas and equipment, refuse disposal equipment, roads, storm drainage, and walkways, must be free of health and safety hazards and be in good repair. The site must not be subject to material adverse conditions, such as abandoned vehicles, dangerous walkways or steps, poor drainage, septic tank back-ups, sewer hazards, excess accumulation of garbage and debris, vermin or rodent infestation, or fire hazards.

2. Building exterior. Each building on the site must be structurally sound, secure, habitable, and in good repair. Each building's doors, fire escapes, foundations, lighting, roofs, walls, and windows, where applicable, must be free of health and safety hazards, operable, and in good repair.

3. Building systems. Each building's domestic water, electrical system, elevators, emergency power, fire protection, HVAC, and sanitary system must be free of health and safety hazards, functionally adequate, operable, and in good repair.

4. Dwelling units. Each dwelling unit within a building must be structurally sound, habitable, and in good repair. All areas and aspects of the dwelling unit (for example, the unit's bathroom, call-for-aid (if applicable), ceilings, doors, electrical systems, floors, hot water heater, HVAC (where individual units are provided), kitchen, lighting, outlets/switches, patio/porch/balcony, smoke detectors, stairs, walls, and windows) must be free of health and safety hazards, functionally adequate, operable, and in good repair. Where applicable, the dwelling unit must have hot and cold running water, including an adequate source of potable water (note: single room occupancy units need not contain water facilities). If the dwelling unit includes its own bathroom, it must be in proper operating condition, usable in privacy, and adequate for personal hygiene and the disposal of human waste. The dwelling unit must include at least one battery-operated or hard-wired smoke detector, in proper working condition, on each level of the unit.

5. Common areas. The common areas must be structurally sound, secure, and functionally adequate for the purposes intended. The basement, garage/carport, restrooms, closets, utility rooms, mechanical rooms, community rooms, day care rooms, halls/corridors, stairs, kitchens, laundry rooms, office, porch, patio, balcony, and trash collection areas, if applicable, must be free of health and safety hazards, operable, and in good repair. All common area ceilings, doors, floors, HVAC, lighting, outlets/switches, smoke detectors, stairs, walls, and windows, to the extent applicable, must be free of health and safety hazards, operable, and in good repair.

Health and Safety Hazards. All areas and components of the housing must be free of health and safety hazards. These include, but are not limited to: air quality, electrical hazards, elevators, emergency/fire exits, flammable materials, garbage and debris, handrail hazards, infestation, and lead-based paint. For example, the buildings must have fire exits that are not blocked and have hand rails that are not damaged, loose, missing portions, or otherwise unusable. The housing must have no evidence of infestation by rats, mice, or other vermin. The housing must have no evidence of electrical hazards, natural hazards, or fire hazards. The dwelling units and common areas must have proper ventilation and be free of mold as well as odor (e.g., propane, natural, sewer, or methane gas). The housing must comply with all requirements related to the evaluation and reduction of lead-based paint hazards and have available proper certifications of such (see 24 C.F.R. part 35).

Project owners must promptly correct exigent and fire safety hazards. Before leaving the project, the inspector should provide the project owner with a list of all observed exigent and fire safety hazards. Exigent health and safety hazards include: air quality problems such as propane, natural gas, or methane gas detected; electrical hazards such as exposed wires or open panels and water leaks on or near electrical equipment; emergency equipment, fire exits, and fire escapes that are blocked or not usable; and carbon monoxide hazards such as gas or hot water heaters with missing or misaligned chimneys. Fire safety hazards include missing or inoperative smoke detectors (including missing batteries), expired fire extinguishers, and window security bars preventing egress from a unit.

Item 11d. Report the failure to provide annual certifications or the provision of certifications that are known to be incomplete or inaccurate as required by Regulations section 1.42-5(c). As examples, report a failure by the owner to include a statement summarizing violations (or copies of the violation reports) of local health, safety, or building codes; report an owner who provided inaccurate or incomplete statements concerning corrections of these violations.

Item 11e. Report any federal grant made with respect to any building or the operation thereof during any taxable year in the compliance period. Report changes in common areas which become commercial, when fees are charged for facilities, etc. In addition, report any below market federal loan or any obligation the interest on which is exempt from tax under section 103 that is or was used (directly or indirectly) with respect to the building or its operation during the compliance period and that was not taken into account when determining eligible basis at the close of the first year of the credit period.

Item 11f. Failure to satisfy the minimum set-aside requirement for the first year of the credit period results in the permanent loss of the entire credit.

Failure to maintain the minimum set-aside requirement for any year after the first year of the credit period results in recapture of previously claimed credit and no allowable credit for that tax year. No low-income housing credit is allowable until the minimum set-aside is restored for a subsequent tax year.

Item 11h. All units in the building must be for use by the general public (as defined in Regulations section 1.42-9), including the requirement that no finding of discrimination under the Fair Housing Act occurred for the building. Low-income housing credit properties are subject to Title VIII of the Civil Rights Act of 1968, also known as the Fair Housing Act. It prohibits discrimination in the sale, rental, and financing of dwellings based on race, color, religion, sex, national origin, familial status, and disability. See 42 U.S.C. sections 3601 through 3619.

It also mandates specific design and construction requirements for multifamily housing built for first occupancy after March 13, 1991, in order to provide accessible housing for individuals with disabilities. The failure of low-income housing credit properties to comply with the requirements of the Fair Housing Act will result in the denial of the low-income housing tax credit on a per-unit basis.

Individuals with questions about the accessibility requirements can obtain the Fair Housing Act Design Manual from HUD by calling 1-800-245-2691 and requesting item number HUD 11112, or they can order the manual through *www.huduser.org* under Publications.

Item 11i. The owner must rent to low-income tenants all comparable units that are available or that subsequently become available in the same building in order to continue treating the over-income unit(s) as a low-income unit. All units affected by a violation of the available unit rule may not be included in qualified basis. When the percentage of low-income units in a building again equals the percentage of low-income units on which the credit is based, the full availability of the credit is restored. Thus, only check the "Noncompliance corrected" box when the percentage of low-income units in the building equals the percentage on which the credit is based.

Item 11q. Check this box for noncompliance events other than those listed in 11a through 11p. Attach an explanation. For projects with allocations from the nonprofit set-aside under section 42(h)(5), report the lack of material participation by a non-profit organization (i.e., regular, continuous, and substantial involvement) that the housing credit agency learns of during the compliance period.

Paperwork Reduction Act Notice. We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to give us the information. We need it to ensure that you are complying with these laws and to allow us to figure and collect the right amount of tax.

You are not required to provide the information requested on a form that is subject to the Paperwork Reduction Act unless the form displays a valid OMB control number. Books or records relating to a form or its instructions must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and return information are confidential, as required by section 6103.

The time needed to complete and file this form will vary depending on individual circumstances. The estimated average time is:

Recordkeeping	7 hr., 39 min.
Learning about the law or the form	3 hr., 16 min.
Preparing and sending the form to the IRS	3 hr., 32 min.

If you have comments concerning the accuracy of these time estimates or suggestions for making this form simpler, we would be happy to hear from you. You can write to the Tax Products Coordinating Committee, SE:W:CAR:MP:T:T:SP, 1111 Constitution Ave., NW, IR-6406, Washington, DC 20224. Do not send Form 8823 to this address. Instead, see Where To File on page 2.

Dear [Name]

The state housing credit agency referenced above has reported, on Form 8823, Low Income Housing Credit Agencies Report of Noncompliance or Building Disposition, that you are not in compliance with Internal Revenue Code Section 42 requirements and regulations for the Building Identification Number (BIN) shown above. (If multiple BINs are referenced, please see the list at the end of this letter.)

The noncompliance issues are:

1. ____
____

2. ____
____

3. ____
____

4. ____
____

Therefore, you should not include the non-qualified units when calculating the credit for the year shown above. Additionally, Sections 42(j)(1) and (2) require that prior credits you claimed are subject to recapture to the extent that any accelerated credit is attributable to the units, plus interest.

If you are subject to recapture, you must use Form 8611, Recapture of Low Income Housing Credit. If you filed this form with your tax return and have not claimed any credit for the year, no further action may be necessary. If you have not, please amend your return to include the recapture, and remove the credit claimed for the year of disposition. Flow-through entities should advise distributive share recipients of applicable credit and recapture requirements.

IRS receipt of Forms 8823 can increase the potential for audit of the reported projects. Therefore, IRS may conduct review and audit activity subsequent to this letter.

If you have questions, you may call the IRS contact listed above between the hours of 9 a.m. and 3 p.m. Eastern Time.

Although this employee may be able to help you, it is your responsibility to resolve all noncompliance issues with the appropriate state housing credit agency. Therefore, if you have questions regarding the issue(s) cited, please contact the referenced state agency.

Sincerely,

Additional Properties

BIN	Noncompliance Date

Chapter 2
Instructions for Completing Form 8823

Overview

State agencies use Form 8823 to notify the IRS of noncompliance with the requirements of IRC §42 or fulfill other reporting requirements. This chapter includes instructions for completing Form 8823.

After Building is Approved

Form 8823 should be used to report noncompliance *after* Form 8609, Low Income Housing Credit Allocation Certification, has been signed by the state agency and issued to the owner.

Before Building is Approved

There may be instances where noncompliance is identified *before* the issuance of Form 8609. For such cases, Form 8823 should be completed, but sent directly to the IRS Headquarter analyst responsible for the Low-Income Housing Credit program, rather than filing the form with the Philadelphia Service Center. The IRS will consider these forms 8823 timely filed.

Correction Period

The correction period is the period of time during which the owner of an LIHC property must correct any noncompliance identified by the state agency. The correction period begins with the date the state agency provides written notification *to the owner* that the building is not in compliance.[1] Under Treas. Reg. §1.42-5(e)(2), state agencies must provide *prompt* written notice to the owner.

The correction period begins as of the date the written notice of noncompliance is issued by the state agency to the owner. Generally, the correction period may not exceed 90 days from the date of the owner's notification; there is no minimum correction period. However, the correction period can be extended for up to a total of 6 months if there is a good cause for granting the extension.

Form 8823 must be filed with the IRS within 45 days following the end of the correction period, whether or not the noncompliance has been corrected.

Example 1: Annual Certification Under Treas. Reg. §1.42-5(c)(1)

> An owner failed to submit the annual certification that the building was in compliance with IRC §42 requirements; e.g., that annual income certifications had been received from each low-income tenant and that the units were rent-restricted, etc. The certification was due March 1, 2005 and the state agency notified the owner in writing on April 1, 2005 that the certification had not been received.
>
> The correction period began on April 1st and ended on June 29th. The owner had 90 days, until June 29, 2005, to provide the annual certification. The Form 8823, noting noncompliance with category 11d, Owner failed to provide annual certification or provided incomplete or inaccurate certifications, must be file after June 29th, but no later than August 15, 2005.

[1] See Treas. Reg. §§1.42-5(e)(4) and 1.42-5(a)(2).

Example 2: Extending the Correction Period

A state agency completed a physical inspection and identified noncompliance that required longer than 90 days to correct. The owner received notice of the noncompliance and the correction period began on January 15, 2004.

The state agency may extend the correction until July 15, 2004, giving the owner a total of 6 months to correct the problem. The Form 8823 must be filed with the IRS after July 15, 2004, but no later than August 25, 2004.

General Guidelines for Completing Form 8823

1. Select all applicable categories of noncompliance.

   Example 1: The state agency determined that 1 out of 10 low-income units in a building had been rented to a household with incomes that did not meet the income eligibility restrictions. Category 11a, Household income above income limit upon initial occupancy, should be selected.

   Example 2: The state agency determined that 7 out of 10 low-income units in a one-building project were rented to households with incomes that did not meet the income eligibility restrictions. As a result, the owner did not meet the 40/60 minimum set-aside for that year. Category 11a, Household income above income limit upon initial occupancy, should be selected, and category 11f, Project failed to meet minimum set-aside requirement, should be selected.

2. A separate Form 8823 must be filed for each BIN. The form must be prepared using the fillable PDF file as revised October 2005 (or later) with the bar codes.

3. When filing a "back in compliance" Form 8823, all the instances of noncompliance for a specific category must be remedied before the building is considered "back in compliance" for that category. For example, if four units are cited for violations of the UPCS inspection standards, all four units must be repaired before the building is considered back in compliance for that issue.

4. All categories of noncompliance must be resolved before filing a "back in compliance" Form 8823. Be sure to mark the "noncompliance corrected" boxes for each of the resolved issues. If more than one "noncompliance corrected" box is marked, enter the date of the most recent correction on line 9 of Form 8823.

5. An amended Form 8823 is identified by checking the box at the top of the form under the title. An amended Form 8823 should be filed with the IRS only if it is necessary to correct an error on a Form 8823 that was previously filed with the Service. For example, the wrong category is selected or an address is incorrect. A copy of the amended Form 8823 should be sent to the owner concurrent to filing the form with the IRS.

6. Descriptions of noncompliance or additional information submitted with the Form 8823 should be concise; however, avoid the use canned or repetitive statements. It is helpful to identify the unit number, the date out of compliance and the date corrected, and summarize the problems with a brief description. Copies of reports and notification letters sent to the owner describing the noncompliance, electronic pictures, and newspaper articles are also helpful.

   Concisely describe the content of any additional information maintained by the state agency; e.g., physical inspection reports, photographs, written statements from tenants, etc. Do *not* send photocopies of pictures; they are not useful.

   State agencies should also include explanations when they suspect owners, managing agents, or other parties may have misrepresented factual information such as falsifying income verifications or altering tenant files.

7. State agencies should report all noncompliance of which they are aware as a result of the annual certification or periodic review of tenant files and physical inspection of the property, without regard to whether the initially outstanding noncompliance is subsequently corrected. See chapter 3 for additional discussion.

   Independently, state agencies must also report any change in the applicable fraction (such as converting LIHC units to market rate units) or eligible basis (such as converting common area to commercial space) that results in a decrease in the qualified basis as noncompliance.

8. There is no “noncompliance corrected” block available for category 11p, Project is no longer in compliance nor participating in the program. Should the state agency decide to reinstate the property, the state agency should contact the IRS Low-Income Housing Credit program analyst.

Line-By-Line Instructions

Line 1 Building Information: Ensure that the complete building (or project) name and address, including ZIP code is identified.

Line 2 Owner Information: Remember to check the box if the current owner's name is different than the owner shown on Form 8609. Ensure that the current owner’s EIN/SSN is correct. If there is more than one owner, attach a schedule listing the name, address, and EIN/SSN of each owner.

Line 3 BIN: Ensure that building identification number is correct. It should consist of the two letter state abbreviation, two-digit year and five-digit number assigned.

Line 4 EIN: Ensure that the identification number for the owner is correct and check the box SSN for individual taxpayers (xxx-xx-xxxx) or EIN for business entities (xx-xxxxxxx) such as corporations and partnerships.

Line 5 Total credit allocated to this BIN: Provide the total allowable LIHC allocated to this BIN. This is computed by adding the amounts of credit allocated to the BIN on all Forms 8609, line 1b. Do not include Forms 8609 for which the compliance period has expired.

Line 6 Number of buildings in the project: Enter the number of buildings that house residential living units and have BIN numbers assigned to the project. Do not include recreational facilities or other amenities.

Line 7

a. Number of residential units in the building: Enter the total number of both LIHC units and all other residential units. But do not include managers' units. See footnote for special rules regarding buildings placed in service prior to September 9, 1992.[2]

b. Number of low-income units in the building.

c. Number of residential units with noncompliance problems: Count each unit for which noncompliance is being identified *in this report*; do not include previously reported, but still outstanding, noncompliance. Count each unit only once, even if there are multiple compliance problems.

d. Indicate the total number of units reviewed in this building for which the Form 8823 is being filed. Count each unit being reviewed once, even if you reviewed the same unit for both the annual certification and simultaneously performed an on-site review.

Line 8 Date building ceased to comply: Enter the date that the building ceased to comply with the IRC §42 low-income housing credit requirements. If there are multiple noncompliance issues, enter the date of the earliest discovered issue. Do not complete this item to indicate the date a building (or an interest therein) was disposed of.

Line 9 Date noncompliance corrected: If entering a corrected date, make sure the appropriate "noncompliance corrected" block in lines 11a through 11o, or 11q is checked. If there are multiple categories, the date the last issue was resolved should be entered. (Note: there is no "noncompliance corrected" block for category 11p, Project is no longer in compliance nor participating in the program.)

Line 10 Correction of previously reported noncompliance: Check this box if the sole reason for filing the form is to indicate that previously reported noncompliance problems have been corrected.

Line 11a-p Noncompliance categories: Select the category that best describes the issue being reported. Be sure to check the correct box for "out of compliance" and/or "noncompliance corrected," as applicable.

Line 11q This category is used only for those issues that do not fit into the categories specified in 11a through11p. Be sure to attach an explanation.

Line 12 Additional Information: Extensive detail is not necessary, but a summary is desirable to indicate the nature and extent of the noncompliance.

---

[2] Note that, in some instances involving buildings placed in service, receiving an allocation of credit, or described in IRC §42(h)(4) with respect to which tax-exempt bonds were issued prior to September 9, 1992, managers' units may be included in the total number of residential units. See Rev. Rul. 92-61, 1992, 32 I.R.B. 4. The IRS will not, however, apply Rev. Rul. 92-61 unless the owner files, or has filed, a return that is consistent with the ruling.

Line 13 a. Building disposition: Check the box for the appropriate type of disposition (sale, foreclosure, destruction, or other). For “other” dispositions, attach an explanatory statement.

b. New owner’s name and address: Ensure that the owner’s name, address and ZIP code are correct.

c. Date of disposition: The date the ownership actually transferred should be used. If the exact date is unknown, enter the best approximation.

d. New owner’s EIN: Ensure that the identification number for the owner is correct and check the SSN for individual taxpayers (xxx-xx-xxxx) or EIN for business entities (xx-xxxxxxx) such as corporations and partnerships.

Line 14 Contact Person: Identify the person the IRS should call if there are any questions and include that person’s telephone number.

Signature Signature of authorizing official: The authorizing official is a state agency official who is authorized by the state agency to sign such documents. The person need not be an executive, but may be a lower level employee within the state agency organization.

Chapter 3
Guidelines for Determining Noncompliance

Overview

State agencies are responsible for determining whether owners are compliant with the requirements of IRC §42 and its regulations. Professional judgment should be used to identify significant noncompliance issues, establish the scope and depth of the project/building review, and apply the law and regulations to the facts and circumstances of the case in a fair and impartial manner. This chapter includes guidelines to assist the state agencies meet these responsibilities.

Current Noncompliance Issues

Initial Physical Inspection and Tenant File Review

Treas. Reg. §1.42-5(c)(2)(ii)(A) requires state agencies to conduct on-site inspections of all buildings in the project, and for at least 20 percent of the low-income units, inspect the units and review the certifications, the documentation supporting the certifications, and the rent records for the tenants in those units, by the end of the second calendar year following the year the last building is placed in service.

Under Treas. Reg. §1.42-14(d)(2)(ii), an allocation of credit may not be returned any later than 180 days following the close of the first tax year of the credit period. Therefore, it is highly recommended that the first review of the LIHC project be conducted within that timeframe. Under specific circumstances, previously allocated credits can be reclaimed and returned to the state's credit ceiling if necessary.[1] Timely review of the initial lease-up provides owners an opportunity to correct problems early in the compliance period.

Subsequent Physical Inspections and Tenant File Reviews

Treas. Reg. §1.42-5(c)(2)(ii)(B) requires that, at least once every 3 years, state agencies conduct on-site inspections of all buildings in the project and, for at least 20 percent of the project's low-income units, inspect the units and review the certifications, documentation supporting the certifications, and the rent records for all the tenants living in the units.

Example 1: Current Tenant Income (Re)Certification and Documentation

> An LIHC building was placed in service and the first tax year of the credit period was 2000. The state agency inspected the property and reviewed tenant certification in May 2001; no noncompliance issues were identified. The next inspection and review were conducted in April 2004; the tenant files were reviewed using the most recent recertification, or initial income certifications for tenants moving into the building within the last year.

Reporting Current Noncompliance

Under Treas. Reg. §1.42-5(a), state agencies are required to report any noncompliance of which the agency becomes aware. Agencies should report all noncompliance, without regard to whether the identified outstanding noncompliance is subsequently corrected.

The inspection standard for on-site inspections of buildings and LIHC units generally requires state agencies to determine whether the building and units are suitable for

[1] See chapter 21.

occupancy based on local health, safety, and building codes or whether the buildings and units satisfy the uniform physical condition standards established by HUD. [2]

The state agency is required to review the low-income certifications, the documentation supporting the certifications (and recertifications[3]), and the rent records for the tenants in the units selected for the physical inspection. [4] Therefore, the state agency should be reviewing the initial income certification if the tenant moved in within the last year or the most recent income recertification.

In addition, state agencies must report any change in the applicable fraction (such as converting LIHC units to market rate units) or eligible basis (such as converting common area to commercial space) that results in a decrease in the qualified basis as noncompliance.

Noncompliance issues identified and corrected by the owner prior to notification of an upcoming compliance review or inspection by the state agency need not be reported; i.e., the owner is in compliance at the time of the state agency's inspection and/or tenant file review. Small Business/Self-Employed (SB/SE) considers the date of the notification letter a "bright line" date comparable to the rules for requesting a PLR or the disclosure on From 1040X that an amended tax return is being filed after being audited by the IRS or subsequent to notification that it will be audited. See Form 1040X, line B.

Sampling Requirements

The review (or sampling) of 20 percent of the LIHC units in a project and the associated tenant files is required under the Treasury regulations. The purpose is to estimate the compliance level of all the tenant income (re)certifications by providing a "snap shot" view of the owner's activities and compliance level at a specific moment in time. Sampling reduces the labor costs, and enables state agencies to meet time constraints when dealing with large LIHC properties.

Selecting a Sample

A random selection of tenant files or LIHC units is required. The method of choosing the sample of files or units to be inspected must not give the owner advance notice of which units and tenants records are to be inspected and reviewed[5]. There is no advantage to selecting different units over the 15-year compliance monitoring cycle.

If the sample includes a currently vacant unit, then the last (re)certification for the last tenant should be reviewed. The "snap shot" is indicative of current compliance.

Interpreting the Results

The IRS uses the results of the state agencies' reviews as an indicator of the owner's level of compliance with IRC §42 requirements. If audited, the IRS can also use the results to make adjustments to the LIHC on a unit-by-unit basis as identified on Form 8823. However, the IRS cannot project the results to the entire population of LIHC units[6].

---

[2] See Treas. Reg. 1.42-5(d)(2).
[3] Treas. Reg. 1.42-5(c)(1)(iii) refers to an "annual income certification" which for clarity purposes is often referred to as a "recertification".
[4] See Treas. Reg. 1.42-5(c)(2)(ii)(A) and (B).
[5] Treas. Reg. 1.42-5(c)(2)(iii).
[6] The IRS has specific requirements for using sampling techniques as part of an income tax audit. A state agency is not required to use these more stringent techniques for random selection and sample size when conducting a compliance review.

Example 1: Applying Tenant File Review Results

A state agency conducts a tenant file review and physical inspection of a 100% LIHC single building project with 100 units. The LIHC associated with each unit is $3,000. Twenty units are inspected and the associated tenant files are reviewed. Various noncompliance issues were identified for fifteen, or 75 percent, of the twenty sampled units.

The IRS can make an LIHC adjustment of $45,000 (15 units x $3,000) for the year of the review, with a recapture of $15,000 plus interest for each of the prior years of the credit period. Although the sample results indicate significant noncompliance, the results cannot be projected to the entire population; i.e., the IRS cannot conclude that 75 of the 100 units are out of compliance and, therefore, disallow the entire LIHC because the taxpayer did not meet the minimum set-aside.

Expanding the Sample Size

In the event that extensive noncompliance is identified, state agencies should consider expanding the number of units inspected/files reviewed beyond the 20 percent sample required under Treas. Reg. 1.42-5(c)(2)(ii). Circumstances warranting consideration of expanding the sample of LIHC units reviewed include (but are not limited to):

1. Poor internal controls (significant risk of error)
2. Multiple problems
3. Significant number of nonqualified units
4. Significant number of households are not income-qualified
5. Credible information from a reliable source

Determining the Scope of the State Agency's Inspection/Review

Large, Unusual and Questionable Items (Materiality)

Large, unusual, or questionable items (LUQ's) may be material in determining whether noncompliance exists, and thus affect the scope of the state agency's inspection/review. Some factors to consider when determining the materiality of items include:

1. Comparative nature of the issue – two of one hundred of a building's rental units out of compliance for a month is not as important as a project failing the 40/60 minimum set-aside.

2. Absolute nature of the issue – violations of the physical conditions standards should be investigated thoroughly whether one or one hundred units are impacted.

3. Inherent nature of the issue – a permanent decrease in the eligible basis of the property is more significant than two units that are not available for rent for two months.

4. Evidence of intent to mislead – this may include missing, misleading or incomplete documentation.

5. Extenuating circumstances – the issue cited is very temporary or in the process of being fixed at the time of inspection.

Determining the Depth of the State Agency's Inspection/Review

Issue Development

Depth is the extent to which an issue of potential noncompliance is developed. It demonstrates the degree of intensity and thoroughness applied to make a determination of noncompliance. State agencies must use judgment to determine the depth required to satisfactorily develop an issue of noncompliance. The following factors should be considered:

1. The type and reliability of evidence available or expected,
2. Complexity of the issue, and
3. Techniques used.

It is important to obtain sufficient evidence for evaluating the owner's compliance with IRC §42 requirements. Determining the proper amount of evidence to accumulate is a judgmental decision. Factors to consider include the risk that the owner may have made errors that are individually or collectively material and the risk that tests (such as sampling) will fail to uncover material errors.

Consideration of Taxpayer Due Diligence

For most taxpayers, voluntary compliance consists of preparing an accurate tax return, filing it timely, and paying any taxes due. Compliant behavior can be demonstrated when a LIHC property owner exercises ordinary business care and prudence in fulfilling its obligations. Due diligence can be demonstrated in many ways, including (but not limited to) establishing strong internal controls (policies and procedures) to identify, measure, and safeguard business operations and avoid material misstatements of LIHC property compliance or financial information. Internal controls include:

1. Separation of duties,

2. Adequate supervision of employees,

3. Management oversight and review (internal audits),

4. Third party verifications of tenant income,

5. Independent audits, and

6. Timely recordkeeping.

Evidence

State agencies gather information to determine the owner/taxpayer's compliance with IRC §42. This determination must be made on the basis of all available facts, including facts supporting the owner's position. Evidence is something that tends to prove a fact or point in question.

Owners have the right to expect that the information they provide will be safeguarded and used only in accordance with the law. To promote and maintain owners' confidence in the privacy, confidentiality, and security protections provided by the state and IRS, the following principles should be followed.

1. No information will be collected or used (with respect to owners/taxpayers) that is not necessary and relevant for tax administration and other legally mandated or authorized purposes.

2. Information will be collected, to the greatest extent practicable, directly from the taxpayer to whom it relates.

3. Information about taxpayers collected from third parties will be verified, to the extent practicable, with the taxpayers before a determination of compliance is made using the information.

Types of Evidence

The Internal Revenue Code requires all taxpayers to keep adequate records to support the items on their tax returns. However, not all evidence need be "books and records." The following discussion is an overview of different types of acceptable evidence of taxpayer compliance.

1. Documentary Evidence

Physical documentation is generally regarded as providing proof or evidence. Writings made contemporaneously with the happening of an event generally reflect the actual facts and indicate what was in the minds of the parties to the event. If possible, original documentary evidence should be reviewed.

The records to be retained by the LIHC property owner are described in Treas. Reg. §1.42-5(b). The records must be retained for at least 6 yeas after the due date (with extensions) for filing the federal income tax return for that year. The records for the first year of the credit period, however, must be retained for at least 6 years beyond the due date (with extensions) for filing the federal income tax return for the last year of the compliance period of the building.

Owners may use electronic storage systems instead of hardcopy (paper) books and records to retain the required records.[7] However, the electronic storage system must satisfy the requirements of Rev. Proc. 97-22. In addition, the owner must satisfy any additional recordkeeping and record retention requirements of the monitoring procedure adopted by the state agency. For example, the housing agency may require the owner to maintain hardcopy books and records.

While documentary evidence has great value, it should not be relied upon to the exclusion of other facts. Facts can also be established by oral testimony. There will be times when greater weight should be given to oral testimony than to conflicting documentary evidence. The owner should not be considered noncompliant simply because documentary evidence is incomplete to establish precise compliance when there is some evidence to support compliance.

The "Cohan Rule," as it is known, originated in the decision of Cohan v. Commissioner, 39 F.2d 540 (2d Cir. 1930). In Cohan, the court made an exception to the rule requiring taxpayers to substantiate their business expenses. George M. Cohan, the famous entertainer, was disallowed a deduction for travel and business expenses because he was unable to substantiate any of the expenses. The judge wrote that "absolute certainty in such

[7] Rev. Rul. 2004-82, I.R.B. 2004-35, Q&A #11.

matters is usually impossible and is not necessary, the Board should make as close an approximation as it can." In general, the Tax Court has interpreted this ruling to mean that in certain situations "best estimates" are acceptable in order to approximate expenses. The Cohan Rule is a discretionary standard and can be used to support a reasonable estimate of compliance requirements.

State agencies may allow owners to reconstruct records when the situation warrants, consider incomplete or imperfect documentation, and accept credible oral testimony to determine the owner/taxpayer's overall compliance with the requirements of IRC §42.

Example 1: Incomplete Documentation

> A couple's current income recertification was timely signed by the wife, but the husband's signature is missing because he is on active military duty and stationed out of the country. The husband's income is included in the recertification and the reporting instructions for his overseas assignment are included in the file. The state agency may consider the unit in compliance, even though the husband's signature is missing.

Example 2: Reconstructing Evidence

> The tenant's income recertification was timely completed and signed. The summary records are in the file, but the income verification from the employer is missing. The state agency may allow the property manager to perfect the documentation.

2. Oral Testimony

There are times, due to taxpayer-specific circumstances, when records may not exist or are incomplete. In such cases, oral testimony may be the only evidence available. Therefore, oral statements made by the owner to the state agency represent direct evidence that must be considered. Although self-serving, *uncontradicted* statements that are *not improbable* or *unreasonable* should not be disregarded.

Example 1: Plausible Oral Testimony

> During a compliance review, an issue involving the income certification for a household was noted. However, the tenant had moved out and could not be located. The manager remembers discussing the item with the tenant, but there is no third party that can corroborate the manager's statement. If the manager's statement is plausible, the oral testimony can be considered sufficient.

The degree of reliability placed on an owner's oral testimony should be based on the credibility of the owner and surrounding circumstantial evidence supporting the owner's testimony. The following concepts are helpful when evaluating oral testimony.

a. Oral evidence should not be used in lieu of available documentary evidence

b. If the issue involves specific recordkeeping required by law, then oral testimony alone cannot be substituted for necessary written documentation

c. Oral testimony need not be accepted without further inquiry. If in doubt, or there are inconsistencies, attempts should be made to verify the facts from another source.

3. Third Party Evidence

Third party evidence is evidence obtained from someone other than the taxpayer. Credible third party evidence is used when the owner is unable to provide the information or it is necessary to verify information provided by the owner. Information about owners collected from third parties will be verified, to the extent practicable, with the owner before determinations are made using the information provided by third parties.

Evaluating Evidence

The state agencies should exercise sound judgment to make reasonable determinations and ensure that there is a basis for each item considered. This may involve considering the extent to which detailed documentation is required, examining all existing documentation, and determining the weight that should be given to oral testimony. *All* the information needed to definitively resolve an issue will seldom be available; state agencies will need to determine when there is sufficient information, or substantially enough, to make a proper determination of compliance with IRC §42.

State agencies are expected to arrive at definite conclusions based on a balanced and impartial evaluation of all available evidence. The state agencies should employ independent and objective judgment in reaching conclusions and should decide all things on their merit; free from bias and conflicts of interest. Fairness may be demonstrated by:

1. Making decisions impartially and objectively based on consistent application of procedures and tax law;

2. Treating individuals equitably;

3. Being open-minded and willing to seek out and consider all relevant information, including opposing perspectives;

4. Voluntarily correcting mistakes and refusing to take advantage of mistakes or ignorance on the part of the owner; and

5. Employing open, equitable, and impartial processes for gathering and evaluating information necessary for making decisions.

Factors to consider when evaluating evidence include the following:

1. Number and type of noncompliance issues,

2. Elements missing from the documentation,

3. Reasons why documentation is incomplete,

4. Availability of other information to substantiate compliance, and

5. Materiality of unsubstantiated documentation.

In the event that an owner provides clarification or evidence that the potential violation *does not exist*, it is not necessary to report the incident to the IRS; i.e., the owner has clarified that they are in compliance.

Workpapers

Content and Purpose

Workpapers are the state agencies' written records that provide the principal support for their project audits and the filing of Forms 8823. They should include all the information needed to conduct the inspection/review, and document contacts with the owner, the procedures applied, tests performed, information obtained, and the conclusions reached. Workpapers serve the following purposes[8]:

1. A record of the evidence gathered, procedures completed, tests performed, and analyses conducted;

2. Provide support for technical conclusions;

3. Basis for internal reviews by state agency management; and

4. Support for IRS audits of the owner's tax returns.

State agency workpapers may be used by IRS examiners to support conclusions regarding the accuracy of the owner's tax return. These papers and other documents in files may be reviewed to help establish the scope and depth of an IRS audit, establish a pattern of noncompliance, or provide evidence to support adjustments to the tax return. In some cases, the workpapers may be the only evidence.

While there are no requirements for the form or style of workpapers or documentation, workpapers should include certain "identifying" information to support IRS examinations. Workpapers should include:

1. Identity of the owner of the building being reviewed,
2. Name (or initials) of person preparing the workpapers, and
3. Date the workpapers were prepared.

Required Recordkeeping and Retention Provisions – State Agencies

For monitoring compliance with low-income housing credit requirements, Treas. Reg. §1.42-5(a)(2)(i)(A) provides that a procedure for monitoring for noncompliance must include the recordkeeping and record retention provisions of Treas. Reg. §1.42-5(b).

Under Treas. Reg. §1.42-5(e)(3)(ii), a state agency must retain the original records of noncompliance or failure to certify for 6 years beyond the state agency's filing of the respective Form 8823. In all other cases, the state agency must retain the certifications and records for 3 years from the end of the calendar year in which the state agency received the certifications and records.

[8] Internal Revenue Manual 4.10.9(3).

Availability of Workpapers to Owners

IRS agents can informally provide taxpayers with access to the workpapers associated with their own audit *that would otherwise be made available under the Freedom of Information Act.* If consistent with the state's disclosure rules, similar access to the workpapers for the compliance monitoring review can be helpful to owners; e.g., clarifying facts or preparing relevant evidence to resolve issues.

Chapter 4
Category 11a
Household Income Above
Income Limit upon Initial Occupancy

Definition

This category is used to report units that have been rented to households with incomes that do not meet income eligibility restrictions. According to IRC §42(g)(1), an owner of a tax credit property must elect to serve tenant populations with gross incomes that are either 50% or less of Area Median Gross Income (AMGI) or the National Nonmetropolitan Median Gross Income (NNMGI) when applicable[1], or 60% or less of AMGI or NNMGI when applicable, as adjusted for family size.[2] Under the terms of an extended use agreement, an owner may agree to service tenant populations at AMGI levels lower than identified in IRC §42(g); nonperformance of such agreements is not a reportable noncompliance event.

Annual Household Gross Income is the gross income (with no adjustments or deductions) the household anticipates it will receive in the 12-month period *following* the effective date of the income certification. The combined income of all occupants of a unit, whether or not legally related, is compared to the appropriate percentage of the AMGI for a family with the same number of members[3].

If information is available on changes expected to occur during the year, that information is used to most accurately determine the anticipated income from all known sources during the year. Unanticipated income received after the household moves in will not affect the original determination that a household is eligible for LIHC housing.

State agencies are required to review the low-income certifications, and the supporting documentation, for the tenants in a sample of LIHC units.[4] Therefore, the state agency must review the initial income certification if the tenant moved in within the last year and the most recent income recertification for continuing tenants.

Where the owner has received a waiver of the annual income recertification requirements, the state agency will always review the initial income certification.[5]

Determining Income Limits (Area Median Gross Income)

To determine the appropriate household income limit figure, refer to the HUD-published table relating to "very low income," which is an income level at or below 50 per cent of the Area Median Gross Income (AMGI). HUD prepares tables and provides income

[1] IRC §1400N(c)(4), Special Rule for Applying Income Tests: In the event of property placed in service (A) during 2006, 2007, or 2008, (B) in the Gulf Opportunity Zone, and (C) in a nonmetropolitan area (as defined in section 42(d)(5)(C)(iv)(IV)), section 42 shall be applied by substituting 'national nonmetropolitan median gross income (determined under rules similar to the rules of section 142(d)(2)(B)' for 'area median gross income' in subparagraphs (A) and (B) of section 42(g)(1).
[2] Note: Once made, this election is irrevocable and applies to all low-income units. See IRC §§42(g)(1) and 42(i)(3)(A)(ii).
[3] See Rev. Rul. 90-89, 1990-2 C.B. 8.
[4] See Treas. Reg. 1.42-5(c)(2)(ii)(A) and (B).
[5] See Rev. Proc. 2004-38, section 5.07, 2004-2 C.B. 10.

figures for family sizes ranging from one to eight persons.

If the owner elected the 40/60 minimum set-aside, then the published income figures for the 50 per cent of AMGI should be multiplied by 1.2.[6] There should be no rounding of these figures, as HUD has already rounded up the figures in the tables.

Households and Family Size

As a general rule, a "household" consists of all individuals (or tenants) residing in a unit. To determine the household income limit, all applicable income standards are adjusted for family size. For LIHC purposes, all occupants of a unit are considered in the determination of family size except the following (refer to HUD Handbook 4350.3 for complete discussion):[7]

1. Live-in aides. A person who resides with one or more elderly persons, near-elderly persons, or persons with disabilities, and who is determined to be essential to the care and well-being of the person(s); is not obligated for the support of the person(s); and would not be living in the unit except to provide the necessary supportive services. While a relative may be considered to be a live-in aide/attendant, they must meet the above requirements. The income of live-in aides is not included in the household's income.

2. Foster children or foster adults

3. Guests

When determining family size for income limits, the owner must include the following individuals who are not living in the unit:

1. Children temporarily absent due to placement in a foster home;

2. Children in joint custody arrangements who are present in the household 50% or more of the time;

3. Children who are away at school but who live with the family during school recesses;

4. Unborn children of pregnant women (as self-certified by the woman);

5. Children who are in the process of being adopted;

6. Temporarily absent family members who are still considered family members. For example, the owner may consider a family member who is working in another state on assignment to be temporarily absent;

---

[6] Rev. Rul. 89-24, 1989-1 C.B. 24.

[7] IRC §142(d)(2)(B) refers to the income of individuals. The combined income of all occupants of an apartment, whether or not legally related, is compared to the appropriate percentage of the median family income for a family with the [same] number of members. See Rev. Rul. 90-89, 1990-2 C.B. 8.

7. Family members in the hospital, or a rehabilitation facility, for periods of limited or fixed duration are considered a family member. These persons are temporarily absent; and

8. Persons permanently confined to a hospital or nursing home. The family decides if such persons are included when determining family size for income limits. If the family chooses to include the permanently confined person as a member of the household, the owner must include income received by the confined person in calculating family income.

Changes in Family Size

Changes in the size of an existing household after the initial tenant income certification must also be addressed.

Family Size Increases

The addition of new member(s) to an existing low-income household requires the income certification for the new member of the household, including third party verification. The new tenant's income is added to the income disclosed on the existing household's tenant income certification.[8] The household continues to be income-qualified, and the income of the new member is taken into consideration with the income of the existing household for purposes of the Available Unit Rule under IRC §42(g)(2)(D). See chapter 14.

Example 1: Additional Person Joins Household During the Year

> Jim and his two children initially income qualified and moved into an LIHC unit on March 1, 2001. The household continued to qualify at the annual income recertification for 2002, 2003, and 2004. Jim then met Jane, and they decided to marry in October 2004. The new couple would like to live in the LIHC unit Jim occupies. Jane completes a tenant income certification.
>
> The certification effective date continues to be March 1, 2001 and the next annual income recertification is due within 120 days before March 1, 2005.
>
> If the household's income, when Jane's income is added, exceeds 140 percent of the income limit (170 percent in deep rent skewed projects), then the Available Unit Rule applies.

A household may continue to add members as long as at least one member of the original low-income household continues to live in the unit. Once all the original tenants have moved out of the unit, the remaining tenants must be certified as a new income-qualified household unless the remaining tenants were income qualified at the time they moved into the unit.

If a state agency determines that the tenants manipulated the income limitation

[8] Under Treas. Reg. 1.42-5(c)(iii), owners must obtain an *annual* income certification from each low-income tenant. Interim income recertifications are not contemplated under IRC §42.

requirements, then the unit should not be treated as a low-income unit as of the date the household initially occupied the unit.

Example 2: New Tenants Manipulated Income Limitations

> An income-qualified household consisting of one person moved into a two bedroom unit on March 15, 2005. A second tenant completed an initial income certification and joined the household soon thereafter. The combined income of the two tenants is above in income limit for a household with two members. The unit is out of compliance as of March 15, 2005.

Family Size Decreases

Decreases in family size do not trigger the immediate income certification of a new household. Subsequent annual income recertifications will be based on the income of the remaining members of the household. If the remaining household's income is more than 140 percent (170 percent in deep rent skewed projects) of the income limit at the time of the annual income recertification, then the Available Unit Rule is applicable.[9]
Example 1: Member of the Household Leaves

> A married couple, with their two children, was initially income qualified and occupied a three bedroom unit. After four years, the oldest child, now 18 years old, moves out of the unit. It is not necessary to certify the remaining household as a new household. If the household's income exceeds the limit for a family with three members at the next income recertification, the Available Unit Rule is applicable.

Example 2: Unborn Children

> A household was originally income qualified based on the inclusion of an unborn child. Four months later, the pregnancy ended in miscarriage. It is not necessary to certify the remaining household as a new tenant at the time of the miscarriage. If the income of the remaining household members exceeds the income at the next income recertification, the Available Unit Rule is applicable.

Verifying Income and Assets

Owners must verify all known income and assets that affect eligibility. However, if the total assets for a household are $5,000 or less, the applicants may satisfy the asset requirement by signing a statement attesting to such fact.[10]

Acceptable methods of verifying information include third party verifications, reviews of documents submitted by the tenant (such as check stubs), and tenant certifications made under penalties of perjury.[11]

---

[9] See the legislative history for IRC §42, which notes that if the tenant's income increases to a level more than 140 percent above the otherwise applicable ceiling (*or if the tenant's family size decreases so that a lower maximum family income applies to the tenant*), that tenant is no longer counted in determining whether the project satisfies the set-aside requirement. The explanation continues, stating that there is no penalty in such cases if the Next Available Unit Rule is applied.
[10] See Rev. Proc. 94-65, 1994-2 C.B. 798.
[11] Treas. Reg. §§ 1.42-5(b)(vii) and 1.42-5(c)(1)(iii).

Third party contacts are preferred. Owners should obtain the tenant's consent for the release of information before contacting third parties. Verification forms should be directly sent to and received from third parties. If third party contacts are by telephone or interview, the conversation should be documented in the tenant's file and include all the information that would have been included in a written verification. The owner may obtain acceptable third party written verification by facsimile, e-mail, or Internet.

Owners can accept tenant-provided documents (e.g., pay stubs, Forms W-2, bank statements, etc.) when third party contacts are impossible or delayed, or third party verifications are not needed (e.g., birth certificates or divorce decrees).[12]

There will be situations where it will be difficult to estimate income. For example, the tenant may work sporadically or seasonally. In such cases, owners are expected to make a reasonable judgment as to how to the most reliable approach to estimating what the tenant will receive in the coming year.

Determining Annual Income

Household income is defined as the gross income (with no adjustments or deductions) the household anticipates it will receive in the 12-month period following the effective date of the household's certification of income.[13] Income includes, but is not limited to, earned and unearned income from all household members age 18 and older (adults), unearned income of minor children, and income from assets. Emancipated minors are treated as adults. As noted in chapter 5 of HUD Handbook 4350.3, "In all instances, owners are expected to make a reasonable judgment as to the most reliable approach to estimating what the tenant will receive during the year."[14]

Common sources of income are discussed below. Refer to HUD Handbook 4350.3 for additional information.

Employment Income

Employment income includes (but is not limited to) hourly wages, salaries, overtime pay, tips, bonuses, and commissions before any payroll deductions. Payments in lieu of employment income are also included; e.g., workers compensation, severance pay, unemployment and disability compensation. Income from employment of children (including foster children) is excluded.

Maximum benefits and annualized payments should not be used unless the source of funds is expected to continue throughout the certification period or for an indeterminable length of time. For example, if the third party does not indicate the length of time for which the tenant will be receiving a certain income, then the income should be annualized. In the event that the family cannot provide documentation that access to a specific source of income is for a limited and determinable time period, the benefits should be considered to be available for an indefinite time period and annualized.

[12] Third party contacts are considered impossible if an employer does not respond, third party charges a fee, or no third party is available. Generally a third party contact is considered delayed if a response will not be received within two weeks, but can be less it is determined that the third party will not respond.
[13] As explained in Treas. Reg. §1.42-5(b)(vii), gross income for purposes IRC §42 is not gross income for purposes of determining a federal income tax liability.
[14] The HUD Handbook 4350.3, Chapter 5, paragraph 5-5(C).

Example 1: Benefits for Indefinite Time Period

John works as a telemarketer for $9.00 an hour, 40 hours a week. He does not work overtime, has no other source of income, and is not planning to leave his job. His anticipated income is computed as:

($9.00/hour) x (40 hours/week) x (52 weeks/year) = $18,720/year

Example 2: Benefits for Definite Time Period

A teacher's assistant works nine months annually and receives $1,300 per month. During the summer recess, the teacher's assistant works for the Parks and Recreation Department for $600 a month. The teacher's anticipated income is computed as:

($1,300 x 9 months) + ($600 x 3 months) = $13,500

If information is available on changes in income expected to occur during the year, use that information to determine the total anticipated income from all know sources during the year. [15]

Example 3: Anticipated Changes in Income

In May 2004, an unemployed plumber applies for LIHC housing. At that time, the plumber is receiving unemployment benefits of $250.00 per month and will qualify for benefits for 4 more months.[16] Beginning in October, the plumber will be employed at $1,000 per month. The plumber's anticipated income is computed for the period from May to September, 2004 plus the income for October 2004 through May 2005.

($250.00 x 5 months) + ($1,000 x 7 months) = $8,250

Military employment may include (but is not limited to) base and longevity pay, proficiency pay, sea and foreign duty pay, hazardous duty pay, subsistence and housing allowances, and clothing allowances. All these are includable in income. Hostile fire pay, however, is excluded from income. *Note*: a temporarily absent individual on active military duty must be removed from the family and his or her income must not be included in the computation of household income, unless that person is the head of the family, spouse, or co-head.

Payments received under the Domestic Volunteer Service Act of 1973 are excluded from income. This includes employment through VISTA, Retired Senior Volunteer Program, Foster Grandparents Program, youthful offender incarceration alternatives, and senior companions. Payment received under Title V of the Older Americans Act (Green Thumb, Senior Aides, Older American Community Service Employment Program) is also excluded.

---

[15] See Footnote #2.

[16] The HUD Handbook 4350.3, Chapter 5, paragraph 5-5(A)(1) refers to unemployment compensation as an example of income that *may* not last for a full 12 months.

Income from Training Programs

Compensation from state or local employment training programs or training of a family member as resident management staff is not included in income. Income from training programs not affiliated with a local government and income from the training of a family member resident to serve on the management staff are also excluded. Amounts excluded by this provision must be received under employment training programs with clearly defined goals and objectives, and are excluded only for a limited period as determined in advance under the program by the state or local government.

Amounts received under training programs funded by HUD are not included in income. Similarly, payments received under programs funded in whole or in part under the Workforce Investment Act (WIA – formerly the Job Training Partnership Act) are excluded from income. These are employment and training programs for Native Americans and migrant and seasonal farm workers, Job Corps, veterans employment programs, state job training programs, career intern programs, and AmeriCorps. Amounts received by a person with a disability that are disregarded for a limited time for purposes of supplemental security income eligibility and benefits because they are set-aside for use under a Plan to Attain Self-Sufficiency (PASS) are excluded from income.

Excluded compensation includes stipends, wages, transportation or childcare payments received, or reimbursements of out-of-pocket costs and which are made solely to allow participation in a specific program. Income received as compensation for employment is excluded only if the employment is a component of a job-training program. Once training is completed, the employment income is included in the computation of annual income. Amounts received during the training period from unrelated sources (public assistance, social security payments, other employment) are not excluded from income.

Income from a Business

The net income from the operation of a business, profession, or sole proprietorship businesses is included in income. Net income is gross income less business expenses, interest on loans, and depreciation computed on a straight-line basis. Salaries paid to the applicant or other household members from the business must also be identified and included in income.

Business expenses do *not* include principal payments on loans, interest on loans for business expansion or capital improvements, or other expenses for business expansion or outlays for capital improvements.

If the net income from a business is negative, it must be counted as zero income. A negative amount cannot be used to offset other family income.

Example 1: Negative Income from Sole Proprietorship

> John and Mary, a married couple, apply for LIHC housing. John operates a sole proprietorship business; the net income from the business after expenses last year was -$3,500. Mary earns $27,000 each year as an employee, as shown on the W-2 from her employer. The household's income is $27,000. The $3,500 loss generated by John's business cannot be used to offset Mary's wages.

Income from a sole proprietorship can be estimated by reviewing the individual's prior year tax returns and Schedules C. If necessary, the owner can ask the potential tenant to provide a signed Form 8821, which will allow the owner to verify the information with the IRS.

Example 2: Using the Prior Year Tax Return

> A potential LIHC tenant is self-employed and expects the business to continue indefinitely. The potential tenant submitted the tax return for the last year. The net income from the sole proprietor ship was $13,000. The $13,000 figure can be used as income anticipated for the next 12 months.

Alternatively, the potential tenant can annualize income from self-employment for the current year business activity based on the number of full months in business. The formula is:

$$\frac{\text{(Net Income Year to Date) x 12 months}}{\text{Number of Months in Business during the Current Year}}$$

Example 3: Annualized Current Year Self-Employment Income

> In September, a potential tenant prepared a Schedule C showing the income and expenses for the current year, from January 1 through August 31, using the tax form from the prior year. To date, the potential tenant has net income of $24,000. The anticipated income is determined by multiplying $24,000 by 12/8, which equals $36,000. This is an acceptable estimate of future earnings.

Income from Rental Property, Partnerships, S-Corporations, and Royalties

Rental property may be real estate or personal property such as equipment or vehicles. The tenant may have income from enterprises doing business as partnerships or s-corporations, or receive royalties for copyrights or patents.

Assets

There is no limit on the amount of assets a household may hold and a household is not required to convert an asset to cash.

Assets include bank accounts, trusts, stocks and bonds, the surrender value of life insurance policies, and cash kept in safety deposit boxes or at home. One time, lump sum distributions are considered assets; e.g., inheritances, capital gains, victim's restitution and settlements on insurance claims. Lottery winnings paid in one lump payment are treated as assets. Lottery winnings paid in periodic payments must be counted as income. Lump sum payments of deferred periodic payments of supplemental security income and social security benefits are also considered assets.

For non-cash assets held for investment, the cash value is the net amount the household would receive if the assets were converted to cash. The cash value is the market value, or the amount another person would pay to acquire the asset, less the cost to turn the asset into cash.

Assets do not include necessary personal items such as clothes, furniture, cars, wedding rings, or vehicles specially equipped for persons with disabilities. Assets used in a business are not assets included in the computation of the tenant's income. If an asset is held in the tenant's name, but the income generated by the asset accrues to someone who is not a member of the household and the other person is responsible for income taxes on the accrued income, then the asset is not included in the tenant's income.

Lump-sum additions to the household's assets, such as inheritances, insurance proceeds (including payments under health and accident insurance and worker's compensation), capital gains, and settlements for personal or property losses are excluded from income.

Example 1: Exhausting an Asset

> A tenant receives a lump sum inheritance of $12,000 and deposits the money in a savings account. The asset is disclosed and the income from the asset correctly accounted for at the time of the initial income certification. The tenant subsequently withdraws $1,000 each month to pay personal living expenses. A year later, when the annual income recertification is completed, the bank account balance is zero. The monthly withdraws retain their character of an asset; i.e., they are not considered income. There is no need to include the bank account as an asset in subsequent annual income recertifications since the balance is zero.

Assets disposed of for less than fair market value within two years of the effective date of a tenant's initial certification or recertification, including assets placed in irrevocable trusts, are included in the tenant's income. Assets are considered to be disposed of for less than fair market value if the cash value of the assets disposed of exceeds the gross amount the tenant received by more than $1,000. Do not include assets disposed of for less than fair market value as the result of a foreclosure, bankruptcy, or divorce or separation agreement if the applicant or tenant receives valuable consideration not measurable in dollars.

Assets must be verified, the income generated from assets must be determined, and the income included in the computation of the household's income.

1. If the total cash value of a household's assets is more than $5,000, imputed income must be calculated using the current HUD passbook rate[17] and the greater of the actual income or imputed income must be included in the household's income. Refer to the HUD Handbook 4350.3, paragraph 5-7F, for the current passbook rate.

2. If the total cash value of the household's assets is $5,000 or less, the actual income the tenant receives from assets is the amount included in annual income as income from assets. An owner may satisfy asset verification requirements by *annually* obtaining a signed, sworn statement from the tenant certifying that the tenant's net family assets are $5,000 or less and disclosing the tenant's annual income from net assets. Owners, however, may not rely on a low-income tenant's signed, sworn statement of income from assets if a reasonable person[18] in the owner's position would conclude that the

[17] Projects receiving a tax credit allocation for rehabilitation of USDA Rural Development properties typically use the USDA Rural Development passbook rate if imputed interest must be included in the income computation.
[18] The "reasonable person" concept is part of the definition of due diligence. Due diligence is defined *(Black's Law Dictionary [6th ed. 1990])* as: "Such measure of prudence, activity, or assiduity, as is properly to be expected from, and ordinarily exercised by, a reasonable and prudent person under the particular circumstances; not measured by any absolute standard, but

tenant's income is higher than the amount presented by the tenant. In such cases, the owner must obtain other documentation of the low-income tenant's annual income from assets to satisfy documentation requirements.[19]

Contract Sales of Real Estate Assets

A tenant may sell real estate using an installment contract (or similar agreement) that provides a stream of payments over a period of time. A portion of the payment will be applied to the principal and a portion will be interest income. The interest should be included in income; the outstanding principal is considered an asset.

Pensions and Trusts

No Return of Capital

The full amount of periodic payments from Social Security, pensions and annuities, Supplemental Security Income (SSI), insurance policies, death benefits, long-term care insurance (in excess of $180 a day) and disability payments should be included in income, including lump sum amounts or prospective monthly amounts for the delayed start of a periodic amount.

Periodic amounts from *supplemental* security income and social security benefits that are received in a lump sum amount or in prospective monthly amounts are excluded; e.g., Black Lung Sick benefits, Veterans Disability, Dependent Indemnity Compensation, and payments to the widow of a serviceman killed in actions.

Return of Capital

Individual Retirement Accounts (IRAs), 401K's and Keogh plans are considered assets. The amount that the tenant can withdraw from a pension plan without retiring or terminating employment, less any penalties but not after tax, is considered an asset. Note: Distributions from an IRA, 401k, or Keogh are *not* periodic payments and are not counted as income as long as the individual can provide documentation that the distribution(s) are a return of capital; i.e., a return of funds the tenant paid into the retirement account.

Trust Amount

The tenant may be the recipient of earning from a trust amount, in which case the gross amount of the trust should be considered an asset. Actual income distributed from the earnings of the trust (that are not revocable by, or under the control of, any member of the tenant household) is included in income. Include only the actual income distributed.

Documentation

Benefit letters or annual statements prepared by third parties are sufficient documentation. Verification may also include bank statements noting the transfers of funds.

---

depending upon the relative facts of the special case." In short, the due diligence standard is a judicially created test to determine the adequacy of the efforts exerted throughout all phases of any activity.

[19] See Rev. Proc. 94-65, 1994-2 C.B. 798.

Public Assistance

Amounts specified for shelter and utilities should be separately stated. They may be excluded from income. Special computations are needed; consult the HUD Handbook 4350.3 for details. Payments, rebates or credits received under the Federal Low-Income Home Energy Assistance Programs are excluded from income. Also exclude any winter differentials given to the elderly.

Special calculations of public assistance income are required for as-paid state, county or local public assistance programs. Consult the HUD Handbook for detailed instructions.

Recurring Gifts, Grants, Scholarships and Contributions

Regular, recurring monetary and nonmonetary gifts or contributions to residents from persons not living in the unit must be included in income. This can include the payments of bills on behalf of a resident. For example, if a parent or family member will be paying a resident's utility bill each month directly to the utility company, those payments are still counted as income for the tenant. However, the value of groceries provided by someone outside the household, and the food portion of public assistance, even if provided routinely, is *not* included.

Example 1: Use of Vehicle

> A tenant uses her ex-husband's car to transport their son to medical examinations conducted on a regular basis. The title to the car is in the ex-husband's name, he makes the car payment, and he is responsible for maintenance.
>
> The use of the car should not be considered a regular non-cash contribution to the household unless the tenant has exclusive use of the vehicle.

Grants received specifically for medical expenses, set aside for use under a Plan to Attain Self Sufficiency (PASS) and excluded for purposes of Supplemental Social Security (SSI) eligibility, or for out-of pocket expenses for participation in publicly assisted programs (expenses include the costs for special equipment, clothing, transportation, child care, etc.) are excluded.

For any student under the age of 24 who is seeking housing without his or her parent, financial assistance in excess of amounts received for tuition under the Higher Education Act of 1965[20], from private sources, or from an institution of higher education[21] shall be considered income to that individual, except for persons over the age of 23 with dependent children. Financial assistance does not include loan proceeds for the purpose of determining income.[22]

For any student residing with his or her parents, scholarships, grants, fellowships, educational entitlement, or any other student financial assistance paid directly to a full-time student or directly to an institution, no matter how the assistance is used, is excluded from income. Amounts of scholarships funded under title IC of the Higher Education Act of 1965, including awards under federal work-study programs or under the Bureau of Indian Affairs student assistance programs are also excluded.

[20] See 20 U.S.C. 10001 *et seq.*
[21] See 20 U.S.C. 1002.
[22] Page 18146, Federal Register Vol. 71.

Generally, contributions that are paid directly to a childcare provider by persons not living in the unit are not included in income. This exclusion is based on a handbook interpretation of reimbursed childcare expenses under the definition of Adjusted Income and it's bearing on Annual Income. See 24 CFR Parts 813.1, 215.1, and 236.1. In relevant part, the regulations define childcare expenses to include "amounts to be paid by the family for [child care]…to the extent [they are] not reimbursed." Handbook 4350.3 indicates that childcare expenses that are not reimbursed are not included as annual income. However, if such childcare is paid by a *non-custodial* parent in lieu of all, or part, of child support payments, then it should be included in income.

Temporary, Nonrecurring, or Sporadic Income

Irregular, nonrecurring monetary gifts or contribution to resident are not included in income.

Alimony or Child Support

Alimony or child support that is court ordered or supported by a written agreement should be included in income unless the recipient certifies that the funds were not received and reasonable efforts have been made to collect the amount due, including filing with courts or agencies responsible for enforcing payments. When no documentation of child support, or alimony stipulated in a divorce decree or separation is available, the owner may require the family to sign a certification stating the amount received. The certification must be notarized. Documentation of the collection efforts made may be requested.

A signed, sworn self-certification by a tenant is sufficient documentation under Treas. Reg. 1.42-5(b)(1)(vii) to show that a tenant is not receiving child support payments and is consistent with the documentation requirements in Rev. Proc. 94-65.[23] In addition to specifying that a tenant is not receiving any child support payments, an annual signed, sworn self-certification should indicate whether the tenant will be seeking or expects to receive child support payments within the next 12 months. If the tenant possesses a child support agreement, but is not presently receiving any child support payments, the tenant should include an explanation of this and all supporting documentation; i.e., a divorce decree or court documents. Also, the self-certification should indicate that the tenant will notify the owner of any changes in the status of child support.[24]

A state agency monitoring procedure, however, may not permit an owner to rely on a low-income tenant's signed, sworn statement indicating that the tenant is not receiving child support payments if a reasonable person in the owner's position would conclude that the tenant's income is higher than the tenant's represented annual income. In this case, the owner must obtain other documentation of the low-income tenant's annual child support payments to satisfy the documentation requirement in Treas. Reg. 1.42-5(b)(1)(viii).

A state agency's monitoring procedure may require that an owner obtain documentation, other than the statement described above, to support a low-income tenant's annual certification of child support payments.

[23] The signed, sworn self certification under Rev. Proc. 94-65 is equivalent to the notarized certification under HUD Handbook 4350.3, Chapter 5, paragraph 5-6E. See also paragraph 5-13D.
[24] See Rev. Rul. 2004-82, Q&A #12, 2004-2 C.B. 350.

Unearned Income of Minor Children

Any unearned income of children under the age of 18 is included in income. This is any income other than employment income; e.g., interest income from bank accounts or dividends from mutual funds held in their name. Unearned income of minor children should be included even if the child is temporarily absent.

Items Excluded from Income (Miscellaneous)

This section includes a description of miscellaneous sources of funds and how they should be treated for purposes of determining the household's income. Refer to HUD Handbook 4350.3, Chapter 5, and Exhibit 5-1 for additional information.

1. Lunches and food received through food programs such as Women, Infants and Children (WIC), amounts received under the School Lunch Act, Meals on Wheels, or food stamps are not included in income.

2. Amounts paid to a family to offset the costs of services or equipment needed to keep a developmentally disabled family member at home are excluded. By Federal statute, the value of food stamps is not included in income.

3. Amounts received by the household that are specifically for, or in reimbursement of, the cost of medical expenses for any member of the household are not included in income.

4. Earnings in excess of $480 for each dependent, full-time student 18 years or older living with his or her parents is excluded from income.

5. Adoption assistance payments in excess of $480 per adopted child are not included in income.

6. Payments received for the care of foster children or foster adults are not included in income.

7. Personal loans, since they must be repaid, are not included in income.

8. Amounts received by the household in the form of refunds or rebates under state or local law for property taxes paid on the dwelling unit are not included in income.

9. Resident service stipends are not included in income. A resident service stipend is a modest amount (not to exceed $200 per month) received by a resident for performing a service for the owner, on a part-time basis, that enhances the quality of life in the LIHC housing. Such services include, but are not limited to, fire patrol, hall monitoring, lawn maintenance, and resident initiatives coordination. No resident may receive more than one such stipend during the same period of time.

10. Reparation payments paid by a foreign government pursuant to claims filed under the laws of that government by persons who were persecuted during the Nazi era are not included in income. Examples include payments by the German or Japanese governments for atrocities committed during the Nazi era.

11. Any amount of crime victim compensation (under the Victims of Crime Act) received through crime victim assistance (or payment or reimbursement of the cost of such assistance) as determined under the Victims of Crime Act because of the commission of crime against the applicant under the Victims of Crime Act (42 U.S.C. 10602) is

not included in income.

12. Income from assets, and amounts received on behalf of, someone who does not reside in the household are not included in income, as long as (1) the amounts are not intermingled with the household's funds and (2) the amounts are used solely to benefit the person who does not reside within the household. For such amounts to be excluded from income, the individual must provide the owner with an affidavit stating that the amounts are received on behalf of someone who does not reside with the family and that the amounts meet the conditions stated above.

13. Interests of individual Native Americans in trust or restricted lands, and the first $2,000 per year of income received by individual Native American that is derived from a trust or restricted lands are not included in income. Amounts received under the Maine Indian Claims Settlement Act of 1980 are also excluded. In addition, all or a portion of the payments under the Alaska Native Claims Settlement Act, judgments of the Indian Claims Commission or U.S Court of Claims may be excluded from income. See HUD Handbook 4350.3 for details.

14. Payments received after January 1, 1989 from the Agent Orange Settlement Fund or any other fund established pursuant to the settlement in the Agent Orange product liability litigation are not included in income. M.D.L. No 236 (E.D.N.Y)

15. Any Earned Income Tax Credit to the extent it exceeds the tenant's income tax liability is not included in income. See IRC §32(j). For example, a tenant may have a tax liability of $400, and an Earned Income Credit of $700. The credit will not only eliminate that $400 tax liability, but the tenant will receive a $300 refund. The $300 is not included in income. Alternatively, the tenant may receive payments directly from his/her employer during the year. These periodic payments are not included in income.

16. The value of any childcare provided or arranged for under the Child Care and Development Block Grant Act of 1990 (CCDBGA) (42 U.S.C. 9858q) is not included in income. Participating families may either pay a reduced amount based on a sliding fee scale or they may receive a certificate for child care services. Note that funds received through CCDBGA for providing childcare services are included in income.

Tenant Income Certification Effective Date

Once all sources of income and assets have been properly verified, owners or managers perform an income calculation using the applicant's tenant income certification to determine whether the applicant qualifies for IRC §42 housing.

The effective date of the tenant's income certification is the date the tenant actually moves into the unit. All adult members of the household should sign the certification. HUD Handbook 4350.3, 5-17B. If the certification is more than 120 days old, the tenant must provide a new certification.. The income recertifications must be completed annually based on the anniversary of the effective date.

Example 1: Determining the Tenant Income Certification Effective Date

> A potential household consisting of John and Jane Doe and their two children completed a rental application and income certification on April 12, 2004. The property manager completed the third party verifications and determined that the household was income eligible on April 21, 2004. John and Jane signed the rental lease on April 25th, and took possession of the unit on May 1, 2004.
>
> The effective date of the tenant income certification is May 1, 2004. All subsequent tenant income recertifications must be performed within 120 days before May 1st of each subsequent year of the 15-year compliance period.

When additional adult individuals join the household, the effective day will remain the same until the unit is completely vacated.

Example 2: Effective Date After Move In of Additional Adult Member

> Jane and her daughter were income qualified and moved into an LIHC unit on September 5, 2003. On March 15, 2004, Jane's widowed mother joined the household.
>
> The tenant income certification continues to be based on the original certification date. All subsequent annual income recertifications will be completed within 120 days before September 5th each year until the household vacates the unit.

Signatures

Generally, all adult members of the household should sign the income certification before, or when, the household moves into the rental unit. However, there will be circumstances where obtaining the signatures is impractical. In these situations, the owner should document the reason for the delay in the tenant's file and secure the signature as soon as possible.

Example 1: Household Member is Serving in the Military

> Mary, with her two children, applies for an LIHC unit and completes a tenant income certification. She discloses and includes the income her husband earns for military service in the Marines. He is currently on active duty and stationed overseas. The owner determines that Mary's household is income qualified for low-income housing
>
> Mary signs the income certification two days before moving in. Because her husband is not available to sign the certification, the owner included documentation in the tenant file that he is in the military and stationed overseas. Mary's husband returns stateside five months later and signs the income certification as soon as he joins his family.
>
> The owner is in compliance. The household's income is properly accounted for and the file sufficiently documents the reason why the husband could not timely sign the income certification. In this case, the file will also indicate that the signature was obtains within a reasonable time after his return.

Tenant Moves to Another Low-Income Unit

A household may move to another unit within a low-income project.

In the Same Building

When a household moves to a different unit within the building, the newly occupied unit adopts the status of the vacated unit.[25] Thus, if a current household, whose income exceeds the applicable income limitation moves from an over-income unit to a vacant unit in the same building, the newly occupied unit is treated as an over-income unit. The vacated unit assumes the status the newly occupied unit had immediately before it was occupied by the current resident.

In a Different Building

As noted in Rev. Rul. 2004-82, Q&A #8, a similar rule applies when a household whose income is no greater than 140% of the income limit (or 170% for deep rent skewed projects) moves to a low-income unit in a different building within the project during any year of the 15-year credit period.[26] The vacated unit assumes the status the newly occupied unit had immediately before it was occupied by the current resident.

Example 1: Household is First Occupant of Low-Income Unit

> On May 31, 2004, of the first year of the credit period, an income qualified household moved into a new, never-occupied, low-income unit in Building A. On October 19, 2004, the household moved to a similar rent- restricted unit in Building B, which had never been occupied, and continued to occupy the unit until the end of the first credit year. The unit in Building A was not rented again until February 2005.
>
> Only the unit the household actually occupies qualifies as a low-income unit.
>
> - The unit in Building A would qualify for May, June, July, August and September. The unit would not qualify as a low-income unit in October, November, or December for purposes of computing the Applicable Fraction for the first year under IRC §42(f)(2). The unit will continue to be treated as a never occupied unit until a qualified household moves in.
> - The unit in Building B is a qualified low-income unit for October, November, and December.

[25] See Treas. Reg. 1.42-15(d).
[26] See IRC §42(g)(1) and IRC §142(d)(4)(B).

Income Certifications Where Owner Acquires or Rehabilitates Existing Building

Income Qualifying Households Before the Beginning of the 10-Year Credit Period

Under Rev. Proc. 2003-82, a unit occupied before the beginning of the credit period will be considered a low-income unit at the beginning of the credit period, even if the household's income exceeds the income limit at the beginning of the first year of the credit period, if two conditions related to income qualifications are met, and the unit must is rent restricted.[27]

For households occupying a unit at the time of acquisition[28] by the owner, the initial tenant income certification is completed within 120 days after the date of acquisition using the income limits in effect on the day of acquisition. The effective date of the tenant income certification is the date of acquisition since there is no move-in date.

In the event that the household occupies a unit at the time of acquisition, but the tenant income certification is completed more than 120 after the date of acquisition, the household is treated as a new move-in. Owners use the income limits in effect at the time of the tenant income certification and the effective date is the date the last adult member of the household signed the certification (this is an exception to the general rule for effective dates because there is no move-in date).

When the household moves into a unit after the building is acquired but before the beginning of the first year of the compliance period, the tenant income certification is completed using the income limits in effect at the time of the certification and the effective date is the date the household moves into the unit.

Testing for Purposes of the Next Available Unit Rule

For purposes of Rev. Proc. 2003-82, the incomes of the individuals occupying a unit occupied before the beginning to the first credit year are first tested for purposes of the Next Available Unit Rule under IRC §42(g)(2)(D)(ii) and Treas. Reg. 1.42-15 at the beginning of the first year of the building's credit period.[29]

1. The test must be completed within 120 days before the beginning of the first year of the credit period.

2. The "test" consists of confirming with the household that sources and amounts of anticipated income included on the tenant income certification are still current. If additional sources or amounts of income are identified, the tenant income certification will be updated based on the household's documentation. It is not necessary to complete third party verifications.

3. If the household is over-income based on current income limits, the Next Available Unit Rule is applied.

[27] Rev. Proc. 2003-82, 2003-2 C.B. 1097, provides a safe harbor under which, if certain conditions are met, a residential rental unit in an existing building acquired by a new owner or in rehabilitated building will be treated as a low-income unit even though the occupants' incomes exceed the income limit at the beginning of the building's 10-year credit period. In order to qualify, the household must have been income-qualified at the time the owner acquired the building or the date the household started occupying the unit, whichever is later. The owner must maintain documentation of the income qualification and the unit must be rent restricted. See chapter 10 for further discussion of the requirement for units to be rent-restricted.
[28] The date of acquisition is the date the building is acquired by purchase under IRC §179(d)(2).
[29] See chapter 14 for detailed discussion of the Next Available Unit Rule.

If the effective date of the initial tenant income certification is 120 days or less before the required "test", it is not necessary to "test" for purposes of the Next Available Unit Rule because the time period for completing the initial tenant income certification and the time period for completing the "test" is the same. The annual tenant income recertification will be completed each year on the anniversary of the original tenant income certification's effective date.

Example 1: The Effective Date of Initial Tenant Income Certification is 120 Days or Less Before the Test Date

An owner purchased an existing building on September 1, 2004 and anticipated beginning the credit period on January 1, 2005. Household A occupied a unit at the time of the purchase and was determined to be income qualified on September 22, 2004. Because the household was determined to be income-qualified within 120 days of January 1, 2005, it is not necessary to "test" for purposes of the Next Available Unit Rule.

If the effective date of the original tenant income certification is more than 120 days before the required "test," the household's income must be tested within 120 days before the beginning of the first year of the credit period.

Example 2: The Effective Date of Original Tenant Income Certification is More Than 120 Days Before the Beginning of the First Year of the Credit Period

An owner purchased an existing building on March 1, 2004 and anticipated beginning the credit period on January 1, 2005. Household A, an income qualified household, moved into a rent-restricted unit on April 1, 2004. Because the household was determined to be income-qualified more than 120 days before the beginning of the credit period on January 1, 2005, the household's income must be tested no earlier than 120 days before January 1, 2005 to determine whether the Next Applicable Unit Rule should be applied.

Income Qualifying Households During the First Year of the 10-Year Credit Period

Under IRC §42(f)(2), the applicable fraction for the first year of the credit period is computed based on a month-by-month accounting of units or floor space occupied by income-qualified households. In the case of buildings that were acquired and then rehabilitated, there are two separate allocations of credit documented on two Forms 8609; one for the acquisition credit and a separate allocation for the rehabilitation credit. However, the owner is not required to determine two applicable fractions. Under IRC §42(e)(4)(B), the applicable fraction for the substantial rehabilitation credit will be the same as the applicable fraction for the acquisition credit. Therefore, for purposes of computing the applicable fraction under IRC §42(f)(2), the following units are considered low-income units;

1. Units occupied before the beginning of the credit period, which are determined to be low-income unit at the beginning of the credit period under Rev. Proc. 2003-82.

2. Units initially occupied after the beginning of the credit period by newly certified income-qualified households (regardless of whether rehabilitation costs have been incurred for the unit).

3. Units occupied by income-qualified households that moved from other units within the project. The household's lease and tenant income certification (with effective date) move with the household. See the section above titled "Tenant Moves to Another Low-Income Unit" for complete discussion.

4. Vacant units that are suitable for occupancy under IRC §42(i)(3)(B)(ii) and were previously occupied by an income-qualified household, regardless of whether rehabilitation costs have been incurred for the unit during the first year of the credit period.

Units are *not* included in the numerator of computation of the applicable fraction if:

1. The unit is occupied by a nonqualified household;

2. The unit is vacant and was last occupied by a nonqualified household;

3. The unit is not suitable for occupancy under IRC §42(i)(3)(B)(ii). These units, including units being rehabilitated, are considered "out of compliance." The noncompliance is corrected when the unit is again suitable for occupancy. The unit's character will be determined based on the household that occupied the unit immediately preceding the rehabilitation during the first year of the credit period. See #4 on the list above.

Example 1: Units Rehabilitated During the First Year of the Credit Period

An owner acquired a building with 10 units and determined that 6 of the units (1-6) were occupied by nonqualifying households at the beginning of the first year of the credit period, on January 1, 2005. Four units (7-10) were occupied by income-qualified households. The nonqualifying households moved out and the owner rehabilitated the six vacant units. Five of the rehabilitated units (1-5) were rented to new households that moved into the units in August of 2005. The sixth rehabilitated unit (6) was rented in August to an existing tenant who transferred from unit 7, one of the four units qualifying on January 1, 2005

1. The owner may include units 1-5, the rehabilitated units occupied by new low-income tenants in the applicable fraction computation under IRC 42(f)(2) for August, September, October, November, and December of 2005

2. For the tenant who transferred between units within the building, the owner may include the unrehabilitated unit 7 that the tenant occupied from January through July in the computation of the applicable fractions for those months, but the unit is no longer a low-income unit when the household moves to the rehabilitated unit 6 in August; Unit 6 is a low-income unit for August through December.

Therefore, for purposes of computing the applicable fraction for August, 2005, there are three low-income units that have not been rehabilitated (units 8, 9, and 10) and six low-income units that have been rehabilitated (units 1-6). Unit 7 is not a low-income unit.

During September, unit 7 was rehabilitated and the tenant from unit 8 moved in; therefore, unit 8 is no longer a low-income unit. To expedite completion of the rehabilitation of the remaining units, the owner also temporarily located the households in 9 and 10 in off-site quarters (and paid all expenses) and started rehabilitation of units 8, 9, and 10. For purposes of determining the applicable fraction for September, units 1-7 are low-income units and units 8, 9, and 10 are out of compliance.

The owner completed the rehabilitation of the final three units (8, 9, and 10) in October and moved the two temporarily displaced households back into units 9 and 10 during October 2005. Unit 8 is a low-income unit because it was previously occupied by an income-qualified household. For purposes of computing the applicable fraction for October, units 1-10 are all low-income units.

The following chart summarized the status of each unit for each month during 2005.

Unit	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
1								LIHC	LIHC	LIHC	LIHC	LIHC
2								LIHC	LIHC	LIHC	LIHC	LIHC
3								LIHC	LIHC	LIHC	LIHC	LIHC
4								LIHC	LIHC	LIHC	LIHC	LIHC
5								LIHC	LIHC	LIHC	LIHC	LIHC
6								LIHC	LIHC	LIHC	LIHC	LIHC
7	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC		LIHC	LIHC	LIHC	LIHC
8	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC		LIHC	LIHC	LIHC
9	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC		LIHC	LIHC	LIHC
10	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC	LIHC		LIHC	LIHC	LIHC

Documentation Requirements

For a unit to be included as a low-income unit, documentation of the household’s initial eligibility must be on file with the owner. Under IRC §6001, every taxpayer is required to maintain records sufficiently detailed to prepare a proper tax return. This requires the maintenance of such permanent books and records sufficient to establish the amounts of gross income, deductions, *credits*, or other matters to be shown on the taxpayer’s return. This requirement extends to the preparation and maintenance of tenant files sufficiently documented to support household eligibility for purposes of claiming the low-income housing credit under IRC §42.

A tenant income certification and supporting documentation are not sufficient unless, at a minimum, the following documents are included:

1. Application/Income and Asset Questionnaire - A document completed by the household that the owner uses to gather information relevant to establishing all aspects of eligibility including, but not limited to, household composition, income, income from assets, and student status.

2. Verification of Income and Assets - All sources of income and assets must be verified to establish move-in eligibility.[30] Each tenant file must contain an annual statement of income, household composition, and student status.

   The preferred verification method is through third parties, and such verifications must be no older than 120 days before the effective date of the Tenant Income Certification. Where applicable, there should be further evidence to support the third party verifications; e.g., a copy of a divorce decree showing award of maintenance or child support, a realtor's statement of market value for a home, a self-employed tenant's tax return, etc. When third party verification has been attempted, but is not possible, documentation may be by check stubs, W-2's, bank statements, etc. Self-certification may be accepted if third party verification or other documentation cannot be obtained. Documentation of attempts to obtain verification, however, must be kept on file.

3. Student Status - Depending upon the student status of each household member, student verification may be required. (See chapter 17 for more information.)

4. Tenant Income Certification – Documents must be signed by all the adult members of a household prior to move-in and at the time of the annual recertification, and must state the anticipated annual gross income of the household.

Sufficient But Imperfect Documentation

If eligibility documentation is imperfect, yet sufficient for the monitoring agency to make a reasonable determination that a household is eligible, the owner should be advised of the imperfections and the need to implement procedures ensuring that similar imperfections do not occur in the future. Imperfections are not of a nature that would cause the unit to be considered out of compliance and will not result in reportable noncompliance.

Use of Standardized Forms

The compliance monitoring regulations under Treas. Reg. §1.42-5 establish the minimum monitoring requirements. State agencies can determine how documents are maintained and may mandate the use of standardized forms to document an owner's compliance with the requirements under Treas. Reg. §1.42-5.

[30] Rev. Proc. 94-65, 1994-2 C.B. 798, allows building managers to obtain a tenant's signed, sworn statement if the total combined cash value of household assets is less than $5,000. Some states have not implemented this procedure and will require third party verification. The states that allow this have an appropriate form.

In Compliance

In order to establish a unit as a qualified housing tax credit unit, the household's Gross Annual Household Income must be at or below the elected area median income (AMGI) limit or national nonmetropolitan median gross income (NNMGI) limit when applicable, adjusted for family size. Household income is calculated in a manner consistent with the determination of annual income under section 8 of the United States Housing Act of 1937. Therefore, the definitions of income of individuals and AMGI for purposes of IRC §42(g)(1) include items of income that are not included in a taxpayer's gross income for purposes of computing a federal tax liability.

Documentation of the household's initial eligibility must be on file with the owner. The initial tenant income certification must be completed and signed by all the tenants on or before the move-in date.

Example 1: Unrelated Parties Sharing an Apartment

> Sally and Jane are unrelated individuals who want to rent a two-bedroom apartment in an LIHC building. Sally and Jane's combined income does not exceed 60% of the AMGI for a two-individual family.
>
> In this case, Sally and Jane are qualified tenants for low-income credit housing. For purposes of computing the Gross Annual Household Income, the combined income of all the occupants of an apartment, whether or not legally related, is compared to the median family income for a household with the same number of members.

State agencies may determine that, even though the documentation at the time a certification was performed was insufficient, sufficient documentation was subsequently obtained by the owner *before* the state agency's notification of a compliance review, which allowed the monitoring agency to make a reasonable determination that the unit was in compliance. Such self-corrected documentation should not be reported to the IRS as noncompliance. The owner has demonstrated due diligence and reasonable attempts to maintain sufficient documentation of tenant eligibility.

Example 2: Failure to Obtain Third Party Verification

> An owner initially failed to verify or include documentation of court-ordered child support when the household moved in. The oversight was identified nine months later when the owner's management company conducted a quality review of the file. The management company immediately corrected the deficiency by obtaining a copy of the court order for the child support. When the amount of child support was added to the move-in income, the annual income did not exceed move-in eligibility. The unit is in compliance with IRC §42 requirements.

Example 3: Correction After Notification of Upcoming Compliance Review

> Unit A in an LIHC building went out of compliance on January 15, 2004, when a household with income exceeding the limit moved in. The owner was notified on March 15, 2004, that the state agency would be conducting a

tenant file review on May 1, 2004. The owner realized the problem while preparing for the review and paid the moving costs for the over-income household to move out immediately. A new income-qualified household moved into Unit A on April 13, 2004.

The state agency selected Unit A as part of the 20% sample and reviewed the new tenant's income certification. Because the effective date of this certification was after the date of the notification of the upcoming review, the state agency requested the file for the previous tenant and determined that Unit A was out of compliance from January 15 to April 13, 2004.

Example 4: Tenant Income Increases After Move In

John and Mary are newly married, in their early 20's, and have moved to a new city where John has accepted a job. The couple is income-qualified based on John's anticipated salary for the next 12 months. Three weeks after they move in, Mary starts working. If her wages are added to the tenant income certification, the couple's income exceeds the limit.

There is no noncompliance if the state agency determines that the owner used due diligence in accepting John and Mary as a qualified low-income household based on their initial tenant income certification. For example, the owner can demonstrate that due diligence was exercised by asking whether Mary intended to seek employment. However, the next available unit rule may apply. See chapter 14.

By itself, the fact that a tenant's actual income exceeds the anticipated income identified during the income certification is not a reportable noncompliance event (hindsight is always perfect). However, the state agency should consider expanding the sample size if multiple instances are identified. Collectively, multiple errors are indicative of poor internal control and increased risk of noncompliance.

The tenant income certification should be based on the best information available at the time of the certification. It represents the income the household anticipates it will receive in the 12-month period *following* the effective date of certification of income. If information is available on changes expected to occur during the year, that information should be used to most accurately determine the anticipated income from all known sources during the year. Owners should use due diligence by asking follow-up questions when the income certification process reveals unusual circumstances suggesting additional sources of income.

Out of Compliance

Units are considered out of compliance as of the date an ineligible household moves into a unit. A unit will also be considered out of compliance if the initial tenant income certification is inaccurate, documentation of initial eligibility is insufficient, or no initial tenant file is on record.[31]

31 A determination by the IRS (during an examination) that the taxpayer has not maintained adequate books and records may result in the issuance of an Inadequate Records Notice. The notice informs taxpayers that their recordkeeping practices are insufficient and must be improved to meet the requirements of the law. The issuance of an Inadequate Records Notice may result in a follow-up examination.

Example 1: Specific Source of Income Omitted

Annual Income was not properly calculated. The manager/owner did not include a source of income, such as a raise, overtime, or bonus. When reviewed, a correct calculation indicates that the household was not income eligible at move-in.

Example 2: Household Incorrectly Determined to be Eligible

The owner calculated annual household income correctly, but the household is over the appropriate income limit at move-in. For example, the owner may have used the income limit for the 40/60 minimum set-aside when the income limit for the 20/50 minimum set-aside income limit was required, or the wrong county AMGI, or the income limits used were not in effect as of the date of the tenant income certification.

Example 3: Unrelated Parties Sharing an Apartment

Tom and Jack are unrelated individuals who want to rent a two-bedroom apartment in an LIHC building. Tom and Jack individually have incomes that do not exceed 60% of AMGI for one individual. However, Tom's and Jack's combined income exceeds 60% of the AMGI for a two-individual family.

In this case, Tom and Jack do not qualify for LIHC housing. For purposes of computing the Gross Annual Household Income, the combined income of all the occupants of an apartment, whether or not legally related, is compared to the median family income for a household with the same number of members.

Example 4: No Initial Tenant Income Certification on File

A household moves into a unit that the owner wishes to include as an LIHC unit. However, the owner does not provide documentation of initial eligibility at the time the state agency reviews the tenant's file. The owner cannot substantiate that the unit qualifies for the LIHC.

Example 5: No Initial Tenant Income Certification on File for New Member of Household

An income qualified household moved into an LIHC unit. Six month later, an adult friend moved into the unit with the household, but no initial tenant income certification was completed for the additional member of the household.

Example 6: Initial Tenant Income Certification Performed After Move-In (Late Certification)

A household moved into a unit that the owner wanted to include as a low-income unit. However, the certification of income eligibility, including the third party verification, was not performed until after the household moved in.

Example 7: Insufficient Documentation of Initial Eligibility

A household moves into a unit that the owner wishes to include as a low-income unit. Income eligibility was not properly documented. The state agency could not reasonably determine that the household was income qualified. The following are possible documentation noncompliance issues:

a. Application/questionnaire is not sufficiently detailed to disclose all sources of income and/or assets,
b. Not all sources of income are verified,
c. Not all sources of assets are verified,
d. Verifications are insufficient,
e. Not all adult household members' income and/or assets are disclosed and included;
f. Tenant income certification form is not prepared, signed and/or dated; and
g. Other state-required forms designed to document compliance with IRC §42 are not in file.

Back in Compliance

Units are back in compliance when it is determined that an income-qualified household occupies the unit. Evidence of corrected noncompliance includes copies of certification paperwork such as the tenant's application, income and asset questionnaire, third party verifications, and tenant income certification.

Insufficient Documentation

In the event that income eligibility was not properly documented and the state agency cannot reasonably determine that the household is eligible, the noncompliance can be corrected in either of two ways:

1. A new certification can be performed using current income and asset sources and current income limits. Assuming the household is eligible, the unit would be out of compliance on the date of move in and back in compliance on the date the new certification signed (Form 8823 should be filed); or

2. A retroactive certification can be performed which completely and clearly documents the sources of income and assets that were in place at the time the *initial certification* should have been effective, and applies income limits that were in effect on that date. Assuming the owner can document that the household was income eligible at the time of move in, the unit should not be considered out of compliance. The owner has clarified the noncompliance; Form 8823 should not be filed.

Evidence of corrected noncompliance may include a copy of the full certification, including application, third party verifications, and/or the tenant income certification.

Income Ineligible Households

The household may be income certified as if it were a new move-in. If the household is eligible under the applicable move-in income limit in place on the date of the new certification, then the unit would be considered back in compliance.

Example 1: Ineligible Household Occupies LIHC Unit

> The household was over the appropriate income limit at move-in on June 1, 2002. The error was discovered during the state agency's review on April 3, 2003.
>
> The owner may treat the household as a new tenant and complete a new income certification using the income limits in effect on April 3, 2003. If the household is qualified, the noncompliance is corrected. The unit is out of compliance from June 1, 2002 until April 3, 2003. If, upon certification, the household is not income-eligible, the unit is considered back in compliance when a new income- qualified household moves into the unit. In either scenario, a Form 8823 noting the noncompliance must be filed.

Initial Tenant Income Certification is Late

If the initial certification is late, the unit is considered out of compliance as of the date the tenant moved into the LIHC unit and back in compliance on the date the completed income certification, indicating the household is income qualified, is signed by all the tenants.

Example 1: Initial Tenant Income Certification Performed After Move-In (Late Certification)

> A household moved into an LIHC unit on August 4, 2003. However, certification of eligibility, including the third party verification, was not completed until September 15, 2004. If the tenant income certification meets all the requirements, the unit is considered in compliance beginning on September 15, 2004.

Note: Noncompliance with the initial income certification requirements that is identified and corrected by the owner retroactive to move-in and *prior to notification* of the compliance review by the state agency need not be reported; i.e., the owner has demonstrated due diligence by addressing noncompliance issues independently. See chapter 3.

Revoking a Waiver of the Annual Income Recertification Requirement

If noncompliance with the tenant income certification requirements is sufficiently serious for a building with a waiver of the annual income recertification requirements, consideration should be given to revoking the waiver.[32] Revocation is not required, but the Service will revoke the waiver at the state agency's request.

Instructions for requesting the revocation of a annual income recertification waiver are included with the instructions for completing Form 8877, Request for Waiver of Annual Income Recertification Requirement for the Low-Income Housing Credit.

[32] See Rev. Proc. 2004-38, which supersedes Rev. Proc. 94-64.

Chapter 5
Category 11b
Owner Failed to Correctly Complete or Document Tenant's Annual Income Recertification

Definition

Owners are required to recertify each low-income household at least annually. The recertification process is identical to the initial certification in terms of documenting household composition, income, and income from assets. State agencies are required to review the tenant income recertifications and the supporting documentation for the tenants in the units.[1] Therefore, the state agency should be reviewing the most recent income recertification.

Noncompliance Corrected by Owner Prior to Notification of State Agency's Compliance Review

Noncompliance with the annual income recertification requirements that is identified and corrected by the owner *prior to notification* of the compliance review by the state agency need not be reported; i.e., the owner has demonstrated due diligence by addressing noncompliance issues independently. See chapter 3.

Example 1: Noncompliance Corrected Before Notification of Compliance Review

> On January 15, 2004, the owner of a LIHC building incorrectly completed a household's income recertification. The owner identified the problem and corrected the documentation deficiency on March 30, 2004. The owner was notified on April 20, 2004, that the state agency would be conducting a tenant file review on May 1, 2004.
>
> The state agency selected Unit A as part of the 20% sample and reviewed the household's income certification and noted the corrections. Because the owner corrected the noncompliance before the April 20, 2004 notification date, the owner is in compliance.

100% LIHC Building

If the building is 100 percent LIHC housing and the owner has received a waiver of the annual income recertification requirement under either Rev. Proc. 94-64 or 2004-38, this chapter is not applicable; i.e., the owner is no longer required to complete annual tenant recertifications. State agencies must, however, review the initial tenant income certifications and report any noncompliance under the appropriate category on Form 8823.

Mixed-Use Buildings

Note: For buildings with both LIHC units and market rate units, the state agencies must also determine whether the owner appropriately applied the Available Unit Rule when a household's income exceeds 140 percent of the income limit at the time of recertification. See chapter 14.

In Compliance

Owners are in compliance if the recertification is completed within 120 days before the anniversary of the effective date of the original tenant income certification.

[1] See Treas. Reg. 1.42-5(c)(2)(ii)(B).

Household Vacates Unit

If an owner has sent a timely notice informing the household that the annual recertification is due, but the household does not provide the certification and supporting documentation prior to vacating the unit, the vacated unit will not be considered out of compliance with the recertification requirements. Owners should document attempts to obtain the recertification and the date the tenant actually moved out.

Example 1: Household Gives Notice of Departure Before Recertification is Due

> The owner provided timely notice to a household (on July 15th, 2004) that the annual income recertification was due on October 1, 2004. The household informed the owner on September 13, 2004 that they would be vacating the unit on October 15, 2004.
>
> Since the household gave notice in advance and will not occupy the unit in the coming year, there is no reason to complete the income recertification and the unit remains in compliance. Should the household later decide to stay in the unit, a late recertification must be completed.

Owner Takes Action to Remove Noncompliant Household

If the owner initiates an eviction proceeding and the household vacates the unit, no recertification is necessary. If, for any reason, it is determined that the household will not vacate the unit as anticipated, a recertification will be necessary within 120 days of the determination.

Example 1: Court Failed to Sustain Request for Eviction

> Income recertification was due on July 1, 2004. The owner initiated the recertification process on April 15, 2004, and documented attempts to obtain recertification information. The household did not complete the recertification and the owner initiated eviction proceedings on July 29, 2004. The court did not sustain the owner's filing for eviction on September 15, 2004. The owner must secure the tenant income recertification.

Households Determined to be Over the Income Limit at Recertification

In the event that a household's income exceeds the income limit at the time of recertification, state agencies must determine whether the household was income qualified at the time of move in. The initial tenant income certification should be reviewed.

Example 1: Household Qualified at Move In

> An income qualified household moved into a rent restricted unit on June 23, 1997 and timely completed their tenant income recertifications each year. In 2005, for the first time, the recertification indicates that that same household's income exceeds the income limit.
>
> The state agency must review the initial tenant income certification. If the household qualified at move in, no further action is necessary and the unit is in compliance with the annual income recertification requirements. If the household's income is 140% or more of the income limit, compliance with the Available Unit Rule must also be evaluated. See chapter 14.

If the state agency identifies an issue of noncompliance on the initial tenant income certification, the state agency must review the intervening tenant income recertifications to determine whether the noncompliance was corrected at some intervening point.

Out of Compliance

A unit will be considered out of compliance if the annual recertification was not performed, or the annual recertification was performed late *and after notification* of a state agency compliance review.

Example 1: Annual Recertification Was Not Performed

Household was initially qualified and properly certified at move-in. However, it has been more than 12 months from the previous recertification and there is no recertification on file. This unit is out of compliance as of the date the recertification is due.

Example 2: Insufficient Documentation of Eligibility at Recertification

Household was initially qualified and properly certified at move-in; however, recertification was not properly documented and the state agency cannot reasonably determine the household's continuing eligibility. The following are possible documentation noncompliance issues:

a. Application/questionnaire is not sufficiently detailed to disclose all sources of income and/or assets;
b. Not all sources of income are verified;
c. Not all sources of assets are verified;
d. Verifications are insufficient;
e. Not all adult household members' incomes and/or assets are disclosed and/or included;
f. Tenant income certification form is not prepared, signed and/or dated; and
g. Other state-required forms designed to document compliance with IRC §42 are not in file.

Back in Compliance

Owners may use the following methods to self-correct noncompliance. Evidence of corrected noncompliance may include a copy of the full recertification, including application, verifications, and/or tenant income recertification. Owners must submit copies of the documents required by the monitoring agency.

1. A recertification can be performed using current income and asset sources and current income limits. If there is no resulting noncompliance (e.g., violation of the Available Unit Rule), the unit would be out of compliance on the date the recertification was due and back in compliance on the date the tenant signs the recertification.

2. A retroactive recertification can be performed which completely and clearly documents the sources of income and assets *that were in place at the time the recertification should have been completed* and applies income limits that were in effect on that date. If there is no resulting noncompliance (e.g., violation of the Available Unit Rule), the unit would be out of compliance on the date the recertification was due, and back in

compliance on the date the tenant signs the recertification.

While the recertification has been performed retroactively, the recertification documents should be dated with the current date. All the adult members of the household should sign the recertification using the current date. In other words, the recertification documents should not be backdated.

The advantage of the retroactive recertification is that the owner may avoid violating the Available Unit Rule.

In either case, the effective date for recertification continues to be the anniversary of the actual date of move in.

Example 1: New Recertification is Performed After Notification

An owner failed to complete a tenant's annual income recertification, which was due February 10, 2004. The mistake was identified during a state agency compliance review conducted November 1, 2004. The management company completed the recertification on November 12, 2004 using the income limits available on that date. The recertification was completed based on the tenant's anticipated future income for the period November 12, 2004 through November 12, 2005.

The unit is out of compliance from February 10^{th} to November 12^{th}, 2004. The next annual income recertification is due on February 10, 2005. Since the noncompliance was corrected after notification of a state agency review, the noncompliance must be reported on Form 8823.

Example 2: Household Determined to be Over-Income

An owner failed to complete a tenant's annual income recertification, which was due February 10, 2004. The mistake was identified during a state agency compliance review conducted November 1, 2004. The management company completed the recertification on November 12, 2004 using the income limits available on that date. The recertification was completed based on the tenant's anticipated future income for the period November 12, 2004 through November 12, 2005. The household's income was determined to be more than 140% of the income limit.

Since the recertification was corrected after notification of a state agency review, the noncompliance must be reported on Form 8823. The unit is out of compliance with the recertification requirements from February 10^{th} to November 12^{th}, 2004. The next annual income recertification is due on February 10, 2005. Further, the Available Unit Rule may have been violated if any unit was rented to a nonqualified household after February10, 2004.

Chapter 6
Category 11c
Violation(s) of the UPCS or Local Inspection Standards

Definition

This category is used to report noncompliance when rental units, building exteriors and systems, common areas, and the property site in a project are not suitable for occupancy. State agencies should assess whether low-income housing tax credit properties are in safe, decent, sanitary condition and in good repair, according to either the Uniform Physical Conditions Standards[1] (UPCS) established by HUD[2], or local inspection standards. The standards to be used should be identified in the Qualified Allocation Plan[3] (QAP).

1. State agencies are not required to use the REAC protocol in using the UPCS.

2. State agencies cannot combine selected portions of the UPCS with portions of local standards; only one inspection standard can be selected and used.

Identifying Noncompliance

Certification Reviews

Noncompliance may be identified when the agency reviews an owner's annual certification that the buildings and units in an LIHC project were suitable for occupancy. (See Treas. Reg. §1.42-5(c)(1)(vi).) The owner must also certify that state or local authorities responsible for making inspections did not issue a violation report for any building or low-income unit in the project. If a violation notice or report was issued, the owner must attach a statement summarizing the violation report/notice (or a copy) to the annual certification submitted to the state agency. The owner must also state whether the violation was corrected.

Physical Inspections

State agencies must inspect LIHC properties to ensure that LIHC buildings and units are suitable for occupancy.[4] Under Treas. Reg. §1.42-5(C)(2)(ii)(B), on-site inspections must be made at least once every three years.

HUD's Uniform Physical Condition Standards (UPCS)

The UPCS requires housing to be decent, safe, sanitary and in good repair. The major areas of consideration include:

1. Site: The site components such as fencing and retaining walls, grounds, lighting, mailboxes/project signs, parking lots and driveways, play areas and equipment, refuse disposal equipment, roads, storm drainage, and walkways must be free of health and safety hazards and in good repair. The site must not be subject to material adverse conditions, such as abandoned vehicles, dangerous walks or steps, poor drainage, septic tank back-ups, sewer hazards, excess accumulations

[1] The Uniform Physical Conditions are available at www.gpoaccess.gov. On the main page, select the "Code of Federal Regulations" option and then enter "24CFR5.703" into the search feature using the quotes ("…").
[2] Department of Housing and Urban Development
[3] See IRC §42(m)(1)(B)(iii).
[4] See Treas. Reg. §1.42-5(d)(2)

of trash, vermin or rodent infestation, or fire hazards.

2. Building Exterior: Each building on the site must be structurally sound, secure, habitable, and in good repair. Each building's door, fire escapes, foundations, lighting, roofs, walls, and windows must be free of health and safety hazards, operable, and in good repair.

3. Building Systems: Each building's domestic water, electrical systems, elevators, emergency power, fire protection, HVAC, and sanitary system must be free from health and safety hazards, functionally adequate, operable and in good repair.

4. Dwelling Units: Each dwelling unit within a building must be structurally sound, habitable, and in good repair. The dwelling unit must be free from health and safety hazards, functionally adequate, operable and in good repair. This includes all areas and aspects of the dwelling unit; i.e., bathroom, call-for-aid (if applicable), ceiling, doors, electrical systems, floors, hot water heater, HVAC, kitchen, lighting, outlets/switches, patio/porch/balcony, smoke detectors, stairs, walls and windows.

   Where applicable, the unit must have hot and cold running water, including an adequate source of drinkable water. (Note: single room occupancy units need not contain water facilities.) If the unit includes its own sanitary facility, it must be in operating condition, usable in privacy and adequate for personal hygiene and the disposal of human waste. The unit must include at least one battery-operated or hard-wired smoke detector in proper working condition on each level of the unit.

5. Common Areas: The common areas must be structurally sound, secure, and functionally adequate for the purposes intended. The basement/garage/carport, restrooms, closets, utility, mechanical, community rooms, day care, halls and corridors, stairs, kitchens, laundry rooms, office, porch, patio, balcony and trash collection areas, if applicable, must be free from health and safety hazards, operable, and in good repair. All common area ceilings, doors, floors, HVAC, lighting, outlets/switches, smoke detectors, stairs, walls, and windows must be free of health and safety hazards, operable, and in good repair.

6. Health and Safety Concerns: All areas and components of the housing must be free of health and safety hazards. These areas include, but are not limited to, air quality, electrical hazards, elevators, emergency/fire exits, flammable materials, garbage and debris, handrail hazards, infestation and lead based paint.

   For example, buildings must have fire exits that are not blocked and have hand rails that are not damaged, loose, missing portions, or otherwise unusable. The housing must have no evidence of infestation by rats, mice, or other vermin. The housing must have no evidence of electrical hazards, natural hazards, or fire hazards. The dwelling units and common areas must have proper ventilation and be free of mold as well as odor (e.g., propane, natural, sewer or methane gas) or other observable deficiencies. The housing must comply with all requirements related to the evaluation and reduction of lead-based paint hazards and have available proper certifications of such.[5]

[5] As defined in Subpart J of 24 CFR part 35.

Local Standards

Although there is considerable variability among local codes, inspection of the LIHC property using local codes should entail an inspection of the project site, building exteriors, building systems, common areas, dwelling units, and health and safety concerns.

Differences between Local Codes and the Uniform Physical Condition Standards (UPCS)

The UPCS do not supersede or preempt[6] local health, safety and building codes; i.e., a low-income housing project under IRC §42 must satisfy the local standards and the state agency must report known violations to the IRS. However, if the state agency uses the UPCS to conduct inspections and determines that they are met, the state agency is not required to determine *by inspection* whether the project meets local standards.

There will be situations when using the UPCS for the state agency's inspection standard may result in a conflict with the local standards. For example, the local code may require bars on windows to prevent children from falling out whereas the bars may be viewed under the uniform physical condition standards as blocking access/exists in case of emergencies. The conflict should be brought to the attention of the state agency by a governmental entity or individual such as a fire marshal's office or municipal building inspector who must provide a written submission explaining the nature of the conflict. When conflicts are presented in this manner, the local code will be evaluated by the state agency in determining whether the project or unit is in compliance.

In Compliance

A building is in compliance if, during an inspection of the building, it meets the requirements of the UPCS or local code. Exhibit 6-1 is a sample checksheet that may be useful (it is not required) in helping document physical inspections of LIHC properties. Owners should be notified of the state agency's findings. Exhibit 6-2 is a sample letter that may be used.

Out of Compliance

An LIHC unit, building and/or entire project is out of compliance if:

1. The owner discloses violations of local standards or incorrectly certifies that the buildings and units in an LIHC project were suitable for occupancy, taking into account local standards (or other habitability standards). See Treas. Reg. §1.42-5(c)(1)(vi).

2. During a physical inspection by the state agency, the property had elements that failed to meet the requirements.

3. Otherwise fails to comply with the requirements of the UPCS or local codes at any time.

[6] In other words, the UPCS do not replace or preempt local health, safety, and building codes.

To ensure consistent evaluation of the property's physical condition, the definitions of physical deficiencies used for the Real Estate Assessment Center System (REAC) by the Department of Housing and Urban Development (HUD) will be used to determine whether noncompliance has occurred. The dictionary is divided into six sections:

1. Site Inspection
2. Building Exterior Inspectable Items
3. Building Systems Inspectable Items
4. Common Areas Inspectable Items
5. Unit Inspectable Items
6. Health and Safety Inspectable Items

Each section identifies specific components, which are then defined in ascending levels of severity (level 1, level 2 or level 3), and a fourth category is health and safety hazards and fire safety hazards. All levels of deficiencies must be reported. State agencies using local codes as their inspection standard may find the UPCS levels of violation helpful in categorizing reported violations. The Dictionary of Deficiency Definitions is available at HUD's website: www.hud.gov/offices/reac/products/pass/pass_def.cfm.

Level 1 Violations of UPCS

Examples of Level 1 violations include:

1. At least one screen door or storm door is damaged or is missing screens or glass. The noncompliance would be evidenced by an empty frame or frames.

2. The roofs of a project where up to one square (100 square feet) of surface material or shingles is missing from roof areas.

3. In one room in a dwelling unit, a permanent lighting fixture is missing or not functioning, and no other switched light source is functioning in the room.

Level 2 Violations of UPCS

Examples of Level 2 violations include:

1. Evidence of water stain, mold, or mildew, such as darkened areas, over a small area of floor (1-4 square feet). Water may or may not be visible. The affected area is estimated to be less than 10% of the floors.

2. In two rooms in a dwelling unit, a permanent lighting fixture is missing or not functioning, and no other switched light source is functioning in the rooms.

Level 3 Violations of UPCS

Example of Level 3 violations include:

1. A common area where a large portion of one or more floors –more than 4 square feet- has been substantially saturated or damaged by water, mold, or mildew. Cracks mold, and flaking are visible and the floor surface may have failed.

2. A sink or other related hardware in a kitchen may be missing, which creates unsanitary living conditions.

3. A permanent light fixture in more than two rooms is missing or not functioning, and no other switched light sources are functioning in the rooms.

Health and Safety Violations and Fire Hazard Violations of UPCS

Health and safety violations can be divided into non-life threatening and exigent, life threatening conditions.

Non-life threatening events include items such as pavement and walkway problems that create the potential for tripping and falling; missing or non-functioning sinks and bathroom components in individual units that impair human sanitation; missing exterior doors; and floor covering damage.

Exigent health and safety and fire hazards require immediate attention because of their life-threatening potential. Exigent health and safety violations include exposed electrical wires or water leaks on or near electrical equipment; propane /natural gas/methane gas detected; emergency/fire exits that are blocked; unusable fire escapes; gas or oil fired hot water heaters with missing or misaligned chimneys that pose carbon monoxide hazards. Fire safety hazards include missing or inoperative smoke detectors; fir extinguishers expired or window security bars preventing egress from a building.

Casualty Losses

A casualty loss is defined as the damage, destruction, or loss of property resulting from an identifiable event that is sudden, unexpected, or unusual. A sudden event is one that is swift, not gradual or progressive. An unexpected event is one that is ordinarily unanticipated and unintended. An unusual event is one that is not a day-to-day occurrence and that is not typical for low income housing credit properties. Casualty losses may result from a number of different sources: e.g., car accidents, fires, government-ordered demolitions, hurricanes, mine cave-ins, sonic booms, storms, tornadoes, vandalism, etc. Property damage is not considered a casualty loss if the damage occurred during normal use, the owner willfully caused the damage or was willfully negligent, or was progressive deterioration such as damage caused by termites.

Physical damage to LIHC properties caused by casualty events and which render LIHC residential rental units or buildings, or common areas associated with the property, unsuitable for occupancy is reported as noncompliance with the UPCS or local standards.

Date of Noncompliance

The reportable “out of compliance” date is the date the property failed to meet the inspection standard, if known; otherwise, at the earliest documented date that the standard was not met.

Example 1: Factual Determination

> The state agency determined that some vacant LIHC residential units were not suitable for occupancy for new tenants when they conducted a physical inspection of the property. The owner explained that because of the high vacancy rate, there were a sufficient number of empty units suitable for occupancy. All vacant LIHC units that are not suitable for occupancy are out of compliance. The out of compliance date is a factual determination reflecting the earliest date that any of the noncompliant units was vacated.

Example 2: Noncompliance Date Identified by Inspection

> The state agency inspected the property site and determined that a dilapidated wooden fence on the exterior of the property represented a UPCS violation because it was about to fall down and nails were protruding out of the boards. The date of noncompliance is the date of the inspection.

Example 3: Noncompliance Date Identified by Documentation

> HUD performed an inspection and determined that there were significant safety hazards on an LIHC property site. The owner was notified, but when HUD revisited the property six months later, the hazards had not been corrected. HUD provided the state agency with a copy of their report. The state agency conducted an inspection and confirmed HUD's information. The date of noncompliance is the date of HUD's initial inspection.

Notice to Owner

The state agency is required to provide prompt *written* notice to the *owner* of a low-income housing project if the state agency discovers that the project is not in compliance with the state agency's inspection standard, or the annual certification is inaccurate. Notification letters establish and document the beginning of the correction period for any "out of compliance" issues. See Exhibit 6-3.

When state agencies determine that the violations involve life-threatening problems, a critical notification letter requiring immediate corrective action should be sent to the owner. *To ensure prompt correction of exigent, life threatening health and safety deficiencies*, the project representative should be provided a list of every observed life threatening violation and fire safety hazard that needs immediate attention or remedy, before the inspector leaves the project site. See Exhibit 6-4. To document receipt, the project representative should sign the state agency's copy of the list of deficiencies.

Back in Compliance

Property is back in compliance when noted violations are corrected. The correction date is the date of the repair, the date of the inspection at which the repair was observed, or the date of the certification that the repair had occurred; whichever evidenced the correction to the agency's satisfaction.

Acceptable evidence of the corrected violations includes items such as a certification from an appropriate licensed professional that the item now complies with the inspection standard, or other documentation demonstrating that the violation has been corrected. Alternatively, the state agency may determine that the owner is back in compliance by visual inspection.

Reporting Noncompliance

Under Treas. Reg. §1.42-5(a), state agencies are required to report any noncompliance of which the agency becomes aware.[7] State agencies must file Form 8823 no later than 45 days after the end of the correction period (including permissible extensions), whether or not the identified noncompliance is corrected. See Chapter 2.

Example 1: Extenuating Circumstances

> A state agency conducted a physical inspection of an LIHC building on October 3, 2004. When inspecting the laundry room located in the basement, the state agency noted that water pipes to three of the six washing machines had frozen and burst during a recent snow storm. The correction period started on October 6, 2004, the date on which the notice of noncompliance was sent to the owner. The correction period ends 90 days later on January 5, 2005.
>
> The damage was extensive and could not be repaired immediately because the ground was frozen, so the owner requested an extension of time. The state granted the maximum extension of an additional 90 days (180 days total), so that the correction period ended April 5, 2005. At that time, the ground was still frozen and the repair had not been completed.
>
> The state agency must file form 8823 within 45 days of the end of the correction period, or May 17, 2005, noting the noncompliance. A second Form 8823 should be filed when the noncompliance is corrected.

Submitting Documentation to the IRS

Documenting noncompliance with the physical inspection standards with sufficient detail to support IRS audit adjustments is particularly important because, at the time of a subsequent IRS audit, there may be no visible indication that the noncompliance ever occurred. Narratives describing the cause, nature and extent of the violations are helpful and should also clarify if the issue is a unit, common area, building exterior or system, or site problem.

Copies of reports summarizing unit-by-unit noncompliance originally given to the owner and electronic pictures are adequate when documenting noncompliance even though the violations may have been corrected after the filing of the report of noncompliance. Note: do not include photocopies of photographs; they are not useful.

Dear Owner:

On __[date]__, a physical inspection of the project listed above was conducted.

The review included a walk-through of the building, common areas, mechanical rooms, and grounds, as well as 20% of the qualified units. This review considered whether the building and its units were suitable for occupancy, taking into account ___[local health, building and safety codes] or [the Uniform Physical Condition Standards as specified in Treas. Reg. § 1.42-5(d)].

The buildings and units inspected were all found to be in good condition. Based on this finding, no response is necessary.

Thank you for the cooperation and courtesies extended by members of your staff.

Please call me at __[telephone number]__ if you have any questions. Or you may reach me by e-mail at __[e-mail address]__. Thank you for your commitment to providing quality affordable housing in the state of _[state]__.

Sincerely,

Chapter 7
Category 11d
Owner Failed to Provide Annual Certifications or Provided Incomplete or Inaccurate Certification

Definition

This category is used to report owners of low-income housing properties who fail to submit annual certifications, or any other required reports and documentation, to the state agency as described in Treas. Reg. §1.42-5(c). Monitoring procedures require certifications (and state agency reviews of the certifications) at least annually for each year of the 15-year compliance period. Monitoring procedures may require certifications (and state agency reviews) more frequently than annually, provided that all months within each 12-month period are subject to certification.

Owners are responsible for reporting to the state agency annually that their projects were in compliance with IRC §42 for the preceding 12-month period. They must report in the form and manner the state agency specifies and must certify, under the penalty of perjury, that the information provided is true, accurate, and in compliance with the requirements of IRC §42. The owner must certify that:

1. The project met the requirements of the minimum set-aside test applicable to the project; i.e., the 20-50 test, the 40-60 test, or the 25-60 test for New York City.[1] See chapter 10.

2. If applicable, the 15-40 test under IRC §§42(g)(4) and 142(d)(4)(B) for deep rent skewed projects was met.

3. There has been no change in the applicable fraction (as defined in IRC §42(c)(1)(B)) of any building in the project, or that there was a change and a description of the change is included with the certification.

4. The owner has an annual income certification from each low-income tenant (Tenant Income Certification) and documentation to support that certification at initial occupancy and subsequent years during the compliance period. Tenants receiving Section 8 housing assistance payments may satisfy the documentation requirement by submitting a statement provided by a public housing authority (see Treas. Reg. §1.42-5(b)(1)(vii)). For an exception to this requirement, see IRC 42(g)(8)(B) and Rev. Proc. 94-64[2], or Rev. Proc. 2004-38[3], which provide rules for 100 percent low-income buildings when the owner has received a waiver from the annual recertification requirements.

5. Each low-income unit in the project was rent restricted.

6. All units in the project were for use by the general public[4], including the requirement that no finding of discrimination under the Fair Housing Act, 42

[1] See IRC §§42(g)(1)(A) and (B), 42(g)(4), 42(g)(4) and 142(d)(6).
[2] Rev. Proc. 94-64, 1994-2 C.B. 797.
[3] Rev. Proc. 2004-38, 2004-2 C.B. 10.
[4] As defined in Treas. Reg. §1.42-9.

U.S.C. 3601-3619, has occurred for the project. A finding of discrimination includes an adverse final decision by the Secretary of the Department of Housing and Urban Development, 24 CFR 180.680, an adverse final decision by a substantially equivalent state or local fair housing agency, 42 U.S.C. 3616a(a)(1), or an adverse judgment from a federal court.

7. The buildings and low-income units in the project were suitable for occupancy, taking into account local health, safety and building codes (or other habitation standards), and the state or local government unit responsible for making local health, safety, or building code inspections did not issue a violation report for any building or low-income unit in the project. If a violation report or notice was issued by the governmental unit, the owner must attach a statement *summarizing* the violation report or notice or attach a *copy* of the violation notice or notice to the annual certification submitted to the state agency. In addition, the owner must state whether the violation has been corrected.

8. There has been no change in the eligible basis (as defined in IRC §42(d)) of any building in the project (determined at the end of the first credit year), or if there was a change, the nature of the change (e.g., a common area has become commercial space, or a fee is now charged for a tenant facility formerly provided without charge).

9. All tenant facilities included in the eligible basis of any building in the project (such as swimming pools, other recreational facilities, or parking areas, etc.) were provided on a comparable basis without charge to all tenants in the buildings.

10. If a low-income unit in the project became vacant during the year, reasonable attempts[5] were or are being made to rent that unit (or the next available unit of comparable or smaller size) to tenants having a qualifying income before any units in the project were or will be rented to tenants not having a qualifying income.

11. If the income of tenants of a low-income building in the project increased above 140% of the applicable income limit (or 170% for deep rent skewed projects), the next available unit of comparable or smaller size in the building was or will be rented to tenants having a qualifying income. See IRC §42(g)(2)(D)(ii), Treas. Reg. §1.42-15, and chapter 14 for guidance on the available unit rule.

12. An extended low-income housing commitment is in effect including the requirement[6] that an owner cannot refuse to lease a unit in the project to an applicant because the applicant holds a voucher or certificate of eligibility under Section 8 of the United States Housing Act of 1937. This requirement is not applicable to buildings receiving allocations before 1990 or bond-financed buildings placed in service before 1990.

[5] See Rev. Rul. 2004-82, 2004-2 C.B. 350, Q&A #9.
[6] See IRC §42(h)(6)(B)(iv), effective August 10, 1993.

13. All low-income units in the project were used on a non-transient basis, except for transitional housing for the homeless[7] or single-room occupancy units rented on a month-by-month basis[8].

The state agency may also require additional reporting items. However, unless noncompliance with these reporting requirements constitutes noncompliance with IRC §42, noncompliance with these state agency reporting requirements should not be reported to the IRS.

In Compliance

Owners are in compliance, for federal tax purposes, when annual certifications have been submitted timely[9], accurately, and completely.

Disclosure of Noncompliance

If the owner's certification discloses noncompliance with the requirements under IRC §42, the noncompliance must be reported to the IRS using Form 8823 and identifying the appropriate category of noncompliance.

Example 1: Owner Discloses Decrease in Eligible Basis

> The owner of an LIHC building correctly submitted the annual certification and reported that the swimming pool had been closed and would no longer be available for use by the tenants. The owner is in compliance with the annual certification requirements, but the reduction in eligible basis should be reported to the IRS on Form 8823, line 11e, Changes in Eligible Basis or the Applicable Percentage.

Example 2: Compliance With Extended Use Agreement Requirements

> As documented in the extended use agreement, the owner of an LIHC building agreed to dedicate 25 percent of the units in a 100 unit building to households with incomes less the 30 percent of the Area Median Gross Income. For purposes of IRC §42, the owner elected the 40/60 minimum set-aside on Form 8609. On the 2006 annual certification, the owner noted that the minimum set-aside had been met, but that only 20 of the units were occupied by households with incomes less than 30% of AMGI.
>
> The nonperformance of the terms of the extended use agreement should not be reported to the IRS.

---

[7] See IRC 42(i)(3)(B)(iii).
[8] See IRC §42(i)(3)(B)(iv).
[9] The state agencies should establish timeframes for submission of annual certifications.

Documentation Requirements

State agencies may require the use of standardized forms or submission of additional documentation to ensure compliance with the certification requirements. The state agencies may establish administrative policies and procedures such as requiring the original signature of the managing general partner or allowing facsimiles, the manner in which certifications are perfected if errors are identified, submission of additional information to clarify issues, etc.

Example 1: Change in Eligible Basis

> To help evaluate the owner's compliance with the eligible basis certification, the state agency requires owners to provide information on any modification to the building that may result in changes to eligible basis. The owner failed to provide the information.
>
> The state agency should report the owner's failure to provide a complete annual certification. The owner has not certified to the state agency's satisfaction that there has been non change in the eligible basis under IRC §42(d) of any building in the project as required under Treas. Reg. 1.42-5(c)(1)(vii).

Out of Compliance

If the owner fails to certify as required under Treas. Reg. §1.42-5(c)(1), submits inaccurate or incomplete certifications, or the certifications and documentation discloses noncompliance with the requirements under IRC §42, the state agency must report the owner using Form 8823. Similarly, an owner must be reported if the state agency does not receive or is not permitted to inspect the tenant income certifications, supporting documentation, and rent records described in Treas. Reg. §1.42-5(c)(2)(ii), or if the state agency learns that the project is not in compliance with the provisions of IRC §42.

To the extent that inadequate documentation from the owner prevents a state agency from determining whether a project is in compliance with IRC §42, the state agency can treat the project as out of compliance.

Out of Compliance Date

If an owner fails to complete or submit any of the certification items listed above, the date each building ceased to comply would be the first day of the reporting year for which such information was due. For example, if an owner does not submit the annual certification package for the 2006 calendar year, the first day of the reporting year date of noncompliance is January 1, 2006.

Back In Compliance

The owner is considered back in compliance when a perfected annual certification (and any other required documentation) is received by the state agency. Corrections may include submission of the required documentation or answering all the questions.

Chapter 8
Category 11e
Changes in Eligible Basis

Definition

This category is used to report violations associated with the Eligible Basis of a building or any occurrence that result in a decrease in the Applicable Percentage of a building, which is discussed in chapter 9. This chapter addresses noncompliance affecting the Eligible Basis.

The low-income housing credit amount is based on certain costs associated with a building *(eligible basis)* and the portion of the building (*applicable fraction)* that low-income households occupy. The cost of acquiring and rehabilitating, or constructing a building constitutes the building's *Eligible* Basis. The portion of the Eligible Basis attributable to low-income units is the building's *Qualified Basis*. The Qualified Basis is multiplied by a factor (*Applicable Percentage)* so that the credit is limited to 70 percent or 30 percent of the Qualified Basis.[1] In summary, the annual credit is:

Eligible Basis x Applicable Fraction = Qualified Basis

Qualified Basis x Applicable Percentage = Annual Credit

Generally, under IRC §42(f)(1), the annual credit can be claimed for 10 taxable years, beginning with the taxable year in which the building is placed in service; or, at the election of the taxpayer, the succeeding year[2]. Under IRC §42(f)(2)(A), there is a special rule for the first year of the credit period. Any reduction in the credit allowable for the first year of the credit period by reason of the rule is allowable for the first taxable year following the credit period. (See IRC §42(f)(2)(B).) In addition, under IRC §42(f)(3), if the qualified basis as of any taxable year in the 15-year compliance period (after the first year) exceeds the qualified basis as of the close of the first year of the credit period, then the applicable percentage applied to the excess Qualified Basis is two-thirds of the Applicable Percentage that would otherwise apply.

A cost incurred in the construction of a low-income housing building is includable in Eligible Basis under IRC §42(d)(1) if the cost is:

1. Included in the adjusted basis of depreciable property subject to IRC §168 and the property qualifies as residential rental property under IRC §103, or

2. Included in the adjusted basis of depreciable property subject to IRC §168 that is used in a common area or provided as a comparable amenity to all residential rental units in the building, or

3. Included in the adjusted basis of depreciable property under IRC §168 (other than 1 or 2 above) that is used throughout the tax year in providing any community service facility, as described in IRC §42(d)(4)(C)(iii).

---

[1] IRC §42(b)(2)(B).
[2] IRC §42(f)(1)(B).

Eligible Basis may include the cost of facilities for use by tenants to the extent there is no separate fee for using the facilities and the facilities are available on a comparative basis to all tenants. It may also include the cost of amenities if the amenities are comparable to the cost of amenities in other units.

Example 1: Laundry Room and Coin Operated Washers and Dryers

> An owner included the cost of a building housing a laundry facility in the eligible basis. For security reasons, the room kept locked, but every household has a key and has access at any time. The owner installed coin operated washers and dryers.
>
> The owner should include the cost of the building in eligible basis; i.e., all tenants have access to the facility. However, because the tenants must pay an additional fee to use the washers and dryers, the appliances should not be included in eligible basis.

Commercial Use

Eligible Basis cannot include any parts of the property used for commercial purposes. Residential rental property may qualify for the credit even though a portion of the building in which the residential rental units are located is used for a commercial use; i.e., commercial office space. No portion of the cost of such nonresidential rental property may be included in eligible basis.

The cost of mixed-use property; i.e., commercial and the residential rental units, must be allocated according to any reasonable method that properly reflects the proportionate benefit to be derived, directly or indirectly, by the qualifying residential rental units and the nonqualifying commercial property. Proposed Treas. Reg. §1.103-8(b)(4)(v)(c) provides two examples of methods generally considered to be reasonable when allocating costs:

1. Allocating the cost of common elements based on the ratio of the total floor space in the building that is to be used for nonqualifying property to all other floor space in the building is generally a reasonable method. For example, in the case of a mixed-use building where a part is to be used for commercial purposes, the cost of the building's foundation must be allocated between the commercial portion and residential rental units based on floor space.

2. In the event that an allocation of costs based on floor space does not reasonably reflect the relative benefits to be derived (directly or indirectly) by the residential rental units and the nonqualifying property, then another method must be used. For example, based on the floor space computation, a building is 50 percent residential rental property and 50 percent commercial space used as a shopping center. However, only 25 percent of the parking lot space will be used to service tenants of the residential units. The cost of constructing the parking lot must be allocated based on the proportion of parking lot used by the tenants of the residential units (25%) and for the commercial portion of the building (75%).

Federal Grants

Under IRC §42(d)(5)(A), the Eligible Basis must be reduced if a federal grant is made to fund the cost or operation of a building. Federal grants are funds which originate from a federal source and which do not require repayment. The Eligible Basis of the building must be reduced by the amount of the grant that is federally funded. The

Eligible Basis is reduced in the year the grant is made for the building and all subsequent years in the compliance period. A building is out of compliance as of the date the federal grant is made if the Eligible Basis is not reduced.

Eligible Basis is not reduced if the proceeds of a federal grant are used as a rental assistance payment under section 8 of the United States Housing Act of 1937 or any comparable rental assistance program. Under Rev. Rul. 2002-65, rental assistance payments made to a building owner on behalf or in respect of a tenant under the Rent Supplement Payment program (12 U.S.C. §1701s) or the Rental Assistance Payments program (12 U.S.C. §1715z-1(f)(2)) are not grants made with respect to a building or its operation under IRC §42(d)(5). Thus, proceeds from these programs do not require a reduction of Eligible Basis.

Resident Managers and Maintenance Personnel

Residential rental property, for low-income housing credit purposes, includes residential rental units, facilities for use by the tenants, and other facilities reasonably required by the project.[3] Under Treas. Reg. §1.103-8(b)(4), facilities that are functionally related and subordinate to residential rental projects are considered residential rental property. Treas. Reg. §1.103-8(b)(4)(iii) provides that facilities functionally related and subordinate to residential rental projects include facilities for use by the tenants, such as swimming pools and similar recreational facilities, parking areas, and other facilities reasonably required for the project. The examples included in Treas. Reg. §1.103-8(b)(4)(iii) of facilities reasonably required by a project specifically include units for resident managers or maintenance personnel.

Rev. Rul. 92-61 holds that the adjusted basis of a unit occupied by a full-time resident manager is included in the Eligible Basis of a qualified low-income building under IRC §42(d)(1), but the unit is excluded from the applicable fraction under IRC §42(c)(1)(B) for purposes of determining the building's Qualified Basis. The unit is considered a facility reasonably required for the benefit of the project and the resident manager and/or maintenance personnel are not required to be income qualified. If the owner is charging rent for the unit, the Service may determine that the unit is not reasonably required by the project because the owner is not requiring the manager to occupy the unit as a condition of employment.[4] Later conversion of the unit into a residential rental unit will not change the Eligible Basis.

Security Officers

For deterring crime in and around an LIHC project, it may be necessary and reasonably required by the project for the owner to provide a security presence by leasing a residential rental unit to a Security Officer, who may be an off-duty law enforcement officer, security person in private industry, or *other qualified person*. In return for performing safety and security services that contribute to the management and control of the LIHC property, the Security Officer may be provided an on-site unit.

Typically, a security officer provides on-site presence during the evening and nighttime hours to respond to any emergencies and disturbances, and to respond to residents' requests for assistance, including complaints, unauthorized visitors, improper parking, and unauthorized use of community facilities. Other encouraged

[3] H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-89 (1986), 1986-3 (Vol. 4) C.B. 89.
[4] The rental value of the housing provided to a full-time resident manager required to live onsite as a condition of employment is considered to be wages. In this situation, however, these wages are not taxable income and are not subject to employment taxes. See IRC §§ 119(a)(2) and 3121(a)(19).

activities may include conducting resident criminal background investigations, neighborhood watch programs, and educational activities for primary school-age residents.

The adjusted basis of the unit occupied by a security officer is includable in the Eligible Basis of the building under IRC §42(d)(1) as a facility reasonably required for the benefit of the project. However, the unit is excluded from the Applicable Fraction of the building under IRC §42(c)(1)(B). The security officer is not required to be income qualified. If the owner is charging rent for the unit, the Service may determine that the unit is not reasonably required by the project because the owner is not requiring the security officer to occupy the unit as a condition of employment. (See footnote 4.) Later conversion of the unit into a residential rental unit will not change the Eligible Basis.

Model Units

Model units are maintained primarily during a project's rent-up period to show prospective tenants the desirability of the project's units. If the project maintains full occupancy thereafter, the model can be dismantled and the unit rented. This makes economic sense because model units do not generate rental income for a project owner. However, at a large apartment complex, it is standard industry practice to continuously maintain a model unit for marketing purposes and to be competitive. The unit can be shown immediately to prospective tenants at any time without disturbing tenants in occupied units. By increasing competitiveness, model units contribute to the economic viability of the LIHC project

A model unit is considered a rental unit under IRC §42; see e.g., PLR 9330013, Issue # 3, July 30, 1993. Therefore, a model unit's cost is included in the building's eligible basis and in the denominator of the applicable fraction when determining a building's qualified basis.

Example 1: Model Unit Never Rented as LIHC Unit

> An owner included the cost of a model unit in the eligible basis for a 100% LIHC building with 49 units (other than the model unit). The owner anticipates that the model unit will be maintained throughout the compliance period and will never be rented to an income qualified household.
>
> The cost of the unit should be included in the building's eligible basis. However, the maximum applicable fraction that the owner can ever claim is 49/50, or 98%.

Example 2: Model Unit Converted to LIHC Unit

> An owner included the cost of a model unit in the eligible basis for a 100% LIHC building with 49 units (other than the model unit). The owner used the unit as a model for the first three years, but in April of year four of the compliance period, the unit was rented to an income qualified tenant.
>
> The cost of the unit should be included in the building's eligible basis and in years one through three of the credit period, the maximum applicable

fraction that the owner can claim is 49/50, or 98%. In year four and subsequent years, the owner will follow the rules outlined in IRC §42(f)(3) for increases in qualified basis; i.e., the “2/3 credit” rules.

Community Service Facilities

As part of the Community Renewal Tax Relief Act of 2000, a new IRC §42(d)(4)(C) was added to include property used to provide services to nontenants as part of the eligible basis used for determining the LIHC amount.

There are specific requirements:

1. The property must be located in a qualified census tract. (See IRC §42(d)(5)(C)(ii).)

2. The property must be subject to the allowance for depreciation and not otherwise accounted for.

3. The property must be used throughout the taxable year in providing any community service facility.

4. Under IRC §42(d)(4)(C)(iii), a community service facility must be designed to service primarily individuals whose income is 60 percent or less of the area median income. According to Rev. Rul. 2003-77, the requirement is satisfied if the following conditions are met:

   - The facility must be used to provide services that will improve the quality of life for community residents; i.e., day care, career counseling, literacy training, education (including tutorial services), recreation, and out-patient clinical health care.

   - The owner must demonstrate that the services provided at the facility will be appropriate and helpful to individuals in the area of the project whose income is 60 percent or less of area median income. This may, for example, be demonstrated in the market study required under IRC §42(m)(1)(A)(ii), or a similar study.

   - The facility must be located on the same tract of land as one of the buildings that comprises the qualified low-income housing project.

   - If fees are charged for the services provided, they must be affordable to individuals whose income is 60 percent or less of the area median income.

Under IRC §42(d)(4)(C)(ii), the increase in the adjusted basis of any building that includes the community service facility cannot exceed 10 percent of the eligible basis of the qualified low-income housing project of which it is a part. All community service facilities that are part of the same qualified low-income housing project are treated as one facility.

Example 1: LIHC Project Includes Community Service Facility

An owner received a credit allocation in 2001. The project is located in a qualified census tract and consists of six residential rental buildings. There are five floors in each building with 5,000 square feet each, for a total of 25,000 square feet per building. The square footage for the entire project is 150,000 square feet. The cost per square foot is $100 and, assuming that the costs are not disproportionately distributed in the building, the total Eligible Basis is $15,000,000. The cost of any community service facilities included in Eligible Basis is limited to $15,000,000 x .10 = $1,500,000.

The entire first floor of one building is a day care facility for children of residents in the community. Half of the first floor of a second building is a facility used to provide activities and medical services for seniors in the community. The combined square footage of the two facilities is 5,000 + 2,500 = 7,500 square feet. The cost is $100 x 7,500 square feet = $750,000. Since the combined cost of the two facilities is less than 10% of the total Eligible Basis, the entire cost of the facilities is included in Eligible Basis.

In Compliance

The Eligible Basis of a building is determined at the end of the first year of the credit period. As long as there is no reduction in the Eligible Basis amount upon which the credit is based, the property is in compliance.

Out of Compliance

The Eligible Basis of a property is reduced when space that originally qualified as residential rental property changes character or space that was originally designated for use by qualified tenants is no longer available to them. Typical noncompliance may involve converting common areas to commercial property, or charging fees for facilities (such as a swimming pool), the cost of which were included in the Eligible Basis.

The date of noncompliance is the specific date the residential space is converted to commercial space or when a fee is charged.

Back in Compliance

Common areas and tax credit rental units may be converted to commercial space. Whether the cost of these converted spaces can be restored to Eligible Basis by changing the properties back into common areas or tax credit rental units has not been determined. In these instances, the state agency should not report the building back in compliance. Instead, the state agency should contact the IRS National Office LIHC Program Analyst for instructions.

Chapter 9
Category 11e
Changes in the Applicable Percentage

Definition

This category is used to report violations associated with the Eligible Basis of a building (discussed in chapter 8) or any occurrence that result in a decrease in the Applicable Percentage of a building. This chapter addresses noncompliance affecting the Applicable Percentage of a building.

The low-income housing credit amount is based on certain costs associated with a building *(eligible basis)* and the portion of the building (*Applicable Fraction)* that low-income households occupy. The cost of acquiring and rehabilitating, or constructing a building constitutes the building's *Eligible* Basis. The portion of the Eligible Basis attributable to low-income units is the building's *Qualified Basis*. The Qualified Basis is multiplied by a factor (*Applicable Percentage)* so that the credit is limited to 70 percent or 30 percent of the Qualified Basis.[1] In summary, the annual credit is:

Eligible Basis x Applicable Fraction = Qualified Basis

Qualified Basis x Applicable Percentage = Annual Credit

Generally, under IRC §42(f)(1), the annual credit can be claimed for 10 taxable years, beginning with the taxable year in which the building is placed in service; or, at the election of the taxpayer, the succeeding year[2]. Under IRC §42(f)(2)(A), there is a special rule for the first year of the credit period. Any reduction in the credit allowable for the first year of the credit period by reason of the rule is allowable for the first taxable year following the credit period. (See IRC §42(f)(2)(B).) In addition, under IRC §42(f)(3), if the qualified basis as of any taxable year in the 15-year compliance period (after the first year) exceeds the qualified basis as of the close of the first year of the credit period, then the applicable percentage applied to the excess Qualified Basis is two-thirds of the Applicable Percentage that would otherwise apply.

IRC §42(b)(2)(B) provides that a new building that is not federally subsidized is eligible for an Applicable Percentage equal to a 70 percent present value credit while a new building that is federally subsidized and an existing building are eligible for a 30 percent present value credit.

Monthly credit tables published in the Internal Revenue Bulletin provide the actual Applicable Percentages to be used in calculating the credit. These tables effectively adjust the rates on a monthly basis so that the present value over the ten-year credit period will continue to yield the 70 percent and 30 percent figures.

Federal Subsidies

IRC §42(b)(2)(B)(ii) provides that the Applicable Percentage for new buildings that are federally subsidized is the 30 percent present value credit. Section 42(i)(2)(A) provides that a new building is federally subsidized for any tax year if, at any time during such tax

[1] IRC §42(b)(2)(B).
[2] IRC §42(f)(1)(B).

year or any prior tax year, there is or was outstanding any obligation the interest on which is exempt from tax under §103, or any below market Federal loan, the proceeds of which are or were used (directly or indirectly) with respect to the building or its operation. However, the building will become eligible for the 70 percent present value credit if (1) by the close of the first year of the credit period the taxpayer elects (on Part II of Form 8609) to reduce the Eligible Basis of the building by the principal amount of the loan or by the proceeds of the tax-exempt bond, or (2) before the building is placed in service, the taxpayer repays the loan or redeems the tax-exempt bond.

Assistance Provided Under the HOME Investment Partnership Act

IRC §42(i)(2)(E)(i) generally provides that assistance provided under the HOME Investment Partnership Act (HOME) with respect to any building will not be treated as a below market Federal loan if 40 percent or more of the residential units *in the building* are occupied by individuals whose income is 50 percent or less of the Area Median Gross Income (AMGI).

Example 1[3]: Qualifying for the 70 Percent Present Value Credit Under IRC §42(b)

> A new qualified low-income housing project consists of Building 1 and Building 2, each containing 100 residential rental units. Forty percent of the units in each building are low-income units. The owner elected the 40/60 minimum set-aside under IRC §42(g)(1)(B). Also, the owner elected, on Form 8609, Low-Income Housing Credit Allocation Certification, to treat the buildings as part of a multiple building project. The owner obtained a HOME loan at less than the AFR for the project.
>
> The rule under IRC §42(i)(2)(E)(i) applies on a building-by-building basis. To qualify for the 70 percent present value credit, the taxpayer must rent at least 40 units in both Building 1 and Building 2 to tenants whose income is 50 percent of less of AMGI throughout the 15-year compliance period.
>
> In addition:
>
> a. The units used to satisfy the rules under IRC §42(i)(2)(E)(i) are also counted toward the project's minimum set-aside under IRC §42(g)(1).
>
> b. The rent restriction for all the low-income units, including the units used to satisfy the rules under IRC §42(i)(2)(E)(i), is based on the applicable income limitation under IRC §42(g). In this example, the imputed income limitation applicable to the units in the project is 60 percent of AMGI and the rent may not exceed 30 percent of that amount.

In Compliance

A new building receiving the 70 percent present value credit is in compliance if no federal subsidy is used (directly or indirectly) for the building or for its operation. If a federal subsidy is used (directly or indirectly) for the building or for its operation, the building is in compliance if (1) the taxpayer elected (on Part II, Form 8609) to reduce the Eligible Basis of the building and this reduction is properly reflected in the Eligible Basis

[3] This example is based on Rev. Rul. 2004-82, Q&A #6.

determined at the close of the first year of the credit period, or (2) the federal subsidy is redeemed or paid before the building is placed in service.

Out of Compliance

A new building receiving a 70 percent present value credit is out of compliance if a federal subsidy is used (directly or indirectly) for the building or for its operation and:

1. The taxpayer fails to elect (on Part II, Form 8609) to reduce the Eligible Basis of the building,

2. The taxpayer elects (on Part II, Form 8609) to reduce the Eligible Basis of the building but the reduction is not properly reflected in the Eligible Basis of the building determined at the close of the first year of the credit period, or

3. The federal subsidy is not redeemed or paid before the building is placed in service and the taxpayer did not elect to reduce the Eligible Basis as described above.

A new building receiving the 70 percent present value credit is also out of compliance if it otherwise meets the "In Compliance" requirements above, but a federal subsidy is subsequently used with respect to the building or its operation during years 2 through 15 of the compliance period.

A building is out of compliance as of the date the federal subsidy is used.

Back in Compliance

In general, a violation of the federal subsidy rules is a noncompliance event that cannot be corrected. For example, a federal subsidy used (directly or indirectly) with respect to a new building receiving the 70 percent present value credit during years 2 through 15 of the compliance period results in a decrease in the Applicable Percentage of the building from the 70 percent to the 30 percent present value credit, beginning with the year the subsidy is used and for all remaining years in the compliance period. Following the close of the first year of the credit period, a taxpayer cannot elect to reduce the Eligible Basis of the building in an attempt to qualify for the 70 percent present value credit.

If a state agency identifies the receipt of a federal subsidy during years 2 through 15 of the compliance period for the operation of a building or project where the Applicable Percentage is the 70 percent present value credit rate, noncompliance should be reported under category 11e. No attempt should be made to determine whether the taxpayer correctly lowered the Applicable Percentage.

Under unusual circumstance, it might be possible to correct a noncompliance event occurring during the first year of the credit period. For example, the owner receives a favorable private letter ruling from the IRS allowing the taxpayer to make a late election on Part II, Form 8609, to reduce Eligible Basis to the extent of a federal subsidy. The owner should not be considered back in compliance unless documented by a favorable determination by the IRS.

Chapter 10
Category 11f
Project Failed to Meet
Minimum Set-Aside Requirement

Definition

This category is used to report projects that have violated the minimum set-aside rules; i.e., the number of qualifying units falls below the minimum requirement.

Under IRC §42(g)(1), a "qualified low-income housing project" means any *project* for residential rental property if the project meets one of the two requirements below, whichever is elected by the owner on Form 8609, line 10c.

1. At least 20% of the available rental units in the development are rented to households with incomes not exceeding 50% of Area Median Gross Income (AMGI) adjusted for family size.

2. At least 40%[1] of the available rental units in the development are rented to households with incomes not exceeding 60% of AMGI adjusted for family size.

The choice of minimum set-aside also establishes the income limit and rent limit applicable to low-income units in the project.

Project Defined

Each building is considered a separate project under IRC §42(g)(3)(D) unless, before the close of the first calendar year in the project period[2], each building that is, or will be, part of a multiple-building project is identified by attaching a statement to the owner's tax return (see instructions for Form 8609, line 8b for details). Each building included in the multiple building project is also identified on Form 8609, line 8b. The minimum set-aside documented on Form 8609, line 10c, must be the same for all buildings in a multiple-building project.

Two or more qualified low-income buildings may be included in a multiple-building project only if they:

1. are located on the same tract of land (unless all of the dwelling units in all of the buildings being aggregated in the multiple-building project are low-income units (see IRC §42(g)(7));

2. are owned by the same person for Federal tax purposes;

3. are financed under a common plan of financing; and

4. have similarly constructed residential units.

Deep Rent Skewing Under IRC §142(d)(4)

In addition to the election of a minimum set-aside, the owner may elect on Form 8609, line 10d, to provide housing to households with incomes of 40 percent or less of the AMGI under IRC §142(d)(4)(B). Under this "deep-rent skewing" set-aside, at least 15% of the low-income units in the project must be occupied by individuals with

[1] For the boroughs of New York City, 25% is substituted for 40%. See IRC §42(g)(4) and IRC §142(d)(6).
[2] Defined in IRC §42(h)(1)(F)(ii).

incomes at 40% or less of the AMGI (adjusted for family size) applicable to the units. Also, gross rent for each low-income unit cannot exceed (1) 30% of the AMGI applicable to the unit, and (2) 50% of the average gross rent for market rate units of comparable size in the project.

Irrevocable Elections

Once made, the minimum set-aside and deep-rent skewing elections are irrevocable.[3] Thus, the applicable minimum set-aside, deep-rent skewing, and the corresponding rent restrictions apply for the duration of the 15-year compliance period.

Assistance Provided Under the HOME Investment Partnership Act[4]

IRC §42(i)(2)(E)(i) generally provides that assistance provided under the HOME Investment Partnership Act (HOME) with respect to any building will not be treated as a below market Federal loan if 40 percent or more of the residential units *in the building* are occupied by individuals whose income is 50 percent or less of the Area Median Gross Income (AMGI).[5] The units used to satisfy the rules under IRC §42(i)(2)(E)(i) also counted toward the project's minimum set-aside under IRC §42(g)(1).

Suitability for Occupancy

For purposes of computing the minimum set-aside, the low-income units must be physically maintained in a manner suitable for occupancy under IRC §42(i)((3)(B)(ii). See chapter 6 for complete discussion.

Example 1: Vacant LIHC Rental Unit Suitable for Occupancy at the End of the Taxable Year Within the Compliance Period

The owner of a 100% LIHC building elected the 40/60 minimum set-aside and placed the building in service in July of 2003; 2003 is the first year of the credit (and compliance) period. An income-qualified tenant moved into a unit in October 2003 and moved out in November of 2004. The unit was cleaned and ready for occupancy on December 1, 2004. The unit is in compliance as of the end of the of the owner's 2004 taxable year and is, therefore, included in the count of qualified low-income units to determine whether the minimum set-aside requirement is satisfied.

Vacant Units

A rental unit is considered an LIHC unit beginning on the date that the first qualified tenant moved in and continues to be eligible for the LIHC even though it is vacant if the character of the last household to inhabit the unit qualified as a low-income household. Unless a specific noncompliance issue is identified for the unit, qualifying units that are vacant at the end of the owner's taxable year of the credit (and compliance) period are included in determining that the minimum set-aside has been met.

Example 1: Qualified LIHC Rental Unit Vacant at End of the Taxable Year of the Compliance Period

An income-qualified tenant moved into a unit on April 15, 2003, but the owner did not reduce the rent to account for a utility allowance.

[3] In rare circumstances the IRS has granted an owner an extension of time to make the correct election (see IRC §42(g)(8)). The owner must request a private letter ruling and receive express permission to do this.
[4] See Rev. Rul. 2004-82, Q&A #6.
[5] The designation is shown on Form 8609 (beginning with the Nov. 2003 revision. Line 6f is completed by the state agency.

The tenant moved out on November 15, 2003. The unit was not rented again until February 2004. At that time, the owner correctly accounted for the utility allowance.

The unit was out of compliance beginning on April 15, 2003 and remains out of compliance until February 2004, when the utility allowance is correctly accounted for. Assume that the close of the first year of the credit (and compliance period) is December 31, 2003. Since the unit is out of compliance on December 31, 2003, the unit is not included in the count of qualified low-income units to determine whether the minimum set-aside requirement is satisfied.

In Compliance

A property is in compliance if the elected minimum set aside requirement (20/50 or 40/60) and the elected deep-rent skewing requirement (15/40) is met by the end of the first year of the owner's credit (and compliance) period and continues to be met each year throughout the compliance period. The LIHC residential units must also be rent-restricted.

Out of Compliance

The initial analysis of compliance with the minimum set-aside requirement is generally based on a sample of tenant files. In the event that the sample does not meet the minimum set-aside, the owner must be given the opportunity to demonstrate that the minimum set-aside is met in the project. Noncompliance should be reported only if the owner cannot demonstrate compliance for the minimum number of units. The burden is on the owner to show that the minimum set-aside was met.

Noncompliance with the minimum set-aside should also be reported if systemic errors affecting all the LIHC units are identified; e.g., using incorrect income or rent limits for all the units.

Example 1: Single Building Project

20 units in a 100 unit building with a 40/60 minimum set-aside were reviewed. To satisfy the minimum set-aside test, 8 of the selected units must be in compliance.

If there are multiple buildings, and the owner elects to treat them collectively as one project, then combine the samples for each building to determine whether the minimum set-aside has been met.

Example 2: Multi-Building Project

A project consists of three buildings with 75 units in each building. The owner elected a 40/60 minimum set-aside. In total, there are 225 units and at least 90 must be qualified LIHC units to meet the minimum set-aside. The state agency must review 45 files. To satisfy the minimum set-aside test, 18 of the selected units must be in compliance.

Date of Noncompliance

In the event that noncompliance results in the failure to meet the minimum set-aside for the first year of the credit period, the taxpayer is prohibited from ever claiming the LIHC; the date of noncompliance is the last day of the taxable year of the first year of the credit period.

Example 1: First Year Lease Up

> The owner did not lease the minimum number of units to income eligible tenants by the end of the first year of the credit period.
>
> The date of noncompliance is the last day of the first year of the credit period. The state agency should issue Form 8823 indicating Category 11f, Project failed to meet minimum set-aside requirements, and Category 11p, Project is no longer in compliance nor participating in the program, if Form 8609 has been filed with the IRS.

If the project meets the minimum set-aside by the end of the first year, but fails to meet the minimum set-aside at the close of the taxable year for a subsequent year in the compliance period, the entire credit is lost for that year. The date of noncompliance is the last day of the taxable year for which the minimum set-aside was not met.

Back in Compliance

First Year of the Credit Period

If a project failed the first year minimum set-aside requirement, the noncompliance cannot be corrected and the owner is prohibited from ever claiming the LIHC. The date of noncompliance is the last day of the taxable year of the first year of the credit period for that project. The state agency should issue Form 8823 indicating Category 11f, Project failed to meet minimum set-aside requirements and Category 11p, Project is no longer in compliance and is no longer participating in the program.

Years Subsequent to the First Year of the Credit Period

If the minimum set-aside violation occurs *after* the first year of the compliance period, the project is back in compliance for the taxable year in the compliance period in which the minimum set-aside is met, determined as of the close of that taxable year.

Example 1: Fees for Assisted Living Services

> The first year of the credit period ended December 31, 1998 for a 100 percent LIHC building. The units were all rented to income qualified households. Subsequently, in 2003, the owner charged all households a fee for mandatory assisted-living services. This fee, when added to the rent, exceeded the gross rent limitation for all the units and resulted in a violation of the minimum set-aside requirement for year 2003. The state agency conducted a review on February 2004 and noted the violation of the rent rules. The owner stopped charging the fee on March 1, 2004.

The owner did not meet the minimum set-aside and should not claim any credit for 2003. The date of noncompliance with the minimum set-aside requirement is December 31, 2003. The owner will be back in compliance at the end of the taxable year in the compliance period in which the minimum set-aside is again met.

The submission of a Form 8823 identifying noncompliance with the minimum set-aside should not be delayed even if the taxpayer demonstrates that the minimum set-aside will be restored by the end of the taxable year in the compliance period. State agencies should file Form 8823 within 45 days after the end of the correction period. A second Form 8823 should be filed after the end of the first taxable tax year in which the minimum set-aside is restored.

Documentation of Corrected Noncompliance

Documentation of corrected noncompliance with the minimum set-aside requirement will be specific to the noncompliance issue resulting in failure to satisfy the set-aside.

Example 1: Rental to Ineligible Tenants Violates Minimum Set-Aside Requirement

Upon inspection, it is determined that the number of units qualifying as LIHC units did not satisfy the minimum set-aside requirement during a year following the first year of the credit period because the owner rented to ineligible tenants. To correct the minimum set-aside violation, the owner must rent units to IRC §42 eligible income-qualified households until the minimum set-aside is restored.

At a minimum, documentation should include the tenant's application/eligibility questionnaire, income verifications, tenant income certification, and student verification, if necessary.

Chapter 11
Category 11g
Gross Rent(s) Exceed Tax Credit Limits

Definition

This category is used to report noncompliance with the rent restrictions outlined in IRC §42(g)(2). A unit qualifies as an LIHC unit when the gross rent does not exceed 30 percent of the imputed income limitation applicable to such unit under IRC §42(g)(2)(C). The income limit for a low-income housing unit is based on the minimum set-aside election made by the owner under IRC §42(g)(1).

Items to consider when determining whether the rent is correctly restricted include services provided, revisions to HUD income limits, rent calculation methods, changes in the tenant's income, Section 8 tenants, Rural Housing Service (formerly FmHA) rents, supportive services, and deep rent skewing.

Fees - Provision of Services

Units may be residential rental property notwithstanding the fact that services *other than housing* are provided. However, any charges to low-income tenants for services that are not optional generally must be included in gross rent (Treas. Reg. 1.42-11). A service is optional when the service is not a condition of occupancy and there is a reasonable alternative. Charges for non-optional services such as a washer and/or dryer hookup fee and built-in/on storage sheds (paid month-to-month or a single payment) would always be included within gross rent. No separate fees should be charged for tenant facilities (i.e., pools, parking, recreational facilities) if the costs of the facilities are included in eligible basis. *Assuming they are optional*, charges such as pet fees, laundry room fees, garage, and storage fees may be charged in addition to the rent; i.e., they are not included in the rent computation.

Fees – Condition of Occupancy

Under Treas. Reg. §1.42-11(a)(3), the cost of services that are required as a condition of occupancy must be included in gross rent even if federal or state law required that the services be offered to tenants by building owners.

1. Refundable fees associated with renting an LIHC unit are not included in the rent computation. For example, security deposits and fees paid if a lease is prematurely terminated[1] are one-time payments that are not considered in the rent calculation.

2. Required costs or fees, which are not refundable, are included in the rent computation. Examples include fee(s) for month-to-month tenancy and renter's insurance.

Fees for preparing a unit for occupancy must not be charged; owners are responsible[2] for physically maintaining LIHC units in a manner suitable for occupancy.

---

[1] Leases commonly include fees for early termination of the rental agreement. The fact that the lease contains terms for this contingency is not indicative of transient use.
[2] See IRC §42(i)(3)(B)(i) and Treas. Reg. §1.42-5(g).

Fees – Application Processing

Application fees may be charged to cover the actual cost of checking a prospective tenant's income, credit history, and landlord references. The fee is limited to recovery of the actual out-of-pocket costs. No amount may be charged in excess of the average expected out-of-pocket costs of checking tenant qualifications at the project. It is also acceptable for the applicant to pay the fee directly to the third party actually providing the applicant's rental history. See PLR 9330013, Issue 1, for an example.

Changes to HUD Income Limits

Rents must be calculated using HUD[3] income limits. The lowest rents owners will be required to charge (gross rent floor) are based on the income limits in effect when the building is allocated credits, unless the owner elects[4] (and notifies the housing credit agency of the election) to treat the rent floor as taking effect on the date the building is placed in service. This rule applies to properties receiving credit allocations or determination letters under IRC §42(m)(2)(D) after October 6, 1994. For allocations and determination letters after 1989 and before October 7, 1994, owners and state agencies may use a date based on a reasonable interpretation of IRC §42. Before 1990, the gross rent floor took effect at the time the building was placed in service. See IRC §42(g)(2)(A). If the income limits increase, there is no noncompliance as long as the rents are at or below the maximum rents in effect at that time. However, if the income limits are reduced, the maximum rent charged, as well as the gross rent floor, should be reviewed.

Example 1: HUD Income Limit Reduced (Credit Allocation Date)

> The owner elected the 40/60 minimum set-aside on Form 8609. HUD issues reduced income limits effective 1/1/2000. The revised maximum 60% gross rent is $400, which is *below* the calculated maximum rent floor of $500 in effect at the time the owner received the credit allocation. The owner has been charging $450 rent and a $50 utility allowance. There is no noncompliance; owner may rely on his gross rent floor and continue to charge $500 in total rent.

Example 2: HUD Income Limit Reduced (Placed-in-Service Date)

> The owner elected the 40/60 minimum set-aside on Form 8609 and elected to treat the rent floor as taking effect on the date the building was placed in service on July 12, 1999. HUD then issued reduced income limits effective 1/1/2000. The revised maximum 60% gross rent is $400, which is *above* the calculated rent floor of $300 at the time the owner placed the building in service. The owner *may* charge rent of $350 and a $50 utility allowance, for a total of $400.

Rent Calculation Methods

Pre-1990: Gross rent for properties receiving tax credit allocations or bond-financed buildings placed in service before January 1, 1990 and for which the election[5] to determine rents based on number of bedrooms was not made, may not exceed thirty percent (30%) of the HUD-determined median income limit adjusted for the actual number of people in the household for the area in which the property is located. Under

---

[3] Owners have 45 days to implement revised income limits after they are published by HUD or HUD's effective date for the new list, whichever is later. See Rev. Rul. 94-57, 1994-2 C.B. 5.
[4] See Rev. Proc. 94-57, 1994-2 C.B. 774.
[5] See Rev. Proc. 94-9, 1994-1 C.B. 555.

this method, the maximum allowable rent varies with the number of individuals occupying the unit. This is the method used prior to the Revenue Reconciliation Act of 1989.

Post-1989: For properties receiving tax credit allocations or placing bond-financed buildings in service after December 31, 1989[6] and for pre-1990 properties subject to the bedroom election under Rev. Proc. 94-9, maximum gross rents are computed based on the number of bedrooms in the unit. Units with no separate bedroom are treated as being occupied by one person and units with separate bedrooms are treated as being occupied by 1.5 persons per each separate bedroom. Note: The bedroom method calculation may be applied only for households moving into units *after* the date the bedroom election was made. Units with households living in the property before the date of the election will continue to be charged rents based on the number of family members actually living in the unit until such time as a turnover in occupancy occurs.

Example 1: Rent Exceed Limit - Bedroom Election

> Assume credits were allocated in 1988 and the owner elected by February 7, 1994 to use the bedroom election to calculate rent. A one-person household moved into a 2-bedroom unit on February 1, 1994 and paid the maximum one-person gross rent of $300 and a $50 utility allowance. Following the bedroom election, the owner raises this household's rent to the maximum two-bedroom rent of $500, plus a $50 utility allowance, for a total rent of $550.
>
> This is not allowable because the household moved into the unit before the date of the election and the rent of $550 is over the allowable maximum. Rent in this unit may only be changed to the bedroom calculation method on the date a new household moves in. The owner must immediately reduce the rent charge to $300 rent, plus a $50 utility allowance. Date of correction is the date of the lease amendment.

Tenant Income Rises Above Limit

A unit shall continue to be treated as a low-income unit if the income of the occupants initially met the income limitation and the unit continues to be rent-restricted[7]. The owner may also be subject to the Available Unit Rule and the Vacant Unit Rule. (See chapters 14 and 15.)

Section 8 Tenants

The gross rent limit applies only to payments made directly by the tenant. Any rental assistance payments made on behalf of the tenant, such as through section 8 of the United States Housing Act of 1937 or any comparable Federal rental assistance, are not included in gross rent. Congress further intended that any comparable state or local government rental assistance not be included in gross rent. See IRC §42(g)(2)(B)(i) and the General Explanation of the Tax Reform Act of 1986.

Example 1: Household Portion of Rent is Below Limit

---

[6] IRC §42(g)(2)(C)
[7] IRC § 42(g)(2)(D)(i).

A Section 8 household moved into a unit on January 1, 2000; the maximum LIHC gross rent is $500 and market rate is $600. Household pays $200 and the assistance pays $400; the total rent is $600. There is no noncompliance since the household portion of rent is below the maximum LIHC rent allowed.

The portion of the rent paid by Section 8 tenants can exceed the LIHC rent ceiling as long as the owner receives a Section 8 assistance payment on behalf of the resident. If no subsidy is provided, the tenant may not pay more than the LIHC rent ceiling.

Example 2: Tenant's Portion of Rent Exceeds Rent Limit

A Section 8 household with an annual income of $18,000 applies for an LIHC unit for which the rent is restricted to $500 and for which the market rate rent is $750. Assistance will pay a maximum of $500, and the applicant's portion is $600 (40 percent of income). Since the applicant is required to pay $600, Section 8 will pay $150. There is no noncompliance.

Note: This example reflects HUD's requirement under the Section 8 housing choice program. The family share may not exceed 40 percent of the family's share monthly adjusted income when the family initially moves into the unit or signs the first assisted lease for a unit. Additional information available at www.hudclips.org/sub_nonhud/jtml/pdfforms/7420g06.pdf.

Rural Develop-ment (FmHA) Rents

Originally, the rent restrictions for projects with Rural Development assistance were computed using the general rules for LIHC housing. Beginning in 1991, however, gross rent does not include any rental payment to the owner of the unit to the extent such owner pays an equivalent amount to the USDA Rural Housing Service[8] under section 515 of the Housing Act of 1949. See IRC §42 (g)(2)(B)(iv). In other words, as long as the owner pays Rural Development the rent amount over the limit (all of the overage) that unit is in compliance.

Example 1: Rent Above Limit (Owner Pays Rural Development, formerly known as FmHA)

Assume a 1991 credit allocation to a property with Rural Development assistance. The maximum gross LIHC rent is $500 and the household's calculated rent under Rural Development regulations is $650, which the owner charges. The owner provides documentation that the $150 above the tax credit maximum has been remitted directly to Rural Development. There is no noncompliance.

Supportive Services

After 1989, gross rent does not include any fee for a supportive service paid to the owner by any governmental program or tax-exempt organization if the amounts paid for rent and assistance are not separable.[9] Under Treas. Reg. §1.42-11, supportive services mean any service designed to enable residents to be independent and avoid placement in a hospital, nursing home, or intermediate care facility for the mentally or physically

[8] Formerly known as the Farmer's Home Administration.
[9] IRC §42(g)(2)(B)(iii) and Revenue Reconciliation Act of 1989.

handicapped. Examples of supportive services include transportation, housekeeping, or planned social activities. Supportive services do not include continual or frequent nursing, medical, or psychiatric services.

Example 1: 1990 Credit Allocation

> Assume a 1990 credit allocation. The maximum gross rent is $500 and the owner receives a monthly payment of $600 from a tax-exempt organization to assist the household with the living expense of handicapped persons so that such persons can live independently and avoid placement in a hospital. There is no noncompliance as long as the owner provides documentation that the assistance is inseparable from the rental of the unit and complies with above rule.

Deep Rent Skewing

Under IRC §142(d)(4)(B)[10], an owner can elect to provide housing to households with incomes of 40% or less of the Area Median Gross Income (AMGI). The election is made on Form 8609, Low-Income Housing Certification, line 10d. The project qualifies if:

1. 15 percent or more of the low-income units are occupied by individuals whose income is 40 percent or less of the AMGI;

2. The gross rent with respect to each low-income unit in the project does not exceed 30 percent of the applicable income limit which applies to the individuals occupying the unit; and

3. The gross rent with respect to each low-income unit in the project does not exceed ½ of the average gross rent with respect to units of comparable size that are not occupied by individuals who meet the applicable income limit.

Assistance Provided Under the HOME Investment Partnership Act

IRC §42(i)(2)(E)(i) generally provides that assistance provided under the HOME Investment Partnerships Act (HOME) with respect to any building will not be treated as a below market Federal loan if 40 percent or more of the residential units *in the building* are occupied by individuals whose income is 50 percent or less of the Average Median Gross Income (AMGI). The rent restriction for all the low-income units, including the units used to satisfy the rules under IRC §42(i)(2)(E)(i), is based on the applicable income limitation under IRC §42(g). See Rev. Rul. 2004-82, Q&A #6.

In Compliance

A unit is in compliance when the rent charged does not exceed the limitations.

Example 1: Provision of Optional Services

> An LIHC property provides hot meals twice a day for the convenience

[10] IRC §42(g)(4) authorizes the application of deep rent skewing under IRC §142(d)(4)(B) for IRC §42 properties.

of its tenants in a common dining facility. They charge a nominal fee to cover their costs, but do not include the cost in the rent charged for the apartments. Each unit in the property includes a fully functional kitchen.

In this case, a practical alternative exists for tenants to obtain meals other than from the dining facility, and payment for the meals in the common dining facility is not required as a condition of occupancy. Thus, the cost of the meals is not included in gross rent for purposes of IRC §42(g)(2)(A) and Treas. Reg. §1.42-11(b).

Example 2: Fee for Late Payment of Rent

A tenant pays the maximum rent of $525 for a one bedroom unit. The tenant did not pay the rent timely and was charged a late fee of $35, as stated in the lease.

The $35 late is a penalty for failure to perform according to the lease agreement and, therefore, the fee is not included in the rent.

Out of Compliance

A unit is out of compliance when the rent charged exceeds the limitation.

1. If the noncompliance is the result of noncompliance with the utility allowance requirements, the error should be noted under category 11m, Owner did not properly calculate utility allowance.

2. If the noncompliance is the result of a systemic error, also evaluate whether the minimum set-aside under IRC §42(g)(1) was met. See chapter 9.

Example 1: Tenant Income Rises Above Limit

A household was initially income qualified and moved into a unit on 1/1/2000. The maximum LIHC gross rent is $500. At recertification, the owner increased the rent to the market rate of $1,000.

The unit is out of compliance, beginning on the date the rent was increased above the maximum of $500.

Back in Compliance

A unit is back in compliance when the rent charged does not exceed the limit. An owner cannot avoid the disallowance of the LIHC by rebating excess rent to the affected tenants.

Example 1: Overcharged Rent

The owner leased the minimum number or units to IRC §42 eligible tenants during the third year of the credit period. However, the owner inadvertently overcharged rent to tenants occupying 3 bedroom apartments. The error impacted 15 out of 75 units.

The unit is back in compliance when the owner correctly limits the rent for all units.

Example 2: Overcharged Rent Impacted Minimum Set-Aside

The owner leased the rental units in a 100% LIHC building to IRC §42 eligible tenants by the end of the first year of the credit period. However, the owner overcharged rent for all the units and, as a result, failed to meet the minimum set-aside for the first year of the credit period.

The building does not qualify for LIHC.

Chapter 12
Category 11h
Project not Available to the General Public

Definition

This category is used to report properties that are not available to the general public. A residential rental unit is for use by the general public if the property conforms to the requirements of Treas. Reg. § 1.42-9. Under Treas. Reg. 1.42-9(b), if a residential unit is provided only for a member of a social organization or provided by an employer for its employees, the unit is not for use by the general public and is not eligible for credit under IRC §42. The general public use rules are violated any time the general public is denied access to LIHC housings.[1] Residential rental units either designated for a single occupational group, or through a preference for an occupational group, also violate the general public use requirements.

In addition, any residential rental unit that is part of a hospital, nursing home, sanitarium, life care facility, retirement home providing significant services other than housing, dormitory, trailer park, or intermediate care facility for the mentally and physically disabled is not for use by the general public.

Fair Housing Act

LIHC properties are also subject to Title VIII of the Civil Rights Act of 1968, which makes it unlawful to discriminate in any aspect relating to the sale, rental, or financing of dwellings because of race, color, religion, sex, or national origin. The Fair Housing Act of 1988 expanded coverage of Title VIII to include familial status and disabilities. Notifications of administrative and legal actions in regards to the Fair Housing Act are also reported to the IRS using Form 8823. See chapter 13 for complete discussion.

In Compliance

Owners must rent their units in a manner consistent with the general public use requirements to be in compliance with IRC §42. Residential rental units must be for use by the general public and all of the units in a project must be used on a nontransient basis. Residential rental units are not for use by the general public, for example, if the units are provided only for members of a social organization or provided by an employer for its employees.

Out of Compliance

The failure of LIHC buildings to comply with the general public use requirements will result in the denial of low-income housing credits on a per-unit basis. A unit is out of compliance starting on the date of the event triggering the noncompliance. State agencies will also need to consider whether the problem is systemic and whether owner has met the minimum set-aside under IRC §42(g)(1). See chapter 10.

[1] General Explanation of the Tax Reform Act of 1986 (H.R. 3838, 99th Congress; Public Law 99-514.

Example 1: LIHC Units Restricted to Members of a Social Organization

The owner of an LIHC building started renting only to members of a local fraternal organization in the third year of the compliance period. By the fifth year, all the tenants in the building were members of the organization.

This building is in violation of the general public use requirements under Treas. Reg. § 1.42-9(b), which provides that a residential unit rented only to a member of a social organization is not for use by the general public and is not eligible for the credit under IRC §42. The noncompliance started on the date the first nonqualified tenant moved into a unit in the third year of the credit period.

Back in Compliance

The owner is back in compliance with the general public use requirements when two conditions are met:

1. The owner demonstrates that marketing and rental practices are no longer in violation of the general public use rules.

2. All the units are made available to the general public.

Example 1: Units Rented to Members of an Occupational Group

An owner placed a 100% LIHC building in service, began claiming the credit in 2000, and elected the 40/60 minimum set-aside. In 2002, when all 25 units were in compliance with qualifying households, the owner decided to rent units solely to teachers. Starting on January 21, 2002, five vacated units were rented to teachers. During 2003, the owner rented an additional 11 units to teachers. The issue was identified during the state agency's inspection in 2004.

The building is out of compliance as of January 21, 2002, when the first unit is rented to a teacher. The applicable fraction for 2002 is 20/25 or 80%. The applicable fraction for 2003 is 9/25 or 36%, and since the minimum set-aside was not met, no credit is allowable for 2003.

The building is back in compliance when:

1. The owner demonstrates that marketing and rental practices are no longer in violation of the general public use rules, and

2. All the units are made available to the general public.

Chapter 13
Category 11h
Project not Available to the General Public
(Notifications of Fair Housing Act Administrative and Legal Actions)

Definition

State agencies must report the receipt of notices of Fair Housing Act (FHA) administrative and legal action issued by HUD or the Department of Justice to the Internal Revenue Service.

The Fair Housing Act

LIHC properties are subject to Title VIII of the Civil Rights Act of 1968[1], which makes it unlawful to discriminate in any aspect relating to the sale or rental of dwellings, in the availability of transactions related to residential real estate, or in the provision of services and facilities in connection therewith because of race, color, religion, sex, disability, familial status, or national origin.

Reasonable Modification and Accommodation

The FHA specifically makes it unlawful to refuse to permit, at the expense of the person with a disability, reasonable modifications to existing premises if the modifications are necessary to accommodate a person with a disability to occupy the premises. A landlord may, where reasonable, condition permission for a modication on the renter's agreeing to restore the interior of the premises to the condition that existed before the modification.

The FHA also makes it unlawful to refuse to make reasonable accommodations in rules, policies, practices or services to afford a person with a disability equal opportunity to use and enjoy a dwelling.

Accessibility

The FHA makes it unlawful to design and construct certain multifamily dwellings for first occupancy after March 13, 1991, in a manner that makes them inaccessible to persons with disabilities. The Fair Housing Act defines multifamily dwellings as buildings consisting of four or more units if such buildings have one or more elevators; and ground floor units in other buildings consisting of four or more units.

All premises within such dwellings are also specifically required to contain features of adaptive design so that the dwelling is readily accessible to and useable by persons with disabilities[2]. The FHA provides a list of the accessibility features necessary for compliance with the design and construction requirements[3]:

1. the public and common use portions of such dwellings are readily accessible to and usable by disabled persons;

---

[1] 42 USC 3601 et.seq., as amended
[2] 42 USC §3604(f)(3)(c)(iii)
[3] Refer to the Fair Housing Act Design Manual: A Manual to Assist Designers and Buildings in Meeting the Accessibility Requirements of the Fair Housing Act for more specific information about these requirements. The manual is available through HUD USER 1-800-245-2691.

2. all the doors designed to allow passage into and within all premises within such dwellings are sufficiently wide to allow passage by disabled persons in wheelchairs;

3. all premises within such dwelling contain the following features of adaptive design:

   (a) an accessible route into and through the dwelling;

   (b) light switches, electrical outlet, thermostats, and other environmental controls in accessible locations;

   (c) reinforcements in bathroom walls to allow later installation of grab bars;

   (d) usable kitchens and bathrooms such that an individual in a wheelchair can maneuver about the space.

Citizenship Status

The FHA does not prohibit discrimination based solely on a person's citizenship status. Therefore, asking housing applicants to provide documentation of their citizenship or immigration status during the screening process would not violate the FHA. Owners implementing citizenship or immigration status screening measures must make sure they are carried out in a uniform, nondiscriminatory fashion.

Example 1: Visa Expiration

> A person applying for an LIHC apartment mentions in the interview that he left his native country to study in the United States. The landlord, concerned that the student's visa may expire during tenancy, asks the student for documentation to determine how long he is legally allowed to be in the United States.
>
> If the landlord requests this information, regardless of the applicant's race or specific national origin, the landlord has not violated the Fair Housing Act.

Questions concerning the Fair Housing Act should be referred to the state's HUD regional office. HUD's regional offices are listed in Exhibit 13-1.

Role of the U.S. Department of Housing and Urban Development (HUD)

HUD is responsible for enforcing the Fair Housing Act. In so doing, HUD investigates allegations of housing discrimination, attempts to resolve the complaint, and determines whether there is reasonable cause to pursue civil action. If reasonable cause is present, HUD must bring the case before an administrative law judge. In the alternative, if either party elects to have claims or complaints decided in a civil action, HUD must refer the complaint to the U.S. Department of Justice for prosecution in the United States District Court.

Role of the U.S. Department of Justice

The Department of Justice (DOJ) may file a lawsuit whenever the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of discrimination or denial of rights to a group of persons where such denial raises an issue of general public importance. DOJ may also file a lawsuit based upon HUD referrals involving the legality of any state or local zoning, or other land use law or ordinance if the parties agree to a civil action. DOJ may also enter into settlement/consent agreements with property owners to obtain compliance with the Fair Housing Act. DOJ may also seek a court judgment to enforce the terms of a settlement/consent agreement.

Role of Substantially Equivalent State or Local Fair Housing Agency

Where HUD has determined that state or local laws are substantially equivalent to the federal Fair Housing Act, a state or local fair housing agency investigates fair housing allegations, attempts conciliation, and determines whether reasonable cause exists to believe a discriminatory housing practice has occurred. If the fair housing agency makes a determination of reasonable cause, then a charge is filed with representation of the complainant provided by a state or local representative.

Memorandum of Understanding (MOU) Among Treasury , HUD and DOJ

Treasury, HUD, and DOJ entered into an MOU in a cooperative effort to promote enhanced compliance with the Fair Housing Act for the benefit of residents of LIHC properties and the general public. Key points of the MOU include coordinated procedures for notifying the state agencies and IRS of charges, lawsuits, or other actions under the Fair Housing Act involving an LIHC property. The MOU also calls for interagency assistance and training, training for the state agencies and industry stakeholders, and training for architects on the accessibility requirements. See Exhibit 13-2 for the full text of the MOU.

Reporting of Fair Housing Act Administrative and Legal Actions

HUD or DOJ will notify a state agency of:

1. a charge by the Secretary of HUD for a violation of the Fair Housing Act,
2. a probable cause finding under a substantially equivalent fair housing state law or local ordinance by a substantially equivalent state or local agency,
3. a lawsuit under the Fair Housing Act filed by the DOJ, or
4. a settlement agreement or consent decree entered into between HUD or DOJ and the owner of an LIHC property.

Other non-FHA civil rights actions and lawsuits, such as section 504 Rehabilitation Act lawsuits or administrative actions, are not covered under the terms of the MOU and should not be reported to the IRS.

On receipt of such a notification, a state agency should immediately file a Form 8823 with the IRS noting the potential violation using the “out of compliance” box and notify the owner in writing. A sample letter that a state agency should send to the owner is included as Exhibit 13-3.

When a Form 8823 pertaining to the above is received, the IRS will send a letter to the owner notifying the owner that a finding of discrimination, including an adverse final decision by the Secretary of HUD, an adverse final decision by a substantially equivalent state or local fair housing agency, or an adverse judgment by a federal court, will result in the loss of low-income housing credits. Similarly, the IRS will also send a letter to owners notifying them that a judgment enforcing the terms of a settlement agreement or consent decree will result in the loss of low-income housing credits.

Potential Violations Discovered by State Agencies

State agencies should report potential Fair Housing Act violations discovered during their compliance monitoring activities to their HUD Regional offices, or other fair housing enforcement agencies, as appropriate. HUD's Regional offices are listed in Exhibit 13-1. Do not submit this information to the IRS via Form 8823.

State Agency Notified by HUD or DOJ that the Terms of Settlement Agreement, Consent Decree, or Judgment are Satisfied

Form 8823 should be filed with the IRS when the civil action is completed. HUD or DOJ will notify the state agency of the resolution of an alleged violation of the Fair Housing Act. Documentation that the owner has complied with the court order and/or HUD's requirements and that the violation has been corrected is needed.

IRS Determinations

The state agencies are responsible for reporting their receipt of notifications of administrative and legal action by HUD and the Department of Justice as outlined in the MOU. The IRS is responsible for determining whether the owner is out of compliance for purposes of IRC §42, and the associated out of compliance and back in compliance dates, based on the findings of the court proceeding. The determination will be based on the facts of the individual case.

Example 1: Violation of Fair Housing Act

> A LIHC project discriminated against single women in its rental practices. The U.S. Department of Justice initiated a lawsuit and obtained a judgment covering all units in the project. The property violates the Fair Housing Act and is in violation of Treas. Reg. §1.42-9.

Depending on the nature of the violation, noncompliance may be determined at the unit, building, or project level. The costs attributable to a residential rental unit that is not for use by the general public are not excludable from eligible basis by reason of the unit's ineligibility for the credit under this section. However, in calculating the applicable fraction, the unit is treated as a residential rental unit that is not a low-income unit.

Exhibit 13-2

MEMORANDUM OF UNDERSTANDING AMONG

THE DEPARTMENT OF THE TREASURY,

THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, AND

THE DEPARTMENT OF JUSTICE

Preamble

The United States Departments of the Treasury, Housing and Urban Development, and Justice enter into this memorandum of understanding (MOU) in a cooperative effort to promote enhanced compliance with the Fair Housing Act (Act), 42 U.S.C. ϶϶ 3601 et seq., for the benefit of residents of low-income housing tax credit properties and the general public.

It is recognized that the Department of the Treasury=s (Treasury) Internal Revenue Service (IRS) is responsible for administering and enforcing the tax laws in the low-income housing tax credit program under ϶ 42 of the Internal Revenue Code, 26 U.S.C. ϶ 42. In accordance with ϶ 1.42-9 of the Income Tax Regulations, 26 C.F.R. ϶ 1.42-9, low-income housing tax credit properties are to be rented in a manner consistent with the Act. Noncompliance of these properties with the low-income housing tax credit provisions is required to be reported to the IRS by state housing finance agencies under 26 U.S.C. ϶ 42(m)(1)(B)(iii).

It is recognized that the Department of Housing and Urban Development (HUD) is responsible for enforcing the Act, 42 U.S.C. ϶϶ 3601 et seq. In doing so, HUD is required to investigate allegations of housing discrimination, attempt conciliation of the complaint, and determine whether there is reasonable cause to believe discrimination has occurred under the Act. Upon finding reasonable cause, HUD must bring the case before an administrative law judge, or if either party elects to have claims or complaints decided in a civil action, HUD must refer the complaint to the Department of Justice for prosecution in the United States District Court.

It is recognized that the Department of Justice (Justice) is responsible for enforcing the Act, 42 U.S.C. ϶϶ 3601 et seq. Pursuant to section 3614 of the Act, Justice may file a lawsuit whenever the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of discrimination or denial of rights to a group of persons where such denial raises an issue of general public importance. Justice also may file a lawsuit upon referral of matters from HUD involving the legality of any state or local zoning or other land use law or ordinance and after receiving a referral from HUD following an election by a party to a HUD complaint to have the matter decided in a civil action. Justice may enter into settlement agreements and consent decrees with property owners to obtain compliance with the Act. In the event a property owner fails to comply with the terms of the settlement agreement or consent decree, Justice may seek a court judgment to enforce the terms of the settlement agreement or consent decree.

The parties to this MOU agree to the following:

<u>1) Coordination on Notifying Low-Income Housing Tax Credit Property Owners about Charges, Lawsuits, and Other Actions</u>

HUD and Justice will identify low-income housing tax credit properties for which there is: 1) a charge by the Secretary of HUD for a violation of the Act; 2) a probable cause finding under a substantially equivalent fair housing state law or local ordinance by a substantially equivalent state or local agency; 3) a lawsuit under the Act filed by Justice; or 4) a settlement agreement or consent decree entered into between HUD or Justice and the owner of a low-income housing tax credit property. HUD or Justice will then transmit the address of the property and a summary of these actions to the appropriate state housing finance agency, using a current list of contacts and addresses of state housing finance agencies provided by the IRS.

Upon the state housing finance agencies reporting this information to the IRS (using Form 8823, Low-Income Housing Credit Agencies Report of Noncompliance), the IRS will send a letter to involved property owners notifying them that a finding of discrimination, including an adverse final decision by the Secretary of HUD, an adverse final decision by a substantially equivalent state or local fair housing agency, or an adverse judgment by a federal court, could result in the loss of low-income housing tax credits. Similarly, the IRS will also send notification to property owners that a judgment enforcing the terms of a settlement agreement or consent decree could result in the loss of low-income housing tax credits. The IRS, HUD, and Justice will collaboratively develop the model letters addressed to property owners and other entities. HUD and Justice will also send to the IRS and the appropriate state housing finance agency a summary of the above-referenced actions, describing relevant information such as the precise nature of the violation, the dates of the violation, and proposed corrective actions.

<u>2) Designating Contacts and Interagency Technical Assistance and Training</u>

HUD and Justice will designate personnel to provide the IRS upon request with technical assistance and problem resolution concerning emerging civil rights and discrimination matters involving the administration of the low-income housing tax credit program (e.g., accessibility issues, section 8 vouchers, civil rights interpretative issues, and published guidance). In addition, HUD and Justice will provide training upon request to a few designated IRS personnel about the Act. The IRS will designate personnel to provide technical assistance and training upon request to HUD and Justice personnel on general tax administration issues under the low-income housing tax credit program, in a manner consistent with the IRS=s disclosure limitations contained in section 6103 of the Internal Revenue Code.

3) Training for State Housing Finance Agencies and Others

HUD and Justice will make training available upon request to state housing finance agencies and other entities (e.g., developers, property management companies, syndicators) on the Act, including training on inspecting for Act accessibility criteria referenced in the uniform physical condition standards in 24 CFR 5.703. HUD will also encourage substantially equivalent state and local fair housing agencies to invite state housing finance agencies and other entities to participate in civil rights training developed by the substantially equivalent agencies.

4) HUD=s Pilot Program to Train Architects on the Act=s Accessibility Requirements

HUD has begun the process of developing a pilot program in one region of the country to provide training and technical assistance to architects and others on the accessible design and construction requirements of the Act. HUD has also proposed expanding this program to four regions in FY 2001. HUD will promote participation in the program by members of the American Institute of Architects, including those involved with the design and construction of low-income housing tax credit properties.

5) Cooperation in Research Concerning Low-Income Housing Tax Credit Properties

HUD and Treasury will cooperate in research sponsored by either Department concerning low-income housing tax credit properties.

6) Cooperation to Identify and Remove Unlawful Barriers to Section 8 Tenants

In consultation with the state housing finance agencies, HUD, Justice, and the IRS will cooperate in identifying and removing unlawful barriers to occupancy of low-income housing tax credit properties by individuals holding section 8 vouchers.

7) Cooperation in Assisting Syndicators of Low-Income Housing Tax Credits

HUD, Justice, and the IRS will cooperate in helping the national associations of investment syndicators of low-income housing tax credit properties to enhance practices by syndicators in monitoring and promoting compliance with the Act and the low-income housing tax credit program.

8) Annual Civil Rights Meeting Among Federal Agencies and Participation in National Conference of State Housing Finance Agencies

HUD, Justice, Treasury, and other interested federal agencies will meet annually to discuss emerging civil rights issues and new methods and programs to increase civil rights compliance in the low-income housing tax credit program. IRS will encourage the state housing finance agencies to invite HUD and Justice to the annual national conference of state housing finance agencies. HUD and Justice agree to designate personnel to conduct training and discuss emerging civil rights issues at the national conference.

Implementation

This MOU will become effective 30 days from the date of the last signature on this document.

The parties agree to confer on the interpretation and application of the memorandum as necessary and to conduct a mutual annual review of its operation.

Nothing in this MOU shall be construed to impair or affect i) HUD=s or Justice=s authority to enforce the Act, ii) the IRS=s authority to administer the low-income housing tax credit program, including complete administrative discretion to deny low-income housing tax credits in the event of a violation of the Act, or iii) the IRS's disclosure limitations under section 6103 of the Internal Revenue Code.

Exhibit 13-3
Sample Letter to Notify Building Owner of Potential Fair Housing Act Violations

Date

Owner
Address
City State ZIP

RE:
Project:
BIN Numbers:

Dear Owner:

Enclosed are Forms 8823, Low-Income Housing Credit Agencies Report of Noncompliance or Building Disposition, concerning certain Fair Housing Act [administrative/legal actions] reported by [the U.S. Department of Housing and Urban Development (HUD)/U.S. Department of Justice] to this agency. Our agency has submitted these Forms 8823 to the Internal Revenue Service.

Low-income housing tax credit properties are subject to Title VIII of the Civil Rights Act of 1968, also known as the Fair Housing Act ("Act"). The Act prohibits discrimination in housing and housing related transactions, including the sale, rental and financing of dwellings, based on race, color, religion, sex, national origin, familial status, and disability. See 42 U.S.C. sections 3601 through 3619. The Act also mandates specific design and construction requirements for multifamily housing built for first occupancy after March 13, 1991, in order to provide accessible housing for individuals with disabilities.

Section 1.42-9 of the Income Tax Regulations provides that the failure of low-income housing tax credit properties to comply with the requirements of the Act results in the denial of credits on a per-unit basis. Thus, an adverse final decision by the Secretary of HUD, an adverse final decision by a substantially equivalent state or local fair housing agency, or an adverse final judgment by a federal court, including a judgment enforcing compliance with the terms of a settlement agreement or consent decree, could result in the disallowance of credits, recapture of credits, and preclusion of future credits on the effected units. If the reduction in the number of the low-income units in the building(s) brings the project below the minimum set-aside requirement defined in section 42(g)(1) of the Internal Revenue Code, the entire amount of the credit for the project could be disallowed.

Your ability to enter into a settlement agreement concerning the particular Fair Housing Act problem with HUD, the Department of Justice, or the state or local fair housing agency may preclude the necessity of loss of low-income housing tax credits. It is incumbent upon you to work with the appropriate agency to resolve the problem.

Sincerely,

Name-Signature

CC: Management Contact

Chapter 14
Category 11i
Violations of the Available Unit Rule
Under Section 42(g)(2)(D)(ii)

Definition

This category is used to report violations of the Available Unit Rule (AUR)[1]; i.e., situations where an *initially* qualified household's income subsequently rises above 140 percent (170 percent in deep rent skewed developments) of the current income limit and a household that is not income qualified moves into the next available unit of comparable or smaller size.

The Available Unit Rule under IRC §42(g)(2)(D) states that if the income of the occupants of a low-income unit increases above 140 percent of the income limit (or 170 percent in deep rent skewed developments), the unit will continue to be treated as a low-income unit if the occupants initially met the income limitation and the unit continues to be rent restricted. If the income of the occupants of the unit increases above 140 percent of the applicable income limitation, the unit will cease to qualify as a low-income unit if any residential rental unit in the building (of a size comparable to, or small than, such unit) is occupied by a *new* resident whose income exceeds the income limitation.

Compliance on a Continuing Basis

The determination of whether a tenant qualifies for purposes of the low-income set-aside is made on a continuing basis, both with respect to the tenant's income and the qualifying income for the location, rather than only on the date the tenant initially occupies the unit.[2]

Changes in Area Median Gross Income

The determination of an over-income household is not limited to instances where the household's income increases. A unit may also become over-income if, subsequent to the initial income qualification, there is a decrease in the Area Median Gross Income (AMGI). Likewise, an increase in AMGI increases the income limitation used to calculate whether an owner must rent any available residential unit of comparable or smaller size to a new low-income tenant. See Rev. Rul. 94-57 for additional information.

Treatment of Vacated Over-Income Units

If an over-income household vacates a unit, it will be treated as an over-income unit subject to the Available Unit Rules until the effective date of the tenant income certification for the new income-qualified household that moves into the unit or the unit is rented to a nonqualifying tenant.

Next Available Unit Defined

The "next available unit" is any vacant unit, or any unit that is subsequently vacated in the same building, of a comparable or smaller size. Treas. Reg. §1.42-15(c) states that a unit is not available when the unit is no longer available for rent due to contractual arrangements that are binding under local law.

Comparable or Smaller Unit

A comparable or smaller unit is defined in § 1.42-15 as "a residential unit in a low-income building that is comparably sized or smaller than an over-income unit or, for deep rent skewed projects described in section 142(d)(4)(B), any low-income unit. For purposes of

---

[1] The terms Next Available Unit Rule (NAUR) and Available Unit Rule (AUR) are synonymous and can be used interchangeably.
[2] H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-89 (1986), 1986-3 (Vol. 4) C.B. 89.

determining whether a residential unit is comparably sized, a comparable unit must be measured by the same method used to determine qualified basis for the credit year in which the comparable unit became available." Since a comparable unit may need to be identified before the end of the year when the qualified basis is determined, an owner may consider a residential unit with similar square footage and amenities to be a comparable unit.

Summary

Key concepts of the Available Unit Rule include:

1. The Available Unit Rule is used to replace over-income households with new income-qualified households as available units are rented. Alternatively, over-income units may be returned to low-income status if the household's income decreases or the AMGI increases.

2. In a project containing more than one low-income building, the Available Unit Rule applies separately to each building.

3. Low-income units containing households whose income rises above 140% (or 170% for deep rent skewed projects) of the *current* income limit are still considered low-income units as long as the rent remains restricted and available units of comparable or smaller size are rented to qualified low-income households.

4. For purposes of determining whether a residential unit is comparably sized, a comparable unit must be measured by the same method used to determine qualified basis for the credit year in which the comparable unit became available. An owner may consider a residential unit with similar square footage and amenities to be a comparable unit.

5. The owner of a low-income building must rent all comparable units that are available or that subsequently become available in the same building to qualified residents in order to continue treating the over-income unit as a low-income unit. Once the percentage of low-income units in a building (excluding the over-income units) equals the percentage of low-income units on which the credit is based, failure to maintain the over-income units as low-income units has no immediate significance.

6. If any comparable or smaller unit that is available or that subsequently becomes available is rented to a nonqualified resident, all over-income units within the same building for which the available unit is comparable or *larger* lose their status as low-income units. See Treas. Reg. 1.42-15(f).

7. The Available Unit Rule should not be confused with the Vacant Unit Rule, which applies without regard to the income of existing tenants.

In Compliance

A building is in compliance when the current applicable fraction is at the applicable fraction on which credit is based. Units containing households whose incomes originally qualified, but currently exceed 140 percent (170 percent for deep rent skewed projects) of the current income limit are included in the applicable fraction as long as the rents for the units continue to be restricted.

Example 1: Change in Over-Income Units

A project consists of one building with 10 units of equal size. Units 1 through 8 are low-income units. Unit 9 is a market rate unit. Unit 10 is a vacant market rate unit. The applicable fraction for the credit is 80%. The current percentage of income-qualified tenants is 80% and the building is in compliance.

On July 1, 2000, the income of the tenants in units 6, 7 and 8 were determined to be over 14 percent of the income limit. The rents for these 3 units remained restricted. The current applicable fraction remains at 80% and the building continues to be in compliance.

To determine whether a noncompliance event could potentially occur, the owner calculated the applicable fraction without the over-income households as part of the numerator. This fraction is 50 percent (5/10). To remain in compliance, Unit 10 must be rented to a qualified household to replace one of the over-income households. In addition, if the tenant in Unit 9 (the other market rate unit) vacates, that unit must also be rented to a qualified household.

A qualified household moved into Unit 10 on August 1, 2000. At the time of the move in, the current applicable fraction (excluding all of the over-income units) has increased to 60 percent.

On August 31, 2000, the market rate household in Unit 9 vacated and a qualified household moved into Unit 9 on January 1, 2001. The applicable fraction (excluding all of the over-income units) has increased to 70 percent.

On December 31, 2000, the over-income household in Unit 6 vacated and a qualified household moved on February 1, 2001. The current fraction (excluding all of the over-income units) increases to 80%.

However, since all of the units are rent restricted, the applicable fraction is 100%. Management may now rent Units 7 and 8 to market rate households or they may convert the over-income households to market rents, depending on the terms of the leases. Once the percentage of low-income units in the building (excluding the over-income units) equals the percentage of low-income units on which the credit is based, failure to maintain the over-income units as low-income units has no immediate significance.

Example 2: Lease Reservation Signed Prior to the Effective Date of a Unit Becoming an Over-Income Unit

A project consists of one building with 10 units of equal size. The project is currently "in compliance" with respect to the qualified basis. Unit 10 is a vacant market rate unit. A market rate household signs a lease on June 25, 2000, for unit 10 and intends to move in on July 5, 2000. The lease term is from July 5, 2000 to June 30, 2001. The household in Unit 6 will be an over-income household effective July 1, 2000.

The building remains "in compliance" even though the available unit was *occupied* after the *effective* date of the over-income unit because a unit is not available for purposes of the Available Unit Rule if the unit is unavailable due to contractual arrangements that are binding under local law. See Treas. Reg. §1.42-15(c).

Out of Compliance

Under Treas. Reg. §1.42-15(c), noncompliance occurs when a comparable or smaller unit than the over-income unit is rented to a nonqualified household when the current applicable fraction (excluding all over-income units from the numerator, but not the denominator) is less than the applicable fraction for which the credit is based. The date of a noncompliance event is the date the unit the market unit household moves into the building or the reservation, if earlier.

Example 1: Moving In Nonqualified Household When Over-Income Households Have Not Been Replaced

A project consists of one building with ten units of equal size. Units 1 through 8 are low-income units. Unit 9 is a market rate unit. Unit 10 is a vacant market rate unit. The applicable fraction for the credit is 80 percent. The current applicable fraction is 80 percent and the building is presently in compliance.

Units 6 and 7 were determined to be over-income. The rents for these two units remain rent restricted. The current applicable fraction remains at 80%.

To determine whether a non-compliance event could potentially occur, the owner calculated the applicable fraction without the over-income households as part of the numerator. The applicable fraction is now 60 percent (6/10). To remain in compliance, Unit 10 must be rented to a qualified household to replace one of the over-income households.

A market rate household moved into Unit 10 on August 1, 2000. At the time of the move in, the current applicable fraction (excluding all of the over-income units) was 60 percent. The event triggered an Available Unit Rule violation. All the over-income units cease to be treated as low-income units. The date of noncompliance is August 1, 2000.

Example 2: Comparable Units

A mixed income building, with an applicable fraction of 85 percent, contains 85 tax credit units and 15 market rate units. Eleven of the low-income units are occupied by households with incomes that have increased above 140 percent of the income limit. The eleven over-income units consist of 4 three-bedroom, 5 two-bedroom, and 2 one-bedroom units. The next unit to be vacated is #99, a two-bedroom unit (not one of the eleven over-income units). The vacated unit is leased to a market rate tenant.

The building is out of compliance. To comply with the Available Unit Rule, the unit should have been leased to an income eligible household. Because the unit was leased to an ineligible tenant, all over-income units, for which #99 was a comparable or *larger*-sized unit, lose their status as low-income units. Thus, all 4 of the three-bedroom and all 5 of the two-bedroom units of the over-income units are out of compliance. The 2 one-bedroom units (which are smaller than the rented unit) are not out of compliance (See Treas. Reg. §1.42-15(f).)

Other Non-Compliance Issues

Violations of the Available Unit Rule can also result in noncompliance with other IRC §42 requirements. Specifically, consideration should be given to the following:

1. Minimum Set-Aside Requirement – as violation of the AUR may result in multiple over-income units losing the low-income status, the minimum set-aside requirement may not be met; i.e., the number of qualifying units falls below the minimum requirement. See chapter 10.

2. Annual Income Recertifications and the Recertification Waiver – if the building is 100% LIHC and the owner has a waiver of the annual income recertification under IRC §42(g)(8)(B), qualified low-income units in the building continue to be treated as qualified low-income units even if the owner is not completing annual tenant income certification or otherwise documenting that the units are not over-income. However if the building owner rents an available unit in the building to a nonqualified household, the owner will need to determine if any of the units in the building are over-income, despite having a recertification waiver in effect. Further, under Rev. Proc. 94-64 or Rev. Proc. 2004-38, renting a unit to a nonqualified household in a 100% LIHC building will result in the revocation of the waiver. See chapter 5.

3. Annual Certification – the owner may have incorrectly reported compliance with the AUR as part of the annual certification as described in Treas. Reg. §1.42-5(c). See chapter 7.

Addressing Violations

Once the Available Unit Rule has been triggered, a building can return to its pre-violation credit amount by renting any combination of market rate units, over-income units, and out of compliance low-income units to qualified households until the applicable fraction upon which the pre-violation credit amount is based is restored. The applicable fraction can also be restored if:

1. The tenant's income decreases to an amount below 140 percent of the income limit in place, or

2. The AMGI increases to an amount, such that 140 percent of the income limit is more than the tenant's income.

The date of correction is the date the last household, which restores the applicable fraction, moves into the building or the income of an existing household falls below the current income limit. Bringing a building back into compliance does not remove the adverse effects that may have occurred.

Chapter 15
Category 11j
Violation(s) of the Vacant Unit Rule
Under Reg. 1.42-5(c)(1)(ix)

Definition

This category is used to report violations of the Vacant Unit Rule (VUR); i.e., situations where an owner failed to make reasonable attempts to rent that unit, or the next available unit of comparable or smaller size, before renting units to tenants not having a qualifying income.

As part of the requirements for the annual certification, Treas. Reg. §1.42-5(c)(1)(ix) states, "If a low-income unit in the project became vacant during the year, that reasonable attempts were or are being made to rent that unit or the next available unit of comparable or smaller size to tenants having a qualifying income before any units in the project were or will be rented to tenants not having a qualifying income."

Reasonable Attempts

As long as reasonable attempts are being made to rent to qualified low income households, vacant LIHC units will continue to be included as qualified low-income units for purposes of determining the minimum set-aside (IRC §42(g)(1)) and calculating the applicable fraction (IRC §42(c)(1)(B)). What constitutes reasonable attempts to rent a vacant unit is based on facts and circumstances, and may differ from project to project depending on factors such as the size and location of the project, tenant turnover rates, and market conditions. Also, the different advertising methods that are accessible to owners and prospective tenants would affect what would be considered reasonable.[1]

Available Low-Income Unit Defined

The definition of an available low-income unit for purposes of the Vacant Unit Rule is the same as used for the Available Unit Rule. Treas. Reg. §1.42-15(c) states that a unit is not available when the unit is no longer available for rent due to contractual arrangements that are binding under local law. See Rev. Rul. 2004-82, Q&A #10.

Comparable Units

The definition of a comparable or smaller unit for purposes of the Vacant Unit Rule is the same as used for the Available Unit Rule; i.e., a residential unit that is comparably sized or smaller than the vacated unit. For deep rent skewed projects described in section 142(d)(4)(B), any low-income unit is considered a comparable unit. For purposes of determining whether a residential unit is comparably sized, a comparable unit must be measured by the same method used to determine qualified basis for the credit year in which the comparable unit became available. (See Treas. Reg. §1.42-15(a).) Since a comparable unit may need to be identified before the end of the year when the qualified basis is determined, an owner may consider a residential unit with similar square footage and amenities to be a comparable unit.

[1] Rev. Rul. 2004-82, Q&A #9.

In Compliance

A project is in compliance when reasonable attempts are made to rent vacant low-income units (comparably sized or smaller than the vacated units) to tenants having a qualifying income before any units are rented to nonqualifying tenants. A state agency's responsibility for reviewing the owner's compliance with the Vacant Unit Rule must include a review of the owner's advertising practices; i.e., a project will be considered in compliance when the owner makes reasonable efforts to rent vacant units to qualified low income households before renting any vacant units to nonqualifying tenants.

Example 1: Renting Market Rate Unit Before Low-Income Units[2]

> Twenty market rate units and ten low-income units previously occupied by income-qualified tenants, in a 200-unit mixed-use housing project are vacant. None of the low-income units are over-income units. The owner displayed a banner and for rent signs at the entrance to the project, placed classified advertisements in two local newspapers, and contacted prospective low-income tenants on a waiting list for the project and on a local public housing authority's list of section 8 voucher holders. These are customary advertising methods for apartment vacancies in the area where the project is located. Subsequent to the low-income unit vacancies, a market rate unit of comparable size to the low-income units became vacant. The owner rents five market rate units before any of the ten vacant low-income units.
>
> The owner is in compliance with the Vacant Unit Rule. The owner has used reasonable methods of advertising an apartment vacancy in the area of the project before renting a market rate unit. In addition, the Available Unit Rule is not violated be renting the market rate unit because there are no over-income units in the building.

A unit is not available for purposes of the vacant unit rule when the unit is no longer available to rent due to contractual arrangements that are binding under local law, such as a reservation entered into between a building owner and a prospective tenant.

Example 2: Low-Income Unit Not Available[3]

> A building has 10 units, consisting of 7 low-income units (none was an over-income unit) and 3 market rate units. All units in the building were occupied except for one market rate unit.
>
> A low-income unit became vacant on March 15, 2004, so the owner started advertising to rent the unit to an income-qualified tenant. On March 29, 2004 the owner agreed to rent the unit to an income-qualified household and the parties signed a reservation binding on both parties. The owner ceased advertising efforts for the low-income unit. The vacant market rate unit was rented on April 15, 2004. The low-income household signed their lease on April 30, 2004 and

[2] Rev. Rul. 2004-82, Q&A #9.
[3] Rev. Rul. 2004-82, Q&A #10.

moved in on May 1, 2004.

Since a reservation had been signed for the vacant low-income unit at the time the market unit was rented, the low-income unit was not available for rent and, therefore, the owner no longer needed to make reasonable efforts to rent the low-income unit.

Out of Compliance

Noncompliance occurs when the owner does not make reasonable attempts to rent vacant low-income units and rents units to nonqualifying tenants. If the Vacant Unit Rule is violated, all vacant units previously occupied by qualified households lose their low-income status and are not considered qualified units. The date of noncompliance is the date the first low-income tenant moved out of the now vacant units.

Example 1: Owner Stopped Making Reasonable Efforts to Rent Low-Income Housing Units

The owner of a mixed-use LIHC project with 100 units stopped advertising efforts to attract low-income tenants on January 15, 2004. 15 of the 25 market rate units are vacant and 25 of the 75 low-income units are vacant at the time the state agency conducts a tenant file review. The LIHC units were vacated between September 25, 2003 and March 31, 2004.

The project is out of compliance is September 25, 2003, when the first currently vacant low-income unit was vacated.

Failure to Provide Information

If it is determine that an owner is not make reasonable attempts to rent vacant low-income units, the owner will need to provide the state agency a list of all vacant low-income units in the project. Under Treas. Reg. §1.42-5(b)(1)(v), owners are required to maintain records identifying vacant low-income units and information that shows, when, and to whom, the next available unit was rented. Failure to provide the needed information will result in a finding of noncompliance under 11f , Project failed to meet minimum set-aside requirement, because the owner has failed to establish that the minimum set-aside has been met.[4] Under IRC §6001, every taxpayer is required to maintain records sufficiently detailed to prepare a proper tax return. This requires the maintenance of such permanent books and records sufficient to establish the amounts of gross income, deductions, *credits*, or other matters to be shown on the taxpayer's return. This requirement extends to the preparation and maintenance of records sufficient for demonstrating compliance with the Vacant Unit Rule.

[4] The legislative history explains that vacant units formerly occupied by low-income individuals may continue to be treated as occupied by a qualified low-income individual for *purposes of the set-aside* requirement provided that the owner has not violated the vacant unit rule.

Addressing Violations

A project may return to its pre-violation status if a sufficient number of vacant units are rented to qualified low-income households.

Example 1: Owner Restored Applicable Fraction

> The owner of a mixed-use LIHC project with 100 units stopped advertising efforts to attract low-income tenants on January 15, 2004. 15 of the 25 market rate units are vacant and 25 of the 75 low-income units are vacant. The LIHC units were vacated between September 25, 2003 and March 31, 2004.
>
> The project violated the Vacant Unit Rule on September 25, 2003, when the first currently vacant low-income unit was vacated. The owner resumes advertising efforts on June 18, 2004, and rented 13 former market rate units and 12 out of compliance low-income units between June 30, 2004 and November 18, 2004 to income-qualified tenants. The building is restored to its pre-violation status when the last household, which restores the applicable fraction, moves into the building; i.e., November 18, 2004, when 75% of the units were restored to the status of low-income units.

Chapter 16
Category 11k
Owner Failed to Execute and Record Extended Use Agreement Within Time Prescribed by Section 42(h)(6)(J)

Definition

This category is used to report buildings for which an extended low-income housing commitment (extended use agreement) is not in effect; i.e., the extended use agreement is not executed, is not recorded, or fails to meet the requirements of IRC §42(h)(6). No credit is allowable for a building in a year unless an extended use agreement is in effect at the end of the year. See IRC §42(h)(6)(A). If it is determined that an extended use agreement was not in effect at the beginning of the year, IRC §42(h)(6)(J) permits the owner to correct the problem within one year from the date of the determination.

For all buildings allocated tax credits after 1989, IRC §42(h)(6) requires owners of tax credit properties to enter into an extended use agreement with the state agency that allocated the credits to the project. Building owners must agree to a long-term commitment beginning on the first day of the 15-year compliance period and ending on the later of (1) the date specified by the state agency in the agreement or (2) the date which is 15 years after the close of the 15-year compliance period. In other words, the owner covenants to maintain the property as a low-income housing project for at least 30 years.

Extended use agreements must:

1. specify that the applicable fraction for the building for each year in the extended use period will not be less than the applicable fraction specified in the extended use agreement and which prohibits the eviction or the termination of tenancy (other than for good cause) of an existing tenant of any low-income unit, or any increase in the gross rent with respect to such unit not otherwise permitted under IRC §42.

2. allow individuals (whether prospective, present, or former occupants) who meet the income limitation applicable to the building under IRC §42(g) the right to enforce in state court the requirements and prohibitions under IRC §42(h)(6)(B)(i), including maintaining the applicable fraction and prohibiting the eviction or the termination of tenancy (other than for good cause) of an existing tenant of any low-income unit, or any increase in the gross rent with respect to such unit not otherwise permitted under IRC §42. These prohibitions apply through out the extended use period.[1]

---

[1] Rev. Rul. 2004-82, 2004-35 I.R.B., Q&A #5 explains that IRC §42(h)(6)(B)(i) requires that an extended use commitment include a prohibition during the extended use period against (1) the eviction or the termination of tenancy (other than for good cause) of an existing tenant of any low-income unit (no-cause eviction protection) and (2) any increase in the gross rent with respect to the unit not otherwise permitted under IRC §42. When Congress amended IRC §42(h)(6)(B)(i) to add the language cited, IRC §42(h)(6)(E)(ii) was already part of IRC §42. As a result, Congress must have intended the amendment to IRC §42(h)(6)(B)(i) to add an additional requirement beyond what was contained in IRC §42(h)(6)(E)(ii), which already prohibited the action described in that section for the 3 years following the termination of the extended use period. Because the

3. prohibit the disposition to any person of any portion of the building unless all of the building is disposed of to that person.

4. prohibit the refusal to lease to section 8 voucher holders because of the status of the prospective tenant as such a holder,

5. provide that the agreement is binding on all successors of the taxpayer, and

6. the extended use agreement must be recorded as a restrictive covenant with respect to the property under state law.

In Compliance

The owner is in compliance when the extended use agreement is executed, recorded, and meets the requirements of IRC §42(h)(6). State agencies should require documentation that the extended use agreement has been recorded before issuing the Form 8609.

Out of Compliance

The owner is out of compliance in the absence of a properly executed and recorded extended use agreement and no credit is allowable if the extended use agreement is not in effect as of the end of a taxable year in the credit period. However, if the owner executes and records an extended use agreement within one year after the determination that an extended use agreement is not in effect, the noncompliance is corrected and the taxpayer can claim the low-income housing credit for past taxable years. If the noncompliance is not remedied within one year after the notification, the taxpayer loses the credit for past taxable years until the taxable year in which the extended use agreement is properly in effect.

Example 1: Owner did not Execute and Record Extended Use Agreement

The owner of a LIHC project placed the buildings in service in February 1998 and submitted the documentation for final approval in June 1998. The state agency issued the Form 8609 in September 1998, prior to receiving the executed extended use agreement from the owner. The owner claimed the credit for the 1998 tax year. The state agency later determined that an extended use agreement was not in effect for the 1998 tax year (the first year of the credit period), issued a notice of noncompliance to the owner in February 1999, and submitted Form 8823 to the IRS in May 1999, reporting the absence of the extended use agreement. In December 2000, the owner and state agency executed the extended use agreement, and recorded it.

---

requirements of IRC §42(h)(6)(B)(i) otherwise apply for the extended use period, Congress must have intended the addition of the prohibition against the actions described in subclauses (I) and (II) of IRC §42(h)(6)(E)(ii) to apply throughout the extended use period. In Rev. Proc. 2005-37, 2005-28 I.R.B. 79, the Service established a safe harbor under which housing credit agencies and project owners could meet the requirements of IRC §42(h)(6)(B)(i) in lieu of an extended use agreement which specifically included the language of subclauses (I) and (II) of IRC §42(h)(6)(E)(ii).

The date of noncompliance is December 31, 1998, when the state agency determined that an extended use agreement was not in effect as of the end of the tax year. Since the owner failed to execute the extended use agreement within one year from the date of the notification, the owner will lose credits for 1998 and 1999, but can resume claiming the credits for 2000.

Back in Compliance

The owner is back in compliance when the extended use agreement is executed and recorded within one year of the determination of noncompliance. If the extended use agreement is not in effect within one year of the determination that an extended use agreement was not in effect, the taxpayer loses low-income housing credits for past taxable years and cannot claim credit with respect to any building for which an extended use agreement is not in affect by the end of the applicable taxable year.

Chapter 17
Category 11l
Low-Income Units Occupied by Nonqualified Full-Time Students

Definition

This category is used to report LIHC units occupied by nonqualified full-time student households. A unit is *not* considered to be occupied by low-income individuals if all the occupants of such unit are students, no one of whom is entitled to file a joint return.[1]

Defining "Student"

IRC §151(c)(4) defines, in part, a "student" as an individual, who during each of 5 calendar months during the calendar year in which the taxable year of the taxpayer begins, is a full-time student at an educational organization described in IRC §170(b)(1)(A)(ii). Treas. Reg. §1.151-3(b) further provides that the five calendar months need not be consecutive.

The determination of student status as full or part-time should be based on the criteria used by the educational institution the student is attending.

An educational organization, as defined by IRC §170(b)(1)(A)(ii), is one that normally maintains a regular faculty and curriculum, and normally has an enrolled body of pupils or students in attendance at the place where its educational activities are regularly carried on. The term "educational organization" includes elementary schools, junior and senior high schools, colleges, universities, and technical, trade and mechanical schools. It does not include on-the-job training courses.

Units Comprised Entirely of Full-Time Students

Units comprised of full-time students (no one of whom is entitled to file a joint return) do not qualify as low-income units. However, there are exceptions as outlined in IRC §42(i)(3)(D). This section provides that a unit shall not fail to be treated as a low-income unit merely because it is occupied

1. by an individual who is:
   I. a student receiving assistance under Title IV of the Social Security Act, or
   II. a student enrolled in a job training program receiving assistance under the Job Training Partnership Act or under other similar Federal, State or local laws, or

2. entirely by full-time students if such students are
   I. single parents with children all of whom are students and such parents and children are not dependents (as defined in IRC §152) of another individual, or
   II. married and file a joint return.

In the case of a single parent with children, the legislative history explains that *none* of the tenants (parent or children) can be a dependent of a third party. See S. Prt. No. 103-37, 103d Cong., 1st Sess. 74 (1993).

[1] H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-89 (1986), 1986-3 (Vol. 4) C.B. 89.

In Compliance

A unit is in compliance when (1) it is not occupied entirely by full-time students at qualifying educational organizations for five or more months during the calendar year in which the taxable year of the taxpayer begins, or (2) it is occupied entirely by full-time students that meet one of the exceptions identified in IRC §42 (i)(3)(D). Also, a married couple that is *entitled* to file a joint tax return, but has not filed one, still satisfies the exception under IRC §42(i)(3)(D)(ii)(II).

Example 1: Newly Married Students

> A recently married full-time student couple is looking for housing. The couple is income qualified, but they have not yet filed their first tax. Even if the couple does not file a joint tax return, they are still entitled to file a joint return and thus satisfy the exception under IRC §42(i)(3)(D)(ii)(II).

Example 2: Full Time Students

> Two students attending college full time and working part time share a low-income housing unit with a third person who works full time and is not enrolled at the college. The students combined incomes qualify them as a household for low-income housing.

Example 3: Qualified Educational Organization

> An individual is participating in an accreditation program at a research facility. There is no tuition or degree, but the individual receives a small stipend for services provided and an accreditation certificate upon completion of the program. The program is similar to a doctor's residency. The research facility is not an educational organization and the individual would qualify for low-income housing.

Out of Compliance

A unit is out of compliance when (1) it is occupied entirely by full-time students at qualifying educational organizations for five or more months during a calendar year in which the taxable year of the taxpayer begins, or (2) full-time students do not meet one of the exceptions identified in IRC §42 (i)(3)(D). The out of compliance date is the first day of the fifth month during the calendar year that the full-time student attended a qualifying educational organization.

Example 1: Continuing Student Status

> An otherwise qualifying low-income individual occupies a unit in June. She attended a qualifying educational organization for two months during the calendar year prior to the date she occupied the unit. From September through December of the calendar year she again attends a qualifying educational organization.

The unit is out of compliance on November 1, the first day of the fifth month she attended a qualifying educational organization during the calendar year.

Back in Compliance

The unit is back in compliance when is no longer occupied entirely by full-time students or the tenant qualifies under one of the exceptions under IRC §42(i)(3)(D).

2. IRC §170(b)(1)(A)(ii).
3. IRC §42(i)(3)(D).

Chapter 18
Category 11m
Owner Did Not Properly
Calculate Utility Allowance

Definition

This category is used to report noncompliance with the utility allowance requirements outlined in Treas. Reg. §1.42-10. An allowance for the cost of any utilities, other than telephone and cable[1], paid directly by the tenant(s) is included in the computation of gross rent under IRC §42(g)(2)(B). A separate estimate is computed for each utility and different methods can be used to compute the individual utility allowances. The utility allowance is computed on a building-by-building basis. The maximum rent that may be paid by the tenant must be reduced by utility allowance(s) obtained in the following manner.

1. If a building receives assistance from Farmer's Home Administration (FmHA), or tenants in the building receive FmHA housing assistance, then the FmHA utility allowance is used for all the rent restricted units in the building.

2. Buildings that are both HUD regulated and FmHA assisted use the FmHA utility allowance for all the rent restricted units in the building.

3. HUD regulated buildings use the HUD utility allowances for all rent restricted units in the building.

4. If a building is neither FmHA assisted nor HUD regulated, and no tenants receive receives FmHA assistance, the units occupied by one or more tenants receiving HUD rental assistance payments must use the applicable public housing authority utility allowances established for the existing Section 8 housing program. Other rent restricted units in the building use the public housing authority allowance as well, unless a utility company estimate is obtained and then that estimate becomes the appropriate allowance *for the building* (except for the HUD assisted units which will continue to use the public housing authority allowance).

5. If neither the building nor tenants are subject to the rules described in 1-4 above, then the local public housing authority (PHA) allowance is used. However, if an estimate is obtained for any unit from a utility company, that estimate is used as the utility allowance for all similar units in the building.

Utility Company Estimates

Under Treas. Reg. §1.42-10(b)(4)(ii)(B), any interested party (tenant, owner, or state agency) may request a written estimated cost of that utility for a unit of similar size and construction *for the geographic area in which the building is located*. This estimate becomes the appropriate utility allowance for all rent-restricted units of similar size and construction in the building. The local utility estimate is not available to buildings/tenants subject to Rural Housing Service or HUD jurisdiction.

[1] Cable service is not a utility. It is a discretionary cost, similar to telephones, and is not included in the gross rent computation.

Until further guidance is provided through administrative ruling or guidance[2], the election to use a local utility company estimate is permanent; i.e., the taxpayer cannot switch back and forth between the local PHA and utility company estimates.

State agencies have reported that although utility companies may be willing to provide interested parties (owner, tenant, state agency) with an initial estimate, utility companies are increasingly unwilling to provide estimates on an on-going basis. Accordingly, until further guidance is provided through administrative ruling or regulation, the Service will not challenge the owner's return to using the applicable PHA utility allowance, provided that:

1. The taxpayer has demonstrated to the state agency that the local utility company was unwilling to provide an updated estimate, and

2. The owner has *written* approval from the state agency to use a mutually agreed upon utility allowance.

Using Public Housing Authority Estimates

State agencies have reported that the local PHA utility allowances do not always reflect a fair approximation of actual utility costs for such buildings. Accordingly, until further guidance is provided through administrative ruling or regulation, taxpayers may calculate utility allowances for the rent-restricted units in the building based upon an average of the actual use of similarly constructed and sized units *in the building* using actual utility usage data and rates, provided that the taxpayer has written approval from the state agency.

If an owner computes the utility allowance estimates based on the expected or historical use by the LIHC buildings/units, the estimate must be calculated in a reasonable manner and *contemporaneously* documented[3] to show how the estimate was determined. State agencies should review the methodology used to calculate the estimate for reasonableness, and ensure that the estimate is computed accurately.

Updating Utility Allowances

If the applicable utility allowance for a unit changes, the new utility allowance must be used to compute gross rents of LIHC units due 90 days after the change. As a practical matter, utility allowances are usually reviewed when HUD updates the Area Median Gross Income (AMGI) for the location (which may change the allowable gross rent). If the applicable utility allowance for a unit changes, the new allowance must be used to compute gross rents due 90 days after the change.

In Compliance

Low-income housing projects are in compliance when the appropriate utility allowance is used, the utility allowance is properly calculated, and rents are reduced for a utility allowance when utilities are paid directly by the tenant.

Example 1: Utility Allowance Increases

[2] Chief Counsel has opened a regulation project. See Federal Register/Vol. 70, No. 209. The regulation number is 1545-BC22 and the sequence number is 2597. This chapter will be updated when the regulation is revised.
[3] IRC §6001 requires all taxpayers to keep adequate records to support the items represented on their tax returns, including utility allowances.

The maximum gross rent is $500. The owner charged rent of $450, which reflected a $50 utility allowance; i.e., $450 rent + $50 utility allowance = $500 gross rent. The annual utility allowance estimate increases to $75. The owner reduces the rent to $425 based upon the increased utility allowance of $75; for a gross rent of $500 ($425 + $75 = $500).

Example 2: Local Utility Company No Longer Provides Estimates

The owner used estimates of utility use as provided by the local utility company to determine the utility allowance. The owner asked the local utility company for an updated estimate of use by similar units in the local area. The utility company informed the owner that they no longer provide estimates. With the state agency's approval, the owner begins using the current PHA allowance.

Example 3: Public Housing Authority's (PHA) Utility Allowance is Outdated

The owner used estimated utility use as provided by the local utility company to determine the utility allowance. The owner reviewed the allowance and asked the local utility company for an updated estimate of use by similar units in the local area. The utility company informed the owner that it no longer provides estimates. The owner and state agency agree that the PHA's utility allowance did not reflect current costs. With the state agency's approval, the owner begins using a utility allowance based on the actual utility use for the LIHC building. The owner may continue to use actual utility costs to compute the utility allowance until further guidance is provided through administrative ruling or regulation.

Example 4: Increased Utility Allowance Does Not Cause Rent to Exceed Limit

The maximum gross rent limit is $500, but the owner charged $415 rent and a $50 utility allowance for a total of $465. The utility allowance increases to $60 the next year. The owner makes no adjustment to the rent. The owner is in compliance. The owner is charging $415 rent and a $60 utility allowance for a total of $475, which continues to be below the gross rent limit of $500.

Out of Compliance

Low income housing projects are considered out of compliance when the appropriate utility allowance is not used, the utility allowance is not properly calculated, or rents are not reduced for a utility allowance when utilities are paid directly by the tenant. Lack of annual written documentation of utility allowances is considered noncompliance; without proof of the amount of the allowance, there is no way to correctly compute the rent.

Back in Compliance

A unit is considered back in compliance when the rent charged is reduced and correctly reflects the utility allowance. The date of correction is date that the rents correctly reflect the utility allowance.

Example 1: The maximum gross rent is $500. Beginning on March 1, 2003, the owner charged $450 rent and a $75 utility allowance; the total rent is $525. The rent is $25 over the ceiling. The error was discovered during a state agency's review on April 13, 2004.

The owner immediately reduces the rent charged to $425 for rents due beginning on May 1, 2004. The effective date of the new rent, or May 1, 2004, is the date the units are back in compliance.

Chapter 19
Category 11n
Owner has Failed to Respond to Agency Requests for Monitoring Reviews

Definition

This category is used to report owners of low-income properties that failed to respond to agency requests for monitoring reviews. Under the inspection provision Treas. Reg. §1.42-5, the state agencies must have the right to perform an on-site inspection of any low-income housing project at least through the end of the 15-year compliance period for the buildings in the project. State agencies (or their representatives) must conduct on-site inspections, inspect units, and review income (re)certifications, supporting documentation, and rent records for the tenants in those units, and otherwise meet the provisions listed in Treas. Reg. §1.42-5(a)(2)(i)(A), (B), (C), and (D).

The review of tenant records may be undertaken wherever the owner maintains or stores the records. A state agency may give an owner reasonable notice that an inspection of the building and low-income units or tenant record review will occur so that the owner may notify tenants of the inspection or assemble tenant records for review (for example, 30 days notice of inspection or review). However, the units and tenant records to be inspected and reviewed must be chosen in a manner that will not give owners of low-income housing projects advance notice that a unit and tenant records for a particular year will or will not be inspected and reviewed.

In Compliance

An owner is in compliance when requests for site visitations and access to tenants' records are honored without unreasonable postponements.

Example 1: Reasonable Request for Postponement

> A state agency notified an owner that a property was to be inspected and requested that the inspection be conducted in 30 days. The owner requested that the inspection be postponed for two weeks because the permanent on-site manager had scheduled training during that time period.
>
> This is a reasonable request. Although the owner arranged for a temporary manager, the permanent manager is more knowledgeable regarding the day-to-day operations, procedures, and tenant files.

Out of Compliance

An owner is out of compliance when requests for site visitations or tenant file inspections are denied or unreasonably postponed. A state agency should accommodate the owner's valid needs to reschedule a site visit or tenant file review, but should not allow owners to delay or circumvent compliance monitoring reviews.[1] The date of noncompliance is the earlier of the date (1) the owner refused to allow a site visitation or access to tenants' records or (2) first postponed the site visit or access to tenant's records.

Example 1: Repetitive Delays

> A state agency notified an owner on April 21, 2004, that a property was to be inspected and requested that the inspection be conducted on May 20, 2004. On May 2, 2004, the owner requested that the inspection be postponed until June 16, 2004, to give them time to get the records together. Then, the day before the inspection, the owner called to say that the property manager would not be available. The inspection was rescheduled for June 28, 2004, but the owner called again on June 27 to say that not all the records were available at the site and it would be more convenient to work at his office during the week of July 12, 2004.
>
> The owner's repeated requests for postponements are not reasonable. The property is out of compliance on May 2, 2004.

State agencies may remove a LIHC property from the program if the owner fails to respond to repeated notices for monitoring reviews. See chapter 21 for complete discussion.

Back in Compliance

The owner is back in compliance when the agency performs the site visit and/or reviews the tenants' files.

Example 1: Site Visit Performed Late

> A state agency filed form 8823 noting noncompliance because the owner refused to allow the state agency's representatives on the property to perform the physical inspection. The date of noncompliance was August 15, 2004. The taxpayer received the IRS' notice identifying the noncompliance, after which the site inspection was completed on December 15, 2004, when state agency resources were available.
>
> The property is back in compliance on December 15, 2004 and a Form 8823 should be filed noting the correction date.

References

1. IRC §42(i).
2. TD 8430, 1992-2 C.B. 14

[1] The IRS recommends that if the site visit/file review can be rescheduled within 45 days of the initial date, the appointment should be reschedule; longer postponements should be discouraged except under unusual circumstances. There is no legal authority for allowing this time period: it is similar to IRS policy for rescheduling audit appointments during an audit. See Internal Revenue Manual 4.10.2.8.3(4).

Chapter 20
Category 11o
Low-Income Units
Used on a Transient Basis

Definition

This category is used to report noncompliance when units have been used on a transient basis. Generally, the length of the initial lease agreement determines whether use is transient. A unit is nontransient if the initial lease term is six months or more. [1]

There are two exceptions to the general rule that the initial lease term must be 6 months or longer.

Buildings Used for Transitional Housing for the Homeless Under IRC §42(i)(3)(B)(iii)

Certain transitional housing for the homeless may be considered used other than on a transient basis provided the residential rental unit contains sleeping accommodations and kitchen and bathroom facilities and is located in a building-

1. which is used exclusively to facilitate the transition of homeless individuals[2] to independent living within 24 months, and

2. in which a government entity or qualified nonprofit organization[3] provided such individuals with temporary housing and supportive services designed to assist such individuals in locating and retaining permanent housing.

Single-Room Occupancy (SRO) Units Under IRC §42(i)(3)(B)(iv)

SRO units which permit the sharing of kitchen, bathroom, and dining facilities, shall not be treated as used on a transient basis merely because it is rented on a month-by-month basis.

In Compliance

A unit is in compliance with this requirement if the *initial* lease term *for each tenant* is at least six months. The presence of a six month initial lease is the customary evidence used to document the owner and tenant's intent to enter into a nontransient rental agreement.

---

[1] H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-89 (1986), 1986-3 (Vol. 4) C.B. 89.) Residential units must be for use by the general public and all of the units in a project must be used on a nontransient basis. …Generally, a unit is considered to be used on a nontransient basis if the initial lease term is six months or greater. Additionally, no hospital, nursing home, sanitarium, life care facility, retirement home providing significant services other than housing, dormitory, or trailer park may be a qualified low-income project..…certain single room occupancy housing used on a nontransient basis may qualify for the credit, even though such housing may provide eating, cooking, and sanitation facilities on a shared basis.

[2] Within the meaning of section 103 of the Stewart M. McKinney Homeless Act (42 U.S.C. 11302) , as in effect on the date of the enactment of this clause.

[3] As defined in IRC §42(h)(5).

Example 1: Tenant Vacates Before End of the Lease

> A couple vacates their unit before fulfilling their initial six-month lease because the husband accepted a job in another state. Because the couple was subject to a valid six-month lease and vacated the unit for a valid reason, the low-income unit was not used on a transient basis.

Out of Compliance

Other than the two exceptions for certain transitional housing and single room occupancy units, a unit is out of compliance if the unit is rented on a transient basis. The out of compliance date is the effective date of the initial tenant income certification. A unit is out of compliance if:

1. no lease is on file for the tenant, or

2. the tenant's initial lease term is not at least six months.

Example 1: Month-to-Month Initial Leases

> A state agency discovers that an owner of a 100 unit LIHC property (not a SRO or transitional housing) established a policy of signing month-to-month leases at the time of initial occupancy.
>
> At the time of the review, 84 units are occupied by households with initial month-to-month leases. All 84 units are out of compliance based on the effective date of the initial tenant income certification.

Back in Compliance

Noncompliance is corrected when a lease with a term of at least six months is executed. The correction date is the effective date of the new lease.

Chapter 21
Category 11p
Project is No Longer in Compliance
Nor Participating in the Program

Definition

This category should be used to notify the Internal Revenue Service that a building is entirely out of compliance and is no longer participating in the program.

1. The determination that an LIHC building is entirely out of compliance and will not be in compliance at any time in the future is a recapture event under IRC §42(j).

2. The filing of a Form 8823 for this category also puts the IRS on notice that the state agency is no longer performing monitoring activities with respect to the property.[1]

3. The building is no longer considered a qualified low-income building under IRC §42(c)(2)(A).[2] No credit is allowable in the remaining years of the credit period, even if the building complies with all the requirements of IRC §42.

Out of Compliance

A state agency may find that a building is no longer in compliance with the LIHC program requirements, and thus, is no longer participating in the program. The following discussion provides a broad overview of issues that may justify terminating an owner's participation in the program. It is not an exhaustive list; state agencies should consider each case individually based on the specific facts and circumstances.

Return of Credits to State Agency

Under certain circumstances, a state agency may obtain return of previously allocated low-income housing credits. In accordance with Treas. Reg. 1.42-14(d)(2)(ii), these credits may be returned up to 180 days following the close of the first tax year of the credit period for the building that received the allocation. If a credit is returns within 180 days following the close of the first taxable year of a building's credit period as provided in Treas. Reg. §1.42-14(d)(2)(ii), and a Form 8609, low-income Housing Credit Allocation and Certification, has been issued for the building, the state agency must notify the Internal Revenue Service that the credit has been returned.

If only part of the credit has been returned, this notification requirement is satisfied when the state agency attaches to an amended Form 8610, Annual Low-Income Housing Credit Agencies Report, the original of an amended Form 8609 reflecting

[1] Treas. Reg. §1.42-5(e)(3).
[2] IRC §42(c)(2) states that the term "qualified low-income building" means any building which is part of a qualified low-income housing project at all times during the period beginning on the 1st day in the compliance period on which such building part of such a project, and ending on the last day of the compliance period with respect to such building.

the correct amount of credit attributed to the building together with an explanation for filing of the amended forms. The state agency must send a copy of the amended Form 8609 to the owner of the building.

If the building is not issued an amended Form 8609 because all of the credit allocated to the building is returned, notification to the Internal Revenue Service is satisfied by following the requirements prescribed by Treas. Reg. 1.42-5(e)(3) for filing Form 8823.

Treas. Reg. §1.42-14(d)(2)(iv) specifies the reasons for the return of the entire amount of allocated credit:

1. The building is not placed in service within the required time period or fails to meet the minimum set-aside requirements of IRC §42(g)(1) by the close of the first year of the credit period.

2. The building does not comply with the terms of its credit allocation. The terms of an allocation are the written conditions agreed to by the state agency and the allocation recipient in the allocation document.

3. The owner and state agency mutually agree to cancel an allocation of credit by mutual consent.

4. The state agency determines, under IRC §42(m)(2), that an amount of credit allocated to a project is not necessary for the financial feasibility of the project and its viability as a qualified low-income housing project throughout the credit period.

<u>IRS Notification</u>

An attachment should be used to explain that the credits are being returned under the authority of Treas. Reg. 1.42-14(d)(2)(ii) and why the property did not qualify.

<u>Owner Notification</u>

As provided in section 1.42-14(d)(3)(i), after a state agency determines that building or project is not in compliance for the reasons 1, 2 or 4 above, the state agency must provide written notification to the allocation recipient, or its successor in interest, that all or part of the allocation is no longer valid. The notification must also state the amount of the allocation that is no longer valid. The date of the notification is the date the credit is returned by the state agency.

If an allocation is cancelled by mutual consent as noted in number 3 above, there must be a written agreement signed by the state agency and the allocation recipient, or its successor in interest, indicating the amount of the allocation that is returned to the state agency. The effective date of the agreement is the date the credit is returned to the state agency.

Egregious Noncompliance with Program Requirements

Egregious noncompliance is conspicuous, flagrant, and systemic in nature and includes the failure to make reasonable attempts to comply with the requirements of the program, or careless, reckless, or intentional disregard of program requirements.

Example 1: Failure to Make Reasonable Attempts to Comply with Program Requirements

The owner did not allow physical inspections or tenant file reviews after the end of the 10-year credit period.

Explanations from the owner should be solicited and analyzed for reasonableness. It is important that the owner be given an opportunity to respond and provide explanations. The reasonableness of the explanations should be evaluated for credibility, presence of corroborative or contradictory evidence, and collateral evidence from third party sources. Refer to chapter 3 for additional guidance.

An attachment to Form 8823 should be used to explain the extent of noncompliance.

The Owner has Voluntarily and Permanently Withdrawn From the Program and is No Longer Claiming Credits

An owner, during the 15-year compliance period, may voluntarily withdraw a property from the low-income housing credit program, but retain ownership. The building still exists physically, but is not being operated as an LIHC property. For example, the owner may have converted the entire building to a use other than as an LIHC housing project or 100% of the units may be vacant (and the owner has no intention of renting any of the units in the future).

An attachment to the Form 8823 should be used to explain why the property was withdrawn and identify the last year the property was in service. This information is needed for the IRS to determine whether the owner properly recaptured accelerated credits.

Failure to Respond to Repeated Requests for Reports, Certifications, Reviews, or Other Essential Communication

State agencies may remove an LIHC property from the program if the owner fails to respond to *repeated* notices for monitoring reviews[3], or annual reports and owner certifications are not submitted, *and* Forms 8823 identifying the noncompliance were previously submitted to the IRS.

1. Under the inspection provisions of Treas. Reg. §1.42-5(d)(1), the state agency must have the right to perform an on-site inspection of any low-income housing project at least through the end of the compliance period of the buildings in the project.

2. Under the certification provisions of Treas. Reg. §1.42-5(c), state agencies may remove a property from the program if annual reports and owner certifications are not submitted

A state agency should send follow-up notices clearly stating that failure to respond will result in the agency notifying the IRS that the property is no longer in compliance and is no longer participating in the LIHC program. See Treas. Reg. §1.42-5(e)(2), which requires the state agency to provide prompt notification to the owner if the project is not in compliance with the provisions of IRC §42.

The date of noncompliance is the first day of *the first year* that the owner failed to provide annual reports or certifications or did not respond to a request for the physical inspection of the property.

[3] See Treas. Reg. § 1.42-5(c)(2).

Building No Longer Participating in the Low-Income Housing Program

When a building is no longer in compliance nor participating in the Low-Income Housing Credit Program, state agencies need to address two issues, as discussed below.

Extended Low-Income Housing Commitment

IRC §42(h)(6)(D) requires a property owner to commit to the low-income housing program for a minimum of 30 years. The commitment is documented as a restrictive covenant against the property and is recorded against the property as a deed restriction governed by state law. Commonly know as “extended use agreements”, these covenants are agreements *between the owner and state agency*. Consideration should be given to enforcing the agreement through a civil court proceeding. However, when a building or project is removed from the program, state agencies have discretionary authority to release the extended use agreement and remove the deed restriction.

Protection of Tenants Rights

Under IRC §42(h)(6)(E)(ii), there are two requirements that must be met when an extended use agreement is terminated:

1. No eviction or termination of tenancy (other than for good cause) of an existing tenant of any low-income unit before the close of the 3-year period following the termination of the extended use agreement, and

2. No increase in the gross rent of any unit occupied by an existing tenant before the close of the 3-year period following the termination of the extended use agreement, not otherwise permitted under IRC §42. In other words, units occupied by income-qualified tenants continue to be rent restricted for three years, or until the tenants vacate the units.

Chapter 22
Category 11q
Other Noncompliance
Qualified Nonprofit Organization Failed to Materially Participate

Definition

IRC §42(h)(5) requires that each state set aside at least 10% of its state housing credit ceiling for allocations to projects in which qualified nonprofit organizations own an interest, and materially participate in the development and operation of the projects. “Qualified nonprofit organization” is defined as an IRC §501(c)(3) or 501(c)(4) organization exempt from tax under IRC §501(a) that is determined by the state agency as not being affiliated with or controlled by a for-profit organization, and one of the exempt purposes of the organization includes the fostering of low-income housing.

For purposes of this allocation, a nonprofit organization must have an ownership interest in the low-income housing project throughout the 15-year compliance period and materially participate in the *development* and *operation* of the project. Whether a nonprofit sponsor materially participates will depend on the application of IRC §469(h) to the facts and circumstances of a given project.

Under IRC §469(h)(1), the nonprofit must participate on a *regular, continuous,* and *substantial* basis in the development and operation of the project.[1] Although this standard is vague, the legislative history suggests the following guidelines in defining material participation in a business activity:

1. Material participation is most likely to be established in an activity that constitutes the principal business/activity of the taxpayer,

2. Involvement in the actual operations of the activity should occur. That is, the services provided must be integral to the operations of the activity. Simply consenting to someone else’s decisions or periodic consultation with respect to general management decisions is not sufficient.

3. Participation must be maintained throughout the year. Periodic consultation is not sufficient.

4. Regular on-site presence at operations is indicative of material participation.

5. Providing services as an independent contractor is not sufficient.

Accordingly, a nonprofit entity will be considered to materially participate where it is regularly, continuously, and substantially involved in providing services integral to

[1] Treas. Reg. §1.469-5T provides rules for determining the material participation for individuals. IRC §469(h)(4) and Treas. Reg. §1.469-5T(g)(3) provide rules for determining the material participation of certain corporations. Because neither of these provisions applies to nonprofit organizations, they should be reviewed for illustrative purposes only. The general facts and circumstances test of IRC §469(h)(1) is the test applicable to nonprofit organizations.

the development and operations of a project.

Pursuant to IRC §42(h)(5)(D), the ownership and material participation test can be met by the organization if it owns stock in a qualified corporation that satisfies the ownership and material participation test. A qualified corporation must be a corporation that is 100 percent owned at all times during its existence by one or more qualified nonprofit organizations.

In Compliance

For purposes of reviewing properties for compliance with the requirements of IRC §42(h)(5) during the 15-year compliance period, the state agencies' responsibility is limited to consideration of whether the qualified nonprofit entity is *materially participating* in the *operation* of the project; i.e., both management decision making and the day-to-day operations. In order to materially participate, the qualified nonprofit must be engaged in the activities on a basis that is regular, continuous, and substantial.

Example 1: Qualified Nonprofit Organization Materially Participates

> A for-profit organization and a qualified nonprofit organization are general partners for an LIHC project. The state agency sent the review notification letter to the nonprofit and the nonprofit's executive director was on site at the time of the review to answer questions and participate in the physical inspection. The nonprofit received the compliance report, corrected a noncompliance issue and report back to the state agency.
>
> The owner has demonstrated management involvement.

Example 2: Property Managed by Nonprofit Representatives

> A qualified nonprofit organization owns an LIHC project. Not having the expertise to operate an LIHC property on a day-to-day basis, the nonprofit hires an affordable housing management company. The management company reports to, and is paid by, the qualified nonprofit organization.
>
> The application of the material participation rules under IRC § 469 should be flexible. In this case, the owner has demonstrated both management decision making and control of the day-to-day operations through their oversight of the management company.

Out of Compliance

A taxpayer is out of compliance if:

1. The qualified nonprofit organization does not materially participate (as determined under IRC §469(h)(1)), or

2. The qualified nonprofit organization does not materially participate in both the *development and operation* of the project; i.e., both management decisions and day-to-day activities.

A property is out of compliance for any taxable year where the entity does not participate on a basis that is regular, continuous and substantial within the meaning of IRC §469(h)(1) for that year. Noncompliance can be identified by interviewing the qualified nonprofit organization's management representatives and observation while at the property site.

Example 1: Qualified Nonprofit Does Not Participate in Management Decisions

> A for-profit organization and qualified nonprofit organization are general partners for an LIHC project. The nonprofit organization fully participated in the development of the project, but has not participated in (directly or through a representative) any monthly management meetings in year 3 of the compliance period and does not otherwise participate on a regular, continuous, or substantial basis.
>
> The property is out of compliance for year 3 of the compliance period.

Example 2: Management Company Employee Provides Volunteer Services

> A for-profit organization and qualified nonprofit organization are general partners for an LIHC project. The third party management company operating the property reports to the for-profit general partner. The management company employs a property manager who signed an agreement to be a "volunteer" for the non-profit and provide services for the nonprofit organization.
>
> The property is not in compliance because the property manager's agreement to be a volunteer is part of its employment responsibilities to the for-profit organization.

Should a state agency become aware of noncompliance with other requirements imposed under IRC §42(h)(5), Form 8823 should be filed noting the issue. Areas of noncompliance may include:

1. The qualified nonprofit organization loses its exempt status. As part of the preparation for a review of an LIHC property owned by a qualified nonprofit organization under IRC §42(h)(5), state agencies may confirm that the nonprofit is a qualified tax-exempt organization by using the IRS website (www.irs.gov). Enter "78" into the "Search IRS site for" feature; the response will be "Chances are you are looking for Publication 78, Search for Exempt Organizations"; clicking on the underline portion will provide an alphabetical listing of exempt organizations. The state agency should request documentation of tax-exempt status if the organization is not included on the list.

2. The qualified nonprofit organization does not have an ownership interest in the low-income housing project.

Back in Compliance

LIHC projects are considered back in compliance in a taxable year when a qualified nonprofit organization owns an interest in the project and satisfies the material participation test set forth in IRC §469(h)(1) for that taxable year.

Example 1: Qualifying Nonprofit Organization Begins Attending Management Meetings

A for-profit organization and a qualified nonprofit organization are general partners for an LIHC project. The nonprofit organization materially participated in the on-going operation of the project in years 2, 3, and 4. They did not materially participate in year 5. It was determined that in year 7 of the compliance period, the nonprofit organization materially participated.

The property is out of compliance as of December 31st of year 5 and back in compliance as of December 31st of year 7.

Chapter 23
Category 11q
Other Noncompliance Issues

Definition

This category should be used to report noncompliance only when the noncompliance cannot be associated with any other category. The discussion presented here is not intended to be all inclusive.

Nonreportable Compliance Issues

Nonperformance of Extended Use Agreement

Under IRC §42(h)(6), taxpayers receiving credits must execute an extended use agreement, which is recorded as a restrictive covenant against the property, as provided by state law. The extended use period ends on the later of the date specified in the agreement or 15 years after the close of the compliance period. At a minimum, the property must be maintained as low-income housing property for 30 years beginning with the first day of the compliance period. The required content of the extended use agreement is outlined in IRC §42(h)(6)(B).

In addition, state agencies may add additional terms or restrictions to reflect the terms of the credit allocation. Under IRC §42(m), state agencies are required to develop qualified allocation plans with criteria for determining housing needs in their location and selecting appropriate projects. These terms and conditions will be reflected in the extended use agreement; e.g., the targeting of special needs groups, income restrictions, rent skewing, housing types, etc. State agencies are expected to enforce the agreement. Nonperformance of the terms of the extended use agreement should *not* be reported to the IRS. See chapter 16 for reportable noncompliance associated with extended use agreements.

Example 1: Special Set-Asides Not Reported

> The owner elected the 40/60 minimum set-aside on Form 8609. The state agency required 20/50 targeting, as evidenced in the extended use agreement. The maximum 50% gross rent is $400, but the maximum 60% gross rent is $500. The owner charges $450 rent and a $50 utility allowance, for a total of $500. The rent charged is above the limit agreed upon in the extended use agreement, but equals the rent limit for the 60 percent minimum set aside election.
>
> The owner has violated the state's requirements. However, according to the imputed income limitation applicable to the unit, the rent is in compliance within federal regulation. The state agency should *not* file a Form 8823.

Example 2: Elected Minimum Set-Aside Inconsistent with Extended Use Agreement

An owner, at the time of application and subsequent submission of final cost certifications when the LIHC project was completed, represented to the state agency that the 20/50 minimum set-aside would be elected. The 20/50 minimum set-aside is also identified in the extended use agreement. When making the election on Form 8609 for IRS purposes, the taxpayer selected the 40/60 set-aside.

The taxpayer is in compliance with the requirements of IRC §42. Noncompliance with the terms of the extended use agreement is *not* reportable to the IRS on Form 8823.

Chapter 24
Line 13
Building Disposition

Definition

Recapture of the accelerated portion of credits may be caused not only by noncompliance with the LIHC program, but by either the sale or other disposition of an LIHC building or the sale of an ownership interest in such a building. It is important to report all dispositions so that the IRS can determine whether the taxpayer has complied with the requirements of IRC §42(j); i.e., the credits have been appropriately recaptured or bonds posted.[1]

Types of Building Dispositions

Line 13a on Form 8823 identifies four categories of building dispositions.

1. SALE - Types of activities that would constitute a "sale" (which does not necessarily involve the seller receiving money) include:

    a. Fee Title Sale of Building - Fee title passes from the seller to a whole new entity (buyer)

    b. Termination of Partnership

2. FORECLOSURE - Foreclosure is the legal process reserved by a lender to terminate the borrower's interest in a property after a loan has been defaulted. On foreclosure, the *owner* is deemed to have made a sale of the property for the outstanding amount of the mortgage debt. In some foreclosures, the new "owner" is an entity not eligible to claim tax credits (i.e. HUD, State Housing Finance Agency, etc.) or the new "owner" is not claiming tax credits (i.e., mortgagee, bank, etc.).

    a. Deed of Property in Lieu of Foreclosure - the owner voluntarily conveys the property to the mortgage holder to avoid foreclosure proceedings.

3. DESTRUCTION - Destruction is related to a building's *physical structure*, and not to the ownership interest in the building. The destruction affects the building *in its entirety*, i.e., the eligible basis of the property is reduced to $0. The destruction is *permanent* and the building is not expected to operate as a tax credit project again. Violations of the physical inspection standards, or casualty losses that are temporary in nature should not be reported as destruction, which is permanent.

4. OTHER (Attach Explanation) – Any event, not listed above, which results in the disposition of a low-income housing credit unit, building, or property.

[1] See Exhibit 24-1 for an explanation of the recapture requirements

State Agency Responsibility for Reporting Property Dispositions

The owner of a low-income housing building is the entity identified on the Form 8609. State agencies should confirm that the ownership has not changed as part of their monitoring and inspection responsibilities.

Example 1: Owners Sells Property

> ABC, a limited partnership, owns and operates an LIHC building, and is identified as the owner on Form 8609. Mr. Jones is the general partner. There are two limited partners, Mr. Smith and the XYZ investment fund. On September 17, 2004, ABC sells the building to E&F, a limited partnership. As included in the extended use agreement, the state agency approved the sale. The state agency should report the disposition on Form 8823.

LIHC buildings are generally owned by partnerships and identifying changes in the composition of the ownership entities is not required. However, if a state agency becomes aware of a change in the composition of the ownership entity, the disposition should be reported.

Example 2: State Agency Reviews Owners' Annual Certification

> ABC, a limited partnership, owns and operates an LIHC building, and is identified as the owner on Form 8609. Mr. Jones is the general partner. There are two limited partners, Mr. Smith and the XYZ investment fund. As part of the regular monitoring procedures, the state agency reviews the owner's annual certification to confirm that ownership has not changed. The state agency is not required to ask whether Mr. Jones, Mr. Smith, or XYZ has disposed of their interest (or a portion of their interest).

Example 3: General Partner Changes

> ABC, a limited partnership, owns and operates an LIHC building, and is identified as the owner on Form 8609. Mr. Jones is the general partner. There are two limited partners, Mr. Smith and the XYZ investment fund. Mr. Jones decides to retire and sells his interest to Ms. White, who will continue as the general partner. The change is not identified in the owner's annual certification. However, a letter sent to Mr. Jones is returned to the state agency as undeliverable. The state agency notifies the limited partners that the general partner cannot be located. Mr. Smith calls Ms. White, who contacts the state agency to explain the change in ownership of the partnership. The state agency should file Form 8823 noting the disposition category as "other"; i.e., Mr. Smith is no longer a partner.

1. IRC §42(f)(4)

Exhibit 24-1
Explanation of
Credit Recapture Requirements
Under IRC §42(j)

As explained in the legislative history, the disposition of an LIHC building (or interest therein) is a recapture event.[1] The amount of the recapture is 1/3 of the allowable credit for each year if the building is disposed of through year 11 of the compliance period plus interest. The interest is computed at the overpayment rate established under IRC §6621on the recaptured credit for each taxable year for the period beginning on the due date for filing the return for the prior taxable year involved. The amount of the recapture declines if the disposition occurs after year 11 of the credit period.

Taxpayers must file Form 8611, Recapture of Low-Income Housing Credit, with their tax return for the year of sale to recapture the LIHC.

Large Partnership Recapture

In the case of a large partnership (a partnership of 35 or more partners), the partnership is treated as the taxpayer to which the credit is allowable for purposes of recapture. The tax benefit rule under IRC §42(j)(4)(A) does not apply and the increase in tax because of the recapture amount is allocated among the partners in the same manner as the partnership's taxable income for the year is allocated among the partners.

The legislative history[2]also indicates that no change in ownership is deemed to occur on the disposition of a partner's interest provided that within a 12-month period at least 50 percent (in value) of the original ownership is unchanged. These conditions apply unless the partnership elects out of such under IRC §42(j)(5).

Other Partnerships and Recapture

For partnerships with fewer than 35 partners, and those electing out of the large partnership provisions of IRC §42(j)(5), a partner (taxpayer) may elect to avoid or defer recapture until the taxpayer has, in the aggregate, disposed of more than 33 1/3 percent of the taxpayer's greatest total interest in the qualified low-income building through the partnership at any time. Once dispositions aggregate more than 33 1/3 percent, further deferral is possible only if a surety bond or alternative collateral is provided. The taxpayer that defers recapture by reason of the 33 1/3 percent rule will remain subject to recapture with respect to that interest. See Rev. Rul. 90-60, 1990-2 C.B. 35.

Surety Bonds and Subsequent Owners

Recapturing the accelerated portion of the credit can be avoided if the owner selling the building, or interest therein, posts a bond equal to the amount specified on Form 8693, Low-Income Housing Credit Disposition Bond. The IRS approves the bond when it is determined that the amount of the bond is correct and that the project is expected to remain in compliance for the balance of the initial compliance period; i.e., the new owner intends to maintain the building as low-income housing throughout the 15-year compliance period. The bond must remain in effect until 58 months after the end of the 15-year compliance period.

---

[1] H.R. Conf. Rep. No. 481, 99th Cong., 2nd Sess. II-96 (1986)
[2] H.R. Conf. Rep. No. 481, 99th Cong., 2nd Sess. II-96 (1986)

As a practical matter, surety bonds may be difficult and costly to obtain. Because of the amount of the bond needed and the inability of the seller to assure that the property will continue to comply (such power effectively being with the new owner), sureties are likely to require either full collateral or very high creditworthiness from the bonded party. IRS Revenue Procedure 99-11 establishes a collateral program as an alternative to providing a surety bond to avoid or defer recapture of low-income housing tax credits. Under this program, taxpayers pledge certain United States Treasury securities to the IRS as collateral.

The IRS will "call a bond" to recapture credit if it subsequently determined that the new owner did not continue to operate the building as a qualified low-income building for the remainder of the compliance period.

Chapter 25
Miscellaneous Noncompliance Topics

The chapter includes noncompliance topics not discussed elsewhere.

Tenant Misrepresentation or Fraud

LIHC property owners should demonstrate due diligence to prevent tenant fraud. Fraud includes *deliberate* misrepresentation of fact in order to induce someone else to part with something of value or surrender a legal right. In this case, the outcome of deliberate misrepresentation by a tenant can result in the property owner renting a residential unit to an ineligible tenant at a below market rate.

If misrepresentation is suspected, additional steps should be taken to verify the accuracy of information provided by the tenant. See chapter 4. Regulation 1.42-5 gives examples of how an income certification may be documented, including the submission of federal tax returns. If necessary, tenants can be asked to complete Form 8821, Tax Information Authorization, which will allow the owner to confirm the accuracy of the tenant's tax returns with the IRS.

If an owner discovers that a tenant has *deliberately* misrepresented their income level, student status, household size, or any other item used to determine eligibility, the owner should consult state or local landlord-tenant laws to determine whether the tenant can be asked to vacate the LIHC unit or the rent raised to the market rate. The owner is not expected to complete the annual recertification if a tenant is asked to leave or an eviction proceeding is in process.

Report any suspected or known deliberate misrepresentation of income to the Internal Revenue Service's Suspected Tax Fraud Hotline at 1-800-829-0433. When calling the Hotline, the following information should be provided:

1. tenant's name,

2. tenant's social security number if possible,

3. explain association with LIHC program,

4. what the tenant did that misrepresented their income or documentation (the owner may be asked to provide evidence of the tenant's fraudulent acts),

5. amount of tenant income as reported by the tenant and the amount actually verified, and

6. the difference between the market rate and restricted rent for the unit, and how long the tenant was in the unit. This is the amount of economic benefit the tenant may be deemed to have received as taxable income.

Reporting Tenant Misrepresentation or Fraud to the IRS

So that possible loss of low-income housing credit might be avoided if it is determined upon later review by the state agency that a tenant is not qualified for low-income housing, the state agency should encourage owners to immediately report any suspected deliberate misrepresentation of fraud by a tenant to the state agency. [1]

The Low-Income Housing Program will not consider there to have been reportable noncompliance if tenant fraud is discovered and addressed by the owner prior to a state agency review or an IRS audit, and the owner satisfies the state agency that: (1) the tenant provided false information; (2) the owner did everything a prudent person would do to avoid fraudulent tenants (due diligence) and has implemented any needed changes to avoid future problems; (3) the tenant has vacated the unit (if possible); and (4) there is no pattern of accepting fraudulent tenants. In such cases, the owner need not reduce the applicable fraction for determining the credit amount and the state agency need not report the noncompliance arising because of the tenant's fraud on Form 8823.

This administrative procedure applies only when the owner notifies the state agency before notice is given by the state agency that a review of the tenant records or a site inspection is to be conducted. As a general rule, the Internal Revenue Service does not want to disturb the credit when the owner has demonstrated due diligence to avoid fraudulent tenants, timely removes fraudulent tenants when identified, and timely notifies the state agency of their actions.

Identification of Tenant Misrepresentation or Fraud During State Agency Reviews or IRS Audits

An owner's opportunity to identify and self-correct misrepresentations or fraud by a tenant for purposes of the low-income housing credit terminates upon notification of a state agency's intended review/inspection of the LIHC project. Any noncompliance arising from such a misrepresentation or fraud discovered during a state agency's review/inspection should be reported to the IRS on Form 8823 under the appropriate category of noncompliance, regardless of the cause. As noted in Treas. Reg. §1.42-5(a), state agencies are required to report any noncompliance of which the agency becomes aware. Agencies should report all noncompliance, without regard to whether the identified outstanding noncompliance is subsequently corrected. See chapter 3 for full discussion.

Owner/Taxpayer Fraud

If a state agency becomes aware of an apparent fraudulent act by the owner, management company, or other party associated with the low-income housing property, or a party responsible for providing income/asset verification for tenants, the state agency should report the alleged acts to the Internal Revenue Service's Criminal Investigation Department (CID) by calling 1-800-829-0433.

[1] The IRS wants to provide an incentive for owners to identify, and remove (if possible) fraudulent tenants. By working with the state agency up front, we can provide an opportunity to resolve the problem without harming the owner and not waiting for a state agency review, yet retaining involvement in the determination of a "fraudulent" tenant.

Chapter 26
Tenant Good Cause Eviction and Rent Increase Protection

Definition

Under IRC §42(h)(6), buildings are eligible for the low-income housing credit only if the owner has entered into an extended low-income housing commitment. The commitment is commonly known as the "extended use agreement." The extended use agreement must be recorded pursuant to state law as a restrictive covenant. See Chapter 16 for additional detail.

3-Year Good Cause Eviction and Rent Increase Protection for Tenants

The term of the agreement is at least 30 years, beginning on the first day of the compliance period and ends on the later of the date specified by the state agency or 15 years after the close of the 15-year compliance period under IRC §42(i)(1). Under IRC §42(h)(6)(E)(i), the extended use agreement can be terminated under two circumstances:

1. the building is acquired through foreclosure, or
2. the state agency fails to present a qualified contract for the acquisition of the LIHC building (or part thereof) by a party who will continue to operate the building (or part thereof) as low-income housing.

In the event that the extended use agreement is terminated, IRC §42(h)(6)(E)(ii) provides existing low-income tenants protection against two events for three years following the termination. These events are:

1. the eviction or the termination of tenancy (other than for good cause) of an existing tenant of any low-income unit, or
2. any increase in the gross rent with respect to such unit no otherwise permitted under IRC §42.

Revenue Ruling 2004-82: Prohibitions Under IRC §42(h)(6)(B)(i) Apply throughout Extend Use Period

Under section C of Rev. Rul. 2004-82[1], Q&A #5 provides further guidance regarding extending use agreements. Question 5 states, "Must the extended low-income housing commitment prohibit the actions described in subclauses (I) and (II) of IRC §42(h)(6)(E)(ii) (i.e., eviction or the termination of tenancy (other than for good cause) only for the 3-year period described in IRC §42(h)(6)(E)(ii)?"

The answer is "no". IRC §42(h)(6)(B)(i) requires that an extended low-income housing commitment include a prohibition during the entire extended use period against: (1) the eviction or the termination of tenancy (other than for good cause) of an existing tenant of any low-income unit (no-cause eviction protection) and (2) any increase in the gross rent with respect to the unit not otherwise permitted under IRC §42.

[1] Rev. Rul. 2004-82, 2004-2 C.B. 350.

The revenue ruling includes the following explanation. When Congress amended IRC §42(h)(6)(B)(i) to add the requirement that the extended use agreement must *prohibit the actions described in subclauses (i) and (II) of subparagraph (E)(ii),* IRC §42(h)(6)(E)(ii) was already part of §42. As a result, Congress must have intended the amendment to §42(h)(6)(B)(i) to add an additional requirement beyond what was contained in §42(h)(6)(E)(ii), which already prohibited the actions described in that section for the 3 years following the termination of the extended use period. Because the requirements of §42(h)(6)(B)(i) otherwise apply for the extended use period, Congress must have intended the addition of the prohibition against the actions described in subclauses (I) and (II) of §42(h)(6)(E)(ii) to apply throughout the extended use period.

The revenue ruling also provided guidance for updating extended use agreements to explicitly provide tenants with protection against evictions without good cause and increases in rent not allowable under IRC §42. The revenue ruling provided that if it is determined by the end of a taxable year that a taxpayer's extended use agreement does not meet the requirements for an extended use agreement under IRC §42(h)(6)(B) (for example, it does not provide no-cause eviction protection for tenants of low-income units throughout the extended use period), the low-income housing credit is not allowable with respect to the building for the taxable year, or any prior taxable year. However, if the failure to have a valid extended use agreement is in effect is corrected within 1 year of the date of the determination, the determination will not apply to the current year of the credit period or any prior year.

The revenue ruling also requires the state agencies to review its extended low-income housing commitments for compliance with the interpretation of §42(h)(6)(B)(i) by December 31, 2004. If, during the review period, the housing credit agency determines that an extended low-income housing commitment is not in compliance with the interpretation of §42(h)(6)(B)(i) provided in Revenue Ruling 2004-82, the 1-year period described under §42(h)(6)(J) will commence on the date of that determination.

Revenue Procedure 2005-37

Effective June 21, 2005, the IRS issued Rev. Proc. 2005-37[2] to provide the state agencies guidance for satisfying the review requirements under Rev. Rul. 2004-82, Q&A #5.

Extended Use Agreements Entered into Before January 1, 2006,

If the extended use agreement contain general language requiring building owners to comply with the requirements of' IRC §42 (catch-all language), the requirements of Rev. Ruling 2004-82, Q&A-5, are satisfied if:

1. Agencies notify building owners in writing on or before December 31, 2005, that consistent with the interpretation in Q&A #5, the catch-all language prohibits the owner from evicting or terminating the tenancy of an existing tenant of any low-income unit (other than for good cause) throughout the entire commitment period. Further, state agencies must notify building owners that the catch-all language prohibits the owner from making an increase in the gross rent with respect to a low-income unit not otherwise permitted by IRC §42 throughout the entire commitment

[2] Rev. Proc. 2005-37, 2005-28 I.R.B. 79.

period;

2. The owner must, as part of its certification under Treas. Reg. 1.42-5(c)(1)(xi), certify annually that for the preceding 12-month period no tenants in low-income units were evicted or had their tenancies terminated other than for good cause and that no tenants had an increase in the gross rent with respect to a low-income unit not otherwise permitted under IRC §42;

Finally, if the extended use agreement is amended for any reason after December 31, 2005, it must also be amended to clearly provide for the prohibition against the eviction or termination of tenancy other than for good cause and any increase in the gross rent not otherwise permitted under IRC §42.

Commitments entered into before January 1, 2006, that do not contain specific language on the IRC §42(h)(6)(B)(i) prohibitions or catch-all language do not satisfy the requirements of Rev. Rul. 2004-82, Q&A #5 and must be amended by December 31, 2005 to clearly provide for the IRC §42(h)(6)(B)(i) prohibitions against the eviction or termination of tenancy of an existing tenant of any low-income unit (other than for good cause) and the increase in the gross rent with respect to a low-income unit not otherwise permitted by IRC §42.

<u>Extended Use Agreements Entered into After December 31, 2005</u>

1. Extended use agreements executed after December 31, 2005, must clearly provide for the prohibition against the eviction or termination of tenancy other than for good cause and any increase in the gross rent not otherwise permitted under IRC §42.

2. The owner must also, as part of its certifications under Treas. Reg. 1.42-5(c)(1)(xi), certify annually that for the preceding 12-month period no tenants in low-income units were evicted or had their tenancies terminated other than for good cause and that no tenants had an increase in the gross rent with respect to a low-income unit not otherwise permitted under IRC §42.

In Compliance

Owners are in compliance with the prohibitions against evictions or terminations of tenancy for other than good cause and increases in the gross rent not permitted under IRC §42 when all of the following four requirements are met.

1. The extended use agreement includes the prohibitions.

    a. For agreements entered into before January 1, 2006, the agreement must contain general language requiring building owners to comply with the requirements of' IRC §42 (catch-all language) and the state agency must notify the owner in writing on or before December 31, 2005, that the catch-all language prohibits the owner from evicting or terminating the tenancy of an existing tenant of any low-income unit (other than for good cause) or increases the gross rent not otherwise permitted by IRC §42 throughout the entire commitment period.

   b. For extended use agreements executed after December 31, 2005, the agreement must clearly provide for the prohibition against the eviction or termination of tenancy other than for good cause and any increase in the gross rent not otherwise permitted under IRC §42.

2. The owner must, as part of its annual certification under Treas. Reg. §1.42-5(c)(1)(xi), certify annually that for the preceding 12-month period no tenants in low-income units were evicted or had their tenancies terminated other than for good cause and that no tenants had an increase in the gross rent with respect to a low-income unit not otherwise permitted under IRC §42.

3. The owner must not evict or terminate the tenancy of an existing tenant of any low-income unit for other than for good cause.

4. The owner must not increases the gross rent unless permitted by IRC §42.

Out of Compliance

Owners are out of compliance with the prohibitions against evictions or terminations of tenancy for other than good cause and increases in the gross rent not permitted under IRC §42 if any of the following four requirements is not met.

Extended Use Agreement

Generally, no credit is allowable for a building in a year unless an extended use agreement is in effect at the end of the year. The extended use agreement is not in effect and the owner is out of compliance if (1) the extended use agreement does not include the prohibitions, or (2) does not contain the general catch-all language requiring compliance with IRC §42 if the agreement was entered into before January 1, 2006.

Noncompliance is reported under category 11k, Owner Failed to Execute and Record Extended Use Agreement Within Time Prescribed by Section 42(h)(6)(J). See chapter 16 for additional discussion.

Annual Certification

Owners are out of compliance if they fail to certify annually, or certify incompletely or inaccurately, under the penalty of perjury, that for the preceding 12-month period no tenants in low-income units were evicted or had their tenancies terminated other than for good cause and that no tenants had an increase in the gross rent with respect to a low-income unit not otherwise permitted under IRC §42.

Noncompliance is reported under category 11d, Owner Failed to Provide Annual Certifications or Provided Incomplete or Inaccurate Certification. See chapter 7 for additional discussion.

Increased Gross Rent

The owner is out of compliance if the gross rent in a manner not permitted by IRC §42. A unit qualifies as an LIHC unit when the gross rent does not exceed 30 percent of the imputed income limitation applicable to such unit under IRC §42(g)(2)(C). The income limit for a low-income housing unit is based on the minimum set-aside election made by the owner under IRC §42(g)(1).

Noncompliance is reported under category 11g, Gross Rent(s) Exceed Tax Credit Limits. See chapter 11 for additional discussion.

Back in Compliance

Owners are back in compliance with the prohibitions against evictions or terminations of tenancy for other than good cause and increases in the gross rent not permitted under IRC §42 if:

Extended Use Agreement

The extended use agreement is in effect and the owner is back in compliance when the extended use agreement is amended to clearly provide for the prohibition against the eviction or termination of tenancy other than for good cause and any increase in the gross rent not otherwise permitted under IRC §42.

Corrected noncompliance is reported under category 11k, Owner Failed to Execute and Record Extended Use Agreement Within Time Prescribed by Section 42(h)(6)(J). See chapter 16 for additional discussion.

Annual Certification

The noncompliance is corrected when the owner certifies that for the preceding 12-month period no tenants in low-income units were evicted or had their tenancies terminated other than for good cause and that no tenants had an increase in the gross rent with respect to a low-income unit not otherwise permitted under IRC § 42. In the event that tenant(s) in low-income units were evicted or had their tenancies terminated other than for good cause, or that tenant(s) had an increase in the gross rent with respect to a low-income unit not otherwise permitted under IRC § 42, the annual certification must disclose the violations.

Corrected noncompliance is reported under category 11k, Owner Failed to Provide Annual Certifications or Provided Incomplete or Inaccurate Certification. See chapter 7 for additional discussion.

Increased Gross Rent

A unit is back in compliance when the rent charged does not exceed the limit. An owner cannot avoid the disallowance of the LIHC by rebating excess rent to the affected tenants.   Corrected noncompliance is reported under category 11g, Gross Rent(s) Exceed Tax Credit Limits. See chapter 11 for additional discussion.

ATTACHMENTS

Submit the following supplemental data or documents with the hard copy of the Self-Evaluation Report. Label each attachment with its number (e.g., Attachment 1). As part of the electronic version, attach a list of items submitted, but do not attach the actual documents to the electronic submission.

Attachments Relating to Key Functions, Powers, and Duties

1. A copy of the agency's enabling statute.
2. A copy of each annual report published by the agency from FY 2004 – 2008
3. A copy of each internal or external newsletter published by the agency from FY 2007 – 2008.
4. A list of publications and brochures describing the agency.
5. A list of studies that the agency is required to do by legislation or riders.
6. A list of legislative or interagency studies relating to the agency that are being performed during the current interim.
7. A list of studies from other states, the federal government, or national groups/associations that relate to or affect the agency or agencies with similar duties or functions.

Attachments Relating to Policymaking Structure

8. Biographical information (e.g, education, employment, affiliations, and honors) or resumes of all policymaking body members.
9. A copy of the agency's most recent rules.

Attachments Relating to Funding

10. A copy of the agency's Legislative Appropriations Request for FY 2010 – 2011.
11. A copy of each annual financial report from FY 2006 – 2008.
12. A copy of each operating budget from FY 2007 – 2009.

Attachments Relating to Organization

13. If applicable, a map to illustrate the regional boundaries, headquarters location, and field or regional office locations.

Attachments Relating to Agency Performance Evaluation

14. A **copy** of each quarterly performance report completed by the agency in FY 2006 – 2008.
15. A **copy** of any recent studies on the agency or any of its functions conducted by outside management consultants or academic institutions.
16. A **copy** of the agency's current internal audit plan.
17. A **copy** of the agency's current strategic plan.
18. A **list** of internal audit reports from FY 2005 – 2009 completed by or in progress at the agency.
19. A **list** of State Auditor reports from FY 2005 – 2009 that relate to the agency or any of its functions
20. A **copy** of any customer service surveys conducted by or for your agency in FY 2008.

GOVERNMENT CODE
CHAPTER 2306. TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS
SUBCHAPTER A. GENERAL PROVISIONS

Sec. 2306.001. PURPOSES. The purposes of the department are to:

(1) assist local governments in:

(A) providing essential public services for their residents; and

(B) overcoming financial, social, and environmental problems;

(2) provide for the housing needs of individuals and families of low, very low, and extremely low income and families of moderate income;

(3) contribute to the preservation, development, and redevelopment of neighborhoods and communities, including cooperation in the preservation of government-assisted housing occupied by individuals and families of very low and extremely low income;

(4) assist the governor and the legislature in coordinating federal and state programs affecting local government;

(5) inform state officials and the public of the needs of local government;

(6) serve as the lead agency for:

(A) addressing at the state level the problem of homelessness in this state;

(B) coordinating interagency efforts to address homelessness; and

(C) addressing at the state level and coordinating interagency efforts to address any problem associated with homelessness, including hunger; and

(7) serve as a source of information to the public regarding all affordable housing resources and community support services in the state.

Sec. 2306.002. POLICY. (a) The legislature finds that:

(1) every resident of this state should have a decent, safe, and affordable living environment;

(2) government at all levels should be involved in assisting individuals and families of low income in obtaining a decent, safe, and affordable living environment; and

(3) the development and diversification of the economy, the elimination of unemployment or underemployment, and the development or expansion of commerce in this state should be encouraged.

(b) The highest priority of the department is to provide assistance to individuals and families of low and very low income who are not assisted by private enterprise or other governmental programs so that they may obtain affordable housing or other services and programs offered by the department.

Sec. 2306.003. PUBLIC PURPOSE. The duties imposed and activities authorized by this chapter serve public purposes, and public money may be borrowed, spent, advanced, loaned, granted, or appropriated for those purposes.

Sec. 2306.004. DEFINITIONS. In this chapter:

(1) "Board" means the governing board of the department.

(2) "Bond" means an evidence of indebtedness or other obligation, regardless of the source of payment, issued by the department under Subchapter P, including a bond, note, or bond or revenue anticipation note, regardless of whether the obligation is general or special, negotiable or nonnegotiable, in bearer or registered form, in certified or book-entry form, in temporary or permanent form, or with or without interest coupons.

(3) "Contract for Deed" means a seller-financed contract for the conveyance of real property under which:

(A) legal title does not pass to the purchaser until the consideration of the contract is fully paid to the seller; and

(B) the seller's remedy for nonpayment is recision or forfeiture or acceleration of any remaining payments rather than judicial or nonjudicial foreclosure.

(4) "Department" means the Texas Department of Housing and Community Affairs or any successor agency.

(4-a) "Development funding" means:

(A) a loan or grant; or

(B) an in-kind contribution, including a donation of real property, a fee waiver for a building permit or for water or sewer service, or a similar contribution that:

(i) provides an economic benefit; and

(ii) results in a quantifiable cost reduction for the applicable development.

(5) "Director" means the executive director of the department.

(6) "Economically depressed or blighted area" means an area:

(A) that is a qualified census tract as defined by Section 143(j), Internal Revenue Code of 1986 (26 U.S.C. Section 143(j)) or has been determined by the housing finance division to be an area of chronic economic distress under Section 143, Internal Revenue Code of 1986 (26 U.S.C. Section 143);

(B) established in a municipality that has a substantial number of substandard, slum, deteriorated, or deteriorating structures and that suffers from a high relative rate of unemployment; or

(C) that has been designated as a reinvestment zone under Chapter 311, Tax Code.

(7) "Elderly individual" means an individual 62 years of age or older or of an age specified by the applicable federal program.

(8) "Family of moderate income" means a family:

(A) that is determined by the board to require assistance, taking into account:

(i) the amount of the total income available for housing needs of the individuals and families;

(ii) the size of the family;

(iii) the cost and condition of available housing facilities;

(iv) the ability of the individuals and families to compete successfully in the private housing market and to pay the amounts required by private enterprise for sanitary, decent, and safe housing; and

(v) standards established for various federal programs determining eligibility based on income; and

(B) that does not qualify as a family of low income.

(9) "Federal government" means the United States of America and includes any corporate or other instrumentality of the United States of America, including the Resolution Trust Corporation.

(10) "Federal mortgage" means a mortgage loan for residential housing:

(A) that is made by the federal government; or

(B) for which a commitment to make has been given by the federal government.

(11) "Federally assisted new communities" means federally assisted areas that

receive or will receive assistance in the form of loan guarantees under Title X of the National Housing Act (12 U.S.C. Section 1701 et seq.), and a portion of that federally assisted area has received grants under Section 107(a)(1) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. Section 5301 et seq.).

(12) "Federally insured mortgage" means a mortgage loan for residential housing that:

(A) is insured or guaranteed by the federal government; or

(B) the federal government has committed to insure or guarantee.

(12-a) "Grant" means financial assistance that is awarded in the form of money to a housing sponsor for a specific purpose and that is not required to be repaid. For purposes of this chapter, a grant includes a forgivable loan.

(13) "Housing development" means property or work or a project, building, structure, facility, or undertaking, whether existing, new construction, remodeling, improvement, or rehabilitation, that meets or is designed to meet minimum property standards required by the department and that is financed under the provisions of this chapter for the primary purpose of providing sanitary, decent, and safe dwelling accommodations for rent, lease, use, or purchase by individuals and families of low and very low income and families of moderate income in need of housing. The term includes:

(A) buildings, structures, land, equipment, facilities, or other real or personal properties that are necessary, convenient, or desirable appurtenances, including streets, water, sewers, utilities, parks, site preparation, landscaping, stores, offices, and other nonhousing facilities, such as administrative, community, and recreational facilities the department determines to be necessary, convenient, or desirable appurtenances; and

(B) single and multifamily dwellings in rural and urban areas.

(14) "Housing sponsor" means an individual, joint venture, partnership, limited partnership, trust, firm, corporation, limited liability company, other form of business organization, or cooperative that is approved by the department as qualified to own, construct, acquire, rehabilitate, operate, manage, or maintain a housing development, subject to the regulatory powers of the department and other terms and conditions in this chapter.

(15) "Individuals and families of low income" means individuals and families earning not more than 80 percent of the area median income or applicable federal poverty line, as determined under Section 2306.123 or Section 2306.1231.

(16) "Individuals and families of very low income" means individuals and families earning not more than 60 percent of the area median income or applicable federal poverty line, as determined under Section 2306.123 or Section 2306.1231.

(17) "Individuals and families of extremely low income" means individuals and families earning not more than 30 percent of the area median income or applicable federal poverty line, as determined under Section 2306.123 or Section 2306.1231.

(18) "Land development" means:

(A) acquiring land for residential housing construction; and

(B) making, installing, or constructing nonresidential improvements that the department determines are necessary or desirable for a housing development to be financed by the department, including:

(i) waterlines and water supply installations;

(ii) sewer lines and sewage disposal installations;

(iii) steam, gas, and electric lines and installations; and

(iv) roads, streets, curbs, gutters, and sidewalks, whether on or off the site.

(19) "Local government" means a county, municipality, special district, or any other political subdivision of the state, a public, nonprofit housing finance corporation created under Chapter 394, Local Government Code, or a combination of those entities.

(20) "Mortgage" means an obligation, including a mortgage, mortgage deed, bond, note, deed of trust, or other instrument, that is a lien:

(A) on real property; or

(B) on a leasehold under a lease having a remaining term that, at the time the lien is acquired, does not expire until after the maturity date of the obligation secured by the lien.

(21) "Mortgage lender" means a bank, trust company, savings bank, mortgage company, mortgage banker, credit union, national banking association, savings and loan association, life insurance company, or other financial institution authorized to transact business in this state and approved as a mortgage lender by the department.

(22) "Mortgage loan" means an obligation secured by a mortgage.

(23) "Municipality" includes only a municipality in this state.

(23-a) "Neighborhood organization" means an organization that is composed of persons living near one another within the organization's defined boundaries for the neighborhood and that has a primary purpose of working to maintain or improve the general welfare of the neighborhood. A neighborhood organization includes a homeowners' association or a property owners' association.

(23-b) "New construction" means any construction to a development or a portion of a development that does not meet the definition of rehabilitation under this section.

(24) "Public agency" means the department or any agency, board, authority, department, commission, political subdivision, municipal corporation, district, public corporation, body politic, or instrumentality of this state, including a county, municipality, housing authority, state-supported institution of higher education, school district, junior college, other district or authority, or other type of governmental entity of this state.

(25) "Real estate owned contractor" means a person required to meet the obligations of a contract with the department for managing and marketing foreclosed property.

(26) "Real property" means land, including improvements and fixtures on the land, property of any nature appurtenant to the land or used in connection with the land, and a legal or equitable estate, interest, or right in land, including leasehold interests, terms for years, and a judgment, mortgage, or other lien.

(26-a) "Rehabilitation" means the improvement or modification of an existing residential development through an alteration, addition, or enhancement. The term includes the demolition of an existing residential development and the reconstruction of any development units, but does not include the improvement or modification of an existing residential development for the purpose of an adaptive reuse of the development.

(27) "Reserve fund" means any reserve fund established by the department.

(28) "Residential housing" means a specific work or improvement undertaken primarily to provide dwelling accommodations, including the acquisition, construction, reconstruction, remodeling, improvement, or rehabilitation of land and buildings and improvements to the buildings for residential housing and other incidental or appurtenant nonhousing facilities.

(28-a) "Rural area" means an area that is located:

(A) outside the boundaries of a primary metropolitan statistical area or a metropolitan statistical area;

(B) within the boundaries of a primary metropolitan statistical area or a metropolitan statistical area, if the statistical area has a population of 25,000 or less and does not share a boundary with an urban area; or

(C) in an area that is eligible for funding by the Texas Rural Development Office of the United States Department of Agriculture, other than an area that is located in a municipality with a population of more than 50,000.

(28-b) "Rural development" means a development or proposed development that is located in a rural area, other than rural new construction developments with more than 80 units.

(29) "Servicer" means a person required to meet contractual obligations with the housing finance division or with a mortgage lender relating to a loan financed under Subchapter J, including:

(A) purchasing mortgage certificates backed by mortgage loans;

(B) collecting principal and interest from the borrower;

(C) sending principal and interest payments to the division;

(D) preparing periodic reports;

(E) notifying the primary mortgage and pool insurers of delinquent and foreclosed loans; and

(F) filing insurance claims on foreclosed property.

(30) "State low income housing plan" means the comprehensive and integrated plan for the state assessment of housing needs and allocation of housing resources.

(31) "Economic submarket" means a group of borrowers who have common home mortgage loan market eligibility characteristics, including income level, credit history or credit score, and employment characteristics, that are similar to Standard and Poor's credit underwriting criteria.

(32) "Geographic submarket" means a geographic region in the state, including a county, census tract, or municipality, that shares similar levels of access to home mortgage credit from the private home mortgage lending industry, as determined by the department based on home mortgage lending data published by federal and state banking regulatory agencies.

(33) "Rural county" means a county that is outside the boundaries of a primary metropolitan statistical area or a metropolitan statistical area.

(34) "Subprime loan" means a loan that is originated by a lender designated as a subprime lender on the subprime lender list maintained by the United States Department of Housing and Urban Development or identified as a lender primarily engaged in subprime lending

under Section 2306.143.

(35) "Uniform application and funding cycle" means an application and funding cycle established under Section 2306.1111.

(36) "Urban area" means the area that is located within the boundaries of a primary metropolitan statistical area or a metropolitan statistical area other than an area described by Subdivision (28-a)(B) or eligible for funding as described by Subdivision (28-a)(C).

Sec. 2306.005. REFERENCES TO FORMER LAW. A reference in law to the Texas Housing Agency or the Texas Department of Community Affairs means the Texas Department of Housing and Community Affairs.

Sec. 2306.006. RULES OF ABOLISHED AGENCIES. Rules of the abolished Texas Housing Agency and the Texas Department of Community Affairs continue in effect as rules of the Texas Department of Housing and Community Affairs until amended or repealed by the department.

Sec. 2306.007. ESTABLISHING ECONOMICALLY DEPRESSED OR BLIGHTED AREAS. (a) To establish an economically depressed or blighted area under Section 2306.004(6)(B) or (C), the governing body of a municipality must hold a public hearing and find that the area:

(1) substantially impairs or arrests the sound growth of the municipality; or

(2) is an economic or social liability and is a menace to the public health, safety, morals, or welfare in its present condition and use.

(b) The governing body of a municipality holding a hearing under this section must give notice as provided by Chapter 551, except that notice must be published not less than 10 days before the date of the hearing.

Sec. 2306.008. PRESERVATION OF AFFORDABLE HOUSING. (a) The department shall support in the manner described by Subsection (b) the preservation of affordable housing for individuals with special needs, as defined by Section 2306.511, and individuals and families of low income at any location considered necessary by the department.

(b) The department shall support the preservation of affordable housing under this section by:

(1) making low interest financing and grants available to private for-profit and nonprofit buyers who seek to acquire, preserve, and rehabilitate affordable housing; and

(2) prioritizing available funding and financing resources for affordable housing preservation activities.

SUBCHAPTER B. GOVERNING BOARD AND DEPARTMENT

Sec. 2306.022. APPLICATION OF SUNSET ACT. The Texas Department of Housing and Community Affairs is subject to Chapter 325 (Texas Sunset Act). Unless continued in existence as provided by that chapter, the department is abolished and this chapter expires September 1, 2011.

Sec. 2306.024. BOARD MEMBERS: APPOINTMENT AND COMPOSITION. The board consists of seven public members appointed by the governor.

Sec. 2306.025. TERMS OF BOARD MEMBERS. Members of the board hold office for staggered terms of six years, with the terms of two or three members expiring on January 31 of each odd-numbered year.

Sec. 2306.027. ELIGIBILITY. (a) The governor shall appoint to the board public members who have a demonstrated interest in issues related to housing and community support services. A person appointed to the board must be a registered voter in the state and may not hold another public office.

(b) Appointments to the board shall be made without regard to the race, color, disability, sex, religion, age, or national origin of the appointees and shall be made in a manner that produces representation on the board of the different geographical regions of this state. Appointments to the board must broadly reflect the geographic, economic, cultural, and social diversity of the state, including ethnic minorities, persons with disabilities, and women.

(c) A person may not be a member of the board if the person or the person's spouse:

(1) is employed by or participates in the management of a business entity or other organization regulated by or receiving money from the department;

(2) owns or controls, directly or indirectly, more than a 10 percent interest in a business entity or other organization regulated by or receiving money from the department; or

(3) uses or receives a substantial amount of tangible goods, services, or money from the department other than compensation or reimbursement authorized by law for board membership, attendance, or expenses.

Sec. 2306.028. TRAINING. (a) A person who is appointed to and qualifies for office as a member of the board may not vote, deliberate, or be counted as a member in attendance at a meeting of the board until the person completes a training program that complies with this section.

(b) The training program must provide the person with information regarding:

(1) the legislation that created the department and the board;

(2) the programs operated by the department;

(3) the role and functions of the department;

(4) the rules of the department, with an emphasis on the rules that relate to disciplinary and investigatory authority;

(5) the current budget for the department;

(6) the results of the most recent formal audit of the department;

(7) the requirements of:

(A) the open meetings law, Chapter 551;

(B) the public information law, Chapter 552;

(C) the administrative procedure law, Chapter 2001; and

(D) other laws relating to public officials, including conflict-of-interest laws;

(8) the requirements of:

(A) state and federal fair housing laws, including Chapter 301, Property Code, Title VIII of the Civil Rights Act of 1968 (42 U.S.C. Section 3601 et seq.), and the Fair Housing Amendments Act of 1988 (42 U.S.C. Section 3601 et seq.);

(B) the Civil Rights Act of 1964 (42 U.S.C. Section 2000a et seq.);

(C) the Americans with Disabilities Act of 1990 (42 U.S.C. Section 12101 et seq.); and

(D) the Rehabilitation Act of 1973 (29 U.S.C. Section 701 et seq.); and

(9) any applicable ethics policies adopted by the department or the Texas Ethics

Commission.

(c) A person appointed to the board is entitled to reimbursement, as provided by the General Appropriations Act, for the travel expenses incurred in attending the training program regardless of whether the attendance at the program occurs before or after the person qualifies for office.

Sec. 2306.030. PRESIDING OFFICER; OTHER OFFICERS. (a) The governor shall designate a member of the board as the presiding officer of the board to serve in that capacity at the will of the governor. The presiding officer presides at meetings of the board and performs other duties required by this chapter.

(b) The board shall elect the following officers:

(1) from the members of the board, an assistant presiding officer to perform the duties of the presiding officer when the presiding officer is not present or is incapable of performing duties of the presiding officer;

(2) a secretary to be the official custodian of the minutes, books, records, and seal of the board and to perform other duties assigned by the board; and

(3) a treasurer to perform duties assigned by the board.

(c) The offices of secretary and treasurer may be held by one individual, and the holder of each of these offices need not be a board member. The board may appoint one or more individuals who are not members to be assistant secretaries to perform any duty of the secretary.

(d) Officers of the board shall be elected at the first meeting of the board on or after January 31 of each odd-numbered year and at any other time as necessary to fill a vacancy.

Sec. 2306.031. MEMBERS' COMPENSATION. Members of the board serve without compensation but are entitled to reimbursement for actual expenses incurred in attending board meetings and in performing the duties of a board member.

Sec. 2306.032. BOARD MEETINGS. (a) The board may hold meetings when called by the presiding officer, the director, or three of the members.

(b) The board shall keep minutes and complete transcripts of board meetings. The department shall post the transcripts on its website and shall otherwise maintain all accounts, minutes, and other records related to the meetings.

(c) All materials provided to the board that are relevant to a matter proposed for discussion at a board meeting must be posted on the department's website not later than the third day before the date of the meeting.

(d) Any materials made available to the board by the department at a board meeting must be made available in hard copy format to the members of the public in attendance at the meeting.

(e) The board shall conduct its meetings in accordance with Chapter 551, except as otherwise required by this chapter.

(f) For each item on the board's agenda at the meeting, the board shall provide for public comment after the presentation made by department staff and the motions made by the board on that topic.

(g) The board shall adopt rules that give the public a reasonable amount of time for testimony at meetings.

Sec. 2306.0321. APPEAL OF BOARD AND DEPARTMENT DECISIONS. (a) The board shall adopt rules outlining a formal process for appealing board and department decisions.

(b) The rules must specify the requirements for appealing a board or department decision, including:

(1) the persons eligible to appeal;

(2) the grounds for an appeal;

(3) the process for filing an appeal, including the information that must be submitted with an appeal;

(4) a reasonable period in which an appeal must be filed, heard, and decided;

(5) the process by which an appeal is heard and a decision is made;

(6) the possible outcomes of an appeal; and

(7) the process by which notification of a decision and the basis for a decision is given.

Sec. 2306.033. REMOVAL OF MEMBERS. (a) It is a ground for removal from the board that a member:

(1) does not have at the time of taking office the qualifications required by Section 2306.027;

(2) does not maintain during service on the board the qualifications required by Section 2306.027;

(3) is ineligible for membership under Section 2306.027(c), 2306.034, or 2306.035;

(4) cannot, because of illness or disability, discharge the member's duties for a substantial part of the member's term;

(5) is absent from more than half of the regularly scheduled board meetings that the member is eligible to attend during a calendar year without an excuse approved by a majority vote of the board; or

(6) engages in misconduct or unethical or criminal behavior.

(b) The validity of an action of the board is not affected by the fact that it is taken when a ground for removal of a board member exists.

(c) If the director has knowledge that a potential ground for removal exists, the director shall notify the presiding officer of the board of the potential ground. The presiding officer shall then notify the governor and the attorney general that a potential ground for removal exists. If the potential ground for removal involves the presiding officer, the director shall notify the next highest ranking officer of the board, who shall then notify the governor and the attorney general that a potential ground for removal exists.

Sec. 2306.034. DISQUALIFICATION OF MEMBERS AND CERTAIN EMPLOYEES. (a) In this section, "Texas trade association" means a cooperative and voluntarily joined association of business or professional competitors in this state designed to assist its members and its industry or profession in dealing with mutual business or professional problems and in promoting their common interest.

(b) A person may not be a member of the board and may not be a department employee employed in a "bona fide executive, administrative, or professional capacity," as that phrase is used for purposes of establishing an exemption to the overtime provisions of the federal Fair Labor Standards Act of 1938 (29 U.S.C. Section 201 et seq.) if:

(1) the person is an officer, employee, or paid consultant of a Texas trade association in the field of banking, real estate, housing development, or housing construction; or

(2) the person's spouse is an officer, manager, or paid consultant of a Texas trade association in the field of banking, real estate, housing development, or housing construction.

Sec. 2306.035. LOBBYIST RESTRICTION. A person may not be a member of the board or act as the director of the department or the general counsel to the board or the department if the person is required to register as a lobbyist under Chapter 305 because of the person's activities for compensation on behalf of a profession related to the operation of the department.

Sec. 2306.036. EMPLOYMENT OF DIRECTOR. (a) With the approval of the governor, the board shall employ a director to serve at the pleasure of the board.

(b) After the election of a governor who did not approve the director's employment under Subsection (a), that governor may remove the director and require the board to employ a new director in accordance with Subsection (a). The governor must act under this subsection before the 90th day after the date the governor takes office.

Sec. 2306.037. DIRECTOR'S COMPENSATION. The board shall set the salary of the director.

Sec. 2306.038. ACTING DIRECTOR. The board shall establish a procedure for designating an acting director and shall, with the approval of the governor, immediately designate an acting director or a new permanent director if the position becomes vacant because of absence or disability. A director designated under this section serves at the pleasure of the board but is subject to removal by a newly elected governor in accordance with Section 2306.036(b).

Sec. 2306.039. OPEN MEETINGS AND OPEN RECORDS. (a) Except as provided by Subsections (b) and (c), the department and the Texas State Affordable Housing Corporation are subject to Chapters 551 and 552.

(b) Chapters 551 and 552 do not apply to the personal or business financial information, including social security numbers, taxpayer identification numbers, or bank account numbers, submitted by a housing sponsor or an individual or family to receive a loan, grant, or other housing assistance under a program administered by the department or the Texas State Affordable Housing Corporation or from bonds issued by the department, except that the department and the corporation are permitted to disclose information about any applicant in a form that does not reveal the identity of the sponsor, individual, or family for purposes of determining eligibility for programs and in preparing reports required under this chapter.

(c) The department's internal auditor, fraud prevention coordinator, or ethics advisor may meet in an executive session of the board to discuss issues related to fraud, waste, or abuse.

Sec. 2306.040. DEPARTMENT PARTICIPATION IN LEGISLATIVE HEARING. On request, the department shall participate in any public hearing conducted by a legislator to discuss a rule to be adopted by the department.

Sec. 2306.041. IMPOSITION OF PENALTY. The board may impose an administrative penalty on a person who violates this chapter or a rule or order adopted under this chapter.

Sec. 2306.042. AMOUNT OF PENALTY. (a) The amount of an administrative penalty may not exceed $1,000 for each violation. Each day a violation continues or occurs is a separate violation for purposes of imposing a penalty.

(b) The amount of the penalty shall be based on:

(1) the seriousness of the violation, including:

(A) the nature, circumstance, extent, and gravity of any prohibited act; and

(B) the hazard or potential hazard created to the health, safety, or economic welfare of the public;

(2) the history of previous violations;

(3) the amount necessary to deter a future violation;

(4) efforts made to correct the violation; and

(5) any other matter that justice may require.

(c) The board by rule or through procedures adopted by the board and published in the Texas Register shall develop a standardized penalty schedule based on the criteria listed in Subsection (b).

Sec. 2306.043. REPORT AND NOTICE OF VIOLATION AND PENALTY. (a) If the director determines that a violation occurred, the director shall issue to the board a report stating:

(1) the facts on which the determination is based; and

(2) the director's recommendation on the imposition of the penalty, including a recommendation on the amount of the penalty.

(b) Not later than the 14th day after the date the report is issued, the director shall give written notice of the report to the person.

(c) The notice must:

(1) include a brief summary of the alleged violation;

(2) state the amount of the recommended penalty; and

(3) inform the person of the person's right to a hearing before the board on the occurrence of the violation, the amount of the penalty, or both.

Sec. 2306.044. PENALTY TO BE PAID OR HEARING REQUESTED. (a) Not later than the 20th day after the date the person receives the notice, the person in writing may:

(1) accept the determination and recommended penalty of the director; or

(2) make a request for a hearing before the board on the occurrence of the violation, the amount of the penalty, or both.

(b) If the person accepts the determination and recommended penalty of the director, the board by order shall approve the determination and impose the recommended penalty.

Sec. 2306.045. HEARING. (a) If the person requests a hearing before the board or fails to respond in a timely manner to the notice, the director shall set a hearing and give written notice of the hearing to the person.

(b) The board shall hold the hearing and make findings of fact and conclusions of law about the occurrence of the violation and the amount of a proposed penalty.

Sec. 2306.046. DECISION BY BOARD. (a) Based on the findings of fact and conclusions of law, the board by order may:

(1) find that a violation occurred and impose a penalty; or

(2) find that a violation did not occur.

(b) The notice of the board's order given to the person must include a statement of the right of the person to judicial review of the order.

Sec. 2306.047. OPTIONS FOLLOWING DECISION: PAY OR APPEAL. Not later than the 30th day after the date the board's order becomes final, the person shall:

(1) pay the penalty; or

(2) file a petition for judicial review contesting the occurrence of the violation, the amount of the penalty, or both.

Sec. 2306.048. STAY OF ENFORCEMENT OF PENALTY. (a) Within the 30-day period prescribed by Section 2306.047, a person who files a petition for judicial review may:

(1) stay enforcement of the penalty by:

(A) paying the penalty to the court for placement in an escrow account; or

(B) giving the court a supersedeas bond approved by the court that:

(i) is for the amount of the penalty; and

(ii) is effective until all judicial review of the board's order is final; or

(2) request the court to stay enforcement of the penalty by:

(A) filing with the court a sworn affidavit of the person stating that the person is financially unable to pay the penalty and is financially unable to give the supersedeas bond; and

(B) sending a copy of the affidavit to the director by certified mail.

(b) If the director receives a copy of an affidavit under Subsection (a)(2), the director may file with the court, not later than the fifth day after the date the copy is received, a contest to the affidavit.

(c) The court shall hold a hearing on the facts alleged in the affidavit as soon as practicable and shall stay the enforcement of the penalty on finding that the alleged facts are true. The person who files an affidavit has the burden of proving that the person is financially unable to pay the penalty and to give a supersedeas bond.

Sec. 2306.049. DECISION BY COURT. (a) Judicial review of a board order imposing an administrative penalty is by trial de novo.

(b) If the court sustains the finding that a violation occurred, the court may uphold or reduce the amount of the penalty and order the person to pay the full or reduced amount of the penalty.

(c) If the court does not sustain the finding that a violation occurred, the court shall order that a penalty is not owed and may award the person reasonable attorney's fees.

Sec. 2306.050. REMITTANCE OF PENALTY AND INTEREST. (a) If the person paid the penalty and if the amount of the penalty is reduced or the penalty is not upheld by the court, the court shall order, when the court's judgment becomes final, that the appropriate amount plus accrued interest be remitted to the person.

(b) The interest accrues at the rate charged on loans to depository institutions by the New York Federal Reserve Bank.

(c) The interest shall be paid for the period beginning on the date the penalty is paid and ending on the date the penalty is remitted.

Sec. 2306.0501. RELEASE OF BOND. (a) If the person gave a supersedeas bond and the penalty is not upheld by the court, the court shall order, when the court's judgment becomes final, the release of the bond.

(b) If the person gave a supersedeas bond and the amount of the penalty is reduced, the court shall order the release of the bond after the person pays the reduced amount.

Sec. 2306.0502. COLLECTION OF PENALTY. (a) If the person does not pay the penalty and the enforcement of the penalty is not stayed, the penalty may be collected.

(b) The attorney general may sue to collect the penalty.

Sec. 2306.0503. ADMINISTRATIVE PROCEDURE. A proceeding to impose the penalty is considered to be a contested case under Chapter 2001.

SUBCHAPTER C. POWERS AND DUTIES

Sec. 2306.051. SEPARATION OF RESPONSIBILITIES. The board shall develop and implement policies that clearly separate the policy-making responsibilities of the board and the management responsibilities of the director and staff of the department.

Sec. 2306.052. DIRECTOR'S POWERS AND DUTIES. (a) The director is the administrator and the head of the department and must be an individual qualified by training and experience to perform the duties of the office.

(b) The director shall:

(1) administer and organize the work of the department consistent with this chapter and with sound organizational management that promotes efficient and effective operation;

(2) appoint and remove personnel employed by the department;

(3) submit, through and with the approval of the governor, requests for appropriations and other money to operate the department;

(4) administer all money entrusted to the department;

(5) administer all money and investments of the department subject to:

(A) department indentures and contracts;

(B) Sections 2306.118 through 2306.120; and

(C) an action of the board under Section 2306.351; and

(6) perform other functions that may be assigned by the board or the governor.

(c) The director shall develop and implement the policies established by the board that define the responsibilities of each division in the department.

(d) Repealed by Acts 2001, 77th Leg., ch. 1367, Sec. 1.45, eff. Sept. 1, 2001.

(e) The board shall adopt rules and the director shall develop and implement a program to train employees on the public information requirements of Chapter 552. The director shall monitor the compliance of employees with those requirements.

(f) The director shall use existing department resources to provide the board with any administrative support necessary for the board to exercise its duties regarding the implementation of this chapter, including:

(1) assigning personnel to assist the board;

(2) providing office space, equipment, and documents and other information to the board; and

(3) making in-house legal counsel available to the board.

Sec. 2306.0521. ORGANIZATIONAL FLEXIBILITY OF DEPARTMENT. (a) Notwithstanding Section 2306.021(b) or any other provision of this chapter, the director, with the approval of the board, may:

(1) create divisions in addition to those listed in Section 2306.021(b) and assign to the newly created divisions any duties and powers imposed on or granted to an existing division or the department generally;

(2) eliminate any division listed in Section 2306.021(b) or created under this

section and assign any duties or powers previously assigned to the eliminated division to another division listed in Section 2306.021(b) or created under this section; or

(3) eliminate all divisions listed in Section 2306.021(b) or created under this section and reorganize the distribution of powers and duties granted to or imposed on a division in any manner the director determines appropriate for the proper administration of the department.

(b) This section does not apply to the manufactured housing division.

Sec. 2306.053. DEPARTMENT POWERS AND DUTIES. (a) The department shall maintain suitable headquarters and other offices in this state that the director determines are necessary.

(b) The department may:

(1) sue and be sued, or plead and be impleaded;

(2) act for and on behalf of this state;

(3) adopt an official seal or alter it;

(4) adopt and enforce bylaws and rules;

(5) contract with the federal government, state, any public agency, mortgage lender, person, or other entity;

(6) designate mortgage lenders to act for the department for the origination, processing, and servicing of the department's mortgage loans under conditions agreed to by the parties;

(7) provide, contract, or arrange for consolidated processing of a housing development to avoid duplication;

(8) encourage homeless individuals and individuals of low or very low income to attend the department's educational programs and assist those individuals in attending the programs;

(9) appoint and determine the qualifications, duties, and tenure of its agents, counselors, and professional advisors, including accountants, appraisers, architects, engineers, financial consultants, housing construction and financing experts, and real estate consultants;

(10) administer federal housing, community affairs, or community development programs, including the low income housing tax credit program;

(11) establish eligibility criteria for individuals and families of low, very low, and families of moderate income to participate in and benefit from programs administered by the

department;

(12) execute funding agreements;

(13) obtain, retain, and disseminate records and other documents in electronic form; and

(14) do all things necessary, convenient, or desirable to carry out the powers expressly granted or necessarily implied by this chapter.

Sec. 2306.054. SPECIAL ADVISORY COUNCILS. (a) The governor or director may appoint special advisory councils to:

(1) assist the department in reviewing basic policy; or

(2) offer advice on technical aspects of certain programs.

(b) A special advisory council is dissolved on completion of its stated purpose unless continued by the governor or director.

(c) A special advisory council is subject to Chapter 2110, including Section 2110.008(a) but not including Section 2110.008(b).

Sec. 2306.055. TRANSFERS FROM GOVERNOR. The governor may transfer to any division personnel, equipment, records, obligations, appropriations, functions, and duties of appropriate divisions of the governor's office.

Sec. 2306.056. COMMITTEES. (a) The presiding officer may appoint a committee composed of board members to carry out the board's duties.

(b) The board may consider a recommendation of a committee in making a decision under this chapter.

Sec. 2306.057. COMPLIANCE ASSESSMENT REQUIRED FOR PROJECT APPROVAL BY BOARD. (a) Before the board approves any project application submitted under this chapter, the department, through the division with responsibility for compliance matters, shall:

(1) assess:

(A) the compliance history in this state of the applicant and any affiliate of the applicant with respect to all applicable requirements; and

(B) the compliance issues associated with the proposed project; and

(2) provide to the board a written report regarding the results of the assessments described by Subdivision (1).

(b) The written report described by Subsection (a)(2) must be included in the appropriate project file for board and department review.

(c) The board shall fully document and disclose any instances in which the board approves a project application despite any noncompliance associated with the project, applicant, or affiliate.

(d) In assessing the compliance of the project, applicant, or affiliate, the board shall consider any relevant compliance information in the department's database created under Section 2306.081, including compliance information provided to the department by the Texas State Affordable Housing Corporation.

SUBCHAPTER D. GENERAL ADMINISTRATIVE PROVISIONS

Sec. 2306.061. STANDARDS OF CONDUCT. The director or the director's designee shall become aware of and provide to members of the board and to department employees, as often as necessary, information regarding the requirements for office or employment under this chapter, including information regarding a person's responsibilities under applicable laws relating to standards of conduct for state officers or employees.

Sec. 2306.063. PERFORMANCE EVALUATIONS. The director or the director's designee shall develop a system of annual performance evaluations. All merit pay for department employees must be based on the system established under this section.

Sec. 2306.064. EQUAL EMPLOYMENT OPPORTUNITIES. (a) The director or the director's designee shall prepare and maintain a written policy statement to ensure implementation of a program of equal employment opportunity under which all personnel transactions are made without regard to race, color, disability, sex, religion, age, or national origin. The policy statement must include:

(1) a comprehensive analysis of the department work force that meets federal and state guidelines;

(2) personnel policies, including policies relating to recruitment, evaluation, selection, appointment, training, and promotion of personnel;

(3) procedures by which a determination can be made of significant underuse in the department work force of all persons for whom federal or state guidelines encourage a more equitable balance; and

(4) reasonable methods to appropriately address those areas of significant underuse.

(b) A policy statement prepared under Subsection (a) must cover an annual period, be updated at least annually, and be filed with the governor's office.

(c) The governor's office shall deliver a biennial report to the legislature based on the information received under Subsection (b). The report may be made separately or as a part of other biennial reports made to the legislature.

Sec. 2306.065. DISCRIMINATION PROHIBITED. An individual may not, because of that individual's race, color, national origin, or sex, be excluded from participation, be denied benefits, or be subjected to discrimination in any program or activity funded in whole or in part with funds made available under this chapter.

Sec. 2306.066. INFORMATION AND COMPLAINTS. (a) The department shall prepare information of public interest describing the functions of the department and the procedures by which complaints are filed with and resolved by the department. The department shall make the information available to the public and appropriate state agencies.

(b) The department shall maintain a file on each written complaint filed with the department. The file must include:

(1) the name of the person who filed the complaint;

(2) the date the complaint is received by the department;

(3) the subject matter of the complaint;

(4) the name of each person contacted in relation to the complaint;

(5) a summary of the results of the review or investigation of the complaint; and

(6) an explanation of the reason the file was closed, if the department closed the file without taking action other than to investigate the complaint.

(c) The department shall provide to the person filing the complaint and to each person who is a subject of the complaint a copy of the department's policies and procedures relating to complaint investigation and resolution. The department, at least quarterly until final disposition of the complaint, shall notify the person filing the complaint and each person who is a subject of the complaint of the status of the investigation unless the notice would jeopardize an undercover investigation.

(d) The board shall develop and implement policies that provide the public with a reasonable opportunity to appear before the board and to speak on any issue under the jurisdiction of the board.

(e) The director shall prepare and maintain a written plan that describes how an individual who does not speak English or who has a physical, mental, or developmental disability may be provided reasonable access to and participation in the department's programs.

Sec. 2306.067. LOANED EMPLOYEES. (a) The director may enter into reciprocal agreements with a state agency or instrumentality or local government to loan or assign department employees to that entity.

(b) A state agency or instrumentality or local government may loan or assign employees to the department, with or without reimbursement, by agreement between the department and the other party. The department may contract to reimburse all costs incidental to loaning or assigning employees.

(c) An employee loaned or assigned to the department is an employee of the lending agency or unit for purposes of salary, leave, retirement, and other personnel benefits. The loaned or assigned employee is under the supervision of personnel of the department and is an employee of the department for all other purposes.

(d) The director may enter into an agreement with the manufactured housing division to loan or assign department employees, equipment, and facilities to that division.

Sec. 2306.068. INTERAGENCY COOPERATION. An agency or institution of the state shall cooperate with the department by providing personnel, information, and technical advice as the department assists the governor in:

(1) the coordination of federal and state activities affecting local government; and

(2) providing affordable housing for individuals and families of low and very low income and families of moderate income.

Sec. 2306.069. LEGAL COUNSEL. (a) With the approval of the attorney general, the department may hire appropriate outside legal counsel.

(b) The department may hire in-house legal counsel. The director shall prescribe the duties of the legal counsel.

Sec. 2306.070. BUDGET. (a) In preparing the department's legislative appropriations request, the department shall also prepare:

(1) a report detailing the fees received, on a cash basis, for each activity administered by the department during each of the three preceding years;

(2) an operating budget for the housing finance division; and

(3) an explanation of any projected increase or decrease of three percent or more in fees estimated for the operating budget as compared to the fees received in the most recent budget year.

(b) The department shall submit the report, operating budget, and explanation to the Legislative Budget Board, the Senate Finance Committee, and the House Appropriations Committee.

Sec. 2306.0705. GENERAL APPROPRIATIONS ACT. Except as specifically provided by this chapter, the department is subject to the General Appropriations Act.

Sec. 2306.071. FUNDS. (a) The department may request, contract for, receive, and spend for its purposes an appropriation, grant, allocation, subsidy, rent supplement, guarantee, aid, contribution, gift, service, labor, or material from this state, the federal government, or another public or private source.

(b) The funds and revenues of the housing finance division shall be kept separate from the funds and revenues of the other divisions, and the other divisions may use funds and revenues of the housing finance division only to administer housing-related programs.

(c) Except for legislative appropriations, funds necessary for the operation of the housing finance division, and trustee-held funds of the department under a multifamily bond indenture, all funds and revenue received by the housing finance division are to be kept outside the state treasury.

(d) Legislative appropriations to the housing finance division and the operating funds of the division shall be kept in the state treasury. Trustee-held funds of the department under a multifamily bond indenture are held by the trustee as provided by the indenture.

Sec. 2306.072. ANNUAL LOW INCOME HOUSING REPORT. (a) Not later than March 18 of each year, the director shall prepare and submit to the board an annual report of the department's housing activities for the preceding year.

(b) Not later than the 30th day after the date the board receives and approves the report, the board shall submit the report to the governor, lieutenant governor, speaker of the house of representatives, and members of any legislative oversight committee.

(c) The report must include:

(1) a complete operating and financial statement of the department;

(2) a comprehensive statement of the activities of the department during the preceding year to address the needs identified in the state low income housing plan prepared as required by Section 2306.0721, including:

(A) a statistical and narrative analysis of the department's performance in addressing the housing needs of individuals and families of low and very low income;

(B) the ethnic and racial composition of individuals and families applying for and receiving assistance from each housing-related program operated by the department; and

(C) the department's progress in meeting the goals established in the previous housing plan;

(3) an explanation of the efforts made by the department to ensure the participation of individuals of low income and their community-based institutions in department programs that affect them;

(4) a statement of the evidence that the department has made an affirmative effort to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process;

(5) a statistical analysis, delineated according to each ethnic and racial group served by the department, that indicates the progress made by the department in implementing the state low income housing plan in each of the uniform state service regions;

(6) an analysis, based on information provided by the fair housing sponsor reports required under Section 2306.0724 and other available data, of fair housing opportunities in each

housing development that receives financial assistance from the department that includes the following information for each housing development that contains 20 or more living units:

(A) the street address and municipality or county in which the property is located;

(B) the telephone number of the property management or leasing agent;

(C) the total number of units, reported by bedroom size;

(D) the total number of units, reported by bedroom size, designed for individuals who are physically challenged or who have special needs and the number of these individuals served annually;

(E) the rent for each type of rental unit, reported by bedroom size;

(F) the race or ethnic makeup of each project;

(G) the number of units occupied by individuals receiving government-supported housing assistance and the type of assistance received;

(H) the number of units occupied by individuals and families of extremely low income, very low income, low income, moderate income, and other levels of income;

(I) a statement as to whether the department has been notified of a violation of the fair housing law that has been filed with the United States Department of Housing and Urban Development, the Commission on Human Rights, or the United States Department of Justice; and

(J) a statement as to whether the development has any instances of material noncompliance with bond indentures or deed restrictions discovered through the normal monitoring activities and procedures that include meeting occupancy requirements or rent restrictions imposed by deed restriction or financing agreements;

(7) a report on the geographic distribution of low income housing tax credits, the amount of unused low income housing tax credits, and the amount of low income housing tax credits received from the federal pool of unused funds from other states; and

(8) a statistical analysis, based on information provided by the fair housing sponsor reports required by Section 2306.0724 and other available data, of average rents reported by county.

(d) Repealed by Acts 2003, 78th Leg., ch. 330, Sec. 31(1).

Sec. 2306.0721. LOW INCOME HOUSING PLAN. (a) Not later than March 18 of each year, the director shall prepare and submit to the board an integrated state low income housing plan for the next year.

(b) Not later than the 30th day after the date the board receives and approves the plan, the board shall submit the plan to the governor, lieutenant governor, and the speaker of the house of representatives.

(c) The plan must include:

(1) an estimate and analysis of the housing needs of the following populations in each uniform state service region:

(A) individuals and families of moderate, low, very low, and extremely low income;

(B) individuals with special needs; and

(C) homeless individuals;

(2) a proposal to use all available housing resources to address the housing needs of the populations described by Subdivision (1) by establishing funding levels for all housing-related programs;

(3) an estimate of the number of federally assisted housing units available for individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(4) a description of state programs that govern the use of all available housing resources;

(5) a resource allocation plan that targets all available housing resources to individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(6) a description of the department's efforts to monitor and analyze the unused or underused federal resources of other state agencies for housing-related services and services for homeless individuals and the department's recommendations to ensure the full use by the state of all available federal resources for those services in each uniform state service region;

(7) strategies to provide housing for individuals and families with special needs in each uniform state service region;

(8) a description of the department's efforts to encourage in each uniform state service region the construction of housing units that incorporate energy efficient construction and appliances;

(9) an estimate and analysis of the housing supply in each uniform state service region;

(10) an inventory of all publicly and, where possible, privately funded housing resources, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies;

(11) strategies for meeting rural housing needs;

(12) a biennial action plan for colonias that:

(A) addresses current policy goals for colonia programs, strategies to meet the policy goals, and the projected outcomes with respect to the policy goals; and

(B) includes information on the demand for contract-for-deed conversions, services from self-help centers, consumer education, and other colonia resident services in counties some part of which is within 150 miles of the international border of this state;

(13) a summary of public comments received at a hearing under this chapter or from another source that concern the demand for colonia resident services described by Subdivision (12); and

(14) any other housing-related information that the state is required to include in the one-year action plan of the consolidated plan submitted annually to the United States Department of Housing and Urban Development.

(d) The priorities and policies in another plan adopted by the department must be consistent to the extent practical with the priorities and policies established in the state low income housing plan.

(e) To the extent consistent with federal law, the preparation and publication of the state low income housing plan shall be consistent with the filing and publication deadlines required of the department for the consolidated plan.

(f) The director may subdivide the uniform state service regions as necessary for purposes of the state low income housing plan.

(g) The department shall include the plan developed by the Texas State Affordable Housing Corporation under Section 2306.566 in the department's resource allocation plan under Subsection (c)(5).

(h) Repealed by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 42, eff. September 1, 2007.

Sec. 2306.0722. PREPARATION OF PLAN AND REPORT. (a) Before preparing the annual low income housing report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the department shall meet with regional planning commissions created under Chapter 391, Local Government Code, representatives of groups with an interest in low income housing, nonprofit housing organizations, managers, owners, and developers of affordable housing, local government officials, residents of low income housing, and members of the Colonia Resident Advisory Committee. The department shall obtain the comments and suggestions of the representatives, officials, residents, and members about the prioritization and allocation of the department's resources in regard to housing.

(b) In preparing the annual report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the director shall:

(1) coordinate local, state, and federal housing resources, including tax exempt housing bond financing and low income housing tax credits;

(2) set priorities for the available housing resources to help the neediest individuals;

(3) evaluate the success of publicly supported housing programs;

(4) survey and identify the unmet housing needs of individuals the department is required to assist;

(5) ensure that housing programs benefit an individual without regard to the individual's race, ethnicity, sex, or national origin;

(6) develop housing opportunities for individuals and families of low and very low income and individuals with special housing needs;

(7) develop housing programs through an open, fair, and public process;

(8) set priorities for assistance in a manner that is appropriate and consistent with the housing needs of the populations described by Section 2306.0721(c)(1);

(9) incorporate recommendations that are consistent with the consolidated plan submitted annually by the state to the United States Department of Housing and Urban Development;

(10) identify the organizations and individuals consulted by the department in preparing the annual report and state low income housing plan and summarize and incorporate comments and suggestions provided under Subsection (a) as the board determines to be appropriate;

(11) develop a plan to respond to changes in federal funding and programs for the

provision of affordable housing;

(12) use the following standardized categories to describe the income of program applicants and beneficiaries:

(A) 0 to 30 percent of area median income adjusted for family size;

(B) more than 30 to 60 percent of area median income adjusted for family size;

(C) more than 60 to 80 percent of area median income adjusted for family size;

(D) more than 80 to 115 percent of area median income adjusted for family size; or

(E) more than 115 percent of area median income adjusted for family size;

(13) use the most recent census data combined with existing data from local housing and community service providers in the state, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies; and

(14) provide the needs assessment information compiled for the report and plan to the Texas State Affordable Housing Corporation.

Sec. 2306.0723. REPORT CONSIDERED AS RULE. The department shall consider the annual low income housing report to be a rule and in developing the report shall follow rulemaking procedures required by Chapter 2001.

Sec. 2306.0724. FAIR HOUSING SPONSOR REPORT. (a) The department shall require the owner of each housing development that receives financial assistance from the department and that contains 20 or more living units to submit an annual fair housing sponsor report. The report must include the relevant information necessary for the analysis required by Section 2306.072(c)(6). In compiling the information for the report, the owner of each housing development shall use data current as of January 1 of the reporting year.

(b) The department shall adopt rules regarding the procedure for filing the report.

(c) The department shall maintain the reports in electronic and hard-copy formats readily available to the public at no cost.

(d) A housing sponsor who fails to file a report in a timely manner is subject to the following sanctions, as determined by the department:

(1) denial of a request for additional funding; or

(2) an administrative penalty in an amount not to exceed $1,000, assessed in the manner provided for an administrative penalty under Section 2306.6023.

Sec. 2306.073. INTERNAL AUDIT. (a) The director, with the approval of the board, shall appoint an internal auditor who reports directly to the board and serves at the pleasure of the board.

(b) The internal auditor shall:

(1) prepare an annual audit plan using risk assessment techniques to rank high-risk functions in the department; and

(2) submit the annual audit plan to the director and board for consideration and approval or change as necessary or advisable.

(c) The internal auditor may bring before the director or board an issue outside the annual audit plan that requires the immediate attention of the director or board.

(d) The internal auditor may not be assigned any operational or management responsibilities that impair the ability of the internal auditor to make an independent examination of the department's operations.

(e) The department shall give the internal auditor unrestricted access to activities and records of the department unless restricted by other law.

Sec. 2306.074. AUDIT. (a) The department's books and accounts must be audited each fiscal year by a certified public accountant or, if requested by the department and if the legislative audit committee approves including the audit in the audit plan under Section 321.013(c), by the state auditor. A copy of the audit must be filed with the governor, the comptroller, and the legislature not later than the 30th day after the submission date for the annual financial report as required by the General Appropriations Act. If the state auditor is conducting the audit and it is not available by the 30th day after the submission date as required by the General Appropriations Act for annual financial reporting, it must be filed as soon as it is available.

(b) The department shall pay for the audit.

Sec. 2306.075. TAX EXEMPTION. The property of the department, its income, and its operations are exempt from all taxes and assessments imposed by this state and all public agencies on property acquired or used by the department under this chapter.

Sec. 2306.076. INSURANCE. (a) The board may purchase from department funds liability insurance for the director, board members, officers, and employees of the department.

(b) The board may purchase the insurance in an amount the board considers reasonably necessary to:

(1) insure against reasonably foreseeable liabilities; and

(2) provide for all costs of defending against those liabilities, including court costs and attorney's fees.

Sec. 2306.077. INTERNET AVAILABILITY. (a) In this section, "Internet" means the largest, nonproprietary, nonprofit, cooperative, public computer network, popularly known as the Internet.

(b) The department, to the extent it considers it to be feasible and appropriate, shall make information on the department's programs, public hearings, and scheduled public meetings available to the public on the Internet.

(c) The access to information allowed by this section is in addition to the public's free access to the information through other electronic or print distribution of the information and does not alter, diminish, or relinquish any copyright or other proprietary interest or entitlement of this state or a private entity under contract with this state.

(d) The department shall provide for annual housing sponsor reports required by Section 2306.0724 to be filed through the Internet.

(e) The department shall provide for reports regarding housing units designed for persons with disabilities made under Section 2306.078 to be filed through the Internet.

Sec. 2306.078. INFORMATION REGARDING HOUSING FOR PERSONS WITH DISABILITIES. (a) The department shall establish a system that requires owners of state or federally assisted housing developments with 20 or more housing units to report information regarding housing units designed for persons with disabilities.

(b) The system must provide for each owner of a development described by Subsection (a) with at least one housing unit designed for a person with a disability to enter the following information on the department's Internet site:

(1) the name, if any, of the development;

(2) the street address of the development;

(3) the number of housing units in the development that are designed for persons with disabilities and that are available for lease;

(4) the number of bedrooms in each housing unit designed for a person with a disability;

(5) the special features that characterize each housing unit's suitability for a person with a disability;

(6) the rent for each housing unit designed for a person with a disability; and

(7) the telephone number and name of the development manager or agent to whom inquiries by prospective tenants may be made.

(c) The department shall require each owner to maintain updated contact information under Subsection (b)(7) and shall solicit the owner's voluntary provision of updated information under Subsections (b)(3) and (6).

(d) The department shall make information provided under this section available to the public in electronic and hard-copy formats at no cost.

Sec. 2306.080. DATABASE INFORMATION SPECIALIST. The director shall appoint a database information specialist. The primary responsibility of the database information specialist is to provide for the effective and efficient dissemination to the public of information related to affordable housing and community development in a form that is accessible, widely available, and easily used.

Sec. 2306.081. PROJECT COMPLIANCE; DATABASE. (a) The department, through the division with responsibility for compliance matters, shall monitor for compliance with all applicable requirements the entire construction phase associated with any project under this chapter. The monitoring level for each project must be based on the amount of risk associated with the project.

(b) After completion of a project's construction phase, the department shall periodically review the performance of the project to confirm the accuracy of the department's initial compliance evaluation during the construction phase.

(c) The department shall use the division responsible for credit underwriting matters and the division responsible for compliance matters to determine the amount of risk associated with each project.

(d) The department shall create an easily accessible database that contains all project compliance information developed under this chapter, including project compliance information provided to the department by the Texas State Affordable Housing Corporation.

(e) Repealed by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 42, eff. September 1, 2007.

Sec. 2306.082. NEGOTIATED RULEMAKING; ALTERNATIVE DISPUTE RESOLUTION. (a) The department shall develop and implement a policy to encourage the use of:

(1) negotiated rulemaking procedures under Chapter 2008 for the adoption of department rules; and

(2) appropriate alternative dispute resolution procedures under Chapter 2009 to assist in the resolution of internal and external disputes under the department's jurisdiction.

(b) The department's procedures relating to alternative dispute resolution must designate the State Office of Administrative Hearings as the primary mediator and, to the extent practicable, conform to any guidelines or rules issued by that office.

(c) The department shall designate a person employed by or appointed to the office of the director but who is not in the legal division to coordinate and process requests for the alternative dispute resolution procedures. The person must receive training from an independent source in alternative dispute resolution not later than the 180th day after the date the person was designated to coordinate and process requests for the alternative dispute resolution procedures.

(d) The department shall notify a person requesting the alternative dispute resolution procedures that:

(1) an alternative dispute resolution decision is not binding on the state; and

(2) the department will mediate in good faith.

(e) The alternative dispute resolution procedures may be requested before the board makes a final decision.

(f) Notwithstanding any other provision of this section, the alternative dispute resolution procedures may not be used to unnecessarily delay a proceeding under this chapter.

Sec. 2306.083. REPORT TO SECRETARY OF STATE. (a) In this section, "colonia" means a geographic area that:

(1) is an economically distressed area as defined by Section 17.921, Water Code;

(2) is located in a county any part of which is within 62 miles of an international border; and

(3) consists of 11 or more dwellings that are located in close proximity to each other in an area that may be described as a community or neighborhood.

(b) To assist the secretary of state in preparing the report required under Section 405.021, the board on a quarterly basis shall provide a report to the secretary of state detailing any projects funded by the department that provide assistance to colonias.

(c) The report must include:

(1) a description of any relevant projects;

(2) the location of each project;

(3) the number of colonia residents served by each project;

(4) the exact amount spent or the anticipated amount to be spent on each colonia served by each project;

(5) a statement of whether each project is completed and, if not, the expected completion date of the project; and

(6) any other information, as determined appropriate by the secretary of state.

(d) The department shall require an applicant for funds administered by the department to submit to the department a colonia classification number, if one exists, for each colonia that may be served by the project proposed in the application. If a colonia does not have a classification number, the department may contact the secretary of state or the secretary of state's representative to obtain the classification number. On request of the department, the secretary of state or the secretary of state's representative shall assign a classification number to the colonia.

SUBCHAPTER E. COMMUNITY AFFAIRS AND COMMUNITY DEVELOPMENT PROGRAMS

Sec. 2306.092. DUTIES REGARDING CERTAIN PROGRAMS CREATED UNDER

FEDERAL LAW. The department shall administer, as appropriate under policies established by the board:

(1) state responsibilities for programs created under the federal Economic Opportunity Act of 1964 (42 U.S.C. Section 2701 et seq.);

(2) programs assigned to the department under the Omnibus Budget Reconciliation Act of 1981 (Pub.L. No. 97-35); and

(3) other federal acts creating economic opportunity programs assigned to the department.

Sec. 2306.093. HOUSING ASSISTANCE GOAL. By action of the board the community affairs division shall have a goal to apply a minimum of 25 percent of the division's total housing-related funds toward housing assistance for individuals and families of very low income.

Sec. 2306.094. SERVICES FOR THE HOMELESS. The department shall administer the state's allocation of federal funds provided under the Emergency Shelter Grants Program (42 U.S.C. Section 11371 et seq.), as amended, or its successor program, and any other federal funds provided for the benefit of homeless individuals and families.

Sec. 2306.097. ENERGY SERVICES PROGRAM FOR LOW-INCOME INDIVIDUALS. The Energy Services Program for Low-Income Individuals shall operate in conjunction with the community services block grant program and has jurisdiction and responsibility for administration of the following elements of the State Low-Income Energy Assistance Program, from whatever sources funded:

(1) the Energy Crisis Intervention Program;

(2) the weatherization program; and

(3) the Low-Income Home Energy Assistance Program.

(b) Applications, forms, and educational materials for a program administered under Subsection (a)(1), (2), or (3) must be provided in English, Spanish, and any other appropriate language.

Sec. 2306.0985. RECOVERY OF FUNDS FROM CERTAIN SUBDIVISIONS. (a) It is the intent of the legislature that a private developer not unduly benefit from the expenditure by the state of public funds on infrastructure for public benefit.

(b) This section applies only to property located in:

(1) the unincorporated area of an affected county, as defined by Section 16.341, Water Code; and

(2) an economically distressed area, as defined by Section 16.341, Water Code.

(c) As a condition for the receipt of state funds, and to the extent permitted by law, federal funds, the department may require a political entity with authority to tax and place a lien on property to place a lien or assessment on property that benefits from the expenditure of state or federal funds for water, wastewater, or drainage improvements affecting the property. The lien or assessment may not exceed an amount equal to the cost of making the improvements as those costs relate to the property. The lien or assessment expires 10 years after the date the improvements are completed.

(d) If property subject to a lien or assessment under Subsection (c) is sold, the seller must pay to the political entity from the proceeds of the sale an amount equal to the value of the lien or assessment. This subsection does not apply if:

(1) the reason for the sale is:

(A) the disposition of the estate following the death of the owner of the property; or

(B) the owner because of physical condition must reside in a continuous care facility and no longer resides on the property; or

(2) the owner of the property is a person of low or moderate income.

(e) If property subject to a lien or assessment under Subsection (c) is repossessed by the holder of a note or a contract for deed, the holder must pay to the political entity an amount equal to the value of the lien or assessment before taking possession of the property.

(f) Subject to rules adopted by the department, a political entity shall collect payments made under this section and remit the funds for deposit in the treasury to the credit of a special account in the general revenue fund that may be appropriated only to the department for use in administering a program under Section 2306.098.

(g) After public notice and comment, the department shall adopt rules to administer this section. The department may provide by rule for the reduction or waiver of a fee authorized by this section.

SUBCHAPTER F. HOUSING FINANCE DIVISION: GENERAL PROVISIONS

Sec. 2306.111. HOUSING FUNDS. (a) The department, through the housing finance division, shall administer all federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12704 et seq.) or any other affordable housing program.

(b) The housing finance division shall adopt a goal to apply an aggregate minimum of 25 percent of the division's total housing funds toward housing assistance for individuals and families of extremely low and very low income.

(c) In administering federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.), the department shall expend:

(1) 95 percent of these funds for the benefit of non-participating small cities and rural areas that do not qualify to receive funds under the Cranston-Gonzalez National Affordable Housing Act directly from the United States Department of Housing and Urban Development; and

(2) five percent of these funds for the benefit of persons with disabilities who live in any area of this state.

(c-1) The following entities are eligible to apply for set-aside funds under Subsection (c):

(1) nonprofit providers of affordable housing, including community housing development organizations; and

(2) for-profit providers of affordable housing.

(c-2) In allocating set-aside funds under Subsection (c), the department may not give preference to nonprofit providers of affordable housing, except as required by federal law.

(d) The department shall allocate housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.), housing trust funds administered by the department under Sections 2306.201-2306.206, and commitments issued under the federal low income housing tax credit program administered by the department under Subchapter DD to all urban areas and rural areas of each uniform state service region based on a formula developed by the department under Section 2306.1115. If the department determines under the formula that an insufficient number of eligible applications for assistance out of funds or credits allocable under this subsection are submitted to the department from a particular uniform state service region, the department shall use the unused funds or credits allocated to that region for all urban areas and rural areas in other uniform state service regions based on identified need and financial feasibility.

(d-1) In allocating low income housing tax credit commitments under Subchapter DD, the department shall, before applying the regional allocation formula prescribed by Section 2306.1115, set aside for at-risk developments, as defined by Section 2306.6702, not less than the minimum amount of housing tax credits required under Section 2306.6714. Funds or credits are not required to be allocated according to the regional allocation formula under Subsection (d) if:

(1) the funds or credits are reserved for contract-for-deed conversions or for set-asides mandated by state or federal law and each contract-for-deed allocation or set-aside allocation equals not more than 10 percent of the total allocation of funds or credits for the applicable program;

(2) the funds or credits are allocated by the department primarily to serve persons with disabilities; or

(3) the funds are housing trust funds administered by the department under Sections 2306.201-2306.206 that are not otherwise required to be set aside under state or federal law and do not exceed $3 million during each application cycle.

(d-2) In allocating low income housing tax credit commitments under Subchapter DD, the department shall allocate five percent of the housing tax credits in each application cycle to developments that receive federal financial assistance through the Texas Rural Development Office of the United States Department of Agriculture. Any funds allocated to developments under this subsection that involve rehabilitation must come from the funds set aside for at-risk developments under Section 2306.6714 and any additional funds set aside for those developments under Subsection (d-1). This subsection does not apply to a development financed wholly or partly under Section 538 of the Housing Act of 1949 (42 U.S.C. Section 1490p-2).

(d-3) In allocating low income tax credit commitments under Subchapter DD, the department shall allocate to developments in rural areas 20 percent or more of the housing tax credits in the state in the application cycle, with $500,000 or more in housing tax credits being reserved for each uniform state service region under this subsection. Any amount of housing tax credits set aside for developments in a rural area in a specific uniform state service region under this subsection that remains after the initial allocation of housing tax credits is available for allocation to developments in any other rural area first, and then is available to developments in urban areas of any uniform state service region.

(e) The department shall include in its annual low income housing plan under Section 2306.0721:

(1) the formula developed by the department under Section 2306.1115; and

(2) the allocation targets established under the formula for the urban areas and rural areas of each uniform state service region.

(f) The department shall include in its annual low income housing report under Section 2306.072 the amounts of funds and credits allocated to the urban areas and rural areas of each uniform state service region in the preceding year for each federal and state program affected by the requirements of Subsection (d).

(g) For all urban areas and rural areas of each uniform state service region, the department shall establish funding priorities to ensure that:

(1) funds are awarded to project applicants who are best able to meet recognized needs for affordable housing, as determined by department rule;

(2) when practicable and when authorized under Section 42, Internal Revenue Code of 1986 (26 U.S.C. Section 42), the least restrictive funding sources are used to serve the lowest income residents; and

(3) funds are awarded based on a project applicant's ability, when consistent with Section 42, Internal Revenue Code of 1986 (26 U.S.C. Section 42), practicable, and economically feasible, to:

(A) provide the greatest number of quality residential units;

(B) serve persons with the lowest percent area median family income;

(C) extend the duration of the project to serve a continuing public need;

(D) use other local funding sources to minimize the amount of state subsidy needed to complete the project; and

(E) provide integrated, affordable housing for individuals and families with different levels of income.

(h) The department by rule shall adopt a policy providing for the reallocation of financial assistance administered by the department, including financial assistance related to bonds issued by the department, if the department's obligation with respect to that assistance is prematurely terminated.

(i) The director shall designate an employee of the department to act as the information officer and as a liaison with the public regarding each application seeking an allocation of housing funds described by this section.

Sec. 2306.1111. UNIFORM APPLICATION AND FUNDING CYCLES. (a) Notwithstanding any other state law and to the extent consistent with federal law, the department shall establish uniform application and funding cycles for all competitive single-family and multifamily housing programs administered by the department under this chapter, other than programs involving the issuance of private activity bonds.

(b) Wherever possible, the department shall use uniform threshold requirements for single-family and multifamily housing program applications, including uniform threshold requirements relating to market studies and environmental reports.

Sec. 2306.1112. EXECUTIVE AWARD AND REVIEW ADVISORY COMMITTEE. (a) The department shall establish an executive award and review advisory committee to make recommendations to the board regarding funding and allocation decisions.

(b) The advisory committee must include representatives from the department's underwriting and compliance functions and from the divisions responsible for administering federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.) and for administering low income housing tax credits.

(c) The advisory committee is not subject to Chapter 2110.

Sec. 2306.1113. EX PARTE COMMUNICATIONS. (a) During the period beginning on the date project applications are filed in an application cycle and ending on the date the board makes a final decision with respect to the approval of any application in that cycle, a member of the board may not communicate with the following persons:

(1) an applicant or a related party, as defined by state law, including board rules, and federal law; and

(2) any person who is:

(A) active in the construction, rehabilitation, ownership, or control of a proposed project, including:

(i) a general partner or contractor; and

(ii) a principal or affiliate of a general partner or contractor; or

(B) employed as a consultant, lobbyist, or attorney by an applicant or a related party.

(a-1) Subject to Subsection (a-2), during the period beginning on the date project applications are filed in an application cycle and ending on the date the board makes a final decision with respect to the approval of any application in that cycle, an employee of the department may communicate about an application with the following persons:

(1) the applicant or a related party, as defined by state law, including board rules, and federal law; and

(2) any person who is:

(A) active in the construction, rehabilitation, ownership, or control of the proposed project, including:

(i) a general partner or contractor; and

(ii) a principal or affiliate of a general partner or contractor; or

(B) employed as a consultant, lobbyist, or attorney by the applicant or a related party.

(a-2) A communication under Subsection (a-1) may be oral or in any written form, including electronic communication through the Internet, and must satisfy the following conditions:

(1) the communication must be restricted to technical or administrative matters directly affecting the application;

(2) the communication must occur or be received on the premises of the department during established business hours; and

(3) a record of the communication must be maintained and included with the application for purposes of board review and must contain the following information:

(A) the date, time, and means of communication;

(B) the names and position titles of the persons involved in the communication and, if applicable, the person's relationship to the applicant;

(C) the subject matter of the communication; and

(D) a summary of any action taken as a result of the communication.

(b) Notwithstanding Subsection (a) or (a-1), a board member or department employee may communicate without restriction with a person listed in Subsection (a) or (a-1) during any board meeting or public hearing held with respect to the application, but not during a recess or other nonrecord portion of the meeting or hearing.

(c) Subsection (a) does not prohibit the board from participating in social events at which a person with whom communications are prohibited may or will be present, provided that all matters related to applications to be considered by the board will not be discussed.

Sec. 2306.1114. NOTICE OF RECEIPT OF APPLICATION OR PROPOSED APPLICATION. (a) Not later than the 14th day after the date an application or a proposed application for housing funds described by Section 2306.111 has been filed, the department shall provide written notice of the filing of the application or proposed application to the following persons:

(1) the United States representative who represents the community containing the development described in the application;

(2) members of the legislature who represent the community containing the development described in the application;

(3) the presiding officer of the governing body of the political subdivision containing the development described in the application;

(4) any member of the governing body of a political subdivision who represents the area containing the development described in the application;

(5) the superintendent and the presiding officer of the board of trustees of the school district containing the development described in the application; and

(6) any neighborhood organizations on record with the state or county in which the development described in the application is to be located and whose boundaries contain the proposed development site.

(b) The notice provided under Subsection (a) must include the following information:

(1) the relevant dates affecting the application, including:

(A) the date on which the application was filed;

(B) the date or dates on which any hearings on the application will be held; and

(C) the date by which a decision on the application will be made;

(2) a summary of relevant facts associated with the development;

(3) a summary of any public benefits provided as a result of the development,

including rent subsidies and tenant services; and

(4) the name and contact information of the employee of the department designated by the director to act as the information officer and liaison with the public regarding the application.

Sec. 2306.1115. REGIONAL ALLOCATION FORMULA. (a) To allocate housing funds under Section 2306.111(d), the department shall develop a formula that:

(1) includes as a factor the need for housing assistance and the availability of housing resources in an urban area or rural area;

(2) provides for allocations that are consistent with applicable federal and state requirements and limitations; and

(3) includes other factors determined by the department to be relevant to the equitable distribution of housing funds under Section 2306.111(d).

(b) The department shall use information contained in its annual state low income housing plan and other appropriate data to develop the formula under this section.

Sec. 2306.112. PREPARATION AND CONTENT OF ANNUAL BUDGET. (a) On or before August 1 of each year, the director shall file with the board a proposed annual budget for the housing finance division for the succeeding fiscal year.

(b) The budget shall state:

(1) the general categories of expected expenditures from revenues and income of the housing finance division;

(2) the amount of expected expenditures for each category;

(3) expected operating expenses of the housing finance division; and

(4) the proposed use of projected year-end unencumbered balances.

(c) The budget may include a provision or reserve for contingencies or overexpenditures.

Sec. 2306.113. BOARD CONSIDERATION OF ANNUAL BUDGET. On or before September 1 of each year, the board shall consider the director's proposed annual budget for the housing finance division and shall approve or change the budget as the board determines necessary or advisable.

Sec. 2306.114. FILING OF ANNUAL BUDGET. (a) Copies of the annual budget certified by the presiding officer of the board shall be filed promptly with the governor and the legislature.

(b) The annual budget is not effective until filed.

Sec. 2306.115. FAILURE TO ADOPT ANNUAL BUDGET. If the board does not adopt the annual budget on or before September 1, the budget for the preceding year remains in effect until a new budget is adopted.

Sec. 2306.116. AMENDED ANNUAL BUDGET. (a) The board may adopt an amended annual budget during the fiscal year.

(b) An amended annual budget does not supersede a prior budget until it is filed with the governor and the legislature.

Sec. 2306.117. PAYMENT OF EXPENSES; INDEBTEDNESS. (a) The expenses incurred in carrying out the functions of the housing finance division may be paid only from revenues or funds provided under this chapter.

(b) This chapter does not authorize the housing finance division to incur debt or liability on behalf of or payable by the state, except as provided by this chapter or other law.

Sec. 2306.118. DEPOSIT OF FUNDS WITH TEXAS TREASURY SAFEKEEPING TRUST COMPANY. Except as provided by Section 2306.120, revenue and funds of the department received by or payable through the programs and functions of the housing finance division, other than funds necessary for the operation of the housing finance division and appropriated funds, shall be deposited outside the treasury with the Texas Treasury Safekeeping Trust Company.

Sec. 2306.119. SELECTION OF DEPOSITORY FOR OPERATING FUNDS. (a) The department shall choose a depository for the operating funds of the housing finance division after inviting bids for favorable interest rates.

(b) The housing finance division shall publish notice in at least one newspaper of general circulation in this state no later than the 14th day before the last day set for the receipt of the bids.

(c) Notice published under this section must state the:

(1) types of deposits planned;

(2) last day on which bids will be received; and

(3) time and place for opening bids.

(d) Sealed bids must be:

(1) identified on the envelope as bids; and

(2) submitted to the housing finance division before the deadline for receiving bids.

(e) The housing finance division shall provide a tabulation of all submitted bids for public inspection.

(f) The department shall choose the depository submitting the bid with the most favorable financial terms to the department, considering the security and efficiency with which the depository is capable of managing the department's funds.

Sec. 2306.120. SELECTION OF DEPOSITORY UNDER COVENANTS OF BONDS OR TRUST INDENTURES. (a) If covenants related to the department's bonds or the trust indentures governing the bonds specify one or more depositories or set out a method of selecting depositories different from the method required by this subchapter, the covenants prevail regarding the funds to which they apply and the funds are not required to be deposited with the Texas Treasury Safekeeping Trust Company.

(b) Bonds of the housing finance division issued under trust indentures executed or resolutions adopted on or after September 1, 1991, may not include a covenant that interferes with the deposit of funds in the Texas Treasury Safekeeping Trust Company.

Sec. 2306.121. RECORDS. The housing finance division shall keep complete records and accounts of its business transactions according to generally accepted accounting principles.

Sec. 2306.123. AREA MEDIAN INCOME. The department may determine the median income of an individual or family for an area by using a source or methodology acceptable under federal law or rule.

Sec. 2306.1231. FEDERAL POVERTY LINE. The department shall use the applicable federal poverty line in determining eligibility for each federal or state program administered by the department that requires poverty instead of area median income to be used as a criterion of program eligibility.

Sec. 2306.124. RULES REGARDING HOUSING DEVELOPMENTS. The department may adopt and publish rules regarding the:

(1) making of mortgage loans under this subchapter;

(2) regulation of borrowers;

(3) construction of ancillary commercial facilities; and

(4) resale and disposition of real property, or an interest in the property, that is financed by the department.

Sec. 2306.125. COURT ACTIONS. (a) The department may institute a judicial action or proceeding against a housing sponsor receiving a loan or owning a housing development under this chapter to:

(1) enforce this chapter;

(2) enforce the terms and provisions of an agreement or contract between the department and the recipient of a loan under this chapter, including provisions regarding rental or carrying charges and income limits as applied to tenants or occupants;

(3) foreclose its mortgage; or

(4) protect:

(A) the public interest;

(B) individuals and families of low and very low income or families of moderate income;

(C) stockholders; or

(D) creditors of the sponsor.

(b) In an action or proceeding under this section, the department may apply for the appointment of a trustee or receiver to assume the management and operation of the affairs of a housing sponsor.

(c) The department, through its designated agent, may accept appointment as trustee or receiver of a housing sponsor when appointed by a court of competent jurisdiction.

Sec. 2306.126. EXEMPTION FROM PROPERTY TAX. (a) The department may, under its terms, conditions, and rules, pay public agencies in lieu of ad valorem taxes on property that the department acquires through foreclosure or sale under a deed of trust.

(b) The department shall make payments under this section instead of paying taxes whenever practicable with money lawfully available for this purpose, subject to the provisions of any bond resolution.

Sec. 2306.127. PRIORITY FOR CERTAIN COMMUNITIES. In a manner consistent with the regional allocation formula described under Section 2306.111(d), the department shall give priority through its housing program scoring criteria to communities that are located wholly or partly in:

(1) a federally designated urban enterprise community;

(2) an urban enhanced enterprise community; or

(3) an economically distressed area or colonia.

SUBCHAPTER G. HOUSING FINANCE DIVISION: GENERAL POWERS AND DUTIES OF BOARD

Sec. 2306.141. RULES. The board shall have the specific duty and power to adopt rules governing the administration of the housing finance division and its programs.

Sec. 2306.142. AUTHORIZATION OF BONDS. (a) Subject to the requirements of this section, the board shall authorize all bonds issued by the department.

(b) If the issuance is authorized by the board, the department shall issue single-family mortgage revenue bonds to make home mortgage credit available for the purchase of newly constructed or previously owned single-family homes to economic and geographic submarkets of borrowers who are not served or who are substantially underserved by the conventional, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation, or Federal Housing Administration home mortgage lending industry or by housing finance corporations organized under Chapter 394, Local Government Code.

(c) The board by rule shall adopt a methodology for determining through a market study the home mortgage credit needs in underserved economic and geographic submarkets in the state. In conducting the market study required by this subsection, the department or its designee shall analyze for the underserved economic and geographic submarkets, at a minimum, the following factors:

(1) home ownership rates;

(2) loan volume;

(3) loan approval ratios;

(4) loan interest rates;

(5) loan terms;

(6) loan availability;

(7) type and number of dwelling units; and

(8) use of subprime mortgage loan products, comparing the volume amount of subprime loans and interest rates to "A" paper mortgage loans as defined by Standard and Poor's credit underwriting criteria.

(d) The department or its designee shall analyze the potential market demand, loan availability, and private sector home mortgage lending rates available to extremely low, very low, low, and moderate income borrowers in the rural counties of the state, in census tracts in which the median family income is less than 80 percent of the median family income for the county in which the census tract is located, and in the region of the state adjacent to the international border of the state. The department or its designee shall establish a process for serving those counties, census tracts, and regions through the single-family mortgage revenue bond program in a manner proportionate to the credit needs of those areas as determined through the department's market study.

(e) Using the market study and the analysis required by this section, the board shall evaluate the feasibility of a single-family mortgage revenue bond program with loan marketing, eligibility, underwriting, structuring, collection, and foreclosure criteria and with loan services practices that are designed to meet the credit needs of the underserved economic and geographic submarkets of the state, including those submarkets served disproportionately by subprime lenders.

(f) In evaluating a proposed bond program under this section, the board shall consider, consistent with the reasonable financial operation of the department, specific set-asides or reservations of mortgage loans for underserved economic and geographic submarkets in the state, including the reservation of funds to serve borrowers who have "A-" to "B-" credit according to Standard and Poor's credit underwriting criteria.

(g) The department may use any source of funds or subsidy available to the department to provide credit enhancement, down payment assistance, pre-homebuyer and post-homebuyer counseling, interest rate reduction, and payment of incentive lender points to accomplish the purposes of this section in a manner considered by the board to be consistent with the reasonable financial operation of the department.

(h) In allocating funds under Subsection (g), the department's highest priority is to provide assistance to borrowers in underserved economic and geographic submarkets in the state. If the board determines that sufficient funds are available after fully meeting the credit needs of borrowers in those submarkets, the department may provide assistance to other borrowers.

(i) The board shall certify that each single-family mortgage revenue bond issued by the department under this section is structured in a manner that serves the credit needs of borrowers in underserved economic and geographic submarkets in the state.

(j) After any board approval and certification of a single-family mortgage revenue bond issuance, the department shall submit the proposed bond issuance to the Bond Review Board for review.

(k) In the state fiscal year beginning on September 1, 2001, the department shall:

(1) adopt by rule a market study methodology as required by Subsection (c);

(2) conduct the market study;

(3) propose for board review a single-family mortgage revenue bond program, including loan feature details, a program for borrower subsidies as provided by Subsections (g) and (h), and origination and servicing infrastructure;

(4) identify reasonable capital markets financing;

(5) conduct a public hearing on the market study results and the proposed bond program; and

(6) submit for review by the Bond Review Board the market study results and, if approved and certified by the board, the proposed bond program.

(l) In the state fiscal year beginning on September 1, 2002, and in each subsequent state fiscal year, the department shall allocate not less than 40 percent of the total single-family mortgage revenue bond loan volume to meet the credit needs of borrowers in underserved economic and geographic submarkets in the state, subject to the identification of a satisfactory market volume demand through the market study.

(m) On completion of the market study, if the board determines in any year that bonds intended to be issued to achieve the purposes of this section are unfeasible or would damage the financial condition of the department, the board may formally appeal to the Bond Review Board the requirements of Subsection (k) or (l), as applicable. The Bond Review Board has sole authority to modify or waive the required allocation levels.

(n) In addition to any other loan originators selected by the department, the department shall authorize colonia self-help centers and any other community-based, nonprofit institutions considered appropriate by the board to originate loans on behalf of the department. All non-financial institutions acting as loan originators under this subsection must undergo adequate training, as prescribed by the department, to participate in the bond program. The department may require lenders to participate in ongoing training and underwriting compliance audits to maintain good standing to participate in the bond program. The department may require that lenders meet appropriate eligibility standards as prescribed by the department.

(o) The department shall structure all single-family mortgage revenue bond issuances in a manner designed to recover the full costs associated with conducting the activities required by this section.

Sec. 2306.143. ALTERNATIVE TO SUBPRIME LENDER LIST. (a) If the United States Department of Housing and Urban Development ceases to prepare or make public a subprime lender list, the market study required by Section 2306.142 must annually survey the 100 largest refinancing lenders and the 100 largest home purchase loan lenders in the state to identify lenders primarily engaged in subprime lending.

(b) The lenders included in the survey must be identified on the basis of home mortgage loan data reported by lenders under the Home Mortgage Disclosure Act of 1975 (12 U.S.C. Section 2801 et seq.) and the Community Reinvestment Act of 1977 (12 U.S.C. Section 2901 et seq.).

Sec. 2306.144. FEES FOR SERVICES AND FACILITIES; PAYMENT OF DEPARTMENT OBLIGATIONS AND EXPENSES. (a) It is the duty of the board to establish and collect sufficient fees for services and facilities.

(b) The board shall use available sources of revenue, income, and receipts to:

(1) pay all expenses of the department's operation and maintenance;

(2) pay the principal and interest on department bonds; and

(3) create and maintain the reserves or funds provided by each resolution authorizing the issuance of department bonds.

Sec. 2306.145. LOAN PROCEDURES. The board shall have the specific duty and power to adopt procedures for approving loans, purchases of loans and interests in loans, and commitments to purchase loans under this chapter.

Sec. 2306.146. INTEREST RATES AND AMORTIZATION SCHEDULES. The board shall have the specific duty and power to establish interest rates and amortization schedules for loans made or financed under this chapter.

Sec. 2306.147. FEES AND PENALTIES. (a) The board shall have the specific duty and power to establish a schedule of fees and penalties relating to the operation of the housing finance division and authorized by this chapter, including application, processing, loan commitment, origination, servicing, and administrative fees.

(b) The department shall waive grant application fees for nonprofit organizations that offer expanded services such as child care, nutrition programs, job training assistance, health services, or human services.

Sec. 2306.148. UNDERWRITING STANDARDS. The board shall have the specific duty and power to adopt underwriting standards for loans made or financed by the housing finance division.

Sec. 2306.149. APPROVED MORTGAGE LENDERS. The board shall have the specific duty and power to compile a list of approved mortgage lenders.

Sec. 2306.150. PROPERTY STANDARDS. The board shall have the specific duty and power to adopt minimum property standards for housing developments financed or acquired under this chapter.

Sec. 2306.151. TARGET STRATEGY FOR BOND PROCEEDS. The board shall have the specific duty and power to adopt a target strategy for the percentage of mortgage revenue bond proceeds to be made available to individuals and families of low and very low income.

Sec. 2306.152. ELIGIBILITY CRITERIA. The board shall have the specific duty and power to establish eligibility criteria for participation in the housing finance division's programs for individuals and families of low and very low income and families of moderate income.

SUBCHAPTER H. HOUSING FINANCE DIVISION: GENERAL POWERS AND DUTIES OF DEPARTMENT

Sec. 2306.171. GENERAL DUTIES OF DEPARTMENT RELATING TO PURPOSES OF HOUSING FINANCE DIVISION. The department shall:

(1) develop policies and programs designed to increase the number of individuals and families of extremely low, very low, and low income and families of moderate income that participate in the housing finance division's programs;

(2) work with municipalities, counties, public agencies, housing sponsors, and nonprofit and for profit corporations to provide:

(A) information on division programs; and

(B) technical assistance to municipalities, counties, and nonprofit corporations;

(3) encourage private for profit and nonprofit corporations and state organizations to match the division's funds to assist in providing affordable housing to individuals and families of low and very low income and families of moderate income;

(4) provide matching funds to municipalities, counties, public agencies, housing sponsors, and nonprofit developers who qualify under the division's programs; and

(5) administer the state's allocation of federal funds provided under the rental rehabilitation grant program authorized by Section 17, Title I, of the United States Housing Act of 1937 (42 U.S.C. Section 1437o).

Sec. 2306.1711. RULEMAKING PROCEDURES FOR CERTAIN PROGRAMS. (a) The department shall adopt rules outlining formal rulemaking procedures for the low income housing tax credit program and the multifamily housing mortgage revenue bond program in accordance with Chapter 2001.

(b) The rules adopted under Subsection (a) must include:

(1) procedures for allowing interested parties to petition the department to request the adoption of a new rule or the amendment of an existing rule;

(2) notice requirements and deadlines for taking certain actions; and

(3) a provision for a public hearing.

(c) The department shall provide for public input before adopting rules for programs with requests for proposals and notices of funding availability.

Sec. 2306.172. ACQUISITION AND USE OF MONEY; DEPOSITORIES. The department may:

(1) acquire, hold, invest, deposit, use, and spend its income and money from every source; and

(2) select its depository or depositories, subject only to the provisions of:

(A) this chapter; and

(B) a covenant relating to the department's bonds issued by the housing finance division.

Sec. 2306.173. INVESTMENTS. Subject to a resolution authorizing issuance of its bonds, the department may:

(1) invest its money in bonds, obligations, or other securities; or

(2) place its money in demand or time deposits, whether or not evidenced by certificates of deposit.

Sec. 2306.174. ACQUISITION AND DISPOSITION OF PROPERTY. The department may:

(1) acquire, own, rent, lease, accept, hold, or dispose of any real, personal, or mixed property, or any interest in property, including a right or easement, in performing its duties and exercising its powers under this chapter, by purchase, exchange, gift, assignment, transfer, foreclosure, sale, lease, or otherwise;

(2) hold, manage, operate, or improve real, personal, or mixed property, except that:

(A) the department is restricted in acquiring property under Section 2306.251 unless it is required to foreclose on a delinquent loan and elects to acquire the property at foreclosure;

(B) the department shall make a diligent effort to sell a housing development acquired through foreclosure to a purchaser who will be required to pay ad valorem taxes on the housing development or, if such a purchaser cannot be found, to another purchaser; and

(C) the department shall sell a housing development acquired through foreclosure not later than the third anniversary of the date of acquisition unless the board adopts a resolution stating that a purchaser cannot be found after diligent search by the housing finance division, in which case the department shall continue to try to find a purchaser and shall sell the housing development when a purchaser is found; and

(3) lease or rent land or a dwelling, house, accommodation, building, structure, or facility from a private party to carry out the housing finance division's purposes.

Sec. 2306.175. TRANSFER AND DISPOSITION OF PROPERTY; MANNER OF SALE. (a) The department may:

(1) sell, assign, lease, encumber, mortgage, or otherwise dispose of real, personal, or mixed property, or an interest in property, or a deed of trust or mortgage lien interest owned by it or in its control, custody, or possession; and

(2) release or relinquish a right, title, claim, lien, interest, easement, or demand acquired in any manner, including an equity or right of redemption in property foreclosed by it.

(b) Notwithstanding any other law, the department may, under this section, conduct a public or private sale, with or without public bidding.

Sec. 2306.176. FEES. The department may set, charge, and collect fees relating to loans made or other services provided by the department under this chapter.

Sec. 2306.177. HEARINGS. The department may:

(1) conduct hearings; and

(2) take testimony and proof, under oath, at public hearings, on matters necessary to carry out the department's purposes.

Sec. 2306.178. INSURANCE. The department may acquire, and pay premiums on, insurance of any kind in amounts and from insurers that the board considers necessary or advisable.

Sec. 2306.179. INVESTIGATION. The department may:

(1) investigate housing conditions and means for improving those conditions; and

(2) determine the location of slum or blighted areas.

Sec. 2306.180. ENCOURAGING HOME OWNERSHIP. The department may encourage individual or cooperative home ownership among individuals and families of low and very low income and families of moderate income.

Sec. 2306.181. TARGETING BOND PROCEEDS. The department may target the proceeds from housing bonds issued by it to a geographic area or areas of the state.

Sec. 2306.182. LOANS TO LENDERS. The department may make loans to mortgage lenders, public agencies, or other housing sponsors and use the proceeds to make loans for multifamily housing developments that will be substantially occupied by individuals and families of low and very low income or families of moderate income.

Sec. 2306.183. NEEDS OF QUALIFYING INDIVIDUALS AND FAMILIES IN RURAL AREAS AND SMALL MUNICIPALITIES. The department may adopt a target strategy to ensure that the credit and housing needs of qualifying individuals and families who reside in rural areas and small municipalities are equitably served by the housing finance division.

Sec. 2306.184. DISCLOSURE OF FEES. (a) This section does not apply to an application submitted by an individual or family for a loan, grant, or other assistance under a program administered by the department or the Texas State Affordable Housing Corporation or from bonds issued by the department.

(b) An application for a loan, grant, or other assistance for an eligible affordable housing project or activity under a program administered by the department or the Texas State Affordable Housing Corporation or from bonds issued by the department must include:

(1) the name of each person expected to charge the applicant a project development fee or project operation fee;

(2) the nature and amount of each project development fee and project operation fee the applicant is expected to pay; and

(3) any interlocking interests of persons listed under Subdivision (1).

(c) On completion of the project, the applicant shall cost certify the project and include the following:

(1) the name of each person to whom the recipient paid a project development fee or project operation fee during the term of the project;

(2) the nature and amount of each project development fee and project operation fee paid by the recipient during the term of the project; and

(3) any interlocking interests of persons listed under Subdivision (1).

(d) The department shall adopt rules governing penalties and sanctions under this section for a person who:

(1) does not provide the information required by this section; or

(2) knowingly discloses false information.

(e) In this section:

(1) "Project development fee" means a fee charged in connection with the planning, design, or development of an affordable housing project, including an application fee, tax credit consulting fee, development consulting fee, mortgage brokerage fee, and financial advising fee.

(2) "Project operation fee" means a fee charged in connection with the operation, construction, management, or administration of an affordable housing project, including a management fee, asset management fee, incentive management fee, general partner fee, construction supervision fee, and construction management fee.

Sec. 2306.185. LONG-TERM AFFORDABILITY AND SAFETY OF MULTIFAMILY RENTAL HOUSING DEVELOPMENTS. (a) The department shall adopt policies and procedures to ensure that, for a multifamily rental housing development funded through loans, grants, or tax credits under this chapter, the owner of the development:

(1) keeps the rents affordable for low income tenants for the longest period that is economically feasible; and

(2) provides regular maintenance to keep the development sanitary, decent, and safe and otherwise complies with the requirements of Section 2306.186.

(b) In implementing Subsection (a)(1) and in developing underwriting standards and application scoring criteria for the award of loans, grants, or tax credits to multifamily developments, the department shall ensure that the economic benefits of longer affordability terms, for specific terms of years as established by the board, and below market rate rents are accurately assessed and considered.

(c) The department shall require that a recipient of funding maintains the affordability of the multifamily housing development for households of extremely low, very low, low, and moderate incomes for the greater of a 30-year period from the date the recipient takes legal possession of the housing or the remaining term of the existing federal government assistance. In addition, the agreement between the department and the recipient shall require the renewal of rental subsidies if available and if the subsidies are sufficient to maintain the economic viability of the multifamily development.

(d) The development restrictions provided by Subsection (a) and Section 2306.269 are enforceable by the department, by tenants of the development, or by private parties against the initial owner or any subsequent owner. The department shall require a land use restriction agreement providing for enforcement of the restrictions by the department, a tenant, or a private party that includes the right to recover reasonable attorney's fees if the party seeking enforcement of the restriction is successful.

(e) Subsections (c) and (d) and Section 2306.269 apply only to multifamily rental housing developments to which the department is providing one or more of the following forms of assistance:

(1) a loan or grant in an amount greater than 33 percent of the market value of the development on the date the recipient completed the construction of the development;

(2) a loan guarantee for a loan in an amount greater than 33 percent of the market value of the development on the date the recipient took legal title to the development; or

(3) a low income housing tax credit.

(f) An owner of the housing development who intends to sell, lease, prepay the loan insured by the United States Department of Housing and Urban Development, opt out of a housing assistance payments contract under Section 8, United States Housing Act of 1937 (42 U.S.C. Section 1437f), or otherwise dispose of the development shall agree to provide notice to the department at least 12 months before the date of any attempt to dispose of the development, prepay the loan, or opt out of the Section 8 contract to enable the department to attempt to locate a buyer who will conform to the development restrictions provided by this section.

(g) Repealed by Acts 2003, 78th Leg., ch. 330, Sec. 31(1).

(h) The department shall monitor a development owner's compliance with this section.

Sec. 2306.186. MANDATORY DEPOSITS TO FUND NECESSARY REPAIRS. (a) In this section:

(1) "Bank trustee" means a bank authorized to do business in this state, with the power to act as trustee.

(2) "Department assistance" means any state or federal assistance administered by or through the department, including low income housing tax credits.

(3) "First lien lender" means a lender whose lien has first priority.

(4) "Reserve account" means an individual account:

(A) created to fund any necessary repairs for a multifamily rental housing development; and

(B) maintained by a first lien lender or bank trustee.

(b) If the department is the first lien lender with respect to the development, each owner who receives department assistance for a multifamily rental housing development that contains 25 or more rental units shall deposit annually into a reserve account:

(1) for the year 2004:

(A) not less than $150 per unit per year for units one to five years old; and

(B) not less than $200 per unit per year for units six or more years old; and

(2) for each year following the year 2004, the amounts per unit per year as described by Subdivision (1).

(c) A land use restriction agreement or restrictive covenant between the owner and the department must require the owner to begin making annual deposits to the reserve account on the date that occupancy of the multifamily rental housing development stabilizes or the date that permanent financing for the development is completely in place, whichever occurs later, and shall continue making deposits until the earliest of the following dates:

(1) the date of any involuntary change in ownership of the development;

(2) the date on which the owner suffers a total casualty loss with respect to the development or the date on which the development becomes functionally obsolete, if the development cannot be or is not restored;

(3) the date on which the development is demolished;

(4) the date on which the development ceases to be used as multifamily rental property; or

(5) the end of the affordability period specified by the land use restriction agreement or restrictive covenant.

(d) With respect to multifamily rental developments, if the establishment of a reserve fund for repairs has not been required by the first lien lender, the development owner shall set aside the repair reserve amount as a reserve for capital improvements. The reserve must be established for each unit in the development, regardless of the amount of rent charged for the unit.

(e) Beginning with the 11th year after the awarding of any financial assistance for the development by the department, the owner of a multifamily rental housing development shall contract for a third-party physical needs assessment at appropriate intervals that are consistent with lender requirements with respect to the development. If the first lien lender does not require a third-party physical needs assessment or if the department is the first lien lender, the owner shall contract with a third party to conduct a physical needs assessment at least once during each five-year period beginning with the 11th year after the awarding of any financial assistance for the development by the department. The owner of the development shall submit to the department copies of the most recent third-party physical needs assessment conducted on the development, any response by the owner to the assessment, any repairs made in response to the assessment, and information on any necessary changes to the required reserve based on the assessment.

(f) The department may complete necessary repairs if the owner fails to complete the repairs as required by Subsection (e). Payment for those repairs must be made directly by the owner of the development or through a reserve account established for the development under this section.

(g) If notified of the development owner's failure to comply with a local health, safety, or building code, the department may enter on the property and complete any repairs necessary to correct a violation of that code, as identified in the applicable violation report, and may pay for those repairs through a reserve account established for the development under this section.

(h) The duties of the owner of a multifamily rental housing development under this section cease on the date of a voluntary change in ownership of the development, but the subsequent owner of the development is subject to the deposit, inspection, and notification requirements of Subsections (b), (c), (d), and (e).

(i) The first lien lender shall maintain the reserve account. In the event there is no longer a first lien lender, then Subsections (b) and (d) no longer apply.

(j) The department shall adopt rules that:

(1) establish requirements and standards regarding:

(A) for first lien lenders and bank trustees:

(i) maintenance of reserve accounts and reasonable costs of that maintenance;

(ii) asset management;

(iii) transfer of money in reserve accounts to the department to fund necessary repairs; and

(iv) oversight of reserve accounts and the provision of financial data and other information to the department; and

(B) for owners, inspections of the multifamily rental housing developments and identification of necessary repairs, including requirements and standards regarding construction, rehabilitation, and occupancy that may enable quicker identification of those repairs;

(2) identify circumstances in which money in the reserve accounts may:

(A) be used for expenses other than necessary repairs, including property taxes or insurance; and

(B) fall below mandatory deposit levels without resulting in department action;

(3) define the scope of department oversight of reserve accounts and the repair process;

(4) provide the consequences of any failure to make a required deposit, including a definition of good cause, if any, for a failure to make a required deposit;

(5) specify or create processes and standards to be used by the department to obtain repairs for developments;

(6) define for purposes of Subsection (c) the date on which occupancy of a development is considered to have stabilized and the date on which permanent financing is considered to be completely in place; and

(7) provide for appointment of a bank trustee as necessary under this section.

(k) The department shall assess an administrative penalty on development owners who fail to contract for the third-party physical needs assessment and make the identified repairs as required by this section. The department may assess the administrative penalty in the same manner as an administrative penalty assessed under Section 2306.6023. The penalty is computed by multiplying $200 by the number of dwelling units in the development and must be paid to the department. The office of the attorney general shall assist the department in the collection of the penalty and the enforcement of this subsection.

(l) This section does not apply to a development for which an owner is required to maintain a reserve account under any other provision of federal or state law.

Sec. 2306.187. ENERGY EFFICIENCY STANDARDS FOR CERTAIN SINGLE AND MULTIFAMILY DWELLINGS. (a) A newly constructed single or multifamily dwelling that is constructed with assistance awarded by the department, including state or federal money, housing tax credits, or multifamily bond financing, must include energy conservation and efficiency measures specified by the department. The department by rule shall establish a minimum level of energy efficiency measures that must be included in a newly constructed single or multifamily dwelling as a condition of eligibility to receive assistance awarded by the department for housing construction. The measures adopted by the department may include:

(1) the installation of Energy Star-labeled ceiling fans in living areas and bedrooms;

(2) the installation of Energy Star-labeled appliances;

(3) the installation of Energy Star-labeled lighting in all interior units;

(4) the installation of Energy Star-labeled ventilation equipment, including power-vented fans, range hoods, and bathroom fans;

(5) the use of energy efficient alternative construction material, including structural insulated panel construction;

(6) the installation of central air conditioning or heat pump equipment with a better

Seasonal Energy Efficiency Rating (SEER) than that required by the energy code adopted under Section 388.003, Health and Safety Code; and

(7) the installation of the air ducting system inside the conditioned space.

(b) A single or multifamily dwelling must include energy conservation and efficiency measures specified by the department if:

(1) the dwelling is rehabilitated with assistance awarded by the department, including state or federal money, housing tax credits, or multifamily bond financing; and

(2) any portion of the rehabilitation includes alterations that will replace items that are identified as required efficiency measures by the department.

(c) The energy conservation and efficiency measures the department requires under Subsection (b) may not be more stringent than the measures the department requires under Subsection (a).

(d) The department shall review the measures required to meet the energy efficiency standards at least annually to determine if additional measures are desirable and to ensure that the most recent energy efficiency technology is considered.

(e) Subsections (a) and (b) do not apply to a single or multifamily dwelling that receives weatherization assistance money from the department or money provided under the first-time homebuyer program.

Sec. 2306.188. ESTABLISHING HOME OWNERSHIP IN DISASTER AREA. (a) An applicant for federally provided financial assistance administered by the department to repair or rebuild a home damaged by a natural disaster may establish ownership of the home through nontraditional documentation of title. The department shall process an application for that assistance as if the applicant is the record title holder of the affected real property if the applicant provides to the department:

(1) on a form prescribed by the department, an affidavit summarizing the basis on which the applicant claims to be the holder of record title or, if applicable, a successor in interest to the holder of record title and stating that:

(A) there is no other person entitled to claim any ownership interest in the property; or

(B) each person who may be entitled to claim an ownership interest in the property has given consent to the application or cannot be located after a reasonable effort; and

(2) other documentation, including tax receipts, utility bills, or evidence of insurance for

the home, that indicates that the applicant exercised ownership over the property at the time of the natural disaster.

(b) This section does not establish record ownership or otherwise alter legal ownership of real property.

(c) The department is not liable to any claimed owner of an interest in real property for administering financial assistance as permitted by this section.

SUBCHAPTER I. HOUSING FINANCE DIVISION: FUNDS

Sec. 2306.201. HOUSING TRUST FUND. (a) The housing trust fund is a fund:

(1) administered by the department through the housing finance division; and

(2) placed with the Texas Treasury Safekeeping Trust Company.

(b) The fund consists of:

(1) appropriations or transfers made to the fund;

(2) unencumbered fund balances;

(3) public or private gifts, grants, or donations;

(4) investment income, including all interest, dividends, capital gains, or other income from the investment of any portion of the fund;

(5) repayments received on loans made from the fund; and

(6) funds from any other source.

(c) The department may accept gifts, grants, or donations for the housing trust fund. All funds received for the housing trust fund under Subsection (b) shall be deposited or transferred into the Texas Treasury Safekeeping Trust Company.

Sec. 2306.202. USE OF HOUSING TRUST FUND. (a) The department, through the housing finance division, shall use the housing trust fund to provide loans, grants, or other comparable forms of assistance to local units of government, public housing authorities, nonprofit organizations, and income-eligible individuals, families, and households to finance, acquire, rehabilitate, and develop decent, safe, and sanitary housing. In each biennium the first $2.6 million available through the housing trust fund for loans, grants, or other comparable forms of assistance shall be set aside and made available exclusively for local units of government, public housing authorities, and nonprofit organizations. Any additional funds may also be made available to for-profit organizations provided that at least 45 percent of available funds, as determined on September 1 of each state fiscal year, in excess of the first $2.6 million shall be made available to nonprofit organizations for the purpose of acquiring, rehabilitating, and developing decent, safe, and sanitary housing. The remaining portion shall be distributed to nonprofit organizations, for-profit organizations, and other eligible entities. Notwithstanding any other section of this chapter, but subject to the limitations in Section 2306.251(c), the department may also use the fund to acquire property to endow the fund.

(b) Use of the fund is limited to providing:

(1) assistance for individuals and families of low and very low income;

(2) technical assistance and capacity building to nonprofit organizations engaged in developing housing for individuals and families of low and very low income; and

(3) security for repayment of revenue bonds issued to finance housing for individuals and families of low and very low income.

Sec. 2306.203. RULES REGARDING ADMINISTRATION OF HOUSING TRUST FUND

The board shall adopt rules to administer the housing trust fund, including rules providing:

(1) that the division give priority to programs that maximize federal resources;

(2) for a process to set priorities for use of the fund, including the distribution of fund resources in accordance with a plan that is developed and approved by the board and included in the department's annual report regarding the housing trust fund as described in the General Appropriations Act;

(3) that the criteria used to evaluate a proposed activity will include the:

(A) leveraging of resources;

(B) cost-effectiveness of the proposed activity; and

(C) extent to which individuals and families of very low income are served by the proposed activity;

(4) that funds may not be made available for a proposed activity that permanently and involuntarily displaces individuals and families of low income;

(5) that the board attempt to allocate funds to achieve a broad geographical distribution with:

(A) special emphasis on equitably serving rural and nonmetropolitan areas; and

(B) consideration of the number and percentage of income-qualified families in different geographical areas; and

(6) that multifamily housing developed or rehabilitated through the fund remain affordable to income-qualified households for at least 20 years.

Sec. 2306.204. INDEPENDENT AUDIT OF HOUSING TRUST FUND. (a) An independent auditor shall annually conduct an audit of the housing trust fund to determine the amount of unencumbered fund balances that is greater than the amount required for the reserve fund.

(b) The independent auditor shall submit the audit report to the board not later than December 31 of each year.

Sec. 2306.205. TRANSFER OF MONEY TO HOUSING TRUST FUND. (a) Except as provided by Subsections (c), (d), and (e), not later than January 10 of each year the housing finance division shall transfer to the housing trust fund an amount, as determined by the audit report prepared under Section 2306.204, equal to one-half of the housing finance division's unencumbered fund balances in excess of two percent of the division's total bonded indebtedness that is not rated on its own merits in the highest long-term debt rating category by one or more nationally recognized rating agencies.

(b) The department shall determine the unencumbered fund balance under Subsection (a) according to the debt rating criteria established for housing finance agencies by one or more nationally recognized rating agencies.

(c) If, at the time an annual audit required by Section 2306.204 is concluded, the housing finance division's unencumbered fund balances exceed four percent of its total bonded indebtedness that is not rated on its own merits in the highest long-term debt rating category, the department shall transfer not later than January 10 of the next year all amounts in excess of that four percent.

(d) If, at the time an annual audit required by Section 2306.204 is concluded, a nationally recognized rating agency has recommended that the housing finance division maintain unencumbered fund balances in excess of the amount permitted by Subsection (a) to achieve or maintain a rating of at least Aa/A+ on all or a portion of the bonded indebtedness of the housing finance division that is issued under an open indenture or an open flow of funds, the department shall transfer not later than January 10 of the next year all amounts in excess of the amount required by the rating agency to be held as unencumbered fund balances.

(e) If, at the time an annual audit required by Section 2306.204 is concluded, a nationally recognized rating agency has recommended that the housing finance division increase the amount of its unencumbered fund balances to achieve or maintain a financially sound condition or to prevent a decrease in the long-term debt rating maintained on all or a portion of the housing finance division's bonded indebtedness, the housing finance division may not make further annual transfers to the housing trust fund until all requirements and conditions of the rating agency have been met.

(f) In addition to the money transferred into the housing trust fund under this section, and subject to Subsection (e), the department shall transfer into the fund the amount of any origination fee, asset oversight fee, and servicing fee the department or the Texas State Affordable Housing Corporation receives in relation to the administration of its 501(c)(3) bond program established pursuant to Section 2306.358 that exceeds the amount needed by the department or the Texas State Affordable Housing Corporation to pay its operating and overhead costs and fund reserves, including an insurance reserve or credit enhancement reserve established by the board in administering the program.

Sec. 2306.206. HOUSING TRUST FUND NOT SUBJECT TO TEXAS TRUST CODE. The housing trust fund provided for by this subchapter is not subject to Subtitle B, Title 9, Property Code.

Sec. 2306.207. RESERVE FUND. (a) The department may create a reserve fund with the comptroller out of:

(1) proceeds from the sale of the department's bonds; or

(2) other resources.

(b) The reserve fund is additional security for the division's bonds.

SUBCHAPTER J. HOUSING FINANCE DIVISION: LOAN TERMS AND CONDITIONS

Sec. 2306.221. HOUSING DEVELOPMENT LOANS. To finance the purchase, construction, remodeling, improvement, or rehabilitation of housing developments for residential housing designed and planned for individuals and families of low and very low income and families of moderate income, the department, on the terms and conditions stated in this chapter, may:

(1) make, commit to make, and participate in the making of mortgage loans, including federally insured loans to housing sponsors; and

(2) make temporary loans and advances in anticipation of permanent mortgage loans.

Sec. 2306.222. CONTRACTS AND AGREEMENTS REGARDING HOUSING DEVELOPMENTS. The department may enter into agreements and contracts with housing sponsors and mortgage lenders under this chapter to make or participate in mortgage loans for residential housing for individuals and families of low and very low income and families of moderate income.

Sec. 2306.223. CRITERIA FOR FINANCING HOUSING DEVELOPMENT OF HOUSING SPONSOR. Notwithstanding any other provision of this chapter, the department may not finance a housing development undertaken by a housing sponsor under this chapter, unless the department first determines that:

(1) the housing development is necessary to provide needed decent, safe, and sanitary housing at rentals or prices that individuals or families of low and very low income or families of moderate income can afford;

(2) the housing sponsor undertaking the proposed housing development will supply

well-planned and well-designed housing for individuals or families of low and very low income or families of moderate income;

(3) the housing sponsor is financially responsible;

(4) the housing sponsor is not, or will not enter into a contract for the proposed housing development with, a housing developer that:

(A) is on the department's debarred list, including any parts of that list that are derived from the debarred list of the United States Department of Housing and Urban Development;

(B) breached a contract with a public agency; or

(C) misrepresented to a subcontractor the extent to which the developer has benefited from contracts or financial assistance that has been awarded by a public agency, including the scope of the developer's participation in contracts with the agency and the amount of financial assistance awarded to the developer by the agency;

(5) the financing of the housing development is a public purpose and will provide a public benefit; and

(6) the housing development will be undertaken within the authority granted by this chapter to the housing finance division and the housing sponsor.

Sec. 2306.224. LOAN TERMS AND CONDITIONS. A loan financed through a program of the housing finance division under this subchapter is subject to the terms and conditions provided by this subchapter.

Sec. 2306.225. RATIO OF LOAN TO DEVELOPMENT COST; AMORTIZATION PERIOD. (a) Except as provided by Subsection (b), the ratio of loan to total housing development cost and the amortization period of a loan insured or guaranteed by the federal government is governed by the federal government mortgage insurance commitment or federal guarantee for each housing development.

(b) The amortization period for a loan may not exceed 40 years.

Sec. 2306.226. INTEREST RATES. (a) The board shall set the interest rates at which the housing finance division makes loans and loan commitments.

(b) The interest rates shall be set to produce, when combined with other available funds, at least the amounts required to pay for the housing finance division's costs of operation and to meet its covenants with and responsibilities to the holders of its bonds.

Sec. 2306.227. PREPAYMENT OF MORTGAGE LOANS. A mortgage loan made under this chapter may be prepaid to maturity after the period of years and under the terms and conditions determined by the board.

Sec. 2306.228. LOAN FEES. The department shall make and collect loan fees that the department determines are reasonable, including:

(1) fees to reimburse the housing finance division's financing costs;

(2) service charges;

(3) insurance premiums;

(4) mortgage insurance premiums; and

(5) fees for administrative costs.

Sec. 2306.229. DOCUMENTS SUPPORTING MORTGAGE LOANS. (a) A mortgage loan shall be evidenced by a mortgage or deed of trust note or bond and by a mortgage that creates a lien on the housing development and on all real property that constitutes the site of or that relates to the housing development.

(b) A note or bond and a mortgage or deed of trust:

(1) must contain provisions satisfactory to the department;

(2) must be in a form satisfactory to the department; and

(3) may contain exculpatory provisions relieving the borrower or its principal from personal liability if the department agrees.

(c) For each loan made for the development of multifamily housing with funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.), the department shall obtain a mortgagee's title policy in the amount of the loan. The department may not designate a specific title insurance company to provide the mortgagee title policy or require the borrower to provide the policy from a specific title insurance company. The borrower shall select the title insurance company to close the loan and to provide the mortgagee title policy.

Sec. 2306.230. AGREEMENTS REGARDING CERTAIN LIMITATIONS ON HOUSING SPONSORS. A mortgage loan is subject to an agreement between the department and the housing sponsor that subjects the sponsor and its principals or stockholders to limitations established by the department regarding:

(1) rentals and other charges;

(2) builders' and developers' profits and fees;

(3) the disposition of its property; and

(4) the real property that constitutes the site of or relates to the housing development.

Sec. 2306.231. LOAN CONDITIONS RELATING TO DEPARTMENT POWERS. As a condition of each loan, the department, acting through the housing finance division, may at any time during the construction, rehabilitation, or operation of a housing development:

(1) enter and inspect the housing development to:

(A) investigate the development's:

(i) physical and financial condition;

(ii) construction;

(iii) rehabilitation;

(iv) operation;

(v) management; and

(vi) maintenance; and

(B) examine all books and records relating to:

(i) capitalization;

(ii) income; and

(iii) other matters regarding capitalization or income;

(2) impose charges that are required to cover the cost of inspections and examinations under Subdivision (1);

(3) order alterations, changes, or repairs necessary to protect:

(A) the security of the department's investment in a housing development; or

(B) the health, safety, and welfare of the occupants of a housing development;

(4) order a managing agent, housing development manager, or housing development owner to do whatever is necessary to comply with or refrain from violating an applicable law, ordinance, department rule, or term of an agreement regarding the housing development; and

(5) file and prosecute a complaint against a managing agent, housing development manager, or housing development owner for a violation of any applicable law or ordinance.

Sec. 2306.232. TEXAS HOUSING AGENCY LOAN OR GUARANTEE. A loan or guarantee made by the Texas Housing Agency becomes a loan or guarantee of the department.
.

SUBCHAPTER K. HOUSING PROGRAMS

Sec. 2306.251. PROPERTY OWNERSHIP PROGRAM. (a) While it is not the intent of the legislature that the department compete with the private sector by becoming a long-term owner of real property merely for the purpose of owning, managing, and operating tenant properties, the department may acquire, own, reconstruct, rehabilitate, manage, or operate real property:

(1) on an interim basis for sale or rental to:

(A) individuals and families of low and very low income and families of moderate income; and

(B) nonprofit housing organizations and other housing organizations to serve the needs of individuals and families of low and very low income and families of moderate income;

(2) for a period of time not to exceed 10 years for the purposes of:

(A) preserving publicly financed or subsidized housing; or

(B) participating in a risk-sharing program entered into with the United States Department of Housing and Urban Development, any other insurer or guarantor of any United States Department of Housing and Urban Development-related indebtedness, a government sponsored enterprise, a housing finance agency or corporation, or a public housing authority.

(b) The department may use money from the housing trust fund, unencumbered fund balances, fees received by the housing finance division, proceeds from the sale or rental of real property, distribution of earnings under Section 2306.557, or appropriations, allocations, grants, or gifts from any public or private source to purchase property under this section.

(c) If the department uses the housing trust fund to finance real property acquisitions, it may not use more than 10 percent of the yearly balance of the fund to acquire the real property.

(d) If the department acquires property under this section, the department shall submit an annual report to the board that includes an analysis of the property ownership program's:

(1) financial stability;

(2) cost-effectiveness; and

(3) effectiveness in serving individuals and families of low and very low income and families of moderate income.

Sec. 2306.252. HOUSING RESOURCE CENTER. (a) The board shall establish a housing resource center in the housing finance division.

(b) The department, through the center, shall:

(1) provide educational material prepared in plain language to housing advocates, housing sponsors, borrowers, and tenants;

(2) provide technical assistance to nonprofit housing sponsors;

(3) assist in the development of housing policy, including the annual state low income housing plan and report and the consolidated plan; and

(4) provide, in cooperation with the state energy conservation office, the Texas Commission on Environmental Quality, and other governmental entities, information on the use of sustainable and energy efficient housing construction products and assist local governments and nonprofits in identifying information on sustainable and energy efficient housing construction and energy efficient resources and techniques.

(c) The housing resource center is intended to assist individuals, local organizations, and local governments in providing for the housing needs of individuals and families in their communities by providing information available to the center to housing contractors, nonprofit housing sponsors, community-based organizations, and local governments on:

(1) local housing needs;

(2) housing programs;

(3) available funding sources; and

(4) programs that affect the creation, improvement, or preservation of housing

affordable to individuals and families of low and very low income.

(d) The center shall serve as a housing and community services clearinghouse to provide information to the public, local communities, housing providers, and other interested parties regarding:

(1) the performance of each department program;

(2) the number of people served;

(3) the income of people served;

(4) the funding amounts distributed;

(5) allocation decisions;

(6) regional impact of department programs; and

(7) any other relevant information.

(e) The center shall compile the department's reports into an integrated format and shall compile and maintain a list of all affordable housing resources in the state, organized by community.

(f) The information required under Subsections (d) and (e) must be readily available in:

(1) a hard-copy format; and

(2) a user-friendly format on the department's website.

(g) The center shall provide information regarding the department's housing and community affairs programs to the Texas Information and Referral Network for inclusion in the statewide information and referral network as required by Section 531.0312.

Sec. 2306.253. HOMEBUYER EDUCATION PROGRAM. (a) The department shall develop and implement a statewide homebuyer education program designed to provide information and counseling to prospective homebuyers about the home buying process.

(b) The department shall develop the program in cooperation with the Texas Agricultural Extension Service, the Texas Department of Human Services, the Real Estate Research Center at Texas A&M University, the Texas Workforce Commission, experienced homebuyer education providers, community-based organizations, and advocates of affordable housing. The department shall implement the program through self-help centers when feasible.

(c) The department shall make full use of existing training and informational materials available from sources such as the United States Department of Housing and Urban Development, the cooperative extension system, the Neighborhood Reinvestment Corporation, and existing homebuyer education providers.

(d) In order to implement this section, the department may use money available to the department for housing purposes that the department is not prohibited from spending on the homebuyer education program, including:

(1) the amount of administrative or service fees the department receives from the issuance or refunding of bonds that exceeds the amount the department needs to pay its overhead costs in administering its bond programs; and

(2) money the department receives from other entities by gift or grant under a contract.

Sec. 2306.255. CONTRACT FOR DEED CONVERSION PROGRAM. (a) In this section, "office" means the office established by the department to promote initiatives for colonias.

(b) The office shall establish a program to guarantee loans made by private lenders to convert a contract for deed into a warranty deed. To the extent possible, the office shall encourage conversion of a contract for deed under the program into a general warranty deed.

(c) The office shall make agreements with private lenders that will issue loans for contract conversions under the guarantee of the department. The office and the lender must agree on the criteria for issuing a deed conversion loan, including the percentage of the guarantee to be issued by the department.

(d) The office may not make an agreement with a lender unless the agreement allows the office to annually renegotiate the guarantee percentage for a loan issued by the lender. The office shall renegotiate the terms of a guarantee when possible to obtain a better guarantee percentage for the state from the lender.

(e) The office may establish eligibility criteria for a holder of a contract for deed who participates in this program. The criteria must include a priority for homeowners and owners of residential real property who are individuals or families of low, very low, or extremely low income.

(f) The office shall use funds allocated to the department under the federal HOME Investment Partnerships program established under Title II of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.) for a guarantee issued under this section.

(g) The office may use the services of the Texas State Affordable Housing Corporation when necessary to accomplish the purposes of this section.

(h) The office shall:

(1) compose an annual report that evaluates the repayment history and coinciding guarantee percentages for guarantees issued under this section; and

(2) deliver a copy of the report to the governor, the lieutenant governor, and the speaker of the house of representatives.

(i) The department may adopt rules necessary to accomplish the purposes of this section.

Sec. 2306.256. AFFORDABLE HOUSING PRESERVATION PROGRAM. (a) The department shall develop and implement a program to preserve affordable housing in this state.

(b) Through the program, the department shall:

(1) maintain data on housing projected to lose its affordable status;

(2) develop policies necessary to ensure the preservation of affordable housing in this state;

(3) advise other program areas with respect to the policies; and

(4) assist those other program areas in implementing the policies.

Sec. 2306.2561. AFFORDABLE HOUSING PRESERVATION PROGRAM: LOANS AND GRANTS. (a) The department, through the housing finance division, shall provide loans and grants to political subdivisions, housing finance corporations, public housing authorities, for-profit organizations, nonprofit organizations, and income-eligible individuals, families, and households for purposes of rehabilitating housing to preserve affordability of the housing.

(b) The department may use any available revenue, including legislative appropriations, to provide loans and grants under this section.

Sec. 2306.257. APPLICANT COMPLIANCE WITH STATE AND FEDERAL LAWS PROHIBITING DISCRIMINATION: CERTIFICATION AND MONITORING. (a) The department may provide assistance through a housing program under this chapter only to an applicant who certifies the applicant's compliance with:

(1) state and federal fair housing laws, including Chapter 301, Property Code, Title VIII of the Civil Rights Act of 1968 (42 U.S.C. Section 3601 et seq.), and the Fair Housing Amendments Act of 1988 (42 U.S.C. Section 3601 et seq.);

(2) the Civil Rights Act of 1964 (42 U.S.C. Section 2000a et seq.);

(3) the Americans with Disabilities Act of 1990 (42 U.S.C. Section 12101 et seq.); and

(4) the Rehabilitation Act of 1973 (29 U.S.C. Section 701 et seq.).

(b) Repealed by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 42, eff. September 1, 2007.

(c) Repealed by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 42, eff. September 1, 2007.

(d) Repealed by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 42, eff. September 1, 2007.

Sec. 2306.258. TRANSITIONAL HOUSING PILOT PROGRAM. (a) If funds are available, the department shall operate a transitional housing pilot program in four areas of the state.

(b) The program must address the needs of the homeless for:

(1) interim housing;

(2) physical and mental health services;

(3) literacy training;

(4) job training;

(5) family counseling;

(6) credit counseling;

(7) education services; and

(8) other services that will prevent homelessness.

Sec. 2306.259. AFFORDABLE HOUSING RESEARCH AND INFORMATION PROGRAM. With money available under Section 1372.006(a), the department shall establish an affordable housing research and information program in which the department shall contract for:

(1) periodic market studies to determine the need for housing for families of extremely low, very low, and low income in census tracts throughout the state;

(2) research from qualified professionals to determine the effect of affordable housing developments on property values, social conditions, and quality of life in surrounding neighborhoods;

(3) independent research in affordable housing design and development approaches that enhance community acceptance of affordable housing and improve the quality of life for the residents of the housing; and

(4) public education and outreach efforts to assist the public in understanding the

nature and purpose of affordable housing and the process for public participation in the administration of affordable housing programs.

SUBCHAPTER L. HOUSING FINANCE DIVISION: REGULATION OF HOUSING SPONSORS

Sec. 2306.261. SUPERVISING HOUSING SPONSORS. The housing finance division may, as provided by this subchapter, supervise:

(1) housing sponsors, including limited profit housing sponsors, of housing developments that are financed under this chapter and rented or leased to tenants; and

(2) real and personal property of sponsors.

Sec. 2306.262. UNIFORM SYSTEMS OF ACCOUNTS AND RECORDS. The department may require uniform systems of accounts and records for housing sponsors.

Sec. 2306.263. REPORTING. The department may require housing sponsors to:

(1) make reports and certifications of their expenditures; and

(2) answer specific questions on forms whenever necessary for the purposes of this chapter.

Sec. 2306.2631. REPORTS BY SPONSORS OF CERTAIN MULTIFAMILY HOUSING DEVELOPMENTS. (a) This section applies only to a housing sponsor of a multifamily housing development that:

(1) receives financial assistance from the state;

(2) receives financial assistance from the federal government, including an allocation of low income housing tax credits; or

(3) is subject to a land use restriction agreement.

(b) The department by rule shall require the housing sponsor of a multifamily housing development to submit a quarterly report to the department. The report must include information that identifies:

(1) the number of vacant units in the development at the time of the report; and

(2) the number of days that each unit has been vacant.

(c) The department shall provide to each member of the legislature, on request of that member, a report that disaggregates the information collected under Subsection (b) by zip code in the member's district.

Sec. 2306.264. INSPECTIONS AND EXAMINATIONS. The department, through its agents or employees, may:

(1) enter and inspect, in whole or in part, the land, buildings, and equipment of a housing sponsor; and

(2) examine all records showing the capital structure, income, expenditures, and other payments of a housing sponsor.

Sec. 2306.265. OPERATION, MAINTENANCE, AND REPAIR. The department may:

(1) supervise the operation and maintenance of a housing development; and

(2) order necessary repairs to protect the public interest or the health, welfare, or safety of the housing development occupants.

Sec. 2306.266. FEES RELATING TO REGULATION. The department may require a housing sponsor to pay the housing finance division fees for the cost of regulating the housing sponsor, including the cost of:

(1) examination;

(2) inspection;

(3) supervision; and

(4) auditing.

Sec. 2306.267. COMPLIANCE WITH APPLICABLE LAWS, RULES, AND CONTRACT TERMS. The department may order a housing sponsor to perform or refrain from performing certain acts in order to comply with the law, department rules, or terms of a contract or agreement to which the housing sponsor is a party.

Sec. 2306.268. RENTS AND CHARGES. The department shall approve and may change from time to time a schedule of rents and charges for a housing development operated by the department under Section 2306.251.

Sec. 2306.269. TENANT AND MANAGER SELECTION. (a) The department shall set standards for tenant and management selection by a housing sponsor.

(b) The department shall prohibit a multifamily rental housing development funded or administered by the department, including a development supported with a housing tax credit allocation under Subchapter DD, from:

(1) excluding an individual or family from admission to the development because the individual or family participates in the housing choice voucher program under Section 8, United States Housing Act of 1937 (42 U.S.C. Section 1437f); and

(2) using a financial or minimum income standard for an individual or family participating in the voucher program described by Subdivision (1) that requires the individual or family to have a monthly income of more than 2-1/2 times the individual's or family's share of the total monthly rent payable to the owner of the development.

Sec. 2306.270. REGULATION OF RETIREMENT OF CAPITAL INVESTMENT OR REDEMPTION OF STOCK. The department shall regulate the retirement of a capital investment or the redemption of stock of a limited profit housing sponsor if the retirement or redemption, when added to a dividend or other distribution, exceeds in any one fiscal year the permitted percentage, as allowed by the department, of the original face amount of the limited profit housing sponsor's investment or equity in a housing development.

Sec. 2306.271. COST CONTROLS. (a) The housing finance division by rule shall specify the categories of costs allowable in the construction, reconstruction, remodeling, improvement, or rehabilitation of a housing development.

(b) The housing finance division shall require a housing sponsor to certify the actual housing development costs on completion of the housing development, subject to audit and determination by the department.

(c) The department may accept, instead of certification of housing development costs under Subsection (b), other assurances of the costs, in any form, that will enable the housing finance division to determine with reasonable accuracy the amount of the costs.

(d) In this section, "housing development costs" means the total of all costs incurred in financing, creating, or purchasing a housing development, including a single-family dwelling, approved by the department as reasonable and necessary. The costs may include:

(1) the value of land and buildings on the land owned by the sponsor or the cost of acquiring land and buildings on the land, including payments for options, deposits, or contracts to purchase properties on the proposed housing site;

(2) costs of site preparation, demolition, and development;

(3) expenses relating to the issuance of bonds;

(4) fees paid or payable in connection with the planning, execution, and financing of the housing development, including fees to:

(A) architects;

(B) engineers;

(C) attorneys;

(D) accountants; or

(E) the housing finance division on the department's behalf;

(5) costs of necessary studies, surveys, plans, permits, insurance, interest, financing, tax and assessment costs, and other operating and carrying costs during construction;

(6) costs of construction, rehabilitation, reconstruction, fixtures, furnishings, equipment, machinery, and apparatus related to the real property;

(7) costs of land improvements, including landscaping and off-site improvements, whether or not the costs have been paid in cash or in a form other than cash;

(8) necessary expenses for the initial occupancy of the housing development;

(9) a reasonable profit and risk fee in addition to job overhead to the general contractor or limited profit housing sponsor;

(10) an allowance established by the department for working capital and contingency reserves and reserves for anticipated operating deficits during the first two years of occupancy; and

(11) the cost of other items, including tenant relocation if tenant relocation costs are not otherwise provided for, that the department determines are reasonable and necessary for the development of the housing development, less net rents and other net revenues received from the operation of the real and personal property on the development site during construction.

Sec. 2306.272. HOUSING SPONSOR INVESTMENTS. (a) A principal or stockholder of a housing sponsor may not earn, accept, or receive a per annum return on an investment in a housing development financed by the department greater than that allowed by department rule.

(b) A housing sponsor's equity in a housing development is the difference between the mortgage loan and the total housing development cost.

(c) The department shall establish a housing sponsor's equity when the final mortgage advance is made.

(d) For the purposes of this section, the amount established under Subsection (c) remains constant during the life of the department's mortgage on the development, except for additional equity investment made by the sponsor with the department's approval or at its order.

(e) In this section, "housing development costs" has the meaning assigned by Section 2306.271(d).

Sec. 2306.273. LIMITATION ON APPLICATION OF CERTAIN PROVISIONS OF SUBCHAPTER. Sections 2306.261 through 2306.271 do not apply to a housing development:

(1) for which individuals or families of low and very low income or families of moderate income receive a mortgage loan under this chapter; and

(2) that initially is intended for occupancy by those individuals or families.

SUBCHAPTER M. HOUSING FINANCE DIVISION: PURCHASE AND SALE OF MORTGAGE LOANS

Sec. 2306.291. PURCHASE AND SALE OF MORTGAGE LOANS. (a) The department may purchase and take assignments from mortgage lenders or the federal government of notes and other obligations, including contracts for deed and mortgages, evidencing loans or interest in loans for the construction, remodeling, improvement, rehabilitation, purchase, leasing, or refinancing of housing developments for individuals and families of low and very low income and families of moderate income.

(b) The department may sell, at public or private sale, with or without public bidding, a mortgage or other obligation held by the department.

Sec. 2306.292. ELIGIBILITY OF MORTGAGE LOANS FOR PURCHASE. A mortgage loan or interest in a mortgage loan is not eligible for purchase by or on behalf of the department from a mortgage lender unless the mortgage lender certifies that the mortgage loan or interest in the mortgage loan is for a housing development for individuals or families of low and very low income or for families of moderate income.

Sec. 2306.293. FEDERALLY ASSISTED MORTGAGE LOANS. A mortgage loan or interest in a mortgage loan purchased or sold under this subchapter may include a mortgage loan that is insured, guaranteed, or assisted by the federal government or a mortgage loan that the federal government has committed to insure, guarantee, or assist.

Sec. 2306.294. MORTGAGE LOAN PURCHASE PRICE. (a) On purchasing a mortgage loan or interest in a mortgage loan from a mortgage lender, the department shall pay a purchase price equal to the outstanding principal balance, except that a discount from the principal balance or the payment of a premium may be used to produce a fair rate of return consistent with the obligations of the department and the purposes of this chapter.

(b) In addition to payment of the outstanding principal balance, the department shall pay the accrued interest due to the date on which the mortgage loan is delivered against payment.

Sec. 2306.295. RULES GOVERNING PURCHASE AND SALE OF MORTGAGE LOANS. The department shall adopt rules governing the purchase and sale of mortgage loans and the application of sale proceeds, including rules governing:

(1) procedures for submitting requests or inviting proposals for the purchase and sale of mortgage loans or interest in the mortgage loans;

(2) restrictions on the number of family units, location, or other qualifications of residences to be financed by residential mortgage loans;

(3) income limits of individuals and families of low and very low income or families of moderate income occupying a residence financed by a residential mortgage loan;

(4) restrictions relating to the interest rates on mortgage loans or the return

realized by mortgage lenders;

(5) requirements for commitments by mortgage lenders relating to mortgage loans;

(6) schedules of fees and charges necessary for expenses and reserves of the housing finance division;

(7) resale of the housing development; and

(8) any other matter related to the power of the department to purchase and sell mortgage loans or interests in mortgage loans.

Sec. 2306.296. REVIEW AND SUBSTITUTION OF PURCHASED MORTGAGE LOANS. (a) The department shall review each mortgage loan purchased or financed by the department to determine if the loan meets:

(1) the conditions of this chapter;

(2) the department's rules; and

(3) any commitment made with the mortgage lender to purchase mortgage loans.

(b) The department may require the substitution of another mortgage loan if it determines that a loan does not comply with the criteria of Subsection (a).

Sec. 2306.297. APPLICATION OF PROVISIONS RELATING TO LOAN TERMS AND CONDITIONS. Sections 2306.225 through 2306.229 apply to the purchase of mortgage loans.

SUBCHAPTER P. HOUSING FINANCE DIVISION BONDS: ISSUANCE OF BONDS

Sec. 2306.351. ISSUANCE OF BONDS. (a) The department may issue bonds under this chapter, including qualified 501(c)(3) bonds under Section 145, Internal Revenue Code of 1986 (26 U.S.C. Section 145), and may:

(1) provide for and secure payment of the bonds;

(2) provide for the rights of the holders of the bonds, as permitted by this chapter and the Texas Constitution; and

(3) purchase, hold, cancel, resell, or otherwise dispose of its bonds, subject to restrictions in a resolution authorizing issuance of its bonds.

(b) In connection with or incidental to issuing and selling its bonds, the department may enter into contracts that the board considers necessary or appropriate for the department's obligation, as represented by the bonds and incidental contracts, to be placed, in whole or in part, on the basis desired by the board, including interest rate, currency, or cash flow.

(c) Contracts that may be entered into under Subsection (b) include contracts:

(1) commonly known as interest rate swap agreements, currency swap agreements, or forward payment conversion agreements;

(2) providing for payments based on levels of or changes in interest rates or currency exchange rates;

(3) to exchange cash flows or a series of payments; or

(4) that include options, puts or calls to hedge payment, currency, rate, spread, or similar exposure.

(d) A contract entered into under this section shall be on terms and conditions approved by the board.

Sec. 2306.352. TEXAS HOUSING BONDS. (a) The board by resolution may provide for the issuance of negotiable bonds as authorized by the Texas Constitution.

(b) The bonds shall be on a parity and shall be called Texas Housing Bonds.

(c) The board:

(1) may issue the bonds in one or several installments; and

(2) shall date the bonds of each issue.

Sec. 2306.353. REVENUE BONDS. (a) In addition to issuing general obligation bonds under Section 2306.352, the department may issue revenue bonds to provide money to carry out a purpose, power, or duty of the housing finance division under this chapter.

(b) The bonds may be issued from time to time in one or more series or issues.

(c) The bonds shall be payable as to principal, interest, and redemption premium, if any, from, and secured by, a first or subordinate lien on, and pledge of, all or part of the revenues, income, or other resources of the housing finance division, including:

(1) the repayments of mortgage loans;

(2) the earnings from investment or deposit of the reserve fund and other funds of the housing finance division;

(3) the fees, charges, and other amounts or payments received under this chapter; and

(4) appropriations, grants, allocations, subsidies, rent supplements, guaranties, aid, contribution, or donations.

Sec. 2306.354. DEFINITIVE REFUNDING BONDS. (a) The department may issue definitive refunding bonds if the bonds are issued and delivered to refund:

(1) other department bonds; or

(2) the obligations of:

(A) the department's predecessor; or

(B) a local housing finance corporation.

(b) The bonds must be payable as to principal, interest, and redemption premium, if any, from the refunding bonds and other revenues, income, or resources of the department.

(c) The department may contract to issue, sell, and deliver the definitive refunding bonds in a manner that will provide the money necessary to pay a required part of the principal, interest, and redemption premium, if any, on the refunded bonds or obligations when due.

(d) The refunded bonds or obligations may be refunded in another manner permitted by this chapter or other state law, including Chapter 1207.

Sec. 2306.355. ISSUANCE OF ADDITIONAL PARITY OR SUBORDINATE LIEN BONDS. The department may issue additional parity bonds or subordinate lien bonds under terms or conditions in the resolution authorizing issuance of the bonds.

Sec. 2306.356. ISSUANCE OF BONDS TO FUND DEPARTMENT RESERVES OR FUNDS. The department may issue bonds to provide all or part of the money required for funding or increasing the department's reserves or funds.

Sec. 2306.357. BONDS ISSUED BY TEXAS HOUSING AGENCY. A general obligation or revenue bond issued by the Texas Housing Agency becomes a general obligation or revenue bond of the department.

Sec. 2306.358. ISSUANCE OF QUALIFIED 501(C)(3) BONDS. (a) Of the total qualified 501(c)(3) bonds issued under Section 145 of the Internal Revenue Code of 1986 (26 U.S.C. Section 145) in each fiscal year, it is the express intent of the legislature that the department shall allocate qualified 501(c)(3) bonding authority as follows:

(1) not more than 25 percent of the total annual issuance amount authorized through the memorandum of understanding provided for in Subsection (b) may be used for projects in any one metropolitan area; and

(2) at least 15 percent of the annual issuance amount authorized through the memorandum of understanding provided for in Subsection (b) is reserved for projects in rural areas.

(a-1) For the purposes of Subsection (a), "rural area" and "metropolitan area" shall be defined through the memorandum of understanding provided for in Subsection (b).

(b) A qualified 501(c)(3) bond may not be issued unless approved by the Bond Review Board. In addition, the Bond Review Board shall enter into a memorandum of understanding with the department specifying the amount of bonds to be issued in each fiscal year. The department and the Bond Review Board shall review the memorandum of understanding annually to determine the specific amount of bonds to be issued in each fiscal year. The Bond Review Board may not approve a proposal to issue qualified 501(c)(3) bonds unless they meet the requirements of this section, including the memorandum of understanding, and all other laws that may apply.

(c) In addition to the requirements of Section 145 of the Internal Revenue Code of 1986 (26 U.S.C. Section 145), a qualified 501(c)(3) organization must:

(1) demonstrate to the department that the project is carefully and conservatively underwritten to:

(A) ensure that the project is well run, well maintained, and financially viable; and

(B) minimize the risk of the organization's default;

(2) ensure that at least 60 percent of the housing to be provided under the project is affordable housing provided to individuals and families of low and very low income and:

(A) at least 40 percent of the units in a multifamily development are affordable to individuals and families with incomes at or below 60 percent of the median family income, adjusted for family size; or

(B) at least 20 percent of the units in a multifamily development are affordable to individuals and families with incomes at or below 50 percent of the median family income, adjusted for family size; and

(3) enter into an agreement with the department in which the 501(c)(3) organization:

(A) agrees during the term of the agreement to reserve at least 60 percent of the housing to be provided under the project for individuals and families of low and very low income;

(B) ensures that the reserved housing will remain affordable to individuals and families of low and very low income during the term of the agreement;

(C) agrees to not discriminate against a tenant applicant solely because the applicant receives public rental assistance payments, except if at least 15 percent of the housing units provided under the project are occupied by tenants who receive public rental assistance payments; and

(D) agrees to restrict the rents charged on those units reserved for individuals and families of low and very low income at 30 percent of the area median income adjusted for family size and utility allowance, unless this requirement is waived or modified on a case-by-case basis by the board, and approved by the Bond Review Board, if both boards determine that the waiver or modification is necessary for an area of the state because the area's median income would prevent the construction of new affordable projects.

(d) Subsection (c)(3)(C) does not prohibit an organization from requiring a tenant applicant who receives public assistance to meet the organization's standard criteria for occupancy, including such criteria as satisfactory creditworthiness and lack of criminal history.

(e) The agreement provided for in Subsection (c)(3) may provide for the lease or sale of the project to a nonprofit corporation approved by the department subject to the conditions specified in Subsection (c).

(f) Neither the department nor the Texas State Affordable Housing Corporation may use state or federal money to provide for credit enhancement of a bond issued under this section unless the credit enhancement would facilitate the issuance of bonds for the purpose of financing the creation or preservation of affordable housing by 501(c)(3) nonprofit entities.

(g) In lieu of complying with the set-aside requirements specified in Subsection (c)(2), a qualified 501(c)(3) organization may comply with such other set-asides or restrictions as are approved by the Internal Revenue Service as a basis for the determination letter addressed to the qualified 501(c)(3) organization.

(h) For purposes of this section, "rural area" and "metropolitan area" shall be defined through the memorandum of understanding provided for in Subsection (b) of this section.

Sec. 2306.359. ISSUANCE OF PRIVATE ACTIVITY BONDS. (a) In evaluating an application for an issuance of private activity bonds, the department shall score and rank the application using a point system based on criteria that are adopted by the department, including criteria regarding:

(1) the income levels of tenants of the development, consistent with the funding priorities provided by Section 1372.0321;

(2) the rent levels of the units;

(3) the level of community support for the application;

(4) the period of guaranteed affordability for low income tenants;

(5) the cost per unit of the development;

(6) the size, quality, and amenities of the units;

(7) the services to be provided to tenants of the development; and

(8) other criteria as developed by the board.

(b) The department shall make available on its website details of the scoring system used by the department to score applications.

(c) The department shall underwrite the applications by determining:

(1) that the general contractor's profit, overhead, and general requirements are within the maximum limit published by the department;

(2) that the developer fee for the proposed project does not exceed the maximum amount allowed by the department; and

(3) if applicable, the amount of tax credits available to the proposed development.

(d) In adopting criteria for underwriting applications under this section, the department shall attach additional weight to criteria that will determine the maximum amount that can be awarded that will:

(1) result in an issuance of private activity bonds for developments serving the lowest income tenants; and

(2) produce the greatest number of high-quality units committed to remaining affordable to qualified tenants for extended periods.

SUBCHAPTER Q. HOUSING FINANCE DIVISION BONDS: BOARD ACTION ON BONDS

Sec. 2306.371. BOARD AUTHORIZATION OF BONDS. Bonds issued by the department must be authorized by board resolution.

Sec. 2306.372. DEPARTMENT PROCEDURES. In a resolution authorizing the issuance of department bonds, the board may prescribe the systems and procedures under which the department shall function.

Sec. 2306.373. USE OF BOND PROCEEDS. The board may provide in a resolution authorizing the issuance of department bonds that part of the proceeds from the sale of the bonds may be used to:

(1) pay the costs and expenses of issuing the bonds;

(2) pay interest on the bonds during a period required by the board;

(3) pay or repay the department's operation and maintenance expenses to the extent and for the period specified in the resolution; and

(4) fund, increase, or restore any depletions of the reserve fund or of other reserves or funds for any purpose.

Sec. 2306.374. FACSIMILE SIGNATURES AND SEALS. (a) The board may state in a resolution authorizing the issuance of an installment or series of bonds the extent to which the presiding officer of the board or any other officer may use a facsimile signature or facsimile seal instead of a manual signature or manually impressed seal to execute or attest the bonds and appurtenant coupons.

(b) An interest coupon may be signed by the facsimile signature of the presiding officer of the board.

Sec. 2306.375. PERSONAL LIABILITY OF BOARD MEMBER OR DIRECTOR. A member of the board or the director is not liable personally for bonds issued or contracts executed by the department or for any other action taken in accordance with the powers and duties authorized by this chapter.

SUBCHAPTER R. HOUSING FINANCE DIVISION BONDS: FORM; TERMS

Sec. 2306.391. FORM. The department's bonds may be issued as:

(1) serial bonds;

(2) term bonds; or

(3) a combination of serial and term bonds as determined by the board.

Sec. 2306.392. DENOMINATION. (a) The department's bonds may be issued:

(1) in coupon form payable to bearer;

(2) in fully registered form;

(3) as coupon bonds payable to bearer but registrable as to principal alone or as to both principal and interest; or

(4) in another form, including a registered uncertificated obligation not represented by written instruments, commonly known as a book-entry obligation.

(b) The department shall provide for the registration of ownership and transfer of a book-entry obligation under a system of books and records maintained by a bank serving as trustee, paying agent, or bond registrar.

Sec. 2306.393. MANNER, PRICE, AND TERMS. The department's bonds may be sold in a manner, at a price, and under terms and conditions determined by the board under a contractual arrangement approved by the board.

Sec. 2306.394. PLACE OF PAYMENT; MEDIUM OF EXCHANGE. (a) The department's bonds may be payable at a place inside or outside the United States.

(b) The bonds may be made payable in any currency or medium of exchange, including United States dollars and currencies of other nations.

Sec. 2306.395. INTEREST ON BONDS. The department's bonds may be issued to bear interest at a rate determined by the board.

Sec. 2306.396. MATURITY OF BONDS. The department's bonds may mature within a period determined by the board.

Sec. 2306.397. REDEMPTION BEFORE MATURITY; CONVERSION. (a) Department bonds may be made redeemable before maturity.

(b) The board may provide and covenant for the:

(1) conversion of one form of bond to another form; and

(2) reconversion of a bond to another form.

(c) Except as provided by Subsection (d), a replacement, converted, or reconverted bond must be approved and registered as provided by Sections 2306.431 and 2306.432, under procedures established by the resolution authorizing the bonds.

(d) If the duty of replacement, conversion, or reconversion of a bond is imposed on a place of payment (paying agent) or a corporate trustee under a trust agreement or trust indenture, the replacement, converted, or reconverted bond does not need to be reapproved by the attorney general or reregistered by the comptroller as provided by Sections 2306.431 and 2306.432.

SUBCHAPTER S. HOUSING FINANCE DIVISION BONDS: SECURITY FOR BONDS

Sec. 2306.411. SECURITY FOR PAYMENT OF PRINCIPAL, INTEREST, AND REDEMPTION PREMIUM. (a) In addition to other security for the department's bonds authorized by this chapter, payment of the principal and interest and redemption premium, if any, on the department's bonds may be secured by a first or subordinate lien on and pledge of all or part of:

(1) the department's assets and real, personal, or mixed property, including:

(A) mortgages or other obligations securing the assets of property;

(B) investments; and

(C) trust agreements or trust indentures administered by one or more corporate trustees as allowed by the board; and

(2) the reserves or funds of the department.

(b) The form of a mortgage, trust agreement, or trust indenture securing department bonds must be authorized under the resolution authorizing the issuance of the bonds.

Sec. 2306.412. VALIDITY OF LIENS AND PLEDGES. (a) A lien on or pledge of revenues, income, assets, reserves, funds, or other resources of the department, as authorized by this chapter, is valid and binding from the time of payment for and delivery of the bonds authorized by the board resolution creating or confirming the lien or pledge.

(b) A lien or pledge is fully effective as to revenues, income, assets, reserves, funds, or other resources on hand or later received, and those items are subject to the lien or pledge without physical delivery of the item or any further act.

(c) A lien or pledge is valid and binding against a party who has a claim in tort, contract, or otherwise against the department or another party, regardless of whether the party has notice of the lien or pledge.

(d) A resolution authorizing the issuance of department bonds or any other instrument creating or confirming a lien or pledge is not required to be filed or recorded, except that:

(1) the resolution or instrument must be filed in the department's records; and

(2) each department bond resolution must be submitted to the attorney general under Section 2306.431.

SUBCHAPTER T. HOUSING FINANCE DIVISION BONDS: APPROVAL, REGISTRATION, AND EXECUTION

Sec. 2306.431. APPROVAL OF BONDS. (a) Bonds issued by the department and the appropriate proceedings authorizing the bonds' issuance shall be submitted to the attorney general for examination.

(b) The attorney general shall approve the bonds if the attorney general finds that the bonds have been authorized as provided by this chapter.

(c) Any bonds submitted by the department to the attorney general under this section must include a certification by the board that home mortgage loans made using the proceeds of the bonds do not include a mandatory arbitration requirement.

Sec. 2306.432. REGISTRATION. On approval of the attorney general under Section 2306.431, the comptroller shall register the department's bonds.

Sec. 2306.433. EXECUTION. Bonds authorized by Section 2306.352 shall be executed on the board's behalf as general obligations of the state as follows:

(1) the presiding officer of the board shall sign the bonds;

(2) the board shall impress its seal on the bonds;

(3) the governor shall sign the bonds; and

(4) the secretary of state shall attest the bonds and impress on them the state seal.

SUBCHAPTER U. HOUSING FINANCE DIVISION BONDS: RIGHTS AND REMEDIES OF BONDHOLDERS AND PARTIES IN INTEREST

Sec. 2306.451. STATE PLEDGE REGARDING BONDHOLDER RIGHTS AND REMEDIES. (a) The state pledges to and agrees with the holders of bonds issued under this chapter that it will not limit or alter the rights vested in the department under this chapter to fulfill the terms of an agreement made with a bondholder or impair the rights and remedies of a bondholder until the following obligations are fully discharged:

(1) the bonds;

(2) interest on the bonds;

(3) interest on any unpaid installment of interest; and

(4) all costs and expenses related to an action or proceeding by or on behalf of the holders.

(b) The department may include the state's pledge and agreement under Subsection (a) in an agreement with the holders of the department's bonds.

Sec. 2306.452. PAYMENT ENFORCEABLE BY MANDAMUS. A writ of mandamus and any other legal or equitable remedy are available to a party in interest to require the department, the comptroller, or another party to carry out an agreement or to perform a function or duty under:

(1) this chapter;

(2) the Texas Constitution; or

(3) the department's bond resolutions.

SUBCHAPTER V. HOUSING FINANCE DIVISION BONDS: OBLIGATIONS OF DEPARTMENT AND STATE

Sec. 2306.471. GENERAL OBLIGATION BONDS. General obligation bonds issued under Section 2306.352 and approved and registered under this chapter are general obligations of the state.

Sec. 2306.472. DEPARTMENT'S BONDS OTHER THAN GENERAL OBLIGATION BONDS NOT OBLIGATIONS OF THE STATE. Except for bonds authorized by the Texas Constitution and issued under Section 2306.352, the department's bonds:

(1) are solely obligations of the department and are payable solely from funds of the housing finance division;

(2) are not an obligation, debt, or liability of the state; and

(3) do not create or constitute a pledge, giving, or lending of the faith, credit, or taxing power of the state.

Sec. 2306.473. STATE NOT OBLIGATED TO PAY; FAITH AND CREDIT NOT PLEDGED. A department bond not authorized by Section 2306.352 must contain a statement on the face of the bond that:

(1) the state is not obligated to pay the principal or interest on the bond; and

(2) the faith, credit, or taxing power of the state is not pledged, given, or loaned to payment of the bond's principal or interest.

SUBCHAPTER W. HOUSING FINANCE DIVISION BONDS: MISCELLANEOUS PROVISIONS

Sec. 2306.491. BONDS NEGOTIABLE INSTRUMENTS. Notwithstanding any other statute, a bond and interest coupon issued and delivered by the department is a negotiable instrument under the Uniform Commercial Code, except that the bond may be registered or subject to registration under this chapter.

Sec. 2306.492. BONDS INCONTESTABLE. Department bonds are incontestable for any reason in a court or other forum after approval by the attorney general and registration by the comptroller and are valid and binding obligations for all purposes under the terms of the bonds.

Sec. 2306.493. SIGNATURE OF FORMER OFFICER. If an officer whose manual or facsimile signature appears on a bond or whose facsimile signature appears on a coupon is not an officer at the time the bond is delivered, the signature is valid and sufficient for all purposes as if the officer had remained in office until delivery.

Sec. 2306.494. BONDS NOT TAXABLE. The following are free from taxation or assessment by this state or a public agency:

(1) department bonds issued under this chapter;

(2) interest and income from department bonds, including a profit from the sale of the bonds; and

(3) all fees, charges, gifts, grants, revenues, receipts, and other money received or pledged to pay or secure the payment of the department's bonds.

Sec. 2306.495. AUTHORIZED INVESTMENTS. Bonds issued by the department under this chapter are legal and authorized investments for:

(1) banks;

(2) savings banks;

(3) trust companies;

(4) savings and loan associations;

(5) insurance companies;

(6) fiduciaries;

(7) trustees;

(8) guardians; or

(9) sinking or other public funds of:

(A) this state;

(B) a municipality;

(C) a county;

(D) a school district; or

(E) another political subdivision or public agency of this state.

Sec. 2306.496. SECURITY FOR DEPOSIT OF FUNDS. Department bonds are eligible and lawful security for a deposit of public funds of the state or a public agency to the extent of the greater of the bonds' par or market value when accompanied by appurtenant unmatured interest coupons.

Sec. 2306.497. MUTILATED, LOST, STOLEN, OR DESTROYED BONDS. The board may provide procedures for the replacement of a mutilated, lost, stolen, or destroyed bond or interest coupon.

Sec. 2306.498. NO GAIN ALLOWED. (a) The director or a board member may not have or attempt to have a pecuniary interest in a transaction to which the department is a party for purposes of personal pecuniary gain.

(b) A board member or department employee may not purchase department bonds in the open secondary market for municipal securities.

SUBCHAPTER X. INDIVIDUALS WITH SPECIAL NEEDS

Sec. 2306.511. DEFINITION. In this subchapter, "individual with special needs" means an individual who:

(1) is considered to be an individual having a disability under a state or federal law;

(2) is elderly;

(3) is designated by the board as experiencing a unique need for decent, safe housing that is not being met adequately by private enterprise; or

(4) is legally responsible for caring for an individual described by Subdivision (1), (2), or (3) and meets the income guidelines established by the board.

Sec. 2306.512. SPECIAL NEEDS. The department may adopt a strategy to serve the needs of individuals with special needs.

Sec. 2306.513. HOUSING FOR INDIVIDUALS WITH SPECIAL NEEDS. (a) The board shall adopt rules to achieve occupancy by individuals with special needs of at least five percent of the units in each multifamily housing development.

(b) Subsection (a) applies only to a multifamily housing development that contains at least 20 units and is financed by bonds issued under this chapter.

(c) If a survey that is conducted by the housing sponsor and verified by the housing finance division reveals that there is not sufficient need for housing for individuals with special needs in the area in which the development will be built or renovated to justify building or renovating and reserving at least five percent of the units for individuals with special needs, the department may, on a showing of good cause by the housing sponsor, lower the requirements to correspond to the amount of need found by the housing sponsor.

(d) Repealed by Acts 1995, 74th Leg., ch. 76, Sec. 5.78, eff. Sept. 1, 1995.

(e) Repealed by Acts 1997, 75th Leg., ch. 980, Sec. 54, eff. Sept. 1, 1997.

Sec. 2306.514. CONSTRUCTION REQUIREMENTS FOR SINGLE FAMILY AFFORDABLE HOUSING. (a) If a person is awarded state or federal funds by the department to construct single family affordable housing for individuals and families of low and very low income, the affordable housing identified on the person's funding application must be constructed so that:

(1) at least one entrance door, whether located at the front, side, or back of the building:

(A) is on an accessible route served by a ramp or no-step entrance; and

(B) has at least a standard 36-inch door;

(2) on the first floor of the building:

(A) each interior door is at least a standard 32-inch door, unless the door provides access only to a closet of less than 15 square feet in area;

(B) each hallway has a width of at least 36 inches and is level, with ramped or beveled changes at each door threshold;

(C) each bathroom wall is reinforced for potential installation of grab bars;

(D) each electrical panel, light switch, or thermostat is not higher than 48 inches above the floor; and

(E) each electrical plug or other receptacle is at least 15 inches above the floor; and

(3) if the applicable building code or codes do not prescribe another location for the breaker boxes, each breaker box is located not higher than 48 inches above the floor inside the building on the first floor.

(b) A person who builds single family affordable housing to which this section applies may obtain a waiver from the department of the requirement described by Subsection (a)(1)(A) if the cost of grading the terrain to meet the requirement is prohibitively expensive.

SUBCHAPTER X-2.
NATURAL DISASTER HOUSING RECONSTRUCTION INITIATIVE

Sec. 2306.541. NATURAL DISASTER HOUSING RECONSTRUCTION ADVISORY COMMITTEE. (a) The director shall appoint a natural disaster housing reconstruction advisory committee composed of representatives from appropriate local, state, and federal entities and organizations and nonprofit organizations.

(b) The advisory committee shall develop a natural disaster housing reconstruction plan. In developing this plan, the advisory committee shall:

(1) evaluate existing systems of providing temporary housing to victims of natural disasters and develop alternative systems to increase efficiency and cost-effectiveness;

(2) evaluate existing models for providing permanent replacement housing to victims of natural disasters;

(3) design alternatives to existing models to improve the sustainability, affordability, desirability, and quality of housing rebuilt in the event of future natural disasters;

(4) evaluate economic circumstances of elderly, disabled, and low-income victims of natural disasters and develop models for providing affordable replacement housing;

(5) recommend programs for the rapid and efficient large-scale production of temporary and permanent replacement housing following a natural disaster; and

(6) encourage the participation, coordination, and involvement of appropriate federal organizations.

(c) Chapter 2110 does not apply to the advisory committee.

Sec. 2306.542. HOUSING RECONSTRUCTION DEMONSTRATION PILOT PROGRAM.

(a) Using the natural disaster housing reconstruction plan developed under this subchapter, the director and advisory committee shall develop, for implementation under Subsections (b) and (c), housing reconstruction demonstration pilot programs for three areas, each of which was affected by one of the three most recent federally declared natural disasters. The pilot programs must provide for the replacement of at least 20 houses in each area to test the feasibility of implementing the plan in the large-scale production of replacement housing for victims of federally declared natural disasters.

(b) The department shall provide to an interested council of government, county, or local government eligible for funding for disaster recovery under the community development block grant program:

(1) information regarding a pilot program developed under Subsection (a); and

(2) assistance in implementing a pilot program developed under Subsection (a).

(c) At the discretion of the board, the department may implement a pilot program in any of the three most recently federally declared disaster areas in which a pilot program has not been implemented by a council of government, county, or local government. The department may use any available funds to implement the pilot program.

Note but not part of statute: per HB 2450 a) Not later than January 1, 2010, the executive director of the Texas Department of Housing and Community Affairs shall submit the natural disaster housing reconstruction plan developed under Subsection (b), Section 2306.541, Government Code, as added by this Act, to the governing board of the Texas Department of Housing and Community Affairs.

(b) Not later than March 1, 2010, the executive director of the Texas Department of Housing and Community Affairs shall provide housing reconstruction demonstration pilot program information to an interested council of government, county, or local government eligible for funding for disaster recovery under the community development block grant program.

SUBCHAPTER Z. COLONIAS

Sec. 2306.581. DEFINITION. In this subchapter:

(1) "Colonia" means a geographic area that is located in a county some part of which is within 150 miles of the international border of this state, that consists of 11 or more dwellings that are located in close proximity to each other in an area that may be described as a

community or neighborhood, and that:

(A) has a majority population composed of individuals and families of low income and very low income, based on the federal Office of Management and Budget poverty index, and meets the qualifications of an economically distressed area under Section 17.921, Water Code; or

(B) has the physical and economic characteristics of a colonia, as determined by the department.

(2) "Community action agency" means a political subdivision, combination of political subdivisions, or nonprofit organization that qualifies as an eligible entity under 42 U.S.C. Section 9902.

Sec. 2306.582. COLONIA SELF-HELP CENTERS: ESTABLISHMENT. (a) The department shall establish colonia self-help centers in El Paso, Hidalgo, Starr, and Webb counties, and in Cameron County to serve Cameron and Willacy counties. If the department determines it necessary and appropriate, the department may establish a self-help center in any other county if the county is designated as an economically distressed area under Chapter 17, Water Code, for purposes of eligibility to receive funds from the Texas Water Development Board.

(b) The department shall attempt to secure contributions, services, facilities, or operating support from the commissioners court of the county in which the self-help center is located to support the operation of the self-help center.

Sec. 2306.583. SELF-HELP CENTERS: DESIGNATION. (a) The department shall designate a geographic area for the services provided by each self-help center.

(b) In consultation with the colonia resident advisory committee and the appropriate self-help center, the department shall designate five colonias in each service area to receive concentrated attention from that center.

(c) In consultation with the colonia resident advisory committee and the appropriate self-help center, the department may change the designation of colonias made under Subsection (b).

Sec. 2306.584. COLONIA RESIDENT ADVISORY COMMITTEE. (a) The board shall appoint not fewer than five persons who are residents of colonias to serve on the Colonia

Resident Advisory Committee. The members of the advisory committee shall be selected from lists of candidates submitted to the board by local nonprofit organizations and the commissioners court of a county in which a self-help center is located.

(b) The board shall appoint one committee member to represent each of the counties in which self-help centers are located. Each committee member:

(1) must be a resident of a colonia in the county the member represents; and

(2) may not be a board member, contractor, or employee of or have any ownership interest in an entity that is awarded a contract under this subchapter.

Sec. 2306.585. DUTIES OF COLONIA RESIDENT ADVISORY COMMITTEE. (a) The Colonia Resident Advisory Committee shall advise the board regarding:

(1) the needs of colonia residents;

(2) appropriate and effective programs that are proposed or are operated through the self-help centers; and

(3) activities that may be undertaken through the self-help centers to better serve the needs of colonia residents.

(b) The advisory committee shall meet before the 30th day preceding the date on which a contract is scheduled to be awarded for the operation of a self-help center and may meet at other times.

(c) The advisory committee shall advise the colonia initiatives coordinator as provided by Section 775.005.

Sec. 2306.586. SELF-HELP CENTER: PURPOSE AND SERVICES. (a) The purpose of a self-help center is to assist individuals and families of low income and very low income to finance, refinance, construct, improve, or maintain a safe, suitable home in the colonias' designated service area or in another area the department has determined is suitable.

(b) A self-help center shall set a goal to improve the living conditions of residents in the colonias designated under Section 2306.583(a)(2) within a two-year period after a contract is awarded under this subchapter.

(c) A self-help center may serve individuals and families of low income and very low income by:

(1) providing assistance in obtaining loans or grants to build a home;

(2) teaching construction skills necessary to repair or build a home;

(3) providing model home plans;

(4) operating a program to rent or provide tools for home construction and improvement for the benefit of property owners in colonias who are building or repairing a residence or installing necessary residential infrastructure;

(5) helping to obtain, construct, access, or improve the service and utility infrastructure designed to service residences in a colonia, including potable water, wastewater disposal, drainage, streets, and utilities;

(6) surveying or platting residential property that an individual purchased without the benefit of a legal survey, plat, or record;

(7) providing credit and debt counseling related to home purchase and finance;

(8) applying for grants and loans to provide housing and other needed community improvements;

(9) providing other services that the self-help center, with the approval of the department, determines are necessary to assist colonia residents in improving their physical living conditions, including help in obtaining suitable alternative housing outside of a colonia's area;

(10) providing assistance in obtaining loans or grants to enable an individual or a family to acquire fee simple title to property that originally was purchased under a contract for a deed, contract for sale, or other executory contract; and

(11) providing monthly programs to educate individuals and families on their rights and responsibilities as property owners.

(d) A self-help center may not provide grants, financing, or mortgage loan services to purchase, build, rehabilitate, or finance construction or improvements to a home in a colonia if water service and suitable wastewater disposal are not available.

(e) Through a self-help center, a colonia resident may apply for any direct loan or grant program operated by the department.

Sec. 2306.587. OPERATION OF SELF-HELP CENTER; MONITORING. (a) To operate a self-help center, the department shall, subject to the availability of revenue for that purpose, enter into a four-year contract directly with a local nonprofit organization, including a local community action agency that qualifies as an eligible entity under 42 U.S.C. Section 9902, or a local housing authority that has demonstrated the ability to carry out the functions of a self-help center under this subchapter.

(b) The department is solely responsible for contract oversight and for the monitoring of self-help centers under this subchapter.

(c) The department and the self-help centers may apply for and receive public or private gifts or grants to enable the centers to achieve their purpose.

Sec. 2306.588. DEPARTMENT LIAISON TO SELF-HELP CENTERS. (a) The department shall designate appropriate staff in the department to act as liaison to the self-help centers to assist the centers in obtaining funding to enable the centers to carry out the centers' programs.

(b) The department shall make a reasonable effort to secure an adequate level of funding to provide the self-help centers with funds for low-interest mortgage financing, grants for self-help programs, a revolving loan fund for septic tanks, a tool-lending program, and other activities the department determines are necessary.

Sec. 2306.589. COLONIA SET-ASIDE FUND. (a) The department shall establish a fund in the department designated as the colonia set-aside fund. The department may contribute money to the fund from any available source of revenue that the department considers appropriate to implement the purposes of this subchapter, except that the department may not use federal community development block grant money authorized by Title I of the Housing and Community Development Act of 1974 (42 U.S.C. Section 5301 et seq.) unless the money is specifically appropriated by the legislature for that purpose.

(b) The department by rule shall provide that an application for assistance in paying for residential service lines, hookups, and plumbing improvements associated with being connected to a water supply or sewer service system may be submitted after construction of a water supply or sewer service system begins. The department shall approve or disapprove a timely application before construction of the water supply or sewer service is completed in order to eliminate delay in hookups once construction is completed. The department and the Texas Water Development Board shall coordinate the application process for hookup funds under this subsection and under Subchapter L, Chapter 15, Water Code, and shall share information elicited by each agency's application procedure in order to avoid duplication of effort and to eliminate the need for applicants to complete different forms with similar information.

(c) The department may use money in the colonia set-aside fund for specific activities that assist colonias, including:

(1) the operation and activities of the self-help centers established under this subchapter;

(2) reimbursement of colonia resident advisory committee members for their reasonable expenses in the manner provided by Chapter 2110 or the General Appropriations Act; and

(3) funding for the provision of water and sewer service connections in accordance with Subsection (b).

(d) The department may review and approve an application for funding from the colonia set-aside fund that advances the policy and goals of the state in addressing problems in the colonias.

Sec. 2306.590. COLONIA INITIATIVES ADVISORY COMMITTEE. (a) The Colonia Initiatives Advisory Committee is composed of seven members appointed by the governor as follows:

(1) one colonia resident;

(2) one representative of a nonprofit organization that serves colonia residents;

(3) one representative of a political subdivision that contains all or part of a colonia;

(4) one person to represent private interests in banking or land development;

(5) one representative of a nonprofit utility;

(6) one representative of an engineering consultant firm involved in economically distressed areas program projects under Subchapter K, Chapter 17, Water Code; and

(7) one public member.

(b) Each committee member, except the public member, must reside within 150 miles of the Texas-Mexico border.

(c) The secretary of state is an ex officio member of the committee.

(d) The committee shall:

(1) review the progress of colonia water and wastewater infrastructure projects managed by the Texas Water Development Board and the state agency responsible for administering the portion of the federal community development block grant nonentitlement program that addresses the infrastructure needs of colonias;

(2) present an update and make recommendations to the board and the Texas Water Development Board annually at the joint meeting required by Section 6.060(d), Water Code, regarding:

(A) efforts to ensure that colonia residents are connected to the infrastructure funded by state agencies;

(B) the financial, managerial, and technical capabilities of project owners and operators;

(C) the agencies' management of their colonia programs and the effectiveness of their policies regarding underperforming projects; and

(D) any other issues related to the effect of state-managed infrastructure programs on colonia residents;

(3) review public comments regarding the colonia needs assessment incorporated into the state low income housing plan under Section 2306.0721; and

(4) based on the public comments reviewed under Subdivision (3), recommend to the board new colonia programs or improvements to existing colonia programs.

Sec. 2306.591. MANUFACTURED HOMES INSTALLED IN COLONIAS. (a) For a manufactured home to be approved for installation and use as a dwelling in a colonia:

(1) the home must be a HUD-code manufactured home, as defined by Section 1201.003, Occupations Code;

(2) the home must be habitable, as described by Section 1201.453, Occupations Code; and

(3) ownership of the home must be properly recorded with the manufactured housing division of the department.

(b) An owner of a manufactured home is not eligible to participate in a grant loan program offered by the department, including the single-family mortgage revenue bond program under Section 2306.142, unless the owner complies with Subsection (a).

SUBCHAPTER DD. LOW INCOME HOUSING TAX CREDIT PROGRAM

Sec. 2306.6701. PURPOSE. The department shall administer the low income housing tax credit program to:

(1) encourage the development and preservation of appropriate types of rental

housing for households that have difficulty finding suitable, affordable rental housing in the private marketplace;

(2) maximize the number of suitable, affordable residential rental units added to the state's housing supply;

(3) prevent losses for any reason to the state's supply of suitable, affordable residential rental units by enabling the rehabilitation of rental housing or by providing other preventive financial support under this subchapter; and

(4) provide for the participation of for-profit organizations and provide for and encourage the participation of nonprofit organizations in the acquisition, development, and operation of affordable housing developments in urban and rural communities.

Sec. 2306.6702. DEFINITIONS. (a) In this subchapter:

(1) "Applicant" means any person or affiliate of a person who files an application with the department requesting a housing tax credit allocation.

(2) "Application" means an application filed with the department by an applicant and includes any exhibits or other supporting materials.

(3) "Application log" means a form containing at least the information required by Section 2306.6709.

(4) "Application round" means the period beginning on the date the department begins accepting applications and continuing until all available housing tax credits are allocated, but not extending past the last day of the calendar year.

(5) "At-risk development" means a development that:

(A) has received the benefit of a subsidy in the form of a below-market interest rate loan, interest rate reduction, rental subsidy, Section 8 housing assistance payment, rental supplement payment, rental assistance payment, or equity incentive under the following federal laws, as applicable:

(i) Sections 221(d)(3) and (5), National Housing Act (12 U.S.C. Section 1715l);

(ii) Section 236, National Housing Act (12 U.S.C. Section 1715z-1);

(iii) Section 202, Housing Act of 1959 (12 U.S.C. Section 1701q);

(iv) Section 101, Housing and Urban Development Act of 1965 (12 U.S.C. Section 1701s);

(v) the Section 8 Additional Assistance Program for housing developments with HUD-Insured and HUD-Held Mortgages administered by the United States Department of Housing and Urban Development;

(vi) the Section 8 Housing Assistance Program for the Disposition of HUD-Owned Projects administered by the United States Department of Housing and Urban Development;

(vii) Sections 514, 515, and 516, Housing Act of 1949 (42 U.S.C. Sections 1484, 1485, and 1486); or

(viii) Section 42, Internal Revenue Code of 1986 (26 U.S.C. Section 42); and

(B) is subject to the following conditions:

(i) the stipulation to maintain affordability in the contract granting the subsidy is nearing expiration; or

(ii) the federally insured mortgage on the development is eligible for prepayment or is nearing the end of its term.

(6) "Development" means a proposed qualified low income housing project, as defined by Section 42(g), Internal Revenue Code of 1986 (26 U.S.C. Section 42(g)), that consists of one or more buildings containing multiple units, that is financed under a common plan, and that is owned by the same person for federal tax purposes, including a project consisting of multiple buildings that:

(A) are located on scattered sites; and

(B) contain only rent-restricted units.

(7) "Development owner" means any person or affiliate of a person who owns or proposes a development or expects to acquire control of a development under a purchase contract approved by the department.

(8) "Housing tax credit" means a tax credit allocated under the low income housing tax credit program.

(9) "Land use restriction agreement" means an agreement between the department, the development owner, and the development owner's successors in interest that encumbers the development with respect to the requirements of this subchapter and the requirements of Section 42, Internal Revenue Code of 1986 (26 U.S.C. Section 42).

(10) "Qualified allocation plan" means a plan adopted by the board under this

subchapter that:

(A) provides the threshold, scoring, and underwriting criteria based on housing priorities of the department that are appropriate to local conditions;

(B) consistent with Section 2306.6710(e), gives preference in housing tax credit allocations to developments that, as compared to the other developments:

(i) when practicable and feasible based on documented, committed, and available third-party funding sources, serve the lowest income tenants per housing tax credit; and

(ii) produce for the longest economically feasible period the greatest number of high quality units committed to remaining affordable to any tenants who are income-eligible under the low income housing tax credit program; and

(C) provides a procedure for the department, the department's agent, or another private contractor of the department to use in monitoring compliance with the qualified allocation plan and this subchapter.

(11) "Related party" means the following individuals or entities:

(A) the brothers, sisters, spouse, ancestors, and descendants of a person within the third degree of consanguinity, as determined by Chapter 573;

(B) a person and a corporation, if the person owns more than 50 percent of the outstanding stock of the corporation;

(C) two or more corporations that are connected through stock ownership with a common parent possessing more than 50 percent of:

(i) the total combined voting power of all classes of stock of each of the corporations that can vote;

(ii) the total value of shares of all classes of stock of each of the corporations; or

(iii) the total value of shares of all classes of stock of at least one of the corporations, excluding, in computing that voting power or value, stock owned directly by the other corporation;

(D) a grantor and fiduciary of any trust;

(E) a fiduciary of one trust and a fiduciary of another trust, if the same person is a grantor of both trusts;

(F) a fiduciary of a trust and a beneficiary of the trust;

(G) a fiduciary of a trust and a corporation if more than 50 percent of the outstanding stock of the corporation is owned by or for:

(i) the trust; or

(ii) a person who is a grantor of the trust;

(H) a person or organization and an organization that is tax-exempt under Section 501(a), Internal Revenue Code of 1986 (26 U.S.C. Section 501), and that is controlled by that person or the person's family members or by that organization;

(I) a corporation and a partnership or joint venture if the same persons own more than:

(i) 50 percent of the outstanding stock of the corporation; and

(ii) 50 percent of the capital interest or the profits' interest in the partnership or joint venture;

(J) an S corporation and another S corporation if the same persons own more than 50 percent of the outstanding stock of each corporation;

(K) an S corporation and a C corporation if the same persons own more than 50 percent of the outstanding stock of each corporation;

(L) a partnership and a person or organization owning more than 50 percent of the capital interest or the profits' interest in that partnership; or

(M) two partnerships, if the same person or organization owns more than 50 percent of the capital interests or profits' interests.

(12) "Rural area" means an area that is located:

(A) outside the boundaries of a primary metropolitan statistical area or a metropolitan statistical area;

(B) within the boundaries of a primary metropolitan statistical area or a metropolitan statistical area, if the statistical area has a population of 20,000 or less and does not share a boundary with an urban area; or

(C) in an area that is eligible for funding by the Texas Rural Development Office of the United States Department of Agriculture.

(13) "Rural development agency" means the state agency designated by the legislature as primarily responsible for rural area development in the state.

(14) "Set-aside" means a reservation of a portion of the available housing tax credits to provide financial support for specific types of housing or geographic locations or serve

specific types of applicants as permitted by the qualified allocation plan on a priority basis.

(15) "Threshold criteria" means the criteria used to determine whether the development satisfies the minimum level of acceptability for consideration established in the department's qualified allocation plan.

(16) "Unit" means any residential rental unit in a development consisting of an accommodation, including a single room used as an accommodation on a non-transient basis, that contains complete physical facilities and fixtures for living, sleeping, eating, cooking, and sanitation.

(b) For purposes of Subsection (a)(11), the constructive ownership provisions of Section 267, Internal Revenue Code of 1986 (26 U.S.C. Section 267), apply. The board may lower in the qualified allocation plan the percentages described by Subsection (a)(11).

Sec. 2306.67021. APPLICABILITY OF SUBCHAPTER. Except as provided by Section 2306.6703, this subchapter does not apply to the allocation of housing tax credits to developments financed through the private activity bond program.

Added by Acts 2001, 77th Leg., ch. 1367, Sec. 8.01, eff. Sept. 1, 2001.

Sec. 2306.67022. QUALIFIED ALLOCATION PLAN; MANUAL. The board annually shall adopt a qualified allocation plan and a corresponding manual to provide information regarding the administration of and eligibility for the low income housing tax credit program.

Sec. 2306.6703. INELIGIBILITY FOR CONSIDERATION. (a) An application is ineligible for consideration under the low income housing tax credit program if:

(1) at the time of application or at any time during the two-year period preceding the date the application round begins, the applicant or a related party is or has been:

(A) a member of the board; or

(B) the director, a deputy director, the director of housing programs, the director of compliance, the director of underwriting, or the low income housing tax credit program manager employed by the department;

(2) the applicant proposes to replace in less than 15 years any private activity bond financing of the development described by the application, unless:

(A) at least one-third of all the units in the development are public housing units or Section 8 project-based units and the applicant proposes to maintain for a period of 30 years or more 100 percent of the units supported by housing tax credits as rent-restricted and exclusively for occupancy by individuals and families earning not more than 50 percent of the area median income, adjusted for family size;

(B) the applicable private activity bonds will be redeemed only in an amount consistent with their proportionate amortization; or

(C) if the redemption of the applicable private activity bonds will occur in the first five years of the operation of the development and complies with Section 42(h)(4), Internal Revenue Code of 1986:

(i) on the date the certificate of reservation is issued, the Bond Review Board determines that there is not a waiting list for private activity bonds in the same priority level established under Section 1372.0321 or, if applicable, in the same uniform state service region, as referenced in Section 1372.0231, that is served by the proposed development; and

(ii) the applicable private activity bonds will be redeemed according to underwriting criteria, if any, established by the department;

(3) the applicant proposes to construct a new development that is located one linear mile or less from a development that:

(A) serves the same type of household as the new development, regardless of whether the developments serve families, elderly individuals, or another type of household;

(B) has received an allocation of housing tax credits for new construction at any time during the three-year period preceding the date the application round begins; and

(C) has not been withdrawn or terminated from the low income housing tax credit program; or

(4) the development is located in a municipality or, if located outside a municipality, a county that has more than twice the state average of units per capita supported by housing tax credits or private activity bonds, unless the applicant:

(A) has obtained prior approval of the development from the governing body of the appropriate municipality or county containing the development; and

(B) has included in the application a written statement of support from that governing body referencing this section and authorizing an allocation of housing tax credits for the development.

(b) Subsection (a)(3) does not apply to a development:

(1) that is using:

(A) federal HOPE VI funds received through the United States Department of Housing and Urban Development;

(B) locally approved funds received from a public improvement district or a tax increment financing district;

(C) funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.); or

(D) funds provided to the state and participating jurisdictions under the Housing and Community Development Act of 1974 (42 U.S.C. Section 5301 et seq.);

(2) that is located in a county with a population of less than one million;

(3) that is located outside of a metropolitan statistical area; or

(4) that a local government where the project is to be located has by vote specifically allowed the construction of a new development located within one linear mile or less from a development under Subsection (a).

Sec. 2306.6704. PREAPPLICATION PROCESS. (a) To prevent unnecessary filing costs, the department by rule shall establish a voluntary preapplication process to enable a preliminary assessment of an application proposed for filing under this subchapter.

(b) The department shall award in the application evaluation process described by Section 2306.6710 an appropriate number of points as an incentive for participation in the preapplication process established under this section.

(b-1) The preapplication process must require the applicant to provide the department with evidence that the applicant has notified the following entities with respect to the filing of the application:

(1) any neighborhood organizations on record with the state or county in which the development is to be located and whose boundaries contain the proposed development site;

(2) the superintendent and the presiding officer of the board of trustees of the school district containing the development;

(3) the presiding officer of the governing body of any municipality containing the development and all elected members of that body;

(4) the presiding officer of the governing body of the county containing the development and all elected members of that body; and

(5) the state senator and state representative of the district containing the development.

(c) The department shall reject and return to the applicant any application assessed by the department under this section that fails to satisfy the threshold criteria required by the board in the qualified allocation plan.

(d) If feasible under Section 2306.67041, an application under this section must be submitted electronically.

Sec. 2306.67041. ON-LINE APPLICATION SYSTEM. (a) The department and the Department of Information Resources shall cooperate to evaluate the feasibility of an on-line application system for the low income housing tax credit program to provide the following functions:

(1) filing of preapplications and applications on-line;

(2) posting of on-line preapplication or application status and the application log detailing the status of, and department's evaluations and scores pertaining to, those applications; and

(3) posting of comments from applicants and the public regarding a preapplication or application.

(b) The department shall determine the process for allowing access to on-line preapplications and applications, information related to those applications, and department decisions relating to those applications.

(c) In the application cycle following the date any on-line application system becomes operational, the department shall require use of the system for submission of preapplications and applications under this subchapter.

(d) The department shall publish a status report on the implementation of the on-line application on the department's website not later than January 1, 2002.

(e) Before the implementation of the on-line application system, the department may implement the requirements of Section 2306.6717 in any manner the department considers appropriate.

Sec. 2306.6705. GENERAL APPLICATION REQUIREMENTS. An application must contain at a minimum the following written, detailed information in a form prescribed by the board:

(1) a description of:

(A) the financing plan for the development, including any nontraditional financing arrangements;

(B) the use of funds with respect to the development;

(C) the funding sources for the development, including:

(i) construction, permanent, and bridge loans; and

(ii) rents, operating subsidies, and replacement reserves; and

(D) the commitment status of the funding sources for the development;

(2) if syndication costs are included in the eligible basis, a justification of the syndication costs for each cost category by an attorney or accountant specializing in tax matters;

(3) from a syndicator or a financial consultant of the applicant, an estimate of the amount of equity dollars expected to be raised for the development in conjunction with the amount of housing tax credits requested for allocation to the applicant, including:

(A) pay-in schedules; and

(B) syndicator consulting fees and other syndication costs;

(4) if rental assistance, an operating subsidy, or an annuity is proposed for the development, any related contract or other agreement securing those funds and an identification of:

(A) the source and annual amount of the funds;

(B) the number of units receiving the funds; and

(C) the term and expiration date of the contract or other agreement;

(5) if the development is located within the boundaries of a political subdivision with a zoning ordinance, evidence in the form of a letter from the chief executive officer of the political subdivision or from another local official with jurisdiction over zoning matters that states that:

(A) the development is permitted under the provisions of the ordinance that apply to the location of the development; or

(B) the applicant is in the process of seeking the appropriate zoning and has signed and provided to the political subdivision a release agreeing to hold the political subdivision and all other parties harmless in the event that the appropriate zoning is denied;

(6) if an occupied development is proposed for rehabilitation:

(A) an explanation of the process used to notify and consult with the tenants in preparing the application;

(B) a relocation plan outlining:

(i) relocation requirements; and

(ii) a budget with an identified funding source; and

(C) if applicable, evidence that the relocation plan has been submitted to the appropriate local agency;

(7) a certification of the applicant's compliance with appropriate state and federal laws, as required by other state law or by the board;

(8) any other information required by the board in the qualified allocation plan; and

(9) evidence that the applicant has notified the following entities with respect to the filing of the application:

(A) any neighborhood organizations on record with the state or county in which the development is to be located and whose boundaries contain the proposed development site;

(B) the superintendent and the presiding officer of the board of trustees of the school district containing the development;

(C) the presiding officer of the governing body of any municipality containing the development and all elected members of that body;

(D) the presiding officer of the governing body of the county containing the development and all elected members of that body; and

(E) the state senator and state representative of the district containing the development.

Sec. 2306.67055. MARKET ANALYSIS. (a) A market analysis submitted in conjunction with an application for housing tax credits must:

(1) be prepared by a market analyst approved by the department; and

(2) include an assessment of other developments that are supported by housing tax credits within the market area.

(b) The department, through the qualified allocation plan, shall develop:

(1) a process for approving market analysts; and

(2) a methodology for determining the market area to be examined in a market analysis.

Sec. 2306.6706. ADDITIONAL APPLICATION REQUIREMENT: NONPROFIT SET-ASIDE ALLOCATION. (a) In addition to the information required by Section 2306.6705, an application for a housing tax credit allocation from the nonprofit set-aside, as defined by Section 42(h)(5), Internal Revenue Code of 1986 (26 U.S.C. Section 42(h)(5)), must contain the following written, detailed information with respect to each development owner and each general partner of a development owner:

(1) Internal Revenue Service documentation of designation as a Section 501(c)(3) or 501(c)(4) organization;

(2) evidence that one of the exempt purposes of the nonprofit organization is to provide low income housing;

(3) a description of the nonprofit organization's participation in the construction or rehabilitation of the development and in the ongoing operations of the development;

(4) evidence that the nonprofit organization prohibits a member of its board of directors, other than a chief staff member serving concurrently as a member of the board, from receiving material compensation for service on the board;

(5) a third-party legal opinion stating that the nonprofit organization is not affiliated with or controlled by a for-profit organization and the basis for that opinion;

(6) a copy of the nonprofit organization's most recent audited financial statement;

(7) a list of the names and home addresses of members of the board of directors of the nonprofit organization;

(8) a third-party legal opinion stating that the nonprofit organization is eligible under Subsection (b) for a housing tax credit allocation from the nonprofit set-aside and the basis for that opinion; and

(9) evidence that a majority of the members of the nonprofit organization's board of directors principally reside:

(A) in this state, if the development is located in a rural area; or

(B) not more than 90 miles from the development in the community in which the development is located, if the development is not located in a rural area.

(b) To be eligible for a housing tax credit allocation from the nonprofit set-aside, a nonprofit organization must:

(1) control a majority of the development;

(2) if the organization's application is filed on behalf of a limited partnership, be the managing general partner; and

(3) otherwise meet the requirements of Section 42(h)(5), Internal Revenue Code of 1986 (26 U.S.C. Section 42(h)(5)).

Sec. 2306.6707. ADDITIONAL APPLICATION REQUIREMENT: DISCLOSURE OF INTERESTED PERSONS. (a) The applicant must disclose in the application the names of any persons, including affiliates of those persons and related parties, providing developmental or operational services to the development, including:

(1) a development owner;

(2) an architect;

(3) an attorney;

(4) a tax professional;

(5) a property management company;

(6) a consultant;

(7) a market analyst;

(8) a tenant services provider;

(9) a syndicator;

(10) a real estate broker or agent or a person receiving a fee in connection with services usually provided by a real estate broker or agent;

(11) at the time the application is submitted, the owners of the property on which the development is located;

(12) a developer; and

(13) a builder or general contractor.

(b) For each person described by Subsection (a), the application must disclose any company name, company contact person, address, and telephone number.

Sec. 2306.6708. APPLICATION CHANGES OR SUPPLEMENTS. (a) Except as provided by Subsection (b), an applicant may not change or supplement an application in any manner after the filing deadline.

(b) This section does not prohibit an applicant from:

(1) at the request of the department, clarifying information in the application or correcting administrative deficiencies in the application; or

(2) amending an application after allocation of housing tax credits in the manner provided by Section 2306.6712.

Sec. 2306.6709. APPLICATION LOG. (a) In a form prescribed by the department, the department shall maintain for each application an application log that tracks the application from the date of its submission.

(b) The application log must contain at least the following information:

(1) the names of the applicant and related parties;

(2) the physical location of the development, including the relevant region of the state;

(3) the amount of housing tax credits requested for allocation by the department to the applicant;

(4) any set-aside category under which the application is filed;

(5) the score of the application in each scoring category adopted by the department under the qualified allocation plan;

(6) any decision made by the department or board regarding the application, including the department's decision regarding whether to underwrite the application and the board's decision regarding whether to allocate housing tax credits to the development;

(7) the names of persons making the decisions described by Subdivision (6), including the names of department staff scoring and underwriting the application, to be recorded next to the description of the applicable decision;

(8) the amount of housing tax credits allocated to the development; and

(9) a dated record and summary of any contact between the department staff, the board, and the applicant or any related parties.

Sec. 2306.6710. EVALUATION AND UNDERWRITING OF APPLICATIONS. (a) In evaluating an application, the department shall determine whether the application satisfies the threshold criteria required by the board in the qualified allocation plan. The department shall reject and return to the applicant any application that fails to satisfy the threshold criteria.

(b) If an application satisfies the threshold criteria, the department shall score and rank the application using a point system that:

(1) prioritizes in descending order criteria regarding:

(A) financial feasibility of the development based on the supporting financial data required in the application that will include a project underwriting pro forma from the permanent or construction lender;

(B) quantifiable community participation with respect to the development, evaluated on the basis of written statements from any neighborhood organizations on record with the state or county in which the development is to be located and whose boundaries contain the proposed development site;

(C) the income levels of tenants of the development;

(D) the size and quality of the units;

(E) the commitment of development funding by local political subdivisions;

(F) the level of community support for the application, evaluated on the basis of written statements from the state representative or the state senator that represents the district containing the proposed development site;

(G) the rent levels of the units;

(H) the cost of the development by square foot;

(I) the services to be provided to tenants of the development; and

(J) whether, at the time the complete application is submitted or at any time within the two-year period preceding the date of submission, the proposed development site is located in an area declared to be a disaster under Section 418.014;

(2) uses criteria imposing penalties on applicants or affiliates who have requested extensions of department deadlines relating to developments supported by housing tax credit allocations made in the application round preceding the current round or a developer or principal of the applicant that has been removed by the lender, equity provider, or limited partners for its failure to perform its obligations under the loan documents or limited partnership agreement; and

(3) encourages applicants to provide free notary public service to the residents of

the developments for which the allocation of housing tax credits is requested.

(c) The department shall publish in the qualified allocation plan details of the scoring system used by the department to score applications.

(d) The department shall underwrite the applications ranked under Subsection (b) beginning with the applications with the highest scores in each region described by Section 2306.111(d) and in each set-aside category described in the qualified allocation plan. Based on application rankings, the department shall continue to underwrite applications until the department has processed enough applications satisfying the department's underwriting criteria to enable the allocation of all available housing tax credits according to regional allocation goals and set-aside categories. To enable the board to establish an applications waiting list under Section 2306.6711, the department shall underwrite as many additional applications as the board considers necessary to ensure that all available housing tax credits are allocated within the period required by law. The department shall underwrite an application to determine the financial feasibility of the development and an appropriate level of housing tax credits. In determining an appropriate level of housing tax credits, the department shall evaluate the cost of the development based on acceptable cost parameters as adjusted for inflation and as established by historical final cost certifications of all previous housing tax credit allocations for:

(1) the county in which the development is to be located;

(2) if certifications are unavailable under Subdivision (1), the metropolitan statistical area in which the development is to be located; or

(3) if certifications are unavailable under Subdivisions (1) and (2), the uniform state service region in which the development is to be located.

(e) In scoring applications for purposes of housing tax credit allocations, the department shall award, consistent with Section 42, Internal Revenue Code of 1986 (26 U.S.C. Section 42), preference points to a development that will:

(1) when practicable and feasible based on documented, committed, and available third-party funding sources, serve the lowest income tenants per housing tax credit, if the development is to be located outside a qualified census tract; and

(2) produce for the longest economically feasible period the greatest number of high quality units committed to remaining affordable to any tenants who are income-eligible under the low income housing tax credit program.

(f) In evaluating the level of community support for an application under Subsection (b)(1)(F), the department shall award:

(1) positive points for positive written statements received;

(2) negative points for negative written statements received; and

(3) zero points for neutral statements received.

(g) Repealed by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 42, eff. September 1, 2007.

Sec. 2306.6711. ALLOCATION OF HOUSING TAX CREDITS. (a) The director shall provide the application scores to the board before the 30th day preceding the date the board begins to issue commitments for housing tax credits in the allocation round.

(b) Not later than the deadline specified in the qualified allocation plan, the board shall issue commitments for available housing tax credits based on the application evaluation process provided by Section 2306.6710. The board may not allocate to an applicant housing tax credits in any unnecessary amount, as determined by the department's underwriting policy and by federal law, and in any event may not allocate to the applicant housing tax credits in an amount greater than $2 million in a single application round.

(c) Concurrently with the initial issuance of commitments for housing tax credits under Subsection (b), the board shall establish a waiting list of additional applications ranked by score in descending order of priority based on set-aside categories and regional allocation goals.

(d) The board shall issue commitments for housing tax credits with respect to applications on the waiting list as additional credits become available.

(e) Not later than the 120th day after the date of the initial issuance of commitments for housing tax credits under Subsection (b), the department shall provide to an applicant who did not receive a commitment under that subsection an opportunity to meet and discuss with the department the application's deficiencies and scoring.

(f) The board may allocate housing tax credits to more than one development in a single community, as defined by department rule, in the same calendar year only if the developments are or will be located more than one linear mile apart. This subsection applies only to communities contained within counties with populations exceeding one million.

Sec. 2306.6712. AMENDMENT OF APPLICATION SUBSEQUENT TO ALLOCATION BY BOARD. (a) If a proposed modification would materially alter a development approved for an allocation of a housing tax credit, the department shall require the applicant to file a formal, written amendment to the application on a form prescribed by the department.

(b) The director shall require the department staff assigned to underwrite applications to evaluate the amendment and provide an analysis and written recommendation to the board. The appropriate monitor under Section 2306.6719 shall also provide to the board an analysis and written recommendation regarding the amendment.

(c) The board must vote on whether to approve the amendment. The board by vote may reject an amendment and, if appropriate, rescind the allocation of housing tax credits and reallocate the credits to other applicants on the waiting list required by Section 2306.6711 if the board determines that the modification proposed in the amendment:

(1) would materially alter the development in a negative manner; or

(2) would have adversely affected the selection of the application in the application round.

(d) Material alteration of a development includes:

(1) a significant modification of the site plan;

(2) a modification of the number of units or bedroom mix of units;

(3) a substantive modification of the scope of tenant services;

(4) a reduction of three percent or more in the square footage of the units or common areas;

(5) a significant modification of the architectural design of the development;

(6) a modification of the residential density of the development of at least five percent; and

(7) any other modification considered significant by the board.

(e) In evaluating the amendment under this subsection, the department staff shall consider whether the need for the modification proposed in the amendment was:

(1) reasonably foreseeable by the applicant at the time the application was submitted; or

(2) preventable by the applicant.

(f) This section shall be administered in a manner that is consistent with Section 42, Internal Revenue Code of 1986 (26 U.S.C. Section 42).

Sec. 2306.6713. HOUSING TAX CREDIT AND OWNERSHIP TRANSFERS. (a) An applicant may not transfer an allocation of housing tax credits or ownership of a development supported with an allocation of housing tax credits to any person other than an affiliate unless the applicant obtains the director's prior, written approval of the transfer.

(b) The director may not unreasonably withhold approval of the transfer.

(c) An applicant seeking director approval of a transfer and the proposed transferee must provide to the department a copy of any applicable agreement between the parties to the transfer, including any third-party agreement with the department.

(d) On request, an applicant seeking director approval of a transfer must provide to the department:

(1) a list of the names of transferees and related parties; and

(2) detailed information describing the experience and financial capacity of transferees and related parties.

(e) The development owner shall certify to the director that the tenants in the development have been notified in writing of the transfer before the 30th day preceding the date of submission of the transfer request to the department.

(f) Not later than the fifth working day after the date the department receives all necessary information under this section, the department shall conduct a qualifications review of a transferee to determine:

(1) the transferee's past compliance with all aspects of the low income housing tax credit program, including land use restriction agreements; and

(2) the sufficiency of the transferee's experience with developments supported with housing tax credit allocations.

Sec. 2306.6714. AT-RISK DEVELOPMENT SET-ASIDE. (a) The department shall set aside for at-risk developments not less than 15 percent of the housing tax credits available for allocation in the calendar year.

(b) Any amount of housing tax credits set aside under this section that remains after the initial allocation of housing tax credits is available for allocation to any eligible applicant as provided by the qualified allocation plan.

Sec. 2306.6715. APPEAL. (a) In a form prescribed by the department in the qualified allocation plan, an applicant may appeal the following decisions made by the department in the application evaluation process provided by Section 2306.6710:

(1) a determination regarding the application's satisfaction of threshold and

underwriting criteria;

(2) the scoring of the application; and

(3) a recommendation as to the amount of housing tax credits to be allocated to the application.

(b) An applicant may not appeal a decision made under Section 2306.6710 regarding an application filed by another applicant.

(c) An applicant must file a written appeal authorized by this section with the department not later than the seventh day after the date the department publishes the results of the application evaluation process provided by Section 2306.6710. In the appeal, the applicant must specifically identify the applicant's grounds for appeal, based on the original application and additional documentation filed with the original application.

(d) The director shall respond in writing to the appeal not later than the 14th day after the date of receipt of the appeal. If the applicant is not satisfied with the director's response to the appeal, the applicant may appeal directly in writing to the board, provided that an appeal filed with the board under this subsection must be received by the board before:

(1) the seventh day preceding the date of the board meeting at which the relevant allocation decision is expected to be made; or

(2) the third day preceding the date of the board meeting described by Subdivision (1), if the director does not respond to the appeal before the date described by Subdivision (1).

(e) Board review of an appeal under Subsection (d) is based on the original application and additional documentation filed with the original application. The board may not review any information not contained in or filed with the original application. The decision of the board regarding the appeal is final.

Sec. 2306.6716. FEES. (a) A fee charged by the department for filing an application may not be excessive and must reflect the department's actual costs in processing the application, providing copies of documents to persons connected with the application process, and making appropriate information available to the public through the department's website.

(b) The department shall publish each year an updated schedule of application fees that specifies the amount to be charged at each stage of the application process.

(c) In accordance with the fee schedule, the department shall refund the balance of any fees collected for an application that is withdrawn by the applicant or that is not fully processed by the department. The department must provide the refund to the applicant not later than the 30th day after the date the last official action is taken with respect to the application.

(d) The department shall develop a sliding scale fee schedule for applications that encourages increased participation by community housing development organizations in the low income housing tax credit program.

Sec. 2306.6717. PUBLIC INFORMATION AND HEARINGS. (a) Subject to Section 2306.67041, the department shall make the following items available on the department's website:

(1) as soon as practicable, any proposed application submitted through the preapplication process established by this subchapter;

(2) before the 30th day preceding the date of the relevant board allocation decision, except as provided by Subdivision (3), the entire application, including all supporting documents and exhibits, the application log, a scoring sheet providing details of the application score, and any other document relating to the processing of the application;

(3) not later than the third working day after the date of the relevant determination, the results of each stage of the application process, including the results of the application scoring and underwriting phases and the allocation phase;

(4) before the 15th day preceding the date of board action on the amendment, notice of an amendment under Section 2306.6712 and the recommendation of the director and monitor regarding the amendment; and

(5) an appeal filed with the department or board under Section 2306.6715 or 2306.6721 and any other document relating to the processing of the appeal.

(b) The department shall make available on the department's website information regarding the low income housing tax credit program, including notice regarding public hearings, meetings, the opening and closing dates for applications, submitted applications, and applications approved for underwriting and recommended to the board, and shall provide that information to:

(1) locally affected community groups;

(2) local and state elected officials;

(3) local housing departments;

(4) any appropriate newspapers of general or limited circulation that serve the

community in which the development is to be located;

(5) nonprofit and for-profit organizations;

(6) on-site property managers of occupied developments that are the subject of applications for posting in prominent locations in those developments; and

(7) any other interested persons and community groups that request the information.

(c) The department shall hold at least three public hearings in different regions of the state to receive public comments on applications and on other issues relating to the low income housing tax credit program.

(d) Notwithstanding any other provision of this section, the department may treat the financial statements of any applicant as confidential and may elect not to disclose those statements to the public.

Sec. 2306.67171. ELECTRONIC MAIL NOTIFICATION SERVICE. (a) The department shall maintain an electronic mail notification service to which any person in this state may electronically subscribe to receive information concerning the status of pre-applications and applications under this subchapter.

(b) The electronic mail notification service maintained under Subsection (a) must:

(1) allow a subscriber to request for a zip code notification of:

(A) the filing of any pre-application or application concerning a development that is or will be located in the zip code;

(B) the posting of the board materials for board approval of a list of approved applications or the issuance of final allocation commitments for applications described by Paragraph (A); and

(C) any public hearing to be held concerning an application or pre-application described by Paragraph (A); and

(2) respond to a subscriber via electronic mail not later than the later of:

(A) the 14th day after the date the department receives notice of an event described by Subdivision (1); or

(B) if applicable, the date or dates specified by Section 2306.6717(a).

(c) The department may include in an electronic mail notification sent to a subscriber any applicable information described by Section 2306.6717.

Sec. 2306.6718. ELECTED OFFICIALS. (a) The department shall provide written notice of the filing of an application to the following elected officials:

(1) members of the legislature who represent the community containing the development described in the application; and

(2) the chief executive officer of the political subdivision containing the development described in the application.

(b) The department shall provide the elected officials with an opportunity to comment on the application during the application evaluation process provided by Section 2306.6710 and shall consider those comments in evaluating applications under that section.

(c) A member of the legislature who represents the community containing the development may hold a community meeting at which the department shall provide appropriate representation.

(d) If the department receives written notice from the mayor or county judge of an affected municipality or county opposing an application, the department must contact the mayor or county judge and offer to conduct a physical inspection of the development site and consult with the mayor or county judge before the application is scored.

Sec. 2306.6719. MONITORING OF COMPLIANCE. (a) The department may contract with an independent third party to monitor a development during its construction or rehabilitation and during its operation for compliance with:

(1) any conditions imposed by the department in connection with the allocation of housing tax credits to the development; and

(2) appropriate state and federal laws, as required by other state law or by the board.

(b) The department may assign department staff other than housing tax credit division staff to perform the relevant monitoring functions required by this section in the construction or rehabilitation phase of a development.

Added by Acts 2001, 77th Leg., ch. 1367, Sec. 8.01, eff. Sept. 1, 2001.

Sec. 2306.6720. ENFORCEABILITY OF APPLICANT REPRESENTATIONS. Each representation made by an applicant to secure a housing tax credit allocation is enforceable by the department and the tenants of the development supported with the allocation.

Sec. 2306.6721. DEBARMENT FROM PROGRAM PARTICIPATION. (a) The board by rule shall adopt a policy providing for the debarment of a person from participation in the low income housing tax credit program as described by this section.

(b) The department may debar a person from participation in the program on the basis of the person's past failure to comply with any condition imposed by the department in connection with the allocation of housing tax credits.

(c) The department shall debar a person from participation in the program if the person:

(1) materially violates any condition imposed by the department in connection with the allocation of housing tax credits;

(2) is debarred from participation in federal housing programs by the United States Department of Housing and Urban Development; or

(3) is in material noncompliance with or has repeatedly violated a land use restriction agreement regarding a development supported with a housing tax credit allocation.

(d) A person debarred by the department from participation in the program may appeal the person's debarment to the board.

Sec. 2306.6722. DEVELOPMENT ACCESSIBILITY. Any development supported with a housing tax credit allocation shall comply with the accessibility standards that are required under Section 504, Rehabilitation Act of 1973 (29 U.S.C. Section 794), and specified under 24 C.F.R. Part 8, Subpart C.

Sec. 2306.6723. COORDINATION WITH RURAL DEVELOPMENT AGENCY. (a) The department shall jointly administer with the rural development agency any set-aside for rural areas to:

(1) ensure the maximum use and optimum geographic distribution of housing tax credits in rural areas; and

(2) provide for information sharing, efficient procedures, and fulfillment of development compliance requirements in rural areas.

(b) The rural development agency shall assist in developing all threshold, scoring, and underwriting criteria applied to applications eligible for the rural area set-aside. The criteria must be approved by that agency.

(c) To ensure that the rural area set-aside receives a sufficient volume of eligible applications, the department shall fund and, with the rural development agency, shall jointly implement outreach, training, and rural area capacity building efforts as directed by the rural development agency.

(d) The department and the rural development agency shall jointly adjust the regional allocation of housing tax credits described by Section 2306.111 to offset the under-utilization and over-utilization of multifamily private activity bonds and other housing resources in the different regions of the state.

(e) From application fees collected under this subchapter, the department shall reimburse the rural development agency for any costs incurred by the agency in carrying out the functions required by this section.

Sec. 2306.6724. DEADLINES FOR ALLOCATION OF LOW INCOME HOUSING TAX CREDITS. (a) Not later than September 30 of each year, the department shall prepare and submit to the board for adoption the qualified allocation plan required by federal law for use by the department in setting criteria and priorities for the allocation of tax credits under the low income housing tax credit program.

(b) The board shall adopt and submit to the governor the qualified allocation plan not later than November 15.

(c) The governor shall approve, reject, or modify and approve the qualified allocation plan not later than December 1.

(d) An applicant for a low income housing tax credit to be issued a commitment during the initial allocation cycle in a calendar year must submit an application to the department not later than March 1.

(e) The board shall review the recommendations of department staff regarding applications and shall issue a list of approved applications each year in accordance with the qualified allocation plan not later than June 30.

(f) The board shall issue final commitments for allocations of housing tax credits each year in accordance with the qualified allocation plan not later than July 31.

Sec. 2306.6725. SCORING OF APPLICATIONS. (a) In allocating low income housing tax credits, the department shall score each application using a point system based on criteria adopted by the department that are consistent with the department's housing goals, including criteria addressing the ability of the proposed project to:

(1) provide quality social support services to residents;

(2) demonstrate community and neighborhood support as defined by the qualified allocation plan;

(3) consistent with sound underwriting practices and when economically feasible, serve individuals and families of extremely low income by leveraging private and state and federal resources, including federal HOPE VI grants received through the United States Department of Housing and Urban Development;

(4) serve traditionally underserved areas;

(5) remain affordable to qualified tenants for an extended, economically feasible period; and

(6) comply with the accessibility standards that are required under Section 504, Rehabilitation Act of 1973 (29 U.S.C. Section 794), and specified under 24 C.F.R. Part 8, Subpart C.

(b) The department shall provide appropriate incentives as determined through the qualified allocation plan to reward applicants who agree to:

(1) equip the property that is the basis of the application with energy saving devices that meet the standards established by the state energy conservation office or to provide to a qualified nonprofit organization or tenant organization a right of first refusal to purchase the property at the minimum price provided in, and in accordance with the requirements of, Section 42(i)(7), Internal Revenue Code of 1986 (26 U.S.C. Section 42(i)(7)); and

(2) locate the development in a census tract in which there are no other existing developments supported by housing tax credits.

(c) On awarding tax credit allocations, the board shall document the reasons for each project's selection, including an explanation of:

(1) all discretionary factors used in making its determination; and

(2) the reasons for any decision that conflicts with the recommendations of department staff under Section 2306.6731.

(d) For each scoring criterion, the department shall use a range of points to evaluate the degree to which a proposed project satisfies the criterion. The department may not award a number of points for a scoring criterion that is disproportionate to the degree to which a proposed project complies with that criterion.

Sec. 2306.6726. SALE OF CERTAIN LOW INCOME HOUSING TAX CREDIT PROPERTY. (a) Not later than two years before the expiration of the compliance period, a recipient of a low income housing tax credit who agreed to provide a right of first refusal under Section 2306.6725 and who intends to sell the property shall notify the department of the recipient's intent to sell. The recipient shall notify qualified nonprofit organizations and tenant organizations of the opportunity to purchase the property.

(b) The recipient may:

(1) during the first six-month period after notifying the department, negotiate or enter into a purchase agreement only with a qualified nonprofit organization that is also a community housing development organization as defined by the federal home investment partnership program;

(2) during the second six-month period after notifying the department, negotiate or enter into a purchase agreement with any qualified nonprofit organization or tenant organization; and

(3) during the year before the expiration of the compliance period, negotiate or enter into a purchase agreement with the department or any qualified nonprofit organization or tenant organization approved by the department.

(c) Notwithstanding an agreement under Section 2306.6725, a recipient of a low income housing tax credit may sell property to which the tax credit applies to any purchaser after the expiration of the compliance period if a qualified nonprofit organization or tenant organization does not offer to purchase the property at the minimum price provided by Section 42(i)(7), Internal Revenue Code of 1986 (26 U.S.C. Section 42(i)(7)), and the department declines to purchase the property.

(d) In this section, "compliance period" has the meaning assigned by Section 42(i)(1), Internal Revenue Code of 1986 (26 U.S.C. Section 42(i)(1)).

Sec. 2306.6727. DEPARTMENT PURCHASE OF LOW INCOME HOUSING TAX CREDIT PROPERTY. The board by rule may develop and implement a program to purchase low income housing tax credit property that is not purchased by a qualified nonprofit organization or tenant organization. The department may not purchase low income housing tax credit property if the board finds that the purchase is not in the best interest of the state.

Sec. 2306.6728. DEPARTMENT POLICY AND PROCEDURES REGARDING RECIPIENTS OF CERTAIN FEDERAL HOUSING ASSISTANCE. (a) The department by rule shall adopt a policy regarding the admittance to low income housing tax credit properties of income-eligible individuals and families receiving assistance under Section 8, United States Housing Act of 1937 (42 U.S.C. Section 1437f).

(b) The policy must provide a reasonable minimum income standard that is not otherwise prohibited by this chapter and that is to be used by owners of low income housing tax credit properties and must place reasonable limits on the use of any other factors that impede the admittance of individuals and families described by Subsection (a) to those properties, including credit histories, security deposits, and employment histories.

(c) The department by rule shall establish procedures to monitor low income housing tax credit properties that refuse to admit individuals and families described by Subsection (a). The department by rule shall establish enforcement mechanisms with respect to those properties, including a range of sanctions to be imposed against the owners of those properties.

Sec. 2306.6729. QUALIFIED NONPROFIT ORGANIZATION. (a) A qualified nonprofit organization may compete in any low income housing tax credit allocation pool, including:

(1) the nonprofit allocation pool;

(2) the rural projects/prison communities allocation pool; and

(3) the general projects allocation pool.

(b) A qualified nonprofit organization submitting an application under this subchapter must have a controlling interest in a project proposed to be financed with a low income housing tax credit from the nonprofit allocation pool.

Added by Acts 2001, 77th Leg., ch. 1367, Sec. 1.30, eff. Sept. 1, 2001.

Sec. 2306.6730. ACCESSIBILITY REQUIRED. A project to which a low income housing tax credit is allocated under this subchapter shall comply with the accessibility standards that are required under Section 504, Rehabilitation Act of 1973 (29 U.S.C. Section 794), as amended, and specified under 24 C.F.R. Part 8, Subpart C.

Sec. 2306.6731. ALLOCATION DECISION; REEVALUATION. (a) Department staff shall provide written, documented recommendations to the board concerning the financial or programmatic viability of each application for a low income housing tax credit before the board makes a decision relating to the allocation of tax credits. The board may not make without good cause an allocation decision that conflicts with the recommendations of department staff.

(b) Regardless of project stage, the board must reevaluate a project that undergoes a substantial change between the time of initial board approval of the project and the time of issuance of a tax credit commitment for the project. The board may revoke any tax credit commitment issued for a project that has been unfavorably reevaluated by the board under this subsection.

Sec. 2306.6733. REPRESENTATION BY FORMER BOARD MEMBER OR OTHER PERSON. (a) A former board member or a former director, deputy director, director of housing programs, director of compliance, director of underwriting, or low income housing tax credit program manager employed by the department may not:

(1) for compensation, represent an applicant for an allocation of low income housing tax credits or a related party before the second anniversary of the date that the board member's, director's, or manager's service in office or employment with the department ceases;

(2) represent any applicant or related party or receive compensation for services rendered on behalf of any applicant or related party regarding the consideration of a housing tax credit application in which the former board member, director, or manager participated during the period of service in office or employment with the department, either through personal involvement or because the matter was within the scope of the board member's, director's, or manager's official responsibility; or

(3) for compensation, communicate directly with a member of the legislative branch to influence legislation on behalf of an applicant or related party before the second anniversary of the date that the board member's, director's, or manager's service in office or employment with the department ceases.

(b) A person commits an offense if the person violates this section. An offense under this section is a Class A misdemeanor.

Sec. 2306.6734. MINORITY-OWNED BUSINESSES. (a) The department shall require a person who receives an allocation of housing tax credits to attempt to ensure that at least 30 percent of the construction and management businesses with which the person contracts in connection with the development are minority-owned businesses.

(b) A person who receives an allocation of housing tax credits must report to the department not less than once in each 90-day period following the date of allocation regarding the percentage of businesses with which the person has contracted that qualify as minority-owned businesses.

(c) In this section:

(1) "Minority-owned business" means a business entity at least 51 percent of which is owned by members of a minority group or, in the case of a corporation, at least 51 percent of the shares of which are owned by members of a minority group, and that is managed and controlled by members of a minority group in its daily operations.

(2) "Minority group" includes:

(A) women;

(B) African Americans;

(C) American Indians;

(D) Asian Americans; and

(E) Mexican Americans and other Americans of Hispanic origin.

Sec. 2306.6735. REQUIRED LEASE AGREEMENT PROVISIONS. A lease agreement with a tenant in a development supported with a housing tax credit allocation must:

(1) include any applicable federal or state standards identified by department rule that relate to the termination or nonrenewal of the lease agreement; and

(2) be consistent with state and federal law.

Sec. 2306.6736. PROHIBITED PRACTICES. (a) Notwithstanding any other law, a development owner of a development supported with a housing tax credit allocation may not:

(1) lock out or threaten to lock out any person residing in the development except by judicial process unless the exclusion results from:

(A) a necessity to perform bona fide repairs or construction work; or

(B) an emergency; or

(2) seize or threaten to seize the personal property of any person residing in the development except by judicial process unless the resident has abandoned the premises.

(b) Each development owner shall:

(1) include a conspicuous provision in the lease agreement prohibiting the owner

(2) remove in the manner specified by department rule any provisions in the lease agreement that are contrary to Subsection (a).

Sec. 2306.6736. LOW INCOME HOUSING TAX CREDITS FINANCED UNDER AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009. (a) To the extent the department receives federal funds under the American Recovery and Reinvestment Act of 2009 (Pub. L. No. 111-5) or any subsequent law (including any extension or renewal thereof) that requires the department to award the federal funds in the same manner and subject to the same limitations as awards of housing tax credits, the following provisions shall apply.

(b) Any reference in this chapter to the administration of the housing tax credit program shall apply equally to the administration of such federal funds, except:

(1) the department may establish a separate application procedure for such funds, outside of the uniform application cycle referred to in Section 2306.1111 and the deadlines established in Section 2306.6724, and any reference herein to the application period shall refer to the period beginning on the date the department begins accepting applications for such funds and continuing until all such available funds are awarded;

(2) unless reauthorized, this section is repealed on August 31, 2011.

Sec. 2306.6737. ASSISTANCE FROM AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009. If allowed by federal law, the department shall, under any federally funded program resulting from the American Recovery and Reinvestment Act of 2009 (Pub. L. No. 111-5), secure the interests of the state through bonds, an ownership interest in property, restrictive covenants filed in the real property records, and/or liens filed on a property for which the applicant has accepted funds until such a time as the department and the State of Texas do not have liability to repay or recapture such funds.

SUBCHAPTER FF. OWNER-BUILDER LOAN PROGRAM

Sec. 2306.751. DEFINITION. In this subchapter, "owner-builder" means a person, other than a person who owns or operates a construction business:

(1) who:

(A) owns or purchases a piece of real property through a warranty deed or a warranty deed and deed of trust; or

(B) is purchasing a piece of real property under a contract for deed entered into before January 1, 1999; and

(2) who undertakes to make improvements to that property.

Sec. 2306.752. OWNER-BUILDER LOAN PROGRAM. (a) To provide for the development of affordable housing in this state, the department, through the colonia self-help centers established under Subchapter Z or a nonprofit organization certified by the department as a nonprofit owner-builder housing program, shall make loans for owner-builders to enable them to:

(1) purchase or refinance real property on which to build new residential housing;

(2) build new residential housing; or

(3) improve existing residential housing.

(b) The department may adopt rules necessary to accomplish the purposes of this subchapter.

Sec. 2306.753. OWNER-BUILDER ELIGIBILITY. (a) Subject to this section, the department shall establish eligibility requirements for an owner-builder to receive a loan under this subchapter. The eligibility requirements must establish a priority for loans made under this subchapter to owner-builders with an annual income, as determined under Subsection (b)(1), of less than $17,500.

(b) To be eligible for a loan under this subchapter, an owner-builder:

(1) may not have an annual income that exceeds 60 percent, as determined by the

department, of the greater of the state or local median family income, when combined with the income of any person who resides with the owner-builder;

(2) must have resided in this state for the preceding six months;

(3) must have successfully completed an owner-builder education class under Section 2306.756; and

(4) must agree to:

(A) provide through personal labor at least 65 percent of the labor necessary to build or rehabilitate the proposed housing by working through a state-certified owner-builder housing program;

(B) provide an amount of personal labor equivalent to the amount required under Paragraph (A) in connection with building or rehabilitating housing for others through a state-certified owner-builder housing program;

(C) provide through the noncontract labor of friends, family, or volunteers and through personal labor at least 65 percent of the labor necessary to build or rehabilitate the proposed housing by working through a state-certified owner-builder housing program; or

(D) if due to documented disability or other limiting circumstances as defined by department rule the owner-builder cannot provide the amount of personal labor otherwise required by this subdivision, provide through the noncontract labor of friends, family, or volunteers at least 65 percent of the labor necessary to build or rehabilitate the proposed housing by working through a state-certified owner-builder housing program.

(c) The department may select nonprofit owner-builder housing programs to certify the eligibility of owner-builders to receive a loan under this subchapter. A nonprofit housing assistance organization selected by the department shall use the eligibility requirements established by the department to certify the eligibility of an owner-builder for the program.

(d) At least two-thirds of the dollar amount of loans made under this subchapter in each fiscal year must be made to borrowers whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code.

Sec. 2306.754. AMOUNT OF LOAN; LOAN TERMS. (a) The department may establish the minimum amount of a loan under this subchapter, but a loan made by the department may not exceed $45,000.

(b) If it is not possible for an owner-builder to purchase necessary real property and build or rehabilitate adequate housing for $45,000, the owner-builder must obtain the amount necessary that exceeds $45,000 from other sources of funds. The total amount of amortized, repayable loans made by the department and other entities to an owner-builder under this subchapter may not exceed $90,000.

(c) A loan made by the department under this subchapter:

(1) may not exceed a term of 30 years;

(2) may bear interest at a fixed rate of not more than three percent or bear interest in the following manner:

(A) no interest for the first two years of the loan;

(B) beginning with the second anniversary of the date the loan was made, interest at the rate of one percent a year;

(C) beginning on the third anniversary of the date the loan was made and ending on the sixth anniversary of the date the loan was made, interest at a rate that is one percent greater than the rate borne in the preceding year; and

(D) beginning on the sixth anniversary of the date the loan was made and continuing through the remainder of the loan term, interest at the rate of five percent; and

(3) shall be secured by:

(A) a first lien by the department on the real property if the loan is the largest amortized, repayable loan secured by the real property; or

(B) a co-first lien or subordinate lien as determined by department rule, if the loan is not the largest loan as described by Paragraph (A).

(d) If an owner-builder is purchasing real property under a contract for deed, the department may not disburse any portion of a loan made under this subchapter until the owner-builder:

(1) fully completes the owner-builder's obligation under the contract and receives a deed to the property; or

(2) refinances the owner-builder's obligation under the contract and converts the obligation to a note secured by a deed of trust.

Sec. 2306.755. NONPROFIT OWNER-BUILDER HOUSING PROGRAMS. (a) The department may certify nonprofit owner-builder housing programs operated by a tax-exempt organization listed under Section 501(c)(3), Internal Revenue Code of 1986, to:

(1) qualify potential owner-builders for loans under this subchapter;

(2) provide owner-builder education classes under Section 2306.756;

(3) assist owner-builders in building or rehabilitating housing; and

(4) originate or service loans made under this subchapter.

(b) The department by rule shall adopt procedures for the certification of nonprofit owner-builder housing programs under this section.

Sec. 2306.756. OWNER-BUILDER EDUCATION CLASSES. (a) A state-certified nonprofit owner-builder housing program shall offer owner-builder education classes to potential owner-builders. A class under this section must provide information on:

(1) the financial responsibilities of an owner-builder under this subchapter, including the consequences of an owner-builder's failure to meet those responsibilities;

(2) the building or rehabilitation of housing by owner-builders;

(3) resources for low-cost building materials available to owner-builders; and

(4) resources for building or rehabilitation assistance available to owner-builders.

(b) A nonprofit owner-builder housing program may charge a potential owner-builder who enrolls in a class under this section a reasonable fee not to exceed $50 to offset the program's costs in providing the class.

Sec. 2306.757. LOAN PRIORITY FOR WAIVER OF LOCAL GOVERNMENT FEES. In making loans under this subchapter, the department shall give priority to loans to owner-builders who will reside in counties or municipalities that agree in writing to waive capital recovery fees, building permit fees, inspection fees, or other fees related to the building or rehabilitation of the housing to be built or improved with the loan proceeds.

Sec. 2306.758. FUNDING. (a) The department shall solicit gifts and grants to make loans under this subchapter.

(b) The department may also make loans under this subchapter from:

(1) available funds in the housing trust fund established under Section 2306.201;

(2) federal block grants that may be used for the purposes of this subchapter; and

(3) the owner-builder revolving loan fund established under Section 2306.7581.

(c) In a state fiscal year, the department may use not more than 10 percent of the revenue available for purposes of this subchapter to enhance the ability of tax-exempt organizations described by Section 2306.755(a) to implement the purposes of this chapter and to enhance the number of such organizations that are able to implement those purposes. The department shall use that available revenue to provide financial assistance, technical training, and management support for the purposes of this subsection.

Sec. 2306.7581. OWNER-BUILDER REVOLVING LOAN FUND. (a) The department shall establish an owner-builder revolving loan fund in the department for the sole purpose of funding loans under this subchapter.

(a-1) Each state fiscal year the department shall transfer at least $3 million to the owner-builder revolving fund from money received under the federal HOME Investment Partnerships program established under Title II of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.), from money in the housing trust fund, or from money appropriated by the legislature to the department. This subsection expires August 31, 2020.

(b) The department shall deposit money received in repayment of a loan under this subchapter to the owner-builder revolving loan fund.

Sec. 2306.759. REPORTING DUTIES. The department shall:

(1) prepare a report that evaluates the repayment history of owner-builders who receive loans under this subchapter, including for each owner-builder:

(A) the owner-builder's income;

(B) the date on which the owner-builder completed building or improving the residential housing for which the loan was made;

(C) the county in which the residential housing is located;

(D) the identity of the owner-builder housing program through which the housing was constructed; and

(E) a description of the type of construction or improvement made; and

(2) deliver a copy of the report to the governor, the lieutenant governor, and the speaker of the house of representatives not later than November 15, 2000.

SUBCHAPTER GG. COLONIA MODEL SUBDIVISION PROGRAM

Sec. 2306.781. DEFINITION. In this subchapter, "program" means the colonia model subdivision program established under this subchapter.

Sec. 2306.782. ESTABLISHMENT OF PROGRAM. The department shall establish the colonia model subdivision program to promote the development of new, high-quality, residential subdivisions that provide:

(1) alternatives to substandard colonias; and

(2) housing options affordable to individuals and families of extremely low and very low income who would otherwise move into substandard colonias.

Sec. 2306.783. COLONIA MODEL SUBDIVISION REVOLVING LOAN FUND. (a) The department shall establish a colonia model subdivision revolving loan fund in the department. Money in the fund may be used only for purposes of the program.

(a-1) The department may transfer money into the colonia model subdivision revolving fund using any available source of revenue.

(a-2) On application, the department may provide a loan under this subchapter through an eligible political subdivision using money from the portion of community development block grant that is set aside under federal law to provide financial assistance to colonias. In a state fiscal year, the department may not provide loans under this subchapter using more than $2 million from the set-aside for colonias.

(a-3) Subsections (a-1) and (a-2) and this subsection expire August 31, 2010.

(b) The department shall deposit money received in repayment of loans under this subchapter to the colonia model subdivision revolving loan fund.

Added by Acts 2001, 77th Leg., ch. 1367, Sec. 2.13, eff. Sept. 1, 2001.

Sec. 2306.784. SUBDIVISION COMPLIANCE. Any subdivision created with assistance from the colonia model subdivision revolving loan fund must fully comply with all state and local laws, including any process established under state or local law for subdividing real property.

Sec. 2306.785. PROGRAM LOANS. (a) The department may make loans under the program only to:

(1) colonia self-help centers established under Subchapter Z; and

(2) community housing development organizations certified by the department.

(b) A loan made under the program may be used only for the payment of:

(1) costs associated with the purchase of real property;

(2) costs of surveying, platting, and subdividing or resubdividing real property;

(3) fees, insurance costs, or recording costs associated with the development of the subdivision;

(4) costs of providing proper infrastructure necessary to support residential uses;

(5) real estate commissions and marketing fees; and

(6) any other costs as the department by rule determines to be reasonable and prudent to advance the purposes of this subchapter.

(c) A loan made by the department under the program may not bear interest and may not exceed a term of 36 months.

(d) The department may offer a borrower under the program one loan renewal for each subdivision.

Sec. 2306.786. ADMINISTRATION OF PROGRAM; RULES. (a) In administering the program, the department by rule shall adopt:

(1) any subdivision standards in excess of local standards the department considers necessary;

(2) loan application procedures;

(3) program guidelines; and

(4) contract award procedures.

(b) The department shall adopt rules to:

(1) ensure that a borrower under the program sells real property under the program only to an individual borrower, nonprofit housing developer, or for-profit housing developer for the purposes of constructing residential dwelling units; and

(2) require a borrower under the program to convey real property under the program at a cost that is affordable to:

(A) individuals and families of extremely low income; or

(B) individuals and families of very low income.

SUBCHAPTER HH. AFFORDABLE HOUSING PRESERVATION

Sec. 2306.801. DEFINITION. In this subchapter, "federally subsidized" means receiving financial assistance through a federal program administered by the Secretary of Housing and Urban Development or the Secretary of Agriculture under which housing assistance is provided on the basis of income, including a program under:

(1) Section 221(d), National Housing Act (12 U.S.C. Section 1715l(d));

(2) Section 236, National Housing Act (12 U.S.C. Section 1715z-1);

(3) Section 202, Housing Act of 1959 (12 U.S.C. Section 1701q);

(4) Section 101, Housing and Urban Development Act of 1965 (12 U.S.C. Section 1701s);

(5) Section 514, 515, or 516, Housing Act of 1949 (42 U.S.C. Section 1484, 1485, or 1486); or

(6) Section 8, United States Housing Act of 1937 (42 U.S.C. Section 1437f).

Sec. 2306.802. MULTIFAMILY HOUSING PRESERVATION CLASSES. The department shall establish two classes of priorities of developments to preserve multifamily housing. The classes, in order of descending priority, are:

(1) Class A, which includes any federally subsidized multifamily housing development at risk because the contract granting a federal subsidy with a stipulation to maintain affordability is nearing expiration or because the government-insured mortgage on the property is eligible for prepayment or near the end of its mortgage term; and

(2) Class B, which includes any other multifamily housing development with low income use or rental affordability restrictions.

Sec. 2306.803. AT-RISK MULTIFAMILY HOUSING: IDENTIFICATION, PRIORITIZATION, AND PRESERVATION. (a) The department shall determine the name and location of and the number of units in each multifamily housing development that is at risk of losing its low income use restrictions and subsidies and that meets the requirements of a Class A priority described by Section 2306.802.

(b) The department shall maintain an accurate list of those developments on the department's website.

(c) The department shall develop cost estimates for the preservation and rehabilitation of the developments in priority Class A.

(d) The department shall contact owners of developments assigned a Class A priority under this section and shall attempt to negotiate with those owners to ensure continued affordability for individuals and families of low income under the federal housing assistance program for those developments.

Sec. 2306.804. USE OF HOUSING PRESERVATION RESOURCES. (a) To the extent possible, the department shall use available resources for the preservation and rehabilitation of the multifamily housing developments identified and listed under Section 2306.803.

(b) To the extent possible, the department shall allocate low income housing tax credits to applications involving the preservation of developments assigned a Class A priority under Section 2306.803 and in both urban and rural communities in approximate proportion to the housing needs of each uniform state service region.

(c) The department shall give priority to providing financing or funding to a buyer who is supported or approved by an association of residents of the multifamily housing development.

Sec. 2306.805. HOUSING PRESERVATION INCENTIVES PROGRAM. (a) The department shall establish and administer a housing preservation incentives program to provide incentives through loan guarantees, loans, and grants to political subdivisions, housing finance corporations, public housing authorities, for-profit organizations, and nonprofit organizations for the acquisition and rehabilitation of multifamily housing developments assigned a Class A or Class B priority under Section 2306.803.

(b) A loan issued by a lender participating in the program must be fully underwritten by the department.

(c) Consistent with the requirements of federal law, the department may guarantee loans issued under the program by obtaining a Section 108 loan guarantee from the United States Department of Housing and Urban Development under the Housing and Community Development Act of 1974 (42 U.S.C. Section 5308).

(d) Grants under this program may include direct subsidies offered as an equity contribution to enable an owner to acquire and rehabilitate a Class A or Class B priority property described by Section 2306.802. Grants may also be offered to provide consultation and technical assistance services to a nonprofit organization seeking to acquire and rehabilitate a Class A or Class B priority property.

(e) A housing development that benefits from the incentive program under this section is subject to the requirements concerning:

(1) long-term affordability and safety prescribed by Section 2306.185; and

(2) tenant and manager selection prescribed by Section 2306.269.

SUBCHAPTER II. MULTIFAMILY HOUSING DEVELOPMENTS: PRESERVATION OF AFFORDABILITY

Sec. 2306.851. APPLICATION. (a) This subchapter applies only to a property owner of a multifamily housing development that is insured or assisted under a program under Section 8, United States Housing Act of 1937 (42 U.S.C. Section 1437f), or that is:

(1) insured or assisted under a program under:

(A) Section 221(d)(3), National Housing Act (12 U.S.C. Section 1715l);

(B) Section 236, National Housing Act (12 U.S.C. Section 1715z-1); or

(C) Section 514, 515, or 516, Housing Act of 1949 (42 U.S.C. Section 1484, 1485, or 1486); and

(2) financed by a mortgage that is eligible for prepayment at the option of the property owner.

(b) This subchapter does not apply to the disposal of property because of:

(1) a governmental taking by eminent domain or negotiated purchase;

(2) a foreclosure action;

(3) a transfer by gift, devise, or operation of law; or

(4) a sale to a person who would be entitled to an interest in the property if the property owner died intestate.

(c) This subchapter does not apply to property included in a restructuring program with a participating administrative entity designated by the United States Department of Housing and Urban Development.

Sec. 2306.852. PROPERTY OWNER RESTRICTION. Except as provided by this subchapter, a property owner to whom this subchapter applies may not sell, lease, or otherwise dispose of a multifamily housing development described by Section 2306.851(a) or take any other action if that action will cause the disruption or discontinuance of:

(1) the development's federal insurance or assistance; or

(2) the provision of low income housing assistance to residents of the development.

Sec. 2306.853. NOTICE OF INTENT. (a) A property owner of a multifamily housing development may take an action, sell, lease, or otherwise dispose of the development subject to the restriction under Section 2306.852 if the property owner provides notice by mail of the owner's intent to the residents of the development and to the department.

(b) The notice required by Subsection (a) must indicate, as applicable, that the property owner intends to prepay a mortgage under a program described by Section 2306.851(a)(1) or that a contract formed under a program under Section 8, United States Housing Act of 1937 (42 U.S.C. Section 1437f), will expire.

(c) The property owner shall provide the notice required by Subsection (a) before the 90th day preceding the date of mortgage prepayment or contract expiration, as applicable, and as otherwise required by federal law.

(d) The notice required by this section is sufficient if the notice meets the requirements of Section 8(c)(8), United States Housing Act of 1937 (42 U.S.C. Section 1437f(c)(8)).

SUBCHAPTER KK. INTERAGENCY COUNCIL FOR THE HOMELESS

Sec. 2306.901. DEFINITION. In this subchapter, "council" means the Texas Interagency Council for the Homeless.

Sec. 2306.902. ADVISORY ROLE. (a) The Texas Interagency Council for the Homeless serves as an advisory committee to the department. The council may recommend policies to the board. The board must provide written justification for not accepting council recommendations and must consider council recommendations in preparing its low income housing plan under

Section 2306.0721.

(b) The council is not subject to Chapter 2110.

Sec. 2306.903. MEMBERSHIP. (a) The Texas Interagency Council for the Homeless is composed of:

(1) one representative from each of the following agencies, appointed by the administrative head of that agency:

(A) the Texas Department of Health;

(B) the Texas Department of Human Services;

(C) the Texas Department of Mental Health and Mental Retardation;

(D) the Texas Department of Criminal Justice;

(E) the Texas Department on Aging;

(F) the Texas Rehabilitation Commission;

(G) the Texas Education Agency;

(H) the Texas Commission on Alcohol and Drug Abuse;

(I) the Department of Protective and Regulatory Services;

(J) the Health and Human Services Commission;

(K) the Texas Workforce Commission;

(L) the Texas Youth Commission; and

(M) the Texas Veterans Commission;

(2) two representatives from the department, one each from the community affairs division and the housing finance division, appointed by the director; and

(3) three members representing service providers to the homeless, one each appointed by the governor, the lieutenant governor, and the speaker of the house of representatives.

(b) A member of the council serves at the pleasure of the appointing official or until termination of the member's employment with the entity the member represents.

(c) A member of the council must have:

(1) administrative responsibility for programs for the homeless or related services provided by the agency that the member represents; and

(2) authority to make decisions for and commit resources of the agency, subject to the approval of the administrative head of the agency.

Sec. 2306.904. OPERATION OF COUNCIL. (a) The members of the council shall annually elect one member to serve as presiding officer.

(b) The council shall meet at least quarterly.

(c) An action taken by the council must be approved by a majority vote of the members present.

(d) The council may select and use advisors.

(e) The department shall provide clerical and advisory support staff to the council.

Sec. 2306.905. DUTIES OF COUNCIL. The council shall:

(1) survey current resources for services for the homeless in this state;

(2) initiate an evaluation of the current and future needs for the services;

(3) assist in coordinating and providing statewide services for all homeless individuals in this state;

(4) increase the flow of information among separate providers and appropriate authorities;

(5) develop guidelines to monitor the provision of services for the homeless and the methods of delivering those services;

(6) provide technical assistance to the housing finance division of the department in assessing the need for housing for individuals with special needs in different localities;

(7) coordinate with the Texas Workforce Commission, local workforce development boards, homeless shelters, and public and private entities to provide homeless individuals information on services available to assist them in obtaining employment and job training;

(8) establish a central resource and information center for the homeless in this state; and

(9) ensure that local or statewide nonprofit organizations perform the duties under this section that the council is unable to perform.

Sec. 2306.906. DUTIES OF STATE AGENCY COUNCIL MEMBERS. (a) Each agency represented on the council shall report to the department a standard set of performance data, as determined by the department, on the agency's outcomes related to homelessness.

(b) Each agency shall contribute resources to the council.

Sec. 2306.907. PUBLIC HEARINGS. (a) The council may hold, throughout the state, public hearings on homelessness issues.

(b) The department shall provide to the secretary of state for publication in the Texas Register a notice of the hearings and shall provide for the notice to be given in other appropriate sources, which may include:

(1) a newsletter published by a nonprofit organization addressing the problem of homelessness; or

(2) a local newspaper.

Sec. 2306.908. REPORT. The council shall submit annually a progress report to the governing bodies of the agencies represented on the council.

Sec. 2306.909. GIFTS AND GRANTS. The council may accept gifts and grants from a public or private source for use in carrying out the council's duties under this subchapter.

SUBCHAPTER LL. MIGRANT LABOR HOUSING FACILITIES

Sec. 2306.921. DEFINITIONS. In this subchapter:

(1) "Facility" means a structure, trailer, or vehicle, or two or more contiguous or grouped structures, trailers, or vehicles, together with the land appurtenant.

(2) "Migrant agricultural worker" means an individual who:

(A) is working or available for work seasonally or temporarily in primarily an agricultural or agriculturally related industry; and

(B) moves one or more times from one place to another to perform seasonal or temporary employment or to be available for seasonal or temporary employment.

(3) "Migrant labor housing facility" means a facility that is established, operated, or used for more than three days as living quarters for two or more seasonal, temporary, or migrant families or three or more seasonal, temporary, or migrant workers, whether rent is paid or reserved in connection with the use of the facility.

(4) "Person" means an individual, association, partnership, corporation, or political

subdivision.

Sec. 2306.922. LICENSE REQUIRED. A person may not establish, maintain, or operate a migrant labor housing facility without obtaining a license from the department.

Sec. 2306.923. LICENSE APPLICATION; APPLICATION INSPECTION. (a) To receive a migrant labor housing facility license, a person must apply to the department according to rules adopted by the board and on a form prescribed by the board.

(b) The application must be made not later than the 45th day before the intended date of operation of the facility.

(c) The application must state:

(1) the location and ownership of the migrant labor housing facility;

(2) the approximate number of persons to be accommodated;

(3) the probable periods of use of the facility; and

(4) any other information required by the board.

(d) The application must be accompanied by the license fee.

Sec. 2306.924. INSPECTION. The department shall inspect the migrant labor housing facility not later than the 30th day after the date of receipt of a complete application and the fee.

Sec. 2306.925. FAILURE TO MEET STANDARDS; REINSPECTION. (a) If a migrant labor housing facility for which a license application is made does not meet the reasonable minimum standards of construction, sanitation, equipment, and operation required by rules adopted under this subchapter, the department at the time of inspection shall give the license applicant the reasons that the facility does not meet those standards. The applicant may request the department to reinspect the facility not later than the 60th day after the date on which the reasons are given.

(b) If a facility does not meet the standards on reinspection, the applicant must submit a new license application as provided by Section 2306.923.

Sec. 2306.926. LICENSE ISSUANCE; TERM; NOT TRANSFERABLE. (a) The department shall issue a license to establish, maintain, and operate a migrant labor housing facility if the facility meets the standards of construction, sanitation, equipment, and operation required by rules adopted under this subchapter.

(b) The license expires on the first anniversary of the date of issuance.

(c) The license issued under this subchapter is not transferable.

Sec. 2306.927. LICENSE POSTING. A person who holds a license issued under this subchapter shall post the license in the migrant labor housing facility at all times during the maintenance or operation of the facility.

Sec. 2306.928. INSPECTION OF FACILITIES. An authorized representative of the department, after giving or making a reasonable attempt to give notice to the operator of a migrant labor housing facility, may enter and inspect the facility during reasonable hours and investigate conditions, practices, or other matters as necessary or appropriate to determine whether a person has violated this subchapter or a rule adopted under this subchapter.

Sec. 2306.929. FEE. The board shall set the license fee in an amount not to exceed $250.

Sec. 2306.930. SUSPENSION OR REVOCATION OF LICENSE. (a) The department may suspend or revoke a license for a violation of this subchapter or a rule adopted under this subchapter.

(b) Chapter 2001 and department rules for holding a contested case hearing govern the procedures for the suspension or revocation of a license issued under this subchapter.

(c) A hearing conducted under this section must be held in the county in which the affected migrant labor housing facility is located.

Sec. 2306.931. ENFORCEMENT; ADOPTION OF RULES. (a) The department shall enforce this subchapter.

(b) The board shall adopt rules to protect the health and safety of persons living in migrant labor housing facilities.

(c) The board by rule shall adopt standards for living quarters at a migrant labor housing facility, including standards relating to:

(1) construction of the facility;

(2) sanitary conditions;

(3) water supply;

(4) toilets;

(5) sewage disposal;

(6) storage, collection, and disposal of refuse;

(7) light and air;

(8) safety requirements;

(9) fire protection;

(10) equipment;

(11) maintenance and operation of the facility; and

(12) any other matter appropriate or necessary for the protection of the health and safety of the occupants.

(d) An employee or occupant of a migrant labor housing facility who uses the sanitary or other facilities furnished for the convenience of employees or occupants shall comply with the rules adopted under Subsection (b) or (c).

(e) The board by rule shall adopt minimum standards for issuing, revoking, or suspending a license issued under this subchapter.

Sec. 2306.932. INJUNCTIVE RELIEF. (a) A district court for good cause shown in a hearing and on application by the department, a migrant agricultural worker, or the worker's representative may grant a temporary or permanent injunction to prohibit a person, including a person who owns or controls a migrant labor housing facility, from violating this subchapter or a rule adopted under this subchapter.

(b) A person subject to a temporary or permanent injunction under Subsection (a) may appeal to the supreme court as in other cases.

Sec. 2306.933. CIVIL PENALTY. (a) A person who violates this subchapter or a rule adopted under this subchapter is subject to a civil penalty of $200 for each day that the violation occurs.

(b) The county attorney for the county in which the violation occurred, or the attorney general, at the request of the department, shall bring an action in the name of the state to collect the penalty.

SUBCHAPTER MM. TEXAS FIRST-TIME HOMEBUYER PROGRAM

Sec. 2306.1071. DEFINITIONS. In this subchapter:

Text of subdivision as added by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 2

(1) "First-time homebuyer" means a person who has not owned a home during the three years preceding the date on which an application under this subchapter is filed.

Text of subdivision as added by Acts 2007, 80th Leg., R.S., Ch. 1029, Sec. 1

(1) "First-time homebuyer" means a person who:

(A) resides in this state on the date on which an application is filed; and

(B) has not owned a home during the three years preceding the date on which an application under this subchapter is filed.

(2) "Home" means a dwelling in this state in which a first-time homebuyer intends to reside as the homebuyer's principal residence.

(3) "Mortgage lender" has the meaning assigned by Section 2306.004.

(4) "Program" means the Texas First-Time Homebuyer Program.

Sec. 2306.1072. TEXAS FIRST-TIME HOMEBUYER PROGRAM. (a) The Texas First-Time Homebuyer Program shall facilitate the origination of single-family mortgage loans for eligible first-time homebuyers.

(b) The program may include down payment and closing cost assistance.

Sec. 2306.1073. ADMINISTRATION OF PROGRAM; RULES. (a) The department shall administer the program.

(b) The board shall adopt rules governing:

(1) the administration of the program;

(2) the making of loans under the program;

(3) the criteria for approving participating mortgage lenders;

(4) the use of insurance on the loans and the homes financed under the program, as considered appropriate by the board to provide additional security for the loans;

(5) the verification of occupancy of the home by the homebuyer as the homebuyer's principal residence; and

(6) the terms of any contract made with any mortgage lender for processing, originating, servicing, or administering the loans.

Sec. 2306.1074. ELIGIBILITY. (a) To be eligible for a mortgage loan under this subchapter, a homebuyer must:

(1) qualify as a first-time homebuyer under this subchapter;

(2) have an income of not more than 115 percent of area median family income or 140 percent of area median family income in targeted areas; and

(3) meet any additional requirements or limitations prescribed by the department.

(b) To be eligible for a loan under this subchapter to assist a homebuyer with down payment and closing costs, a homebuyer must:

(1) qualify as a first-time homebuyer under this subchapter;

(2) have an income of not more than 80 percent of area median family income; and

(3) meet any additional requirements or limitations prescribed by the department.

(c) The department may contract with other agencies of the state or with private entities to determine whether applicants qualify as first-time homebuyers under this section or otherwise to administer all or part of this section.

Sec. 2306.1075. FEES. The board of directors of the department may set and collect from each applicant any fees the board considers reasonable and necessary to cover the expenses of administering the program.

Sec. 2306.1076. FUNDING. (a) The department shall ensure that a loan under this section is structured in a way that complies with any requirements associated with the source of the funds used for the loan.

Text of subdivision as added by Acts 2007, 80th Leg., R.S., Ch. 1341, Sec. 2

(b) In addition to funds set aside for the program under Section 1372.023, the department may solicit and accept gifts and grants for the purposes of this section.

Text of subsection as added by Acts 2007, 80th Leg., R.S., Ch. 1029, Sec. 1

(b) In addition to funds set aside for the program under Section 1372.023, the department may solicit and accept funding for the program from gifts and grants for the purposes of this section.

SUBCHAPTER NN. HOUSING AND HEALTH SERVICES COORDINATION COUNCIL

Sec. 2306.1091. DEFINITIONS. (a) In this subchapter, "council" means the housing and health services coordination council.

(b) With the advice and assistance of the council, the department by rule shall define "service-enriched housing" for the purposes of this subchapter.

Sec. 2306.1092. COMPOSITION. (a) The department shall establish a housing and health services coordination council.

(b) The council is composed of 16 members consisting of:

(1) the director;

(2) one representative from each of the following agencies, appointed by the head of that agency:

(A) the Office of Rural Community Affairs;

(B) the Texas State Affordable Housing Corporation;

(C) the Health and Human Services Commission;

(D) the Department of Assistive and Rehabilitative Services;

(E) the Department of Aging and Disability Services; and

(F) the Department of State Health Services;

(3) one representative from the Department of Agriculture who is:

(A) knowledgeable about the Texans Feeding Texans and Retire in Texas programs or similar programs; and

(B) appointed by the head of that agency;

(4) one member who is:

(A) a member of the Health and Human Services Commission Promoting Independence Advisory Committee; and

(B) appointed by the governor; and

(5) one representative from each of the following interest groups, appointed by the governor:

(A) financial institutions;

(B) multifamily housing developers;

(C) health services entities;

(D) nonprofit organizations that advocate for affordable housing and consumer-directed long-term services and support;

(E) consumers of service-enriched housing;

(F) advocates for minority issues; and

(G) rural communities.

(c) A member of the council appointed under Subsection (b)(2) must have, subject to the approval of the head of the agency, authority to make decisions for and commit resources of the agency that the member represents and must have:

(1) administrative responsibility for agency programs for older adults or persons with disabilities;

(2) knowledge or experience regarding the implementation of projects that coordinate integrated housing and health services; or

(3) knowledge or experience regarding services used by older adults or persons with disabilities.

(d) The director serves as the presiding officer of the council.

Sec. 2306.1093. TERMS. (a) A member of the council who represents a state agency serves at the pleasure of the head of that agency.

(b) Members of the council who are appointed by the governor serve staggered six-year terms, with the terms of two or three members expiring on September 1 of each odd-numbered year.

Sec. 2306.1094. OPERATION OF COUNCIL. (a) The council shall meet at least quarterly.

(b) The department shall provide clerical and advisory support staff to the council.

(c) Except as provided by Section 2306.1095, Chapter 2110 does not apply to the size, composition, or duration of the council.

Sec. 2306.1095. COMPENSATION AND REIMBURSEMENT. (a) A member of the council who is appointed by the governor may not receive compensation for service on the council. The member may receive reimbursement from the department for actual and necessary expenses incurred in performing council functions as provided by Section 2110.004.

(b) A member of the council who is not appointed by the governor may not receive compensation for service on the council or reimbursement for expenses incurred in performing council functions.

Sec. 2306.1096. DUTIES; BIENNIAL REPORT. (a) The council shall:

(1) develop and implement policies to coordinate and increase state efforts to offer service-enriched housing;

(2) identify barriers preventing or slowing service-enriched housing efforts, including barriers attributable to the following factors:

(A) regulatory requirements and limitations;

(B) administrative limitations;

(C) limitations on funding; and

(D) ineffective or limited coordination;

(3) develop a system to cross-educate selected staff in state housing and health services agencies to increase the number of staff with expertise in both areas and to coordinate relevant staff activities of those agencies;

(4) identify opportunities for state housing and health services agencies to provide technical assistance and training to local housing and health services entities about:

(A) the cross-education of staff;

(B) coordination among those entities; and

(C) opportunities to increase local efforts to create service-enriched housing; and

(5) develop suggested performance measures to track progress in:

(A) the reduction or elimination of barriers in creating service-enriched housing;

(B) increasing the coordination between state housing and health services agencies;

(C) increasing the number of state housing and health services staff who are cross-educated or who have expertise in both housing and health services programs; and

(D) the provision of technical assistance to local communities by state housing and health services staff to increase the number of service-enriched housing projects.

(b) The council shall develop a biennial plan to implement the goals described by Subsection (a).

(c) Not later than August 1 of each even-numbered year, the council shall deliver a report of the council's findings and recommendations to the governor and the Legislative Budget Board.

Sec. 2306.1097. GIFTS AND GRANTS. The council may solicit and accept gifts, grants, and donations for the purposes of this subchapter.

Sec. 2306.1098. DUTIES OF EMPLOYEES PROVIDING ADVISORY SUPPORT TO COUNCIL. Department employees assigned to provide advisory support to the council shall:

(1) identify sources of funding from this state and the federal government that may be used to provide integrated housing and health services;

(2) determine the requirements and application guidelines to obtain those funds;

(3) provide training materials that assist the development and financing of a service-enriched housing project;

(4) provide information regarding:

(A) effective methods to collaborate with governmental entities, service providers, and financial institutions; and

(B) the use of layered financing to provide and finance service-enriched housing;

(5) create a financial feasibility model that assists in making a preliminary determination of the financial viability of proposed service-enriched housing projects, including models that allow a person to analyze multiuse projects that facilitate the development of projects that will:

(A) address the needs of communities with different populations; and

(B) achieve economies of scale required to make the projects financially viable;

(6) facilitate communication between state agencies, sources of funding, service providers, and other entities to reduce or eliminate barriers to service-enriched housing projects;

(7) provide training about local, state, and federal funding sources and the requirements for those sources;

(8) develop a database to identify, describe, monitor, and track the progress of all service-enriched housing projects developed in this state with state or federal financial assistance;

(9) conduct a biennial evaluation and include in the council's report to the governor and the Legislative Budget Board under Section 2306.1096 information regarding:

(A) the capacity of statewide long-term care providers; and

(B) interest by housing developers in investing in service-enriched housing;

(10) to increase the consistency in housing regulations, recommend changes to home and community-based Medicaid waivers that are up for renewal;

(11) research best practices with respect to service-enriched housing projects subsidized by other states; and

(12) create and maintain a clearinghouse of information that contains tools and resources

for entities seeking to create or finance service-enriched housing projects.

NOTE: (a) As soon as possible after the effective date of this Act, the governor and the heads of the applicable state agencies shall appoint members to the housing and health services coordination council in accordance with Subchapter NN, Chapter 2306, Government Code, as added by this Act.

(b) In making initial appointments to the housing and health services coordination council, the governor shall appoint two members to serve a term expiring September 1, 2011, three members to serve a term expiring September 1, 2013, and three members to serve a term expiring September 1, 2015.

SECTION 3. Not later than September 1, 2010, the housing and health services coordination council shall submit the first report of the council's findings and recommendations as required by Subchapter NN, Chapter 2306, Government Code, as added by this Act.

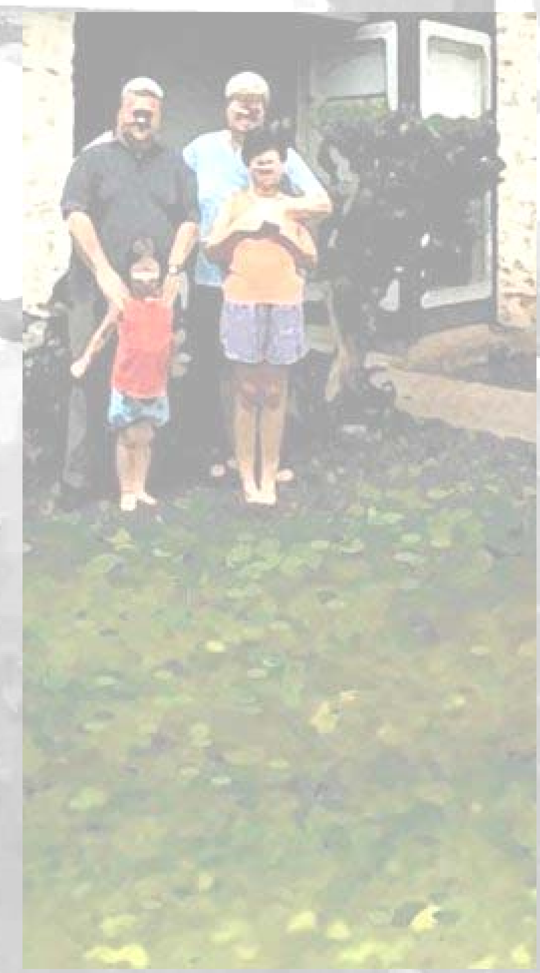
January 2004



2004 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

CONTENTS

INTRODUCTION

TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS

The Texas Department of Housing and Community Affairs (TDHCA, the Department, or the Agency) is the State's lead agency responsible for affordable housing, in addition to the administration of community and energy assistance programs and colonia activities.

AGENCY MISSION AND CHARGE

The Department's mission is to help Texans achieve an improved quality of life through the development of better communities. The Department accomplishes this mission through the administration of a variety of housing and community affairs programs. One function of the Department is to act as a conduit for federal grant funds for housing and community services. However, because several major housing programs require the participation of private investors and private lenders, the Agency also operates as a housing finance agency. As a consequence of these dual roles, the Department must balance public purpose with sound business principles.

The Department's charge is to serve the state's extremely low income to moderate income population. Funding priority is given to those populations most in need of services: extremely low, very low, and low income households and individuals.

The Department's services address a broad spectrum of housing and community affairs issues that include low-interest mortgage financing, emergency food and shelter, rental subsidy, and energy assistance. The Department is viewed as a valuable financial and educational resource by individuals and communities attempting to deal with problems of housing, poverty, and energy assistance.

It is important to note that TDHCA is only one organization in a network of housing and community service providers located throughout the state. This document outlines only those programs within the jurisdiction of TDHCA, which are intended to either work in cooperation or as complements to the services provided by other organizations. A brief overview of other available providers follows, though a more detailed listing that includes contact information is available in TDHCA's *Program Guide*. This publication is available on the Department's website (www.tdhca.state.tx.us) or can be ordered from the TDHCA Center for Housing Research, Planning, and Communications.

Participating jurisdictions (PJs) are state or local governments that have been designated by the US Department of Housing and Urban Development (HUD) to administer federal HOME Investment Partnerships Program funding in their respective areas. PJs are often urban areas and administer a variety of single family and multifamily housing programs. Many PJs also receive direct funding through the Community Development Block Grant Program and the Emergency Shelter Grants Program, which address community development and homelessness issues, respectively.

The Texas State Affordable Housing Corporation and local housing finance corporations use mortgage revenue bonds to finance the development of affordable multifamily housing or offer homebuyer assistance programs.

The US Department of Agriculture Rural Development Division addresses rural housing issues through the Rural Housing Service. Rural Development administers home purchase, home repair, rental assistance, rental housing development, and other community development programs in rural areas only.

Public housing authorities (PHAs) are governmental entities whose responsibilities range from rental assistance, which includes project-based and voucher assistance, to operating and/or developing public housing units. Housing authorities maintain a designated service area and operate in all metropolitan areas and larger rural cities. TDHCA uses its Section 8 rental voucher allocation to assist individuals in areas that are not served by an existing PHA.

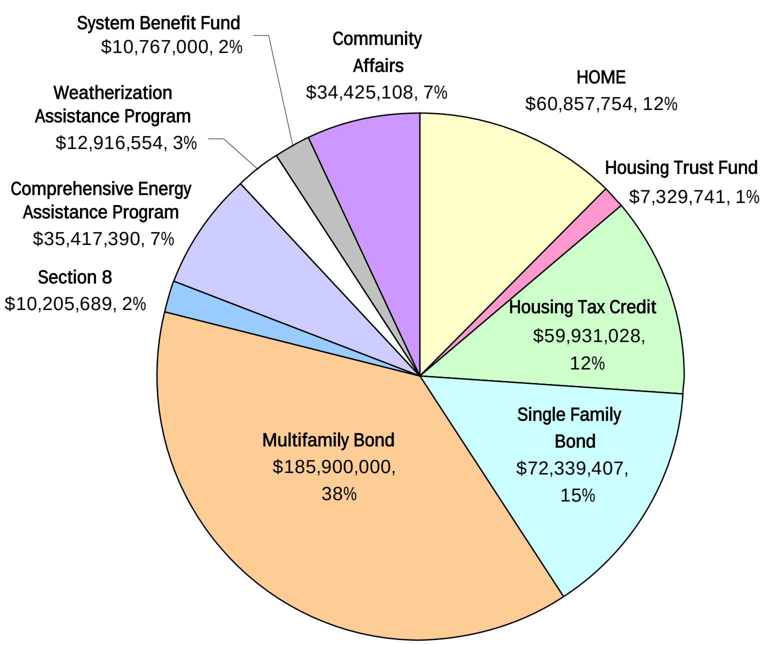
Community action agencies (CAAs) administer federal and state antipoverty programs and generally administer TDHCA's community affairs programs, which offer emergency assistance, utility assistance, and weatherization assistance. CAAs serve a designated multicounty area and together administer poverty-related programs statewide.

Various subpopulations are also served through designated entities. Individuals over the age of 60 may receive assistance through local area agencies on aging that are affiliated with the Texas Department on Aging. The Texas Department of Mental Health and Mental Retardation and the Texas Department of Human Services administer supported housing programs for persons with disabilities and seniors. The US Department of Veterans Affairs and the Texas General Land Office administer housing programs for eligible veterans.

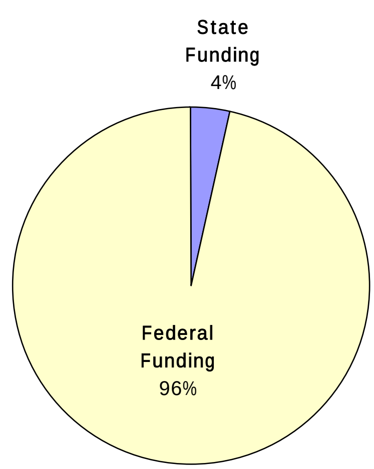
In fiscal year 2003, TDHCA received $464,096,192 in total funds and committed $492,389,672 to serving lower income Texans. Committed funds include allocations from previous years and deobligated funds. Most of the funding originated from federal sources, 96 percent of the total. Approximately 4 percent of the total was State funding.

FY 2003 Total Funding by Program

Total Funds Committed: $492,389,672



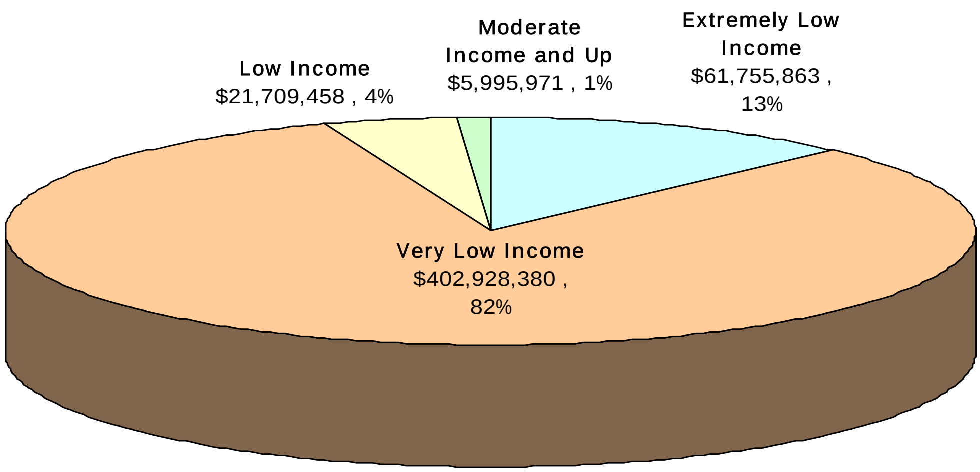
FY 2003 Funding Source



Total funds committed through all programs were delineated by extremely low income, very low income, low income, and moderate income groups.

FY 2003 Total Funding by Income Level

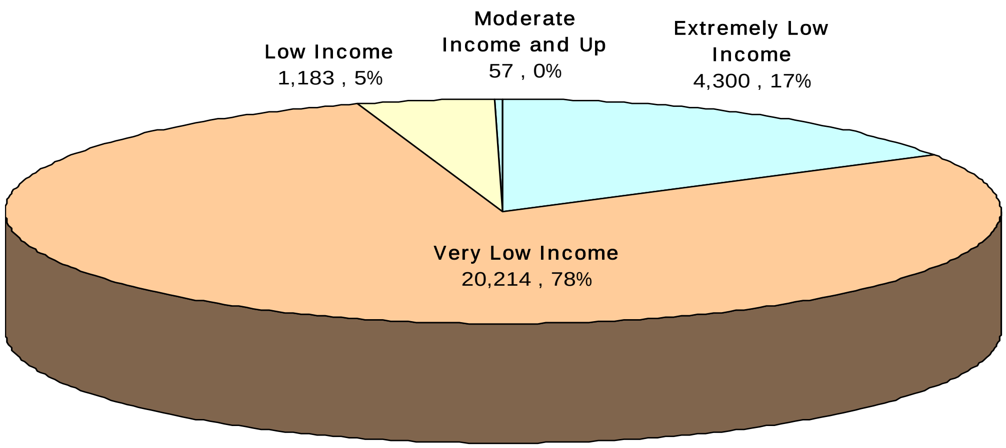
Total Funds Committed: $492,389,672



In 2003, TDHCA assisted 4,300 extremely low income, 20,214 very low income, 1,183 low income, and 57 moderate income households through housing programs. Community Affairs activities, which includes weatherization and utility assistance programs, assisted 542,868 very low income households and individuals.

FY 2003 Total Housing Assistance by Income Levels

Total Households Served: 25,754



Note: Extremely low income: 0% to 30%, very low income: 31% to 60%, low income: 61% to 80%, moderate income and up: >80%.

ADMINISTRATIVE STRUCTURE

Programs administered by TDHCA provide housing and housing-related services, including community services. Housing activities include housing finance, rehabilitation of single family and multifamily units, rental assistance, new construction of single family and multifamily housing, homebuyer assistance including down payment and closing costs, special needs housing, transitional housing, and emergency shelters. Housing-related and community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance.

The administration of these services is currently grouped into three categories: Single Family Finance Production, Multifamily Finance Production, and Community Affairs. In addition, the Department includes the following divisions: Administrative Support; Bond Finance; Financial Administration; Governmental Affairs; Information Systems; Internal Audit; Legal Services; Portfolio Management and Compliance; Real Estate Analysis; the Center for Housing Research, Planning, and Communications; and the Office of Colonia Initiatives.

Federal funding sources for the services listed above include the US Department of Housing and Urban Development, the US Treasury Department, the US Department of Health and Human Services, and the US Department of Energy. The Housing Trust Fund receives general revenue funds from the State. Through these funding mechanisms, the Department strives to promote sound housing policies; ensure equity; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process.

AGENCY HISTORY

In 1991, the 72nd Texas Legislature created the Texas Department of Housing and Community Affairs. The Department’s enabling legislation combined programs from the Texas Housing Agency, the Texas Department of Community Affairs, and the Community Development Block Grant Program from the Texas Department of Commerce.

On September 1, 1992, two programs were transferred to TDHCA from the Texas Department of Human Services: the Low Income Home Energy Assistance Program (LIHEAP) and the Emergency Nutrition and Temporary Emergency Relief Program (ENTERP). Effective September 1, 1995, in accordance with House Bill 785, regulation of manufactured housing was transferred to the Department. In accordance with House Bill 7, effective September 1, 2002, the Community Development Block Grant and Local Government Services programs were transferred to the newly created Office of Rural Community Affairs (ORCA). Effective September 1, 2002, in accordance with Senate Bill 322, the Manufactured Housing Division became an independent entity administratively attached to TDHCA.

2004 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

The *2004 State of Texas Low Income Housing Plan and Annual Report* (the Plan) is prepared in accordance with Sections 2306.072–2306.0723 of the Texas Government Code. This statute requires the Department to perform a comprehensive overview of statewide housing needs, provide a description of the Department's housing programs, and establish a resource allocation plan to meet the state's housing needs.

The *State of Texas Low Income Housing Plan and Annual Report* is one of three comprehensive planning documents, together with the *State of Texas Consolidated Plan: One-Year Action Plan* and *State of Texas Consolidated Plan: Annual Performance Report*, that TDHCA is required to submit annually. It offers policy makers, affordable housing providers, and local communities a comprehensive reference on statewide housing need, housing resources, and performance-based funding allocations. It serves in the following capacities:

- Provides an overview of statewide housing needs
- Updates progress on initiatives resulting from the 78th Texas Legislative session
- Reports on the programs administered by TDHCA
- Reports on the distribution of TDHCA's resources in the previous fiscal year
- Provides information on TDHCA's housing program funding levels and performance measures

The Plan is organized into five sections:

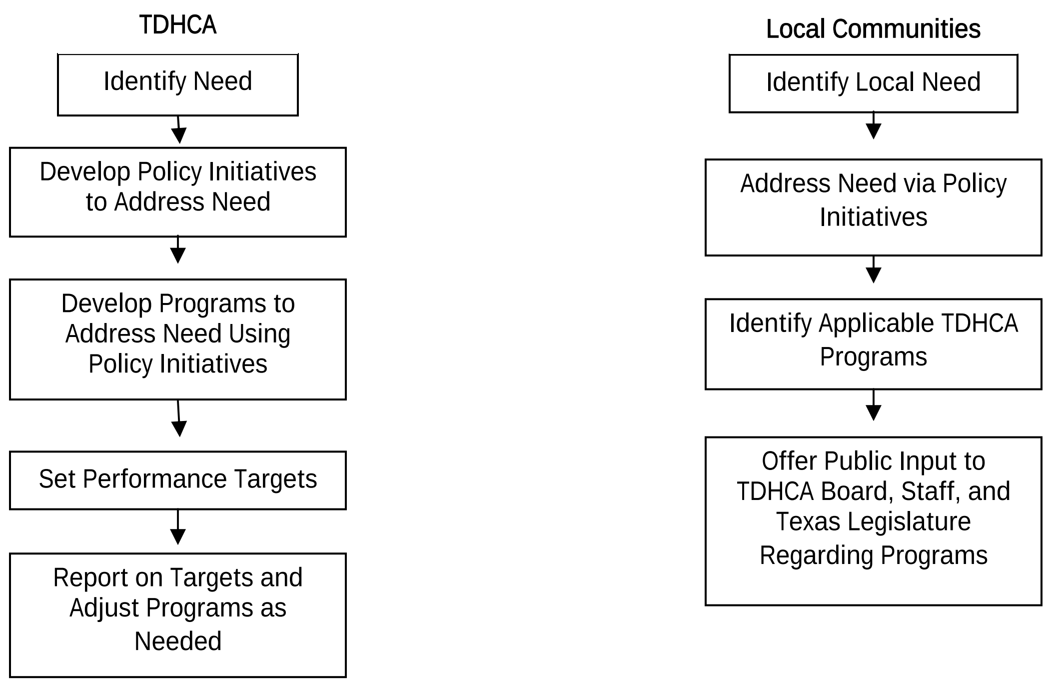
- *Introduction:* An introduction, a summary of the 2003 Department impact, an overview of the Department, and an overview of the Plan
- *Department Activities and Initiatives:* A summary of Department activities, overview of policy initiatives, discussion of the Department's Strategic Plan goals, and a legislative review
- *Housing Analysis and Action Plan:* An analysis of statewide and regional demographic information, housing characteristics, and housing needs; and an annual low income housing report including state and regional funding allocation, target numbers, and actual numbers served
- *Colonia Action Plan:* This biennial plan for 2004–2005 discusses housing and community development needs in the colonias, describes the Department's policy goals, summarizes the strategies and programs designed to meet these goals, and describes some of the projected outcomes to support the improvement of living conditions of colonia residents
- *Appendix:* Includes the Agency's enabling legislation, program descriptions, a glossary of selected terms, and a summary of public comment

It is important to note that this Plan is a working document that changes annually based on input received throughout the year. The format is intended to help providers and interested parties recognize statewide housing needs, understand general housing issues, formulate policies, and identify available resources.

As the information required by the legislation for the *State of Texas Low Income Housing Plan and Annual Report* is rather voluminous, it has been deemed appropriate to present the information as a collection of separate publications. This allows the consumer to receive specific information and has proven cost-effective for both TDHCA and its consumers through lower printing and distribution costs. TDHCA produces the following publications in compliance with Section 2306.071–2306.0723 of the Texas Government Code:

- *State of Texas Low Income Housing Plan and Annual Report*
- *TDHCA Program Guide:* A description of the Department's housing programs as well as other state and federal housing and housing-related programs
- *TDHCA Property Inventory and Guide to Services:* A comprehensive list of the Department's multifamily and single family housing activity in addition to HOME Program contracts and Community Services programs
- *TDHCA Housing Sponsor Report:* A report that provides property and occupant profiles of developments that have received assistance from TDHCA

Below are illustrations as to how (1) TDHCA uses this Plan to develop Department programs and (2) how the Plan may be used by communities to develop and implement local initiatives:



PREPARATION OF THE PLAN

Current legislation mandates that the Department meet with various organizations concerning the prioritization and allocation of the Department's housing resources prior to preparation of the Plan. As this is a working document, there is no such time at which the Plan is static. Rather, research is conducted throughout the year by the Department's Center for Housing Research, Planning, and Communications in order to analyze housing needs across the state. Furthermore, focus group meetings are held to discuss ways in which funds may be prioritized to meet specific needs. Public comment is also received at public hearings and Board of Directors meetings.

CITIZEN PARTICIPATION

Throughout the year, the Department accepts comments and suggestions from the public on all of its programs. Public comment may be received at, but not limited to, Board of Directors meetings, various Department-sponsored or attended informational workshops, legislative committee hearings, individual program and publication public comment periods and hearings, and application and implementation workshops.

The formal citizen participation process for the *2004 State of Texas Low Income Housing Plan and Annual Report* began on September 22, 2003, and ended October 24, 2003. Constituents were encouraged to give input regarding all Department programs in writing or at one of the 13 public hearings that were held across the state, one in each of the 13 Uniform State Service Regions.

Approximately 250 individuals attended the public hearings held in the following cities: Longview, Dallas, Wichita Falls, Lubbock, San Angelo, El Paso, Austin, San Antonio, Harlingen, Corpus Christi, Waco, Lufkin, and Houston. A summary of comment received during the public comment period is included in Appendix D. Transcripts of public hearings and complete copies of submitted comments are also available in the Housing Center Library, which is open to the public 8 am–5 pm, Monday through Friday. Please contact the Housing Center directly at (512) 475-3976 for further information.

DEPARTMENT ACTIVITIES AND INITIATIVES

This section provides the basis for the state and regional housing assessments through a discussion of Department activities and policy objectives. The final subsection provides an overview of legislation passed during the 78th Texas Legislative Session that directly impacts the Department.

AGENCY ACTIVITIES

TDHCA administers various programs that address the housing and community service needs of extremely low to moderate income populations, which can be categorized according to multifamily, single family, capacity building, and community affairs activities.

MULTIFAMILY ACTIVITIES

TDHCA's dedication to increasing affordable multifamily housing opportunities for needy residents across the state improves the quality of life for thousands of households. The Department utilizes a variety of methods to provide rental housing for lower income households and households with special needs. Programs finance multifamily construction, acquisition, and rehabilitation; offer capacity building for organizations involved in multifamily housing; and provide rental payment assistance to tenants. New construction of multifamily units supplies additional much-needed housing targeting lower income families, though the Department also recognizes the need to preserve and repair existing affordable units in order to maintain quality housing that is accessible and affordable. Direct rental payment assistance to very low and extremely low income households offers families and individuals the chance to improve their housing conditions.

Through the Housing Tax Credit (HTC) Program, the Department aids in building affordable housing through the allocation of federal tax credits used to fund new construction, acquisition, and rehabilitation of multifamily residential developments. Although a developer must set aside at least 20 percent of a project's units for qualified tenants, typically a developer will set aside 100 percent and, in doing so, claim the maximum amount of tax credits eligible for the development. The allocation of the tax credits allows these quality developments to be affordable to qualified very low and extremely low income families at below-market rents.

The Department issues taxable and tax-exempt mortgage revenue bonds used to fund loans to qualifying nonprofit or for-profit developers through the Multifamily Bond Program. The proceeds of the bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties. In return for favorable interest rates typically available through the tax-exempt bond transaction, property owners elect to restrict either 20 percent of the units for households earning 50 percent or less of area median income or 40 percent of the units to households earning 60 percent or less of area median income.

The HOME Program's Rental Housing Development Set-Aside funds are available to nonprofit and for-profit organizations for the acquisition, rehabilitation, reconstruction, or new construction of affordable rental housing units. The HOME Program also makes funding available for the preservation of existing multifamily developments through the Rental Housing Preservation Set-Aside. In all cases, owners are required to make the units available to low, very low, and extremely low income families, and must meet long-term rent restrictions. Housing Trust Fund (HTF) monies may also be used for the acquisition, rehabilitation, and new construction of affordable multifamily housing.

Community housing development organizations (CHDOs) may apply for funding for the new construction or rehabilitation of rental housing through the HOME Program CHDO Set-Aside. CHDO projects are owned, developed, or sponsored by the CHDO

Direct rental assistance to tenants, which includes rental subsidies and utility and/or security deposits, allows households to expand their housing opportunities. Such programs offered by the Section 8 Program and Tenant-Based Rental Assistance provided through the HOME Program are designed to help households in small cities and rural areas that are not served by similar local programs.

	Program	Targeted Households by Area Median Family Income				
		Extremely Low Income: < 30% AMFI	Very Low Income: < 50% AMFI	Very Low Income: < 60% AMFI	Low Income: < 80% AMFI	Moderate Income: < 115% AMFI
Multifamily Development Activities	HOME Program Rental Housing Set-Asides					
	Housing Trust Fund					
	Housing Tax Credit Program		20% of units	or 40% of units		
	Multifamily Bond Program		20% of units	or 40% of units	75% of 501(c)(3) units	
Rental Assistance	Section 8 Program					
	HOME Program Tenant-Based Rental Assistance					

SINGLE FAMILY ACTIVITIES

The range of TDHCA's single family activities includes home construction, home purchase assistance, and then assistance for homeowners. TDHCA supports affordable single family homeownership by providing loans to developers of affordable housing; promoting homebuyer education, offering mortgage financing and assistance, and by extending owner-occupied rehabilitation assistance to households.

Through HTF, the Department offers funding that may be used for the acquisition, rehabilitation, and new construction of affordable single family housing. Single family new construction is an eligible activity in the HTC program and is a CHDO-eligible activity in the HOME Program. In colonia areas, TDHCA supports single family development through the Colonia Model Subdivision Loan Program and the Bootstrap Loan Program, which provide loan funds to assist organizations build single family housing. Certain types of assistance may require considerable labor contribution on the part of the owner.

Homebuyer education and counseling are essential in order to ensure successful homeownership. Through the Texas Statewide Homebuyer Education Program (TSHEP), TDHCA offers training to local nonprofit organizations interested in offering homebuyer education, and also acts as a referral service for homebuyers seeking education. In addition, the Contract for Deed Consumer Education Program offers homebuyer education and assistance tailored specifically for the unique needs of colonia residents. Technical assistance on such topics as housing rehabilitation, new construction, surveying and platting, construction skills, housing finance, and credit and debt counseling is available.

The dream of homeownership is beyond the reach for many households because of the inability to acquire affordable financing, the lack of down payment funds, or a lack of education about the home purchase process. Through the First Time Homebuyer and Down Payment Assistance programs, the Department offers below-market mortgage loans and down payment assistance for very low to moderate income residents across the state. Similar to the Multifamily Bond Program, the single family bond structure allows favorable mortgage interest rates for eligible borrowers through participating lenders and other partners that originate and service the loans. In addition, the HOME Program funds local organizations to offer assistance to eligible first time homebuyers for down payment and closing costs ranging from $5,000 to $10,000 per homebuyer based on an area's median family income. The Mortgage Credit Certificate Program provides a tax credit for the annual interest paid on a mortgage loan.

Homeowners and potential homeowners in border areas may utilize the Texas Bootstrap Loan Program and the Contract for Deed Conversion Initiative for low-interest owner-builder mortgage loans or to convert contracts for deeds into traditional mortgages.

Through the HOME Program, the Department provides rehabilitation and reconstruction grants to homeowners for the repair of their existing structures, which may also be used for construction costs associated with architectural barrier removal for homebuyers with disabilities. There are also funds available to help with the acquisition and rehabilitation costs associated with the contract for deed conversion for colonia residents.

		Targeted Households by Area Median Family Income				
	Program	Extremely Low Income: < 30% AMFI	Very Low Income: < 50% AMFI	Very Low Income: < 60% AMFI	Low Income: < 80% AMFI	Moderate Income: < 115% AMFI
Single Family Development	HOME Program CHDO Set-Aside

Homebuyer Education	Contract for Deed Consumer Education Program					
	Texas Statewide Homebuyer Education Program					

	Program	Targeted Households by Area Median Family Income				
		Extremely Low Income: < 30% AMFI	Very Low Income: < 50% AMFI	Very Low Income: < 60% AMFI	Low Income: < 80% AMFI	Moderate Income: < 115% AMFI
Home Purchase Assistance and Home Repair Assistance	First Time Homebuyer Program					
	Down Payment Assistance Programs					
	Mortgage Credit Certificate Program					
	HOME Program Homebuyer Assistance					
	Texas Bootstrap Loan Program					
	Contract for Deed Conversion Initiative					
	HOME Program Owner-Occupied Housing Assistance					

COMMUNITY AFFAIRS AND ENERGY ASSISTANCE

The Department's community affairs and energy assistance programs exist to provide a safety net for those experiencing homelessness, those at risk of homelessness, and for those able to maintain some sort of housing, but with other unmet essential needs. The community affairs programs provide emergency relief in the form of shelter and social services for individuals and families experiencing crisis poverty. The energy assistance programs help very low income households manage their utility bills through payment assistance, the installation of energy efficient measures and appliances, and energy conservation education.

Basic needs such as shelter, food, child care, health and human services, transportation, job training, and substance-abuse prevention must be addressed in order for households or individuals to contemplate long-term solutions to poverty. The programs administered by TDHCA that address these needs are vital to the transition from poverty. The Emergency Shelter Grants Program (ESGP) addresses the immediate needs of homeless individuals and families through funding to nonprofit organizations and local governments that provide shelter and related services for homeless persons, as well as intervention services for persons threatened with homelessness. Eligible activities include renovation, major rehabilitation, and conservation of buildings for use as an emergency shelter, and may involve the provision of services including assistance in obtaining permanent housing, medical treatment and psychological counseling, nutritional counseling, substance-abuse treatment, child care, transportation, and job placement.

The Department also offers grants to organizations that provide essential services to persons living in poverty, such as access to child care; health and human services for children, families, and the elderly; nutrition; transportation; job training and employment services; housing; substance-abuse prevention;

and migrant assistance. Other Department activities include the coordination of statewide efforts to address hunger issues and expand anti-hunger programs such as child-feeding programs, the distribution of surplus commodities and game donated by hunters, and the creation of farmer's markets in lower income neighborhoods. The Department provides disaster-related emergency relief in the form of utility assistance, housing, food, clothing, medical services, and transportation to extremely low, very low, and low income persons. The Community Services Block Grant Program (CSBG) and HTF have funds available for agencies providing essential services and the Community Food and Nutrition Program (CFNP) addresses hunger-related issues.

Through the Department's energy assistance programs, eligible households can receive financial assistance with utility bills, energy-efficient appliances and measures, case management, and education assistance to ensure continued energy self-sufficiency. Priority for these programs is given to the elderly, persons with disabilities, and households with children under the age of six, with further priority given to households with the highest energy costs and the lowest incomes. The Comprehensive Energy Assistance Program (CEAP) funds local entities that offer utility bill assistance, while the Weatherization Assistance Program (WAP) provides grants to entities that fund energy conservation measures in housing.

More detailed programmatic information including funding levels, eligible applicants and beneficiaries, program activities, set-asides, and special initiatives is available in Appendix B.

		Targeted Households by Area Median Family Income				
	Program	Extremely Low Income: < 30% AMFI	Very Low Income: < 50% AMFI	Very Low Income: < 60% AMFI	Low Income: < 80% AMFI	Moderate Income: < 115% AMFI
Community Affairs Activities (Targeted households are based on federal poverty guidelines and estimated as percentage of AMFI.)	Community Services Block Grant Program					
	Emergency Shelter Grants Program	Homeless				
	Community Food and Nutrition Program					
	Comprehensive Energy Assistance Program					
	Weatherization Assistance Program					

CAPACITY BUILDING

The Housing Trust Fund (HTF) administers two programs specifically intended to increase a nonprofit organization's ability to access Department programs.

The Capacity Building Program has been used to fund classes that cover such topics as training in CHDO organizational development, the real estate development process, construction management, property management, and housing development finance. In addition, funds may be used to hire qualified persons who can provide technical assistance in developing safe, decent, and sanitary housing for low, very low, and extremely low income individuals and families, including persons with special needs. Funds may also be used to contract directly with qualified technical assistance providers.

The Predevelopment Loan Program provides opportunities for nonprofit organizations to develop affordable housing by assisting with the costs incurred while securing project financing.

In addition to the funding outlined above, the Department offers capacity building technical assistance to organizations interested in addressing the affordable housing needs in their communities. The Department aims to increase the capacity of organizations by providing access to information and trainings on topics such as strategic and business planning, financial and asset management, board development, outcome measures, coordination, collaboration, networking, and partnership development. The Department hopes to empower organizations to be more competitive in applying for not only TDHCA funding, but also other available federal, state, and local funds.

POLICY INITIATIVES AND STRATEGIES

Families at the very bottom of the income strata who have virtually no financial resources and a variety of other poverty-related issues (including employment, education, transportation, health care, and child care) require direct assistance, as do vulnerable populations with a fixed income. These groups are served most effectively through rental vouchers or access to housing developments that have received substantial subsidies, allowing for rents affordable to those making less than 30 percent of the area median family income. However, for those populations with higher incomes, consumer needs tend to change. Higher income households with housing affordability problems typically have some income, but cannot access market-rate housing without some assistance—either an affordable multifamily unit or homeowner assistance in the form of down payment assistance and low-interest loans.

Opinions regarding how to address these housing needs are as varied and diverse as Texas itself. On one side of the spectrum, there is the desire to allocate available resources in the form of direct assistance to the state's poorest populations, with an emphasis on utilizing community-based organizations in the allocation of housing funds. On the other side, there is the desire to make affordable housing a private-sector function subject to the demands of the market and with little government intervention.

The challenge therefore lies in serving the appropriate population with the appropriate funding mechanism. Both concepts can be incorporated into policy that encourages the participation of private-market resources and experience while still serving the state's most vulnerable populations. By striking this balance, the Department will be able to spend its resources wisely and for the greatest public good.

Below are examples of strategies that TDHCA has used to produce and promote affordable housing, in accordance with the goals and objectives established in the *2001–2004 Consolidated Plan; 2003–2007 Strategic Plan;* and TDHCA Performance Measures, as reported to the Legislative Budget Board.

1. Increase the supply of housing for extremely low, very low, low, and moderate income households through partnerships with local communities, local lenders, health and human services providers, community-based nonprofit organizations, and private developers
2. Preserve the supply of existing affordable housing units
3. Adopt strategies to serve rural populations
4. Develop housing policy based on a fair and open process driven by local communities
5. Increase outreach and marketing efforts
6. Adopt strategies to serve extremely low income populations
7. Provide long-term solutions to those living in poverty
8. Develop consumer-driven programs for the state's most vulnerable populations, such as the elderly, persons with disabilities, and other special needs populations
9. Implement self-help programs that combine public funds with volunteer efforts and local resources
10. Identify and address colonia needs
11. Provide homeownership opportunities to lower income populations and homeownership counseling services to individuals currently unable to access the Department's housing finance programs
12. Promote fair housing issues
13. Promote energy efficiency to increase housing affordability
14. Encourage local affordable housing initiatives

15. Address capacity building issues
16. Encourage communication and cooperation with local groups opposed to affordable housing in their communities
17. Ensure compliance with all applicable federal and State laws

It should be noted that the Department's programs operate under different sets of state and/or federal regulations that provide parameters that govern the use of funds. These parameters determine the extent to which the Department can enact its policy directives.

Public and Private Partnerships

Understanding that no single entity will be able to address the enormous needs of the state of Texas, TDHCA supports the formation of partnerships for the provision of housing and housing-related endeavors. The Department works with many housing and community-development partners, including consumer groups, community-based organizations, neighborhood associations, community development corporations, community housing development organizations, community action agencies, public housing authorities, real estate developers, social-service providers, local lenders, investor-owned electric utilities, local governments, nonprofits, faith-based organizations, property managers, state and local elected officials, and other state and federal agencies. There are many benefits to these partnerships: risk and commitment are shared; the principle of reciprocity requires that local communities demonstrate an awareness of their needs and a willingness to participate actively in solving problems, therefore prompting local communities to play an active role in tailoring the project to their needs; partners are able to concentrate specifically on their area of expertise; and a greater variety of resources insure a well-targeted, more-affordable product.

TDHCA has used the public/private partnership principle in many of its programs, including the partnership with Fannie Mae on an Expanded Approval loan product through the Department's First Time Homebuyer Program, a mortgage product targeting people with disabilities through the Home of Your Own Coalition (HOYO), and the training of homebuyer education providers in conjunction with the Neighborhood Reinvestment Corporation through the Texas Statewide Homebuyer Education Program (TSHEP). In addition, the Department's continued collaboration with USDA Rural Development and the Office of Rural Community Affairs (ORCA) has provided housing opportunities in rural areas across the state.

Combining ideas, information, and resources allows TDHCA to provide additional services to its consumers. Because the amount of funds available to address Texas's housing needs is limited, collaborations between public and private entities are the best way to stretch limited Department funds. Below are additional examples of coordination of resources with both public and private entities:

- *Expanded Approval Program:* Through a groundbreaking partnership between TDHCA and Fannie Mae, eligible households with slight credit blemishes may obtain a mortgage loan at a lower rate than they would receive under alternative financing arrangements. The Department is the first State housing finance agency in the country to employ Expanded Approval products to reach previously underserved and overcharged borrowers by offering mortgage rates that may be as much as two percentage points lower than alternative subprime mortgage financing.
- *Texas Statewide Homebuyer Education Program (TSHEP):* In 2003, TDHCA worked with the Neighborhood Reinvestment Corporation, Fannie Mae, Banc One, Countrywide, the Texas State

Affordable Housing Corporation (TSAHC), and the Texas Affiliation of Affordable Housing Providers (TAAHP) to provide “Train the Trainer” classes to organizations interested in providing homebuyer education services at the local level.

- *Olmstead v. L.C.:* TDHCA continues to work with the Texas Department of Human Services, Texas Department of Mental Health and Mental Retardation, Texas Council on Developmental Disabilities, and Texas Department of Health on initiatives that will serve the needs of persons with disabilities who desire housing options outside of institutional settings.
- *Project Access:* The Department in cooperation with the Texas Health and Human Services Commission, the Texas Department of Human Services, and local public housing authorities administer a housing voucher pilot program developed by the US Department of Housing and Urban Development (HUD), the US Department of Health and Human Services, and the Institute on Disability at the University of New Hampshire. The voucher program helps low income, non-elderly persons with disabilities transition from nursing facilities into the community by providing access to affordable housing and necessary supportive services.
- *Texas PHA Project:* TDHCA serves on the Project Advisory Committee with the Coalition of Texans with Disabilities, Texas Council on Developmental Disabilities, Advocacy Inc., and United Cerebral Palsy to oversee the three-year grant to provide training and technical assistance to public housing authorities. Activities of the grant are intended to result in a measurable increase in the number of integrated housing units available to persons with disabilities.
- *USDA Rural Development:* As a provider of services to rural Texas communities, TDHCA has an ongoing relationship with USDA Rural Development. Collaborations have been achieved through several TDHCA programs (HTC, HTF, HOME) in the form of multifamily developments and single family homeownership initiatives.
- *Public Housing Authorities:* Over the past few years, TDHCA has developed a strong relationship with the Texas Housing Association (THA) and Texas chapter of the National Association of Housing and Redevelopment Officials (TX NAHRO), which represent the public housing authorities of Texas. The two organizations have worked to promote programs that will repair substandard housing and develop additional affordable housing units.
- *Colonia Self-Help Centers:* TDHCA coordinates services with centers in counties selected by the Legislature (Cameron/Willacy, El Paso, Hidalgo, Maverick, Starr, and Webb) to provide housing and technical assistance to improve the quality of life for colonia residents beyond the provision of basic infrastructure. Contracts are executed directly with the county in which the center is located.
- *Texas Home of Your Own Coalition (HOYO):* HOYO is a partnership of state and local direct service providers, state agencies, disability advocacy groups, community groups, and statewide lending institutions that are committed to making homeownership a reality for Texans with disabilities.
- *Weatherization:* Partnerships between the Weatherization Assistance Program and Texas Utilities, Central Power & Light, West Texas Utilities, Southwestern Electric Power Company, Southwestern Public Service Company, Entergy, Reliant Energy-Houston Power and Light, Texas–New Mexico Power Company, El Paso Electric, and Brazos Electric Cooperative provide energy conservation measures to very low and extremely low income utility customers.

MULTIFAMILY PRESERVATION

Preservation of existing affordable and subsidized housing stock is a critical element in achieving the Department's mission of providing safe, decent, and affordable housing. From a supply-and-demand perspective, there is a shortage of affordable and subsidized multifamily housing, and any deterioration of the current supply further widens the gap. Given the demographic projections for Texas, the housing shortage will only continue to grow. In terms of meeting future demand for housing, stabilization of the existing stock is equally as important as new production.

Over the next few years, many units in the existing stock of affordable rental units are at risk of being lost. These include units in the Section 8 portfolio, the USDA Rural Development portfolio, and units associated with the Housing Tax Credit Program. Texas relies almost exclusively on federal funds for housing programs and any cuts to federal programs will have dramatic effects on the housing supply.

A 2002 study completed by the Department, *Assessment of the Need to Preserve Affordable Housing in Texas: The Section 8 Portfolio*, attempted to estimate the total preservation cost of the Texas Section 8 portfolio. As of the writing of the study in September of 2002, it was estimated that between 8,000 and 12,000 Section 8 units had been lost since contracts started to expire in 1996 (approximately 18 percent of the portfolio). By the end of 2002, 72 percent of the original contracts in the portfolio were up for expiration. It was projected that of the remaining approximately 54,000 units, 3 percent were likely to be lost to contract termination: a total of 1,800 units. According to the study, approximately 48 million dollars would be required in incentives over the next 20 years to maintain the affordability status of the properties most likely to be lost. The full study may be accessed on the Department's website at: http://www.tdhca.state.tx.us/mf_preserve.htm.

The loss of existing units places many of the poorest Texans at risk. Rental units that are disappearing the fastest and at risk of being lost are the units that serve the neediest populations. Aside from HUD-associated programs, properties awarded tax credits from 1987 to 1989 began reaching the end of their 15-year compliance periods in 2002.

The principal policy decision for the Department is the allocation of current resources between new production and preservation efforts. Aside from the resource allocation issue, policy decisions regarding which existing units should be salvaged or prioritized, given available funding, are also paramount. Concentrations of special tenant populations, the condition and location of the properties, availability of better replacement housing, and functional utility of the properties are factors that must be considered in preservation efforts. Focusing limited resources on those properties with high concentrations of elderly or disabled residents, groups that are most adversely affected by displacement, and strategically well-located properties and well-maintained properties will help stabilize the housing stock.

Typically, even with significant rehabilitation, preservation is generally less costly per unit than new construction. However, because some of the existing stock is functionally obsolete and therefore not conducive to rehabilitation, building a new development is often more cost efficient. Given the limited financial resources, TDHCA believes that an important role for the Department in the preservation effort is to provide direction and technical assistance to local organizations or units of government to facilitate local preservation initiatives. Because not all of the existing units can or will be preserved, the importance of salvaging specific properties and the strategies to preserve them are best determined on a local basis.

Among the programs that have dedicated funds toward preservation activities, the Housing Tax Credit Program has set aside 15 percent of the state housing credit ceiling for preserving “at risk” affordable housing developments. This is in addition to the 5 percent set-aside for USDA Rural Development projects, resulting in a total of 20 percent of the state housing credit ceiling available for the preservation of existing affordable housing. Additionally, the HOME Program allocates $2,000,000 annually for preservation activities.

In addition to fund provision, the Department strives to make information necessary to encourage preservation transactions available to the public. Data for federal portfolios of affordable housing has been made available on the Department’s website, with each property being given a priority ranking depending on the length of time before its affordable regulatory restrictions expire. The Department has undertaken in-depth studies of each affordable housing portfolio in the state, beginning with the federal Section 8 portfolio, in order to determine the factors influencing owners’ decisions to leave affordable housing programs, and the potential costs associated with retaining the housing as affordable. Other measures such as the Preservation Clearinghouse on the Department’s website and direct informational mailings to property owners have sought to facilitate communication among those parties critical in effecting transactions to preserve housing.

Rural and Non–Participating Jurisdictions

As the migration of populations and industries continues to urban and suburban areas, the less-populous areas of the state are left with a dilapidated housing stock and households with lower incomes than their urban or suburban counterparts. Currently, according to HUD, the median income for metropolitan areas is $54,600 compared to $41,200 for non-metropolitan areas.

The larger metropolitan cities and more populous counties, designated as participating jurisdictions (PJs), receive funding directly from the federal government to address their housing and homeless needs through the HOME and Emergency Shelter Grants programs. The funding TDHCA receives from the federal government for these programs is therefore intended for non-PJ areas that do not receive financial assistance directly from the federal government.

Due to the lower incomes and lack of access to resources (e.g., bonds, large tax base, and investment capital) in less-populous areas, TDHCA gives special consideration to lower income individuals and households residing in non–participating jurisdictions and rural areas. This focus is considered in the development of all Department programs and in the distribution of associated funds. In the event that funding cannot be limited to non-PJ and rural areas because of rule or financial feasibility reasons, scoring criteria or set-asides are added to the applications or program rules to encourage the participation of these areas.

TDHCA is dedicated to serving populations that traditionally have the highest need for assistance, yet tend to remain underserved. Within the non-PJ and rural areas, the populations that will receive priority consideration include extremely low income individuals and households (0–30 percent AMFI) and low income special needs populations including persons with alcohol and/or drug addictions, colonia residents, people with disabilities, victims of domestic violence, elderly populations, persons with HIV/AIDS, homeless populations, and migrant farmworkers.

The Department works closely with several rural-based affordable housing organizations, private lenders, nonprofits, and units of local government in order to give funding priority to non-PJ and rural areas. It requires more effort to spark affordable housing activity in rural areas as the number of organizations available to assist with these activities is significantly fewer. With this in mind, the Department has developed specific strategies to address the needs of the rural populations of the state, which include rural set-asides or special scoring criteria for housing program funds, prioritization of activities that are most needed in rural areas, increasing awareness of TDHCA programs in rural areas, and building the capacity of rural service providers.

TDHCA and the Office of Rural Community Affairs (ORCA) jointly administer the HTC rural regional allocation. ORCA assists in developing all thresholds, scoring, and underwriting criteria for rural regional allocation, and must approve the criteria. It is anticipated that joint-implementation outreach, training, and rural area capacity building efforts will increase participation in the rural set-aside. Additionally, 95 percent of HOME funds are expended exclusively in non-PJ and rural areas and the remaining 5 percent, which may be used in PJs, is used for projects that serve persons with disabilities. The Housing Trust Fund gives extra points to applicants who commit to serving rural areas.

REGIONAL INPUT INTO DEPARTMENT POLICIES

TDHCA continuously strives to improve the methods used to identify regional affordable housing needs.[1] Through this effort, TDHCA is better positioned to provide technical assistance and funding that addresses specific regional needs.

One component of this effort involved creating a statewide network of Regional Development Coordinators (RDCs). The RDCs' primary focus is the completion of an annual Regional Housing Need Report (RHNR), which will document the region's affordable housing needs and the resources that are available to meet those needs. More specifically, the RHNR will describe the RDC's efforts to

- help local communities identify and address affordable housing and community development needs;
- establish regional-planning and resource-sharing partnerships;
- facilitate the leveraging of available local, state, and federal funds by housing partners;
- gather and manage data related to the state service region's affordable housing and community development needs;
- analyze the region's affordable housing and community development needs based on the data gathered and regional input;
- establish a framework for sharing affordable housing data with regional partners;
- use collected data to facilitate the development of a regional plan and to encourage consensus amongst regional partners with regard to the plan;
- identify statewide and national housing partners for meeting the region's affordable housing and community development needs[2];

[1] TDHCA uses 13 state service regions whose geographical boundaries have been identified by the Comptroller's office for planning purposes.
[2] Including the US Department of Housing and Urban Development, US Department of Agriculture Rural Development Texas, Texas State Affordable Housing Corporation, statewide nonprofit entities, banking associations, developer associations, and foundations.

- provide a regional information clearinghouse that facilitates sharing of information on affordable housing issues.

Another significant portion of this planning effort involves helping coordinate the activities of Regional Advisory Committees (RACs). The RACs are comprised of the regional councils of governments (COGs) and other affordable housing organizations in each region, with the purpose of gathering information on the region's affordable housing needs and available resources. A primary task of the RACs is to prioritize the region's needs and report this information to TDHCA via an annual report that TDHCA will then consider in developing its policies and program rules. TDHCA works directly with the councils of governments to

- develop the format of the meetings;
- publicize the RAC meetings;
- share available information that assesses the need for affordable housing and related supportive services in Texas;
- identify opportunities to increase the supply and quality of affordable housing and supportive services in Texas;
- collect contact information for state, regional, and local partners that can assist persons interested in providing affordable housing and supportive services.

These meetings represented an invaluable opportunity for TDHCA staff to hear about local affordable housing needs directly from persons whose daily work revolves around addressing these issues.

In 2002–2003, TDHCA contracted with a regional COG in each state service region to serve as the RDC. Unfortunately, with the recent budgetary constraints faced by all state agencies, the funding required to continue the project is unavailable. TDHCA intends to maintain the level of interaction with the COGs that the RDC initiative has helped foster. To this end, a staff member from TDHCA's Center for Housing Research, Planning, and Communications will continue to work directly with the COGs to provide ongoing activity updates and technical assistance on affordable housing–related issues. TDHCA will also help the COGs satisfy the ongoing RAC reporting requirements contained in §2306.079 of the Texas Government Code. The designated TDHCA staff member will continue to help advertise the RAC meetings; develop the RAC meeting format and associated outline; and serve as a resource witness and observer at these meetings.

PUBLIC INPUT INTO DEPARTMENT POLICIES

Dialogue and communication with interested citizens at the community level, through program information workshops, public hearings, technical training sessions, and town hall meetings, enables the Department to act as a catalyst that draws community resources together. Increased dialogue establishes the groundwork for the formation of the aforementioned partnerships and community input. The State does not have the resources to meet the needs of all Texans in need, so it is only through increased participation and communication with the Department's consumers that services can be appropriately and efficiently directed to address need.

Citizen Participation

The Agency values and relies on community input to direct resources to meet its goals and objectives. The citizen participation process and information delivery system administered by the Department is constantly undergoing expansion and modification.

In an effort to provide the public with an opportunity to more effectively give input on the Department's policies, rules, planning documents, and programs, TDHCA has consolidated its public hearings. Each year there will be one hearing per Uniform State Service Region that will cover all Department programs. Staff is available at each hearing to answer questions and lend technical assistance to attendees.

TDHCA ensures that all programs follow the citizen participation and public hearing requirements as outlined in the Texas Government Code. Hearing locations are accessible to all who choose to attend and are held at times accessible to both working and non-working persons. A database has been developed that includes citizen and nonprofit organizations, local governments, state legislators, public housing authorities, and local public libraries so that, when a public hearing or public comment period is scheduled, all interested parties are notified. Additionally, pertinent information is posted in the *Texas Register*, in *Breaking Ground* (the TDHCA newsletter), on the Department’s website, and in several association newsletters. Participation and comments are encouraged and can be submitted either at a public hearing or in writing via mail, fax, email, and, in some cases, directly at the TDHCA website.

Program Participation

The Department constantly seeks ways of increasing statewide participation in TDHCA programs. It is important to note that TDHCA is primarily a pass-through funding agency and funds developments through a formal competitive Request for Proposal (RFP)/Notice of Funding Availability (NOFA) process. Therefore, so that funds reach those in need at the local level, it is incumbent on the Department to increase the public’s awareness of what funds are available and how they may be accessed. Below are the approaches taken by TDHCA to achieve this end:

- Throughout the year, Department staff participate in informational workshops and conferences across the state where information is shared with organizations that are unfamiliar with Agency programs. Organizations interested in becoming affordable housing providers are actively encouraged to contact the Agency for further technical assistance in accessing TDHCA programs.
- The TDHCA *Program Guide* was developed to provide a comprehensive, statewide housing resource guide for both individuals and organizations across the state. The *Program Guide* provides a list of housing and housing-related programs operated by TDHCA, HUD, and other federal and state agencies.
- The Internet is also an invaluable tool for TDHCA. Through its provision of timely information to consumers, it has become one of TDHCA’s most successful marketing tools.
- A database, including public housing authorities (PHAs), community development housing organizations (CHDOs), community development corporations (CDCs), area agencies on aging (AAAs), homebuyer education providers, local governments, and other community-based organizations, streamlines departmental efforts to inform interested parties of available funding, public hearings, and other activities.

- Regional Advisory Committees, comprised of the regional councils of governments and other affordable housing organizations in each region, serve as valuable resources in gathering input from people working at the local level. These groups gather information on the region's affordable housing needs and available resources, prioritize the region's needs, and report this information to TDHCA.

SERVING EXTREMELY LOW AND VERY LOW INCOME POPULATIONS

TDHCA's purpose, as defined in the Texas Government Code, is to "provide for the housing needs of individuals and families of extremely low, very low, and low income and families of moderate income." Recognizing the formidable housing challenges of extremely low income populations, the Agency strives to develop programs that can adequately and appropriately serve these individuals and families. According to the *Housing Sponsor Report*, which is an annual snapshot of all affordable multifamily housing assisted with TDHCA funds, approximately 20 percent of all assisted units are occupied by extremely low income individuals and families.

TDHCA is dedicated to serving populations that traditionally have the highest need for assistance, yet tend to remain underserved. The following populations receive funding priority:

- Extremely low income individuals and households (0 to 30 percent AMFI)
- Low income, special needs populations, including persons with alcohol and/or drug addictions, persons with disabilities, victims of domestic violence, elderly populations, persons with HIV/AIDS, and migrant farmworkers
- Residents of the colonias
- The homeless

In addition to the Department's own efforts to address the affordable housing needs of extremely low income Texans, the 78th Texas Legislature passed a rider to TDHCA's appropriation that requires the housing finance division (which includes the HTC, HOME, HTF, Section 8, Multifamily Bond, and Single Family Bond programs) to adopt an annual goal to apply a minimum of $30 million of the Division's total housing funds toward housing assistance to individuals and families earning less than $13,000 for a one-person household, $16,000 for a two-person household, $17,000 for a three-person household, $19,000 for a four-person household, and $21,000 for a five-person household—for each additional person adding $1,500. The rider also mandates that no less than 20 percent of the division's funds be spent to serve very low income individuals and families: those at or below 60 percent of area median family income (AMFI).

Working with a focus group comprised of advocacy groups and industry associations, the Department determined that the following activities will be the basis for reaching the $30 million goal:

- Tenant-based rental assistance
- Owner-occupied rehabilitation
- Housing vouchers (rental/homeownership)
- Rental housing development with incentives to set aside units for 0 to 30 percent AMFI
- Point incentives to applicants to serve 0 to 30 percent AMFI
- Continued marketing and encouragement for organizations to serve 0 to 30 percent AMFI

TDHCA will continue to explore the use of funds outside the traditional housing programs allocation (e.g., de-obligated funds, bond fees) for activities that serve 0 to 30 percent of AMFI. The Department will also explore funding that will allow a cash flow subsidy grant to work with existing development programs.

Poverty Solutions

TDHCA has an important role in addressing Texas poverty. The Department seeks to reduce the number of Texans living in poverty, thereby providing a better future for all individuals. This means targeting resources at those with the greatest need and aiming to provide long-term solutions to the problems facing people in poverty. The Department provides low income persons with energy-related, emergency, and housing assistance to meet the basic necessities.

Homeless persons are considered a priority group for housing-related funding. The priorities also target households at 80 percent or less of median income, particularly those at 0–50 percent of AMFI; much of this population group can be considered “at risk” of homelessness.

For households or individuals to contemplate long-term solutions to poverty, basic needs such as shelter, food, energy costs, child care, health and human services, transportation, job training, and substance-abuse prevention must be addressed. Therefore, the programs administered by TDHCA that address these needs are vital to the transition from poverty.

Public assistance and social service programs have shifted their focus over the last decade. The new emphasis centers on reducing dependency and increasing self-sufficiency. Assisted housing can no longer have a pure income-maintenance orientation. In light of this new emphasis, housing and community development resources that address poverty should emphasize self-sufficiency. The self-sufficiency approach provides incentives for assisted housing residents who are willing to undertake a set of activities intended to lessen dependency. These activities should be tailored to meet the needs and capabilities of each individual household and can be provided through the housing deliverer or through human service providers.

Experience has shown that segregating low income persons in an insulated community perpetuates the cycle of poverty and often creates slums. A second anti-poverty theme centers on mobility—insuring that residents of assisted housing have access to jobs, schooling, public safety, and role models. Rental assistance combined with counseling and support services can be used to increase mobility. Scattered site production can also be used to encourage mixed-income housing. TDHCA provides tenant-based rental assistance options through several of its programs, specifically the HOME Program and Section 8.

An asset development approach to addressing poverty emphasizes the use of public assistance to facilitate long-term investments, rather than incremental increases in income. In housing, this can include the establishment of equity through homeownership. Several TDHCA programs introduce the option of homeownership to lower income populations: the HOME Program offers down payment and closing cost assistance, and the Single Family Bond Program offers below-market mortgage loans coupled with down payment assistance.

Comprehensive community development can be used to address the complex and interrelated problems of distressed neighborhoods. It involves recognizing the many levels of need in a community and addressing these needs with housing, community development, economic development, and social service resources. When these resources are used in conjunction, they can improve the quality of life in a community and engender long-term changes. These “changes of condition” may deal with alcohol and substance dependency, mental and physical health, nutrition, child care and parenting, life skills, general education and work skills, and criminal behavior. “Changes of condition” may also mean providing an influx of non-poor households to serve as role models and shift the nature of the environment. For those in housing and community development, the recognition that collaboration between and among private sector developers, builders and lenders, and non-development resources (such as local governments and social-services providers) is essential. For those in human services, the change may involve a subtle shift in focus away from crisis intervention and towards preventive measures; working with the family on a case-basis, rather than individual members of the family; and, most importantly, providing services within the context of community development.

Serving Special Needs Populations

Special needs populations include persons with alcohol and/or drug addictions, colonia residents, persons with physical and/or mental disabilities, victims of domestic violence, elderly populations, persons with HIV/AIDS, homeless populations, and migrant farmworkers. Because of the unique challenges associated with the housing needs of these varying populations, a considerable level of planning and consumer-need-based focus is required.

Advocates for the elderly and persons with disabilities continue to stress that the primary goal of these populations is to live independently and remain in their own homes. Access to rehabilitation funds for single family housing—to perform minor physical modifications such as extra handrails, grab bars, wheelchair-accessible bathrooms, and ramps, thus making existing units livable and providing a cost-effective and consumer-driven alternative to institutionalization—was considered as a priority. Likewise, the availability of rental vouchers that provide options beyond institutional settings was found to be a high priority.

Olmstead

In June of 1999, the Supreme Court of the United States affirmed a judgment in the *Olmstead v. L.C. and E.W.* lawsuit, which has had far-reaching effects with states regarding services for individuals with disabilities. The *Olmstead* decision upheld Title II of the Americans with Disabilities Act (ADA) and applied it to access to services in the most integrated setting for the plaintiffs in the case. Title II of the ADA proscribes discrimination in the provision of public services, which specifies, *inter alia*, that no qualified individual with a disability shall, “by reason of such disability,” be excluded from participation in, or be denied the benefits of, a public entity’s services, programs, or activities. Congress instructed the Attorney General to issue regulations implementing Title II’s discrimination proscriptions, and one such regulation, known as the “integration regulation,” requires a “public entity to administer programs in the most integrated setting appropriate to the needs of qualified individuals with disabilities.”

The Court went further in their opinion to state that it acknowledged that Congress found that discrimination against people with disabilities includes segregation, isolation, and institutionalization, and that under the ADA, an individual with disabilities has the legal right to be served in the most integrated setting. The court stated that the reasonable modifications standard for the ADA would be met if the state has a comprehensive, effectively working plan for persons and a waiting list that moved at a reasonable pace, not controlled by the state's endeavors to keep institutions fully populated. The Court stated, "Confinement in an institution severely diminishes the everyday life activities of individuals, including family relations, social contacts, work options, economic independence education advancement, and cultural enrichment."

With the advent of the *Olmstead* decision, the Health and Human Services Commission (HHSC) initiated the Promoting Independence Initiative and appointed the Promoting Independence Advisory Board, as directed by then-Governor George Bush's Executive Order GWB 99-2. The Promoting Independence Advisory Board (PIAB) met during FY 1999 and FY 2000 and assisted the HHSC in creating the state's response to the *Olmstead* decision. This was accomplished with the development and implementation of the Promoting Independence Plan. This plan highlights the State's efforts to assist those individuals desirous of community placement, appropriate for community placement as determined by the state's treatment professionals, and who do not constitute a fundamental alteration in the state's services, to live in the community.

During the 77th Session of the Texas Legislature, SB 367 was passed, which renamed the Promoting Independence Advisory Board as the "SB 367 Interagency Task Force on Appropriate Care Settings for Persons with Disabilities." The Commissioner of Health and Human Services appoints the SB 367 Task Force and its presiding officer, and determines the number of task force members, who include representatives of appropriate health and human service agencies, related work groups, consumer and family advocacy groups, and providers of services. A representative from TDHCA has been a voting member of the PIAB and SB 367 Task Force since their inception.

TDHCA has taken a strong leadership role in the provision of funding for rental assistance to address the housing needs of persons looking for community-based alternatives to institutionalization. The Department committed $4,000,000 in rental assistance from the HOME Program for the FY 2003-2004 biennium. Additionally, in FY 2002, TDHCA received 35 rental vouchers to administer to the *Olmstead* population as part of a national pilot program called "Project Access." To date, all 35 Project Access vouchers have been issued, and of the 35, 23 voucher recipients have made the transition from a nursing facility into their own homes.

Integrated Housing Rule

In 2002, an issue of particular concern for advocates for persons with disabilities involved the Department's policies related to integrated housing. Integrated housing, as defined by SB 367 and passed by the 77th Texas Legislature, is "housing in which a person with a disability resides or may reside that is found in the community but that is not exclusively occupied by persons with disabilities and their care providers." The Department, with the assistance of the TDHCA Disability Advisory Committee, developed an integrated housing rule to address this concern. On November 14, 2003, the TDHCA Board approved an Integrated Housing Rule that was to be utilized by all Department housing programs. Below is a synopsis of the draft rule:

- A housing development may not restrict occupancy solely to people with disabilities or people with disabilities in combination with other special needs populations.

- Large housing developments (50 units or more) shall provide no more than 18 percent of the units of the development set aside exclusively for people with disabilities. The units must be dispersed throughout the development.
- Small housing developments (less than 50 units) shall provide no more than 36 percent of the units of the development set aside exclusively for people with disabilities. These units must be dispersed throughout the development.

- Set-aside percentages outlined above refer only to the units that are to be solely restricted for persons with disabilities. This section does not prohibit a property from having a higher percentage of occupants that are disabled.
- Property owners may not market a housing development entirely, nor limit occupancy to, persons with disabilities.

Exceptions to the above rule:

- Scattered site development and tenant-based rental assistance is exempt from the requirements of this section.
- Transitional housing is exempt from the requirements of this section, but must be time-limited, with a clear and convincing plan for permanent integrated housing upon exit from the transitional situation.
- This section does not apply to housing developments designed exclusively for the elderly.
- This section does not apply to housing developments designed for other special needs populations.
- The Board may waive the requirements of this rule to further the purposes or policies of Chapter 2306, Texas Government Code, or for other good cause.

SELF-HELP INITIATIVES

Community-based self-help is an age-old tradition that extends far beyond the implementation of the first government housing programs. Lower income households have used self-help and incremental construction techniques to house themselves throughout history. Within the administrative context of government, self-help techniques, such as volunteer labor and the use of innovative materials and technologies, become a resource that can be used to encourage people’s efforts and extend the reach of the government dollar.

Self-help relies almost exclusively on the participation of local communities and residents in addressing problems. It can be defined as any activity for which a community can undertake itself that it would otherwise pay outsiders to complete. When applied to housing and community development, the concept of self-help assumes that (1) the most valuable resources available are those in place within a community and (2) the key to increased production is reducing needs through innovation and volunteerism. Using the self-help approach, the State assumes the role of a facilitator that assists the community within the framework of its local resources and needs, rather than a provider that funds projects according to pre-determined program guidelines.

Self-help can result in significant cost savings through reduced overhead and reduced markups of intermediaries, the use of existing assets, and the substitution of volunteers for paid labor. Communities that use conventional grant programs typically hire outside experts to determine the amount of subsidy required to finance a project. Using the self-help approach, the amount of outside assistance requested for a project is determined locally after the community has established what can be completed independently. The Department currently funds these successful self-help initiatives: Colonia Self-Help Centers and the Texas Bootstrap Loan Program.

Colonia Issues

The Office of Colonia Initiatives (OCI) was created by the Department to administer and coordinate efforts for the enhancement of living conditions for colonias in Texas. OCI plays a vital role in addressing the problems of our state's colonias through partnerships with other state and federal agencies along the Texas-Mexico border region, as well as those in the for-profit and nonprofit sectors. The following are specific concentrated on-site technical activities currently underway:

- Increased affordable housing opportunities (i.e., low-interest-rate loans, new construction, reconstruction, rehabilitation, surveying and platting)
- Community development activities
- Conversion of contracts for deed to conventional mortgages with transfer of title and homeownership education
- Construction education and assistance
- Tool library access
- Access to adequate infrastructure

Homeownership and Homeownership Counseling

Exploring innovative approaches to financing homeownership, such as individual development accounts (IDAs), the use of community development financial institutions (CDFIs), the creation of innovative lending products, as well as the proliferation of quality homebuyer education, will aid in the Department's efforts to increase homeownership. Ultimately, making homeownership a reality for lower income Texans is the underlying theme for several TDHCA programs. Every step toward self-sufficiency provided to consumers gets them closer to the realization of this goal.

Expanding homeownership opportunities for very low, low, and moderate income households is a major objective of the Department. Along with the Department, a growing number of lenders and affordable housing professionals recognize that it takes more than flexible underwriting in lending to expand homeownership for this traditionally under-represented population. For the past three decades, homeownership counseling has been an integral part of affordable lending in the United States. It has been demonstrated that counseling better-prepares borrowers to recognize and accept the responsibilities that come with owning a home. By assisting borrowers in obtaining a home they can truly afford to purchase and maintain, homeownership counseling has been credited with stabilizing families and neighborhoods while, at the same time, reducing the risk of default for lenders.

The Department believes that offering homebuyer education/counseling enhances the ability and confidence of lenders, borrowers, and policymakers to effectively make full use of the Department's lending programs. To improve access to local homebuyer education providers, TDHCA collaborates with several partners to implement the Texas Statewide Homebuyer Education Program (TSHEP). To ensure uniform quality of the homebuyer education provided throughout the state, TDHCA contracted with the Neighborhood Reinvestment Corporation to teach local nonprofit organizations the principles and applications of comprehensive pre- and post-purchase homebuyer education and to certify participants as providers. In 2003, 114 attendees were present at four training sessions held in Austin, Dallas, and Galveston.

FAIR HOUSING ISSUES

The Texas Fair Housing Act of 1989 enables the State to remedy discriminatory public policies affecting housing affordability and access. The act prohibits discrimination against individuals in their pursuit of homeownership or rental housing opportunities based on race, color, national origin, sex, religion, familial status, and physical or mental disabilities. Recent Department activities or current objectives relating to fair housing follow:

- Require compliance with the Texas Fair Housing Act in TDHCA-administered programs
- Provide fair housing training to TDHCA staff and governing board members
- Distribute fair housing brochures and information to recipients of housing program funds and make information available to the public upon request
- Coordinate fair housing efforts with the Texas Commission on Human Rights (TCHR), which was created under the Fair Housing Act to directly address public grievances related to fair housing.

  Complaints will be handled in two ways:
  - *TDHCA Housing Sponsor Report* (submitted annually and due by March 1): A list of all properties responding affirmatively that they have had a fair housing complaint will be submitted to TCHR.
  - Written complaints: All written complaints will be handled in a manner outlined in the Texas Government Code. If fair housing issues are involved, the complaint will be forwarded to TCHR.
- Enforcement of the Section 8 Admittance Policy. In June 2000, TDHCA appointed a Section 8 Task Force and charged it to develop a policy for expanding housing opportunities for Section 8 voucher and certificate holders in TDHCA-assisted properties. The policy adopted by the TDHCA Board is as follows:
  - Managers and owners of HTC properties are prohibited from having policies, practices, procedures, and/or screening criteria that have the effect of excluding applicants because they have a Section 8 voucher or certificate.
  - The verification of such an exclusionary practice by TDHCA on the part of the owner or manager will be considered a violation and will result in the issuance of a Notice of Violation and, if appropriate, issuance of a Form 8823 to the Internal Revenue Service.
  - Any violation of program requirements relative to this policy will also impact the owner’s ability to participate in future TDHCA programs.

The Department has adopted rules that mirror this policy in accordance with §2306.269, Government Code, at 10 TAC §1.14.

In addition, through the monitoring of TDHCA-funded developments, the Department requires compliance of all applicable state and federal housing laws including Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act, and the Texas Architectural Barriers Act (§2306.514, Texas Government Code).

ENERGY EFFICIENCY

Energy and water costs are often the largest single housing expense after food and shelter for lower income families. Utility costs typically represent 13 to 44 percent of lower income annual gross incomes and account for nearly one-fourth of total housing costs. Proper use of existing technologies and management practices can reduce these utility costs significantly at a relatively low initial cost, thereby greatly increasing housing affordability for low and moderate income families. Studies have shown that the cost of energy is a major contributing factor to housing abandonment and high mobility.

Through programs that encourage energy efficiency, help consumers control energy costs through education, and provide direct financial assistance for utilities or weatherization, TDHCA addresses an often overlooked expense of housing. In addition, applicants for Department programs are encouraged to consider energy efficiency in their developments.

ENCOURAGE LOCAL AFFORDABLE HOUSING INITIATIVES

The greatest understanding of housing needs is found at the local level. TDHCA concurs that localities should implement specific regulatory reforms related to affordable housing due to their greater awareness of local economic, demographic, and housing conditions; at the same time the State also believes that it should provide some form of guidance. As the “trustee” of funding for these local entities, it is incumbent upon the State to make information available to local governments regarding potential avenues for the provision of affordable housing. It is important to note that TDHCA does not have regulatory authority over the housing and building industry except for certain developments financed with TDHCA funds. Additionally, as a governmental entity, the Department cannot lobby or attempt to influence the policies related to the governing of the State of Texas. However, TDHCA can act as an information resource and will continue to engage in actions to assist localities in overcoming unnecessary regulatory barriers that may increase the cost of housing.

In 1997, the 75th Texas Legislature enacted Senate Bill 1852, which created the Texas Affordable Housing Task Force. The Task Force was comprised of eleven gubernatorial appointees representing the private sector, municipalities, code officials, public and community-based housing organizations, and the general public. The following information comes from the *Report of the Texas Affordable Housing Task Force* published in December 1998.

The Affordable Housing Task Force’s purpose was to evaluate and identify federal, state, and local government regulations and policies that unnecessarily increase the cost of constructing or rehabilitating housing, create barriers to affordable housing for low income Texans, and limit the availability of affordable housing. Specifically, the Task Force was asked to evaluate the following: zoning provisions, deed restrictions, impact fees and other development fees, permitting processes, restrictions on the use of affordable housing options, building codes, overlapping government authority over housing construction, environmental regulations, and practices that impede access to affordable housing and finance opportunities.

It was noted by the Task Force that while governments usually pass ordinances, regulations, and laws that are intended to have a positive effect on the community at large, the new regulations may have an adverse effect on the future of housing in their own community. While a single law or ordinance may only add $100 to the price of a home, layering or regulations may create a sharp increase in the final cost of a home or an actual shortage of housing for those low and moderate income consumers. Studies show that even small price increases can affect affordability. For example, the Real Estate Center at Texas A&M University estimates that a $1,000 increase in the cost of a median-priced home will prevent approximately 27,000 Texas households from qualifying to buy the home. Below is a brief synopsis of observations of the Task Force:

- *Zoning provisions*: Because municipalities have zoning authority, they are in the position to shape the type and direction of growth within their boundaries. Ordinances may be passed to encourage affordable housing through measures such as lowering minimum lot sizes, decreasing building set-back requirements, and lowering minimum square footages of homes. However, they can also pass ordinances that drive land and construction costs up to the point that affordable housing cannot be built. Unfortunately, the attitudes of municipalities can be influenced by attitudes of fear and distrust with regard to affordable housing. Testimony to the Task Force indicated that neighborhood groups often oppose affordable housing projects because of concerns that they will drive down property values, increase crime, and put a strain on local resources including schools and roads.
- *Deed restrictions*: Property owners may place a variety of deed restrictions on the development of property. Common deed restrictions include minimum square footage requirements, the type of construction and materials that must be used, and requirements for other amenities such as stone fences, landscaping, etc. They are primarily used to protect property values in a neighborhood by ensuring that certain minimum standards are met. Deed restrictions may be placed on properties through various means including neighborhood associations or property owners before the sale, subdivision, or development of an individual's own property.
- *Impact fees and development fees*: In the mid 1980s, many Texas cities experienced rapid growth. As a consequence, cities encountered difficulties in meeting the demand for city services and infrastructure. To address this problem, legislation authorizing impact fees was passed during the 1987 legislative session. As a condition of permit approval, the legislation authorized the assessment of fees to pay for infrastructure costs. The impact fee bill validated municipal impact fees, specified the type of projects for which the fees could be charged, required municipalities to account for impact fees that were collected, and allowed for public input into the process.
- *Restrictions on affordable housing options*: Construction options have increased over the last 10 years with the advent of new materials and new housing options such as manufactured housing. Many of these alternatives could have a positive impact on the availability of affordable housing. Currently many of these options are viewed with distrust or are not well known by the general public. With regard to alternative building materials, the effectiveness of these new materials may be able to lower the cost of construction without sacrificing quality, but many municipalities view them with suspicion. Ultimately, municipalities will have to review the appropriateness of allowing these less-expensive materials to be used in affordable housing. Manufactured homes represent

30 percent of the new homes built in Texas in 2000, according to the Texas Real Estate Research Center. While these homes are finding their way into the main stream of the housing market, many new owners find that they face code concerns and the fear of declining property values from their local governments.

- *Building codes*: The adoption of a single code, the Uniform Building Code (UBC), would have several advantages such as reducing costs for manufacturing, architectural plans, engineering, personnel, materials, and inspections. Currently, cities have the authority to adopt building codes and set minimum construction standards. In general, cities adopt one of several nationally-recognized codes, but they may also adopt code amendments to address specific local problems and conditions. In major metropolitan areas of the state, there are adjacent cities that have adopted different codes and amendments. Varying code interpretations can also cause problems; different inspectors often interpret the same code differently. Houses that are built to the same specifications could be passed by one inspector and failed by another. The differing codes and interpretations can be confusing, time-consuming, and costly to builders.
- *Overlapping government authority over housing construction*: In some cases, more than one government entity has authority over a specific part of the building and development process. There are times when this overlapping causes delays and adds to the costs of construction.
- *Environmental regulations*: There are several state and federal regulations that have been passed to protect the environment. At the federal level, such regulations include the Endangered Species Act, the National Pollutant Discharge Elimination System, and the Wetlands regulations. In Texas, rules to protect the environment are promulgated by the Texas Commission on Environmental Quality (TCEQ). These include rules for the installation of septic systems and for development over the Edwards Aquifer. The restrictions associated with the regulations can add to the cost of development.

Capacity Building

While the evidence of interest in producing affordable housing is easily documented, the actual capacity of organizations to produce such housing is not as clear. A lack of organizational capacity, especially in the harder-to-reach areas of the state, may explain the hesitancy of smaller communities to attempt to address affordable housing issues.

TDHCA offers capacity building technical assistance to organizations interested in addressing the affordable housing needs in their community. The Department aims to increase the capacity of organizations by providing access to information and trainings on topics such as strategic and business planning, financial and asset management, board development, outcome measures, coordination, collaboration, networking, and partnership development. The Department hopes to empower organizations to be more competitive in applying for not only TDHCA funding, but also other available federal, state, and local funds.

Local Opposition

Resistance by residents to new development in their neighborhoods is prevalent throughout Texas. It is difficult to dispel the common misperception that affordable housing equates to crime-ridden neighborhoods that will lower the surrounding property values. Even mixed-income properties, such as those funded by Housing Tax Credits, can experience significant opposition.

To address these issues, a workgroup consisting of TDHCA staff, developers, neighborhood groups, local governments/officials, and housing advocates has been convened to review policies and procedures regarding public input. In the short term the group will focus on rulemaking related specifically to the tax credit and bond programs, as well public input considered by the Board in relation to a proposed housing development. In the long term, the group will discuss and work through larger policy questions that will culminate into a public input policy that will be submitted to the Board for their consideration.

The Department, with the passage of Senate Bill 1664 by Averitt, will also have the resources to establish an affordable housing research and information program in which the Department shall contract for

- periodic market studies to determine the need for housing for families of extremely low, very low, and low income in census tracts throughout the state;
- research from qualified professionals to determine the effect of affordable housing developments on property values, social conditions, and quality of life in surrounding neighborhoods;
- independent research in affordable housing design and development approaches that enhance community acceptance of affordable housing and improve the quality of life for the residents of the housing;
- public education and outreach efforts to assist the public in understanding the nature and purpose of affordable housing and the process for public participation in the administration of affordable housing programs.

TDHCA believes that through education and outreach, the Department can help mitigate opposition to affordable housing.

COMPLIANCE MONITORING

It is the function of the Portfolio Management and Compliance Division to oversee the development and enforcement of procedures to ensure compliance with program requirements and contract representations. This is accomplished through program implementation, program development, contract administration, technical assistance (including workshops and other training opportunities), inspections, field visits, and on-going subrecipient monitoring, including long-term compliance.

The Compliance Monitoring Section monitors rental developments during construction and the long-term compliance phases of the various rental housing programs administered by TDHCA. The Compliance Monitoring Section is also responsible for the post-construction and post-rehabilitation monitoring of multifamily properties. Division responsibilities include tracking construction deadlines as well as processing construction extensions. Staff processes deed restriction documents and amendments. Staff is responsible for monitoring long-term occupancy requirements established in restrictive use agreements, program rules, and application representations. During the affordability period, compliance monitors verify that the income of tenants and the rent charged for housing is at or below limits established by programs such as the Affordable Housing Disposition Program (AHDP), Housing Tax Credit Program, HOME Program, Tax-Exempt Multifamily Bond Program, and Housing Trust Fund. Examples of monitoring activities include, but are not limited to, inspections of rental developments during construction and the affordability period, monitoring to determine compliance with program requirements to ensure developments remain affordable, and analysis of management activities. Compliance monitors review necessary records to assure adherence to program requirements and terms of the deed restrictions on single family or multifamily affordable rental housing developments. Monitors perform on-site and desk monitoring reviews and collect annual Fair Housing Sponsor Reports as required under 2306.0724.

POLICY SUMMARY

Table 1A summarizes key policy initiatives described in the previous section and indicates which programs within the Department meet the priority objectives.

Table 1A: Programs and Policy Initiatives

	Preservation of Affordable Housing	Home-ownership	Rural Markets	Extremely Low-Income Households	Special Needs	Colonias
HOME Program						
Owner-Occupied Housing Assistance	X	X	X	X	X	X
Homebuyer Assistance		X	X		X	X
Tenant-Based Rental Assistance				X	X	
Rental Housing Preservation	X		X

Community Services Block Grant Program			X	X	X	
Community Food and Nutrition Program				X		
Comprehensive Energy Assistance Program			X	X	X	
Weatherization Assistance Program			X	X	X	

78TH TEXAS LEGISLATIVE SESSION OVERVIEW

The following is a summary of legislation tracked during the 78th Legislature. Only bills that amend TDHCA's enabling statute, otherwise directly affect the Agency, or are of major interest are addressed.

SENATE BILLS

SB 264 by Lucio

This bill continues TDHCA in existence until September 1, 2011 and makes other changes. A section-by-section summary of the bill is as follows:

- *Section 1:* Corrects a bill drafting error made in the House.
- *Section 2:* Removes the community development division from TDHCA's organizational structure
- *Section 3:* Extends TDHCA's existence until September 1, 2011
- *Section 4:* Adds subsection (f) to Section 2306.0661 to require the board to adopt rules governing the topics to be covered at public hearings. The rules must require TDHCA to consider the following topics in relation to a proposed housing development: the developer's market study; the location; the compliance history of the developer; the anticipated impact on local school districts; the financial feasibility; the appropriateness of the development's size and configuration in relation to the housing needs of the community in which the development is located; the development's proximity to other low income housing developments; zoning and other land use considerations; the availability of adequate public facilities and services; and other appropriate topics.
- *Section 5:* Amends Section 2306.0721(c) to add the colonia biennial action plan to the SLIHP.
- *Section 6:* Amends Section 2306.0722(a) to require consultation with the members of the Colonia Residents Advisory Committee before adopting the SLIHP.
- *Section 7:* Adds Section 2306.082 relating to negotiated rulemaking and Alternative Dispute Resolution by which TDHCA is required to encourage the use of negotiated rulemaking procedures under Chapter 2008 as well as appropriate alternative dispute resolution procedures under Chapter 2009 to assist in the resolution of internal and external disputes. TDHCA is required to designate a trained person to act as the coordinator.
- *Section 8:* Amends Section 2306.111(c) to provide that nonprofit providers of affordable housing, including CHDOs, are eligible to apply for HOME funds as well as for profits and to prohibit TDHCA from giving preference to nonprofits except as required by federal law. In addition, the section is amended to exempt from the regional allocation process funds reserved for contract for deed conversions or for set-asides mandated by state or federal law as long as each such allocation does not exceed 10 percent of the total allocation (TDHCA request). The section is also amended to add subsection (i) to require TDHCA's executive director to designate an employee to act as the information officer and liaison with the public concerning each HOME, HTF, and HTC application.
- *Section 9:* Amends Section 2306.111(d) to require TDHCA to allocate HOME and HTF funds and low income housing tax credits to all "urban/exurban" and rural areas of each uniform state service region. Sections 2306.111(e) and (f) are similarly amended to add urban/exurban and rural areas to the SLIHP and report and to the funding priorities. Subsection (g) is amended to require TDHCA to establish funding priorities for all urban/exurban and rural areas of each uniform state service region to ensure that funds are awarded to project applicants who are best

able to meet recognized needs for affordable housing as determined by TDHCA rule. (Please note Section 30 of the bill with respect to the "urban/exurban" requirement.)

- *Section 10:* Section 2306.1113, "Ex Parte Communications," is amended to remove the members of EARAC from the general prohibition and to add Subsections (a-1) and (a-2) to permit any TDHCA employee to communicate, orally or in writing, about an application with the applicant or a related party, or a lobbyist employed by either, and any person who is active in the construction, rehabilitation, ownership, or control of the proposed project during the application cycle as long as the communication is restricted to technical or administrative matters, is received at TDHCA offices during business hours, and a specified record is maintained of the communication for board review.
- *Section 11:* Section 2306.1114, "Notice of Receipt of Application or Proposed Application," is added to require TDHCA not later than the 14th day after an application or proposed application for funds from the HOME or HTF programs or for tax credits under the HTC program to provide written notice, as specified in the section, of the filing of the application or proposed application to the US representative who represents the community containing the development, members of the Legislature, the presiding officer and affected member of the governing body, the superintendent and presiding officer of the school district board of trustees, and any neighborhood organizations on record with the state or county. Among other things, the written notice must include the name and contact information of the employee designated by the executive director of TDHCA to act as the public information officer and liaison concerning the application.
- *Section 12:* Section 2306.185 is amended to start the affordability period when construction is completed and to require the housing development to comply with the requirements of Section 2306.186.
- *Section 13:* Adds Section 2306.186 to establish reserve accounts for repairs. The bill adds Section 2306.186 to the Government Code to require each developer who receives TDHCA assistance (state or federal, including HTC) for a multifamily rental housing development that contains 25 or more units to deposit annually into a reserve account maintained by the first lien holder or bank trustee for the year 2004 not less than $150/unit per year for units one to five years old and not less than $200/unit per year for units six or more years old. For each year after 2004, at least $150 is required to be deposited annually. The bill provides that the LURA must address the deposit requirements, as specified in this section, and which may continue until the affordability period specified in the LURA ends. In addition, the bill provides that if the first lien holder has not required the establishment of a reserve account for multifamily housing, the development owner is required to set aside a repair reserve amount as a reserve for capital improvements.

  Beginning with the 11th year after the awarding of any financial assistance for the development by TDHCA, an owner is required to contract for a third party physical needs assessment at appropriate intervals that are consistent with lender requirements or as specified in the section. The owner is required to submit the third-party needs assessment to TDHCA as well as any response to the assessment, and repairs made in response, and information on any necessary changes to the required reserve based on the assessment. TDHCA is authorized to complete the necessary repairs if owner fails to do so and the owner has to pay for those repairs directly or through a reserve account. If TDHCA is notified of health and safely violations in the report, TDHCA may complete the repairs and pay for them through a reserve account.

The section ends the requirement for reserve accounts to be maintained when there is no longer a first lien lender and provides that the reserve account requirements do not apply to a development for which an owner is required to maintain a reserve account "under any other provision of federal or state law."

TDHCA is required to adopt specified rules not later than December 1, 2003, including those relating to the transfer of money in the reserve accounts to TDHCA to fund necessary repairs and that define the scope of TDHCA's oversight of reserve accounts and the repair process.

TDHCA is required to assess administrative penalties on owners who fail to conduct the inspection and the identified repairs in the same manner as in Sec. 2306.6023 (relating to manufactured housing) in an amount computed by multiplying $200 by the number of dwelling units. The penalty is paid to TDHCA and the Attorney General is required to assist in the collection of the penalty and the enforcement of the reserve account requirements.

- *Section 14:* Amends Section 2306.252 to make the technical, clean-up changes.
- *Section 15:* Adds Section 2306.359, "Issuance of Private Activity Bonds" to require TDHCA to evaluate an application for the issuance of private activity bonds using a point system based on criteria including those regarding the income level of tenants; the rent levels of the units; the level of community support for the application; the period of guaranteed affordability; the cost per unit; the size, quality, and amenities of the units; the services to be provided to tenants of the development; the commitment of development funding by local political subdivisions that enables additional units for individuals and families of very low income; and other criteria developed by the board; and imposing penalties on applicants who have requested extensions of deadlines relating to developments supported by private activity bonds in the application round preceding the current round. The section requires TDHCA to make the details of the scoring system used available on its website. The new section also requires TDHCA to underwrite applications by determining that the general contractor's profit, overhead, and general requirements are within the maximum limit published by TDHCA; that the developer fee does not exceed the maximum allowed by TDHCA; and, if applicable, the amount of tax credits available to the proposed development. TDHCA must attach the greatest weight to scoring and underwriting criteria that will result in an issuance of private activity bonds for developments serving the lowest income tenants and produce the greatest number of high quality units committed to remaining affordable to qualified tenants for extended periods*.* The new requirements described above apply only to applications for the allocation of the state ceiling set aside for TDHCA in a year beginning on or after January 1, 2004.
- *Section 16:* Amends Section 2306.589(c) to remove the requirement that TDHCA reimburse the Colonia Initiatives Advisory Committee.
- *Section 17:* Amends Section 2306.6702(a)(5), "At-risk development" to include a development that has received an equity incentive to the list of eligible developments and to include the HTC program to the list of eligible federal programs.

Amends Section 2306.6702(a)(10) to require the QAP to give preference to developments that, when practicable and feasible based on documented, committed, and available third-party funding sources, serve the lowest income tenants and produce the greatest number of high quality units committed to remaining affordable to any income eligible tenant under the HTC program, rather than giving a preference to developments that serve the lowest income tenants and remain affordable for the longest economically feasible period;

Amends Section 2306.6702(a)(16), "Unit" to remove the requirement that living and eating facilities be separate.

- *Section 18:* Amends Section 2306.6703, "Ineligibility for Consideration" by adding subsections (3) and (4) to expand the prohibition on submitting a HTC application to include an applicant that proposes to construct a new development that is located one linear mile or less from a development that serves the same type of household as the new development; has received an allocation of tax credits for new construction at any time during the preceding three-year period; and has not been withdrawn or terminated from the HTC program. An HTC application is also ineligible if the proposed development is located in a municipality, or if outside the municipality in a county that has more than twice the state average of units per capita supported by housing tax credits or private activity bonds, unless the applicant has obtained the prior written approval of the governing body and has included in the application a written statement of support from the governing body of the municipality or county authorizing the application. The prior municipal approval requirement does not apply to a development <u>in a municipality</u> that is using federal HOPE VI funds; locally approved funds received from a public improvement district or a tax increment financing district; HOME funds provided to the state; CDBG funds provided to the state and "participating jurisdictions; or that is located in a county with a population of less than one million.
- *Section 19:* Amends Section 2306.6704 to require a HTC applicant as part of the pre-application process to provide evidence that the applicant has provided notice of the filing of the application to any neighborhood organizations on record with the state or county, the superintendent and presiding officer of the board of trustees of the school district, the presiding officers of the governing bodies of the municipality and the county and all elected members; and the state senator and state representative of the district containing the development.
- *Section 20:* Amends Section 2306.6705 to require evidence in the HTC application of the notices sent to the same parties that were required to be notified in the pre-application process.
- *Section 21:* Adds Section 2306.67055, "Market Analysis" to require a HTC market analysis to be prepared by a market analyst approved by TDHCA and to include an assessment of other developments that are supported by tax credits within the market area. TDHCA is required to develop, through the QAP, a process for approving market analysts and a methodology for determining the market area.
- *Section 22:* Amends Section 2306.6710 to re-prioritize the allocation of tax credits. The point system is required to rank the following factors in the following descending order: financial feasibility of the development "based on the supporting financial data required in the application that will include a project underwriting pro-forma from the permanent or construction lender;" "quantifiable community participation" based on written statements from neighborhood organizations on record with the state or county; income levels of the tenants; the size and quality of the units; the commitment of development funding by local political subdivisions; the "level of

community support" evaluated on the basis of written statements from state elected officials (changed from written support from local and state elected officials); the rent levels of the units; the cost by square foot; and the services to be provided to the tenants of the development.

This section is also amended to add to the penalty on requesting extensions to include penalties on "a developer or principal of the applicant that has been removed by the lender, equity provider, or limited partners for its failure to perform its obligations under the loan documents or limited partnership agreement."

Section 2306.6710(d) is also amended to require TDHCA to underwrite tax credit applications to determine the financial feasibility of the development and an appropriate level of housing tax credits. In determining the appropriate level of credits, TDHCA is required to determine that the cost of the development does not exceed acceptable cost parameters as adjusted for inflation and as established by historical final cost certifications of all previous HTC allocations for the county in which a development is to be located; if certifications are unavailable for the county, the MSA in which the development is to be located; or if neither certifications are available, the uniform state service region.

Section 2306.6710(e) is amended to require the award of preference points to developments, that when practicable and feasible based on documented, committed, and available third-party funding, serve the lowest income tenants "per housing tax credit" if the development is to be located outside a qualified census tract and produce for the longest economically feasible period the greatest number of high quality units committed to remaining affordable to any tenants who are income-eligible under the HTC program.

Subsection (f) is added to Section 2306.6710 to govern TDHCA's evaluation of the level of community support under subsection 2306.6710(b), as amended. TDHCA is required to give positive points for positive written statements received; negative points for negative written statements received; and zero points for neutral statements received. TDHCA is also required to give equal weight to each written statement received.

- *Section 23:* Amends Section 2306.6711(b) to increase the amount of credits that the board may allocate to $2 million, instead of $1.6 million, in a single application round. Subsection (f) is added to only allow the board to allocate tax credits to more than one development in a single community in the same calendar year if the developments are or will be located more than one linear mile apart and only if the community is contained within a county with a population exceeding one million.
- *Section 24:* Amends Section 2306.6716(b) to remove the date on which TDHCA is required to publish an updated schedule of application fees.
- *Section 25:* Amends Section 2306.6717(b) to require TDHCA to also make available on its website submitted applications and applications approved for underwriting and recommended to the board and to provide information on all of the website information to locally affected community groups, local and state elected officials, newspapers, and for-profit organizations in addition to local housing departments, nonprofit organizations, and on-site property managers.

- *Section 26:* Section 2306.6725(b) is amended to require TDHCA to reward HTC applicants that locate the development in a census tract in which there are no other existing developments supported by housing tax credits.
- *Section 27:* Section 1372.0231(b) of the Government Code, relating to the 25 percent of the state ceiling available exclusively to TDHCA for qualified residential rental project bonds, is amended to require the Bond Review Board to grant reservations at the direction of TDHCA as provided by Section 2306.359 and in a manner to ensure the set-aside amount is used for proposed projects throughout the state and that not more than 50 percent of the set-aside is used for proposed projects in qualified census tracts, instead of requiring the BRB to determine the order by lot. Subsection (h) is added to make clear that such allocations are subject to review and approval by the BRB.
- *Section 28:* Section 1372.0321 is amended to reconcile the two amendments made to this section last session and to provide that for qualified residential rental project issues, BRB is required to give first priority to projects in which 50 percent of the residential units in the projects are under a 30 percent of 50 percent of the area median income rent restriction minus an allowance for utility costs and reserved for families and individuals earning not more than 50 percent of the area median income with the remaining 50 percent of the units having a rent restriction of 30 percent of 60 percent of the area median family income minus an allowance for utility costs and reserved for families and individuals earning not more than 60 percent of area median income OR projects in which 15 percent of units have a rent restriction of 30 percent of 30 percent of the AMFI minus the allowance and reserved for families earning not more than 30 percent of the area median income with the remaining 85 percent rent restricted to 30 percent of 60 percent AMFI and reserved for families and individuals earning not more than 60 percent of area median income; or projects in which 100 percent have a rent restriction of 30 percent of 60 percent of the AMFI minus the allowance and reserved for families and individuals earning not more than 60 percent of the area median income and which are located in a census tract in which the median income is higher than the median income of the county, MSA, or primary MSA in which the census tract is located.
- *Section 29:* The changes made only apply to awards made after the effective date of the bill; TDHCA is required to adopt the rules required by Section 2306.186 not later than December 1, 2003; Section 2306.186 only applies to multifamily rental developments that receive TDHCA assistance on or after January 1, 2004; and the changes made to Chapter 1372 only apply to applications for residential rental project bonds set-aside in a year beginning on or after January 1, 2004.
- *Section 30:* The Senate Intergovernmental Relations Committee and the House Urban Affairs Committee are required to jointly investigate whether subdividing uniform state service regions into urban/exurban areas and rural areas "would" impact the provision of state and federal financial assistance to meet the housing needs of rural areas and to report by January 1, 2005, on its findings to the Lieutenant Governor and the Speaker. The findings are required to include a proposed definition for "exurban" areas, an assessment of the housing needs of exurban areas, and recommended solutions to address those needs.
- *Section 31:* Repeals Sections 2306.072(d) relating to the Neighborhood Partnership Program, 2306.185(g), exempting 501(c)(3) bonds from the affordability requirements; 2306.590, relating to the CDBG-funded Colonia Initiatives Advisory Council; 2306.591, relating to the colonia biennial action plan, and 2306.6732, relating to HTC public information requirements.

- *Section 32:* The effective date is September 1, 2003.

Signed by the Governor June 18, 2003.

SB 284 by Lucio

This bill continues the existence of the Texas State Affordable Housing Corporation (TSAHC) until September 1, 2009, and makes other changes. A section-by-section summary of the bill is as follows:

- *Section 1:* Amends Section 1372.0221 to rename the Teachers Home Loan Program, the Professional Educators Home Loan Program and to provide that the allocation of the state ceiling to the program is only available until August 1.
- *Section 2*: Amends Section 1372.023(b) to reduce TDHCA's exclusive allocation of residential rental project bonds to one-fifth, instead of one-fourth.
- *Section 3:* Amends Section 1372.0231 to reduce the amount of the allocation of residential rental project bonds available exclusively to TDHCA to 20 percent, instead of 25 percent, decreases the allocation to housing finance corporations to 70 percent, and allocates the remaining 10 percent to TSAHC directly to be used in accordance with the new Section 2306.565. TSAHC's issuances are subject to review and approval by the BRB.
- *Section 4:* Adds subsection (d) to Section 2306.057 to require TDHCA's board to consider compliance information in TDHCA's database, including compliance information provided by TSAHC.
- *Section 5*: Adds subsections (g) and (h) to Section 2306.0721 to require TDHCA to include in the SLIHP's resource allocation plan TSAHC's plan developed under the new Section 2306.565 and to include the results of TSAHC's programs in the SLIHP's estimate and analysis of the housing supply in each uniform state service region.
- *Section 6:* Amends Section 2306.0722(b) to require TDHCA to provide to TSAHC the needs assessment information complied for the SLIHP and report.
- *Section 7:* Amends Section 2306.081 to require TDHCA to include project compliance information from TSAHC in its central database and to allow TSAHC timely access to the information.
- *Section 8:* Amends Section 2306.5521 to extend TSAHC's existence to September 1, 2009.
- *Section 9:* Amends Section 2306.553 to change the name of the teachers home loan program and to provide that one of TSAHC's primary purposes is the issuance of qualified 501(c)(3) and residential rental project bonds.
- *Section 10:* Section 2306.554 makes standard sunset amendments relating to TSAHC's board.
- *Section 11:* Sections 2306.5541-2306.5543 are added to govern the terms and removal of TSAHC's board members as well as their training requirements.
- *Section 12:* Amends Section 2306.5545 relating to TSAHC conflicts of interest.
- *Section 13:* Adds Sections 2306.5546-2306.5548 relating to standards of conduct, division of responsibility, and equal employment opportunity.
- *Sections 14 and 15:* Amend Section 2306.562 to change the name of the teachers home loan program throughout and to remove the five year residency requirement and three year teacher experience requirement. In addition, the definition of "professional educator" is changed to include classroom teachers, full time teacher aides, full time librarians, certified full time counselors, and full time nurses. Section 16: Section 2306.563 is added to require TSAHC to

implement a public benefit requirement for CHDOs that receive a 501(c)(3) bond issuance and Section 2306.564 is added to require TSAHC to review its 501(c)(3) policies annually.

Section 2306.565, “Issuance of Qualified Residential Rental Project Bonds; Allocation of Bond Funds,” is added to govern the issuance by TSAHC of residential rental project bonds. TSAHC is required to adopt guidelines governing the method by which target areas for allocation are identified, to research the state’s strategic housing needs by coordinating with TDHCA, to adopt specified scoring criteria, and to hold public hearings. TSAHC is required to inform the BRB of its final decision with respect to the allocation of bond funds. TSAHC is required to pay TDHCA a “reasonable” fee for underwriting a HTC application if the development will be supported by bonds issued by TSAHC.

Section 2306.566, “Coordination Regarding State Low Income Housing Plan,” is added to require TSAHC to review the needs assessment information provided by TDHCA, to develop a plan to meet the state’s most pressing housing needs based on the assessment, and to provide it to TDHCA for inclusion in the SLIHP. TSAHC’s plan must include specific proposals to help serve rural and other underserved areas of the state.

Section 2306.567, “Compliance Information,” is added to require TSAHC to provide electronic compliance information to TDHCA and to consider compliance information in TDHCA’s database before approving an application.

Section 2306.568 is added relating to TSAHC’s complaint system and Section 2306.569 is added related to the effective use of technology by TSAHC.

- *Sections 17-19:* Clean-up amendments and housekeeping directions to TSAHC relating to the appointment of its board members and other matters, including providing that the change in law related to residential rental project bonds only apply to applications in a year beginning on or after January 1, 2004.
- *Section 20*: The effective date is September 1, 2003.

SB 1326 by Carona

This bill relates to the regulation of industrialized housing by municipalities.

The bill adds Section 1202.253 to the Occupations Code to specify the ways in which municipalities may regulate single family and duplex industrialized housing, including requiring such housing to have a value equal to or greater than the median taxable value for each single family dwelling located within 500 feet of the lot on which the industrialized housing is proposed to be located; to have exterior siding, roofing, and roof pitch compatible with single family dwellings located within 500 feet; to comply with municipal aesthetic standards; and to be securely fixed to a permanent foundation.

Effective Date: June 18, 2003.

SB 1663 by Lindsay

This bill relates to private activity bonds.

In addition to making corrections and providing clarification, the bill amends Section 1372.028 of the Government Code to change the application date to October 5, from October 10. Section 1372.031 is also amended to add residential rental project bond issues to the categories in which if more than one issuer applies on or before October 20, the BRB is required to grant reservations in that category by lot.

In addition, the bill amends Section 1372.036 to authorize the BRB, beginning June 1, to offer partial reservations to issuers in each category described in Section 1372.022(a) until an applicant accepts the partial reservation or until additional volume is returned in an amount sufficient to grant a full reservation.

Finally, the bill requires the BRB to publish the available state ceiling at least weekly on its Internet site, rather than bi-weekly in the *Texas Register*.

Effective Date: September 1, 2003.

SB 1664 by Averitt

This bill relates to the state ceiling for private activity bonds.

The bill adds Section 2306.259 to TDHCA's statute to require TDHCA to establish an Affordable Housing Research and Information program to contract for periodic market studies to determine the need for affordable housing for families of extremely low, very low, and low income within census tracts throughout the state; for research to determine the effect of affordable housing developments on property values, social conditions, and quality of life in surrounding neighborhoods; and for independent research in affordable housing design and development approaches that enhance community acceptance of affordable housing and improve the quality of life for the residents of the housing; and for public education and outreach efforts to assist the public in understanding the purpose of affordable housing and the process for public participation.

The bill exempts state voted issuers from paying the closing fee to the BRB required by Sec. 1372.006(b) and further amends subsection (a) of Section 1372.006, "Fees" to provide that qualified residential rental project applications must pay a $5,000 fee, $1000 of which the BRB keeps and $4,000 of which is transferred to TDHCA for use in the affordable housing research and information program described above.

Among other things, the bill clarifies the conflicting amendments that were made to Section 1372.022 of the Government Code last session and makes amendments. The bill amends the section to provide that if the state ceiling is computed on the basis of $75 per capita or greater before August 15 of each year, 28 percent of the state ceiling is allocated exclusively for qualified mortgage revenue bonds (decreased from 29.5 percent) and 22 percent is available exclusively for residential rental project bonds (decreased from 23 percent). (Note: One-third of the state ceiling for qualified mortgage revenue bonds is available exclusively to TDHCA so its pool decreases under the bill. Also, 25 percent of the residential rental project bonds allocation is available exclusively to TDHCA so its allocation authority is decreased in this area also.) The bill further amends this section to provide that all applications for reservations share, in the order determined by the BRB by lot, in the portion of the state ceiling that becomes available after August 15 but before September 1, not only residential rental project issues.

Section 1372.0231(b) is amended to provide that after BRB review and approval, the BRB is required to grant reservations of qualified residential rental project bonds available exclusively to TDHCA at TDHCA's direction in accordance with Section 1372.0321 and criteria established by TDHCA. Subsequent allocations made by the BRB on behalf of TDHCA are subject to review and approval by the BRB. The subsection is further amended to require the grant of reservations for qualified residential rental project bonds by lot for reservations granted between August 15 and November 30. The bill amends subsection (e) and adds subsections (h) and (i) to provide, among other things, that until May 15, for each of the uniform state service regions containing Austin, Dallas, or Houston, the BRB is required to reserve $15 million of the state ceiling for residential rental projects bonds for local housing finance agencies for areas in the region that are outside of a metropolitan statistical area.

Section 1372.028 is amended to allow issuers that applied for qualified mortgage revenue bond reservations the previous year, but had not received a reservation at the time of application for the lottery, to file a statement of changes rather than a complete application. The same application fee applies.

Among other things, the bill also amends §1372.0321 to reconcile the two amendments made to this section last session and to provide that for qualified residential rental project issues. The BRB is required to give first priority to projects in which 50 percent of the residential units in the projects are under a 30 percent of 50 percent of the area median income rent restriction minus an allowance for utility costs, and reserved for families and individuals earning not more than 50 percent area median income with the remaining 50 percent of the units having a rent restriction of 30 percent of 60 percent of the AMFI minus an allowance for utility costs and reserved for families and individuals earning not more than 60 percent of AMFI or projects in which 15 percent of units have a rent restriction of 30 percent of 30 percent of the AMFI minus the allowance and reserved for families earning not more than 30 percent of the AMFI with the remaining 85 percent rent restricted to 30 percent of 60 percent AMFI and reserved for families and individuals earning not more than 60 percent of AMFI; or projects in which 100 percent have a rent restriction of 30 percent of 60 percent of the AMFI minus the allowance and reserved for families and individuals earning not more than 60 percent of AMFI and located in a census tract in which the median income is higher than the median income of the county, MSA, or primary MSA in which the census tract is located. (Note: SB 264 makes identical amendments to this section.)

The bill makes several of the same amendments that are made by SB 1663 and also amends Section 1372.042, "Deadline for Closing on Bonds by Issuer," to exempt issuers of residential rental project bonds and state-voted issues from the 120 days closing requirement (along with qualified mortgage revenue bond issuers). Issuers of residential rental bonds are given 150 days from the reservation date to close and if the issuer fails to close by then, the issuer is required to pay the full closing fee unless the application is withdrawn before the 120th day.

Signed by the Governor June 22, 2003.

Effective Date: September 1, 2003 (applying to reservations granted on or after January 1, 2004).

SCR 6 by Averitt
This bill relates to the volume cap on private activity bonds.

The Senate Concurrent Resolution asks the United States Congress to amend the Internal Revenue Code to remove the volume cap on private activity bonds for water and waste water facilities.

Signed by the Governor May 14, 2003.

HOUSE BILLS

HB 1 by Heflin
This bill relates to the General Appropriations Act for the 2004-2005 biennium.

HB 7 by Heflin
This bill reduces the general revenue appropriations for TDHCA and other state agencies for the current biennium.

The bill reduces TDHCA's general revenue appropriation in General Revenue Fund 0001 in the amount of $753,187. The bill requires each agency to which the reductions apply to identify the strategies and objectives out of which the indicated reductions in unencumbered amounts are made.

Effective Date: June 22, 2003.

HB 424 by Christian
This bill relates to the appointment of a tenant representative as a commissioner of a municipal housing authority and requires notice thereof to be sent to TDHCA.

The bill amends Section 392.0331(a) of the Local Government Code to limit the application of the tenant representative requirement to municipal housing authorities in which the total number of units is 300 or more. A housing authority is required to send annual notice to TDHCA as to whether a tenant representative serves as a commissioner of the housing authority and the name and mailing address of the resident.

The bill, among other things, also adds Section 392.0332 to the Local Government Code, "Tenant Commissioner Requirement for Small Municipal Housing Authorities," to require a housing authority that has fewer than 300 housing units under its jurisdiction or that has no units and only administers Section 8 assistance to have a tenant representative unless, after taking the actions specified, the housing authority does not receive positive tenant response. The bill also requires the small housing authorities to send the required notice to TDHCA.

This bill was vetoed.

HB 649 by Keefer
This bill expands an interagency work group on rural issues and creates another.

The bill amends Section 487.054(a) of the Government Code to expand the membership of the committee that was created last session to provide information to ORCA annually on rural issues. In addition to the executive director of TDHCA and the agency heads of eleven other state agencies, the bill adds thirteen additional state agencies to the committee including the executive director of ORCA.

The bill also adds Section 487.0541 to the Government Code to create an interagency work group to meet at the call of ORCA. The interagency work group is composed of a representative appointed by the executive head from each of the state agencies on the annual committee. The work group is charged with developing a process to allow agencies to work together on rural issues, discussing and coordinating programs and services offered to rural communities and residents of rural communities, and developing regulatory and legislative recommendations that would eliminate duplication and combine program services.

Effective Date: September 1, 2003.

HB 730 by Ritter

This bill regulates residential home construction.

The bill adds Title 16 to the Property Code, the "Texas Residential Construction Commission Act" to create a new state agency, the nine-member Texas Residential Construction Commission. The Commission is charged with overseeing dispute resolution and an inspection and resolution process between builders and homeowners for claims arising out of an alleged construction defect. A builder is required to register a new home with the Commission the month after the title is transferred. A registration fee of $125 is required to be submitted to the Commission by the builder. The bill provides that a person may not act as a builder or a residential construction arbitrator unless issued a certificate of registration by the Commission.

The Commission is also required to adopt limited statutory warranties and building standards for residential construction as specified in the bill. The bill provides that the only statutory warranty and building and performance standards that apply to residential construction in unincorporated areas of counties in economically distressed areas and located within 50 miles of the international border are the standards established for colonias for housing programs administered by TDHCA, unless the county has adopted other standards.

Effective Date: September 1, 2003.

HB 1197 by Krusee

This bill relates to the authorization for a development agreement between a developer and an owner of land in the municipality's ETJ.

The bill adds Subchapter G to Chapter 212 of the Local Government Code to authorize a municipality to enter into a written contract with the owner of land in its ETJ to guarantee the land owner immunity from annexation for 15 years in exchange for the municipality's extension of its planning authority over the land, the enforcement of municipal land use and development regulations and environmental regulations, and the provision of certain infrastructure. The agreement must be recorded in the real property records and it may be extended for a period not to exceed 45 years. A municipality in an economically disadvantaged county may not enter into an agreement that is inconsistent with the model rules.

The bill does not apply to land located in the ETJ of a municipality with a population of 1.9 million or more.

Effective Date: June 20, 2003.

HB 1207 by Kuempel

This bill relates to the application of certain municipal zoning regulations affecting the appearance of buildings and open spaces.

The bill adds Section 211.016 to the Local Government Code to provide that a municipal zoning regulation adopted after the approval of a residential plat that affects the exterior appearance of a single family house or the landscaping of a single family residential lot does not apply to that subdivision until the second anniversary of the date the plat was approved or the date the municipality accepts the subdivision improvements offered for public dedication.

Effective Date: June 20, 2003.

HB 1247 by Ritter

This bill relates to creation of a fire fighter and police officer home loan program at TSAHC.

The bill adds Section 2306.563 to the Government Code to require TSAHC to establish by September 1, 2004, a program to provide eligible fire fighters and police officers with low-interest home mortgage loans in accordance with the bill. The program expires September 1, 2014. The bill provides that if the Legislature finds before January 1, 2005 that TSAHC should be abolished under the sunset review process, the program must be administered by TDHCA.

The bill adds Section 1372.0222 to the Government Code to allocate $25 million each year to TSAHC out of the state ceiling that is available exclusively for issuers of qualified mortgage bonds under §1372.022 for the purpose of issuing such bonds for the home loan program established under Section 2306.563. The bill adds Section 2306.563(h) to authorize TSAHC, in addition to such funds, to accept funding from TDHCA's Housing Trust Fund and federal "block" grants.

Effective Date: June 20, 2003.

HB 1493 by Solomons

This bill relates to the foreclosure of property and the authority of a mortgage servicer to administer the foreclosure.

The bill amends Chapter 51 of the Property Code to authorize a mortgage servicer to administer the foreclosure of property on behalf of a mortgagee if they have entered into an agreement granting the mortgage servicer authority to service the mortgage and the mortgage servicer discloses this agreement in the required notices of the sale. The bill also provides that a purchaser at such a sale acquires the foreclosed property “as is.” In addition, the bill authorizes a trustee or substitute trustee to set reasonable conditions for conducting the public sale under specified conditions. Finally, the bill defines many of these terms including the “debtor’s last known address.”

Effective Date: January 1, 2004.

HB 2044 by McReynolds

This bill relates to the duties of the General Land Office and the disposition of state owned land.

Among other things, the bill amends Section 31.156 of the Natural Resources Code to revise the process by which substantially underused real property owned by the state is reviewed. As it relates to TDHCA, the bill only involves TDHCA in the process after the Commissioner of GLO makes a real estate transaction recommendation to the Governor. At that time, the bill requires GLO to notify TDHCA and the state agency that controls the real estate of the recommendation and give them 60 days to file with the Governor their comments on or objections to the recommendation. TDHCA is also required to evaluate as suitable for affordable housing real property that the Land Commissioner has recommended to the Governor and the “highest and best use” of which has been determined by GLO to be residential. TDHCA is required to submit comments concerning such property to the Governor not later than the 60th day after the date it receives the report from GLO.

The bill adds Section 31.158 to the Natural Resources Code, “Transfer of Real Property For Use as Affordable Housing,” to govern the process GLO must follow if the Legislature or the Governor approves the transfer of title to real property to an “entity” for use as affordable housing (the requirement that the housing be accessible is deleted). GLO is charged with monitoring and enforcing to ensure that the real property is used as affordable housing.

Effective Date: June 20, 2003.

HB 2308 by Jesse Jones

This bill relates to the concentration of HTC projects.

The bill amends Section 2306.6703 of the Government Code, “Ineligibility for Consideration” by adding subsection (3) to expand the prohibition on submitting an application to include an applicant that proposes to construct a new development that is located one linear mile or less from a development that serves the same type of household as the new development; has received an allocation of tax credits for new construction at any time during the preceding three-year period; and has not been withdrawn or terminated from the HTC program. The bill provides that the new subsection does not apply to a development that is using federal HOPE VI funds; locally approved funds received from a public improvement district or a tax increment financing district; HOME funds provided to the state; CDBG funds provided to the state or “participating jurisdictions;” that is located outside of a metropolitan statistical area; or that a local government where the project is located has by vote specifically allowed the construction of a new development located within one linear mile or less from a HTC development.

The bill also amends Section 2306.6711 by adding subsection (f) which prohibits TDHCA's board from allocating tax credits to more than one development in a single community, as defined by TDHCA rule, in a calendar year unless the developments are or will be located more than one linear mile apart.

Finally, the bill amends Section 2306.6725 to require TDHCA to provide appropriate incentives through the QAP to applicants who agree to locate the development in a census tract in which there are no other existing developments supported by housing tax credits.

Effective Date: September 1, 2003.

HB 2376 by Elkins

This bill repeals the surety bond requirement provisions in certain statutes, including TDHCA's.

Among other things, the bill repeals Section 2306.029 "Surety Bonds" of TDHCA's statute.

Effective Date: September 1, 2003.

HB 2425 by McCall

This bill relates to state fiscal affairs and amends the membership requirements of the Texas Interagency Council for the Homeless.

Among other things (many of which will be summarized in a separate memorandum), the bill removes the representative of the Office of the Comptroller from the composition of the Council.

Effective Date: June 20, 2003, except as otherwise noted.

HB 2801 by Giddings

This bill relates to urban land bank demonstration programs.

The bill adds Chapter 379C to the Local Government Code, "Urban Land Bank Demonstration Program," to authorize a home-rule municipality that has a population 1.18 million or more and is located in a county that has a total area of less than 1,000 square miles to adopt an urban land bank demonstration program in which certain eligible unimproved real property may be sold to be used for affordable housing. The bill requires an eligible municipality that wishes to implement the program to adopt a demonstration plan annually on which public hearings are held.

The bill authorizes certain property ordered sold pursuant to a foreclosure of a tax lien to be sold in a private sale to a "land bank." A land bank is an entity established by the municipality for the purpose of acquiring, holding, and transferring unimproved property for the purposes of the program. The bill requires the land bank to resell the property to a qualified participating developer within the three-year period following the date of acquisition for sale or rental to low income households (not greater than 80 percent of the area median income). Certain CHDOs have rights of first refusal in purchasing the property offered for re-sale. The bill provides for the enforcement of the program's requirements including mandatory deed restrictions.

Effective Date: September 1, 2003.

HB 3318 by Luna

This is this session's consolidation bill.

Among other things, the bill exempts the System Benefit Fund from being reduced and also expands the use of the Fund for purposes provided by other law.

Effective Date: June 21, 2003.

HB 3546 by Hamric

This bill relates to CHDO property tax exemptions and monitoring by TDHCA.

The bill provides that a CHDO may not receive an exemption under the current law for a tax year beginning on or after January 1, 2004, unless the organization received an exemption for any part of the 2003 tax year. The bill adds Section 11.1825 to the Tax Code, "Organizations Constructing or Rehabilitating Low-Income Housing; Property not Previously Exempt," to exempt from taxation real property owned by an organization that the organization constructs or rehabilitates and uses to provide housing to individuals or families meeting the eligibility requirements of the bill. The bill does not restrict the exemption to CHDOs and allows an organization that has had as one of its purposes, the provision of low income housing to receive the tax exemption, rather than only organizations whose sole purpose was the provision of low income housing. The bill specifies the requirements that the property must fulfill in order for it to be exempt, including a requirement that at least 50 percent of the units must be reserved for individuals and families renting housing whose median income is not more than 60 percent of the either the area median family income or the statewide median family income or for individuals and families buying a single family dwelling whose median income is not more than the greater of either the area median family income or the statewide area median family income. An organization is not eligible for the exemption if the construction of the housing project was not completed before January 1, 2004. Among other things, for rehabilitated property to receive an exemption the organization must maintain a reserve fund for replacements. The bill provides that the amount of the reserve in increased by a cost of living adjustment beginning with the 2005 taxable year.

The bill provides that, unless otherwise provided by the governing body of taxing unit any part of which is located in a county with a population of 1.4 million, the amount of the exemption does not exceed 50 percent of the appraised value of the property. An organization owning property in such a county must also receive the approval of the governing body of the taxing unit.

The bill requires adds Section 11.1826 to the Tax Code, "Monitoring of Compliance with Low-Income and Moderate-Income Housing Exemptions," to provide that in order for property to be exempted for a tax year the organization is required to submit a specified audit to TDHCA and the chief appraiser not later than 180 days after the end of the organization's fiscal year. If the property contains not more than 36 units, the organization may submit a detailed report and certification instead of an audit.

Finally, the bill adds Section 23.215 to the Tax Code to allow the income method of tax appraisal to be used for HTC financed real property rented to low or moderate income individuals or families (sic) that does not receive a property tax exemption.

Effective Date: January 1, 2004.

HOUSING ANALYSIS AND ACTION PLAN

This section of the *2004 State of Texas Low Income Housing and Annual Report* contains an overview of the affordable housing needs in the state, a report on the Department's activities during the last fiscal year, and the Department's plans for addressing housing needs over the next year.

The size and diversity of the Texas population necessitates tailored regional need assessments and plans. The regional plans following the statewide analysis provide local estimations of housing need and offer customized strategies for meeting the identified needs. The final section summarizes the information in the regional plans.

DATA SOURCES AND LIMITATIONS

The information provided in this section should be considered within the context of its limitations. The Department recognizes that an undistorted assessment of housing need can be found only at the local level based on the direct experience of local households. The following issues should be considered when reviewing the information contained in this report:

- Nuances of housing need are lost when data is aggregated into regional, county, and statewide totals. For example, housing needs in rural communities are often distorted when reported at the county level because housing needs are often very different in rural and urban areas. The large population of urban metropolitan areas can skew the data and mask the needs of the rural areas.
- 1990 Census data was collected in 1989 and fails to account for many years of demographic changes. Although population projections can be used to extrapolate growing need, the changes in disparities between income levels are lost. The information has been updated whenever possible with data from the 2000 US Census, HUD's housing reports, and from outside sources.
- Data available on the condition of the housing stock, the homeless population, and the housing needs of special needs populations is very limited.
- It is generally believed that the 1990 Census undercounted minority populations in Texas, particularly along the Texas-Mexico border and in large metropolitan areas where serious housing need is concentrated.

It should be noted that, unless otherwise stated, the majority of demographic information contained in this report is based on 1990 Census data. Where possible, the census information has been supplemented with more recent information from other sources.

The content and format of the Census-based tables, graphs, and maps provided in this section were derived, in part, from a methodology for housing needs assessment in the *National Analysis of Housing Affordability, Adequacy, and Availability: A Framework for Local Housing Strategies*. The Urban Institute prepared this document for the US Department of Housing and Urban Development (HUD). It provides a methodology with which to describe and analyze local housing markets in order to develop strategies for addressing housing problems and needs. The document served as a guide for the preparation of Comprehensive Housing Affordability Strategy (CHAS) reports. As such, it provides a systematic framework for housing market analysis. HUD collaborated with the Census Bureau to develop special tabulations of the 1990 Census data to support development of the 1993 CHAS by local jurisdictions. The figures presented here have been derived from that CHAS Database. It is estimated that the tabulations based on the 2000 Census data will be available for public use in late 2003 or early 2004.

The CHAS database classifies households into five relative income categories based on reported household income, the number of people in the household, and geographic location. These income categories are used to reflect income limits that define eligibility for HUD's major assistance programs, as well as for other housing programs, such as the Housing Tax Credit Program. Households are classified into income groups by comparing reported household income to HUD-Adjusted Median Family Income (HAMFI). The income limits are calculated by household size for each metropolitan area and non-metropolitan county in the United States and its territories. They are based on HUD estimates of median family income with several adjustments as required by statute. The income level definitions are as follows:

- Extremely Low Income: At or below 30 percent of HAMFI
- Very Low Income: Between 31 percent and 50 percent of HAMFI
- Low Income: Between 51 percent and 80 percent of HAMFI
- Moderate Income: Between 81 percent and 95 percent of HAMFI
- Above 95 percent of HAMFI

The income limits for metropolitan areas may not be less than limits based on the state non-metropolitan median family income level and must be adjusted accordingly. Income limits must be also adjusted for family size and may be adjusted for areas with unusually high or low family income or housing-cost-to-income relationships.

Unit affordability compares housing cost to local area HAMFI. Affordable units are defined as units for which a household would pay no more than 30 percent of its income for rent and no more than two and one-half times its annual income to purchase. Since HUD's adjusted median family incomes are estimated for a family of four, affordability levels are also adjusted to control for various-sized units based on the number of people that could occupy a unit without overcrowding. This adjustment is made by multiplying the threshold described above by 75 percent for a 0–1 bedroom unit, 90 percent for a two bedroom unit, and 104 percent for a 3+ bedroom unit.

The needs assessment data is augmented with additional information from the perspective of local officials, where available. In 2003 there was a series of Regional Advisory Committee (RAC) meetings held across the state to address regional planning issues. Each RAC meeting was advertised, coordinated, and facilitated by a Regional Development Coordinator (RDC). The statewide network of RDCs is part of a joint planning effort between 11 councils of governments and TDHCA. In March 2003, the Department conducted the 2003 State of Texas Community Needs Survey. This survey was designed to provide a better understanding of housing and community development needs, issues, and problems at the state, regional, and local levels. The survey gave local officials, who are most familiar with the unique characteristics of their communities, a voice in determining how Texas's affordable housing, supportive service, and community development needs can be most effectively addressed.

STATE OF TEXAS

The state level housing analysis includes information on demographics, special needs populations, and affordable housing need indicators. Department plans reflect this statewide information as well as the consideration of affordable housing assistance from various sources. This section also includes a report on the Department's statewide FY 2003 performance and targets for FY 2004.

DEMOGRAPHIC CHARACTERISTICS

Texas is one of the fastest growing states in the country. The 2000 Census data indicates that Texas experienced the second highest increase in population with 3.9 million more persons living in the state in 2000 than in 1990. The state's population grew by almost a quarter (22.8 percent) over the 10 year period. This was the eighth highest state percentage increase, far exceeding the national average increase of 13.2 percent.

Population Growth and Housing Demand

Long-term projections indicate that future population characteristics will create an even greater demand for affordable and subsidized housing than there exists currently. According to a report prepared for the Texas Legislature by the Center for Demographic and Socioeconomic Research and Education Department of Rural Sociology, Texas A&M University:

- Household growth, projected at 119.9 percent over the period 1990 to 2030, will increase at a faster rate than population growth: 99 percent during the same period. Consequently, the average size of households declines from 2.73 persons in 1990 to 2.47 persons in 2030.
- The population will become more ethnically diverse from 1990 to 2030 with 87.5 percent of the total net change coming from growth in minority populations. The Black population will increase 62 percent over the period while Hispanics will grow by 258 percent.
- The average age of the population will increase: by 2030: 17 percent of the population will be 65 years of age or older compared to 10 percent in 1990. Between now and 2010, the population group between 45 and 64 years of age will be the fastest growing segment, increasing from 17 percent in 1990 to over 25 percent by 2010. Overall, the median age will increase from 30.8 years in 1990 to 37.9 years in 2030.
- Projected households in poverty will increase from 16.2 percent in 1990 to 19.6 percent in 2030, with the number of households in poverty increasing by 165 percent over the same period.

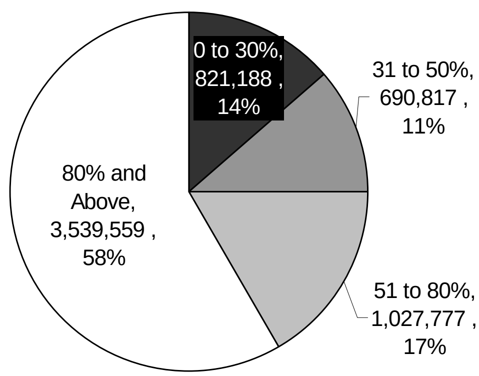
It is expected that the above population changes will impact the socioeconomic resources of the population. Ethnic differences in income were substantial in 1990, with whites accounting for 92 percent of all households with incomes of $100,000 or more, but were only 68 percent of all households. By 2030, although minorities will dominate in more income categories, whites will still account for the majority of households with incomes over $50,000 while only accounting for 42 percent of all households. Because of the current differences, households will become poorer unless the relationship between income and ethnicity changes. Forty-seven percent of households had incomes below $25,000 in 1990 while 53.7 percent is projected below that same level in 2030 (in 1990 dollars). Because household growth is faster than income growth, average household income is projected to decline from $35,667 in 1990 to $32,299 in 2030 (in 1990 dollars). Housing demand projections are directly linked to projected changes in the demographic makeup of the population. Projections show faster population and household growth in segments that generally create the largest demand on the supply of affordable and subsidized housing.

Poverty and Income

According to the 2000 Census, Texas has the eighth highest poverty rate in the nation, with a rate of 15.4 percent compared to the national rate of 13.1 percent. Poverty conditions along the Texas-Mexico border merit special consideration; fifteen counties along the border have a poverty rate of at least 25 percent, almost double the national average. Although the entire border region suffers from high poverty rates, conditions in the colonias, unincorporated areas lacking infrastructure and decent housing, are particularly acute. It is estimated that 43 percent of colonia residents live below the poverty level.

The poverty statistics give a general idea of the overall status of the state. This report will use the five income groups designated by HUD to provide a more detailed breakdown of the low income population.

Figure 1A: Households by Income Group, 1990



Source: 1990 CHAS Database

Figure 1A indicates the 1990 distribution of households by income group across Texas by number and percentage. It should be noted that a total of 42 percent of all households are in the low income range (0 to 80 percent of HAMFI).

SPECIAL NEEDS POPULATIONS

Various populations within the state of Texas have been identified by the US Department of Housing and Urban Development and the Agency as “special needs populations. It is recognized that the following groups have distinct housing needs and require individual attention with regard to housing assistance.

Alcohol and Drug Addiction

In 2001, the Texas Commission on Alcohol and Drug Abuse (TCADA) estimated that approximately 1.8 million, or 12 percent, of adults in Texas have an alcohol-related problem, another 227,000 have drug-related problems, and an additional 495,000 have both alcohol and drug-related problems.[3] Of the 40,793 total admissions to TCADA-funded treatment programs during 2002, admitted individuals were most likely to be single, white males with an average age of 35, an average 12th grade education, and an average annual income of $6,892.[4] The population of persons with alcohol or other drug addiction is diverse and often overlaps with the mentally disabled or homeless populations.

According to the *2000 Texas Survey of Substance Use Among Adults*, a survey of alcohol and drug usage among over 10,000 adults, it was found that urban and suburban residents were more likely to have substance-abuse problems than were individuals in rural areas.[5] Furthermore, respondents who had moved one or more times within the preceding 5 years were more likely to abuse alcohol or drugs than those who had not relocated.

Supportive housing programs needed for persons with alcohol and/or other drug addiction problems range from short-term, in-patient services to long-term, drug-free residential housing environments for recovering addicts. Better recovery results may be obtained by placing individuals in stable living environments.

For more information on alcohol and drug addiction, contact:

- TCADA Hotline: 1-800-832-9623

Colonias

According to Section 2306.581 of the Texas Government Code:

> "Colonia" means a geographic area located in a county some part of which is within 150 miles of the international border of this state and that
>
> - has a majority population composed of individuals and families of low income and very low income, based on the federal Office of Management and Budget poverty index, and meets the qualifications of an economically distressed area under Section 17.921, Water Code; or
> - has the physical and economic characteristics of a colonia, as determined by the department.

It is estimated that the average median household income is between $7,000 and $11,000 for the 1,450 colonias that accommodate over 350,000 residents.[6] Colonia residents are generally unskilled, lack a formal education, and do not have stable employment. It is assumed that many residents work as day-to-day or farm laborers and the unemployment rate ranges from 20 to 60 percent.[7]

According to 2000 US Census data, colonias have a 75 percent homeownership rate. Despite this rate, however, colonia homes are inadequate; 4.9 percent of colonia dwellings lack kitchen facilities and 5.3 percent lack plumbing facilities. It is estimated that 50 percent of colonia residents lack basic water and sewage systems: 51 percent use septic tanks, 36 percent use cesspools, 7 percent use outhouses, and 6 percent use other wastewater systems.[8] Some of these properties may have been purchased with contracts for deed, which are seller-financed transactions that do not transfer the title and ownership of the property to the buyer until the purchase price is paid in full.

Colonia residents have several needs that include increased affordable housing opportunities, such as down payment assistance and low-interest-rate loans, homeowner education, construction education and assistance, owner-occupied home repair, access to adequate infrastructure, and the conversion of remaining contracts for deed to conventional mortgages.

For more information on colonias, contact Susana J. Garza, Office of Colonia Initiatives, at (512) 475-1592.

Persons with Disabilities

According to the US Department of Housing and Urban Development, 24 CFR 582.5:

> A person shall be considered to have a disability if such a person has a physical, mental, or emotional impairment that
>
> - is expected to be of long-continued and indefinite duration,
> - substantially impedes his or her ability to live independently,
> - is of such a nature that the ability could be improved by more suitable housing conditions.

According to the 2000 US Census, there are approximately 3,605,542 disabled, civilian, non-institutionalized persons over the age of five (or approximately 19 percent of total population) in Texas. Of this figure, 663,300 have a sensory disability (severe vision or hearing impairment), 1,428,580 have a physical disability (condition that substantially limits a physical activity such as walking or carrying), 816,185 have a mental disability (learning or remembering impairment), 487,120 have a self-care disability (dressing, bathing, or getting around inside the home), 1,359,848 have a "going outside the home disability," and 1,651,821 have an employment disability.

Housing opportunities for people with disabilities may be complicated by low incomes. The 2000 census estimates that 553,934 disabled individuals over 5 years of age live below the poverty level in Texas. Many people with disabilities may be unable to work, and receive Supplemental Security Income (SSI) disability benefits or Social Security Disability Insurance (SSDI) as their principle source of income. According to *Priced Out in 2002*, an SSI recipient would have to pay an average of 98.3 percent [or $536] of his or her $545 monthly payment to rent a one-bedroom apartment in Texas.[9] According to the HUD definition of affordability that estimates that a household should pay no more than 30 percent of its income on housing expenses, an SSI recipient can afford a monthly rent of no more than $164.

[8] Moncada, "A Colonias Primer."

[9] Technical Assistance Collaborative Inc. and Consortium for Citizens with Disabilities Housing Task Force, *Priced Out in 2002*, by Ann O'Hara and Emily Cooper (Boston, MA: Technical Assistance Collaborative Inc., May 2003), 37, http://www.c-c-d.org/PO2002.pdf (accessed August 6, 2003).

The *Olmstead* Supreme Court decision maintained that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the American with Disabilities Act (ADA). Furthermore, the Fair Housing Act, Section 504 of the Rehabilitation Act, ADA, and Section 2306.514 of the Texas Government Code all provide mandates for accessible residential housing for persons with disabilities. A cost-effective and integrative approach is to promote "adaptive design" or "universal access" housing, which promotes basic, uniform standards in the design, construction, and alteration of structures that include accessibility or simple modification for disabled individuals. While an "adaptable" unit may not be fully accessible at time of occupancy, it can easily and inexpensively be modified to meet the needs of any resident. Another option is to equip homes with special features designed for persons with disabilities, including ramps, extra-wide doors and hallways, hand rails and grab bars, raised toilets, and special door levers.

There is a significant shortage of housing that is physically accessible to persons with disabilities and an even greater shortage of accessible housing that has multiple bedrooms. Many persons with disabilities require larger housing units because they live with family, roommates, or attendants. The lack of multi-bedroom housing furthers their segregation. Moreover, accessible housing is an urgent and present need for not only citizens who currently have disabilities, but for the aging population in the US, which will likely develop disabilities in the future. Accessible housing will become increasingly more important as the ability for self-care and mobility decreases with age.

Victims of Domestic Violence

According to the Texas Family Code, as quoted by the Texas Council on Family Violence, "family violence" may be defined as an act intended as a threat or to result in bodily harm by a member of a household towards another household member; abuse by a household member towards a child household member; or dating violence.[10] In 2002, there were 183,440 reported family violence incidents in Texas.[11] According to the Texas Department of Human Services, in fiscal year 2002, the Family Violence Program provided emergency shelter to 28,886 adults and children, and nonresidential services to 47,883 adults and children.[12]

The Texas Department of Human Services Family Violence Program funds approximately 70 shelters for domestic violence victims that offer various services including temporary emergency shelter, hotline

services, information and referral, counseling, assistance in obtaining medical care and employment, and transportation services. Some shelters have transitional living centers, which allow victims to stay for an extended period and offer additional services.

Because those entering shelters are generally unemployed, victims must secure employment and alternative housing within shelter time limits. This task is often complicated by a lack of resources for start-up costs, transportation, and affordable childcare options. These victims may be eligible for public housing and Temporary Assistance to Needy Families (TANF) assistance, but waiting lists and application reviews for such programs can be long and provide limited payments. If women are unable to secure housing within their 30-day stay, domestic violence shelters may assist in finding space in homeless shelters. Unfortunately, space and time are also limited in these shelters. The numerous obstacles faced by domestic violence victims often make it difficult to escape abusive situations and achieve self-sufficiency.

Elderly Populations

According to the 2000 US Census, 9.9 percent (approximately 2 million) of people in Texas are 65 years of age or older. The Texas Department on Aging (TDoA) estimates that by the year 2040, individuals age 60 and over will comprise 23 percent of the population in Texas.[13] TDoA reports that females significantly outnumber males age 60 and over and, though the majority of elderly Texans live in urban areas, rural areas have a higher percentage of elderly relative to the local population.[14]

Nationwide, in 2001, the median income for individual elderly males was $19,688, individual females was $11,313, and families headed by individuals 65 and over was $33,938.[15] According to the 2000 Census, 13.1 percent of seniors age 65 and over in Texas live below the poverty level. Low incomes in addition to rising healthcare costs may make housing unaffordable. Approximately 30 percent of all elderly households pay more than 30 percent of their income on housing, while 14 percent pay more than 50 percent of their income on housing.[16]

[13] Texas Department on Aging, Office of Aging Policy and Information, *Texas Demographics: Older Adults in Texas* (Austin, TX: Texas Department on Aging, April 2003), x, http://www.tdoa.state.tx.us/Publications/ResearchReports/NewDemographicProfile4-03.pdf (accessed November 25, 2003).

[16] US Department of Housing and Urban Development, *Housing Our Elders* (HUD, November 1999), 29, http://www.hud.gov/library/bookshelf18/pressrel/elderlyfull.pdf (accessed August 6, 2003).

A 2000 American Association of Retired Persons study found that 90 percent of elderly persons expressed a desire to stay in their own homes as long as possible.[17] Of all elderly households, 80 percent own their own homes.[18] However, elderly homeowners generally live in older homes than the majority of the population; in 1999, the median year of construction for homes owned by elderly households was 1963.[19] Due to their age, homes owned by the elderly are often in need of repair, weatherization, and energy assistance.

Some elderly households may require in-house services such as medical treatment, meal preparation, or house cleaning. Community Care Services, a program administered by the Texas Department of Human Services to meet the needs of elderly and disabled Texans avoiding premature nursing home placement, proves to be more cost-effective than nursing home care. Department of Human Services statistics show that in fiscal year 2002, an average of 65,000 nursing facility clients were assisted each month and an annual cost of $1,803,381,667, and an average of 137,800 Community Care Services clients were assisted each month at an annual cost of $1,139,249,323.[20] Though Medicaid covers nursing home care as well as assisted-living services, such assisted-living services are limited and waiting lists can be lengthy, which can prematurely place low income seniors in nursing home facilities.

Persons with HIV/AIDS

Human Immunodeficiency Virus, or HIV, is the virus that causes AIDS (Acquired Immunodeficiency Syndrome). HIV infects cells and attacks the immune system, which weakens the body and makes it especially susceptible to other infections and diseases. According to the Texas Department of Health (TDH), as of December 2002, there were 41,925 reported persons living with HIV/AIDS in Texas.[21] The majority of these cases were located in Bexar, Dallas, Harris, Tarrant, and Travis Counties. Because of increased medical costs or the loss of the ability to work, people with HIV/AIDS may be at risk of losing their housing arrangements.

TDH addresses the housing needs of AIDS patients through the Housing Opportunities for Persons with AIDS Program (HOPWA), which is a federal program funded by HUD. In Texas, HOPWA funds provide emergency housing assistance, which funds short-term rent, mortgage, and utility payments to prevent homelessness; and tenant-based rental assistance, which enables low income individuals to pay rent and utilities until there is no longer a need or until they are able to secure other housing. In addition to the TDH statewide program, the cities of Austin, Dallas, Fort Worth, Houston, and San Antonio receive HOPWA funds directly from HUD.

Homeless Populations

The Stewart B. McKinney Homeless Assistance Act of 1987, the legislation that created a series of homeless assistance programs, defined the term "homeless." The following definition is used by the US Department of Housing and Urban Development (HUD) and all other federal agencies responsible for administering McKinney programs:

The term "homeless" or "homeless individual" includes

- an individual who lacks a fixed, regular, and adequate night time residence; or
- an individual who has a primary nighttime residency that is
  - a supervised publicly or privately-operated shelter designed to provide temporary living accommodations;
  - an institution that provides a temporary residence for individuals intended to be institutionalized; or
  - a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

The Texas Interagency Council for the Homeless estimates that approximately 200,000 people in Texas, or about 1 percent of the population, are homeless.[22] However, estimates of homeless populations vary widely; the migratory nature of the homeless population, the stigma associated with homelessness, and the fact that many homeless individuals lack basic documentation all contribute to the difficulty of making an accurate count. Furthermore, the homeless population is generally classified into three categories: (1) literally homeless, which describes those who have no permanent residence and stay in shelters or public places; (2) marginally homeless, which includes those who live temporarily with other people and have no prospects for housing; and (3) people at risk of homelessness. People at risk of homelessness generally have incomes below the poverty level, rely on utility and rental assistance, and may be unable to absorb unexpected events such as the loss of a job or serious illness. Most homeless counts are "point in time" estimates, which do not capture the revolving-door phenomenon of persons moving in and out of shelters over time.

Various homeless subpopulations have been identified: youth, elderly, persons with mental illness and/or disabilities, persons with HIV/AIDS, persons with alcohol and/or drug addiction, rural households, migrant farmworkers, unemployed persons, families with children, victims of domestic violence, ex-offenders, and veterans. Though these subpopulations may have different characteristics, the two main trends significant in the rise of homelessness can be connected to the increase in poverty (characterized by the decline in employment opportunities and public assistance programs) and a shortage of affordable housing.[23]

[22] Texas Interagency Council for the Homeless, "Key Facts," http://www.tich.state.tx.us/facts.htm (accessed August 6, 2003).
[23] National Coalition for the Homeless, *Why are People Homeless?* NCH Fact Sheet #1 (Washington, DC: National Coalition for the Homeless, September 2002), 1, http://www.nationalhomeless.org/causes.html (accessed August 6, 2003).

The "continuum of care" approach to fighting homelessness is based on the understanding that homelessness is not caused merely by a lack of shelter, but involves a variety of underlying unmet physical, economic, and social needs. A comprehensive system of services as well as permanent housing is needed to help homeless individuals and families reach independence using a combination of emergency shelters, transitional housing, social services, and permanent housing. The continuum of care system begins with outreach, intake, and assessment. It is followed by safe emergency shelter and/or transitional housing that provides a variety of services including job training, educational services, substance abuse services, mental health services, and family support. Ultimately, the goal is to assist the family or individual achieve permanent housing.

Migrant Farmworkers

According to the US Department of Health and Human Services *Migrant and Seasonal Farmworker Enumeration Profiles Study* through the Migrant Health Program, a seasonal farmworker describes an individual whose principal employment (at least 51 percent of time) is in agriculture on a seasonal basis and who has been so employed within the preceding twenty-four months. A migrant farmworker meets the same definition, but establishes temporary housing for purposes of employment.[24] The US Department of Health and Human Services estimates that there are 362,724 migrant and seasonal farm workers and families residing in Texas.[25] Of this population, 26 percent reside in Cameron, Hidalgo, and Starr Counties.

The National Agricultural Workers Survey, a national survey of 4,199 farmworkers conducted between 1997 and 1998, found that 61 percent lived below the poverty level.[26] The median annual income for individual workers was less than $7,500 and migrant families earned less than $10,000. Sixty percent of workers held only one farm job, which lasted only 24 weeks out of the year. Despite the short employment duration and low incomes, only 20 percent of workers received unemployment benefits and 10 percent received Medicaid or food stamps.

(Washington, DC: US Department of Labor, March 2000), vii, http://www.dol.gov/asp/programs/agworker/report_8.pdf (accessed August 6, 2003).

Farmworkers have a particularly difficult time finding available, affordable housing because of extremely low and sporadic incomes and mobility. Many of the small, rural communities where migrant workers may seek employment do not have the rental units available for the seasonal influx. Overcrowding and substandard housing are significant housing problems for farmworkers.[27] In addition, migrant workers may not be able to afford security deposits, pass credit checks, or commit to long-term leases.

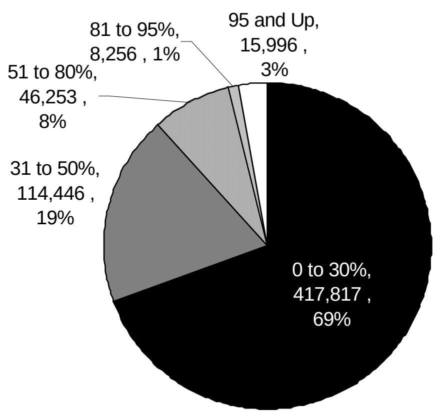
AFFORDABLE HOUSING NEED INDICATORS

When analyzing local housing markets and developing strategies for meeting housing problems, HUD suggests the consideration of several factors. These factors include how much a household spends on housing costs, the physical condition of the housing, and whether or not the household is overcrowded. Data on poverty and income levels and the extent to which the housing is available for the appropriate income level is essential supplementary information.

Severe Housing Cost Burden

A severe cost burden is identified when a household pays more than 50 percent of its gross income for housing costs. The following figure indicates the most critical housing problems in the state—the lowest income households with the most severe housing difficulties. It is important to note that lower income categories make up the majority of the population experiencing severe housing cost burden, with extremely low incomes suffering the most.

Figure 2A: Severe Housing Cost Burden by Income Group, 1990



Source: 1990 CHAS Database

[27] Christopher Holden. “Monograph no. 8: Housing” in *Migrant Health Issues* (Buda, TX: National Center for Farmworker Health Inc., October 2001), 40, <http://www.ncfh.org/docs/08%20-%20housing.pdf> (accessed August 6, 2003).

Physical Inadequacy-Lack of Kitchen and Plumbing Facilities

The methods used to determine housing conditions used by the Census are rudimentary and make it difficult to measure the physical condition of housing. The only measure of physical inadequacy available from the CHAS database tabulation of the 1990 Census is the number of units lacking complete kitchen and/or plumbing facilities. While this is not a complete measure of physical inadequacy, the lack of plumbing and/or kitchen facilities can serve as a strong indication of one type of housing inadequacy. Table 3A demonstrates that among the physically inadequate housing units, almost half are affordable to extremely low income households.

Table 3A: Units Lacking Kitchen and/or Plumbing Facilities by Affordability Category, 1990

	Number	Percent
0% to 30%	35,692	46%
31% to 50%	19,997	26%
51% to 80%	14,463	19%
80% and Above	7,977	10%
Total	78,129	100%

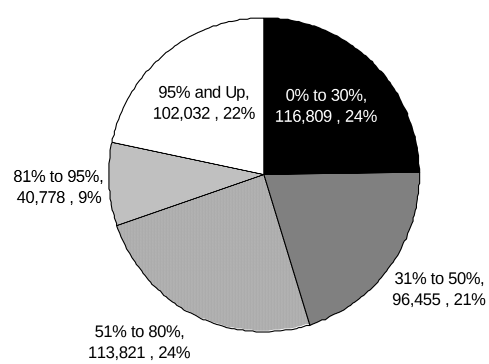
Source: 1990 CHAS Database

Housing experts agree that the number of units lacking kitchen and plumbing facilities has been underreported. For instance, according to CHAS data, a total of only approximately 17,500 houses along the Texas-Mexico border are considered physically inadequate. However, most studies reveal a higher number of houses lacking adequate kitchen and/or plumbing facilities in this area.

Overcrowding

Overcrowded housing conditions occur when a residence accommodates more than one and one-half persons per room. Overcrowding can be indicative of a general lack of affordable housing in a community where households have been forced to “double up,” either because other housing units are not available or because the units available are too expensive. The 1990 US Census showed 469,895 households in Texas live in overcrowded conditions. Figure 4A shows the distribution of overcrowded households by income category.

Figure 4A: Overcrowded Households by Income Group, 1990



Source: 1990 CHAS Database

Housing Availability and Affordability

Table 5A compares the number of housing units throughout Texas by affordability category with the number of households by income group. On the surface, there appears to be a sufficient supply of affordable housing to meet the demand for most of the income groups. However, the comparison of supply and demand for each income category assumes that households are matched to units in their affordability range; this is seldom the case. Furthermore, because of the formula used to calculate housing affordability categories, estimates of affordable housing supply by income category are actually somewhat inflated. This is because affordability is computed for households at the top of each income range, meaning that households in the lower part of the income range would have to pay more than 30 percent of their income for some of the units that are considered affordable to them. Only a small percentage of units are affordable to the lowest income households. Therefore, estimates of housing shortfalls should be treated as lower-bound estimates, and estimates of housing surplus are undoubtedly overstated.

Table 5A: Households and Housing Units
by Income Group, 1990

	0% to 30%	31% to 50%	51% to 80%	80% and Above
Households	821,188	690,817	1,027,777	3,539,559
Housing Units	903,387	1,558,182	2,289,440	1,796,862

Source: 1990 CHAS Database

This seeming availability of affordable housing does not translate into an affordable housing surplus. For a variety of reasons, affordable housing is not available to many low income families. The majority of affordable housing is often occupied by persons in higher income levels. Figure 5A illustrates the problem of housing mismatch by affordability category. Each affordability category has three associated figures: the first bar shows the number of households in that income category, the second bar shows the number of units affordable to households in that income category, and the third bar displays the number of units in that income category actually inhabited by households of that category.

Figure 5A: Housing Mismatch
by Affordability Category, 1990

	0% to 30%	31% to 50%	51% to 80%	80% and Up
No. of Households	821,188	690,817	1,027,777	3,539,559

Local Perception

Table 6A provides an estimate of the need for housing assistance by income group and by type of household in 2000. If the estimate is accurate, then a little over a quarter of the 7.4 million households in Texas could use some type of housing assistance.

Table 6A: Estimated Households in Need of Housing Assistance

	Elderly Households		Related Households		Other		Total		
Income Group	Renter	Owner	Renter	Owner	Renter	Owner	Renter	Owner	Total
0% to 30%	71,883	121,937	261,211	118,013	137,070	33,278	470,164	273,228	743,392
31% to 50%	39,317	60,516	198,158	111,341	104,748	19,050	342,223	190,907	533,130

Regional Development Coordinators and Advisory Committees

In 2003 there was a series of Regional Advisory Committee (RAC) meetings held across the state to address regional planning issues. Each RAC meeting was advertised, coordinated, and facilitated by a Regional Development Coordinator (RDC). The statewide network of RDCs is part of a joint planning effort between 11 councils of governments and TDHCA. TDHCA works with an RDC in each service region to facilitate the RAC meetings, provide technical assistance, gather data on regional housing needs and resources, and help build the region's network of housing organizations.

A primary purpose of the RACs was to bring together persons with a wide variety of housing expertise to find ways to more effectively utilize their region's existing resources. Therefore, it is encouraging to note that some of the most significant housing issues and corresponding solutions identified by the RACs relate to activities that allow the region's residents to address their housing issues directly. These types of activities include such things as capacity building, educational initiatives, and program marketing. Other topics addressed by the RAC participants include TDHCA administrative issues, development costs and other obstacles to development, and serving special needs populations. Comments from each regional RAC meeting are incorporated into the regional plans. A copy of the *Report on the 2003 Regional Advisory Committee Meetings on Affordable Housing and Community Service Issues* can be obtained from the Center for Housing Research, Planning, and Communications at TDHCA.

State of Texas Community Needs Survey

In March 2003, TDHCA distributed over 2,000 copies of the Community Needs Survey (CNS) to cities, counties, local housing departments, public housing authorities, and US Department of Agriculture Rural Development field offices. Local community action agencies were also contacted for their expertise on homeless issues and other community development topics. For TDHCA, the survey represents the opportunity to gather local input on housing needs, preferences, and regional characteristics. Information from the survey is also used as a primary component of the Affordable Housing Needs Score (AHNS), the location score in several housing program funding applications.

Approximately 78 percent of Community Needs Survey respondents feel that there is a severe or significant affordable housing problem in their area.[28] There is a slight preference statewide for owner-occupied housing assistance over rental assistance. Among the owner-occupied assistance activities, renovation is ranked highest in importance, followed by purchase assistance and new housing development. New rental housing development and the renovation of existing multifamily housing are more important than rental payment assistance. The regional results from the CNS are incorporated into the regional plans. A final report on the survey, *Report on the 2003 State of Texas Community Needs Survey*, is available from the Center for Housing Research, Planning, and Communications.

STATE HOUSING SUPPLY

The 2000 US Census reported 8.2 million housing units in Texas, of which 90.6 percent are occupied. The number of housing units increased 16 percent from 7.0 million units that were on the ground in 1990. The breakdown of occupied units by type is 4.7 million owner occupied (a 28 percent increase over 1990) and 2.8 million renter occupied (a 13 percent increase over 1990). The average household size for owner-occupied units increased to 2.87 persons per unit in 2000 as compared to 2.85 units in 1990. The average household size for renter units decreased slightly to 2.53 persons per unit in 2000 as compared to 2.55 units in 1990.

Almost 67 percent of the housing units are single family units, 14 percent are multifamily up to 19 units, and 10 percent are within multifamily structures with 20 units or more. An additional 9.4 percent are mobile homes, RVs, or boats.

Table 7A: Housing Type, 2000

	Total	Percent
Housing Units	8,157,575	
One Unit	5,420,910	66.50%
2 to 19 Units	1,151,599	14.10%
Over 20 Units	819,101	10.00%
Mobile Homes	731,652	9.00%
Boats, RVs	34,313	0.40%

Assisted Housing Inventory

The Department has assisted approximately 179,600 multifamily units since 1992. Over the same time period, there have been 28,700 families assisted with single family programs. These totals do not include approximately 2,200 Section 8 tenant-based rental vouchers that are administered by the Department.

Table 7B provides a summary of the current public housing authority inventory in Texas. Included in this list are households that receive tenant-based rental assistance.

[28] The response rate for the 2003 CNS was 37 percent.

Table 7B: Public Housing Authority Units

	Total	Percent
Public Housing/Indian Housing	63,358	31.3%
Section 8 Vouchers	121,095	59.8%
Section 8 New Construction	6,025	3.0%
Section 8 Moderate Rehabilitation	3,714	1.8%
FmHA Farm Labor Housing	918	0.5%
FmHA Rural Rental	948	0.5%
FmHA/Section 8 Assisted	477	0.2%
Tax Credit Program	5,088	2.5%
Homeownership	864	0.4%
Total Public Housing Authority Units	202,487	

Source: Texas Housing Association

There have been 60,784 multifamily units produced by the Texas State Affordable Housing Corporation and local housing finance corporations in Texas, according to HFC responses to the 2003 Housing Finance Corporation Report by TDHCA. There have been 13,052 single family mortgages produced by the HFCs, or a total of $908,051,286.

Department Performance

This section reports on agency performance for the past fiscal year and includes a description of funding allocations, amounts committed, target numbers, numbers served for each program in Fiscal Year 2003; and projected funding and target numbers for Fiscal Year 2004. This section also reports on the Strategic Plan Goals for FY 2003.

The Department received $462,096,192 in funding allocations during FY 2003 and committed $492,389,672 to housing and community affairs programs that predominantly benefit extremely low, very low, and low income families and individuals (see Tables 8A and 8B). The target performance number was 71,723 households and 420,000 individuals; the actual number served was 117,895 households and 453,380 individuals. Multifamily development accounted for 50 percent of the total dollar amount committed during the past year; the next largest activity was community affairs activities with 19 percent of the total dollar amount committed. The single family financing and homebuyer assistance group was the third largest with almost 16 percent of the total committed amount. More than 93 percent of the total funds committed went to assist extremely low, very low, and low income families and individuals.

The activity categories in the tables below describe the broad range of Department activities and provide general groupings for analysis. The multifamily development category includes activities that support multifamily development, such as the funding of projects, capacity building, and predevelopment funding. All activities related to the acquisition, rehabilitation, and preservation of multifamily units are classified in the multifamily rehabilitation category. Rental payment assistance is tenant based, direct payment assistance. The single family development category includes all funding for housing developers, nonprofits, or other housing organizations to support activities associated with the development of single family housing. The single family financing, homebuyer assistance, and education category includes activities related to the process of buying a home, such as mortgage financing, down payment assistance, and homebuyer education. Single family owner-occupied assistance assists current homeowners requiring home rehabilitation and reconstruction. The community affairs category is comprised of all activities surrounding community services and energy assistance; this category includes the Colonia Self-Help Centers.

The program groupings are largely self-explanatory; only a few comments are necessary. The Single Family Bond Program includes the First Time Homebuyer Program and the Down Payment Assistance Program. The Office of Colonia Initiatives receives much of its funding from internal sources; for this reason, the totals for most of the OCI activities are not included in the grand total. The only exception is the funding for the Self-Help Centers, which is external and included in the grand total.

Assistance to the Neediest Individuals and Families

The distribution of the Department's resources in fiscal year 2003 showed a clear prioritization of assistance to individuals and households with the most need; see Table 9A. The vast majority of households served by the Department were classified as extremely low, very low, and low income. These three income categories account for over 99.4 percent of households assisted by the Department in FY 2002.

Table 9A: Housing Assistance by Income Category

	Total Committed FY2003		Extremely Low-Income (0% to 30% AMFI)		Very Low-Income (31% to 60% AMFI)		Low-Income (61% to 80% AMFI)		Moderate-Income (Greater than 80% AMFI)	
	Amount	Households	Amount	Households	Amount	Households	Amount	Households	Amount	Households
HOME Program	$ 60,857,754	2,867	$ 45,703,546	1,400	$ 6,562,399	430	$ 8,591,809	1,037

Total	$ 396,563,620	25,754	$ 61,755,863	4,300	$ 307,102,328	20,214	$ 21,709,458	1,183	$ 5,995,971	57
Percent of Total			15.6%	16.7%	77.4%	78.5%	5.5%	4.6%	1.5%	0.2%

The vast majority of households and individuals served through CEAP, WAP, ENTERP, ESGP, and CFNP earn less than 30 percent area median family income. However, federal tracking of assistance from these programs is based on poverty guidelines, which do not translate easily to an AMFI equivalent. For conservative reporting purposes, assistance in these programs is reported in the 30 to 60 percent AMFI category.

Strategic Plan Goals

The following goals demonstrate TDHCA's commitment to serving households with the greatest need. These goals are reflective of the performance measures, as outlined in the Legislative Appropriations Act for Fiscal Year 2004, the TDHCA *Strategic Plan*, and the *State of Texas Consolidated Plan*.

Goal 1: TDHCA will increase and preserve the availability of safe, decent, affordable, and integrated housing for very low, low, and moderate income persons and families

Housing Trust Fund. The target number of extremely low, very low and low income households benefiting from HTF loans and grants was 1,390 and the number served was 1,735; representing 125 percent of the target number. Almost 12 percent of the total funding went to extremely low income families and almost 89 percent went to very low income families.

Home Program. The target number of extremely low, very low, and low income households benefiting from HOME Investment Partnerships Program loans and grants was 2,106. The actual number served was 2,876, or 137 percent of the goal. In total, 75 percent of HOME Program funds were directed to extremely low income households and 11 percent were directed to very low income households. The remaining funds were directed to low income households.

Section 8 Program. The target number of rental assistance through Section 8 certificates and vouchers for extremely low and very low income households and individuals was 2,200. The actual number of households served was 2,262, representing 103 percent of the goal. Extremely low income families comprised 80 percent of the households served and 20 percent were very low income.

Housing Tax Credit Program. The target number units funded through federal tax incentives for extremely low, very low, and low income households in FY 2003 was 6,100. The actual number of units developed was 14,055. Of this total, 7,000 units are through federal tax funds and 7,385 are from the Tax-Exempt Bond Program. There were 839 units set aside for extremely low income households, and the remainder were for very low income households.

Single Family Mortgage Revenue Bond Program. The target number of extremely low, very low, and low income households and individuals receiving loans through the Single Family MRB Program was 1,260. The actual number served was 1,218, or 97 percent of the goal. The target number of moderate-income families was 600; the actual number served was 57. Of the 1,275 households served through the SF MRB Program, 4.4 percent were extremely low income, about 69 percent were very low income, 18 percent were low income, and the remaining 8.3 percent were moderate income.

Multifamily Mortgage Revenue Bond Program. The target number of federal mortgage loans through the Multifamily MRB Program for the acquisition, rehabilitation, construction, and preservation of multifamily rental units for very low, low, and moderate-income families was 1,100. The actual number of loans was 3,560. All of the units in FY 2002 were for very low income families.

Goal 2: TDHCA will target its housing finance programs resources for assistance to extremely low income households

The annual target is $30,000,000 of the division's total housing funds towards assistance for extremely low income families and individuals. The housing finance division exceeded this goal and provided $61,755,863 in funding for extremely low income households in FY 2003.

Goal 3: TDHCA will target its housing finance resources for assistance to very low income households

The annual target is 20 percent of the division's total housing funding applied towards assistance for families and individuals earning between 31 percent and 60 percent of the area median family income. The division exceeded this goal and committed 77 percent of its funding for very low income households.

Goal 4: TDHCA will provide contract for deed conversions for families who reside in a colonia and earn 60 percent or less of the applicable area median family income

The target is to spend no less than $4,000,000 for the 2002–2003 biennium for the sole purpose of contract for deed conversions. There was a total of $3,433,134 of funds allocated through the contract for deed program in FY 2002–2003. The funding from these awards came from the HOME Program and Junior Lien Mortgage Revenue Bonds. There were a total of 60 loans converted and there are 30 loan conversions in progress.

Goal 5: TDHCA will assist extremely low and very low income households or individuals with costs associated with energy-related improvements, expenses, or emergencies that may lead to homelessness

Comprehensive Energy Assistance Program. The target number of households assisted through the Comprehensive Energy Assistance Program for FY 2003 was 47,241. The actual number of households served was 82,442, 175 percent of the target number.

Weatherization Assistance Program. The target number of units weatherized was 5,319; the total number weatherized was 4,864. This represents 91 percent of the target number.

Goal 6: TDHCA will ensure that affordable housing programs are in compliance with federal and state program mandates

Portfolio Management and Compliance Division. The target number of on-site reviews conducted by the Portfolio Management and Compliance Division for FY 2003 was 628; the actual number conducted was 731, a variance of 116. The target number of financial reviews was 664; the actual number conducted was 328, 51 percent of the target amount. The target number of single audit reviews was 250; the actual number completed was 101 percent of the total, or 253 reviews.

Goal 7: TDHCA will commit funding resources to address the housing needs and increase the availability of affordable, accessible, and integrated housing for persons with special needs

HOME Program. The Goal for FY 2003 was to award 20 percent of the total HOME project allocation to applicants that target persons with special needs. The HOME Program awarded $16,825,144 to applicants that target persons with special needs, or 31 percent of the total project allocation. The number of units produced is 770, 29 percent of the total HOME units.

Housing Trust Fund. The goal for FY 2003 was to dedicate no less than 10 percent of the HTF project allocation for applicants that target specific persons with special needs. The HTF funded 306 units for persons with special needs, or 19 percent of the total units for FY 2003.

Multifamily Mortgage Revenue Bond Program. The goal was to dedicate no less than 5 percent of Multifamily MRB Program units for persons with special needs. The Multifamily MRB Program funded 368 units for persons with special needs, 10 percent of the total 3,560 units.

Goal 8: TDHCA will compile information and accurately assess the housing needs and the housing resources available to persons with special needs

In 2003, TDHCA completed and analyzed data from the Community Needs Survey, which, among other housing needs–related questions, requested local governments to indicate the housing needs of various special needs populations. This information will be used in conjunction with Census data in the formulation of Department policies and scoring for its housing programs.

In addition, in 2002, the Department made its property inventory available on its website. The easy-to-use database is searchable by city and county and includes basic property information, the number of adapted units, rent amounts, and property contact information. The Department is working on a system that will allow property owners to voluntarily update information related to the availability of accessible units on a real-time basis. This information will also be available on the Department’s website.

<u>Goal 9</u>: TDHCA will increase collaboration between organizations that provide services to special needs populations and organizations that provide housing

Persons with Disabilities.

- TDHCA Disability Advisory Committee: In 2002, the Department established a Disability Advisory Committee (DAC) to advise the Department's Board on issues related to persons with disabilities. The members of the DAC represent organizations with experience providing services to persons with disabilities.
- Promoting Independence Advisory Board (PIAB): TDHCA staff serves on the Health and Human Service Commission's PIAB, along with representatives from other State agencies and consumer groups. The Board coordinates services to promote the integration into the community of persons residing in institutions.
- Project Access: TDHCA actively promotes the coordination of disabled consumers with housing providers through Project Access vouchers. Consumers and their advocates work directly with local service and housing providers to address their needs as they integrate into the community.
- PHA Project: Department staff serves on the oversight committee of this grant funded in part by the Texas Council on Developmental Disabilities. Activities include the provision of training and technical assistance to public housing authorities to increase the number of integrated housing units available to persons with disabilities.

Elderly. TDHCA is a member of the Texas Department on Aging's (TDoA's) Agency Policy Advisory Committee. This Committee is comprised of various state agencies that serve the elderly, as well as industry experts that provide services to the elderly.

Homeless. TDHCA is the lead agency in the Texas Interagency Council for the Homeless (TICH). TICH is charged with surveying and evaluating services for the homeless in Texas; assisting in the coordination and provision of services for homeless person throughout the state; increasing the flow of information among service providers and appropriate authorities; developing guidelines to monitor services for the homeless; providing technical assistance to the housing finance divisions of TDHCA in assessing housing needs for persons with special needs; establishing a central resource and information center for the state's homeless, and developing a strategic plan to address the needs of the homeless in cooperation with TDHCA and the Health and Human Services Commission. Through the Texas Homeless Network, TDHCA also supports other activities that address homelessness, including providing technical assistance to develop and strengthen homeless coalitions throughout Texas; distributing a statewide bi-monthly newsletter on homelessness; maintaining an information resource center; conducting Continuum of Care Technical Assistance and Training workshops; and sponsoring an annual statewide conference on homeless issues.

Colonias. In 2001, the 77th Texas Legislative amended the Texas Government Code, Chapter 2306, Subchapter Z, which required the Department's Board of Directors to appoint members to the Colonia Resident Advisory Committee (C-RAC), which is to include two representatives from each county. The C-RAC members meet 30 days prior to making an award to a Colonia Self-Help Center. The C-RAC has been instrumental in voicing the concerns of the targeted populations and has helped both the Department and the Colonia Self-Help Centers develop useful tools and programs to address the needs of colonia residents.

Goal 10: TDHCA will discourage the segregation of persons with special needs from the general public

In 2002, the Department, with the assistance of the TDHCA Disability Advisory Committee, developed an integrated housing policy. In 2003, the Department adopted the policy as a rule for all Department housing programs.

Goal 11: TDHCA will improve the living conditions for the poor and homeless

Community Affairs. The target number of persons assisted through the homeless and poverty–related funds administered by the Department was 420,000. The total number of persons assisted through the Emergency Shelter Grants Program was 138,756, the total number served by the Community Services Block Grant Program was 313,798, and the total number served by the Emergency Nutrition and Temporary Emergency Relief Program was 826. The total number assisted through the Department's homeless and poverty–related funds for FY 2003 was 453,380.

The target number of persons assisted that achieve incomes above poverty level was 650. The total number of people that transitioned out of poverty with the assistance of community action agencies working with the Department was 1,602.

Emergency Shelter Grant Program. The target number of homeless shelters assisted for FY 2002 was 60; the actual number assisted was 72, 120 percent of the target number.

Other Funding

It is important to note that TDHCA is one organization in a network of housing and community service providers located throughout the state. Other agencies and departments, such as USDA Rural Development, local participating jurisdictions, the Texas State Affordable Housing Corporation, and local housing finance corporations, receive housing-related funds that work in conjunction with the Department's accomplishments. Table 8C shows housing funds available through non-TDHCA sources that were distributed across the state in 2003. These funds are also considered in the Regional Allocation Formula.

Table 8C: Non-TDHCA Sources of Housing Funding, 2003

Funding Source	Owner-Occupied Assistance	Rental Assistance	Owner-Occupied or Rental Assistance	Grand Total
Mortgage Revenue Bonds	$ 110,704,367	$ 104,057,164		$ 214,761,531
Emergency Shelter Grants		$ 9,877,494		$ 9,877,494
HOME Program			$ 78,094,792	$ 78,094,792
HOPWA Program		$ 11,752,000		$ 11,752,000
USDA Multifamily or Single Family Programs	$ 3,635,281	$ 5,676,464		$ 9,311,745
Tenant-Based Rental Assistance		$ 681,779,548		$ 681,779,548
Grand Total	$ 114,339,648	$ 813,142,670	$ 78,094,792	$ 1,005,577,110

Source: Texas Bond Review Board, HUD, and USDA

TDHCA Funding Distribution

The need for affordable housing far outweighs the funding available to address the problem. The Department distributes much of its funding to the 13 Uniform State Service Regions based on calculations of need. In an attempt to ensure an equitable distribution of all federal and state housing funds, the Department also takes into account other funding recently utilized in the region.

2004 TDHCA Regional Allocation Formula

Section 2306.111(d) of the Government Code requires TDHCA to use a Regional Allocation Formula (RAF) to allocate its HOME Program, Housing Trust Fund (HTF), and Housing Tax Credit (HTC) Program funding. The resulting RAF, which is based on objective measures of affordable housing need and available resources, determines how this program funding is distributed among the 13 Uniform State Service Regions TDHCA uses for planning purposes. While the methodology and formula data are similar, modified versions of the RAF are used for the HOME and HTF/HTC programs because the programs

- serve different types of households in terms of owner and renter status,
- allow for different eligible activities,
- have unique geographical eligibility requirements (i.e., 95 percent of HOME funds must serve non–participating jurisdictions).

As a dynamic measure of need, the formula is updated annually to reflect more up-to-date demographic and available funding information; respond to public comment on the formula; and include other factors as required to better assess regional affordable housing needs.

Funding Distribution under the 2004 RAF

Please note that funding distribution percentages are final, but final dollar amounts may change based on actual funding received by the Department.

Housing Tax Credit Regional Allocation Formula

Region	Reference City	Funding Available	Funding Distribution	Urban/ Exurban Areas	Rural Areas	Percent to Urban/ Exurban Areas	Percent to Rural Areas
1	Lubbock	$1,620,753	4.3%	$855,004	$765,749	52.8%	47.2%
2	Abilene	$1,067,631	2.8%	$581,108	$486,523	54.4%	45.6%
3	Dallas/Fort Worth	$7,001,362	18.4%	$6,544,854	$456,508	93.5%	6.5%
4	Tyler	$1,851,816	4.9%	$709,081	$1,142,735	38.3%	61.7%
5	Beaumont	$1,485,785	3.9%	$682,095	$803,690	45.9%	54.1%
6	Houston	$9,309,000	24.5%	$8,458,598	$850,402	90.9%	9.1%
7	Austin/Round Rock	$1,936,878	5.1%	$1,687,375	$249,503	87.1%	12.9%
8	Waco	$2,073,169	5.5%	$1,637,657	$435,512	79.0%	21.0%
9	San Antonio	$2,613,520	6.9%	$2,159,101	$454,419	82.6%	17.4%
10	Corpus Christi	$1,644,334	4.3%	$956,659	$687,675	58.2%	41.8%
11	Brownsville/Harlingen	$4,494,121	11.8%	$2,668,907	$1,825,214	59.4%	40.6%
12	San Angelo	$1,065,240	2.8%	$705,898	$359,342	66.3%	33.7%
13	El Paso	$1,836,391	4.8%	$1,562,049	$274,342	85.1%	14.9%
	Total	$38,000,000	100%	$29,208,385	$8,791,615	76.9%	23.1%

HOME Regional Allocation Formula

Region	Reference City	Funding Available	Funding Distribution	Urban/ Exurban Areas	Rural Areas	Percent to Urban/ Exurban Areas	Percent to Rural Areas
1	Plainview	$1,350,462	6.1%	$0	$1,350,462	0.0%	100.0%
2	Brownwood	$1,099,989	5.0%	$15,706	$1,084,283	1.4%	98.6%
3	Carrolton	$3,863,801	17.4%	$2,757,243	$1,106,558	71.4%	28.6%
4	Texarkana	$2,774,549	12.5%	$598,939	$2,175,610	21.6%	78.4%
5	Lufkin	$1,497,124	6.8%	$145,081	$1,352,043	9.7%	90.3%
6	League City	$1,586,233	7.2%	$686,441	$899,792	43.3%	56.7%
7	Round Rock	$1,443,461	6.5%	$764,150	$679,311	52.9%	47.1%
8	Temple	$1,114,795	5.0%	$513,617	$601,178	46.1%	53.9%
9	New Braunfels	$1,255,071	5.7%	$30,833	$1,224,238	2.5%	97.5%
10	Victoria	$1,779,084	8.0%	$394,470	$1,384,614	22.2%	77.8%
11	Del Rio	$2,451,189	11.1%	$360,711	$2,090,478	14.7%	85.3%
12	Midland	$1,222,856	5.5%	$568,719	$654,137	46.5%	53.5%
13	Socorro	$723,886	3.3%	$299,332	$424,554	41.4%	58.6%
	Total	$22,162,500	100%	$7,135,240	$15,027,260	32.2%	67.8%

Due to the relatively small funding amount available regionally, the decision has been made to allocate the HTF money regionally, but without a specified urban/exurban and rural distribution of funds within each region. The overall statewide urban/exurban and rural distribution of funds will be maintained in awarding the funds.

Housing Trust Fund Regional Allocation Formula

Region	Reference City	Funding Available	Funding Distribution	Urban/ Exurban Areas	Rural Areas	Percent to Urban/ Exurban Areas	Percent to Rural Areas
1	Lubbock	$85,302	4.3%				
2	Abilene	$56,191	2.8%				
3	Dallas/Fort Worth	$368,493	18.4%				
4	Tyler	$97,464	4.9%				
5	Beaumont	$78,199	3.9%				
6	Houston	$489,947	24.5%				
7	Austin/Round Rock	$101,941	5.1%				
8	Waco	$109,114	5.5%				
9	San Antonio	$137,554	6.9%				
10	Corpus Christi	$86,544	4.3%				
11	Brownsville/Harlingen	$236,533	11.8%				
12	San Angelo	$56,066	2.8%				
13	El Paso	$96,652	4.8%				
	Total	$2,000,000	100%	$1,537,284	$462,716	76.9%	23.1%

RAF Methodology

Affordable Housing Need (AHN). The following US Census data measures each region's share of the state's affordable housing need:

- Poverty: Number of persons in the region who live in poverty
- Cost burden: Housing units with a monthly gross rent or mortgage payment to monthly household income ratio that exceeds 30 percent
- Overcrowding: Housing units with more than one person per room
- Incomplete kitchen: Housing units that do not have all of the following: a sink with piped water; a range, or cook top and oven; and a refrigerator
- Incomplete plumbing: Housing units that do not have all of the following: hot and cold piped water, a flush toilet, and a bathtub or shower

The table below shows whether owner and/or renter data is included in each program formula.

	HTC & HTF		HOME	
	Renter	Owner	Renter	Owner
Poverty	√	√	√	√
Cost Burden	√		√	√
Overcrowding	√		√	√
Incomplete Plumbing	√		√	√
Incomplete Kitchen	√		√	√

The RAF uses the following steps to assess each region's share of the state's affordable housing need:

- For each of the above listed AHN factors, the region's total is divided by the state total to determine the region's portion of the state's total need.
- The resulting regional AHN factor percentages are then weighted to reflect each factor's relative size and representation of affordable housing need. The factor weights are: poverty = 50 percent, cost burden = 35 percent, overcrowding = 5 percent, incomplete kitchen = 5 percent, and incomplete plumbing = 5 percent.
- The weighted AHN factors are combined to create a single AHN percentage that represents the region's share of the state's affordable housing need.

Other Funding Sources. Section 2306.111(d) of the Government Code requires that the RAF consider other available housing resources in the region. The following funding sources are considered by the RAF.

Funding Type	HTC & HTF	HOME[29]
Emergency Shelter Grant Funds (TDHCA & PJ)	√	√
HOME Funds (Non-TDHCA)	√	
Housing for Persons with AIDS (HOPWA) Funding	√	
Multifamily Housing Tax Credits with Tax-Exempt Bond Financing	√	√
Multifamily Tax-Exempt Bond Financing (Texas Bond Review Board)[30]	√	√
PHA Operating and Capital Funding from HUD	√	√
Section 8 Tenant-Based Rental Assistance (TDHCA & PHA)	√	√
Single Family Bond Financing (TDHCA and Housing Finance Corporation)		√
US Dept. of Agriculture (USDA) Multifamily Development Funding	√	√
USDA Single Family 502 and 504 loans and grants		√
USDA Tenant-Based Rental Assistance	√	√

The following steps adjust the RAF to consider other available housing resources:

1) The percentage of Texas's other available funding that was distributed to each region is calculated.
2) The difference between each region's AHN percentage and other available funding percentage is calculated.
3) Each region's AHN percentage is adjusted based on the resulting size and sign (positive or negative) of the AHN need and other available funding difference relative to the other regions. For example, if a region has 5 percent of the state's AHN and received only 2 percent of the other available funding, then that region's AHN percentage will be slightly adjusted upwards. This adjusted AHN percentage determines how much HOME, HTC, or HTF funding the region will receive.

Rural and Exurban/Urban Need. Section 2306.111(d) of the Government Code requires that the RAF consider rural and urban/exurban areas in its distribution of program funding. The following steps are used to make this RAF adjustment.

1) Each place is identified as being urban/exurban or rural based a slightly modified version of the Housing Tax Credit definition which reflects terms used by the US Census.
    a) Rural Area - An area that is
        i) within the boundaries of a place as identified by the US Census Bureau and outside the boundaries of a metropolitan statistical area; or
        ii) within the boundaries of a metropolitan statistical area (MSA), if the place has a population of 20,000 or less and does not share a boundary with a place that has a population of 20,000 or more.

[29] Only funds in non–participating jurisdictions are considered for the HOME RAF.

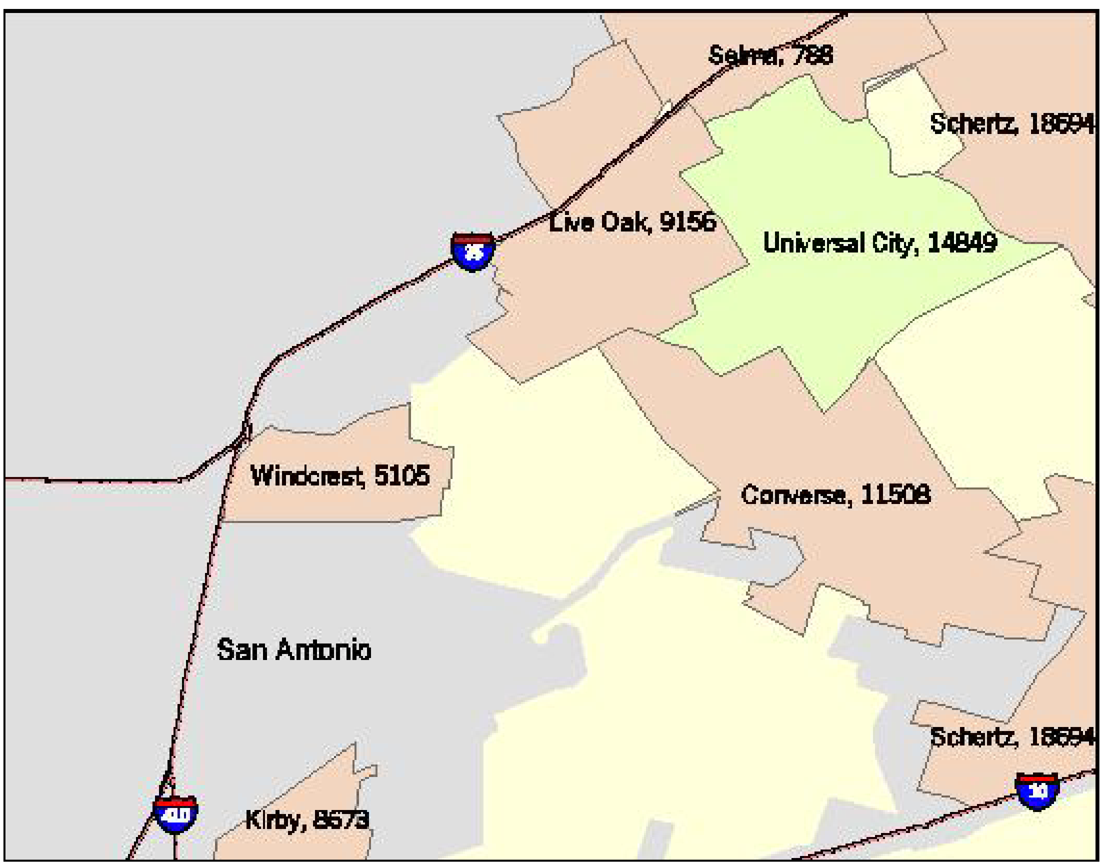
[30] The value of the bonds has been reduced to 20 percent of the total bond amount. This 20 percent adjustment is an estimate of the value of the bonds over an equivalent market-rate loan that was developed by the TDHCA Real Estate Analysis Division and the TDHCA Center for Housing Research, Planning, and Communications. The HTCs associated with these bonds are valued at their full estimated syndicated value.

   b) Urban/Exurban Areas - All US Census Bureau places that do not meet the "Rural Area" criteria.
2) The AHN data is totaled by urban/exurban and rural places for each region to determine how much of the region's affordable housing need is in urban/exurban and rural places.
3) The percentage of other available state and federal funding that went to urban/exurban and rural places within each region is calculated.
4) The difference between the region's distribution of urban/exurban and rural affordable housing need and the region's distribution of other available funding is calculated. Each region's urban/exurban and rural funding distribution is adjusted based on the resulting size and sign (positive or negative) of this difference. This adjusted urban/exurban and rural funding distribution determines the portion of the region's funds that will be available to urban/exurban and rural areas within the region.

The figure below shows how part 1) a) ii) of the Rural Area definition is used to determine if places within MSAs are rural or urban/exurban.

- San Antonio is considered urban/exurban because it is located within an MSA and its population is greater than 20,000.
- Live Oak is considered urban/exurban as its population is less than 20,000, but its boundaries touch San Antonio which has a population greater than 20,000.
- Universal City is considered rural since its population is greater than 20,000 and its boundaries do not touch the boundaries of a place with a population greater than 20,000.

Rural and Urban/Exurban Areas



2004 TDHCA Affordable Housing Needs Score

While not legislatively required, the scoring criteria used to evaluate HOME, Housing Trust Fund (HTF), and Housing Tax Credit (HTC) applications include an Affordable Housing Needs Score (AHNS). The AHNS provides a comparative assessment of each county and place's[31] level of need relative to other areas within the 13 Uniform State Service Regions TDHCA uses for planning purposes. Through the AHNS, applicants are encouraged to request funding to serve communities that have a high proportion of the region's affordable housing need.

Measures of Need

The AHNS calculation uses the same Affordable Housing Need (AHN) indicators, weighting factors, rural and urban/exurban area definitions, and program activity considerations as the Regional Allocation Formula (RAF) discussed in the previous section.

US Census Affordable Housing Need (AHN) Factors. Each US Census AHN factor (poverty, cost burden, overcrowding, incomplete plumbing, and incomplete kitchen) is used to quantify the area's level of affordable housing need by calculating the

- ratio of the county's AHN population to the region's total AHN population. This calculation measures the overall <u>distribution</u> of AHN populations within the region.
- ratio of the place's AHN population to the place's total population associated with that factor (i.e., rental cost burden/total renters). This calculation provides a measure of the <u>concentration</u> of the area's AHN populations relative to the area's total population.

For each of the above ratios, the resulting AHN factor percentages are weighted based on their relative population size and representation of affordable housing need. The weighted factor percentages are then combined to create a single AHN percentage. AHN points are assigned to each place based on a sliding scale that compares the place's AHN percentage to the other places in the region.

TDHCA 2003 Community Needs Survey (CNS). Responses to 2003 CNS questions that relate to the application activity are averaged by county. The resulting averages provide a quantifiable measure of the county's need for affordable housing as perceived by local officials. The county average is used because the CNS results are more subjective than US Census data and not all places return the survey. A scoring weight is assigned to each question based on its representation of the need for affordable housing. CNS points are then assigned to each county based on the average of the question responses.

Prior TDHCA Funding Awards in the Area. Areas where TDHCA HTC, HOME, and HTF funding awards have not been made during the preceding two program allocation cycles receive a five point scoring bonus. Only awards for activities that are similar to those for which an application will be made are considered in making this adjustment. Therefore, only rental development funding is considered in the HTC, HTF, and HOME rental development AHNS. Other TDHCA rental development awards are excluded from the HOME non–rental development activity score calculations.

[31] County scores are not generated for rental development activities. Development sites located outside the boundaries of a place (as designated by the US Census) will utilize the score of the place whose boundary is closest to the development site. County scores reflect the average score of all the places within the county.

In order to provide an equitable set of scores for all communities in a region, the AHNS point adjustment for previous TDHCA funding is subject to change until the application is submitted. This includes scoring revisions for both returned TDHCA funding as well as additional TDHCA awards that occur after the Board approves the AHNS methodology.

Calculation of the AHNS

A point value is assigned to each measure based on its representation of affordable housing need and its level of subjectivity (i.e., US Census data is less subjective than CNS data). A 20 point maximum score is divided into the following components:

- The county AHN population divided by region's AHN population is worth 6.25 points (31 percent of the total score).
- The place AHN population divided by the place total population is worth 6.25 points (31 percent of the total score).
- The Community Needs Survey factor is worth 2.5 points (13 percent of the score).
- Areas without a TDHCA HTC, HOME, and HTF funding award during the preceding two program allocation cycles receive a 5 point scoring bonus (25 percent of the score).

Rural and Exurban/Urban Need Area Designations

As required by §2306.111(d) of the Government Code, the RAF used by TDHCA to allocate HOME, HTF, and HTC funding provides a "rural and urban/exurban" area funding distribution. Each place is identified as urban/exurban or rural based on a slightly modified version of the HTC definition, which reflects terms used by the US Census.

Emergency Shelter Grants Program (ESGP) Allocation Formula

ESGP funds are reserved according to the percentage of poverty population identified in each of the 13 state service regions (i.e., 3.95 percent of the available ESGP funds were reserved for Region 1 with 3.95 percent of the state's poverty population). The top scoring applications in each region are recommended for funding, based on the amount of funds available for that region. Any application that receives a score below 70 percent of the highest raw score from the region is not considered for funding.

Community Services Block Grant Program (CSBG) Allocation Formula

Allocations to the 49 CSBG–eligible entities are based primarily on two factors: (1) the number of persons living in poverty within the designated service delivery area for each organization and (2) a calculation of population density. Poverty population is given 98 percent weight, and the ratio of inverse population density is given 2 percent weight. The formula also includes a base award of $30,000 for each organization before the factors are applied, as well as a floor, or minimum award.

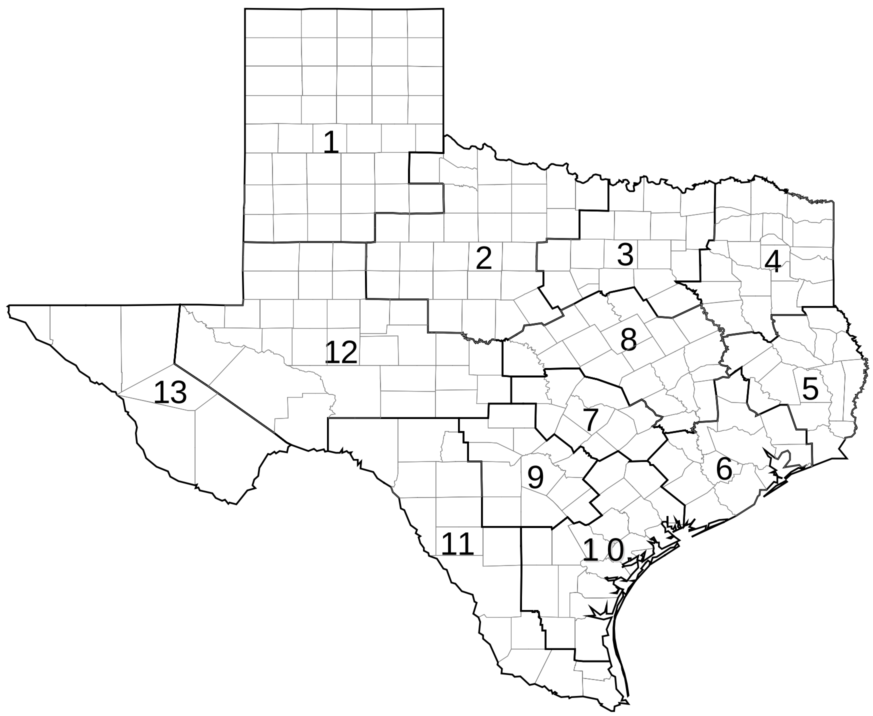
Comprehensive Energy Assistance Program and Weatherization Assistance Program Allocation Formula

The allocation formula for the Comprehensive Energy Assistance and Weatherization Assistance programs uses the following five factors and corresponding weights to distribute its funds by county: county non-elderly poverty household factor (40 percent); county elderly poverty household factor (40 percent); county inverse poverty household density factor (5 percent); county variance factor (5 percent); and county weather factor (10 percent).

UNIFORM STATE SERVICE REGIONS

The Department uses 13 Uniform State Service Regions for research and planning purposes. These regions follow the Texas Comptroller of Public Accounts' grouping that creates 13 regions to better identify the unique characteristics of the border counties and to treat larger metropolitan areas as distinct regions. The Uniform State Service Regions are shown below.

Uniform State Service Regions

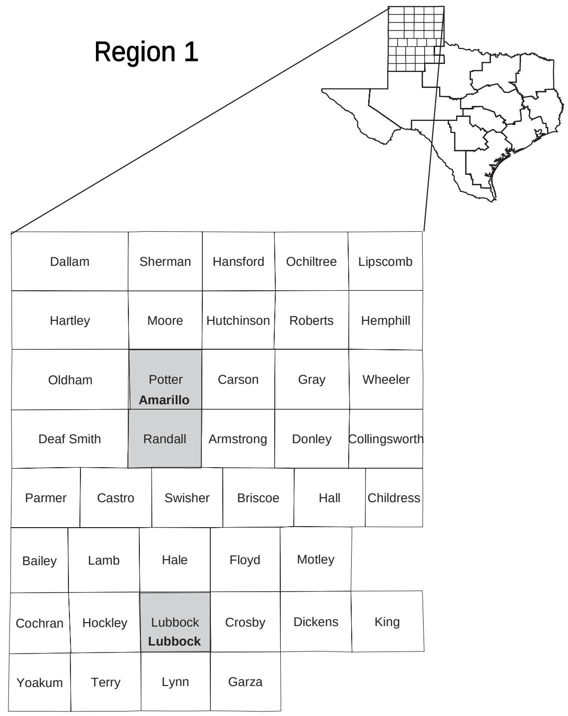


The size and diversity of the state of Texas necessitates tailored regional plans. Each of the following Uniform State Service Region plans includes a general demographic description, a needs assessment, an estimate of the existing housing supply, and the Department's funding distribution plans for the next year.

The first part of each plan describes regional characteristics including demographic information, general housing attributes, and public opinion on regional housing need. Following the introduction is a needs assessment analyzing multifamily and single family housing need and regional need for community service activities. The rental factors examined include poverty, housing cost burden, and the number of physically inadequate and overcrowded housing units. The owner-occupied factors considered are housing cost burden and physically inadequate and overcrowded housing. In order to gain a complete picture of the regional housing supply, the plan includes housing data from the US Census, total TDHCA assistance in the region, and consideration of other sources of assisted housing. The last section of the regional plan also describes the Department's allocation plan for the area.

REGION 1

This 41-county region in the northwest corner of Texas encompasses over 39,500 square miles of the Panhandle. According to the Census, the total population in Region 1 is 780,733, representing a 6.3 percent increase from 1990. Slightly less than 48 percent of the population lives in the urban areas, including Amarillo and Lubbock, and the rest live in rural areas of the region. The figure to the side shows Region 1 with the metropolitan statistical areas shaded.



According to the Texas Comptroller, the region will experience a 1.7 percent annual employment growth rate. The areas that have experienced the highest annual employment growth over the past 20 years are services to business, healthcare, and tourism and entertainment. The region specializes in specific economic areas including the ordnance and ammunition industry as demonstrated by the nuclear weapons operations near Amarillo. The oil and gas industry, as well as the agriculture and cattle industry, are other regional specializations.[32]

Of the 288,175 housing units in the region, 66.3 percent are owner occupied and 33.7 percent are occupied by renters, according to 2000 Census data. Approximately 3.7 percent of the state's population lives in Region 1, but regional housing permits for 2002 represent only 1.7 percent of the state's total housing starts.[33]

Almost three-quarters of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. Most prefer rental housing assistance to owner-occupied housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting reports from Region 1 identified several areas of concern that could be addressed by the Department. Focus groups prioritized funding for emergency homeless shelters and energy assistance and weatherization activities. The lack of homebuyer education was also mentioned. The scarcity of affordable rental housing and the need to address the substandard housing problems in the area ranked as high concerns for the region. Finally, the lack of effective communication—including program marketing and public education on affordable housing—was identified as an issue requiring attention.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The most recent Census data shows that 122,991 people in the region live in poverty, representing a 16.4 percent poverty rate. Almost 79 percent of the 15,677 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 17.5 percent of the households with severe housing cost burden. Only 2.8 percent of the households with severe cost burden are low income and 0.9 percent are moderate income and above.

In Region 1 there are 1,407 renter households that lack kitchen and/or plumbing facilities. Almost one-quarter of them (383 households) earn under 30 percent of the area median income, 193 households earn between 31 and 50 percent, and 594 households earn between 51 and 80 percent. The remaining 19 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income (272 households). Of the 8,817 overcrowded renter households, almost 28 percent are extremely low income, 26 percent are very low income, another 26 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a lack of a strong expressed preference among the various rental assistance activities. For the respondents the renovation of existing rental housing and new housing development rank only slightly higher than rental payment assistance.

Single Family Housing Need

Region 1 has 4.2 percent of the state's owner households (10,184 households) with severe housing cost burden. Almost 60 percent of that total is extremely low income households. Twenty-one percent, or 2,184 households, are very low income; 13 percent are low income; and the rest are moderate income and above.

There are 936 owner households in Region 1 that lack kitchen and/or plumbing facilities; many of these households are extremely low income (44 percent). Twenty seven percent of the households lacking kitchen and/or plumbing are very low income and almost 18 percent are low income. The remaining 100 households are moderate income and above. Region 1 has 4.1 percent of the state's overcrowded owner households. Of the 7,890 overcrowded households, almost 14 percent are extremely low income. Seventeen percent are very low income, 27 percent are low income, and the remaining 42 percent are moderate income and above.

In the two metropolitan areas of the region, over 61 percent of the households have sufficient income to afford the median-priced home; this is higher than the state average of 58 percent and the national average of 53 percent.[34]

According to the Community Needs Survey respondents from Region 1, home purchase assistance is more important than the renovation of existing owner-occupied housing and the development of new owner-occupied housing.

Community Services Need

Region 1 has 4.5 percent of the state's poverty households; 8,897 households are elderly and 37,710 households are headed by individuals under 65 years of age. Fourteen percent of the Community Needs Survey respondents report a severe or significant homeless problem in their area; this is lower than the state average of 23 percent. There is a strong preference for specific TDHCA weatherization and energy activities. Utility payment assistance is more important than measures to increase energy efficiency and activities that repair and replace existing HVAC equipment. Energy-related education activities rank the lowest among energy assistance and weatherization activities for the region.

Housing Supply

According to the most recent US Census, there are 322,045 housing units in Region 1 and 288,175 are occupied. Of the total housing stock, almost 75 percent are one unit; 15.9 percent are over two units; and the rest are mobile homes, boats, and RVs.

The Department has assisted approximately 3,700 multifamily and 886 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 7,319 units. Almost all of these units are multifamily; there have been 25 homeownership units. The housing finance corporations in the region have produced 1,101 multifamily units and assisted 1,644 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $4,975,745 in Region 1 in 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Multifamily development accounted for 35 percent of the total dollar amount committed during the past year; the next largest activity was single family owner-occupied assistance activities with 31 percent of the total dollar amount committed. The single family financing and homebuyer assistance group was the third largest with almost 16 percent of the total committed amount. More than 98 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

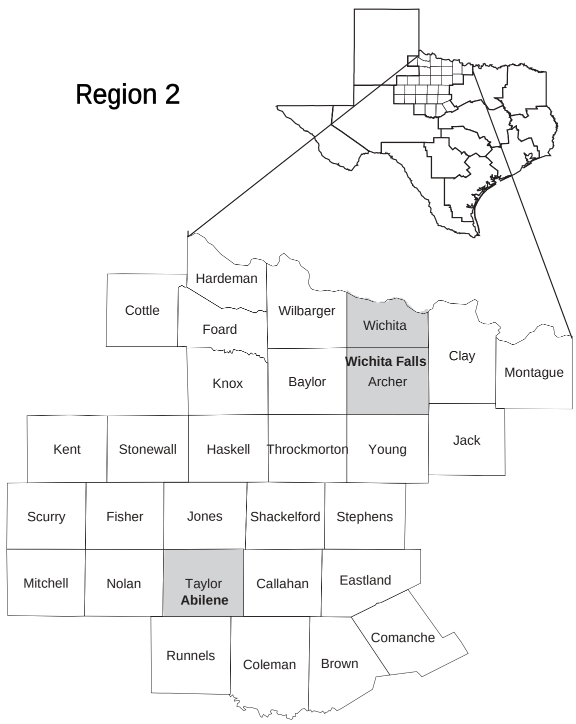
Other sources of housing assistance arrived in the region in 2003. Region 1 received almost $300,000 worth of single family assistance in bond funds and various USDA homeownership loan programs. Almost $29.8 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $2.3 million worth of HOME funds dedicated to either single family or multifamily activities. The housing finance corporations in Region 1 produced 8 multifamily units and assisted 3 single family households in 2003.

The Department's Regional Allocation Formula distributes 6.1 percent of the state's 2004 HOME funds to the region. Of that funding, 100 percent will go to rural areas, approximately $1,350,462. Region 1 also receives 4.3 percent of the state's Housing Tax Credit and Housing Trust Fund allocations, or $1,620,753 and $85,302 respectively. Of the tax credit allocation 47.2 percent will go to rural areas and 52.8 percent will go to urban areas.



REGION 2

Region 2 surrounds the metropolitan areas of Wichita Falls and Abilene, shaded in the figure to the left. The region has a majority rural population at 59 percent. A total of 549,267 people live in the area, or 2.6 percent of the state's population. Estimated population figures through 2002 display no projected change.[35]

The region's employment is expected to grow at the same rate that it has experienced since 1995, about 1 percent annual growth. According to the Texas Comptroller, delivering a high-tech educated workforce is one of the economic challenges of the region. Region 2 plays a smaller role in the state's economy than it did 30 years ago; other regions have experienced much higher rates of population and employment growth. The areas of economic specialization for the region include the oil and gas industries and the manufactured housing industry. Employment in the oil and gas industries has declined nationwide over the past decades, while the manufactured housing industry has experienced growth during the 1990s.[36]

There are 206,388 occupied housing units in the region: 69.1 percent are owner occupied and 30.9 percent are occupied by renters, according to 2000 Census data. Approximately 2.6 percent of the state's population lives in the area, but regional housing permits for 2002 represent only 0.4 percent of the state's total housing starts.[37]

Almost three-quarters of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. Most prefer rental housing assistance to owner-occupied housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 2 suggest that the department direct the limited housing assistance funding in the area towards existing housing stock rather than new construction. Also, duplicating housing assistance across state and federal funding types is inefficient and should be minimized. The focus group specified some areas in the TDHCA application process that could be improved. One suggestion was a renewal form for previous successful applicants rather than a full application. Another suggested that the application process for state funding is too complex and involves a lot of paperwork, and more training is required.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate for Region 2 is 15 percent, representing 77,647 people. Slightly more than 73 percent of the 8,147 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 21.2 percent of the households with severe housing cost burden. Approximately 4.7 percent of the households are low income and 0.7 percent are moderate income and above.

In Region 2, 611 renter households lack kitchen and/or plumbing facilities. More than half of them earn under 30 percent of the area median income, 20 percent of the households earn between 31 and 50 percent, and 17.5 percent earn between 51 and 80 percent. The remaining 12 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 3,897 overcrowded renter households, almost one-quarter are extremely low income, 26.1 percent are very low income, another 24.3 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

Single Family Housing Need

Region 2 has 3.5 percent of the state's owner households with severe housing cost burden, or 8,463 households. The region's share of owner households with severe housing cost burden is higher than the region's share of the state's population at 2.6 percent. Slightly more than 60 percent of the owner households with severe cost burden are extremely low income households. Twenty-two percent are very low income, 11.3 percent are low income, and the rest are moderate income and above.

There are 873 owner households in the region that lack kitchen and/or plumbing facilities; many of these households are extremely low income (47 percent). Sixteen percent of the households lacking kitchen and/or plumbing are very low income and almost 15 percent are low income. The remaining 186 households are moderate income and above. Region 2 has 2 percent of the state's overcrowded owner households. Of the 3,851 overcrowded households, 12 percent are extremely low income. Seventeen and one-half percent are very low income, 21 percent are low income, and the remaining households are moderate income and above.

In Abilene, one of the major metropolitan areas of the region, 76 percent of the households can afford the median-priced home. For Wichita Falls, the percentage is 68; both of these rates are higher than the state average of 58 percent and the national average of 53 percent.[38]

According to the Community Needs Survey respondents from Region 2, the renovation of existing owner-occupied housing is much more important than home purchase assistance and the development of new owner-occupied housing.

Community Services Need

Region 2 has 3.2 percent of the state's poverty households; 8,100 households are elderly (4.2 percent of the state's total) and 23,414 households are headed by individuals under 65 years of age (2.8 percent of the state's total).

Twelve percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region; this is lower than the state average of 23 percent. Among the different types of homeless assistance, short-term homeless shelters rank higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 2 has a strong preference for utility payment assistance. Measures to increase energy efficiency and assistance with HVAC systems rank next in importance. Energy-related educational activities are the least preferred of the energy-related activities.

Housing Supply

According to the most recent US Census, there are 243,506 housing units in the region and 84 percent are occupied. Of the total housing stock, almost 77 percent are one unit; 12 percent are over two units; and the rest are mobile homes, boats, and RVs.

The Department has assisted approximately 3,390 multifamily and 584 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 7,786 units; all of this assistance has been multifamily. The housing finance corporations have produced 280 multifamily units and assisted 616 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $3,375,207 in Region 2 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family owner-occupied assistance accounted for 42 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 40 percent of the total dollar amount committed. All of the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

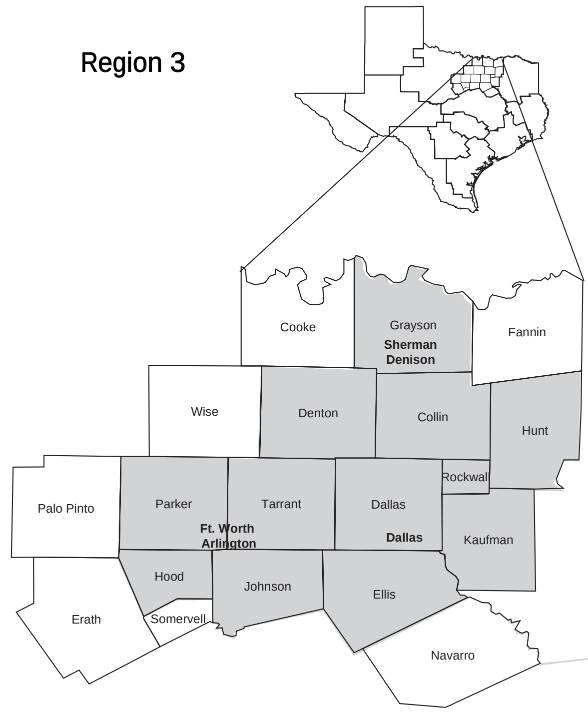
Other sources of housing assistance arrived in the region in 2003. Region 2 received over $2.5 million worth of single family assistance in bond funds and various USDA homeownership loan programs. More than $21.2million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1.2 million worth of HOME funds dedicated to either single family or multifamily activities. In 2003, the area housing finance corporations assisted 49 single family households with mortgages.

The Department's Regional Allocation Formula distributes 5 percent of the state's 2004 HOME funds to the region. Of that funding, 98.6 percent will go to rural areas, or approximately $1,084,283. Region 2 also receives 2.8 percent of the state's Housing Tax Credit and Housing Trust Fund allocations, $1,067,631 and 56,191 respectively. Forty-six percent of the Housing Tax Credit funding will go to rural areas, about $486,523; and 54 percent will go to urban areas, approximately $581,108.

REGION 3



Region 3, including the metropolitan areas of Dallas, Fort Worth, Arlington, Sherman, and Denison, is the state's most populous region. Population estimates for 2002 report 5,739,731 people in the region.[39] That is a 4.6 percent change from Census 2000 figures, higher than the state increase of 3.2 percent.

The region's employment is expected to grow by 1.7 percent per year through 2005, slightly higher than the state's projected annual growth rate. The growth in Region 3 will be slower than it has been in the past; this may cause some challenges for the region while adjusting to this slower pace of economic growth. The annual increase of gross regional product over the past 30 years has been a remarkable 4.7 percent. The industry with the highest growth rate over the past 20 years is the business services industry. This reflects a growing trend towards outsourcing and an increasing number of specially trained contract workers. The healthcare industry is the sector with the second highest growth rate, reflecting national trends. Future growth will be concentrated in some areas that are well-suited to the region, computer services and health care.[40]

There are 2,004,826 occupied housing units in the region: 60.9 percent are owner-occupied and 39.1 percent are occupied by renters, according to 2000 Census data. Region 3 has the second highest rate of renter-occupied housing. Approximately 26.3 percent of the state's population lives in the area, and regional housing permits for 2002 represent 33.9 percent of the state's total housing starts.[41]

Almost three-quarters of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 3 identified several areas of concern including the lack of rental housing for very low income families and the related landlord reluctance to accept Section 8 vouchers. One suggestion is that TDHCA require all tax credit units to accept Section 8 vouchers. Another area of concern is the lack of state support for mixed-income and mixed-use developments; this could be addressed by changing the scoring criterion to encourage mixed-use. According to meeting attendees, TDHCA takes an excessive length of time to process grant applications. Other obstacles to affordable housing include a shortage of qualified buyers with bad credit and public

[39] Texas State Data Center and Office of the State Demographer, "Texas Population Estimates Program."
[40] Texas Comptroller of Public Accounts, "Texas Regional Outlook."
[41] Real Estate Center at Texas A&M University, "Building Permit Activity."

opposition to affordable housing developments. More down payment assistance programs and increased education on affordable housing would address these issues.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 10.9 percent, representing 588,688 people. Almost 78 percent of the 90,349 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 18 percent of the households with severe housing cost burden. Approximately 3.5 percent of the households are low income and 0.9 percent are moderate income and above.

In Region 3, 6,161 renter households lack kitchen and/or plumbing facilities, which is 17.3 percent of the state's total. Approximately 21 percent earn less than 30 percent of the area median income, almost 35 percent of the households earn between 31 and 50 percent, and 32 percent earn between 51 and 80 percent. The remaining 12 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 65,312 overcrowded renter households, more than 28 percent are extremely low income, 24.3 percent are very low income, another 26 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

Single Family Housing Need

Region 3 has 23.1 percent of the state's owner households with severe housing cost burden, or 55,481 households. Slightly more than 51 percent of the owner households with severe cost burden are extremely low income households. Twenty-one percent are very low income, 16 percent are low income, and the rest are moderate income and above.

There are 4,256 owner households in the region that lack kitchen and/or plumbing facilities; almost 32 percent of these households are extremely low income. Almost 24 percent of the households lacking kitchen and/or plumbing are very low income and 23.4 percent are low income. The remaining 904 households are moderate income and above. Region 3 has 15.8 percent of the state's overcrowded owner households. Of the 30,544 overcrowded households, 11 percent are extremely low income. Fifteen percent are very low income, 27 percent are low income, and the remaining households are moderate income and above.

The areas with the highest percentage of households that can afford the median-priced home are Collin County, Denton County, Irving, and Sherman-Denison. Dallas has the lowest percentage at 59 percent.[42]

According to the Community Needs Survey respondents from Region 3, the renovation of existing owner-occupied housing is slightly more important than the development of new owner-occupied housing and home purchase assistance.

Community Services Need

Region 3 has 19.1 percent of the state's poverty households; 32,129 households are elderly (16.6 percent of the state's total) and 165,495 households are headed by individuals under 65 years of age (19.7 percent of the state's total).

Twenty-three percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 3 has a strong preference for utility payment assistance, reflecting the state trend. The repair and replacement of HVAC equipment ranks next in importance, followed by weatherization measures to increase energy efficiency. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 2,140,641 housing units in the region and 93.7 percent are occupied; this is the highest occupancy rate among all of the regions. Of the total housing stock, 64 percent are one unit; 30 percent are over two units; and the rest are mobile homes and boats.

The Department has assisted approximately 61,679 multifamily and 5,741 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 49,308 units; all but 82 have been multifamily. The housing finance corporations have assisted 13,207 multifamily units and 4,501 single family households in the region.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $161,836,699 in Region 3 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Multifamily development accounted for 88 percent of the total dollar amount committed during the past year. Almost 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

Other sources of housing assistance arrived in the region in 2003. Region 3 received over $33.3 million worth of single family assistance in bond funds and various USDA homeownership loan programs. More than $328.6 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $19.8 million worth of HOME funds dedicated to either single family or multifamily activities. In 2003, the housing finance corporations assisted 302 multifamily units with 9 other developments under construction. There were 350 single family households assisted by HFCs in 2003.

The Department's Regional Allocation Formula distributes 17.4 percent of the state's 2004 HOME funds to the region. Of that funding, 28.6 percent will go to rural areas, approximately $1,106,558. The other $3,383,959 will go to urban areas. Region 3 also receives 18.4 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Approximately $456,508 of Housing Tax Credit funding, or 6.5 percent will go to rural areas and $6,544,854 will go to urban areas. The total Housing Trust Fund funding for the region is $368,493.

REGION 4

Region 4, located in the northeast corner of the state, surrounds the urban areas of Texarkana, Longview-Marshall, and Tyler. According to the 2000 Census, 4.9 percent of the state's population lives in Region 4, or 1,015,648 people. As indicated by population estimates through 2002, the region has experienced 1.6 percent growth; this is lower than the state increase of 3.2 percent.[43] Region 4 has the highest percentage of rural population in the state at 77.5 percent.

Similar to population trends, employment in the region over the next 5 years will increase at a slightly lower rate compared to the state. Region 4 is projected to grow at 1.3 percent each year and the state will grow by 1.6 percent. The region's share of the state's employment and gross regional product has declined between 1970 and 2000, partially due to extremely high growth rates in other regions. The industry with the highest growth rate over the past 20 years is the business services industry. This is a result of a growing trend towards outsourcing and an increasing number of specially trained contract workers. The healthcare industry is the sector with the second highest growth rate, reflecting national trends. Regional economic specialties include oil and gas and forest-related industries; both of these areas have experienced declining employment.[44]

There are 380,468 occupied housing units in the region; 73.8 percent are owner occupied and 26.2 percent are occupied by renters, according to 2000 Census data. Region 4 has the highest rate of owner-occupied housing among the Uniform State Service Regions. Approximately 4.9 percent of the state's population lives in the area, and regional housing permits for 2002 represent 1.01 percent of the state's total housing starts.[45]

Approximately 73 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 4 represented several sectors of the housing industry including private developers, nonprofits, housing authorities, and grant consultants. Some of the identified housing problems include the poor quality of affordable housing and existing obstacles to development such as prohibitive land costs, onerous lead-based paint restrictions, and building codes. Other identified housing problems include a lack of mortgage products for buyers of affordable housing

[43] Texas State Data Center and Office of the State Demographer, "Texas Population Estimates Program."
[44] Texas Comptroller of Public Accounts, "Texas Regional Outlook."
[45] Real Estate Center at Texas A&M University, "Building Permit Activity."

and a scarcity of housing development in downtown areas. Homebuyer and consumer education were mentioned as priorities for the region.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 15.7 percent, representing 152,036 people. Almost 77 percent of the 14,617 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 19.5 percent of the households with severe housing cost burden. Approximately 3.4 percent of the households are low income and 0.6 percent are moderate income and above.

In the region, 2,031 renter households lack kitchen and/or plumbing facilities; this is 5.7 percent of the state's total. Approximately 58.5 percent earn less than 30 percent of the area median income, almost 20 percent of the households earn between 31 and 50 percent, and 18 percent earn between 51 and 80 percent. The remaining 3 percent of the households that live in physically inadequate housing earn over 80 percent of the area median income. Of the 7,505 overcrowded renter households, 30 percent are extremely low income, 22 percent are very low income, another 21 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

Single Family Housing Need

Region 4 has 7.1 percent of the state's owner households with severe housing cost burden, or 17,074 households. Slightly less than 61 percent of the owner households with severe cost burden are extremely low income households. Twenty-one percent are very low income, 12 percent are low income, and the rest are moderate income and above.

There are 3,716 owner households in the region that lack kitchen and/or plumbing facilities; almost 61 percent of these households are extremely low income. Almost 15 percent of the households lacking kitchen and/or plumbing are very low income and 12 percent are low income. The remaining 404 households are moderate income and above. Region 4 has 3.6 percent of the state's overcrowded owner households. Of the 7,047 overcrowded households, 14 percent are extremely low income. Sixteen percent are very low income, 22 percent are low income, and the remaining households are moderate income and above.

In the urban area of Longview-Marshall, approximately 65 percent of the households can afford the median-priced home. For Tyler the figure is 60 percent.[46]

The Community Needs Survey respondents from Region 4 do not express any preference for the different types of owner-occupied housing assistance. The renovation of existing housing, purchase assistance, and new housing development all rank about the same in importance.

Community Services Need

Region 4 has 5.7 percent of the state's poverty households; 15,592 households are elderly (8.1 percent of the state's total) and 43,499 households are headed by individuals under 65 years of age (5.2 percent of the state's total).

Twenty percent of the Community Needs Survey respondents report a severe or significant homeless problem in their area. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 4 has a strong preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 434,792 housing units in the region and 87.5 percent are occupied. Of the total housing stock, 71 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs.

The Department has assisted approximately 6,880 multifamily and 1,176 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 9,296 multifamily units in Region 4. The housing finance corporations in the region have created 706 multifamily units and assisted 680 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $6,899,628 in Region 4 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family owner-occupied assistance accounted for 43 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 38 percent of the total dollar amount committed. Single family financing and homebuyer assistance was the third largest activity with 14 percent of the total dollar amount committed. All the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

Other sources of housing assistance arrived in the region in 2003. Region 4 received over $530,000 worth of single family assistance in the form of various USDA homeownership loan programs. Approximately $36.1 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1 million worth of HOME funds dedicated to either single family or multifamily activities. There is one housing finance corporation–assisted multifamily development under construction in the region.

The Department's Regional Allocation Formula distributes 12.5 percent of the state's 2004 HOME funds to the region. Of the approximate $2,774,549 total, 78.4 percent will go to rural areas. Region 4 also receives 4.9 percent of the state's Housing Tax Credit and Housing Trust Fund allocations, about $1,851,816 and $97,464 respectively. Of the Housing Tax Credit funding, 61.7 percent will go to rural areas and 38.3 percent will go to urban areas.

REGION 5

Region 5 encompasses a 15-county area in east Texas including the urban areas of Beaumont and Port Arthur. According to the 2000 Census, 740,952 people live in the region. Most of the population lives in rural areas, over 70 percent. Population estimates through 2002 show a 0.8 percent growth rate for the area, compared to the 3.2 percent growth for the state as a whole.[47]

Over the next few years to 2005, the employment in the area is expected to grow at the same rate it did for the period of 1995 to 2000, 1.5 percent. The region's share of the state's employment, population, and gross regional product has declined between 1970 and 2000. The industry with the highest growth rate over the past 20 years is the business services industry. This reflects a growing trend towards outsourcing and an increasing number of specially trained contract workers. The healthcare industry is the sector with the second highest growth rate, same as national trends. The regional economic specialties include the oil and gas industries and the forest-related industries, both of these areas have experienced declining employment numbers.[48]

There are 275,122 occupied housing units in the region, 73.4 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 3.6 percent of the state's population lives in the area, and regional housing permits for 2002 represent 0.95 percent of the state's total housing starts.[49]

Approximately 80 percent of the respondents to the 2003 Community Needs Survey report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meetings in Region 5 were very well attended: over 67 people met at two locations to discuss affordable housing problems and solutions. The groups expressed concern with the existing obstacles to homeownership such as a lack of down payment and closing costs, need for education, and predatory lenders. Another problem with affordable housing in the region is the proliferation of substandard and dilapidated homes, including manufactured homes. There is also a scarcity of funding to rehabilitate existing housing. Meeting attendees would like to see more information sharing, perhaps a clearinghouse of available housing resources. There is a lack of technical and administrative support at the local government level in the region.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is approximately 17.1 percent, higher than the state rate of 15.4 percent. More than 81 percent of the 13,186 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 15 percent of the households with severe housing cost burden. Approximately 3.7 percent of the households are low income and 0.1 percent are moderate income and above.

In the region, 1,383 renter households lack kitchen and/or plumbing facilities; this is 3.9 percent of the state's total. Approximately 47 percent earn less than 30 percent of the area median income, more than 27 percent of the households earn between 31 and 50 percent, and 23 percent earn between 51 and 80 percent. The remaining 3 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 5,398 overcrowded renter households, 35 percent are extremely low income, 21 percent are very low income, another 19 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over other rental housing activities. The renovation of existing housing is more important than rental payment assistance in the region.

Single Family Housing Need

Region 5 has 5.2 percent of the state's owner households with severe housing cost burden, or 12,536 households. Slightly less than 67 percent of the owner households with severe cost burden are extremely low income households. Twenty percent are very low income, 9 percent are low income, and the rest are moderate income and above.

There are 2,444 owner households in the region that lack kitchen and/or plumbing facilities; almost 59 percent of these households are extremely low income. Almost 18 percent of the households lacking kitchen and/or plumbing are very low income; 14 percent are low income. The remaining 235 households are moderate income and above. Region 5 has 3.3 percent of the state's overcrowded owner households. Of the 6,368 overcrowded households, 12 percent are extremely low income. Thirteen percent are very low income, 23 percent are low income, and the remaining households are moderate income and above.

In the Port Arthur area, approximately 62 percent of the households can afford the median-priced home. For Lufkin the figure is 71 percent.[50]

[50] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 5 express a slight preference for new housing development; the renovation of existing housing and purchase assistance ranked next in importance.

Community Services Need

Region 5 has 4.6 percent of the state's poverty households; 11,148 households are elderly (5.8 percent of the state's total) and 36,076 households are headed by individuals under 65 years of age (4.3 percent of the state's total).

Twenty-one percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 5 has a strong preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 325,047 housing units in the region and 84.7 percent are occupied. Of the total housing stock, 69.3 percent are one unit, 11 percent are over two units, and 18.6 percent are mobile homes. Boats and RVs make up the rest of the housing stock.

The Department has assisted approximately 4,610 multifamily and 890 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 10,444 units, most have been multifamily units. The housing finance corporations in the region have assisted 860 multifamily units and 151 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $9,157,798 in Region 5 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family owner-occupied assistance accounted for 40 percent of the total dollar amount committed during the past year; the next largest activity was multifamily rehabilitation with 21 percent of the total dollar amount committed. Multifamily development was the third largest activity with 18 percent of the total dollar amount committed. Approximately 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

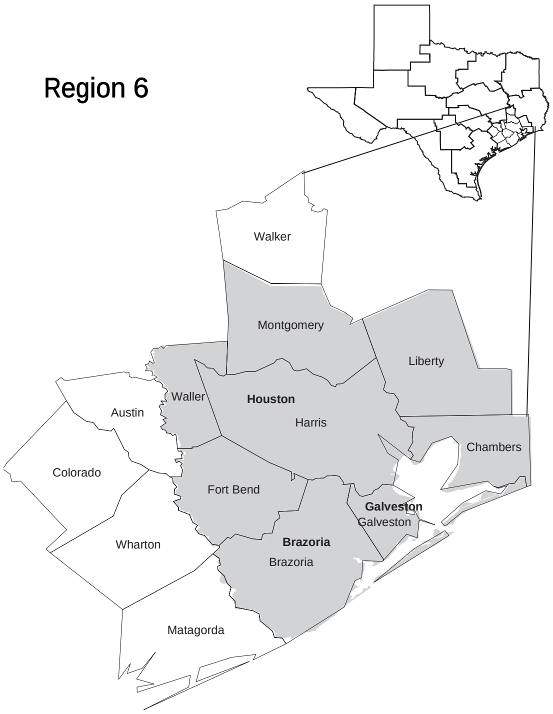
Other sources of housing assistance arrived in the region in 2003. Region 5 received over $1.7 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $40.7 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1.3 million worth of HOME funds dedicated to either single family or multifamily activities. The area housing finance corporations assisted 23 single family households in the region and there are 2 HFC-assisted multifamily developments under construction.

The Department's Regional Allocation Formula distributes 6.8 percent of the state's 2004 HOME funds to the region, about $1,497,124. Of that funding, 90.3 percent will go to rural areas. Region 5 also receives 3.9 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the total Housing Tax Credit funding, $803,690, or 54.1 percent will go to rural areas and 45.9 percent will go to urban areas. The total Housing Trust Fund allocation for the region is $78,199.



REGION 6

Region 6 includes the urban areas of Houston, Brazoria, and Galveston. According to the US Census, 4,854,454 people live in the region. Over 66 percent of the population lives in urban areas. Population estimates through January 2002 show a 3.3 percent increase, about the same as the state as a whole.[51]

Employment in the region is projected to grow at 1.6 percent, the same annual growth rate as the state. Region 6 was one of the fastest growing areas in the state over the past 30 years. There have been three distinct economic eras in the region's history. From 1970 to 1982, employment grew at a 5.7 percent annual rate. From 1982 to 1988, there was no change in the rate, and from 1988 to 2000, the region has seen a 2.8 percent growth rate. These eras reflect the region's history with the oil and gas industry and the real estate business. The industry with the highest employment growth since 1980 is services to business. The healthcare industry is the sector with the second highest growth rate, reflecting national trends. The main regional economic specialty is oil and gas.[52]

There are 1,702,792 occupied housing units in the region, 60.9 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 23.3 percent of the state's population lives in the area, and regional housing permits for 2002 represent 27.8 percent of the state's total housing starts.[53]

Approximately 77 percent of the respondents to the 2003 Community Needs Survey report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 6 identified three main areas of concern. There is a lack of communication among the affordable housing community and there is little sharing of knowledge. One solution to this problem is a regional or statewide repository of information. Another issue that requires attention is the public perception of "affordable housing." The group recommends using other terms to describe affordable housing such as "work force housing" or "providing a continuum of housing choice." There is also a shortage of support for the nonprofit sector, both in terms of funding and technical assistance.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 13.8 percent. Approximately 81 percent of the 87,155 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 15 percent of the households with severe housing cost burden. Approximately 3.2 percent of the households are low income and 0.7 percent are moderate income and above.

In the region, 7,514 renter households lack kitchen and/or plumbing facilities; this is 21.1 percent of the state's total. Approximately 30 percent earn less than 30 percent of the area median income, more than 40 percent of the households earn between 31 and 50 percent, and 24 percent earn between 51 and 80 percent. The remaining 6.4 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 80,090 overcrowded renter households, 30 percent are extremely low income, 24 percent are very low income, another 25 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over other rental housing activities. The renovation of existing housing is more important than rental payment assistance in the region.

Single Family Housing Need

Region 6 has 21 percent of the state's owner households with severe housing cost burden, or 50,776 households. Slightly less than 57 percent of the owner households with severe cost burden are extremely low income households. Twenty-one percent are very low income, 12.5 percent are low income, and the rest are moderate income and above.

There are 6,160 owner households in the region that lack kitchen and/or plumbing facilities; almost 48 percent of these households are extremely low income. Almost 24 percent of the households lacking kitchen and/or plumbing are very low income and 16 percent are low income. The remaining 796 households are moderate income and above. Region 6 has 19.7 percent of the state's overcrowded owner households. Of the 38,123 overcrowded households, 12 percent are extremely low income. Fourteen percent are very low income, 26 percent are low income, and the remaining households are moderate income and above.

In the Houston area, approximately 60 percent of the households can afford the median-priced home. For Fort Bend and Montgomery County the figure is 65 percent.[54]

[54] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 6 express a slight preference for new housing development; the renovation of existing housing and purchase assistance rank next in importance.

Community Services Need

Region 6 has 20.5 percent of the state's poverty households; 32,192 households are elderly (16.7 percent of the state's total) and 179,586 households are headed by individuals under 65 years of age (21.4 percent of the state's total).

Thirty-two percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 6 has a strong preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 1,853,854 housing units in the region and 91.9 percent are occupied. Of the total housing stock, 71 percent are one unit; 18 percent are over two units; and the rest are mobile homes, RVs, and boats.

The Department has assisted approximately 44,750 multifamily and 3,790 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 27,503 units, most have been multifamily units. The housing finance corporations in the region have assisted 30,074 multifamily units and 1,206 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $79,301,369 in Region 6 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Multifamily development accounted for 77 percent of the total dollar amount committed during the past year. Approximately 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

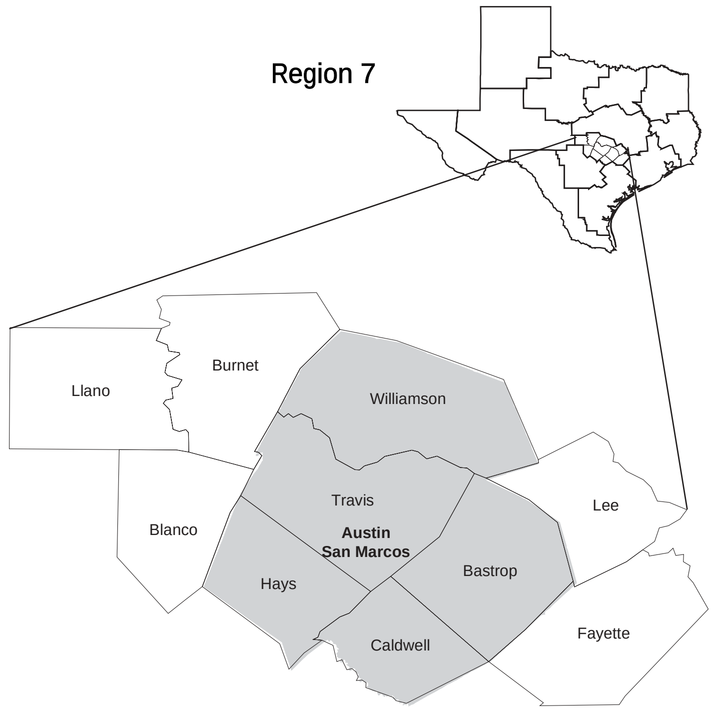
Other sources of housing assistance arrived in the region in 2003. Region 6 received over $25.8 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $162.8 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $21.9 million worth of HOME funds dedicated to either single family or multifamily activities. In 2003, the area Housing finance corporations produced 360 multifamily units with 4 other developments under construction. There were 305 single family households assisted by HFCs in 2003.

The Department's Regional Allocation Formula distributes 7.2 percent of the state's 2004 HOME funds to the region. Of that funding, 56.7 percent, approximately $899,792 will go to rural areas; the other 43.3 percent will go to urban areas. Region 6 also receives 24.5 percent of the state's Housing Tax Credit and Housing Trust Fund allocations, about $9,309,000 and $489,947 respectively. Of the Housing Tax Credit funding, 9.1 percent will go to rural areas and 90.9 percent will go to urban areas.

REGION 7



The urban area of Austin-San Marcos is at the center of Region 7. According to the US Census, 1,346,833 people live in the region. Over 68 percent of the population lives in urban areas. Population estimates through January 2002 show a 6.1 percent increase, the highest growth in the state.[55]

Employment in the region is projected to grow at 1.2 percent between 2000 and 2005. The rate will pick up during the latter part of the period. Region 7 was the fastest growing area in the state over the past 30 years; the region's share of the state's growth has increased as well. The areas with the highest employment growth since 1980 are services to business and high tech, communications, aviation, and electronics. The high tech growth that occurred during the late 1980s and 1990s is due to Region 7 companies such as Dell, IBM, Motorola, Samsung, MCC, and AMD. The region has experienced a recent economic decline in the high tech areas and will require time to rebound.[56]

There are 510,555 occupied housing units in the region, 60 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 6.5 percent of the state's population lives in the area, and regional housing permits for 2002 represent 10.6 percent of the state's total housing starts.[57]

Approximately 91 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem; this is the highest percentage in the state. There is a preference for rental housing assistance over owner-occupied housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 7 identified several areas of concern. A major issue for the region is education, including consumer education about housing options and responsibilities as well as public education about the benefits of affordable housing. The government should create incentives for affordable housing development. Development costs in the area are increasing, and there is a lack of financing for development. One solution to the problem is more public/private partnerships.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 11.1 percent. Approximately 78 percent of the 31,118 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 18 percent of the households with severe housing cost burden. Approximately 3.4 percent of the households are low income and 0.5 percent are moderate income and above.

In the region, 1,939 renter households lack kitchen and/or plumbing facilities; this is 5.4 percent of the state's total. Approximately 32 percent earn less than 30 percent of the area median income, more than 33 percent of the households earn between 31 and 50 percent, and 24 percent earn between 51 and 80 percent. The remaining 11.2 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 13,035 overcrowded renter households, 33 percent are extremely low income, 23 percent are very low income, another 24 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for renovation of existing housing over other rental housing activities. Rental payment assistance is more important than in the region new housing development.

Single Family Housing Need

Region 7 has 5.4 percent of the state's owner households with severe housing cost burden, or 13,037 households. Slightly more than 43 percent of the owner households with severe cost burden are extremely low income households. Twenty-four percent are very low income, 19.5 percent are low income, and the rest are moderate income and above.

There are 1,834 owner households in the region that lack kitchen and/or plumbing facilities; almost 39 percent of these households are extremely low income. More than 19 percent of the households lacking kitchen and/or plumbing are very low income and 18 percent are low income. The remaining 449 households are moderate income and above. Region 7 has 3.6 percent of the state's overcrowded owner households. Of the 6,955 overcrowded households, 13 percent are extremely low income. Fifteen percent are very low income, 27 percent are low income, and the remaining households are moderate income and above.

In the Austin area, approximately 64 percent of the households can afford the median-priced home.[58]

[58] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 7 express a slight preference for the renovation of existing housing; purchase assistance and new housing development rank next in importance.

Community Services Need

Region 7 has 5.1 percent of the state's poverty households; 6,601 households are elderly (3.5 percent of the state's total) and 46,549 households are headed by individuals under 65 years of age (5.5 percent of the state's total).

Twenty-nine percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 7 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 545,761 housing units in the region and 93.5 percent are occupied. Of the total housing stock, 62 percent are one unit, 30 percent are over two units, and the rest are mobile homes, boats.

The Department has assisted approximately 16,770 multifamily and 3,883 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 7,955 units; all but 30 units have been multifamily. The housing finance corporations have produced 6,334 multifamily units; and assisted 947 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $9,157,798 in Region 7 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family financing and homebuyer assistance accounted for 61 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 29 percent of the total dollar amount committed. Approximately 95 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

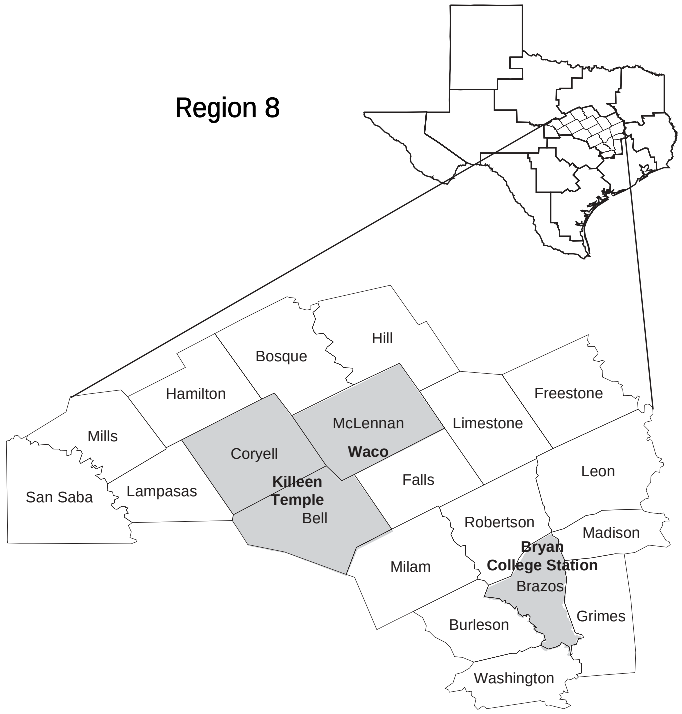
Other sources of housing assistance arrived in the region in 2003. Region 7 received over $8.7 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $70.2 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $4.7 million worth of HOME funds dedicated to either single family or multifamily activities. The area housing finance corporations have assisted 2 multifamily developments currently under construction. There were 75 single family households assisted in 2003.

The Department's Regional Allocation Formula distributes 6.5 percent of the state's 2004 HOME funds to the region. Of that funding, 47.1 percent will go to rural areas, approximately $679,311. The remaining $937,840 will go to urban areas. Region 7 also receives 5.1 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 12.9 percent, or $249,503, will go to rural areas and 87.1 percent, or $1,687,375 will go to urban areas. The total amount of Housing Trust Fund allocation is $101,941.



REGION 8

Region 8, located in the center of the state, surrounds the urban areas of Waco, Bryan, College Station, Killeen, and Temple. According to the US Census, 963,139 people live in the region. Over 55 percent of the population lives in urban areas. Population estimates through January 2002 show a 2.2 percent increase.[59]

Employment in the region is projected to grow at 1.3 percent between 2000 and 2005. The region, one of the fastest growing areas in the state in the past, will not continue to experience such high rates of growth. The areas with the highest employment growth since 1980 are services to business, tourism, and personal services. The growth in tourism and personal services is a reflection of the wealth effect of growing per-capita personal income. The industries that are projected to add the most jobs through 2005 include state and local government, eating and drinking places, and health services.[60]

There are 344,575 occupied housing units in the region, 61 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 4.6 percent of the state's population lives in the area, and regional housing permits for 2002 represent 3.53 percent of the state's total housing starts.[61]

Approximately 76 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 8 identified several areas of concern.[62] A major issue is for the region is education, including consumer education about housing options and responsibilities and public education about the benefits of affordable housing. The government should create incentives for affordable housing development. Development costs in the area are increasing, and there is a lack of financing for development. One solution to the problem is more public/private partnerships.

60 Texas Comptroller of Public Accounts, "Texas Regional Outlook."
61 Real Estate Center at Texas A&M University, "Building Permit Activity."
62 The Regional Advisory Committees are organized based on the old Uniform State Service Regions. Old Region 7 equals new regions 7 and 8.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 16.7 percent. Approximately 75 percent of the 23,277 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 21 percent of the households with severe housing cost burden. Approximately 3.4 percent of the households are low income and 0.5 percent are moderate income and above.

In the region, 1,580 renter households lack kitchen and/or plumbing facilities; this is 4.4 percent of the state's total. Approximately 50 percent earn less than 30 percent of the area median income, more than 22 percent of the households earn between 31 and 50 percent, and 27 percent earn between 51 and 80 percent. The remaining 1.5 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 9,428 overcrowded renter households, 26 percent are extremely low income, 21 percent are very low income, another 26 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for renovation of existing housing over other rental housing activities. Rental payment assistance is more important than in the region new housing development.

Single Family Housing Need

Region 8 has 5 percent of the state's owner households with severe housing cost burden, or 11,897 households. Slightly more than 57 percent of the owner households with severe cost burden are extremely low income households. Twenty-one percent are very low income, 16 percent are low income, and the rest are moderate income and above.

There are 2,368 owner households in the region that lack kitchen and/or plumbing facilities; almost 53 percent of these households are extremely low income. Almost 17 percent of the households lacking kitchen and/or plumbing are very low income and 15 percent are low income. The remaining 360 households are moderate income and above. Region 8 has 2.8 percent of the state's overcrowded owner households. Of the 5,479 overcrowded households, 10 percent are extremely low income. Fourteen percent are very low income, 25 percent are low income, and the remaining households are moderate income and above.

In the Bryan-College Station area only approximately 44 percent of the households can afford the median-priced home. For Killeen-Fort Hood, 75 percent can afford the median-priced home.[63]

---

[63] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 8 express a slight preference for the renovation of existing housing; purchase assistance and new housing development rank next in importance.

Community Services Need

Region 8 has 5.6 percent of the state's poverty households; 10,531 households are elderly (5.4 percent of the state's total) and 47,640 households are headed by individuals under 65 years of age (5.7 percent of the state's total).

Twenty-seven percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 8 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 387,627 housing units in the region and 88.9 percent are occupied. Of the total housing stock, 67 percent are one unit, 20 percent are over two units, 12 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 8,340 multifamily and 1,715 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 12,599 units; all but 246 units have been multifamily. The housing finance corporations in Region 8 have assisted 104 multifamily households and 774 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $9,428,716 in Region 8 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family owner-occupied assistance accounted for 43 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 29 percent of the total dollar amount committed. Rental payment assistance in the region represented 12 percent of the total committed. All of the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

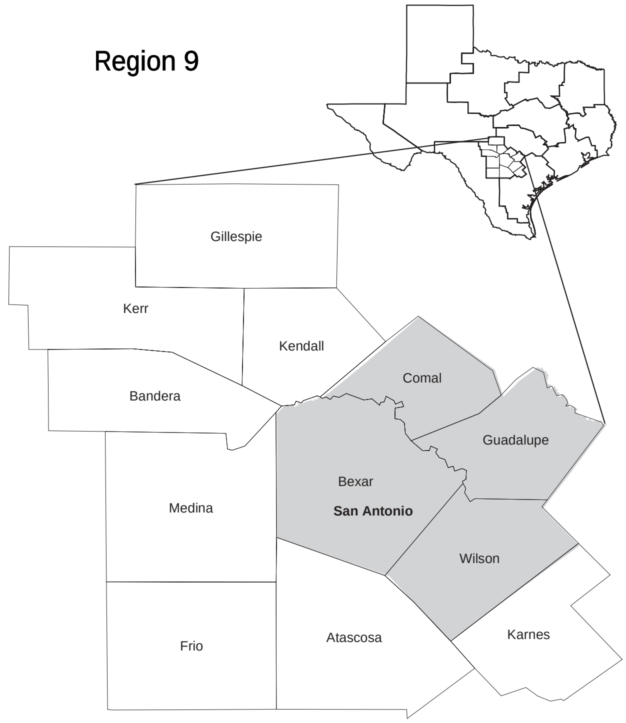
Other sources of housing assistance arrived in the region in 2003. Region 8 received over $6 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $40.7 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $3.4 million worth of HOME funds dedicated to either single family or multifamily activities. The housing finance corporations assisted 84 single family households in 2003.

The Department's Regional Allocation Formula distributes 5 percent of the state's 2004 HOME funds to the region. Of that funding, 53.9 percent will go to rural areas, approximately $601,178. The other 46.1 percent will go to urban areas. Region 8 also receives 5.5 percent of the state's Housing Tax Credit and Housing Trust Fund allocations, about $2,073,169 and $109,114 respectively. Of the Housing Tax Credit funding, 21 percent will go to rural areas and 79 percent will go to urban areas.

REGION 9



San Antonio is the main metropolitan area in Region 9. According to the US Census, 1,807,868 people live in the region, 73 percent in urban areas. Population estimates through January 2002 show a 2.7 percent increase.[64]

Employment in the region is projected to grow at the same rate as the state, 1.6 percent annual increase between 2000 and 2005. The region experienced high growth rates in the 1990s, while the growth will continue; it will not be as dramatic as before. The region's growth has remained strong over the past few decades partially because the region is not dependent on the oil and gas industries. The areas with the highest employment growth since 1980 are services to business, high tech, communications, tourism, and personal services. The growth in the high tech, communications, aviation, and electronics industry reflects the siting of Southwestern Bell in the region. The industries that are projected to add the most jobs through 2005 include retail, local government, construction, and eating and drinking places.[65]

There are 636,796 occupied housing units in the region, 65 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 8.7 percent of the state's population lives in the area, and regional housing permits for 2002 represent 7.9 percent of the state's total housing starts.[66]

Approximately 79 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is no clear preference for owner-occupied housing assistance or rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 9 identified several areas of concern.[67] One area of concern is education and cooperation. There is a need for more homeowner education as well as cooperation among existing housing and regional organizations. The group also highlighted the underserved populations in the region that require housing assistance. The special needs groups include the elderly, persons with disabilities, and young adults.

[65] Texas Comptroller of Public Accounts, "Texas Regional Outlook."
[66] Real Estate Center at Texas A&M University, "Building Permit Activity."
[67] The Regional Advisory Committees are organized based on the old Uniform State Service Regions. Old Region 8A equals new regions 9 and 10.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 267,118 people that live in poverty in the region, a poverty rate of 15.2 percent. Approximately 74 percent of the 31,145 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 19 percent of the households with severe housing cost burden. Approximately 5 percent of the households are low income and 1.7 percent are moderate income and above.

In the region, 3,090 renter households lack kitchen and/or plumbing facilities; this is 8.7 percent of the state's total. Approximately 39 percent earn less than 30 percent of the area median income, more than 28 percent of the households earn between 31 and 50 percent, and 24 percent earn between 51 and 80 percent. The remaining 8.7 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 24,750 overcrowded renter households, 37 percent are extremely low income, 21 percent are very low income, another 22 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for new housing development over other rental housing activities. Rental payment assistance is more important in the region than the renovation of existing housing.

Single Family Housing Need

Region 9 has 8.9 percent of the state's owner households with severe housing cost burden, or 21,398 households. Slightly less than 53 percent of the owner households with severe cost burden are extremely low income households. Twenty percent are very low income; 16 percent are low income; and the rest are moderate income and above.

There are 3,709 owner households in the region that lack kitchen and/or plumbing facilities; approximately 48 percent of these households are extremely low income. Almost 25 percent of the households lacking kitchen and/or plumbing are very low income and 13 percent are low income. The remaining 526 households are moderate income and above. Region 9 has 10.4 percent of the state's overcrowded owner households. Of the 20,215 overcrowded households, 13 percent are extremely low income. Seventeen percent are very low income, 16 percent are low income, and the remaining households are moderate income and above.

In the San Antonio area approximately 64 percent of the households can afford the median-priced home.[68]

[68] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 9 do not express a preference for the renovation of existing housing, purchase assistance, or new housing development.

Community Services Need

Region 9 has 8.5 percent of the state's poverty households; 17,887 households are elderly (9.34 percent of the state's total) and 70,207 households are headed by individuals under 65 years of age (8.4 percent of the state's total).

Twenty percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 9 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 689,862 housing units in the region and 92.3 percent are occupied. Of the total housing stock, 69 percent are one unit, 22 percent are over two units, 8 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 11,580 multifamily and 1,033 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 24,300 units; all but 83 units have been multifamily. The housing finance corporations in the region have produced 6,966 multifamily units and assisted 103 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $15,741,953 in Region 9 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Multifamily development accounted for 47 percent of the total dollar amount committed during the past year; the next largest activity was single family owner-occupied assistance with 19 percent of the total dollar amount committed. Single family financing and homebuyer assistance in the region represented 17 percent of the total committed. Approximately 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

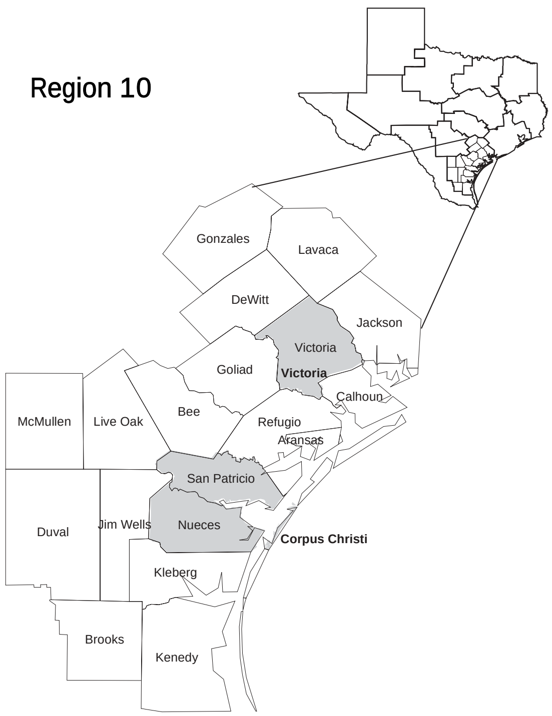
Other sources of housing assistance arrived in the region in 2003. Region 9 received over $17.3 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $103.9 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $8 million worth of HOME funds dedicated to either single family or multifamily activities. In 2003, the housing finance corporations assisted 333 multifamily units with 2 other developments under construction. There were 199 single family households assisted by HFCs.

The Department's Regional Allocation Formula distributes 5.7 percent of the state's 2004 HOME funds to Region 9. Of the total $1,255,071 approximate funding, 97.5 percent will go to rural areas and 2.5 will go to urban areas. Region 9 also receives 6.9 percent of the state's Housing Tax Credit and Housing Trust Fund allocations, approximately $2,613,520 and $137,554 respectively. Of the Housing Tax Credit Funding, 17.4 percent will go to rural areas and 82.6 percent will go to urban areas.



REGION 10

Region 10, including the urban areas of Corpus Christi and Victoria, is located in the south eastern part of the state on the Gulf of Mexico. Half of the total population of 732,917 people lives in urban areas. Population estimates through January 2002 show a 0.8 percent increase.[69]

Employment in the region between 2000 and 2005 is projected continue to grow at the same rate as the past 30 years, 1.7 percent annual increase. Since 1970, the region has experienced less growth than the state in terms of employment, population, and gross regional product. The areas with the highest employment growth since 1980 are health care, reflecting national trends, and services to business, as a result of the outsourcing trend in business. The regional specialties include the oil and gas industries and health care. The industries that are projected to add the most employment between 2000 and 2005 are health services, construction, and retail trade.[70]

There are 256,428 occupied housing units in the region, 66.8 percent are owner occupied and the rest are occupied by renters according to 2000 Census data. Approximately 3.5 percent of the state's population lives in the area, and regional housing permits for 2002 represent 1.4 percent of the state's total housing starts.[71]

Approximately 87 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 10 identified several areas of concern.[72] One area of concern is education and cooperation. There is a need for more homeowner education as well as cooperation among existing housing and regional organizations. The group also highlighted the underserved populations in the region that require housing assistance. The special needs groups include the elderly, persons with disabilities, and young adults.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the

following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 132,214 people that live in poverty in the region, a rate of 18.7 percent. Approximately 79 percent of the 12,250 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 16.5 percent of the households with severe housing cost burden. Approximately 3.6 percent of the households are low income and 1.3 percent are moderate income and above.

In the region, 1,657 renter households lack kitchen and/or plumbing facilities; this is 4.7 percent of the state's total. Approximately 48 percent earn less than 30 percent of the area median income, less than 26 percent of the households earn between 31 and 50 percent, and 22 percent earn between 51 and 80 percent. The remaining 4.6 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 10,273 overcrowded renter households, 37percent are extremely low income, 20 percent are very low income, another 20 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show no significant preference between new housing development and the renovation of existing housing. Rental payment assistance is the least important of the three rental housing assistance activities.

Single Family Housing Need

Region 10 has 4.4 percent of the state's owner households with severe housing cost burden, or 10,557 households. Slightly more than 58 percent of the owner households with severe cost burden are extremely low income households. Twenty-two percent are very low income, 13 percent are low income, and the rest are moderate income and above.

There are 2,706 owner households in the region that lack kitchen and/or plumbing facilities; approximately 56 percent of these households are extremely low income. Almost 18 percent of the households lacking kitchen and/or plumbing are very low income and 15 percent are low income. The remaining 302 households are moderate income and above. Region 10 has 5.2 percent of the state's overcrowded owner households. Of the 10,062 overcrowded households, 16 percent are extremely low income. Fourteen percent are very low income, 24 percent are low income, and the remaining households are moderate income and above.

In the Corpus Christi area approximately 60 percent of the households can afford the median-priced home; for Victoria the figure is 68 percent.[73]

The Community Needs Survey respondents from Region 10 prefer home purchase assistance over the renovation of existing housing. New housing development is the least important owner-occupied housing assistance.

[73] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

Community Services Need

Region 10 has 4.4 percent of the state's poverty households; 10,783 households are elderly (5.6 percent of the state's total) and 34,422 households are headed by individuals under 65 years of age (4.1 percent of the state's total).

Twenty-seven percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 10 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 298,494 housing units in the region and 86 percent are occupied. Of the total housing stock, 71 percent are one unit, 18 percent are over two units, 10 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 4,114 multifamily and 1,180 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 8,323 units; all have been multifamily. The housing finance corporations have assisted 750 multifamily units and 1,390 single family households.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $9,795,237 in Region 10 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family financing and homebuyer assistance accounted for 33 percent of the total dollar amount committed during the past year; the next largest activity was single family owner-occupied assistance with 31 percent of the total dollar amount committed. Multifamily development in the region represented 27 percent of the total committed. Approximately 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

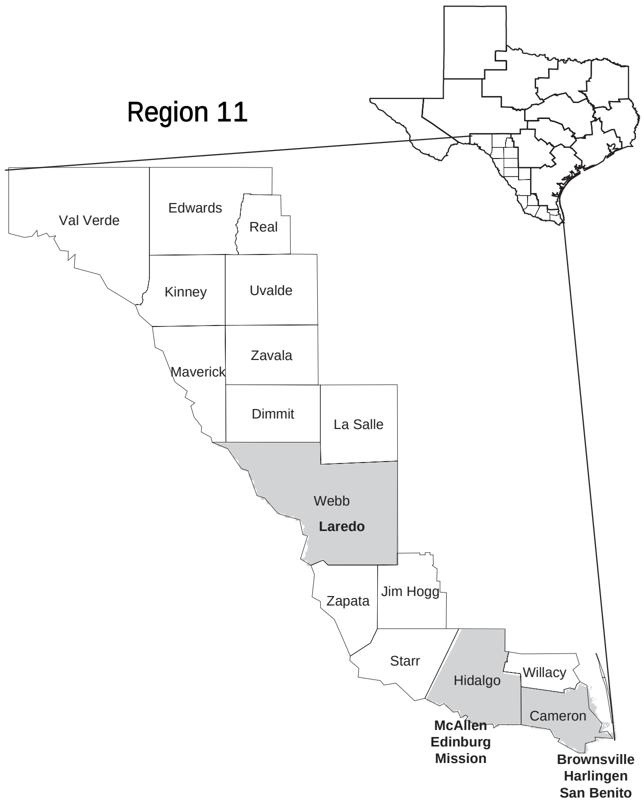
Other sources of housing assistance arrived in the region in 2003. Region 10 received over $6.5 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $25.5 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1.8 million worth of HOME funds dedicated to either single family or multifamily activities. In 2003, there were 30 multifamily units produced by housing finance corporations and 91 single family households received assistance.

The Department's Regional Allocation Formula distributes 8 percent of the state's 2004 HOME funds to Region 10. Of that funding, 77.8 percent will go to rural areas, approximately $1,384,614. The remaining 22.2 percent, or $484,132, will go to urban areas. Region 10 also receives 4.3 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 41.8 percent will go to rural areas, about $687,675, and 58.2 percent will go to urban areas, approximately $956,659. The total allocation from the Housing Trust Fund for the region is $86,544.



REGION 11

Region 11 is a 16-county area along the border of Mexico. The main urban areas in the region are Brownsville-Harlingen, McAllen-Edinburg, Del Rio, and Laredo. Almost 59 percent of the population lives in urban areas. Population estimates through January 2002 show a 4.4 percent increase, from 1,343,330 to 1,402,662.[74]

Region 11 is projected to be the fastest growing region in the state, a 2.8 percent annual growth rate. This growth will continue the trend experienced in the region since 1970. The areas with the highest employment growth since 1980 are health care, reflecting national trends and regional population growth, and services to business, as a result of the outsourcing trend in business. The regional specialties include transportation, apparel, and health services. The region's proximity to Mexico leads to the specialization of the transportation functions related to international trade. The industries that are projected to add the most employment between 2000 and 2005 are local government, retail trade, health services, and construction.[75]

There are 378,275 occupied housing units in the region: 71 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 6.4 percent of the state's population lives in the area, and regional housing permits for 2002 represent 8.1 percent of the state's total housing starts.[76]

Approximately 90 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area, the second highest percentage among the regions. There is a strong preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 11 identified several areas of concern.[77] There is a need for more housing for the elderly and the homeless in the region. There is a lack of multifamily housing, and rental housing funds in general. In order to increase the effective marketing of the available housing programs, the attendees suggest a centralized area for the dissemination of information.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 455,366 people that live in poverty in the region; this is the highest poverty rate in the state. Approximately 83 percent of the 15,785 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 14 percent of the households with severe housing cost burden. Approximately 2.4 percent of the households are low income and 0.6 percent are moderate income and above.

In the region, 5,440 renter households lack kitchen and/or plumbing facilities; this is 15.3 percent of the state's total. Approximately 57 percent earn less than 30 percent of the area median income, less than 28 percent of the households earn between 31 and 50 percent, and 13 percent earn between 51 and 80 percent. The remaining 2.2 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 27,040 overcrowded renter households, 43 percent are extremely low income, 23 percent are very low income, another 18 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over the renovation of existing housing and rental payment assistance.

Single Family Housing Need

Region 11 has 5.8 percent of the state's owner households with severe housing cost burden, or 13,905 households. Slightly less than 69 percent of the owner households with severe cost burden are extremely low income households. Seventeen percent are very low income, 10 percent are low income, and the rest are moderate income and above.

There are 10,475 owner households in the region that lack kitchen and/or plumbing facilities; approximately 63 percent of these households are extremely low income. More than 22 percent of the households lacking kitchen and/or plumbing are very low income and 9 percent are low income. The remaining 590 households are moderate income and above. Region 11 has 19.7 percent of the state's overcrowded owner households. Of the 38,184 overcrowded households, 23 percent are extremely low income. Twenty-one percent are very low income, 24 percent are low income, and the remaining households are moderate income and above.

The Community Needs Survey respondents from Region 11 prefer home purchase assistance over new housing development. The renovation of existing housing is the least important owner-occupied housing assistance.

Community Services Need

Region 11 has 11.3 percent of the state's poverty households; 23,614 households are elderly (12.2 percent of the state's total) and 93,382 households are headed by individuals under 65 years of age (11.1 percent of the state's total).

Forty-three percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region; this is the highest percentage in the state. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 11 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 457,406 housing units in the region and 82.7 percent are occupied. Of the total housing stock, 66 percent are one unit, 14 percent are over two units, 18 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 6,900 multifamily and 5,250 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 19,854 units; all but 59 have been multifamily. The housing finance corporations have assisted 662 single family households in the region.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $42,067,484 in Region 11 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family financing and homebuyer assistance accounted for 51 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 16 percent of the total dollar amount committed. Single family owner-occupied assistance in the region represented 14 percent of the total committed. Approximately 98 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

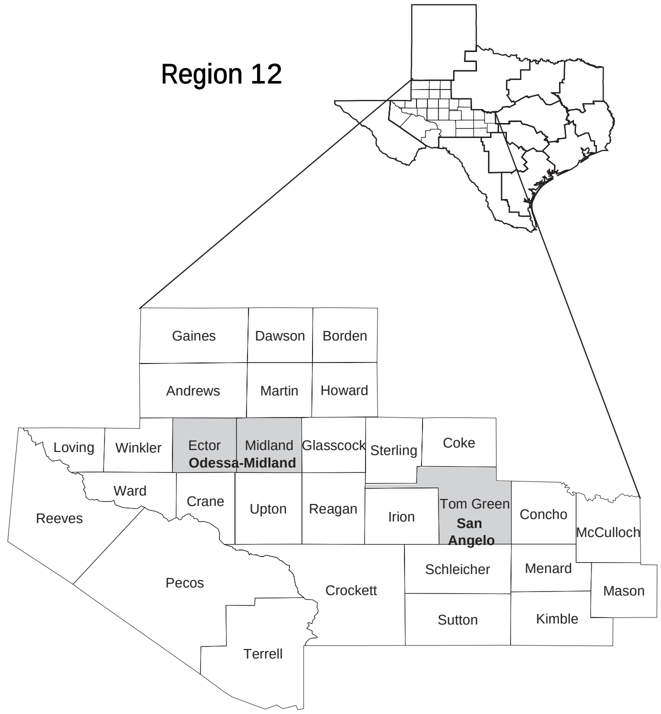
Other sources of housing assistance arrived in the region in 2003. Region 11 received over $4.4 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $61.2 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $7 million worth of HOME funds dedicated to either single family or multifamily activities. Housing finance corporations assisted 53 single family households in 2003.

The Department's Regional Allocation Formula distributes 11.1 percent of the state's 2004 HOME funds to Region 11. Of the total $2,451,189 approximate funding, 85.3 percent will go to rural areas and 14.7 to urban areas. Region 11 also receives 11.8 percent of the state's Housing Tax Credit and Housing Trust Fund allocations, about $4,494,121 and $236,533 respectively. Of the Housing Tax Credit funding, 40.6 percent will go to rural areas and 59.4 percent will go to urban areas.

REGION 12

Region 12 in west Texas surrounds the urban areas of Odessa-Midland and San Angelo. Census 2000 population for the region is 524,884 and 56 percent live in urban areas. Population estimates through 2002 show a slight decline of 0.3 percent.[78]



Employment in Region 12 is expected to grow at an annual rate of 1.7 percent for the period between 2000 and 2005. This is higher than the 1.1 percent growth experienced between 1995 and 2000. Compared with the rest of the state since 1970, the region's share of employment, population, and gross regional product has declined. The areas with the highest employment growth since 1980 are health care, reflecting national trends and regional population growth, and services to business, and local government. The area's economic specialties include industries related to the oil and gas business. The industries that are projected to add the most employment between 2000 and 2005 are retail trade, local government, oil and gas services, and wholesale trade.[79]

There are 189,582 occupied housing units in the region, 70 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 2.5 percent of the state's population lives in the area, and regional housing permits for 2002 represent 0.5 percent of the state's total housing starts.[80]

Approximately 81 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 12 identified several areas of concern.[81] There is a lack of marketing of state and federal housing programs. Increased communication and cooperation among the agencies providing the services is needed. In the region there is also the lack of capacity within smaller communities. Small communities must work with consultants when preparing an application. The attendees pointed out that there is a scarcity of rental housing assistance in the region.

---

[78] Texas State Data Center and Office of the State Demographer, "Texas Population Estimates Program."
[79] Texas Comptroller of Public Accounts, "Texas Regional Outlook."
[80] Real Estate Center at Texas A&M University, "Building Permit Activity."
[81] The Regional Advisory Committees are organized based on the old Uniform State Service Regions. Old region 9 equals new region 12.

There is a need for more rental vouchers, tax breaks for rental rehabilitation projects, and lower housing construction costs.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 85,063 people that live in poverty in the region. Approximately 81 percent of the 7,971 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 16 percent of the households with severe housing cost burden. Approximately 2.3 percent of the households are low income and 0.9 percent are moderate income and above.

In the region, 714 renter households lack kitchen and/or plumbing facilities; this is 2 percent of the state's total. Approximately 34 percent earn less than 30 percent of the area median income, more than 38 percent of the households earn between 31 and 50 percent, and 14 percent earn between 51 and 80 percent. The remaining 14 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 5,875 overcrowded renter households, 34 percent are extremely low income, 23 percent are very low income, another 21 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over the renovation of existing housing and rental payment assistance.

Single Family Housing Need

Region 12 has 3.1 percent of the state's owner households with severe housing cost burden, or 7,347 households. Slightly less than 64 percent of the owner households with severe cost burden are extremely low income households. Twenty percent are very low income, 11 percent are low income, and the rest are moderate income and above.

There are 955 owner households in the region that lack kitchen and/or plumbing facilities; approximately 62 percent of these households are extremely low income. More than 15 percent of the households lacking kitchen and/or plumbing are very low income and 11 percent are low income. The remaining 120 households are moderate income and above. Region 12 has 3.7 percent of the state's overcrowded owner households. Of the 7,229 overcrowded households, 16 percent are extremely low income. Nineteen percent are very low income, 29 percent are low income, and the remaining households are moderate income and above.

In the Odessa-Midland area, 73 percent of households can afford the median-priced home. In San Angelo, 70 percent can afford the median-priced home.[82]

In terms of owner-occupied housing assistance, Community Needs Survey respondents from Region 12 prefer the renovation of existing housing over new housing development. Home purchase assistance is the least important owner-occupied housing assistance.

Community Services Need

Region 12 has 3 percent of the state's poverty households; 6,744 households are elderly (3.5 percent of the state's total) and 24,271 households are headed by individuals under 65 years of age (2.9 percent of the state's total).

Eighteen percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank about equal in importance with transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 12 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 221,968 housing units in the region and 85.4 percent are occupied. Of the total housing stock, 72 percent are one unit, 16 percent are over two units, 12 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 3,350 multifamily and 1,070 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 5,250 units; all have been multifamily. Housing finance corporations have assisted 24 multifamily units and 90 single family households in the region.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $4,303,643 in Region 12 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family owner-occupied assistance accounted for 59 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 20 percent of the total dollar amount committed. All of the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

Other sources of housing assistance arrived in the region in 2003. Region 12 received over $1.4 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $17.4 was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1 million worth of HOME funds dedicated to either single family or multifamily activities. Housing finance corporations assisted 24 multifamily units, and 27 single family households received assistance.

The Department's Regional Allocation Formula distributes 5.5 percent of the state's 2004 HOME funds to Region 12. Of that funding, 53.5 percent will go to rural areas, approximately $654,137. The other 46.5 percent will go to urban areas. Region 12 also receives 2.8 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 33.7 percent, or $359,342, will go to rural areas and 66.3 percent, or $705,898. The total Housing Trust Fund allocation for the region is $56,066.

REGION 13

El Paso is the main urban area in Region 13. The region spreads along the Texas-Mexico border in the southwestern tip of the state. The population for the region according to the 2000 US Census is 704,318. Slightly less than 89 percent live in urban areas; this is the highest urban percentage in the state. Population estimates through 2002 show an increase of 1.8 percent to 717,261.[83]

Employment in Region 13 is expected to grow at an annual rate of 1.6 percent for the period between 2000 and 2005. The region experienced high levels of growth in the period between 1970 and 2000, an annual growth rate in gross regional product of 3.5 percent. The region's share of the state's economy has grown as well. The areas with the highest employment growth since 1980 are services to business, health care, and tourism and entertainment. The industries that are projected to add the most employment between 2000 and 2005 are local government, retail trade, and eating and drinking places.[84]

There are 219,261 occupied housing units in the region, 64 percent are owner occupied and the rest are rentals, according to 2000 Census data. Approximately 3.4 percent of the state's population lives in the area, and regional housing permits for 2002 represent 2.2 percent of the state's total housing starts.[85]

Approximately 78 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 13 identified several areas of concern.[86] TDHCA's Regional Allocation Formula does not meet the needs of the region, according to attendees. Very rural counties, or frontier counties, have needs that extend beyond those of rural counties. Transportation barriers present extra challenges to these areas. There is a lack of technical assistance and outreach for the communities in Region 13.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 165,122 people that live in poverty in the region; representing the second highest poverty rate in the state at 23.9 percent. Approximately 70 percent of the 11,760 renter households with severe housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 22 percent of the households with severe housing cost burden. Approximately 7.3 percent of the households are low income and 0.8 percent are moderate income and above.

In the region, 2,091 renter households lack kitchen and/or plumbing facilities; this is 5.9 percent of the state's total. Approximately 42 percent earn less than 30 percent of the area median income, less than 21 percent of the households earn between 31 and 50 percent, and 21 percent earn between 51 and 80 percent. The remaining 6 percent of the households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 14,603 overcrowded renter households, 32 percent are extremely low income, 26 percent are very low income, another 23 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over the renovation of existing housing and rental payment assistance.

Single Family Housing Need

Region 13 has 3.2 percent of the state's owner households with severe housing cost burden, or 7,676 households. Slightly more than 47 percent of the owner households with severe cost burden are extremely low income households. Twenty-five percent are very low income, 16 percent are low income, and the rest are moderate income and above.

There are 2,079 owner households in the region that lack kitchen and/or plumbing facilities; approximately 35 percent of these households are extremely low income. Less than 26 percent of the households lacking kitchen and/or plumbing are very low income and 22 percent are low income. The remaining 371 households are moderate income and above. Region 13 has 6.2 percent of the state's overcrowded owner households. Of the 11,924 overcrowded households, 14 percent are extremely low income. Fifteen percent are very low income, 23 percent are low income, and the remaining households are moderate income and above.

In the El Paso area, 60 percent of households can afford the median-priced home.[87]

[87] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

In terms of owner-occupied housing assistance, Community Needs Survey respondents from Region 13 prefer new housing development over the renovation of existing housing. Home purchase assistance is the least important owner-occupied housing assistance.

Community Services Need

Region 13 has 4.6 percent of the state's poverty households; 9,083 households are elderly (4.7 percent of the state's total) and 38,561 households are headed by individuals under 65 years of age (4.6 percent of the state's total).

Forty-one percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region; this is the second highest rate in the state. Among the different types of homeless assistance, short-term homeless shelters rank higher in importance with transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 13 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 236,572 housing units in the region and 92.7 percent are occupied. Of the total housing stock, 68 percent are one unit, 23 percent are over two units, 8 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 3,520 multifamily and 1,500 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 12,590 units; all but 218 have been multifamily. Housing finance corporations have produced 378 multifamily units and assisted 288 single family households in the region.

Housing and Community Services Assistance for 2003 and 2004

The Department allocated $18,994,213 in Region 13 in FY 2003. Note that this regional total does not include several of the Community Affairs programs; totals for the CSBG, ENTERP, CFNP, CEAP, WAP and SBF programs are not available at the regional level. Single family financing and homebuyer assistance accounted for 74 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 12 percent of the total dollar amount committed. Approximately 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

Other sources of housing assistance arrived in the region in 2003. Region 13 received over $5.5 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $37.5 was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $4.1 million worth of HOME funds dedicated to either single family or multifamily activities. Housing finance corporations assisted 83 single family households in 2003.

The Department’s Regional Allocation Formula distributes 3.3 percent of the state’s 2004 HOME funds to Region 13. Of that funding, 58.6 percent will go to rural areas, approximately $424,554. The remaining 41.4 percent will go to urban areas. Region 13 also receives 4.8 percent of the state’s Housing Tax Credit and Housing Trust Fund allocations, approximately $1,836,391 and $96,652 respectively. Of the Housing Tax Credit funding, 14.9 percent will go to rural areas and 85.1 percent will go to urban areas.

REGIONAL PLANS SUMMARY

The housing and community service needs of the different regions of Texas are as varied as the regions themselves. The Department strives to identify these regional needs and offer activities and programs that fit the characteristics of each area of the state. This section summarizes the information from the regional plans in the previous section. This summary contains the tables referenced in the regional plans and describes the sources and limitations of the data utilized in the needs assessments.

GENERAL INFORMATION ON POPULATION AND HOUSING

The most populous regions of the state according to the 2000 Census are Regions 3 and 6, together representing almost 50 percent of the state. Regions 3, 7, and 11 are the fastest growing areas as indicated by population estimates.

Table 1: Population by Region

Service Region	Population 2000 Census	Percent of State's Population	Population Estimate Jan 1, 2002	Percent Change 2000 to 2002
1	780,733	3.7%	785,039	0.6%
2	549,267	2.6%	549,027	0.0%

Information on the number of housing permits provides information on the regional housing industry. The regions with the highest share of the state's housing permits are also the most populous regions: 3 and 6, see Table 4. Across the state, there were three times as many single family permits as multifamily permits in 2002. Region 4 had eight and one-half times as many single family permits as multifamily, and Region 13 had fourteen times as many single family permits.

Table 4: Housing Permits, 2002

Service Region	Multifamily Housing Permits	Percent of State	Single Family Housing Permits	Percent of State	Total Housing Permits	Percent of State
1	718	1.7%	2,181	1.7%	2,899	1.70%

NEED INDICATORS

Table 5 shows the number of renter households with cost burden greater than 50 percent by income group. The highest numbers of very low income households with severe cost burden are found in Region 3 with a total of 86,426 households and Region 6 with 83,798 households.

Table 5: Number of Renter Households with Severe Cost Burden by Income Group, 1990

Service Region	All Incomes	0% to 30%	31% to 50%	51% to 80%	81% to 95%	95% and Above

The number of rental units lacking complete plumbing and/or kitchen facilities is one of the indicators of housing need that does not follow the pattern of population, see Table 6. Regions 6 and 3 have the first and third ranked number of units lacking facilities and are also the regions with the highest number of renter households. Region 11, however, is ranked sixth in terms of renter population and second in number of renter units lacking kitchen and/or plumbing facilities.

Table 6: Number of Renter Units Lacking Kitchen and/or Plumbing by Affordability Category, 1990

COLONIA ACTION PLAN

OVERVIEW

The Texas Department of Housing and Community Affairs Colonia Action Plan for 2004–2005 discusses housing and community development needs in the colonias, describes the Department's policy goals, summarizes the strategies and programs designed to meet these goals, and describes some of the projected outcomes to support the improvement of living conditions of colonia residents along the Texas-Mexico border region. While this plan focuses on colonias as defined by state statute, it should be noted that colonia-type conditions (i.e., lack of basic services such as potable water; adequate sewage systems; drainage; streets; utilities; and safe, sanitary, and sound housing) exist throughout the state.

The overall goal of the Department with respect to colonias is to improve the living conditions and lives of border residents in Texas. As a result, TDHCA provides planning, housing, and housing-related assistance.

Performance measures for colonia activities, as reported to the Legislative Budget Board, focus on outreach and technical assistance efforts of the Department—specifically the number of on-site technical assistance visits conducted annually from the Border Field Offices. The targeted performance number for the 2004–2005 biennium is 747 technical assistance visits a year.

It should be noted that there is no single or dedicated source of funds for colonia-focused programs and services administered by the Department. In the past, funding has been provided from the Housing Trust Fund, the HOME Program, Single Family Bond proceeds, and the Community Development Block Grant (CDBG) Program.

COLONIA NEEDS

In today's world, Texas colonias are considered an observable fact. Their beginnings date back to the 1950s. As a response to the reconstruction era, Texans adopted a state constitution to minimize the powers of government. By making counties subdivisions of the state with no home rule powers, Texans guaranteed that no county could take an action or adopt a rule until it is first voted on by the state. As a result all regulatory powers originate with cities and the state. Areas outside city limits are "regulation free zones" until problems become so serious that the entire state is ready to empower a county to address them.[88]

These regulatory free zones enabled colonia developers to purchase tracts of land with a marginal agricultural value. Some of these tracts were flood prone and drained poorly; some were too hilly to irrigate; some were land with a declining value due to changes in agricultural economics. These developers platted their tracts, bulldozed roads, and sold the undeveloped lots on 10- to 20-year contracts for deed starting anywhere from $8,000 to $20,000 at an interest rate of 10 percent to 17 percent annually.[89] A contract for deed is an instrument used to sell land. Title to the property is not transferred until the balance is paid in full.

WHAT IS A COLONIA?

A "colonia," Spanish for "neighborhood" or "community," is a geographic area located within 150 miles of the Texas-Mexico border that has a majority population comprised of individuals and families of low and very low income who lack safe, sanitary, and sound housing. This includes a lack of basic services such as potable water, adequate sewage systems, drainage, streets, utilities, paved roads, and plumbing. With living conditions often compared to Third World countries, the colonias present one of the most critical housing needs in the state. Housing in the colonias is primarily constructed with scarce materials, and professional builders are rarely used. Residents frequently start with makeshift structures of wood, cardboard, or other materials, and as finances allow, continue to improve their homes.

Colonia residents tend to be young, predominately Hispanic, low to very low income, and employed in low-paying employment sectors. According to the most recent data available, 36.6 percent of colonia residents are children (compared to 29 percent statewide). Nearly all are Hispanic and 27.4 percent speak Spanish as their primary language. However, contrary to common perception, more than 75 percent of colonia residents were born in the US and 85 percent are US citizens.

The workforce tends to be young and unskilled; consequently, wages are low. Primary occupations are seasonal in nature; agriculture service providers and construction-related jobs account for more than 50 percent of the workforce.[90] A study by the Texas A&M University Center for Housing and Urban Development indicated that unemployment levels in five Rio Grande Valley colonias ranged from 20 percent to as high as 70 percent, compared with the overall state unemployment rate of only 7 percent.

According to a survey by the Texas Department of Health of residents in 96 colonias in 6 border counties, almost half of the colonia households make less than $834 a month. Nearly 70 percent of the residents never graduated from high school.[91]

As indicated in a Status Report by the Center for Housing and Urban Development at Texas A&M University, there are approximately 1,450 colonias in the Texas, which are home to over 350,000 Texans. Future projections indicate the population may reach as high as 700,000 residents by the year 2010.[92]

LIVING CONDITIONS

As previously noted, the lack of even the most basic infrastructure including potable water and adequate sewage systems has contributed to the proliferation of disease. Compounded with a lack of adequate medical insurance and a shortage of healthcare facilities, reported cases of viral disease in the colonias far exceed statewide levels.

According to a study by the University of Texas System Texas-Mexico Border Health Coordination Office, diseases such as Hepatitis A, Salmonellosis, Shigellosis, and Tuberculosis occurred at a much higher rate

in the colonias than the rest of the state.[93] The rate of reported Hepatitis A, for example, was more than double the statewide rate. Other health problems included high rates of gastroenteritis and other water-quality-related problems.[94] Lack of medical services is rarely available and compounds health problems in the colonias. Due to these stumbling blocks, children in the colonias experience slower growth and lower educational development rates.

The scarcity of potable water is another daily hardship for colonia residents. According to data from the Texas Department of Human Services, the use of untreated water for drinking, washing, bathing, and cooking ranged from 4 percent to 13 percent in colonia households.[95] Many residents rely on large plastic drums for the storage of water. More often, water is transferred to the house by bucket or plastic containers. Reports of water used for bathing, washing, and even cooking drawn from ditches where sewage and agricultural chemicals gather are not uncommon.

In addition to a lack of adequate wastewater infrastructure, most roadways located in colonias are unpaved or continue to be of very poor quality. A survey of residents of the El Cenizo colonia conducted by TDHCA indicated that 50 percent of the roads within the colonia were classified as "deteriorated" or "poor."[96] Water from heavy rains tends to collect, and when combined with inadequate waste removal systems, forms into pools of raw sewage, which again causes health problems for colonia residents.

Plumbing facilities are also a problem in the colonias. Approximately 50 percent of houses in rural colonias and 20 percent in urban colonias have incomplete plumbing facilities. Additionally, 40 percent in rural colonias and 15 percent in urban colonias lack a complete kitchen. For more information on the housing needs of border counties, see the Housing Analysis and Action Plan section of this report, Regions 11 and 13.

While each colonia is different and may have needs unique to that area, most share the same general characteristics. Unfortunately, these and other concerns are all part of the day-to-day life for most colonia residents 365 days a year. A bad situation is made even worse due to a profound lack of the most basic of necessities: safe, sanitary, and decent housing.

HOUSING AND HOUSING-RELATED NEEDS[97]

An increasing amount of attention has been placed on colonias over the past several years. This attention has been focused on eliminating their presence rather than addressing the reason for their existence. One key to improving the conditions of colonias is the availability of affordable housing programs. While it is important to eradicate the conditions that exist in colonias; it is equally important to address the circumstances that enable such an environment to develop.

[96] Texas Department of Housing and Community Affairs, Office of Colonia Initiatives, *A Study of the People of El Cenizo, Texas* (Austin, TX: Texas Department of Housing and Community Affairs, April 1997).

[97] A portion of the information in this Action Plan is derived from the six Colonia Self-Help Centers' Needs Assessments.

While colonia residents have been resourceful and creative in providing for themselves, they continue to have several needs, including:

- Increased affordable housing opportunities such as down payment assistance, low interest loans, flexible underwriting guidelines, etc.
- Conversion of contracts for deed to conventional mortgages, with transfer of title and homeowner education
- Construction and rehabilitation education and assistance
- Access to information regarding available resources
- Access to adequate infrastructure

Typically colonia residents do not have access to traditional financing or professional assistance when they purchase a home. They have limited credit or even nonexistent credit histories, and, for some, it is difficult to save for the down payment required to qualify for a conventional mortgage. Credit and debt counseling, including money management and financial literacy training, is lacking in colonia areas. There is also a need for flexible housing assistance such as low-interest-rate loans with underwriting guidelines appropriate for nontraditional borrowers.

The contract for deed has been the most common method of financing the purchase of colonia properties, due to the lack of underwriting guidelines by developers. Often, developers charge outrageous interest rates—as high as 14 to 18 percent—including higher late fees. Traditionally, developers would not record the contract for deed, making it easy to reclaim the property without legal process, while retaining any physical improvements made on the property.

Home construction, improvement, and maintenance require access to resources and skills. Many colonia residents do not have the resources to contract for home improvement, and choose to undertake the work on their own. Within the colonias, there is a need for education on several topics related to construction and rehabilitation such as surveying, platting, and general construction skills. There is also a scarcity of construction tools available for use by colonia residents.

Occasionally there is funding available to communities and organizations in the colonias to support local programs. Training is needed on how to locate funding and, once the funding is identified, how to write a successful grant proposal.

Interagency coordination and financial backing at the state and federal level needs to continue to address colonia issues. While many housing professionals recognize that the level of coordination and dialogue has increased in recent years, and that many communities in the border region acknowledge an increase in funding for infrastructure development, much work remains. In the context of affordable housing (construction and financing mechanisms) and infrastructure development (potable water, wastewater treatment, paved streets, etc.), TDHCA is committed to interagency cooperation.

POLICY GOALS

In 1995, in an effort to place more emphasis on addressing the needs of colonias, the Office of Colonia Initiatives (OCI) was created and charged with the responsibility of coordinating all TDHCA and legislative initiatives involving border issues and managing a portion of TDHCA's existing programs targeted for colonias. The fundamental goal of the division is to improve the living conditions and lives of border residents, and to educate the public regarding the services that TDHCA has to offer.

The OCI Division was created to

- expand housing opportunities to colonia residents living along the Texas-Mexico border;
- increase knowledge and awareness of programs and services available through TDHCA;
- implement initiatives that promote improving the quality of life of colonia residents and border communities;
- empower and enhance organizations building capacity to better serve the targeted population;
- provide comprehensive education to colonia residents;
- develop cooperative working relationships between other state, federal, and local organizations to leverage resources and exchange information;
- promote comprehensive planning of communities along the Texas-Mexico border to better understand community and resident needs;
- serve as a catalyst for colonia residents by allowing input into major funding decisions that will affect border communities.

The OCI Division assists TDHCA program divisions by coordinating activities in the colonias and border communities. Currently, the OCI Division headquarters and Border Field Offices (in Edinburg, Laredo, and El Paso) employ eight employees that provide consumer education, housing and financial assistance, and community services along the Texas-Mexico border region to colonia residents and state, federal, and local organizations.

ACTION PLAN

The Colonia Action Plan includes a strategic vision for housing, community development, and community services. This two-year Action Plan outlines how various initiatives will be implemented in 2004–2005. The activities focus on the needs identified in the Housing and Housing-Related Needs section above.

The initiatives described within the Action Plan have been divided into two categories: (1) Increase Affordable Housing Opportunities and (2) Housing Construction and Rehabilitation, Access to Infrastructure, and Information Regarding Resources. Each category contains the following information:

- Legislative mandate: directive by the legislature
- Purpose: intent of the program
- Funding: financial support
- Activities to date: actions and success
- Strategic approach: plan to further ongoing activities

INCREASE AFFORDABLE HOUSING OPPORTUNITIES

The following TDHCA initiatives focus on increasing affordable housing opportunities in the colonias.

Texas Bootstrap Loan Program

Chapter 2306, Subchapter FF of the Texas Government Code establishes a loan program, working through certified nonprofit organizations, to enable owner-builders to purchase real estate, construct a home, or renovate a home.

The intent of the Bootstrap Program is to promote and enhance homeownership for very low income Texans by providing loan funds to purchase or refinance real property on which to construct new residential housing or improve existing residential housing.

The self-help component of the Bootstrap Program is designed to allow very low income residents an opportunity to help themselves through the form of sweat equity. The borrowers are required to provide at least 60 percent of labor that is necessary to construct or rehabilitate the home under this program. TDHCA loan funds can not exceed $30,000 per home. Nonprofit organizations can combine program lending funds with other sources such as private lending institutions, local governments, private grants, or any other sources; however, all combined sources can not exceed $60,000 per home.

TDHCA will to make available $6 million to implement this initiative for the FY 2004-2005 biennium. In accordance with Section 2306.753(d) of the Texas Government Code, TDHCA shall set aside at least two-thirds of the available funds for owner-builders whose property is located in an Economically Distressed Area Program (EDAP) county, as defined under Subchapter K, Chapter 17, Water Code. The remainder of the funding will be available to TDHCA-funded Colonia Self-Help Centers and TDHCA-certified nonprofit owner-builder housing programs in the State of Texas. The maximum amount of funding per organization is $600,000. TDHCA may, at its discretion, award funds above the maximum award limit to an organization that has demonstrated successful implementation of this initiative. Projects needing additional non-TDHCA resources will be required to provide additional documentation identifying the source(s) of these additional funds and provide information about their rates and terms. Compliance with Housing Trust Fund rules and regulations is also required.

For the 2003 fiscal year, the Bootstrap Program was funded with $1.2 million Housing Trust Fund money and $1.8 million Single Family Mortgage Revenue Bond proceeds. The total dollars awarded through the program was $3 million. There were a total of 6 recipients and 97 families benefiting.

In the next biennium, the goal for the Bootstrap program is to develop a successful model of a self-help owner-builder program that can be replicated throughout the state. Specifically, the objective is to expand affordable housing through self-help construction. OCI will market the program to certified nonprofit organizations and Colonia Self-Help Centers. The measurable output will be the number of certified nonprofit organizations applying for this program. This will enhance the development of affordable housing through self-help construction statewide.

Contract for Deed Conversion Initiative

The 78th Legislature passed Appropriations Rider 10, a legislative directive requiring the Department to spend no less than $4 million on contract for deed conversions for families that reside in a colonia and earn 60 percent or less of the applicable area median family income (AMFI), and convert no less than 400 contracts for deeds into traditional notes and deeds of trust by August 31, 2005.

The intent of the program is to help colonia residents become property owners by converting their contracts for deeds into traditional mortgages. Participants in this program must be permanent legal residents of this country and must not earn more than 60 percent of AMFI. The properties proposed for this initiative must be located in a colonia as identified by the Texas Water Development Board colonia list or meet TDHCA's definition of a colonia.

After residents convert their contracts for deeds to traditional loans, the program provides colonia residents with the opportunity to seek funding for construction, rehabilitation, and other benefits that come with owning property.

For 2004 and 2005, TDHCA will set aside $4 million through the HOME Investment Partnerships Program. As stipulated in the legislation, the Department must do no less than 400 contract for deed conversions and spend no less then $4 million for the biennium. In reality, each conversion costs approximately $20,000, which only allows for 200 conversions with the allotted $4 million, not allowing the Department to meet its goal of 400.

There was a total of $3,433,134 of funds allocated through the program in FY 2002-2003. The funding from these awards came from the HOME Program and Junior Lien Mortgage Revenue Bonds. There were a total of 60 loans converted and there are 30 loan conversions in progress.

In order to meet the goal under Appropriations Rider 10 for Fiscal Years 2004 and 2005, the Department will have to identify additional funding sources that can be used to make these conversions.

Housing Construction and Rehabilitation, Access to Adequate Infrastructure, and Information Regarding Resources

The following TDHCA initiatives focus on constructing and rehabilitating housing and infrastructure in the colonias, and providing information to colonia organizations and residents.

Colonia Self-Help Centers (CSHCs) Program

Chapter 2306, Subchapter Z, of the Texas Government Code established the Colonia Self-Help Centers (CSHCs) in Cameron/Willacy, El Paso, Hidalgo, Starr, and Webb counties. The legislative directive also allows the TDHCA to establish a CSHC in any other county if the county is designated as an economically distressed area. The Department opened its sixth CSHC in Maverick County and is in the final stages of opening an additional center in Val Verde County.

Five colonias in each county are identified to receive concentrated attention from the appropriate CSHC. Operation of CSHCs is carried out through a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the ability to perform the functions of a CSHC. The law also requires the establishment of a Colonia Resident Advisory Committee (C-RAC) to advise the Department on the needs of colonia residents, activities to be provided, and programs to be undertaken in the selected colonias. Each county selects two residents to serve on this committee; one of the two residents must reside in a colonia serviced by the CSHC. In addition, the law requires TDHCA's Board to appoint members to the C-RAC, made up of a primary and secondary representative from each county. The C-RAC members meet 30 days prior to making an award to a CSHC. The C-RAC has been instrumental in voicing the concerns of the targeted populations, and has helped both TDHCA and the CSHCs develop useful tools and programs to address the needs of colonia residents.

CSHCs provide concentrated onsite technical assistance to low and very low income individuals and families, including housing and community development activities, infrastructure improvements, and outreach and education. Some of the activities that are offered to the colonia residents are rehabilitation, new construction, surveying and platting, construction skills training, tool library access for self-help construction, housing finance, credit and debt counseling, grant writing, infrastructure constructions and access, contract for deed conversions, and capital access for mortgages, to improve the quality of life for colonia residents in ways that go beyond the provision of basic infrastructure.

The program serves 28 designated colonias in the six counties with approximately 10,000 colonia residents as beneficiaries of these services. Beneficiaries must be at or below 80 percent of the area median family income. CSHCs subcontract with their respective county governments for the provision of housing and infrastructure services, and provide technical assistance to oversee their implementation of contractual responsibilities.

Operation of CSHCs is funded from the US Department of Housing and Urban Development's Texas Community Development Block Program (CDBG) 2.5 percent colonia set-aside. CDBG funds can only be provided to eligible units of general local governments; therefore, TDHCA must enter into a contract with each affected county government. TDHCA provides administrative and general oversight to ensure programmatic and contract compliance to meet legislative intent. The Department maintains a relationship with the unit of general local government and CSHC operator(s) to ensure that the housing and community development activities within each respective contract are achieved. In addition, CSHCs are encouraged to seek funding from other sources to help them achieve their goals and performance measures.

CSHC funds are awarded every two years. In FY 2002, the total dollars allocated through the program was $1,374,663. Of that funding, $227,713 went to the CSHC in Hidalgo County and $1,146,950 went to the CSHC serving Cameron and Willacy counties. A total of $972,287 was awarded to the CSHC in Hidalgo County in FY 2003.

One goal for the CSHCs over the next biennium is to increase the level of funding available. The Department will strive to expand the number of beneficiaries receiving assistance through the CSHCs. By limiting salary and operating expenses to 25 to 30 percent of the total award, at least 70 to 75 percent of the allocated funds can be utilized to assist additional beneficiaries. Another way to expand the number of beneficiaries is to identify funding from other TDHCA and external (i.e., USDA Rural Development, HUD, the Housing Assistance Council, Fannie Mae, etc.) sources that can be added to the annual allocation for the CSHCs. The Department will encourage CSHCs to apply for affordable housing programs.

Another goal of the CSHCs is to expand the program to other communities along the Texas-Mexico border. The Department will target potential counties and colonias that can benefit from CSHC activities, and work with units of local government to identify and determine potential sites for other CSHCs.

Colonia Model Subdivision Loan (CMSL) Program

During the 77th Legislative Session, under Senate Bill 322, Subchapter GG creates the Colonia Model Subdivision Loan Program. The intent of this program is to provide low-interest-rate or interest-free loans through a competitive scoring criteria to promote the development of new, high-quality residential subdivisions that provide alternatives to substandard colonias, and housing options affordable to individuals and families of extremely low and very low income that would otherwise move into substandard colonias.

Any subdivision created under this program must fully comply with all state and local laws, including any process established by state or locality for subdividing real property.

TDHCA will only make loans through the program to CSHCs that are also community housing development organizations (CHDOs) certified by TDHCA. The loans made under this initiative may be used only for the payment of

- costs associated with the purchase of real property;
- costs of surveying, platting, and subdividing or re-subdividing real property;
- fees, insurance costs, or recording costs associated with the development of the subdivision;
- costs of providing proper infrastructure necessary to support residential uses;
- real estate commissions and marketing fees;
- any other cost that TDHCA, by rule, determines to be reasonable and prudent to advance the purposes of this subchapter.

The residential lots developed under this program can be sold to an individual borrower, nonprofit housing developer, or for-profit housing developer for the purposes of constructing single family residential dwelling units affordable to individuals and families of extremely low income or individuals and families of very low income.

For the 2003-2004 biennium, $2 million from the HOME Program Community Housing Development Organization (CHDO) set-aside will be used to implement this initiative.

Border Field Offices

TDHCA operates three Border Field Offices (BFOs) located in El Paso, Laredo, and Edinburg. These offices are partially funded through various sources including general revenue funds, the HOME Program, bond proceeds, and CDBG 1 percent Technical Assistance.

Currently, BFOs provide technical assistance to units of local government, nonprofits and for-profits, colonia residents, and the general public on TDHCA's programs and services. In addition, BFOs conduct onsite loan packaging and processing, homebuyer counseling, inspections, and administration of the CSHCs.

Over the next biennium, the BFOs' goal is to establish a network of communication with units of general local government, nonprofits, and community-based organizations within 150 miles of the Texas-Mexico border. To increase the availability of services to border communities, BFOs will conduct onsite visits to communities requesting technical assistance on accessing TDHCA programs. A database of contacts by county will advise communities of current and future funding opportunities available through TDHCA. BFOs will coordinate a minimum of four colonia public forums per year, which will provide information on various funding sources.

Additionally, BFOs will educate units of local government, nonprofits, and community-based organizations on the process of applying for funding and help identify opportunities for accessing various funding sources. They will coordinate capacity building seminars for units of general local government, nonprofits, and community-based organizations, and will assist with grant writing seminars to be conducted along the Texas-Mexico border. BFOs will also help units of general local government develop nonprofit organizations that can, in turn, provide services to colonia residents. A minimum of three workshops on the development of nonprofits will be coordinated by each BFO within their respective service region, and each BFO will coordinate a minimum of three tours of successful programs currently being administered along the border region.

Contract for Deed Consumer Education Program

OCI continues the consumer education program and has expanded its educational goals, although OCI is no longer required by legislation to provide education for contract for deed participants. With the statewide expansion of the Contract for Deed Conversion initiative, OCI recognized the need for additional education topics, including homebuyer education and instruction in other aspects of homeownership. Education services are available through the Colonia Self-Help Centers and OCI Border Field Offices.

Consumer Information Resources

The Office of Colonia Initiatives operates a toll-free hotline (1-800-462-4251), which enables colonia residents to voice their concerns and/or request information. In addition, this hotline is available to colonia residents who may be having trouble making their monthly mortgage payment.

Funding for this activity is part of the OCI administration budget.

Consumer Information Resources has been developed to promote the availability of housing and community development along the Texas-Mexico border through marketing and forums meant to increase public awareness. It is important to encourage the attendance of border residents at public hearings, conferences, and forums.

COMMENT ON THE COLONIA ACTION PLAN

In an effort to solicit public comment on the Colona Action Plan, the Office of Colonia Initiatives mailed the plan to members of the Colonia Resident Advisory Committee. Representatives from the Border Field Offices also contacted the committee members to encourage comment. The comment received by the Department is summarized below.

Comment

Mr. Jose Luis Almazan, Cameron County Secondary C-RAC member, stated that education in the colonias is very important because it will educate the future residents of the area—so the same mistakes will not be done again.

- Department Response
  No response necessary.

Check the areas so there won't be flood conditions; one of the major problems. And the existing projects continue to work.

- Department Response
  Current legislation prevents properties from being developed in flood zones. The Department verifies conformity to the statute.

Have more trees in the new colonias along with new homes and maintain the area. Contractors with property should continue warranty deeds with vendor's lien. More programs for the youth.

- Department Response
  This type of activity is considered eligible.

Contractors with property should continue warranty deeds with vendor's lien.

- Department Response
  The Department concurs and does encourage this.

More programs for the youth.

- Department Response
  The focus of TDHCA is the provision of safe, decent, and affordable housing. While the Department does not have any statutory authority to focus on youth related programs, OCI will attempt to disseminate information related to youth programs.

Comment

Mr. Dewitt Jones, Starr County C-RAC member, stated that he was for the plan and especially interested in the education part of it.

- Department Response
  No response necessary.

Comment

Mr. Guillermo Garcia, El Paso County C-RAC member, agreed with the plan, but would like to see more self-help construction initiatives.

- **Department Response**

  TDHCA currently funds several self-help construction initiatives. At this time, the Department feels the administrative capacity of nonprofit organizations currently able to undertake these initiatives are fully extended. The Department will consider future initiatives as organizational capacity increases.

The NOFA cycles should be open year round to allow better project planning.

- **Department Response**

  In November 2003, the TDHCA Board approved open cycles for several colonia-related activities.

APPENDIX A

LEGISLATIVE REQUIREMENTS FOR THE STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

SEC. 2306.072. ANNUAL LOW INCOME HOUSING REPORT

(a) Not later than December 18 of each year, the director shall prepare and submit to the board an annual report of the department's housing activities for the preceding year.

(b) Not later than the 30th day after the date the board receives the report, the board shall submit the report to the governor, lieutenant governor, speaker of the house of representatives, and members of any legislative oversight committee.

(c) The report must include

- (1) a complete operating and financial statement of the department;
- (2) a comprehensive statement of the activities of the department during the preceding year to address the needs identified in the state low income housing plan prepared as required by Section 2306.0721, including:
  - (A) a statistical and narrative analysis of the department's performance in addressing the housing needs of individuals and families of low and very low income;
  - (B) the ethnic and racial composition of families and individuals applying for and receiving assistance from each housing-related program operated by the department; and
  - (C) the department's progress in meeting the goals established in the previous housing plan;
- (3) an explanation of the efforts made by the Department to ensure the participation of persons of low income and their community-based institutions in department programs that affect them;
- (4) a statement of the evidence that the Department has made an affirmative effort to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process;
- (5) a statistical analysis, delineated according to each ethnic and racial group served by the department, that indicates the progress made by the department in implementing the state low income housing plan in each of the uniform state service regions; and
- (6) an analysis, based on information provided by the fair housing sponsor reports required under Section 2306.0724 and other available data, of fair housing opportunities in each housing development that receives financial assistance from the department that includes the following information for each housing development that contains twenty or more living units:
  - (A) the street address and municipality or county where the property is located;
  - (B) the telephone number of the property management of leasing agent;
  - (C) the total number of units reported by bedroom size;
  - (D) the total number of units, reported by bedroom size, designed for individuals who are physically challenged or who have special needs and the number of these individuals served annually as reported by each housing sponsor;
  - (E) the rent for each type of rental unit, reported by bedroom size;
  - (F) the race or ethnic makeup of each project;
  - (G) the number of units occupied by individuals receiving government-supported housing assistance and the type of assistance received;

(H) the number of units occupied by individuals and families of extremely low income, very low income, low income, moderate income, and other levels of income;

(I) a statement as to whether the department has been notified of a violation of the fair housing law that has been filed with the United States Department of Housing and Urban Development, the Commission on Human Rights, or the United State Department of Justice; and

(J) a statement as to whether the development has any instances of material noncompliance with bond indentures or deed restrictions discovered though the normal monitoring activities and procedures that include meeting occupancy requirements or rent restrictions imposed by deed restrictions or financing agreements.

(7) a report on the geographic distribution of low income housing tax credits, the amount of unused low income housing tax credits, and the amount of low income housing tax credits received from the federal pool of unused funds from other states.

(8) A statistical analysis, based on information provided by the fair housing sponsor reports required by Section 2306.0724 and other available data, of average rents reported by county.

(d) The annual report submitted in each even-numbered year must:

(1) include recommendations designed to strengthen and support the Neighborhood Partnership Program in providing home ownership opportunities to individuals and families of low and very low income; and

(2) describe in detail actions the department has taken to assist small municipalities and rural areas in obtaining matching funds from public and private sources for participation in the Neighborhood Partnership Program.

SEC. 2306.0721. LOW INCOME HOUSING PLAN

(a) Not later than December 18 of each year, the director shall prepare and submit to the board an integrated state low income housing plan for the next year.

(b) Not later than the 30th day after the date the board receives the plan, the board shall submit the plan to the governor, lieutenant governor, and the speaker of the house of representatives.

(c) The plan must include:

(1) an estimate and analysis of the housing needs of the following populations in each uniform state service region:

(A) individuals and families of moderate, low, very low income, and extremely low income;

(B) individuals with special needs; and

(C) homeless individuals;

(2) a proposal to use all available housing resources to address the housing needs of the populations described by Subdivision (1) by establishing funding levels for all housing-related programs;

(3) an estimate of the number of federally assisted housing units available for individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(4) a description of state programs that govern the use of all available housing resources;

(5) a resource allocation plan that targets all available housing resources to individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(6) a description of the department's efforts to monitor and analyze the unused or underused federal resources of other state agencies for housing-related services and services for homeless individuals and the department's recommendations to endorse the full use by the state of all available federal resources for those services in each uniform state service region;
(7) strategies to provide housing for individuals and families with special needs each uniform state service region;
(8) a description of the department's efforts in each uniform state service region to encourage the construction of housing units that incorporate energy efficient construction and appliances;
(9) an estimate and analysis of the housing supply in each uniform state service region;
(10) an inventory of all publicly and, where possible, privately funded housing resources, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies;
(11) strategies for meeting rural housing needs;
(12) information on the demand for contract-for-deed conversions, services from self-help centers, consumer education, and other colonia resident services in counties some part of which is within 150 miles of the international border of this state;
(13) a summary of public comments received at a hearing under this chapter or from another source that concern the demand for colonia resident services described by Subdivision (12); and
(14) any other housing-related information that the state is required to include in the one-year action plan of the consolidated plan submitted annually to the United States Department of Housing and Urban Development.

(d) The priorities and policies in another plan adopted by the department must be consistent to the extent practical with the priorities and policies established in the state low income housing plan.
(e) To the extent consistent with federal law, the preparation and publication of the state low income housing plan shall be consistent with the filing and publication deadlines required of the department for the consolidated plan; and
(f) The director may subdivide the uniform state service regions as necessary for the purposes of the state low income housing plan.

SEC. 2306.0722. PREPARATION OF PLAN AND REPORT

(a) Before preparing the annual low income housing report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the department shall meet with regional planning commissions created under Chapter 391, Local Government Code, representatives of groups with an interest in low income housing, nonprofit housing organizations, managers, owners, and developers of affordable housing, local government officials, and residents of low income housing. The department shall obtain the comments and suggestions of the representatives, officials, and residents about the prioritization and allocation of the department's resources in regard to housing.
(b) In preparing the annual report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the director shall:

(1) coordinate local, state, and federal housing resources, including tax exempt housing bond financing and low income housing tax credits;
(2) set priorities for the available housing resources to help the neediest individuals;
(3) evaluate the success of publicly supported housing programs;
(4) survey and identify the unmet housing needs of persons the department is required to assist;

(5) ensure that housing programs benefit a person regardless of the persons' race, ethnicity, sex, or national origin;
(6) develop housing opportunities for individuals and families of low and very low income and individuals with special housing needs;
(7) develop housing programs through an open, fair, and public process;
(8) set priorities for assistance in a manner that is appropriate and consistent with the housing needs of the populations described by Section 2306.0721(c)(1);
(9) incorporate recommendations that are consistent with the consolidated plan submitted annually by the state to the United States Department of Housing and Urban Development;
(10) identify the organizations and individuals consulted by the department in preparing the annual report and state low income housing plan and summarize and incorporate comments and suggestions provided under Subsection (a) as the board determines to be appropriate;
(11) develop a plan to respond to changes in federal funding and programs for the provision of affordable housing;
(12) use the following standardized categories to describe the income of program applicants and beneficiaries:
  (A) to 30 percent of area median income adjusted for family size;
  (B) more than 30 to 60 percent of area median income adjusted for family size;
  (C) more than 60 to 80 percent of area median income adjusted for family size;
  (D) more than 80 to 115 percent of area median income adjusted for family size; or
  (E) more than 115 percent of area median income adjusted for family size; and

(13) use the most recent census data combined with existing data from local housing and community service providers in the state, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies.

SEC. 2306.0723. PUBLIC PARTICIPATION REQUIREMENTS

(a) The department shall hold public hearings on the annual state low income housing plan and report before the director submits the report and the plan to the board. The department shall provide notice of the public hearings as required by Section 2306.0661. The department shall accept comments on the report and plan at the public hearings and for at least 30 days after the date of the publication of the notice of the hearings.
(b) In addition to any other necessary topics relating to the report and the plan, each public hearing required by Subsection (a) must address:
  (1) infrastructure needs;
  (2) home ownership programs;
  (3) rental housing programs;
  (4) housing repair programs; and
  (5) the concerns of individuals with special needs, as defined by Section 2306.511.
(c) The board shall hold a public hearing on the state low income housing report and plan before the board submits the report and the plan to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature.
(d) The board shall include with the report and the plan the board submits to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature, and members of the advisory board formed by the department to advise on the consolidated plan a written summary of public comments on the report and the plan.

APPENDIX B

TDHCA PROGRAM DESCRIPTIONS

The following program descriptions provide information on the various TDHCA programs including funding source, type of assistance, recipients, targeted beneficiaries, program activities, set-asides, and special initiatives.

HOME INVESTMENT PARTNERSHIPS PROGRAM

The HOME Investment Partnerships (HOME) Program receives funding from the US Department of Housing and Urban Development (HUD) and provides loans and grants to units of local government, public housing authorities (PHAs), community housing development organizations (CHDOs), nonprofit organizations, and for-profit entities, with targeted beneficiaries being low, very low, and extremely low income households. The purpose of the HOME Program is to expand the supply of decent, safe, and affordable housing for extremely low, very low, and low income households, and to alleviate the problems of excessive rent burdens, homelessness, and deteriorating housing stock. HOME strives to meet both the short-term goal of increasing the supply and the availability of affordable housing and the long-term goal of building partnerships between state and local governments and private and nonprofit organizations in order to strengthen their capacity to meet the housing needs of lower income Texans.

The State of Texas receives an annual allocation of HOME funds from HUD. TDHCA provides technical assistance to all recipients of the HOME Program to ensure that all participants meet and follow state implementation guidelines and federal regulations. In 2003, the Texas Legislature passed Senate Bill 264, which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the HOME, Housing Trust Fund, and Housing Tax Credit programs to each Uniform State Service Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance. Please see the Regional Allocation Formula section of this document, beginning on page 78, for further explanation.

Note: It is anticipated that the CHDO, Olmstead Populations, Contract for Deed Conversions, Rental Housing Preservation, and Rental Housing Development activities will be awarded through an open funding cycle.

Homebuyer Assistance

Down payment and closing cost assistance is provided to homebuyers for the acquisition of affordable single family housing. This activity may also be used for construction costs associated with architectural barrier removal in a home purchased with HOME assistance to meet the accessibility needs of homebuyers with disabilities; acquisition and rehabilitation costs associated with contract for deed conversions to serve colonia residents; and construction costs associated with the rehabilitation of a home purchased with HOME assistance. For PY 2004 funds, this activity will comprise 35 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $7,756,875.

Owner-Occupied Housing Assistance

Rehabilitation or reconstruction cost assistance in the form of grants is provided to homeowners for the repair or reconstruction of their existing homes. The homes must be the principal residence of the homeowner. This activity will comprise 45 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $9,973,125.

Tenant-Based Rental Assistance (TBRA)

Rental subsidy and security and utility deposit assistance is provided to tenants, in accordance with written tenant selection policies, for a period not to exceed two years. TBRA allows the assisted tenant to live in and move to any dwelling unit with a right to continued assistance with the condition that assisted family participate in a Self-Sufficiency Program. This activity will comprise 20 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $4,432,500.

Set-Asides

Rental Housing Development Set-Aside

Awards for eligible applicants are to be used for the development of affordable multifamily rental housing. Owners are required to make the units available to extremely low, very low, and low income families and must meet long-term rent restrictions. Three million dollars will be allocated toward this activity for FY 2004. These funds will not be subject to the Regional Allocation Formula.

Rental Housing Preservation Set-Aside

Awards for eligible applicants are to be used for the acquisition and/or rehabilitation for the preservation of existing affordable or subsidized rental housing. Owners are required to make the units available to extremely low, very low, and low income families and must meet long-term rent restrictions. Two million dollars will be allocated toward this activity for FY 2004. These funds will not be subject to the Regional Allocation Formula.

CHDO Set-Aside

A minimum of 15 percent, approximately $6,750,000 (plus $337,500 in operating expenses) of the annual HOME allocation is reserved for community housing development organizations (CHDOs). CHDO Set-Aside projects are owned, developed, or sponsored by the CHDO, and result in the development of rental units or homeownership. Development includes projects that have a construction component, either in the form of new construction or the rehabilitation of existing units.

Set-Aside for Persons with Disabilities

A minimum of 5 percent, approximately $2,250,000, of the annual HOME allocation is reserved for applicants serving persons with disabilities and will not be subject to the Regional Allocation Formula. Eligible activities include homebuyer assistance, owner-occupied housing assistance, and tenant-based rental assistance. A minimum of $500,000 will be reserved under this set-aside for the Texas Home of Your Own (HOYO) Program for homebuyer assistance. The HOYO program coordinates existing homeownership services, which streamlines the process homebuyers must follow, including homebuyer counseling, down payment assistance, and architectural barrier removal.

Set-Aside for Olmstead Population

In an effort to address SB 367 from the 77th Legislative Session, enacted in response to the Supreme Court *Olmstead* decision (related to the de-institutionalization of persons with disabilities), for PY 2004, TDHCA will allocate $2,000,000 towards those populations (as outlined in SB 367).[98] These funds will be used for tenant-based rental assistance, including security deposits. These funds will not be subject to the Regional Allocation Formula.

Set-Aside for Contract for Deed Conversions

The intent of this program is to help colonia residents become property owners by converting their contracts for deed into traditional mortgages. To assist the Department in meeting this mandate, $2,000,000 in HOME Program funds will be targeted to assist households described under this initiative. These funds will not be subject to the Regional Allocation Formula.

Set-Aside for Colonia Model Subdivision Loan Program

Per Subchapter GG of Chapter 2306, Texas Government Code, the intent of this program is to provide low-interest-rate or possible interest-free loans to promote the development of new, high-quality residential subdivisions that provide alternatives to substandard colonias, and housing options affordable to individuals and families of extremely low and very low income who would otherwise move into substandard colonias. The Department will only make loans to CHDOs certified by the Department and for the types of activities and costs described under the previous section regarding CHDO Set-Aside. Two million dollars will be targeted to assist households described under this initiative. These funds will not be subject to the Regional Allocation Formula.

Special Needs Populations

TDHCA has a goal of allocating 20 percent of the annual HOME allocation to applicants serving persons with special needs. Eligible activities include homebuyer assistance, owner-occupied housing assistance, and tenant-based rental assistance. Additional scoring criteria has been established under each of the eligible activities to assist the Department in reaching its goal.

Projected HOME Program funding for FY 2004: $45,000,000.

For more information regarding single family activities, contact Skip Beaird, Single family Finance Production Division, at (512) 475-0908. For multifamily activity information, contact the Multifamily Finance Production Division at (512) 475-3340

[98]Institutional housing meaning: (1) an ICF-MR, as defined by Section 531.002, Health and Safety Code, (2) a nursing facility; (3) a state hospital, state school, or state center maintained and managed by the Texas Department of Mental Health and Mental Retardation; or (4) an institution for the mentally retarded licensed or operated by the Department of Protective and Regulatory Services. Note that SB 367 expanded the state's definition of the Olmstead Population to include not only those individuals who had been served in a state mental health facility for twelve months, but also those individuals who had three inpatient hospitalizations within a 180-day period to a TDMHMR facility (State hospital) to be presumed at imminent risk of institutionalization.

HOUSING TRUST FUND

The Housing Trust Fund (HTF) receives funding from the State of Texas, multifamily bond issuance fees, and loan repayments, and is the only State-authorized program for affordable housing, as created by the 72nd Legislature in Senate Bill 546. HTF offers loans and grants to nonprofits, units of local government, PHAs, CHDOs, for-profit entities, and, as an eligible activity, income-eligible individuals and families. The targeted beneficiaries of the program are low, very low, and extremely low income households. HTF funds may be used for the acquisition, rehabilitation, and new development of affordable housing, and may provide pre-development loans and capacity building grants to nonprofits and CHDOs engaged in the development of affordable housing. HTF strives for a broad geographic distribution of projects with a focus on rural areas.

Housing units assisted with HTF funds must remain affordable for a period of at least 30 years.[99] Funds are not available to projects that will permanently and involuntarily displace persons of low income. Projects will be funded based on ranking criteria including leveraging of funds, cost effectiveness, and the extent to which persons of low income are served. Funds are awarded on a competitive basis through periodic application cycles. Applications are evaluated against a number of criteria, including (1) the extent to which the project will leverage state funds with other resources, including federal resources and private sector funds; (2) the cost-effectiveness of a proposed development; and (3) the extent to which individuals and families of very low income and extremely low income are served by the development. Funding for the development is subject to the TDHCA Regional Allocation Formula.

Capacity Building and Technical Assistance

Up to 10 percent of Housing Trust Fund money may be set aside for capacity building activities. In 2003, the Housing Trust Fund provided $567,729 in grant funding to 14 nonprofits so they could hire staff or contract with technical assistance providers to increase the organization's capacity to develop affordable housing. Up to $350,000 may be made available for capacity building activities in 2004.

Predevelopment Loan Fund Demonstration Program

Up to 10 percent of Housing Trust Fund money may be set aside for predevelopment activities. The purpose of the Predevelopment Loan Fund Demonstration Program is to provide opportunities for nonprofits and CHDOs to develop affordable housing by helping eliminate the barriers predevelopment expenses may pose. In FY 2003, administration of this program was awarded to Texas Community Capital. A total of $1,088,068 in funding will be made available to eligible entities for predevelopment activities. These funds will continue to be administered by subgrantees through FY 2004.

Special Initiatives and Partnerships

Special Needs Populations

Ten percent of the total number of project units assisted with HTF funds must be set aside for special needs populations. Five percent must be fully wheelchair accessible and 2 percent must be for sight- or hearing-impaired individuals. HTF provides scoring incentives for developments that choose to set aside additional units for special needs populations.

[99] See §2306.185

Texas Bootstrap Loan Program

The Texas Bootstrap Loan Program, as administered by the TDHCA Office of Colonia Initiatives, receives substantial funding from the Housing Trust Fund.

Projected Housing Trust Fund Funding for FY 2004: $3,247,460.

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

HOUSING TAX CREDIT PROGRAM

The Housing Tax Credit (HTC) Program receives funding from the US Treasury Department and provides tax credits to nonprofits, for-profit developers, and syndicators or investors. The targeted beneficiaries of the program are very low and extremely low income families at or below 60 percent AMFI. The program's purpose is to encourage the development and preservation of rental housing for low income families, provide for the participation of for-profit and nonprofit organizations in the program, maximize the number of units added to the state's housing supply, and prevent losses in the state's supply of affordable housing.

The HTC program was created by the Tax Reform Act of 1986 and is governed by the Internal Revenue Code of 1986 (the Code), as amended, 26 USC Section 42. It authorizes tax credits in the amount of $1.75 per capita of the state population. Tax credits are also awarded to developments with tax-exempt bond financing and are made independent of the $1.75 state volume cap. TDHCA is the only entity in the state with the authority to allocate tax credits under this program. The state's distribution of the credits is administered by the Department's *Qualified Allocation Plan and Rules* (QAP) as required by the Code. In 2003, the Texas Legislature passed Senate Bill 264, which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the Housing Tax Credit Program to each Uniform State Planning Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance.

To qualify for tax credits, the proposed development must involve new construction or undergo substantial rehabilitation of residential units. The credit amount for which a development may be eligible depends on the total amount of depreciable capital improvements, the percentage of units set aside for qualified tenants, and the funding sources available to finance the total development cost. Pursuant to the Code, a low income housing project qualifies for residential rental occupancy if it meets one of the following two criteria: (1) 20 percent or more of the residential units in the project are both rent-restricted and occupied by individuals whose income is 50 percent or less of AMFI; or (2) 40 percent or more of the residential units in the project are both rent-restricted and occupied by individuals whose income is 60 percent or less of AMFI. Typically, 60 to 100 percent of a development's units will be set aside for qualified tenants in order to maximize the amount of tax credits the development may claim.

Credits from the state volume cap are awarded through a competitive application process. Each application must satisfy a set of threshold criteria and is then scored based on selection criteria. The board considers the recommendations of the Department and determines a final award list. Credits to developments with tax-exempt bond financing are awarded through a similar application review process, but because these credits are not awarded from a limited credit pool, the process is noncompetitive and the selection criteria are not part of the application.

The selection criteria encourages the provision of units for persons with special needs by awarding points for projects that include units designed for large families; that set aside units for families with income at or below 50 percent, 40 percent, and/or 30 percent of the area median income; that are designed and equipped for the elderly; that serve low income tenants for the longest period of time; that provide design amenities and include supportive services for tenants; that set aside units designed and built to Section 504 standards and equipped for persons with physical or mental disabilities; and that provide transitional housing units for the homeless.

The Department requires recipients of tax credits to document the participation of historically underutilized businesses (HUBs) in the development, construction, and management of tax credit projects, and has established a minimum goal of 30 percent participation of HUBs. The selection criteria awards extra points to projects owned by HUBs and also areas located in colonias. Efforts are made in the planning process and allocation of funds to ensure the involvement of housing advocates, community-based institutions, developers, and local municipalities. The Department also encourages the participation of community development corporations and other neighborhood-based groups.

Projected Housing Tax Credit Program Funding for FY 2004:$38,000,000.

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

MULTIFAMILY BOND PROGRAM

The Multifamily Bond Program issues taxable and tax-exempt mortgage revenue bonds (MRBs) to fund loans to nonprofit and for-profit developers. The proceeds of the bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties with the targeted beneficiaries being very low, low, and moderate income households. Owners elect to set aside 20 percent of the units in each project for households earning 50 percent or less of area median income, or 40 percent of the units for households earning 60 percent or less of area median income. Persons with special needs must occupy 5 percent of the units. Property owners are also required to offer a variety of services to benefit the residents of the development. Specific tenant programs must be designed to meet the needs of the current tenant profile and must be approved annually by TDHCA.

TDHCA issues tax-exempt, multifamily MRBs through two different authorities defined by the Internal Revenue Code. Under one authority, tax-exempt bonds used to create housing projects are subject to the State's private activity volume cap. Beginning in 2003, the State will allocate 23 percent of the annual private activity volume cap for multifamily projects. Approximately $367 million in issuance authority will be made available to various issuers to finance multifamily projects, of which 20 percent, or approximately $73.3 million, will be made available exclusively to TDHCA. Issuance authority per individual projects is allocated through a lottery administered by the Texas Bond Review Board. TDHCA, local housing authorities, and other eligible bond issuers enter the lottery with applications for specific projects on behalf of project owners. Applications submitted to TDHCA for the private activity bond 2004 program year will be scored and ranked. Lottery numbers will then be assigned from the lowest to highest ranked application. Projects that receive 50 percent or more of their funding from the proceeds of tax-exempt bonds under the private activity volume cap are also eligible to apply for housing tax credits.

Under the second authority, TDHCA may issue tax-exempt MRBs to finance properties that are owned entirely by nonprofit organizations. Bonds issued under this authority are exempt from the private activity volume cap. This is a noncompetitive application process and applications may be received at any time throughout the year. In addition to the set-asides above, 75 percent of project units financed under the 501(c)(3) authority must be occupied by households earning 80 percent or less of the area median income.

Projected Multifamily Bond Program Funding for FY 2004: $150,000,000.

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

First Time Homebuyer Program

The First Time Homebuyer Program receives funding from tax-exempt and taxable mortgage revenue bonds. The program offers 30-year fixed-rate mortgage financing at below-market rates for very low, low, and moderate income residents purchasing their first home or residents who have not owned a home within the preceding three years. Qualified applicants access First Time Homebuyer Program funds by contacting any participating lender, which is then responsible for the loan application process and subsequent loan approval. After closing, the lender transfers the mortgage loan to a Master Servicer designated by TDHCA.

The First Time Homebuyer Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI (area median family income) limitations, based on IRS adjusted income limits. Recipients must have adequate income stability and credit history sufficient to qualify for an industry-standard mortgage loan, and the purchase price of the home must not exceed stipulated maximum purchase price limits. Program funds will be allocated on a regional basis based on population percentage per Uniform State Service Region. A minimum of 30 percent of program funds will be set aside to assist Texans earning 60 percent or less of bond income limits.

TDHCA currently offers Assisted Mortgage Loans and Non-Assisted Mortgage Loans. The Assisted Mortgage Loans have a slightly higher interest rate than the Non-Assisted Loans and include down payment and closing cost assistance through the Down Payment Assistance Program (DPAP) or the Grant Assistance Program (GAP); the availability and amount of assistance varies by bond issuance. Assisted Mortgage Loans are available exclusively to low income homebuyers earning 60 percent or less of bond income limits. Non-Assisted Mortgage Loans have a slightly lower interest rate than the Assisted Loans and do not offer down payment or closing cost assistance.

Income limits for the program are set by the IRS Tax Code (1986) based on income figures determined by the US Department of Housing and Urban Development. The first time homebuyer restriction is established by federal Internal Revenue Service regulations, which also require that program recipients may be subject to a recapture tax on any capital gain realized from a sale of the home during the first nine years of ownership. Certain exceptions to the first time homebuyer restriction, income ceiling, and maximum purchase price limitation apply in targeted areas. Such targeted areas are qualified census tracts, as designated by the Secretary of Commerce, in which 70 percent or more of the families have an income of 80 percent or less of the statewide median income and/or are areas of chronic economic distress as designated by the state and approved by the Secretaries of Treasury and Housing and Urban Development, respectively.

Projected Single Family Bond Program funding for FY 2004: $165,000,000.

For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

EXPANDED APPROVAL PROGRAM

Through an innovative partnership with Fannie Mae, TDHCA has launched the Expanded Approval Program, which enables households with slight blemishes on their credit report qualify for a homebuyer loan with interest rates lower than that of alternative financing arrangements. The Department has allocated $10 million of single family bond proceeds to this program. Unlike the standard assisted homebuyer funds, assisted loans made through the Expanded Approval Program are available to qualifying households earning up to 115 percent of the area median family income.

Projected Expanded Approval Program funding for FY 2004: $10,000,000.

For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

DOWN PAYMENT ASSISTANCE PROGRAM

Funding for the Down Payment Assistance Program (DPAP) is derived from available TDHCA funds. The program offers subordinate lien financing to qualified residents of Texas that participate in the First Time Homebuyer Program, with targeted beneficiaries including households at or below 60 percent AMFI. Eligible home purchasers participating in select bond programs with limited liquid assets who qualify for a mortgage loan through the TDHCA First Time Homebuyer Program may apply for DPAP assistance. This program provides up to $5,000, $7,500, or $10,000 (depending upon property location) to be used for home purchase–associated down payment and closing costs.

The assistance is a non-interest-bearing second lien mortgage, the term of which runs concurrently with the first lien loan, and can be used only in conjunction with the First Time Homebuyer Program. Monthly payments are not required. Repayment of the principal of the second lien loan is required upon the sale, lease, or refinance of the home, or payoff of the first lien obligation.

Projected Down Payment Assistance Program funding for FY 2004: Varies by bond issuance.
For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

GRANT ASSISTANCE PROGRAM

The Texas Department of Housing and Community Affairs also offers grant funds for down payment and closing cost assistance on a first-come, first-served basis for mortgage loans originated through the First Time Homebuyer Program. The Grant Assistance Program (GAP) provides up to 4 percent of the amount of the mortgage loan. Assistance is available to eligible borrowers whose incomes do not exceed 60 percent AMFI.

Projected Down Payment Assistance Program funding for FY 2004: Varies by bond issuance.

For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

MORTGAGE CREDIT CERTIFICATE PROGRAM

A mortgage credit certificate (MCC) provides a tax credit that will reduce the federal income taxes, dollar-for-dollar, of qualified buyers purchasing a qualified residence. As a result, the MCC effectively reduces the monthly mortgage payment and increases the buyer's disposable income by reducing his or her federal income tax obligation. This tax savings provides a family with more available income to qualify for a loan and meet mortgage payment requirements.

The amount of the annual tax credit will equal 40 percent of the annual interest paid on a mortgage loan; however, the maximum amount of the credit cannot exceed $2,000 per year. The credit cannot be greater than the annual federal income tax liability, after all other credits and deductions have been taken into account. MCC tax credits in excess of a borrower's current year tax liability may, however, be carried forward for use during the subsequent three years.

The MCC Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI limitations, based on IRS adjusted income limits. In order to participate in the MCC Program, homebuyers must meet certain eligibility requirements and obtain a qualified mortgage loan through a participating lender. The mortgage loan must be financed from sources other than tax-exempt revenue bonds. The mortgage may be a conventional, FHA, VA, or RHS loan at prevailing market rates, but may not be used in connection with the refinancing of an existing loan

Projected Mortgage Credit Certificate Program funding for FY 2004: $15,000,000.

For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962.

TEXAS STATEWIDE HOMEBUYER EDUCATION PROGRAM

The Texas Statewide Homebuyer Education Program (TSHEP) offers provider certification training to nonprofit organizations including Texas Agriculture Extension Agents, units of local government, faith-based organizations, CHDOs, community development corporations (CDCs), community-based organizations (CBOs), and other organizations with a proven interest in community building. In addition, a referral service for individuals interested in taking a homebuyer education class is available through a toll-free hotline at TDHCA. The targeted beneficiaries of the program include extremely low, very low, low, and moderate income individuals; minority populations; and persons with disabilities.

To ensure uniform quality of the homebuyer education provided throughout the state, TDHCA contracts with training professionals to teach local nonprofit organizations the principles and applications of comprehensive pre- and post-purchase homebuyer education. The training professionals and TDHCA also certify the participants as homebuyer education providers.

Projected Texas Statewide Homebuyer Education Program funding for FY 2004: $65,000.

For more information, contact JoAnn DePenning, Center for Housing Research, Planning, and Communications, at (512) 475-4779. To access the TSHEP referral network, obtain a list of TSHEP-certified providers, or for more information regarding TSHEP, call 1-877-895-1093.

Office of Colonia Initiatives

The Office of Colonia Initiatives (OCI) was established within the Department in June 1996. OCI coordinates Department and legislative initiatives involving border issues and manages a portion of the Department's existing programs targeted at colonias. These programs include housing finance and mortgage revenue bond set-asides, community development block grants, self-help centers, and the implementation of legislation affecting colonias.

Colonias are generally described as subdivisions in unincorporated areas, typically within 150 miles of the Texas-Mexico border, that lack adequate water and wastewater services. Most colonias are located in Hidalgo, Cameron, Maverick, Willacy, Webb, Starr, and El Paso counties.

Border Field Offices

OCI oversees three Border Field Offices (BFOs) located in Edinburg, El Paso, and Laredo, which serve a 75-county area with a primary purpose to provide technical assistance to colonia residents. Each BFO is responsible for marketing Department programs and services to colonia residents and networking with local governments, state and federal agencies, nonprofits, and private organizations. This collaboration of efforts serves as a mechanism for community improvements that is responsive to the needs of colonia residents.

Colonia Self-Help Centers

Legislative action in 1995 directed the establishment of Colonia Self-Help Centers (SHCs) in Cameron/Willacy, El Paso, Hidalgo, Starr, and Webb counties, and any other county if designated as an economically distressed area. Operation of SHCs is carried out through a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the ability to perform the functions of a Colonia Self-Help Center. SHCs provide concentrated on-site technical assistance to low and very low income individuals and families regarding housing and community development activities, infrastructure improvements, and outreach and education. The program serves 28 designated colonias in the six counties and benefits approximately 10,000 colonia residents. Beneficiaries of services must be at or below 80 percent of the area median family income. The Department opened its sixth SHC in Maverick County and is in the final stages of opening an additional center in Val Verde County.

Colonia Resident Advisory Committee

The Colonia Resident Advisory Committee (C-RAC) advises the Department on the needs of colonia residents and potential activities and programs. The Department's Board of Directors is required by the Texas Government Code to appoint two colonia resident representatives from each county to the C-RAC. C-RAC members meet 30 days prior to making an award to a Colonia Self-Help Center. The C-RAC has been instrumental in voicing the concerns of the targeted populations and assisting in the development of useful tools and programs to address the needs of colonia residents.

Contract for Deed Conversion Initiative

The intent of this program is to facilitate colonia-resident property ownership by converting contracts for deed into traditional mortgages. The Department is required through legislative directive to spend no less than $4 million on contract for deed conversions for colonia families earning less than 60 percent of AMFI. The Department must convert at least 400 of these contracts for deed into traditional notes and deeds of trust by August 31, 2005. Participants of this program must live in a colonia and must be citizens or permanent residents of the United States. Pre- and post-conversion counseling is available, as well as funding for housing construction and rehabilitation.

Contract for Deed Consumer Education Program

OCI continues the consumer education program and has expanded its educational goals, although OCI is no longer required by legislation to provide education for contract for deed participants. With the statewide expansion of the Contract for Deed Conversion initiative, OCI recognized the need for additional education topics, including homebuyer education and instruction in other aspects of homeownership. Education services are available through the Colonia Self-Help Centers and OCI Border Field Offices.

Texas Bootstrap Loan Program

This program provides loan funds to purchase or refinance real property on which to improve existing or construct new residential housing. Eligible applicants for this program are Colonia Self-Help Centers and state-certified nonprofit organizations. This program requires that the owner-builder (the borrower) provide at least 60 percent of the labor necessary to build the proposed housing, or provide an equivalent amount of labor by working through a state-certified owner-builder housing program. A minimum of two-thirds of the available funding is set aside for owner-builders whose property is located in an Economically Distressed Area Program county. The remainder of the funding will be available to other Department-certified nonprofit owner-builder housing programs.

Colonia Model Subdivision Loan Program

The intent of this program, created in 2001 by the 77th Legislature, is to provide low-interest or interest-free loans to Colonia Self-Help Centers or certified CHDOs through a competitive scoring process. These loans are intended for the development of new, high-quality residential subdivisions that provide alternatives to substandard colonias. The Department has allocated $1 million from the HOME Program to implement this initiative in FY 2003.

Builder Incentive Partnership Program

The purpose of this program is to assist working families purchase a new home. This initiative was created to entice builders to build homes at or below $70,000 with the guarantee that the home will be purchased if it is not sold to a conventional buyer within 30 days of completion. The Department, Fannie Mae, and other local for-profit and nonprofit entities have partnered to implement this one-time pilot initiative.

Border Affairs

The Office of the Texas Secretary of State is taking the lead on the State Agency Advisory Roundtable on the Texas Border and Mexican Affairs (Advisory Roundtable), which meets on a quarterly basis with the purpose of identifying common interagency border concerns. This forum is expected to facilitate in the creation of a common agenda that will best advance the quality of life and standard of living in our border communities.

Consumer Information Resources

OCI manages a toll-free hotline (1-800-462-4251) in both English and Spanish that allows colonia residents to voice concerns and/or request information.

Projected Office of Colonia Initiatives funding for FY 2003: OCI will receive 2.5 percent from the State Community Development Block Grant Program (CDBG) annual allocation to fund the operations of the Colonia Self-Help Centers; approximately $3 million from the Housing Trust Fund for the implementation of the FY 2004 Texas Bootstrap Loan Program; and $2 million from the HOME Investment Partnerships Program for the implementation of the Contract For Deed Conversion Program.

For additional information, contact Homero V. Cabello or Susana J. Garza, Office of Colonia Initiatives, at 1-800-462-4251.

Comprehensive Energy Assistance Program

The Comprehensive Energy Assistance Program (CEAP) receives funding from the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) and offers grants to community action agencies, nonprofits, and local units of government. The targeted beneficiaries of the program in Texas are households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly, disabled, families with young children, and households with the highest energy costs or needs in relation to income (highest home energy burden). Local providers must implement special outreach efforts for these special needs populations.

CEAP combines case management, education, and financial assistance to help very low and extremely low income consumers reduce utility bills to an affordable level. By statute, 10 percent of total funding is allocated for administration and 5 percent is allocated to case-management activities. The remaining 85 percent of the funding is used for direct client services.

There are four basic components to meet consumers' needs:

- The co-payment component assists households achieve energy self-sufficiency by helping households set goals for reducing utility bills, giving advice on improving household budgets, and assisting with utility bills for six to twelve months.
- The heating and cooling systems component repairs or replaces heating and cooling appliances to increase energy efficiency.

- The energy crisis component provides assistance during an energy crisis caused by extreme weather conditions or an energy supply shortage.
- The elderly and persons with disabilities component protects vulnerable households from fluctuations in energy costs by paying up to four of the highest bills during the year.

CEAP providers are expected to create partnerships with programs within and outside their agencies and with private entities. The program also requires that providers refer CEAP clients to the Department's Weatherization Assistance Program. Because CEAP is designed to help clients achieve energy self-sufficiency, it encourages the consumer to control future energy costs without having to rely on other government programs for energy assistance.

Projected Comprehensive Energy Assistance Program funding for FY 2004: $28,320,465.

For more information, contact Peggy Colvin, Energy Assistance Section, at (512) 475-3864.

WEATHERIZATION ASSISTANCE PROGRAM

The Weatherization Assistance Program (WAP) is funded through the US Department of Energy Weatherization Assistance Program for Low Income Persons grant and the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) grant. WAP offers grants to community action agencies, nonprofits, and local units of government with targeted beneficiaries being households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly, disabled, families with young children, and households with the highest energy costs or needs in relation to income (highest home energy burden). Local providers must implement special outreach efforts to reach these priority populations. Applicants who have special needs receive additional points in the application process. To help consumers control energy costs, WAP funds the installation of weatherization measures and provides energy conservation education. In addition to meeting the income-eligibility criteria, the weatherization measures to be installed must meet specific energy-savings goals.

The Department of Energy allows up to 15 percent of the funds for administration. The Department of Health and Human Services LIHEAP grant allows 10 percent for administration. The remaining funds are used for direct client services.

Partnerships between the Weatherization Assistance Program and the Southwestern Electric Power Company, the Southwestern Public Service Company, Entergy, El Paso Electric, and the Brazos Electric Cooperative provide energy conservation measures to very low and extremely low income utility customers. These partnerships increase the total number of low income households receiving weatherization services and provide consumers the opportunity to receive more comprehensive energy-efficiency measures.

Projected Weatherization Assistance Program funding for FY 2004: $11,148,999.

For more information, contact Peggy Colvin, Energy Assistance Section, at (512) 475-3864.

Section 8 Program

The Section 8 Program receives funding from HUD and offers rental assistance subsidies to families and individuals, including the elderly and persons with disabilities, earning 50 percent or less of area median income. No less than 75 percent of new admissions to the tenant-based voucher assistance program must have incomes at or below 30 percent of the area median income. Qualified households are afforded the opportunity to select the best available housing through direct negotiations with landlords to ensure accommodations that meet their needs. The statewide program is designed specifically for needy families in small cities and rural communities not served by similar local or regional programs.
TDHCA contracts with community action agencies, public housing authorities, and local governments to administer the program in their jurisdictions. This partnership has increased program efficiency.

Projected Section 8 Program funding for FY 2004: $11,119,039.

For more information, contact Willie Faye Hurd, Community Services Section, at (512) 475-3892.

Emergency Shelter Grants Program

The Emergency Shelter Grants Program (ESGP) receives funding from the US Department of Housing and Urban Development and awards grants to units of local government and private nonprofit entities that provide shelter and related services to homeless persons and/or intervention services to persons threatened with homelessness. Activities eligible for ESGP funding include the rehabilitation or conversion of buildings for use as emergency shelters for the homeless and the provision of essential services, including benefits paid on behalf of clients to prevent homelessness. General operating expenses and certain administrative salaries are also eligible uses of ESGP funds. ESGP funds are awarded statewide through a competitive application basis.

TDHCA also participates in the Texas Interagency Council for the Homeless (TICH). TICH is charged with surveying and evaluating services for the homeless in Texas; assisting in the coordination and provision of services for homeless persons throughout the state; increasing the flow of information among separate service providers and appropriate authorities; developing guidelines to monitor services for the homeless; providing technical assistance to the housing finance divisions of TDHCA in order to assess housing needs for persons with special needs; establishing a central resource and information center for the state's homeless; and developing, in cooperation with the Department and the Health and Human Services Commission, a strategic plan to address the needs of the homeless.

The Department provided funds to the Texas Homeless Network (THN) to provide in-depth technical assistance on refining a collaborative network of local service providers, assessing the needs of the homeless population, and developing priorities for addressing those needs.

Projected Emergency Shelter Grants Program funding for FY 2004: $4,703,000.

For more information, contact Dyna C. Lang, Community Services Section, at (512) 475-3905.

COMMUNITY SERVICES BLOCK GRANT PROGRAM

The Community Services Block Grant Program (CSBG) receives funding from the US Department of Health and Human Services and offers grants to eligible entities. The targeted beneficiaries of the program are persons at or below federal poverty guidelines according to income level and household size. CSBG provides administrative support to a network of 49 local Community Action Agencies (CAAs) and other eligible entities that provide services to very low income persons. The funding assists in providing essential services including access to child care; health and human services for children, families, and the elderly; nutrition; transportation; job training and employment services; housing; substance abuse prevention; assistance to migrant workers; and other related services.

Five percent of the State's CSBG allocation may be used to fund activities that support the intent of the Community Services Block Grant Act, which may include providing training or technical assistance to eligible entities or short-term financial support for innovative projects that address the causes of poverty, promote client self-sufficiency, or promote community revitalization. These funds may also be used to support nonprofit organizations that assist low income Native Americans and migrant or seasonal farm workers. In addition, local contractors may use CSBG funds to assist homeless persons and other special needs populations. The Department also uses CSBG funds to support the activities of the Community Resource Coordination Groups (CRCG), which encourages multiagency involvement and resource coordination among local service providers.

Community Services Block Grant Program funding for FY 2004: $30,947,421.

For more information, contact Dyna C. Lang, Community Services Section, at (512) 475-3905.

COMMUNITY FOOD AND NUTRITION PROGRAM

The Community Food and Nutrition Program (CFNP) receives funding from the US Department of Health and Human Services and supports efforts to address hunger issues in low income neighborhoods on a statewide basis.

CFNP coordinates statewide efforts to address hunger and related issues by distributing surplus commodities and game donated by hunters. CFNP funds are also used to support the expansion of child-feeding programs and the creation of farmers markets designed to serve low income neighborhoods.

A total of 1.6 million pounds of food were donated through Share Our Surplus Service and Hunters for the Hungry in FY 2002. Donations through the Share Our Surplus program decreased dramatically in 2002 due to economic decline and drought experienced by produce growers in Texas.

Community Food and Nutrition Program funding for FY 2004: $346,017.

For more information, contact Dyna C. Lang, Community Services Section, at (512) 475-3905.

APPENDIX C

TSAHC PROGRAM DESCRIPTIONS

The following descriptions provide information on the programs offered through the Texas State Affordable Housing Corporation (TSAHC, the Corporation). For more information about TSAHC programs, please call (512) 477-3555 or 1-888-638-3555.

TEXAS PROFESSIONAL EDUCATORS HOME LOAN PROGRAM

The Texas Professional Educators Home Loan Program was established under Senate Bill 284 and allocates $25 million of the State's Ceiling for Private Activity Bond Cap for the exclusive purpose of making single family mortgage loans to Texas professional educators (individuals and families) that are first time homebuyers.

To be eligible for a mortgage loan through this program, a borrower must

- not have had an ownership interest in any principal residence during the last three years;
- be a professional educator as defined by Subchapter B, Chapter 21, of the Texas Education Code;
- reside in the state of Texas;
- meet the income and purchase price eligibility limits for the program;
- meet standard mortgage underwriting requirements that demonstrate credit worthiness;
- occupy the purchased home as his or her primary residence

The program will be available statewide on a first-come, first-served basis to first time homebuyers who wish to purchase a newly constructed or existing home. Eligible borrowers are able to apply for a 30-year fixed-rate mortgage loan, which will offer down payment and closing cost assistance. Interested individuals will need to contact a participating lender regarding the application process.

Funding for this program will be available on the first business day of January 2004, with an anticipated program release in early spring 2004. The interest rate and assistance percentage will be determined by current market rates at the time the program is made available.

TEXAS FIRE FIGHTER AND POLICE OFFICER HOME LOAN PROGRAM

The Texas Fire Fighter and Police Officer Home Loan Program was established under House Bill 1247 and allocates $25 million of the State's Ceiling for Private Activity Bond Cap for the exclusive purpose of making single family mortgage loans to Texas fire fighters & police officers (individuals and families) that are first time homebuyers.

To be eligible for a mortgage loan through this program, a borrower must

- not have had an ownership interest in any principal residence during the last three years;
- be a fire fighter or a police officer as defined by Section 143.003 of the Local Government Code;
- reside in the state of Texas;
- meet the income and purchase price eligibility limits for the program;
- meet standard mortgage underwriting requirements that demonstrate credit worthiness;
- must occupy the purchased home as his or her primary residence

The program will be available statewide on a first-come, first-served basis to first time homebuyers who wish to purchase a newly constructed or existing home. Eligible borrowers are able to apply for a 30-year fixed-rate mortgage loan, which will offer down payment and closing cost assistance. Interested individuals will need to contact a participating lender regarding the application process.

Funding for this program will be available on the first business day of January 2004, with an anticipated program release in early spring 2004. The interest rate and assistance percentage will be determined by current market rates at the time the program is made available.

Multifamily Direct Lending Program

The Corporation's Multifamily Direct Lending Program provides permanent financing for the purpose of increasing and preserving the stock of affordable multifamily housing units throughout the state of Texas.

The Corporation's ability to offer permanent financing is facilitated through existing relationships with real estate investment companies that invest in affordable multifamily housing. The Community Development Trust in New York and the Federal Home Loan Bank of Dallas are the Corporation's principal partners in this program.

To date, the Corporation has provided permanent financing for developments in Wichita Falls, Big Spring, Brady, and Stephenville. The Corporation will continue to focus this program on serving rural and under-served markets.

501(c)(3) Multifamily Bond Program

The Corporation's 501(c)(3) Multifamily Bond Program is utilized for the acquisition/rehabilitation or new construction of affordable multifamily housing units. In 2001 and 2002, the Corporation provided $487 million in financing for the preservation or creation of 7,700 units of affordable housing in the state of Texas. These affordable units are targeted primarily at moderately low income individuals.

TSAHC will continue to focus this program on serving the "moderate income" housing need.

2004 Multifamily Private Activity Bond Program

The State of Texas has made approximately $35 million in Private Activity Bond (PAB) financing available to the Corporation, effective January 2004. PAB financing will be utilized for the acquisition/rehabilitation or new construction of affordable multifamily housing units in underserved areas of the state.

The Corporation's Board of Directors will designate certain geographic areas (e.g., cities, metropolitan statistical areas, counties, etc.) as targeted areas within the state. The Board will attempt to give priority for target area designation to regions where PAB financing has traditionally not been awarded (underserved areas).

APPENDIX D

GLOSSARY OF SELECTED TERMS

Accessible: A definition used by HUD in Section 504 with respect to the design, construction, or alteration of an individual dwelling unit. It means that the unit is located on an accessible route and when designed, constructed, altered, or adapted, it can be approached, entered, and used by individuals with physical disabilities. A unit that is on an accessible route and is adaptable and otherwise in compliance with the standards set forth in the Uniform Federal Accessibility Standards (UFAS, 23 CFR Subpart 40 for residential structures) is considered accessible. When a unit in an existing facility that is being made accessible as a result of alterations intended for use by a specific qualified person with a disability, the unit will be deemed accessible if it meets the requirements of applicable standards that address the particular disability or impairment of such person.

Accessible route: Unobstructed path that connects accessible elements and spaces in a building or facility and complies with the space and reach requirements prescribed by the Uniform Federal Accessibility Standards (UFAS). An accessible route that serves only accessible units occupied by persons with hearing or vision impairments need not comply with those requirements intended to affect accessibility for persons with mobility requirements.

Acquisition: Acquisition of standard housing (at a minimum, meeting HUD Section 8 Housing Quality Standards) only with no expectation of other activities being carried out in conjunction with the acquisition.

Adaptability: A definition used by HUD in Section 504 meaning the ability of certain elements of a dwelling unit (such as kitchen counters, sinks, and grab bars) to be added to, raised, lowered, or otherwise altered, to accommodate the needs of persons with or without disability or to accommodate the needs of persons with different degrees of disability.

Administrative Costs Reasonable and necessary costs, as described in OMB Circular A-87, incurred by the participating jurisdiction in carrying out its eligible program activities in accordance with prescribed regulations. Administrative costs include any project delivery costs, such as new construction and rehabilitation counseling, preparing work specifications, loan processing, inspections, and other entities applying for or receiving HOME funds. Administrative costs do not include eligible project-related costs that are incurred by and charged to project owners.

Affordable Housing: Housing where the occupant is paying no more than 30 percent of his/her gross monthly income for gross housing costs, including utility costs. Housing that is for purchase (with or without rehabilitation) qualifies as affordable housing if it (1) is purchased by a low income, first-time home buyer who will make the housing his or her principal residence; and (2) has a sale price that does not exceed the mortgage limit for type of single family housing for the area under HUD's single family insuring authority under the National Housing Act.

Area Median Family Income (AMFI): Income limits for MSAs and counties that are based on HUD's estimates of the area's median income adjusted for family size. Calculated yearly by HUD and used to determine an applicant's eligibility with regard to HUD programs.

Assisted Household or Person:	For the purpose of identification of goals, an assisted household or person is one in which, during the periods covered by the annual plan, will receive benefits through the investment of federal funds, either alone or in conjunction with the investment of other public or private funds. A renter is benefited if the household or person takes occupancy of affordable housing that is newly acquired (standard housing) or new rehabilitation is completed. A first-time home buyer is benefited if a home is purchased during the year. A homeless person is benefited if the person becomes an occupant of transitional or permanent housing. A non-homeless person with special needs is considered as being benefited if the provision of supportive services is linked to the acquisition, rehabilitation, or new construction of a housing unit and/or the provision of rental assistance during the year.
Capacity Building:	Educational and organizational support assistance to promote the ability of an organizations to maintain, rehabilitate, and construct housing for low and very low income persons and families. This activity may include, but is not limited to: 1) Organizational support to cover expenses for training, technical, and other assistance to the board of directors, staff, and members of the organization, 2) Program support including technical assistance and training related to housing development, housing management, or other subjects related to the provision of housing or housing services, and 3) Studies and analyses of housing needs.
Community Housing Development Organization (CHDO):	A nonprofit organization, certified by a city or the state, that provides decent, affordable housing to low income individuals within a designated geographic area.
Colonia:	An identifiable unincorporated area located within 150 miles of the Texas-Mexico border that lacks infrastructure and decent housing.
Consolidated Plan:	A document submitted to the US Department of Housing and Urban Development (HUD) containing housing needs assessments and strategic plans for the state. It is required of the State of Texas by HUD in order to receive federal CDBG, HOME, ESGP, and HOPWA program funds.
Contract for Deed:	A financing arrangement for the sale of property whereby land ownership remains with the seller until the total purchase price is paid.
Disability:	According to the US Department of Housing and Urban Development, a person shall be considered to have a disability if the person is determined to have a physical, mental, or emotional impairment that: (1) is expected to be of long-continued and indefinite duration, (2) substantially impeded his or her ability to live independently, and (3) is of such a nature that the ability could be improved by more suitable housing conditions. A person shall also be considered to have a disability or he or she has a developmental disability as defined in the Developmental Disabilities Assistance and Bill of Rights Act (42 USC. 6001-6006). The term also includes the surviving member(s) or any household described in the first sentence of this paragraph who is (were) living in an assisted unit with the disabled member of the household at the time of his or her death. Disabilities reflect the consequences of a bodily impairment in terms of functional performance. Also see “Person with Disability.”
Disabled Household:	A household composed of one or more persons at least one of whom is an adult (a person of at least 18 years of age) who has a disability.

Economic Independence and Self-Sufficiency Programs: Programs undertaken by public housing agencies (PHAs) to promote economic independence and self-sufficiency for participating families. Such programs may include Project Self-sufficiency and Operation Bootstrap programs that originated under earlier Section 8 initiatives, as well as the Family Self-Sufficiency program. In addition, PHAs may operate locally developed programs or special projects designed to promote economic independence and self-sufficiency.

Elderly Household: According to HUD, a family in which the head of the household or a spouse is at least 62 years of age, by HUD's definition. This definition may change according to specific program.

Extremely Low Income: Individual of family with a household income less than or equal to 30 percent of the area median family income (AMFI)

Fair Housing Act Prohibits discrimination in housing because of race, national origin, religion, sex, familial status, or disability.

Federal Preference for Admission: The preference given to otherwise eligible applicants under HUD's rental assistance programs who, at the time they seek housing assistance, are involuntarily displaced, living in substandard housing, or paying more than 50 percent of family income for rent.

First Time Home Buyer: An individual or family who has not owned a home during the three-year period preceding the HUD-assisted purchase of a home that must be used as the principal residence of the homebuyer.

Frail Elderly Persons: Includes elderly persons who are unable to perform one or more Activities of Daily Living (ADL) without help.

Household: One or more persons occupying a housing unit (US Census definition).

Housing Development Costs: The total of all costs incurred in financing, creating, or purchasing any housing development, which are approved by the department as reasonable and necessary. The costs may include, but are not limited to, the value of land and any buildings on the land, cost of land acquisition, options, deposits, or contracts to purchase; cost of site preparation demolition and development; fee paid or payable in connection with the planning, execution, and financing of the development, such as those to architects, engineers, attorneys, accountants; cost of necessary studies, surveys, plans, permits, insurance, interest, financing, tax and assessment costs, and other operating and carrying costs during construction; cost of construction, rehabilitation, reconstruction, fixtures, furnishings, equipment, machines, and apparatus related to the real property; cost of land improvements, including without limitation, landscaping and off-site improvements; necessary expenses in connection with initial occupancy of the housing development; an allowance established by the Department for contingency reserves; and the cost of the other items, including tenant relocation, if tenant relocation costs are not otherwise being provided for, as determined by the department to be reasonable and necessary for the development of the housing development, less any and all net rents and other net revenues received from the operation of the real and personal property on the development site during construction.

Housing Development or Housing Project: Any real or personal property, project, building structure, or facilities work or undertaking, whether existing, new construction, remodeling, improvement, or rehabilitation, that meets or is designed to meet minimum property standards consistent with those prescribed in the federal HOME Program for the primary purpose of providing sanitary, decent, and safe dwelling accommodations for rent, lease, use, or purchase by persons and families of low and very low income and persons with special needs. This term may include buildings, structure, land, equipment, facilities, or other real or personal properties that are necessary, convenient, or desirable appurtenances, such as but not limited to streets, water, sewers, utilities, parks, site preparation, landscaping, stores, offices, and other non-housing facilities, such as administrative, community, and recreational facilities the Department determines to be necessary, convenient, or desirable appurtenances.

Housing Problems: Households with housing problems include those that: (1) occupy units with physical defects; (2) meet the definition of overcrowded; or (3) meet the definition of cost burdened (>30 percent of income spent on housing).

Jurisdiction: A unit of state or local government

Local Government: A county; an incorporated municipality; a special district; any other legally constituted political subdivision of the State; a public, nonprofit housing finance corporation created under Chapter 394, Local Government code Texas revised Civil Statues; or a combination of any of the entities described here.

Low Income Neighborhood: A neighborhood that has at least 51 percent of its households at or below 80 percent of AMFI.

Low Income: Household with an annual income that does not exceed 80 percent of the area median family income for the area. HUD may establish income ceilings higher or lower than the 80 percent figure on the basis of HUD's findings that such variations are necessary because of prevailing levels of construction costs or fair market rents or unusually high or low family incomes.

Metropolitan Statistical Area (MSA): US Census term used to identify a metropolitan area, which is a large population nucleus, together with adjacent communities having a high degree of social and economic integration with that core. Also described as an "urbanized area" of at least 50,000 inhabitants and/or a total metropolitan population of 100,000.

Migrant Farmworkers: Persons who travel from place to place in order to take advantage of work opportunities provided by various agricultural seasons across the country.

Moderate Income: Households whose incomes are between 81 percent and 115 percent of the median income for the area, as determined by HUD, with adjustments for smaller or larger families, except that HUD may establish income ceilings higher or lower than 95 percent of the prevailing levels of construction costs or fair market rents, or unusually high of low family incomes. May differ by program.

Neighborhood: A geographic location designated in comprehensive plans, ordinances, or other local documents as a neighborhood, village, or similar geographical designation that is within the boundary but does not encompass the entire area of a unit of general local government. If the general local government has a population under 25,000, the neighborhood may, but need not, encompass the entire area of a unit of general local government.

Nonprofit Organization:	A nonprofit corporation is created by filing articles of incorporation with the Secretary of State in accordance with the Texas Non-Profit Corporation Act. "Non-profit corporation" means a corporation in which no part of the earned income is distributable to members, directors, or officers. A nonprofit corporation may be created for any lawful purposes and are entitled to exemption from state or federal taxes.
***Olmstead*:**	The US Supreme Court in *Olmstead v. L. C.* held that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the ADA.
Overcrowded:	A housing unit containing more than one person per room. (US Census definition)
Participating Jurisdiction (PJ):	Term for any state or local government that has been designated by HUD to receive HOME Program funds.
Person with Disability:	(1) A person is considered to have a disability if the person has a physical, mental, or emotional impairment that (i) is expected to be of long-continued and indefinite duration; (ii) substantially impedes his or her ability to live independently; and (iii) is of such a nature that such ability could be improved by more suitable housing conditions. (2) A person will also be considered to have a disability if he or she has a developmental disability, which is a severe, chronic disability that (i) is attributable to a mental or physical impairment or combination of mental and physical impairments; (ii) is manifested before the person attains age twenty-two; (iii) is likely to continue indefinitely; (iv) results in substantial functional limitations in three or more of the following areas of major life activity; self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, and economic self-sufficiency, and (v) reflects the person's need for a combination and sequence of special interdisciplinary, or generic care, treatment, or other services that are lifelong or extended duration and are individually planned and coordinated.
Physical Defects:	A housing unit lacking complete kitchen or bathroom facilities (US Census definition).
Poverty:	Term to describe the poor. The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor or in poverty. Varies by year.
Predevelopment Costs:	Costs related to a specific eligible housing project including: a) expenses necessary to determine project feasibility (including costs of an initial feasibility study), consulting fees, costs of preliminary financial applications, legal fees, architectural fees, engineering fees, engagement of a development team, site control, and title clearance; and b) reconstruction housing project costs that the board determines to be customary and reasonable, including but not limited to the costs of obtaining firm construction loan commitments, architectural plans and specifications, zoning approvals, engineering studies, and legal fees. Predevelopment costs <u>does not</u> include general operational or administrative costs.
Primary Housing Activity:	A means of providing or producing affordable housing - such as rental assistance, production, rehabilitation, or acquisition - that will be allocated significant resources and/or pursued intensively for addressing a particular housing need. (See also, "Secondary Housing Activity.")

Project: A site or an entire building, including a manufactured housing unit or two or more buildings together with the site or sites on which the building or buildings is located, that are under common ownership, management, and financing (i.e., a project assisted with HOME funds, under a commitment by the owner, as a single undertaking). Project includes all the activities associated with the site and building. If there is more than one site associated with a project, the sites must be within a four-block area.

Project Completion: All necessary title transfer requirements and construction work have been performed and the project, in HUD's judgment, complies with specified requirements (including the property standards adopted under HOME 92.251); the final drawdown has been disbursed for the project; and a project completion report has been submitted and processed in the Cash and Management Information System (92.501) as prescribed by HUD. For tenant-based rental assistance, the final drawdown has been disbursed for the project and the final payment certification has been submitted and processed in the Cash and Management Information System (92.502) as prescribed by HUD.

Project-Based Rental Assistance: Rental Assistance provided for a project, not for a specific tenant. Tenants receiving project-based rental assistance give up the right to that assistance upon moving from the project.

Public Housing: Any state, county, municipality, or other government entity or public body (or its agency or instrumentality) that is authorized to engage in or assist in the development or operation of low income housing. The term includes any Indian Housing Authority.

Qualified Allocation Plan: The Qualified Allocation Plan is utilized by the Low Income Housing Tax Credit Program in setting threshold and selection criteria points for the allocation of tax credits.

Real Property: All land, including improvements and fixtures and property of any nature appurtenant, or used in connection therewith, and every estate, interest, and right legal or equitable therein, including leasehold interests, terms for years, and liens by way of judgment, mortgage or otherwise.

Reconstruction: HUD guidelines regarding reconstruction are as follows: *The regulation defines reconstruction as the rebuilding of housing on the same foundation. Therefore, the foundation must be used, if possible. If the building has no foundation or if it is not possible to rebuild on the foundation, then the "foundation" will be the same location as the building that is being reconstructed. Construction of housing on a different portion of the land parcel would be new construction. The reconstructed housing must be substantially similar to the structure that is being replaced, regardless of whether an existing foundation is used (i.e. a single family house must be replaced with a structure containing the same number of units). Rooms may be added to a building outside of the foundation or footprint of the original housing if needed to meet local codes. However, additional units cannot be constructed as part of a reconstruction project. A structure must be present prior to reconstruction. This structure should be documented by pictures and an explanation of why rehabilitation of the existing structure is not feasible.*

Rental Assistance: Rental assistance payments provided as either project-based rental assistance or tenant-based rental assistance.

Rental Housing (Affordable):	A rental housing unit is considered to be an affordable housing unit if it is occupied by a low income family or individual and bears a rent that is the lesser of (1) the Existing Section 8 Fair Market Rent (FMR) for comparable units in the area; or (2) 30 percent of the adjusted income of a family whose income equals 65 percent of the median income for the area, except that HUD may establish income ceilings higher or lower than 65 percent of the median because of prevailing levels of construction costs or fair market rents, or usually high or low family incomes.
Rural Area:	Rural areas are considered areas outside of Metropolitan Statistical Areas. Definition may differ according to program.
Service Needs:	The particular services identified for special needs populations, which may include transportation, personal care, housekeeping, counseling, meals, case management, personal emergency response, and other services to prevent premature institutionalization and assist individuals to continue living independently.
Severe Cost Burden:	Refers to households and individuals who spend more than 50 percent of their gross income on housing costs.
Sheltered:	Families and persons whose primary nighttime residence is a supervised, publicly or privately operated shelter, including emergency shelters, transitional housing for the homeless, domestic violence shelters, residential shelters for runaway and homeless youth, and any hotel/motel/apartment voucher arrangement paid because the person is homeless. This term does not include persons living in overcrowded or substandard conventional housing. Any facility offering permanent housing is not a shelter, nor are its residents homeless.
Special Needs Populations	Populations with special needs, as defined by HUD, include persons with alcohol and/ or drug addictions, colonia residents, persons with disabilities, victims of domestic violence, elderly persons, persons with HIV/AIDS, homeless populations, and migrant farmworkers.
State Recipient:	A unit of local government designated by a state to receive HOME funds from the state in which to carry out HOME Program activities.
Subrecipient:	A public agency or nonprofit organization selected by the participating jurisdiction's HOME program. A public agency or nonprofit organization that receives HOME funds solely as a developer or owner of housing is not a sub-recipient. The participating jurisdiction's selection of a sub-recipient is not subject to the procurement procedures and requirements.
Substandard Condition but Suitable for Rehabilitation:	By local definition, dwelling units that do not meet standard conditions but are both financially and structurally feasible for rehabilitation. This does not include units that require only cosmetic work, correction or minor livability problems, or maintenance work. The jurisdiction must define this term (i.e., standard condition, financially and structurally feasible for rehab) and include this definition in the Appendix (Glossary of Terms) portion of its CHAS submission.
Substantial Rehabilitation:	Rehabilitation of residential property at an average cost for the project in excess of $25,000 per dwelling unit.
Supportive Housing:	Housing, including housing units and group quarters, that has a supportive environment and includes a planned service component.

Supportive Services: Services provided to residents of supportive housing for the purpose of facilitating the independence of residents. Some examples are case management, medical or psychological counseling and supervision, child care, transportation, and job training.

Tenant-Based Rental Assistance: A form of rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. The assistance is provided for the tenant, not for the project.

Threshold Criteria: To be considered for funding, a housing project must first demonstrate that it meets all the threshold criteria set forth as follows: a) the project is consistent with the requirements established in this rule; b) the applicant provides evidence of their ability to carry out the project in the areas of financing, acquiring, rehabilitating, developing, or managing affordable housing developments; and c) the project addresses an identified housing need. This assessment will be based on statistical data, surveys, or other indicators of needs as appropriate.

Total Bonded Indebtedness: All single family mortgage revenue bonds (including collateralized mortgage obligations), multifamily mortgage revenue bonds, and other debt obligations issued or assumed by the Department and outstanding as of August thirty-one of the year of calculation, excluding; all such bonds rated AAA by Moody's Investors Service or AAA by Standard & Poors Corporation for which the Department has no direct or indirect financial liability form the Department's unencumbered fund balances, and all other such bonds, whether rated or unrated, for which the Department has no direct or indirect financial liability from the Departments unencumbered fund balances, unless Moody's' or Standard & Poors has advised the Department in writing that all or portion of the bonds excluded by this clause should be included in a determination of total bonded indebtedness.

Unencumbered Fund Balances: A) The sum of the balances resulting at the end of each Department fiscal year form deducting the sum of bond indenture and credit rating restrictions and liabilities for the sum of amounts on deposit in indenture funds and other tangible and intangible assets of each department housing bond program, and b) uncommitted amounts of deposit in each independent or separate unrestricted fund established by the housing finance division or its administrative component units.

Very Low Income: Households whose incomes do not exceed 50 percent of the median area income for the area, as determined by HUD, with adjustments for smaller and larger families and for areas with unusually high or low incomes or where needed because of prevailing levels of construction costs or fair market rents. Definition may differ according to program; the State of Texas designates very-low income as 60 percent or less AMFI.

Work Disability: A condition that prevents a person from working or limits a person's ability to work.

APPENDIX E

SUMMARY OF PUBLIC COMMENT

The comments summarized below were received during the 13 consolidated public hearings or submitted in writing directly to the Department. They cover general programmatic issues that are directly related to the Plan. Please refer to the November 14, 2003, Board book, available from TDHCA's website at http://www.tdhca.state.tx.us/au_boardcenter.htm, for comments received regarding program-specific rules.

COMMENTS REGARDING THE HOME PROGRAM

Comment: Development Funds

Establish scoring criteria and appropriate set-asides of funds within existing programs in order to partner with the other governmental entities who have the primary responsibility of providing this type of housing (migrant farmworker). Request for grants for smaller communities to build garden homes for the elderly. If the need is there, and in cities where you could only do three to five homes anyway because of the small amount they're asking for, such as 250, I think there needs to be another look at this.

- Department Response

  The Department believes that funding for smaller multifamily new construction should be made available to the rural areas. In response to public comment, the Department will allocate $3 million for new construction multifamily activities through the HOME Program.

Comment: Set-Aside Descriptions

Should include 15 percent as reserved for CHDOs that are acting in the role of owner, developer, or sponsor—and not as stated reserved for CHDOs for the development of housing-sponsored or owned by the organization.

- Department Response

  The Department will use the following wording to be consistent with HOME rules: *CHDO set-aside projects are owned, developed, or sponsored by the CHDO, and result in the development of rental units or homeownership. Development includes projects that have a construction component, either in the form of new construction or the rehabilitation of existing units.*

Comment: Set-Aside Descriptions

The Plan fails to specify anywhere the process of applying "through direct funding or loan guarantees," nor are these listed as part of the Description of Activities section. The Plan seems to indicate this is in addition to a CHDO being able to apply for Homebuyer Assistance.

- Department Response

  Per HOME rules, neither direct funding nor loan guarantees are eligible activities, therefore are not addressed in the Plan. No change proposed.

Comment: CHDO Operating Expenses

That 75 percent of the funds available (75 percent of $337,500) be available exclusively to CHDOs that are awarded HOME funds under the CHDO Set-Aside.

- **Department Response**
  Currently all CHDO Operating Funds are available exclusively to CHDOs that are awarded HOME funds under the CHDO Set-Aside. No change proposed.

Comment: CHDO Operating Expenses

Fifteen percent of the funding is set aside for CHDOs, as is required by federal law. However, the Department sets aside an additional $337,500 for CHDO Operating Expenses…not mandated by law. If the Department elected, it could include the CHDO operating expenses funds as part of the mandated 15 percent CHDO Set-Aside. The $337,500 could then be allocated to the preservation and rehabilitation of multifamily housing.

- **Department Response**
  The Department believes that unique needs of CHDOs justify the additional operating expenses. No change proposed.

Comment: CHDO Funds

Comments were received requesting that applicants be allowed to receive CHDO Operating Funds even if the applicant has not been awarded HOME awards for Development Activities.

- **Department Response**
  The Department does not currently have the procedures in place to allocate CHDO Operating Funds for those applicants that do not receive HOME awards for specific activities. The Department will do further research over the next year to determine requirements for such a program. No change proposed.

Comment: CHDO Administrative Expenses

Would suggest the CHDOs receiving funds under the Set-Aside as owner, sponsor, or developer, be automatically awarded not only the 4 percent for administrative costs, but also be allowed to apply for CHDO Operating Funds in a separate category from those CHDOs strictly applying for operating funds. In this way, you help pay for CHDOs that are already performing services.

- **Department Response**
  Currently, the Department awards 5 percent for administrative costs to CHDOs. The proposed Action Plan does not allocate CHDO Operating Funds for those applicants that do not receive HOME awards for specific activities. No change proposed.

Comment: CHDO General

The $500,000 per applicant cap for Homebuyer Assistance under the CHDO Set-Aside be raised to $1,000,000.

- **Department Response**
  CHDOs are eligible to receive up to a total of $1.5 million per award and are not subject to the $500,000 cap. No change proposed.

Comment: CHDO General

Allow a CHDO receiving an award above the $500,000 level an additional year to expend the funds.

- **Department Response**

The Department believes that 24 months is sufficient time to expend CHDO funds. No change proposed.

Comment: CHDO General

Allow a CHDO that has been certified and received HOME funds in the last three years to certify that "no material changes" have taken place that would affect the organization's CHDO qualifications, in lieu of having to resubmit all of the organization documents time after time.

- **Department Response**

  In an effort to fulfill HUD's on-going requirements related to the qualifications of CHDOs, the Department believes that it is appropriate to require full certification for each new application/award received for CHDO funds. No change proposed.

Comment: CHDO Funds

It is our view that HOME Program requirements that restrict the release of CHDO Operating Funds to certified CHDOs upon their certification creates a negative development environment for newly established organizations.

- **Department Response**

  HUD rules require that all organizations that receive CHDO funds be organized as a CHDO. No change proposed.

Comment: Capacity Building

Comment was received suggesting that the Department consider using HOME funds to establish a capacity building program. Comment encourages the Department to structure this program to target organizations that might reasonably be expected to develop as successful applicants for HOME Investment Partnerships Program funds.

- **Department Response**

  The Department realizes the need for capacity building assistance, especially for those nonprofits beginning efforts to supply affordable housing in their respective communities. Although no funding will be awarded for such a program in the proposed 2004 State of Texas Consolidated Plan: One-Year Action Plan, the Department is working diligently to establish the possibility of such a program in future funding years.

Comment: Administrative Funds

Comment urges the Department to closely observe the Set-Aside of Tenant-Based Rental Assistance for individuals affected by the *Olmstead* decision and other set-asides that benefit people with disabilities. It asked that the Department seek innovative processes that will broaden the scope of people with disabilities who will request access to assistance. It has been expressed that the funding involves a meager administrative fee, coupled with a reimbursement process. As a result, many community-based organizations cannot compete for contracts.

- Department Response

  It is the Department's desire to serve all citizens of Texas, including those of the disability population. The Department is awarding applications for Tenant-Based Rental Assistance for those persons affected by the *Olmstead* decision for the first time. Staff has worked closely with advocates of this population to ensure proper execution of this set-aside. Realizing the higher expenses incurred by taking on a program of this nature, the amount of administrative funds awarded was increased from 4 percent of the project request, to 6 percent of the project request. Staff will continue to carefully review and monitor this set-aside, however, and look for inadequacies and areas of possible improvement.

Comment: Rehabilitation Funds

The Department acknowledges that rehabilitation must be the primary eligible activity. However, in reviewing the Plan, it does not appear that rehabilitation constitutes a required component of 50 percent or more of the required funding.

It appears that only rental housing preservation and owner-occupied housing assistance have a required rehabilitation component. It is recommended that special needs housing and homebuyer assistance be revised to include a requirement that the funds be used for rehabilitation.

- Department Response

  The Department currently allocates (less set-asides) 45 percent of HOME funding towards Owner-Occupied Rehabilitation. In addition, $2 million is allocated specifically towards multifamily preservation, and preservation/rehabilitation activities may be undertaken through the CHDO set-aside—making rehabilitation the primary HOME-funded activity.

  The consolidated planning process is designed to give participating jurisdictions the flexibility to serve the specific needs of its constituency. Through an extensive citizen participation process, and taking into account various legislative requirements, the Department believes that the activity allocations are consistent with the needs of Texas's most vulnerable populations. No change proposed.

Comment: Tenant-Based Rental Assistance

The Department certifies that "the use of HOME funds for tenant-based assistance is an essential element of the State's Consolidated Plan." However, Section 21(a)(3) of the Cranston-Gonzalez National Affordable Housing Act states as follows:

> A participating jurisdiction may use funds provided under this subtitle for tenant-based rental assistance <u>only if</u>
> 1) the jurisdiction certifies that the use of funds under this subtitle for tenant-based rental assistance is an essential element of the jurisdiction's annual housing strategy for expanding the supply, affordability, and availability of decent, safe, sanitary, and affordable housing, and <u>specifies the local market conditions that lead to the choice of this option.</u>

...in 2003, the Department conducted a Community Needs Survey in the 13 service regions of the state requesting the local need to choose between the type of multifamily assistance needed....in 10 of the regions, the need for multifamily rental assistance program was the lowest priority. Without discarding the

Community Needs Surveys, the Department would appear to be without support for having a TBRA program.

- **Department Response**

  Per §91.305 (b)(1) of the statute governing the consolidated planning process, the Department outlined the specific need for rental assistance in the 2001–2004 Consolidated Plan—refer to the Housing and Homeless Needs Assessment. Pages 12–36 outline the specific Census demographic support for the activities undertaken by the Department. Pages 37–57 outline the specific needs of special needs populations that further support the need for rental assistance.

  With regard to the Community Needs Survey, it is important to note that the surveys are one of many avenues utilized by the Department to gather data/information to be used towards making HOME allocation decisions. The survey is representative of local desires and does not necessarily give an accurate assessment of need. With this in mind, the Department also analyzes Census data, as well as data from other State agencies and research institutions in determining need. No change proposed.

  Note that at 20 percent, rental assistance is the lowest percentage allocated to the major HOME activities (45 percent for Owner Occupied and 35 percent for Homebuyer Assistance).

Comment: 5 Percent Disability Set-Aside

Under State law, at least 95 percent of the HOME funding must be set aside for non–participating jurisdictions, which are basically rural areas of the state. State law then states that if the funds are not allocated to non–participating jurisdictions, then the funds may be used on housing for persons with disabilities. It is recommended that the Department set aside 100 percent of its funds for non–participating jurisdictions…be available for rural disability housing as a matter of first priority. In the event that sufficient applications for the housing for persons with disabilities in rural areas were submitted, then the funding would shift to rental housing preservation.

- **Department Response**

  §2306.111(c) of the Texas Government Code reads:

  > the department shall expend at least 95 percent of these funds for the benefit of non-participating small cities and rural areas that do not qualify to receive funds under the Cranston-Gonzalez National Affordable Housing Act directly from the United States Department of Housing and Urban Development. **All funds not set aside under this subsection shall be used for the benefit of persons with disabilities who live in areas other than small cities and rural areas.**

  It specifically states that all funds not set aside under this section shall be used for the benefit of persons with disabilities who live in areas other than nonparticipating areas. The Department believes that it is currently in compliance with the language of the statute. Additionally, it has been shown that much of the disabled population and those services necessary to aid this population are located in the areas with participating jurisdiction status. No change proposed.

Comment: Contract for Deed Conversions

The Department has set aside $2 million for Contract for Deed conversions. It appears that the Office of Rural Community Affairs and/or the Office of Colonia Initiatives has primary responsibility for colonias. It is recommended that the $2 million be funded from the CDBG program. While the Department's appropriation bill does direct that funds for the CFD program and Colonia Model Subdivision program be spent by the Department, the funds for these programs would be more properly funded by CDBG funds.

- Department Response

  As stated by the commenter, the Department is legislatively required to fund both the Contract for Deed Conversion and Colonia Model Subdivision programs. No change proposed.

Comment: HOME Program Funding

It is further recommended that the Homebuyer Assistance and Owner-Occupied Housing Assistance programs be combined into one program that requires a rehabilitation component and excludes down payment and closing cost assistance as an eligible activity.

- Department Response

  The Department believes that Census data and public comment support the need for both activities. No change proposed.

Comment: Rental Housing Preservation

The funding of Rental Housing Preservation should be increased from $2 million to $10 million per year.

- Department Response

  Preservation funds are currently available through other Department housing programs including the Junior Lien Bond Proceeds, Multifamily Bond, Housing Tax Credit, and Housing Trust Fund. The Department believes it is important to support additional avenues of affordable housing available through HOME Program funds. No change proposed.

Comment: Definition

In reviewing the Plan, we note that the definition of "persons with disabilities" is different from definitions found in other TDHCA documents.

- Department Response

  The Department will review and make changes as appropriate.

Comment: Integrated Housing Policy

There should be a requirement that all applicants follow the Department's Integrated Housing Policy.

- Department Response

  The Department's Integrated Housing Policy was adopted by the TDHCA Board as a rule in November of 2003. All Department housing programs must adhere to the new rule.

Comment: Compliance Monitoring

There is no mention of inspectors assuring that accessibility requirements are met and that the Department's Integrated Housing Policy is followed.

- Department Response

  Per TDHCA policy, monitoring will ensure that all applicants comply with Department rules.

Comment: Housing Costs

Unfortunately, with the HOME Program, there are differences in the cost of housing and how those projects are funded in a rural county because you have—in a larger community, you have more economy for scale. And what we get in HOME funds, unfortunately, does not go as far as that money might go in a larger community because it just costs more to do business. We don't have contractors that specialize in doing a lot of new construction.

- Department Response
  No response necessary.

Comment: Olmstead Funding

We appreciate the $4 million and the tenant-based rental assistance for the same kind of initiative that's for the next biennium.

- Department Response
  No response necessary.

Comment: Competitive Review

Support of an open CHDO funding cycle.

- Department Response
  No response necessary.

Comments Regarding the Emergency Shelter Grants Program

The Texas Department of Housing and Community Affairs sponsored a series of public hearings as a forum to receive public comment on the Department's proposed administration for several federally funded programs, including ESGP. Responses to ESGP administration have been summarized below.

Comment

Please consider stopping the double-dipping allowed by entitlement cities still being able to compete at the regional level. Two chances or two sources of funding is unfair to non-entitlement locations and lowers the amount of available funds in under-served areas.

- Department Response
  Statistics indicate concentrations of homeless individuals in large urban areas; therefore, the Department does not prohibit entitlement cities or private nonprofit organizations in those areas from applying for available ESGP funds. This does not reduce the funds reserved for each of the thirteen planning regions as per the ESGP formula. In addition, the Department awards bonus points to successful applications received from non-entitlement areas.

Comment

I feel that the need for housing for the homeless/needy people in America is great and need action on a continual basis. I feel that the grant application should be short and to the point and new programs should be highly considered for funding up on request because of the over-flowing need for shelter. There are too many laws within laws that zero out the main purpose of reviving the homeless as intended. Staff people are the key to making this program work to meet the clients needed as well as just having shelter.

- **Department Response**

  ESGP is a competitive grant and the Department is required to develop and consistently apply criteria by which to award funds. Each year the Department revises the ESGP application and sponsors a pre-application workshop in an attempt to clarify requirements and to assist eligible organizations (particularly new applicants) to submit responsive applications. The Department reviews and scores each application according to criteria based on the content of the application packet. In order to maintain a fair and equitable selection process, neither new applicants nor repeat applicants are favored.

Comment

More temporary shelter, rent assistance, and utility assistance are needed. Electricity has almost doubled in the last two years.

- **Department Response**

  ESGP funds are one of several funding sources that may be used for these purposes.

Comment

The program should continue as it is currently operated. More funds should be made available for the project awards.

- **Department Response**

  The Department awards to eligible applicants 95 percent of the annual ESGP funds awarded to the State of Texas. The remaining 5 percent is used to pay costs the State incurs to effectively administer ESGP.

Comment

The language used under the "Special Initiative" section sounds like TDHCA is trying to restrict the competition for providing statewide Technical Assistance to a pre-selected bidder, and hence eliminate competition. There are several well-qualified persons and organizations that could provide the service, including for-profit organizations and individuals. Why award only one Technical Assistance contract? Why only nonprofit providers?

- **Department Response**

  Eligible applicants for ESGP funds include units of general local government and private nonprofit organizations. Any entity that applies for the Special Initiative funding must be eligible to apply for ESGP funds. Individuals and for-profit organizations are not eligible to apply for or administer ESGP funds. Through the Special Initiative Project, the Department encourages the development of applications for other HUD funds targeted to assist homeless individuals, an effort that requires establishing effective local service coalitions. Stated requirements in the application parallel this narrow focus.

COMMENTS REGARDING THE REGIONAL ALLOCATION FORMULA

Comment

It was stated that the 2003 RAF is serving its intended purpose and it should not be changed other than to update the US Census data used in the formula as it becomes available.

- Department Response

  The part of the RAF that allocates available funding among the state service regions remains unchanged except for adding 2000 US Census data and updating the other available funding for 2003. (Additional HUD funding for public housing authorities was added to the other available funding data set. This addition of previously unavailable data is consistent with the intent of the RAF to consider as many sources of other affordable housing funding as possible.)

  The change to the formula, which divides the region's available funding into urban/exurban and rural funding pools, is in response to Senate Bill 264 of the 78th Legislature. The methodology used to distribute the funds to the urban/exurban and rural populations within the region is consistent with the method used to distribute the funds from the state level to the regional level. No change proposed.

Comment

Concern was voiced that rural areas are adversely impacted by the Regional Allocation Formula because much of the need is located in larger metropolitan areas. For example, it was stated that, "El Paso gets the bulk of the money, the way the allocation formula criteria are, because the formula is very heavily weighted on numbers of people…Well, unfortunately, in the rural communities or the frontier communities, we don't have big numbers. And so we automatically receive less funding consideration because we don't have…numbers to compete with larger communities."

- Department Response

  The current formula attempts to split the available funds between urban/exurban and rural areas based on quantifiable measures of need. In past allocation rounds, the determination of how much funding would be available to rural areas was either not specifically defined or was based on a statewide set aside of funds. The new formula provides rural areas in each region with a specifically designated pool of money for their use. This distribution is based on an estimate of what portion of the region's affordable housing need is located in "rural" areas.

  Under the Housing Trust Fund and Housing Tax Credit RAF formula, six regions have over 40 percent of the region's available funds earmarked for rural areas. Statewide, the distribution of funding is 77 percent urban/exurban and 23 percent rural (8 percent higher than the previous 15 percent rural set-aside). The HOME Program, which distributes 95 percent of its funds to non–participating jurisdictions, shows a 32 percent urban/exurban and 68 percent rural statewide distribution pattern. No change proposed.

Comment

A comment asked why some of the regions with larger metropolitan areas showed such substantial variances in the distribution of affordable housing need, other available funding, and the resulting distribution of funds between urban/exurban and rural areas. Specifically, the proposed RAF showed an 11 percent difference between the rural funding allocation for Region 3 (Dallas) and Region 6 (Houston).

- **Department Response**

  To address this concern the Department reevaluated the way the RAF calculates affordable housing need for the urban/exurban and rural areas. The 2004 methodology proposed for public comment assumed that all need outside of urban place boundaries (urban city boundaries) was rural. This assumption was problematic and contributed to an inaccurate distribution of urban/exurban and rural need.

  The most conspicuous example of the inaccurate distribution lies in the funding results for Uniform State Service Region 6, where the city of Houston is located. In Harris County over 680,000 people live in unincorporated areas just outside of the Houston city limits. Most of this unincorporated population lives in an area located northwest of the Houston city limits near the Sam Houston Tollway. This population should not be considered rural given the proximity to the city of Houston and a population density similar to that of Houston. In the 2004 methodology proposed for public comment, this population was considered rural, thereby inflating the region's rural funding distribution.

  To compound this issue, 93 percent of the other available funding the Housing Tax Credit and Housing Trust Fund RAF considers is place-specific. Because the estimate of urban/exurban and rural affordable housing need was not place-specific in the 2004 methodology proposed for public comment, even more of the urban/exurban allocation was adjusted to rural areas.

  With the desire to remain as consistent and accurate as possible, the Department modified the affordable housing need calculation in the Regional Allocation Formula to reflect place-level (city or town) information. This revised 2004 methodology utilizes the urban/exurban and rural place designations based on the Regional Allocation Formula's definition of urban/exurban and rural.

Comment:

It was stated that the RAF needs to consider other HUD tenant-based rental assistance funding available to PHAs if it is going to consider similar funding from USDA. If such data is not considered, then the funding available to urban/exurban and rural areas would be distorted.

- **Department Response**

  The Department agrees that including more sources of funds will provide a more accurate RAF model. TDHCA worked directly with HUD to obtain this information and it is included in the model.

Comment

It was suggested that USDA multifamily property transfer payments should not be included in the formula as they do not represent actual new available funding.

- **Department Response**

  The Department concurs. USDA multifamily transfer payment transactions were identified and were removed from the RAF.

Comment

It was recommended that the HOME RAF methodology should be refined to separate the other available sources of funding between homeownership/owner-occupied and multifamily activities. With the need for multifamily and single family activities being closely equal and over 80 percent of the other available funding being available for owner-occupied housing, it seems misdirected for TDHCA to use 80 percent of its HOME funds for owner-occupied housing.

- Department Response

  The RAF does not determine the percentage of HOME funds that will be used for a specific activity. As such, considering the single family funds separately from multifamily funds would have no impact on this issue. The Regional Allocation Formula distributes funds to regions with a consideration of how much money is available to the region from other sources for affordable housing activities. As the HOME Program serves both single family and multifamily activities, the Department will continue to consider single family and multifamily funds together. No change proposed.

Comment

It is recommended that the sources and uses of the other available funds be provided with the release of the Regional Allocation Formula so the public may provide a more informed response to the request for comment.

- Department Response

  The Department concurs. While this information is included in the Plan in which the RAF is published, this information will be provided in future write-ups describing the Regional Allocation Formula.

Comments Regarding the Affordable Housing Needs Score

Comment

A few comments suggested that more weight should be assigned to the poverty-related component of the AHNS—as the score does not give sufficient weight to factors that would provide housing assistance to those households with the "greatest housing need." The AHNS should give greater priority to geographic areas having families living at or below the poverty level and where there is either an insufficient supply of housing affordable to such families or the housing stock is unaffordable, inadequate, or substandard.

- Department Response

  Sixty-two percent of the total AHNS is based on US Census data. Persons living at or below the poverty level already represent half of these points. Persons experiencing housing cost burden and the combined measures of housing quality (overcrowding, incomplete plumbing, and incomplete kitchen facilities) each represent a third of the US Census data related points. It is thought that the weights assigned to each of the components in the proposed AHNS results in a balanced scoring model. No change is proposed.

Comment

Concern was voiced that the difference between the high and low scores in the proposed AHNS was too great for some areas to even bother applying. For example, it was stated that, "the affordable housing needs score is 20 points for Dallas, and the rest of the points going down to three and four points. It's just too dramatic a difference there. Also we found that there's no way to compensate for that point score differential, because the exurban proposal in the QAP limits the developer to 100 units. I found that extremely difficult to make work on expensive tracts, or more expensive tracts in the suburbs." This concern of the scoring differential between places was voiced for both urban and rural areas.

- Department Response
  The Department agrees that the originally proposed AHNS did not have a range of scores that allowed for equitable competition between a variety of places within each region. It had been intended that scoring items within the program rules would offset this potential scoring gap in the AHNS. However, from a practical standpoint, the originally proposed AHNS made it much harder to determine what places in a region would score competitively. The AHNS methodology was revised to provide a set of scores that allows competitive applications to be submitted for more places in a region.

Comment

Concern was voiced that cities with the highest scores were also the ones that have repeatedly received funding.

- Department Response
  The Department agreed with this suggestion and reinstated the five-point AHNS scoring bonus for cities that have not received an award of HOME, HTC, or HTF funding within the past two program allocations.

Comment

It was suggested that the type of population served by previous TDHCA funding awards should be considered when this data is used to adjust the AHNS. For example, while a community may have received prior funding commitments, these awards may not have specifically addressed the elderly or persons with disabilities.

- Department Response
  The previous-TDHCA-award scoring adjustment in the AHNS is designed to ensure that TDHCA's limited funds are distributed across a wide geographical area. For the purpose of the AHNS, it is the fact that a particular community received funds for affordable housing that another community did not have the opportunity to receive. The AHNS is not designed to determine what activities the funds should be used for or what demographic groups should be served. No change is proposed.

Comment

A suggestion was made that the AHNS should make a distinction between the need for elderly developments as opposed to family, or other categories.

- Department Response
  The AHNS is designed to encourage developers to submit applications that will serve parts of the region that show the highest level of affordable housing need. As such, it is a macro-level analysis of need. Due to the complexity of analyzing local markets, it is thought that the determination of what type of housing is needed locally is best left to market studies and input from the members of the community. No change is proposed.

Comment

It was suggested that overcrowding should not be considered in the AHNS scoring model for applicants applying in the HOME special needs set-aside. Special needs funding that serves the elderly will help households who are normally one or two persons. These households will typically not be affected by overcrowding. More emphasis could be placed on the need associated with incomplete kitchens and incomplete plumbing.

- Department Response

  The AHNS serves as a measure of the general need for affordable housing in an area. The factors used in the formula represent a broad segment of the population with affordable housing need as opposed to data that relates to specific population groups. The current formula places more emphasis on the measures that affect a larger portion of the population. Income and housing cost issues (as represented by poverty and housing cost burden data) are weighted much higher than the factors related to much smaller population groups (overcrowding, incomplete plumbing, and incomplete kitchen). No change is proposed.

Comment

It was suggested that TDHCA should consider including 2000 Census information on persons with disabilities in the Affordable Housing Need Score.

- Department Response

  The AHNS serves as a general assessment of affordable housing need which helps distribute funds within the state's service regions. Currently, the AHNS does not include data that could result in funding distribution preferences based on the demographic characteristics of specific subgroups of the population. The proposed AHNS methodology, which considers the region's income, cost of housing, and condition of housing, provides an accurate measure of the region's overall housing need. No change is proposed.

  Note that TDHCA is working in conjunction with Texas Council for Developmental Disabilities on a report to identify the housing needs of persons with disabilities in Texas. The 2000 US Census data on persons with disabilities will be a significant part of this report. It is possible that the AHNS may be modified for future funding allocations based on the findings of this report.

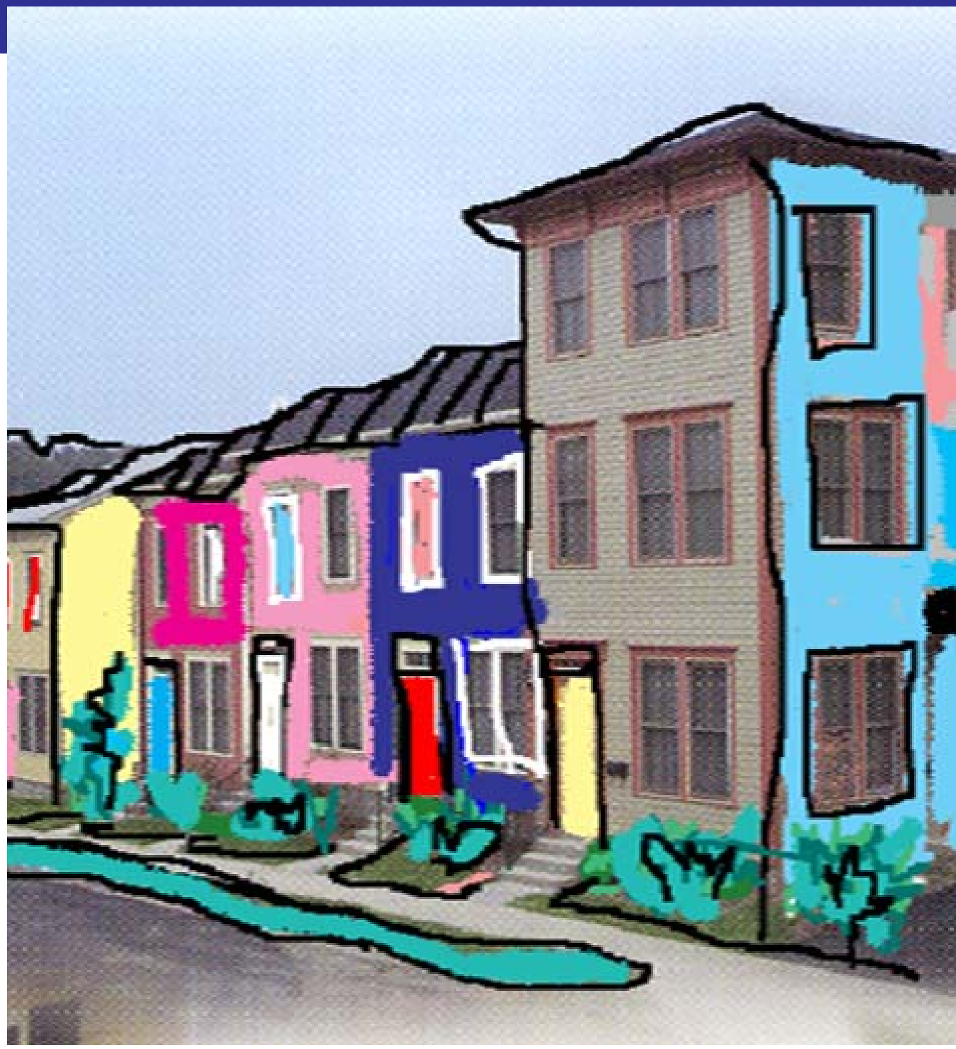
Comment

A number of comments stated that additional weight in the AHNS should be associated with an area's level of affordable housing need relative to the area's overall population. The proposed AHNS formula provides a scoring advantage to all places located in counties that have a higher percentage of the region's population. In the proposed AHNS, all communities in counties with larger metropolitan areas receive an insurmountable scoring edge over similarly sized communities in lower-population counties. One comment suggested that this problem could be addressed by having "factors that gave equal scoring consideration to the absolute number of households that appear within a particular needs category, as well as using a percentage of how those people make up the community as a whole."

- Department Response

  The Department concurs with this recommendation. The formula has been revised to provide a greater scoring variation for places throughout the region's counties. To accomplish this, the part of the score which compares an area's affordable housing need indicator (AHNI) data to the area's total population was changed to use place level data instead of county level data. Also, the relative weights associated with this factor and the factor that compares the county AHNI need to the region's AHNI need were equalized. The remaining points associated with the Community Need Survey responses were not changed.

January 2005



2005 State of Texas Low Income Housing Plan & Annual Report

Texas Department of Housing and Community Affairs

www.tdhca.state.tx.us

2005 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

TABLE OF CONTENTS

INTRODUCTION

TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS

The Texas Department of Housing and Community Affairs (TDHCA, the Department, or the Agency) is the State's lead agency responsible for affordable housing, in addition to its responsibility for the administration of community affairs and energy assistance programs and colonia activities.

AGENCY MISSION AND CHARGE

The Department's mission is to help Texans achieve an improved quality of life through the development of better communities. The Department accomplishes this mission through the administration of a variety of housing and community affairs programs. One function of the Department is to act as a conduit for federal grant funds for housing and community services. However, because several major housing programs require the participation of private investors and private lenders, the Agency also operates as a housing finance agency. As a consequence of these dual roles, the Department must balance public purpose with sound business principles.

The Department's charge is to serve the state's extremely low income to moderate income population. Funding priority is given to those populations most in need of services: extremely low, very low, and low income households and individuals.

The Department's services address a broad spectrum of housing and community affairs issues that include multifamily and single family development, low-interest mortgage financing, emergency food and shelter, rental subsidy, and energy assistance. The Department is viewed as a valuable financial and educational resource by individuals and communities attempting to deal with problems of housing, poverty, and energy assistance.

It is important to note that TDHCA is only one organization in a network of housing and community services providers located throughout the state. This document outlines only those programs within the jurisdiction of TDHCA, which are intended to either work in cooperation or as complements to the services provided by other organizations. A brief overview of other available providers follows, though a more detailed listing that includes contact information is available in TDHCA's *Program Guide*. The *Program Guide* is available on the Department's website (www.tdhca.state.tx.us) or can be ordered from the TDHCA Center for Housing Research, Planning, and Communications.

Participating jurisdictions (PJs) are state or local governments that have been designated by the US Department of Housing and Urban Development (HUD) to administer federal HOME Investment Partnerships Program funding in their respective areas. PJs are often urban areas and administer a variety of single family and multifamily housing programs. Many PJs also receive direct funding through the Community Development Block Grant Program and the Emergency Shelter Grants Program, which address community development and homelessness issues, respectively.

The Texas State Affordable Housing Corporation (TSAHC) and local housing finance corporations use mortgage revenue bonds to finance the development of affordable multifamily housing or offer homebuyer assistance programs.

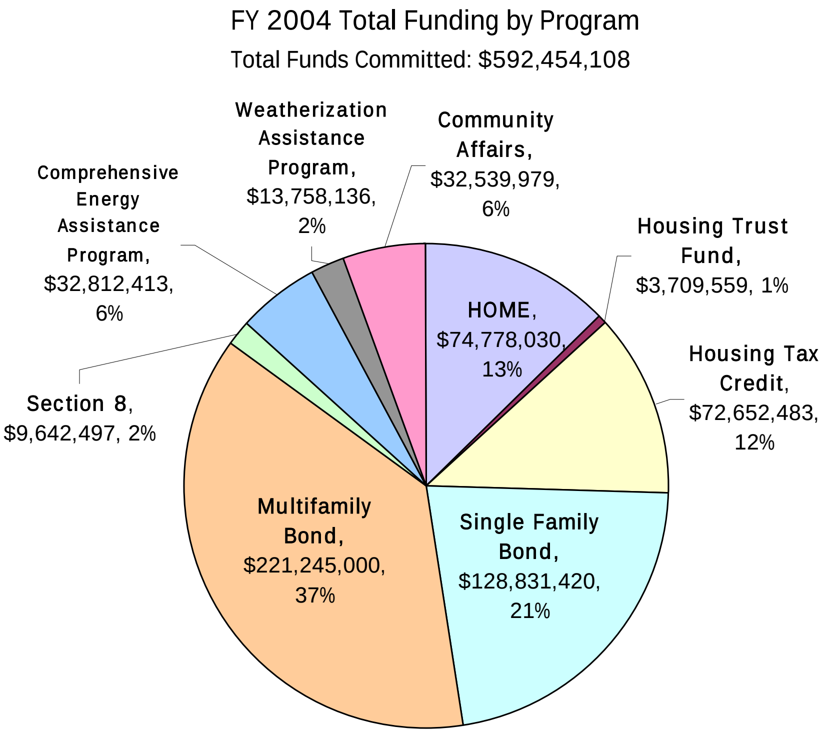
The US Department of Agriculture Rural Development Division addresses rural housing issues through the Rural Housing Service. Rural Development administers home purchase, home repair, rental assistance, rental housing development, and other community development programs in rural areas only.

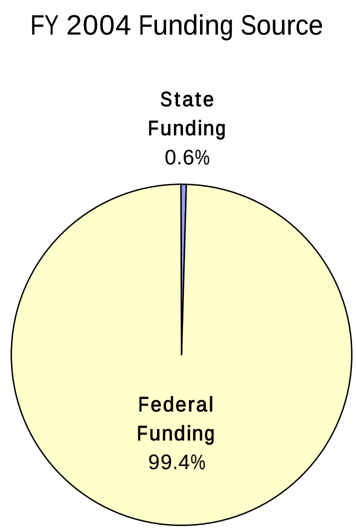
Public housing authorities (PHAs) are governmental entities whose responsibilities range from rental assistance, which includes project-based and portable voucher assistance, to operating and developing public housing units. Housing authorities maintain a designated service area and operate in all metropolitan areas and larger rural cities. TDHCA uses its Section 8 rental voucher allocation to assist individuals in areas that are not served by an existing PHA.

Community action agencies (CAAs) administer federal and state antipoverty programs and generally administer TDHCA's community affairs programs, which offer emergency assistance, utility assistance, and weatherization assistance. CAAs serve a designated multicounty area and together administer poverty-related programs statewide.

Various subpopulations are also served through designated entities. Individuals over the age of 60 may receive assistance through local area agencies on aging that are affiliated with the Texas Department of Aging and Disability Services. The Texas Department of Aging and Disability Services and the Texas Department of State Health Services administer supported housing and community care programs for persons with mental and physical disabilities and seniors. The US Department of Veterans Affairs and the Texas General Land Office administer housing programs for eligible veterans.

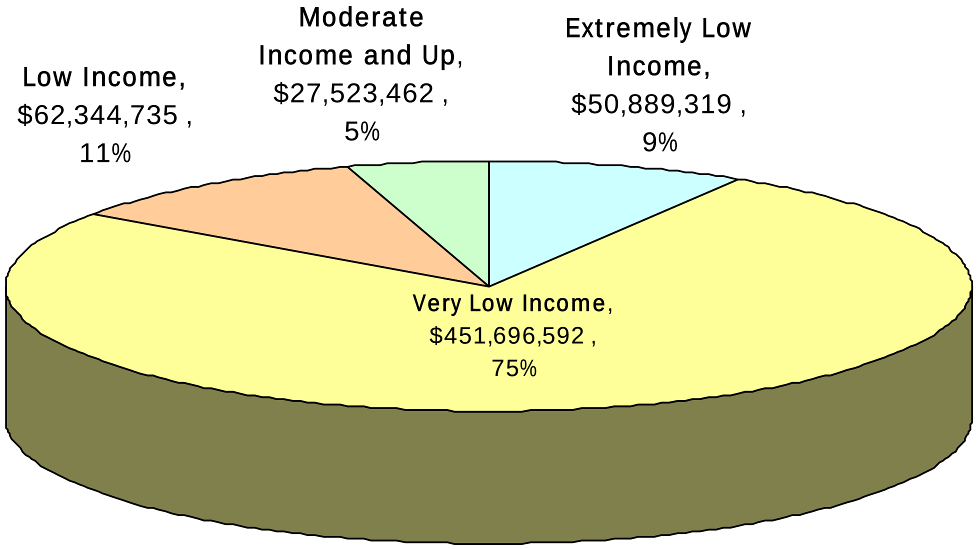
In fiscal year 2004, TDHCA received $597,280,636 in total funds and committed $592,454,108 to serving lower income Texans. Most of the funding originated from federal sources, 99.4 percent of the total. Approximately 0.6 percent of the total was State funding.





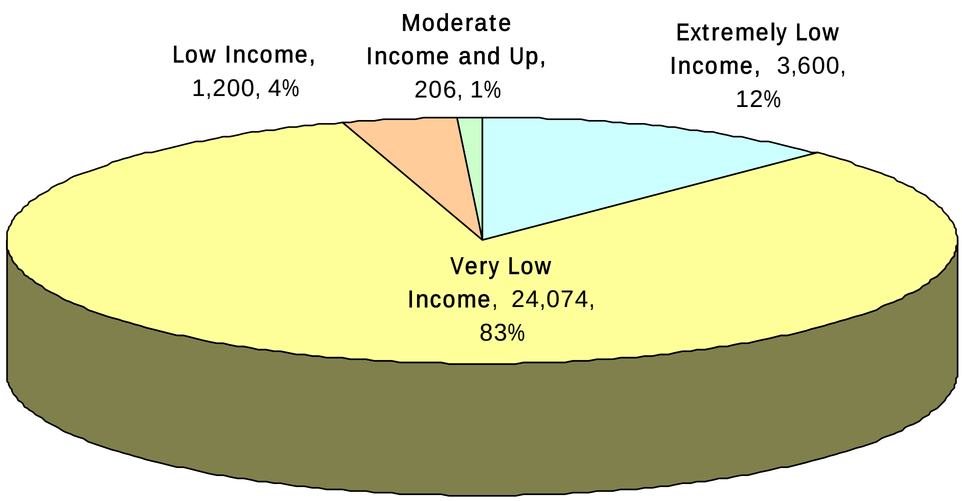
Total funds committed through all programs were delineated by extremely low income, very low income, low income, and moderate income groups.

FY 2004 Total Funding by Income Level
Total Funds Committed: $592,454,108



In 2004, TDHCA assisted 3,600 extremely low income, 20,074 very low income, 1,200 low income, and 206 moderate income households through housing programs. Community Affairs activities, which includes weatherization and utility assistance programs, assisted 498,670 very low income households and individuals.

FY 2004 Total Housing Assistance by Income Levels
Total Households Served: 29,080



Note: Extremely low income: 0% to 30%, very low income: 31% to 60%, low income: 61% to 80%, moderate income and up: >80%.

ADMINISTRATIVE STRUCTURE

Programs administered by TDHCA provide housing and housing-related services, including community services. Housing activities consist of homebuyer assistance which includes down payment and closing costs, the rehabilitation of single family and multifamily units, rental assistance, the new construction of single family and multifamily housing, special needs housing, transitional housing, and emergency shelters. Housing-related and community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance.

Funding of agency programs is currently grouped into three categories: Single Family Finance Production, Multifamily Finance Production, and Community Affairs. In addition, the Department includes the following divisions: Administrative Support; Bond Finance; Financial Administration; Governmental Affairs; Information Systems; Internal Audit; Legal Services; Portfolio Management and Compliance; Real Estate Analysis; the Center for Housing Research, Planning, and Communications; and the Office of Colonia Initiatives. The Office of Colonia Initiatives administers programs related to the Texas-Mexico border and oversees Border Field Offices and Colonia Self-Help Centers.

Federal funding sources for the services listed above include the US Department of Housing and Urban Development, US Treasury Department, US Department of Health and Human Services, and US Department of Energy. The Housing Trust Fund receives general revenue funds from the State. Through these funding mechanisms, the Department strives to promote sound housing policies; ensure equity; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process.

AGENCY HISTORY

In 1991, the 72nd Texas Legislature created the Texas Department of Housing and Community Affairs. The Department's enabling legislation combined programs from the Texas Housing Agency, the Texas Department of Community Affairs, and the Community Development Block Grant Program from the Texas Department of Commerce.

On September 1, 1992, two programs were transferred to TDHCA from the Texas Department of Human Services: the Low Income Home Energy Assistance Program (LIHEAP) and the Emergency Nutrition and Temporary Emergency Relief Program (ENTERP). Effective September 1, 1995, in accordance with House Bill 785, regulation of manufactured housing was transferred to the Department. In accordance with House Bill 7, effective September 1, 2002, the Community Development Block Grant (CDBG) and Local Government Services programs were transferred to the newly created Office of Rural Community Affairs (ORCA). However TDHCA, through an interagency contract with ORCA, administers 2.5 percent of the CDBG funds used for the Self-Help Centers along the Texas-Mexico border. Effective September 1, 2002, in accordance with Senate Bill 322, the Manufactured Housing Division became an independent entity administratively attached to TDHCA.

2005 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

The *2005 State of Texas Low Income Housing Plan and Annual Report* (the Plan) is prepared in accordance with Sections 2306.072–2306.0723 of the Texas Government Code. This statute requires the Department to perform a comprehensive overview of statewide housing needs, provide a description of the Department's housing programs, and establish a resource allocation plan to meet the state's housing needs.

The *State of Texas Low Income Housing Plan and Annual Report* is one of three comprehensive planning documents, together with the *State of Texas Consolidated Plan: One-Year Action Plan* and *State of Texas Consolidated Plan: Annual Performance Report*, that TDHCA is required to submit annually. It offers policy makers, affordable housing providers, and local communities a comprehensive reference on statewide housing need, housing resources, and performance-based funding allocations. It serves in the following capacities:

- Provides an overview of statewide housing needs
- Reports on the programs administered by TDHCA
- Reports on the distribution of TDHCA's resources in the previous fiscal year
- Provides information on TDHCA's housing program funding levels and performance measures

The Plan is organized into six sections:

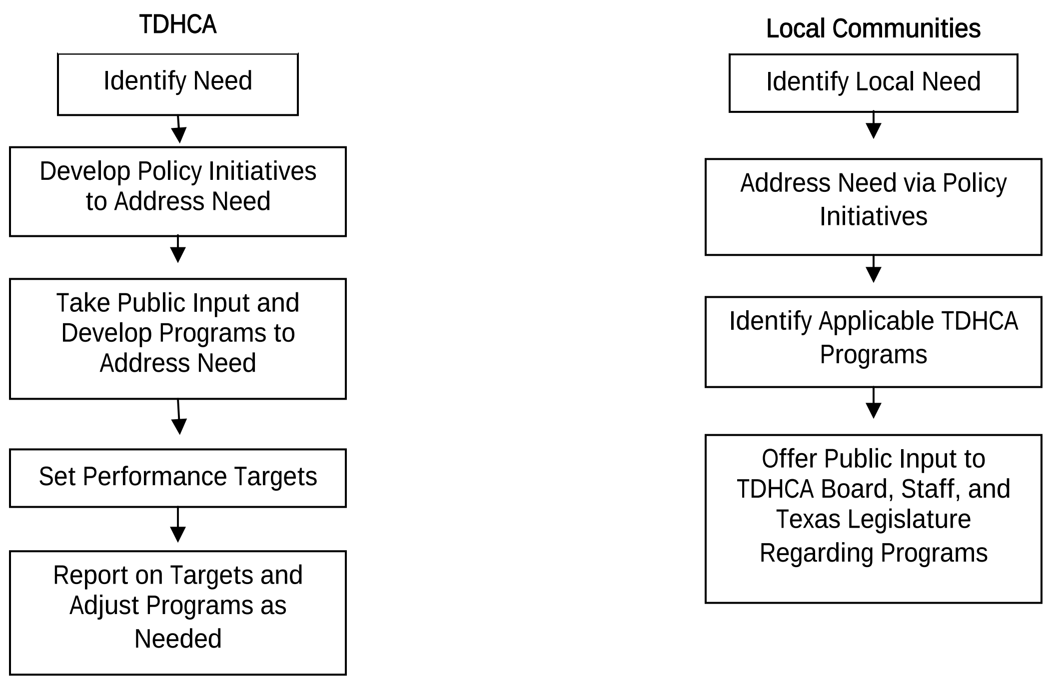
- *Introduction:* An introduction, a summary of the 2004 Department impact, an overview of the Department, and an overview of the Plan
- *Department Activities and Initiatives:* A summary of Department activities and an overview of policy initiatives
- *Housing Analysis and Action Plan:* An analysis of statewide and regional demographic information, housing characteristics, and housing needs; and an annual low income housing report including state and regional funding allocation, target numbers, actual numbers served, and discussion of the Department's Strategic Plan goals
- *Colonia Action Plan:* This biennial plan for 2004–2005 discusses housing and community development needs in the colonias, describes the Department's policy goals, summarizes the strategies and programs designed to meet these goals, and describes some of the projected outcomes to support the improvement of living conditions of colonia residents
- *Texas State Affordable Housing Corporation Plan:* This plan, prepared by the Texas State Affordable Housing Corporation (TSAHC) and included in this document in accordance with legislative requirements, outlines TSAHCs programs for the upcoming year.
- *Appendix:* Includes the Agency's enabling legislation, program descriptions, a glossary of selected terms, and a summary of public comment

It is important to note that this Plan is a working document that changes annually based on input received throughout the year. The format is intended to help providers and interested parties recognize statewide housing needs, understand general housing issues, formulate policies, and identify available resources.

As the information required by the legislation for the *State of Texas Low Income Housing Plan and Annual Report* is rather voluminous, it has been deemed appropriate to present the information as a collection of separate publications. This allows the consumer to receive specific information and has proven cost-effective for both TDHCA and its consumers through lower printing and distribution costs. TDHCA produces the following publications in compliance with Section 2306.071–2306.0723 of the Texas Government Code:

- *State of Texas Low Income Housing Plan and Annual Report*
- *TDHCA Program Guide:* A description of the Department's housing programs as well as other state and federal housing and housing-related programs
- *TDHCA Property Inventory and Guide to Services:* A comprehensive list of the Department's multifamily and single family housing activity in addition to HOME Program contracts and Community Services programs
- *TDHCA Housing Sponsor Report:* A report that provides property and occupant profiles of developments that have received assistance from TDHCA

Below are illustrations as to how TDHCA uses this Plan to develop Department programs and how the Plan may be used by communities to develop and implement local initiatives:



PREPARATION OF THE PLAN

Current legislation mandates that the Department meet with various organizations concerning the prioritization and allocation of the Department's housing resources prior to preparation of the Plan. As this is a working document, there is no such time at which the Plan is static. Rather, research is conducted throughout the year by the Department's Center for Housing Research, Planning, and Communications in order to analyze housing needs across the state. Furthermore, focus group meetings are held to discuss ways in which funds may be prioritized to meet specific needs. Public comment is also received at public hearings and TDHCA Board meetings.

CITIZEN PARTICIPATION

Throughout the year, the Department accepts comments and suggestions from the public on all of its programs. Public comment may be received at, but not limited to, Board of Directors meetings, various Department-sponsored or attended informational workshops, legislative committee hearings, individual program and publication public comment periods and hearings, and application and implementation workshops.

The formal citizen participation process for the *2005 State of Texas Low Income Housing Plan and Annual Report* began on September 24, 2004, and ended October 25, 2004. Constituents were encouraged to give input regarding all Department programs in writing or at one of the 13 public hearings to be held across the state, one in each of the 13 Uniform State Service Regions.

Approximately 196 individuals attended the public hearings held in the following cities: Houston, El Paso, Dallas, San Antonio, Victoria, Waco, Tyler, Lufkin, Wichita Falls, Amarillo, Harlingen, San Angelo, and Austin. A summary of comment received during the public comment period will be included in Appendix E. Transcripts of public hearings and complete copies of submitted comments are also available in the Housing Center Library, which is open to the public 8 am to 5 pm, Monday through Friday. Please contact the Housing Center at (512) 475-3975 for more information.

DEPARTMENT ACTIVITIES AND INITIATIVES

This section provides the basis for the state and regional housing assessments through a discussion of Department activities and policy objectives.

AGENCY ACTIVITIES

TDHCA administers various programs that address the housing and community service needs of extremely low to moderate income populations, which can be categorized according to multifamily, single family, capacity building, and community affairs activities.

MULTIFAMILY ACTIVITIES

TDHCA's dedication to increasing affordable multifamily housing opportunities for needy residents across the state improves the quality of life for thousands of households. The Department utilizes a variety of methods to provide rental housing for lower income households and households with special needs. Programs finance multifamily construction, acquisition, and rehabilitation; and offer capacity building for organizations involved in multifamily housing. New construction of multifamily units supplies additional much-needed housing targeting lower income families, though the Department also recognizes the need to preserve and repair existing affordable units in order to maintain quality housing that is accessible and affordable.

Through the Housing Tax Credit (HTC) Program, the Department aids in building affordable housing through the allocation of federal tax credits used to fund new construction, acquisition, and rehabilitation of multifamily residential developments. Although a developer must set aside at least 20 percent of a project's units for qualified tenants, typically a developer will set aside 100 percent and, in doing so, claim the maximum amount of tax credits eligible for the development. The allocation of the tax credits allows these quality developments to be affordable to qualified very low and extremely low income families at below-market rents.

The Department issues taxable and tax-exempt mortgage revenue bonds to fund loans to qualifying nonprofit or for-profit developers through the Multifamily Bond Program. The proceeds of the bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties. In return for favorable interest rates typically available through the tax-exempt bond transaction, property owners elect to restrict either 20 percent of the units for households earning 50 percent or less of area median income or 40 percent of the units to households earning 60 percent or less of area median income.

The HOME Program's Rental Housing Development and Rental Housing Preservation funds are available to nonprofit and for-profit organizations for the acquisition, rehabilitation, reconstruction, or new construction of affordable rental housing units. In all cases, owners are required to make the units available to low, very low, and extremely low income families, and must meet long-term rent restrictions. Housing Trust Fund (HTF) monies may also be used for the acquisition, rehabilitation, and new construction of affordable multifamily housing.

Community housing development organizations (CHDOs) may apply for funding for the new construction or rehabilitation of rental housing through the HOME Program CHDO Set-Aside. CHDO projects are owned, developed, or sponsored by the CHDO.

	Program	Targeted Households by Area Median Family Income				
		Extremely Low Income: < 30% AMFI	Very Low Income: < 50% AMFI	Very Low Income: < 60% AMFI	Low Income: < 80% AMFI	Moderate Income: < 115% AMFI
Multifamily Development Activities	HOME Program Rental Housing Set-Asides					
	Housing Trust Fund					
	Housing Tax Credit Program		20% of units	or 40% of units		
	Multifamily Bond Program		20% of units	or 40% of units	75% of 501(c)(3) units	

SINGLE FAMILY ACTIVITIES

The range of TDHCA's single family activities includes home construction, rental assistance, home purchase assistance, and assistance for homeowners. TDHCA supports affordable single family homeownership by providing loans to developers of affordable housing; promoting homebuyer education, offering mortgage financing and assistance, and by extending owner-occupied rehabilitation assistance to households.

Through HTF, the Department offers funding that may be used for the acquisition, rehabilitation, and new construction of affordable single family housing. Single family new construction is an eligible activity in the HTC program and is a CHDO-eligible activity in the HOME Program. In colonia areas, TDHCA supports single family development through the Colonia Model Subdivision Loan Program and the Bootstrap Loan Program, which provide loan funds to assist organizations build single family housing. Certain types of assistance may require considerable labor contribution on the part of the owner.

Direct rental assistance to tenants, which includes rental subsidies and utility and/or security deposits, allows households to expand their housing opportunities. Such programs offered by the Section 8 Program and Tenant-Based Rental Assistance provided through the HOME Program are designed to help households in small cities and rural areas that are not served by similar local programs.

Homebuyer education and counseling are essential in order to ensure successful homeownership. Through the Texas Statewide Homebuyer Education Program (TSHEP), TDHCA offers training to local nonprofit organizations interested in offering homebuyer education, and also acts as a referral service for homebuyers seeking education. In addition, the Contract for Deed Consumer Education Program offers homebuyer education and assistance tailored specifically for the unique needs of colonia residents. Technical assistance on such topics as housing rehabilitation, new construction, surveying and platting, construction skills, housing finance, and credit and debt counseling is available.

The dream of homeownership is beyond the reach for many households because of the inability to acquire affordable financing, the lack of down payment funds, or a lack of education about the home purchase process. Through the First Time Homebuyer Program and Grant Assistance Program, the Department offers below-market mortgage loans and down payment assistance for very low to moderate income residents across the state. Similar to the Multifamily Bond Program, the single family bond structure allows favorable mortgage interest rates for eligible borrowers through participating lenders and other partners that originate and service the loans. In addition, the HOME Program funds local organizations to offer assistance to eligible first time homebuyers for down payment and closing costs. The Mortgage Credit Certificate Program provides a tax credit for the annual interest paid on a mortgage loan.

Homeowners and potential homeowners in border areas may utilize the Texas Bootstrap Loan Program and the Contract for Deed Conversion Initiative for low-interest owner-builder mortgage loans or to convert contracts for deeds into traditional mortgages.

Through the HOME Program, the Department provides rehabilitation and reconstruction grants to homeowners for the repair of their existing structures, which may also be used for construction costs associated with architectural barrier removal for homebuyers with disabilities. There are also funds available to help with the acquisition and rehabilitation costs associated with the contract for deed conversion for colonia residents.

		Targeted Households by Area Median Family Income

Community Affairs and Energy Assistance

The Department's community affairs and energy assistance programs exist to provide a safety net for those experiencing homelessness, those at risk of homelessness, and for those able to maintain some sort of housing, but with other unmet essential needs. The community affairs programs provide emergency relief in the form of shelter and social services for individuals and families experiencing crisis poverty. The energy assistance programs help very low income households manage their utility bills through payment assistance, the installation of energy efficient measures and appliances, and energy conservation education.

Basic needs such as shelter, food, child care, health and human services, transportation, job training, and substance-abuse prevention must be addressed in order for households or individuals to contemplate long-term solutions to poverty. The programs administered by TDHCA that address these needs are vital to the transition from poverty. The Emergency Shelter Grants Program (ESGP) addresses the immediate needs of homeless individuals and families through funding to nonprofit organizations and local governments that provide shelter and related services for homeless persons, as well as intervention services for persons threatened with homelessness. Eligible activities include renovation, major rehabilitation, and conservation of buildings for use as an emergency shelter, and may involve the provision of services including assistance in obtaining permanent housing, medical treatment and psychological counseling, nutritional counseling, substance-abuse treatment, child care, transportation, and job placement.

The Department also offers grants to organizations that provide essential services to persons living in poverty, such as access to child care; health and human services for children, families, and the elderly; nutrition; transportation; job training and employment services; housing; substance-abuse prevention;

and migrant assistance. Other Department activities include the coordination of statewide efforts to address hunger issues and expand anti-hunger programs such as child-feeding programs, the distribution of surplus commodities and game donated by hunters, and the creation of farmer's markets in lower income neighborhoods. The Department provides disaster-related emergency relief in the form of utility assistance, housing, food, clothing, medical services, and transportation to extremely low, very low, and low income persons. The Community Services Block Grant Program (CSBG) and HTF have funds available for agencies providing essential services and the Community Food and Nutrition Program (CFNP) addresses hunger-related issues.

Through the Department's energy assistance programs, eligible households can receive financial assistance with utility bills, energy-efficient appliances and measures, case management, and education assistance to ensure continued energy self-sufficiency. Priority for these programs is given to the elderly, persons with disabilities, and households with children under the age of six, with further priority given to households with the highest energy costs and the lowest incomes. The Comprehensive Energy Assistance Program (CEAP) funds local entities that offer utility bill assistance, while the Weatherization Assistance Program (WAP) provides grants to entities that fund energy conservation measures in housing.

More detailed programmatic information including funding levels, eligible applicants and beneficiaries, program activities, set-asides, and special initiatives is available in Appendix B.

Capacity Building

The Housing Trust Fund (HTF) administers two programs specifically intended to increase a nonprofit organization's ability to access Department programs.

The Capacity Building Program has been used to fund classes that cover such topics as training in CHDO organizational development, the real estate development process, construction management, property management, and housing development finance. In addition, funds may be used to hire qualified persons who can provide technical assistance in developing safe, decent, and sanitary housing for low, very low, and extremely low income individuals and families, including persons with special needs. Funds may also be used to contract directly with qualified technical assistance providers.

The Predevelopment Loan Program provides opportunities for nonprofit organizations to develop affordable housing by assisting with the costs incurred while securing project financing.

In addition to the funding outlined above, the Department offers technical assistance to organizations interested in addressing the affordable housing needs in their communities. Trainings are conducted throughout the year by TDHCA staff on how to apply for and administer Department funds. Additionally, the Department makes information available to the public on trainings being held throughout the state on topics such as strategic and business planning, financial and asset management, board development, outcome measures, coordination, collaboration, networking, and partnership development

The Department hopes to empower organizations to be more competitive in applying for not only TDHCA funding, but also other available federal, state, and local funds.

POLICY INITIATIVES AND STRATEGIES

Families at the very bottom of the income strata who have virtually no financial resources and a variety of other poverty-related issues (including employment, education, transportation, health care, and child care) require direct assistance, as do vulnerable populations with a fixed income. These groups are served most effectively through rental vouchers or access to housing developments that have received substantial subsidies, allowing for rents affordable to those making less than 30 percent of the area median family income. However, for those populations with higher incomes, consumer needs tend to change. Higher income households with housing affordability problems typically have some income, but cannot access market-rate housing without some assistance—either an affordable multifamily unit or homeowner assistance in the form of down payment assistance and low-interest loans.

Opinions regarding how to address these housing needs are as varied and diverse as Texas itself. On one side of the spectrum, there is the desire to allocate available resources in the form of direct assistance to the state’s poorest populations, with an emphasis on utilizing community-based organizations in the allocation of housing funds. On the other side, there is the desire to make affordable housing a private-sector function subject to the demands of the market and with little government intervention.

The challenge therefore lies in serving the appropriate population with the appropriate funding mechanism. Both concepts can be incorporated into policy that encourages the participation of private-market resources and experience while still serving the state’s most vulnerable populations. By striking this balance, the Department will be able to spend its resources wisely and for the greatest public good.

Below are examples of strategies that TDHCA has used to produce and promote affordable housing, in accordance with the goals and objectives established in the *2005–2009 Consolidated Plan; 2005–2009 Strategic Plan;* and TDHCA Performance Measures, as reported to the Legislative Budget Board.

1. Increase the supply of housing for extremely low, very low, low, and moderate income households through partnerships with local communities, local lenders, health and human services providers, community-based nonprofit organizations, and private developers
2. Preserve the supply of existing affordable housing units
3. Adopt strategies to serve rural populations
4. Develop housing policy based on a fair and open process driven by local communities
5. Increase outreach and marketing efforts
6. Adopt strategies to serve extremely low income populations
7. Provide long-term solutions to those living in poverty
8. Develop consumer-driven programs for the state’s most vulnerable populations, such as the elderly, persons with disabilities, and other special needs populations
9. Implement self-help programs that combine public funds with volunteer efforts and local resources
10. Identify and address colonia needs
11. Provide homeownership opportunities to lower income populations and homeownership counseling services to individuals currently unable to access the Department’s housing finance programs
12. Promote fair housing issues
13. Promote energy efficiency to increase housing affordability
14. Encourage local affordable housing initiatives

15. Address capacity building issues
16. Encourage communication and cooperation with local groups opposed to affordable housing in their communities
17. Ensure compliance with all applicable federal and State laws

It should be noted that the Department's programs operate under different sets of state and/or federal regulations that provide parameters that govern the use of funds. These parameters determine the extent to which the Department can enact its policy directives.

PUBLIC AND PRIVATE PARTNERSHIPS

Understanding that no single entity will be able to address the enormous needs of the state of Texas, TDHCA supports the formation of partnerships for the provision of housing and housing-related endeavors. The Department works with many housing and community-development partners, including consumer groups, community-based organizations, neighborhood associations, community development corporations, community housing development organizations, community action agencies, public housing authorities, real estate developers, social-service providers, local lenders, investor-owned electric utilities, local governments, nonprofits, faith-based organizations, property managers, state and local elected officials, and other state and federal agencies. There are many benefits to these partnerships: risk and commitment are shared; the principle of reciprocity requires that local communities demonstrate an awareness of their needs and a willingness to participate actively in solving problems, therefore prompting local communities to play an active role in tailoring the project to their needs; partners are able to concentrate specifically on their area of expertise; and a greater variety of resources insure a well-targeted, more-affordable product.

TDHCA has used the public/private partnership principle in many of its programs, including the training of homebuyer education providers in conjunction with the Neighborhood Reinvestment Corporation through the Texas Statewide Homebuyer Education Program (TSHEP); and the Department's continued collaboration with USDA Rural Development and the Office of Rural Community Affairs (ORCA) has provided housing opportunities in rural areas across the state.

Combining ideas, information, and resources allows TDHCA to provide additional services to its consumers. Because the amount of funds available to address Texas's housing needs is limited, collaborations between public and private entities are the best way to stretch limited Department funds. Below are additional examples of coordination of resources with both public and private entities.

- *First Time Homebuyer Program*: In an effort to assist borrowers with impaired credit histories, the First Time Homebuyer Program may be used in conjunction with Fannie Mae's My Community Mortgage, which offers flexibility on credit histories and the acceptance of nontraditional credit histories. These loans may be used with all TDHCA mortgage revenue bond programs, thus giving households with slight credit blemishes the opportunity to qualify for a homebuyer loan with interest rates lower than that of alternative financing arrangements.
- *Texas Statewide Homebuyer Education Program (TSHEP):* In 2004, TDHCA worked with the Neighborhood Reinvestment Corporation, Fannie Mae, Banc One, Countrywide, the Texas State Affordable Housing Corporation (TSAHC), and the Texas Affiliation of Affordable Housing Providers

(TAAHP) to provide "Train the Trainer" classes to organizations interested in providing homebuyer education services at the local level.

- *Olmstead v. L. C.:* TDHCA continues to work with the Texas Department of Aging and Disability Services, Texas Council for Developmental Disabilities, and Texas Department of State Health Services on initiatives that will serve the needs of persons with disabilities who desire housing options outside of institutional settings.
- *Project Access:* The Department in cooperation with the Texas Health and Human Services Commission, the Texas Department of Aging and Disability Services, and local public housing authorities administer a housing voucher pilot program developed by the US Department of Housing and Urban Development (HUD), the US Department of Health and Human Services, and the Institute on Disability at the University of New Hampshire. The voucher program helps low income, non-elderly persons with disabilities transition from nursing facilities into the community by providing access to affordable housing and necessary supportive services.
- *Texas PHA Project:* TDHCA serves on the Project Advisory Committee with the Coalition of Texans with Disabilities, Texas Council for Developmental Disabilities, Advocacy Inc., and United Cerebral Palsy to oversee the three-year grant to provide training and technical assistance to public housing authorities. Activities of the grant are intended to result in a measurable increase in the number of integrated housing units available to persons with disabilities.
- *USDA Rural Development*: As a provider of services to rural Texas communities, TDHCA has an ongoing relationship with USDA Rural Development. Collaborations have been achieved through several TDHCA programs (HTC, HTF, HOME) in the form of multifamily developments and single family homeownership initiatives.
- *Public Housing Authorities*: Over the past few years, TDHCA has developed a strong relationship with the Texas Housing Association (THA) and Texas chapter of the National Association of Housing and Redevelopment Officials (TX NAHRO), which represent the public housing authorities of Texas. The two organizations have worked to promote programs that will repair substandard housing and develop additional affordable housing units.
- *Colonia Self-Help Centers*: TDHCA coordinates services with centers in counties selected by the Legislature to provide housing and technical assistance to improve the quality of life for colonia residents beyond the provision of basic infrastructure. Centers are currently established in Cameron/Willacy, El Paso, Hidalgo, Maverick, Starr, Val Verde, and Webb counties. Contracts are executed directly with the county in which the center is located.
- *Texas Home of Your Own Coalition (HOYO):* HOYO is a partnership of state and local direct service providers, state agencies, disability advocacy groups, community groups, and statewide lending institutions that are committed to making homeownership a reality for Texans with disabilities.
- *Weatherization:* Partnerships between the Weatherization Assistance Program and Southwestern Electric Power Company, Southwestern Public Service Company, Entergy, and El Paso Electric provide energy conservation measures to very low and extremely low income utility customers.

MULTIFAMILY PRESERVATION

Preservation of existing affordable and subsidized housing stock is a critical element in achieving the Department's mission of providing safe, decent, and affordable housing. From a supply-and-demand perspective, there is a shortage of affordable and subsidized multifamily housing, and any deterioration of the current supply further widens the gap. Given the demographic projections for Texas, the housing shortage will only continue to grow. In terms of meeting future demand for housing, stabilization of the existing stock is equally as important as new production.

Over the next few years, many units in the existing stock of affordable rental units are at risk of being lost. These include units in the Section 8 portfolio, the USDA Rural Development portfolio, and units associated with the Housing Tax Credit Program. Texas relies almost exclusively on federal funds for housing programs and any cuts to federal programs will have dramatic effects on the housing supply.

A 2002 study completed by the Department, *Assessment of the Need to Preserve Affordable Housing in Texas: The Section 8 Portfolio*, attempted to estimate the total preservation cost of the Texas Section 8 portfolio. As of the writing of the study in September of 2002, it was estimated that between 8,000 and 12,000 Section 8 units had been lost since contracts started to expire in 1996 (approximately 18 percent of the portfolio). By the end of 2002, 72 percent of the original contracts in the portfolio were up for expiration. It was projected that of the remaining approximately 54,000 units, 3 percent were likely to be lost to contract termination: a total of 1,800 units. According to the study, approximately 48 million dollars would be required in incentives over the next 20 years to maintain the affordability status of the properties most likely to be lost. The full study may be accessed on the Department's website at: http://www.tdhca.state.tx.us/mf_preserve.htm.

The loss of existing units places many of the poorest Texans at risk. Rental units that are disappearing the fastest and at risk of being lost are the units that serve the neediest populations. Aside from HUD-associated programs, properties awarded tax credits from 1987 to 1989 began reaching the end of their 15-year affordability periods in 2002.

The principal policy decision for the Department is the allocation of current resources between new production and preservation efforts. Aside from the resource allocation issue, policy decisions regarding which existing units should be salvaged or prioritized, given available funding, are also paramount. Concentrations of special tenant populations, the condition and location of the properties, availability of better replacement housing, and functional utility of the properties are factors that must be considered in preservation efforts. Focusing limited resources on those properties with high concentrations of elderly or disabled residents, groups that are most adversely affected by displacement, and strategically well-located properties and well-maintained properties will help stabilize the housing stock.

Typically, even with significant rehabilitation, preservation is generally less costly per unit than new construction. However, because some of the existing stock is functionally obsolete and therefore not conducive to rehabilitation, building a new development may be more cost efficient. Given the limited financial resources, TDHCA believes that an important role for the Department in the preservation effort is to provide direction and technical assistance to local organizations or units of government to facilitate local preservation initiatives. Because not all of the existing units can or will be preserved, the importance of salvaging specific properties and the strategies to preserve them are best determined on a local basis.

Among the programs that have dedicated funds toward preservation activities, the Housing Tax Credit Program has set aside 15 percent of the state housing credit ceiling for preserving "at risk" affordable housing developments. This is in addition to the 5 percent set-aside for USDA Rural Development projects, resulting in a total of 20 percent of the state housing credit ceiling available for the preservation of existing affordable housing. Additionally, the HOME Program allocates $2,000,000 annually for preservation activities.

In addition to funding preservation activities, the Department strives to make information necessary to encourage preservation transactions available to the public. Data for federal portfolios of affordable housing has been made available on the Department's website, with each property being given a priority ranking depending on the length of time before its affordable regulatory restrictions expire. The Department has undertaken in-depth studies of each affordable housing portfolio in the state, beginning with the federal Section 8 portfolio, in order to determine the factors influencing owners' decisions to leave affordable housing programs, and the potential costs associated with retaining the housing as affordable. Other measures such as the Preservation Clearinghouse on the Department's website and direct informational mailings to property owners have sought to facilitate communication among those parties critical in effecting transactions to preserve housing.

RURAL AND NON–PARTICIPATING JURISDICTIONS

As the migration of populations and industries continues to urban and suburban areas, the less-populous areas of the state are left with a dilapidated housing stock and households with lower incomes than their urban or suburban counterparts. Currently, according to HUD, the median income for metropolitan areas is $55,500 compared to $42,400 for non-metropolitan areas.

The larger metropolitan cities and more populous counties, designated as participating jurisdictions (PJs), receive funding directly from the federal government to address their housing and homeless needs through the HOME and Emergency Shelter Grants programs. The funding TDHCA receives from the federal government for these programs is therefore intended for non-PJ areas that do not receive financial assistance directly from the federal government.

Due to the lower incomes and lack of access to resources (e.g., bonds, large tax base, and investment capital) in less-populous areas, TDHCA gives special consideration to lower income individuals and households residing in non–participating jurisdictions and rural areas. This focus is considered in the development of Department programs and in the distribution of associated funds. In the event that funding cannot be limited to non-PJ and rural areas because of rule or financial feasibility reasons, scoring criteria or set-asides are added to the applications or program rules to encourage the participation of these areas.

TDHCA is dedicated to serving populations that traditionally have the highest need for assistance, yet tend to remain underserved. Within the non-PJ and rural areas, the populations that will receive priority consideration include extremely low income individuals and households (0–30 percent AMFI) and low income special needs populations including persons with alcohol and/or drug addictions, colonia residents, people with disabilities, victims of domestic violence, elderly populations, persons with HIV/AIDS, homeless populations, and migrant farmworkers.

The Department works closely with several rural-based affordable housing organizations, private lenders, nonprofits, and units of local government in order to give funding priority to non-PJ and rural areas. It requires more effort to spark affordable housing activity in rural areas as the number of organizations available to assist with these activities is significantly fewer. With this in mind, the Department has developed specific strategies to address the needs of the rural populations of the state, which include rural set-asides or special scoring criteria for housing program funds, prioritization of activities that are most needed in rural areas, increasing awareness of TDHCA programs in rural areas, and building the capacity of rural service providers.

TDHCA and the Office of Rural Community Affairs (ORCA) jointly administer the HTC rural regional allocation. ORCA assists in developing all thresholds, scoring, and underwriting criteria for rural regional allocation, and must approve the criteria. It is anticipated that joint-implementation outreach, training, and rural area capacity building efforts will increase participation in the rural set-aside. Additionally, 95 percent of HOME funds are expended exclusively in non-PJ and rural areas and the remaining 5 percent, which may be used in PJs, is used for projects that serve persons with disabilities.

Regional Input into Department Policies

TDHCA continuously strives to improve the methods used to identify regional affordable housing needs.[1] Through this effort, TDHCA is better positioned to provide technical assistance and funding that addresses specific regional needs.

One component of this effort involves helping coordinate the activities of Regional Advisory Committees (RACs). The RACs are comprised of the regional councils of governments (COGs) and other affordable housing organizations in each region, with the purpose of gathering information on the region's affordable housing needs and available resources. A primary task of the RACs is to prioritize the region's needs and report this information to TDHCA via an annual report that TDHCA will then consider in developing its policies and program rules. TDHCA works directly with the COGs to

- develop the format of the meetings;
- publicize the RAC meetings;
- share available information that assesses the need for affordable housing and related supportive services in Texas;
- identify opportunities to increase the supply and quality of affordable housing and supportive services in Texas;
- collect contact information for state, regional, and local partners that can assist persons interested in providing affordable housing and supportive services.

These meetings represented an invaluable opportunity for TDHCA staff to hear about local affordable housing needs directly from persons whose daily work revolves around addressing these issues.

[1] TDHCA uses 13 state service regions whose geographical boundaries have been identified by the Comptroller's office for planning purposes.

PUBLIC INPUT INTO DEPARTMENT POLICIES

Dialogue and communication with interested citizens at the community level, through program information workshops, public hearings, technical training sessions, and town hall meetings, enables the Department to act as a catalyst that draws community resources together. Increased dialogue establishes the groundwork for the formation of the aforementioned partnerships and community input. The State does not have the resources to meet the needs of all Texans in need, so it is only through increased participation and communication with the Department's consumers that services can be appropriately and efficiently directed to address need.

Citizen Participation

The Department values and relies on community input to direct resources to meet its goals and objectives. The citizen participation process and information delivery system administered by the Department is constantly undergoing expansion and modification.

In an effort to provide the public with an opportunity to more effectively give input on the Department's policies, rules, planning documents, and programs, TDHCA has consolidated its public hearings. Each year there will be one hearing per Uniform State Service Region that will cover all Department programs. Staff is available at each hearing to answer questions and lend technical assistance to attendees.

TDHCA ensures that all programs follow the citizen participation and public hearing requirements as outlined in the Texas Government Code. Hearing locations are accessible to all who choose to attend and are held at times accessible to both working and non-working persons. A database has been developed that includes citizen and nonprofit organizations, local governments, state legislators, public housing authorities, and local public libraries so that, when a public hearing or public comment period is scheduled, all interested parties are notified. Additionally, pertinent information is posted in the *Texas Register*, in *Breaking Ground* (the TDHCA newsletter), on the Department's website, in several association newsletters, and in the newspapers that are local to the hearing location. Participation and comments are encouraged and can be submitted either at a public hearing or in writing via mail, fax, email, and, in some cases, directly at the TDHCA website.

Program Participation

The Department constantly seeks ways of increasing statewide participation in TDHCA programs. It is important to note that TDHCA is primarily a pass-through funding agency and funds developments through a formal competitive Request for Proposals (RFP)/Notice of Funding Availability (NOFA) process. Therefore, so that funds reach those in need at the local level, it is incumbent upon the Department to increase the public's awareness of what funds are available and how they may be accessed. Below are the approaches taken by TDHCA to achieve this end:

- Throughout the year, Department staff participate in informational workshops and conferences across the state where information is shared with organizations that are unfamiliar with Agency programs. Organizations interested in becoming affordable housing providers are actively encouraged to contact the Agency for further technical assistance in accessing TDHCA programs.
- The TDHCA *Program Guide* was developed to provide a comprehensive, statewide housing resource guide for both individuals and organizations across the state. The *Program Guide*

provides a list of housing and housing-related programs operated by TDHCA, HUD, and other federal and state agencies.

- The Internet is also an invaluable tool for TDHCA. Through its provision of timely information to consumers, it has become one of TDHCA's most successful marketing tools.
- A database, including public housing authorities (PHAs), community development housing organizations (CHDOs), community development corporations (CDCs), area agencies on aging (AAAs), homebuyer education providers, local governments, and other community-based organizations, streamlines departmental efforts to inform interested parties of available funding, public hearings, and other activities.
- Regional Advisory Committees, comprised of the regional councils of governments and other affordable housing organizations in each region, serve as valuable resources in gathering input from people working at the local level. These groups gather information on the region's affordable housing needs and available resources, prioritize the region's needs, and report this information to TDHCA.

SERVING EXTREMELY LOW AND VERY LOW INCOME POPULATIONS

TDHCA's purpose, as defined in the Texas Government Code, is to "provide for the housing needs of individuals and families of extremely low, very low, and low income and families of moderate income." Recognizing the formidable housing challenges of extremely low income populations, the Agency strives to develop programs that can adequately and appropriately serve these individuals and families. According to the most recent *Housing Sponsor Report*, which is an annual snapshot of all affordable multifamily housing assisted with TDHCA funds, approximately 20 percent of all assisted units are occupied by extremely low income individuals and families.

TDHCA is dedicated to serving populations that traditionally have the highest need for assistance, yet tend to remain underserved. The following populations receive funding priority:

- Extremely low income individuals and households (0 to 30 percent AMFI)
- Low income, special needs populations, including persons with alcohol and/or drug addictions, persons with disabilities, victims of domestic violence, elderly populations, persons with HIV/AIDS, and migrant farmworkers
- Residents of the colonias
- The homeless

In addition to the Department's own efforts to address the affordable housing needs of extremely low income Texans, the 78th Texas Legislature passed a rider to TDHCA's appropriation that requires the housing finance division (which includes the HTC, HOME, HTF, Section 8, Multifamily Bond, and Single Family Bond programs) to adopt an annual goal to apply a minimum of $30 million of the Division's total housing funds toward housing assistance to individuals and families earning less than $13,000 for a one-person household, $16,000 for a two-person household, $17,000 for a three-person household, $19,000 for a four-person household, and $21,000 for a five-person household—for each additional person adding $1,500. The rider also mandates that no less than 20 percent of the division's funds be spent to serve very low income individuals and families, which are those at or below 60 percent of area median family income (AMFI).

Working with a focus group comprised of advocacy groups and industry associations, the Department determined that the following activities will be the basis for reaching the $30 million goal:

- Tenant-based rental assistance
- Owner-occupied housing rehabilitation
- Housing vouchers (rental/homeownership)
- Rental housing development with incentives to set aside units for 0 to 30 percent AMFI
- Point incentives to applicants to serve 0 to 30 percent AMFI
- Continued marketing and encouragement for organizations to serve 0 to 30 percent AMFI

TDHCA will continue to explore the use of funds outside the traditional housing programs allocation (e.g., de-obligated funds, bond fees) for activities that serve 0 to 30 percent of AMFI. The Department will also explore funding that will allow a cash flow subsidy grant to work with existing development programs.

POVERTY SOLUTIONS

TDHCA has an important role in addressing Texas poverty. The Department seeks to reduce the number of Texans living in poverty, thereby providing a better future for all individuals. This means targeting resources at those with the greatest need and aiming to provide long-term solutions to the problems facing people in poverty. The Department provides low income persons with energy, emergency, and housing assistance to meet the basic necessities.

Homeless persons are considered a priority group for housing-related funding. The priorities also target households at 80 percent or less of median income, particularly those at 0–50 percent of AMFI; much of this population group can be considered "at risk" of homelessness.

For households or individuals to contemplate long-term solutions to poverty, basic needs such as shelter, food, energy costs, child care, health and human services, transportation, job training, and substance-abuse prevention must be addressed. Therefore, the programs administered by TDHCA that address these needs are vital to the transition from poverty.

Public assistance and social service programs have shifted their focus over the last decade. The new emphasis centers on reducing dependency and increasing self-sufficiency. Assisted housing can no longer have a pure income-maintenance orientation. In light of this new emphasis, housing and community development resources that address poverty should emphasize self-sufficiency. The self-sufficiency approach provides incentives for assisted housing residents who are willing to undertake a set of activities intended to lessen dependency. These activities should be tailored to meet the needs and capabilities of each individual household and can be provided through the housing deliverer or through human service providers.

Experience has shown that segregating low income persons in an insulated community perpetuates the cycle of poverty and often creates slums. A second anti-poverty theme centers on mobility—insuring that residents of assisted housing have access to jobs, schooling, public safety, and role models. Rental assistance combined with counseling and support services can be used to increase mobility. Scattered site production can also be used to encourage mixed-income housing. TDHCA provides tenant-based rental assistance options through several of its programs, specifically the HOME Program and Section 8.

An asset development approach to addressing poverty emphasizes the use of public assistance to facilitate long-term investments, rather than incremental increases in income. In housing, this can include the establishment of equity through homeownership. Several TDHCA programs introduce the option of homeownership to lower income populations: the HOME Program offers down payment and closing cost assistance, and the Single Family Bond Program offers below-market mortgage loans coupled with down payment assistance.

Comprehensive community development can be used to address the complex and interrelated problems of distressed neighborhoods. It involves recognizing the many levels of need in a community and addressing these needs with housing, community development, economic development, and social service resources. When these resources are used in conjunction, they can improve the quality of life in a community and engender long-term changes. These “changes of condition” may deal with alcohol and substance dependency, mental and physical health, nutrition, child care and parenting, life skills, general education and work skills, and criminal behavior. “Changes of condition” may also mean providing an influx of non-poor households to serve as role models and shift the nature of the environment. For those in housing and community development, the recognition that collaboration between and among private sector developers, builders and lenders, and non-development resources (such as local governments and social-services providers) is essential. For those in human services, the change may involve a subtle shift in focus away from crisis intervention and towards preventive measures; working with the family on a case-basis, rather than individual members of the family; and, most importantly, providing services within the context of community development.

Serving Special Needs Populations

Special needs populations include persons with alcohol and/or drug addictions, colonia residents, persons with physical and/or mental disabilities, victims of domestic violence, elderly populations, persons with HIV/AIDS, homeless populations, and migrant farmworkers. Because of the unique challenges associated with the housing needs of these varying populations, a considerable level of planning and consumer-need-based focus is required.

Advocates for the elderly and persons with disabilities continue to stress that the primary goal of these populations is to live independently and remain in their own homes. Access to rehabilitation funds for single family housing—to perform minor physical modifications such as extra handrails, grab bars, wheelchair-accessible bathrooms, and ramps, thus making existing units livable and providing a cost-effective and consumer-driven alternative to institutionalization—was considered as a priority. Likewise, the availability of rental vouchers that provide options beyond institutional settings was found to be a high priority.

Olmstead

In June of 1999, the Supreme Court of the United States affirmed a judgment in the *Olmstead v. L. C. and E. W.* lawsuit, which has had far-reaching effects with states regarding services for individuals with disabilities. The *Olmstead* decision upheld Title II of the Americans with Disabilities Act (ADA) and applied it to access to services in the most integrated setting for the plaintiffs in the case. Title II of the ADA proscribes discrimination in the provision of public services, which specifies, *inter alia*, that no qualified individual with a disability shall, “by reason of such disability,” be excluded from participation in, or be denied the benefits of, a public entity's services, programs, or activities. Congress instructed the Attorney General to issue regulations implementing Title II's discrimination proscriptions, and one such regulation, known as the "integration regulation," requires a "public entity to administer programs in the most integrated setting appropriate to the needs of qualified individuals with disabilities."

The Court went further in their opinion to state that it acknowledged that Congress found that discrimination against people with disabilities includes segregation, isolation, and institutionalization, and that under the ADA, an individual with disabilities has the legal right to be served in the most integrated setting. The court stated that the reasonable modifications standard for the ADA would be met if the state has a comprehensive, effectively working plan for persons and a waiting list that moved at a reasonable pace, not controlled by the state's endeavors to keep institutions fully populated. The Court stated, "Confinement in an institution severely diminishes the everyday life activities of individuals, including family relations, social contacts, work options, economic independence education advancement, and cultural enrichment."

With the advent of the *Olmstead* decision, the Health and Human Services Commission (HHSC) initiated the Promoting Independence Initiative and appointed the Promoting Independence Advisory Board, as directed by then-Governor George Bush's Executive Order GWB 99-2. The Promoting Independence Advisory Board (PIAB) met during FY 1999 and FY 2000 and assisted the HHSC in creating the State's response to the *Olmstead* decision. This was accomplished with the development and implementation of the Promoting Independence Plan. This plan highlights the State's efforts to assist those individuals desirous of community placement, appropriate for community placement as determined by the state's treatment professionals, and who do not constitute a fundamental alteration in the state's services, to live in the community.

During the 77th Session of the Texas Legislature, SB 367 was passed, which renamed the Promoting Independence Advisory Board as the "SB 367 Interagency Task Force on Appropriate Care Settings for Persons with Disabilities." The Commissioner of Health and Human Services appoints the SB 367 Task Force and its presiding officer, and determines the number of task force members, who include representatives of appropriate health and human service agencies, related work groups, consumer and family advocacy groups, and providers of services. A representative from TDHCA has been a voting member of the PIAB and SB 367 Task Force since their inception.

TDHCA has taken a strong leadership role in the provision of funding for rental assistance to address the housing needs of persons looking for community-based alternatives to institutionalization. In FY 2002, TDHCA received 35 rental vouchers to administer to the *Olmstead* population as part of a national pilot program called "Project Access." To date, all Project Access vouchers have been issued, and 40 voucher recipients, through voucher recycling, have made the transition from a nursing facility into their own homes.

Integrated Housing Rule

An issue of particular concern for advocates for persons with disabilities involved the Department's policies related to integrated housing. Integrated housing, as defined by SB 367 and passed by the 77th Texas Legislature, is "housing in which a person with a disability resides or may reside that is found in the community but that is not exclusively occupied by persons with disabilities and their care providers." The

Department, with the assistance of the TDHCA Disability Advisory Committee, developed an integrated housing rule to address this concern. In November 2003, the TDHCA Board approved an Integrated Housing Rule for use by all Department housing programs. Below is a synopsis of the rule:

- A housing development may not restrict occupancy solely to people with disabilities or people with disabilities in combination with other special needs populations.
    - Large housing developments (50 units or more) shall provide no more than 18 percent of the units of the development set aside exclusively for people with disabilities. The units must be dispersed throughout the development.
    - Small housing developments (less than 50 units) shall provide no more than 36 percent of the units of the development set aside exclusively for people with disabilities. These units must be dispersed throughout the development.
- Set-aside percentages outlined above refer only to the units that are to be solely restricted for persons with disabilities. This section does not prohibit a property from having a higher percentage of occupants that are disabled.
- Property owners may not market a housing development entirely, nor limit occupancy to, persons with disabilities.

Exceptions to the above rule include the following:

- Scattered site development and tenant-based rental assistance is exempt from the requirements of this section.
- Transitional housing is exempt from the requirements of this section, but must be time-limited, with a clear and convincing plan for permanent integrated housing upon exit from the transitional situation.
- This section does not apply to housing developments designed exclusively for the elderly.
- This section does not apply to housing developments designed for other special needs populations.
- The Board may waive the requirements of this rule to further the purposes or policies of Chapter 2306, Texas Government Code, or for other good cause.

SELF-HELP INITIATIVES

Community-based self-help is an age-old tradition that extends far beyond the implementation of the first government housing programs. Lower income households have used self-help and incremental construction techniques to house themselves throughout history. Within the administrative context of government, self-help techniques, such as volunteer labor and the use of innovative materials and technologies, become a resource that can be used to encourage people's efforts and extend the reach of the government dollar.

Self-help relies almost exclusively on the participation of local communities and residents in addressing problems. It can be defined as any activity for which a community can undertake itself that it would otherwise pay outsiders to complete. When applied to housing and community development, the concept of self-help assumes that (1) the most valuable resources available are those in place within a community and (2) the key to increased production is reducing needs through innovation and volunteerism. Using the self-help approach, the State assumes the role of a facilitator that assists the community within the framework of its local resources and needs, rather than a provider that funds projects according to pre-determined program guidelines.

Self-help can result in significant cost savings through reduced overhead and reduced markups of intermediaries, the use of existing assets, and the substitution of volunteers for paid labor. Communities that use conventional grant programs typically hire outside experts to determine the amount of subsidy required to finance a project. Using the self-help approach, the amount of outside assistance requested for a project is determined locally after the community has established what can be completed independently. The Department currently funds these successful self-help initiatives: Colonia Self-Help Centers and the Texas Bootstrap Loan Program.

COLONIA ISSUES

The Office of Colonia Initiatives (OCI) was created by the Department to administer and coordinate efforts for the enhancement of living conditions for colonias in Texas. OCI plays a vital role in addressing the problems of our state's colonias through partnerships with other state and federal agencies along the Texas-Mexico border region, as well as those in the for-profit and nonprofit sectors. The following are specific concentrated on-site technical activities currently underway:

- Increased affordable housing opportunities (i.e., low-interest-rate loans, new construction, reconstruction, rehabilitation, surveying and platting)
- Community development activities
- Conversion of contracts for deed to conventional mortgages with transfer of title and homeownership education
- Construction education and assistance
- Tool library access
- Access to adequate infrastructure

For more information related to activities and initiatives related to the colonias, please refer to the Colonia Action Plan section beginning on page 136.

HOMEOWNERSHIP AND HOMEOWNERSHIP COUNSELING

Exploring innovative approaches to financing homeownership, such as individual development accounts (IDAs), the use of community development financial institutions (CDFIs), the creation of innovative lending products, as well as the proliferation of quality homebuyer education, will aid in the Department's efforts to increase homeownership. Ultimately, making homeownership a reality for lower income Texans is the underlying theme for several TDHCA programs. Every step toward self-sufficiency provided to consumers gets them closer to the realization of this goal.

Expanding homeownership opportunities for very low, low, and moderate income households is a major objective of the Department. Along with the Department, a growing number of lenders and affordable housing professionals recognize that it takes more than flexible underwriting in lending to expand homeownership for this traditionally under-represented population. For the past three decades, homeownership counseling has been an integral part of affordable lending in the United States. It has been demonstrated that counseling better-prepares borrowers to recognize and accept the responsibilities that come with owning a home. By assisting borrowers in obtaining a home they can truly afford to purchase and maintain, homeownership counseling has been credited with stabilizing families and neighborhoods while, at the same time, reducing the risk of default for lenders.

The Department believes that offering homebuyer education/counseling enhances the ability and confidence of lenders, borrowers, and policymakers to effectively make full use of the Department's lending programs. To improve access to local homebuyer education providers, TDHCA collaborates with several partners to implement the Texas Statewide Homebuyer Education Program (TSHEP). To ensure uniform quality of the homebuyer education provided throughout the state, TDHCA contracted with the Neighborhood Reinvestment Corporation to teach local nonprofit organizations the principles and applications of comprehensive pre- and post-purchase homebuyer education and to certify participants as providers. In 2004, a total of 75 attendees were present at two "Train the Trainer Homebuyer Education Provider" workshops held in San Antonio and Austin. In addition, two new continuing education courses were offered in Austin, at which 30 and 29 attendees were present. These new courses were offered to previously certified homebuyer education providers and were titled "Financial Fitness: Teaching Money Management Skills" and "Beginner to Intermediate Foreclosure Prevention."

FAIR HOUSING ISSUES

The Texas Fair Housing Act of 1989 enables the State to remedy discriminatory public policies affecting housing affordability and access. The act prohibits discrimination against individuals in their pursuit of homeownership or rental housing opportunities based on race, color, national origin, sex, religion, familial status, and physical or mental disabilities. Recent Department activities or current objectives relating to fair housing follow:

- Require compliance with the Texas Fair Housing Act in TDHCA-administered programs
- Provide fair housing training to TDHCA staff and governing board members
- Distribute fair housing brochures and information to recipients of housing program funds and make information available to the public upon request
- Coordinate fair housing efforts with the Texas Workforce Commission (TWC) Civil Rights Division, which was created under the Texas Fair Housing Act to directly address public grievances related to fair housing. Complaints will be handled in two ways:
  - *TDHCA Housing Sponsor Report* (submitted annually and due by March 1): A list of all properties responding affirmatively that they have had a fair housing complaint will be submitted to the TWC Civil Rights Division.
  - Written complaints: All written complaints will be handled in a manner outlined in the Texas Government Code. If fair housing issues are involved, the complaint will be forwarded to the TWC Civil Rights Division.
- Enforcement of the Section 8 Admittance Policy. In June 2000, TDHCA appointed a Section 8 Task Force and charged it to develop a policy for expanding housing opportunities for Section 8 voucher and certificate holders in TDHCA-assisted properties. The policy adopted by the TDHCA Board is as follows:
  - Managers and owners of HTC properties are prohibited from having policies, practices, procedures, and/or screening criteria that have the effect of excluding applicants because they have a Section 8 voucher or certificate.

- The verification of such an exclusionary practice by TDHCA on the part of the owner or manager will be considered a violation and will result in the issuance of a Notice of Violation and, if appropriate, issuance of a Form 8823 to the Internal Revenue Service.
- Any violation of program requirements relative to this policy will also impact the owner's ability to participate in future TDHCA programs.

The Department has adopted rules that mirror this policy in accordance with §2306.269, Government Code, at 10 TAC §1.14.

In addition, through the monitoring of TDHCA-funded developments, the Department requires compliance of all applicable state and federal housing laws including Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act, and the Texas Architectural Barriers Act (§2306.514, Texas Government Code).

ENERGY EFFICIENCY

Energy and water costs are often the largest single housing expense after food and shelter for lower income families. Utility costs typically represent 13 to 44 percent of lower income annual gross incomes and account for nearly one-fourth of total housing costs. Proper use of existing technologies and management practices can reduce these utility costs significantly at a relatively low initial cost, thereby greatly increasing housing affordability for low and moderate income families. Studies have shown that the cost of energy is a major contributing factor to housing abandonment and high mobility.

Through programs that encourage energy efficiency, help consumers control energy costs through education, and provide direct financial assistance for utilities or weatherization, TDHCA addresses an often overlooked expense of housing. In addition, applicants for Department programs are encouraged to consider energy efficiency in their developments.

ENCOURAGE LOCAL AFFORDABLE HOUSING INITIATIVES

The greatest understanding of housing needs is found at the local level. TDHCA concurs that localities should implement specific regulatory reforms related to affordable housing due to their greater awareness of local economic, demographic, and housing conditions; at the same time, the State also believes that it should provide some form of guidance. As the "trustee" of funding for these local entities, it is incumbent upon the State to make information available to local governments regarding potential avenues for the provision of affordable housing. It is important to note that TDHCA does not have regulatory authority over the housing and building industry except for certain developments financed with TDHCA funds. Additionally, as a governmental entity, the Department cannot lobby or attempt to influence the policies related to the governing of the State of Texas. However, TDHCA can act as an information resource and will continue to engage in actions to assist localities in overcoming unnecessary regulatory barriers that may increase the cost of housing.

The Texas Legislature created the Texas Affordable Housing Task Force, comprised of eleven gubernatorial appointees representing the private sector, municipalities, code officials, public and community-based housing organizations, and the general public. The following information comes from the *Report of the Texas Affordable Housing Task Force*.

The Affordable Housing Task Force's purpose was to evaluate and identify federal, state, and local government regulations and policies that unnecessarily increase the cost of constructing or rehabilitating housing, create barriers to affordable housing for low income Texans, and limit the availability of affordable housing. Specifically, the Task Force was asked to evaluate the following: zoning provisions, deed restrictions, impact fees and other development fees, permitting processes, restrictions on the use of affordable housing options, building codes, overlapping government authority over housing construction, environmental regulations, and practices that impede access to affordable housing and finance opportunities.

It was noted by the Task Force that while governments usually pass ordinances, regulations, and laws that are intended to have a positive effect on the community at large, the new regulations may have an adverse effect on the future of housing in their own community. While a single law or ordinance may only add $100 to the price of a home, layering or regulations may create a sharp increase in the final cost of a home or an actual shortage of housing for those low and moderate income consumers. Studies show that even small price increases can affect affordability. For example, the Real Estate Center at Texas A&M University estimates that a $1,000 increase in the cost of a median-priced home will prevent approximately 27,000 Texas households from qualifying to buy the home. Below is a brief synopsis of observations of the Task Force:

- *Zoning provisions*: Because municipalities have zoning authority, they are in the position to shape the type and direction of growth within their boundaries. Ordinances may be passed to encourage affordable housing through measures such as lowering minimum lot sizes, decreasing building set-back requirements, and lowering minimum square footages of homes. However, they can also pass ordinances that drive land and construction costs up to the point that affordable housing cannot be built. Unfortunately, the attitudes of municipalities can be influenced by attitudes of fear and distrust with regard to affordable housing. Testimony to the Task Force indicated that neighborhood groups often oppose affordable housing projects because of concerns that they will drive down property values, increase crime, and put a strain on local resources including schools and roads.
- *Deed restrictions*: Property owners may place a variety of deed restrictions on the development of property. Common deed restrictions include minimum square footage requirements, the type of construction and materials that must be used, and requirements for other amenities such as stone fences, landscaping, etc. They are primarily used to protect property values in a neighborhood by ensuring that certain minimum standards are met. Deed restrictions may be placed on properties through various means including neighborhood associations or property owners before the sale, subdivision, or development of an individual's own property.
- *Impact fees and development fees*: In the mid 1980s, many Texas cities experienced rapid growth. As a consequence, cities encountered difficulties in meeting the demand for city services and infrastructure. To address this problem, legislation authorizing impact fees was passed during the 1987 legislative session. As a condition of permit approval, the legislation authorized the assessment of fees to pay for infrastructure costs. The impact fee bill validated municipal impact fees, specified the type of projects for which the fees could be charged, required municipalities to account for impact fees that were collected, and allowed for public input into the process.
- *Restrictions on affordable housing options*: Construction options have increased over the last 10 years with the advent of new materials and new housing options such as manufactured housing.

Many of these alternatives could have a positive impact on the availability of affordable housing. Currently many of these options are viewed with distrust or are not well known by the general public. With regard to alternative building materials, the effectiveness of these new materials may be able to lower the cost of construction without sacrificing quality, but many municipalities view them with suspicion. Ultimately, municipalities will have to review the appropriateness of allowing these less-expensive materials to be used in affordable housing. Manufactured homes represent 30 percent of the new homes built in Texas in 2000, according to the Texas Real Estate Research Center. While these homes are finding their way into the main stream of the housing market, many new owners find that they face code concerns and the fear of declining property values from their local governments.

- *Building codes*: The adoption of a single code, the Uniform Building Code (UBC), would have several advantages such as reducing costs for manufacturing, architectural plans, engineering, personnel, materials, and inspections. Currently, cities have the authority to adopt building codes and set minimum construction standards. In general, cities adopt one of several nationally-recognized codes, but they may also adopt code amendments to address specific local problems and conditions. In major metropolitan areas of the state, there are adjacent cities that have adopted different codes and amendments. Varying code interpretations can also cause problems; different inspectors often interpret the same code differently. Houses that are built to the same specifications could be passed by one inspector and failed by another. The differing codes and interpretations can be confusing, time-consuming, and costly to builders.
- *Overlapping government authority over housing construction*: In some cases, more than one government entity has authority over a specific part of the building and development process. There are times when this overlapping causes delays and adds to the costs of construction.
- *Environmental regulations*: There are several state and federal regulations that have been passed to protect the environment. At the federal level, such regulations include the Endangered Species Act, the National Pollutant Discharge Elimination System, and the Wetlands regulations. In Texas, rules to protect the environment are promulgated by the Texas Commission on Environmental Quality (TCEQ). These include rules for the installation of septic systems and for development over the Edwards Aquifer. The restrictions associated with the regulations can add to the cost of development.

CAPACITY BUILDING

While the evidence of interest in producing affordable housing is easily documented, the actual capacity of organizations to produce such housing is not as clear. A lack of organizational capacity, especially in the harder-to-reach areas of the state, may explain the hesitancy of smaller communities to attempt to address affordable housing issues.

TDHCA offers technical assistance to organizations interested in addressing the affordable housing needs in their community. Trainings are conducted throughout the year by TDHCA staff on how to apply for and administer Department funds. Additionally, the Department makes information available to the public on trainings being held throughout the state on topics such as strategic and business planning, financial and asset management, board development, outcome measures, coordination, collaboration, networking, and partnership development. The Department hopes to empower organizations to be more competitive in applying for not only TDHCA funding, but also other available federal, state, and local funds.

LOCAL OPPOSITION

Resistance by residents to new development in their neighborhoods is prevalent throughout Texas. It is difficult to dispel the common misperception that affordable housing equates to crime-ridden neighborhoods that will lower the surrounding property values. Even mixed-income properties, such as those funded by Housing Tax Credits, can experience significant opposition.

To address these issues, a workgroup consisting of TDHCA staff, developers, neighborhood groups, local governments/officials, and housing advocates was convened to review policies and procedures regarding public input. In the short term the group focused on rulemaking related specifically to the tax credit and bond programs, as well as public input considered by the Board in relation to a proposed housing development. In the long term, the group will discuss and work through larger policy questions.

The 78th Texas Legislature created a funding mechanism for the Department to have the resources to establish an affordable housing research and information program in which the Department shall contract for

- periodic market studies to determine the need for housing for families of extremely low, very low, and low income in census tracts throughout the state;
- research from qualified professionals to determine the effect of affordable housing developments on property values, social conditions, and quality of life in surrounding neighborhoods;
- independent research in affordable housing design and development approaches that enhance community acceptance of affordable housing and improve the quality of life for the residents of the housing;
- public education and outreach efforts to assist the public in understanding the nature and purpose of affordable housing and the process for public participation in the administration of affordable housing programs.

TDHCA believes that through education and outreach, the Department can help mitigate opposition to affordable housing.

COMPLIANCE MONITORING

It is the function of the Portfolio Management and Compliance Division to oversee the development and enforcement of procedures to ensure compliance with program requirements and contract representations. This is accomplished through program implementation, program development, contract administration, technical assistance (including workshops and other training opportunities), inspections, field visits, and on-going subrecipient monitoring, including long-term compliance.

The Compliance Monitoring Section monitors rental developments during construction and the long-term compliance phases of the various rental housing programs administered by TDHCA. The Compliance Monitoring Section is also responsible for the post-construction and post-rehabilitation monitoring of multifamily properties. Division responsibilities include tracking construction deadlines as well as processing construction extensions. Staff processes deed restriction documents and amendments. Staff is responsible for monitoring long-term occupancy requirements established in restrictive use agreements, program rules, and application representations. During the affordability period, compliance monitors verify that the income of tenants and the rent charged for housing is at or below limits established by programs such as the Affordable Housing Disposition Program (AHDP), Housing Tax Credit Program, HOME Program, Private Activity Multifamily Bond Program, and Housing Trust Fund. Examples of monitoring activities include, but are not limited to, inspections of rental developments during construction and the affordability period, monitoring to determine compliance with program requirements to ensure developments remain affordable, and analysis of management activities. Compliance monitors review necessary records to assure adherence to program requirements and terms of the deed restrictions on single family or multifamily affordable rental housing developments. Monitors perform on-site and desk monitoring reviews and collect annual Fair Housing Sponsor Reports as required under Section 2306.0724 of the Texas Government Code.

POLICY SUMMARY

Table 1A summarizes key policy initiatives described in the previous section and indicates which programs within the Department meet the priority objectives.

Table 1A: Programs and Policy Initiatives

	Preservation of Affordable Housing	Home-ownership	Rural Markets	Extremely Low Income Households	Special Needs	Colonias
HOME Program						
Owner-Occupied Housing Assistance	X	X	X	X	X	X
Homebuyer Assistance		X	X		X	X
Tenant-Based Rental Assistance				X	X

Weatherization Assistance Program			X	X	X	

HOUSING ANALYSIS AND ACTION PLAN

This section of the *2005 State of Texas Low Income Housing and Annual Report* contains an overview of the affordable housing needs in the state, a report on the Department's activities during the last fiscal year, and the Department's plans for addressing housing needs over the next year.

The size and diversity of the Texas population necessitates tailored regional needs assessments and plans. The regional plans following the statewide analysis provide local estimations of housing need and offer customized strategies for meeting the identified needs. The final section summarizes the information in the regional plans.

DATA SOURCES AND LIMITATIONS

The information provided in this section should be considered within the context of its limitations. The Department recognizes that an undistorted assessment of housing need can be found only at the local level based on the direct experience of local households. The following issues should be considered when reviewing the information contained in this report:

- Nuances of housing need are lost when data is aggregated into regional, county, and statewide totals. For example, housing needs in rural communities are often distorted when reported at the county level because housing needs are often very different in rural and urban areas. The large population of urban metropolitan areas can skew the data and mask the needs of the rural areas.
- Data available on the condition of the housing stock, the homeless population, and the housing needs of special needs populations is very limited.

The content and format of the Census-based tables, graphs, and maps provided in this section were derived, in part, from a methodology for housing needs assessment in the *National Analysis of Housing Affordability, Adequacy, and Availability: A Framework for Local Housing Strategies*. The Urban Institute prepared this document for the US Department of Housing and Urban Development (HUD). It provides a methodology with which to describe and analyze local housing markets in order to develop strategies for addressing housing problems and needs. The document served as a guide for the preparation of Comprehensive Housing Affordability Strategy (CHAS) reports. As such, it provides a systematic framework for housing market analysis. HUD collaborated with the Census Bureau to develop special tabulations of the 2000 Census data.

The CHAS database classifies households into five relative income categories based on reported household income, the number of people in the household, and geographic location. These income categories are used to reflect income limits that define eligibility for HUD's major assistance programs, as well as for other housing programs, such as the Housing Tax Credit Program. Households are classified into income groups by comparing reported household income to HUD-Adjusted Median Family Income (HAMFI). The income limits are calculated by household size for each metropolitan area and non-metropolitan county in the United States and its territories. They are based on HUD estimates of median family income with several adjustments as required by statute. The income classifications are extremely low income, very low income, low income, moderate income, and above 95% of HAMFI.

The income limits for metropolitan areas may not be less than limits based on the state non-metropolitan median family income level and must be adjusted accordingly. Income limits must be also adjusted for family size and may be adjusted for areas with unusually high or low family income or housing-cost-to-income relationships.

Unit affordability compares housing cost to local area HAMFI. Affordable units are defined as units for which a household would pay no more than 30 percent of its income for rent and no more than two and one-half times its annual income to purchase. Since HUD's adjusted median family incomes are estimated for a family of four, affordability levels are also adjusted to control for various-sized units based on the number of people that could occupy a unit without overcrowding. This adjustment is made by multiplying the threshold described above by 75 percent for a 0–1 bedroom unit, 90 percent for a two bedroom unit, and 104 percent for a 3+ bedroom unit.

The needs assessment data is augmented with additional information from the perspective of local officials, where available. In 2004 there was a series of Regional Advisory Committee (RAC) meetings held across the state to address regional planning issues. In March 2003, the Department conducted the 2003 State of Texas Community Needs Survey. This survey was designed to provide a better understanding of housing and community development needs, issues, and problems at the state, regional, and local levels. The survey gave local officials, who are most familiar with the unique characteristics of their communities, a voice in determining how Texas's affordable housing, supportive service, and community development needs can be most effectively addressed.

STATE OF TEXAS

The state level housing analysis includes information on demographics, special needs populations, and affordable housing need indicators. Department plans reflect this statewide information as well as the consideration of affordable housing assistance from various sources. This section also includes a report on the Department's statewide FY 2004 performance and targets for FY 2005.

DEMOGRAPHIC CHARACTERISTICS

Texas is one of the fastest growing states in the nation. According to recent Census data, Texas population expanded by nearly a quarter (22.8 percent) between 1990 and 2000, far exceeding the national growth average of 13.2 percent for the same decade. The increase in state population by 3,865,310 persons was the largest of any decade in Texas history. More than one of every nine persons added to the population of the United States in the 1990s was added in Texas.[2]

Projected Population Change and Implications for Housing Need

Looking at long-term demographic projections, it is clear that the demand for affordable and subsidized housing will increase in the coming years.

- The present state population of 20.9 million is expected to surge to 50.4 million by 2040.
- The Anglo population will account for only 3.9 percent of net population growth from 2000 to 2040, meaning that more than 96 percent of the total net increase in Texas population between 2000 and 2040 will be due to the non-Anglo population.
- Anglo population is expected to grow by 10.4 percent between 2000 and 2040, while blacks are expected to increase by 65.0 percent and Hispanics by 348.7 percent.
- The population is becoming older: the median age will increase from 32.3 in 2000 to 38.3 in 2040. The percentage of the population that was 65 or older was 9.9 percent in 2000 but will increase to 20 percent by 2040.
- Growth in the number of households, projected at 162.1 percent over the period 2000-2040, will outstrip population growth: 142.6 percent during the same period.

Expected housing demand is directly linked to projected changes in population characteristics. The current ethnic shift is significant because of the substantial differences between the races in terms of income level. The absolute difference in median household income between Anglos and Blacks was $13,602 in 1989, but $17,857 in 1999; and the Anglo-Hispanic difference was $12,242 in 1989, but $17,289 in 1999. Similarly, the poverty rates of 23.4 percent for Blacks and 25.4 percent for Hispanics were still roughly three times as high as the 7.8 percent of persons in poverty among Anglos. Because of these disparities, households in Texas will become poorer over the coming decades unless the relationship between ethnicity and income somehow changes.[3]

A correlation also exists between income and age. According to the 2000 Census, 13.1 percent of Texans age 65 and older live below the poverty level. Lower incomes combined with rising healthcare costs contribute to the burden of paying for housing. Approximately 30 percent of all elderly households spend

[2] Information for the Housing Analysis comes from the 2000 US Census except where noted otherwise.
[3] Texas A&M University, *A Summary of the Texas Challenge in the Twenty-First Century: Implications of the Population Change for the Future of Texas,* by Steve H. Murdock, Steve White, Md. Nazrul Hoque, Beverly Pecotte, Xiuhong You, and Jennifer Balkan (College Station, TX: Department of Rural Sociology, December 2002).

more than 30 percent of their income on housing, while 14 percent spend more than 50 percent of their income on housing. These statistics take on new urgency when considered alongside the anticipated upsurge in the state's elderly population.

Not only will the demographics of the population be changing, but so will its needs. The faster growth in number of households than in total population is a reflection of the large number of non-Anglos who will enter household-formation ages during this time period. More young families mean an increased demand for housing.[4]

Poverty and Income

According to the 2000 Census, Texas has the eighth highest overall poverty rate in the nation, with a rate of 15.4 percent compared to the national rate of 12.4 percent. Poverty conditions along the Texas-Mexico border warrant special attention. Parts of the region, like McAllen-Edinburg-Mission, suffer from an unemployment rate double that of the state's (12 percent vs. 6.1 percent) and less than half of state's per capita income average. Fifteen counties along the border have a poverty rate of at least 25 percent, almost double the national average. Conditions are particularly acute in the colonias, unincorporated areas along the Texas-Mexico border lacking infrastructure and decent housing. It is estimated that 43 percent of colonia residents live below the poverty level.

The poverty rate for all family households in Texas, different from the overall poverty rate, is expected to increase from the 2000 figure of 11.4 percent to 15.4 percent by 2040.[5] The primary reasons for this are the rapid growth of present minority populations and the dominance in the economy of low-paying, particularly service-industry, jobs.[6] While manufacturing and mining continue to decline, Texas ranked third in the nation in 2003 for service industry job creation. In 2002 the top two most common jobs in Texas were retail salesperson and cashier. Of course, these occupations are not high-paying. According to US Bureau of Labor Statistics data, eight of the top ten most common jobs in Texas earn incomes that fall at least $10,000 below the state median income of $33,770. Considering this fact, the existing income imbalance is clear.

Many families who rely on these low-wage occupations for a living find it difficult to cover all essential expenses. According to a study by the Center for Public Policy Priorities, "a significant proportion of families throughout the state struggle paycheck-to-paycheck to make ends meet." The study examined a typical family's fundamental expenses, such as housing, food, child care, medical costs, transportation, taxes, etc., and compared the total bill to typical wages earned in the 27 Texas Metropolitan Statistical Areas. The study asserts that a family of four in Texas requires a household hourly income of $18 to $22 per hour (depending on the metro area in which the family lives) to simply meet its most basic needs. In a majority of Texas metro areas, however, half of the total employment is in occupations with a median wage under $10 per hour.[7]

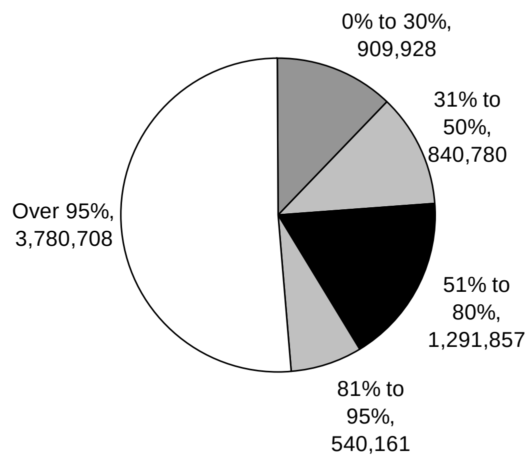
[4] Ibid.
[5] Ibid.
[6] Center for Public Policy Priorities, *Making It: What it Really Takes to Live in Texas* (Austin, TX: Center for Public Policy Priorities, September 2002).
[7] Ibid.

Furthermore, expected economic growth will not necessarily lift the lowest income groups. The Texas Comptroller's Economic Update predicts that the fastest growing sector of the state economy over the next decade will be largely in industries requiring specialized education and skills. These industries include high tech communications, engineering, and research. While this progress may buoy state growth figures, it is unlikely to raise many low income families, who may not have the necessary education or training, from their current positions.

To provide a more detailed breakdown of the population by income level, this report will use the five income groups designated by HUD. Households are classified into these groups by comparing reported household incomes to HUD-adjusted median family incomes (HAMFI). The income level definitions are as follows:

- Extremely Low Income: At or below 30 percent of HAMFI
- Very Low Income: Between 31 percent and 50 percent of HAMFI
- Low Income: Between 51 percent and 80 percent of HAMFI
- Moderate Income: Between 81 percent and 95 percent of HAMFI
- Above 95 percent of HAMFI

Figure 1A: Households by Income Group in Texas, 2000



Source: 2000 CHAS data

Figure 1A indicates the 2000 distribution of households by income group across Texas by number and percentage. It should be noted that a total of 48 percent of all households are in the low income range (0 to 80 percent of HAMFI).

SPECIAL NEEDS POPULATIONS

Various populations within the state of Texas have been identified by the US Department of Housing and Urban Development and the Agency as "special needs populations." It is recognized that the following groups have distinct housing needs and require individual attention with regard to housing assistance.

Alcohol and Drug Addiction

In 2001, the Texas Commission on Alcohol and Drug Abuse (TCADA), now part of the Texas Department of State Health Services, estimated that approximately 1.8 million, or 12 percent, of adults in Texas have an alcohol-related problem, another 227,000 have drug-related problems, and an additional 495,000 have both alcohol and drug-related problems.[8] Of the 46,474 total admissions to TCADA-funded treatment programs during 2003, admitted individuals were most likely to be single males with an average age of 35, an average 12th grade education, and an average annual income of $6,041.[9] The population of persons with alcohol or other drug addiction is diverse and often overlaps with the mentally disabled or homeless populations.

According to the *2000 Texas Survey of Substance Use Among Adults*, a survey of alcohol and drug usage among over 10,000 adults, it was found that urban and suburban residents were more likely to have substance-abuse problems than were individuals in rural areas.[10] Furthermore, respondents who had moved one or more times within the preceding five years were more likely to abuse alcohol or drugs than those who had not relocated.

Supportive housing programs needed for persons with alcohol and/or other drug addiction problems range from short-term, in-patient services to long-term, drug-free residential housing environments for recovering addicts. Better recovery results may be obtained by placing individuals in stable living environments.

For more information on alcohol and drug addiction, contact:

- Texas Department of State Health Services Substance Abuse Services: 1-800-832-9623.

Colonias

According to Section 2306.581 of the Texas Government Code:

> "Colonia" means a geographic area located in a county some part of which is within 150 miles of the international border of this state and that
>
> - has a majority population composed of individuals and families of low income and very low income, based on the federal Office of Management and Budget poverty index, and meets the qualifications of an economically distressed area under Section 17.921, Water Code; or
> - has the physical and economic characteristics of a colonia, as determined by the department.

---

[8] Texas Commission on Alcohol and Drug Abuse, *2000 Texas Survey of Substance Use Among Adults*, by Lynn Wallisch *(*Austin, TX: Texas Commission on Alcohol and Drug Abuse, July 2001), 29, http://www.tcada.state.tx.us/research/AdultHousehold.pdf (accessed August 3, 2004).

[10] Texas Commission on Alcohol and Drug Abuse, *2000 Texas Survey of Substance Use Among Adults, 20.*

It is estimated that the average median household income is between $7,000 and $11,000 for the 1,450 colonias that accommodate over 350,000 residents.[11] Colonia residents are generally unskilled, lack a formal education, and do not have stable employment. It is assumed that many residents work as day-to-day or farm laborers and the unemployment rate ranges from 20 to 60 percent.[12]

According to 2000 US Census data, colonias have a 75 percent homeownership rate. Despite this rate, however, colonia homes are inadequate; 4.9 percent of colonia dwellings lack kitchen facilities and 5.3 percent lack plumbing facilities. It is estimated that 50 percent of colonia residents lack basic water and sewage systems: 51 percent use septic tanks, 36 percent use cesspools, 7 percent use outhouses, and 6 percent use other wastewater systems.[13] Some of these properties may have been purchased with contracts for deed, which are seller-financed transactions that do not transfer the title and ownership of the property to the buyer until the purchase price is paid in full.

Colonia residents have several needs that include increased affordable housing opportunities, such as down payment assistance and low-interest-rate loans, homeowner education, construction education and assistance, owner-occupied home repair, access to adequate infrastructure, and the conversion of remaining contracts for deed to conventional mortgages.

For more information on colonias, contact Susana Garza, Office of Colonia Initiatives, at (512) 475-1592.

Persons with Disabilities

According to the US Department of Housing and Urban Development, 24 CFR 582.5:

> A person shall be considered to have a disability if such a person has a physical, mental, or emotional impairment that
>
> - is expected to be of long-continued and indefinite duration,
> - substantially impedes his or her ability to live independently,
> - is of such a nature that the ability could be improved by more suitable housing conditions.

According to the 2000 US Census, there are approximately 3,605,542 disabled, civilian, non-institutionalized persons over the age of five (or approximately 19 percent of total population) in Texas. Of this figure, 663,300 have a sensory disability (severe vision or hearing impairment), 1,428,580 have a physical disability (condition that substantially limits a physical activity such as walking or carrying), 816,185 have a mental disability (learning or remembering impairment), 487,120 have a self-care disability (dressing, bathing, or getting around inside the home), 1,359,848 have a "going outside the home disability," and 1,651,821 have an employment disability.

Housing opportunities for people with disabilities may be complicated by low incomes. The 2000 census estimates that 553,934 disabled individuals over 5 years of age live below the poverty level in Texas. Many people with disabilities may be unable to work, and receive Supplemental Security Income (SSI) or

[12] Ninfa Moncada, "A Colonias Primer" (A briefing presented to the US Department of Housing and Urban Development, 2001), http://www.nationalmortgagenews.com/nmn/plus93.htm (accessed August 3, 2004).
[13] Moncada, "A Colonias Primer."

Social Security Disability Insurance (SSDI) benefits as their principal source of income. According to *Priced Out in 2002*, an SSI recipient would have to pay an average of 98.3 percent [or $536] of his or her $545 monthly payment to rent a one-bedroom apartment in Texas.[14] According to the HUD definition of affordability that estimates that a household should pay no more than 30 percent of its income on housing expenses, an SSI recipient can afford a monthly rent of no more than $164.

The *Olmstead* Supreme Court decision maintained that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the American with Disabilities Act (ADA). Furthermore, the Fair Housing Act, Section 504 of the Rehabilitation Act, ADA, and Section 2306.514 of the Texas Government Code all provide mandates for accessible residential housing for persons with disabilities. A cost-effective and integrative approach is to promote "adaptive design" or "universal access" housing, which promotes basic, uniform standards in the design, construction, and alteration of structures that include accessibility or simple modification for disabled individuals. While an "adaptable" unit may not be fully accessible at time of occupancy, it can easily and inexpensively be modified to meet the needs of any resident. Another option is to equip homes with special features designed for persons with disabilities, including ramps, extra-wide doors and hallways, hand rails and grab bars, raised toilets, and special door levers.

There is a significant shortage of housing that is physically accessible to persons with disabilities and an even greater shortage of accessible housing that has multiple bedrooms. Many persons with disabilities require larger housing units because they live with family, roommates, or attendants. The lack of multi-bedroom housing furthers their segregation. Moreover, accessible housing is an urgent and present need for not only citizens who currently have disabilities, but for the aging population in the US, which will likely develop disabilities in the future. Accessible housing will become increasingly more important as the ability for self-care and mobility decreases with age.

Victims of Domestic Violence

According to the Texas Family Code, as quoted by the Texas Council on Family Violence (TCFV), "family violence" may be defined as an act intended as a threat or to result in bodily harm by a member of a household towards another household member; abuse by a household member towards a child household member; or dating violence.[15] In 2003, there were 185,299 reported family violence incidents

[14] Technical Assistance Collaborative Inc. and Consortium for Citizens with Disabilities Housing Task Force, *Priced Out in 2002*, by Ann O'Hara and Emily Cooper (Boston, MA: Technical Assistance Collaborative Inc., May 2003), 37, http://www.c-c-d.org/PO2002.pdf (accessed August 6, 2003).
[15] Texas Council on Family Violence, "Know the facts," http://www.tcfv.org/know_the_facts.htm (accessed August 3, 2004).

in Texas.[16] Furthermore, according to a TCFV statewide poll, 47 percent of all Texans report having experienced some form of domestic violence. In fiscal year 2003, the Family Violence Program provided emergency shelter to 29,733 adults and children and nonresidential services to 49,153 adults and children.[17]

The Texas Health and Human Services Commission Family Violence Program funds over 70 shelters for domestic violence victims that offer various services including temporary emergency shelter, hotline services, information and referral, counseling, assistance in obtaining medical care and employment, and transportation services. Some shelters have transitional living centers, which allow victims to stay for an extended period and offer additional services.

Because those entering shelters are generally unemployed, victims must secure employment and alternative housing within shelter time limits. This task is often complicated by a lack of resources for start-up costs, transportation, and affordable childcare options. These victims may be eligible for public housing and Temporary Assistance to Needy Families (TANF) assistance, but waiting lists and application reviews for such programs can be long and provide limited payments. If women are unable to secure housing within their 30-day stay, domestic violence shelters may assist in finding space in homeless shelters. Unfortunately, space and time are also limited in these shelters. The numerous obstacles faced by domestic violence victims often make it difficult to escape abusive situations and achieve self-sufficiency.

Elderly Population

According to the 2000 US Census, 9.9 percent (approximately 2 million) of people in Texas are 65 years of age or older. The Texas Department on Aging (TDoA), now part of the Texas Department of Aging and Disability Services, estimates that by the year 2040, individuals age 60 and over will comprise 23 percent of the population in Texas.[18] TDoA reports that females significantly outnumber males age 60 and over and, though the majority of elderly Texans live in urban areas, rural areas have a higher percentage of elderly relative to the local population.[19]

Nationwide, in 2002, the median income for individual elderly males was $19,436, individual females was $11,406, and families headed by individuals 65 and over was $33,802.[20] According to the 2000 Census, 13.1 percent of seniors age 65 and over in Texas live below the poverty level. Low incomes in

addition to rising healthcare costs may make housing unaffordable. Approximately 30 percent of all elderly households pay more than 30 percent of their income on housing, while 14 percent pay more than 50 percent of their income on housing.[21]

A 2000 American Association of Retired Persons study found that 90 percent of elderly persons expressed a desire to stay in their own homes as long as possible.[22] Of all elderly households, 80 percent own their own homes.[23] However, elderly homeowners generally live in older homes than the majority of the population; in 2001, the median year of construction for homes owned by elderly households was 1963.[24] Due to their age, homes owned by the elderly are often in need of repair, weatherization, and energy assistance.

Some elderly households may require in-house services such as medical treatment, meal preparation, or house cleaning. Community Care Services, administered by the Texas Department of Aging and Disability Services, provides services to meet the needs of elderly and disabled Texans avoiding premature nursing home placement, and proves to be more cost-effective than nursing home care. Statistics show that in fiscal year 2003, 65,202 nursing facility clients were assisted at an annual cost of $1,814,420,111, and 150,696 Community Care Services clients were at an annual cost of $1,332,477,707.[25] Though Medicaid covers nursing home care as well as assisted-living services, such assisted-living services are limited and waiting lists can be lengthy, which can prematurely place low income seniors in nursing home facilities.

Persons with HIV/AIDS

Human Immunodeficiency Virus, or HIV, is the virus that causes AIDS (Acquired Immunodeficiency Syndrome). HIV infects cells and attacks the immune system, which weakens the body and makes it especially susceptible to other infections and diseases. According to the Texas Department of Health, now the Texas Department of State Health Services (DSHS), as of December 2003, there were 48,368 reported persons living with HIV/AIDS in Texas.[26] The majority of these cases were located in Bexar, Dallas, Harris, Tarrant, and Travis Counties. Because of increased medical costs or the loss of the ability to work, people with HIV/AIDS may be at risk of losing their housing arrangements.

DSHS addresses the housing needs of AIDS patients through the Housing Opportunities for Persons with AIDS Program (HOPWA), which is a federal program funded by HUD. In Texas, HOPWA funds provide emergency housing assistance, which funds short-term rent, mortgage, and utility payments to prevent homelessness; and tenant-based rental assistance, which enables low income individuals to pay rent and utilities until there is no longer a need or until they are able to secure other housing. In addition to the

Homeless Populations

The Stewart B. McKinney Homeless Assistance Act of 1987, the legislation that created a series of homeless assistance programs, defined the term "homeless." The following definition is used by the US Department of Housing and Urban Development (HUD) and all other federal agencies responsible for administering McKinney programs:

The term "homeless" or "homeless individual" includes

- an individual who lacks a fixed, regular, and adequate night time residence; or
- an individual who has a primary nighttime residency that is
  - a supervised publicly or privately-operated shelter designed to provide temporary living accommodations;
  - an institution that provides a temporary residence for individuals intended to be institutionalized; or
  - a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

The Texas Interagency Council for the Homeless estimates that approximately 200,000 people in Texas, or about 1 percent of the population, are homeless.[27] However, estimates of homeless populations vary widely; the migratory nature of the homeless population, the stigma associated with homelessness, and the fact that many homeless individuals lack basic documentation all contribute to the difficulty of making an accurate count. Most homeless counts are "point in time" estimates, which do not capture the revolving-door phenomenon of persons moving in and out of shelters over time. Furthermore, the homeless population can be classified into three categories: literally homeless, which describes those who have no permanent residence and stay in shelters or public places; marginally homeless, which includes those who live temporarily with other people and have no prospects for housing; and people at risk of homelessness. People at risk of homelessness generally have incomes below the poverty level, rely on utility and rental assistance, and may be unable to absorb unexpected events such as the loss of a job or serious illness.

The following homeless subpopulations have special characteristics. Though these subpopulations may have different characteristics, the two main trends significant in the rise of homelessness can be connected to the increase in poverty (characterized by the decline in employment opportunities and public assistance programs) and a shortage of affordable housing.[28]

[28] National Coalition for the Homeless, *Why are People Homeless?* NCH Fact Sheet #1 (Washington, DC: National Coalition for the Homeless, September 2002), 1, http://www.nationalhomeless.org/causes.html (accessed August 5, 2004).

Homeless Families with Children

The number of homeless families with children has increased significantly over the past decade. A 2003 US Conference of Mayors survey of 25 American cities found that homeless families comprised 40 percent of the homeless population.[29] Approximately 90 percent of homeless families are homeless due to a crisis.[30] Many parents with young children cannot work because of a lack of affordable childcare, which hinders their ability to earn an income to pay for suitable housing.

Homeless Youth

An estimated 12 percent of the homeless population is aged 13 to 24.[31] Of this age group, approximately 40 percent has a history of sexual abuse, 46 percent report mental illness, 25 percent have problems with alcohol abuse, and 33 percent spent time in juvenile detention. Furthermore, 28 percent have been in foster care at least once. Due to the specific challenges faced by homeless youth, they may particularly benefit from the provision of essential services, including job training, education, and employment services.

Homeless Minorities

A 2003 US Conference of Mayors survey of 25 American cities found that 49 percent of the homeless population was African American, 35 percent was white, 13 percent was Hispanic, 2 percent was Native American, and 1 percent was Asian.[32] However, the ethnic makeup of the homeless population will vary by geographic area.

Homeless in Rural Areas

TDHCA estimates that 1 percent of the rural population is homeless, or 32,000. Rural areas typically have fewer jobs and shelters than urban areas, which makes it especially difficult for homeless persons. The NCH reports that homeless persons in rural areas are more likely to be white, and homeless farmworkers and Native Americans are also generally found in rural areas.[33] Migrant farmworkers, because of their mobile lifestyle, extremely low incomes, and lack of affordable housing, are at a high risk for homelessness.

Homeless Victims of Domestic Violence

Battered women who live in poverty are often forced to choose between staying in abusive relationships and homelessness. According to the NCH, half of women with children experiencing homelessness left their last place of residence because of domestic violence.[34]

Homeless Persons with Mental Illnesses and Disabilities

According to the Texas Interagency Council for the Homeless, approximately 25 percent of homeless individuals suffer from a serious mental illness, and more than 65,000 persons with disabilities did not

---

[29] National Coalition for the Homeless, *Who is Homeless?* NCH Fact Sheet #3 (Washington DC: National Coalition for the Homeless, May 2004) http://www.nationalhomeless.org/who.html (accessed August 20, 2004).

[33] National Coalition for the Homeless, *Who is Homeless?*
[34] National Coalition for the Homeless, *Who is Homeless?*

have a predictable means of shelter in 1999.[35] The general lack of affordable housing and the poverty of this population make it difficult for homeless persons with mental illness to access social service programs and leaves them highly susceptible to homelessness.

Elderly Persons

According to 2000 Census data, of those below the poverty level in Texas, an estimated 13.1 are age 65 and over. Proportionately, this makes the elderly the poorest of all Texans and leaves them with a higher risk of becoming homeless.

Homeless Veterans

According to the Department of Veteran's Affairs[36] approximately, on any given day, as many as 250,000 veterans are living in shelters or on the street. Of the veterans who are homeless, approximately 56 percent are African American or Hispanic, 45 percent suffer from mental illness, and 70 percent suffer from alcohol or drug abuse problems.

Chronically Homeless Persons

According to the Texas Homeless Network, 27 percent of single homeless adults are chronically homeless, meaning that these persons have been homeless for an average of four years.[37] Furthermore, these persons have high rates of alcohol or drug abuse and mental illness.

Homeless Persons with HIV/AIDS

The NCH estimates that 3 to 20 percent homeless people are HIV positive.[38] People with HIV/AIDS may lose their jobs because of discrimination or have high health care costs, leading to homelessness. This population may require supportive health services or community care programs in addition to housing assistance.

Homeless Persons with Chronic Substance Abuse

The US Conference of Mayors survey reports that 30 percent of homeless persons has an addiction disorder.[39] TCADA, now part of the Texas Department of State Health Services, reports that, of adult clients admitted to TCADA-funded programs in 2003, 12 percent were homeless.[40] Homeless persons with substance abuse problems may require supportive services.

The "continuum of care" approach to fighting homelessness is based on the understanding that homelessness is not caused merely by a lack of shelter, but involves a variety of underlying unmet physical, economic, and social needs. A comprehensive system of services as well as permanent housing is needed to help homeless individuals and families reach independence using a combination of emergency shelters, transitional housing, social services, and permanent housing. The continuum of care

Migrant Farmworkers

According to the US Department of Health and Human Services *Migrant and Seasonal Farmworker Enumeration Profiles Study*, a seasonal farmworker describes an individual whose principal employment (at least 51 percent of time) is in agriculture on a seasonal basis and who has been so employed within the preceding twenty-four months; a migrant farmworker meets the same definition, but establishes temporary housing for purposes of employment.[41] The US Department of Health and Human Services estimates that there are 362,724 migrant and seasonal farm workers and families residing in Texas.[42] Of this population, 26 percent reside in Cameron, Hidalgo, and Starr Counties.

The National Agricultural Workers Survey, a national survey of 4,199 farmworkers conducted between 1997 and 1998, found that 61 percent lived below the poverty level.[43] The median annual income for individual workers was less than $7,500 and migrant families earned less than $10,000. Sixty percent of workers held only one farm job, which lasted only 24 weeks out of the year. Despite the short employment duration and low incomes, only 20 percent of workers received unemployment benefits and 10 percent received Medicaid or food stamps.

Farmworkers have a particularly difficult time finding available, affordable housing because of extremely low and sporadic incomes and mobility. Many of the small, rural communities where migrant workers may seek employment do not have the rental units available for the seasonal influx. Overcrowding and substandard housing are significant housing problems for farmworkers.[44] In addition, migrant workers may not be able to afford security deposits, pass credit checks, or commit to long-term leases.

AFFORDABLE HOUSING NEED

When analyzing local housing markets and developing strategies for meeting housing problems, HUD suggests the consideration of several factors. These factors include how much a household spends on housing costs, the physical condition of the housing, and whether or not the household is overcrowded. The following table reveals the number and percentage of households with at least one housing need by income category and household type.

Figure 2A: Households with Housing Need by Income Group

		Renter Households			Owner Households		
		At Least One Problem	Total Households	Percent with At Least One Problem	At Least One Problem	Total Households	Percent with At Least One Problem

Physical Inadequacy (Lack of Kitchen and Plumbing Facilities)

The measure of physical inadequacy available from the CHAS database tabulation of the 2000 Census is the number of units lacking complete kitchen and/or plumbing facilities. While this is not a complete measure of physical inadequacy, the lack of plumbing and/or kitchen facilities can serve as a strong indication of one type of housing inadequacy. Table 3A demonstrates that among the physically inadequate housing units for households under 80 percent of HAMFI, 44 percent are affordable to extremely low income households.

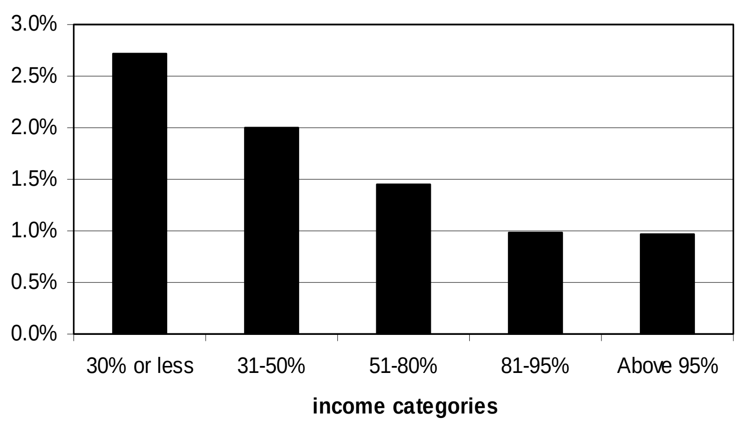
Table 3A: Units Lacking Kitchen and/or Plumbing Facilities by Affordability Category, 2000

	Number	Percent
0% to 30%	25,817	44%
31% to 50%	15,907	27%
51% to 80%	16,341	28%
Total	58,065	100%

Source: 2000 CHAS Database

Slightly more than 1 percent of all renter households in Texas lack complete kitchen or plumbing facilities. The following table shows the distribution of this problem by income group. Households in the lowest income group, less than 30 percent HAMFI, have the highest incidence of physically inadequate housing.

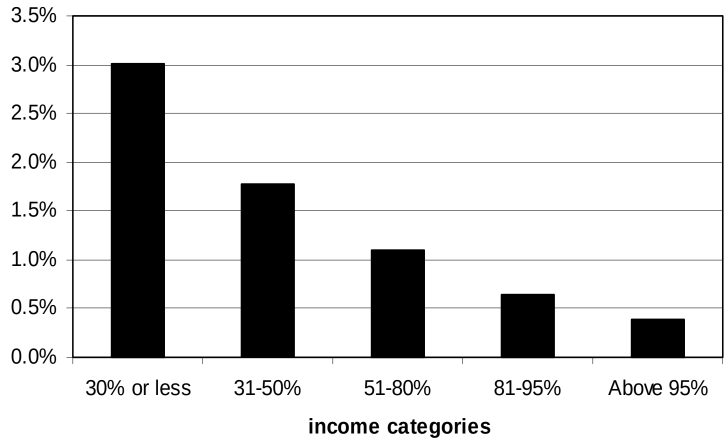
Figure 3B: Renter-Occupied Units Lacking Complete Kitchen/Plumbing, by percent



Source: 2000 CHAS data

As is the case with renter households, inadequate kitchen and plumbing is a greater problem for the lowest income categories of owner households. A full 3 percent of owner households earning below 30 percent HAMFI lack full kitchen or plumbing facilities.

Figure 3C: Owner-Occupied Units Lacking Complete Plumbing/Kitchen, by percent

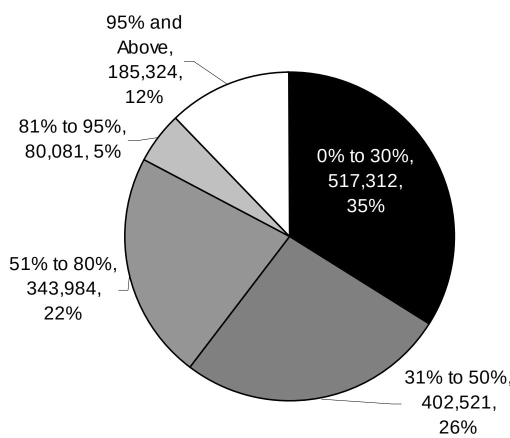


Source: 2000 CHAS data

Excess Housing Cost Burden

An excess cost burden is identified when a household pays more than 30 percent of its gross income for housing costs. When so much is spent on housing, other basic household needs may suffer. Figure 4A shows the number and percentage of households with excess housing cost burden by income group.

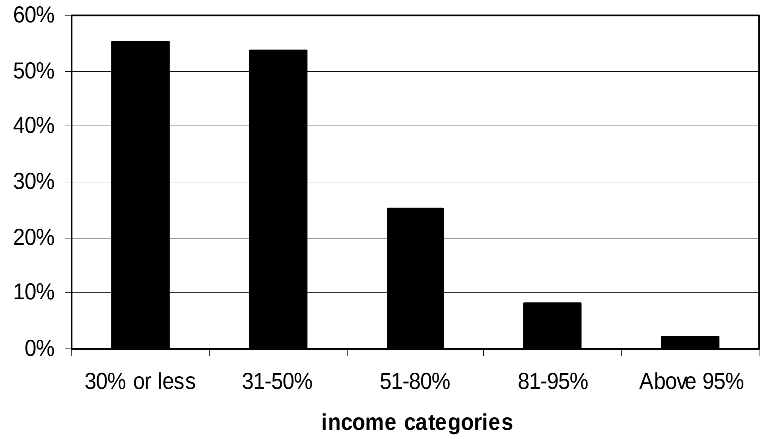
Figure 4A: Excess Housing Cost Burden by Income Group, 2000



Source: 2000 CHAS Database

As the following graph shows, a majority of renter households in the lowest two income categories, totaling more than 540,000 households, is burdened by paying an excess portion of income toward housing. This is much greater than in the highest income category, above 95 percent HAMFI, where only 2.2 percent of households experience the problem.

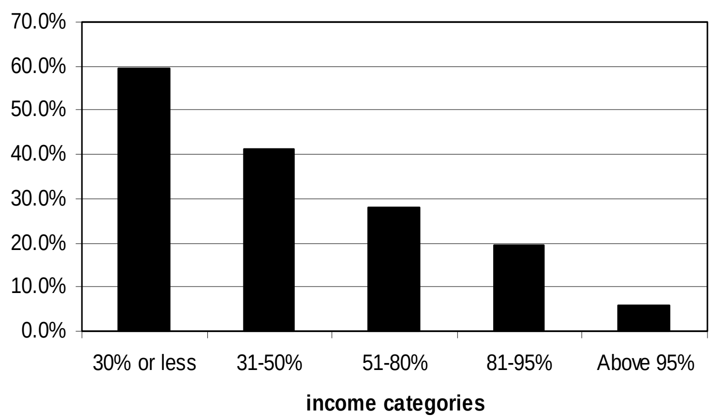
Figure 4B: Renter Households with Excess Housing Cost Burden (>30% of Income), by percent



Source: 2000 CHAS data

As shown in the following graph, excess housing cost burden affects 59.3 percent of owner households in the lowest income category. This figure, representing a majority, is much higher than the 5.7 percent of households affected in the highest income category. The graph illustrates the direct correlation between income category and a household's likelihood of experiencing this problem.

Figure 4C: Owner Households with Excess Housing Cost Burden (>30% of Income), by percent

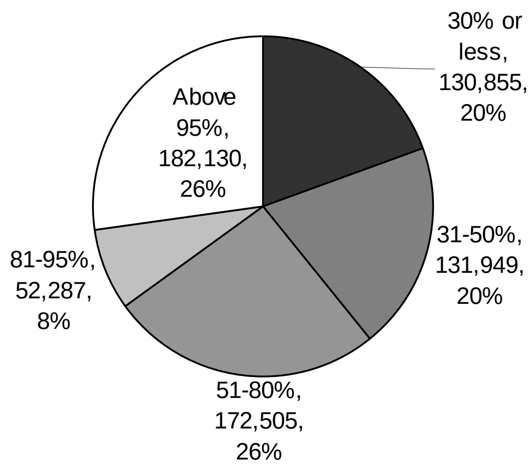


Source: 2000 CHAS data

Overcrowding

Overcrowded housing conditions occur when a residence accommodates more than one person per room. Overcrowding may indicate a general lack of affordable housing in a community where households have been forced to share space, either because other housing units are not available or because the units available are too expensive. Figure 5A shows the incidence of overcrowded households by income group.

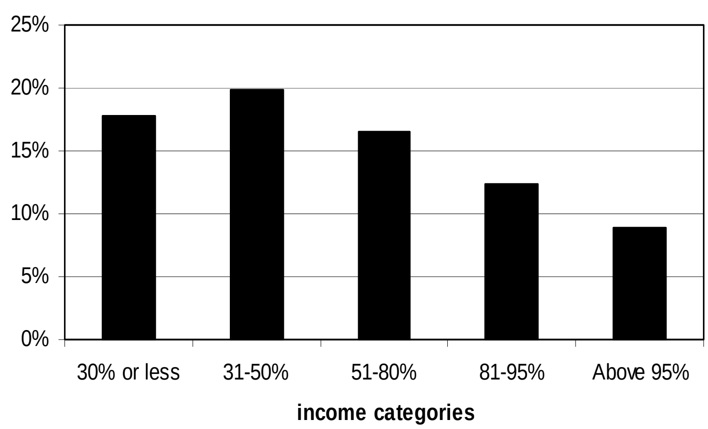
Figure 5A: Overcrowded Households by Income Group, 2000



Source: 2000 CHAS Database

Lower income renter households experience overcrowded conditions more frequently than higher income households. Almost 18 percent of renter households in the extremely low income category and 19.9 percent of renter households in the low income category are afflicted by overcrowding.

Figure 5B: Renter Households with Incidence of Overcrowding, by percent



Source: 2000 CHAS data

Lower income owner households also experience overcrowded conditions more frequently than higher income owner households. More than 21 percent of owner households earning less than 50 percent HAMFI live in overcrowded conditions compared to 11.4 percent of owner households over 80 percent HAMFI.

Figure 5C: Owner Households with Incidence of Overcrowding, by percent

Housing Availability and Affordability

The following figures compare demand and supply of affordable housing by looking at the number of households and housing units in different affordability categories. For each income category, it has been assumed that households are matched to units in their affordability range. In actuality, however, higher income households often reside in units that could be affordable to the lowest income households. For example, households that have incomes greater than 80 percent of the median income greatly outnumber the housing units in this specific affordability category. Households in this category can afford units in any of the defined affordability categories. Non-low-income households often limit the supply of affordable housing units available to low-income households. Therefore, estimates of housing shortfalls should be treated as lower-bound estimates, and estimates of housing 'surplus' are undoubtedly overstated.

Table 6A describes the housing market interaction of various income groups and housing costs. The table shows the income classifications of the occupants of housing units. The table also illustrates the housing market mismatch between housing units and income groups. For example, very low income households (0-50 percent of HAMFI) account for only about one-third of all the occupants of housing that is affordable to them. All low income households (0-80 percent of HAMFI) make up only 48 percent of all households occupying housing affordable to them. This table illustrates housing market mismatches as well as an implicit excessive cost burden for those households that are residing in units beyond their affordability category.

Table 6A
Occupied Affordable Housing Units by Income Group of Occupant, 2000
by percentage of HAMFI

Number of Renter units	Total	50% or less	51-80%	Above 80%
Affordable to 0-50% HAMFI	1,112,083	588,198	246,476	277,409
Affordable to 51-80% HAMFI	1,245,842	346,703	301,491	597,648
Affordable to >80% HAMFI	305,135	52,391	41,485	211,259

Local Perception

TDHCA acknowledges that the greatest understanding of housing needs is found at the local level. TDHCA continuously strives to improve the methods used to identify regional affordable housing needs.

Regional Advisory Committees

In 2004 there was a series of Regional Advisory Committee (RAC) meetings held across the state to address regional planning issues. Each RAC meeting was advertised, coordinated, and facilitated by a Regional Development Coordinator (RDC). The statewide network of RDCs is part of a joint planning effort between 11 councils of governments and TDHCA. TDHCA works with an RDC in each service region to facilitate the RAC meetings, provide technical assistance, gather data on regional housing needs and resources, and help build the region's network of housing organizations.

Rather than trying to identify and address all regional housing issues, this year's RAC meetings focused on gathering additional information on the most prevalent issues identified last year. Additionally, slightly more emphasis was placed on discussing issues over which TDHCA and the COGs have some control. The following four topics were recommended by TDHCA for discussion at the meetings: communication, populations with special needs, funding distribution, and education. The regional plans discuss the RAC meetings in greater detail.

State of Texas Community Needs Survey

In March 2003, TDHCA distributed over 2,000 copies of the Community Needs Survey (CNS) to cities, counties, local housing departments, public housing authorities, and US Department of Agriculture Rural Development field offices. Local community action agencies were also contacted for their expertise on homeless issues and other community development topics. For TDHCA, the survey represents the opportunity to gather local input on housing needs, preferences, and regional characteristics. Information from the survey is also used as a primary component of the Affordable Housing Needs Score (AHNS), the location score in several housing program funding applications.

Approximately 78 percent of Community Needs Survey respondents feel that there is a severe or significant affordable housing problem in their area.[45] There is a slight preference statewide for owner-occupied housing assistance over rental assistance. Among the owner-occupied assistance activities, renovation is ranked highest in importance, followed by purchase assistance and new housing development. New rental housing development and the renovation of existing multifamily housing are more important than rental payment assistance. The regional results from the CNS are incorporated into the regional plans. A final report on the survey, *Report on the 2003 State of Texas Community Needs Survey*, is available from the Center for Housing Research, Planning, and Communications.

STATE HOUSING SUPPLY

The 2000 US Census reported 8.2 million housing units in Texas, of which 90.6 percent are occupied. The number of housing units increased 16 percent from 7.0 million units that were on the ground in 1990. The breakdown of occupied units by type is 4.7 million owner occupied (a 28 percent increase over 1990) and 2.8 million renter occupied (a 13 percent increase over 1990). The average household size for owner-occupied units increased to 2.87 persons per unit in 2000 as compared to 2.85 units in 1990. The average household size for renter units decreased slightly to 2.53 persons per unit in 2000 as compared to 2.55 units in 1990.

There is a shortage of affordable housing in the extremely low, very low, low, and moderate income brackets. This is primarily caused by the private sector's concentration of development, both single family and multifamily development, in larger metropolitan areas and targeting higher income individuals and families. The explosive growth of the metropolitan areas as well as the lack of new construction during the late 1980s and early 1990s created a huge demand for housing at all income levels. Due to higher

[45] The response rate for the 2003 CNS was 37 percent.

margins associated with housing product targeted for the higher income population, developers focused production to fill the demand at the upper-end of the income spectrum.

A significant portion of Texas's affordable housing portfolio consists of HUD-financed or HUD-subsidized properties—many of which are at risk of becoming market rate properties. The most serious of the "at-risk" portfolios is the project-based Section 8 portfolio. The critical nature of this portfolio stems from the number of units in the portfolio and the income segment served. This portfolio contains approximately 49,000 units of deeply subsidized units. Roughly 21,000 of these units (44 percent of the portfolio) are classified as "opt-out" eligible. Another 10,000 units are "marginal" opt-out candidates based on rents fairly close to market rents. The remaining units are classified as restructuring candidates that may or may not enter HUD's Mark-to-Market Program.

Almost 67 percent of the housing units in Texas are single family units, 14 percent are multifamily up to 19 units, and 10 percent are within multifamily structures with 20 units or more. An additional 9.4 percent are mobile homes, RVs, or boats.

Table 7A: Housing Type, 2000

	Total	Percent
Housing Units	8,157,575	
One Unit	5,420,910	66.50%
2 to 19 Units	1,151,599	14.10%
Over 20 Units	819,101	10.00%
Mobile Homes	731,652	9.00%
Boats, RVs	34,313	0.40%

Assisted Housing Inventory

The Department has assisted approximately 179,600 multifamily units since 1992. Over the same time period, there have been 28,700 families assisted with single family programs. These totals do not include approximately 2,200 Section 8 tenant-based rental vouchers that are administered annually by the Department.

Table 7B provides a summary of the current public housing authority inventory in Texas. Included in this list are households that receive tenant-based rental assistance.

Table 7B: Public Housing Authority Units, 2004

	Total	Percent
Public Housing/Indian Housing	63,344	29.3%
Section 8 Vouchers	134,845	62.4%
Section 8 New Construction	5,641	2.6%
Section 8 Moderate Rehabilitation	2,915	1.3%
FmHA Farm Labor Housing	1,018	0.5%
FmHA Rural Rental	970	0.4%
FmHA/Section 8 Assisted	653	0.3%
Other	5,824	2.7%
Homeownership	738	0.3%
Total Public Housing Authority Units	215,948	

Source: Texas Housing Association

There have been 62,408 multifamily units produced by the Texas State Affordable Housing Corporation and local housing finance corporations in Texas, according to HFC responses to the 2004 Housing Finance Corporation Report by TDHCA. There have been 14,545 single family mortgages produced by the HFCs, or a total of $1.032 billion.

Department Performance

This section reports on agency performance for fiscal year 2004 and includes a description of funding allocations, amounts committed, target numbers, numbers served for each program in fiscal year 2004; and projected funding and target numbers for fiscal year 2005. This section also reports on the Strategic Plan Goals for FY 2004.

The Department committed $592,454,108 to housing and community affairs programs that predominantly benefit extremely low, very low, and low income families and individuals (see Tables 8A and 8B). The target performance number was 97,545 households and 440,000 individuals; the actual number served was 107,621 households and 422,331 individuals. Multifamily development accounted for 49 percent of the total dollar amount committed during the past year; the next largest activity was single family financing and homebuyer assistance with 23 percent of the total dollar amount committed. Community affairs was the third largest with almost 14 percent of the total committed amount. More than 95 percent of the total funds committed went to assist extremely low, very low, and low income families and individuals.

The activity categories in the tables below describe the broad range of Department activities and provide general groupings for analysis. The multifamily development category includes activities that support multifamily development, such as the funding of projects, capacity building, and predevelopment funding. All activities related to the acquisition, rehabilitation, and preservation of multifamily units are classified in the multifamily rehabilitation category. Rental payment assistance is tenant based, direct payment assistance. The single family development category includes all funding for housing developers, nonprofits, or other housing organizations to support activities associated with the development of single family housing. The single family financing and homebuyer assistance category includes activities related to the process of buying a home, such as mortgage financing, and down payment assistance. Single family owner-occupied assistance assists current homeowners requiring home rehabilitation and reconstruction. The community affairs category is comprised of all activities surrounding community services and energy assistance; this category includes the Colonia Self-Help Centers.

The program groupings are largely self-explanatory; only a few comments are necessary. The Single Family Bond Program includes the First Time Homebuyer Program and the Down Payment Assistance Program. The Office of Colonia Initiatives receives much of its funding from internal sources; for this reason, the totals for most of the OCI activities are not included in the grand total. The only exception is the funding for the Self-Help Centers, which is external and included in the grand total.

Table 8A: Total Department Funding and Performance for FY 2004

[1] All Programs total includes 440,000 individuals in the target number and the rest are households. The number served and very low income totals include 422,331 individuals.
[2] HTC funding includes $41,186,736 the nine percent tax credits, and $31,465,747 four percent tax credits.The total number served includes 11,421 four percent units.
[3] Most of OCI funding is internal except for the self-help centers. OCI activities funded internally are not included in the grand totals. The total number served includes 1,135 households statewide served by technical assistance.

[4] Target numbers and numbers served is individuals, not households.

Assistance to the Neediest Individuals and Families

The distribution of the Department's housing resources in fiscal year 2004 showed a clear prioritization of assistance to individuals and households with the most need; see Table 9A. The vast majority of households served by the Department were classified as extremely low, very low, and low income. These three income categories account for over 99.3 percent of households assisted by the Department in fiscal year 2004.

Table 9A: Housing Assistance by Income Category

	Total Committed FY2004		Extremely Low-Income (0% to 30% AMFI)		Very Low-Income (31% to 60% AMFI)		Low-Income (61% to 80% AMFI)		Moderate-Income (Greater than 80% AMFI)	
	Amount	Households	Amount	Households	Amount	Households	Amount	Households	Amount	Households
HOME Program	$ 74,778,030	2,818	$ 36,009,996	1,295	$ 13,903,535	647	$ 24,864,499	876		
Housing Trust Fund	$ 3,709,559	325	$ 32,328	12	$ 3,677,231	313				
Housing Tax Credit	$ 72,652,483	18,399	$ 2,763,344	481	$ 69,889,139	17,918				
Single Family Bond	$ 128,831,420	1,695	$ 3,421,241	111	$ 60,406,481	1,054	$ 37,480,236	324	$ 27,523,462	206

Section 8	$ 9,642,497	2,035	$ 8,662,409	1,701	$ 980,088	334				
Total	$ 510,858,989	29,080	$ 50,889,319	3,600	$ 370,101,474	24,074	$ 62,344,735	1,200	$ 27,523,462	206
Percent of Total			10.0%	12.4%	72.4%	82.8%	12.2%	4.1%	5.4%	0.7%

The vast majority of households and individuals served through CEAP, WAP, ESGP, and CFNP earn less than 30 percent area median family income. However, federal tracking of assistance from these programs is based on poverty guidelines, which do not translate easily to an AMFI equivalent. For conservative reporting purposes, assistance in these programs is reported in the very low income category.

Strategic Plan Goals

The following goals demonstrate TDHCA's commitment to serving households with the greatest need. These goals are reflective of the performance measures, as outlined in the Legislative Appropriations Act, the TDHCA *Strategic Plan*, and the *State of Texas Consolidated Plan*.

Goal 1: TDHCA will increase and preserve the availability of safe, decent, affordable, and integrated housing for very low, low, and moderate income persons and families

Housing Trust Fund. The target number of extremely low, very low and low income households benefiting from HTF loans and grants was 1,686 and the number served was 325. Almost 99 percent of the total funding went to very low income families and the rest went to extremely low income families.

Home Program. The target number of extremely low, very low, and low income households benefiting from HOME Investment Partnerships Program loans and grants was 2,300. The actual number served was 2,812, or 122 percent of the goal. In total, 48 percent of HOME Program funds were directed to extremely low income households and 19 percent were directed to very low income households. The remaining funds were directed to low income households.

Section 8 Program. The target number of rental assistance through Section 8 certificates and vouchers for extremely low and very low income households and individuals was 2,200. The actual number of households served was 2,035, representing 88 percent of the goal. Extremely low income families comprised 84 percent of the households served and 16 percent were very low income.

Housing Tax Credit Program. The target number units funded through federal tax incentives for extremely low, very low, and low income households in FY 2004 was 10,763. The actual number of units developed was 18,399. Of this total, 6,978 units are through federal tax funds and 11,421 are from the Tax-Exempt Bond Program. There were 481 units set aside for extremely low income households, and the remainder were for very low income households.

Single Family Mortgage Revenue Bond Program. The target number of extremely low, very low, and low income households and individuals receiving loans through the Single Family MRB Program was 1,560. The actual number served was 1,422, or 91 percent of the goal. The target number of moderate-income families was 210; the actual number served was 273. Of the 1,695 households served through the SF MRB Program, 21 percent were extremely low income, about 47 percent were very low income, 26 percent were low income, and the remaining 21 percent were moderate income.

Multifamily Mortgage Revenue Bond Program. The target number of federal mortgage loans through the Multifamily MRB Program for the acquisition, rehabilitation, construction, and preservation of multifamily rental units for very low, low, and moderate-income families was 1,999. The actual number of loans was 3,808. All of the units in FY 2004 were for very low income families.

Goal 2: TDHCA will target its housing finance programs resources for assistance to extremely low income households

The annual target is $30,000,000 of the division's total housing funds towards assistance for extremely low income families and individuals. The housing finance divisions exceeded this goal and provided $50,889,319 in funding for extremely low income households in FY 2004.

Goal 3: TDHCA will target its housing finance resources for assistance to very low income households

The annual target is 20 percent of the division's total housing funding applied towards assistance for families and individuals earning between 31 percent and 60 percent of the area median family income. The division exceeded this goal and committed 72 percent of its funding for very low income households.

Goal 4: TDHCA will provide contract for deed conversions for families who reside in a colonia and earn 60 percent or less of the applicable area median family income

The target is to spend no less than $4,000,000 for the 2004–2005 biennium for the sole purpose of contract for deed conversions. A total of $4,000,000 of HOME funds will be allocated in FY 2004-2005. The Department released a $2,000,000 NOFA in the fall of 2003 of which $1,300,000 was awarded to three organizations. The Department will release another NOFA in FY 2005 in the amount of $2,700,000 to fulfill the $4,000,000 requirement.

Goal 5: TDHCA will assist extremely low and very low income households or individuals with costs associated with energy-related improvements, expenses, or emergencies that may lead to homelessness

Comprehensive Energy Assistance Program. The target number of households assisted through the Comprehensive Energy Assistance Program for FY 2004 was 69,736. The actual number of households served was 70,887; this is 102 percent of the target number.

Weatherization Assistance Program. The target number of units weatherized was 3,734; the total number weatherized was 5,452. This represents 146 percent of the target number.

Goal 6: TDHCA will ensure that affordable housing programs are in compliance with federal and state program mandates

Portfolio Management and Compliance Division. The target number of on-site reviews conducted by the Portfolio Management and Compliance Division for FY 2004 was 659; the actual number conducted was 888, or 135 percent of the total. The target number of financial reviews was 644; the actual number conducted was 231, 36 percent of the target amount. The target number of single audit reviews was 332; the actual number completed was 66 percent of the total, or 218 reviews.

Goal 7: TDHCA will commit funding resources to address the housing needs and increase the availability of affordable, accessible, and integrated housing for persons with special needs

HOME Program. The Goal for FY 2004 was to award 20 percent of the total HOME project allocation to applicants that target persons with special needs. The HOME Program awarded $32,622,456 to applicants that target persons with special needs, or 46 percent of the total project allocation. The number of units produced is 943, 33 percent of the total HOME units.

Housing Trust Fund. The goal for FY 2004 was to dedicate no less than 10 percent of the HTF project allocation for applicants that target specific persons with special needs. The HTF funded 100 units for persons with special needs, or 31 percent of the total units for FY 2004.

Multifamily Mortgage Revenue Bond Program. The goal was to dedicate no less than 5 percent of Multifamily MRB Program units for persons with special needs. The Multifamily MRB Program funded 600 units for persons with special needs, 16 percent of the total 3,808 units.

Goal 8: TDHCA will compile information and accurately assess the housing needs and the housing resources available to persons with special needs

TDHCA completed and analyzed data from the 2003 Community Needs Survey, which, among other housing needs–related questions, requested local governments to indicate the housing needs of various special needs populations. This information is used in conjunction with Census data in the formulation of Department policies and scoring for its housing programs.

In addition, the Department made its property inventory available on its website in 2002. The easy-to-use database is searchable by city and county and includes basic property information, the number of adapted units, rent amounts, and property contact information. The Department is working on a system that will allow property owners to voluntarily update information related to the availability of accessible units on a real-time basis. This information will also be available on the Department's website.

Goal 9: TDHCA will increase collaboration between organizations that provide services to special needs populations and organizations that provide housing

Persons with Disabilities.

- TDHCA Disability Advisory Committee: The Department established a Disability Advisory Committee (DAC) in 2002 to advise the Department's Board on issues related to persons with disabilities. The members of the DAC represent organizations with experience providing services to persons with disabilities.

- Promoting Independence Advisory Board (PIAB): TDHCA staff serves on the Health and Human Service Commission's PIAB, along with representatives from other State agencies and consumer groups. The Board coordinates services to promote the integration into the community of persons residing in institutions.
- Project Access: TDHCA actively promotes the coordination of disabled consumers with housing providers through Project Access vouchers. Consumers and their advocates work directly with local service and housing providers to address their needs as they integrate into the community.
- PHA Project: Department staff served on the oversight committee of this grant funded in part by the Texas Council for Developmental Disabilities. Activities include the provision of training and technical assistance to public housing authorities to increase the number of integrated housing units available to persons with disabilities.

Elderly. TDHCA is a member of the Texas Department on Aging and Disability Services (DADS) Agency Policy Advisory Committee. This Committee is comprised of various state agencies that serve the elderly, as well as industry experts that provide services to the elderly.

Homeless. TDHCA is the lead agency in the Texas Interagency Council for the Homeless (TICH). TICH is charged with surveying and evaluating services for the homeless in Texas; assisting in the coordination and provision of services for homeless person throughout the state; increasing the flow of information among service providers and appropriate authorities; developing guidelines to monitor services for the homeless; providing technical assistance to the housing finance divisions of TDHCA in assessing housing needs for persons with special needs; establishing a central resource and information center for the state's homeless, and developing a strategic plan to address the needs of the homeless in cooperation with TDHCA and the Health and Human Services Commission. Through the Texas Homeless Network, TDHCA also supports other activities that address homelessness, including providing technical assistance to develop and strengthen homeless coalitions throughout Texas; distributing a statewide bi-monthly newsletter on homelessness; maintaining an information resource center; conducting Continuum of Care Technical Assistance and Training workshops; and sponsoring an annual statewide conference on homeless issues.

Colonias. In 2001, the 77th Texas Legislative amended the Texas Government Code, Chapter 2306, Subchapter Z, which requires the Department's Board of Directors to appoint members to the Colonia Resident Advisory Committee (C-RAC), which is to include two representatives from each county. The C-RAC members meet 30 days prior to making an award to a Colonia Self-Help Center. The C-RAC has been instrumental in voicing the concerns of the targeted populations and has helped both the Department and the Colonia Self-Help Centers develop useful tools and programs to address the needs of colonia residents.

Goal 10: TDHCA will discourage the segregation of persons with special needs from the general public

The Department, with the assistance of the TDHCA Disability Advisory Committee, developed an integrated housing policy. The Department adopted the policy as a rule for all Department housing programs in 2003.

Goal 11: TDHCA will improve the living conditions for the poor and homeless

Community Affairs. The target number of persons assisted through the homeless and poverty–related funds administered by the Department was 440,000. The total number of persons assisted through the Emergency Shelter Grants Program was 125,766 and the total number served by the Community Services Block Grant Program was 296,565. The total number assisted through the Department's homeless and poverty–related funds for FY 2004 was 422,331.

The target number of persons assisted that achieve incomes above poverty level was 1,314. The total number of people that transitioned out of poverty with the assistance of community action agencies working with the Department was 2,068.

Emergency Shelter Grant Program. The target number of homeless shelters assisted for FY 2004 was 70; the actual number assisted was 77, 110 percent of the target number.

Other Funding

It is important to note that TDHCA is only one of many housing and community service providers that distribute housing and community services funding across the state. These other agencies and departments include the US Department of Housing and Urban Development, USDA Rural Development, Texas Bond Review Board, Texas State Affordable Housing Corporation, Public Housing Authorities, local participating jurisdictions, and local housing finance corporations. Table 8C shows the housing funding available through these agencies over the course of a typical year.

Table 8C: Non-TDHCA Sources of Housing Funding, 2004

Funding Source	Owner Assistance	Renter Assistance	Owner or Renter Assistance
HUD American Dream Down Payment Initiative[1]	$ 7,536,736		
HUD Emergency Shelter Grants[1]		$ 6,037,876	
HUD HOME Investment Partnerships Program[1]			$ 78,496,761
HUD Housing Choice Vouchers (Section 8) [2]		$ 780,230,515	
HUD Housing Opportunities for Persons w/ AIDS[1]		$ 13,951,748	
HUD PHA Capital Funds[2]		$ 49,300,950

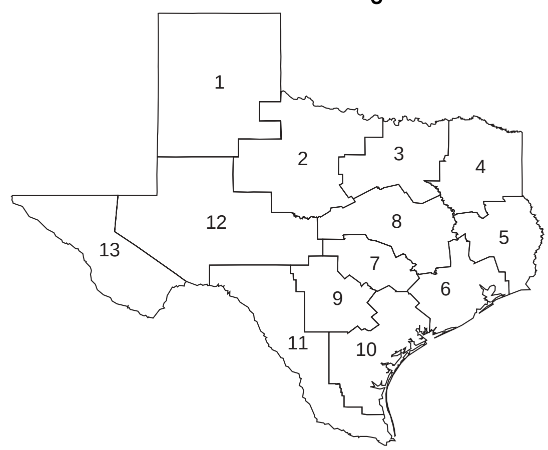
TDHCA FUNDING DISTRIBUTION

The State's affordable housing need far outweighs the resources available to address the problem. To ensure an equitable funding distribution throughout the state, much of the Department's funding is regionally allocated based on measures of affordable housing need and available housing resources.

2005 TDHCA Regional Allocation Formula

Uniform State Service Regions



Section 2306.111(d) of the Government Code requires that TDHCA use a Regional Allocation Formula (RAF) to allocate its HOME, Housing Trust Fund (HTF), and Housing Tax Credit (HTC) program funding. This RAF objectively measures the affordable housing need and available resources in the 13 Uniform State Service Regions the Department uses for planning purposes, shown in the figure to the right. The RAF also allocates funding to rural and urban/exurban areas within each region. A dynamic measure of need, the formula is revised annually to reflect updated demographic and resource data; public comment; and better assess regional affordable housing needs. Because of the programs' different eligible activities, households, and geographical areas[46], slightly modified formulas are used for the HOME and HTF/HTC programs.

Funding Distribution under the 2005 RAF

While the allocation percentages shown in the tables below are final, the funding amounts may change to reflect the final amount the Department receives from the funding source to actually allocate.

Housing Tax Credit Regional Allocation Formula

Region	Place for Geographical Reference	Regional Funding Amount	Regional Funding Percentage	Rural Funding Amount	Urban/Exurb Funding Amount	Rural Funding Percentage	Urban/Exurb Funding Percentage
