- As of the most recent statistical information available, there were 2,676,060 renter occupied housing units in Texas. Eighty-four percent of these were constructed before 1990 with the highest production of rental housing (50.8%) built between 1970 and 1989. Therefore, the majority of rental housing stock in Texas is between 15-35 years old and may be in need of some type of moderate to substantial rehabilitation in order to preserve its functionality.[113]

HURRICANE-AFFECTED AREA HOUSING NEEDS

- Many Texas Gulf Coast residents were left with damaged or destroyed homes after Hurricane Rita came through the state. On Wednesday, December 21, 2005, the President signed into law, H.R. 4440, the "Gulf Opportunity Zone Act of 2005," to assist the Gulf Coast in its recovery from the past year's hurricane season. The Act defines three "GO Zones" for the areas hit by hurricanes Katrina, Rita, and Wilma.
- According to the U.S. Census Bureau, the estimated population for the state of Texas in 2005 was 22,859,968. Of this figure, 5,416,433 live in the twenty-two designated targeted areas in the GO Zone. Areas designated as "targeted" include the following counties: Angelina, Brazoria, Chambers, Fort Bend, Galveston, Hardin, Harris, Jasper, Jefferson, Liberty, Montgomery,

The Corporation will address these pressing housing needs through the following single family, multifamily, and grant programs for 2008. The following summary of Corporation programs gives the history and accomplishments of our programs to date and a plan for achieving greater success with these programs in 2008. A few of the programs mentioned are mandated by the state legislature, as noted, and a few have been undertaken upon the Corporation's own initiative to fulfill housing needs for identified underserved areas of the state.

CORPORATION PROGRAM DESCRIPTIONS

- Texas Professional Educators Home Loan Program
- Texas Fire Fighter, Law Enforcement or Security Officer, and EMS Personnel Home Loan Program
- Home Sweet Texas Loan Program

These Programs are the Corporation's Single Family Mortgage Revenue Private Activity Bond Programs. The first two Programs were established by the Legislature in 2001 and 2003, respectively, and allocated, until this recent legislative session in 2007, a total of $55 million of the State's Ceiling for Private Activity Bond Cap for the exclusive purpose of making single family mortgage loans to Texas Professional Educators ($25 million); Fire Fighters, Law Enforcement Officers, and Corrections Officers ($25 million); and Nursing Faculty ($5 million) who are first-time home buyers.

In the 80th legislative session in 2007 changes were made to the Programs, including adding new eligible professionals to both programs (adding emergency medical services personnel and juvenile corrections officers to the Texas Fire Fighter, Law Enforcement or Security Office, and Emergency Medical Services Personnel Home Loan Program, and adding allied health faculty and nursing faculty to the Professional Educators Home Loan Program) and changing the way private activity bonds are allocated to the Programs. In the past, both the Professional Educators and Homes for Texas Heroes Programs received $25 million each and the Nursing Faculty Home Loan Program received a $5 million set aside on bond cap.

In 2008, the Corporation will receive 10 percent of the bond cap set aside for issuers of single family mortgage revenue bonds. In addition, the new law specifies that of that 10 percent, 54.5 percent shall be allotted to the Professional Educators Home Loan Program and 45.5 percent shall be allotted to the Texas Fire Fighter, Law Enforcement or Security Officer, and Emergency Medical Services Personnel Home Loan Program. The Nursing Faculty Home Loan Program was repealed and nursing faculty are now eligible under the Professional Educators Home Loan Program.

In 2006 the Corporation created the Home Sweet Texas Loan Program by applying for, and receiving, $25 million in bond cap after the collapse of the set-asides for all state issuers of bonds. The Home Sweet Texas Loan Program is available statewide with no professional requirements to those at or below 80 percent of the AMFI.

The Programs are available statewide on a first come, first-served basis, to first-time homebuyers who wish to purchase a newly constructed or existing home. Through each Program, eligible borrowers are able to apply for a 30 year fixed rate mortgage loan and receive 5 percent of the total loan amount as down payment assistance in the form of a grant. The programs are accessible to eligible borrowers by directly contacting a trained, participating mortgage lender.

The 2005 and 2006 Professional Educators Home Loan Programs fully originated the $50,000,000 bond fund allocation. In 2007, the Corporation released a total of $101 million for the Professional Educators Home Loan Program. This amount includes $76,000,000 that the Corporation applied for during the bond collapse. This program continues to be extremely successful. Since its inception in 2001, the program has financed over 1500 homes for teachers, teacher's aides, school counselors, school nurses and school librarians.

Additionally, the 2005 and 2006 Fire Fighter and Law Enforcement or Security Officer Home Loan Program fully originated $50,000,000 in loan commitments. The 2007 Fire Fighter and Law Enforcement or Security Officer Home Loan Program was released in May, and has committed the full $25 million allocation. Since the inception of this program in 2003, the program has financed over 750 homes for fire fighters, peace officers, correctional officers, county jailers, public security officers, and emergency medical services personnel.

Since the inception of both the Professional Educator Home Loan Program in 2001 and the Fire Fighter and Law Enforcement or Security Officer Home Loan Program in 2003, the Corporation has only seen the demand for these programs increase.

The Gulf Opportunity Zone Act of 2005 expanded the eligibility for our single family bond programs significantly. Some of the principal provisions included in the Gulf Opportunity Zone Act of 2005 relate to private activity bonds for financing residential property located in a GO Zone, specifically, but not limited to, those funds used for "targeted area" residences. "Targeted area" means that part of the Eligible Loan Area that has been or may be designated from time to time as a qualified census tract or an area of chronic economic distress in accordance with section 143(j) of the Internal Revenue Code.

Section 1400T of the Gulf Opportunity Zone Act provides that for purposes of section 143, each residence in a designated area is treated as a "targeted" area residence (for financing provided from 12/21/05 through 12/31/2010), thus eliminating the first-time homebuyer requirement, and applying the higher targeted area purchase price and income limitations (state income limitation of 140% AMFI).

As a result of the designation of "targeted areas", coupled with the elimination of the first-time homebuyer requirement and increased income and purchase price limitations, the funds set aside for "targeted areas" have been originating quickly. In 2006 and 2007, the Corporation allocated over $44 million to targeted areas. To date $40.6 million have been committed, assisting over 360 individuals.

2008 Implementation Plan

The Corporation's primary goal for 2008 will be to continue to develop a financing structure that minimizes the Programs' mortgage interest rate and offers the best possible down payment assistance grant to the borrowers. Down payment assistance is especially critical when the spread between conventional mortgage rates and tax-exempt mortgage rates have reached historical lows. The Corporation will also continue to advertise and to receive input about the Programs by attending home builder, real estate agent, lender, and the various professional trade associations' conventions and trade shows in 2008.

In addition, the Corporation will continue to train and develop relationships with mortgage lenders and realtors who represent the Programs to the borrowers.

Given the demand for first-time homebuyer programs, other financing options available to the Corporation through its enabling legislation will be explored. If demand continues, the Corporation will continue to submit applications to the Texas Bond Review Board requesting additional volume cap during the collapse to serve new first-time homeowners.

Affordable Homeownership Program For Texas

One of the Corporation's main initiatives is to provide housing opportunities to Texans that do not have comparable housing options through conventional financial channels. Many families throughout Texas seeking to purchase a home are not able to meet the traditional lending requirements and, up to now, have had no other option but to rent. In order to meet this need and provide deserving families with a financing alternative for achieving the American dream of homeownership, the Corporation developed the Affordable Homeownership Program for Texas ("Program").

The Program, developed through a partnership with a national lender and the Corporation, provided borrowers with an affordable mortgage financing option that allows them the opportunity to achieve homeownership. As a result of this partnership, the national lender committed up to $100 million dollars for mortgage loans and the Corporation committed $1 million dollars for down payment assistance.

The Program was established to serve those individuals and/or families in Texas that have FICO scores between 525 and 610 and who are at or below 80% of the AMFI by providing them access to an affordable mortgage loan product and down payment assistance in an amount up to seven percent (7%) of the mortgage loan amount. In addition, the Program rewards borrowers who make timely mortgage payments with lower interest rates and lower mortgage payments. Borrowers receive a 50 basis point (.5%) reduction in their mortgage interest rate for every 12 months of on-time payments. As a result, Borrowers can reduce their mortgage interest rate by up to two percent (2%) during the first 48 months of their mortgage loan.

Homebuyer education is an essential component to the success of home ownership. Under the Program, borrowers are provided pre- and post-closing Homebuyer Education Training by ACORN Housing. ACORN Housing is a national housing counseling organization, helping low and moderate income homebuyers and homeowners since 1986. Additionally, borrowers will have intervention assistance available to them during the life of the mortgage loan. We believe this training and assistance is crucial to the success of this Program.

Since 2004, the Program has provided __ loans to individuals and families who otherwise might not have achieved the dream of home ownership. At this time, the Corporation has put the program on hold as we search for a new national lender to step in to provide the mortgage loans for this important program.

2008 Implementation Plan

At this time, the program is on hold as the Corporation searches for a new national lender to step in to provide the mortgage loans for this important program.

Interim Construction and Land Acquisition Program

The Corporation's Interim Construction and Land Acquisition Loan Program supports our mission to serve the housing needs of low, very low and extremely low-income Texans who do not have comparable housing opportunities in rural and underserved communities. The program accomplishes this by providing short-term financing for site acquisition and interim construction to non-profit and for-profit developers to increase or preserve the stock of affordable single family homes in Texas.

The Corporation only considers proposals for a development that involves the sale of housing units to unrelated third party households. This includes developments involving, but not limited to, single-family or multi-unit residential structures, condominiums, limited equity co-operatives, subdivisions, infill construction, new construction and rehabilitation.

Funding for this program comes from investments made by public and private entities into the Corporation's single family loan pool. The Corporation may also commit its own funds to the program or borrow funds from public or private entities to finance loans. The availability of funds is dependant upon the Corporation's ability to find new investments, and/or borrow funds at reasonable rates and terms. All loan commitments are conditioned upon the availability of funds.

In December 2007 the Corporation's Board approved loan policies to govern the program that provide guidance to staff, borrowers and investors of our process for administering the program. The program policies were a significant step forward in the development of the program and will assist us in increasing investments in the program from private and public entities and with creating application materials, loan documents and marketing materials for the program.

2008 Implementation Plan

The program will require new investments in order to continue operations; therefore the primary goal for the next year will be to raise at least $1 million dollars in new funding. To assist in this goal, the Corporation will create a loan loss reserve pool that can act as insurance on the repayment of funds to investors. The Corporation intends to lend at least 70% of its available loan pool to qualified affordable housing developments. As the funding for the program increases, the Corporation will create a marketing campaign for the program that includes the development of web-based materials, marketing brochures, presentation materials, and clear document packages for borrowers. Staff will work with regional and statewide associations to promote the program at conferences and training events. The Corporation will track the number, cost and location of affordable housing units produced by the program to determine if the Corporation is fulfilling its mission to serve underserved populations and areas in Texas.

Multifamily Private Activity Bond Program

The Texas Legislature in 2003 allocated 10 percent of the multifamily private activity bond cap to the Corporation. The available amount for funding in 2007 was approximately $44 million, and a similar amount will be available for 2008. Nonprofit and for profit developers can use the program to finance the acquisition and rehabilitation or new construction of multifamily residential rental units across the state. Developers are encouraged to leverage the private activity bond funds by using Low Income Housing Tax Credits (LIHTC) available through TDHCA.

The Corporation's Private Activity Bond program statute requires the Corporation to target areas with the greatest housing need that have expressed local community support for affordable multifamily housing. The statute also requires the Corporation to solicit proposals from developers who would provide the specific housing development that would address the targeted housing need outlined in the request, whether for senior, rehabilitation, rural, supportive, migrant farm worker, or other specific housing need. Applications received in response to the request for proposals issued by the Corporation will be scored and ranked using criteria that analyzes the Developer's qualifications, experience and willingness to provide the types of multifamily housing targeted by the Corporation. Tax-exempt private activity bond financing will be allocated to the highest-scoring proposal that meets the identified housing needs of the Request for Proposals, subject to available allocation.

The Corporation issued requests for proposals in 2007 to Developers for the provision of rural, senior, preservation of at-risk housing (rehabilitation), and supportive housing. The Corporation received two applications and issued $34,900,000 to one developer to finance the acquisition and rehabilitation of 13 properties around the state. Since 2003, the Corporation has awarded $49,200,000 to create or preserve 1,258 units of affordable rental housing.

2008 Implementation Plan

The targeted areas of housing for 2008 are Preservation of At-Risk Housing, Senior Housing, Supportive Housing, and Rural Housing. These targeted areas are based on current research and information received throughout the last few years. In 2004 and 2005 the Corporation solicited participation in the private activity bond program by sending letters to mayors of all cities with a population over 10,000 people and all county judges. Discussing the various needs with each interested city and county highlighted the diversity of needs for different areas of Texas. The larger metropolitan areas believed they were saturated with multifamily housing, but were interested in rehabilitation or redevelopment of existing multifamily housing that had fallen into disrepair. Cities with a lower population, generally not in urban areas, expressed interest in developing new multifamily housing to fill their affordable housing needs.

Most recently, the Corporation conducted an electronic survey by email to known stakeholders, and the targeted housing needs from 2007 were confirmed as those still most needed in the state. As a result of this fact-finding, the Corporation targeted housing needs for 2008 and included those in its 2008 Request for Proposal (RFP). The 2008 RFP is an evergreen RFP that will stay outstanding until all volume cap set aside for this program is allocated.

MULTIFAMILY 501(C)(3) BOND PROGRAM

The Corporation's 501(c)(3) Multifamily Bond Program was created to finance the acquisition and rehabilitation, or new construction, of affordable multifamily housing units throughout the state of Texas. Unlike the Corporation’s PAB program, 501(c)(3) financing does not use volume cap allocation and applications can be considered year-round. Also different from the PAB program is that 501(c)(3) financing may not be used in conjunction with low income housing tax credits. Only qualified nonprofit developers, designated under the internal revenue code as 501(c)(3) organizations, are eligible to apply for 501(c)(3) financing.

In addition to providing safe, decent, and affordable rental housing to residents of the state of Texas, recipients of 501(c)(3) financing must adopt a dollar-for-dollar public benefit program, investing at least one dollar in rent reduction, capital improvement projects, or social, educational, or economic development services for every dollar of abated property tax revenue they receive.

In 2001 and 2002 the Corporation provided $487 million in financing for the preservation or creation of 7,700 units of affordable housing in the state of Texas. Since 2002 the Corporation has not considered applications or issued bonds under the 501(c)(3) program as a result of market changes and legislatively mandated changes.

2008 IMPLEMENTATION PLAN

The Corporation will monitor market conditions and will reactivate the program if demand shows the need for this type of financing to create needed multifamily affordable housing. Non-profit developers may choose to apply under the Corporation’s Multifamily Private Activity Bond Program to be eligible for bond financing in addition to 4 percent tax credit equity.

MULTIFAMILY DIRECT LENDING PROGRAM

The Multifamily Direct Lending Program supports the Corporation’s mission to promote equal access to safe, decent, and affordable housing with an emphasis on serving rural and underserved markets. The program provides long-term financing to non-profit and for-profit developers for the purpose of increasing and preserving the stock of affordable rental housing throughout the state of Texas.

The primary sources of funds available to this program are from investments made by public and private entities into the Corporation’s multifamily loan pool. The Corporation may also commit its own funds to the program, borrow funds from public or private entities to finance loans, or act as a conduit lender for pubic or private financial institutions. The availability of funds is dependant upon the Corporation’s ability to find new investments, borrow funds at reasonable rates and terms, or identify secondary purchasers of loans.

The Corporation only considers proposals for developments involving the acquisition, construction and/or rehabilitation of affordable rental housing projects containing at least 10 housing units located within the state of Texas. Developments may be comprised of scattered-sites, senior apartments, affordable assisted living, limited-equity cooperatives, single-family rental units and other nontraditional multifamily rental housing.

This program helps to expand the flow of much-needed long-term capital to the community development industry by providing fixed rate mortgages that may not be efficiently priced by traditional secondary markets- whether because of their small size ($5M and under), configuration (scattered site and urban rehabs), affordable aspects, or lack of rated credit enhancement.

The Corporation has provided over $6.5 million in financing to over 1,500 units of affordable housing since the program's inception. In 2003 and 2004, the Corporation provided permanent financing in the aggregate amount of $5,628,000 for five (5) separate developments in Odessa, Wichita Falls, Big Spring, Brady, and Stephenville. These developments provided 412 units of affordable housing to low income Texans. The last transaction financed, the RHAC Texas Portfolio, included more than 1,000 units and was completed in September 2007. Staff believes that the market for the Direct Lending Program will continue to be strong. The need for financing of multifamily developments in rural and underserved areas is acute. To ensure the Corporation can continue to provide flexibility in its financing strategy, staff has proposed new policies for the program that will continue to allow a wide variety of strategies to be employed to meet market challenges.

2008 Implementation Plan

The Corporation is committed to administering and marketing our capabilities under this program in 2008. The Corporation has included the following goals in its 2007-2009 Business Plan for this Program. First, the Corporation intends to establish and update yearly lending policies that will guide our utilization and management of the program. Second, to expand our impact in the market, the Corporation will actively fund raise for new sources of investment, and secondary market purchasers for the Corporation's loan portfolio. The Corporation has set a goal of raising $2 million for the Corporation's Multifamily Direct Lending loan pool over the next two years.

Asset Oversight and Compliance

Asset oversight of properties is required by many bond issuers, including the Corporation and TDHCA, to monitor the financial and physical health of a property and to provide suggestions for improvement. Compliance monitoring ensures that the borrowers are providing the required number of affordable units to income eligible households and that quality resident services are being provided to all residents of the property. Periodic on-site inspections and resident file reviews of affordable units ensure that federal requirements relating to the tax-exempt status of the bonds are followed.

For those properties funded by the Corporation, the Corporation has developed a convenient way for property managers/owners to submit their compliance reports online. All properties started reporting online on or before February 2005. Since that time, properties have been reporting as required on a monthly and quarterly basis and serves to streamline paper and provide convenience to the properties.

The Corporation is currently providing asset oversight for 131 properties and compliance oversight for 36 properties. In May of 2006 TDHCA contracted with the Corporation to provide asset oversight services for multifamily properties financed through their bond program. The number of asset oversight reviews conducted by the Corporation for the Texas Department of Housing and Community Affairs are as follows:

2005	50 site visits	11,568 units
2006	73 site visits	16,956 units
2007	86 site visits	19,727 units

2008 Implementation Plan

The Corporation will continue to provide high quality asset oversight and compliance monitoring services to the properties in our current portfolio and intends to increase the effectiveness and efficiency of the program. First, the Corporation intends to develop and implement compliance software for better tracking purposes. The Corporation will also work to contract with other entities to expand our asset oversight and compliance monitoring portfolio of business. The Corporation will pursue new asset oversight and/or compliance business relationships with public agencies such as HUD, the Texas Department of Housing and Community Affairs, Housing Authorities, or partnering with private owners and property management companies.

Grant Program

Although the Corporation has been a 501(c)(3) nonprofit entity since 2001, the Corporation did not actively pursue fundraising and grant opportunities until last year. The Corporation needs to fundraise to sustain current programs and to add new programs. In 2006 the Corporation made considerable strides in this area by developing a Fundraising and Grant Program Action Plan and by searching out available grant funding for affordable housing. In 2006, the Corporation hired a Manager of Marketing and Development to actively pursue fundraising opportunities. In addition, the Corporation received a low-interest loan from Wells Fargo in the amount of $1.05 million for three areas: the Interim Construction and Land Acquisition Loan Program, Single Family Down Payment Assistance, and Multifamily Gap Financing Assistance. The Corporation has used $500,000 of this award for the Multifamily Gap Financing Assistance Program (now part of our Multifamily Direct Lending Program) to help finance the acquisition and rehabilitation of 13 properties around the state. The Corporation has committed $542,000 of this award for the Interim Construction and Land Acquisition Program to help finance the development of 170 single family homes.

The Corporation intends to fund two new programs described more fully below, the HomeWorks Loan Program and the Texas Foundations Fund, with grants and donations.

2008 Implementation Plan

The Corporation's mission of affordable housing matches many foundation and grant objectives, and provides multiple opportunities for corporate sponsorship and cross-promoting. The Corporation will work to fundraise for grants and will pursue low-interest loans for the Texas Foundations Fund, the HomeWorks Loan Program, the Multifamily Direct Lending Program, and the Interim Construction and Land Acquisition Program. In addition, the Corporation will solicit corporate partners in the home improvement, home appliance, and large retail business sectors for down payment assistance for our Professional Educator, Fire Fighter, Police Officer, Security Officer, and Nursing Faculty bond programs. We will request a grant for down payment assistance and coupons for participating borrowers, such as $50 off a refrigerator, or a $100 coupon to the home improvement store. The Corporation will also work with national computer manufacturers to contribute a computer to every teacher, firefighter, police officer, corrections officer, or nurse educator that closes a loan through our program, and negotiate with telecommunications companies to contribute phone/internet service packages. These are just a few of the fundraising activities and initiatives that the Corporation will undertake in 2008.

NEW PROGRAM INITIATIVES FOR 2008

HOMEWORKS PROGRAM

The Corporation will explore the possibility of creating an employer assisted housing program. Employer assisted housing programs are aimed not only at providing an affordable financing product to potential homebuyers, but aid in recruiting new businesses to the State while enhancing existing business by allowing such businesses to offer incentives not otherwise possible to employees they would like to recruit and retain.

This program would be a partnership between the Corporation and participating employers and their employees. The program, *HomeWorks*, would offer a 30-year fixed rate mortgage through the mortgage lender of the borrower's choice. The program would offer up to $4,000 in matching funds for downpayment and closing cost assistance courtesy of the Corporation and participating employers across Texas.

The Corporation and the employer will match dollar for dollar, up to $2,000 each, of an employee's contribution toward downpayment and closing costs. Matching assistance would be provided to the employee in the form of a 3-year deferred forgivable second lien loan *(33.33% is forgiven each year).* If the employee leaves or is terminated by the employer, the remaining balance of the assistance is to be paid back to the Corporation and/or the employer.

The employer would contribute a maximum amount to the program, and offer it to employees on a first-come, first-served basis. The employee must be employed by a participating employer for at least 6 months, with a 3 year commitment to the employer. The employee must participate in a homebuyer education course approved by the Corporation prior to closing on the loan. The employee must meet income and purchase price limits set by the Corporation, while meeting standard mortgage underwriting requirements demonstrating credit worthiness. The employee must occupy the purchased home as his or her primary residence.

TEXAS FOUNDATIONS FUND

The Corporation is developing, and will present for board approval in early 2008, the Texas Foundations Fund (TFF). The TFF will support housing initiatives for very low-income families, currently expected to be at or below 50 percent of the area median income. The Corporation intends to fund TFF through revenues generated from existing programs and donations received. This program is intended to meet the Corporation's goal of providing low-income housing options for very low-income Texans, which is best met through a grant program. Our plan is to seek applications from housing nonprofits whose mission is to serve very low- income Texans. Every year the Texas Foundations Fund would build up funds from program revenue and donations, and a notice of funding availability (NOFA) would be issued when the fund reaches a certain level. The NOFA would be issued to nonprofits that provide very low-income housing. Applications would be evaluated according to guidelines established by the Board

Before presenting the TFF Program to the board, Corporation staff will explore the best legal options for creating the Texas Foundations Fund, including the possible creation of an irrevocable trust. Staff will also explore the creation of an endowment portion of the Texas Foundations Fund to ensure long-term viability and maximum impact of the fund on future generations. Most importantly, Staff will evaluate how to fund the Texas Foundations Fund, including the Corporation's revenue from existing programs and methods for fundraising specifically for this new Fund. In addition, Guidelines will be developed for evaluating grant applications.

APPENDIX A

LEGISLATIVE REQUIREMENTS FOR THE STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

Sec. 2306.072. Annual Low Income Housing Report

1) Not later than March 18 of each year, the director shall prepare and submit to the board an annual report of the department's housing activities for the preceding year.
2) Not later than the 30th day after the date the board receives the report, the board shall submit the report to the governor, lieutenant governor, speaker of the house of representatives, and members of any legislative oversight committee.
3) The report must include
   a) a complete operating and financial statement of the department;
   b) a comprehensive statement of the activities of the department during the preceding year to address the needs identified in the state low income housing plan prepared as required by Section 2306.0721, including:
      i) a statistical and narrative analysis of the department's performance in addressing the housing needs of individuals and families of low and very low income;
      ii) the ethnic and racial composition of families and individuals applying for and receiving assistance from each housing-related program operated by the department; and
      iii) the department's progress in meeting the goals established in the previous housing plan;
   c) an explanation of the efforts made by the Department to ensure the participation of persons of low income and their community-based institutions in department programs that affect them;
   d) a statement of the evidence that the Department has made an affirmative effort to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process;
   e) a statistical analysis, delineated according to each ethnic and racial group served by the department, that indicates the progress made by the department in implementing the state low income housing plan in each of the uniform state service regions; and
   f) an analysis, based on information provided by the fair housing sponsor reports required under Section 2306.0724 and other available data, of fair housing opportunities in each housing development that receives financial assistance from the department that includes the following information for each housing development that contains twenty or more living units:
      i) the street address and municipality or county where the property is located;
      ii) the telephone number of the property management of leasing agent;
      iii) the total number of units reported by bedroom size;
      iv) the total number of units, reported by bedroom size, designed for individuals who are physically challenged or who have special needs and the number of these individuals served annually as reported by each housing sponsor;
      v) the rent for each type of rental unit, reported by bedroom size;
      vi) the race or ethnic makeup of each project;
      vii) the number of units occupied by individuals receiving government-supported housing assistance and the type of assistance received;
      viii) the number of units occupied by individuals and families of extremely low income, very low income, low income, moderate income, and other levels of income;
      ix) a statement as to whether the department has been notified of a violation of the fair housing law that has been filed with the United States Department of Housing and Urban

Development, the Commission on Human Rights, or the United State Department of Justice; and

x) a statement as to whether the development has any instances of material noncompliance with bond indentures or deed restrictions discovered though the normal monitoring activities and procedures that include meeting occupancy requirements or rent restrictions imposed by deed restrictions or financing agreements.

g) a report on the geographic distribution of low income housing tax credits, the amount of unused low income housing tax credits, and the amount of low income housing tax credits received from the federal pool of unused funds from other states.

h) A statistical analysis, based on information provided by the fair housing sponsor reports required by Section 2306.0724 and other available data, of average rents reported by county.

Sec. 2306.0721. Low Income Housing Plan

1) Not later than March 18 of each year, the director shall prepare and submit to the board an integrated state low income housing plan for the next year.
2) Not later than the 30th day after the date the board receives the plan, the board shall submit the plan to the governor, lieutenant governor, and the speaker of the house of representatives.
3) The plan must include:
   a) an estimate and analysis of the housing needs of the following populations in each uniform state service region:
      i) individuals and families of moderate, low, very low income, and extremely low income;
      ii) individuals with special needs; and
      iii) homeless individuals;
   b) a proposal to use all available housing resources to address the housing needs of the populations described by Subdivision (1) by establishing funding levels for all housing-related programs;
   c) an estimate of the number of federally assisted housing units available for individuals and families of low and very low income and individuals with special needs in each uniform state service region;
   d) a description of state programs that govern the use of all available housing resources;
   e) a resource allocation plan that targets all available housing resources to individuals and families of low and very low income and individuals with special needs in each uniform state service region;
   f) a description of the department's efforts to monitor and analyze the unused or underused federal resources of other state agencies for housing-related services and services for homeless individuals and the department's recommendations to endorse the full use by the state of all available federal resources for those services in each uniform state service region;
   g) strategies to provide housing for individuals and families with special needs each uniform state service region;
   h) a description of the department's efforts in each uniform state service region to encourage the construction of housing units that incorporate energy efficient construction and appliances;
   i) an estimate and analysis of the housing supply in each uniform state service region;
   j) an inventory of all publicly and, where possible, privately funded housing resources, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies;
   k) strategies for meeting rural housing needs;
   l) a biennial action plan
      i) addresses current policy goals for colonia programs, strategies to meet the policy goals, and the projected outcomes with respect to policy goals; and

ii) includes information on the demand for contract-for-deed conversions, services from self-help centers, consumer education, and other colonia resident services in counties some part of which is within 150 miles of the international border of this state;

m) a summary of public comments received at a hearing under this chapter or from another source that concern the demand for colonia resident services described by Subdivision (12); and

n) any other housing-related information that the state is required to include in the one-year action plan of the consolidated plan submitted annually to the United States Department of Housing and Urban Development.

4) The priorities and policies in another plan adopted by the department must be consistent to the extent practical with the priorities and policies established in the state low income housing plan.

5) To the extent consistent with federal law, the preparation and publication of the state low income housing plan shall be consistent with the filing and publication deadlines required of the department for the consolidated plan; and

6) The director may subdivide the uniform state service regions as necessary for the purposes of the state low income housing plan.

7) The department shall include the plan developed by the Texas State Affordable Housing Corporation under Section 2306.566 in the department's resource allocation plan under Subsection (c)(5).

Sec. 2306.0722. Preparation of Plan and Report

1) Before preparing the annual low income housing report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the department shall meet with regional planning commissions created under Chapter 391, Local Government Code, representatives of groups with an interest in low income housing, nonprofit housing organizations, managers, owners, and developers of affordable housing, local government officials, and residents of low income housing. The department shall obtain the comments and suggestions of the representatives, officials, and residents about the prioritization and allocation of the department's resources in regard to housing.

2) In preparing the annual report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the director shall:

a) coordinate local, state, and federal housing resources, including tax exempt housing bond financing and low income housing tax credits;

b) set priorities for the available housing resources to help the neediest individuals;

c) evaluate the success of publicly supported housing programs;

d) survey and identify the unmet housing needs of persons the department is required to assist;

e) ensure that housing programs benefit a person regardless of the persons' race, ethnicity, sex, or national origin;

f) develop housing opportunities for individuals and families of low and very low income and individuals with special housing needs;

g) develop housing programs through an open, fair, and public process;

h) set priorities for assistance in a manner that is appropriate and consistent with the housing needs of the populations described by Section 2306.0721(c)(1);

i) incorporate recommendations that are consistent with the consolidated plan submitted annually by the state to the United States Department of Housing and Urban Development;

j) identify the organizations and individuals consulted by the department in preparing the annual report and state low income housing plan and summarize and incorporate comments and suggestions provided under Subsection (a) as the board determines to be appropriate;

k) develop a plan to respond to changes in federal funding and programs for the provision of affordable housing;

l) use the following standardized categories to describe the income of program applicants and beneficiaries:

i) to 30 percent of area median income adjusted for family size;
ii) more than 30 to 60 percent of area median income adjusted for family size;
iii) more than 60 to 80 percent of area median income adjusted for family size;
iv) more than 80 to 115 percent of area median income adjusted for family size; or
v) more than 115 percent of area median income adjusted for family size; and

m) use the most recent census data combined with existing data from local housing and community service providers in the state, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies.

n) provide the needs assessment information compiled for the report and plan to the Texas State Affordable Housing Corporation.

Sec. 2306.0723. Public Participation Requirements

1) The Department shall consider the annual low income housing report to be a rule and in developing the report shall follow rulemaking procedures required by Chapter 2001.

Sec. 2306.0724. Fair Housing Sponsor Report

1) The department shall require the owner of each housing development that receives financial assistance from the department and that contains 20 or more living units to submit an annual fair housing sponsor report. The report must include the relevant information necessary for the analysis required by Section 2306.072(c)(6). In compiling the information for the report, the owner of each housing development shall use data current as of January 1 of the reporting year.
2) The department shall adopt rules regarding the procedure for filing the report.
3) The department shall maintain the reports in electronic and hard-copy formats readily available to the public at no cost.
4) A housing sponsor who fails to file a report in a timely manner is subject to the following sanctions, as determined by the department:
   a) denial of a request for additional funding; or
   b) an administrative penalty in an amount not to exceed $1,000, assessed in the manner provided for an administrative penalty under Section 2306.6023.

TDHCA Announces Major Funding Commitment to Disability Community

The Department has released $3.7 million in grants to 14 nonprofit organizations through TDHCA's HOME Program which will help persons with disabilities purchase a home or make monthly rent payments.

Five organizations submitting 12 applications received $1.6 million in federal HOME funds to be used for down payment assistance for persons with disabilities purchasing a home of their own. Funds may also be used to make certain alterations to the home to remove any barriers to accessibility.

The remaining $2.1 million was awarded to nine nonprofit organizations through 15 applications which will help persons with disabilities make their monthly rent payments. Altogether, the Department estimates that 299 Texas households will receive funding through this series of awards.

The following Texas organizations received an award through TDHCA's Single Family HOME Program:

Organization	City	Assistance	Award
Community Council of SW Texas	Uvalde	Homebuyer	$190,000
Fort Worth Area Habitat for Humanity	Fort Worth	Homebuyer	$15,000
El Paso Rehabilitation Center	El Paso	Homebuyer	$175,000
Life Rebuilders	Ennis	Homebuyer	$275,000
United Cerebral Palsy of Texas	Various	Homebuyer	$1,010,000
ARCIL, Inc.	Austin/Waco	Rental	$331,200
Burke Center	Lufkin	Rental	$275,000
Central Texas Mental Health and	Brownwood/Coleman	Rental	$275,000

Mental Retardation (MHMR)			
Coalition for Barrier Free Living	Houston	Rental	$56,956
Coastal Bend Center for Independent Living	Corpus Christi	Rental	$250,000
Lifetime Independence for Everyone	Lubbock	Rental	$157,322
Tri-County MHMR	Conroe	Rental	$410,000
Spindletop MHMR	Beaumont/Port Arthur	Rental	$163,700
Valley Association for Independent Living	McAllen/Harlingen	Rental	$184,000

State Releases $160 Million in Homebuyer Funds, Waives Homebuyer Status Rule for Texas Veterans

TDHCA has released $160 million in homebuyer funds through its popular First Time Homebuyer Program which offers home loans with interest rates beginning as low as 5.75 percent for qualifying first time homebuyers.

Loans through this program is available in two forms: unassisted loans, with no additional funds for down payment and closing costs; and assisted loans, which come with a 5 percent grant for down payment and closing cost assistance. The grant is offered to qualifying households earning no more than 60 percent of the area median family income.

Interest rates range from 5.75 percent for statewide unassisted loans to 6.50 percent for assisted loans statewide. The program is designed to serve households earning no more than 115 percent of the area median family income, depending on the number of individuals in the family.

TDHCA also is providing a special highlight with this release of funds as it is waiving certain program requirements for Texas veterans. Through the end of the year, qualified veterans who are not first time homebuyers will be eligible to participate in the loan program.

For more information, visit the program's website at www.myfirsttexashome.com or call toll free at (800) 792-1119.

Texas Receiving $2.4 Million in Additional Energy Assistance Funds

The U.S. Department of Health and Human Services (HHS) has informed TDHCA that it is allocating $2.4 million in supplemental federal energy assistance funds to Texas.

The funds are in addition to the $60 million in energy assistance grants TDHCA administers annually through the Community Affairs Division and its Comprehensive Energy Assistance Program (CEAP).

The program helps low income Texans pay a portion of their utility bills and provides case management and consumer education to help eligible households achieve self-sufficiency. In 2006, TDHCA assisted nearly 97,000 households through CEAP.

The HHS award was part of $131 million in Low Income Home Energy Assistance Program (LIHEAP) grants recently released to each state by the federal government. TDHCA will administer the funds through its network of 50 contract organizations providing direct service to income eligible individuals and families in all 254 Texas counties.

To find the nearest CEAP provider, use a land-based (non-cell phone) telephone and call 1-877-399-8939. Callers will be automatically routed to the CEAP provider serving their county. For more information on this and other energy assistance programs at TDHCA, visit the Department's website at www.tdhca.state.tx.us/ea/index.htm.

Department to Accept Comment on Rules, Policy Documents

Beginning September 24, TDHCA will provide all Texans interested in affordable housing an opportunity to provide comment on a wide ranging set of program rules, planning guidelines, and policy documents at a series of six public hearings.

Hearings are scheduled for Austin, Brownsville, Dallas, El Paso, Houston and Lubbock, and run September 24 through October 4. Input provided by the public will assist TDHCA in finalizing many program rules and guidelines for 2008.

Agenda items for which TDHCA will accept public comment include (but are not limited to) rules and guidelines for the Housing Tax Credit, Multifamily Bond, First Time Homebuyer and Housing Trust Fund programs. In addition, TDHCA will accept comment on planning and policy documents including the Affordable Housing Needs Score, Regional Allocation Formula, and Consolidated Plan-One Year Action Plan.

A complete list of agenda topics and information on hearing times and locations will be posted on the Department's website prior to the beginning of the comment period. The comment period for all rules and documents runs September 10 through October 10, 2007.

Department Grants Emergency Disaster Recovery Funds to City of D'Hanis

TDHCA has awarded $15,000 in special emergency disaster relief funds to the Community Council of South Central Texas (CCSCT), a nonprofit community action agency. The funds will go toward helping residents of D'Hanis recover from devastating flooding in July which displaced an estimated 300 residents.

CCSCT will use the grant, funded through TDHCA's Community Service Block Grant (CSBG) Program, to provide D'Hanis residents with household appliances, mattresses, minor home repairs, and food.

The disaster prompted CCSCT requested assistance from TDHCA for any available disaster relief funds. TDHCA's Community Services Section was able to meet this request from its reserve of CSBG Special Innovative and Demonstration Project funds.

CCSCT is a CSBG eligible entity organization under the Department's CSBG Community Action network serving Duval, Jim Hogg, McMullen, San Patricio, Starr, and Zapata counties.

CCSCT also administers funding through one of two TDHCA energy assistance programs, providing utility payment assistance and consumer case management assistance to low income residents.

In addition, the agency provides a wide range of services to area low income residents under other funding programs for health, housing, transportation, youth, and senior citizens.

State Awards Additional $3.5 Million in Tax Credits to Support Seniors, Workforce Rental Housing Developments

With an eye toward providing reasonably priced rental housing for the state's growing workforce and senior populations, the Texas Department of Housing and Community Affairs (TDHCA) today awarded $3.5 million in additional tax credits to support the construction of affordable rental housing developments in Alamo, Dalhart, Odessa, Pharr, Poteet and San Antonio.

"Seniors and working Texans need an affordable place to live and we are committed to supporting the housing opportunities they require to continue working and contributing to their community," explained TDHCA Executive Director Michael Gerber. "New tax credit developments are great economic generators for local communities and, once completed, will provide high-quality, stable, and secure homes."

Although the following awarded developments did not receive credits in the $42 million 2007 allocation cycle from which awards were made in July 2007, they were recognized as having special merit and received a forward commitment from Texas' anticipated 2008 federal tax credit allocation:

Project Name	Project City	Number Units	Amount
Bluebonnet Senior Village*	Alamo	36	$360,000
StoneLeaf at Dalhart	Dalhart	76	$707,970
Key West Village II*	Odessa	36	$237,938
Sunset Terrace	Pharr	100	$975,319
Poteet Housing Authority Farm Labor	Poteet	30	$87,371
San Juan Square II	San Antonio	144	$1,200,000
* Seniors			

The Housing Tax Credit Program is the nation's primary means of directing private capital toward the development of high quality affordable rental housing.

The tax credits provide developers and investors with a benefit that is used to offset a portion of their federal tax liability in exchange for the production of affordable rental housing. The value associated with the credits allows units in tax credit properties to offer leases to income eligible tenants at rents below those of market rate apartment properties.

The program has helped create or retain approximately 118,837 units of safe, decent, and affordable rental housing for low income Texans since the first allocation cycle in 1987.

The Texas Department of Housing and Community Affairs is Texas' lead agency responsible for affordable housing, community and energy assistance programs, and colonia activities. The Department annually administers funds in excess of $400 million, the majority of which is derived from mortgage revenue bond financing and refinancing, federal grants, and federal tax credits.

TDHCA Institutes Section 8 Preference for Flood Victims

TDHCA has approved an emergency measure authorizing a Section 8 Housing Choice Voucher Program preference for disaster assistance to low income households displaced by recent floods.

As a result, the Department will be able to issue vouchers to flood victims who are eligible for Section 8 assistance and reside in cities or counties in which the Department operates the program. TDHCA administers the Section 8 Program in 46 cities or counties where there typically is no local public housing authority.

The Section 8 Program provides rental housing assistance to low income individuals and families, providing safe, decent housing that might otherwise be beyond their reach. Qualified households select the best available housing through direct negotiations with landlords, and TDHCA pays approved rent amounts directly to property owners.

Department awards $14.8 million in rural home repair, homebuyer funds

TDHCA recently awarded $14.8 million to 52 rural cities, counties, and nonprofit housing organizations to help repair or replace 249 deteriorating homes owned and lived in by low income households.

The awards will also help assist 12 qualifying first time homebuyer with down payment and closing cost assistance.

The funds were released through the Department's 2007 HOME Program Single Family awards. The US Department of Housing and Urban Development (HUD) is the funding source for TDHCA's HOME Program. To benefit from these funds, households must earn no more than 80 percent of the area median family income.

Most of Texas' larger city and county governments receive HOME Program funding directly from HUD. TDHCA receives a statewide block grant of HOME funds for rural areas of the state that do not receive such funding directly from the federal government.

CDBG Disaster Funds Begin Flowing into SE Texas

Ms. Karen Gifford at the ribbon cutting ceremony in front of her new home.

On June 11, 2007, two women in southeast Texas were the first to receive assistance under the Community Development Block Grant (CDBG) Disaster Recovery Program. Both of these applicants had been forced to live in their devastated units because they had no other options.

Ms. Patsy Stein, elderly and debilitated by a stroke, received a brand new manufactured housing unit. She was overcome with emotion after almost two years had passed since the hurricane damaged her home.

Ms. Stein said it was as if she won the lottery. Ms. Karen Gifford, single and living on social security disability, also had her home replaced with a manufactured housing unit on June 11, 2007. She was truly grateful to have a new home so she could finally get her life-long collected belongings out of storage.

Ms. Patsy Stein sits in her new home in front of SETRPC staff.

The South East Texas Regional Planning Commission received a $26.5 million award in CDBG Disaster Recovery Funding from TDHCA in July 2006 for the repair, rehabilitation, and reconstruction of owner-occupied housing damaged as a result of Hurricane Rita on September 24, 2005.

TDHCA's Disaster Recovery Division is administering more than $500 million in federal CDBG funds to rebuild southeast Texas communities affected by Hurricanes Rita and Katrina. For more information about the Department's disaster recovery efforts, please visit the division's website link above.

How to Celebrate Homeownership Month? Buy a Home!

June is Homeownership Month, and you're wondering how to best celebrate in style. Why not buy your first home? TDHCA can make it happen.

Beginning June 5, the Department is making $97 million in new funding available through its Texas First Time Homebuyer Program. This popular program offers mortgage loans to eligible first time home buyers typically at below market mortgage rates and, for those who qualify, down payment and closing cost assistance.

Eligible individuals and families purchasing their first home or who have not owned a home in the past three years and meet certain income may apply for these 30-year, fixed-interest rate loans.

Two types of loan opportunities are available:

- Unassisted Loans: Typically offers the lowest interest rate available and does not provide funds for down payment and closing cost assistance. The current rate for Unassisted Loans is 5.25%.

- Assisted Loans: Offered to income-eligible borrowers needing assistance with their down payment - up to 5% of the mortgage amount. These loans are offered at the slightly higher interest rate of 5.99%.

All Texas First Time Homebuyer Program loans are available to qualifying households on a first-come/first-served basis through a network of participating lenders. In addition to the annual income requirements, the program includes a maximum home purchase price limit.

Visit www.myfirsttexashome.com or call the Texas First Time Homebuyer Program hotline at 800-792-1119 to learn more about the program, find a lender, or determine program eligibility.

TDHCA issues bonds on behalf of the State of Texas several times each year for the funding that supports the Texas First Time Homebuyer Program.

TDHCA, Veterans Commission team up to help vets access homebuyer program

TDHCA is joining forces with the Texas Veterans Commission to ensure Texas veterans are aware that they might qualify for a share of $97 million in below-market interest rate home loans through TDHCA's Texas First Time Homebuyer Program. Loans through this program begin at a low 5.25 percent interest rate.

Both agencies have pledged to work together to increase program participation among veterans residing in Texas. The Texas Veterans Commission has agreed to help promote the Texas First Time Homebuyer Program through its website and other resources, while TDHCA has waived a rule that will significantly increase the number of veterans eligible to apply for these homebuyer funds.

These state homebuyer funds are normally reserved for low to moderate income households who have not owned a home in the previous three years. Under this waiver, veterans with the appropriate discharge papers and who have not previously received a loan through this program can be a current homeowner and still participate.

Veterans must still meet income eligibility requirements which typically allow homebuyers to earn up to 115 percent of the area median family income. For more information, please visit the homebuyer program's website or call (800) 792-1119.

Department awards Starr County with $514,800 in disaster relief funds

TDHCA has awarded $514,800 in disaster recovery funds to Starr County to help make needed repairs to 10 homes damaged by severe flooding last September. The award was made through a portion of TDHCA's HOME Investment Partnerships (HOME) Program reserved for income eligible households who own the home in which they live.

Starr County will utilize $495,000 of the funds to rehabilitate or reconstruct 10 homes and apply the balance toward covering administrative costs as allowed under federal rules.

Heavy rains that fell on Starr County beginning on September 13, 2006, resulted in severe flooding which damaged several homes. The Governor's Division of Emergency Management, accompanied by TDHCA staff, conducted a preliminary damage assessment the week of September 15.

Governor Rick Perry subsequently requested TDHCA make available any financial assistance to the area possible. The Department communicated with county officials regarding the potential use of HOME Program funds to respond to this natural disaster, and staff visited with officials to provide technical assistance with the application process. The county applied for an award, and the Department's Governing Board in mid June gave final funding approval.

Texas Veterans of Afghanistan, Iraq Wars to receive Essential Housing Assistance

Texas may soon repay veterans of recent overseas conflicts for their sacrifices with decent, affordable housing through a pioneering program that will provide $1 million in rental and homebuyer assistance to help low income veterans make the transition from military to civilian life.

TDHCA will provide these funds through its Housing Trust Fund, Texas' only state-authorized affordable housing initiative.

The program, which is still in the early stages of development, will provide rental subsidies and homeownership assistance for veterans earning no more than 80 percent of the area median family income. Rental assistance will be available for veterans transitioning from VA hospitals and other care facilities; or veterans leaving military service transitioning to civilian life. Assistance will be available for up to three years and will be calculated based on income.

Homebuyer assistance will be available in the form of a one-time deferred forgivable loan up to $35,000 for down payment and closing cost assistance. Funds could also be used to make accessibility modifications such as installing ramps or accessible bathrooms and kitchens.

Priority for both programs will be given to veterans with disabilities and to those who served in recent wars in Afghanistan and Iraq.

TDHCA will issue a Notice of Funding Available later this year to alert eligible applicants to the availability of these Housing Trust Fund awards. Eligible applicants include nonprofit organizations, units of local government, public housing authorities, Community Housing Development Organizations (CHDOs), and income eligible individuals and families.

Anyone interested in this program should visit the Housing Trust Fund's web page often for additional information about the NOFA and other program developments.

Rural Economic Development Efforts to Receive Housing Boost

Rural Texas may soon benefit from more jobs, greater economic opportunities, an increased tax base, and a higher quality of life through an innovative housing program to be tied directly to job creation in rural communities.

TDHCA has released a $5 million Notice of Funding Availability (NOFA) for a new rental housing development program designed to help rural communities expand the stock of rental housing affordable to its local workforce.

Eligible applicants have until October 1, 2007, to apply and include nonprofit housing organizations, public housing authorities, sole proprietors, and local governments. Applicants must be located in or represent non-participating jurisdictions as designated by the US Department of Housing and Urban Development.

Funds must be tied to the creation of new or expanded job opportunities currently in development or created within the previous 18 months at the time the application is submitted. Only housing development sites where businesses employing at least ten new positions in the area will be considered, and employment locations must be located no more than 20 miles from the proposed housing development.

Projects where limited housing is a factor in the overall site selection for new business will be given a priority. Applications for funding must provide evidence of a definite and long-term employment commitment from the employer.

Organizations and individuals interested in applying for funds or who would like more information on the NOFA and this new initiative are encouraged to contact Skip Beaird at (512) 475-0908 or via e-mail at skip.beaird@tdhca.state.tx.us; or Barbara Skinner at (512) 475-1643 or via e-mail at barbara.skinner@tdhca.state.tx.us.

TDHCA Energy Assistance Programs: "An Answer to a Prayer."

I lost all hope and life had become drudgery. All I did was work two jobs and come home to get in my 'PJs.' When the WAP program qualified me for an air conditioner it was an answer to a prayer that gave me and my kids hope. Since then I have repainted my home and installed a screen door. My whole outlook on life has changed and I believe God has answered my prayers and used this avenue to give me hope that I can make it and have a good life even when things don't work out the way you thought they would. Thank you and may God continue to bless your organization abundantly.

(Letter from a mother of two and beneficiary of TDHCA's Weatherization Assistance Program)

During a time when energy prices continue to rise, TDHCA's Energy Assistance Programs bring hope to low income households. The Comprehensive Energy Assistance Program (CEAP) and Weatherization Assistance Program (WAP) provide immeasurable services to vulnerable households. The Department's energy programs are administered in all 254 counties in the state of Texas.

CEAP is a utility assistance program designed to assist low income households with their immediate energy needs and to encourage consumers to control energy costs through energy conservation education. It also provides direct assistance that prevents the termination of basic gas and electric utility services.

WAP is designed to promote long term energy efficiency by providing, attic and wall insulation, replacement of heating and air conditioning units, addressing inefficient appliances and reducing the amount of air infiltration in low income households. The program often results in financial savings that can be used to purchase much needed essentials such as groceries and medication.

The demand for energy assistance continues to rise in the state of Texas. Since 2003, natural gas price increases have remained above the Consumer Price Index; electric utilities routinely base electricity prices on natural gas as a fuel, and their prices have risen accordingly. As energy prices increase, the energy burden for those who are on fixed incomes also increases. Low income households often have to make choices between purchasing groceries, medication, paying rent, and paying the utility bill.

At the same time, funding for TDHCA's Energy Assistance Programs have not kept up with rising utility costs. Congress in Program Year 2007 did not increase CEAP funding to the states. Additionally, the U.S. Department of Energy (DOE) weatherization program allocation to the states actually decreased by $1.7 million from Program Year 2006.

Despite the realities of increased energy costs, the WAP and CEAP programs have positively affected those who receive assistance.

Clients such as the woman above often write to members of the Texas subrecipient network testifying they have renewed hope. Testimonials often originate from clients who recently have gone through family tragedies of illness, death, divorce, depression, as well as financial crisis.

Subrecipient Program Coordinators describe the Energy Assistance programs as the programs that affect the lives of those who need assistance the most such as young children who can only express themselves by drawing their heartfelt emotions.

The Energy Assistance programs of TDHCA continue to address home energy crises and reduce energy burdens for households earning 125% or less of the federal poverty income guideline. Due to this need the Department has established two toll free numbers for clients to call for assistance. Qualified clients must use a land line to call 1-888-606-889 for weatherization assistance and 1-877-399-8939 for utility assistance.

Prayers can often be answered during normal business hours.

Spaces Filling Quickly for Homebuyer Education Provider Training Workshops

Spaces are filling quickly for the Texas Statewide Homebuyer Education Program (TSHEP) training and certification workshops. TDHCA is offering one "Train the Trainer" certification workshop and three continuing education workshops for 2007 training season. TDHCA contracts with NeighborWorks America to offer the workshops, and space is open to individuals from nonprofit organizations and governmental entities.

Homebuyer Education Methods:
Train the Trainer
June 4 - 8, Corpus Christi

Continuing Education Courses:
Housing Counseling Principles, Practices and Techniques
July 9 - 13, San Antonio

Foreclosure Prevention
August 27- 28, Dallas

Combating Predatory Lending
August 29 - 30, Dallas

For workshop descriptions and application materials, visit http://www.tdhca.state.tx.us/homeownership/tshep/index.htm page and download the "2007 TSHEP Application."

For more information, please contact Dina Gonzalez at dina.gonzalez@tdhca.state.tx.us

HOME Funds Available for Housing Persons with Disabilities

The Department has released two draft Notices of Funding Availability (NOFA's) through the HOME Division. These HOME funds are available for housing programs for persons with disabilities. Approximately $2 million is available under the Homebuyer Assistance Program, and approximately $2 million is available under the Tenant Based Rental Assistance Program. Under each NOFA, approximately $1 million will be targeted to assist households in a Participating Jurisdiction (PJ); however, this may be adjusted at the discretion of the Department not to exceed the $2 million dollar cap.

Eligible first time homebuyers may receive up to $35,000 for down payment, closing costs, and rehabilitation. A maximum of $15,000 of that amount may be used for down payment and closing costs; the balance may be used for required accessible modifications. At least one household member must meet the definition of persons with disabilities.

Under the Tenant Based Rental Assistance, eligible tenants may receive rental subsidy and security and utility deposit assistance in the form of a grant in accordance with written tenant selection policies for a period not to exceed twenty-four months. TBRA allows the assisted tenant to move and live in any dwelling unit with a right to continued assistance during the 24-month period with the condition that the assisted tenant participate in a self-sufficiency program. At least one household member must meet the definition of persons with disabilities.

Qualifying local governments, nonprofit organizations, and public housing authorities have until May 11, 2007, to submit an application for funding.

Federal and State rules and requirements must be met by both the applicant and beneficiary, and both funding notices are subject to the HOME Program rule regarding the awarding of funds to households living in participating jurisdictions. For more information, please visit the HOME Division website.

Pilot Programs to Integrate Mental Health Care with Affordable Housing

TDHCA recently helped direct $13.7 million in federal grant awards to six local organizations to fund a series of pilot programs aimed at better integrating the mental health system.

Awarded under the Texas Mental Health Transformation Project, the initiative emphasizes early intervention and the use of technology to coordinate services across multiple state and local agencies, including TDHCA.

The six collaboratives were selected in March 2007 from among 20 applications by the Governor's Office and the Mental Health Transformation Community Collaborative selection committee. Receiving grant funds were:

• Coastal Bend Rural Health Partnership, serving Kleberg, Jim Wells, and Brooks counties
• Dallas County Unified Public Mental Health Initiative, serving Dallas County
• Mental Health Connection, serving Tarrant County
• Terrell County Behavioral Mental Health Collaborative, serving Terrell County
• West Texas Community Coalition, serving Hale, Lamb, Floyd, Briscoe, Bailey, and Motley counties
• Williamson County Mental Health Task Force, serving Williamson County

The federal Substance Abuse and Mental Health Services Administration in 2006 awarded the five-year grant to the Office of Governor Rick Perry and the Texas Department of State Health Services (TDSHS). The selection committee included TDHCA; the Office of Rural Community Affairs; Camille D. Miller, Texas Health Institute President and CEO; Vijay Ganju, Project Director for the Texas Mental Health Transformation Project; and two consumer representatives.

Each community collaborative will initiate a prototype program addressing the integration of health services with those of mental health, early intervention to foster recovery and improve the quality of life for mental health clients, and the need to better meet the requirements of clients across a wide spectrum of social services.

For further information about the Texas Mental Health Transformation Project, please contact the Texas Health Institute at (512) 279-3910. Interested persons should contact TDHCA at (800) 525-0657 to learn more about the Department, its housing and community affairs programs, and its commitment to the Texas Mental Health Transformation Project.

April is Fair Housing Month

Governor Rick Perry and TDHCA ask all Texans to join together in celebration of April 2007 for Fair Housing Month in Texas.

President Lyndon Johnson signed Title VIII of the Civil Rights Act, also known as the Fair Housing Act, into law in 1968. The Texas Legislature passed the Texas Fair Housing Act in 1989, solidifying the state's commitment to nondiscrimination. The act's purpose is to remove discrimination in the sale, rental, or housing finance because of race, color, religion, gender, national origin, familial status or disability.

As Governor Rick Perry noted on his proclamation, all Americans should have the right to find clean, safe and affordable housing without discrimination and be able to move into the type of house or rental property they desire without delay.

Texans derive pride from their fairness and diversity. By taking away prejudice and discrimination it helps to pave the way for prosperity and advancement. Support fair housing opportunities so that we may achieve a higher quality of life for Texans in the future.

Homebuyer Education Program Finalizing Workshops, Division Changes

The Department has finalized the 2007 Texas Statewide Homebuyer Education Program (TSHEP) workshop series, which kicks off June 4-8 in Corpus Christi with a five-day Homebuyer Education Methods "Train the Trainer" course. Through this course, trainers will learn the principles and applications of comprehensive pre- and post purchase homebuyer education. Trainers who successfully complete the course will be certified as a homebuyer education provider.

To date nearly 400 individuals have been certified as homebuyer education providers through the Texas Statewide Homebuyer Education Program.

Due to the success of last year's continuing education workshops, TSHEP will also sponsor three continuing education trainings: "Housing Counseling Principles, Practices and Techniques" (Part I), a five-day training course; "Beginning to Intermediate Foreclosure Prevention" (Part II), a two-day training course; and "Combating Predatory Lending," a two-day training course. TDHCA has contracted with Neighborhood Reinvestment Corporation dba NeighborWorks America to conduct the 2007 TSHEP workshops.

These continuing education courses are open to previously certified TSHEP homebuyer education providers. Registration for these workshops occurs on a first-come, first-served basis, and classes fill quickly. The registration application will be available on March 12, 2007.

TDHCA also announces a change in the administration of this valuable program. TSHEP until recently was administered by the Department's Division of Policy and Public Affairs (DPPA). As a result of a recent Department reorganization, the program was relocated to a newly created division - The Texas Homeownership Division. As a result, Dina Gonzalez will be the designated contact for the program.

The Department created TSHEP in 1997 in response to legislation passed by the 75th Texas Legislature requiring TDHCA to develop and implement a statewide homebuyer education program to provide information and counseling to prospective homebuyers. TSHEP brings comprehensive pre- and post-purchase homebuyer education to all 254 Texas counties and promotes the uniform quality of homebuyer education provided throughout the state.

Applications are available from www.tdhca.state.tx.us. For more information, please contact Dina Gonzalez at 512-475-3993 or dina.gonzalez@tdhca.state.tx.us.

Department Names New Research and Planning Manager

TDHCA has tabbed Brenda Hull as Manager of the Research and Planning section of the Division of Policy and Public Affairs. Also known as the Housing Resource Center, the section provides educational materials, planning documents, and technical assistance to the public, community-based housing development organizations, nonprofit housing developers, and other state and federal agencies.

Ms. Hull will oversee a wide range of projects that consist of the development of Consolidated Planning documents for HUD, including the Consolidated Plan, Action Plan, and Annual Performance Report; the State of Texas Low Income Housing Plan and Annual Report; the Agency Strategic Plan; Regional Allocation Formula and Affordable Housing Needs Score; and any special research projects as needed.

This will be her second stint with the Housing Resource Center; Ms. Hull previously served with the Center from 2002 to 2005 before accepting a position with the Department's Real Estate Analysis Division. She was Credit Underwriter from 2005 until her recent hire. Ms. Hull will be a key contact at TDHCA, particularly for developers, housing advocates, and local housing officials on numerous housing and related issues.

You can contact Brenda Hull at (512) 305-9038 or brenda.hull@tdhca.state.tx.us.

2007 Tax Credit Public Hearing Schedule Set

The dates, times, and locations for the 2007 Competitive Housing Tax Credit Program allocation cycle public hearings have been scheduled and posted on the program's web page. TDHCA conducts these hearings annually to accept comment from the general public on applications competing for federal tax credits in support of affordable rental housing.

The Department will conduct hearings in each of the state's 13 uniform service regions beginning Monday, April 2, in both San Antonio and Austin. Other hearings are scheduled for El Paso, Corpus Christi, Dallas, Harlingen, Houston, Longview, Lubbock, Lufkin, San Angelo, Waco, and Wichita Falls.

A detailed log of all 2007 pre-applications is posted on the Housing Tax Credit Program's website. The deadline for final applications is March 1, 2007, and the log will be updated to reflect this final list. For those who want to provide comment but are unable to attend any of the 13 hearings, TDHCA encourages written comment be provided. Such comments should be addressed to:

Multifamily Finance Production Division
Texas Department of Housing and Community Affairs
P.O. Box 13941
Austin, Texas 78711-3941

For additional information you may contact the Multifamily Division at (512) 475-3440 or visit the program's web page.

Individuals who require auxiliary aids or services for these meetings should contact Gina Esteves, ADA Responsible Employee, at (512) 475-3942 or Relay Texas at (800) 735-2989 at least two days before the meeting so that appropriate arrangements can be made.

Personas que hablan español y requieren un intérprete, favor de llamar a Jorge Reyes al siguiente número (512) 475-4577 por lo menos tres días antes de la junta para hacer los preparativos

Home Program Announces $11 Million in Funding Available for Rural Housing

TDHCA has announced two competitive funding notices through the Multifamily HOME Program's Rental Housing Development fund totaling $11 million to develop decent, affordable rental housing for low income Texans. The awards will be made through the Preservation and Rental Development competitive allocation cycle and the Community Housing Development Organization (CHDO) housing fund allocation.

Interested applicants have until March 1, 2007, to apply; after this date, any fund balances that still exist will be made available through a subsequent open application process.

The Department will award approximately $6 million to certified CHDOs for the creation of rental housing affordable to households earning no more than 80 percent or less than the area median family income. CHDOs are private, nonprofit organization with a 501 (c) federal tax exemption that must include providing decent, affordable housing as one of its purpose in its charter.

Another $5 million in federal HOME Program funds will be available to qualified applications for preservation and rental housing development. Eligible nonprofit organizations, for-profit entities, public housing authorities, and units of local government may apply for these funds.

Of this amount, approximately $2 million will specifically target the acquisition and rehabilitation of existing affordable rental housing at risk of losing the benefit of any existing subsidy – below-market interest rate loan, rental subsidy, Section 8 housing assistance payment, etc. – and reverting to market rental rates. The remaining $3 million in funds will be available to all eligible applicants for rental development activities.

New Hope Housing Nets Two Awards

One of the Department's thriving nonprofit partners in affordable housing recently received two regional and statewide awards for its quality housing and supportive services to extremely low income individuals.

New Hope Housing Inc. recently received a Mayor's Proud Partner Award from Keep Houston Beautiful and the Outstanding Community Organization 2006 Award from the Texas Homeless Network. Both awards acknowledge successful efforts to improve lives in the Houston community.

The nonprofit's most recent development, Canal Street Apartments, is a stunning property that provides 133 supportive, efficiency apartments for adults living singly on extremely low incomes. Seventy percent of Canal Street's residents earn an income of less than $1000 per month. The property is fully occupied and delivering the tenant supportive services essential to this population.

Canal Street Apartments, opened in November 2005, was also featured in an October 2006 issue of the Houston Business Journal and a feature article on the property will be published in the Texas Architect magazine March/April 2007 issue.

New Hope Housing's three properties are 98 percent occupied, providing strong evidence of the need of such Single Room Occupancy housing.

Successful nonprofit serving an extremely low income population is not possible without the consistent support from the funding community. TDHCA played a key role in helping support the funding for the very successful Canal Street venture.

The developers received a $1 million grant through the Department's HOME Program Community Development Housing Organization (CHDO) set-aside, and another $250,000 grant awarded through the Housing Trust Fund.

TDHCA Seeking Funds for Disaster Housing Pilot Program

TDHCA on October 20 submitted an application to the Department of Homeland Security-Federal Emergency Management Agency (DHS-FEMA) for $63 million in the federal agency's Alternative Housing Pilot Program.

The program will allow Texas and four other Gulf states impacted by hurricanes in 2005 to compete for $400 million in pilot projects to find housing alternatives that meet current and future needs of households affected by natural disaster.

To facilitate the process, TDHCA asked a panel of experts to review information submitted to the Department during a recent request for information regarding the pilot project. Included in the submission were submissions from Centara Building Technologies, The Heston Group, Octagon Building Systems, Palm Harbor Homes, Spacebox USA, and the University of Texas and Texas State University partnership.

FEMA will chair a selection committee consisting of Department of Homeland Security technical experts, representatives from HUD, and staff of private sector organizations with housing architectural, engineering, and construction expertise. The selection panel will evaluate all proposals and make grant recommendations to DHS staff regarding which proposals to fund.

TDHCA Releasing $132 Million in Mortgage Loans

Beginning this month, TDHCA will make available $132 million in low interest rate home loans targeting very low to moderate income Texans through the First Time Homebuyer Program. The funds will be available beginning November 15 through the Department's network of participating lenders with interest rates starting as low as 5.65 percent.

TDHCA's First Time Homebuyer Program offers very low to moderate income households an opportunity to qualify for mortgage loans with monthly payments that might otherwise be beyond their reach at current market interest rates.

The Department will waive certain program rules for residents in a 22-county region of southeast Texas designated for relief under the federal Rita Gulf Opportunity ("GO") Zone Act of 2005. These counties were most seriously affected by Hurricane Rita, and the program rule waivers will make it easier for more households to qualify for a home loan. Interest rates for loans inside the Rita GO Zone will feature a low rate of 5.99 percent and come with a grant for down payment and closing costs.

Loans outside the Rita GO Zone will be available in two forms, depending upon household income and geographic region: assisted loans, which also come with the 5 percent grant for down payment assistance; and unassisted loans, with no additional funds. Unassisted loans will feature a very attractive rate of 5.65 percent, while assisted loans will carry a 6.20 percent interest rate.

Interested homebuyers may visit the program's website at www.myfirsttexashome.com or call (800) 792-1119 to learn more about eligibility requirements, program details, the Rita GO Zone, or to find a participating lender.

HOME Funds being Awarded to East and Southeast Texas Communities

TDHCA is awarding an additional $4.3 million in HOME Investment Partnerships (HOME) Program funds to East and Southeast Texas communities to assist in their continued recovery efforts in the aftermath of Hurricane Rita. These Owner Occupied Assistance funds will help impacted communities repair or rebuild single family homes damaged or destroyed in the storm.

The HOME funds were made available to the 22-county, Presidentially declared disaster area affected by Hurricane Rita. Seven of the 22 eligible counties responded to the Notice of Funding Availability (NOFA). The seven counties are Jasper, Tyler, Newton, Polk, San Jacinto, Liberty, and Chambers. The applications received demonstrated the ongoing need for housing assistance in the disaster-impacted counties.

These funds represent the remaining 2005 and 2006 Community Housing Development Organization (CHDO) funds for which HUD granted a waiver to the Department to utilize in the areas impacted by Hurricane Rita. Funds were made available to Uniform State Service Regions 5 and 6 on a first-come, first-serve basis.

In an effort to award the full amount of available funding, staff requested and received approval to waive the maximum HOME Disaster Relief award amount of $500,000 to allow the award amount to be increased to $600,000 per applicant. An additional 4 percent of project funds were awarded for program administration, bringing the total HOME award per applicant to $624,000. These awards will be administered over an 18-month contract period.

Governor Perry Appoints Gloria L. Ray to TDHCA Board

Governor Rick Perry has appointed Gloria L. Ray of San Antonio to the TDHCA Governing Board for a term to expire January 31, 2011.

Ray is a retired senior official of Kelly Air Force Base where she served as chief of the resources management division for the propulsion directorate. She is a member of the Alamo Area Council of Government, serving on both the Council's Housing Round Table and Housing Advisory Committee, and is vice president the Alamo Community College District's bond oversight committee.

In addition, Ray is co-founder and volunteer executive director of the St. Paul Area Development Corporation and a member of the San Antonio Women's Hall of Fame. She has previously served as a member of the Carver Cultural Center Development Board, the Kelly Air Force Base speakers bureau, the Kelly Management Club, the Federal Managers Association, and is past president of the Fiesta San Antonio Commission. In March 2006, Ray was selected as chair of the annual Martin Luther King Jr. birthday celebration.

A student of liberal arts at St. Philip's College and the University of Texas at San Antonio, her appointment to the TDHCA Board is subject to senate confirmation.

Comment Period Still Open for Numerous Program Rules, Documents

The public comment period remains open for several program rules, policy documents, and planning materials. Comments provided by the public will assist TDHCA in finalizing these important rules and guidelines. The public comment period for all but two planning documents will run through October 18, 2006.

Items for which TDHCA will accept public comment include rules for the Housing Tax Credit, Multifamily Bond, HOME, Housing Trust Fund, Community Services Block Grant, Weatherization Assistance, Comprehensive Energy Assistance, and Emergency Shelter Grants programs.

TDHCA will also accept comment on planning and policy documents including the Affordable Housing Needs Score, Regional Allocation Formula, Compliance Monitoring Policies and Procedures, Low Income Housing Plan and Annual Report, Consolidated Plan-One Year Action Plan, Alternative Dispute Resolution, Colonia Action Plan, and numerous rules relating to the Department's underwriting processes.

The public comment period for the 2007 State of Texas Low Income Housing Plan and Annual Report and the 2007 Consolidated Plan-One Year Action Plan concludes October 12, 2006.

TDHCA in September held seven public hearings to accept comment in Corpus Christi, Amarillo, Dallas, Tyler, Bryan, San Antonio, and El Paso. The Department will conclude the 2006 consolidated hearings this month with hearings in Brownwood, Beaumont, Houston, Austin, Harlingen, and Midland. Interested parties may download the rules and documents from the Department's website prior to the hearings.

Board Okays Hurricane CDBG Funds for Unmet Non-Housing Needs

The TDHCA Governing Board on August 30 approved projects recommended by four councils of governments (COGs) totaling $30.5 million in Community Development Block Grants to help repair or replace critical public infrastructure in a 29-county region damaged by Hurricane Rita. The Office of Rural Community Affairs (ORCA), who is administering the Hurricane Disaster Relief CDBG grants in conjunction with TDHCA, will enter into contracts for the approved projects directly with cities, counties, and Indian tribes.

The Board approved projects totaling $12.1 million in Deep East Texas Council of Governments (DETCOG); $2.1 million in East Texas Council of Governments (ETCOG); $3.7 million in Houston-Galveston Area Council (H-GAC); and $12.4 million in Southeast Texas Regional Planning Commission (SETRPC).

The Board in July previously approved grants totaling $40.2 million to DETCOG, H-GAC, and SETRPC for unmet housing needs. Eligible housing activities included emergency home repair, home rehabilitation, and new single family construction. TDHCA will enter into contracts directly with the COGs for those projects. ETCOG indicated that it primarily sustained non-housing related damage and did not apply for grant funding of housing needs.

Hurricane Rita made landfall near Sabine Pass on September 24, 2005, damaging or destroying an estimated 75,000 homes and manufactured homes and leaving another 4,500 apartment units damaged or destroyed.

TDHCA Awards $24 Million in HOME Program Single Family Cycle

On August 30, 2006, TDHCA awarded $24 million to 91 eligible cities, counties, public housing authorities, and nonprofit organizations through the HOME Investment Partnerships (HOME) Program's 2006-2007 Single Family funding cycle.

More than 850 families will benefit from the 183 Single Family HOME applications submitted for funding for Homebuyer Assistance (HBA), Owner-Occupied Housing Assistance (OCC) and Tenant-Based Rental Assistance (TBRA). Award recipients may use these funds to provide down payment assistance for qualifying homebuyers, repair homes owned and occupied by low income households, or provide income-eligible households help with rent payments. Individuals and families receiving assistance through these awards must earn an annual income of no more than 80 percent of the area median family income.

The home repair awards made through the Owner-Occupied Housing Assistance fund totaled $20.2 million to 72 applicants. This fund provides financing for the rehabilitation of single family homes, and eligible activities include roof repair or replacement, and electrical system and plumbing repairs. In order to qualify for this program, an individual or family must own and reside in the home. Rental homes are not eligible.

Down payment and closing cost assistance, made through the HBA Program, will provide $3.3 million in awards to 13 applicants. Eligible individuals and families may receive up to $10,000 per household. Assistance is in the form of a second or third lien, 0 percent interest, 10-year deferred forgivable loan. Loans are to be repaid at the time of resale of the property, refinance of the first lien, repayment of the first lien, or if the unit ceases to be the assisted homebuyer's principal residence, if any of these occurs before the end of the 10-year term.

Beginning with the current funding cycle, 2006-2007 OCC awards to eligible families and individuals will be in the form of a deferred forgivable loan for households at or below 50 percent AMFI. For households whose income is above 50 percent AMFI, the assistance will be a 30-year, 0 percent interest, repayable loan.

TDHCA also awarded $1.47 million through the HOME Program's TBRA fund, awarded to six applicants to subsidize rents and provide security deposits for income-eligible tenants. Tenants are required to participate in a self-sufficiency program as a condition of receiving the assistance.

The US Department of Housing and Urban Development (HUD) is the funding source for TDHCA's HOME Program. Congress established the program in 1990 to provide multiyear housing strategies for units of governments to strengthen public-private partnerships and provide more affordable housing for eligible Texans.

TDHCA 13th Annual Community Affairs Executive Directors Conference

Eddie Fariss welcomes attendees to the 13th Annual Executive Directors Conference.

The Texas Department of Housing and Community Affairs sponsored the 13th Annual Community Affairs Division Executive Directors Conference on July 19-21, 2006. This year's conference was held at the Hyatt Regency Hotel in Austin. Approximately 200 executive directors, board chairs, and other key administrative staff of Community Services Block Grant (CSBG), Comprehensive Energy Assistance Program (CEAP), and Weatherization Assistance Program (WAP) subrecipients attended the conference.

The theme for this year's conference was "Community Action: Share the Vision." This theme emphasized the importance of sharing the vision for the future and informing the public and elected officials of the broad range of programs that TDHCA subrecipients operate to assist individuals and families in poverty and foster self-sufficiency. The Community Action Network in Texas is one of the largest networks in the nation. In FY 2005, they assisted 317,239 persons; transitioned 2,179 persons out of poverty; and administered $502,119,344 in federal, state, local, and private resources.

The TDHCA Diversity Choir opened the conference by singing traditional songs and gospel. Mr. Michael Gerber, TDHCA's new Executive Director, was the keynote speaker.

Speakers for the breakout sessions included Mr. Jim Bearden, a Certified Speaking Professional, who provided a two-part workshop entitled "Happily Ever Afters Don't Just Happen." The workshop focused on skills needed to assist organizations to succeed in challenging times and strategies for organizations to refine strategic direction in order to meet community needs.

Mr. Gary McDaniel of

Michael Gerber, TDHCA Executive Director, delivers the keynote speech at the 2006 Executive Directors Conference.

Christopher Ptomey, TDHCA Federal Liaison, receives a special recognition award for his efforts at the federal level.

the Texas Association of Nonprofit Organizations presented a workshop entitled "From Conflict to Cooperation," which focused on conflict resolution within organizations, with clients, and with other community organizations. Attorney Anita Lichtblau, Executive Director and General Counsel for Community Action Program Legal Services (CAPLAW), also presented a session addressing legal issues common to community action agencies and discussed the guidelines governing the use of federal funds. In addition, Ms. Lichtblau presented a workshop for nonprofit board members in which she discussed the fiduciary responsibilities of board members.

The Community Services Section conducted a workshop that highlighted CSBG Innovative Projects and provided an opportunity for peer-to-peer exchange on innovative projects. The Energy Assistance Section conducted a workshop on program changes to the Low Income Housing Energy Assistance Program CEAP and WAP programs.

William Dally, Deputy ED for Administration, receives a Special Recognition Award for his assistance to the Community Affairs Division.

On the evening of July 20, TDHCA held an awards dinner and presented certificates of appreciation to the 23 CSBG subrecipients that assisted persons affected by Hurricane Katrina and Hurricane Rita. In addition, TDHCA presented Service Award Certificates to CSBG and WAP subrecipient staff who have been working in community services or weatherization/energy assistance initiatives for 25 years or more. These recipients included Imelda Rodriguez and Alex Rodriguez from Bee Community Action Agency, Gloria Gonzalez and Suzanna Salinas from Cameron and Willacy Counties Community Projects, Thelma Garcia from Community Action Council of South Texas, Amparo Valenzuela from Community Council of Reeves County, Mary Fernandez from El Paso Community Action Program, Carol Brown from the City of Fort Worth, and Rosie Salinas of Gulf Coast Community Services Association.

TDHCA Diversity Choir performs at the opening session of the 13th Annual Community Affairs Division Executive Directors Conference.

The Conference concluded on Friday, July 21, with the CSBG Performance Awards Breakfast. The invocation was given by Reverend Sterling Lands PhD. TDHCA conferred monetary CSBG Performance Awards to CSBG subrecipients that transitioned persons out of poverty. This year, TDHCA awarded $185,545 in performance awards to 35 CSBG subrecipients for transitioning 1,593 persons out of poverty. The two largest awards were presented to Panhandle Community Services, for transitioning 387 persons out of poverty, and Cameron and Willacy Counties Community Projects, for transitioning 527 persons out of poverty.

TDHCA also presented a Lifetime Achievement Award to one individual who has been involved with community action for over 10 years and has contributed a lifetime of excellent service to persons in poverty. This year's recipient was Ms. Corina Jaimes, Executive Director of Community Action Inc. of Hays, Caldwell, and Blanco Counties.

The 13th Annual Community Affairs Division Executive Directors Conference provided an opportunity for subrecipient management staff and board members to learn current management concepts and share best practices. This year's conference was a success—not only because of the knowledge shared by individuals and organizations in attendance—but also because of the increase in the number of persons transitioned out of poverty.

Corina Jaimes, Executive Director, Community Action Incorporated of Hays, Caldwell and Blanco Counties, received the 2006 Lifetime Achievement Award.

Cameron-Willacy Counties Community Projects received the top CSBG Performance Award.

4. A list of publications and brochures describing the agency.

- 2005-2009 State of Texas Consolidated Plan
- 2009 State of Texas Consolidated Plan One-Year Action Plan

8. Biographical information (e.g, education, employment, affiliations, and honors) or resumes of all policymaking body members.

C. Kent Conine, Chairman, of Dallas is the president of Conine Residential Group and has served on the TDHCA Governing Board since 1997. He is a board member of the Federal Home Loan Bank of Dallas and Home and Apartment Builders of Metropolitan Dallas. He is also past president of the National Association of Home Builders and Texas Association of Builders. Additionally, Conine volunteers with Big Brothers Big Sisters of Dallas, the Center for Housing Resources, Fellowship of Christian Athletes and the Dallas Symphony Association. He received a bachelor's degree in finance from Texas Tech University.

Mr. Conine was appointed to the TDHCA Board by Governor George W. Bush on February 10, 1997 replacing Joseph Kemp and was reappointed to subsequent terms on September 14, 2001 and November 4, 2003, by Governor Rick Perry. Governor Perry appointed Mr. Conine as presiding officer of the Governing Board on January 11, 2008 and re-appointed Mr. Conine to another term on March 13, 2009.

Gloria L. Ray, Vice Chairwoman, of San Antonio is a retired senior official of Kelly Air Force Base where she served as chief of the resources management division for the propulsion directorate. She is a member of the Alamo Area Council of Governments, where she serves on the Housing Round Table and Housing Advisory Committee, and is vice president the Alamo Community College District's bond oversight committee. Ms. Ray is co-founder and volunteer executive director of the St. Paul Area Development Corporation and a member of the San Antonio Women's Hall of Fame. She has previously served as a member of the Carver Cultural Center Development Board, the Federal Managers Association, and is past president of the Fiesta San Antonio Commission. Ms. Ray studied liberal arts at Saint Philip's College and the University of Texas at San Antonio.

Ms. Ray was appointed to the TDHCA Board by Governor Rick Perry on September 20, 2006. Ms. Ray is currently the Chair of the TDHCA Audit Committee.

Leslie Bingham Escareño of Brownsville is CEO of Valley Baptist Medical Center-Brownsville. She is a board member and treasurer of Easter Seals of the Rio Grande Valley and board member of the Children's Museum of Brownsville. She is also past chair of the Valley AIDS Council and the San Benito Chamber of Commerce. Additionally, Bingham Escareño is a member of the Texas Hospital Association's Council on Policy Development. She received bachelors and master's degrees from the University of Mississippi and a master of business administration degree from the University of Texas-Pan American.

Ms. Bingham-Escareño was appointed to the TDHCA Board by Governor Rick Perry on January 15, 2008, replacing Mayor Norberto Salinas.

Mr. Tom H. Gann of Lufkin is president of Gann Medford Real Estate Inc., a full service brokerage firm in Lufkin. In addition, he is president of Tom Gann & Associates, a residential and commercial construction company. He is a past director of the East Texas Mortgage Finance Corporation and past Board member of the Angelina and Neches River Authority. A former chair of the Real Estate Center Advisory Committee at Texas A&M University, Gann previously served as a member of the Texas Strategic Military Planning Commission. He served in the U.S. Army Reserve and received both a Batchelor's and Master's degree in Business Administration from Baylor University.

Mr. Gann was appointed to the TDHCA Board by Governor Rick Perry on March 13, 2009, replacing Sonny Flores.

Dr. Juan Sanchez Muñoz of Lubbock is an Associate Professor of Education, Associate Vice Provost and Special Assistant to the President at Texas Tech University. He has served as a commissioner for the City of Lubbock Housing Authority. Dr. Muñoz received a bachelor's degree from the University of California at Santa Barbara, a master's degree from California State University, and a doctorate degree from the University of California at Los Angeles. In addition to his academic appointments, he is president of the board of directors for the Lubbock Boys & Girls Club, vice president of the board of directors of the South Plains Boy Scouts, and is a director in the Texas Lyceum.

Dr. Muñoz was appointed to the TDHCA Board by Governor Rick Perry on January 1, 2008, replacing Shadrick Bogany.

Lowell Keig of Austin is an attorney, currently serving as General Counsel and Corporate Compliance Director for Youth and Family Centered Services, Inc., which provides affordable health, education, and assisted living services, to troubled children and adolescents in eight states. He previously served as the Chief of the Elder Law and Public Health Division of the Office of the Attorney General.

Mr. Keig was appointed to the TDHCA Board by Governor Rick Perry on August 26, 2009, replacing Tomas Cardenas.

Table of Contents

The Texas Department of Housing and Community Affairs (TDHCA) is the state's lead agency for affordable housing, energy assistance, and community services activities. TDHCA is building homes as well as building communities. TDHCA programs simultaneously improve the lives of households assisted and provide needed investments to local communities to help spur revitalization and growth. In administering the programs under its charge, TDHCA is continuously working to use limited funds more effectively, leverage resources, and ensure delivery of quality services and products. During state fiscal year 2008, TDHCA's accomplishments included the following:

- Enabled more than 2,800 families to achieve the American Dream by purchasing their first home, including 200 families whose contribution included "sweat equity." TDHCA's low-interest, fixed rate loan products offer low to moderate income households safe and affordable alternatives to the predatory products which helped instigate the current mortgage crisis;

- Awarded funds to create or rehabilitate more than 11,000 units of quality, safe, rental housing for working families;

- Monitored nearly 243,000 existing units to ensure that they are well-maintained and are compliant with state and federal law;

- Assisted 100 veterans transitioning into permanent housing by providing rental or homebuyer assistance;

- Helped more than 50,000 households through utility bill payments assistance;

- Decreased overall housing energy costs and created healthier environments for 3,500 families through home weatherization;

- Provided homeless shelter or services for more than 100,000 persons, including at-risk youth and women and families fleeing domestic violence;

- Helped over 2,700 Texans transition out of poverty.

During the 2008-2009 biennium, TDHCA remains dedicated to is core mission to ensure that recipients of funding are fully complying with their commitments to provide safe, decent, affordable housing and energy and community services assistance to low income Texans. The Department's compliance capabilities have been greatly enhanced by the passage of Senate Bill (SB) 1908, 80th Texas Legislature. Previous to the passage of SB 1908, TDHCA had a limited scope of potential sanctions to impose, such as barring future participation in TDHCA programs. SB 1908 conferred on the Department new authority to impose significant penalties. For instance, TDHCA may now impose a fine of up to $1,000 a day per violation on housing sponsors, contractors and others who fail to abide by TDHCA rules. These new penalties have resulted in increased cooperation from property owners and managers to ensure that their developments are safe and well-maintained.

TDHCA's First Time Homebuyer Program offers a safe, conventional, 30-year fixed rate mortgage at a highly competitive rate, usually one (1) percent or more below current market interest rates. TDHCA's mortgage loan products are safely underwritten and bear no resemblance to "exotic" loan products with variable interest rates. Still, given the current mortgage and foreclosure crisis, the Department has joined with NeighborWorks America, local governments, the financial industry, and nonprofits to form the Texas Foreclosure Prevention Task Force. TDHCA has taken a lead role in disseminating information statewide regarding resources available to homeowners who are in or near foreclosure, including local counseling services and a toll free number, the HOPE Hotline (1-888-995 HOPE), which provides guidance to homeowners at risk of foreclosure. TDHCA has also provided funding for the Task Force. Task Force activities include outreach efforts by local foreclosure prevention initiatives and the monitoring of mortgage default patterns and trends in Texas through ongoing research in order to support timely intervention.

In 2008, TDHCA implemented changes to the Texas Bootstrap Owner Builder Loan Program that have significantly increased utilization and allowed broader participation by nonprofits statewide. The Department moved the program from a model in which funds were disbursed through competitive awards to a new loan reservation system, similar to the manner in which the Texas First Time Homebuyer Program funds are distributed. Rather than placing funds under contract for a 24-month period, TDHCA allows pre-certified nonprofits to reserve funds for up to ten loans at a time. If funds are not draw-down within a certain time frame, they become available to the next nonprofit lender. This has resulted in a dramatic increase in efficiency and utilization of Bootstrap funds. TDHCA estimates that in 2008 the program will fund $6 million in Bootstrap Loans, reflecting effective utilization of both its $3 million in General Revenue appropriations and its deobligated funds from previous years which have been applied to the program.

While proud of its success, TDHCA recognizes that it faces a number of emerging challenges and opportunities over the next several years. These include the state’s continued dynamic growth, increasing housing and energy costs, and the recent mortgage crisis and resulting market conditions .

According to the U.S. Census Bureau, in 2000 approximately sixty (60) percent of all low income households in the state - or 1.7 million low income households - were experiencing some level of housing need, such as excessive housing costs or overcrowding. Every indication suggests that this number will increase in the coming decades. The U.S. Census Bureau estimates Texas gained 2.95 million people since the 2000 Census, a 14% growth, for a total of approximately 23.9 million people. By 2040, it is anticipated that our population will be 50.4 million. In 2008, TDHCA was able to provide housing assistance to approximately 17,000 households, most of whom were low income. This allowed us to address less than one (1) percent of the estimated housing need.

Population increases are not the only factor exacerbating the need for affordable housing in the state . TDHCA has seen the costs of construction and energy rise, translating into higher housing costs for low income households and decreased purchase power for TDHCA affordable housing resources . This has required TDHCA to increase the per household subsidy for most of its housing programs, decreasing the overall number of households served. The national mortgage crisis has also had a major impact on TDHCA programs. While increased foreclosures place more families at risk, thereby increasing the number of households needing affordable housing, the reverberations of this crisis on the broader financial markets also have implications for TDHCA programs. Tightened loan standards now limit the lending options of would-be homeowners and of affordable housing developers alike, regardless of the borrower’s credit standing. The Housing Tax Credit Program, which is the primary vehicle for building and rehabilitating affordable workforce housing, has seen the value of a housing credit decrease from 95 cents to 80 cents on the dollar since the beginning of 2008. Both the Housing Tax Credit Program and the Private Activity Bond Program rely on private investors, but the pool of such investors is diminishing, and is not likely to rebound until mid 2009 or later.

Although all income groups are affected by rising costs and tightening financial markets, the impact is greatest on populations with the least resources, including extremely low income households and persons with disabilities. It is in serving these populations that TDHCA encounters its greatest obstacles. TDHCA has very limited tools at its disposal, and these do not fit the needs of all Texans. The vast majority of TDHCA housing funds (99%) derive from the federal government. Federal programs tend to be highly complex and proscriptive. For instance, while the HOME Investment Partnership Program can be utilized to serve extremely low income households, the intricacies of its regulations often preclude its use for special initiatives. Other programs such as the Housing Tax Credit Program and the Private Activity Bond Program provide a sufficient subsidy to reach working families but cannot independently serve families at the lowest income levels.

Congress has recently passed significant housing legislation that, in addition to addressing many aspects of the mortgage crisis and reforming federal incentive programs, expands federal affordable housing resources. These new resources will play an important role in addressing housing needs, but like existing federal programs, these resources are very targeted and thereby preclude the flexibility innovative programs need to reach underserved populations. Among those benefiting from the legislation will be some homeowners facing foreclosure and communities struggling with an inventory of foreclosed homes. The legislation also provides a temporary increase to the Housing Tax Credit and Private Activity Bond programs and creates a new program, the National Affordable Housing Trust Fund. The Fund is to be supported by future revenues generated by Government Sponsored Enterprises (Fannie Mae and Freddie Mac) and must target extremely low and very low income households. However, despite its broad name, the Fund is very restricted in its use: at least ninety percent of the funding made available under the program must be used strictly for rental development activities, leaving no more than ten percent of the funding for homeownership activities. It is not yet clear when the funding will be available or how much funding will be allocated to Texas.

The combined impact of increasing needs and limited tools highlight the need to find another vehicle to deliver affordable housing options to low income Texans, especially more vulnerable and difficult to reach populations. For this reason, TDHCA is respectfully requesting an additional $20 million per year for the Housing Trust Fund. The Housing Trust Fund is the only state funded affordable housing program. Unlike federal programs, the Housing Trust Fund is highly flexible and has been successfully utilized for state initiatives that could not be supported by federal funds, such as increasing housing options for people with disabilities and helping veterans returning from Iraq and Afghanistan transition to permanent housing through rental and homebuyer assistance. TDHCA has also utilized these funds for the Bootstrap Program, a state-mandated sweat-equity program, and to provide gap-financing for low income homeowners affected by Hurricane Rita whose rehabilitation or reconstruction costs exceeded allowable limits for other programs.

The 80th Texas Legislature supported growth in the Housing Trust Fund and appropriated an additional $ 2.5 million per year to the Housing Trust Fund for the 2008-2009 biennium. The Department has been a good steward of these funds, targeting them to populations underserved through federal funding and using the funds to leverage other resources. The additional $20 million per year that the Department is requesting would allow us to continue to increase affordable housing opportunities for hard to reach populations. Activities that could be funded include homebuyer and rental assistance for veteran's returning from Iraq and Afghanistan; expansion of the successful Bootstrap Home Loan Program; homebuyer assistance and barrier removal for people with disabilities; gap-financing for rural rental development; supportive housing; and nonprofit capacity building to expand the number of effective affordable housing providers in the state. As with the previous funding received, the Department would work with stakeholders to determine the best application of these funds and provide an allocation plan to the Legislature at the beginning of the fiscal year. Given previous stakeholder input and expansion of federal rental development options, the majority of the funds would likely support homeownership and other single family activities for underserved communities. However, given rapidly changing real estate conditions, credit markets and other shifts, flexibility is key to the success of the Housing Trust Fund and the emphasis must always remain on the production of additional affordable housing.

TDHCA is also requesting full restoration of the System Benefit Fund Weatherization Assistance Program. As of July 2008, there were over 14,000 households on weatherization waiting lists statewide. Targeted low income energy efficiency programs coordinated with existing federal weatherization efforts at TDHCA are among the allowable and intended statutory uses of the SBF. These programs help decrease a household's monthly cost burden, decrease overall demand for energy in the state, create healthier living environments, and make homes more affordable. Activities that would be funded through this Exceptional Item include insulation, replacement of energy inefficient heating and cooling components, and caulking. The funding requested would return the program to the funding level approved by the 77th Texas Legislature and allow TDHCA to serve an additional 2,500 households per year in areas of the state where the electric industry has been deregulated. The program targets the elderly, families with young children, and others whose health makes them more vulnerable to the state's temperature extremes. Increased energy costs, the need to diminish the state's energy demand, and demographic trends indicate a strong and growing need for weatherization services.

Ten Percent Reduction

In determining budget items to include in the ten-percent General Revenue Reduction Schedule, TDHCA sought to minimize the impact on service delivery. Although the majority of the Department’s General Revenue is dedicated to the Housing Trust Fund, TDHCA determined that it would propose cuts in this area only when all other cuts had been considered. During the 2008-2009 biennium, the Department received funds to contract for technical assistance to help rural communities apply for Balance of State Continuum of Care funds to help them address their homeless populations and those at risk of homelessness. Much of the activity being funded involves outreach and education that will lay the groundwork for the applications. The Department determined that the work being currently funded could continue to be used for application effort undertaken during the 2010-2011 biennium, minimizing the need for continued funding for this activity. The Department then examined potential cuts within Central Administration and identified funds used for staff development and training for potential reduction. While staff development plays an important role in maintaining the expertise and effectiveness of the state’s housing finance agency, the Department’s ability to perform it's core mission would not be affected by this reduction. Any reduction to Central Administration beyond this point would require elimination of staff needed to maintain internal controls; therefore this was not considered.

The Department then looked to funds appropriated for the statutorily required Affordable Housing Research and Information Program. While activity under this program is important, the program does not provide direct services; it was therefore considered for reduction before the Housing Trust Fund. It was determined that a 41.67% reduction would provide the program funding for limited market studies, research and public education campaigns, although the level of activity would be significantly reduced.

In order to achieve the remaining reduction, TDHCA looked to the Housing Trust Fund. Because of existing federal resources for multifamily activity, the Department first reduced funding associated with Strategy A.1. 7 – Housing Trust Fund Multifamily- before reducing funds that could be used for single family activities such as homeownership.

TDHCA Governing Board
C. Kent Conine, Chair (Dallas) Term expires January 31, 2013
Gloria L. Ray, Vice Chair (San Antonio) Term expires January 31, 2011
Leslie Bingham-Escareño (Brownsville) Term expires January 31, 2013
Tomas Cardenas (El Paso) Term expires January 31, 2013
Dionicio Vidal (Sonny) Flores (Houston) Term expires January 31, 2009
Juan Sanchez Muñoz (Lubbock) Term expires January 31, 2011

The Manufactured Housing Division

The Manufactured Housing Division (MHD) is administratively attached to the Department and operates under its own five member governing board. The MHD has three functional strategies: 1) the issuance of statements of ownership and location for manufactured homes and the issuance of licenses for different activities in the manufactured housing industry; 2) the inspection of such homes; and 3) enforcement and consumer protection activity, including the operation of a manufactured homeowners’ recovery trust fund The MHD also acts as HUD’s State Administrative Agency with respect to the federal manufactured home program. As part of its administrative agreement with TDHCA, MHD field inspectors assist in the assessment of proposed multifamily sites as well as inspects and licenses migrant labor housing facilities.

MHD undertook various policy changes in response to the enactment of House Bill 1460, 80th Texas Legislature. This law streamlined licensing processes, converting all licenses to two-year licenses, while increasing training requirement for licensees. Most significantly, the legislation gave MHD enforcement authority to order cease and desist orders and to order corrective action. This new authority will help reduce illegal and unethical activity, providing benefit both to consumers and the broader industry.

MHD is in the process of upgrading its database system with an integrated web-enabled system. The upgrade should be fully operational in FY 2010 and is expected to increase MHD's efficiencies by providing faster accessibility. This would also reduce costs currently associated with the mailing, scanning and processing of data.

By being administratively attached, MHD and TDHCA are able to enjoy significant efficiencies in information technology, human resources, and other unique housing services.

MHD Governing Board
Michael H. Bray, Chair (El Paso) Term expires January 31, 2011
Devora Denice Mitchell (Kermit)Term expires January 31, 2011
Kimberly A. Shambley (Dallas) Term expires January 31, 2009
Pablo Schneider (Richardson) Term expires January 31, 2013

Criminal Background Check Authority and Procedures (As Requested in Detailed Instructions Provided by LBB and GOBP)

Texas Government Code, Section 411.1405, provides TDHCA authority to obtain from the Department of Public Safety (DPS) the criminal history record information maintained by DPS of any "employee, applicant for employment, contractor, subcontractor, or intern or other volunteer with the Department or with a contractor or subcontractor for the Department" and anyone who has "access to information resources or information resources technologies, other than a desktop computer or telephone station assigned to that person." As of August 2008, TDHCA began conducting criminal history checks for all new hires as well as all current employees. TDHCA anticipates completing criminal history checks of all current employees by December 2008.

Description of TDHCA Functional Areas

MANUFACTURED HOUSING

The Manufactured Housing Division carries out the processing of ownership records, manufactured home licensing, installation inspections, consumer protection, and HUD's State Administrative Agency.

ADMINISTRATION

The Financial Administration Division is responsible for the overall fiscal management, accounting, and financial reporting for the Department. The Division's other functions include budgeting, payroll, travel, purchasing, bond accounting and investment activities. The Division is also responsible for the coordination of information and planning relating to the state budget / appropriations process. The annual financial audit, conducted by an independent auditor, is facilitated through the Financial Administration Division. In conjunction with the Bond Finance Division, this Division monitors the financial status of the bonds and performs all responsibilities of the Department in accordance with the bond covenants as stated in the bonds' legal documents created as part of the issuance process.

The Portfolio Management and Compliance Division ensures program and financial compliance with federal and state regulatory mandates through established oversight and monitoring procedures. By effectively managing TDHCA's housing contracts, the Division ensures financial feasibility, monitors for compliance, and provides technical assistance to the affordable housing industry. Failure to comply with state and federal regulations results in various sanctions, including notification to the Internal Revenue Service for noncompliance identified under the Housing Tax Credit program. The Department has the ability to impose a penalty of up to $1,000 per day for uncorrected noncompliance. Entities can also be debarred from future participation in Department programs. The staff of the Portfolio Management and Compliance Division is integral in the initiation of these sanctions and works closely with the Department's Legal Division on these matters.

PROGRAMS

The Office of Colonia Initiatives (OCI) coordinates programs that improve living conditions in the state's colonias, typically located within 150 miles of the Texas-Mexico border. OCI assists the Department's program Divisions by coordinating activities in the colonias that provide consumer education on contracts for deed, assistance with housing, and technical assistance for housing and infrastructure development through field offices located in Edinburg, El Paso, and Laredo. Programs administered through the OCI include the Texas Bootstrap Home Loan Program and the Colonia Self-Help Centers Program.

The Community Affairs Division administers programs to improve the living conditions of poor and homeless persons, reduce the cost of home energy for very low-income persons, and increase the availability of affordable housing to very low-income households. These include the Community Services Block Grant Program, the Emergency Shelter Grants Program, the Comprehensive Energy Assistance Program, the Weatherization Assistance Program and the Section 8 Program.

The Disaster Recovery Division administers federal and state funds focused on assisting individuals and communities in Southeast Texas recover from the impacts of Hurricanes Rita and Katrina.

The HOME Division administers multi-use programs that expand affordable housing options, with a focus on initiatives serving rural and special needs populations. These include the federal HOME Investment Partnerships Program and the State of Texas Housing Trust Fund.

The Multifamily Finance Production Division administers programs that encourage the production of affordable, high-quality multifamily housing. These include the Housing Tax Credit Program and the Multifamily Bond Program.

The Texas Homeownership Division administers programs that assist individuals and families in purchasing a home. These include the First Time Homebuyer Program, the Texas Loanstar Program, the Mortgage Credit Certificate Program, and the Texas Statewide Homebuyer Education Program.

The Real Estate Analysis Division provides the TDHCA Governing Board and staff with comprehensive analytical reports necessary to make well-informed decisions for funding of affordable housing developments. The Division is also charged with reviewing cost certification materials.

The Bond Finance Division is chiefly responsible for structuring, restructuring, administering and monitoring the Department Single Family Mortgage Revenue Bonds (SFMRB) issues and coordinates all activities related to the issuance and/or remarketing of SFMRBs and notes. The Division also undertakes monitoring and compliance functions related to TDHCA single family and multifamily mortgage revenue bonds. In conjunction with Financial Administration, this Division monitors the financial status of the bonds and performs all responsibilities of the Department in accordance with the bond covenants as stated in the bonds' legal documents created as part of the issuance process.

Housing Resource Center produces the annual planning documents and publications for both the state and federal government and serves as a clearinghouse for affordable housing and community services information throughout the state. The Center also serves as the Department liaison for various interagency workgroups.

The Division of Policy and Public Affairs acts as the primary liaison between TDHCA and the executive and legislative branches of state and federal government, industry stakeholders, advocacy groups, and housing and community service organizations throughout the state.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy reflects single family activities financed through authority provided under 26 United States Code §143 and §§1372.023 and 2306, Texas Gov't Code Ann. and § §2306.053, 2306.142(g), and 2306.353 which provide TDHCA authority to issue mortgage revenue bonds (MRBs) to finance housing for families of low, very low, and moderate income. §2306.1072, Texas Gov't Code guides administration of the program. The First Time Homebuyer (FTHB) Program offers below-market-rate mortgage financing and down payment and closing cost assistance. TDHCA currently offers “unassisted” and “assisted” First Time Homebuyer loans. “Unassisted” loans do not provide funds for down payment and closing cost assistance. “Assisted” loans provide down payment and closing cost assistance to low income borrowers and typically carry a higher interest rate. The Mortgage Credit Certificate (MCC) Program provides qualified homebuyers with credits against their federal income tax burden. The reduced tax burden makes homeownership more affordable. By making homeownership more affordable to very low to moderate income households, this strategy supports the Department's Goal 1(To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State’s Priority Goal 4, Economic Development, and the State’s Priority Goal 8, General Government, which includes housing affordability. The indirect economic impact of construction spurred by this strategy supports Benchmark 4.10 (Texas unemployment rate).

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Agency code: **332** Agency name: **Department of Housing and Community Affairs**

GOAL: 1 Increase Availability of Safe/Decent/Affordable Housing — Statewide Goal/Benchmark: 4 0

OBJECTIVE: 1 Make Loans/Grants/Incentives to Fund/Develop/Preserve Housing — Service Categories:

STRATEGY: 1 Federal Mortgage Loans & MCCs through the SF MRB Program — Service: 15 Income: A.1 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

§1372.023, Tex. Gov. Code Ann., sets aside Private Activity Bond (PAB) authority for TDHCA for this activity. The newly added §2306.1072, Tex. Gov. Code (Senate Bill 1908) directs TDHCA to make down-payment assistance (i.e. assisted loans) available to low income households at or below 80% of the area family median income (AMFI). Rider 11 requires that TDHCA reserve for one year 30% of its FTHB funds for households at or below 60% AMFI and offer assisted loans to this population. TDHCA is requesting a revision to this rider to conform its requirements with SB 1908.

TDHCA was able to obtain additional PAB authority in 2006-07 when other PAB issuers did not utilize their statutory set asides; this increased the volume of FTHB loans funded in 2007. As access to additional PAB cannot be predicted, 2009-11 FTHB projections are based on TDHCA's statutory set-aside, anticipated increases in housing prices, and a likely, one-time increase in housing-related PAB authority due to recent federal legislation (HR 3221). TDHCA is still analyzing the impact of this bill.

The high number of assisted loans in 2007 is a result of a set-aside of these funds for areas affected by Hurricane Rita. In accordance with the Gulf Opportunity Zone Act, higher income and purchase price resulted in higher average assisted loan amounts. This average will likely increase again in 2009-2011, as TDHCA makes this product available to households at or below 80% AMFI. The MCC Program was inactive in 2007 but reestablished in 2008.

GOAL: 1 Increase Availability of Safe/Decent/Affordable Housing — Statewide Goal/Benchmark: 8 12

OBJECTIVE: 1 Make Loans/Grants/Incentives to Fund/Develop/Preserve Housing — Service Categories:

STRATEGY: 2 Provide Single Family Housing through HOME Investment Program — Service: 15 Income: A.1 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

This strategy reflects single family activities funded through the HOME Investment Partnerships Program (42 U.S.C., Section 12741 et. seq.) including Owner-Occupied Housing Assistance (OCC), Homebuyer Assistance (HBA), and Tenant-Based Rental Assistance (TBRA) programs. The HOME Program was created under the Cranston-Gonzalez National Affordable Housing Act and is administered by TDHCA through authority granted under Section 2306.111, Texas Gov't Code Ann. The HOME Program provides assistance in the form of loans and grants to units of general local government, public housing authorities, community housing development organizations, nonprofit organizations, and for-profit entities. The targeted population includes low, very low, and extremely low income households. Activities under this single family strategy reflect roughly 65% of total HOME funds. (The balance of HOME funds is reflected under Strategy A.1.6: HOME—Multifamily.) This strategy supports the Department's Goal 1(To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State's Priority Goal 4, Economic Development, and the State's Priority Goal 8, General Government, which includes housing affordability. Through its targeting of extremely low and very low income households and its partnership with local government and providers, it also supports State Priority Goal 3, Health and Human Services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

§2306.111(c), Texas Gov't Code Ann., requires TDHCA to expend 95% of all HOME funds in communities that do not receive a HOME allocation directly from HUD; remaining funds must serve persons with disabilities anywhere in the state. State mandates and initiatives reflected in this strategy include $4 million over the biennium for contract for deed conversions (Rider 6) and $1 million yearly for the Colonia Model Subdivision Program (§2306, Tex. Gov't Code Ann., Subchapter GG).

Federal regulations require that 15% of the total annual HOME allocation be reserved for community housing development organizations (CHDOs). While TDHCA anticipates continuous HOME funding, an increase in the number of participating jurisdictions (PJs) - communities which receive direct HOME funding- could decrease TDHCA funding since funding is determined on a statewide basis.

Fewer awards were made in 2007, reflecting 1) insufficient applicants received during a biennial allocation process implemented in 2006-2007 and 2) a delay in receiving the federal funds that year. Performance for 2008 reflects a delay in making home repair funds available; TDHCA will award these funds in 2009. Explanatory 1 reflects award made under Colonia Model Subdivision Program; no award was made in 2008. Explanatory 5 and 6 for 2007 reflect administrative activities associated with the biennial allocation made in 2006-2007 allocation; measures for 2008 forward reflect single year funding as well as streamlined processes. Projections for 2009-2011 reflect increased housing costs.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy reflects single family activities funded through the Texas Housing Trust Fund (HTF) (§2306.201 et seq., Texas Gov't Code Ann.). In recent years, TDHCA has utilized HTF to implement the statutorily required Texas Bootstrap Owner-Builder Loan Program. Unlike federal programs, the Housing Trust Fund is highly flexible and has been successfully utilized for state initiatives that could not be supported by federal funds, such as the Bootstrap Program. The Bootstrap Program works through nonprofit organizations to assist very low income families construct or repair their homes through sweat equity. Non-Bootstrap activity funded in 2008 include rental and down-payment assistance for returning veterans; homeownership activities; and home repair gap-financing to assist homeowners affected by Hurricane Rita. This strategy supports the Department's Goal 1 (To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State's Priority Goal 4, Economic Development, and the State's Priority Goal 8, General Government, which includes housing affordability. Through its targeting of very low income households and economically distressed communities and its partnership with local nonprofits, this strategy also supports State Priority Goal 3, Health and Human Services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Agency code: **332** Agency name: **Department of Housing and Community Affairs**

GOAL: 1 Increase Availability of Safe/Decent/Affordable Housing — Statewide Goal/Benchmark: 8 12

OBJECTIVE: 1 Make Loans/Grants/Incentives to Fund/Develop/Preserve Housing — Service Categories:

STRATEGY: 3 Provide Funding through the HTF for Affordable Single Family Housing — Service: 15 Income: A.1 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

The percent of HTF funding directed at single family activities fluctuates from year to year. This fluctuation reflects budget constraints, legislative mandates, and response to public input. HTF strategies rely primarily on General Revenue appropriations but also use loan repayments and interest earnings as appropriated by Rider 10. TDHCA utilizes General Revenue funding received under this strategy to support the Texas Bootstrap Owner-Builder Loan Program. This allows TDHCA to comply with Section 2306.7581(a-1), Texas Government Code, which requires TDHCA to provide $3 million per year for the program. 2/3 of Bootstrap awards must be made in Economically Distressed Areas. The 80th Texas Legislature increased HTF by approximately $2.5 million per year.

TDHCA determines use of HTF annually through a public process. Per household subsidy varies greatly depending on activity funded and affects annual perforamance. Statute caps the amount of Bootstrap subsidy per loan to $30,000. Stakeholders indicate that an increase in the cap is necessary to ensure greater utilization of the program.

Performance measures for 2008 forward reflect the increased HTF appropriations. Households served in 2007 and most especially in 2008 reflect awards and loans funded through deobligated balances and loan repayments.

Funding information reflects funds transferred to the Texas Treasury Safekeeping Trust per Rider 10.

The reallignment of staff and funding allocated to this strategy provides a more accurate reflection of staff dedicated to this activity.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Funds for the Section 8 Housing Choice Voucher Program (HCVP), codified at 42 U.S.C. Sec. 1437f, are received from the US Department of Housing and Urban Development (HUD). TDHCA administers this program through authority granted under Section 2306.53(b)(10), Texas Government Code. The HCVP assists primarily extremely low-and very low-income households with housing by paying rent subsidies to landlords of private-sector rental housing. The Department’s program serves small rural communities that usually do not have a public housing authority to administer the HCVP vouchers. This strategy supports the Department's Goal 1 (To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State’s Priority Goal 4, Economic Development, and the State’s Priority Goal 8, General Government, which includes housing affordability. Through its targeting of extremely low and very low income households, it also supports State Priority Goal 3, Health and Human Services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

HUD currently provides a fixed budget based on the number of vouchers utilized at a specified point in time. TDHCA anticipates increases in fair market rents, local operator fees, and utility allowances. These increases combined with level funding will reduce households served under this strategy.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Housing Tax Credit Program was created by the U.S .Tax Reform Act of 1986, as amended and is governed by 26 U.S.C. §42, Internal Revenue Code. The program provides financial incentives, in the form of equity, to nonprofit and for-profit developers of multifamily housing for extremely low income and very low income households, senior citizens, persons with disabilities, and homeless persons. Texas Department of Housing and Community Affairs (the Department) administers the program through authority granted under §2306.6701, Tex. Gov't Code Ann., Subchapter DD, TDHCA's governing state statute for the program.

The program's purpose is to encourage the development and preservation of affordable rental housing for low income families and individuals and prevent the loss of affordable housing through acquisition and rehabilitation of existing properties. The targeted beneficiaries of the program are very low and low income families, senior citizens, persons with disabilities, and homeless persons. Developments funded through the program offer onsite supportive services such as child care facilities, health care and immunization services, and computer training facilities. This strategy supports the Department's Goal 1(To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State's Priority Goal 4, Economic Development, and the State's Priority Goal 8, General Government. The indirect economic impact of construction supports Benchmark 4.10 (Texas unemployment rate).

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

The state receives an annual per capita allocation of federal tax credits. Federal law also allows developments financed through private activity bond (PAB) authority to receive tax credits. While the number of competitively awarded credits from the state's annual allocation can be estimated from year to year, the amount of tax credits allocated to PAB-financed developments changes based on the number of PAB developments financed per year by TDHCA and other issuers. This in turn depends on available PAB authority and market forces; PAB production has declined in recent years.

The current credit crisis has drastically impacted the credit pricing associated with tax credits. In 2008, pricing decreased from 95 cents to 80 cents on the dollar, affecting current applicants and placing recently awarded applicants at risk of having to return credits. Congress has approved an increase to each state's 2008 and 2009 allocation that may mitigate this impact (HR 3221).

Another economic factor affecting production is stagnant gross allowable rents and increased utility costs which effectively reduce the maximum allowable rent that can be charged for an affordable unit. At the same time, operating costs have increased. The increase in overall operating expenses and stagnant rents make it more difficult to make transactions financially feasible. Natural disasters experienced in the state in recent years have increased construction cost while affecting the availability of materials and labor, also decreasing overall households served.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy reflects multifamily activities funded through the HOME Investment Partnerships (HOME) Program. The HOME Program (42 U.S.C., §§12701 - 12839) was created under the Cranston-Gonzalez National Affordable Housing Act and is administered by TDHCA through authority granted under Section 2306.111(a), Tex. Gov. Code Ann. The HOME Program provides loans and grants to units of general local government, public housing authorities, community housing development organizations, nonprofit organizations, and for-profit entities. The targeted population includes low, very low, and extremely low income households. The multifamily component of the HOME Program provides funding for the new construction or rehabilitation of affordable multifamily rental development. Activities under this multifamily strategy reflect roughly 35% of total HOME funds. (The balance of HOME funds is reflected under Strategy A.1.2: HOME—Single Family.) This strategy supports the Department's Goal 1 (To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State’s Priority Goal 4, Economic Development, and the State’s Priority Goal 8, General Government, which includes housing affordability. The indirect economic impact of construction spurred by this strategy supports Benchmark 4.10 (Texas unemployment rate).

STRATEGY: 6 Provide Multifamily Housing through HOME Investment Program — Service: 15 Income: A.1 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

§2306.111(c), Texas Gov't Code Ann., requires TDHCA to expend 95% of all HOME funds in communities that do not receive an allocation of HOME funds directly from HUD. The remaining funds must be used to serve people with disabilities anywhere in the state. Federal regulations require that 15% of the total annual HOME allocation be reserved for community housing development organizations (CHDOs). Historically the majority of CHDO funds have been used for multifamily activity.

Because many applicants for these funds also jointly apply for funding under the Housing Tax Credit (HTC) Program, the number of households served under this strategy is often contigent on the success of joint HOME/HTC applications. In 2007, there were fewer successful applications of this nature, while a large number of joint applications received funding in 2008. Measures for 2008 include awards made using deobligated funds. The current market instability may be increasing the demand for HOME funds as other funding options decrease. Long-term impediments to the growth of the program include an increasing number of local PJs, which may reduce TDHCA's share of the state's annual HOME allocation from HUD, and difficulties in maintaining the financial feasibility of developments for the statutory minimum 30-year affordability period.

Increases in efficiency measures from 2007 to 2008 reflect rising housing costs affecting all TDHCA programs.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The HTF §2306.201, Tex. Gov't Code Ann.) was created in 1993 to provide loans, grants, or other comparable forms of assistance to units of general local government, public housing authorities, nonprofit organizations, and income-eligible individuals, families, and households to finance, acquire, rehabilitate, and develop decent, safe, and sanitary housing. This strategy reflects rental development and "housing-related" activities such as capacity building activity funded through the Housing Trust Fund (HTF). Rental development refers to the new construction or rehabilitation of rental housing affordable to low, very low and extremely low income households. Capacity building refers to activities that help increase the ability of nonprofit housing developers to produce additional affordable housing units. This strategy supports the Department's Goal 1(To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State's Priority Goal 4, Economic Development, and the State's Priority Goal 8, General Government, which includes housing affordability.

STRATEGY: 7 Provide Funding through the HTF for Affordable Multifamily Housing — Service: 15 Income: A.1 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

In response to legislative mandates and public input, TDHCA has dedicated the majority of HTF GR to the legislatively mandated Texas Bootstrap Owner-Builder Loan Program and other single family activity. (See Strategy A.1.3.) The funding dedicated to multifamily activity has been very fairly limited and tends to fluctuate. The statutory requirement that housing development funds be regionally allocated (§2306.111, Tex. Gov't Code Ann.) can also have an impact on funds made available under this strategy: historically, application of the formula to limited HTF development funds has resulted in regional set-asides too small to provide substantive assistance or interest applicants.

No funding awards for multifamily activity were made in 2007 and 2008. However, TDHCA anticipates making funds available for rental development funds and capacity building in 2009-2011 contingent on public support for these uses. Performance projections for these years reflect this assumption.

Funding information reflects General Revenue transferred to the Texas Treasury Safekeeping Trust per Rider 10.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy reflects multifamily activities financed through federal Private Activity Bonds (PAB) as authorized under 26 USC §143, Internal Revenue Code, and §1371.051, §1372.023 and §2306.351, Tex. Gov. Code Ann. §1371.051, Tex. Gov. Code Ann. provides TDHCA the authority to issue taxable and tax-exempt mortgage revenue bonds (MRBs) to nonprofit and for-profit developers. The majority of bonds issued by TDHCA are associated with the State's Private Activity Bond (PAB) authority. TDHCA uses the bond proceeds to finance the construction, acquisition, or rehabilitation of rental properties affordable to very low, low, and moderate income households. Property owners offer a variety of supportive services such as health screening and immunizations, child care, after school tutoring, computer facilities, job training, ESL training, parenting classes, personal finance classes and other adult education to benefit the residents of the development. This strategy supports the Department's Goal 1(To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State's Priority Goal 4, Economic Development, and the State's Priority Goal 8, General Government, which includes housing affordability. The indirect economic impact of construction spurred by this strategy supports Benchmark 4.10 (Texas unemployment rate).

Agency code: **332** Agency name: **Department of Housing and Community Affairs**

GOAL: 1 Increase Availability of Safe/Decent/Affordable Housing — Statewide Goal/Benchmark: 4 0

OBJECTIVE: 1 Make Loans/Grants/Incentives to Fund/Develop/Preserve Housing — Service Categories:

STRATEGY: 8 Federal Mortgage Loans through the MF Mortgage Revenue Bond Program — Service: 15 Income: A.1 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

State law dictates the amount of PAB authority reserved for TDHCA for this purpose. If other Private Actvity Bond (PAB) issuers do not utilize their authority, TDHCA and others may apply to receive this unused authority. In 2007 and 2008, TDHCA was able to obtain and utlize additional authority.

Multifamily PAB activity has generally decreased over the last 3 years throughout the state in response to various economic factors. Because gross allowable rents have remained stagnant while utility costs have increased, the maximum allowable rent that can be charged for an affordable unit has actually decreased. At the same time, operating costs have increased. The increase in overall operating expenses and stagnant rents make it more difficult to make these transactions financially feasible. Because PAB transactions are coupled with housing tax credits, the current reduction in credit pricing (see Strategy A.1.5.) poses further challenges. In addition, natural disasters experienced in the state in recent years has increased construction cost while affecting the availability of materials and labor; this has had a significant impact on the housing market and decreased overall households served. Recently passed federal legislation should help mitigate the impact of some of these factors by providing additional bond cap (HR 3221).

The reallignment of FTEs from 2010-2011 reflects a more accurate reflection of staff supporting this activity.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Texas Government Code Section 2306.252 states that TDHCA shall establish a Housing Resource Center for providing information and technical assistance on housing needs, programs, available funding, and department performance to individuals, local governments, community organizations, and nonprofit developers. This includes maintenance of TDHCA's interactive consumer assistance website, which provides information on local and statewide affordable housing and community services programs. Research and referral services provided to the public include census and housing needs data analysis, information on the availability of funding and services to individual consumers, and information for organizations interested in providing services. The Housing Resource Center also assists in the development of housing policy, including the preparation of the State Low Income Housing Plan and Annual Report and the Consolidated Plan. This strategy supports the Department's Goal 1 (To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State's Priority Goal 4, Economic Development, which includes promotion of a favorable and fair system to fund necessary state services and addressing housing needs.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The number of information and technical assistance requests fulfilled by the Housing Center depends on the number of requests received which varies based on economic conditions throughout the state and the need for affordable housing and community services assistance. TDHCA received increased call in 2008 as a result of the mortgage crisis.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy reflects technical assistance and services provided through the Office of Colonia Initiatives (OCI), which administers/ coordinates efforts to enhance living conditions in colonias along the Texas-Mexico border. OCI maintains offices in El Paso, Laredo, and Edinburg to offer technical assistance and information resources to colonia residents, nonprofits, for-profits, units of local government, and communities along the border related to TDHCA and other homeownership programs available. OCI also administers the Colonia Self-Help Center (SHC) Program (§2306.582, Tex, Gov, Code Ann), which serves targeted colonias in Cameron/Willacy, El Paso, Hidalgo, Starr, Webb, Val Verde, and Maverick counties. SHCs provide a wide array of direct services, including housing rehabilitation, new construction, infrastructure construction, construction skills training, and credit counseling and indirect services such as solid waste removal and tool lending libraries that benefit the entire Colonia SHC service area. Services offered vary for each SHC.

This strategy supports TDHCA's Goal 1 (To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families) and the State’s Priority Goal 4, Economic Development, and the State’s Priority Goal 8, General Government, which includes housing affordability. Through its support of safe and sanitary housing and activities such as solid waste removal campaigns which decrease disease vectors, it also supports State Priority Goal 3, Health and Human Services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Agency code: **332** Agency name: **Department of Housing and Community Affairs**

GOAL: 2 Provide Information and Assistance — Statewide Goal/Benchmark: 8 12
OBJECTIVE: 2 Promote and Improve Homeownership Along the Texas-Mexico Border — Service Categories:
STRATEGY: 1 Assist Colonias, Border Communities, and Nonprofits — Service: NA Income: NA Age: NA

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

The Colonia Self-Help Center (SHC) Program is funded out of a 2.5% set-aside from the Community Development Block Grant Program as required under Rider 8 of the Department's appropriations. In recent years, CDBG funding to the state has declined, decreasing funds available for existing SHC and diminishing the ability to expand the program to other counties.

SHCs and nonprofit self-help center service providers are eligible to receive other TDHCA funds, such as Bootstrap and Contract for Deed funding and often are also administering these and similar programs.

The lack of affordable housing options and the prevalence of predatory lending practices in colonias affect the need for the types of activity reflected under this strategy. The training offered also helps address the lack of eligible nonprofits which the capacity to carry out affordable housing programs.

Changes in Output 2 from 2007 and 2008 forward reflect adoption of the methodology used to report level of activity to HUD; this methodology includes mechanisms to report Public Service activities that benefit entire service areas rather only reporting direct assistance to individual addresses. Changes in Output 3 reflect increased trainings being offered.

Staffing and funding declines reflects a reallignment in presentation of resources associated with the administration of the OCI-administered Bootstrap Program (reflected under A.1.3 for 2009 forward) and does not reflect a diminution of services or resources dedicated to colonia residents.

OBJECTIVE: 1 Ease Hardships for 16% of Homeless & Very Low Income Persons Each Year — Service Categories:

STRATEGY: 1 Administer Poverty-related Federal Funds through a Network of Agencies — Service: 15 Income: A.1 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

This strategy reflects poverty and homelessness assistance and prevention activities funded through the federal Community Services Block Grant (CSBG) Program and Emergency Shelter Grants Program (ESGP).

TDHCA's authority to administer the programs derives from the following statutes: CSBG - 42 United States Code 9901 et. seq. and §2306.092, Tex.Gov.Code Ann, and Tex. Admin. Code .ESGP - 42 United States Code 11371 et. seq. and § 2306.094, Tex. Gov. Code Ann, and Tex. Admin. Code.

The Department's Community Services programs provide citizens with poverty-related assistance and homeless related assistance. CSBG funds provide funding for community action agencies to operate a vast array of federal and state funded programs, to coordinate assistance with other service providers, and to offer services that assist persons to transition out of poverty. ESGP funds provide funding to organizations providing services and shelter for homeless persons, to operate and renovate homeless shelters, and to provide homelessness prevention assistance. Persons assisted with CSBG funds must have an income which does not exceed 125% of the federal poverty level and ESGP serves persons at 100% of the federal poverty level. Through its poverty services and shelter funding, this strategy supports TDHCA's Goal 3. By serving those in most need, transitioning people out of poverty, and creating partnerships with local communities, it also supports the State's Priority Goal 3. Health and Human Services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Performance under this strategy is affected by the level of federal funding, the amount of funding contractors can leverage from other sources, and the general state of the economy. ESGP is additionally affected by weather conditions; harsh weather often increases the number of homeless persons seeking shelter.

The decrease in persons served through CSBG from 2007 to 2008 is partially due to a one-time funding increase for the Comprehensive Energy Assistance Program (some but not all CSBG contractors also administer CEAP); this allowed an increase in persons served in 2007. The remaining declines reflect a reduction in the amount of funding contractors were able to leverage from other sources between those years.

The total persons served through ESGP in 2007 were underreported. TDHCA will be revising this figure to 104,451

The decrease in persons that achieve incomes above poverty level is primarily attributable to increased challenges encountered by CSBG clients in finding employment that offer wages sufficient to raise household income above poverty.

The increase in the efficiency measure reflects a projected decrease in the number of persons to be served from 2008 thru 2011; in addition, several vacancies in 2008 resulted in reduced administrative expenses that year.

Performance projections for 2010-2011 are based on the assumption of level funding for these programs

This strategy reflects activities undertaken to assist very low income households meet their energy needs. Funding for these activities derives from the Low Income Home Energy Assistance Program (LIHEAP), administered by the U.S. Department of Health and Human Services, and the U.S. Department of Energy (DOE) and Investor Owned Utility (IOU) contracts. TDHCA administers its energy assistance programs through authority granted under 42 United States Code (USC), §8621 et. seq. (LIHEAP), 42 USC §6861 et. seq. , and §2306.097 Texas Gov't Code Ann.

The Comprehensive Energy Assistance Program (CEAP), funded with LIHEAP funds, provides contracts to organizations in order to provide energy payment and other energy assistance to eligible households. The Weatherization Assistance Program (WAP), funded through LIHEAP, DOE and IOU funds, provides contracts to organizations that provide weatherization services to increase the energy efficiency of dwellings occupied by very low income persons and reduce total energy expenditures. Both CEAP and WAP are available statewide and serve households with incomes at or below 125% of poverty level. This strategy supports TDHCA's Goal 3 (To improve living conditions for the poor and homeless and reduce the cost of home energy for very low income households). By serving those in most need, promoting self-sufficiency through CEAP Co-payment components, and creating partnerships with local communities, it also supports the State's Priority Goal 3, Health and Human Services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

In 2006, TDHCA received an additional $38,276,836 in LIHEAP funds in response to higher energy costs. The 2007 CEAP and WAP performance figures reflect this one-time funding as a result of funding carryover. Because of the return to level funding, the households served decreased from 2007 to 2008 Projections for 2010 and 2011 reflect anticipated level LIHEAP funding and continued high energy costs.

TDHCA also increased the maximum allowable LIHEAP assistance for WAP, allowing the program to serve homes in poorer condition. This increased the per unit cost and lowered the number of households served through this program. WAP for 2010-2011 projections reflect anticipated level federal funding for 2010-2011.

In areas of the state with regulated utilities, Investor Owned Utilities provide TDHCA with additional weatherization funding. The decrease in Appropriated Receipts from 2008 forward reflects a decrease in such contracts.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy reflects TDHCA activities required to monitor the compliance of TDHCA housing programs with state and federal regulatory mandates, including the requirements found in Sections 2306.081, 2306.185, 2306.257, and 2306.267 of the Texas Government Code. The Department monitors multifamily and single family rental properties financed through its programs for compliance with program requirements, including rent and income limits. The Department uses onsite monitoring visits and desk reviews for in-depth scrutiny and overall assessment. The work includes reviews of owner reports, property compliance reports, tenant files, physical inspections of program units and building exteriors, and other program records. Training programs are offered to project owners and managers to promote compliance. This strategy also reflects initial site inspection of each Housing Tax Credit application received by TDHCA. By ensuring compliance with federal and state program mandates and implementing clear standards, this strategy supports TDHCA's Goal 4 and the State Priority Goal 7 (Regulatory).

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The Department's performance measures have historically included information regarding the FDIC's Affordable Housing Program. The Department has been monitoring this portfolio of properties at the request of the FDIC since 1993. To focus on oversight of the rental developments actually funded by TDHCA, notice of termination of the Memorandum of Understanding was given to the FDIC. Effective September 1, 2008, the number of properties, and units administered will decrease as follows:

Properties: From 1,966 to 1,694. (There are 272 FDIC properties that TDHCA will no longer monitor.)

Number of units: From 230,610 to 186,156.

The elimination of the FDIC contract will also decrease the required number of onsite visits and desk reviews. This is reflected in the decrease in projected performance measures for 2009 followed by normal increases in the performance measures in 2010.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy reflects TDHCA activities required to monitor subrecipients to assess compliance with federal and state regulatory mandates. The Department monitors subrecipients that receive state and federal pass-through funds for compliance with program and financial requirements. The Department uses onsite monitoring visits and desk reviews for in-depth scrutiny and overall assessment. The monitoring scope includes review of subrecipient financial records, single audits, household eligibility files, physical inspections of units, and review of other program records. Also, prior to making an award, the Department assesses an applicant’s compliance history in accordance with §2306.057, Texas Government Code. This strategy also includes FTEs in the Disaster Recovery Division that are fully funded by federal money. By ensuring compliance with federal and state program mandates and implementing clear standards, this strategy supports TDHCA’s Goal 4 and the State Priority Goal 7 (Regulatory).

Agency code: **332** Agency name: **Department of Housing and Community Affairs**

GOAL: 4 Ensure Compliance with Program Mandates — Statewide Goal/Benchmark: 7 0

OBJECTIVE: 1 Monitor Developments & Subrecipient Contracts for Compliance — Service Categories:

STRATEGY: 2 Monitor Subrecipient Contracts — Service: NA Income: NA Age: NA

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

Performance under this strategy is affected by the number of existing and new contracts. Changes in federal and state mandates also have an impact on performance.

The high level of previous participation reviews in 2007 and 2008 reflect a higher than anticipated number of contract amendments requiring review. Projections for 2009-2011 are based on anticipated new contracts and the impact of procedural changes which should decrease the number of reviews required.

The Department anticipates an increase in monitoring and onsite reviews conducted in 2010 and 2011 as it strives to ensure successful implementation of program activity.

It should also be noted that the number of single audit reviews conducted is difficult to determine since this depends on the total amount of federal funds a sub-recipient receives, including federal funds from non-TDHCA programs.

HUD Community Development Block Grant Program and FEMA Alternative Housing Pilot Program funds are included under this strategy. Please see Homeland Security schedule for discussion of use of these funds.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Pursuant to Tex. Occ. Code, Chapter 1201 (the “Manufactured Housing Standards Act”), Subchapter C, the Manufactured Housing Division (MHD) maintains current records regarding manufactured homes (“Statements of Ownership and Location” or “SOLs”) and licensees. SOLs are records of who owns the home, where it is located, whether the owner has elected to treat it as real property or personal property, and, if it is personal property, whether there are any liens on it. Completed SOL applications are processed within fifteen working days. SOLs provide a centralized source of records that is essential to homeowners, licensees under the MH Act, lenders, taxing authorities, and others.

All manufactured housing occupational licenses required under the MH Act are valid for two years and are processed by 1.5 assigned FTEs. Renewals may be done via Texas Online.

MHD also contracts with TDHCA to perform inspections and review and issue the licenses of migrant labor housing facilities, which TDHCA regulates.

Functional activities include processing applications for licenses and SOLs, customer service, policy/planning, consumer protection/enforcement, and quality assurance. These support the TDHCA’s Goal Number 5 (to protect the public by regulating the manufactured housing industry in accordance with state and federal laws), the State's Priority Goal 7 (ensuring that Texans are effectively and efficiently served by high-quality professionals and businesses) and affect Benchmark 8 (percent new and renewed licenses issued via Internet).

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Agency code: **332** Agency name: **Department of Housing and Community Affairs**

GOAL: 5 Regulate Manufactured Housing Industry — Statewide Goal/Benchmark: 7 8

OBJECTIVE: 1 Operate a Regulatory System To Ensure Responsive SOL/Licensing/Other — Service Categories:

STRATEGY: 1 Provide SOL and Licensing Services in a Timely Manner — Service: 17 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

The volume of SOLs and licenses to be processed is determined by the number of manufactured housing transactions and the number of licensees. The decrease in SOLs between 2007 and 2008 reflects a softening in the market together as industry adjustment to changes made as a result of House Bill (HB) 1470, 80th Texas Legislature. HB 1460, which took effect January 1, 2008, requires more stringent procedures to transfer ownership and clarifies responsibilities of businesses licensed by the MHD. TDHCA anticipates that the number of SOLs issued in from 2009 forward will increase as the public and tax offices become more familiar with these requirements.

MHD is updating its database system with an integrated web-enabled system. The upgrade should be operational in 2010 and is expected to increase MHD’s efficiencies by providing faster accessibility. This would also reduce costs currently associated with the mailing, scanning and processing of data. Internal factors include not only MHD’s allocation of resources but the efficiency of its processes, which MHD continually seeks to improve.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Pursuant to Tex. Occ. Code, Chapter 1201 (the “Manufactured Housing Standards Act”), Subchapter G, the Manufactured Housing Division (MHD) inspects at least 25% of all manufactured home installations, focusing on multi-section homes and homes installed in Wind Zone II (areas prone to hurricanes). MHD also conducts inspections in connection with consumer complaints and investigations and its duties as HUD’s State Administrative Agency. Under a contractual arrangement with TDHCA, MHD also performs inspections of properties subject to various affordable housing programs that TDHCA administers and the inspection of migrant labor housing facilities, which TDHCA licenses in accordance with HB 1099, 79th Legislature, Regular Session. To promote efficiency, MHD inspectors are available to assist TDHCA with other inspection needs and to assist on a statewide basis in disaster recovery matters. Functional activities include the issuance of orders to carry out responsibilities found and assigned in the inspection process and preparation of reports, including investigative reports. These activities support Goal Number 5 (to protect the public by regulating the manufactured housing industry in accordance with state and federal laws), the State's Priority Goal 7 (ensuring that Texans are effectively and efficiently served by high-quality professionals and businesses). The high level of compliance benefits consumers and provides stability in the manufactured housing industry by promoting a level playing field.

GOAL: 5 Regulate Manufactured Housing Industry — Statewide Goal/Benchmark: 7 0

OBJECTIVE: 1 Operate a Regulatory System To Ensure Responsive SOL/Licensing/Other — Service Categories:

STRATEGY: 2 Conduct Inspections of Manufactured Homes in a Timely Manner — Service: 17 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

The required level of inspection activity is determined chiefly by the number of homes installed, the number of consumer complaints filed, and the number of migrant labor facilities and affordable housing properties that the Department needs to have inspected, none of which MHD controls. This strategy targets the statutory requirement of inspecting at least 25% of all manufactured home installations and 100% of all complaints about homes and/or installation issues.

The Division is currently working on upgrading its database system with an integrated web-enabled system that is estimated to be implemented in FY 2010. The upgrade is expected to increase the Division's efficiencies by providing faster accessibility and would also have costs reduction effect in mail, scanning and processing of data.

HUD pays MHD to act as its State Administrative Agency. Due to prior receipt of federal funds in excess of what had been projected, MHD has been able to realign its method of payment for this strategy, paying more of the 2007 and 2008 costs from federal funds than originally planned, but within SAA requirements.

HUD has been reviewing the method of calculating the fees paid to its SAAs, such as the Division. The new methodology being considered would reduce HUD payments by approximately $175,000 per year. Goal 5 federal fund estimates for 2010 and 2011 are based on this new methodology.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Pursuant to Tex. Occ. Code, Chapter 1201 (the “Manufactured Housing Standards Act”), Subchapter H, and Tex. Gov. Code, Chapter 2306, the Manufactured Housing Division (MHD) provides effective consumer remedies and promotes compliance and industry-based solutions by receiving, investigating, and handling consumer complaints, taking administrative action as appropriate. Functional activities include intake of complaints, investigations, pursuit of administrative action through the holding of administrative hearings and the issuance of orders, and administration of the Homeowners’ Recovery Trust Fund. MHD has taken related functions of complaint processing and enforcement actions intake and consolidated them in a single consumer protection function to promote efficiency and improve communication with consumers, the industry, and other interested parties. These activities support the TDHCA’s Goal Number 5 (to protect the public by regulating the manufactured housing industry in accordance with state and federal laws), the State's Priority Goal 7 (ensuring that Texans are effectively and efficiently served by high-quality professionals and businesses) and affect Benchmark 5 (the number of documented complaints to professional licensing agencies resolved within six months).

OBJECTIVE: 1 Operate a Regulatory System To Ensure Responsive SOL/Licensing/Other — Service Categories:

STRATEGY: 3 Process Complaints/Conduct Investigations/Take Administrative Actions — Service: 17 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011

Performance under this strategy is dictated by the level of consumer complaints and other issues that may require investigation and enforcement.

"Other Operating Expenses" includes Texas Manufactured Homeowners Recovery Trust Fund (Fund) payments. These are used to correct defects in manufactured homes, reimbursement of un-refunded deposits and payments to discharge tax liens in order to provide good and marketable title to homes purchased from retailers, and other allowable used. MHD experienced a large number of claims in 2007.

HUD pays MHD to act as its State Administrative Agency. Due to the receipt of federal funds in prior years in excess of what had been projected, MHD realigned its method of finance in 2007 to pay more of the costs associated with its enforcement strategy from federal funds. This allowed MHD, after consulting with the LBB, to address a backlog of Fund obligations with available appropriated receipts.

HUD has been reviewing the method of calculating the fees paid to its SAAs, such as the Division. The new methodology being considered would reduce HUD payments by approximately $175,000 per year. Goal 5 federal fund estimates for 2010 and 2011 are based on this new methodology. The database upgrade discussed in previous strategies will also increase efficiencies in this area.

3.B. Rider Revisions and Additions Request
(continued)

4	VII-5	**Appropriations Limited to Revenue Collections.** Fees, fines and other miscellaneous revenues as authorized and generated by the agency shall cover, at a minimum, the cost of the appropriations made above for the strategy items in Goal E, Manufactured Housing, the cost of the appropriations required for manufactured housing consumer claims payments according to the Occupations Code § 1201, Manufactured Housing Standards Act, as well as the "other direct and indirect costs" associated with this goal, appropriated elsewhere in this Act. "Other direct and indirect costs" for Goal E, Manufactured Housing, are estimated to be $903,280 for fiscal year ~~2008~~ 2010 and $947,807 for fiscal year ~~2009~~ 2011. In the event that actual and/or projected revenue collections are insufficient to offset the costs identified by this provision, the Legislative Budget Board may direct that the Comptroller of Public Accounts reduce the appropriation authority provided above to be within the amount of revenue expected to be available.
6	VII-5	**Conversions of Executory Contracts.** a. Out of the funds appropriated above, the department shall spend not less than $4,000,000 for the biennium for the sole purpose of contract for deed conversions for families that reside in a colonia and earn 60 percent or less of the applicable area median family income. It is the intent of the Legislature that the department shall make a good-faith effort to complete at least 200 contract for deed conversions by August 31, ~~2009~~ 2011. b. The Department of Housing and Community Affairs shall provide a quarterly report to the Legislative Budget Board detailing the number of, and cost for each, contract for deed conversions completed.
9	VII -6	**Appropriation: Housing Trust Fund Interest Earnings and Loan Repayments.** Interest earnings and loan repayments received from loans made through the Housing Trust Fund program from the General Revenue Fund are included above in Strategy A.1.3, Housing Trust Fund – Single Family, estimated to be ~~$900,000~~ $1,000,000 each year.

10	VII-6	**Housing Trust Fund Deposits to the Texas Treasury Safekeeping Trust Company.** Out of funds appropriated above in Strategy A.1.3, Housing Trust Fund – Single Family~~, $2,503,295 in fiscal year 2008 and $2,503,296 in fiscal year 2009~~ all funds above those retained for administrative purposes in fiscal year 2010 and fiscal year 2011 shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, at the beginning of each fiscal year. The amounts to be transferred in fiscal years 20~~08~~10 and 20~~09~~11 include an estimated ~~$900,000~~ $1,000,000 in each fiscal year from interest earnings and loan repayments received, identified above in Rider 9, Appropriation: Housing Trust Fund Interest Earnings and Loan Repayments. *The changes in subsections (a), (b) an (f) retain the original intent of the rider to transfer the majority of funds appropriated for the Housing Trust Fund to the Texas Treasury Safekeeping Trust Company, while eliminating the exact dollar amounts. This will give the Department more flexibility and eliminate the need for the Legislature to revisit the amounts in this rider each biennium.* a. Out of funds appropriated above in Strategy A.1.7, Housing Trust Fund – Multifamily~~, $187,000 in fiscal year 2008 and $187,000 in fiscal year 2009~~ all funds above those retained for administrative purposes in fiscal year 2010 and fiscal year 2011 shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, at the beginning of each fiscal year. b. Interest earnings and loan repayments received from loans made through the Housing Trust Fund program from the General Revenue Fund shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, for the same purpose. c. The Department of Housing and Community Affairs shall provide an annual report to the Legislative Budget Board, the House Appropriations Committee, and the Senate Finance Committee no later than October 1 detailing the agency's plan to expend funds from the Housing Trust Fund during the current fiscal year. d. Notwithstanding limitations on appropriations transfers contained in the General Provisions of this Act, the Department of Housing and Community Affairs is hereby authorized to direct agency resources and transfer such amounts appropriated above, ~~not to exceed $2,500,000 in General Revenue each fiscal year,~~ in excess of the statutorily required $3,000,000 set-aside for the Owner-Builder (Bootstrap) Loan Program established under Government Code, Chapter 2306, which must remain in Strategy A.1.3, Housing Trust Fund – Single Family, between Strategy A.1.3, Housing Trust Fund – Single Family and Strategy A.1.7, Housing Trust Fund – Multifamily. *This change retains the original intent of the rider to allow transferability between the Housing Trust Fund Single Family and Multifamily strategies, while eliminating the exact dollar amounts. This will maintain the Department's flexibility and eliminate the need for the Legislature to revisit the amounts in this rider each biennium, while ensuring there is adequate funding for the Bootstrap Self-Help Housing Loan Program.* e. Out of funds appropriated above in Strategy A.1.3, Housing Trust Fund – Single Family and Strategy A.1.7, Housing Trust Fund – Multifamily, ~~an amount not to exceed $2,500,000 in both strategies in fiscal year 2008 and an amount not to exceed $2,500,000 in fiscal year 2009 in both strategies~~ all funds above those retained for administrative purposes in fiscal year 2010 and fiscal year 2011 and above amounts required in Sections (a) and (b) of this rider, shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, no later than October 1 of each fiscal year. f. At the end of each fiscal year, any unexpended administrative balances appropriated under Strategy A.1.3, Housing Trust Fund – Single Family and A.1.7, Housing Trust Fund – Multifamily shall be transferred to the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306. *This new subsection is requested so that the agency may maximize funds expended directly on programs. This rider will also encourage the Department to continue to increase efficiency and effectiveness of its program administration so that more dollars may be directed to programs.*

3.B. Rider Revisions and Additions Request
(continued)

11	VII-7	**Mortgage Revenue Bond Program.** The Department of Housing and Community Affairs shall operate the First-Time Homebuyer Mortgage Revenue Bond Program in a manner that maximizes the creation of very low-income single family housing by ensuring that at least 30 percent of the lendable bond proceeds are set aside for a period of one year for individuals and families at ~~60~~ 80 percent and below the area median family income (AMFI), while assuring the highest reasonable bond rating. In an effort to facilitate the origination of single family mortgage loans to individuals and families at ~~60~~ 80 percent and below the AMFI, the department shall utilize down payment and closing cost assistance or other assistance methods. *This rider has been revised to reflect statutory changes enacted by SB 1908, 80th Legislative Session.*
13	VII-7	**Manufactured Homeowner Consumer Claims.** Included above in Goal E, Manufactured Housing, the Manufactured Housing Division of the Department of Housing and Community Affairs is appropriated an amount required for the purpose of paying manufactured housing consumer claims from Appropriated Receipts according to the Occupations Code Chapter 1201, Manufactured Housing Standards Act, from Statement of Ownership and Location (SOL) issuance fees involving manufactured housing that are collected during the ~~2008-09~~ 2010-11 biennium. No General Revenue is appropriated for the payment of these claims.

FULL-TIME EQUIVALENT POSITIONS (FTE):		4.00	4.00

DESCRIPTION / JUSTIFICATION:

TDHCA is requesting an additional $20 million in General Revenue per year for the Housing Trust Fund (HTF), the only state-funded housing program. TDHCA will use the funds for housing and housing-related activities for which federal funds are too limited or restrictive. Potential uses of these funds include, but are not limited to, programs for special needs populations, such as persons with disabilities and veterans; supportive housing; rural rental housing; homeownership activities; and activities to enhance the ability of nonprofits to offer affordable housing options. TDHCA currently receives approximately $5.8 million per year for the HTF. This funding level supports assistance to approximately 200 households per year. Recent examples of innovative, targeted activities funded though the HTF include assistance for returning veterans and gap-financing for homes damaged by Hurricane Rita. As with its 2008-2009 funding, TDHCA would determine use of the funds through a public process and provide the resulting allocation plan to the Legislature on October 1 of each year. Total households served would depend on activities funded. Projected performance measures reflect the assumption that the majority but not all funds would be directed towards homeownership activities. These measures would be subject to change based on the allocation plans developed.

TDHCA requests four (4) FTEs to assist in administration of the HTF programs. TDHCA will utilize existing infrastructure for several aspects of program administration, including contract set ups, funding draws, and compliance. Additional staff would assist with intensive program administration - including planning, training and technical assistance - that would be needed to take advantage of the inherent flexibility of the program and provide a range of affordable housing options to distinct populations. Associated costs equal 1.3% of the total funding request.

EXTERNAL/INTERNAL FACTORS:

CODE DESCRIPTION	Excp 2010	Excp 2011

A key factor affecting this request is the state's extensive need for affordable housing. According to the 2000 US Census, over 1.7 million low income households have at least one housing problem, defined as excess housing cost burden, overcrowded households, or living in substandard housing conditions. With current resources available to it, the Department is able help only 17,000 households, most of whom are low income, access affordable housing per year. This represents less than one percent of the need.

Another key external factor is the limitation of the Department's federal funding. The majority of TDHCA housing funds, 99%, derive from the federal government. In recent years, funding for some federal programs, such as the Section 8 program, have seen marked decreases, while others have seen their "purchase power" decrease as a result of increased construction costs and current market conditions. Federal programs are generally highly proscriptive, limiting use of funds for innovative options. Federal legislation recently passed (H.R. 3221) will help address housing needs by providing increased resources, but only for strictly targeted activities. HTF by contrast, is highly flexible, and has been successfully used by TDHCA for state initiatives that could not be supported by federal funds, such as the Bootstrap Program, a state-mandated sweat-equity program promoting homeownership. By providing TDHCA additional funds through this highly adaptable state program, the Department will be better equipped to meet the state's growing and diverse affordable housing needs.

Along with this Exceptional Item Request, TDHCA is including a revision to Rider 10 to allow full transferability between the two Housing Trust Fund strategies. This will allow the program to maintain flexibility provided through appropriations made by the 80th Texas Legislatures and thus be responsive to current needs.

	TOTAL, METHOD OF FINANCING	**$10,700,000**	**$10,700,000**

DESCRIPTION / JUSTIFICATION:

TDHCA is requesting $10.7 million in General Revenue Dedicated for each year of the biennium in order to restore the low income energy efficiency component of the System Benefit Fund (SBF) to the annual funding level provided by the 77th Texas Legislature. §39.903, Texas Utility Code, establishes the System Benefit Fund.§ 39.903(e)(3) and (f)(2) of the Code identify “targeted energy efficiency programs to be administered by the Texas Department of Housing and Community Affairs in coordination with existing weatherization programs” as the third highest funding priority for the SBF. Weatherization measures that would be funded include items such as installation of wall and attic insulation, caulking, and repair or replacement of energy inefficient appliances and heating and cooling systems. By making the homes more energy efficient, the TDHCA would reduce families’ monthly energy consumption, create a healthier living environment, and decrease overall energy demand in the state. In accordance with statute, TDHCA would leverage these funds with federal Weatherization Assistance for Low Income Persons (WAFLIP) and Low Income Home Energy Assistance Program (LIHEAP) funds to serve an estimated 2,500 additional households in deregulated areas of the state, as well as reach lower income households underserved by existing programs. The program would prioritize populations most vulnerable to extreme weather conditions such as elderly persons 60 years of age and older, persons with disabilities, and households with young children under 6 years of age. High residential energy users and households with high energy cost burdens would also be prioritized. To receive services, a household could earn no more than 125% of the federal poverty level. This funding would be allocated under Strategy C-2-1.

EXTERNAL/INTERNAL FACTORS:

CODE	DESCRIPTION	Excp 2010	Excp 2011

As of July 2008, there were over 14,000 households on weatherization waiting lists statewide. Because demand far outpaces resources available for this service, it is not unusual for a qualifying household to wait over a year for services. Increasing energy costs will likely strengthen demand for weatherization services as will demographic trends, which predict the increase of low income elderly persons and children as a portion of the population.

Current funding sources also do not allow adequate service to lower income households in deregulated areas of the state. Families in the lowest income tiers typically have homes in poor conditions that require more investment to achieve savings. Because of limits on the amount of federal funds that can be invested per units, these households often cannot be served through federal WAP program. For instance, Dept. of Energy (DOE) regulations limit funds used for weatherization to a maximum of $2,826 per unit. Energy conservation activities exceeding $2,966 requires the use of other funds. (In regulated areas of the state, contracts with Investor Owned Utilities help TDHCA serve this population and otherwise provide enhanced and expanded services.)

To ensure effective use of limited resources, only measures resulting in anticipated consumer savings that are at least equal to the cost of the measures would be funded. DOE estimates the national average for energy savings for weatherized homes to be $358 annually.

The SBF is collected in areas of the state where the electric utility industry has been deregulated; therefore funds would only serve these areas. Administrative funds associated with LIHEAP would be utilized to meet state administrative needs for this item, allowing TDHCA to pass all funds through to local contractors for program delivery.

PROJECT DESCRIPTION

General Information

In the FY 2010-2011 biennium, TDHCA plans to replace its legacy, character-based Human Resources (HR) System with an upgraded web-enabled system. The current HR System is a custom-built application that has been in use for over 14 years and is maintained and developed entirely by TDHCA information technology staff. It supports the following HR functions: 1) personnel records management, including position and compensation management, 2) time reporting through online timesheets, 3) leave accounting, 4) applicant tracking, and 5) training records management.

Although the system supports these HR functions, there are several areas in which the agency plans to improve the management of each through the development and deployment of a new HR System:

• The new HR System will provide for expanded management and employee access to relevant HR data, which will result in increased time for the Human Resources Division (HRD) to focus on strategic issues, such as workforce management, succession planning, recruitment, professional development, and compensation management, while at the same time improving service to management and employees. In the area of recruitment, HRD will be able to assist the agency in filling vacant positions with qualified candidates in a more timely basis, from job posting through application review, interviewing, and hiring.
• The new HR System will be streamlined, will reduce required data entry, and will improve reporting capabilities.
• The new HR System will provide the ability to interface some payroll information, such as legislative salary actions and longevity information, from Office of the Comptroller of Public Accounts (CPA) systems to reduce duplicate data entry and help ensure data accuracy.
• The current technology platform (APPX) represents an ongoing support risk because of the limited availability of developers with this skill set. By building a new system in a modern, web-based technology, TDHCA will reduce this risk.

REVENUE GENERATION / COST SAVINGS

REVENUE_COST_FLAG	MOF_CODE	AVERAGE_AMOUNT

Explanation: The $150,000 HR System Upgrade budget will be used entirely for contract programmer support. Although TDHCA will not receive a return on investment in the form of long term cost savings, the agency will receive returns in the form of the benefits listed in the Project Description and Project Justification sections of the Information Technology Detail. After the initial capital investment, the ongoing support costs will be comparable to the current support costs.

Project Location: The HR System Upgrade will take place at TDHCA headquarters in Austin. The new system will serve employees in Austin and in regional Manufactured Housing and Office of Colonia Initiatives locations.

Beneficiaries: Direct beneficiaries are the TDHCA Human Resources Division (HRD), management, and employees. TDHCA constituents will benefit indirectly from increased HRD time for strategic goals and objectives.

Frequency of Use and External Factors Affecting Use:

The HR System will be used by the agency on a daily basis.

Project number:	**4**	Project Name:	**Purchase of IT**

PROJECT DESCRIPTION

General Information

The Purchase of IT project for FY 2010-2011 will fund end-user and server hardware and software for TDHCA. The total Purchase of IT budget request is $661,920. $458,920 (69%) of the project budget is planned for end-user hardware and software. $203,000 (31%) is planned for server hardware and software.

The Purchase of IT project achieves the goals of 1) providing desktop software, 2) delivering suitable PCs, laptops, printers, and related end-user hardware, 3) performing server hardware and software upgrades, and 4) performing network hardware replacements.

The FY 2010-2011 Purchase of IT budget request is a $271,920 increase over the FY 2008-2009 budget request. This increase reflects a push to modernize the hardware and software that assists the agency in fulfilling its mission.

Details about the $458,920 end-user hardware and software part of the budget are as follows: Since FY 2003, our deployment of PCs and laptops has been based not on a predetermined life cycle but on performance benchmarks set by the TDHCA Network Administrator as documented in our standard operating procedure on PC Life Cycles. The number of PCs and laptops planned for deployment in fiscal years 2010 and 2011 is an estimate (190) based on projected performance benchmarks for future fiscal years. This represents $290,000 of the Purchase of IT budget request. $48,000 is budgeted for printer replacements. $23,000 is budgeted for other end-user hardware replacements, including projectors and a digital camera for weatherization monitoring visits. Finally, $97,920 is planned for end-user desktop software replacements.

The $203,000 server hardware and software part of the budget is planned for the following: a file server upgrade, a tape library and backup server upgrade, network utility and security server upgrades, application server upgrades, new software for security, and network hardware upgrades.

REVENUE GENERATION / COST SAVINGS

REVENUE_COST_FLAG	**MOF_CODE**	**AVERAGE_AMOUNT**

Explanation: The Purchase of IT project consists of essential IT-related products. Our technical support tracking software helps us identify the appropriate performance benchmarks for PCs and laptops. Benchmarks for network and server upgrades are based on daily monitoring by network staff of job times, CPU load, and resource use.

Project Location: The Purchase of IT project will take place at TDHCA headquarters and regional Manufactured Housing and Office of Colonia Initiatives locations.

Beneficiaries: Because the Purchase of IT project provides TDHCA with IT tools needed to effectively manage information and deliver services, the agency's constituents benefit from the project.

Frequency of Use and External Factors Affecting Use:

The IT hardware and software provided through the project will be used by TDHCA on a daily basis.

COMPARISON TO STATEWIDE HUB PROCUREMENT GOALS

A. Fiscal Year 2006 - 2007 HUB Expenditure Information

Statewide HUB Goals	Procurement Category	HUB Expenditures FY 2006 % Goal	HUB Expenditures FY 2006 % Actual	HUB Expenditures FY 2006 Actual $	Total Expenditures FY 2006	HUB Expenditures FY 2007 % Goal	HUB Expenditures FY 2007 % Actual	HUB Expenditures FY 2007 Actual $	Total Expenditures FY 2007
11.9%	Heavy Construction	0.0 %	0.0%	$0	$1	0.0 %	0.0%	$0	$1
26.1%	Building Construction	0.0 %	0.0%	$0	$1	0.0 %	0.0%	$0	$1
57.2%	Special Trade Construction	20.0 %	100.0%	$4,950	$4,950	20.0 %	0.0%	$0	$0
20.0%	Professional Services	15.0 %	32.8%	$72,000	$219,408	15.0 %	39.9%	$84,700	$212,149
33.0%	Other Services	25.0 %	37.0%	$979,327	$2,648,163	25.0 %	60.3%	$1,189,822	$1,974,614
12.6%	Commodities	25.0 %	75.3%	$390,941	$519,326	25.0 %	85.9%	$304,877	$354,762
	Total Expenditures		**42.7%**	**$1,447,218**	**$3,391,849**		**62.1%**	**$1,579,399**	**$2,541,527**

B. Assessment of Fiscal Year 2006 - 2007 Efforts to Meet HUB Procurement Goals

Attainment:

The agency exceeded four of four categories, or 100% of the applicable Statewide HUB Goals in FY 2006 and three of three, or 100% of the applicable Statewide HUB Goals in FY 2007.

Applicability:

“Heavy Construction” and “Building Construction” categories were not applicable to TDHCA in FY 2006 and in FY 2007 since we did not engage in any type of construction activity during those years. “Special Trade Construction” was not an applicable category for TDHCA in FY 2007 since we did not engage in any type of special trade activity for that year.

Factors Affecting Attainment:

There were no factors affecting attainment since TDHCA exceeded all HUB procurement goals in FY 2006 and FY 2007

"Good-Faith" Efforts:

In FY 2006 and 2007, TDHCA aggressively pursued HUB participation through its “Good Faith” Effort program. We encourage potential HUBs by assisting them in becoming HUB certified as well as promote the benefits of being a certified HUB vendor. TDHCA actively participates in Equal Opportunity Forums (EOFs) with other state, local, and federal entities.

REVENUE ASSUMPTIONS:

Increases in revenues from 2007 to 2008 reflect the implementation of provisions of House Bill (HB) 1460, 80th Texas Legislature. HB 1460 increased training requirements for licensees, resulting in increased revenues associated with this activity. The ne law also requires that new and existing licenses be renewed every two years rather than annually. To ensure sufficient revenues for administrative costs associated with this activity, MHD doubled fees for new and renewal licenses effective January 2008, resulting in overall increase in revenues associated with this activity. Decreases in some categories reflect industry trends. The assumptions for FY 2010-11 revenues are based on the actual/estimates for FY 2008-09, modified historical trends, and HB 1460 provisions.

USE OF HOMELAND SECURITY FUNDS

Expenditures prior to 2008 reflect only TDHCA administrative costs associated with $74.5 million in HUD Community Development Block Grant (CDBG) funding received in 2006 to help the state respond to needs arising from Hurricane Rita. Funds are reflected in the Office of Rural Community Affairs' (ORCA's) budget; 56.87% of funds were applied to unmet housing needs; remaining funds addressed infrastructure needs.

Expenditures from 2008 forward also reflect:

*An additional $428.6 million in CDBG funds to received to address unmet needs resulting from Hurricanes Rita and Katrina, allocated as follows:

-Homeowners Assistance Program: Provides home repair or reconstruction assistance to low income households. TDHCA contracts with Affiliated Computer Services (ACS) for local delivery.

-Sabine Pass Restoration Program: This program provides home repair or reconstruction for households living in Sabine Pass. TDHCA contracts with ACS for local delivery.

-Multifamily Rental Housing Stock Restoration Program: Funds rehabilitation or reconstruction of damaged affordable rental housing. TDHCA awarded funds to affected local developments.

-City of Houston and Harris County Public Service and Community Development Program: Funds address increased demand on public services and rental stock resulting from absorption of Katrina evacuees. TDHCA contracts directly to the city and county.

-Restoration of Critical Infrastructure Program: Funds restore outstanding damage to infrastructure where no other source of funding has been obtained. TDHCA contracts with ORCA for administration.

*$16.5 million in FEMA Alternative Housing Pilot Program funds to develop and test alternative housing products that may be used in the event of a future disaster. Resulting homes will be provided to households in Harris County and East Texas. TDHCA contracts with the Heston Group for product delivery.

All funds above are reflected in Strategy D.1.2.

6.H. Estimated Total of All Agency Funds Outside the GAA Bill Pattern

ESTIMATED GRAND TOTAL OF AGENCY FUNDS OUTSIDE THE 2010-11 GAA BILL PATTERN	**$2,160,162,012**

Single Family Bonds

Estimated Beginning Balance in FY 2008		$	1,393,568,395
Estimated Revenues FY 2008		$	157,060,000
Estimated Revenues FY 2009		$	180,000,000
	FY 2008-09 Total	$	1,730,628,395
Estimated Beginning Balance in FY 2010		$	1,565,833,395
Estimated Revenues FY 2010		$	170,000,000
Estimated Revenues FY 2011		$	170,000,000
	FY 2010-11 Total	$	1,905,833,395

Constitutional or Statutory Creation and Use of Funds:

The Department's enabling legislation, Texas Government Code (TGC) Chapter 2306, has several provisions regarding the deposit of funds outside treasury: §2306.118, § 2306.120, and §2306.172. The sections of the Code regarding the issuance of bonds and collection of revenue from bonds are §2306.352 and §2306.353 respectively.

Method of Calculation and Revenue Assumptions:

Revenues consist of bond proceeds from the annual issuance of tax-exempt and taxable bonds, notes or other obligations to finance or refinance single-family residential housing. These bonds are not the obligation of the State of Texas and they are to be paid by their respective revenue streams. Funds in Single Family bonds are restricted by bond covenants. Any unexpended proceeds, repayments, or interest earnings are strictly committed for the debt service payments of the bonds. Estimated revenues represent bond issuances made using a portion of the Department's Private Activity Bond (PAB) allocation for single family activity. (Note: TDHCA utilizes a portion of its single family PAB authority for Mortgage Credit Certificates; because of this, revenue estimates will generally not reflect full single family bond authority utilized by the Department in a given year.) Interest revenue on investment on bond proceeds and bond interest expense are not included in the estimation because earnings are offset by expenses on bonds. These bonds are issued under separate Bond Trust Indentures and are secured on an equal and ratable basis by the trust estate established by such trust indentures. The assets created by the bond proceeds and their revenues are pledged to the Trust Indenture for the payment of Debt Service and retirement of the bonds outstanding. The assumptions above do not include the effects of new Federal Legislation, H.R. 3221, which is yet to be determined.

6.H. Estimated Total of All Agency Funds Outside the GAA Bill Pattern

Multifamily Housing Bonds

Estimated Beginning Balance in FY 2008		$	194,361,104
Estimated Revenues FY 2008		$	59,000,000
Estimated Revenues FY 2009		$	90,000,000
	FY 2008-09 Total	$	343,361,104
Estimated Beginning Balance in FY 2010		$	13,105,682
Estimated Revenues FY 2010		$	80,000,000
Estimated Revenues FY 2011		$	80,000,000
	FY 2010-11 Total	$	173,105,682

Constitutional or Statutory Creation and Use of Funds:

The Department's enabling legislation, Texas Government Code (TGC) Chapter 2306, has several provisions regarding the deposit of funds outside treasury: §§ 2306.118 and 2306.120, 2306.172. The sections of the Code regarding the issuance of bonds and collection of revenue from bonds are §2306.352 and §2306.353 respectively.

Method of Calculation and Revenue Assumptions:

Revenues consist of funds from the Department's best estimate of projected issuance of tax-exempt and taxable bonds, notes or other obligations to finance or refinance multifamily housing developments. All debt issued is considered to be conduit debt, making the developer responsible for the debt service payments on the bonds. These bonds are issued under separate Bond Trust Indentures and are secured on an equal and ratable basis by the trust estate established by such trust indentures. Funds in Multifamily Housing Bonds are restricted by bond covenants. These funds are held by a trustee and are strictly for the use of the developer of the multifamily project. Estimated revenues represent the state's Private Activity Bond allocation of issuance authority for multifamily bonds by the Department. The assumptions above do not include the effects of new Federal Legislation, H.R. 3221, which is yet to be determined.

6.H. Estimated Total of All Agency Funds Outside the GAA Bill Pattern

Compliance Fees

Estimated Beginning Balance in FY 2008		$	3,807,567
Estimated Revenues FY 2008		$	4,400,000
Estimated Revenues FY 2009		$	3,800,000
	FY 2008-09 Total	$	12,007,567
Estimated Beginning Balance in FY 2010		$	3,807,567
Estimated Revenues FY 2010		$	3,925,000
Estimated Revenues FY 2011		$	4,025,000
	FY 2010-11 Total	$	11,757,567

Constitutional or Statutory Creation and Use of Funds:

The Department's enabling legislation, Texas government code (TGC) Chapter 2306, has several provisions regarding the deposit of funds outside treasury: §§ 2306.118, 2306.120, and 2306.172. There are numerous provisions for fees to be collected for the purpose of supporting the housing finance programs such as single family bonds, multifamily bonds, housing tax credits and compliance monitoring: §2306.144, §2305.147, §2306.176, §2306.228, §2306.266 and §2306.6716.

Method of Calculation and Revenue Assumptions:

Multifamily developers are assessed an annual fee based on the number of low income units available for rent. They are collected over the 30-year affordability period. The number of low income units are identified in the individual Land Use Restriction Agreements (LURAs) that are issued to each developer. These fees are generated for the purpose of offsetting expenses incurred by the Department related to the monitoring and administration of these properties. These fees are collected and deposited in Safekeeping Trust Company (TTSTC) in the compliance fee account. The Department then makes periodic transfers as necessary to fund 0896 in the state treasury, in accordance with approved budget appropriations, to pay for its administrative expenses. Revenue estimates are expected to decrease from 2008 to 2009 due to elimination of the monitoring function for the Affordable Housing Disposition Program (AHDP). Revenue estimates are expected to increase from the 2009 level due to an increase in the number of low income units available resulting from additional multifamily bonds and tax credits issued.

6.H. Estimated Total of All Agency Funds Outside the GAA Bill Pattern

Housing Tax Credit Fees

Estimated Beginning Balance in FY 2008		$	7,081,992
Estimated Revenues FY 2008		$	3,300,000
Estimated Revenues FY 2009		$	4,025,000
	FY 2008-09 Total	$	14,406,992
Estimated Beginning Balance in FY 2010		$	7,081,992
Estimated Revenues FY 2010		$	4,075,000
Estimated Revenues FY 2011		$	4,125,000
	FY 2010-11 Total	$	15,281,992

Constitutional or Statutory Creation and Use of Funds:

The Department's enabling legislation, Texas Government Code (TGC) Chapter 2306, has several provisions regarding the deposit of funds outside treasury: §2306.118, §2306.120, and §2306.172. The Department has authority to collect housing tax credit fees pursuant to §2306.144, §2305.147, §2306.176, §2306.228, §2306.266 and §2306.2617, Texas Government Code.

Method of Calculation and Revenue Assumptions:

The fees collected are application fees, commitment fees and inspection fees. The authority for the collection of these fees is outlined in the Department's Qualified Allocation Plan (QAP), which is published annually. Currently, the Department has the authority to award approximately $48 million in tax credits each year, which generates approximately $2 million in commitment fees. The balance is received from application, inspection, and other miscellaneous fees. These fees are generated for the purpose of offsetting expenses incurred by the Department related to the monitoring and administration of the Housing Tax Credit Program. These fees are collected and deposited in the Safekeeping Trust Company. The Department makes transfers as necessary, in accordance with approved budget appropriations, to funds held at the state treasury to pay for its administrative expenses. Revenue estimates are expected to increase slightly from the 2008-09 levels due to anticipated application fees and extension fees.

6.H. Estimated Total of All Agency Funds Outside the GAA Bill Pattern

Housing Trust Fund

Estimated Beginning Balance in FY 2008		$	14,126,915
Estimated Revenues FY 2008		$	5,490,295
Estimated Revenues FY 2009		$	5,515,296
	FY 2008-09 Total	$	25,132,506
Estimated Beginning Balance in FY 2010		$	17,132,506
Estimated Revenues FY 2010		$	5,990,295
Estimated Revenues FY 2011		$	6,090,295
	FY 2010-11 Total	$	29,213,096

Constitutional or Statutory Creation and Use of Funds:

The Department's enabling legislation, Texas Government Code (TGC) Chapter 2306, has several provisions regarding the Housing Trust fund: § 2306.201 addresses placing the funds with the Texas Safekeeping Trust Company and §§ 2306.202 through 2306.206 addresses the administration of the fund.

Method of Calculation and Revenue Assumptions:

Revenue consists of Housing Trust Fund General Revenue transfers made in accordance with TDHCA Rider 10, General Appropriations Act, and antecedent riders and transfers made to the fund from unencumbered fund balances, grants, or other sources as determined by the Department (i.e., "local funds"). The fund is used to provide loans and grants to entities and individuals to finance, acquire, rehabilitate, and develop affordable housing. The beginning balance for each biennium reflects funds encumbered through existing contracts or reserved for open notices of funding availability (NOFAs). The components of revenue estimates are General Revenue transfers, including $1,00,000 from loan repayment and interest generated from previous, General Revenue-funded contracts and $300,000 generated from loan repayments and earned interest from contracts funded with local funds.

6.H. Estimated Total of All Agency Funds Outside the GAA Bill Pattern

Administration Fund

Estimated Beginning Balance in FY 2008		$	16,336,280
Estimated Revenues FY 2008		$	4,228,000
Estimated Revenues FY 2009		$	4,052,000
	FY 2008-09 Total	$	24,616,280
Estimated Beginning Balance in FY 2010		$	16,641,280
Estimated Revenues FY 2010		$	4,127,000
Estimated Revenues FY 2011		$	4,202,000
	FY 2010-11 Total	$	24,970,280

Constitutional or Statutory Creation and Use of Funds:

The Department's enabling legislation, Texas Government Code (TGC) Chapter 2306, has several provisions regarding the deposit of funds outside treasury: §2306.118, § 2306.120, amd §2306.172.

Method of Calculation and Revenue Assumptions:

Funds held in this fund account are for the principal operating activities conducted by the Department. Funds held in the Administration Funds are generated from transfers from the Bond Compliance Accounts, Tax Credit Accounts, and revenue from Single Family/Multifamily Administration Fees. These fees and transfers support the general administration expenses associated with bond funds. In additon, the beginning balance includes funds designated for a specific purpose by Board action.

Rank / Name
Explanation of Impact to Programs and Revenue Collections

1. Poverty Related Funds

This reduction would eliminate funding utilized in the 2008-2009 biennium for providing technical assistance to rural communities to assist them in their efforts to access HUD Balance of State Continuum of Care funding. The primary groundwork for this effort will be funded through the 2008-2009 appropriations. Background research assembled during 2008-2009 will likely continue to be of assistance in efforts undertaken during the 2010-2011 biennium, mitigating the impact of discontinued funding.

2. Central Administration

To achieve this reduction, TDHCA would substantially reduce funding for professional development, training and tuition reimbursement, all of which are currently utilized by TDHCA to help staff maintain best practices and professional expertise. TDHCA would also decrease the use of professional services.

3. Center for Housing Research and Planning

This represents a 41.67% reduction to General Revenue funding for this program. This funding reduction would reduce the number of market studies and public education efforts funded through the Affordable Housing Research and Information Program, while still allowing the Department to undertake this activity. At this lower funding level, the Department would be able to conduct roughly one to two fewer regional market studies per year, depending on the scope of the study, and one fewer outreach and education effort.

4. Housing Trust Fund - Multifamily

This represents an 18.7% reduction to the Housing Trust Fund (HTF) Multifamily program budget, which would result in three to seven fewer rental units being constructed or rehabilitated.

5. Housing Trust Fund - Single Family

This funding reduction to the Housing Trust Fund (HTF) Single Family program budget would result in ten to seventy-two fewer households served, depending on the activity to be reduced. HTF Single Family activity includes tenant-based rental assistance, homebuyer assistance, and home repair or rehabilitation, and veterans assistance. The proposed funding reduction translates into roughly ten fewer households receving mortgage assistance to help them repair or replace a home lost as a result of natural disaster, twenty-one fewer veteran households served receivng rental or down-payment assistance to help them transition to permanent housinng, twenty-four fewer households receiving home repair assistance, seventy-two fewer households receving down payment assistance, or seventy-two fewer rental vouchers. TDHCA would determine activities to be reduced through a public comment process. No reduction would be made to funds related to the statutorily-required Texas Bootstrap (Owner-Builder) Loan Program.

Michael Gerber
EXECUTIVE DIRECTOR

December 19, 2006

The Honorable Rick Perry, Governor
The Honorable Carole Keeton Strayhorn, Texas Comptroller
Mr. John O'Brien, Deputy Director, Legislative Budget Board
Mr. John Keel, CPA, State Auditor

Dear Governor Perry, Comptroller Strayhorn, Mr. O'Brien and Mr. Keel:

We are pleased to submit the Annual Financial Report of the Texas Department of Housing and Community Affairs for the year ended August 31, 2006, in compliance with TEX. GOV'T CODE ANN §2101.011 and in accordance with the requirements established by the Comptroller of Public Accounts.

The accompanying annual financial report has been prepared in accordance with Generally Accepted Accounting Principles (GAAP) reporting requirements. The financial report has been audited by an independent Auditor as required by statute.

If you have any questions, please contact David Cervantes, Director of Financial Administration at (512) 475-3875. Esther Ku may be contacted at (512) 475-3871 for questions related to the Schedule of Expenditures of Federal Awards.

Sincerely,

Michael Gerber
Executive Director

INDEPENDENT AUDITORS' REPORT

To the Honorable Rick Perry, Governor,
and the Board of Directors of
Texas Department of Housing and Community Affairs:

We have audited the accompanying financial statements of the governmental activities, business-type activities, major funds, remaining fund information, and supplementary schedules 1-A through 1-F of the Texas Department of Housing and Community Affairs (the "Department") as of and for the year ended August 31, 2006, as listed in the table of contents. These financial statements and supplementary schedules 1-A through 1-F are the responsibility of the Department's management. Our responsibility is to express an opinion on these financial statements and supplementary schedules based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 1 to the financial statements, the financial statements of the Department are intended to present the financial position and results of operations and cash flows of only that portion of the funds of the state of Texas that is attributable to the transactions of the Department.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities, business-type activities, major funds, and remaining fund information of the Department, as of August 31, 2006, and the results of its operations and cash flows (where applicable) for the year then ended in conformity with accounting standards generally accepted in the United States of America. Also, in our opinion, schedules 1-A through 1-F, as listed in the table of contents, present fairly, in all material respects, the information set forth therein in accordance with guidelines issued by the Texas Comptroller of Public Accounts.

Management's Discussion and Analysis, as listed in the table of contents, is not a required part of the financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 19, 2006, on our consideration of the Department's internal control over financial reporting and our tests of its compliance and other matters. The purpose of that report is to describe the scope of our testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

MANAGEMENT'S

DISCUSSION AND ANALYSIS

TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS
MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

This section of the Texas Department of Housing and Community Affairs' (Department) annual financial report presents management's discussion and analysis of the Department's financial performance during the fiscal year that ended on August 31, 2006. Please read it in conjunction with the Department's financial statements, which follow this section.

Financial Highlights

- The Department's business-type activity net assets decreased \$26.1 million and governmental activities net assets decreased \$7.9 million.

- The Department's proprietary fund experienced a decline in operating income in the amount of \$19.9 million to an Operating (Loss) of (\$38.2) million. This impact on operating income resulted primarily from the decline of the fair value of investments in the amount of \$19.9 million. The \$14.4 million increase in interest and investment income, the \$1.1 million decrease in other operating revenues, the \$9.4 million increase in interest expense, and the \$4.4 million increase in other operating expenses had an offsetting effect on operating income.

- Net Assets in the Department's Governmental Fund decreased from \$8.6 million to \$0.7 million. The decrease was primarily attributed to the \$12.1 million transfer of the Housing Trust Fund from the Governmental Fund to the Proprietary Fund. A portion of the decrease was offset by Excess of Revenues over Expenditures during the fiscal year.

- The Department's proprietary fund debt increased \$154.8 million to \$2.3 billion. Debt issuances and debt retirements totaled \$503.9 million and \$349.1 million, respectively.

- Loan originations for the year totaled \$181.9 million and \$9.5 million in the Department's proprietary and governmental funds, respectively.

Overview of the Financial Statements

The financial statements consist of three parts – management's discussion and analysis (this section), the basic financial statements, and supplementary information. The basic financial statements include two types of statements that present different views of the Department.

- The first set of statements are government-wide financial statements that provide information about the Department's overall financial position and results. These statements, which are presented on an accrual basis, consist of the Statement of Net Assets and the Statement of Activities.

- The remaining statements are fund financial statements of the Department's governmental fund and proprietary fund. The governmental fund's activities are funded primarily from Federal funds but also include General Revenue appropriations for which the Department follows a modified accrual basis of accounting. The Department's proprietary fund operates similar to business activities and follows an accrual basis of accounting.

- The basic financial statements also include a "Notes to Financial Statement" section which explains some of the information presented in the Government-wide and fund financial statements and provides additional detailed data.

- The Notes to the Financial Statements are followed by a "Supplementary Information" section, which presents supplementary bond information.

The remainder of this overview section of the management's discussion and analysis explains the structure and contents of each of these statements.

Government-Wide Financial Statements

The Statement of Net Assets shows Governmental Activities and Business-type Activities consolidated on a full accrual basis. The Statement of Activities presents a government wide format of expenses, charges for services, operating grants and contributions and net expenses by both Governmental activities and Business-type activities. Both activities are further broken down by function and programs. The second section of the Statement of Activities shows general revenues not associated with a particular program but provides resources for the Department's programs and operations. The fiduciary activity is not included in the government wide statements.

Statements of Net Assets

The following tables show a summary of changes from prior year amounts for governmental activities.

Texas Department of Housing and Community Affairs
Condensed Statement of Net Assets – Governmental Activities
As of August 31, 2006

	Governmental Activities		Increase / (Decrease)

Total Liabilities	115,990,249	112,900,377	3,089,872	2.7
Net Assets				
Invested in Capital Assets	262,815	108,118	154,697	143.1
Restricted by Grantor	374,890	99,319	275,571	277.5
Unrestricted	48,226	8,390,529	(8,342,303)	(99.4)
Total Net Assets	$ 685,931	$ 8,597,966	$ (7,912,035)	(92.0)

Net Assets of the Department's governmental fund decreased by $7.9 million or 92%. In 2005, Unrestricted Net Assets primarily consisted of a balance of $8.9 million in the Housing Trust Fund (HTF). This program was transferred from the General Fund to Texas Treasury Safekeeping Trust Company in accordance with the 2006-2007 General Appropriations Act. A portion of the decrease was offset by Excess of Revenues over Expenditures at the government-wide level. The ending balance of Unrestricted Net Assets primarily consists of balances in the Manufactured Housing Division. Restricted Net Assets represent balances in the Investor Owned Utility Programs.

The balance in Cash and Investments increased by $1.5 million. The Section 8 program had less expenditures due to lower lease-up rates during fiscal year 2006. The monthly installments received from the U.S. Department of Housing and Urban Development were not fully spent. Accordingly, a cash balance remained at year end.

Due to a legislative mandate, the Housing Trust Fund was transferred from the General Fund to Texas Treasury Safekeeping Trust Company. As a result, Legislative Appropriations decreased by $8.7 million.

The Department experienced an increase in Federal Receivable and Accounts Payable. Increased payment activities at year end for the Low Income Home Energy Assistance Program (LIHEAP) and HOME Investment Partnerships Program (HOME) were reflected in the increase of Federal Receivable and Accounts Payable. Federal Receivable was offset because of an unspent Cash balance in the Section 8 program at year end.

Accounts Receivable experienced an increase during fiscal year 2006. This resulted from an effort to reduce the outstanding consumer claims for Manufactured Housing. There were increased activities for consumer claims payments at year end. Consequently, there were increased Receivable for recoveries from surety bond coverage.

The Department experienced decreases of Loans and Contracts as well as Deferred Revenue. This change occurred primarily because of the increase of current and non-current program loans, which are funded by federal funds for the purpose of HOME program activities. It also reflects reduction of current and non-current loan balances funded by General Revenue for HTF program which was transferred to the Proprietary Fund.

Included in Other Liabilities is the current and non-current portion of Employees' Compensable Leave. It represents unpaid balances of employees' accumulated annual leave.

Business-Type Activities

Texas Department of Housing and Community Affairs
Business-Type Activities – Condensed Statement of Net Assets as of August 31, 2006

	Business-Type Activities		Increase / (Decrease)

Other Non-current Liabilities	171,965,689	236,593,911	(64,628,222)	(27.3)
Total Liabilities	2,570,195,008	2,450,597,087	119,597,921	4.9
Net Assets				
Invested in Capital Assets	269,218	213,233	55,985	26.3
Restricted	23,720,348	61,632,463	(37,912,115)	(61.5)
Unrestricted	38,960,974	27,170,859	11,790,115	43.4
Total Net Assets	$ 62,950,540	89,016,555	$ (26,066,015)	(29.3)

Net assets of the Department's proprietary fund decreased $26.1 million, or 29.3% to $62.9 million. The decrease resulted primarily from a decline in earnings from the Department's investments, loans, other programs and an increase in expenses. A decline in the Department's fair value of its investments also contributed to this decrease in net assets. This decline resulted in an unrealized (loss) of ($33.4) million, down $19.9 million from an unrealized (loss) of $13.5 million. Restricted net assets of the Department's proprietary fund decreased $37.9 million or 61.5%. Unrestricted net assets increased $11.8 million or 43.4%.

Cash and investments increased $174 thousand, or .01% to $1.4 billion, as funds were generated from debt issuances, reinvestment of loan repayments, and interest earnings. Program loans receivable (current and non-current) increased $88.1 million, or 8.1% to $1.2 billion, as a result from the origination of $111.1 million and $36.7 million in payoffs of mortgage loans under the Department's Multifamily Program. Total bonds and notes payable (current and non-current) increased $160.6 million, or 7.4% due to new debt issuances associated with the Department's Single Family and Multifamily Programs.

Earnings within the Department's various funds were $99.5 million of which $87.4 million is classified as restricted and $12.1 million as unrestricted.

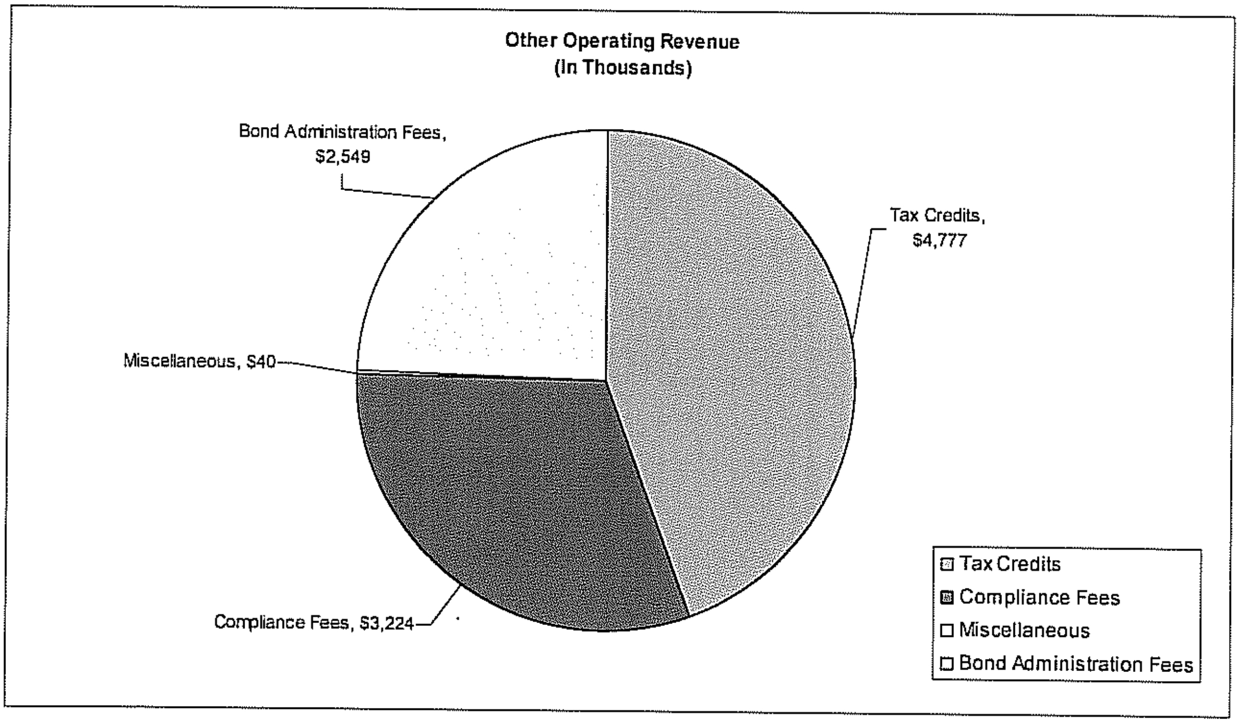
Restricted earnings are composed of $119.7 million in interest and investment income, ($33.4) million in fair value of investments, and $1.1 million in other revenue. Interest and investment income are restricted per bond covenants for debt service. Fair value of investments is an unrealized (loss) due to the fact that the Department holds investments until maturity. Other revenue is predominantly an accounting recognition of fees received in previous years that were deferred when received and are being amortized over a period of time.

Unrestricted earnings are composed of $1.6 million in interest and investment income and $10.5 million in other operating revenue.

Interest and investment income earned from unrestricted investments are used to support various housing initiatives programs such as Housing Trust Fund and the Bootstrap Program. Sources for other operating revenue are fees from the Tax Credit Program, compliance fees, bond administrative fees, and miscellaneous interest earned from funds held by the Comptroller.

Fees earned under the Tax Credit Program are application fees, commitment fees, and inspection fees. Yearly compliance fees are generated from the Department's portfolio of multifamily properties. The Department performs on site visits and desk reviews to ensure that the properties are in compliance with the various housing regulations. Bond administrative fees are generated yearly from the various bond issuances to support the Department's administrative expenses.

The graph below illustrates the composition of the $10.5 million in other operating revenue, classified as unrestricted earnings, according to the different housing programs.



Statement of Activities

The Statement of Activities reflects the sources of the Department's changes in net assets as they arise through its various programs and functions. Single Family, Multifamily and Housing Trust Fund are shown as business-type activities, and seven major programs are shown as governmental activities. Federal and state assistance activities allocate various subsidy funds to local governments, nonprofit organizations or individuals.

A condensed Statement of Activities for the fiscal year ended August 31, 2006 and 2005 is shown in the table below.

Texas Department of Housing and Community Affairs

Ending Net Assets	$ 686	$ 8,598	$ 62,951	$ 89,017	$ 63,637	$ 97,615

Governmental Fund Activities

Revenues of the Department's Governmental Activities were primarily from Operating Grants and Contributions. The majority of the revenues were from the U.S. Department of Housing and Urban Development (HUD) and the U.S. Department of Health and Human Services. General Revenues are revenues appropriated to the Department in accordance with legislative acts and regulations.

Total revenue increased $9.3 million. This increase consisted primarily of increases of $8.0 million in Operating Grants and Contributions, increase of Charges for Services of $2.7 million and decrease of General Revenues of $1.5 million. The increase of Operating Grants and Contributions is a result of increased federal activities in the LIHEAP and HOME Programs. The increase of Charges for Services is due to increased charges of Manufactured Housing licenses, fees and permits. There was also a change in the Department's methodology of finance from General Revenues to Appropriated Receipts for Manufactured Housing strategies.

Expenses of the Department's Governmental Activities consisted primarily of Intergovernmental Payments and Public Assistance Payments. The Department distributes program funds to local providers, including local governments, nonprofit and for-profit organizations, community based organizations and real estate developers. The increase in Expenses is primarily due to a combination of increased activities in the HOME and LIHEAP programs and decreased activities in the Community Services Block Grant (CSBG), HTF and Section 8 programs.

Transfers consisted primarily of the transferring out of HTF from Governmental Activities to Business-Type Activities according to TDHCA rider 19 in the 2006-2007 General Appropriations Act. There were also additional transfers of retirement incentive and earned federal funds in Governmental Activities.

Business-Type Activities

Revenues of the Department's Business-type Activities were primarily from charges for services of $131.3 million and a decrease in fair value of investments of ($33.4 million). Charges for services consist primarily of earned interest income on loans for the three housing lending programs. It also includes program investment income which is earned within the Department's bond programs, the investments and the income of which are restricted to those programs by a pledge to the respective bond indentures. Total revenue decreased $6.5 million which consisted primarily of a decrease in fair value of investments of $19.9 million compared to 2005 and offset by an increase of $14.4 million in interest and investment income and a decrease of $1.0 million in other operating revenue.

Expenses of the Department's Business-type Activities consist primarily of interest expense of $117.5 million, which increased $9.4 million. The increase in interest expense is a result of an increase in the Department's debt issued to fund its various Single Family and Multifamily lending programs. The direct expenses also include Administrative Funds, allocations of expenses of Department programs that directly involve the production or monitoring activities associated with the housing programs, as well as certain costs incurred, both internally and externally. Administrative expenses decreased $1.0 million to $10.9 million, which was incurred within the Department's Administrative Fund including all other administrative and supportive functions and overhead expenses.

The Department's Business-type Activities expenses of $137.7 million exceeded Charges for Services of $131.3 million by $6.4 million. Charges for Services, primarily interest income on loans and investment income, are intended to cover bond principal and interest expense. The other direct expenses were covered and the difference was covered by prior year available net assets. This income, plus interest earned on loans, produces an adequate amount to pay Department obligations as required by the bond indentures covenants.

The Department's Business-type Activities also generated $1.6 million of unrestricted investment income, which was used primarily to pay administrative costs.

Fund Financial Statements

The fund financial statements provide more detailed information about the Department's most significant fund and the Department as a whole. The Department has two types of funds:

- Governmental fund – The General Revenue Fund is the Department's only Governmental Fund. It is the principal operating fund used to account for the Department's general activities. The financing for this fund is authorized through state legislative appropriations either as committed or collected revenues. Federal and state programs are also reported within this fund.

- Proprietary fund – The Department's activities in its proprietary fund are accounted for in a manner similar to businesses operating in the private sector. Funding has primarily arisen through the issuances of taxable and tax-exempt bonds whose proceeds are used primarily to fund various types of loans to finance low and moderate-income housing. This fund also receives fee income from the Multifamily Tax Credit Program and Compliance fees collected for the purpose of covering the operating costs of the Department. The net assets of these funds represent accumulated earnings since their inception and are generally restricted for program purposes or debt service.

Beginning Fund Balance	9,419,177	9,662,417	(243,240)	(2.5)
Appropriations (Lapsed)	(404,716)	(145,414)	(259,302)	178.3
Ending Fund Balance	$ 1,372,345	$ 9,419,177	$ (8,046,832)	(85.4)

Revenues of the Department's governmental activities totaled $173.6 million and were generated by federal grants primarily from LIHEAP, CSBG and HOME programs. Expenditures of $169.3 million consisted primarily of Intergovernmental and Public Assistance Payments.

Total revenues from governmental activities increased by $9.5 million in 2006. The majority of the increase was attributed to the increase in Federal Revenue from the HOME and LIHEAP programs. It was also attributed to decreases in the CSBG and Section 8 programs. The Department received additional funds from the U.S. Department of Health and Human Services for the LIHEAP Program. On the other hand, the Department experienced decreased activities in CSBG and lower lease-up rates in Section 8.

The increase in licenses, fees, and permits resulted from increased charges of license and installation fees for Manufactured Housing. It also reflected a change in the Department's methodology of finance from General Revenue to Appropriated Receipts for Manufactured Housing strategies. This change also resulted in decrease in Legislative Appropriations.

The change to State Grant Pass-Through Revenues was due to the decrease of funding from the State Energy Conservation Office. This program was being phased out over the past several years. The change to Interest and Investment Income was due to an increase in interest rates and increased cash balance in the State Treasury.

The Department experienced a similar increase in expenses. The majority of the increase was attributed to the Intergovernmental Payments for the HOME, LIHEAP and CSBG Programs.

The Department also experienced increases in Salaries and Wages and Payroll Related Costs. It was primarily due to across the board cost of living adjustments and a shift of Governmental Fund's share of Payroll Related Costs in accordance with the funding proportionality calculation provided in Accounting Policy Statements.

The decrease of Rentals & Leases was a result of the Department's relocation to a state owned facility. The decrease of Public Assistance Payments was due to decreased activities in CSBG and Section 8 programs. The majority of the decrease was offset by increases in HOME and LIHEAP.

Claims and Judgments increased $1.4 million. The increase was due to a 2005 HOME accrued contingent loss reversal of $483,115. In addition, Manufactured Housing consumer services were reported in the Professional Fees and Services category in 2005, while $949,011 was reported in Claims and Judgments in 2006.

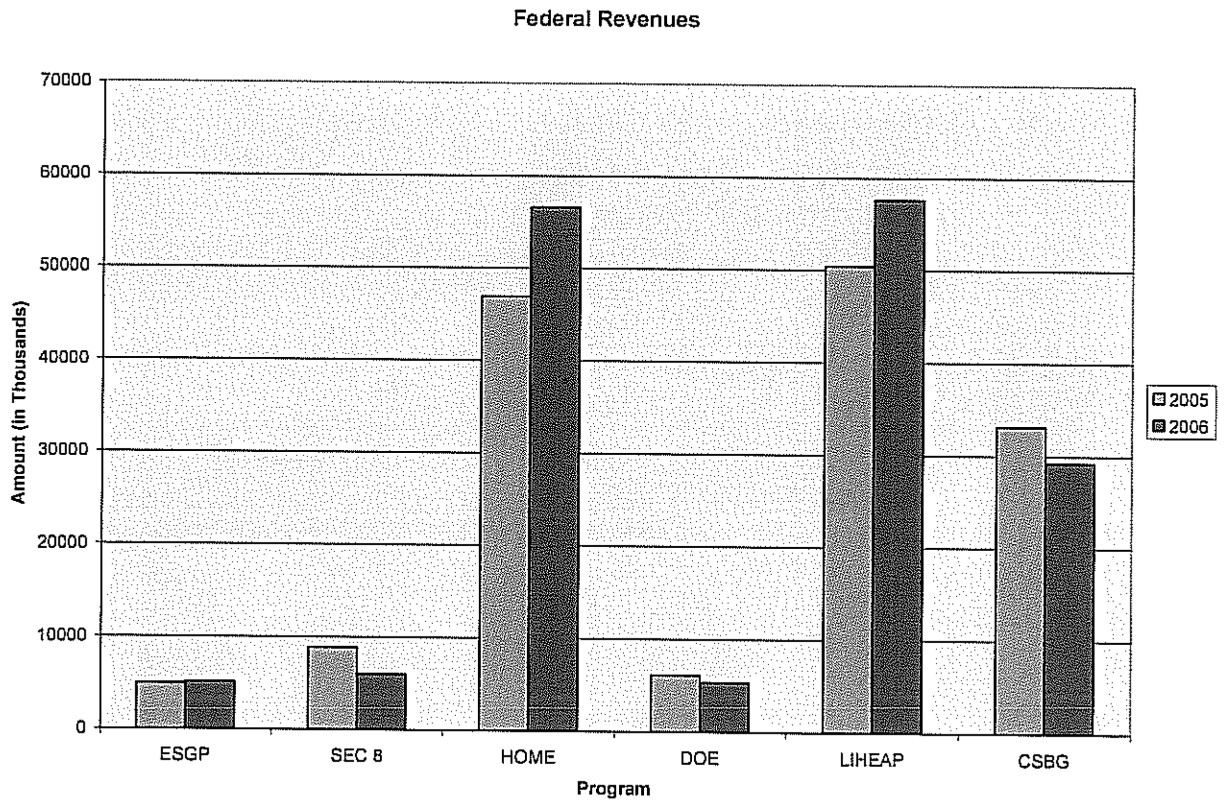
The fiscal year 2006 Other Financing Sources (Uses) consisted primarily of the transfer of HTF from General Revenue to Texas Treasury Safekeeping Trust Company. It included transfers of unexpended General Revenue balances from prior years and interest earnings and loan repayments received during the year. There were also additional transfers of Retirement Incentive funding and earned federal funds collected in excess of appropriation authority.

The following graphs illustrate a comparison between fiscal year 2006 and 2005 for Federal Revenues, Intergovernmental Payments, and Public Assistance Payments.

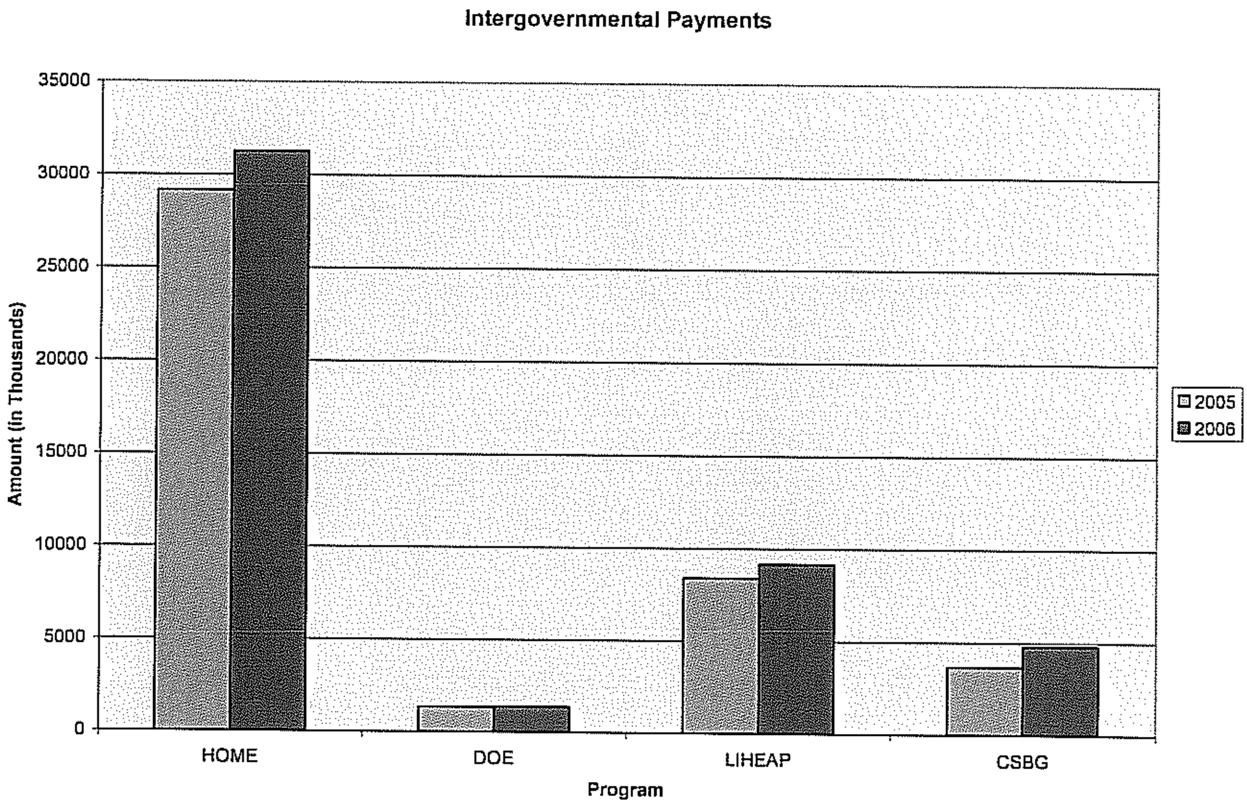
The acronyms used in the graphs are defined as following:

CSBG	Community Services Block Grant
DOE	Department of Energy, Weatherization Assistance for Low-Income Persons
ESGP	Emergency Shelter Grants Program
HOME	HOME Investment Partnerships Program
LIHEAP	Low-Income Home Energy Assistance Program
SEC 8	Section 8 Housing Choice Vouchers
HTF	Housing Trust Fund

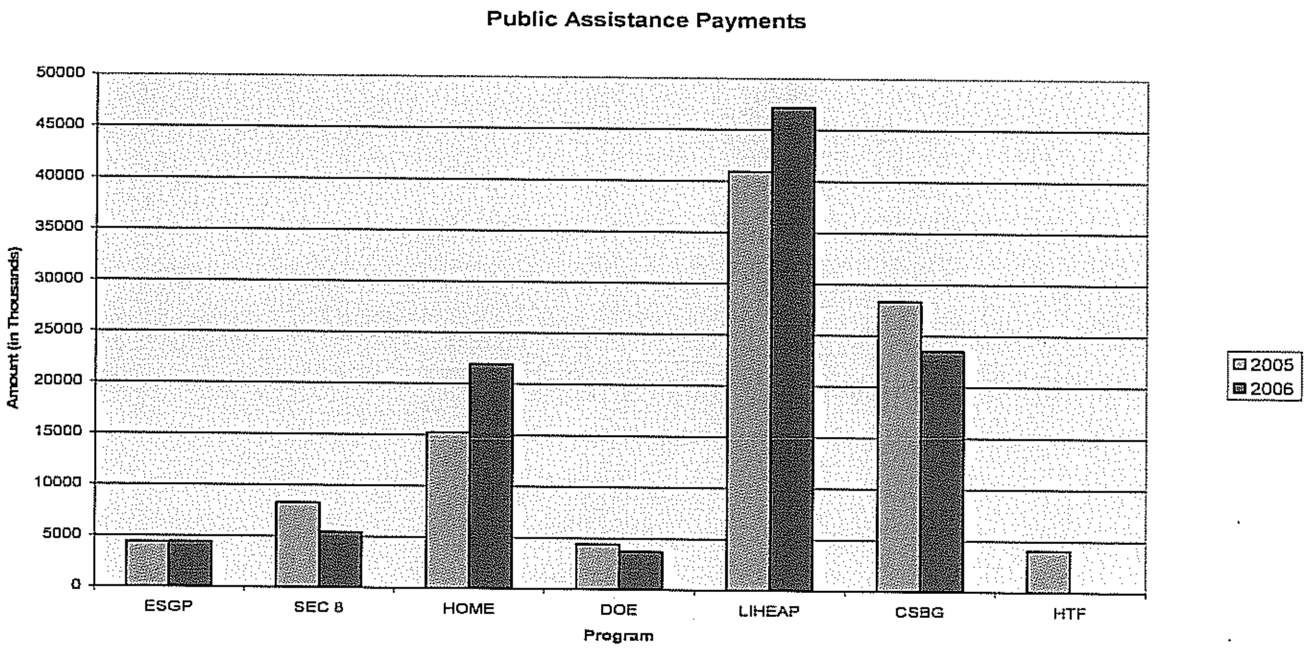
Federal Revenues: Receipts from the State's participation in programs financed with federal funds.



Intergovernmental Payments: Payment of grants to cities, counties, council of governments or other governmental entities.



Public Assistance Payments: Payment of grants to community action groups and organizations for community service programs.



Proprietary Fund

Net assets of the Department's proprietary fund decreased from the August 31, 2005 figures by $26.1 million or 29.3% to $62.9 million. The following table summarizes the Statement of Revenues, Expenses and Changes in Net Assets of the Department's proprietary fund for the fiscal years ended August 31, 2006 and August 31, 2005.

Texas Department of Housing and Community Affairs

Total Operating Expenses	137,655,345	124,332,472	13,322,873	10.7
Operating Income (Loss)	(38,178,867)	(18,310,169)	(19,868,698)	108.5
NONOPERATING REVENUES (EXPENSES) & EXTRAORDINARY ITEMS	12,112,852	(237,254)	12,350,106	5,205.4
CHANGE IN NET ASSETS	(26,066,015)	(18,547,423)	(7,518,592)	40.5
Beginning Net Assets,	89,016,555	107,567,251	(18,550,696)	(17.3)
Restatements	-	(3,273)	3,273	(100.00)
Net Assets, as Restated	89,016,555	107,563,978	(18,547,423)	(17.2)
Ending Net Assets	$ 62,950,540	89,016,555	$ (26,066,015)	(29.3)

Interest earned on program loans increased by $9.6 million, or 17.7% due primarily to an increase of $9.6 million within the Department's Multifamily Bond Program, due to higher loan amounts outstanding.

Investment income increased $4.9 million or 9.3% and reflected higher investment yields for the market overall. The primary increase in investment income was within the Single Family Bond Program funds, which increased $5.9 million or 24.3% but was offset by the Residential Mortgage Revenue Bond Program funds which declined $2.5 million.

The following table illustrates the changes in net assets by program of the Department's business-type activities for the fiscal years 2006 and 2005.

General Funds		16,544	15,010		1,535	10.2
Housing Trust Fund		21,907	11,765		10,142	86.2
Administration Fund		(235)	(57)		(178)	312.3
Compliance Programs		341	127		214	168.5
Housing Initiatives		673	539		134	24.9
Total	$	62,951	89,017	$	(26,065)	(29.3)

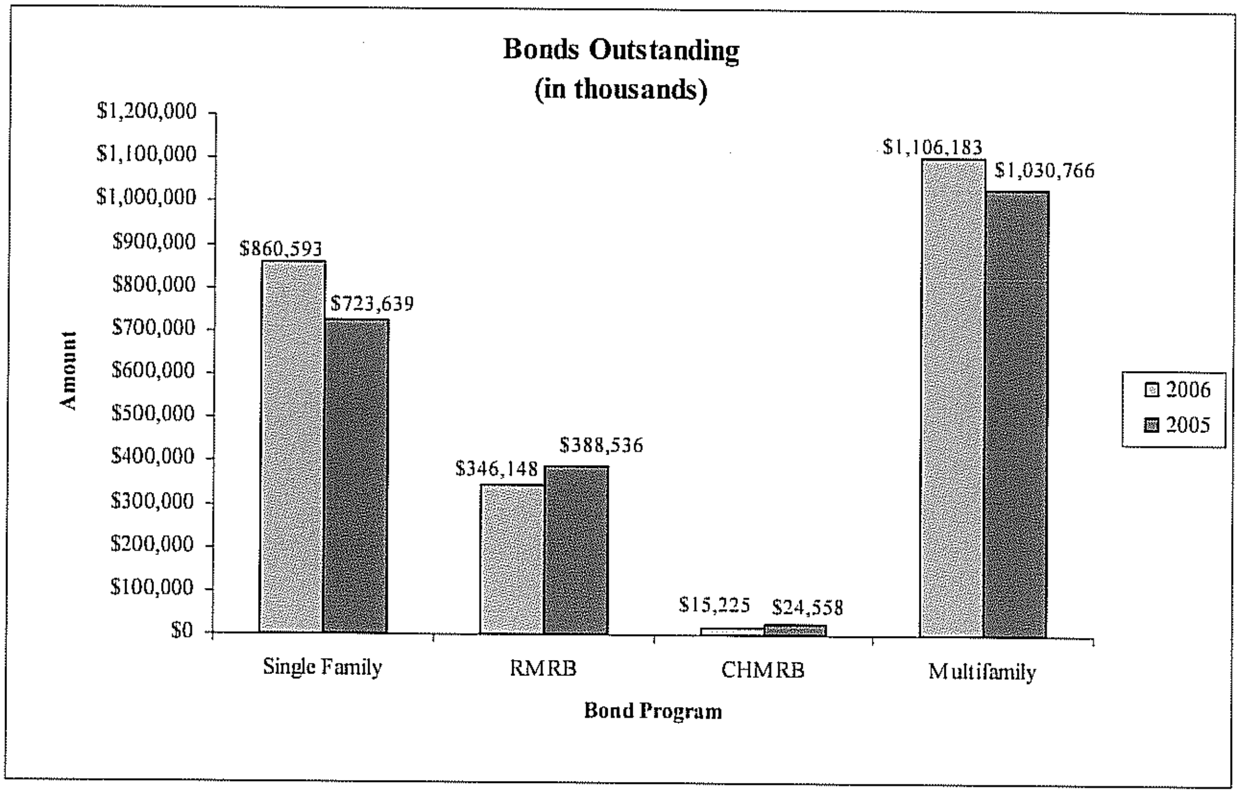
The net assets in the Housing Trust Fund increased $10.1 million or 86.2% during fiscal year 2006 as a result of transfer of funds of the Housing Trust Fund from General Revenue due to the 2006 – 2007 General Appropriations Act, Rider 19 in the amount of $12.1 million.

The net assets of the Single Family Bond Program decreased by $25.8 million or 60.0%, primarily due to a decrease in fair value in investments and increase in interest expense. The net assets of the Residential Mortgage Revenue Bonds (RMRB) decreased by $10.1 million due to the net effect of a $3.7 million adjustment to fair value of investments, a decrease in investment income of $2.5 million, and an increase in interest expense of $3.2 million.

Department Debt

The Department's new debt issuances during fiscal year 2006 totaled $503.9 million. The Single Family program issued $392.8 million in bonds and the Multi-Family Bond Program issued $111.1 million. The Department also had $349.1 million in debt retirement during the year primarily due to consumer refinancing and prepayments of original loans. The net result was an increase in bonds payable of $154.8 million to $2.3 billion of which $33.8 million is due within one year. For additional information, see Note 12, Bond Indebtedness, and supplementary bond information schedules.

The following graph will illustrate a comparison of bonds outstanding between fiscal year 2006 and 2005 per bond program.



Request for Information

This financial report is designed to provide a general overview of the Texas Department of Housing and Community Affairs' (TDHCA) operations for all parties interested in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Texas Department of Housing and Community Affairs, Director of Financial Administration, P.O. Box 13941, Austin, Texas, 78711-3941.

NOTES TO THE

FINANCIAL STATEMENTS

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ENTITY

Effective September 1, 1991, the Texas Department of Housing and Community Affairs (Department) was created to assist local governments in helping residents overcome financial, social and environmental problems; to address very low to moderate income housing needs; to contribute to the preservation and redevelopment of neighborhoods and communities; to assist the Governor and the legislature in coordinating federal and state programs affecting local governments; and to continually inform the state and the public about the needs of local government (*Texas Government Code Ann., Chapter 2306*). The Department was created by merging two former agencies, the Texas Housing Agency and the Texas Department of Community Affairs.

The regulation of manufactured housing was transferred from the Texas Department of Licensing and Regulation to the Department on September 1, 1995. The Manufactured Housing Division is administratively attached to the Department and is responsible for establishing standards and requirements for the construction and installation of manufactured housing that are reasonably necessary to protect the health, safety and welfare of the occupants of such housing and the general public. The Manufactured Housing Division has a governing Board of five members appointed by the Governor.

The Department is governed by a Board, composed of seven members, all of whom are appointed by the Governor with the advice and consent of the Texas Senate. The Board then appoints the Executive Director, with the approval of the Governor.

The accompanying financial statements of the Department have been prepared to conform with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

Blended Component Units - No component units have been identified which meet the criteria for inclusion in the Department's financial statements.

FUND STRUCTURE

The accompanying financial statements are presented on the basis of funds, each of which is considered a separate accounting entity.

Governmental Fund Types & Government-wide Adjustment Fund Types

General Fund
The General Fund is the principal operating fund used to account for most of the Department's general activities. It accounts for all financial resources except those accounted for in other funds.

Proprietary Fund Types

Enterprise Funds (Business-Type Activity)
Enterprise Funds account for operations financed and operated in a manner similar to private business. The intent is to recover costs through user charges and where a periodic determination of revenues earned, expenses incurred, and net income are appropriate for management control, accountability, contractual obligations and other purposes.

Fiduciary Fund Types

Agency Funds
Agency funds are used to account for assets the government holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

Basis of Accounting

The basis of accounting determines when revenues and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental funds are accounted for using the modified accrual basis of accounting. Under modified accrual, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year end. The State of Texas considers receivables collected within sixty days after year-end to be available and recognizes them as revenues of the current year for the Fund Financial Statements prepared on the modified accrual basis of accounting. Expenditures and other uses of financial resources are recognized when the related liability is incurred.

The Government-wide Financial Statements are accounted for using the accrual method of accounting. This includes unpaid Employee Compensable leave, the unmatured debt service (principal and interest) on general long-term liabilities, capital assets and accumulated depreciation.

Proprietary funds are accounted for on the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized at the time liabilities are incurred. Proprietary Funds distinguish operating from non-operating items. Operating revenues result from providing services or producing and delivering goods in connection with the proprietary funds principal ongoing operations which include, interest on investments and mortgage loans, and fees generated from housing activities. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets.

The Department has elected not to apply Financial Accounting Standards Board pronouncements issued after November 30, 1989 as allowed by GASB Statement No. 20.

BUDGET AND BUDGETARY ACCOUNTING

The budget is prepared biennially and represents appropriations authorized by the legislature and approved by the Governor (the General Appropriations Act). The state monitors its statewide budget by establishing the legal level of control at the agency level to ensure that expenditures are not made in excess of budgetary authority. Within the Department, procedures are used to ensure that expenditures do not exceed their total budget at the division level, but the State Comptroller ultimately ensures that each total authorized agency budget is not exceeded.

Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

ASSETS, LIABILITIES AND FUND BALANCES/NET ASSETS

Assets

Cash and Cash Equivalents
Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Investments
Investments are stated at fair value in accordance with Governmental Accounting Standards Board Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools,* (GASB Statement 31). The Department utilizes established quoted market prices for determining the fair value of its debt securities in reserve funds. Fair value of the Department's securitized mortgage loans (GNMA/FNMA) has been established by each bond issues trustee using a pricing service.

The Department has reported all investment securities at fair value as of August 31, 2006 with exception of some short-term money market investments and nonparticipating interest-earning investments contracts which are reported at amortized cost provided that the fair value of these investments is not significantly affected by the impairment of the credit standing of the issuer or by other factors.

Changes in the fair value are reported in the Combined Statement of Revenues, Expenses, and Changes in Net Assets as "Net Increase (Decrease) in the Fair Value of Investments."

Restricted Assets
Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets in the General Fund include federal grants which are restricted by the grantor for specific program purposes established by the State Legislature. The Proprietary Fund includes certain assets pledged to respective bond indentures, the use of which is restricted by those same bond covenants.

Consumable Inventories
Consumable inventories consist of postage on hand at year-end. Inventories for governmental fund types and proprietary fund types are accounted for using the consumption method of accounting. The cost of these items is expensed when the items are consumed.

Capital Assets
Assets with an initial, individual cost of more than $5,000 and an estimated useful life in excess of one year are capitalized. These assets are capitalized at cost or, if donated, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all "exhaustible" assets. Assets are depreciated over the estimated useful life of the asset (5 years for both Furniture & Equipment and Other Capital Assets) using the straight-line method.

All capital assets acquired by proprietary funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated assets are reported at fair value on the donation date. Depreciation is charged to operations over the estimated useful life of each asset using the straight-line method.

Loans and Contracts
Loans and contracts consist of loans in the General Fund made from federal funds for the purpose of Single Family loans and Multifamily development loans from the HOME Program.

Restricted loans and contracts in proprietary funds consist of mortgage loans made from Single Family and Multifamily bond proceeds. Unrestricted loans and contracts consist of Single Family loans and Multifamily development loans from the Housing Trust Fund and other Housing Initiative Programs. Loans receivable are carried at the unpaid principal balance outstanding, net of the allowance for estimated losses. Deferred commitment fees relating to the Single Family, Residential Mortgage Revenue Bonds (RMRB) Series 1987A and certain Multifamily programs are included as a reduction of loans receivable. Interest on loans is credited to income as earned. Loans are generally placed on nonaccrual status when the Department becomes aware that the borrower has entered bankruptcy proceedings or when they are past due 90 days as to either principal or interest or when payment in full of principal and interest is not expected. Deferred commitment fees are recognized using the interest method over the estimated lives of the loans.

Real Estate Owned
Real estate owned are properties acquired through foreclosure that are carried at the unpaid principal balance on the related property plus accrued interest and reimbursable expenses through the date of foreclosure, less any sales proceeds, reimbursements received from mortgage insurers and an allowance for estimated losses on such properties, which approximates the net realizable value of the property at foreclosure.

Loans secured by Single Family properties on which there is an indication that the borrower no longer has the ability to repay the loan and that foreclosure is likely are considered in-substance foreclosures and are classified as real estate owned in the accompanying balance sheet. Interest on real estate owned is credited to income as earned based on a calculation of interest recoverable in accordance with the Department's agreements with its mortgage insurers.

Allowance for Estimated Losses on Loans and Foreclosed Properties
The allowance for estimated losses on loans is calculated for future charge-offs on Single Family and Multifamily loans. The allowance for estimated losses on real estate owned is calculated for future charge-offs on foreclosed Single Family loans.

All losses are charged to the allowance when the loss actually occurs or when a determination is made that a loss is likely to occur. During the year, management estimates the level of future losses to determine whether the allowances for estimated losses are adequate to absorb anticipated losses in the existing loan and real estate owned portfolios. Based on these estimates, a provision for estimated losses on loans and real estate owned is credited to the allowances in order to adjust the allowances to levels estimated to be adequate to absorb reasonably foreseeable losses.

While management uses available information to recognize losses in the loan and real estate owned portfolios, future additions may be necessary based on changes in economic conditions. However, it is the judgment of management that allowances are currently adequate to absorb reasonably foreseeable losses in the existing loan and real estate owned portfolios.

Commitment Fees
Commitment fees received in connection with the origination of loans are deferred and recognized using the interest method over the estimated lives of the related loans and mortgage-backed securities, or if the commitment expires unexercised it is credited to income upon expiration of the commitment.

Deferred Issuance Costs
Deferred issuance costs on bonds are amortized using the interest method over the contractual life of the bonds to which they relate. Prepayments on the bonds result in the proportionate amortization during the current year of the remaining balance of deferred issuance costs.

Discounts and Premiums on Debt
Discounts and premiums on debt are recognized using the interest method over the lives of the bonds to which they relate. Prepayments on the bonds result in the proportionate amortization during the current year of the remaining balance of discounts and premiums on debt.

Liabilities

Accounts Payable
Accounts payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

Other Current Liabilities
Other current liabilities primarily consist of escrow fees and arbitrage rebate liability.

Deferred Revenues
Deferred Revenues in the governmental fund represent a deferral of amounts disbursed from funding agencies for the amount of Loans and Contracts outstanding. These deferred revenues are classified as current liabilities in accordance with GAAP. The deferred revenues in the proprietary fund represent fees such as commitment fees and compliance fees that are deferred upon receipt and amortized over a period of time. It also includes deferred revenues for loans and contracts.

Employees' Compensable Leave Balances
Employees' Compensable Leave Balances represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or noncurrent in the statement of net assets.

Bonds Payable – Revenue Bonds
Revenue bonds are accounted for in the proprietary funds. The bonds payable are reported at par less unamortized discount or plus unamortized premium. Interest expense is reported on the accrual basis, with amortization of discount or premium. Payables are reported separately as either current or noncurrent in the statement of net assets.

Other Non-current Liabilities
Other non-current liabilities primarily account for funds due to Developers as a result of Multifamily bond proceeds. These proceeds are conduit debt issued on behalf of the Developer for the purpose of Multifamily developments and are held by the trustee. Due to the developers' fluctuation in cash flow needs, the current portion cannot be reasonably estimated.

Fund Balance/Net Assets

The difference between fund assets and liabilities is "Net Assets" on the government-wide, proprietary and fiduciary fund statements, and the "Fund Balance" is the difference between fund assets and liabilities on the governmental fund statements.

Reservations of Fund Balance
Fund balances for governmental funds are classified as either reserved or unreserved in the fund financial statements. Reservations are legally restricted to a specific future use or not available for expenditure.

Reserved for Encumbrances
This represents commitments of the value of contracts awarded or assets ordered prior to year-end but not received as of that date. Encumbrances are not included with expenditures or liabilities. They represent current resources designated for specific expenditures in subsequent operating periods.

Reserved for Consumable Inventories
This represents the amount of postage to be used in the next fiscal year.

Reserve for Imprest Accounts
This represents reserves for travel and imprest cash in amounts equal to the assets.

Unreserved/Undesignated
Unreserved represents the unappropriated balance at year-end.

Net Assets
Invested in Capital Assets consists of capital assets including restricted capital assets, net of accumulated depreciation. The Department reports net assets as restricted when constraints placed on net assets are externally imposed by bond covenants and federal grants. Unrestricted Net Assets consist of net assets that do not meet the definition of Invested in Capital Assets or Restricted Net Assets.

Interfund Transactions and Balances

The Department may have the following types of transactions among funds:

1. Transfers - Legally required transfers that are reported when incurred as "Transfers In" by the recipient fund and as "Transfers Out" by the disbursing fund.

2. Legislative Sources/Uses – Budget transfers between agencies within the General Revenue Fund (0001).

3. Quasi-External Transactions - Charges or collections for services rendered by one fund to another that are recorded as revenues of the recipient fund and expenditures or expenses of the disbursing fund.

NOTE 2: CAPITAL ASSETS

A summary of changes in Capital Assets for the year ended August 31, 2006, is presented below:

	PRIMARY GOVERNMMENT			
Governmental Activities:	**Balance 09/01/05**	**Additions**	**Deletions**	**Balance 08/31/06**
Depreciable Assets:				
Furniture and Equipment	$1,659,127	$95,118	($29,943)	$1,724,302
Other Capital Assets	-	130,964	-	130,964
Total Depreciable Assets at Historical Costs	$1,659,127	$226,082	($29,943)	$1,855,266
Less Accumulated Depreciation for:				
Furniture and Equipment	($1,551,009)	($50,092)	$29,943	($1,571,158)
Other Capital Assets	-	(21,293)	-	(21,293)
Total Accumulated Depreciation	(1,551,009)	(71,385)	29,943	(1,592,451)
Governmental Activities Capital Assets, Net:	$108,118	$154,697	-	$262,815

	PRIMARY GOVERNMMENT			
Business-Type Activities:	**Balance 09/01/05**	**Additions**	**Deletions**	**Balance 08/31/06**
Depreciable Assets:				
Furniture and Equipment	$1,388,880	$45,425	($8,752)	$1,425,553
Other Capital Assets	-	132,279	-	132,279
Total Depreciable Assets at Historical Costs	$1,388,880	$177,704	($8,752)	$1,557,832
Less Accumulated Depreciation for:				
Furniture and Equipment	($1,175,647)	($100,212)	$8,752	($1,267,107)
Other Capital Assets	-	(21,507)	-	(21,507)
Total Accumulated Depreciation	(1,175,647)	(121,719)	8,752	(1,288,614)
Business-Type Activities Capital Assets, Net:	$213,233	$55,985	-	$269,218

Depreciation expense of $193,104 was allocated to Administration in the Statement of Activities for both the Governmental and Business-type activities.

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS

The Department is authorized by statute to make investments following the "prudent person rule" and based upon provisions within the master bond indentures and its Investment Policy adopted by the Board in accordance with the Public Funds Investment Act. There were no significant violations of legal provisions during the period.

Deposits of Cash in Bank
As of August 31, 2006, the carrying amount of deposits was $1,918,037.

Governmental Funds Current Assets Cash in Bank	$ 20,000
Proprietary Funds Current Assets Cash in Bank	
Texas Treasury Safekeeping Trust	361,521
Demand Deposits	
Proprietary Funds Current Assets Restricted Cash in Bank	
Texas Treasury Safekeeping Trust	202,689
Demand Deposits	1,333,827
Cash in Bank	$1,918,037

At August 31, 2006, the Department's cash and deposits in the State Treasury amounted to $5,916,919. Of that amount, $5,916,919 was fully collateralized by securities held with a trustee in the State's name, as reported to the Department by the Comptroller of Public Accounts of the State of Texas.

Investments

The types of investments in which the Department may invest are restricted by the provisions of the master bond indentures and the Department's Investment Policy adopted by its Board in accordance with the Public Funds Investment Act. The indentures allow for investments in direct obligations of or guaranteed by the U.S. Government; obligations, debentures, notes or other evidences of indebtedness issued or guaranteed by agencies or intermediaries of the U.S. Government; obligations issued by public agencies or municipalities; obligations and general obligations of or guaranteed by the state; demand deposits, interest-bearing time deposits or certificates of deposit; repurchase agreements in U.S. Government securities; direct or general obligations of any state within the territorial U.S.; investment agreements with any bank or financial institution; commercial paper; and guaranteed investment contracts. Certain trust indentures restrict the Department from investing in certain of the aforementioned investments.

At August 31, 2006, the fair value of investments (including both short-term and long-term) are shown below.

Business Type Activities	Carrying Value	Fair Value
U.S. Treasury Securities	$ 25,921,371	$ 26,128,517
U.S. Government Agency Obligations	910,427,585	887,365,111
Repurchase Agreements (TTSTC)	102,187,013	102,187,013
Fixed Income Money Markets	57,845,249	57,845,249
Misc (Investment Agreements/GICs)	341,800,568	341,800,568
Total	$ 1,438,181,786	$ 1,415,326,458

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS Cont'd

Credit Risk

Credit Risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Preservation and safety of principal is the foremost objective of the investment program. According to the Department's investment policy, investments should be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio. Credit risk is mitigated by

- Limiting investments to the safest types of securities.
- Pre-qualifying the financial institution, broker/dealers, intermediaries, and advisors with which the Department will do business.
- Diversifying the investment portfolio so that potential losses on individual securities will be minimized.

As of August 31, 2006, the Department's credit quality distribution for securities with credit risk exposure was as follows.

Standard & Poor's

Fund Type	GAAP Fund	Investment Type	Not Rated	AAA	AA	A
05	3054	U.S. Government Agency Obligations		$73,172,641		
05	3054	Repurchase Agreements (TTSTC)	$102,187,013			
05	3054	Misc (Investment Agreements/GICs)	$341,800,568			
			Not Rated	AAA-M	AA-M	A-M
05	3054	Fixed Income Money Market		$57,845,249		

A total of $840,320,987 was not subject to credit risk disclosure due to their explicit guarantee by the U.S. Government which is composed of $26,128,517 in U.S. Treasury securities and $814,192,470 in U.S. Government Agency obligations issued by the Government National Mortgage Association.

Concentration of credit risk is the risk of loss attributable to the magnitude of investment in a single issuer. As of August 31, 2006, the Department's concentration of credit risk is as follows.

Fund Type	GAAP Fund	Issuer	Carrying Value	% of Total Portfolio
05	3054	DEPFA Bank	$235,705,002	16.39%
05	3054	USB Warbug	$102,153,570	7.10%

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of any investment. The longer the maturity of an investment will result in greater sensitivity of its fair value to changes in the market interest rates. The Department's investment policy allows for the mitigation of interest rate risk by

- Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities on the open market prior to maturity.
- Investing operating funds primarily in shorter-term securities.

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS Cont'd

Information about the sensitivity of the fair values of the Departments investments to market interest rate fluctuations is provided by the following table that shows the distribution of the Department's investments by maturity:

Remaining Maturity (in months)

Government and Business Type Activities	Fair Value	12 months or less	13 to 24 months	25 to 60 months	More than 60 months
U.S. Treasury Securities	$26,128,517	$24,983,215			$1,145,302
U.S. Government Agency Obligations	887,365,111	10,336,325			877,028,786
Repurchase Agreements (TTSTC)	102,187,013	102,187,013			
Fixed Income Money Markets	57,845,249	57,845,249			
Misc (Investment Agreements/GICs)	341,800,568	55,030,869	257,353,074	154,152	29,262,473
Total	$1,415,326,458	$250,382,671	$257,353,074	$154,152	$907,436,561

Highly Sensitive Investments

Mortgage backed securities. These securities are subject to early payment in a period of declining interest rates. These prepayments result in a reduction of expected total cash flows affecting the fair value of these securities and make the fair value of these securities highly sensitive to the changes in interest rates. The Department does not make it a common practice to sell these investments. Any fluctuation in fair value generates an unrealized gain or loss. As of August 31, 2006, the Department holds $887,365,111 in mortgage backed securities.

NOTE 4: SUMMARY OF LONG TERM LIABILITIES

Changes in Long-Term Liabilities

During the year ended August 31, 2006, the following changes occurred in liabilities.

Governmental Activities	Balance 9/1/05	Additions	Reductions	Balance 8/31/06	Amounts Due Within One Year
Compensable Leave	$ 929,329	724,577	704,677	$ 949,229	$ 724,577
Total Governmental Activities	$ 929,329	724,577	704,677	$ 949,229	$ 724,577

Business-Type Activities	Balance 9/1/05	Additions	Reductions	Balance 8/31/06	Amounts Due Within One Year
Revenue Bonds Payable	$ 2,092,498,974	435,431,044	214,979,461	$ 2,312,950,557	$18,642,000
Commercial Paper Notes	75,000,000	72,191,000	131,993,000	15,198,000	15,198,000
Subtotal	2,167,498,974	507,622,044	346,972,461	2,328,148,557	33,840,000
Compensable Leave	502,391	490,840	381,180	612,051	490,840
Total Business-Type Activities	$ 2,168,001,365	508,112,884	347,353,641	$2,328,760,608	$34,330,840

Employees' Compensable Leave
A state employee is entitled to be paid for all unused vacation time accrued, in the event of the employee's resignation, dismissal or separation from State employment, provided the employee has had continuous employment with the State for six months. Expenditures for accumulated annual leave balances are recognized in the period paid or taken in governmental funds. For these funds, the liability for unpaid benefits is recorded in the Statement of Net Assets. An expense and liability for proprietary fund are recorded in the proprietary funds as the benefits accrue to employees. No liability is recorded for non-vesting accumulating rights to receive sick pay benefits.

Commercial Paper Notes Payable
The Department is authorized to issue the Notes in an aggregate principal amount not to exceed $75,000,000 outstanding. Proceeds of the initial issuance of the Notes and of future issues not issued to refund outstanding Notes will be used to redeem certain of the Department's single-family mortgage revenue bonds (the "Refunded Bonds"), which are subject to redemption as a result of the receipt by the Department of prepayments of the related underlying mortgage loans. Such prepayments may, at a future date, be recycled into new mortgage loans by the Department. On December 31, 2005, the Department was temporarily authorized to increase in the aggregate principal amount of the notes to $200,000,000 from $75,000,000 for the purpose of warehousing new volume cap. The authorization expires December 31, 2006.

Other Non-current Liabilities
Other non-current liabilities totaling $171,844,478 primarily account for funds due to Developers as a result of Multifamily bond proceeds. These proceeds are conduit debt issued on behalf of the Developer for the purpose of Multifamily developments and are held by the trustee. Due to the various variables related to the balance, the current portion cannot be reasonably estimated.

NOTE 5: OPERATING LEASE OBLIGATIONS

As of December 5, 2005, the Department resides in state owned facilities located at 221 E. 11th Street in Austin, Texas. As a result, the Department reports no lease expense for its facility.

NOTE 6: INTERFUND BALANCES / ACTIVITIES

As explained in Note 1 on Interfund Transactions and Balances, there are numerous transactions between funds and agencies. At year-end, amounts to be received or paid are reported as:

- Interfund Receivables or Interfund Payables
- Transfers In or Transfers Out
- Legislative Transfers In or Transfers Out

The Department experienced routine transfers with other state agencies, which were consistent with the activities of the fund making the transfer. Repayment of interfund balances will occur within one year from the date of the financial statements.

Individual balances and activity at August 31, 2006, follows:

Fund	Current Interfund Receivable	Current Interfund Payable
General Fund (01)		
General Revenue (0001)	$ 2,042	-
Consolidated Federal (0127)	33,842	-
Enterprise Fund (05, 0896)	-	$ 35,884
Total Interfund Receivable/ Payable (Exhibit I & Exhibit III)	$ 35,884	$ 35,884

The Department has no Non-Current Interfund Receivables/Interfund Payables.

Fund	Transfers In	Transfers Out	Purpose
General Fund (01)			
Appd Fund 0001, D23 Fund 0001	$	$ 9,805,755	Article VII-7, Rider 19*
Appd Fund 0001, D23 Fund 0001		17,560	Article IX, § 11.04
Appd Fund 0001, D23 Fund 0066		2,290,781	Article VII-7, Rider 19*
Appd Fund 0001, D23 Fund 0066		40,104	Gov't Code § 403.071
Appd Fund 0001, D23 Fund 0077		135,818	Gov't Code § 403.071
Appd Fund 0001, D23 Fund 0088		343,280	Article IX, § 6.01(a)
Total Transfers for Fund 0001 (Exhibit II & IV)		**$ 12,633,298**	
Enterprise Fund (05)			
Appd Fund 0896, D23 Fund 0896	10,804,746		Article VII-7, Rider 19*
Appd Fund 3054, D23 Fund 0999	1,291,790		Article VII-7, Rider 19*
Total Transfers for Fund 0896 (Exhibit II & VI)	**$ 12,096,536**	$	
Total Transfers	**$ 12,096,536**	**$ 12,633,298**	

* In fiscal year 2006, the Department transferred $12,096,536 from the Governmental Fund to the Texas Treasury Safekeeping Trust Company established by Government Code 2306. In accordance with the requirements established by the 79th Legislature, SB 1, Article VII-7, Rider 19, the transfer was made to create a central repository for Housing Trust Fund activities.

NOTE 6: INTERFUND BALANCES / ACTIVITIES Cont'd

Fund	Legislative Transfers In		Legislative Transfers Out	
General Fund (01)				
Appd Fund 0001, D23 Fund 0001	$	1,465,591		
Appd Fund 0001, D23 Fund 0066		(1,156,139)		
Appd Fund 0001, D23 Fund 0088		(273,000)	$	(639,821)
Total Legislative Transfers (Exh II)	$	**36,452**	$	**(639,821)**

NOTE 7: CONTINGENT LIABILITIES

The Department is a defendant in legal actions arising from transactions and activities conducted in the ordinary course of business. Management, after consultation with legal counsel, believes that the aggregate liabilities, if any, will not be material to the basic financial statements.

NOTE 8: CONTINUANCE SUBJECT TO REVIEW

Under the Texas Sunset Act, the Department will be abolished effective September 1, 2011 unless continued in existence as provided by the Act. If abolished, the Department may continue until September 1, 2012 to close out its operations.

NOTE 9: RISK FINANCING AND RELATED INSURANCE

The Department is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. It is the Department's policy to periodically assess the proper combination of commercial insurance and retention of risk to cover losses to which it may be exposed. The Department assumes substantially all risks associated with the performance of its duties. Currently there is no purchase of commercial insurance, nor is the Department involved in any risk pools with other government entities. The Department carries Public Official Liabilities Insurance coverage in the amount of $10,000,000; automobile liability insurance in the amount of $500,000, errors and omissions insurance of $300,000 related to loan servicing for others and a $350,000 Public Employee Fidelity Bond.

The Department's liabilities are reported when it is both probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Liabilities are reevaluated periodically to consider current settlements, frequency of claims, past experience and economic factors. There have been no significant reductions in insurance coverage in the past year and losses did not exceed funding arrangements during the past three years. The Department incurred no claims liability during fiscal years 2005 and 2006.

NOTE 10: SEGMENT INFORMATION FOR ENTERPRISE FUND

The Segment information below is for the Department's direct debt associated with the issuance of Single Family bonds only and does not include the Multifamily bonds where the Department is only a conduit issuer. Therefore, this note represents less than what is reported in the Enterprise Fund as a whole. Each grouping consists of separate indentures that have one or more bonds outstanding with the revenue stream and assets exclusively pledged in support of that debt. Each indenture imposes the requirement of separate accounting of the revenues, expenses, gains, losses, assets, and liabilities.

Ending Cash and Cash Equivalents	$ 61,136,071	$ 4,413,284	$ 586,610	$ 8,002	$ 88

NOTE 11: BONDED INDEBTEDNESS

The Department has 112 bond issues outstanding at August 31, 2006. All series are revenue bonds backed by the pledged revenue sources and restricted funds specified in the bond resolutions. Each series is designed to be self-supporting with no repayment nor obligation from the State's General Revenue. The Department issues bonds to assist in financing the purchase of homes by or the construction of rental housing for families with very low to moderate incomes. Loan payments provide the revenues for debt service payments. (Detailed supplementary bond information is disclosed in Schedules 1-A, 1-B, 1-C, 1-D, 1-E and 1-F.)

Proceeds from the issuance of bonds under the Single Family and Residential Mortgage Revenue Bonds (RMRB) Series 1987A Programs were used to acquire loans. Proceeds from Collateralized Home Mortgage Revenue Bond (CHMRB) and the remaining RMRB programs were used to acquire pass-through certificates backed by mortgage loans. Proceeds from the remaining Multifamily bond issues were used to finance mortgage loans.

Interest on bonds and collateralized mortgage obligations is payable periodically, except for capital appreciation bonds, on which interest is compounded semiannually and payable at maturity or upon redemption.

The Single Family, RMRB and CHMRB bonds are collateralized by the revenues and assets pledged under the trust indentures, primarily Single Family mortgage loans, mortgage-backed securities and investments. The Multifamily bonds are collateralized by varying methods, including, but not limited to, the mortgage loans on the applicable housing developments, certificates of deposit, letters of credit, guarantees provided by third parties and collateralized mortgage obligations issued by federally chartered, privately owned corporations.

The trust indentures contain positive and negative covenants. Events of default include the following: failure to make timely payment of both principal and interest on any outstanding bond; failure to make timely payment of any other monies required to be paid to the Trustee; and non-performance or non-observance of any other covenants, agreements or conditions contained in the indentures. Management believes they are in compliance with the covenants of the indentures.

Deferred issuance costs at August 31, 2006, consist of the following:

	Amount
Deferred Issuance Costs at August 31, 2006	$ 37,310,370
Less Accumulated Amortization	(26,017,755)
Deferred Issuance Costs, net	$ 11,292,615

VARIABLE TO FIXED INTEREST RATE SWAP OBJECTIVE

In order to hedge against increases in interest rates on variable rate demand bond issues, the Department has entered into three interest rate swap agreements with the objective of reducing the interest rate risk of certain variable rate demand bonds. The variable rate demand bonds were issued at a lower total interest cost than attainable through traditional fixed rate bond structures. The Department has entered into interest rate swap agreements with various rated counterparties. Under the terms of the agreements, the Department makes periodic fixed interest rate payments in exchange for receiving variable rate payments comparable to the rates payable on the variable rate demand bonds. The swap notional amounts amortize in accordance with the scheduled and/or anticipated reductions in the related variable rate demand bond liability. The Department is potentially exposed to loss in the event of nonperformance by the counterparties under the swap agreements. Termination of the swap agreements may result in the Department making or receiving termination payments. Each swap agreement includes optional early termination provisions granting the Department the right, but not an obligation, to terminate the interest rate swaps at par without a termination payment after an effective date.

NOTE 11: BONDED INDEBTEDNESS Cont'd

TERMS AND FAIR VALUE

The terms, including the fair value of the outstanding swaps as of August 31, 2006 are as follows. The fair value of the swaps are not shown in the financial statements. The notional amounts of the swaps match the principal amount of the associated debt.

Counterparty	Notional Amount	Fair Value	Effective Date	Fixed Rate	Variable Rate	Swap Termination Date
UBS AG	$53,000,000	$(341,966)	9/1/04	3.843 %	63% of LIBOR + .30%	9/1/34 (a)
Goldman Sachs	35,000,000	(58,177)	1/1/05	3.6125 %	Lesser of (the greater of 65% of LIBOR and 56% of LIBOR + .45%) and LIBOR	3/1/35 (b)
Bear Stearns	100,000,000	(1,581,395)	8/1/05	3.99 %	Less of (the greater of 65% of LIBOR and 56% of LIBOR + .45%) and LIBOR	9/1/36 (c)
Total	$188,000,000	$(1,981,538)				

a. The swap agreement is subject to optional early termination, at par value, starting on March 1, 2015 and semiannually thereafter. The maximum notional amount subject to early termination equals 60% of the current notional amount.

b. The swap agreement is subject to optional early termination, at par value, starting on September 1, 2014 and semiannually thereafter. The maximum notional amount subject to early termination equals 60% of the applicable notional amount through September 1, 2023 and 100% of the applicable notional amount thereafter.

c. The swap agreement is subject to optional early termination, at par value, from prepayments at any time with a ten business day notice.

CREDIT RISK

As of August 31, 2006, the Department is not exposed to credit risk on any of its outstanding swaps because the swaps have negative fair values. If interest rates change and the fair value of the swaps become positive, the department would be exposed to credit risk on those swaps. The swap agreements contain varying collateral agreements and insurance policies with the counterparties. The credit ratings for the counterparties are as follows.

Counterparty	Standard & Poor's	Moody's	Fitch
UBS AG	AA+	Aa2	AA+
Goldman Sachs Capital Markets, LP	Not Rated	Aa3	AA-
Bear Stearns Financial Products, Inc.	AAA	Not Rated	Not Rated

BASIS RISK

The Department's variable-rate bond coupon payments are equivalent to the Bond Market Association Municipal Swap Index (BMA) rate. The swap agreements designate a function of London Inter-Bank Offered Rate (LIBOR) as the rate for payments received on these swaps. The Department will be exposed to basis risk should LIBOR and BMA converge. The swap agreements provide an option to terminate as stated above.

ROLLOVER RISK

The Department is exposed to rollover risk on swap agreements which mature or may be terminated prior to the maturity of the associated debt. The following debt is exposed to rollover risk if the option for early termination is executed:

Associated Debt Issuance	Debt Maturity Date	Swap Termination Date
2004B Single Family	September 2034	May be terminated as early as March 2014
2004D Single Family	March 2035	May be terminated as early as September 2014
2005A Single Family	September 2036	May be terminated at anytime giving 10 day notice

NOTE 11: BONDED INDEBTEDNESS Cont'd

SWAP PAYMENTS AND ASSOCIATED DEBT

Using rates as of August 31, 2006, debt service requirements of the Department's outstanding variable-rate debt and net swap payments are as follows. As rates vary, variable-rate debt bond interest payments and new swap payments will vary. The Department's swap agreements contain scheduled reductions to outstanding notional amounts that are expected to follow scheduled reductions in the associated bonds outstanding.

Fiscal Year Ending August 31	Variable-Rate Bonds Principal	Interest	Interest Rate Swaps, Net	Total
2007	$ 885,000	$ 4,579,948	$ 2,512,348	$ 7,977,296
2008	1,820,000	4,545,905	2,491,508	8,857,413

Current Refunding

On December 15, 2005, the Department issued Series 2005 B, C & D Residential Mortgage Revenue Bonds. Series 2005 B and 2005 C were issued for the primary purpose of refunding and redeeming the Single Family Mortgage Revenue Bonds Series 1995A and 1995C. This refunding transaction resulted in a deferred loss of $798,680, which will be amortized for recognition purposes over the life of the new debt per GASB Statement 23. During the current period, $145,001 of the deferral amount has been recognized as period bond interest expense within the Revenue Bond Enterprise Fund. This transaction also gave rise to an $8,477,117 economic gain.

Advance Refunding Bonds

On 6/28/06, the Department issued the 2006 Single Family Revenue Bonds (Series ABCDE) in the amount of $228,830,000. The proceeds for Series D ($29,685,000) and Series E ($17,295,000) with average rates of 4.50% and 4.06%, respectively, were used to advance refund outstanding bonds. The Series D bond proceeds refunded the 1996A Single Family Revenue Bonds ($5,765,000) and the 1996D Single Family Revenue Bonds ($23,920,000) with average rates of 6.3% and 6.25%, respectively. The Series E bond proceeds refunded the 1996E Single Family Revenue Bonds ($17,295,000) with an average rate of 6.15%. The bond proceeds were used to purchase U.S. Government Securities. The securities were deposited with an escrow agent to provide for all future debt service on the 1996 bonds. As a result, the 1996 bonds are considered to be defeased and the liability for those bonds has been removed from the Department's financial statements.

The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of $546,869. Since the old debt will be redeemed on 9/1/06, the entire difference will be amortized this fiscal year increasing interest expense. The Department advance refunded the 1996 Single Family Revenue Bonds Series ADE to reduce its total debt service payments over the next 30 years by $16,009,337 and to obtain an economic gain of $11,711,590.

NOTE 12: SUBSEQUENT EVENTS

On September 14, 2006, the Department issued $5,015,000 in multifamily revenue bonds (Red Hills Villas) made up as follows:

$ 5,015,000 MF 2006 Series A

On September 14, 2006, the Department issued $5,125,000 in multifamily revenue bonds (Champion's Crossing Apartments) made up as follows:

$ 5,125,000 MF 2006 Series A

On September 15, 2006, the Department issued $11,300,000 in multifamily revenue bonds (Stonehaven Apartment Homes) made up as follows:

$ 11,300,000 MF 2006 Series A

On September 19, 2006, the Department issued $8,325,000 in multifamily revenue bonds (Center Ridge Apartments) made up as follows:

$ 8,325,000 MF 2006 Series A

On September 26, 2006, the Department issued $13,500,000 in multifamily revenue bonds (Meadowlands Apartments) made up as follows:

$ 13,500,000 MF 2006 Series A

On October 24, 2006, the Department issued $13,500,000 in multifamily revenue bonds (East Tex Pines Apartments) made up as follows:

$ 13,500,000 MF 2006 Series A

On November 8, 2006, the Department issued $7,200,000 in multifamily revenue bonds (Villas @ Henderson Apartments) made up as follows:

$ 7,200,000 MF 2006 Series A

On November 9, 2006, the Department issued $9,800,000 in multifamily revenue bonds (Aspen Park Apartments) made up as follows:

$ 9,800,000 MF 2006 Series A

On November 22, 2006, the Department issued $14,250,000 in multifamily revenue bonds (Idlewilde Apartments) made up as follows:

$ 14,250,000 MF 2006 Series A

The multifamily bonds are issued for the primary purpose to finance the acquisition, construction and equipping of multifamily residential rental developments. Red Hills Villas will be located in Round Rock, Texas. Champion's Crossing Apartments will be located in San Marcos, Texas. Stonehaven Apartments and Meadowlands Apartments will be located in Houston, Texas. Center Ridge Apartments will be located in Duncanville, Texas. Villas @ Henderson Apartments will be located in Cleburne, Texas. East Tex Pines, Aspen Park, and Idlewilde Apartments will be located in Houston, Texas.

On November 15, 2006, the Department issued $132,195,000 in single family revenue bonds made up as follows:

NOTE 12: SUBSEQUENT EVENTS Cont'd

$81,195,000	SF 2006 Series F (AMT)
$15,000,000	SF 2006 Series G (AMT)
$36,000,000	SF 2006 Series H (AMT)

The Series 2006 F (AMT) and Series H (AMT) bonds are being issued for the primary purpose of providing funds for the purchase of mortgage-backed, pass-through certificates (the "2006 F/G/H Mortgage Certificates") guaranteed as to timely payment of principal and interest by either Government National Mortgage Association ("Ginnie Mae"), Freddie Mac or Fannie Mae which represent beneficial ownership of pools of Mortgage Loans (the "2006 Mortgage Loans"). The Series G (AMT) bonds are being issued for the primary purpose of refunding the Department's outstanding Single Family Mortgage Revenue Refunding Tax-Exempt Commercial Paper Notes, Series A, thereby providing funds for the purchase of 2006 F/G/H Mortgage Certificates. In connection with the issuance of the Series H (AMT) bonds, the Department will enter into an interest rate swap agreement (the "Swap Agreement") with the UBS AG (the "Swap Provider"), which will become effective upon the delivery of the Series H (AMT) bonds. Pursuant to the swap agreement payments will begin accruing on the date of delivery of the bonds and payments will be made semiannually beginning March 1, 2007. The swap provider will agree to pay to the Department on such date, payments computed based on a variable rate of 63% of LIBOR plus .30% intended to approximate the variable interest rate on the Series H (AMT) bonds, on a notional amount corresponding to the outstanding principal amount of the Series H (AMT) bonds, provided that the variable rate payments to the Department may not equal the variable interest payable on the Series H (AMT) bonds.

TOTAL MULTIFAMILY BONDS	$ 1,175,365					
TOTAL BONDS ISSUED	**$ 3,143,908**					

FOOTNOTES:

(a) The taxable bonds shall be subject to redemption prior to maturity in whole or any part on any interest payment date after the completion date from the proceeds of an optional prepayment of the loan by the borrower.

(b) Variable rate not to exceed the maximum rate permitted by applicable law.

(c) Variable rate could change to fixed rate provided the conversion option is exercised.

(d) Variable rate series and fixed rate series-variable rate could change to fixed rate provided the conversion option is exercised.

(e) No set amortization, per trustee, amortization will occur in $100,000 denominations when the amount in the principal reserve fund exceeds 20% of the issue.

(f) The bonds are subject to redemption, in whole, at the option of the Issuer acting at the direction of the Holders of a majority of the outstanding principal amount of the Bonds.

(g) The Bonds shall be subject to redemption prior to maturity, after giving the required notice, as follows: During the variable interest rate period the bonds shall be subject to optional redemption by the Department, in whole or in part on any business day, at a redemption price equal to 100% of the principal amount thereof to be redeemed plus accrued interest, if any, to the redemption date.

(h) The Series bonds are subject to redemption prior to maturity, after giving notice as provided in the Trust Indendure, as follows: During a daily interest rate period or weekly interest rate period for the Series bonds, the bonds shall be subject to optional redemption by the Department, in whole or in part on any business day, at a redemption price equal to 100% of the principal amount thereof to be redeemed plus accrued interest, if any, to the redemption date.

(i) The bonds are subject to redemption at the option of the Issuer, at the direction of the Borrower, in whole or in part on the first day of any month, in the event and to the extent the trustee receives funds from the Borrower representing an optional prepayment of the principal of the note, at a redemption price equal to the principal thereof, plus accrued interest to the redemption date plus any premium remitted therewith as required by the note.

(j) Bonds are subject to redemption if and to the extent the Borrower is entitled to make, or is required to make, a prepayment pursuant to the loan agreement.

(k) The Bonds are subject to optional redemption in whole or in part upon optional prepayment of the Loan by the Borrower as permitted by theloan documents.

(l) The Bonds are subject to optional redemption at the direction of the Borrower on any interest payment date, in whole or in part, at the redemption price (as calculated by the sole bondholder) calculated in accordance with the Exhibit H plus accrued and unpaid interest, if any, to the redemption date. Optional redemptions may be made only in denominations of $100,000 plus integral multiples of $5,000 or for the entire amount of the bonds outstanding.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED UPON THE AUDIT PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Honorable Rick Perry, Governor,
and the Board of Directors of
Texas Department of Housing and Community Affairs:

We have audited the basic financial statements of the Texas Department of Housing and Community Affairs (the "Department") as of and for the year ended August 31, 2006, and have issued our report thereon dated December 19, 2006. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Department's internal control over financial reporting in order to determine our procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the specific internal control components does not reduce to a relatively low level the risk that errors or misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving internal control over financial reporting and its operation that we consider to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Department's basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, including the Public Funds Investment Act (§2256, Texas Government Code), regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of the Board of Directors, management, and federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

Rick Perry
GOVERNOR

Michael Gerber
EXECUTIVE DIRECTOR

December 19, 2007

The Honorable Rick Perry, Governor
The Honorable Susan Combs, Texas Comptroller
Mr. John O'Brien, Director, Legislative Budget Board
Mr. John Keel, CPA, State Auditor

Dear Governor Perry, Comptroller Combs, Mr. O'Brien and Mr. Keel:

We are pleased to submit the Annual Financial Report of the Texas Department of Housing and Community Affairs for the year ended August 31, 2007, in compliance with TEX. GOV'T CODE ANN §2101.011 and in accordance with the requirements established by the Comptroller of Public Accounts.

The accompanying annual financial report has been prepared in accordance with Generally Accepted Accounting Principles (GAAP) reporting requirements. The financial report has been audited by an independent Auditor as required by statute.

If you have any questions, please contact David Cervantes, Director of Financial Administration at (512) 475-3875. Esther Ku may be contacted at (512) 475-3871 for questions related to the Schedule of Expenditures of Federal Awards.

Sincerely,

Michael Gerber
Executive Director

INDEPENDENT AUDITORS' REPORT

To the Honorable Rick Perry, Governor,
and the Governing Board of
Texas Department of Housing and Community Affairs:

We have audited the accompanying financial statements of the governmental activities, business-type activities, major funds, remaining fund information, and supplementary schedules 1-A through 1-F of the Texas Department of Housing and Community Affairs (the "Department") as of and for the year ended August 31, 2007, as listed in the table of contents. These financial statements and supplementary schedules 1-A through 1-F are the responsibility of the Department's management. Our responsibility is to express an opinion on these financial statements and supplementary schedules based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 1, the financial statements of the Department are intended to present the financial position and the changes in financial position and, where applicable, cash flows of only that portion of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the State that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of Texas as of August 31, 2007, the changes in its financial position, or, where applicable, its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities, business-type activities, major funds, and remaining fund information of the Department, as of August 31, 2007, and the results of its operations and, where applicable, cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, schedules 1-A through 1-F, as listed in the table of contents, present fairly, in all material respects, the information set forth therein in accordance with guidelines issued by the Texas Comptroller of Public Accounts.

Management's Discussion and Analysis, as listed in the table of contents, is not a required part of the financial statements but is supplementary information required by the Governmental Accounting

Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 19, 2007, on our consideration of the Department's internal control over financial reporting and our tests of its compliance and other matters. The purpose of that report is to describe the scope of our testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

MANAGEMENT’S DISCUSSION

AND ANALYSIS (UNAUDITED)

TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS
MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

This section of the Texas Department of Housing and Community Affairs' (Department) annual financial report presents management's discussion and analysis of the Department's financial performance during the fiscal year that ended on August 31, 2007. Please read it in conjunction with the Department's financial statements, which follow this section.

Financial Highlights

- The Department's business-type activity net assets decreased $9.2 million and governmental activities net assets increased $84 thousand.

- The Department's proprietary fund experienced an increase in operating income in the amount of $25.9 million to an Operating (Loss) of ($12.3) million. This impact on operating income resulted primarily from the increase of the fair value of investments in the amount of $26.1 million. The $20.0 million increase in interest and investment income, the $2.4 million increase in other operating revenues, the $14.3 million increase in interest expense, the $2.2 million increase in bad debt expense and the $6.7 million increase in Down Payment Assistance had a net offsetting effect on operating income.

- Net Assets in the Department's Governmental Fund increased from $686 thousand to $770 thousand. The change represents larger decrease in expenditures than in revenues. Net Assets were also reduced by the transfer out of Housing Trust Fund and Earned Federal Funds during the fiscal year.

- The Department's proprietary fund debt increased $267.7 million to $2.6 billion. Debt issuances and debt retirements totaled $468.5 million and $200.8 million, respectively.

- Loan originations for the year totaled $200.6 million and $15.0 million in the Department's proprietary and governmental funds, respectively.

- Subprime lending continues to receive significant attention in the financial market. A rise in the number of borrowers who are unable to pay debt obligations has led to increased foreclosures causing uncertainty in the housing market. According to Standard and Poor's, Housing Finance Agencies (HFAs) face lower risk from defaults on their loans. Homebuyer education programs, conservative underwriting, generous reserves and ongoing HFA asset management have resulted in strong portfolio performance which is expected to continue for the long-term. Since 1988, the Department has had its single family mortgage loans guaranteed by Fannie Mae, GNMA or Freddie Mac.

Overview of the Financial Statements

The financial statements consist of three parts – management's discussion and analysis (this section), the basic financial statements, and supplementary information. The basic financial statements include two types of statements that present different views of the Department.

- The first set of statements are government-wide financial statements that provide information about the Department's overall financial position and results. These statements, which are presented on an accrual basis, consist of the Statement of Net Assets and the Statement of Activities.

- The remaining statements are fund financial statements of the Department's governmental fund and proprietary fund. The governmental fund's activities are funded primarily from Federal funds but also include General Revenue appropriations for which the Department follows a modified accrual basis of accounting. The Department's proprietary fund operates similar to business activities and follows an accrual basis of accounting.

- The basic financial statements also include a "Notes to Financial Statement" section which explains some of the information presented in the Government-wide and fund financial statements and provides additional detailed data.

- The Notes to the Financial Statements are followed by a "Supplementary Information" section, which presents supplementary bond information.

The remainder of this overview section of the management's discussion and analysis explains the structure and contents of each of these statements.

Government-Wide Financial Statements

The Statement of Net Assets shows Governmental Activities and Business-type Activities consolidated on a full accrual basis. The Statement of Activities presents a government wide format of expenses, charges for services, operating grants and contributions and net expenses by both Governmental activities and Business-type activities. Both activities are further broken down by function and programs. The second section of the Statement of Activities shows general revenues not associated with a particular program but which provide resources for the Department's programs and operations. The fiduciary activity is not included in the government wide statements.

Statements of Net Assets

The following tables show a summary of changes from prior year amounts for governmental activities.

Texas Department of Housing and Community Affairs
Condensed Statement of Net Assets – Governmental Activities
As of August 31, 2007

	Governmental Activities		Increase / (Decrease)	
Assets	2007	2006	Amount	%
Cash & Investments	$ 6,696,555	$ 5,005,004	$ 1,691,551	33.8
Legislative Appropriations	2,880,562	1,305,355	1,575,207	120.7
Federal Receivable	399,825	7,862,358	(7,462,533)	(94.9)
Other Intergovernmental Receivables	65,593	160,161	(94,568)	(59.0)
Accounts Receivable	353,456	379,473	(26,017)	(6.9)
Interfund Receivables	-	35,884	(35,884)	(100.0)
Loans and Contracts	116,647,963	101,570,577	15,077,386	14.8
Capital Assets	210,927	262,815	(51,888)	(19.7)
Other Assets	81,021	94,553	(13,532)	(14.3)
Total Assets	127,335,902	116,676,180	10,659,722	9.1
Liabilities				
Accounts Payable	7,230,317	12,583,233	(5,352,916)	(42.5)
Payroll Payable	971,482	887,210	84,272	9.5
Claims & Judgments Payable	109,334	-	109,334	100.0
Interfund Payable	577,403	-	577,402	100.0
Deferred Revenue	116,647,963	101,570,577	15,077,386	14.8
Other Current Liabilities	770,582	724,577	46,005	6.3
Other Non-current Liabilities	258,622	224,652	33,971	15.1
Total Liabilities	126,565,703	115,990,249	10,575,454	9.1
Net Assets				
Invested in Capital Assets	210,927	262,815	(51,888)	(19,7)
Restricted by Grantor	136,181	374,890	(238,709)	(63.7)
Unrestricted	423,091	48,226	374,865	777.3
Total Net Assets	$ 770,199	$ 685,931	$ 84,268	12.3

Net Assets of the Department's governmental fund increased by 12.3%. The ending balance of Unrestricted Net Assets primarily consists of balances in the Manufactured Housing Division. Restricted Net Assets represent balances in the Investor Owned Utility Programs.

The balance in Cash and Investments increased by $1.7 million. The net change is associated with an increase of $2 million in the Section 8 program and a $300,000 decrease in Manufactured Housing. The Section 8 balance resulted from installments received from the U.S. Department of Housing and Urban Development that were not fully utilized, resulting in a cash balance at year end. The drop in Manufactured Housing occurred due to an effort to reduce cash balances associated with Federal funds.

Legislative Appropriations increased by $1.6 million. The increase resulted primarily from activities in Manufactured Housing where Federal Funds were used first to fund program activities in this fiscal year. In addition, revenues collected in excess of budget authority were not transferred to the Comptroller's Office until after year end.

The Department experienced a decrease in Federal Receivable and Accounts Payable. The changes occurred primarily because of the substantial payment activities for the Low Income Home Energy Assistance Program (LIHEAP) and HOME Investment Partnerships Program (HOME) at year end of fiscal year 2006. Federal Receivable was also decreased due to an unspent Cash balance in the Section 8 Program at year end.

The Department experienced increases of Loans and Contracts as well as Deferred Revenue. This change was due to the receipt, disbursement and adjustment of the portfolio, which is funded by federal funds for the purpose of HOME program activities.

Included in Other Liabilities is the current and non-current portion of Employees' Compensable Leave. It represents unpaid balances of employees' accumulated annual leave.

Business-Type Activities

Texas Department of Housing and Community Affairs
Business-Type Activities – Condensed Statement of Net Assets as of August 31, 2007

	Business-Type Activities		Increase / (Decrease)	
Assets	2007	2006	Amount	%
Cash & Investments	$ 1,630,392,649	$ 1,418,156,810	$ 212,235,839	15.0
Loans and Contracts	1,285,810,608	1,183,252,271	102,558,337	8.7
Interest Receivable	20,078,776	18,674,249	1,404,527	7.5
Capital Assets	206,714	269,218	(62,504)	(23.2)
Real Estate Owned	295,124	243,372	51,752	21.3
Deferred Issuance Cost	11,655,758	11,292,615	363,143	3.2
Other Assets	1,661,912	1,257,013	404,899	32.2
Total Assets	2,950,101,541	2,633,145,548	316,955,993	12.0
Liabilities				
Current				
Interest Payable	40,093,199	32,977,121	7,116,078	21.6
Deferred Revenue	35,104,327	27,983,948	7,120,379	25.4
Other Liabilities	33,677,908	42,959,693	(9,281,785)	(21.6)
Non-current				
Bonds/Notes Payable	2,591,530,011	2,294,308,557	297,221,454	13.0
Other Non-current Liabilities	195,989,745	171,965,689	24,024,056	14.0
Total Liabilities	2,896,395,190	2,570,195,008	326,200,182	12.7
Net Assets				
Invested in Capital Assets	191,765	269,218	(77,453)	(28.8)
Restricted	11,349,639	23,720,348	(12,370,709)	(52.2)
Unrestricted	42,164,947	38,960,974	3,203,973	8.2
Total Net Assets	$ 53,706,351	$ 62,950,540	$ (9,244,189)	(14.7)

Net assets of the Department's proprietary fund decreased $9.2 million, or 14.7%, to $53.7 million. A decline in the Department's fair value of its investments contributed to this decrease in net assets and bad debt expense related to the recognition of an allowance for uncollectible debt related to Housing Trust Fund in the amount of $1.9 million. This decline resulted in an unrealized (loss) of ($7.3) million, up $26.1 million from an unrealized (loss) of ($33.4) million.

Restricted net assets of the Department's proprietary fund decreased $12.4 million or 52.2%. Unrestricted net assets increased $3.2 million or 8.2%.

Cash and investments increased $212.2 million, or 15.0%, to $1.6 billion, as funds were generated from debt issuances, reinvestment of loan repayments, and interest earnings. Program loans receivable (current and non-current) increased $102.6 million, or 8.7%, to $1.3 billion, primarily as a result from the origination of $193.3 million and $87.9 million in payoffs of mortgage loans under the Department's Multifamily Program. Total bonds and notes payable (current and non-current) increased $297.2 million, or 13.0%, due to new debt issuances associated with the Department's Single Family and Multifamily Programs.

Earnings within the Department's various funds were $148 million of which $133.3 million is classified as restricted and $14.7 million as unrestricted.

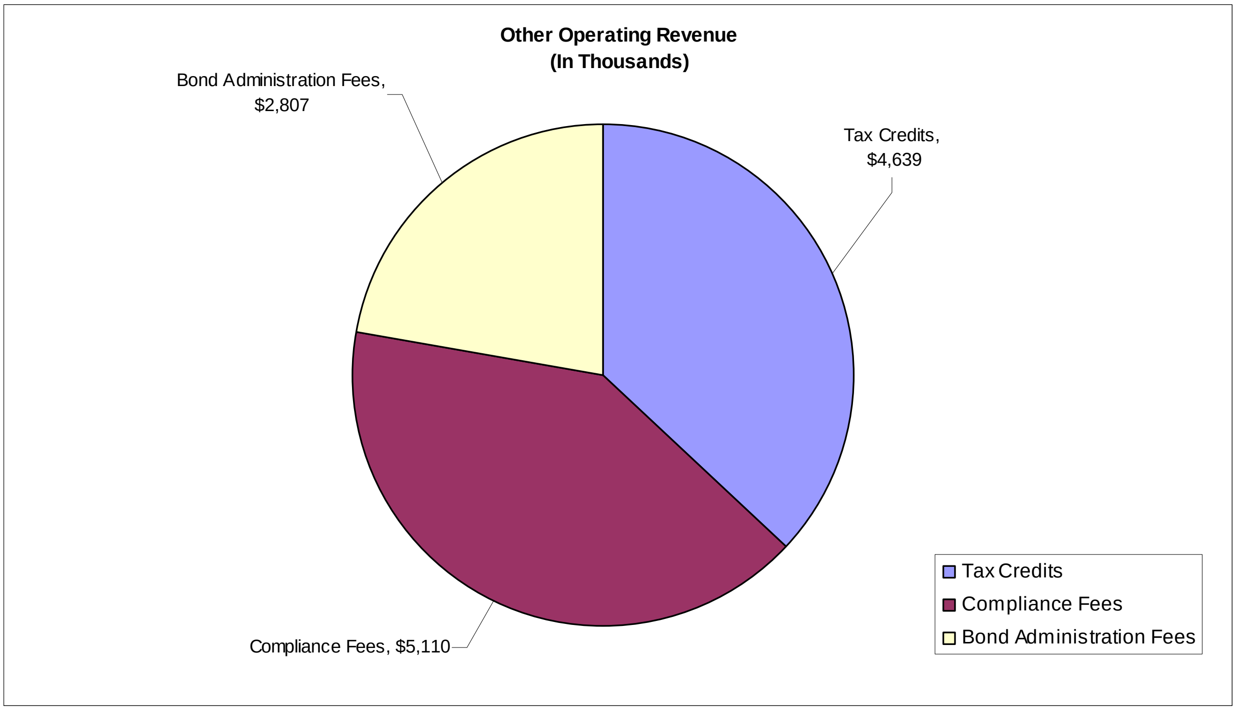
Restricted earnings are composed of $139.2 million in interest and investment income, ($7.3) million in fair value of investments, and $1.4 million in other revenue. Interest and investment income are restricted per bond covenants for debt service. Fair value of investments is an unrealized (loss) due to the fact that the Department holds investments until maturity. Other revenue is predominantly an accounting recognition of fees received in previous years that were deferred when received and are being amortized over a period of time.

Unrestricted earnings are composed of $2.1 million in interest and investment income and $12.6 million in other operating revenue.

Interest and investment income earned from unrestricted investments are used to support various housing initiatives programs such as Housing Trust Fund and the Bootstrap Program. Sources for other operating revenue are fees from the Tax Credit Program, compliance fees, bond administrative fees, and miscellaneous interest earned from funds held by the Comptroller.

Fees earned under the Tax Credit Program are application fees, commitment fees, and inspection fees. Yearly compliance fees are generated from the Department's portfolio of multifamily properties. The Department performs on site visits and desk reviews to ensure that the properties are in compliance with the various housing regulations. Bond administrative fees are generated yearly from the various bond issuances to support the Department's administrative expenses.

The graph below illustrates the composition of the $12.6 million in other operating revenue, classified as unrestricted earnings, according to the different housing programs.



Statement of Activities

The Statement of Activities reflects the sources of the Department's changes in net assets as they arise through its various programs and functions. Single Family, Multifamily and Housing Trust Fund are shown as business-type activities, and six major programs are shown as governmental activities. Federal and state assistance activities allocate various subsidy funds to local governments, nonprofit organizations or individuals.

A condensed Statement of Activities for the fiscal year ended August 31, 2007 and 2006 is shown in the table below.

Texas Department of Housing and Community Affairs
Condensed Statement of Activities
(In Thousands)

	Governmental Activities		Business-Type Activities		Total	
	2007	2006	2007	2006	2007	2006

Change in Net Assets	84	(7,912)	(9,245)	(26,066)	(9,161)	(33,978)
Beginning Net Assets	686	8,598	62,951	89,017	63,637	97,615
Ending Net Assets	$ 770	$ 686	$ 53,706	62,951	$ 54,476	63,637

Governmental Activities
Revenues of the Department's Governmental Activities were primarily from Operating Grants and Contributions. The majority of the revenues were from the U.S. Department of Housing and Urban Development (HUD) and the U.S. Department of Health and Human Services. General Revenues are revenues appropriated to the Department in accordance with legislative acts and regulations.

Total revenue decreased $0.9 million. This decrease consisted primarily of decreases of $2.4 million in Operating Grants and Contributions, increase of Charges for Services of $0.1 million and increase of General Revenues of $1.4 million. The decrease of Operating Grants and Contributions is a result of increased federal activities in the LIHEAP Program and decreased activity in the HOME Program. The increase of General Revenues is due to an increased balance in Earned Federal Fund.

Expenses of the Department's Governmental Activities consisted primarily of Intergovernmental Payments and Public Assistance Payments. The Department distributes program funds to local providers, including local governments, nonprofit and for-profit organizations, community based organizations and real estate developers. The net impact to expenses is primarily due to decreased activities in the HOME and Community Services Block Grant (CSBG) Programs and increased activity in the LIHEAP Program.

Transfers consisted primarily of the transferring out of Housing Trust Fund (HTF) from Governmental Activities to Business-Type Activities according to TDHCA rider 19 in the 2006-2007 General Appropriations Act. All of the current and prior year balances were transferred in fiscal year 2006 while current activities were transferred in fiscal year 2007. There were also additional transfers of earned federal funds from the Department to the State Comptroller's Office.

Business-Type Activities
Revenues of the Department's Business-type Activities were primarily from charges for services of $153.2 million and a decrease in fair value of investments of ($7.3 million). Charges for services consist primarily of earned interest income on loans for the three housing lending programs. It also includes program investment income which is earned within the Department's bond programs, the investments and the income of which are restricted to those programs by a pledge to the respective bond indentures. Total revenue increased $21.9 million which consisted primarily of an increase in fair value of investments of $26.1 million compared to 2006 and an increase in other operating revenue of $2.4 which were offset by an increase of $6.7 million in Down Payment Assistance grants.

Expenses of the Department's Business-type Activities consist primarily of interest expense of $117.5 million, which increased $14.3 million. The increase in interest expense is a result of an increase in the Department's debt issued to fund its various Single Family and Multifamily lending programs. The direct expenses also include Administrative Funds, allocations of expenses of Department programs that directly involve the production or monitoring activities associated with the housing programs, as well as certain costs incurred, both internally and externally. Administrative expenses, which were incurred within the Department's Administrative Fund, including all other administrative and supportive functions and overhead expenses remained approximately constant.

The Department's Business-type Activities expenses of $160.2 million exceeded Charges for Services of $153.2 million by $7.0 million. Charges for Services, primarily interest income on loans and investment income, are intended to cover bond principal and interest expense. The other direct expenses were covered and the difference was covered by prior year available net assets. This income, plus interest earned on loans, produces an adequate amount to pay Department obligations as required by the bond indentures covenants.

The Department's Business-type Activities also generated $2.1 million of unrestricted investment income, which was used primarily to pay administrative costs.

Fund Financial Statements

The fund financial statements provide more detailed information about the Department's most significant funds and the Department as a whole. The Department has two types of funds:

- Governmental fund – The General Revenue Fund is the Department's only Governmental Fund. It is the principal operating fund used to account for the Department's general activities. The financing for this fund is authorized through state legislative appropriations either as committed or collected revenues. Federal and state programs are also reported within this fund. The Condensed Balance Sheet – Governmental Funds would be substantially the same as that of the Condensed Statement of Net Assets – Governmental Activities and therefore, is not included.

- Proprietary fund – The Department's activities in its proprietary fund are accounted for in a manner similar to businesses operating in the private sector. Funding has primarily arisen through the issuances of taxable and tax-exempt bonds whose proceeds are used primarily to fund various types of loans to finance low and moderate-income housing. This fund also receives fee income from the Multifamily Tax Credit Program and Compliance fees collected for the purpose of covering the operating costs of the Department. The net assets of these funds represent accumulated earnings since their inception and are generally restricted for program purposes or debt service. The Condensed Statement of Net Assets – Proprietary Funds would be exactly the same as the Business-Type Activities Condensed Statement of Net Assets and therefore, is not included.

Ending Fund Balance	$ 1,588,476	$ 1,372,345	$ 216,131	15.7

Revenues of the Department's governmental activities totaled $172.3 million and were generated by federal grants primarily from LIHEAP, CSBG and HOME programs. Expenditures of $167.3 million consisted primarily of Intergovernmental and Public Assistance Payments.

Total revenues from governmental activities decreased by $1.3 million in 2007. The change was attributed to the decrease in Federal Revenue from the HOME program and increase in the LIHEAP program. The HOME program decrease is due to contract closeouts and the implementation of new HOME program rules. The increase of LIHEAP revenue is a result of additional funds from the U.S. Department of Health and Human Services allocated in late 2006.

The change to Federal Grant Pass-Through Revenues was due to the funding awarded from HUD in Community Development Block Grant (CDBG). This program was for recovery assistance in the areas impacted by Hurricanes Katrina and Rita.

The Department experienced similar changes in expenses. The majority of the decrease was attributed to the Intergovernmental Payments for the HOME and CSBG Programs. The decrease was offset by increase of Intergovernmental Payments and Public Assistance payment for LIHEAP.

The Department also experienced increases in Salaries and Wages and Payroll Related Costs. It was primarily due to across the board cost of living adjustments and a shift of Governmental Fund's share of Payroll Related Costs in accordance with the funding proportionality calculation provided in Accounting Policy Statements.

The decrease of Professional Fees and Services was primarily attributed to the expiration of a proprietary service contract for HOME program and decreased charges from State Auditor's Office. The decrease of Rentals & Leases was a result of the Department's relocation to a state owned facility.

The fiscal year 2007 Other Financing Sources (Uses) consisted primarily of the transfer of HTF from General Revenue to Texas Treasury Safekeeping Trust Company. It included transfers of interest earnings and loan repayments received during the year. There were also additional transfers of Allocation Office Space Reduction and Earned Federal funds collected in excess of appropriation authority. The decrease of Other Financing Uses represents transfers of the HTF General Revenue balances from previous years due to a legislative mandate.

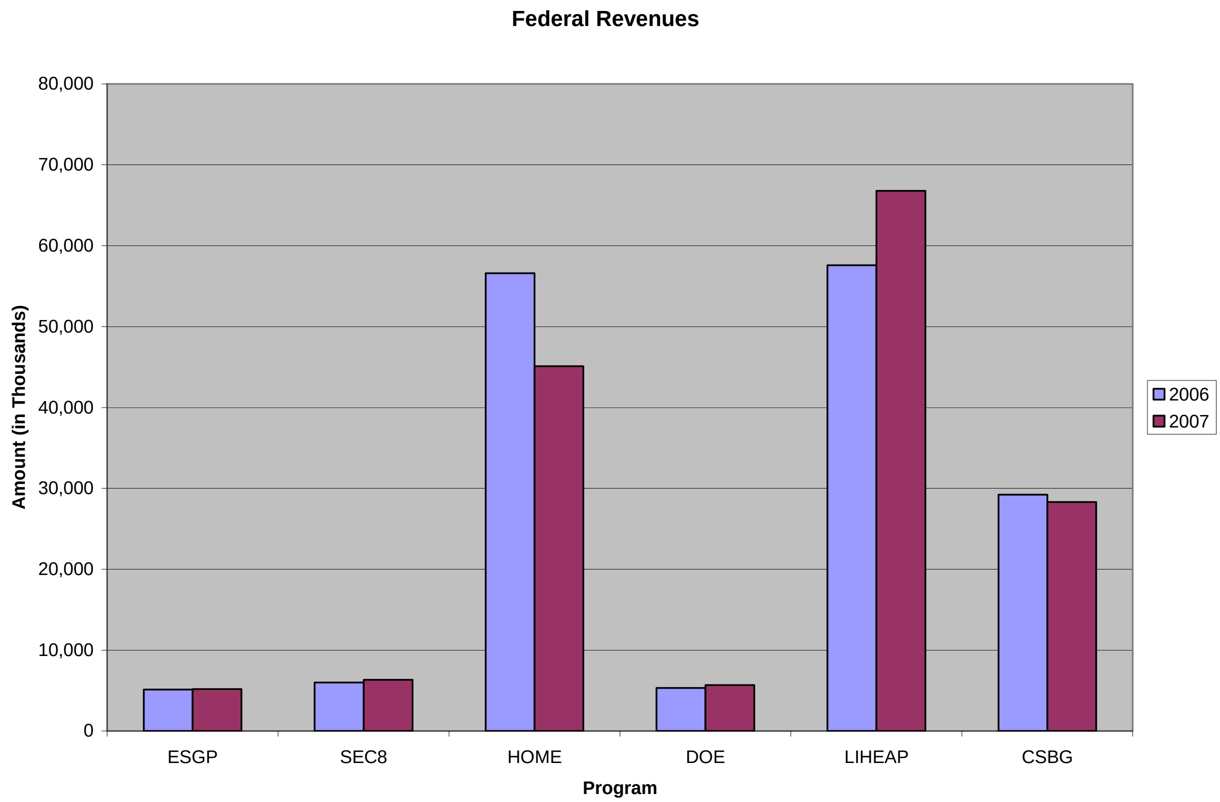
The variance of Lapse is a result of timing difference. Two appropriation years were lapsed during fiscal year 2006. Therefore, there was no lapse in fiscal year 2007.

The following graphs illustrate a comparison between fiscal year 2007 and 2006 for Federal Revenues, Intergovernmental Payments, and Public Assistance Payments.

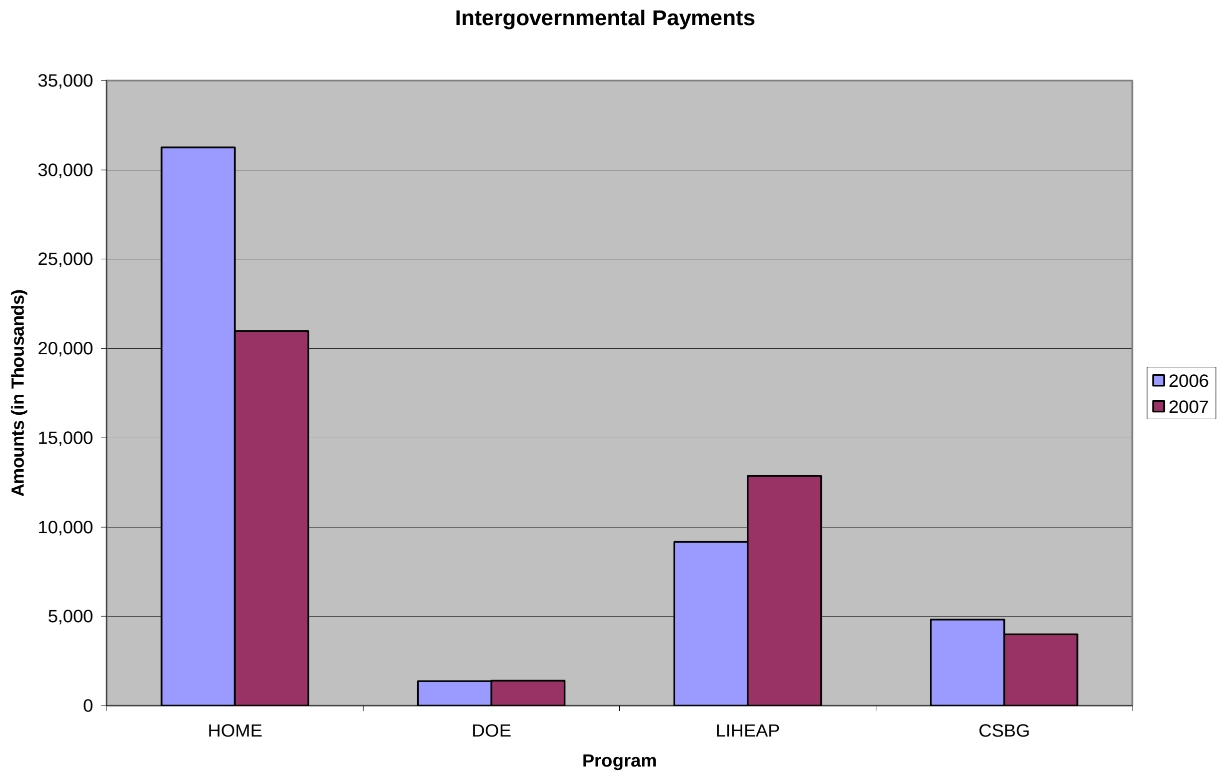
The acronyms used in the graphs are defined as following:

CSBG	Community Services Block Grant
DOE	Department of Energy, Weatherization Assistance for Low-Income Persons
ESGP	Emergency Shelter Grants Program
HOME	HOME Investment Partnerships Program
LIHEAP	Low-Income Home Energy Assistance Program
SEC 8	Section 8 Housing Choice Vouchers

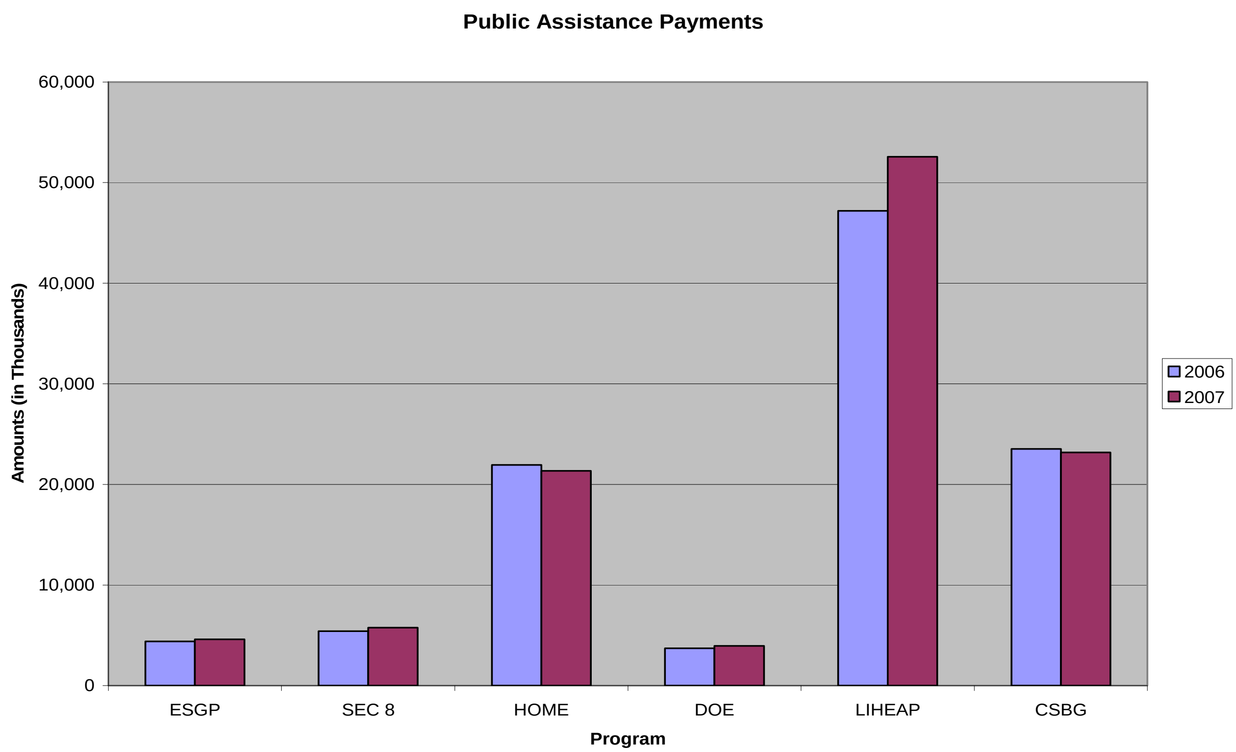
Federal Revenues: Receipts from the State's participation in programs financed with federal funds.



Intergovernmental Payments: Payment of grants to cities, counties, council of governments or other governmental entities.



Public Assistance Payments: Payment of grants to community action groups and organizations for community service programs.



Proprietary Fund

Net assets of the Department's proprietary fund decreased from the August 31, 2007 figures by $9.2 million, or 14.7%, to $53.7 million. The following table summarizes the Statement of Revenues, Expenses and Changes in Net Assets of the Department's proprietary fund for the fiscal years ended August 31, 2007 and August 31, 2006.

Beginning Net Assets	62,950,540	89,016,555	(26,066,015)	(29.3)
Ending Net Assets	$ 53,706,351	62,950,540	$ (9,244,188)	(14.7)

Interest earned on program loans increased by $6.4 million, or 10.1%, due primarily to an increase within the Department's Multifamily Bond Program, due to higher loan amounts outstanding.

Investment income increased $13.6 million or 9.3% and reflected higher investment yields for the market overall and the investment of bond proceeds associated with two new Single Family issuances totaling $392.8 million. The primary increase in investment income was within the Single Family Bond Program funds, which increased $18.2 million or 60% but was offset by the Residential Mortgage Revenue Bond Program funds which declined $2.0 million.

The following table illustrates the changes in net assets by program of the Department's business-type activities for the fiscal years 2007 and 2006.

Texas Department of Housing and Community Affairs
Business-Type Activities
Changes in Net Assets by Fund Groups
(amounts in thousands)

				Increase / (Decrease)	
Fund		2007	2006	Amount	%
Single Family	$	4,616	17,209	$ (12,593)	(73.2)
RMRB		5,253	5,352	(99)	(1.9)
CHMRB		1,587	1,355	232	17.1
Multifamily		(158)	(206)	48	(23.3)
1993 SF CHMRB		0	10	(10)	(100.0)
Commercial Paper		52	1	51	5,100.0
General Funds		19,488	16,544	2,944	17.8
Housing Trust Fund		19,173	21,907	(2,734)	(12.5)
Administration Fund		(170)	(235)	65	27.7
Compliance Programs		2,212	341	1,871	549.0
Housing Initiatives		1,653	673	980	145.6
Total	$	53,706	62,951	$ (9,245)	(14.7)

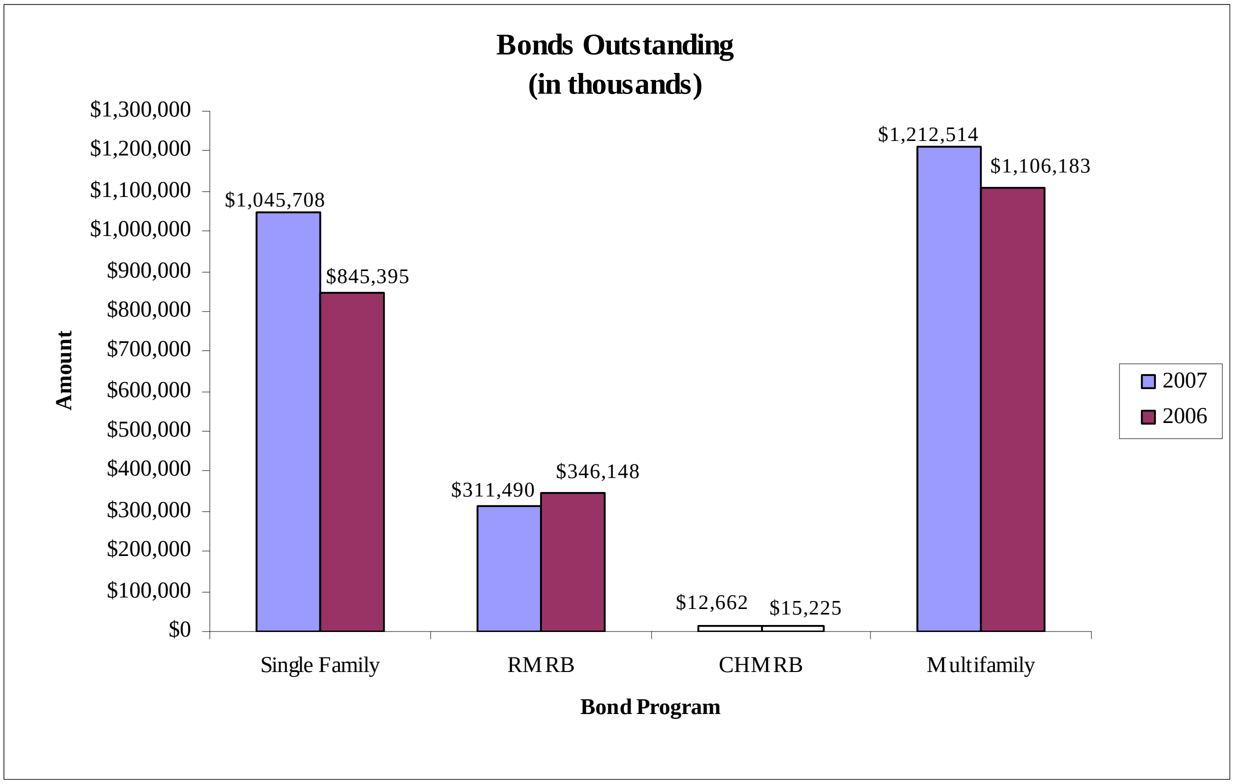
The net assets of the Single Family Bond Program decreased by $12.6 million or 73.2%, primarily due to a decrease in fair value in investments and increase in interest expense.

The net assets of the Housing Trust Fund decreased $2.7 million due to the increase in origination of loans for the Bootstrap Program and other Housing Trust Fund initiatives. The net assets of the Compliance Programs increased $1.9 million due to the increase in properties being monitored.

Department Debt

The Department's new debt issuances during fiscal year 2007 totaled $468.5 million. The Single Family program issued $275.2 million in bonds and the Multi-Family Bond Program issued $193.3 million. The Department also had $200.8 million in debt retirement during the year primarily due to consumer refinancing and prepayments of original loans. The net result was an increase in bonds payable of $267.7 million to $2.6 billion of which $23.7 million is due within one year. For additional information, see Note 10, Bond Indebtedness, and supplementary bond information schedules.

The following graph will illustrate a comparison of bonds outstanding between fiscal year 2007 and 2006 per bond program.



Request for Information

This financial report is designed to provide a general overview of the Texas Department of Housing and Community Affairs' (TDHCA) operations for all parties interested in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Texas Department of Housing and Community Affairs, Director of Financial Administration, P.O. Box 13941, Austin, Texas, 78711-3941.

NOTES TO THE

FINANCIAL STATEMENTS

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ENTITY

Effective September 1, 1991, the Texas Department of Housing and Community Affairs (Department) was created to assist local governments in helping residents overcome financial, social and environmental problems; to address very low to moderate income housing needs; to contribute to the preservation and redevelopment of neighborhoods and communities; to assist the Governor and the legislature in coordinating federal and state programs affecting local governments; and to continually inform the state and the public about the needs of local government (*Texas Government Code Ann., Chapter 2306*). The Department was created by merging two former agencies, the Texas Housing Agency and the Texas Department of Community Affairs.

The regulation of manufactured housing was transferred from the Texas Department of Licensing and Regulation to the Department on September 1, 1995. The Manufactured Housing Division is administratively attached to the Department and is responsible for establishing standards and requirements for the construction and installation of manufactured housing that are reasonably necessary to protect the health, safety and welfare of the occupants of such housing and the general public. The Manufactured Housing Division has a governing Board of five members appointed by the Governor.

The Department is governed by a Board, composed of seven members, all of whom are appointed by the Governor with the advice and consent of the Texas Senate. The Board then appoints the Executive Director, with the approval of the Governor.

The accompanying financial statements of the Department have been prepared to conform with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). The Department's financial statements are combined with other state departments in the State of Texas financial statements.

Component Units - No component units have been identified which should be included in the Department's financial statements.

FUND STRUCTURE

The accompanying financial statements are presented on the basis of funds, each of which is considered a separate accounting entity.

Governmental Funds

General Fund
The General Fund is the principal operating fund used to account for most of the Department's general activities. It accounts for all financial resources except those accounted for in other funds.

Proprietary Fund Types

Enterprise Funds (Business-Type Activity)
Enterprise Funds account for operations financed and operated in a manner similar to private business. The intent is to recover costs through user charges and where a periodic determination of revenues earned, expenses incurred, and net income are appropriate for management control, accountability, contractual obligations and other purposes.

Fiduciary Fund Types

Agency Funds
Agency funds are used to account for assets the government holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

Basis of Accounting
The basis of accounting determines when revenues and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental funds are accounted for using the modified accrual basis of accounting. Under modified accrual, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year end. The Department considers receivables collected within sixty days after year-end to be available and recognizes them as revenues of the current year for the Fund Financial Statements prepared on the modified accrual basis of accounting. Expenditures and other uses of financial resources are recognized when the related liability is incurred.

The Government-wide Financial Statements are accounted for using the accrual method of accounting. This includes unpaid employees' compensable leave, the unmatured debt service (principal and interest) on general long-term liabilities, capital assets and accumulated depreciation.

Proprietary funds are accounted for on the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized at the time liabilities are incurred. Proprietary Funds distinguish operating from non-operating items. Operating revenues result from providing services or producing and delivering goods in connection with the proprietary funds principal ongoing operations. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets.

The Department has elected not to apply Financial Accounting Standards Board pronouncements issued after November 30, 1989 as allowed by GASB Statement No. 20.

BUDGET AND BUDGETARY ACCOUNTING

The budget is prepared biennially and represents appropriations authorized by the legislature and approved by the Governor (the General Appropriations Act). The state monitors its statewide budget by establishing the legal level of control at the agency level to ensure that expenditures are not made in excess of budgetary authority. Within the Department, procedures are used to ensure that expenditures do not exceed their total budget at the division level, but the State Comptroller ultimately ensures that each total authorized agency budget is not exceeded.

Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

ASSETS, LIABILITIES AND FUND BALANCES/NET ASSETS

Assets

Cash and Cash Equivalents
Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Investments
Investments are stated at fair value in accordance with Governmental Accounting Standards Board Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, (GASB Statement 31). The Department utilizes established quoted market prices for determining the fair value of its debt securities in reserve funds. Fair value of the Department's securitized mortgage loans (GNMA/FNMA) has been established by each bond issues trustee using a pricing service.

The Department has reported all investment securities at fair value as of August 31, 2007 with exception of some short-term money market investments and nonparticipating interest-earning investments contracts which are reported at amortized cost provided that the fair value of these investments is not significantly affected by the impairment of the credit standing of the issuer or by other factors.

Changes in the fair value for the Enterprise Fund are reported in the Combined Statement of Revenues, Expenses, and Changes in Net Assets as “Net Increase (Decrease) in the Fair Value of Investments.”

Restricted Assets
Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets in the General Fund include federal grants which are restricted by the grantor for specific program purposes established by the State Legislature. The Proprietary Fund includes certain assets pledged to respective bond indentures, the use of which is restricted by those same bond covenants.

.

Consumable Inventories
Consumable inventories consist of postage on hand at year-end. Inventories for governmental fund types and proprietary fund types are accounted for using the consumption method of accounting. The cost of these items is expensed when the items are consumed.

Capital Assets
Assets with an initial, individual cost of more than $5,000 and an estimated useful life in excess of one year are capitalized. These assets are capitalized at cost or, if donated, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all “exhaustible” assets. Assets are depreciated over the estimated useful life of the asset (5 years for both Furniture & Equipment and Other Capital Assets) using the straight-line method.

All capital assets acquired by proprietary funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated assets are reported at fair value on the donation date. Depreciation is charged to operations over the estimated useful life of each asset using the straight-line method.

Loans and Contracts
Loans and contracts consist of loans in the General Fund made from federal funds for the purpose of Single Family loans and Multifamily development loans from the HOME Program.

Restricted loans and contracts in proprietary funds consist of mortgage loans made from Single Family and Multifamily bond proceeds. Unrestricted loans and contracts consist of Single Family loans and Multifamily development loans from the Housing Trust Fund and other Housing Initiative Programs. Loans receivable are carried at the unpaid principal balance outstanding, net of the allowance for estimated losses. Deferred commitment fees relating to the Single Family, Residential Mortgage Revenue Bonds (RMRB) Series 1987A and certain Multifamily programs are included as a reduction of loans receivable. Interest on loans is credited to income as earned. Loans are generally placed on nonaccrual status when the Department becomes aware that the borrower has entered bankruptcy proceedings or when they are past due 90 days as to either principal or interest or when payment in full of principal and interest is not expected. Deferred commitment fees are recognized using the interest method over the estimated lives of the loans.

Real Estate Owned
Real estate owned are properties acquired through foreclosure that are carried at the unpaid principal balance on the related property plus accrued interest and reimbursable expenses through the date of foreclosure, less any sales proceeds, reimbursements received from mortgage insurers and an allowance for estimated losses on such properties, which approximates the net realizable value of the property at foreclosure.

Loans secured by Single Family properties on which there is an indication that the borrower no longer has the ability to repay the loan and that foreclosure is likely are considered in-substance foreclosures and are classified as real estate owned in the accompanying balance sheet. Interest on real estate owned is credited to income as earned based on a calculation of interest recoverable in accordance with the Department's agreements with its mortgage insurers.

Allowance for Estimated Losses on Loans and Foreclosed Properties
The allowance for estimated losses on loans is calculated for future charge-offs on Single Family and Multifamily loans. The allowance for estimated losses on real estate owned is calculated for future charge-offs on foreclosed Single Family loans.

All losses are charged to the allowance when the loss actually occurs or when a determination is made that a loss is likely to occur. During the year, management estimates the level of future losses to determine whether the allowances for estimated losses are adequate to absorb anticipated losses in the existing loan and real estate owned portfolios. Based on these estimates, a provision for estimated losses on loans and real estate owned is credited to the allowances in order to adjust the allowances to levels estimated to be adequate to absorb reasonably foreseeable losses.

While management uses available information to recognize losses in the loan and real estate owned portfolios, future additions may be necessary based on changes in economic conditions. However, it is the judgment of management that allowances are currently adequate to absorb reasonably foreseeable losses in the existing loan and real estate owned portfolios.

Commitment Fees
Commitment fees received in connection with the origination of loans are deferred and recognized using the interest method over the estimated lives of the related loans and mortgage-backed securities, or if the commitment expires unexercised it is credited to income upon expiration of the commitment.

Deferred Issuance Costs
Deferred issuance costs on bonds are amortized using the interest method over the contractual life of the bonds to which they relate. Prepayments on the bonds result in the proportionate amortization during the current year of the remaining balance of deferred issuance costs.

Discounts and Premiums on Debt
Discounts and premiums on debt are recognized using the interest method over the lives of the bonds to which they relate. Prepayments on the bonds result in the proportionate amortization during the current year of the remaining balance of discounts and premiums on debt.

Liabilities

Accounts Payable
Accounts payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

Other Current Liabilities
Other current liabilities primarily consist of escrow fees and arbitrage rebate liability.

Deferred Revenues
Deferred Revenues in the governmental fund represent a deferral of amounts disbursed from funding agencies for the amount of Loans and Contracts outstanding. These deferred revenues are classified as current liabilities in accordance with GAAP. The deferred revenues in the proprietary fund represent fees such as commitment fees and compliance fees that are deferred upon receipt and amortized over a period of time. It also includes deferred revenues for loans and contracts.

Employees' Compensable Leave Balances
Employees' Compensable Leave Balances represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or noncurrent in the statement of net assets.

Bonds Payable – Revenue Bonds
Revenue bonds are accounted for in the proprietary funds. The bonds payable are reported at par less unamortized discount or plus unamortized premium. Interest expense is reported on the accrual basis, with amortization of discount or premium. Payables are reported separately as either current or noncurrent in the statement of net assets.

Notes and Loans Payable
Notes and Loans Payable is composed of Commercial Paper Notes issued by the Department. Proceeds not used to refund outstanding Commercial Paper Notes are intended to redeem single-family mortgage revenue bonds.

Other Non-current Liabilities
Other non-current liabilities primarily account for funds due to Developers as a result of Multifamily bond proceeds. These proceeds are conduit debt issued on behalf of the Developer for the purpose of Multifamily developments and are held by the trustee. Due to the developers' fluctuation in cash flow needs, the current portion cannot be reasonably estimated.

Fund Balance/Net Assets
The difference between fund assets and liabilities is "Net Assets" on the government-wide, proprietary and fiduciary fund statements, and the "Fund Balance" is the difference between fund assets and liabilities on the governmental fund statements.

Reservations of Fund Balance
Fund balances for governmental funds are classified as either reserved or unreserved in the fund financial statements. Reservations are legally restricted to a specific future use or not available for expenditure.

Reserved for Encumbrances
This represents commitments of the value of contracts awarded or assets ordered prior to year-end but not received as of that date. Encumbrances are not included with expenditures or liabilities. They represent current resources designated for specific expenditures in subsequent operating periods.

Reserved for Consumable Inventories
This represents the amount of postage to be used in the next fiscal year.

Reserve for Imprest Accounts
This represents reserves for travel and imprest cash in amounts equal to the assets.

Unreserved/Undesignated
Unreserved represents the unappropriated balance at year-end.

Net Assets
Invested in Capital Assets consists of capital assets including restricted capital assets, net of accumulated depreciation. The Department reports net assets as restricted when constraints placed on net assets are externally imposed by bond covenants and federal grants. Unrestricted Net Assets consist of net assets that do not meet the definition of Invested in Capital Assets or Restricted Net Assets.

Interfund Transactions and Balances
The Department may have the following types of transactions among funds:

1. Transfers - Legally required transfers that are reported when incurred as "Transfers In" by the recipient fund and as "Transfers Out" by the disbursing fund.

2. Legislative Sources/Uses – Budget transfers between agencies within the General Revenue Fund (0001).

3. Quasi-External Transactions - Charges or collections for services rendered by one fund to another that are recorded as revenues of the recipient fund and expenditures or expenses of the disbursing fund.

NOTE 2: CAPITAL ASSETS

A summary of changes in Capital Assets for the year ended August 31, 2007, is presented below:

	PRIMARY GOVERNMMENT			
Governmental Activities:	**Balance 09/01/06**	**Additions**	**Deletions**	**Balance 08/31/07**
Depreciable Assets:				
Furniture and Equipment	$1,724,302	$17,137	($6,095)	$1,735,344
Other Capital Assets	130,964	-	-	130,964
Total Depreciable Assets at Historical Costs	$1,855,266	$17,137	($6,095)	$1,866,308
Less Accumulated Depreciation for:				
Furniture and Equipment	($1,571,158)	($42,832)	$6,095	($1,607,895)
Other Capital Assets	(21,293)	(26,193)	-	(47,486)
Total Accumulated Depreciation	(1,592,451)	(69,025)	6,095	(1,655,381)
Governmental Activities Capital Assets, Net	$262,815	($51,888)	-	$210,927

NOTE 2: CAPITAL ASSETS Cont'd

	PRIMARY GOVERNMMENT			
Business-Type Activities:	**Balance 09/01/06**	**Additions**	**Deletions**	**Balance 08/31/07**
Depreciable Assets:				
Furniture and Equipment	$1,425,553	$12,409	-	$1,437,962
Other Capital Assets	132,279	-	-	132,279
Total Depreciable Assets at Historical Costs	$1,557,832	$12,409	-	$1,570,241
Less Accumulated Depreciation for:				
Furniture and Equipment	($1,267,107)	($63,406)	-	($1,330,513)
Other Capital Assets	(21,507)	(26,456)	-	(47,963)
Total Accumulated Depreciation	(1,288,614)	(89,862)	-	(1,378,476)
Business-Type Activities Capital Assets, Net	$269,218	($77,453)	-	$191,765

Depreciation expense was allocated to Administration in the Statement of Activities for both the Governmental and Business-type activities.

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS

The Department is authorized by statute to make investments following the "prudent person rule" and based upon provisions within the master bond indentures and its Investment Policy adopted by the Board in accordance with the Public Funds Investment Act. There were no significant violations of legal provisions during the period.

Deposits of Cash in Bank

As of August 31, 2007, the carrying amount of deposits was $1,249,426.

Governmental Funds Current Assets Cash in Bank	$ 20,000
Proprietary Funds Current Assets Cash in Bank	
Texas Treasury Safekeeping Trust	116,145
Proprietary Funds Current Assets Restricted Cash in Bank	
Texas Treasury Safekeeping Trust	263,381
Demand Deposits	849,900
Cash in Bank per AFR	$1,249,426

At August 31, 2007 the Department's cash and deposits in the State Treasury amounted to $7,786,551. Of that amount, $7,786,551 was fully collateralized by securities held with a trustee in the State's name, as reported to the Department by the Comptroller of Public Accounts of the State of Texas.

Investments

The types of investments in which the Department may invest are restricted by the provisions of the master bond indentures and the Department's Investment Policy adopted by its Board in accordance with the Public Funds Investment Act. The indentures allow for investments in direct obligations of or guaranteed by the U.S. Government; obligations, debentures, notes or other evidences of indebtedness issued or guaranteed by agencies or intermediaries of the U.S. Government; obligations issued by public agencies or municipalities; obligations and general obligations of or guaranteed by the state; demand deposits, interest-bearing time deposits or certificates of deposit; repurchase agreements in U.S. Government securities; direct or general obligations of any state within the territorial U.S.; investment agreements with any bank or financial institution; commercial paper; and guaranteed investment contracts. Certain trust indentures restrict the Department from investing in certain of the aforementioned investments.

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS Cont'd

At August 31, 2007, the fair value of investments (including both short-term and long-term) are shown below.

Business Type Activities	Carrying Value	Fair Value
U.S. Treasury Securities	$ 938,785	$ 1,080,697
U.S. Government Agency Obligations	1,129,168,860	1,098,900,081
Repurchase Agreements (TTSTC)	112,436,746	112,436,746
Fixed Income Money Markets	49,938,862	49,938,862
Misc (Investment Agreements/GICs)	365,696,442	365,696,442
Total	$ 1,658,179,695	$ 1,628,052,828

Credit Risk

Credit Risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Preservation and safety of principal is the foremost objective of the investment program. According to the Department's investment policy, investments should be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio. Credit risk is mitigated by

- Limiting investments to the safest types of securities.
- Pre-qualifying the financial institution, broker/dealers, intermediaries, and advisors with which the Department will do business.
- Diversifying the investment portfolio so that potential losses on individual securities will be minimized.

As of August 31, 2007, the Department's credit quality distribution for securities with credit risk exposure was as follows.

Standard & Poor's

Fund Type	GAAP Fund	Investment Type	Not Rated	AAA	AA	A
05	3054	U.S. Government Agency Obligations		$153,761,970		
05	3054	Repurchase Agreements (TTSTC)	$112,436,746			
05	3054	Misc (Investment Agreements/GICs)	$365,696,442			
			Not Rated	**AAA-M**	**AA-M**	**A-M**
05	3054	Fixed Income Money Market		$49,938,862		

A total of $946,218,807 was not subject to credit risk disclosure due to their explicit guarantee by the U.S. Government which is composed of $1,080,697 in U.S. Treasury securities and $945,138,110 in U.S. Government Agency obligations issued by the Government National Mortgage Association.

Concentration of credit risk is the risk of loss attributable to the magnitude of investment in a single issuer. As of August 31, 2007, the Department's concentration of credit risk is as follows.

Fund Type	GAAP Fund	Issuer	Carrying Value	% of Total Portfolio
05	3054	Transamerican Life	$151,199,674	9.29%
05	3054	USB Warburg	$112,436,746	6.91%

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS Cont'd

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of any investment. The longer the maturity of an investment will result in greater sensitivity of its fair value to changes in the market interest rates. The Department's investment policy allows for the mitigation of interest rate risk by

- Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities on the open market prior to maturity.
- Investing operating funds primarily in shorter-term securities.

Information about the sensitivity of the fair values of the Departments investments to market interest rate fluctuations is provided by the following table that shows the distribution of the Department's investments by maturity:

Remaining Maturity (in months)

Government and Business Type Activities	Fair Value	12 months or less	13 to 24 months	25 to 60 months	More than 60 months
U.S. Treasury Securities	$1,080,697				$1,080,697
U.S. Government Agency Obligations	1,098,900,080		$7,000,000	$1,833,002	1,090,067,078
Repurchase Agreements (TTSTC)	112,436,746	$112,436,746			
Fixed Income Money Markets	49,938,863	49,938,863			
Misc (Investment Agreements/GICs)	365,696,442	204,298,616	18,892,235	116,698,939	25,806,652
Total	$1,628,052,828	$366,674,225	$25,892,235	$118,531,941	$1,116,954,427

Highly Sensitive Investments

U. S. Government Agency obligations in the form of Mortgage backed securities. These securities are subject to early payment in a period of declining interest rates. These prepayments result in a reduction of expected total cash flows affecting the fair value of these securities and make the fair value of these securities highly sensitive to the changes in interest rates. The Department does not make it a common practice to sell these investments. Any fluctuation in fair value generates an unrealized gain or loss. The fair value of these investments is inversely affected by national mortgage interest rates. In an environment of rising interest rates, the Department would recognize an unrealized loss in fair market value and vice versa. Since the end of the 2007 fiscal year, the national mortgage rates have begun to decrease; as such, the Department does not believe that the value of these assets has been impaired. As of August 31, 2007, the Department holds $1,098,900,080 in U. S. Government Agency obligations in the form of mortgage backed securities.

NOTE 4: SUMMARY OF LONG TERM LIABILITIES

Changes in Long-Term Liabilities

During the year ended August 31, 2007, the following changes occurred in liabilities.

Governmental Activities	Balance 9/1/06	Additions	Reductions	Balance 8/31/07	Amounts Due Within One Year
Compensable Leave	$ 949,229	$ 770,582	$ 690,606	$ 1,029,205	$ 770,582
Total Governmental Activities	$ 949,229	$ 770,582	$ 690,606	$ 1,029,205	$ 770,582

NOTE 4: SUMMARY OF LONG TERM LIABILITIES Cont'd

Business-Type Activities	Balance 9/1/06	Additions	Reductions	Balance 8/31/07	Amounts Due Within One Year
Revenue Bonds Payable	$ 2,312,950,557	$ 469,578,648	$ 200,155,700	$ 2,582,373,505	$23,712,494
Commercial Paper Notes*	15,198,000	(15,198,000)	-	-	-
Notes Payable*	-	47,869,000	15,000,000	32,869,000	-
Subtotal	2,328,148,557	502,249,648	215,155,700	2,615,242,505	23,712,494
Compensable Leave	612,051	587,279	442,764	756,566	587,279
Total Business-Type Activities	$ 2,328,760,608	$ 502,836,927	$ 215,598,464	$2,615,999,071	$24,299,773

Commercial Paper Notes Payable
The Department is authorized to issue the Notes in an aggregate principal amount not to exceed $75,000,000 outstanding. Proceeds of the initial issuance of the Notes and of future issues not issued to refund outstanding Notes will be used to redeem certain of the Department's single-family mortgage revenue bonds (the "Refunded Bonds"), which are subject to redemption as a result of the receipt by the Department of prepayments of the related underlying mortgage loans. Such prepayments may, at a future date, be recycled into new mortgage loans by the Department.

*On August 31, 2006, Commercial Paper Notes Payable was included in Bonds Payable but will be reported in Long –Term Notes Payable on August 31, 2007, per instructions from the State Comptroller.

Employees' Compensable Leave
A state employee is entitled to be paid for all unused vacation time accrued, in the event of the employee's resignation, dismissal or separation from State employment, provided the employee has had continuous employment with the State for six months. Expenditures for accumulated annual leave balances are recognized in the period paid or taken in governmental fund types. For these fund types, the liability for unpaid benefits is recorded in the Statement of Net Assets. An expense and liability for proprietary fund types are recorded in the proprietary funds as the benefits accrue to employees. No liability is recorded for non-vesting accumulating rights to receive sick pay benefits.

Other Non-current Liabilities
Other non-current liabilities in the Enterprise Fund totaling $195,820,458 primarily account for funds due to Developers as a result of Multifamily bond proceeds. These proceeds are conduit debt issued on behalf of the Developer for the purpose of Multifamily developments and are held by the trustee. Due to the various variables related to the balance, the current portion cannot be reasonably estimated.

NOTE 5: INTERFUND BALANCES / ACTIVITIES

As explained in Note 1 on Interfund Transactions and Balances, there are numerous transactions between funds and agencies. At year-end, amounts to be received or paid are reported as:

- Interfund Receivables or Interfund Payables
- Transfers In or Transfers Out
- Legislative Transfers In or Legislative Transfers Out

The Department experienced routine transfers with other state agencies, which were consistent with the activities of the fund making the transfer. Repayment of interfund balances will occur within one year from the date of the financial statements.

NOTE 5: INTERFUND BALANCES / ACTIVITIES Cont'd

Individual balances and activity at August 31, 2007, follows:

Fund	Current Interfund Receivable	Current Interfund Payable
General Fund (01)		
General Revenue (0001)	-	$ 701,618
Consolidated Federal (0127)	-	(124,215)
Enterprise Fund (05, 0896)	-	169,074
Agency Fund (09, 1000)	$ 746,477	-
Total Interfund Receivable/ Payable (Exhibit I, Exhibit III & VIII)	**$ 746,477**	**$ 746,477**

The Department has no Non-Current Interfund Receivables/Interfund Payables.

Fund	Transfers In	Transfers Out	Purpose
General Fund (01)			
Appd Fund 0001, D23 Fund 0001		$ 3,007,983	Article VII-7, Rider 19
Appd Fund 0001, D23 Fund 0001		402,776	Article IX, § 11.04
Total Transfers for Fund 0001 (Exhibit IV)		**$ 3,410,759**	
Enterprise Fund (05)			
Appd Fund 3054, D23 Fund 0999	$ 3,007,983		Article VII-7, Rider 19
Total Transfers for Fund 3054 (Exhibit VI)	**$ 3,007,983**		
Total Transfers	**$ 3,007,983**	**$ 3,410,759**	

Fund	Legislative Transfers In	Legislative Transfers Out
General Fund (01)

NOTE 6: CONTINGENT LIABILITIES

The Department is a defendant in legal actions arising from transactions and activities conducted in the ordinary course of business. Management, after consultation with legal counsel, believes that the aggregate liabilities, if any, will not be material to the basic financial statements.

The Department receives federal grants that are subject to review and audit by the grantor agencies. Such audits could lead to request for reimbursement to the grantor agency for expenditures disallowed under terms of the grant. The Department's management has recorded $109,334 as an estimate of potential settlement of disallowed costs pursuant to administration of federal programs. The Department is considering seeking a waiver of repayment provisions by the federal grantor agency.

NOTE 7: CONTINUANCE SUBJECT TO REVIEW

Under the Texas Sunset Act, the Department will be abolished effective September 1, 2011 unless continued in existence as provided by the Act. If abolished, the Department may continue until September 1, 2012 to close out its operations.

NOTE 8: RISK FINANCING AND RELATED INSURANCE

The Department is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. It is the Department's policy to periodically assess the proper combination of commercial insurance and retention of risk to cover losses to which it may be exposed. The Department assumes substantially all risks associated with the performance of its duties. Currently there is no purchase of commercial insurance, nor is the Department involved in any risk pools with other government entities. The Department carries Public Official Liabilities Insurance coverage in the amount of $10,000,000; automobile liability insurance in the amount of $500,000, errors and omissions insurance of $300,000 related to loan servicing for others and a $350,000 Public Employee Fidelity Bond.

The Department's liabilities are reported when it is both probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Liabilities are reevaluated periodically to consider current settlements, frequency of claims, past experience and economic factors. There have been no significant reductions in insurance coverage in the past year and losses did not exceed funding arrangements during the past three years. The Department incurred no claims liability during fiscal years 2006 and 2007 related to these policies.

NOTE 9: SEGMENT INFORMATION FOR ENTERPRISE FUND

The Segment information following is the Department's direct debt associated with the issuance of Single Family bonds only and does not include the Multifamily bonds where the Department is only a conduit issuer. Therefore, this note represents less than what is reported in the Enterprise Fund as a whole. Each grouping consists of separate indentures that have one or more bonds outstanding with the revenue stream and assets exclusively pledged in support of that debt. Each indenture imposes the requirement of separate accounting of the revenues, expenses, gains, losses, assets, and liabilities.

NOTE 10: BONDED INDEBTEDNESS

The Department has 123 bond issues outstanding at August 31, 2007. All series are revenue bonds backed by the pledged revenue sources and restricted funds specified in the bond resolutions. Each series is designed to be self-supporting with no repayment nor obligation from the State's General Revenue. The Department issues bonds to assist in financing the purchase of homes by or the construction of rental housing for families with very low to moderate incomes. Loan payments provide the revenues for debt service payments. (Detailed supplemental bond information is disclosed in Schedules 1-A, 1-B, 1-C, 1-D, 1-E and 1-F.)

Proceeds from the issuance of bonds under the Single Family and Residential Mortgage Revenue Bonds (RMRB) Series 1987A Programs were used to acquire loans. Proceeds from Collateralized Home Mortgage Revenue Bond (CHMRB) and the remaining RMRB programs were used to acquire pass-through certificates backed by mortgage loans. Proceeds from the remaining Multifamily bond issues were used to finance mortgage loans.

Interest on bonds and collateralized mortgage obligations is payable periodically, except for capital appreciation bonds, on which interest is compounded semiannually and payable at maturity or upon redemption.

NOTE 10: BONDED INDEBTEDNESS Cont'd

The Single Family, RMRB and CHMRB bonds are collateralized by the revenues and assets pledged under the trust indentures, primarily Single Family mortgage loans, mortgage-backed securities and investments. The Multifamily bonds are collateralized by varying methods, including, but not limited to, the mortgage loans on the applicable housing developments, certificates of deposit, letters of credit, guarantees provided by third parties and collateralized mortgage obligations issued by federally chartered, privately owned corporations.

The trust indentures contain positive and negative covenants. Events of default include the following: failure to make timely payment of both principal and interest on any outstanding bond; failure to make timely payment of any other monies required to be paid to the Trustee; and non-performance or non-observance of any other covenants, agreements or conditions contained in the indentures. Management believes they are in compliance with the covenants of the indentures.

Deferred issuance costs at August 31, 2007, consist of the following:

		Amount
Deferred Issuance Costs at August 31, 2007	$	39,626,610
Less Accumulated Amortization		(27,970,852)
Deferred Issuance Costs, net	$	11,655,758

NOTE 10: BONDED INDEBTEDNESS Cont'd

VARIABLE TO FIXED INTEREST RATE SWAP

OBJECTIVE

In order to hedge against increases in interest rates on variable rate demand bond issues, the Department has entered into five interest rate swap agreements with the objective of reducing the interest rate risk of certain variable rate demand bonds. The variable rate demand bonds were issued at a lower total interest cost than attainable through traditional fixed rate bond structures. The Department has entered into interest rate swap agreements with various rated counterparties. Under the terms of the agreements, the Department makes periodic fixed interest rate payments in exchange for receiving variable rate payments comparable to the rates payable on the variable rate demand bonds. The swap notional amounts amortize in accordance with the scheduled and/or anticipated reductions in the related variable rate demand bond liability. The Department is potentially exposed to loss in the event of nonperformance by the counterparties under the swap agreements. Termination of the swap agreements may result in the Department making or receiving termination payments. Each swap agreement includes optional early termination provisions granting the Department the right, but not an obligation, to terminate the interest rate swaps at par without a termination payment after an effective date.

TERMS AND FAIR VALUE

The terms, including the fair value of the outstanding swaps as of August 31, 2007 are as follows. The fair value of the swaps are not shown in the financial statements. The notional amounts of the swaps match the principal amount of the associated debt.

Counterparty	Notional Amount	Fair Value	Effective Date	Fixed Rate	Variable Rate	Swap Termination Date
UBS AG	$53,000,000	($378,758)	9/1/04	3.843 %	63% of LIBOR + .30%	9/1/34 (a)
Goldman Sachs	35,000,000	(96,416)	1/1/05	3.6125 %	Lesser of (the greater of 65% of LIBOR and 56% of LIBOR + .45%) and LIBOR	3/1/35 (b)
Bear Stearns	98,145,000	(1,580,061)	8/1/05	3.99 %	Less of (the greater of 65% of LIBOR and 56% of LIBOR + .45%) and LIBOR	9/1/36 (c)
UBS AG	36,000,000	(554,019)	11/15/06	3.857%	63% of LIBOR +.30%	9/1/25 (d)
Bear Stearns	143,005,000	(3,223,482)	6/5/07	4.013% %	Less of (the greater of (a) 65% of LIBOR and (b) 56% of LIBOR + .45%) and LIBOR	9/1/38 (c)
Total	$365,150,000	($5,832,736)				

a. Swap Agreement has an optional early termination date of March 1, 2014 and every March and September thereafter. The maximum notional amount subject to early termination is equal to 60% of the current notional amount.
b. Swap Agreement has an optional early termination date of September 1, 2014 and every March and September thereafter.
c. Swap Agreement is subject to an early termination date at any time with a 10 business day notice.
d. Swap Agreement has an optional early termination date of March 1, 2016 and every March and September thereafter. The maximum notional amount subject to early termination is current notional amount per the amortization schedule.

CREDIT RISK

As of August 31, 2007, the Department is not exposed to credit risk on any of its outstanding swaps because the swaps have negative fair values. If interest rates change and the fair value of the swaps become positive, the department would be exposed to credit risk on those swaps. The swap agreements contain varying collateral agreements and insurance policies with the counterparties. The credit ratings for the counterparties are as follows.

Counterparty	Standard & Poor's	Moody's	Fitch
UBS AG	AA	A3	AA+
Goldman Sachs Capital Markets, LP	Not Rated	Aa3	AA-
Bear Stearns Financial Products, Inc.	AAA	Not Rated	Not Rated

NOTE 10: BONDED INDEBTEDNESS Cont'd

BASIS RISK

The Department's variable-rate bond coupon payments are equivalent to the Bond Market Association (BMA) rate. The swap agreements designate a function of LIBOR as the rate for payments received on these swaps. The Department will be exposed to basis risk should LIBOR and BMA converge. The swap agreements provide an option to terminate as stated above.

ROLLOVER RISK

The Department is exposed to rollover risk on swap agreements which mature or may be terminated prior to the maturity of the associated debt. The following debt is exposed to rollover risk if the option for early termination is executed:

Associated Debt Issuance	Debt Maturity Date	Swap Termination Date
2004B Single Family	September 2034	May be terminated as early as March 2014
2004D Single Family	March 2035	May be terminated as early as September 2014
2005A Single Family	September 2036	May be terminated at anytime giving 10 day notice
2006H Single Family	September 2037	May be terminated as early as March 2016
2007A Single Family	September 2038	May be terminated at anytime giving 10 day notice

SWAP PAYMENTS AND ASSOCIATED DEBT

Using rates as of August 31, 2007, debt service requirements of the Department's outstanding variable-rate debt and net swap payments are as follows. As rates vary, variable-rate debt bond interest payments and new swap payments will vary. The Department's swap agreements contain scheduled reductions to outstanding notional amounts that are expected to follow scheduled reductions in the associated bonds outstanding.

Fiscal Year Ending August 31	Variable-Rate Bonds				
	Principal	Interest	Interest Rate Swaps, Net	Total
2008	$ 850,000	$ 12,686,733	$ 1,147,606	$ 14,684,339

2038-2042	7,115,000	199,679	25,762	7,340,441
Total	$ 365,150,000	$ 259,854,009	$ 24,369,602	$ 649,373,611

DEFEASED DEBT

In fiscal year 2007 and in prior years, the Department has issued refunding bonds to advance refund certain single family and multifamily revenue bonds. The proceeds of the refunding bonds were deposited in an irrevocable trust with an escrow agent. The funds were used to purchase government securities, which will provide for all future debt service requirements.

On August 31, 2007, defeased bonds remaining unredeemed or unmatured from the 2003 and 2007 refunding issuance amounted to $24,525,000 and $36,700,000, respectively.

NOTE 10: BONDED INDEBTEDNESS Cont'd

ADVANCE REFUNDING BONDS

On June 5, 2007, the Department issued $143,005,000 in variable rate revenue bonds (2007A Single Family Revenue Bonds) with a maximum rate of 12% of which $36,600,000 was used to advance refund $27,120,000 of outstanding 1997A Single Family Revenue Bonds and $9,580,000 of 1997D Single Family Revenue Bonds. The bond proceeds were deposited with an escrow agent to provide for future debt service on the 1997 bonds. As a result, the 1997 bonds are considered to be defeased and the liability for those bonds has been removed from the Department's financial statements.

The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of $529,156. Since the old debt will be redeemed on September 1, 2007, the entire difference will be amortized this fiscal year increasing interest expense. The Department advance refunded the 1997 Single Family Revenue Bonds Series A & D to reduce its total debt service payments over the next 30 years by $19,912,544 and to obtain an economic gain of $10,031,775. Because the new debt is variable rate debt, the economic and cash differences were calculated using the current rate as of August 31, 2007 which is 4%. The cash flow and economic impact will fluctuate with the prevailing interest rates. Using the maximum rate allowable by the trust indenture of 12%, the Department could incur a maximum of additional $33,323,234 in debt service payments and an economic loss of $16,755,147 as a result of the advance refunding.

NOTE 11: EMPLOYEE BENEFITS

PLAN DESCRIPTION

The Department contributes to the Employees Retirement System of Texas (the "System"), a cost-sharing, multiple-employer, defined benefit plan. The Department has implemented GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, which standardizes financial reporting for pensions by state and local government employers. The System provides service retirement, disability retirement benefits, and death benefits to plan members and beneficiaries. The System operates under the authority of provisions contained primarily in Texas Government Code, Title 8, Subtitle B, which is subject to amendment by the Texas Legislature. The System's annual financial report and other required disclosure information are available by writing the Employees Retirement System of Texas, P.O. Box 13207, Austin, Texas, 78711-3207 or by calling (512) 476-6431.

FUNDING POLICY

Under provisions in State law, plan members are required to contribute 6% of their annual covered salary, and the Department contributes an amount equal to 6.45% of the Department's covered payroll. The Department and the employees' contributions to the System for the years ending August 31, 2007, 2006, and 2005, were $947,383, $874,775, and $784,304, respectively, equal to the required contributions for each year.

NOTE 12: SUBSEQUENT EVENTS

On September 20, 2007, the Department issued $157,060,000 in Single Family revenue bonds made up as follows:

$157,060,000 SF 2007 Series B (AMT)

The Series 2007 B bonds are being issued for the primary purpose of providing funds for the purchase of mortgage-backed, pass-through certificates (the "2007 B Mortgage Certificates") guaranteed as to timely payment of principal and interest by either Government National Mortgage Association ("Ginnie Mae"), Freddie Mac or Fannie Mae which represent beneficial ownership of pools of Mortgage Loans (the "2007 Mortgage Loans").

On December 3, 2007, the Department issued $15,000,000 in Multifamily revenue bonds (The Residences @ Onion Creek) made up as follows:

$ 15,000,000 MF 2007 Series

The Multifamily bonds are issued for the primary purpose to finance the acquisition, construction and equipping of multifamily residential rental developments. The Residences @ Onion Creek will be located in Austin, Texas.

TOTAL MULTIFAMILY BONDS	$	1,355,597					
TOTAL BONDS ISSUED	**$**	**3,584,142**					

FOOTNOTES:

(a) The taxable bonds shall be subject to redemption prior to maturity in whole or any part on any interest payment date after the completion date from the proceeds of an optional prepayment of the loan by the borrower.

(b) Variable rate not to exceed the maximum rate permitted by applicable law.

(c) Variable rate could change to fixed rate provided the conversion option is exercised.

(d) No set amortization, per trustee, amortization will occur in $100,000 denominations when the amount in the principal reserve fund exceeds 20% of the issue.

(e) The bonds are subject to redemption, in whole, at the option of the Issuer acting at the direction of the Holders of a majority of the outstanding principal amount of the Bonds.

(f) The Bonds shall be subject to redemption prior to maturity, after giving the required notice, as follows: During the variable interest rate period the bonds shall be subject to optional redemption by the Department, in whole or in part on any business day, at a redemption price equal to 100% of the principal amount thereof to be redeemed plus accrued interest, if any, to the redemption date.

(g) The Series bonds are subject to redemption prior to maturity, after giving notice as provided in the Trust Indendure, as follows: During a daily interest rate period or weekly interest rate period for the Series bonds, the bonds shall be subject to optional redemption by the Department, in whole or in part on any business day, at a redemption price equal to 100% of the principal amount thereof to be redeemed plus accrued interest, if any, to the redemption date.

(h) The bonds are subject to redemption at the option of the Issuer, at the direction of the Borrower, in whole or in part on the first day of any month, in the event and to the extent the trustee receives funds from the Borrower representing an optional prepayment of the principal of the note, at a redemption price equal to the principal thereof, plus accrued interest to the redemption date plus any premium remitted therewith as required by the note.

(i) Bonds are subject to redemption if and to the extent the Borrower is entitled to make, or is required to make, a prepayment pursuant to the loan agreement.

(j) The Bonds are subject to optional redemption in whole or in part upon optional prepayment of the Loan by the Borrower.

(k) The Bonds are subject to optional redemption at the direction of the Borrower on any interest payment date, in whole or in part, at the redemption price (as calculated by the sole bondholder) calculated in accordance with the Exhibit H plus accrued and unpaid interest, if any, to the redemption date. Optional redemptions may be made only in denominations of $100,000 plus integral multiples of $5,000 or for the entire amount of the bonds outstanding.

(l) The Bonds shall be subject to redemption prior to maturity in whole but not in part on any Bond Payment Date on or after fifteen years from Conversion Date, from the proceeds of an optional prepayment of the Loan by the Borrower at a redemption price equal to the principal amount plus accrued and unpaid interest to the date fixed for redemption.

(m) The Bonds may be redeemed by the Trustee at the option of the Issuer, but only upon the written request of the Borrower pursuant of the Loan Agreement, and with the prior written consent of the Bank, in whole or in part, at a redemption price equal to the principal amount, without premium, plus accrued interest to the date of redemptions.

INDEPENDENT AUDITORS' REPORT ON INTERI OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MAT ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDAI *GOVERNMENT AUDITING STANDARDS*

To the Honorable Rick Perry, Governor,
and the Governing Board of
Texas Department of Housing and Community Affairs:

We have audited the basic financial statements of the Texas Department of Housing and Community Affairs (the "Department") as of and for the year ended August 31, 2007, and have issued our report thereon dated December 19, 2007. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Department's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Department's financial statements that is more than inconsequential will not be prevented or detected by the Department's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Department's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Department's basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, including the Public Funds Investment Act (§2256, Texas Government Code); regulations; contracts; and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the Department in a separate letter dated December 19, 2007.

This report is intended solely for the information and use of the Governing Board, management, and federal and state awarding agencies and pass-through entities, and is not intended to be, and should not be, used by anyone other than these specified parties.

Deloitte & Touche LLP

Rick Perry
GOVERNOR

Michael Gerber
EXECUTIVE DIRECTOR

December 18, 2008

The Honorable Rick Perry, Governor
The Honorable Susan Combs, Texas Comptroller
Mr. John O'Brien, Director, Legislative Budget Board
Mr. John Keel, CPA, State Auditor

Dear Governor Perry, Comptroller Combs, Mr. O'Brien and Mr. Keel:

We are pleased to submit the Annual Financial Report of the Texas Department of Housing and Community Affairs for the year ended August 31, 2008, in compliance with TEX. GOV'T CODE ANN §2101.011 and in accordance with the requirements established by the Comptroller of Public Accounts.

The accompanying annual financial report has been prepared in accordance with Generally Accepted Accounting Principles (GAAP) reporting requirements. The financial report has been audited by an independent Auditor as required by statute.

If you have any questions, please contact David Cervantes, Director of Financial Administration at (512) 475-3875. Esther Ku may be contacted at (512) 475-3871 for questions related to the Schedule of Expenditures of Federal Awards.

Sincerely,

Michael Gerber
Executive Director

INDEPENDENT AUDITORS' REPORT

To the Honorable Rick Perry, Governor,
and the Governing Board of
Texas Department of Housing and Community Affairs:

We have audited the accompanying financial statements of the governmental activities, business-type activities, major funds, remaining fund information, and supplementary schedules 1-A through 1-E of the Texas Department of Housing and Community Affairs (the "Department") as of and for the year ended August 31, 2008, which collectively comprise the Department's basic financial statements as listed in the table of contents. These financial statements and supplementary schedules 1-A through 1-E are the responsibility of the Department's management. Our responsibility is to express an opinion on these financial statements and supplementary schedules based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 1, the financial statements of the Department are intended to present the financial position and the changes in financial position and, where applicable, cash flows of only that portion of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the State that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of the state of Texas as of August 31, 2008, the changes in its financial position, or, where applicable, its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities, business-type activities, major funds, and remaining fund information of the Department, as of August 31, 2008, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, schedules 1-A through 1-E, as listed in the table of contents, present fairly, in all material respects, the information set forth therein in accordance with guidelines issued by the Texas Comptroller of Public Accounts.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 18, 2008, on our consideration of the Department's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

The Management's Discussion and Analysis, as listed in the table of contents, is not a required part of the financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

MANAGEMENT'S

DISCUSSION AND ANALYSIS

TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS
MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

This section of the Texas Department of Housing and Community Affairs' (Department) annual financial report presents management's discussion and analysis of the Department's financial performance during the fiscal year that ended on August 31, 2008. Please read it in conjunction with the Department's financial statements, which follow this section.

The Department was created to assist local governments in helping residents overcome financial, social and environmental problems; to address very low to moderate income housing needs; to contribute to the preservation and redevelopment of neighborhoods and communities; to assist the Governor and the legislature in coordinating federal and state programs affecting local governments; and to continually inform the state and the public about the needs of local government.

The Manufactured Housing Division is administratively attached to the Department and is responsible for establishing standards and requirements for the construction and installation of manufactured housing that are reasonably necessary to protect the health, safety and welfare of the occupants of such housing and the general public. The Manufactured Housing Division has a governing Board of five members appointed by the Governor.

The Department is governed by a Board, composed of seven members, all of whom are appointed by the Governor with the advice and consent of the Texas Senate.

Financial Highlights

- The Department's business-type activity net assets increased $7.6 million and governmental activities net assets increased $1.1 million.

- The Department's proprietary fund experienced an increase in operating income in the amount of $14.5 million to an Operating Income of $2.3 million. This impact on operating income resulted primarily from the increase of the fair value of investments in the amount of $13.8 million. The $4.3 million increase in interest and investment income, the $1.8 million decrease in other operating revenues, the $5.1 million increase in interest expense, the $1.9 million decrease in bad debt expense and the $2.9 million decrease in Down Payment Assistance had a net offsetting effect on operating income.

- Net Assets in the Department's Governmental Activities increased from $770 thousand to $1.9 million. The change represents an increase in revenues larger than the increase in expenditures and transfers out.

- The Department's proprietary fund debt increased $86.7 million to $2.7 billion. Debt issuances and debt retirements totaled $213 million and $126.3 million, respectively.

- Loan originations for the year totaled $63.2 million and $40.4 million in the Department's proprietary and governmental funds, respectively.

- Subprime lending continues to receive significant attention in the financial market. A rise in the number of borrowers who are unable to pay debt obligations has led to increased foreclosures causing uncertainty in the housing market. According to Standard and Poor's, Housing Finance Agencies (HFAs) face lower risk from defaults on their loans. Homebuyer education programs, conservative underwriting, generous reserves and ongoing HFA asset management have resulted in strong portfolio performance which is expected to continue for the long-term. Since 1988, the Department has had its single family mortgage loans guaranteed by Federal National Mortgage Association (FNMA) , Government National Mortgage Association (GNMA) or Federal Home Loan Mortgage Corporation (FHLMC).

Overview of the Financial Statements

The financial statements consist of three parts – management's discussion and analysis (this section), the basic financial statements, and supplementary information. The basic financial statements include two types of statements that present different views of the Department.

- The first set of statements are government-wide financial statements that provide information about the Department's overall financial position and results. These statements, which are presented on an accrual basis, consist of the Statement of Net Assets and the Statement of Activities.

- The remaining statements are fund financial statements of the Department's governmental fund and proprietary fund. The governmental fund's activities are funded primarily from Federal funds but also include General Revenue appropriations for which the Department follows a modified accrual basis of accounting. The Department's proprietary fund operates similar to business activities and follows an accrual basis of accounting.

- The basic financial statements also include a "Notes to Financial Statement" section which explains some of the information presented in the Government-wide and fund financial statements and provides additional detailed data.

- The Notes to the Financial Statements are followed by a "Supplementary Information" section, which presents supplementary bond information.

The remainder of this overview section of the management's discussion and analysis explains the structure and contents of each of these statements.

Government-Wide Financial Statements

The Statement of Net Assets shows Governmental Activities and Business-type Activities consolidated on a full accrual basis. The Statement of Activities presents a government wide format of expenses, charges for services, operating grants and contributions and net expenses by both Governmental activities and Business-type activities. Both activities are further broken down by function and programs. The second section of the Statement of Activities shows general revenues not associated with a particular program but which provide resources for the Department's programs and operations. The fiduciary activity is not included in the government wide statements.

Schedule of Net Assets

The following tables show a summary of changes from prior year amounts for governmental activities.

Texas Department of Housing and Community Affairs
Condensed Schedule of Net Assets – Governmental Activities
As of August 31, 2008

	Governmental Activities		Increase / (Decrease)	
Assets	2008	2007	Amount	%
Cash & Investments	$ 6,899,689	$ 6,696,555	$ 203,134	3.0
Legislative Appropriations	3,193,155	2,880,562	312,593	10.9
Federal Receivables	3,458,607	399,825	3,058,782	765.0
Other Intergovernmental Receivables	847,500	65,593	781,907	1192.1
Accounts Receivable	42,082	353,456	(311,374)	(88.1)
Interfund Receivables	49,331	-	49,331	100.0
Loans and Contracts	128,660,128	116,647,963	12,012,165	10.3
Capital Assets	166,479	210,927	(44,448)	(21.1)
Other Assets	74,823	81,021	(6,198)	(7.6)
Total Assets	143,391,794	127,335,902	16,055,892	12.6
Liabilities				
Accounts Payable	10,897,247	7,230,317	3,666,930	50.7
Payroll Payable	853,101	971,482	(118,381)	(12.2)
Claims & Judgments Payable	-	109,334	(109,334)	(100.0)
Interfund Payable	104,613	577,403	(472,790)	(81.9)
Deferred Revenue	128,660,128	116,647,963	12,012,165	10.3
Other Current Liabilities	759,929	770,582	(10,653)	(1.4)
Other Non-current Liabilities	232,713	258,622	(25,909)	(10.0)
Total Liabilities	141,507,731	126,565,703	14,942,028	11.8
Net Assets				
Invested in Capital Assets	166,479	210,927	(44,448)	(21.1)
Restricted by Grantor	42,666	136,181	(93,515)	(68.7)
Unrestricted	1,674,918	423,091	1,251,827	295.9
Total Net Assets	$ 1,884,063	$ 770,199	$ 1,113,864	144.6

Net Assets of the Department's governmental fund were increased by 145%. The ending balance of Unrestricted Net Assets primarily consists of balances in the Housing Trust Fund Administration and Manufactured Housing Division. Restricted Net Assets represent balances in the Investor Owned Utility Programs.

The Department experienced an increase in Federal Receivables. This change occurred primarily because of the substantial payment activities for the Community Development Block Grant (CDBG) and the Low Income Home Energy Assistance Program (LIHEAP) at year end. A new round of CDBG funding was awarded to the Department for the purpose of disaster relief.

Other Intergovernmental Receivables in 2008 represents advances to the subgrantees for the Alternative Housing Pilot Program (AHPP) awarded by the Department of Homeland Security through the Federal Emergency Management Agency (FEMA) during the fiscal year.

Accounts Receivable in 2008 and 2007 are primarily receivables from surety companies to cover Manufactured Housing consumer's warranty claims. The Department experienced increased consumer claims in Manufactured Housing during fiscal year 2007. The claim activities slowed down in 2008. Consequently, Receivables from surety companies decreased.

The Department experienced increases of Loans and Contracts as well as Deferred Revenue. This change occurred primarily because of the increase of current and non-current program loans, which are funded by federal funds. These loans are for the purpose of Single Family HOME and newly awarded CDBG activities.

Accounts Payable experienced an increase during fiscal year 2008. This resulted primarily from additional disaster recovery grant funding of CDBG. There were also increased activities at year end for both LIHEAP and Community Services Block Grant (CSBG) programs.

Included in Other Liabilities is the current and non-current portion of Employees' Compensable Leave. It represents unpaid balances of employees' accumulated annual leave.

Business-Type Activities

Texas Department of Housing and Community Affairs
Business-Type Activities – Condensed Schedule of Net Assets as of August 31, 2008

	Business-Type Activities		**Increase / (Decrease)**	
Assets	2008	2007	Amount	%
Cash & Investments	$ 1,711,009,092	$ 1,630,392,649	$ 80,616,443	4.9
Loans and Contracts	1,292,439,525	1,285,810,608	6,628,917	0.5
Interest Receivable	14,973,551	20,078,776	(5,105,225)	(25.4)
Capital Assets	148,776	206,714	(57,938)	(28.0)
Real Estate Owned	578,375	295,124	283,251	96.0
Deferred Issuance Cost	11,991,756	11,655,758	335,998	2.9
Other Assets	1,868,800	1,661,912	206,889	12.5
Total Assets	3,033,009,875	2,950,101,541	82,908,335	2.8
Liabilities				
Current				
Interest Payable	38,307,371	40,093,199	(1,785,828)	(4.5)
Deferred Revenue	39,987,881	35,104,327	4,883,554	13.90
Other Liabilities	52,110,088	33,677,908	18,432,180	54.7
Non-current				
Bonds/Notes Payable	2,701,244,728	2,591,530,011	109,714,717	4.2
Other Non-current Liabilities	140,045,490	195,989,745	(55,944,255)	(28.5)
Total Liabilities	2,971,695,558	2,896,395,190	75,300,368	2.60
Net Assets				
Invested in Capital Assets	148,775	191,765	(42,990)	(22.4)
Restricted	17,304,915	11,349,639	5,955,276	52.5
Unrestricted	43,860,627	42,164,947	1,695,680	4.0
Total Net Assets	$ 61,314,317	$ 53,706,351	$ 7,607,966	14.2

Business-Type Activities Cont'd.

Net assets of the Department's proprietary fund increased $7.6 million, or 14.2%, to $61.3 million. An increase in the Department's fair value of its investments contributed to this increase in net assets offset by the increase of bond interest expense.

Restricted net assets of the Department's proprietary fund increased $6 million or 52.5%. Unrestricted net assets increased $1.7 million or 4%.

Cash and investments increased $80.6 million, or 4.9%, to $1.7 billion, as funds were generated from debt issuances, reinvestment of loan repayments, and interest earnings. Program loans receivable (current and non-current) increased $6.6 million, or 0.5%, to $1.3 billion, primarily as a result from the origination of $56 million and $48.4 million in payoffs of mortgage loans under the Department's Multifamily Program. Total bonds and notes payable (current and non-current) increased $127.3 million, or 4.9%, due to new debt issuances associated with the Department's Single Family and Multifamily Programs net of debt retirements.

Earnings within the Department's various funds were $164.3 million of which $151.6 million is classified as restricted and $12.7 million as unrestricted.

Restricted earnings are composed of $144.1 million in interest and investment income, $6.5 million in fair value of investments, and $1 million in other revenue. Interest and investment income are restricted per bond covenants for debt service. Fair value of investments is an unrealized gain due to the fact that the Department holds investments until maturity. Other revenue is predominantly an accounting recognition of fees received in previous years that were deferred when received and are being amortized over a period of time.

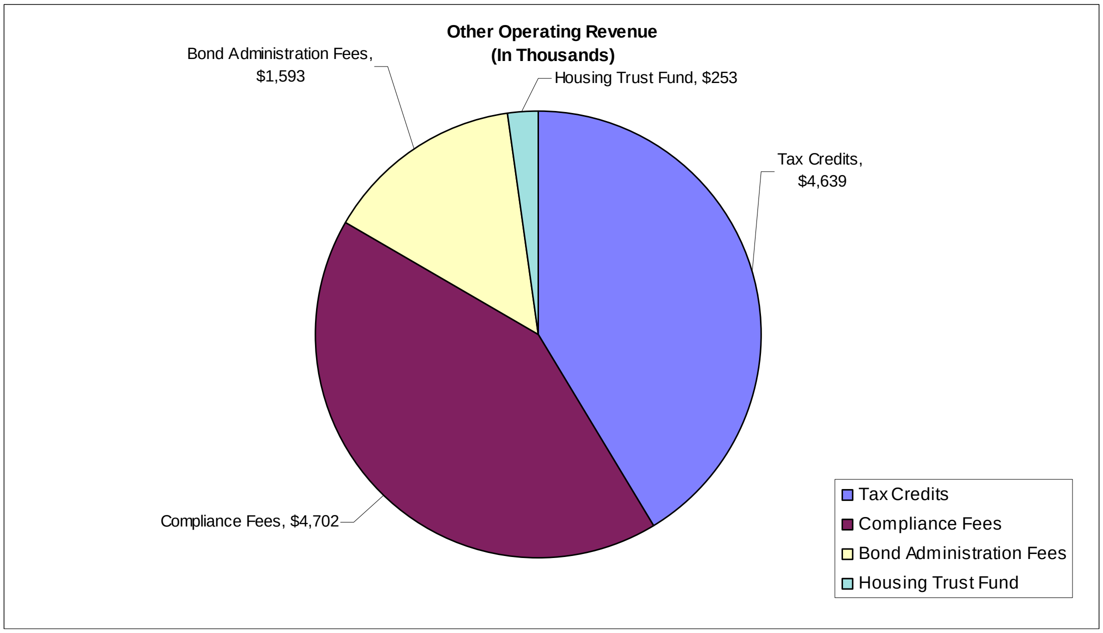
Unrestricted earnings are composed of $1.5 million in interest and investment income and $11.2 million in other operating revenue.

Interest and investment income earned from unrestricted investments are used to support various housing initiatives programs such as Housing Trust Fund and the Bootstrap Program. Sources for other operating revenue are fees from the Tax Credit Program, compliance fees, bond administrative fees, and miscellaneous interest earned from funds held by the Comptroller.

Fees earned under the Tax Credit Program are application fees, commitment fees, and inspection fees. Yearly compliance fees are generated from the Department's portfolio of multifamily properties. The Department performs on site visits and desk reviews to ensure that the properties are in compliance with the various housing regulations. Bond administrative fees are generated yearly from the various bond issuances to support the Department's administrative expenses.

Business-Type Activities Cont'd.

The graph below illustrates the composition of the $11.2 million in other operating revenue, classified as unrestricted earnings, according to the different housing programs.



Schedule of Activities

The Schedule of Activities reflects the sources of the Department's changes in net assets as they arise through its various programs and functions. Single Family, Multifamily and Housing Trust Fund are shown as business-type activities, and seven major programs are shown as governmental activities. Federal and state assistance activities allocate various subsidy funds to local governments, nonprofit organizations or individuals.

A condensed Schedule of Activities for the fiscal year ended August 31, 2008 and 2007 is shown in the table below.

Texas Department of Housing and Community Affairs
Condensed Schedule of Activities
(In Thousands)

	Governmental Activities		Business-Type Activities		Total	
	2008	2007	2008	2007	2008	2007
Program Revenues:						
Charges for Services	$ 4,918	4,561	$ 156,253	153,153	$ 161,171	157,714
Operating Grants and Contributions	169,542	160,692	-	-	169,542	160,692
General Revenues	8,193	7,073	8,005	(5,132)	16,198	1,941
Total Revenue	182,653	172,326	164,258	148,021	346,911	320,347
Total Expenses	174,631	167,412	161,975	160,274	336,606	327,686
Excess before Transfers	8,022	4,914	2,283	(12,253)	10,305	(7,339)
Transfers	(6,908)	(4,830)	5,325	3,008	(1,583)	(1,822)
Change in Net Assets	1,114	84	7,608	(9,245)	8,722	(9,161)
Beginning Net Assets	770	686	53,706	62,951	54,476	63,637
Ending Net Assets	$ 1,884	$ 770	$ 61,314	53,706	$ 63,198	54,476

Governmental Activities

Revenues of the Department's Governmental Activities were primarily from Operating Grants and Contributions. The majority of the revenues were from the U.S. Department of Housing and Urban Development (HUD) and the U.S. Department of Health and Human Services. General Revenues are revenues appropriated to the Department in accordance with legislative acts and regulations.

Total revenue increased $10.3 million. This increase consisted primarily of increases of $8.9 million in Operating Grants and Contributions, Charges for Services of $0.3 million and General Revenues of $1.1 million. The increase of Operating Grants and Contributions is a result of federal activities in the CDBG program which was for the purpose of disaster recovery. The increase was offset by decreased activities in the HOME and Energy Assistance Programs. The increase of General Revenues is due to an increased appropriation in Housing Trust Fund Administration.

Expenses of the Department's Governmental Activities consisted primarily of Intergovernmental Payments and Public Assistance Payments. The Department distributes program funds to local providers, including local governments, nonprofit and for-profit organizations, community based organizations and real estate developers. The net impact to expenses is primarily due to increased activities in the CDBG and decreased activities in the LIHEAP and HOME Programs.

Transfers consisted primarily of the transferring out of Housing Trust Fund (HTF) from Governmental Activities to Business-Type Activities according to TDHCA rider 10 in the 2008-2009 General Appropriations Act. It included transfers of interest earnings and loan repayments received during the year. In addition, it included transfers of Earned Federal Funds collected in accordance with H.B. 1, Article IX.

Business-Type Activities

Revenues of the Department's Business-type Activities were primarily from charges for services of $156.3 million and an increase in fair value of investments of $6.5 million. Charges for services consist primarily of earned interest income on loans for the three housing lending programs. It also includes program investment income which is earned within the Department's bond programs, the investments and the income of which are restricted to those programs by a pledge to the respective bond indentures. Total charges for services increased $3.1 million which is accounted by the following: a $7 million increase in interest and investment income related to single family bonds due to higher investment balances, a $2.1 million decrease in interest and investment income related to multifamily bonds due to lower mortgage loan balances and a $1.6 million decrease in other operating revenue related to the Administration funds.

Expenses of the Department's Business-type Activities consist primarily of interest expense of $136.9 million, which increased $5.1 million and down payment assistance of $10.2 million, which decreased $2.9 million. The increase in interest expense is a result of an increase in the Department's debt issued to fund its various Single Family and Multifamily lending programs. The direct expenses also include Administrative Funds, allocations of expenses of Department programs that directly involve the production or monitoring activities associated with the housing programs, as well as certain costs incurred, both internally and externally. Administrative expenses, which were incurred within the Department's Administrative Fund, including all other administrative and supportive functions and overhead expenses remained approximately constant.

Business-Type Activities Cont'd.

The Department's Business-type Activities expenses of $162 million exceeded Charges for Services of $156.3 million by $5.7 million. Charges for Services, primarily interest income on loans and investment income, are intended to cover bond principal and interest expense. The charges for services also covered the other direct expenses. This income, plus interest earned on loans, produces an adequate amount to pay Department obligations as required by the bond indentures covenants.

The Department's Business-type Activities also generated $1.6 million of unrestricted investment income, which was used primarily to pay administrative costs.

Fund Financial Statements

The fund financial statements provide more detailed information about the Department's most significant funds and the Department as a whole. The Department has two types of funds:

- Governmental fund – The General Revenue Fund is the Department's only Governmental Fund. It is the principal operating fund used to account for the Department's general activities. The financing for this fund is authorized through state legislative appropriations either as committed or collected revenues. Federal and state programs are also reported within this fund. The Condensed Balance Sheet – Governmental Funds would be substantially the same as that of the Condensed Statement of Net Assets – Governmental Activities and therefore, is not included.

- Proprietary fund – The Department's activities in its proprietary fund are accounted for in a manner similar to businesses operating in the private sector. Funding has primarily arisen through the issuances of taxable and tax-exempt bonds whose proceeds are used primarily to fund various types of loans to finance low and moderate-income housing. This fund also receives fee income from the Multifamily Tax Credit Program and Compliance fees collected for the purpose of covering the operating costs of the Department. The net assets of these funds represent accumulated earnings since their inception and are generally restricted for program purposes or debt service. The Condensed Statement of Net Assets – Proprietary Funds would be exactly the same as the Business-Type Activities Condensed Statement of Net Assets and therefore, is not included.

Governmental Fund

Ending Fund Balance	$ 2,710,226	$ 1,588,476	$ 1,121,750	70.6

Governmental Fund Cont'd.

Revenues of the Department's governmental activities totaled $182.8 million and were generated by federal grants primarily from LIHEAP, CSBG, CDBG and HOME programs. Expenditures of $174.6 million consisted primarily of Intergovernmental and Public Assistance Payments.

Total revenues from governmental activities were increased by $10.5 million in 2008 which consisted primarily of increases in the Federal Revenue and Legislative Appropriations and was offset by a decrease in Other Revenues.

Federal Revenue increased by $8.9 million. The increase was primarily attributed to the increase in the CDBG program and was offset by decreases in the HOME and LIHEAP programs. New CDBG funds were awarded to the Department for the purpose of disaster relief and long-term recovery related to Hurricanes of 2005. The HOME program decrease is due to insufficient applicants in the double funding cycle in 2006. The decrease of LIHEAP revenue is a result of phasing out emergency funding from the U.S. Department of Health and Human Services.

The increase in Legislative Appropriations was a result of increases to the Housing Trust Fund by the 80th Legislature.

The decrease in Other Revenues resulted from a decrease of revenue from Investor Owned Utilities. In addition, the Department experienced a decrease in consumer claims during the fiscal year. Consequently, reimbursements from sureties decreased.

The change in Federal Grant Pass-Through Revenues was due to CDBG funding awarded from HUD. This program was for disaster relief assistance in the areas impacted by Hurricane Rita.

The Department experienced similar changes in expenditures. The majority of the increase was attributed to the Intergovernmental Payments for the CDBG program. The increase was offset by a decrease of Intergovernmental Payments and Public Assistance Payments for LIHEAP and HOME programs. Federal Pass-Through expenditures represent payments to another state agency for the CDBG program.

The fiscal year 2008 Other Financing Sources (Uses) consisted primarily of the transfer of HTF from General Revenue to Texas Treasury Safekeeping Trust Company. It also included transfers of Earned Federal Funds to the Comptroller's Office for the purpose of reimbursement to the General Revenue Fund. The majority of the increase of Other Financing Sources (Uses) is related to the increased appropriations to the Housing Trust Fund in fiscal year 2008. The increase was offset by transfers included in 2007 which reduced funds appropriated to the Department for Allocation Office Space Reduction.

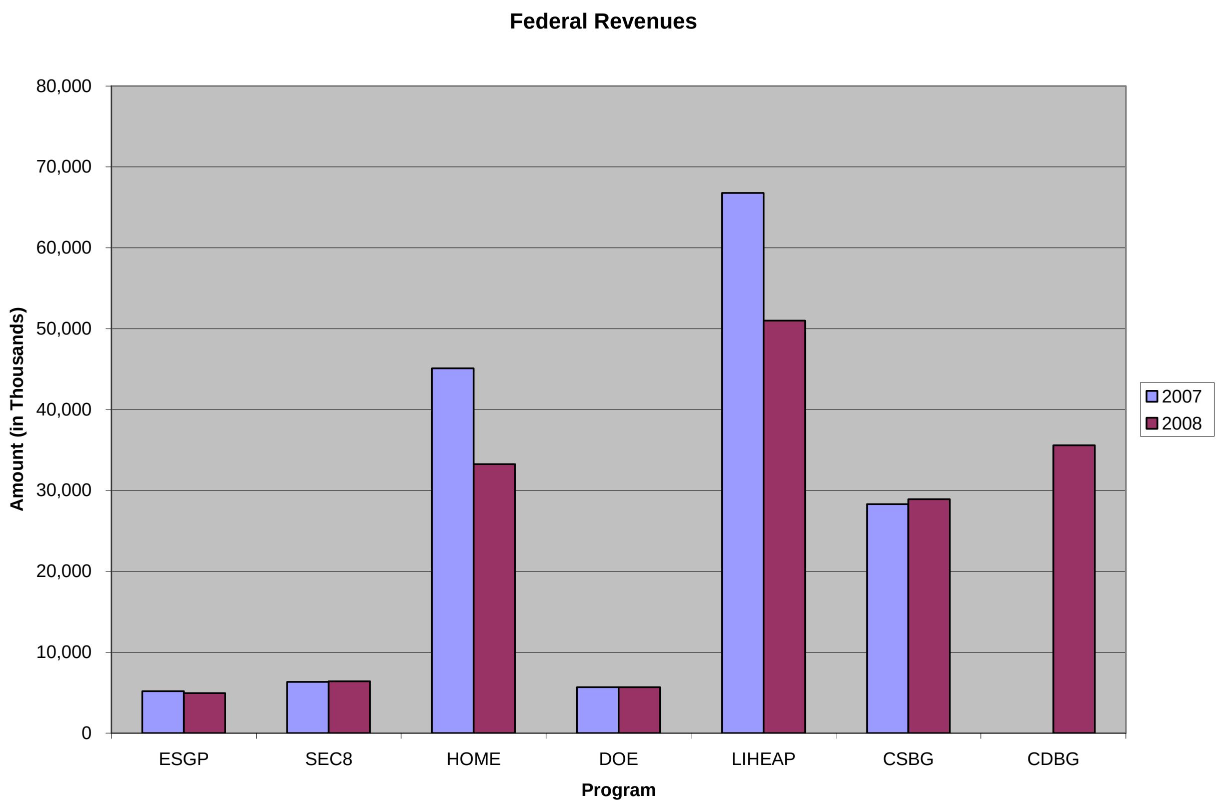
Governmental Fund Cont'd.

The following graphs illustrate a comparison between fiscal year 2008 and 2007 for Federal Revenues, Intergovernmental Payments, and Public Assistance Payments.

The acronyms used in the graphs are defined as following:

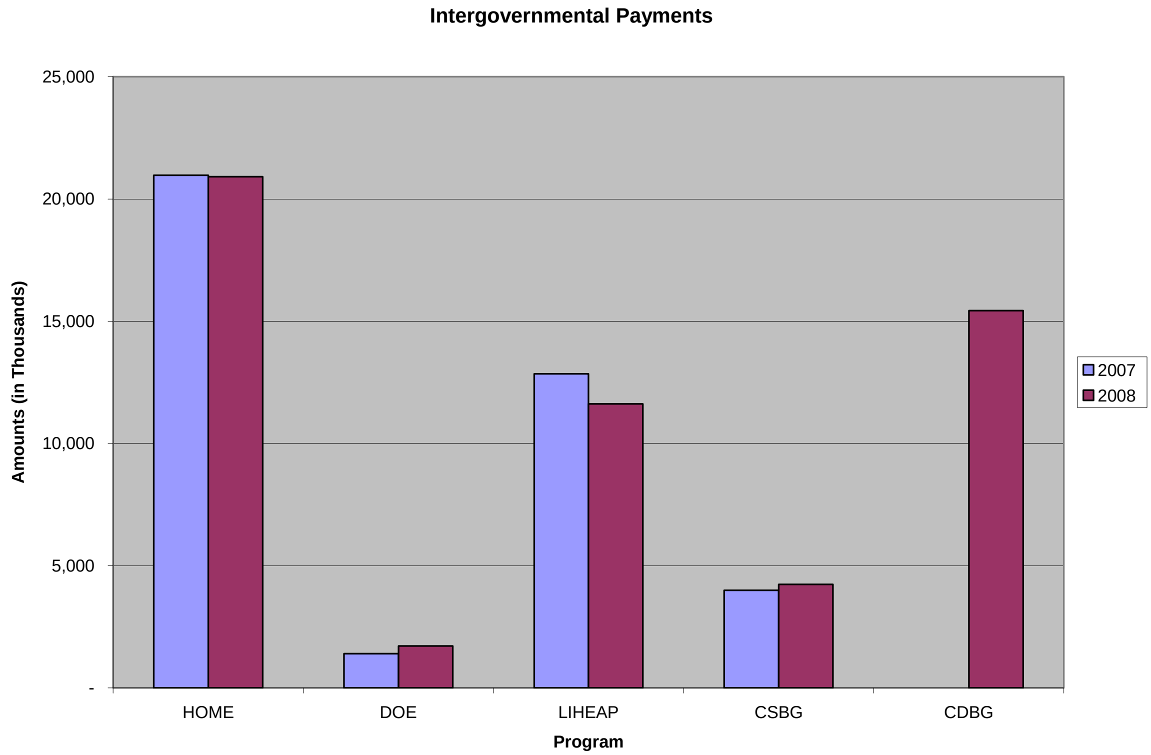
ESGP	Emergency Shelter Grants Program
SEC 8	Section 8 Housing Choice Vouchers
HOME	HOME Investment Partnerships Program
DOE	Department of Energy, Weatherization Assistance for Low-Income Persons
LIHEAP	Low-Income Home Energy Assistance Program
CSBG	Community Services Block Grant
CDBG	Community Development Block Grant

Federal Revenues: Receipts from the State's participation in programs financed with federal funds.

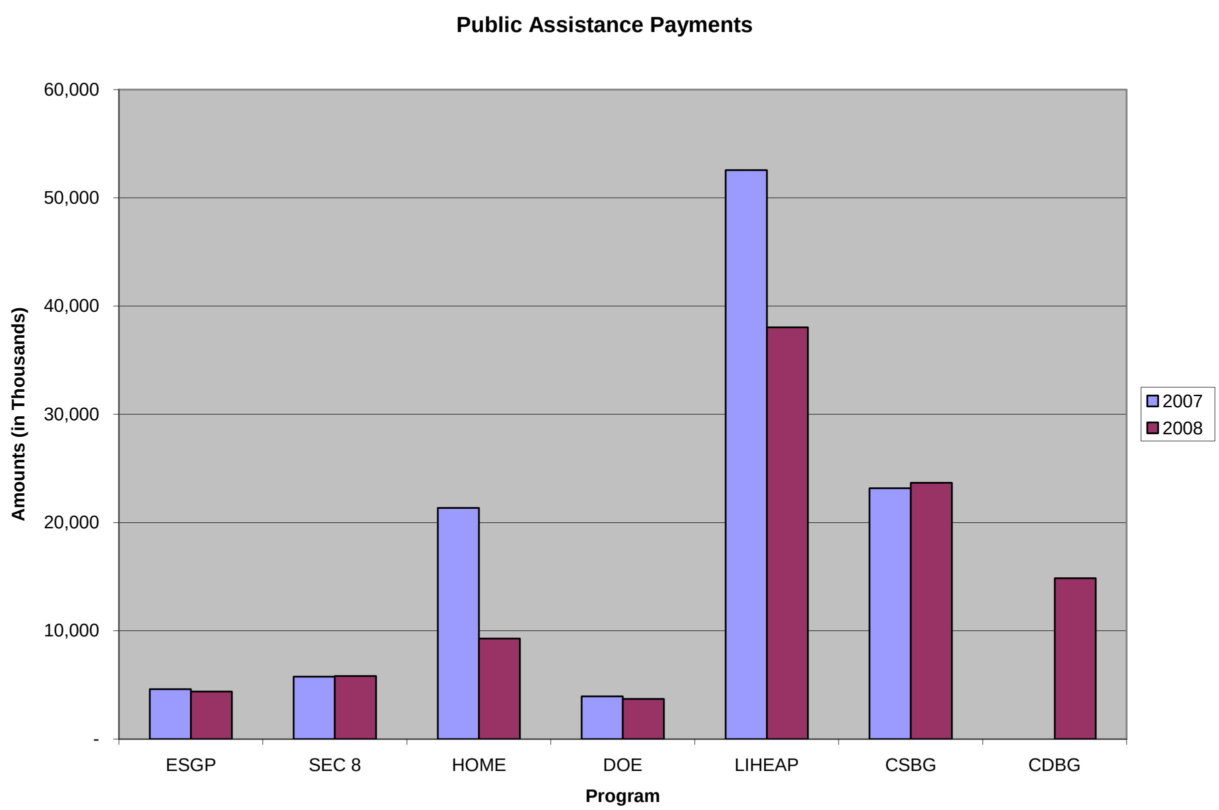


Governmental Fund Cont'd.

Intergovernmental Payments: Payment of grants to cities, counties, council of governments or other governmental entities.



Public Assistance Payments: Payment of grants to community action groups and organizations for community service programs.



Proprietary Fund

Net assets of the Department's proprietary fund increased from the August 31, 2008 figures by $7.6 million, or 14.2%, to $61.3 million. The following table summarizes the Schedule of Revenues, Expenses and Changes in Net Assets of the Department's proprietary fund for the fiscal years ended August 31, 2008 and August 31, 2007.

Texas Department of Housing and Community Affairs
Business-Type Activities

Beginning Net Assets	53,706,351	62,950,540	(9,244,189)	(14.7)
Ending Net Assets	$ 61,314,317	53,706,351	$ 7,607,966	(14.2)

Proprietary Fund Cont'd.

Interest earned on program loans decreased by $2.6 million, or 3.7%, due primarily to a decrease within the Department's Multifamily Bond Program, due to lower loan amounts outstanding.

Investment income increased $6.9 million or 9.7% and reflected the investment of bond proceeds associated with one new Single Family issuance totaling $157 million. The primary increase in investment income was within the Single Family Bond Program funds, which increased $9 million or 18% but was offset by the Residential Mortgage Revenue Bond Program funds which declined $1.8 million.

The following table illustrates the changes in net assets by program of the Department's business-type activities for the fiscal years 2008 and 2007.

Texas Department of Housing and Community Affairs
Business-Type Activities
Changes in Net Assets by Fund Groups
(amounts in thousands)

				Increase / (Decrease)	
Fund		2008	2007	Amount	%
Single Family	$	5,693	4,616	$ 1,077	23.3
RMRB		9,800	5,253	4,547	86.6
CHMRB		1,915	1,587	328	20.7
Multifamily		(134)	(158)	24	(15.1)
Commercial Paper		32	52	(20)	(38.5)
General Funds		18,362	19,488	(1,126)	(5.8)
Housing Trust Fund		19,750	19,173	577	3.0
Administration Fund		314	(170)	484	(284.7)
Housing Initiatives & Compliance		5,582	3,865	1,717	44.4
Total	$	61,314	53,706	$ 7,608	14.2

The net assets of the RMRB Bond Program increased by $4.5 million or 86.6%, primarily due to an increase in fair value in investments.

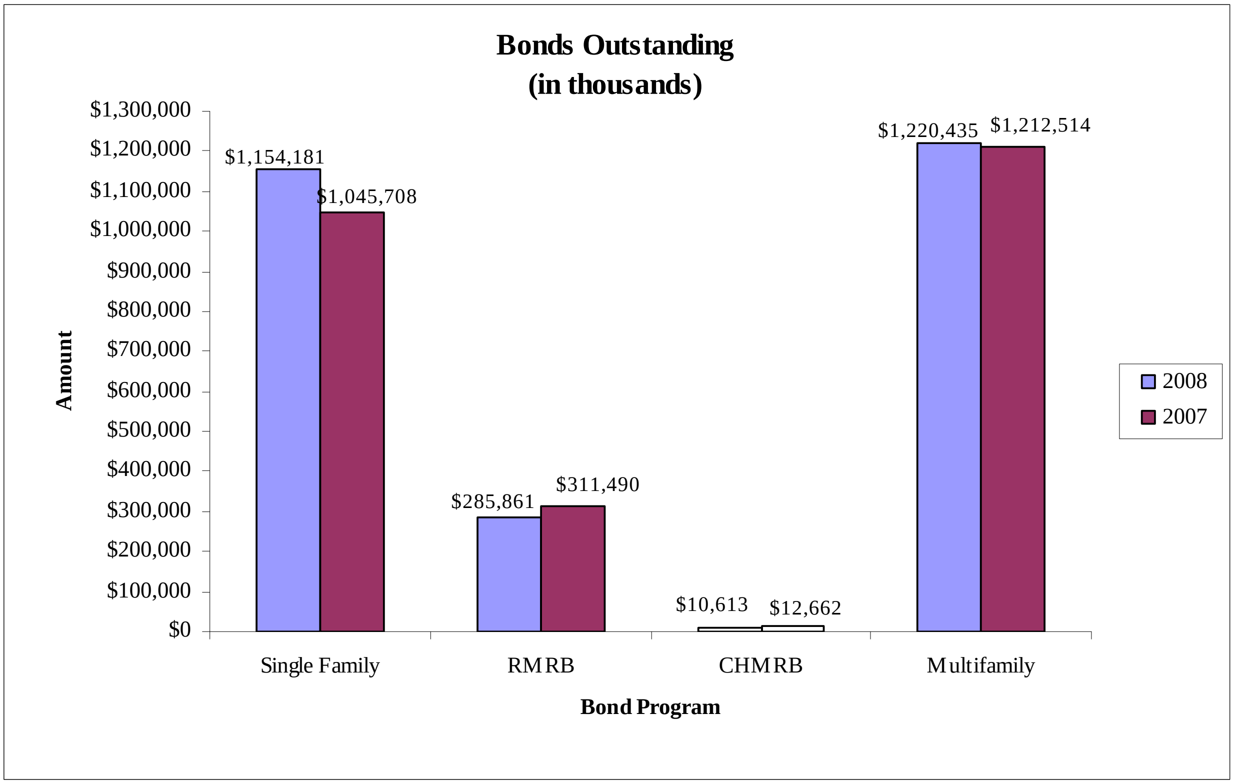
The net assets of the Housing Initiatives & Compliance increased $1.7 million due to the increase in properties being monitored.

Proprietary Fund Cont'd.

Department Debt

The Department's new debt issuances during fiscal year 2008 totaled $213.1 million. The Single Family program issued $157.1 million in bonds and the Multi-Family Bond Program issued $56 million. The Department also had $126 million in debt retirement during the year primarily due to consumer refinancing and prepayments of original loans. The net result was an increase in bonds payable of $86.7 million to $2.7 billion of which $41.3 million is due within one year. For additional information, see Note 10, Bond Indebtedness, and supplementary bond information schedules.

The following graph will illustrate a comparison of bonds outstanding between fiscal year 2008 and 2007 per bond program.



The recent credit and liquidity crisis precipitated by the failure of Wall Street investment bank Lehman Brothers among others began a cascading effect of rating downgrades. The current crisis affected counterparties which ultimately impacted the Department in various ways as discussed in Note 12 of the Notes to the Financial Statements.

Request for Information

This financial report is designed to provide a general overview of the Texas Department of Housing and Community Affairs' (TDHCA) operations for all parties interested in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Texas Department of Housing and Community Affairs, Director of Financial Administration, P.O. Box 13941, Austin, Texas, 78711-3941.

NOTES TO THE

FINANCIAL STATEMENTS

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ENTITY

Effective September 1, 1991, the Texas Department of Housing and Community Affairs (Department) was created to assist local governments in helping residents overcome financial, social and environmental problems; to address very low to moderate income housing needs; to contribute to the preservation and redevelopment of neighborhoods and communities; to assist the Governor and the legislature in coordinating federal and state programs affecting local governments; and to continually inform the state and the public about the needs of local government (*Texas Government Code Ann., Chapter 2306*). The Department was created by merging two former agencies, the Texas Housing Agency and the Texas Department of Community Affairs.

The regulation of manufactured housing was transferred from the Texas Department of Licensing and Regulation to the Department on September 1, 1995. The Manufactured Housing Division is administratively attached to the Department and is responsible for establishing standards and requirements for the construction and installation of manufactured housing that are reasonably necessary to protect the health, safety and welfare of the occupants of such housing and the general public. The Manufactured Housing Division has a governing Board of five members appointed by the Governor.

The Department is governed by a Board, composed of seven members, all of whom are appointed by the Governor with the advice and consent of the Texas Senate. The Board then appoints the Executive Director, with the approval of the Governor.

The accompanying financial statements of the Department have been prepared to conform with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

Component Units - No component units have been identified which should be included in the Department's financial statements.

FUND STRUCTURE

The accompanying financial statements are presented on the basis of funds, each of which is considered a separate accounting entity.

Governmental Funds

General Fund
The General Fund is the principal operating fund used to account for most of the Department's general activities. It accounts for all financial resources except those accounted for in other funds.

Proprietary Fund Types

Enterprise Funds (Business-Type Activity)
Enterprise Funds account for operations financed and operated in a manner similar to private business. The intent is to recover costs through user charges and where a periodic determination of revenues earned, expenses incurred, and net income are appropriate for management control, accountability, contractual obligations and other purposes.

Fiduciary Fund Types

Agency Funds
Agency funds are used to account for assets the government holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

Basis of Accounting
The basis of accounting determines when revenues and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental funds are accounted for using the modified accrual basis of accounting. Under modified accrual, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year end. The Department considers receivables collected within sixty days after year-end to be available and recognizes them as revenues of the current year for the Fund Financial Statements prepared on the modified accrual basis of accounting. Expenditures and other uses of financial resources are recognized when the related liability is incurred.

The Government-wide Financial Statements are accounted for using the accrual method of accounting. This includes unpaid Employee Compensable leave, the unmatured debt service (principal and interest) on general long-term liabilities, capital assets and accumulated depreciation.

Proprietary funds are accounted for on the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized at the time liabilities are incurred. Proprietary Funds distinguish operating from non-operating items. Operating revenues result from providing services or producing and delivering goods in connection with the proprietary funds principal ongoing operations. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets.

The Department has elected not to apply Financial Accounting Standards Board pronouncements issued after November 30, 1989 as allowed by GASB Statement No. 20.

BUDGET AND BUDGETARY ACCOUNTING

The budget is prepared biennially and represents appropriations authorized by the legislature and approved by the Governor (the General Appropriations Act). The state monitors its statewide budget by establishing the legal level of control at the agency level to ensure that expenditures are not made in excess of budgetary authority. Within the Department, procedures are used to ensure that expenditures do not exceed their total budget at the division level, but the State Comptroller ultimately ensures that each total authorized agency budget is not exceeded.

Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

ASSETS, LIABILITIES AND FUND BALANCES/NET ASSETS

Assets

Cash and Cash Equivalents
Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Investments
Investments are stated at fair value in accordance with Governmental Accounting Standards Board Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools,* (GASB Statement 31). The Department utilizes established quoted market prices for determining the fair value of its debt securities in

reserve funds. Fair value of the Department's securitized mortgage loans (GNMA, FNMA, FHLMC) has been established by each bond issue's trustee using a pricing service.

The Department has reported all investment securities at fair value as of August 31, 2008 with exception of some short-term money market investments and nonparticipating interest-earning investments contracts which are reported at amortized cost provided that the fair value of these investments is not significantly affected by the impairment of the credit standing of the issuer or by other factors.

Changes in the fair value for the Enterprise Fund are reported in the Combined Statement of Revenues, Expenses, and Changes in Net Assets-Proprietary Fund as "Net Increase (Decrease) in the Fair Value of Investments."

Restricted Assets
Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets in the General Fund include federal grants which are restricted by the grantor for specific program purposes established by the State Legislature. The Proprietary Fund includes certain assets pledged to respective bond indentures, the use of which is restricted by those same bond covenants.

.

Consumable Inventories
Consumable inventories consist of postage on hand at year-end. Inventories for governmental fund types and proprietary fund types are accounted for using the consumption method of accounting. The cost of these items is expensed when the items are consumed.

Capital Assets
Assets with an initial, individual cost of more than $5,000 and an estimated useful life in excess of one year are capitalized. These assets are capitalized at cost or, if donated, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all "exhaustible" assets. Assets are depreciated over the estimated useful life of the asset (5 years for both Furniture & Equipment and Other Capital Assets) using the straight-line method.

All capital assets acquired by proprietary funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated assets are reported at fair value on the donation date. Depreciation is charged to operations over the estimated useful life of each asset using the straight-line method.

Loans and Contracts
Loans and contracts consist of loans in the General Fund made from federal funds for the purpose of Single Family loans and Multifamily development loans from the HOME and Community Development Block Grant Program.

Restricted loans and contracts in proprietary funds consist of mortgage loans made from Single Family and Multifamily bond proceeds. Unrestricted loans and contracts consist of Single Family loans and Multifamily development loans from the Housing Trust Fund and other Housing Initiative Programs. Loans receivable are carried at the unpaid principal balance outstanding, net of the allowance for estimated losses. Deferred commitment fees relating to the Single Family, Residential Mortgage Revenue Bonds (RMRB) Series 1987A and certain Multifamily programs are included as a reduction of loans receivable. Interest on loans is credited to income as earned. Loans are generally placed on nonaccrual status when the Department becomes aware that the borrower has entered bankruptcy proceedings or when they are past due 90 days as to either principal or interest or when payment in full of principal and interest is not expected. Deferred commitment fees are recognized using the interest method over the estimated lives of the loans.

Real Estate Owned
Real estate owned are properties acquired through foreclosure that are carried at the unpaid principal balance on the related property plus accrued interest and reimbursable expenses through the date of foreclosure, less any sales proceeds, reimbursements received from mortgage insurers and an allowance for estimated losses on such properties, which approximates the net realizable value of the property at foreclosure.

Loans secured by Single Family properties on which there is an indication that the borrower no longer has the ability to repay the loan and that foreclosure is likely are considered in-substance foreclosures and are classified as real estate owned in the accompanying balance sheet. Interest on real estate owned is credited to income as earned based on a calculation of interest recoverable in accordance with the Department's agreements with its mortgage insurers.

Allowance for Estimated Losses on Loans and Foreclosed Properties
The allowance for estimated losses on loans is calculated for future charge-offs on Single Family and Multifamily loans. The allowance for estimated losses on real estate owned is calculated for future charge-offs on foreclosed Single Family loans.

All losses are charged to the allowance when the loss actually occurs or when a determination is made that a loss is likely to occur. During the year, management estimates the level of future losses to determine whether the allowances for estimated losses are adequate to absorb anticipated losses in the existing loan and real estate owned portfolios. Based on these estimates, a provision for estimated losses on loans and real estate owned is credited to the allowances in order to adjust the allowances to levels estimated to be adequate to absorb reasonably foreseeable losses.

While management uses available information to recognize losses in the loan and real estate owned portfolios, future additions may be necessary based on changes in economic conditions. However, it is the judgment of management that allowances are currently adequate to absorb reasonably foreseeable losses in the existing loan and real estate owned portfolios.

Commitment Fees
Commitment fees received in connection with the origination of loans are deferred and recognized using the interest method over the estimated lives of the related loans and mortgage-backed securities, or if the commitment expires unexercised it is credited to income upon expiration of the commitment.

Deferred Issuance Costs
Deferred issuance costs on bonds are amortized using the interest method over the contractual life of the bonds to which they relate. Prepayments on the bonds result in the proportionate amortization during the current year of the remaining balance of deferred issuance costs.

Discounts and Premiums on Debt
Discounts and premiums on debt are recognized using the interest method over the lives of the bonds to which they relate. Prepayments on the bonds result in the proportionate amortization during the current year of the remaining balance of discounts and premiums on debt.

Liabilities

Accounts Payable
Accounts payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

Other Current Liabilities
Other current liabilities primarily consist of escrow fees and arbitrage rebate liability.

Deferred Revenues
Deferred Revenues in the governmental fund represent a deferral of amounts disbursed from funding agencies for the amount of Loans and Contracts outstanding. These deferred revenues are classified as current liabilities in accordance with GAAP. The deferred revenues in the proprietary fund represent fees such as commitment fees and compliance fees that are deferred upon receipt and amortized over a period of time. It also includes deferred revenues for loans and contracts.

Employees' Compensable Leave Balances
Employees' Compensable Leave Balances represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or noncurrent in the statement of net assets.

Bonds Payable – Revenue Bonds
Revenue bonds are accounted for in the proprietary funds. The bonds payable are reported at par less unamortized discount or plus unamortized premium. Interest expense is reported on the accrual basis, with amortization of discount or premium. Payables are reported separately as either current or noncurrent in the statement of net assets.

Notes and Loans Payable
Notes and Loans Payable is composed of Commercial Paper Notes issued by the Department. Proceeds not used to refund outstanding Commercial Paper Notes are intended to redeem single-family mortgage revenue bonds.

Other Non-current Liabilities
Other non-current liabilities primarily account for funds due to Developers as a result of Multifamily bond proceeds. These proceeds are conduit debt issued on behalf of the Developer for the purpose of Multifamily developments and are held by the trustee. Due to the developers' fluctuation in cash flow needs, the current portion cannot be reasonably estimated.

Fund Balance/Net Assets
The difference between fund assets and liabilities is "Net Assets" on the government-wide, proprietary and fiduciary fund statements, and the "Fund Balance" is the difference between fund assets and liabilities on the governmental fund statements.

Reservations of Fund Balance
Fund balances for governmental funds are classified as either reserved or unreserved in the fund financial statements. Reservations are legally restricted to a specific future use or not available for expenditure.

Reserved for Encumbrances
This represents commitments of the value of contracts awarded or assets ordered prior to year-end but not received as of that date. Encumbrances are not included with expenditures or liabilities. They represent current resources designated for specific expenditures in subsequent operating periods.

Reserved for Consumable Inventories
This represents the amount of postage to be used in the next fiscal year.

Reserve for Imprest Accounts
This represents reserves for travel and imprest cash in amounts equal to the assets.

Unreserved/Undesignated
Unreserved represents the unappropriated balance at year-end.

Net Assets
Invested in Capital Assets consists of capital assets including restricted capital assets, net of accumulated depreciation. The Department reports net assets as restricted when constraints placed on net assets are externally imposed by bond covenants and federal grants. Unrestricted Net Assets consist of net assets that do not meet the definition of Invested in Capital Assets or Restricted Net Assets.

Interfund Transactions and Balances

The Department may have the following types of transactions among funds:

1. Transfers - Legally required transfers that are reported when incurred as "Transfers In" by the recipient fund and as "Transfers Out" by the disbursing fund.

2. Legislative Sources/Uses – Budget transfers between agencies within the General Revenue Fund (0001).

3. Quasi-External Transactions - Charges or collections for services rendered by one fund to another that are recorded as revenues of the recipient fund and expenditures or expenses of the disbursing fund.

NOTE 2: CAPITAL ASSETS

A summary of changes in Capital Assets for the year ended August 31, 2008, is presented below:

PRIMARY GOVERNMMENT

Governmental Activities:	**Balance 09/01/07**	**Additions**	**Deletions**	**Balance 08/31/08**
Depreciable Assets:				
Furniture and Equipment	$1,735,344	$20,867	($31,920)	$1,724,291
Other Capital Assets	130,964	-	-	130,964
Total Depreciable Assets at Historical Costs	$1,866,308	$20,867	($31,920)	$1,855,255
Less Accumulated Depreciation for:				
Furniture and Equipment	($1,607,895)	($39,123)	$31,920	($1,615,098)
Other Capital Assets	(47,486)	(26,192)	-	(73,678)
Total Accumulated Depreciation	(1,655,381)	(65,315)	31,920	(1,688,776)
Governmental Activities Capital Assets, Net:	$210,927	($44,448)	-	$166,479

PRIMARY GOVERNMMENT

Business-Type Activities:	**Balance 09/01/07**	**Additions**	**Deletions**	**Balance 08/31/08**
Depreciable Assets:				
Furniture and Equipment	$1,437,962	$19,321	($431,172)	$1,026,111
Other Capital Assets	132,279	-	-	132,279
Total Depreciable Assets at Historical Costs	$1,570,241	$19,321	($431,172)	$1,158,390
Less Accumulated Depreciation for:				
Furniture and Equipment	($1,330,513)	($35,855)	$431,172	($935,196)
Other Capital Assets	(47,963)	(26,455)	-	(74,418)
Total Accumulated Depreciation	(1,378,476)	(62,310)	431,172	(1,009,614)
Business-Type Activities Capital Assets, Net:	$191,765	($42,989)	-	$148,776

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS

The Department is authorized by statute to make investments following the "prudent person rule" and based upon provisions within the master bond indentures and its Investment Policy adopted by the Board in accordance with the Public Funds Investment Act. There were no significant violations of legal provisions during the period.

Deposits of Cash in Bank
As of August 31, 2008, the carrying amount of deposits was $687,114.

Governmental Funds Current Assets Cash in Bank	$20,000
Proprietary Funds Current Assets Cash in Bank	
Texas Treasury Safekeeping Trust	119,559
Proprietary Funds Current Assets Restricted Cash in Bank	
Texas Treasury Safekeeping Trust	243,052
Demand Deposits	304,503
Cash in Bank	$687,114

At August 31, 2008 the Department's cash and deposits in the State Treasury amounted to $8,927,011. Of that amount, $8,927,011 was fully collateralized by securities held with a trustee in the State's name, as reported to the Department by the Comptroller of Public Accounts of the State of Texas.

Investments
The types of investments in which the Department may invest are restricted by the provisions of the master bond indentures and the Department's Investment Policy adopted by its Board in accordance with the Public Funds Investment Act. The indentures allow for investments in direct obligations of or guaranteed by the U.S. Government; obligations, debentures, notes or other evidences of indebtedness issued or guaranteed by agencies or intermediaries of the U.S. Government; obligations issued by public agencies or municipalities; obligations and general obligations of or guaranteed by the state; demand deposits, interest-bearing time deposits or certificates of deposit; repurchase agreements in U.S. Government securities; direct or general obligations of any state within the territorial U.S.; investment agreements with any bank or financial institution; commercial paper; and guaranteed investment contracts. Certain trust indentures restrict the Department from investing in certain of the aforementioned investments.

At August 31, 2008, the fair value of investments (including both short-term and long-term) are shown below.

Business Type Activities	Carrying Value	Fair Value
U.S. Treasury Securities	$ 939,415	$ 1,013,942
U.S. Government Agency Obligations	1,332,487,317	1,308,774,174
Repurchase Agreements (TTSTC)	131,206,394	131,206,394
Fixed Income Money Markets	71,219,012	71,219,012
Misc (Investment Agreements/GICs)	196,080,733	196,080,733
Total	$ 1,731,932,871	$ 1,708,294,255

Credit Risk
Credit Risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Preservation and safety of principal is the foremost objective of the investment program. According to the Department's investment policy, investments should be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio. Credit risk is mitigated by

- Limiting investments to the safest types of securities.
- Pre-qualifying the financial institution, broker/dealers, intermediaries, and advisors with which the Department will do business.
- Diversifying the investment portfolio so that potential losses on individual securities will be minimized.

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS Cont'd

As of August 31, 2008, the Department's credit quality distribution for securities with credit risk exposure was as follows.

Standard & Poor's

Fund Type	GAAP Fund	Investment Type	Not Rated	AAA	AA	A
05	3054	U.S. Government Agency Obligations		$231,003,819		
05	3054	Repurchase Agreements (TTSTC)	$131,206,394			
05	3054	Misc (Investment Agreements/GICs)	$196,080,733			
			Not Rated	**AAA-M**	**AA-M**	**A-M**
05	3054	Fixed Income Money Market		$71,219,012		

A total of $1,078,784,298 was not subject to credit risk disclosure due to their explicit guarantee by the U.S. Government which is composed of $1,013,942 in U.S. Treasury securities and $1,077,770,356 in U.S. Government Agency obligations issued by the Government National Mortgage Association.

Concentration of credit risk is the risk of loss attributable to the magnitude of investment in a single issuer. As of August 31, 2008, the Department's concentration of credit risk is as follows.

Fund Type	GAAP Fund	Issuer	Carrying Value	% of Total Portfolio
05	3054	Paribas Corporation	$131,206,394	7.68%
05	3054	Transamerican Life	$ 88,070,816	5.16%

Interest Rate Risk
Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of any investment. The longer the maturity of an investment will result in greater sensitivity of its fair value to changes in the market interest rates. The Department's investment policy allows for the mitigation of interest rate risk by

- Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities on the open market prior to maturity.
- Investing operating funds primarily in shorter-term securities.

Information about the sensitivity of the fair values of the Departments investments to market interest rate fluctuations is provided by the following table that shows the distribution of the Department's investments by maturity:

Remaining Maturity (in months)

Government and Business Type Activities	Fair Value	12 months or less	13 to 24 months	25 to 60 months	More than 60 months
U.S. Treasury Securities	$1,013,942				$1,013,942
U.S. Government Agency Obligations	1,308,774,174	$11,317,707		$12,085,642	1,285,370,825
Repurchase Agreements (TTSTC)	131,206,394	131,206,394			
Fixed Income Money Markets	71,219,012	71,219,012			
Misc (Investment Agreements/GICs)	196,080,733	147,779,783	$19,385,040		28,915,910

NOTE 3: DEPOSITS, INVESTMENTS & REPURCHASE AGREEMENTS Cont'd

Highly Sensitive Investments

Mortgage backed securities. These securities are subject to early payment in a period of declining interest rates. These prepayments result in a reduction of expected total cash flows affecting the fair value of these securities and make the fair value of these securities highly sensitive to the changes in interest rates. The Department does not make it a common practice to sell these investments. Any fluctuation in fair value generates an unrealized gain or loss. As of August 31, 2008, the Department holds $1,308,774,174 in mortgage backed securities.

NOTE 4: SUMMARY OF LONG TERM LIABILITIES

Changes in Long-Term Liabilities

During the year ended August 31, 2008, the following changes occurred in liabilities.

Governmental Activities	Balance 9/1/07	Additions	Reductions	Balance 8/31/08	Amounts Due Within One Year
Compensable Leave	$ 1,029,205	759,929	796,492	$ 992,642	$ 759,929
Total Governmental Activities	$ 1,029,205	759,929	796,492	$ 992,642	$ 759,929

Business-Type Activities	Balance 9/1/07	Additions	Reductions	Balance 8/31/08	Amounts Due Within One Year
Revenue Bonds Payable	$ 2,582,373,505	216,112,363	127,395,714	$ 2,671,090,154	$41,276,426
Notes Payable	32,869,000	38,562,000		71,431,000	-
Subtotal	2,615,242,505	254,674,363	127,395,714	2,742,521,154	41,276,426
Compensable Leave	756,566	717,957	519,372	955,151	717,957
Total Business-Type Activities	$ 2,615,999,071	255,392,320	127,915,086	$2,743,476,305	$41,994,383

Commercial Paper Notes Payable

The Department is authorized to issue the Notes in an aggregate principal amount not to exceed $75,000,000 outstanding. Proceeds of the initial issuance of the Notes and of future issues not issued to refund outstanding Notes will be used to redeem certain of the Department's single-family mortgage revenue bonds (the "Refunded Bonds"), which are subject to redemption as a result of the receipt by the Department of prepayments of the related underlying mortgage loans. Such prepayments may, at a future date, be recycled into new mortgage loans by the Department.

Commercial Paper Notes Payable Debt Service Requirements Business-Type Activities			
Year	**Principal**	**Interest**	**Total**
2009	$71,431,000	$194,623	$71,625,623
Total	**$71,431,000**	**$194,623**	**$71,625,623**

Employees' Compensable Leave

A state employee is entitled to be paid for all unused vacation time accrued, in the event of the employee's resignation, dismissal or separation from State employment, provided the employee has had continuous employment with the State for six months. Expenditures for accumulated annual leave balances are recognized in the period paid or taken in governmental fund types. For these fund types, the liability for unpaid benefits is recorded in the Statement of Net Assets. An expense and liability for proprietary fund types are recorded in the proprietary funds as the benefits accrue to employees. No liability is recorded for non-vesting accumulating rights to receive sick pay benefits.

NOTE 4: SUMMARY OF LONG TERM LIABILITIES Cont'd.

Other Non-current Liabilities
Other non-current liabilities in the Enterprise Fund totaling $139,808,296 primarily account for funds due to Developers as a result of Multifamily bond proceeds which have corresponding investment balances not adjusted to market value. These proceeds are conduit debt issued on behalf of the Developer for the purpose of Multifamily developments and are held by the trustee. Due to the various variables related to the balance, the current portion cannot be reasonably estimated.

NOTE 5: INTERFUND BALANCES / ACTIVITIES

As explained in Note 1 on Interfund Transactions and Balances, there are numerous transactions between funds and agencies. At year-end, amounts to be received or paid are reported as:

- Interfund Receivables or Interfund Payables
- Transfers In or Transfers Out
- Legislative Transfers In or Legislative Transfers Out

The Department experienced routine transfers with other state agencies, which were consistent with the activities of the fund making the transfer. Repayment of interfund balances will occur within one year from the date of the financial statements.

Individual balances and activity at August 31, 2008, follows:

Fund	Current Interfund Receivable	Current Interfund Payable
General Fund (01)		
General Revenue (0001)	$ 49,331	$ 1,488
Consolidated Federal (0127)	-	103,125
Enterprise Fund (05, 0896)	55,282	-
Total Interfund Receivable/ Payable (Exhibit I & Exhibit III & VIII)	**$ 104,613**	**$ 104,613**

The Department has no Non-Current Interfund Receivables/Interfund Payables.

Fund	Transfers In	Transfers Out	Purpose
General Fund (01)			
Appd Fund 0001, D23 Fund 0001		$ 5,324,774	Article VII-6, Rider 10

Appd Fund 0001, D23 Fund 0066	61,521	-
Appd Fund 0001, D23 Fund 0077	793	-
Total Legislative Transfers (Exh IV)	$ **779,488**	**-**

NOTE 6: CONTINGENT LIABILITIES

The Department is a defendant in legal actions arising from transactions and activities conducted in the ordinary course of business. Management, after consultation with legal counsel, believes that the aggregate liabilities, if any, will not be material to the basic financial statements.

NOTE 7: CONTINUANCE SUBJECT TO REVIEW

Under the Texas Sunset Act, the Department will be abolished effective September 1, 2011 unless continued in existence as provided by the Act. If abolished, the Department may continue until September 1, 2012 to close out its operations.

NOTE 8: RISK FINANCING AND RELATED INSURANCE

The Department is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. It is the Department's policy to periodically assess the proper combination of commercial insurance and retention of risk to cover losses to which it may be exposed. The Department assumes substantially all risks associated with the performance of its duties. Currently there is no purchase of commercial insurance, nor is the Department involved in any risk pools with other government entities. The Department carries Public Official Liabilities Insurance coverage in the amount of $10,000,000; automobile liability insurance in the amount of $500,000, errors and omissions insurance of $300,000 related to loan servicing for others and a $350,000 Public Employee Fidelity Bond.

The Department's liabilities are reported when it is both probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Liabilities are reevaluated periodically to consider current settlements, frequency of claims, past experience and economic factors. There have been no significant reductions in insurance coverage in the past year and losses did not exceed funding arrangements during the past three years. The Department incurred no claims liability during fiscal years 2007 and 2008 related to these policies.

NOTE 9: SEGMENT INFORMATION FOR ENTERPRISE FUND

The Segment information below is for the Department's direct debt associated with the issuance of Single Family bonds only and does not include the Multifamily bonds where the Department is only a conduit issuer. Therefore, this note represents less than what is reported in the Enterprise Fund as a whole. Each grouping consists of separate indentures that have one or more bonds outstanding with the revenue stream and assets exclusively pledged in support of that debt. Each indenture imposes the requirement of separate accounting of the revenues, expenses, gains, losses, assets, and liabilities.

Ending Cash and Cash Equivalents	$ 84,187,598	$ 6,177,047	$ 719,617

NOTE 10: BONDED INDEBTEDNESS

The Department has 125 bond issues outstanding at August 31, 2008. All series are revenue bonds backed by the pledged revenue sources and restricted funds specified in the bond resolutions. Each series is designed to be self-supporting with no repayment nor obligation from the State's General Revenue. The Department issues bonds to assist in financing the purchase of homes by or the construction of rental housing for families with very low to moderate incomes. Loan payments provide the revenues for debt service payments. (Detailed supplemental bond information is disclosed in Schedules 1-A, 1-B, 1-C, 1-D, and 1-E.)

Proceeds from the issuance of bonds under the Single Family and Residential Mortgage Revenue Bonds (RMRB) Series 1987A Programs were used to acquire loans. Proceeds from Collateralized Home Mortgage Revenue Bond (CHMRB) and the remaining RMRB programs were used to acquire pass-through certificates backed by mortgage loans. Proceeds from the remaining Multifamily bond issues were used to finance mortgage loans.

Interest on bonds and collateralized mortgage obligations is payable periodically, except for capital appreciation bonds, on which interest is compounded semiannually and payable at maturity or upon redemption.

The Single Family, RMRB and CHMRB bonds are collateralized by the revenues and assets pledged under the trust indentures, primarily Single Family mortgage loans, mortgage-backed securities (which had a change in ownership as discussed in Note 12) and investments. The Multifamily bonds are collateralized by varying methods, including, but not limited to, the mortgage loans on the applicable housing developments, certificates of deposit, letters of credit, guarantees provided by third parties and collateralized mortgage obligations issued by federally chartered, privately owned corporations.

The trust indentures contain positive and negative covenants. Events of default include the following: failure to make timely payment of both principal and interest on any outstanding bond; failure to make timely payment of any other monies required to be paid to the Trustee; and non-performance or non-observance of any other covenants, agreements or conditions contained in the indentures. Management believes they are in compliance with the covenants of the indentures.

Deferred issuance costs at August 31, 2008, consist of the following:

		Amount
Deferred Issuance Costs at August 31, 2008	$	41,272,747
Less Accumulated Amortization		(29,280,991)
Deferred Issuance Costs, net	$	11,991,756

VARIABLE TO FIXED INTEREST RATE SWAP

OBJECTIVE

In order to hedge against increases in interest rates on variable rate demand bond issues, the Department has entered into five interest rate swap agreements with the objective of reducing the interest rate risk of certain variable rate demand bonds. The variable rate demand bonds were issued at a lower total interest cost than attainable through traditional fixed rate bond structures. The Department has entered into interest rate swap agreements with various rated counterparties. Under the terms of the agreements, the Department makes periodic fixed interest rate payments in exchange for receiving variable rate payments comparable to the rates payable on the variable rate demand bonds. The swap notional amounts amortize in accordance with the scheduled and/or anticipated reductions in the related variable rate demand bond liability. The Department is potentially exposed to loss in the event of nonperformance by the counterparties under the swap agreements. Termination of the swap agreements may result in the Department making or receiving termination payments. Each swap agreement includes optional early termination provisions granting the Department the right, but not an obligation, to terminate the interest rate swaps at par without a termination payment after an effective date.

NOTE 10: BONDED INDEBTEDNESS Cont'd

TERMS AND FAIR VALUE

The terms, including the fair value of the outstanding swaps as of August 31, 2008 are as follows. The fair value of the swaps are not shown in the financial statements. The notional amounts of the swaps match the principal amount of the associated debt.

Counterparty	Notional Amount	Fair Value	Effective Date	Fixed Rate	Variable Rate	Swap Termination Date
UBS AG	$53,000,000	($2,510,824)	9/1/04	3.843 %	63% of LIBOR + .30%	9/1/34 (a)
Goldman Sachs Capital Markets, LP	35,000,000	(1,343,868)	1/1/05	3.6125 %	Lesser of (the greater of 65% of LIBOR and 56% of LIBOR + .45%) and LIBOR	3/1/35 (b)
Bear Stearns Financial Products, Inc. (e)	94,860,000	(3,327,212)	8/1/05	3.99 %	Less of (the greater of 65% of LIBOR and 56% of LIBOR + .45%) and LIBOR	9/1/36 (c)
UBS AG	36,000,000	(1,829,278)	11/15/06	3.857%	63% of LIBOR +.30%	9/1/25 (d)
Bear Stearns Financial Products, Inc. (e)	141,070,000	(4,926,319)	6/5/07	4.013% %	Less of (the greater of (a) 65% of LIBOR and (b) 56% of LIBOR + .45%) and LIBOR	9/1/38 (c)
Total	$359,930,000	($13,937,501)				

a. Swap Agreement has an optional early termination date of March 1, 2014 and every March and September thereafter. The maximum notional amount subject to early termination is equal to 60% of the current notional amount.
b. Swap Agreement has an optional early termination date of September 1, 2014 and every March and September thereafter.
c. Swap Agreement is subject to an early termination date at any time with a 10 business day notice.
d. Swap Agreement has an optional early termination date of March 1, 2016 and every March and September thereafter. The maximum notional amount subject to early termination is current notional amount per the amortization schedule.
e. Bear Stearns Financial Products, Inc. was formerly a subsidiary of The Bear Stearns Companies, Inc. As a result of Bear Stearns' acquisition by JP Morgan Chase & Co. on 3/16/2008, Bear Stearns Financial Products, Inc. operates as a subsidiary of JP Morgan Chase & Co.

CREDIT RISK

As of August 31, 2008, the Department is not exposed to credit risk on any of its outstanding swaps because the swaps have negative fair values. If interest rates change and the fair value of the swaps become positive, the department would be exposed to credit risk on those swaps. The swap agreements contain varying collateral agreements and insurance policies with the counterparties. The credit ratings for the counterparties are as follows.

Counterparty	Standard & Poor's	Moody's	Fitch
UBS AG	AA-	Aa2	AA+
Goldman Sachs Capital Markets, LP	A	Not Rated	AA-
Bear Stearns Financial Products, Inc.	AAA	Aaa	Not Rated

BASIS RISK

The Department's variable-rate bond coupon payments are equivalent to the Bond Market Association (BMA) rate. The swap agreements designate a function of LIBOR as the rate for payments received on these swaps. The Department will be exposed to basis risk should LIBOR and BMA converge. The swap agreements provide an option to terminate as stated above.

NOTE 10: BONDED INDEBTEDNESS Cont'd

ROLLOVER RISK is the risk that arises when a derivative associated with a government's variable-rate debt does not extend all the way to the maturity date of the associated debt, thereby creating a gap in the protection otherwise afforded by the derivative. The Department is not exposed to rollover risk on swap agreements which mature or may be terminated prior to the maturity of the associated debt. The counterparties in the swap agreements have limited rights to terminate the swap. They can terminate only if the Department were to be downgraded below investment grade or default on any swap payments. The swap providers cannot unilaterally terminate any of the swaps subjecting the Department to rollover risk.

The Department has retained optional termination rights which are listed below. They are intended to allow the Department to keep the notional amount in line with bonds outstanding to the extent the Department experiences prepayments.

Associated Debt Issuance	Debt Maturity Date	Swap Termination Date
2004B Single Family	September 2034	May be terminated as early as March 2014
2004D Single Family	March 2035	May be terminated as early as September 2014
2005A Single Family	September 2036	May be terminated at anytime giving 10 day notice
2006H Single Family	September 2037	May be terminated as early as March 2016
2007A Single Family	September 2038	May be terminated at anytime giving 10 day notice

SWAP PAYMENTS AND ASSOCIATED DEBT

Using rates as of August 31, 2008, debt service requirements of the Department's outstanding variable-rate debt and net swap payments are as follows. As rates vary, variable-rate debt bond interest payments and new swap payments will vary. The Department's swap agreements contain scheduled reductions to outstanding notional amounts that are expected to follow scheduled reductions in the associated bonds outstanding.

Fiscal Year Ending August 31	Variable-Rate Bonds Principal	Variable-Rate Bonds Interest	Interest Rate Swaps, Net	Total
2009	$ 515,000	$ 7,485,423	$ 7,408,843	$ 15,409,266

NOTE 10: BONDED INDEBTEDNESS Cont'd

Demand Bonds

The Department currently holds seven single family bond series in the amount $371,000,000 in variable rate demand bonds. The proceeds of these bonds were used to refund outstanding bonds or provide funds for the primary purpose of purchasing mortgaged-backed securities which are pools of first time homebuyer loans. These bond series have the following terms.

Demand Bonds - Standby Purchase Agreements

Single Family Bond Series	Liquidity Provider	Commitment Fee Rate	Outstanding Variable Rate Demand Bonds as of 8/31/08	Bank Bonds Remaining with Liquidity Provider as of 11/14/08	Liquidity Facility Expiration Date
2007A	DEPFA Bank plc	0.09%	$ 141,070,000	$ 139,380,000	06/5/2012
2006H	DEPFA Bank plc	0.09%	36,000,000	36,000,000	11/15/2009
Total DEPFA Bank plc			*$ 177,070,000*	*$ 175,380,000*	
2005A	Dexia Credit Local	0.275%	$ 94,860,000	$ 15,000,000	04/28/2011
2004D	Dexia Credit Local	0.275%	35,000,000	22,000,000	04/28/2011
2004B	Dexia Credit Local	0.275%	53,000,000	52,900,000	04/28/2011
2005C	Dexia Credit Local	0.1225%	7,215,000	4,515,000	12/15/2015
2004A Jr. Lien	Dexia Credit Local	0.315%	3,855,000	600,000	04/28/2011
Total Dexia Credit Local			*$ 193,930,000*	*$ 95,015,000*	
Total Demand Bonds			**$ 371,000,000**	**$ 270,395,000**	

These bonds are subject to purchase on the demand of the holder at a price equal to principal plus accrued interest with proper notice and delivery to the corresponding remarketing agent. If the remarketing agent is unable to remarket any bonds, the liquidity facility will purchase the bonds (bank bonds). If bonds purchased by the liquidity facility are not remarketed according to the terms of the liquidity agreement, the Department will be subject to term out provisions with the corresponding liquidity provider to convert the bonds to an installment loan payable over seven years.

The 2007A series in the amount of $139,380,000 and 2006H series in the amount of $36,000,000 are subject to term out provisions effective within six months of the purchase of the bonds by DEPFA, currently April 2009. If these bonds are not remarketed by April 2009, the Department will be subject to 14 semi-annual payments over 7 years. The Department could potentially pay in principal and interest a total of $160,287,000 and $82,800,000 related to the 2007A and 2006H Series, respectively. Interest was computed using the prime lending rate of 4.00% effective during November 2008 (See Note 12 for related information).

The 2004A Jr. Lien, 2004B, 2004D, 2005A and 2005C variable rate demand bonds currently owned by DEXIA are not subject to term out provisions until six months following the expiration of the liquidity agreement.

Refunding Bonds

On August 22, 2008, the Department issued $14,000,000 in variable rate debt (Series 2008 Addison Park Apartments Multifamily) with a maximum rate of 12% to refund $14,000,000 of outstanding 2004 Multifamily (Addison Park Apartments) bonds. The purpose of the refunding was to establish a new financing structure establishing Freddie Mac as the credit enhancer which would guarantee payments to the bondholders and make the bonds AAA rated. In addition, the refunding transaction would establish a new letter of credit which would satisfy the expiring letter of credit under the original bond issue. The refunding transaction resulted in a cash flow loss of $247,989, and an economic loss of $153,684. Because the new debt is variable rate debt, the economic and cash differences were calculated using the current rate as of August 31, 2008 which is 2.05%. The cash flow and economic impact will fluctuate with the prevailing interest rates. Using the maximum rate allowable by the trust indenture of 12%, the Department could incur a maximum of additional $49,470,502 in debt service payments and an economic loss of $11,482,294 on the refunding.

NOTE 10: BONDED INDEBTEDNESS Cont'd

Pledged and Other Sources (amounts in thousands)

GASB Statement No. 48 requires the following disclosures for "specific revenues that have been formally committed to directly collateralize or secure debt of the Department." The following table summarizes by indenture, pledged and other sources and related expenditures for the Department's revenue bonds. A detail schedule of each bond issue is included in Schedule 2-D.

NOTE 11: EMPLOYEE BENEFITS

PLAN DESCRIPTION

The Department contributes to the Employees Retirement System of Texas (the "System"), a cost-sharing, multiple-employer, defined benefit plan. The Department has implemented GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, which standardizes financial reporting for pensions by state and local government employers. The System provides service retirement, disability retirement benefits, and death benefits to plan members and beneficiaries. The System operates under the authority of provisions contained primarily in Texas Government Code, Title 8, Subtitle B, which is subject to amendment by the Texas Legislature. The System's annual financial report and other required disclosure information are available by writing the Employees Retirement System of Texas, P.O. Box 13207, Austin, Texas, 78711-3207 or by calling (512) 476-6431.

FUNDING POLICY

Under provisions in State law, plan members are required to contribute 6% of their annual covered salary, and the Department contributes an amount equal to 6.45% of the Department's covered payroll. The Department and the employees' contributions to the System for the years ending August 31, 2008, 2007, and 2006, were $1,002,741, $947,383, and $874,775, respectively, equal to the required contributions for each year.

NOTE 12: SUBSEQUENT EVENTS

The recent credit and liquidity crisis precipitated by the failure of Wall Street investment bank Lehman Brothers among others began a cascading effect of rating downgrades. The current crisis affected counterparties which ultimately impacted the Department in various ways as listed below.

On September 8, 2008 the Federal Housing Finance Agency (FHFA) placed FNMA and FHLMC into conservatorship. In addition, the U.S. Department of the Treasury agreed to provide up to $100 billion of capital as needed to FNMA and established a Preferred Stock Purchase Agreement with FHLMC to ensure they can continue to provide stability and liquidity to the U.S. mortgage market. As of August 31, 2008, the Department carried $217,235,754 and $13,768,065 in mortgage backed securities guaranteed by FNMA and FHLMC, respectively. Upon the conservatorship, these mortgage backed securities acquired the explicit guarantee of the U.S. Government.

NOTE 12: SUBSEQUENT EVENTS Cont'd.

On September 15, 2008, American Insurance Group, Inc. was downgraded by all credit rating agencies. Upon the downgrade, the Department decided to opt out of the investment agreements and on October 10, 2008 the standing agreements were terminated. As of August 31, 2008, the Department carried three investment agreements of $3,323,523 for the 2001 A-E RMRB bond issue, $1,220,015 for the 2003A RMRB bond issue and $3,161,147 for the 2000 BCDE RMRB bond issue. Upon the termination, the Department will invest repayments into overnight repurchase agreement held by Texas Treasury Safekeeping Trust Company.

On September 29, 2008, DEPFA Bank was downgraded to a BBB rating by the rating agencies. DEPFA Bank is the liquidity provider for the 2006H Single Family and 2007A Single Family variable rate demand bonds. On October 2, 2008, these bonds were downgraded from A-1 to A-2 by Standard & Poor's rating agency due to DEPFA's downgrade. Upon the downgrade these bonds were no longer eligible investments in tax-exempt money market funds, therefore, the Department began to receive tender notices on these bonds. Once the remarketing of the bonds was unsuccessful, DEPFA Bank acquired temporary ownership of the "bank bonds" until the Department is able to get a new liquidity provider and subsequently have the bonds upgraded in rating.

On September 30, 2008, Dexia Credit Local was downgraded to a AA- rating by credit agencies. Dexia Credit Local is the liquidity provider for the 2004 Junior Lien, 2004B Single Family, 2005A Single Family, and the 2005C Single Family variable rate demand bonds. Upon the downgrade of Dexia Credit Local, but not the Department's bonds, the Department began to receive tender notices on some portion of these bonds. Once the remarketing of the bonds was unsuccessful, Dexia Credit Local acquired temporary ownership of the "bank bonds" until the bonds are successfully remarketed.

TOTAL MULTIFAMILY BONDS	$ 1,411,622						
TOTAL BONDS ISSUED	**$ 3,797,227**						

FOOTNOTES:

(a) The taxable bonds shall be subject to redemption prior to maturity in whole or any part on any interest payment date after the completion date from the proceeds of an optional prepayment of the loan by the borrower.

(b) Variable rate not to exceed the maximum rate permitted by applicable law.

(c) Variable rate could change to fixed rate provided the conversion option is exercised.

(d) No set amortization, per trustee, amortization will occur in $100,000 denominations when the amount in the principal reserve fund exceeds 20% of the issue.

(e) The bonds are subject to redemption, in whole, at the option of the Issuer acting at the direction of the Holders of a majority of the outstanding principal amount of the Bonds.

(f) The Bonds shall be subject to redemption prior to maturity, after giving the required notice, as follows: During the variable interest rate period the bonds shall be subject to optional redemption by the Department, in whole or in part on any business day, at a redemption price equal to 100% of the principal amount thereof to be redeemed plus accrued interest, if any, to the redemption date.

(g) The Series bonds are subject to redemption prior to maturity, after giving notice as provided in the Trust Indendure, as follows: During a daily interest rate period or weekly interest rate period for the Series bonds, the bonds shall be subject to optional redemption by the Department, in whole or in part on any business day, at a redemption price equal to 100% of the principal amount thereof to be redeemed plus accrued interest, if any, to the redemption date.

(h) The bonds are subject to redemption at the option of the Issuer, at the direction of the Borrower, in whole or in part on the first day of any month, in the event and to the extent the trustee receives funds from the Borrower representing an optional prepayment of the principal of the note, at a redemption price equal to the principal thereof, plus accrued interest to the redemption date plus any premium remitted therewith as required by the note.

(i) Bonds are subject to redemption if and to the extent the Borrower is entitled to make, or is required to make, a prepayment pursuant to the loan agreement.

(j) The Bonds are subject to optional redemption in whole or in part upon optional prepayment of the Loan by the Borrower.

(k) The Bonds are subject to optional redemption at the direction of the Borrower on any interest payment date, in whole or in part, at the redemption price (as calculated by the sole bondholder) calculated in accordance with the Exhibit H plus accrued and unpaid interest, if any, to the redemption date. Optional redemptions may be made only in denominations of $100,000 plus integral multiples of $5,000 or for the entire amount of the bonds outstanding.

(l) The Bonds shall be subject to redemption prior to maturity in whole but not in part on any Bond Payment Date on or after fifteen years from Conversion Date, from the proceeds of an optional prepayment of the Loan by the Borrower at a redemption price equal to the principal amount plus accrued and unpaid interest to the date fixed for redemption.

(m) The Bonds may be redeemed by the Trustee at the option of the Issuer, but only upon the written request of the Borrower pursuant of the Loan Agreement, and with the prior written consent of the Bank, in whole or in part, at a redemption price equal to the principal amount, without premium, plus accrued interest to the date of redemptions.

(n) With the prior Written consent of the Credit Facility Provider, the Bonds are subject to optional redemption, in whole or in part, upon optional prepayments on the Bond Mortgage Loan in accordance with the prepayment restrictions set forth in the Bond Mortgage Note and Financing Agreement.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Honorable Rick Perry, Governor,
and the Governing Board of
Texas Department of Housing and Community Affairs:

We have audited the basic financial statements of the Texas Department of Housing and Community Affairs (the "Department") as of and for the year ended August 31, 2008, and have issued our report thereon dated December 18, 2008. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Department's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control over financial reporting.

A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Department's financial statements that is more than inconsequential will not be prevented or detected by the Department's internal control.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Department's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Department's basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, including the Public Funds Investment Act (§2256, Texas Government Code); regulations; contracts; and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the Department in a separate letter dated December 18, 2008.

This report is intended solely for the information and use of the Governing Board, management, and federal and state awarding agencies and pass-through entities, and is not intended to be, and should not be, used by anyone other than these specified parties.

Relating to Agency Performance Evaluation

14. A copy of each quarterly performance report completed by the agency in FY 2006 – 2008.

1st Qtr 2006

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332 - DEPT HOUSING-COMM AFFAIRS
FISCAL YEAR
2/1/2006

Edwina P. Carrington 2/2/06
Edwina P. Carrington Date
Executive Director

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target

Output Measures

1-1-1 MRB PROGRAM - SINGLE FAMILY
1 # HOUSEHOLDS ASST. W/SF MRB

Quarter 1	1,727.00	537.00	537.00	31.09 % *

Explanation of Variance: Households assisted with Single Family Mortgage Revenue Bond originations were higher than targeted because of the increased benefit of the program's interest rates over increasing market interest rates.

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY
1 # HOUSEHOLDS ASST THRU SF HTF

Quarter 1	100.00	15.00	15.00	15.00 % *

Explanation of Variance: A NOFA for the Texas Bootstrap Loan Program was released on September 30, 2005 in the approximate amount of $6,000,000. Deadline for submission of applications was at 5:00 pm on November 18, 2005. This funding represented program awards for fiscal years 2006 and 2007. On January 18, 2006, 17 applications were recommended to the TDCHA's Board of Directors for approval totaling $6,673,322.71 in Housing Trust Funds and Bond Refinancing Residuals. Loans are anticipated to start closing within the 3rd quarter. The loan closings within the 1st quarter represent closings from previous awards.

Prior Amount: 15.00

Prior YTD: 15.00

1-1-4 SECTION 8 RENTAL ASSISTANCE
1 # HOUSEHOLDS ASSISTED

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

1 # HOUSEHOLDS ASSISTED

Quarter 1	2,100.00	1,008.00	1,008.00	48.00 %	*

Explanation of Variance: The targeted measure of 2,100 vouchers was developed when the U. S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on the number of Housing Choice vouchers available. The allocation of HAP funds changed for the Section 8 Program Year beginning January 1, 2005. TDHCA no longer receives HAP funds based on a specified number of vouchers. Instead, for PY 2005 and 2006, TDHCA receives funds from HUD based on the average number of active tenants during May, June, and July, 2004.

1-1-5 FEDERAL TAX CREDITS

1 # HOUSEHOLDS ASST THRU HTC PROGRAM

Quarter 1	18,832.00	2,581.00	2,581.00	13.71 %	*

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% (competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

1-1-6 HOME PROGRAM - MULTIFAMILY

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 1	741.00	22.00	22.00	2.97 %	*

Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the HOME application cycle does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year.

1-1-8 MRB PROGRAM-MULTIFAMILY

1 # HOUSEHOLDS ASST MF MRB PROG

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 # HOUSEHOLDS ASST MF MRB PROG					
Quarter 1	3,500.00	374.00	374.00	10.69 %	*

Explanation of Variance: Total multifamily mortgage revenue bond unit production for the first quarter is lower than targeted due to tighter than expected rental markets in major metropolitan areas; limited access to the bond cap; and increasing construction costs related to natural disasters in Texas and the Gulf region.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
2-1-1 HOUSING RESOURCE CENTER					
1 # REQUESTS COMPLETED					
Quarter 1	5,400.00	1,097.00	1,097.00	20.31 %	
2-2-1 COLONIA SERVICE CENTERS					
1 SERVICE CENTER ON-SITE VISITS					
Quarter 1	600.00	366.00	366.00	61.00 %	*

Explanation of Variance: The better than target performance, reflects technical assistance visits to units of local governments and nonprofit organizations, to assist them with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. This activity was boosted through extensive marketing and technical assistance to nonprofit organizations related to the 2006 and 2007 application cycle for the Texas Bootstrap Loan Program.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
3-1-1 POVERTY-RELATED FUNDS					
1 # PERSONS ASSISTED					
Quarter 1	440,000.00	87,718.00	87,718.00	19.94 %	*

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant and Emergency Shelter Grants (ESG) Program. ESG funds are awarded via a competitive process annually and since subrecipients vary from year to year it is difficult to estimate how many persons will be assisted.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
2 # PERSONS IMPROVED					
Quarter 1	2,000.00	766.00	766.00	38.30 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

3 # SHELTERS ASSISTED					
Quarter 1	70.00	76.00	76.00	108.57 %	*

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). The ESGP grant awards are issued only once each fiscal year and the FY'05 contracts began September 2005 and thus the entire measure is met during the 1st quarter. The Department exceeded the measure set because it is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS					
1 # RECEIVING ENERGY ASSIST					
Quarter 1	63,200.00	11,952.00	11,952.00	18.91 %	*

Explanation of Variance: This quarter, falling toward the end of the CEAP program year, finds energy assistance contractors running out of money – following a year of extreme client demand resulting from rapidly rising energy costs and an elongated air conditioning season.

2 # WEATHERIZED DWELLINGS					
Quarter 1	4,800.00	1,110.00	1,110.00	23.13 %	
4-1-1 MONITOR HOUSING REQUIREMENTS					

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
3 # OF ONSITE REVIEWS					
Quarter 1	888.00	165.00	165.00	18.58 %	*

Explanation of Variance: Onsite reviews were cancelled in September 2005 in the Houston area due to Hurricane Katrina. The number will increase in the 2nd Quarter.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
4-1-2 MONITOR CONTRACT REQUIREMENTS					
1 # OF MONITORING REVIEWS					
Quarter 1	10,725.00	2,798.00	2,798.00	26.09 %	
5-1-1 TITLING AND LICENSING					
1 # SOL ISSUED					
Quarter 1	89,000.00	41,514.00	41,514.00	46.64 %	*

Explanation of Variance: Performance is over the targeted projection due to an increase in applications resulting from lienholders revising Statements of Ownership and Location to reflect the most current mortgage lien information. This is due to a new law that became effective in June 2005 that allows a real property owner to declare a home abandoned if they properly send notices of intent to the owner of the home and all lienholders that are on file with the Department.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
2 # LICENSES ISSUED					
Quarter 1	4,435.00	1,093.00	1,093.00	24.64 %	
5-1-2 INSPECTIONS					
1 # ROUTINE INSPECTIONS					

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 # ROUTINE INSPECTIONS					
Quarter 1	8,000.00	1,071.00	1,071.00	13.39 %	*

Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 27.49%.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
5-1-3 ENFORCEMENT					
1 # COMPLAINTS RESOLVED					
Quarter 1	1,700.00	173.00	173.00	10.18 %	*

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Efficiency Measures					
5-1-3 ENFORCEMENT					
2 AVERAGE TIME RESOLUTION					
Quarter 1	180.00	119.60	119.60	66.44 %	*

Explanation of Variance: This measure is under the targeted projection, which is desirable.

* Varies by 5% or more from target.

2nd Qtr 2006

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332 - DEPT HOUSING-COMM AFFAIRS
FISCAL YEAR
4/7/2006

William Dally
William Dally
Acting Executive Director

4-7-2006
Date

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1-1-1 MRB PROGRAM - SINGLE FAMILY					
1 # HOUSEHOLDS ASST. W/SF MRB					
Quarter 1	1,727.00	537.00	537.00	31.09 %	*

Explanation of Variance: Households assisted with Single Family Mortgage Revenue Bond originations were higher than targeted because of the increased benefit of the program's interest rates over increasing market interest rates.

Prior Amount: 537.00

Prior YTD: 537.00

Quarter 2	1,727.00	704.00	1,241.00	71.86 %	*

Explanation of Variance: Households assisted with Single Family Mortgage Revenue Bond originations were higher than targeted because of the increased benefit of the program's interest rates over increasing market interest rates.

Explanation of Update: Had to reenter number in order to get YTD to calculate correctly.

Prior Amount: 704.00

Prior YTD: 1,256.00

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY

1 # HOUSEHOLDS ASST THRU SF HTF

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

1 # HOUSEHOLDS ASST THRU SF HTF

Quarter 1	100.00	15.00	15.00	15.00 %	*

Explanation of Variance: A NOFA for the Texas Bootstrap Loan Program was released on September 30, 2005 in the approximate amount of $6,000,000. Deadline for submission of applications was at 5:00 pm on November 18, 2005. This funding represented program awards for fiscal years 2006 and 2007. On January 18, 2006, 17 applications were recommended to the TDCHA's Board of Directors for approval totaling $6,673,322.71 in Housing Trust Funds and Bond Refinancing Residuals. Loans are anticipated to start closing within the 3rd quarter. The loan closings within the 1st quarter represent closings from previous awards.

Prior Amount: 15.00

Prior YTD: 15.00

Quarter 2	100.00	15.00	30.00	30.00 %	*

Explanation of Variance: Many homes that are currently under construction have not been completed. It is anticipated that the number of fully closed loans will increase significantly within the 3rd and 4th quarters.

1-1-4 SECTION 8 RENTAL ASSISTANCE

1 # HOUSEHOLDS ASSISTED

Quarter 1	2,100.00	1,008.00	1,008.00	48.00 %	*

Explanation of Variance: The targeted measure of 2,100 vouchers was developed when the U. S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on the number of Housing Choice vouchers available. The allocation of HAP funds changed for the Section 8 Program Year beginning January 1, 2005. TDHCA no longer receives HAP funds based on a specified number of vouchers. Instead, for PY 2005 and 2006, TDHCA receives funds from HUD based on the average number of active tenants during May, June, and July, 2004.

Quarter 2	2,100.00	9.00	1,017.00	48.43 %	

1-1-5 FEDERAL TAX CREDITS

* Varies by 5% or more from target.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

1 # HOUSEHOLDS ASST THRU HTC PROGRAM

Quarter 1	18,832.00	2,185.00	2,185.00	11.60 %	*

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% (competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

Explanation of Update: Number was updated to reflect an administrative correction in the number of units approved by the Board during the 1st Qtr.

Prior Amount: 2,581.00

Prior YTD: 2,581.00

Quarter 2	18,832.00	2,427.00	4,612.00	24.49 %	*

Explanation of Variance: Targets are for combined cyclical and noncyclical allocations. The performance measures reported for the first and second quarter are mostly 4% noncyclical allocations. It is anticipated that the targets will be met once the 9% cyclical allocations are awarded in July.

1-1-6 HOME PROGRAM - MULTIFAMILY

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 1	741.00	62.00	62.00	8.37 %	*

Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the HOME application cycle does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year.

Explanation of Update: 1st Quarter total was increased by 40 units to include households assisted thru Non-CHDO rehab/acquisition activities.

Prior Amount: 22.00

Prior YTD: 22.00

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 # HOUSEHOLDS ASST WITH MF FUNDS					
Quarter 2	741.00	66.00	128.00	17.27 %	*

Explanation of Variance: Average and total development costs have fluctuated significantly but should normalize as the number of awards increase in the 3rd and 4th quarter. Additionally, due to many of the HOME awards being coupled with other cyclical program funds, the production number are below target. It is anticipated that the numbers will increase when the cyclical allocations are awarded during the fourth quarter.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
1-1-8 MRB PROGRAM-MULTIFAMILY					
1 # HOUSEHOLDS ASST MF MRB PROG					
Quarter 1	3,500.00	323.00	323.00	9.23 %	*

Explanation of Variance: Total multifamily mortgage revenue bond unit production for the first quarter is lower than targeted due to tighter than expected rental markets in major metropolitan areas; limited access to the bond cap; and increasing construction costs related to natural disasters in Texas and the Gulf region.

Explanation of Update: The number of MF Bond units was updated to reflect the actual number of units approved by the Board in the 1st quarter.

Prior Amount: 374.00

Prior YTD: 374.00

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Quarter 2	3,500.00	914.00	1,237.00	35.34 %	*

Explanation of Variance: As was discussed in the 1st quarter variance explanation, overall production numbers are lagging but are anticipated to rebound in the 3rd and 4th quarters.

2-1-1 HOUSING RESOURCE CENTER
1 # REQUESTS COMPLETED

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 # REQUESTS COMPLETED					
Quarter 1	5,400.00	1,097.00	1,097.00	20.31 %	
Quarter 2	5,400.00	1,054.00	2,151.00	39.83 %	*

Explanation of Variance: TDHCA made a phone system upgrade during the quarter. A 1-800 number for the entire agency was added and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded by the Department's receptionist to DPPA for response.

2-2-1 COLONIA SERVICE CENTERS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
1 SERVICE CENTER ON-SITE VISITS					
Quarter 1	600.00	366.00	366.00	61.00 %	*

Explanation of Variance: The better than target performance, reflects technical assistance visits to units of local governments and nonprofit organizations, to assist them with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. This activity was boosted through extensive marketing and technical assistance to nonprofit organizations related to the 2006 and 2007 application cycle for the Texas Bootstrap Loan Program.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Quarter 2	600.00	331.00	697.00	116.17 %	*

Explanation of Variance: The activity consisted of technical assistance visits to units of local governments and nonprofit organizations, to assist them with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program, and the Colonia Self-Help Centers. In particular, extensive marketing and technical assistance to nonprofit organizations regarding the 2006 and 2007 application cycle for the Bootstrap during the first half of the year has accounted for the high number of contacts with local governments and nonprofit organizations. In addition, increased interest in the OCI Programs has contributed to OCI exceeding its goal.

3-1-1 POVERTY-RELATED FUNDS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

1 # PERSONS ASSISTED

Quarter 1	440,000.00	87,718.00	87,718.00	19.94 %	*

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant and Emergency Shelter Grants (ESG) Program. ESG funds are awarded via a competitive process annually and since subrecipients vary from year to year it is difficult to estimate how many persons will be assisted.

Quarter 2	440,000.00	128,010.00	215,728.00	49.03 %	

2 # PERSONS IMPROVED

Quarter 1	2,000.00	766.00	766.00	38.30 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Quarter 2	2,000.00	411.00	1,177.00	58.85 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

3 # SHELTERS ASSISTED

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
3 # SHELTERS ASSISTED					
Quarter 1	70.00	76.00	76.00	108.57 %	*

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). The ESGP grant awards are issued only once each fiscal year and the FY'05 contracts began September 2005 and thus the entire measure is met during the 1st quarter. The Department exceeded the measure set because it is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and the ranking of the applications based upon their score.

Quarter 2	70.00	0.00	76.00	108.57 %	*

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). The ESGP grant awards are issued only once each fiscal year and the FY'05 contracts began September 2005 and thus the entire measure is met during the 1st quarter. The Department exceeded the measure set because it is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS
1 # RECEIVING ENERGY ASSIST

Quarter 1	63,200.00	11,952.00	11,952.00	18.91 %	*

Explanation of Variance: This quarter, falling toward the end of the CEAP program year, finds energy assistance contractors running out of money – following a year of extreme client demand resulting from rapidly rising energy costs and an elongated air conditioning season.

Quarter 2	63,200.00	15,087.00	27,039.00	42.78 %	*

Explanation of Variance: Cold weather months (November – April) typically account for roughly 40% of utility assistance demand. Although this quarter's performance satisfies only 96% of a quarter of the year's goal, the cumulative households assisted represent 43% of the annual goal. We anticipate 60 percent or more of demand for program services will occur in the next two quarters.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

2 # WEATHERIZED DWELLINGS

Quarter 1	4,800.00	1,100.00	1,100.00	22.92 %	

Explanation of Update: The 1st quarter number was incorrectly entered as 1,110 instead of 1,100.

Prior Amount: 1,110.00

Prior YTD: 1,110.00

Quarter 2	4,800.00	971.00	2,071.00	43.15 %	*

Explanation of Variance: Winter weather and the end of the program year typically slows weatherization activity in the second quarter of the State fiscal year.

Prior Amount: 971.00

Prior YTD: 2,081.00

4-1-1 MONITOR HOUSING REQUIREMENTS

3 # OF ONSITE REVIEWS

Quarter 1	888.00	165.00	165.00	18.58 %	*

Explanation of Variance: Onsite reviews were cancelled in September 2005 in the Houston area due to Hurricane Katrina. The number will increase in the 2nd Quarter.

Quarter 2	888.00	187.00	352.00	39.64 %	*

Explanation of Variance: Due to a recent turn over in staff that has resulted in a shortage of Compliance Monitors, the number of completed On-site Reviews has not increased as expected. As adjustments are made for this change, the number will rise and the variance will decrease in the following quarters.

4-1-2 MONITOR CONTRACT REQUIREMENTS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 # OF MONITORING REVIEWS					
Quarter 1	10,725.00	2,842.00	2,842.00	26.50 %	

Explanation of Update: Revised to include additional reviews that occured in the 1st Quarter but were not documented until after the LBB reporting deadline.

Prior Amount: 2,798.00

Prior YTD: 2,798.00

Quarter 2	10,725.00	3,444.00	6,286.00	58.61 %	*

Explanation of Variance: Improved tracking of contract performance has resulted in an increase in the total number of monitoring reviews.

Prior Amount: 3,444.00

Prior YTD: 6,242.00

5-1-1 TITLING AND LICENSING

1 # SOL ISSUED

Quarter 1	89,000.00	41,514.00	41,514.00	46.64 %	*

Explanation of Variance: Performance is over the targeted projection due to an increase in applications resulting from lienholders revising Statements of Ownership and Location to reflect the most current mortgage lien information. This is due to a new law that became effective in June 2005 that allows a real property owner to declare a home abandoned if they properly send notices of intent to the owner of the home and all lienholders that are on file with the Department.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

* Varies by 5% or more from target.

3rd Qtr 2006

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332 - DEPT HOUSING-COMM AFFAIRS
FISCAL YEAR
7/6/2006

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

1-1-1 MRB PROGRAM - SINGLE FAMILY
1 # HOUSEHOLDS ASST. W/SF MRB

Quarter 1	1,727.00	537.00	537.00	31.09 %	*

Explanation of Variance: Households assisted with Single Family Mortgage Revenue Bond originations were higher than targeted because of the increased benefit of the program's interest rates over increasing market interest rates.

Prior Amount: 537.00

Prior YTD: 537.00

Quarter 2	1,727.00	704.00	1,241.00	71.86 %	*

Explanation of Variance: Households assisted with Single Family Mortgage Revenue Bond originations were higher than targeted because of the increased benefit of the program's interest rates over increasing market interest rates.

Explanation of Update: Had to reenter number in order to get YTD to calculate correctly.

Prior Amount: 704.00

Prior YTD: 1,256.00

Quarter 3	1,727.00	438.00	1,679.00	97.22 %	*

Explanation of Variance: Same as previous quarter.

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY
1 # HOUSEHOLDS ASST THRU SF HTF

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 # HOUSEHOLDS ASST THRU SF HTF					
Quarter 1	100.00	15.00	15.00	15.00 %	*

Explanation of Variance: A NOFA for the Texas Bootstrap Loan Program was released on September 30, 2005 in the approximate amount of $6,000,000. Deadline for submission of applications was at 5:00 pm on November 18, 2005. This funding represented program awards for fiscal years 2006 and 2007. On January 18, 2006, 17 applications were recommended to the TDCHA's Board of Directors for approval totaling $6,673,322.71 in Housing Trust Funds and Bond Refinancing Residuals. Loans are anticipated to start closing within the 3rd quarter. The loan closings within the 1st quarter represent closings from previous awards.

Prior Amount: 15.00

Prior YTD: 15.00

Quarter 2	100.00	15.00	30.00	30.00 %	*

Explanation of Variance: Many homes that are currently under construction have not been completed. It is anticipated that the number of fully closed loans will increase significantly within the 3rd and 4th quarters.

Quarter 3	100.00	11.00	41.00	41.00 %	*

Explanation of Variance: Many homes that are currently under construction have not been completed. It is anticipated that the number of fully closed loans will increase significantly within the 4th quarter.

1-1-4 SECTION 8 RENTAL ASSISTANCE

1 # HOUSEHOLDS ASSISTED

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

1 # HOUSEHOLDS ASSISTED

Quarter 1	2,100.00	1,008.00	1,008.00	48.00 %	*

Explanation of Variance: The targeted measure of 2,100 vouchers was developed when the U. S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on the number of Housing Choice vouchers available. The allocation of HAP funds changed for the Section 8 Program Year beginning January 1, 2005. TDHCA no longer receives HAP funds based on a specified number of vouchers. Instead, for PY 2005 and 2006, TDHCA receives funds from HUD based on the average number of active tenants during May, June, and July, 2004.

Quarter 2	2,100.00	9.00	1,017.00	48.43 %	
Quarter 3	2,100.00	7.00	1,024.00	48.76 %	*

Explanation of Variance: Variance explanation is the same as 1st quarter.

1-1-5 FEDERAL TAX CREDITS

1 # HOUSEHOLDS ASST THRU HTC PROGRAM

Quarter 1	18,832.00	2,185.00	2,185.00	11.60 %	*

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% (competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

Explanation of Update: Number was updated to reflect an administrative correction in the number of units approved by the Board during the 1st Qtr.

Prior Amount: 2,581.00

Prior YTD: 2,581.00

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 # HOUSEHOLDS ASST THRU HTC PROGRAM					
Quarter 2	18,832.00	2,427.00	4,612.00	24.49 %	*

Explanation of Variance: Targets are for combined cyclical and noncyclical allocations. The performance measures reported for the first and second quarter are mostly 4% noncyclical allocations. It is anticipated that the targets will be met once the 9% cyclical allocations are awarded in July.

Quarter 3	18,832.00	2,143.00	6,755.00	35.87 %	*

Explanation of Variance: The HTC program has experienced slower than anticipated production numbers from 4% HTC developments but expects to meet overall annual goals with the award of 9% HTC developments in the 4th quarter.

1-1-6 HOME PROGRAM - MULTIFAMILY

1 # HOUSEHOLDS ASST WITH MF FUNDS					
Quarter 1	741.00	62.00	62.00	8.37 %	*

Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the HOME application cycle does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year.

Explanation of Update: 1st Quarter total was increased by 40 units to include households assisted thru Non-CHDO rehab/acquisition activities.

Prior Amount: 22.00

Prior YTD: 22.00

Quarter 2	741.00	66.00	128.00	17.27 %	*

Explanation of Variance: Average and total development costs have fluctuated significantly but should normalize as the number of awards increase in the 3rd and 4th quarter. Additionally, due to many of the HOME awards being coupled with other cyclical program funds, the production number are below target. It is anticipated that the numbers will increase when the cyclical allocations are awarded during the fourth quarter.

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 3	741.00	45.00	173.00	23.35 %	*

Explanation of Variance: Production numbers for HOME rental programs are on track to meet annual targets. Although numbers are low, the bulk of awards will occur in the 4th quarter since many applications are layered with 9% HTCs.

1-1-8 MRB PROGRAM-MULTIFAMILY

1 # HOUSEHOLDS ASST MF MRB PROG

Quarter 1	3,500.00	323.00	323.00	9.23 %	*

Explanation of Variance: Total multifamily mortgage revenue bond unit production for the first quarter is lower than targeted due to tighter than expected rental markets in major metropolitan areas; limited access to the bond cap; and increasing construction costs related to natural disasters in Texas and the Gulf region.

Explanation of Update: The number of MF Bond units was updated to reflect the actual number of units approved by the Board in the 1st quarter.

Prior Amount: 374.00

Prior YTD: 374.00

Quarter 2	3,500.00	914.00	1,237.00	35.34 %	*

Explanation of Variance: As was discussed in the 1st quarter variance explanation, overall production numbers are lagging but are anticipated to rebound in the 3rd and 4th quarters.

Quarter 3	3,500.00	294.00	1,531.00	43.74 %	*

Explanation of Variance: Production numbers of MF Bonds are mixed from initial estimates. New construction appears to be far below targets, while rehab developments are exceeding targets annual targets already. We believe this is a factor of high land costs and resistance to new affordable developments from neighborhood groups. The average amount of bonds per household are exceeding expectations, along with the average cost of new construction. However, the average cost of rehab units are lower than anticiapted for the year. Factors for these trend include rising construction and land costs, tighter housing markets in metropolitain areas and increases in bond yields to investors.

* Varies by 5% or more from target.

Agency code: 332 Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

2-1-1 HOUSING RESOURCE CENTER
1 # REQUESTS COMPLETED

	Target	Actual	YTD	Percent	
Quarter 1	5,400.00	1,097.00	1,097.00	20.31 %	
Quarter 2	5,400.00	1,054.00	2,151.00	39.83 %	*

Explanation of Variance: TDHCA made a phone system upgrade during the quarter. A 1-800 number for the entire agency was added and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded by the Department's receptionist to DPPA for response.

	Target	Actual	YTD	Percent	
Quarter 3	5,400.00	1,540.00	3,691.00	68.35 %	*

Explanation of Variance: While the number of responses increased over the previous quarter due to better internal tracking, the reason for the overall YTD variance is the same as that reported in the 2nd Quarter.

2-2-1 COLONIA SERVICE CENTERS
1 SERVICE CENTER ON-SITE VISITS

	Target	Actual	YTD	Percent	
Quarter 1	600.00	366.00	366.00	61.00 %	*

Explanation of Variance: The better than target performance, reflects technical assistance visits to units of local governments and nonprofit organizations, to assist them with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. This activity was boosted through extensive marketing and technical assistance to nonprofit organizations related to the 2006 and 2007 application cycle for the Texas Bootstrap Loan Program.

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
1 SERVICE CENTER ON-SITE VISITS					
Quarter 2	600.00	331.00	697.00	116.17 %	*

Explanation of Variance: The activity consisted of technical assistance visits to units of local governments and nonprofit organizations, to assist them with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program, and the Colonia Self-Help Centers. In particular, extensive marketing and technical assistance to nonprofit organizations regarding the 2006 and 2007 application cycle for the Bootstrap during the first half of the year has accounted for the high number of contacts with local governments and nonprofit organizations. In addition, increased interest in the OCI Programs has contributed to OCI exceeding its goal.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Quarter 3	600.00	359.00	1,056.00	176.00 %	*

Explanation of Variance: Variance explanation is the same as the previous quarter.

3-1-1 POVERTY-RELATED FUNDS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
1 # PERSONS ASSISTED					
Quarter 1	440,000.00	87,718.00	87,718.00	19.94 %	*

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant and Emergency Shelter Grants (ESG) Program. ESG funds are awarded via a competitive process annually and since subrecipients vary from year to year it is difficult to estimate how many persons will be assisted.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Quarter 2	440,000.00	128,010.00	215,728.00	49.03 %	
Quarter 3	440,000.00	121,643.00	337,371.00	76.68 %	
2 # PERSONS IMPROVED					

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	

Output Measures

2 # PERSONS IMPROVED

Quarter 1	2,000.00	766.00	766.00	38.30 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Quarter 2	2,000.00	411.00	1,177.00	58.85 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Quarter 3	2,000.00	251.00	1,428.00	71.40 %	

3 # SHELTERS ASSISTED

Quarter 1	70.00	76.00	76.00	108.57 %	*

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). The ESGP grant awards are issued only once each fiscal year and the FY'05 contracts began September 2005 and thus the entire measure is met during the 1st quarter. The Department exceeded the measure set because it is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and the ranking of the applications based upon their score.

Agency code: 332 Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
3 # SHELTERS ASSISTED					
Quarter 2	70.00	0.00	76.00	108.57 %	*

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). The ESGP grant awards are issued only once each fiscal year and the FY'05 contracts began September 2005 and thus the entire measure is met during the 1st quarter. The Department exceeded the measure set because it is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and the ranking of the applications based upon their score.

Quarter 3	70.00	0.00	76.00	108.57 %	*

Explanation of Variance: Variance explanation is the same as previous quarter.

3-2-1 ENERGY ASSISTANCE PROGRAMS

1 # RECEIVING ENERGY ASSIST

Quarter 1	63,200.00	11,952.00	11,952.00	18.91 %	*

Explanation of Variance: This quarter, falling toward the end of the CEAP program year, finds energy assistance contractors running out of money – following a year of extreme client demand resulting from rapidly rising energy costs and an elongated air conditioning season.

Quarter 2	63,200.00	15,087.00	27,039.00	42.78 %	*

Explanation of Variance: Cold weather months (November – April) typically account for roughly 40% of utility assistance demand. Although this quarter's performance satisfies only 96% of a quarter of the year's goal, the cumulative households assisted represent 43% of the annual goal. We anticipate 60 percent or more of demand for program services will occur in the next two quarters.

Quarter 3	63,200.00	16,495.00	43,534.00	68.88 %	*

Explanation of Variance: Utility customers experienced high energy rates and unusually hot weather in the Spring.

2 # WEATHERIZED DWELLINGS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Output Measures					
2 # WEATHERIZED DWELLINGS					
Quarter 1	4,800.00	1,100.00	1,100.00	22.92 %	
Quarter 2	4,800.00	971.00	2,071.00	43.15 %	*
Quarter 3	4,800.00	1,079.00	3,150.00	65.63 %	*

Output Measures

2 # WEATHERIZED DWELLINGS

Quarter 1 4,800.00 | 1,100.00 | 1,100.00 | 22.92 %

Explanation of Update: The 1st quarter number was incorrectly entered as 1,110 instead of 1,100.

Prior Amount: 1,110.00

Prior YTD: 1,110.00

Quarter 2 4,800.00 | 971.00 | 2,071.00 | 43.15 % *

Explanation of Variance: Winter weather and the end of the program year typically slows weatherization activity in the second quarter of the State fiscal year.

Prior Amount: 971.00

Prior YTD: 2,081.00

Quarter 3 4,800.00 | 1,079.00 | 3,150.00 | 65.63 % *

Explanation of Variance: Program year closeout activities, high production costs, and funding difficulties supressed weatherization production in the third quarter.

4-1-1 MONITOR HOUSING REQUIREMENTS

3 # OF ONSITE REVIEWS

Quarter 1 888.00 | 165.00 | 165.00 | 18.58 % *

Explanation of Variance: Onsite reviews were cancelled in September 2005 in the Houston area due to Hurricane Katrina. The number will increase in the 2nd Quarter.

* Varies by 5% or more from target.

Agency code: 332 Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target

Output Measures

3 # OF ONSITE REVIEWS

Quarter 2	888.00	187.00	352.00	39.64 % *

Explanation of Variance: Due to a recent turn over in staff that has resulted in a shortage of Compliance Monitors, the number of completed On-site Reviews has not increased as expected. As adjustments are made for this change, the number will rise and the variance will decrease in the following quarters.

Quarter 3	888.00	259.00	611.00	68.81 % *

Explanation of Variance: While the number of reviews increased over the previous quarter, the variance caused by the issues described in the 1st and 2nd quarters continues to be addressed. It is expected that progress towards reducing the current 7% difference between the actual and target number will continue in the fourth quarter.

4-1-2 MONITOR CONTRACT REQUIREMENTS

1 # OF MONITORING REVIEWS

Quarter 1	10,725.00	2,842.00	2,842.00	26.50 %

Explanation of Update: Revised to include additional reviews that occured in the 1st Quarter but were not documented until after the LBB reporting deadline.

Prior Amount: 2,798.00

Prior YTD: 2,798.00

Quarter 2	10,725.00	3,444.00	6,286.00	58.61 % *

Explanation of Variance: Improved tracking of contract performance has resulted in an increase in the total number of monitoring reviews.

Prior Amount: 3,444.00

Prior YTD: 6,242.00

* Varies by 5% or more from target.

Agency code: 332 Agency name: **DEPT HOUSING-COMM AFFAIRS**

5-1-1 TITLING AND LICENSING

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
1 # SOL ISSUED					
Quarter 1	89,000.00	41,514.00	41,514.00	46.64 %	*

Explanation of Variance: Performance is over the targeted projection due to an increase in applications resulting from lienholders revising Statements of Ownership and Location to reflect the most current mortgage lien information. This is due to a new law that became effective in June 2005 that allows a real property owner to declare a home abandoned if they properly send notices of intent to the owner of the home and all lienholders that are on file with the Department.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	
Quarter 2	89,000.00	20,422.00	61,936.00	69.59 %	*

Explanation of Variance: Performance is over the targeted projection due to an increase in applications resulting from lienholders revising Statements of Ownership and Location to reflect the most current mortgage lien information. This is due to a new law that became effective in June 2005 that allows a real property owner to declare a home abandoned if they properly send notices of intent to the owner of the home and all lienholders that are on file with the Department.

Quarter 3	1,727.00	438.00	1,679.00	97.22 % *	1,208.90 - 1,381.60
Explanation of Variance: Same as previous quarter.					
Quarter 4	1,727.00	576.00	2,255.00	130.57 % *	1,640.65 - 1,813.35
Explanation of Variance: Same as 2nd Quarter. Note that the 4th quarter # of loans was reduced by 1 to resolve a reporting discrepancy from the first quarter.					
1-1-3 HOUSING TRUST FUND - SINGLE FAMILY					
1 # HOUSEHOLDS ASST THRU SF HTF					
Quarter 1	100.00	15.00	15.00	15.00 % *	20.00 - 30.00
Explanation of Variance: A NOFA for the Texas Bootstrap Loan Program was released on September 30, 2005 in the approximate amount of $6,000,000. Deadline for submission of applications was at 5:00 pm on November 18, 2005. This funding represented program awards for fiscal years 2006 and 2007. On January 18, 2006, 17 applications were recommended to the TDCHA's Board of Directors for approval totaling $6,673,322.71 in Housing Trust Funds and Bond Refinancing Residuals. Loans are anticipated to start closing within the 3rd quarter. The loan closings within the 1st quarter represent closings from previous awards.					
Quarter 2	100.00	15.00	30.00	30.00 % *	45.00 - 55.00
Explanation of Variance: Many homes that are currently under construction have not been completed. It is anticipated that the number of fully closed loans will increase significantly within the 3rd and 4th quarters.					
Quarter 3	100.00	11.00	41.00	41.00 % *	70.00 - 80.00
Explanation of Variance: Many homes that are currently under construction have not been completed. It is anticipated that the number of fully closed loans will increase significantly within the 4th quarter.					
Quarter 4	100.00	25.00	66.00	66.00 % *	95.00 - 105.00
Explanation of Variance: Need variance explanation.					

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1-1-4 SECTION 8 RENTAL ASSISTANCE					
1 # HOUSEHOLDS ASSISTED					
Quarter 1	2,100.00	1,008.00	1,008.00	48.00 % *	420.00 - 630.00
Explanation of Variance: The targeted measure of 2,100 vouchers was developed when the U. S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on the number of Housing Choice vouchers available. The allocation of HAP funds changed for the Section 8 Program Year beginning January 1, 2005. TDHCA no longer receives HAP funds based on a specified number of vouchers. Instead, for PY 2005 and 2006, TDHCA receives funds from HUD based on the average number of active tenants during May, June, and July, 2004.					
Quarter 2	2,100.00	9.00	1,017.00	48.43 %	945.00 - 1,155.00
Quarter 3	2,100.00	7.00	1,024.00	48.76 % *	1,470.00 - 1,680.00
Explanation of Variance: Variance explanation is the same as 1st quarter.					
Quarter 4	2,100.00	1.00	1,025.00	48.81 % *	1,995.00 - 2,205.00
Explanation of Variance: Variance explanation is the same as the 1st quarter.					
1-1-5 FEDERAL TAX CREDITS					

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # HOUSEHOLDS ASST THRU HTC PROGRAM					
Quarter 1	18,832.00	2,353.00	2,353.00	12.49 % *	3,766.40 - 5,649.60

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% (competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

Quarter 2	18,832.00	2,628.00	4,981.00	26.45 % *	8,474.40 - 10,357.60

Explanation of Variance: Targets are for combined cyclical and noncyclical allocations. The performance measures reported for the first and second quarter are mostly 4% noncyclical allocations. It is anticipated that the targets will be met once the 9% cyclical allocations are awarded in July.

Quarter 3	18,832.00	2,298.00	7,279.00	38.65 % *	13,182.40 - 15,065.60

Explanation of Variance: The HTC program has experienced slower than anticipated production numbers from 4% HTC developments but expects to meet overall annual goals with the award of 9% HTC developments in the 4th quarter.

Quarter 4	18,832.00	9,971.00	17,250.00	91.60 % *	17,890.40 - 19,773.60

Explanation of Variance: In 06, fewer "4%" units associated with developments that receive Private Activity Bond (PAB) financing were approved than originally projected. PAB financed developments are primarily in urban/metro market; it is believed that the reduced number of associated units is related to over-saturation and concentration of affordable housing in these communities. Sharp increases in development costs after Hurricanes Katrina and Rita also reduced units served by requiring more subsidy per unit. Projections for 07-09 reflect continued reduction in 4% units and escalating development costs associated with Hurricanes Katrina and Rita.

1-1-6 HOME PROGRAM - MULTIFAMILY

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2006 Target**	**2006 Actual**	**2006 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # HOUSEHOLDS ASST WITH MF FUNDS					
Quarter 1	741.00	62.00	62.00	8.37 % *	148.20 - 222.30

Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the HOME application cycle does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year.

Quarter 2	741.00	66.00	128.00	17.27 % *	333.45 - 407.55

Explanation of Variance: Average and total development costs have fluctuated significantly but should normalize as the number of awards increase in the 3rd and 4th quarter. Additionally, due to many of the HOME awards being coupled with other cyclical program funds, the production number are below target. It is anticipated that the numbers will increase when the cyclical allocations are awarded during the fourth quarter.

Quarter 3	741.00	45.00	173.00	23.35 % *	518.70 - 592.80

Explanation of Variance: Production numbers for HOME rental programs are on track to meet annual targets. Although numbers are low, the bulk of awards will occur in the 4th quarter since many applications are layered with 9% HTCs.

Quarter 4	741.00	293.00	466.00	62.89 % *	703.95 - 778.05

Explanation of Variance: Despite strong indications early in the HOME MF cycle, the total number of units to be produced was significantly lower than anticipated. One primary weakness in current program rules was the ability of applicants to minimize HOME units layered with HTC properties.

1-1-8 MRB PROGRAM-MULTIFAMILY

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # HOUSEHOLDS ASST MF MRB PROG					
Quarter 1	3,500.00	323.00	323.00	9.23 % *	700.00 - 1,050.00

Explanation of Variance: Total multifamily mortgage revenue bond unit production for the first quarter is lower than targeted due to tighter than expected rental markets in major metropolitan areas; limited access to the bond cap; and increasing construction costs related to natural disasters in Texas and the Gulf region.

Quarter 2	3,500.00	914.00	1,237.00	35.34 % *	1,575.00 - 1,925.00

Explanation of Variance: As was discussed in the 1st quarter variance explanation, overall production numbers are lagging but are anticipated to rebound in the 3rd and 4th quarters.

Quarter 3	3,500.00	294.00	1,531.00	43.74 % *	2,450.00 - 2,800.00

Explanation of Variance: Production numbers of MF Bonds are mixed from initial estimates. New construction appears to be far below targets, while rehab developments are exceeding targets annual targets already. We believe this is a factor of high land costs and resistance to new affordable developments from neighborhood groups. The average amount of bonds per household are exceeding expectations, along with the average cost of new construction. However, the average cost of rehab units are lower than anticiapted for the year. Factors for these trend include rising construction and land costs, tighter housing markets in metropolitain areas and increases in bond yields to investors.

Quarter 4	3,500.00	1,596.00	3,127.00	89.34 % *	3,325.00 - 3,675.00

Explanation of Variance: Households served through this program in 06 were less than anticipated as a result of a reduced demand for Private Activity Bond financing. PAB financed developments are primarily in urban/metro market; it is believed that the reduced number of associated units is related to over-saturation and concentration of affordable housing in these communities. Sharp increases in development costs after Hurricanes Katrina and Rita also reduced units served by requiring more subsidy per unit. Projections for 07-09 reflect continued reduction in demand and escalating development costs associated with Hurricanes Katrina and Rita.

2-1-1 HOUSING RESOURCE CENTER

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # REQUESTS COMPLETED					
Quarter 1	5,400.00	1,097.00	1,097.00	20.31 %	1,080.00 - 1,620.00
Quarter 2	5,400.00	1,054.00	2,151.00	39.83 % *	2,430.00 - 2,970.00

Explanation of Variance: TDHCA made a phone system upgrade during the quarter. A 1-800 number for the entire agency was added and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded by the Department's receptionist to DPPA for response.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Quarter 3	5,400.00	1,540.00	3,691.00	68.35 % *	3,780.00 - 4,320.00

Explanation of Variance: While the number of responses increased over the previous quarter due to better internal tracking, the reason for the overall YTD variance is the same as that reported in the 2nd Quarter.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Quarter 4	5,400.00	1,314.00	5,005.00	92.69 % *	5,130.00 - 5,670.00

Explanation of Variance: The reason for the overall YTD variance is the same as that reported in the 2nd Quarter.

2-2-1 COLONIA SERVICE CENTERS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
1 SERVICE CENTER ON-SITE VISITS					
Quarter 1	600.00	366.00	366.00	61.00 % *	120.00 - 180.00

Explanation of Variance: The better than target performance, reflects technical assistance visits to units of local governments and nonprofit organizations, to assist them with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. This activity was boosted through extensive marketing and technical assistance to nonprofit organizations related to the 2006 and 2007 application cycle for the Texas Bootstrap Loan Program.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Quarter 2	600.00	331.00	697.00	116.17 % *	270.00 - 330.00

Explanation of Variance: The activity consisted of technical assistance visits to units of local governments and nonprofit organizations, to assist them with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program, and the Colonia Self-Help Centers. In particular, extensive marketing and technical assistance to nonprofit organizations regarding the 2006 and 2007 application cycle for the Bootstrap during the first half of the year has accounted for the high number of contacts with local governments and nonprofit organizations. In addition, increased interest in the OCI Programs has contributed to OCI exceeding its goal.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Quarter 3	600.00	359.00	1,056.00	176.00 % *	420.00 - 480.00

Explanation of Variance: Variance explanation is the same as the previous quarter.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Quarter 4	600.00	270.00	1,326.00	221.00 % *	570.00 - 630.00

Explanation of Variance: Variance explanation is the same as the previous quarter.

3-1-1 POVERTY-RELATED FUNDS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # PERSONS ASSISTED					
Quarter 1	440,000.00	87,718.00	87,718.00	19.94 % *	88,000.00 - 132,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant and Emergency Shelter Grants (ESG) Program. ESG funds are awarded via a competitive process annually and since subrecipients vary from year to year it is difficult to estimate how many persons will be assisted.

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Quarter 2	440,000.00	128,010.00	215,728.00	49.03 %	198,000.00 - 242,000.00
Quarter 3	440,000.00	121,643.00	337,371.00	76.68 %	308,000.00 - 352,000.00
Quarter 4	440,000.00	211,791.00	549,162.00	124.81 % *	418,000.00 - 462,000.00

Explanation of Variance: Beginning in January, 2006, the reporting procedures for CSBG subrecipients was revised by TDHCA. The revision allowed these subrecipients to report persons assisted through any programs they operate. As a result, a higher number of persons assisted were reported.

Note: This number contains an adjustment of 8,409 to account for administrative adjustments in the number of persons served in previous quarters.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/<u>Strategy</u>/Measure	**2006 Target**	**2006 Actual**	**2006 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
2 # PERSONS IMPROVED					
Quarter 1	2,000.00	766.00	766.00	38.30 % *	400.00 - 600.00

<u>Explanation of Variance:</u> Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Quarter 2	2,000.00	411.00	1,177.00	58.85 % *	900.00 - 1,100.00

<u>Explanation of Variance:</u> Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Quarter 3	2,000.00	251.00	1,428.00	71.40 %	1,400.00 - 1,600.00
Quarter 4	2,000.00	230.00	1,658.00	82.90 % *	1,900.00 - 2,100.00

<u>Explanation of Variance:</u> CSBG subrecipients use intensive case management programs to help persons transition out of poverty. These programs are extremely labor intensive and helping individual clients to make this transition may take from 90 days to several years.

A major factor which affected case management efforts was Hurricanes Katrina and Rita. CSBG subrecipients diverted staff resources from case management to emergency assistance to assist in relief efforts and to provide short and long term assistance to individuals impacted by the hurricanes.

Another factor which diverted staff resources from case management was the large increases in fuel costs which increased the number of persons seeking emergency utility assistance.

Note: This number contains an adjustment of -154 to account for administrative adjustments in the number of persons served in previous quarters.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
3 # SHELTERS ASSISTED					
Quarter 1	70.00	76.00	76.00	108.57 % *	14.00 - 21.00

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). The ESGP grant awards are issued only once each fiscal year and the FY'05 contracts began September 2005 and thus the entire measure is met during the 1st quarter. The Department exceeded the measure set because it is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and the ranking of the applications based upon their score.

Quarter 2	70.00	0.00	76.00	108.57 % *	31.50 - 38.50

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). The ESGP grant awards are issued only once each fiscal year and the FY'05 contracts began September 2005 and thus the entire measure is met during the 1st quarter. The Department exceeded the measure set because it is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and the ranking of the applications based upon their score.

Quarter 3	70.00	0.00	76.00	108.57 % *	49.00 - 56.00

Explanation of Variance: Variance explanation is the same as previous quarter.

Quarter 4	70.00	0.00	76.00	108.57 % *	66.50 - 73.50

Explanation of Variance: Variance explanation is the same as the 2nd Quarter.

3-2-1 ENERGY ASSISTANCE PROGRAMS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # RECEIVING ENERGY ASSIST					
Quarter 1	63,200.00	11,952.00	11,952.00	18.91 % *	12,640.00 - 18,960.00

Explanation of Variance: This quarter, falling toward the end of the CEAP program year, finds energy assistance contractors running out of money – following a year of extreme client demand resulting from rapidly rising energy costs and an elongated air conditioning season.

Quarter 2	63,200.00	15,087.00	27,039.00	42.78 % *	28,440.00 - 34,760.00

Explanation of Variance: Cold weather months (November – April) typically account for roughly 40% of utility assistance demand. Although this quarter's performance satisfies only 96% of a quarter of the year's goal, the cumulative households assisted represent 43% of the annual goal. We anticipate 60 percent or more of demand for program services will occur in the next two quarters.

Quarter 3	63,200.00	16,495.00	43,534.00	68.88 % *	44,240.00 - 50,560.00

Explanation of Variance: The distribution of this year's available funding to local contractors did not occur until the beginning of the second quarter. This suppressed the level of energy assistance activities that occurred through the 3rd quarter. As can be seen by the increase in activity between the 2nd and 3rd quarters, utility customers experienced higher energy rates and unusually hot weather in the Spring which resulted in increasing demand. This trend is expected to continue during the summer months. It is anticipated that the annual performance target will be exceeded at the conclusion of the 4th Quarter.

Quarter 4	63,200.00	43,454.00	86,988.00	137.64 % *	60,040.00 - 66,360.00

Explanation of Variance: The following items caused this outcome to exceed projections.
1) There was increased demand for utility assistance by customers in summer months due to high energy rates and unusually hot weather.
2) The program received an infusion of LIHEAP funds in addition to its budgeted annual funding amount.'
3) Program design changes were implemented that also allowed more households to be served.

2 # WEATHERIZED DWELLINGS					
Quarter 1	4,800.00	1,100.00	1,100.00	22.92 %	960.00 - 1,440.00
Quarter 2	4,800.00	971.00	2,071.00	43.15 % *	2,160.00 - 2,640.00

Explanation of Variance: Winter weather and the end of the program year typically slows weatherization activity in the second quarter of the State fiscal year.

Quarter 3	4,800.00	1,079.00	3,150.00	65.63 % *	3,360.00 - 3,840.00

Explanation of Variance: Program year closeout activities, high production costs, and funding difficulties supressed weatherization production in the third quarter.

Quarter 4	4,800.00	754.00	3,904.00	81.33 % *	4,560.00 - 5,040.00

Explanation of Variance: Mid year changes in the program design allowed for higher expenditures per unit (in order to assist lower income households) that resulted in lower than projected performance for the year.

4-1-1 MONITOR HOUSING REQUIREMENTS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target		Target Range
Output Measures						
3 # OF ONSITE REVIEWS						
Quarter 1	888.00	165.00	165.00	18.58 %	*	177.60 - 266.40
Explanation of Variance: Onsite reviews were cancelled in September 2005 in the Houston area due to Hurricane Katrina. The number will increase in the 2nd Quarter.						
Quarter 2	888.00	187.00	352.00	39.64 %	*	399.60 - 488.40
Explanation of Variance: Due to a recent turn over in staff that has resulted in a shortage of Compliance Monitors, the number of completed On-site Reviews has not increased as expected. As adjustments are made for this change, the number will rise and the variance will decrease in the following quarters.						
Quarter 3	888.00	259.00	611.00	68.81 %	*	621.60 - 710.40
Explanation of Variance: While the number of reviews increased over the previous quarter, the variance caused by the issues described in the 1st and 2nd quarters continues to be addressed. It is expected that progress towards reducing the current 7% difference between the actual and target number will continue in the fourth quarter.						
Quarter 4	888.00	267.00	878.00	98.87 %		843.60 - 932.40
4-1-2 MONITOR CONTRACT REQUIREMENTS						
1 # OF MONITORING REVIEWS						
Quarter 1	10,725.00	2,842.00	2,842.00	26.50 %		2,145.00 - 3,217.50
Quarter 2	10,725.00	3,444.00	6,286.00	58.61 %	*	4,826.25 - 5,898.75
Explanation of Variance: Improved tracking of contract performance has resulted in an increase in the total number of monitoring reviews.						
Quarter 3	10,725.00	3,993.00	10,279.00	95.84 %	*	7,507.50 - 8,580.00
Explanation of Variance: Variance explanation is the same as the previous quarter:						
Quarter 4	10,725.00	3,130.00	13,409.00	125.03 %	*	10,188.75 - 11,261.25
Explanation of Variance: TDHCA reviewed all Single Audits received by Contract Administrators that expended over $500K in federal funds during their fiscal year. The target for this measure is being revised in 2008/2009 to better estimate the actual number of reviews conducted annually. Because the number of contracts administered during the fiscal year was greater than anticipated, the Department was required to conduct a greater number of desk reviews.						
5-1-1 TITLING AND LICENSING						

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # SOL ISSUED					
Quarter 1	89,000.00	41,514.00	41,514.00	46.64 % *	17,800.00 - 26,700.00
Explanation of Variance: Performance is over the targeted projection due to an increase in applications resulting from lienholders revising Statements of Ownership and Location to reflect the most current mortgage lien information. This is due to a new law that became effective in June 2005 that allows a real property owner to declare a home abandoned if they properly send notices of intent to the owner of the home and all lienholders that are on file with the Department.					
Quarter 2	89,000.00	20,422.00	61,936.00	69.59 % *	40,050.00 - 48,950.00
Explanation of Variance: Performance is over the targeted projection due to an increase in applications resulting from lienholders revising Statements of Ownership and Location to reflect the most current mortgage lien information. This is due to a new law that became effective in June 2005 that allows a real property owner to declare a home abandoned if they properly send notices of intent to the owner of the home and all lienholders that are on file with the Department.					
Quarter 3	89,000.00	21,557.00	83,493.00	93.81 % *	62,300.00 - 71,200.00
Explanation of Variance: Variance explanation is the same as previous quarter.					
Quarter 4	89,000.00	22,645.00	106,138.00	119.26 % *	84,550.00 - 93,450.00
Explanation of Variance: Variance explanation is the same as previous quarter.					
2 # LICENSES ISSUED					
Quarter 1	4,435.00	1,093.00	1,093.00	24.64 %	887.00 - 1,330.50
Quarter 2	4,435.00	1,016.00	2,109.00	47.55 %	1,995.75 - 2,439.25
Quarter 3	4,435.00	1,159.00	3,268.00	73.69 %	3,104.50 - 3,548.00
Quarter 4	4,435.00	807.00	4,075.00	91.88 % *	4,213.25 - 4,656.75
Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications resulting from a continued slowdown of activity in the industry.					
5-1-2 INSPECTIONS					

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # ROUTINE INSPECTIONS					
Quarter 1	8,000.00	1,071.00	1,071.00	13.39 % *	1,600.00 - 2,400.00
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 27.49%.					
Quarter 2	8,000.00	1,240.00	2,311.00	28.89 % *	3,600.00 - 4,400.00
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 29%.					
Quarter 3	8,000.00	1,395.00	3,706.00	46.33 % *	5,600.00 - 6,400.00
Explanation of Variance: Variance explanation is the same as previous quarter.					
Quarter 4	8,000.00	1,397.00	5,103.00	63.79 % *	7,600.00 - 8,400.00
Explanation of Variance: Variance explanation is the same as previous quarter. Actual YTD inspection rate is 30.38%.					
5-1-3 ENFORCEMENT					
1 # COMPLAINTS RESOLVED					
Quarter 1	1,700.00	173.00	173.00	10.18 % *	340.00 - 510.00
Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.					
Quarter 2	1,700.00	272.00	445.00	26.18 % *	765.00 - 935.00
Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.					
Quarter 3	1,700.00	250.00	695.00	40.88 % *	1,190.00 - 1,360.00
Explanation of Variance: Variance explanation is the same as the previous quarter.					
Quarter 4	1,700.00	307.00	1,002.00	58.94 % *	1,615.00 - 1,785.00
Explanation of Variance: Variance explanation is the same as the previous quarter.					
Efficiency Measures					
5-1-3 ENFORCEMENT					

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2006 Target	2006 Actual	2006 YTD	Percent of Annual Target	Target Range
Efficiency Measures					
2 AVERAGE TIME RESOLUTION					
Quarter 1	180.00	119.60	119.60	66.44 % *	171.00 - 189.00
Explanation of Variance: This measure is under the targeted projection, which is desirable.					
Quarter 2	180.00	161.70	145.40	80.78 % *	171.00 - 189.00
Explanation of Variance: This measure is under the targeted projection, which is desirable.					
Quarter 3	180.00	189.50	161.20	89.56 % *	171.00 - 189.00
Explanation of Variance: Variance explanation is the same as the previous quarter.					
Quarter 4	180.00	228.40	181.80	101.00 %	171.00 - 189.00

* Varies by 5% or more from target.

ACTUAL PERFORMANCE FOR EXPLANATORY MEASURES
332 - DEPT HOUSING-COMM AFFAIRS
FISCAL YEAR 2006
3/14/2007

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2006 Target**	**2006 YTD**	**Percent of Annual Target**	**Target Range**
Explanatory/Input Measures				
5-1-2 INSPECTIONS				
1 # INSTALLATION REPORTS				
Quarter 1	20,000.00	16,799.00	84.00 % *	19,000.00 - 21,000.00

Explanation of Variance: Fewer reports are received due to the continued slowdown in the industry. The installation forms that we receive incomplete are not included in this total because they are not data entered in the database.

Type/Strategy/Measure	**2006 Target**	**2006 YTD**	**Percent of Annual Target**	**Target Range**
5-1-3 ENFORCEMENT				
1 # JURISDICTIONAL COMPLAINT RECEIVED				
Quarter 1	1,800.00	1,006.00	55.89 % *	1,710.00 - 1,890.00

Explanation of Variance: This measure is under the targeted projection, which is desirable because the Department encourages the informal resolution of customer concerns prior to their issues becoming official complaints.

* Varies by 5% or more from target.

1st Qtr 2007

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332 - DEPT HOUSING-COMM AFFAIRS
FISCAL YEAR
1/10/2007

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range

Output Measures

1-1-1 MRB PROGRAM - SINGLE FAMILY
1 # HOUSEHOLDS ASST. W/SF MRB

Quarter 1	1,727.00	816.00	816.00	47.25 % *	345.40 - 518.10

Explanation of Variance: Originations were higher as a result of increased market interest rates.

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY
1 # HOUSEHOLDS ASST THRU SF HTF

Quarter 1	100.00	22.00	22.00	22.00 %	20.00 - 30.00

1-1-4 SECTION 8 RENTAL ASSISTANCE
1 # HOUSEHOLDS ASSISTED

Quarter 1	2,100.00	930.00	930.00	44.29 % *	420.00 - 630.00

Explanation of Variance: The targeted measure of 2,100 vouchers was developed:
a) prior to the Department's transfer of 560 vouchers to Brazoria County, effective May 1, 2005; and
b) at a time when the U.S. Department of Housing and Urban Development provided the Section 8 Housing Assistance Program (HAP) funds based on the number of vouchers the Department was authorized to distribute. Prior to 2005, HUD provided assistance in an amount that covered all eligible costs associated with the vouchers the Department distributed during the year. After 2005, HUD established a maximum annual allocation amount for the Department.

Both of these events have significantly decreased the number of vouchers available for allocation by the Department each year.

1-1-5 FEDERAL TAX CREDITS
1 # HOUSEHOLDS ASST THRU HTC PROGRAM

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # HOUSEHOLDS ASST THRU HTC PROGRAM					
Quarter 1	20,151.00	2,265.00	2,265.00	11.24 % *	4,030.20 - 6,045.30

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
1-1-6 HOME PROGRAM - MULTIFAMILY					
1 # HOUSEHOLDS ASST WITH MF FUNDS					
Quarter 1	647.00	22.00	22.00	3.40 % *	129.40 - 194.10

Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year.

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
1-1-8 MRB PROGRAM-MULTIFAMILY					
1 # HOUSEHOLDS ASST MF MRB PROG					
Quarter 1	3,500.00	971.00	971.00	27.74 %	700.00 - 1,050.00
2-1-1 HOUSING RESOURCE CENTER					
1 # REQUESTS COMPLETED					
Quarter 1	5,400.00				1,080.00 - 1,620.00
2-2-1 COLONIA SERVICE CENTERS					
1 SERVICE CENTER ON-SITE VISITS					

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Output Measures					
1 SERVICE CENTER ON-SITE VISITS					
Quarter 1	600.00	295.00	295.00	49.17 % *	120.00 - 180.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers.

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
3-1-1 POVERTY-RELATED FUNDS					
1 # PERSONS ASSISTED					
Quarter 1	440,000.00	175,309.00	175,309.00	39.84 % *	88,000.00 - 132,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report persons assisted through any programs operated by the CSBG subrecipient to be reported to the Department. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
2 # PERSONS IMPROVED					
Quarter 1	2,000.00	843.00	843.00	42.15 % *	400.00 - 600.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

3 # SHELTERS ASSISTED

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range

Output Measures

3 # SHELTERS ASSISTED

Quarter 1	70.00	76.00	76.00	108.57 % *	14.00 - 21.00

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS

1 # RECEIVING ENERGY ASSIST

Quarter 1	63,200.00	27,229.00	27,229.00	43.08 % *	12,640.00 - 18,960.00

Explanation of Variance: This quarter benefited from a large supplemental appropriation for LIHEAP that helped subrecipient agencies assist households with rising utility bills and unusually warm weather.

2 # WEATHERIZED DWELLINGS

Quarter 1	4,800.00	1,316.00	1,316.00	27.42 %	960.00 - 1,440.00

4-1-1 MONITOR HOUSING REQUIREMENTS

3 # OF ONSITE REVIEWS

Quarter 1	917.00	210.00	210.00	22.90 %	183.40 - 275.10

4-1-2 MONITOR CONTRACT REQUIREMENTS

1 # OF MONITORING REVIEWS

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # OF MONITORING REVIEWS					
Quarter 1	9,220.00	3,445.00	3,445.00	37.36 % *	1,844.00 - 2,766.00

Explanation of Variance: All monitoring requests received by the Department require a review. A request has been submitted to the LBB to amend the target to 11,235 reviews, which will more accurately reflect the actual number of reviews that the Department is required to complete. With the implementation of the amended target, the variance is reduced to 6%. Because several contracts expired during the first quarter, the Department received a larger number of draw requests than projected.

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
5-1-1 TITLING AND LICENSING					
1 # SOL ISSUED					
Quarter 1	89,000.00	20,364.00	20,364.00	22.88 %	17,800.00 - 26,700.00
2 # LICENSES ISSUED					
Quarter 1	4,435.00	568.00	568.00	12.81 % *	887.00 - 1,330.50

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
5-1-2 INSPECTIONS					
1 # ROUTINE INSPECTIONS					
Quarter 1	8,000.00	1,378.00	1,378.00	17.23 % *	1,600.00 - 2,400.00

Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 28.74%.

5-1-3 ENFORCEMENT

1 # COMPLAINTS RESOLVED

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # COMPLAINTS RESOLVED					
Quarter 1	1,700.00	255.00	255.00	15.00 % *	340.00 - 510.00

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Efficiency Measures					
5-1-3 ENFORCEMENT					
2 AVERAGE TIME RESOLUTION					
Quarter 1	180.00	182.90	182.90	101.61 %	171.00 - 189.00

* Varies by 5% or more from target.

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332 - DEPT HOUSING-COMM AFFAIRS
FISCAL YEAR
4/4/2007

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**

Output Measures

1-1-1 MRB PROGRAM - SINGLE FAMILY

1 # HOUSEHOLDS ASST. W/SF MRB

Quarter 1	1,727.00	816.00	816.00	47.25 % *	345.40 - 518.10

Explanation of Variance: Originations were higher as a result of increased market interest rates.

Quarter 2	1,727.00	686.00	1,502.00	86.97 % *	777.15 - 949.85

Explanation of Variance: Loan originations were higher as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY

1 # HOUSEHOLDS ASST THRU SF HTF

Quarter 1	100.00	22.00	22.00	22.00 %	20.00 - 30.00
Quarter 2	100.00	37.00	59.00	59.00 % *	45.00 - 55.00

Explanation of Variance: Due to limited number of organizations that are able to deliver a self-help constructed home, the Department has provided extensive technical assistance to nonprofit organizations that have limited resources. The higher number of households assisted is due to increased technical assistance, including outreach and communication, provided to assist nonprofit organizations to fulfill their contractual obligations.

1-1-4 SECTION 8 RENTAL ASSISTANCE

1 # HOUSEHOLDS ASSISTED

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # HOUSEHOLDS ASSISTED					
Quarter 1	2,100.00	930.00	930.00	44.29 % *	420.00 - 630.00

Explanation of Variance: The targeted measure of 2,100 vouchers was developed:
a) prior to the Department's transfer of 560 vouchers to Brazoria County, effective May 1, 2005; and
b) at a time when the U.S. Department of Housing and Urban Development provided the Section 8 Housing Assistance Program (HAP) funds based on the number of vouchers the Department was authorized to distribute. Prior to 2005, HUD provided assistance in an amount that covered all eligible costs associated with the vouchers the Department distributed during the year. After 2005, HUD established a maximum annual allocation amount for the Department.

Both of these events have significantly decreased the number of vouchers available for allocation by the Department each year.

Quarter 2	2,100.00	27.00	957.00	45.57 %	945.00 - 1,155.00
1-1-5 FEDERAL TAX CREDITS					
1 # HOUSEHOLDS ASST THRU HTC PROGRAM					
Quarter 1	20,151.00	2,265.00	2,265.00	11.24 % *	4,030.20 - 6,045.30

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

Quarter 2	20,151.00	1,217.00	3,482.00	17.28 % *	9,067.95 - 11,083.05

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

1-1-6 HOME PROGRAM - MULTIFAMILY

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**

Output Measures

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 1	647.00	22.00	22.00	3.40 % *	129.40 - 194.10

Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year.

Quarter 2	647.00	0.00	22.00	3.40 % *	291.15 - 355.85

Explanation of Variance: The HOME rental development program runs an application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year in line with the tax credit awards.

1-1-8 MRB PROGRAM-MULTIFAMILY

1 # HOUSEHOLDS ASST MF MRB PROG

Quarter 1	3,500.00	971.00	971.00	27.74 %	700.00 - 1,050.00
Quarter 2	3,500.00	504.00	1,475.00	42.14 % *	1,575.00 - 1,925.00

Explanation of Variance: This quarter there was a limited amount of bond allocation carryforward which affected the amount of bond volume cap available for the second quarter. With a lower amount of bond volume cap, there are fewer households assisted through the program.

2-1-1 HOUSING RESOURCE CENTER

1 # REQUESTS COMPLETED

* Varies by 5% or more from target.

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**

Output Measures

1 # REQUESTS COMPLETED

Quarter 1	5,400.00	823.00	823.00	15.24 % *	1,080.00 - 1,620.00

Explanation of Variance: Explanation of Variance: TDHCA made a phone system upgrade in the first quarter of 2006. A 1-800 number for the entire agency was added and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded by the Department's receptionist to DPPA for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was targeted.

Quarter 2	5,400.00	734.00	1,557.00	28.83 % *	2,430.00 - 2,970.00

Explanation of Variance: The Department made a phone system upgrade in the first quarter of 2006. A 1-800 number for the entire agency was implemented and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was originally projected.

2-2-1 COLONIA SERVICE CENTERS

1 SERVICE CENTER ON-SITE VISITS

Quarter 1	600.00	295.00	295.00	49.17 % *	120.00 - 180.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers.

Quarter 2	600.00	258.00	553.00	92.17 % *	270.00 - 330.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order to provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. The Department continues to prioritize technical assistance to local organizations and this in turn has increased the demand for on-site visits.

3-1-1 POVERTY-RELATED FUNDS

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # PERSONS ASSISTED					
Quarter 1	440,000.00	175,309.00	175,309.00	39.84 % *	88,000.00 - 132,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Quarter 2	440,000.00	114,095.00	289,404.00	65.77 % *	198,000.00 - 242,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

2 # PERSONS IMPROVED					
Quarter 1	2,000.00	843.00	843.00	42.15 % *	400.00 - 600.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
2 # PERSONS IMPROVED					
Quarter 2	2,000.00	633.00	1,476.00	73.80 % *	900.00 - 1,100.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty. It is anticipated that the Department will exceed the target for fiscal year 2007.

3 # SHELTERS ASSISTED					
Quarter 1	70.00	76.00	76.00	108.57 % *	14.00 - 21.00

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

Quarter 2	70.00	0.00	76.00	108.57 % *	31.50 - 38.50

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS

1 # RECEIVING ENERGY ASSIST

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # RECEIVING ENERGY ASSIST					
Quarter 1	63,200.00	27,229.00	27,229.00	43.08 % *	12,640.00 - 18,960.00

Explanation of Variance: This quarter benefited from a large supplemental appropriation for LIHEAP that helped subrecipient agencies assist households with rising utility bills and unusually warm weather.

Quarter 2	63,200.00	14,391.00	41,620.00	65.85 % *	28,440.00 - 34,760.00

Explanation of Variance: The Department exceeded the first quarter goal due to supplemental funds from the Low Income Home Energy Assistance Program (LIHEAP)that were not included in original projections. The Department typically serves fewer households in the second quarter because the program year for the utility assistance program ends December 31st. Most subrecipients use the month of January and the beginning of February to close out the previous program year and prepare for the upcoming program year.

2 # WEATHERIZED DWELLINGS					
Quarter 1	4,800.00	1,316.00	1,316.00	27.42 %	960.00 - 1,440.00
Quarter 2	4,800.00	1,282.00	2,598.00	54.13 %	2,160.00 - 2,640.00
4-1-1 MONITOR HOUSING REQUIREMENTS					
3 # OF ONSITE REVIEWS					
Quarter 1	917.00	210.00	210.00	22.90 %	183.40 - 275.10
Quarter 2	917.00	238.00	448.00	48.85 %	412.65 - 504.35
4-1-2 MONITOR CONTRACT REQUIREMENTS					
1 # OF MONITORING REVIEWS					

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # OF MONITORING REVIEWS					
Quarter 1	9,220.00	3,445.00	3,445.00	37.36 % *	1,844.00 - 2,766.00

Explanation of Variance: All monitoring requests received by the Department require a review. A request has been submitted to the LBB to amend the target to 11,235 reviews, which will more accurately reflect the actual number of reviews that the Department is required to complete. With the implementation of the amended target, the variance is reduced to 6%. Because several contracts expired during the first quarter, the Department received a larger number of draw requests than projected.

Quarter 2	9,220.00	2,751.00	6,196.00	67.20 % *	4,149.00 - 5,071.00

Explanation of Variance: All monitoring requests received by the Department require a review. Monitoring reviews include set up and draw reviews. As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration. Because several contracts expired during the first quarter, the Department received a larger number of draw requests than projected.

5-1-1 TITLING AND LICENSING					
1 # SOL ISSUED					
Quarter 1	89,000.00	20,364.00	20,364.00	22.88 %	17,800.00 - 26,700.00
Quarter 2	89,000.00	22,773.00	43,137.00	48.47 %	40,050.00 - 48,950.00
2 # LICENSES ISSUED					
Quarter 1	4,435.00	568.00	568.00	12.81 % *	887.00 - 1,330.50

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
2 # LICENSES ISSUED					
Quarter 2	4,435.00	563.00	1,131.00	25.50 % *	1,995.75 - 2,439.25

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
5-1-2 INSPECTIONS					
1 # ROUTINE INSPECTIONS					
Quarter 1	8,000.00	1,378.00	1,378.00	17.23 % *	1,600.00 - 2,400.00

Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 28.74%.

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Quarter 2	8,000.00	949.00	2,327.00	29.09 % *	3,600.00 - 4,400.00

Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.7%

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
5-1-3 ENFORCEMENT					
1 # COMPLAINTS RESOLVED					
Quarter 1	1,700.00	255.00	255.00	15.00 % *	340.00 - 510.00

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # COMPLAINTS RESOLVED					
Quarter 2	1,700.00	252.00	507.00	29.82 % *	765.00 - 935.00

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Efficiency Measures					
5-1-3 ENFORCEMENT					
2 AVERAGE TIME RESOLUTION					
Quarter 1	180.00	182.90	182.90	101.61 %	171.00 - 189.00
Quarter 2	180.00	211.40	197.00	109.44 % *	171.00 - 189.00

Explanation of Variance: The Department resolved a greater number of complex, time-consuming complaints during the second quarter.

* Varies by 5% or more from target.

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332-DEPT HOUSING/COMM AFFAIRS
3rd QUARTER 2007
4/3/2007

Michael Gerber, Executive Director

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target		Target Range
Output Measures						
1-1-1 MRB PROGRAM - SINGLE FAMILY						
1 # HOUSEHOLDS ASST. W/SF MRB						
Quarter 1	1,727.00	816.00	816.00	47.25 %	*	345.40 - 518.10
Explanation of Variance: Originations were higher as a result of increased market interest rates						
Quarter 2	1,727.00	686.00	1,502.00	86.97 %	*	777.15 - 949.85
Explanation of Variance: Loan originations were higher as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.						
Quarter 3	1,727.00	476.00	1,978.00	114.53 %	*	1,208.90 - 1,381.60
Explanation of Variance: Loan originations were higher as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.						
1-1-3 HOUSING TRUST FUND - SINGLE FAMILY						
1 # HOUSEHOLDS ASST THRU SF HTF						
Quarter 1	100.00	22.00	22.00	22.00 %		20.00 - 30.00
Quarter 2	100.00	37.00	59.00	59.00 %	*	45.00 - 55.00
Explanation of Variance: Due to limited number of organizations that are able to deliver a self-help constructed home, the Department has provided extensive technical assistance to nonprofit organizations that have limited resources The higher number of households assisted is due to increased technical assistance, including outreach and communication, provided to assist nonprofit organizations to fulfill their contractual obligations						
Quarter 3	100.00	21.00	80.00	80.00 %	*	70.00 - 80.00
Explanation of Variance: Due to limited number of organizations that are able to deliver a self-help constructed home, the Department has provided extensive technical assistance to nonprofit organizations that have limited resources The higher number of households assisted is due to increased technical assistance, including outreach and communication, provided to assist nonprofit organizations to fulfill their contractual obligations						
1-1-4 SECTION 8 RENTAL ASSISTANCE						

* Varies by 5% or more from target

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target		Target Range
Output Measures						
1 # HOUSEHOLDS ASSISTED						
Quarter 1	2,100.00	930.00	930.00	44.29 %	*	420.00 - 630.00

Explanation of Variance: The targeted measure of 2,100 vouchers was developed:
a) prior to the Department's transfer of 560 vouchers to Brazoria County, effective May 1, 2005; and
b) at a time when the U.S. Department of Housing and Urban Development provided the Section 8 Housing Assistance Program (HAP) funds based on the number of vouchers the Department was authorized to distribute Prior to 2005, HUD provided assistance in an amount that covered all eligible costs associated with the vouchers the Department distributed during the year After 2005, HUD established a maximum annual allocation amount for the Department

Both of these events have significantly decreased the number of vouchers available for allocation by the Department each year

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target		Target Range
Quarter 2	2,100.00	27.00	957.00	45.57 %		945.00 - 1,155.00
Quarter 3	2,100.00	56.00	1,013.00	48.24 %	*	1,470.00 - 1,680.00

Explanation of Variance: The targeted measure of 2,100 vouchers was developed when the U.S. Department of Housing and Urban Development provided Section 8 Housing Assistance Program (HAP) funds on the number of Housing Choice Vouchers available The allocation of HAP funds changed for the Section 8 program year beginning January 1, 2005. The Department no longer receives HAP funds based on a specified number of vouchers Consequently, the number of households served will be below target

1-1-5 FEDERAL TAX CREDITS

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target		Target Range
1 # HOUSEHOLDS ASST THRU HTC PROGRAM						
Quarter 1	20,151.00	2,265.00	2,265.00	11.24 %	*	4,030.20 - 6,045.30

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target		Target Range
Quarter 2	20,151.00	1,217.00	3,482.00	17.28 %	*	9,067.95 - 11,083.05

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target		Target Range
Quarter 3	20,151.00	1,502.00	4,984.00	24.73 %	*	14,105.70 - 16,120.80

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter

1-1-6 HOME PROGRAM - MULTIFAMILY

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target		Target Range
Output Measures						
1 # HOUSEHOLDS ASST WITH MF FUNDS						
Quarter 1	647.00	22.00	22.00	3.40 %	*	129.40 - 194.10
Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year						
Quarter 2	647.00	0.00	22.00	3.40 %	*	291.15 - 355.85
Explanation of Variance: The HOME rental development program runs an application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year in line with the tax credit awards.						
Quarter 3	647.00	0.00	22.00	3.40 %	*	452.90 - 517.60
Explanation of Variance: The HOME rental development program runs an application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the fourth quarter of the State fiscal year in line with the tax credit awards.						
1-1-8 MRB PROGRAM-MULTIFAMILY						
1 # HOUSEHOLDS ASST MF MRB PROG						
Quarter 1	3,500.00	971.00	971.00	27.74 %		700.00 - 1,050.00
Quarter 2	3,500.00	504.00	1,475.00	42.14 %	*	1,575.00 - 1,925.00
Explanation of Variance: This quarter there was a limited amount of bond allocation carryforward which affected the amount of bond volume cap available for the second quarter. With a lower amount of bond volume cap, there are fewer households assisted through the program						
Quarter 3	3,500.00	1,054.00	2,529.00	72.26 %		2,450.00 - 2,800.00
2-1-1 HOUSING RESOURCE CENTER						

* Varies by 5% or more from target.

Agency code: 332 Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Output Measures					
1 # REQUESTS COMPLETED					
Quarter 1	5,400.00	823.00	823.00	15.24 % *	1,080.00 - 1,620.00

Explanation of Variance: Explanation of Variance: TDHCA made a phone system upgrade in the first quarter of2006. A 1-800 number for the entire agency was added and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded by the Department's receptionist to DPPA for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was targeted

Quarter 2	5,400.00	734.00	1,557.00	28.83 % *	2,430.00 - 2,970.00

Explanation of Variance: The Department made a phone system upgrade in the first quarter of2006. A 1-800 number for the entire agency was implemented and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was originally projected

Quarter 3	5,400.00	1,123.00	2,680.00	49.63 % *	3,780.00 - 4,320.00

Explanation of Variance: The Department made a phone system upgrade in the first quarter of2006. A 1-800 number for the entire agency was implemented and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was originally projected

2-2-1 COLONIA SERVICE CENTERS

1 SERVICE CENTER ON-SITE VISITS					
Quarter 1	600.00	295.00	295.00	49.17 % *	120.00 - 180.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers.

Quarter 2	600.00	258.00	553.00	92.17 % *	270.00 - 330.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order to provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. The Department continues to prioritize technical assistance to local organizations and this in turn has increased the demand for onsite visits.

Quarter 3	600.00	279.00	832.00	138.67 % *	420.00 - 480.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order to provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. The Department continues to prioritize technical assistance to local organizations and this in turn has increased the demand for onsite visits.

3-1-1 POVERTY-RELATED FUNDS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range

Output Measures

2 # PERSONS IMPROVED

	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Quarter 1	2,000.00	843.00	843.00	42.15 % *	400.00 - 600.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in selfsufficiency case management programs and how many of them will complete the program and finally transition out of poverty

	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Quarter 2	2,000.00	633.00	1,476.00	73.80 % *	900.00 - 1,100.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in selfsufficiency case management programs and how many of them will complete the program and finally transition out of povertyIt is anticipated that the Department will exceed the target for fiscal year 2007.

	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Quarter 3	2,000.00	733.00	2,209.00	110.45 % *	1,400.00 - 1,600.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in selfsufficiency case management programs and how many of them will complete the program and finally transition out of povertyIt is anticipated that the Department will exceed the target for fiscal year 2007.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2007 Target	2007 Actual	2007 YTD	Percent of Annual Target	Target Range
Output Measures					
3 # SHELTERS ASSISTED					
Quarter 1	70.00	76.00	76.00	108.57 % *	14.00 - 21.00
Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program(ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded It is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.					
Quarter 2	70.00	0.00	76.00	108.57 % *	31.50 - 38.50
Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program(ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score					
Quarter 3	70.00	0.00	76.00	108.57 % *	49.00 - 56.00
Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program(ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score					
3-2-1 ENERGY ASSISTANCE PROGRAMS					
1 # RECEIVING ENERGY ASSIST					
Quarter 1	63,200.00	27,229.00	27,229.00	43.08 % *	12,640.00 - 18,960.00
Explanation of Variance: This quarter benefited from a large supplemental appropriation for LIHEAP that helped subrecipient agencies assist households with rising utility bills and unusually warm weather					
Quarter 2	63,200.00	14,391.00	41,620.00	65.85 % *	28,440.00 - 34,760.00
Explanation of Variance: The Department exceeded the first quarter goal due to supplemental funds from the Low Income Home Energy Assistance Program (LIHEAP)that were not included in original projections. The Department typically serves fewer households in the second quarter because the program year for the utility assistance program ends December 31st. Most subrecipients use the month of January and the beginning of February to close out the previous program year and prepare for the upcoming program year					
Quarter 3	63,200.00	22,798.00	64,418.00	101.93 % *	44,240.00 - 50,560.00
Explanation of Variance: High home energy prices accross the state contributed to high demand for utility assistance during the third quarter					

* Varies by 5% or more from target.

Output Measures						
2 # WEATHERIZED DWELLINGS						
Quarter 1	4,800.00	1,316.00	1,316.00	27.42 %		960.00 - 1,440.00
Quarter 2	4,800.00	1,282.00	2,598.00	54.13 %		2,160.00 - 2,640.00
Quarter 3	4,800.00	1,938.00	4,536.00	94.50 %	*	3,360.00 - 3,840.00
Explanation of Variance: Advantageous weather enabled high weatherization production this quarter						
4-1-1 MONITOR HOUSING REQUIREMENTS						
3 # OF ONSITE REVIEWS						
Quarter 1	917.00	259.00	259.00	28.24 %		183.40 - 275.10
Quarter 2	917.00	280.00	539.00	58.78 %	*	412.65 - 504.35
Explanation of Variance: More onsite monitoring reviews were scheduled during this quarter than previously anticipated						
Quarter 3	917.00	286.00	825.00	89.97 %	*	641.90 - 733.60
Explanation of Variance: More onsite monitoring reviews were scheduled during this quarter than previously anticipated						
4-1-2 MONITOR CONTRACT REQUIREMENTS						
1 # OF MONITORING REVIEWS						
Quarter 1	9,220.00	3,432.00	3,432.00	37.22 %	*	1,844.00 - 2,766.00
Explanation of Variance: All monitoring requests received by the Department require a review A request has been submitted to the LBB to amend the target to 11,235 reviews, which will more accurately reflect the actual number of reviews that the Department is required to complete With the implementation of the amended target, the variance is reduced to 6%. Because several contracts expired during the first quarter, the Department received a larger number of draw requests than projected.						
Quarter 2	9,220.00	2,781.00	6,213.00	67.39 %	*	4,149.00 - 5,071.00
Explanation of Variance: All monitoring requests received by the Department require a review Monitoring reviews include set up and draw reviews As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration Because several contracts expired during the quarter, the Department received a larger number of draw requests than projected						
Quarter 3	9,220.00	2,737.00	8,950.00	97.07 %	*	6,454.00 - 7,376.00
Explanation of Variance: All monitoring requests received by the Department require a review Monitoring reviews include set up and draw reviews As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration Because several contracts expired during the quarter, the Department received a larger number of draw requests than projected

Quarter 1	89,000.00	20,364.00	20,364.00	22.88 %	17,800.00 - 26,700.00
Quarter 2	89,000.00	22,773.00	43,137.00	48.47 %	40,050.00 - 48,950.00
Quarter 3	89,000.00	20,905.00	64,042.00	71.96 %	62,300.00 - 71,200.00
2 # LICENSES ISSUED					
Quarter 1	4,435.00	568.00	568.00	12.81 % *	887.00 - 1,330.50
Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses					
Quarter 2	4,435.00	563.00	1,131.00	25.50 % *	1,995.75 - 2,439.25
Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses					
Quarter 3	4,435.00	684.00	1,815.00	40.92 % *	3,104.50 - 3,548.00
Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses					
5-1-2 INSPECTIONS					
1 # ROUTINE INSPECTIONS					
Quarter 1	8,000.00	1,378.00	1,378.00	17.23 % *	1,600.00 - 2,400.00
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 28.74%.					
Quarter 2	8,000.00	949.00	2,327.00	29.09 % *	3,600.00 - 4,400.00
Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.7%					
Quarter 3	8,000.00	1,168.00	3,495.00	43.69 % *	5,600.00 - 6,400.00
Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.49%.

1-1-1 MRB PROGRAM - SINGLE FAMILY						
1 # HOUSEHOLDS ASST. W/SF MRB						
Quarter 1	1,727.00	816.00	816.00	47.25 %	*	345.40 - 518.10
Explanation of Variance: Originations were higher as a result of increased market interest rates.						
Quarter 2	1,727.00	686.00	1,502.00	86.97 %	*	777.15 - 949.85
Explanation of Variance: Loan originations were higher as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.						
Quarter 3	1,727.00	476.00	1,978.00	114.53 %	*	1,208.90 - 1,381.60
Explanation of Variance: Loan originations were higher as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.						
Quarter 4	1,727.00	749.00	2,727.00	157.90 %	*	1,640.65 - 1,813.35
Explanation of Variance: Loan originations were higher as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.						
1-1-3 HOUSING TRUST FUND - SINGLE FAMILY						
1 # HOUSEHOLDS ASST THRU SF HTF						
Quarter 1	100.00	22.00	22.00	22.00 %		20.00 - 30.00
Quarter 2	100.00	37.00	59.00	59.00 %	*	45.00 - 55.00
Explanation of Variance: Due to limited number of organizations that are able to deliver a self-help constructed home, the Department has provided extensive technical assistance to nonprofit organizations that have limited resources. The higher number of households assisted is due to increased technical assistance, including outreach and communication, provided to assist nonprofit organizations to fulfill their contractual obligations.						
Quarter 3	100.00	21.00	80.00	80.00 %	*	70.00 - 80.00
Explanation of Variance: Due to limited number of organizations that are able to deliver a self-help constructed home, the Department has provided extensive technical assistance to nonprofit organizations that have limited resources. The higher number of households assisted is due to increased technical assistance, including outreach and communication, provided to assist nonprofit organizations to fulfill their contractual obligations.						
Quarter 4	100.00	35.00	115.00	115.00 %	*	95.00 - 105.00
Explanation of Variance: Performance was higher than anticipated this quarter due to the closing out of previous fiscal year contracts this quarter and an elevated amount of technical assistance provided by the Department to ensure that the nonprofit organizations are meeting their performance benchmarks.						
1-1-4 SECTION 8 RENTAL ASSISTANCE						

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**

Output Measures

1 # HOUSEHOLDS ASSISTED

Quarter 1	2,100.00	930.00	930.00	44.29 % *	420.00 - 630.00

Explanation of Variance: The targeted measure of 2,100 vouchers was developed:
a) prior to the Department's transfer of 560 vouchers to Brazoria County, effective May 1, 2005; and
b) at a time when the U.S. Department of Housing and Urban Development provided the Section 8 Housing Assistance Program (HAP) funds based on the number of vouchers the Department was authorized to distribute. Prior to 2005, HUD provided assistance in an amount that covered all eligible costs associated with the vouchers the Department distributed during the year. After 2005, HUD established a maximum annual allocation amount for the Department.

Both of these events have significantly decreased the number of vouchers available for allocation by the Department each year.

Quarter 2	2,100.00	27.00	957.00	45.57 %	945.00 - 1,155.00
Quarter 3	2,100.00	56.00	1,013.00	48.24 % *	1,470.00 - 1,680.00

Explanation of Variance: The targeted measure of 2,100 vouchers was developed when the U.S. Department of Housing and Urban Development provided Section 8 Housing Assistance Program (HAP) funds on the number of Housing Choice Vouchers available. The allocation of HAP funds changed for the Section 8 program year beginning January 1, 2005. The Department no longer receives HAP funds based on a specified number of vouchers. Consequently, the number of households served will be below target.

Quarter 4	2,100.00	51.00	1,064.00	50.67 % *	1,995.00 - 2,205.00

Explanation of Variance: The targeted measure of 2,100 vouchers was developed when the U.S. Department of Housing and Urban Development provided Section 8 Housing Assistance Program (HAP) funds on the number of Housing Choice Vouchers available. The allocation of HAP funds changed for the Section 8 program year beginning January 1, 2005. The Department no longer receives HAP funds based on a specified number of vouchers. Consequently, the number of households served will be below target. At this time the Department has committed or has identified tenants for all available funds.

1-1-5 FEDERAL TAX CREDITS

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # HOUSEHOLDS ASST THRU HTC PROGRAM					
Quarter 1	20,151.00	2,265.00	2,265.00	11.24 % *	4,030.20 - 6,045.30
Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.					
Quarter 2	20,151.00	1,217.00	3,482.00	17.28 % *	9,067.95 - 11,083.05
Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.					
Quarter 3	20,151.00	1,502.00	4,984.00	24.73 % *	14,105.70 - 16,120.80
Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.					
Quarter 4	20,151.00	8,014.00	12,998.00	64.50 % *	19,143.45 - 21,158.55
Explanation of Variance: The Department allocated approximately $3.7 million from the 2007 credit ceiling in order to address construction cost increases for tax credit awards from 2004 and 2005. This resulted in more funds being allocated to developments without creating additional units.					
1-1-6 HOME PROGRAM - MULTIFAMILY					

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**

Output Measures

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 1	647.00	22.00	22.00	3.40 % *	129.40 - 194.10

Explanation of Variance: The HOME rental development program runs an open cycle application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year.

Quarter 2	647.00	0.00	22.00	3.40 % *	291.15 - 355.85

Explanation of Variance: The HOME rental development program runs an application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the third or fourth quarters of the State fiscal year in line with the tax credit awards.

Quarter 3	647.00	0.00	22.00	3.40 % *	452.90 - 517.60

Explanation of Variance: The HOME rental development program runs an application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. Therefore, the application cycle which awards most of the HOME funding does not open until the second quarter of each State fiscal year. It is not anticipated that performance targets will be met until the fourth quarter of the State fiscal year in line with the tax credit awards.

Quarter 4	647.00	122.00	144.00	22.26 % *	614.65 - 679.35

Explanation of Variance: The HOME rental development program runs an application process in line with statutory requirements to maintain a uniform application cycle for all TDHCA rental development programs. The HOME and Housing Tax Credit programs operated concurrent application cycles. Due to the competitiveness of the cycle, not all applicants that applied for both sources of funds were competitive in the Housing Tax Credit round and eligible for an award. Therefore, the awarding of HOME funds was limited to those applications that were competitive and received a Housing Tax Credit award.

1-1-8 MRB PROGRAM-MULTIFAMILY

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
1 # HOUSEHOLDS ASST MF MRB PROG					
Quarter 1	3,500.00	971.00	971.00	27.74 %	700.00 - 1,050.00
Quarter 2	3,500.00	504.00	1,475.00	42.14 % *	1,575.00 - 1,925.00
Explanation of Variance: This quarter there was a limited amount of bond allocation carryforward which affected the amount of bond volume cap available for the second quarter. With a lower amount of bond volume cap, there are fewer households assisted through the program.					
Quarter 3	3,500.00	1,054.00	2,529.00	72.26 %	2,450.00 - 2,800.00
Quarter 4	3,500.00	468.00	2,997.00	85.63 % *	3,325.00 - 3,675.00
Explanation of Variance: This quarter the Department was limited in the amount multifamily volume cap that was available. The June 1, 2007 collapse at the Texas Bond Review Board allowed for local issuers to receive additional volume cap, however, the Department per statute is not included in that collapse and therefore did not benefit from the increase.					
2-1-1 HOUSING RESOURCE CENTER					

* Varies by 5% or more from target.

1 # REQUESTS COMPLETED

Quarter 1	5,400.00	823.00	823.00	15.24 % *	1,080.00 - 1,620.00

Explanation of Variance: Explanation of Variance: TDHCA made a phone system upgrade in the first quarter of 2006. A 1-800 number for the entire agency was added and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded by the Department's receptionist to DPPA for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was targeted.

Quarter 2	5,400.00	734.00	1,557.00	28.83 % *	2,430.00 - 2,970.00

Explanation of Variance: The Department made a phone system upgrade in the first quarter of 2006. A 1-800 number for the entire agency was implemented and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was originally projected.

Quarter 3	5,400.00	1,123.00	2,680.00	49.63 % *	3,780.00 - 4,320.00

Explanation of Variance: The Department made a phone system upgrade in the first quarter of 2006. A 1-800 number for the entire agency was implemented and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was originally projected.

Quarter 4	5,400.00	1,144.00	3,824.00	70.81 % *	5,130.00 - 5,670.00

Explanation of Variance: The Department made a phone system upgrade in the first quarter of 2006. A 1-800 number for the entire agency was implemented and an automated attendant was added to the phone tree. This system has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center for response. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center. Therefore, the number of completed requests has decreased from what was originally projected.

2-2-1 COLONIA SERVICE CENTERS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**

Output Measures

1 SERVICE CENTER ON-SITE VISITS

Quarter 1	600.00	295.00	295.00	49.17 % *	120.00 - 180.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers.

Quarter 2	600.00	258.00	553.00	92.17 % *	270.00 - 330.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order to provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. The Department continues to prioritize technical assistance to local organizations and this in turn has increased the demand for on-site visits.

Quarter 3	600.00	279.00	832.00	138.67 % *	420.00 - 480.00

Explanation of Variance: Technical assistance visits to units of local governments and nonprofit organizations continue to increase in order to provide them assistance with the implementation of the Texas Bootstrap Loan Program, Contract for Deed Conversion Program and the Colonia Self-Help Centers. The Department continues to prioritize technical assistance to local organizations and this in turn has increased the demand for on-site visits.

Quarter 4	600.00	131.00	963.00	160.50 % *	570.00 - 630.00

Explanation of Variance: Technical assistance visits to units of local government and nonprofit organizations continued to increase due to various changes to the programs administered through the field offices.

3-1-1 POVERTY-RELATED FUNDS

Output Measures

1 # PERSONS ASSISTED

Quarter 1	440,000.00	175,309.00	175,309.00	39.84 % *	88,000.00 - 132,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Quarter 2	440,000.00	114,095.00	289,404.00	65.77 % *	198,000.00 - 242,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Quarter 3	440,000.00	136,388.00	425,792.00	96.77 % *	308,000.00 - 352,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Quarter 4	440,000.00	140,030.00	565,822.00	128.60 % *	418,000.00 - 462,000.00

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
2 # PERSONS IMPROVED					
Quarter 1	2,000.00	843.00	843.00	42.15 % *	400.00 - 600.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Quarter 2	2,000.00	633.00	1,476.00	73.80 % *	900.00 - 1,100.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty. It is anticipated that the Department will exceed the target for fiscal year 2007.

Quarter 3	2,000.00	733.00	2,209.00	110.45 % *	1,400.00 - 1,600.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty. It is anticipated that the Department will exceed the target for fiscal year 2007.

Quarter 4	2,000.00	878.00	3,087.00	154.35 % *	1,900.00 - 2,100.00

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Output Measures

3 # SHELTERS ASSISTED

Quarter 1	70.00	76.00	76.00	108.57 % *	14.00 - 21.00

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

Quarter 2	70.00	0.00	76.00	108.57 % *	31.50 - 38.50

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

Quarter 3	70.00	0.00	76.00	108.57 % *	49.00 - 56.00

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

Quarter 4	70.00	0.00	76.00	108.57 % *	66.50 - 73.50

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**		**Target Range**
Output Measures						
1 # RECEIVING ENERGY ASSIST						
Quarter 1	63,200.00	27,229.00	27,229.00	43.08 %	*	12,640.00 - 18,960.00
Explanation of Variance: This quarter benefited from a large supplemental appropriation for LIHEAP that helped subrecipient agencies assist households with rising utility bills and unusually warm weather.						
Quarter 2	63,200.00	14,391.00	41,620.00	65.85 %	*	28,440.00 - 34,760.00
Explanation of Variance: The Department exceeded the first quarter goal due to supplemental funds from the Low Income Home Energy Assistance Program (LIHEAP)that were not included in original projections. The Department typically serves fewer households in the second quarter because the program year for the utility assistance program ends December 31st. Most subrecipients use the month of January and the beginning of February to close out the previous program year and prepare for the upcoming program year.						
Quarter 3	63,200.00	22,798.00	64,418.00	101.93 %	*	44,240.00 - 50,560.00
Explanation of Variance: High home energy prices accross the state contributed to high demand for utility assistance during the third quarter.						
Quarter 4	63,200.00	19,111.00	83,529.00	132.17 %	*	60,040.00 - 66,360.00
Explanation of Variance: High home energy prices contributed to higher demand for energy assistance.						
2 # WEATHERIZED DWELLINGS						
Quarter 1	4,800.00	1,316.00	1,316.00	27.42 %		960.00 - 1,440.00
Quarter 2	4,800.00	1,282.00	2,598.00	54.13 %		2,160.00 - 2,640.00
Quarter 3	4,800.00	1,938.00	4,536.00	94.50 %	*	3,360.00 - 3,840.00
Explanation of Variance: Advantageous weather enabled high weatherization production this quarter.						
Quarter 4	4,800.00	868.00	5,404.00	112.58 %	*	4,560.00 - 5,040.00
Explanation of Variance: The Department is below target for this quarter due to the fact that weatherization production decreases in June, July and August when subrecipients focus on providing energy assistance. The Department is above target for the year due to the high production during the third quarter as a result of advantageous weather enabling higher weatherization production.						

4-1-1 MONITOR HOUSING REQUIREMENTS

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2007 Target**	**2007 Actual**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
Output Measures					
3 # OF ONSITE REVIEWS					
Quarter 1	917.00	259.00	259.00	28.24 %	183.40 - 275.10
Quarter 2	917.00	280.00	539.00	58.78 % *	412.65 - 504.35
Explanation of Variance: More onsite monitoring reviews were scheduled during this quarter than previously anticipated.					
Quarter 3	917.00	286.00	825.00	89.97 % *	641.90 - 733.60
Explanation of Variance: More onsite monitoring reviews were scheduled during this quarter than previously anticipated.					
Quarter 4	917.00	165.00	990.00	107.96 % *	871.15 - 962.85
Explanation of Variance: More onsite monitoring reviews were scheduled during the quarter than were previously anticipated at the time the measures were established.					
4-1-2 MONITOR CONTRACT REQUIREMENTS					
1 # OF MONITORING REVIEWS					
Quarter 1	9,220.00	3,432.00	3,432.00	37.22 % *	1,844.00 - 2,766.00
Explanation of Variance: All monitoring requests received by the Department require a review. A request has been submitted to the LBB to amend the target to 11,235 reviews, which will more accurately reflect the actual number of reviews that the Department is required to complete. With the implementation of the amended target, the variance is reduced to 6%. Because several contracts expired during the first quarter, the Department received a larger number of draw requests than projected.					
Quarter 2	9,220.00	2,781.00	6,213.00	67.39 % *	4,149.00 - 5,071.00
Explanation of Variance: All monitoring requests received by the Department require a review. Monitoring reviews include set up and draw reviews. As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration. Because several contracts expired during the quarter, the Department received a larger number of draw requests than projected.					
Quarter 3	9,220.00	2,737.00	8,950.00	97.07 % *	6,454.00 - 7,376.00
Explanation of Variance: All monitoring requests received by the Department require a review. Monitoring reviews include set up and draw reviews. As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration. Because several contracts expired during the quarter, the Department received a larger number of draw requests than projected.					
Quarter 4	9,220.00	2,524.00	11,474.00	124.45 % *	8,759.00 - 9,681.00
Explanation of Variance: All monitoring requests received by the Department require a review. Monitoring reviews include set up and draw reviews. As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration. Because several contracts expired during the quarter, the Department received a larger number of draw requests than projected.

1 # ROUTINE INSPECTIONS						
Quarter 1	8,000.00	1,378.00	1,378.00	17.23 %	*	1,600.00 - 2,400.00
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 28.74%.						
Quarter 2	8,000.00	949.00	2,327.00	29.09 %	*	3,600.00 - 4,400.00
Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.7%						
Quarter 3	8,000.00	1,168.00	3,495.00	43.69 %	*	5,600.00 - 6,400.00
Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.49%.						
Quarter 4	8,000.00	1,108.00	4,603.00	57.54 %	*	7,600.00 - 8,400.00
Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.76%.

Efficiency Measures					
5-1-3 ENFORCEMENT					
2 AVERAGE TIME RESOLUTION					
Quarter 1	180.00	182.90	182.90	101.61 %	171.00 - 189.00
Quarter 2	180.00	211.40	197.00	109.44 % *	171.00 - 189.00
Explanation of Variance: The Department resolved a greater number of complex, time-consuming complaints during the second quarter.					
Quarter 3	180.00	204.20	199.30	110.72 % *	171.00 - 189.00
Explanation of Variance: The Department resolved a greater number of complex, time-consuming complaints during the second quarter.					
Quarter 4	180.00	177.90	193.10	107.28 % *	171.00 - 189.00
Explanation of Variance: The Department resolved a greater number of complex, time-consuming complaints during this quarter.					

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Objective/Measure	**2007 Target**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
1-1 MAKE FUNDS AVAILABLE				
1 %VLI/LI/MI RECEIVE HOUSING	1.81 %	0.89 %	49.17 % *	1.72 - 1.90

Explanation of Variance: To accurately represent the level of housing need addressed by Department activities, the 1.1 Outcome measures use 2000 Census data as the Explanatory measure. However, the 2006-2007 targets were calculated using 1990 Census data. The 1990 need population was much lower than in the 2000 Census. Since the measure of need is the calculation's denominator, the use of the 1990 data generated higher percentage targets thatn using the 2000 data would have.
If the 1990 data had been used to calculate the actual 2007 Outcome, then 1.31% of the State's need would have been met, representing 73% of the target. See Outcome 1.2 below for an explation of the remaining variance from the target.

2 % VLI RECEIVING HOUSING	1.46 %	0.24 %	16.44 % *	1.39 - 1.53

Explanation of Variance: As described for Outcome 1.1, the continued use of 1990 Census data inflates the targets. If 1990 data were used to calculate the 2006 Outcome, then 20% of the target would have been met.

The remaining difference is due to several factors:
1) Fewer Section 8 vouchers were distributed than anticipated because a large number of vouchers were transferred by HUD to a large consortium and were no longer available to the Department. Also, the overall number of vouchers has decreased from what was originally projected. This is because the methodology that HUD uses to distribute Section 8 assistance has changed from distributing vouchers based on the average number of vouchers to distributing funding based on assistance provided during a time period of three months.
2) The multifamily HOME program application process runs concurrently with the Housing Tax Credit process as statutorily required. Due to the competitiveness of the cycle, not all applicants for both sources of funds were competitive and did not receive an award.
3) In 2006, the Department announced single family HOME funds available for 2006-2007. Applications were received and eligible applications not funded in 2006 were funded in 2007. The total number of units assisted are significantly lower than the target due to the impact of the biennial funding cycle, programmatic changes, and fewer applications received resulting in an undersubscription for Homebuyer Assistance and Tenant Based Rental Assistance activities.

3 % LI RECEIVING HOUSING	2.75 %	3.02 %	109.82 % *	2.61 - 2.89

Explanation of Variance: A higher portion of the 2007 9% Housing Tax Credit funding will serve LI households than was originally projected.

4 % MI RECEIVING HOUSING	0.17 %	0.22 %	129.41 % *	0.16 - 0.18

Explanation of Variance: Households assisted with Single Family Mortgage Revenue Bond originations were higher than targeted because of the increased benefit of the program's interest rate over increasing market interest rates.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Objective/Measure	**2007 Target**	**2007 YTD**	**Percent of Annual Target**		**Target Range**
3-1 PROGRAMS FOR HOMELESS/VLI					
1 % POVERTY ASSISTANCE	14.60 %	13.56 %	92.88 %	*	13.87 - 15.33

Explanation of Variance: To accurately represent the level of poverty assistance need addressed by TDHCA activities, the 3.1.1 Outcome measure uses 2000 Census data as the Explanatory measure. However, the 2006-2007 target was calculated using 1990 Census data. The 1990 need population was much lower than in the 2000 Census. Since the measure of need is the calculation's denominator, the use of 1990 data generated a higher percentage than using the 2000 Census data would have.

If the 1990 data were used to calcuate the actual 2007 Outcome, then 18.85% of the State's need would have been met, or 129% of the target..

Type/Objective/Measure	**2007 Target**	**2007 YTD**	**Percent of Annual Target**		**Target Range**
3-2 REDUCE HOME ENERGY COSTS					
1 % VLI HOUSEHOLD RECIPIENTS	6.00 %	6.72 %	112.00 %	*	5.70 - 6.30

Explanation of Variance: The following factors contributed to the Department exceeding the projected targets:
1) The program received an infusion of LIHEAP funds in addition to the budgeted annual funding amount.
2) There was increased demand for utility assistance due to high energy costs.

Type/Objective/Measure	**2007 Target**	**2007 YTD**	**Percent of Annual Target**		**Target Range**
5-1 PROTECT CITIZENS					
2 % CONSUMER COMPLAINT INSPECTIONS	100.00 %	100.00 %	100.00 %		95.00 - 105.00
3 % COMPLAINTS DISCIPLINARY ACTION	22.00 %	12.36 %	56.18 %	*	20.90 - 23.10

Explanation of Variance: Performance under target is desirable because the preference of the Department is to resolve complaints before disciplinary actions are required. Disciplinary actions are cases that require action by the Board or Executive Director of the Manufactured Housing Division.

* Varies by 5% or more from target.

Explanatory/Input Measures				
5-1-2 INSPECTIONS				
1 # INSTALLATION REPORTS	20,000.00	14,963.00	74.82 % *	19,000.00 - 21,000.00

Explanation of Variance: Fewer reports were received due to the continued slowdown in the manufactured housing industry. The installation forms that are incomplete when received are not included in the total reported for this measure because they are not entered into the database.

Type/Strategy/Measure	**2007 Target**	**2007 YTD**	**Percent of Annual Target**	**Target Range**
5-1-3 ENFORCEMENT				
1 # JURISDICTIONAL COMPLAINT RECEIVED	1,800.00	845.00	46.94 % *	1,710.00 - 1,890.00

Explanation of Variance: This measure is under the targeted projection, which is desirable because the Department encourages the informal resolution of customer concerns prior to becoming official complaints.

* Varies by 5% or more from target.

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332-DEPT HOUSING/COMM AFFAIRS
1st QUARTER 2008
1/07/08

Michael Gerber, Executive Director

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target

Output Measures

1-1-1 MRB PROGRAM - SINGLE FAMILY

1 # HOUSEHOLDS ASST. W/SF MRB

Quarter 1	2,016.00	753.00	753.00	37.35 % *

Explanation of Variance: Loan originations were higher than anticipated as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.

1-1-2 HOME PROGRAM - SINGLE FAMILY

1 # HOUSEHOLDS ASST. W/SF HOME FUNDS

Quarter 1	1,255.00	257.00	257.00	20.48 %

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY

1 # HOUSEHOLDS ASST THRU SF HTF

Quarter 1	228.00	60.00	60.00	26.32 %

1-1-4 SECTION 8 RENTAL ASSISTANCE

1 # HOUSEHOLDS ASSISTED

Quarter 1	1,494.00	967.00	967.00	64.73 % *

Explanation of Variance: The targeted measure of 1,494 vouchers was developed when the U.S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on a specified number of vouchers. The methodology for the allocation of HAP funds has changed and the Department no longer receives funds based on a specified number of vouchers. Consequently, the number of households served will be below target.

1-1-5 FEDERAL TAX CREDITS

1 # HOUSEHOLDS ASST THRU HTC PROGRAM

Quarter 1	12,261.00	1,937.00	1,937.00	15.80 % *

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

1-1-6 HOME PROGRAM - MULTIFAMILY

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target	
Output Measures					
1 # HOUSEHOLDS ASST WITH MF FUNDS					
Quarter 1	500.00	0.00	0.00	0.00 %	*

Explanation of Variance: The Department did not release any NOFAs for awards during the first quarter due to the reorganization of the HOME division and impending rule changes. The Department has recently released two multifamily HOME NOFAs and we anticipate these awards will be made during the second or third quarter.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target	
1-1-8 MRB PROGRAM - MULTIFAMILY					
1 # HOUSEHOLDS ASST MF MRB PROG					
Quarter 1	2,393.00	224.00	224.00	9.36 %	*

Explanation of Variance: This quarter there was a limited amount of bond volume cap available following the August 15th collapse. With a lower amount of bond volume cap, there are fewer households assisted through the program.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target	
2-1-1 HOUSING RESOURCE CENTER					
1 # REQUESTS COMPLETED					
Quarter 1	4,900.00	1,705.00	1,705.00	34.80 %	*

Explanation of Variance: The number of requests for information and technical assistance varies throughout the year. During the first quarter the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target	
2-2-1 COLONIA SERVICE CENTERS					
1 SERVICE CENTER ON-SITE VISITS					
Quarter 1	800.00	283.00	283.00	35.38 %	*

Explanation of Variance: As the Department continues to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program, field staff continues to provide technical assistance to units of local government and nonprofit organizations. Some of the changes that have been implemented in the last few months include the implementation of the Texas Bootstrap Loan Preservation Reservation System.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target	
3-1-1 POVERTY-RELATED FUNDS					
1 # PERSONS ASSISTED					
Quarter 1	512,244.00	146,713.00	146,713.00	28.64 %	

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
2 # PERSONS IMPROVED				
Quarter 1	2,200.00	1,157.00	1,157.00	52.59 % *

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-suffiency case management programs and how many of those will complete the program and transition out of poverty.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
3 # SHELTERS ASSISTED				
Quarter 1	73.00	78.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
3-2-1 ENERGY ASSISTANCE PROGRAMS				
1 # RECEIVING ENERGY ASSIST				
Quarter 1	51,502.00	14,383.00	14,383.00	27.93 %
2 # WEATHERIZED DWELLINGS				
Quarter 1	3,004.00	1,057.00	1,057.00	35.19 % *

Explanation of Variance: Moderate weather enabled higher weatherization production than originally anticipated for the first quarter.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
4-1-1 MONITOR HOUSING REQUIREMENTS				
3 # OF ONSITE REVIEWS				
Quarter 1	915.00	265.00	265.00	28.96 %
4-1-2 MONITOR CONTRACT REQUIREMENTS				
1 # OF MONITORING REVIEWS				
Quarter 1	12,715.00	2,655.00	2,655.00	20.88 %
5-1-1 TITLING AND LICENSING				
1 # SOL ISSUED				
Quarter 1	90,000.00	22,886.00	22,886.00	25.43 %

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**
Output Measures				
2 # LICENSES ISSUED				
Quarter 1	4,000.00	685.00	685.00	17.13 % *

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

5-1-2 INSPECTIONS

1 # ROUTINE INSPECTIONS				
Quarter 1	6,000.00	1,004.00	1,004.00	16.73 % *

Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 27.67%.

5-1-3 ENFORCEMENT

1 # COMPLAINTS RESOLVED				
Quarter 1	1,250.00	230.00	230.00	18.40 % *

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to becoming official complaints. This effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.

Efficiency Measures

5-1-3 ENFORCEMENT

2 AVERAGE TIME RESOLUTION				
Quarter 1	180.00	162.20	162.20	90.11 % *

Explanation of Variance: The average time is under the targeted projection, which is desirable.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**

Output Measures

1-1-1 MRB PROGRAM - SINGLE FAMILY

1 # HOUSEHOLDS ASST. W/SF MRB

Quarter 1	2,016.00	753.00	753.00	37.35 % *

Explanation of Variance: Loan originations were higher than anticipated as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.

Quarter 2	2,016.00	517.00	1,270.00	63.00 % *

Explanation of Variance: Loan originations were higher than anticipated as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.

1-1-2 HOME PROGRAM - SINGLE FAMILY

1 # HOUSEHOLDS ASST. W/SF HOME FUNDS

Quarter 1	1,255.00	257.00	257.00	20.48 %
Quarter 2	1,255.00	0.00	257.00	20.48 % *

Explanation of Variance: The Department has released two Notice of Funding Availability (NOFAs) for single-family activities and anticipates awarding these funds during the third quarter. Additionally, the Department signed its 2008 Funding Agreement with the US Department of Housing and Urban Development in March, permitting the allocation of 2008 funds in the third and fourth quarters.

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY

1 # HOUSEHOLDS ASST THRU SF HTF

Quarter 1	228.00	142.00	142.00	62.28 % *

Explanation of Variance: The legislature appropriated approximately $5.8 million over the biennium for the Housing Trust Fund. It is anticipated that the Department will surpass existing performance measure targets.

Quarter 2	228.00	123.00	265.00	116.23 % *

Explanation of Variance: The Department received approximately $5.8 million in appropriations for the Housing Trust Fund for the 2008-2009 biennium. In accordance with the funding plan allocating the new source of funds, $1,000,000 was awarded as gap financing for the Disaster Recovery effort in Southeast Texas. During the first quarter, this investment supported the rehabilitation of 100 housing units with grants or deferred forgivable loans up to $10,000. Additionally, the Department was able to award $1,062,816 from local funds funded by loan repayments and investment earnings, resulting in 78 units in Veteran's Housing Assistance. An additional 24 units were funded in March and will be reported for the third quarter. The Veteran's Housing Assistance Program is an innovative program initiated by the Department in 2007, which supports homebuyer and rental assistance to veterans transitioning back into their communities.

1-1-4 SECTION 8 RENTAL ASSISTANCE

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**

Output Measures

1 # HOUSEHOLDS ASSISTED

Quarter 1	1,494.00	967.00	967.00	64.73 % *

Explanation of Variance: The targeted measure of 1,494 vouchers was developed when the U.S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on a specified number of vouchers. The methodology for the allocation of HAP funds has changed and the Department no longer receives funds based on a specified number of vouchers. Consequently, the number of households served will be below target.

Quarter 2	1,494.00	25.00	992.00	66.40 % *

Explanation of Variance: The targeted measure of 1,494 vouchers was developed when the U.S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on a specified number of vouchers. The methodology for the allocation of HAP funds has changed and the Department no longer receives funds based on a specified number of vouchers. Consequently, the number of households served will be below target.

1-1-5 FEDERAL TAX CREDITS

1 # HOUSEHOLDS ASST THRU HTC PROGRAM

Quarter 1	12,261.00	1,937.00	1,937.00	15.80 % *

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

Quarter 2	12,261.00	1,001.00	2,938.00	23.96 % *

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA expects to make progress on this measure in the fourth quarter however the 4% credits are tied to the bond market which is experiencing a dramatic slowdown.

1-1-6 HOME PROGRAM - MULTIFAMILY

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**

Output Measures

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 1	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department did not release any NOFAs for awards during the first quarter due to the reorganization of the HOME division and impending rule changes. The Department has recently released two multifamily HOME NOFAs and we anticipate these awards will be made during the second or third quarter.

Quarter 2	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department has recently republished two multifamily HOME NOFAs to operate in conjunction with the 2008 HOME rule changes and we anticipate these awards will be made during the third or fourth quarter.

1-1-8 MRB PROGRAM - MULTIFAMILY

1 # HOUSEHOLDS ASST MF MRB PROG

Quarter 1	2,393.00	224.00	224.00	9.36 % *

Explanation of Variance: This quarter there was a limited amount of bond volume cap available following the August 15th collapse. With a lower amount of bond volume cap, there are fewer households assisted through the program.

Quarter 2	2,393.00	0.00	224.00	9.36 % *

Explanation of Variance: The awards from the previous quarter were applications from the 2007 fiscal year. The Department has not awarded any bond applications during the second quarter due to the fact that the Bond Review Board did not begin issuing reservations for bond funds for the 2008 fiscal year until January. TDHCA expects to make progress on this measure in the third and fourth quarters however this measure is tied to the bond market which is experiencing a dramatic slowdown.

2-1-1 HOUSING RESOURCE CENTER

1 # REQUESTS COMPLETED

Quarter 1	4,900.00	1,705.00	1,705.00	34.80 % *

Explanation of Variance: The number of requests for information and technical assistance varies throughout the year. During the first quarter the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.

Quarter 2	4,900.00	1,612.00	3,317.00	67.69 % *

Explanation of Variance: The number of requests for information and technical assistance varies throughout the year. During this quarter, the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.

2-2-1 COLONIA SERVICE CENTERS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**

Output Measures

1 SERVICE CENTER ON-SITE VISITS

Quarter 1	800.00	283.00	283.00	35.38 % *

Explanation of Variance: As the Department continues to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program, field staff continues to provide technical assistance to units of local government and nonprofit organizations. Some of the changes that have been implemented in the last few months include the implementation of the Texas Bootstrap Loan Preservation Reservation System.

Quarter 2	800.00	203.00	486.00	60.75 % *

Explanation of Variance: As the Department continues to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program, field staff continues to provide technical assistance to units of local government and nonprofit organizations. Some of the recent changes that have been implemented include the implementation of the Texas Bootstrap Loan Preservation Reservation System.

3-1-1 POVERTY-RELATED FUNDS

1 # PERSONS ASSISTED

Quarter 1	512,244.00	146,713.00	146,713.00	28.64 %
Quarter 2	512,244.00	89,901.00	236,614.00	46.19 %

2 # PERSONS IMPROVED

Quarter 1	2,200.00	1,157.00	1,157.00	52.59 % *

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-suffiency case management programs and how many of those will complete the program and transition out of poverty.

Quarter 2	2,200.00	818.00	1,975.00	89.77 % *

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-suffiency case management programs and how many of those will complete the program and transition out of poverty.

* Varies by 5% or more from target.

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**

Output Measures

3 # SHELTERS ASSISTED

Quarter 1	73.00	78.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

Quarter 2	73.00	0.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS

1 # RECEIVING ENERGY ASSIST

Quarter 1	51,502.00	14,383.00	14,383.00	27.93 %
Quarter 2	51,502.00	7,457.00	21,840.00	42.41 % *

Explanation of Variance: Administering agencies were unable to sign their 2008 contracts with the Department due to delayed implementation of the new contract and reporting system. This delay forced agencies to postpone their outreach efforts until funding was secured. The funding has been secured and the Department anticipates meeting the targets in the third and fourth quarters.

2 # WEATHERIZED DWELLINGS

Quarter 1	3,004.00	1,057.00	1,057.00	35.19 % *

Explanation of Variance: Moderate weather enabled higher weatherization production than originally anticipated for the first quarter.

Quarter 2	3,004.00	774.00	1,831.00	60.95 % *

Explanation of Variance: A moderate winter enabled higher weatherization production to continue into the second quarter.

4-1-1 MONITOR HOUSING REQUIREMENTS

3 # OF ONSITE REVIEWS

Quarter 1	915.00	265.00	265.00	28.96 %
Quarter 2	915.00	226.00	491.00	53.66 %

4-1-2 MONITOR CONTRACT REQUIREMENTS

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**
Output Measures				
1 # OF MONITORING REVIEWS				
Quarter 1	12,715.00	2,655.00	2,655.00	20.88 %
Quarter 2	12,715.00	2,269.00	4,924.00	38.73 % *

Explanation of Variance: The closing of contracts from previous years and a delay in the generation and execution of 2007 contracts has yielded fewer contracts to be serviced by staff. Additionally, a risk assessment was completed and a monitoring plan was developed during the early part of the fiscal year. The number of onsite monitoring visits will increase in the upcoming quarters due to the risk assessment and monitoring plan.

5-1-1 TITLING AND LICENSING

1 # SOL ISSUED				
Quarter 1	90,000.00	22,886.00	22,886.00	25.43 %
Quarter 2	90,000.00	12,783.00	35,669.00	39.63 % *

Explanation of Variance: The measure is below target because there were fewer applications received by the Department. In addition, the Department received more incomplete applications. The incomplete applications are due to the public being unaware of a new requirement in Section 1201.206(g) of the Standards Act that requires a seller to file a statement from the tax assessor-collector that no taxes are due on used homes sold. In order to educate the public and tax offices about the changes, the Department has posted notice of the requirement on the Department's website and has mailed a notice letter to all tax assessor-collectors.

2 # LICENSES ISSUED				
Quarter 1	4,000.00	685.00	685.00	17.13 % *

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Quarter 2	4,000.00	733.00	1,418.00	35.45 % *

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

5-1-2 INSPECTIONS

1 # ROUTINE INSPECTIONS				
Quarter 1	6,000.00	1,004.00	1,004.00	16.73 % *

Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 27.67%.

Quarter 2	6,000.00	1,039.00	2,043.00	34.05 % *

Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 33.41%.

5-1-3 ENFORCEMENT

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**
Output Measures				
1 # COMPLAINTS RESOLVED				
Quarter 1	1,250.00	230.00	230.00	18.40 % *
Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to becoming official complaints. This effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.				
Quarter 2	1,250.00	198.00	428.00	34.24 % *
Explanation of Variance: The Department has received fewer complaints than expected, resulting in fewer complaints resolved.				
Efficiency Measures				
5-1-3 ENFORCEMENT				
2 AVERAGE TIME RESOLUTION				
Quarter 1	180.00	162.20	162.20	90.11 % *
Explanation of Variance: The average time is under the targeted projection, which is desirable.				
Quarter 2	180.00	129.40	147.00	81.67 % *
Explanation of Variance: The average time for complaint resolution is under the targeted projection, which is desirable.				

* Varies by 5% or more from target.

ACTUAL PERFORMANCE FOR OUTPUT/EFFICIENCY MEASURES
332-DEPT HOUSING/COMM AFFAIRS
3rd QUARTER 2008
6/25/05

Michael Gerber, Executive Director

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**
Output Measures				
1-1-1 MRB PROGRAM - SINGLE FAMILY				
1 # HOUSEHOLDS ASST. W/SF MRB				
Quarter 1	2,016.00	753.00	753.00	37.35 % *
Explanation of Variance: Loan originations were higher than anticipated as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.				
Quarter 2	2,016.00	517.00	1,270.00	63.00 % *
Explanation of Variance: Loan originations were higher than anticipated as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products.				
Quarter 3	2,016.00	352.00	1,622.00	80.46 % *
Explanation of Variance: Loan originations were higher than anticipated as a result of increased market interest rates which generated higher demand for the Department's lower interest rate products and the lack of availability of other affordable options.				
1-1-2 HOME PROGRAM - SINGLE FAMILY				
1 # HOUSEHOLDS ASST. W/SF HOME FUNDS				
Quarter 1	1,255.00	257.00	257.00	20.48 %
Quarter 2	1,255.00	0.00	257.00	20.48 % *
Explanation of Variance: The Department has released two Notice of Funding Availability (NOFAs) for single-family activities and anticipates awarding these funds during the third quarter. Additionally, the Department signed its 2008 Funding Agreement with the US Department of Housing and Urban Development in March, permitting the allocation of 2008 funds in the third and fourth quarters.				
Quarter 3	1,255.00	512.00	769.00	61.27 % *
Explanation of Variance: The Department is in the process of publishing its 2008 Single Family Notice of Funding Availability (NOFA), which includes Owner-Occupied Housing Assistance (OCC), Tenant-Based Rental Assistance (TBRA), and Homebuyer Assistance (HBA) activities, and anticipates awarding funds later this year. For this reporting period, awards for Rehabilitation activities provided disaster relief with OCC and are funded by deobligated funds in accordance with the Department's Deobligated Funds Rule.

Quarter 1	228.00	142.00	142.00	62.28 % *

Explanation of Variance: The legislature appropriated approximately $5.8 million over the biennium for the Housing Trust Fund. It is anticipated that the Department will surpass existing performance measure targets.

Quarter 2	228.00	123.00	265.00	116.23 % *

Explanation of Variance: The Department received approximately $5.8 million in appropriations for the Housing Trust Fund for the 2008-2009 biennium. In accordance with the funding plan allocating the new source of funds, $1,000,000 was awarded as gap financing for the Disaster Recovery effort in Southeast Texas. During the first quarter, this investment supported the rehabilitation of 100 housing units with grants or deferred forgivable loans up to $10,000. Additionally, the Department was able to award $1,062,816 from local funds funded by loan repayments and investment earnings, resulting in 78 units in Veteran’s Housing Assistance. An additional 24 units were funded in March and will be reported for the third quarter. The Veteran’s Housing Assistance Program is an innovative program initiated by the Department in 2007, which supports homebuyer and rental assistance to veterans transitioning back into their communities.

Quarter 3	228.00	101.00	366.00	160.53 % *

Explanation of Variance: The Department received approximately $5.8 million in appropriations for the Housing Trust Fund for the 2008-2009 biennium. In accordance with the funding plan allocating the new source of funds, $1,000,000 was awarded as gap financing for the Disaster Recovery effort in Southeast Texas resuting in assistance to 100 housing units during the first quarter. Additionally, the Department was able to award $1,062,816 funded by loan repayments and investment earnings, resulting in 78 units in Veteran’s Housing Assistance, supporting homebuyer and rental assistance to veterans transitioning back into their communities. The Veteran's NOFA is currently oversubscribed and the Department anticipates making additional awards in the fourth quarter. For the third quarter, two awards were made that will assist 48 households. In addition to the activity associated with the new and innovative programs described above, the Bootstrap (owner-builder) program is surpassing established targets due to an additional $3,500,000 in funding and program improvements including a new loan reservation system that effectively expands the number of organizations eligible to participate in the program.

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 1	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department did not release any NOFAs for awards during the first quarter due to the reorganization of the HOME division and impending rule changes. The Department has recently released two multifamily HOME NOFAs and we anticipate these awards will be made during the second or third quarter.

Quarter 2	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department has recently republished two multifamily HOME NOFAs to operate in conjunction with the 2008 HOME rule changes and we anticipate these awards will be made during the third or fourth quarter.

Quarter 3	500.00	78.00	78.00	15.60 % *

Explanation of Variance: The Department has recently republished two multifamily HOME NOFAs to operate in conjunction with the 2008 HOME rule changes and we anticipate these awards will be made during the fourth quarter. A majority of the applicants for the funds have applied for both HOME and Housing Tax Credits (HTC). Any anticipated HOME awards will be made in conjunction with the HTC awards at the July 31, 2008 Board meeting and will be reported for the fourth quarter. Additionally, the Department is in the process of releasing the 2008 Rental Housing Development and Community Housing Development Organization (CHDO) NOFAs, which may include additional uncommitted and/or deobligated funds, in order to make funding available on a first-come, first-served basis.

1-1-8 MRB PROGRAM - MULTIFAMILY

1 # HOUSEHOLDS ASST MF MRB PROG

Quarter 1	2,393.00	224.00	224.00	9.36 % *

Explanation of Variance: This quarter there was a limited amount of bond volume cap available following the August 15th collapse. With a lower amount of bond volume cap, there are fewer households assisted through the program.

Quarter 2	2,393.00	0.00	224.00	9.36 % *

Explanation of Variance: The awards from the previous quarter were applications from the 2007 fiscal year. The Department has not awarded any bond applications during the second quarter due to the fact that the Bond Review Board did not begin issuing reservations for bond funds for the 2008 fiscal year until January. TDHCA expects to make progress on this measure in the third and fourth quarters however this measure is tied to the bond market which is experiencing a dramatic slowdown.

Quarter 3	2,393.00	232.00	456.00	19.06 % *

Explanation of Variance: The Department expects to make progress on this measure in the fourth quarter however this measure is tied to the bond market which is experiencing a dramatic slowdown. Economic conditions in the equity markets have made it very difficult for developers to present financially feasible applications to the Department.

Quarter 2	2,393.00	0.00	224.00	9.36 % *

Explanation of Variance: The awards from the previous quarter were applications from the 2007 fiscal year. The Department has not awarded any bond applications during the second quarter due to the fact that the Bond Review Board did not begin issuing reservations for bond funds for the 2008 fiscal year until January. TDHCA expects to make progress on this measure in the third and fourth quarters however this measure is tied to the bond market which is experiencing a dramatic slowdown.

Quarter 3	2,393.00	232.00	456.00	19.06 % *

Explanation of Variance: The Department expects to make progress on this measure in the fourth quarter however this measure is tied to the bond market which is experiencing a dramatic slowdown. Economic conditions in the equity markets have made it very difficult for developers to present financially feasible applications to the Department.

Output Measures

1 # HOUSEHOLDS ASST WITH MF FUNDS

Quarter 1	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department did not release any NOFAs for awards during the first quarter due to the reorganization of the HOME division and impending rule changes. The Department has recently released two multifamily HOME NOFAs and we anticipate these awards will be made during the second or third quarter.

Quarter 2	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department has recently republished two multifamily HOME NOFAs to operate in conjunction with the 2008 HOME rule changes and we anticipate these awards will be made during the third or fourth quarter.

Quarter 3	500.00	78.00	78.00	15.60 % *

Explanation of Variance: The Department has recently republished two multifamily HOME NOFAs to operate in conjunction with the 2008 HOME rule changes and we anticipate these awards will be made during the fourth quarter. A majority of the applicants for the funds have applied for both HOME and Housing Tax Credits (HTC). Any anticipated HOME awards will be made in conjunction with the HTC awards at the July 31, 2008 Board meeting and will be reported for the fourth quarter. Additionally, the Department is in the process of releasing the 2008 Rental Housing Development and Community Housing Development Organization (CHDO) NOFAs, which may include additional uncommitted and/or deobligated funds, in order to make funding available on a first-come, first-served basis.

1-1-8 MRB PROGRAM - MULTIFAMILY

1 # HOUSEHOLDS ASST MF MRB PROG

Quarter 1	2,393.00	224.00	224.00	9.36 % *

Explanation of Variance: This quarter there was a limited amount of bond volume cap available following the August 15th collapse. With a lower amount of bond volume cap, there are fewer households assisted through the program.

Quarter 2	2,393.00	0.00	224.00	9.36 % *

Explanation of Variance: The awards from the previous quarter were applications from the 2007 fiscal year. The Department has not awarded any bond applications during the second quarter due to the fact that the Bond Review Board did not begin issuing reservations for bond funds for the 2008 fiscal year until January. TDHCA expects to make progress on this measure in the third and fourth quarters however this measure is tied to the bond market which is experiencing a dramatic slowdown.

Quarter 3	2,393.00	232.00	456.00	19.06 % *

Explanation of Variance: The Department expects to make progress on this measure in the fourth quarter however this measure is tied to the bond market which is experiencing a dramatic slowdown. Economic conditions in the equity markets have made it very difficult for developers to present financially feasible applications to the Department.

Quarter 3	73.00	0.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS

1 # RECEIVING ENERGY ASSIST

Quarter 1	51,502.00	14,383.00	14,383.00	27.93 %
Quarter 2	51,502.00	7,457.00	21,840.00	42.41 % *

Explanation of Variance: Administering agencies were unable to sign their 2008 contracts with the Department due to delayed implementation of the new contract and reporting system. This delay forced agencies to postpone their outreach efforts until funding was secured. The funding has been secured and the Department anticipates meeting the targets in the third and fourth quarters.

Quarter 3	51,502.00	16,581.00	38,421.00	74.60 %

2 # WEATHERIZED DWELLINGS

Quarter 1	3,004.00	1,057.00	1,057.00	35.19 % *

Explanation of Variance: Moderate weather enabled higher weatherization production than originally anticipated for the first quarter.

Quarter 2	3,004.00	774.00	1,831.00	60.95 % *

Explanation of Variance: A moderate winter enabled higher weatherization production to continue into the second quarter.

Quarter 3	3,004.00	1,234.00	3,065.00	102.03 % *

Explanation of Variance: Additional one-time funding for the program enabled the weatherization subrecipients to exceed their quarterly targets for assistance.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**
Output Measures				
4-1-1 MONITOR HOUSING REQUIREMENTS				
3 # OF ONSITE REVIEWS				
Quarter 1	915.00	265.00	265.00	28.96 %
Quarter 2	915.00	226.00	491.00	53.66 %
Quarter 3	915.00	300.00	791.00	86.45 % *

Explanation of Variance: There were more onsite reviews scheduled this quarter than originally ancipated when the annual performance measure targets were established.

4-1-2 MONITOR CONTRACT REQUIREMENTS				
1 # OF MONITORING REVIEWS				
Quarter 1	12,715.00	2,657.00	2,657.00	20.90 %
Quarter 2	12,715.00	2,227.00	4,884.00	38.41 % *

Explanation of Variance: The closing of contracts from previous years and a delay in the generation and execution of 2007 contracts has yielded fewer contracts to be serviced by staff. Additionally, a risk assessment was completed and a monitoring plan was developed during the early part of the fiscal year. The number of onsite monitoring visits will increase in the upcoming quarters due to the risk assessment and monitoring plan.

Quarter 3	12,715.00	1,998.00	6,882.00	54.13 % *

Explanation of Variance: This measure reports contract administration and monitoring activities. During the third quarter, there were few new contracts resulting in less contract administration activity. Additionally, a significant number of contracts have been deobligated within the last two quarters, resulting in decreased pipeline activity due to the decrease in active contracts. The numbers reported this quarter reflect activity on contracts pending from previous years. The Department anticipates releasing the 2008 HOME Single Family NOFA during the fourth quarter, and an increase in the performance is anticipated.

Type/Strategy/Measure	**2008 Target**	**2008 Actual**	**2008 YTD**	**Percent of Annual Target**
4-1-2 MONITOR CONTRACT REQUIREMENTS				
1 # OF MONITORING REVIEWS				
Quarter 1	12,715.00	2,657.00	2,657.00	20.90 %
Quarter 2	12,715.00	2,227.00	4,884.00	38.41 % *

Explanation of Variance: The closing of contracts from previous years and a delay in the generation and execution of 2007 contracts has yielded fewer contracts to be serviced by staff. Additionally, a risk assessment was completed and a monitoring plan was developed during the early part of the fiscal year. The number of onsite monitoring visits will increase in the upcoming quarters due to the risk assessment and monitoring plan.

Quarter 3	12,715.00	1,998.00	6,882.00	54.13 % *

Explanation of Variance: This measure reports contract administration and monitoring activities. During the third quarter, there were few new contracts resulting in less contract administration activity. Additionally, a significant number of contracts have been deobligated within the last two quarters, resulting in decreased pipeline activity due to the decrease in active contracts. The numbers reported this quarter reflect activity on contracts pending from previous years. The Department anticipates releasing the 2008 HOME Single Family NOFA during the fourth quarter, and an increase in the performance is anticipated.

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target

Output Measures

1 # HOUSEHOLDS ASST. W/SF HOME FUNDS

Quarter 1	1,255.00	257.00	257.00	20.48 %
Quarter 2	1,255.00	0.00	257.00	20.48 % *

Explanation of Variance: The Department has released two Notice of Funding Availability (NOFAs) for single-family activities and anticipates awarding these funds during the third quarter. Additionally, the Department signed its 2008 Funding Agreement with the US Department of Housing and Urban Development in March, permitting the allocation of 2008 funds in the third and fourth quarters.

Quarter 3	1,255.00	512.00	769.00	61.27 % *

Explanation of Variance: The Department is in the process of publishing its 2008 Single Family Notice of Funding Availability (NOFA), which includes Owner-Occupied Housing Assistance (OCC), Tenant-Based Rental Assistance (TBRA), and Homebuyer Assistance (HBA) activities, and anticipates awarding funds later this year. For this reporting period, awards for Rehabilitation activities provided disaster relief with OCC and are funded by deobligated funds in accordance with the Department's Deobligated Funds Rule.

Quarter 4	1,255.00	166.00	935.00	74.50 % *

Explanation of Variance: Due to the delayed progress on current awards for Owner-Occupied Housing Assistance, the Department postponed its publication of the 2008 Single Family Notice of Funding Availability (NOFA), which includes Owner-Occupied Housing Assistance, Tenant-Based Rental Assistance, and Homebuyer Assistance activities, until the 4th Quarter and anticipates awarding funds in FY 2009. For this reporting period, awards for Rehabilitation Activities provided disaster relief with OCC and are funded by deobligated funds in accordance with the Department's Deobligated Funds Rule. A HBA and a TBRA NOFA were released in December of 2007. The source of the funds for these NOFA's were deobligated dollars from previous contracts and uncommitted funds from prior years. These NOFA's were not anticipated as a part of the regular funding cycle and were not estimated as a part of the performance measure targets.

1-1-3 HOUSING TRUST FUND - SINGLE FAMILY

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target

Output Measures

1 # HOUSEHOLDS ASST THRU SF HTF

Quarter 1	228.00	142.00	142.00	62.28 % *

Explanation of Variance: The legislature appropriated approximately $5.8 million over the biennium for the Housing Trust Fund. It is anticipated that the Department will surpass existing performance measure targets.

Quarter 2	228.00	127.00	269.00	117.98 % *

Explanation of Variance: The Department received approximately $5.8 million in appropriations for the Housing Trust Fund for the 2008-2009 biennium. In accordance with the funding plan allocating the new source of funds, $1,000,000 was awarded as gap financing for the Disaster Recovery effort in Southeast Texas. During the first quarter, this investment supported the rehabilitation of 100 housing units with grants or deferred forgivable loans up to $10,000. Additionally, the Department was able to award $1,062,816 from local funds funded by loan repayments and investment earnings, resulting in 78 units in Veteran's Housing Assistance. An additional 24 units were funded in March and will be reported for the third quarter. The Veteran's Housing Assistance Program is an innovative program initiated by the Department in 2007, which supports homebuyer and rental assistance to veterans transitioning back into their communities.

Quarter 3	228.00	101.00	370.00	162.28 % *

Explanation of Variance: The Department received approximately $5.8 million in appropriations for the Housing Trust Fund for the 2008-2009 biennium. In accordance with the funding plan allocating the new source of funds, $1,000,000 was awarded as gap financing for the Disaster Recovery effort in Southeast Texas resuting in assistance to 100 housing units during the first quarter. Additionally, the Department was able to award $1,062,816 funded by loan repayments and investment earnings, resulting in 78 units in Veteran's Housing Assistance, supporting homebuyer and rental assistance to veterans transitioning back into their communities. The Veteran's NOFA is currently oversubscribed and the Department anticipates making additional awards in the fourth quarter. For the third quarter, two awards were made that will assist 48 households. In addition to the activity associated with the new and innovative programs described above, the Bootstrap (owner-builder) program is surpassing established targets due to an additional $3,500,000 in funding and program improvements including a new loan reservation system that effectively expands the number of organizations eligible to participate in the program.

Quarter 4	228.00	189.00	559.00	245.18 % *

Explanation of Variance: The Department received approximately $5.8 million in appropriations for the Housing Trust Fund for the 2008-2009 biennium. In accordance with the funding plan allocating the new source of funds, $1,000,000 was awarded as gap financing for the Disaster Recovery effort in Southeast Texas. During the first quarter, this investment supported the rehabilitation of 100 housing units with grants or deferred forgivable loans up to $10,000. Additionally, the Department was able to award $1,062,816 from local funds funded by loan repayments and investment earnings, resulting in 102 units in Veteran's Housing Assistance. During the second quarter, the Department also released a Homeownership SuperNOFA making available $1,000,000 from the annual appropriation. In June 2008, the Board approved an additional $1,000,000 in Housing Trust Fund loan repayments and investment earnings for the Homeownership SuperNOFA, increasing the total amount available to $2,000,000. This increase resulted in four additional awards assisting 80 Texas families during the 4th Quarter. The Department was able to exceed the target due to the lower amount of assistance provided per household for the gap financing for Disaster Recovery and Veteran's Housing Assistance programs.

	Target	Actual	YTD	Percent of Annual Target
Quarter 3	1,494.00	4.00	996.00	66.67 % *

Explanation of Variance: The targeted measure of 1,494 vouchers was developed when the U.S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on a specified number of vouchers. The methodology for the allocation of HAP funds has changed and the Department no longer receives funds based on a specified number of vouchers but rather receives a set amount of funding that limits the number of households served to approximately 1,100 a year. Consequently, the number of households served will be below target.

	Target	Actual	YTD	Percent of Annual Target
Quarter 4	1,494.00	40.00	1,036.00	69.34 % *

Explanation of Variance: The targeted measure of 1,494 vouchers was developed when the U.S. Department of Housing and Urban Development (HUD) provided Section 8 Housing Assistance Program (HAP) funds based on a specified number of vouchers. The methodology for the allocation of HAP funds has changed and the Department no longer receives funds based on a specified number of vouchers but rather receives a set amount of funding that limits the number of households served to approximately 1,100 a year. Consequently, the number of households served will be below target.

1-1-5 FEDERAL TAX CREDITS

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target

Output Measures

1 # HOUSEHOLDS ASST THRU HTC PROGRAM

Quarter 1	12,261.00	1,937.00	1,937.00	15.80 % *

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA does not anticipate meeting its targeted measures for this output until the fourth quarter.

Quarter 2	12,261.00	509.00	2,446.00	19.95 % *

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA expects to make progress on this measure in the fourth quarter however the 4% credits are tied to the bond market which is experiencing a dramatic slowdown.

Quarter 3	12,261.00	712.00	3,158.00	25.76 % *

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. TDHCA expects to make progress on this measure in the fourth quarter; however, the 4% credits are tied to the bond market which is experiencing a dramatic slowdown nationally due to the recession in the economy.

Quarter 4	12,261.00	6,918.00	10,076.00	82.18 % *

Explanation of Variance: The Housing Tax Credit program activity for this measure is a combination of 4% (multifamily bond related) and 9% (competitive application cycle) rental development funding awards. The 9% program is statutorily required to award funding during the fourth quarter of each fiscal year. The 4% credits are tied to the bond market which is experiencing a dramatic slowdown nationally due to the recession in the economy.

1-1-6 HOME PROGRAM - MULTIFAMILY

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target

Output Measures

1 # HOUSEHOLDS ASST WITH MF FUNDS

	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Quarter 1	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department did not release any NOFAs for awards during the first quarter due to the reorganization of the HOME division and impending rule changes. The Department has recently released two multifamily HOME NOFAs and we anticipate these awards will be made during the second or third quarter.

	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Quarter 2	500.00	0.00	0.00	0.00 % *

Explanation of Variance: The Department has recently republished two multifamily HOME NOFAs to operate in conjunction with the 2008 HOME rule changes and we anticipate these awards will be made during the third or fourth quarter.

	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Quarter 3	500.00	78.00	78.00	15.60 % *

Explanation of Variance: The Department has recently republished two multifamily HOME NOFAs to operate in conjunction with the 2008 HOME rule changes and we anticipate these awards will be made during the fourth quarter. A majority of the applicants for the funds have applied for both HOME and Housing Tax Credits (HTC). Any anticipated HOME awards will be made in conjunction with the HTC awards at the July 31, 2008 Board meeting and will be reported for the fourth quarter. Additionally, the Department is in the process of releasing the 2008 Rental Housing Development and Community Housing Development Organization (CHDO) NOFAs, which may include additional uncommitted and/or deobligated funds, in order to make funding available on a first-come, first-served basis.

	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Quarter 4	500.00	585.00	663.00	132.60 % *

Explanation of Variance: The Department has made HOME funds available for this activity since October 2007 and awarded twenty awards in conjunction with the Housing Tax Credit awards at the July 31, 2008 board meeting. Additional HOME funds that were deobligated from single family activities were made available for this strategy. This allowed the Department to maintain a continuous, open-cycle NOFA and facilitated the timely commitment and expenditure of HOME funds in accordance with federal requirements.

1-1-8 MRB PROGRAM - MULTIFAMILY

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
1 # HOUSEHOLDS ASST MF MRB PROG				
Quarter 1	2,393.00	224.00	224.00	9.36 % *

Explanation of Variance: This quarter there was a limited amount of bond volume cap available following the August 15th collapse. With a lower amount of bond volume cap, there are fewer households assisted through the program.

Quarter 2	2,393.00	0.00	224.00	9.36 % *

Explanation of Variance: The awards from the previous quarter were applications from the 2007 fiscal year. The Department has not awarded any bond applications during the second quarter due to the fact that the Bond Review Board did not begin issuing reservations for bond funds for the 2008 fiscal year until January. TDHCA expects to make progress on this measure in the third and fourth quarters however this measure is tied to the bond market which is experiencing a dramatic slowdown.

Quarter 3	2,393.00	232.00	456.00	19.06 % *

Explanation of Variance: The Department expects to make progress on this measure in the fourth quarter however this measure is tied to the bond market which is experiencing a dramatic slowdown. Economic conditions in the equity markets have made it very difficult for developers to present financially feasible applications to the Department.

Quarter 4	2,393.00	422.00	878.00	36.69 % *

Explanation of Variance: This measure is tied to the bond market which is experiencing a dramatic slowdown. Economic conditions in the equity markets have made it very difficult for developers to present financially feasible applications to the Department.

2-1-1 HOUSING RESOURCE CENTER

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
1 # REQUESTS COMPLETED				
Quarter 1	4,900.00	1,705.00	1,705.00	34.80 % *

Explanation of Variance: The number of requests for information and technical assistance varies throughout the year. During the first quarter the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.

Quarter 2	4,900.00	1,612.00	3,317.00	67.69 % *

Explanation of Variance: The number of requests for information and technical assistance varies throughout the year. During this quarter, the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.

Quarter 3	4,900.00	1,397.00	4,714.00	96.20 % *

Explanation of Variance: The number of requests for information and technical assistance varies throughout the year. During this quarter, the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.

Quarter 4	4,900.00	1,395.00	6,109.00	124.67 % *

Explanation of Variance: The number of requests for information and technical assistance varies throughout the year. During this fiscal year, the Department experienced a higher amount of requests than usual. In addition, the Department has made a concerted effort to improve the quality of the data collected for information and technical assistance requests.

2-2-1 COLONIA SERVICE CENTERS

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
1 SERVICE CENTER ON-SITE VISITS				
Quarter 1	800.00	283.00	283.00	35.38 % *

Explanation of Variance: As the Department continues to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program, field staff continues to provide technical assistance to units of local government and nonprofit organizations. Some of the changes that have been implemented in the last few months include the implementation of the Texas Bootstrap Loan Preservation Reservation System.

Quarter 2	800.00	203.00	486.00	60.75 % *

Explanation of Variance: As the Department continues to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program, field staff continues to provide technical assistance to units of local government and nonprofit organizations. Some of the recent changes that have been implemented include the implementation of the Texas Bootstrap Loan Preservation Reservation System.

Quarter 3	800.00	173.00	659.00	82.38 % *

Explanation of Variance: As we continue to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program OCI Field Staff continues to provide technical assistance to units of local governments and nonprofit organizations. Some of the changes that have been implemented recently include the implementation of the Texas Bootstrap Loan Program Reservation System which has necessitated increased outreach activities.

Quarter 4	800.00	245.00	904.00	113.00 % *

Explanation of Variance: As we continue to improve the Texas Bootstrap Loan Program and the Colonia Self-Help Center Program OCI Field Staff continues to provide technical assistance to units of local governments and nonprofit organizations. The Texas Bootstrap Loan Program Reservation System has necessitated increased technical activities. In addition, technical assistance visits have increased for the Colonia Self-Help Program due to environmental assessments and other related federal regulations.

3-1-1 POVERTY-RELATED FUNDS

1 # PERSONS ASSISTED

	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Quarter 1	512,244.00	146,713.00	146,713.00	28.64 %
Quarter 2	512,244.00	89,901.00	236,614.00	46.19 %
Quarter 3	512,244.00	150,866.00	387,480.00	75.64 %
Quarter 4	512,244.00	151,956.00	539,436.00	105.31 % *

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). Beginning in January 2006, the Department revised the reporting procedures for Community Services Block Grant (CSBG) subrecipients. The revision allowed CSBG subrecipients to report to the Department all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds. Additionally, funding for the ESGP program was higher than anticipated when the measures were set.

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target	
Output Measures					
2 # PERSONS IMPROVED					
Quarter 1	2,200.00	1,157.00	1,157.00	52.59 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG subrecipients will assist more persons to transition out of poverty.

Quarter 2	2,200.00	818.00	1,975.00	89.77 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG subrecipients will assist more persons to transition out of poverty.

Quarter 3	2,200.00	422.00	2,397.00	108.95 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG subrecipients will assist more persons to transition out of poverty.

Quarter 4	2,200.00	627.00	3,024.00	137.45 %	*

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG subrecipients will assist more persons to transition out of poverty.

* Varies by 5% or more from target.

Output Measures				
3 # SHELTERS ASSISTED				
Quarter 1	73.00	78.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

Quarter 2	73.00	0.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

Quarter 3	73.00	0.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

Quarter 4	73.00	0.00	78.00	106.85 % *

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the target was established, the Department anticipated funding fewer subrecipients than the number that was actually funded. The number of contracts awarded varies by the amount of funds requested and then awarded and the ranking of the applications based upon their score.

3-2-1 ENERGY ASSISTANCE PROGRAMS

1 # RECEIVING ENERGY ASSIST				
Quarter 1	51,502.00	14,383.00	14,383.00	27.93 %
Quarter 2	51,502.00	7,457.00	21,840.00	42.41 % *

Explanation of Variance: Administering agencies were unable to sign their 2008 contracts with the Department due to delayed implementation of the new contract and reporting system. This delay forced agencies to postpone their outreach efforts until funding was secured. The funding has been secured and the Department anticipates meeting the targets in the third and fourth quarters.

Quarter 3	51,502.00	16,581.00	38,421.00	74.60 %
Quarter 4	51,502.00	11,412.00	49,833.00	96.76 %

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
2 # WEATHERIZED DWELLINGS				
Quarter 1	3,004.00	1,057.00	1,057.00	35.19 % *
Explanation of Variance: Moderate weather enabled higher weatherization production than originally anticipated for the first quarter.				
Quarter 2	3,004.00	774.00	1,831.00	60.95 % *
Explanation of Variance: A moderate winter enabled higher weatherization production to continue into the second quarter.				
Quarter 3	3,004.00	1,234.00	3,065.00	102.03 % *
Explanation of Variance: Additional one-time funding for the program enabled the weatherization subrecipients to exceed their quarterly targets for assistance.				
Quarter 4	3,004.00	935.00	4,000.00	133.16 % *
Explanation of Variance: Additional one-time funding for the program enabled the weatherization subrecipients to exceed their quarterly and annual targets for assistance.				
4-1-1 MONITOR HOUSING REQUIREMENTS				
3 # OF ONSITE REVIEWS				
Quarter 1	915.00	265.00	265.00	28.96 %
Quarter 2	915.00	226.00	491.00	53.66 %
Quarter 3	915.00	300.00	791.00	86.45 % *
Explanation of Variance: There were more onsite reviews scheduled this quarter than originally ancipated when the annual performance measure targets were established.				
Quarter 4	915.00	255.00	1,046.00	114.32 % *
Explanation of Variance: There were more onsite reviews scheduled for the fiscal year than originally ancipated when the annual performance measure targets were established.				
4-1-2 MONITOR CONTRACT REQUIREMENTS				

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
1 # OF MONITORING REVIEWS				
Quarter 1	12,715.00	2,657.00	2,657.00	20.90 %
Quarter 2	12,715.00	2,227.00	4,884.00	38.41 % *

Explanation of Variance: The closing of contracts from previous years and a delay in the generation and execution of 2007 contracts has yielded fewer contracts to be serviced by staff. Additionally, a risk assessment was completed and a monitoring plan was developed during the early part of the fiscal year. The number of onsite monitoring visits will increase in the upcoming quarters due to the risk assessment and monitoring plan.

Quarter 3	12,715.00	1,998.00	6,882.00	54.13 % *

Explanation of Variance: This measure reports contract administration and monitoring activities. During the third quarter, there were few new contracts resulting in less contract administration activity. Additionally, a significant number of contracts have been deobligated within the last two quarters, resulting in decreased pipeline activity due to the decrease in active contracts. The numbers reported this quarter reflect activity on contracts pending from previous years. The Department anticipates releasing the 2008 HOME Single Family NOFA during the fourth quarter, and an increase in the performance is anticipated.

Quarter 4	12,715.00	1,853.00	8,735.00	68.70 % *

Explanation of Variance: During this reporting period, there were few new contracts which would result in contract administration activity. Additionally, a significant number of contracts have been deobligated within the last three reporting periods which has also resulted in decreased pipeline activity. The numbers reported reflect activity on contracts pending from the previous years. The Department has released the 2008 HOME Single Family NOFA during the 4th Quarter and anticipates an increase in the activities reported during the first quarter of FY 2009.

5-1-1 TITLING AND LICENSING

* Varies by 5% or more from target.

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
1 # SOL ISSUED				
Quarter 1	90,000.00	22,886.00	22,886.00	25.43 %
Quarter 2	90,000.00	12,783.00	35,669.00	39.63 % *

Explanation of Variance: The measure is below target because there were fewer applications received by the Department. In addition, the Department received more incomplete applications. The incomplete applications are due to the public being unaware of a new requirement in Section 1201.206(g) of the Standards Act that requires a seller to file a statement from the tax assessor-collector that no taxes are due on used homes sold. In order to educate the public and tax offices about the changes, the Department has posted notice of the requirement on the Department's website and has mailed a notice letter to all tax assessor-collectors.

Quarter 3	90,000.00	14,093.00	49,762.00	55.29 % *

Explanation of Variance: The measure is below target because there were fewer applications received by the Department. In addition, the Department received more incomplete applications. The incomplete applications are due to the public being unaware of a new requirement in Section 1201.206(g) of the Standards Act that requires a seller to file a statement from the tax assessor-collector that no taxes are due on used homes sold. In order to educate the public and tax offices about the changes, the Department has posted notice of the requirement on the Department's website and has mailed a notice letter to all tax assessor-collectors.

Quarter 4	90,000.00	12,622.00	62,384.00	69.32 % *

Explanation of Variance: The measure is under the projected total because there were fewer applications received and there was an increase in incomplete applications that cannot be processed until the required information is received by the Department. The increase in incomplete applications is due to many sellers being unaware of the new requirement in §1201.206(g) of the Standards Act that became effective on 01/01/2008, which requires a seller to file a statement from the tax assessor-collector that no taxes are due on used homes sold that are not in a retailer's inventory. To educate the public and tax offices the Department posted notice of the requirement on the Department's website and mailed a notice letter in January 2008 to all tax assessor-collectors.

2 # LICENSES ISSUED				
Quarter 1	4,000.00	685.00	685.00	17.13 % *

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Quarter 2	4,000.00	733.00	1,418.00	35.45 % *

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Quarter 3	4,000.00	1,322.00	2,740.00	68.50 % *

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Quarter 4	4,000.00	861.00	3,601.00	90.03 % *

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

5-1-2 INSPECTIONS

* Varies by 5% or more from target.

Agency code: 332 Agency name: DEPT HOUSING-COMM AFFAIRS

Type/Strategy/Measure	2008 Target	2008 Actual	2008 YTD	Percent of Annual Target
Output Measures				
1 # ROUTINE INSPECTIONS				
Quarter 1	6,000.00	1,004.00	1,004.00	16.73 % *
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 27.67%.				
Quarter 2	6,000.00	1,039.00	2,043.00	34.05 % *
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 33.41%.				
Quarter 3	6,000.00	781.00	2,824.00	47.07 % *
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 28.76%.				
Quarter 4	6,000.00	808.00	3,632.00	60.53 % *
Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of the installation inspections received. The actual year-to-date inspection rate is 26%.				
5-1-3 ENFORCEMENT				
1 # COMPLAINTS RESOLVED				
Quarter 1	1,250.00	230.00	230.00	18.40 % *
Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to becoming official complaints. This effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.				
Quarter 2	1,250.00	198.00	428.00	34.24 % *
Explanation of Variance: The Department has received fewer complaints than expected, resulting in fewer complaints resolved.				
Quarter 3	1,250.00	120.00	548.00	43.84 % *
Explanation of Variance: The Department has received fewer complaints than expected, resulting in fewer complaints resolved.				
Quarter 4	1,250.00	255.00	803.00	64.24 % *
Explanation of Variance: The Department has received fewer complaints than expected, resulting in fewer complaints resolved.				
Efficiency Measures

ACTUAL PERFORMANCE FOR OUTCOME MEASURES
332-DEPT HOUSING/COMM AFFAIRS
4th QUARTER 2008
9/30/08

Michael Gerber, Executive Director

Agency code: **332** Agency name: **DEPT HOUSING-COMM AFFAIRS**

Type/Objective/Measure	2008 Target	2008 YTD	Percent of Annual Target
1-1 MAKE FUNDS AVAILABLE			
1 %VLI/LI/MI RECEIVE HOUSING	0.91 %	0.70 %	76.92 % *

Explanation of Variance: For the HOME program, the Department posponed the publication of the 2008 Single Family Notice of Funding Availability due to the delayed progress on current awards for Owner-Occupied Housing Assistance. The performance target for Section 8 was developed prior to a change in how the U.S. Department of Housing and Urban Development distributes funding. Consequently, the number of Section 8 households served will be below target. The Housing Tax Credit program is a combination of 4% (multifamily bond-related) and 9% (competitive application cycle) rental development funding. The 4% credits are tied to the bond market which is experiencing a dramatic slowdown nationally due to the recession in the economy.

2 % VLI RECEIVING HOUSING	0.28 %	0.25 %	89.29 % *

Explanation of Variance: For the HOME program, the Department posponed the publication of the 2008 Single Family Notice of Funding Availability due to the delayed progress on current awards for Owner-Occupied Housing Assistance. MARKET STUDY CERTIFICATION

This certifies that Christopher Bunch and Ted Uritus, employees of VWB Research, personally made inspections of Deaf Smith, Castro, and Parmer counties in Texas, including surveying existing rental developments. Further, the information contained in this report is true and accurate as of August 22, 2008.

VWB Research is a disinterested third party without any current or future financial interest in any projects under consideration in the study area. We have received a fee in preparation of the market study. However, no contingency fees exist between our firm and the client.

I. INTRODUCTION

A. PURPOSE

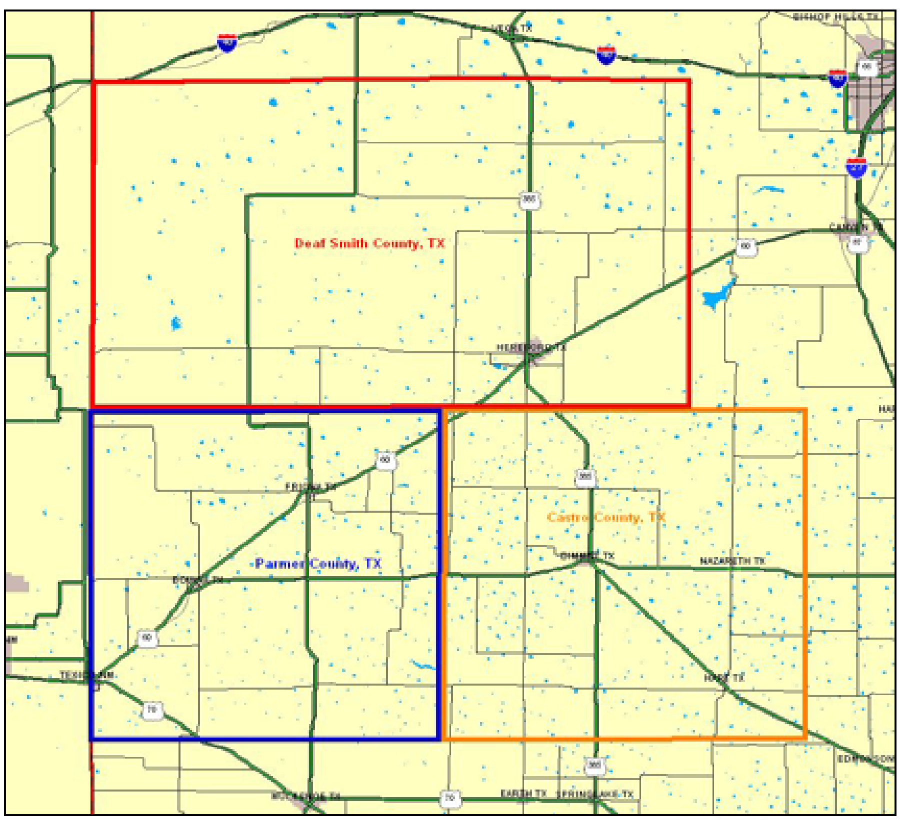
The purpose of this report is to evaluate the need for affordable rental housing in Deaf Smith County, Castro County, and Parmer County, Texas. This assessment is based upon the identification and analysis of the housing markets in each of these three subject counties. We have surveyed the housing stock, conducted interviews with key stakeholders, and provided a demand analysis indicating potential housing opportunities and a general housing needs assessment. The impact of farmworkers (both migrant and year-round) on the housing markets of each county has also been addressed in this analysis.

Mr. Michael Gerber of the Texas Department of Housing and Community Affairs (TDHCA) initiated this study.

B. METHODOLOGIES

Methodologies used by VWB Research include the following:

- Establishment of market areas, which are defined as the county boundaries for Deaf Smith County, Castro County, and Parmer County, Texas. The following map illustrates these three counties:



- Evaluation of general characteristics of each county including demographic and economic trends. The economic evaluation includes an assessment of area employment composition, income growth (particularly among the target market), and area growth perceptions. The demographic evaluation uses the most recently issued Census information, as well as projections that determine the characteristics of the market. We have also analyzed the impact of farms in each county and the number of farmworkers employed.

- A survey of area Tax Credit properties. All Tax Credit properties have been identified by lists provided by the Texas Department of Housing and Community Affairs (TDHCA). Both 9% and 4% allocation projects have been included. We surveyed at least 40% of listed TDHCA properties in person in order to evaluate overall condition and quality.

- A survey of most available market-rate properties in each county. For each county we have included details regarding all surveyed properties, including the overall vacancy rate, the number of units built per year, as well as the average rent and unit square footage for each unit type in the submarket.

- A survey of existing government-subsidized properties in each county. These properties were identified and analyzed due to their purpose of serving low- and very-low-income households in the area.

- Area building statistics and interviews with area officials familiar with area development provides identification of those properties that might be planned or proposed for the area that will have an impact on the rental housing market. Planned and proposed projects are always in different stages of development. As a result, it is important to establish the likelihood of construction, the timing of the project, and its impact on the market.

- A demand analysis by bedroom type and income range was completed to determine the need for additional Tax Credit development in each submarket. This analysis has been segregated into overall demand and demand from households age 55+.

- We have also projected the number of income-qualified households at 0% to 30% of the Area Median Household Income (AMHI), 31% to 40% AMHI, 41% to 50% AMHI, 51% to 60% AMHI, 61% to 80% AMHI, and 81% to 100% AMHI for the years 2008 through 2013. A detailed explanation of the demand analysis methodology is included at the beginning of each submarket demand section.

C. SOURCES

VWB Research uses various sources to gather and confirm data used in each analysis. These sources include the following:

- The 1990 and 2000 Census on Housing
- ESRI Demographics
- InfoUSA
- Ribbon Demographics HISTA Data
- U.S. Department of Labor
- Management for each property included in the survey
- Local planning and building officials
- Local Housing Authority representatives
- Farm owners and agricultural representatives
- U.S. Department of Housing and Urban Development (HUD)
- USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture

D. REPORT LIMITATIONS

VWB Research relies on a variety of sources of data to generate this report. These data sources are not always verifiable; however, VWB Research makes a significant effort to assure accuracy. While this is not always possible, we believe our effort provides an acceptable standard margin of error. VWB Research is not responsible for errors of or omissions in the data provided by other sources.

Any reproduction or duplication of this report without the express approval by the Texas Department of Housing and Community Affairs or VWB Research is strictly prohibited.

II. EXECUTIVE SUMMARY

This report provides a rental housing needs assessment of the Deaf Smith County, Castro County, and Parmer County areas in the panhandle region of Texas. The focus of this report is to evaluate supply and demand characteristics and to determine the potential need for additional affordable rental housing in the subject counties. Potential housing demand was calculated for general occupancy, seniors, disabled persons, and migrant farm workers.

Demographic Overview

The following table provides demographic characteristics of each of the three subject counties, as well as the demographic characteristics of the state of Texas and the nation as a whole. Since 2000, Deaf Smith County is the only subject county to have experienced an increase in population and households. Overall, Deaf Smith County is the largest of the three subject counties and offers the most community services and employment opportunities. The following table reflects demographic trends projected to 2013:

	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY		TEXAS		U.S.	
	POP.	H.H.	POP.	H.H.	POP.	H.H.	POP.	H.H.	POP.	H.H.

Source: VWB Research; ESRI; 1990, 2000 Census
H.H. – Households
POP. - Population

The state of Texas experienced significant growth in population and total households between 2000 and 2008, increasing by 17.3% and 16.7%, respectively. During the same time period, the population and households in Deaf Smith County increased by 0.4% and 1.7%, respectively. Essentially, household formations (i.e. younger people moving out of their parents' homes) are being created faster than the population growth rate. Note Castro County experienced declines of 8.0% and 6.2%, respectively. Parmer County also experienced a decline in population and households of 1.9% and 1.4%, respectively. Despite the projected decline in total population in Castro and Parmer counties over the next five years, the senior population (age 55 years and older) is projected to increase in all three subject counties. This is indicative of an aging population base and an increasing need for affordable senior housing.

Rental Housing Survey

We personally surveyed a total of 31 rental housing properties within the three subject counties. All properties surveyed in this analysis were found through apartment guide listing, classified advertisements, the Multiple Listing Service, interviews with local real estate agents and professionals, government officials, and the personal observations of our analysts. These 31 total properties surveyed contain a total of 886 units with an overall occupancy rate of 96.5%. This is considered a high occupancy rate for rental housing. The following table summarizes the rental housing supply by project type for each subject county.

	DEAF SMITH COUNTY				CASTRO COUNTY				PARMER COUNTY			
PROJECT TYPE	PROJECT SURVEYED	TOTAL UNITS	VACANT	OCCUPANCY RATE	PROJECT SURVEYED	TOTAL UNITS	VACANT	OCCUPANCY RATE	PROJECT SURVEYED	TOTAL UNITS	VACANT	OCCUPANCY RATE
MRR	10	217	13	94.0%	3	55	0	100.0%	7	126	8	93.7%
MRT	1	76	4	94.7%	0	0	-	-	0	0	-	-

GSS	4	150	5	96.7%	2	60	0	100.0%	1	11	0	100.0%
TOTAL	18	634	23	96.4%	5	115	0	100.0%	8	137	8	94.2%

MRR – Market-rate
MRT – Market-rate/Tax Credit
TAX – Tax Credit
TGS – Tax Credit/Government-Subsidized
GSS – Government-Subsidized

Based on our survey of rental housing alternatives in the Panhandle Region, vacancies are highest among market-rate properties. This is common, as demand for lower cost, affordable rental housing is typically higher than market-rate rental housing. In Parmer County, the overall occupancy rate is being slightly skewed by the currently under renovation 6th Street/Avenue B South Apartments (Map ID 3). This property has three vacancies among its six rentable units that have recently been renovated. Excluding this property, the 120 market-rate units surveyed in Parmer County have a combined occupancy rate of 95.8%, which is considered very good for market-rate rentals.

Overall, the demand for rental housing in each of the three counties appears to be strong. However, Castro County does not have any available rental units, clearly indicating a shortage of housing choices. Despite the declining demographic and economic trends in Castro County, the existing rental housing opportunities are not sufficient to accommodate the rental housing demand.

Demand Estimates

a. *Overall Affordable Housing*

Pursuant to the TDHCA RFP, two demand models were conducted as part of this analysis of affordable housing within the subject markets. These demand components include the following (Note: demand estimates for disabled persons and farm workers were conducted separately from the following analysis):

1. Demand based on strict need:
   - Household growth
   - Cost overburdened households
   - Overcrowding
   - Substandard housing
   - Demand from other non-overlapping sources

2. Demand based upon traditional transitory patterns:
   - Household growth
   - Turnover
   - Demand from other non-overlapping sources

We have summarized demand into three categories: below 40% of AMHI; between 41% and 60% of AMHI; and between 61% and 100% of AMHI. Note that although most government-subsidized units actually target households with incomes up to 50% of AMHI and Tax Credit units often target households with incomes as low as 30% of AMHI, we used the income levels that are typical for specific program occupants. Typically, households with incomes below 40% of AMHI reside in government-subsidized units, while those with incomes between 41% and 60% typically reside in Tax Credit units, and households with incomes between 61% and 100% of AMHI often reside in non-income-restricted market-rate units. Although exceptions can certainly occur, this summary is considered the most likely illustration of potential demand for each of the three subject counties (both the *Strict Need Demand* and *Traditional* T*ransitory Demand* model estimates are shown). This summary is also illustrated on page V-27 of this report, as well as project-specific demand calculations assuming a single project can capture 25% of the very-low income anticipated demand or 10% of the moderate-income anticipated demand.

OVERALL DEMAND SUMMARY (STRICT AND TRANSITORY DEMAND MODELS)												
	DEAF SMITH COUNTY				CASTRO COUNTY				PARMER COUNTY			
	2008		2013		2008		2013		2008		2013	
GENERAL OCCUPANCY	STRICT	TRANSITORY	STRICT	TRANSITORY	STRICT	TRANSITORY	STRICT	TRANSITORY	STRICT	TRANSITORY	STRICT	TRANSITORY
TOTAL NET DEMAND (0%-40% AMHI)	457	411	389	402	85	97	82	106	216	160	188	153
TOTAL NET DEMAND (41%-60% AMHI)	92	92	118	185	-12	51	13	49	89	91	39	81
TOTAL NET DEMAND (61%-100% AMHI)	107	301	147	301	12	96	16	86	3	137	40	129
SENIOR HOUSING (AGE 55+)												
TOTAL NET DEMAND (0%-40% AMHI)	203	196	188	181	26	27	38	37	66	52	65	51
TOTAL NET DEMAND (41%-60% AMHI)	59	75	51	69	6	11	7	13	16	20	14	18
TOTAL NET DEMAND (61%-100% AMHI)	42	71	47	80	3	11	11	21	10	21	20	33

Regardless of the demand model used, most of the potential support for new affordable product appears to be in Deaf Smith County, where there are as many as 457 potentially income-eligible households with incomes under 40% of AMHI may be currently supported throughout the county. Currently, up there are up to 203 age- and income-restricted households that could potentially be supported in Deaf Smith County. It is important to reiterate that the total potential demand is for the entire county, rather than one specific site. Many additional factors such as site location, design, features, and rents all contribute to a project's ability to capture market support. As such, unless all product types at varying rent levels serving seniors and families at a wide band of income levels was built in several locations throughout the county, we would not anticipate that the total number of units listed in the table above could actually be supported. Instead, we believe only a portion of these units could be supported at a single site. A site specific estimate of support is addressed later in this report.

The demand estimates also indicate that a smaller support base appears to be in Castro and Parmer Counties, particularly among senior households. While there are many rent overburdened and overcrowded households in these two counties, any new product developed in this market may have difficulty attracting enough support to fill very many units. In the event that a well-designed and affordable project was built in either of these counties, it is anticipated that because most of its support would have to originate from existing rentals in the market, some existing projects may be adversely impacted and lease-up for the subject project(s) may be slower than typical. At this time, it appears that a mixed income range project (0% to 60% of AMHI) targeting both seniors and families would have the greatest support potential.

b. *Special Needs Housing (Disabled)*

The following table summarizes the demand for special needs housing in each subject county (Note: the data includes those non-institutionalized persons age 16+ with a sensory or physical disability).

DEAF SMITH COUNTY						
APPROPRIATE INCOME RANGE BY TARGETED AMHI	**0% - 30%**	**31% - 40%**	**41% - 50%**	**51% - 60%**	**61% - 80%**	**81% - 100%**
% BASELINE TARGETED INCOME-QUALIFIED RENTER HOUSEHOLDS	36.7%	9.4%	10.1%	10.5%	19.1%	14.3%
X DISABLED RENTER HOUSEHOLDS	547	547	547	547	547	547
TOTAL INCOME-QUALIFIED RENTER HOUSEHOLDS WITH DISABLED RESIDENT	201	51	55	57	104	78
CASTRO COUNTY						
APPROPRIATE INCOME RANGE BY TARGETED AMHI	**0% - 30%**	**31% - 40%**	**41% - 50%**	**51% - 60%**	**61% - 80%**	**81% - 100%**
% BASELINE TARGETED INCOME-QUALIFIED RENTER HOUSEHOLDS	31.1%	12.7%	11.4%	10.2%	16.8%	17.7%
X DISABLED RENTER HOUSEHOLDS	145	145	145	145	145	145
TOTAL INCOME-QUALIFIED RENTER HOUSEHOLDS WITH DISABLED RESIDENT	45	18	16	15	24	26
PARMER COUNTY						
APPROPRIATE INCOME RANGE BY TARGETED AMHI	**0% - 30%**	**31% - 40%**	**41% - 50%**	**51% - 60%**	**61% - 80%**	**81% - 100%**
% BASELINE TARGETED INCOME-QUALIFIED RENTER HOUSEHOLDS	31.6%	9.6%	10.9%	12.6%	21.7%	13.6%
X DISABLED RENTER HOUSEHOLDS	209	209	209	209	209	209
TOTAL INCOME-QUALIFIED RENTER HOUSEHOLDS WITH DISABLED RESIDENT	66	20	23	26	45	28

The preceding analysis assumes persons with disabilities have incomes reflective of the general population. In reality, it is more likely persons with disabilities will have lower incomes than the general population; therefore, the above analysis understates the housing required to serve this component at lower incomes. If units were developed to 100% of the above level, some vacancies would likely occur in the market since so many people are cared for in conventional units.

We recommend a development target of no more than 2% to 5% of total demand for special needs households. Due to the limitations of accurate information available pertaining to special needs households, we strongly recommend any planned project involve extensive interviews with appropriate local service providers, caregivers, medical facilities, etc., to help determine the demand of special needs households within that market, and the type or characteristics of the housing required.

c. *Farm Worker Housing*

Rural Development defines a farm worker household as a "household of one or more persons wherein at least one member of the household is a farmworker." Farmworker is defined by Rural Development as "any laborer who is employed on a seasonal, temporary, or permanent basis in the planting, cultivating, harvesting or processing of agricultural or aquacultural products and who has derived at least 50% of his or her income in the immediately preceding 12 calendar months from such employment."

The number of hired farm labor farms and workers for each county is as follows.

COUNTY	HIRED FARM LABOR FARMS	HIRED FARMWORKERS (FARMS WITH $1,000+ PAYROLL)		
		TOTAL	150 DAYS OR MORE	LESS THAN 150 DAYS
DEAF SMITH	226	1,072	619	453
CASTRO	251	1,393	520	873
PARMER	261	1,662	635	1,027

Source: USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture

Although Deaf Smith County has the largest population, it has the fewest number of hired farm labor farms and farmworkers among the three subject counties. In addition, the hired farmworkers in Deaf Smith County are predominately those working 150 days or more per year. Conversely, the majority of hired farmworkers in Castro County and Parmer County work less than 150 days per year, indicating more migrant workers. This indicates potential need for migrant farmworker housing.

Based on the National Agricultural Workers Study (NAWS) completed in 1998 by the U.S. Department of Labor, nearly three-quarters of U.S. farm workers earned less than $10,000 per year; three out of five farm worker families had incomes below the poverty level. Therefore, farmworkers often live in overcrowded homes in order to reduce their housing costs. More than half of all farm workers live in overcrowded housing.

The table on the following page is a summary of the three projects in the subject counties that are either designated as farmworker housing or have a large share of farmworkers. For the purpose of this analysis, we have assumed two persons per bedroom for each of the farmworker apartment complexes identified.

	AMISTAD 301 S. TEXAS AVE. HEREFORD, TX		AZTECA APARTMENTS I & II 3910 E. JONES ST. DIMMITT, TX		COTTONWOOD TOWNHOMES 1300 WALNUT AVE. FRIONA, TX	
BEDROOMS	UNITS	POTENTIAL FARMWORKERS *	UNITS	POTENTIAL FARMWORKERS *	UNITS	POTENTIAL FARMWORKERS *
ONE-BR.	-	-	-	-	4	8
TWO-BR.	24	96	16	24	10	40
THREE-BR.	20	120	16	96	16	96
FOUR-BR.	6	48	28	224	-	-
TOTAL	50	264	60	344	30	144

*Based on two-persons per bedroom

Assuming that the hired farmworkers in each county that work less than 150 days per year reside at conventional apartment projects targeting farmworkers, we have estimated a farmworker housing deficit for each county in the following table. It is estimated that farmworkers that work more than 150 days per year, and are not migrant, typically reside in other conventional low-income apartments.

COUNTY	HIRED FARMWORKERS THAT WORK LESS THAN 150 DAYS	MINUS	TOTAL POTENTIAL BEDS OF EXISTING FARMWORKER HOUSING	EQUALS	FARMWORKER BEDS DEFICIT
DEAF SMITH	453	-	264	=	189
CASTRO	873	-	344	=	529
PARMER	1,027	-	144	=	883

As indicated in the preceding table, the largest farmworker housing deficit (based on the number of hired migrant farmworkers and the existing conventional farmworker housing opportunities in each county) is in Parmer County. As illustrated in the table above, Parmer County has the largest migrant farmworker base and the fewest existing beds available in conventional farmworker housing. The farmworker bed deficit is based on the number of beds for each farmworker, rather than the number of potential units of farmworker housing, considering that farmworkers often reside in overcrowded housing units, with an average of two persons per bedroom. The number of achievable units would be dependent upon the bedroom-types offered.

Based on our analysis of each of the three subject counties and the farmworker housing characteristics, it appears that due to the increasing dairy industry in the Texas Panhandle, farmworker housing is in increasing demand. Additional farmworker housing can likely be supported in each county. Numerous factors go into the specific achievability of a specific farmworker housing project. For instance, although Deaf Smith County has the fewest number of hired farmworkers (compared to Castro and Parmer Counties), this area may potentially be able to support a large project due to available community services and the fact that farmworkers are accustomed to commuting between counties for employment. The ability of a project to draw support from an entire county or three-county area will be dependent upon design type (garden, townhouse, single-family), unit mix and bedroom types, amenities, rents, targeted AMHI and housing assistance, and location (proximity to community services, visibility, access, and surrounding land uses).

Similar to the achievability of non-farmworker rental housing, it is anticipated that any new farmworker rental project can capture no more than a small share of the total demand (based on deficit) in a given county. While this preceding analysis illustrates the gap between the number of hired migrant farmworkers in each of the three subject counties and the existing conventional rental farmworker housing supply, it does not take into account additional farmworker housing opportunities, such as private single-family rentals, mobile home rentals, or motels. Thus, caution must be exercised when determining the market potential of a specific farmworker housing project.

The following pages summarize of the key findings of each of the three subject counties.

DEAF SMITH COUNTY

Deaf Smith County: 1,498 square miles
2008 Median Household Income: $35,976
2008 Median Home Value: $67,699

	Population	Households

The following table illustrates the migrant farmworker demand for Deaf Smith County:

COUNTY	HIRED FARMWORKERS THAT WORK LESS THAN 150 DAYS	MINUS	TOTAL POTENTIAL BEDS OF EXISTING FARMWORKER HOUSING	EQUALS	FARMWORKER BEDS DEFICIT
DEAF SMITH	453	-	264	=	189

SUMMARY OF DEAF SMITH COUNTY FINDINGS

Deaf Smith County experienced positive demographic growth between 2000 and 2008, which is projected to continue (at a minimal rate) through 2013. It should be noted that of the three subject counties, Deaf Smith County is the only area projected to experience a demographic increase in total population and total households over the next five years.

Over the past 10 years, Deaf Smith County has experienced in increase in total employment of 16.7%, which is a positive indication of the strength of the area economy. Data for 2007, the most recent year that year-end figures are available, indicates in-place employment in Deaf Smith County to be 81.6% of the total county employment. This indicates that the number of employment opportunities in the county is fewer than the number of employable persons seeking work. A high share of employed persons leaving the county for employment could have an adverse impact on residency with increasing energy costs.

The rental housing market within the Deaf Smith County area is considered to be strong, with an overall occupancy rate of 96.4%. There is only one existing conventional rental project serving farmworkers, Amistad (Map ID 1). This project originally constructed 30 units in 1991 under the RD 514 and 516 programs. In 2000, an additional 20 units were constructed due to strong demand. While additional small motels are rented on a weekly basis during the migratory farmworker season, we were unable to obtain specific rental information from these small properties due to the sensitivity of the migrant farmworker situation and likely presence of illegal immigrants in the migrant farmworking community.

Based on the demand calculations found in Section V of this analysis, Deaf Smith County appears to have the largest demographic support base for additional very low-income conventional rental units and senior rental units when compared to Castro and Parmer Counties. Combined with the increasing demographic trends, Deaf Smith County appears to be a favorable location for additional consideration for the development of modern rental housing.

However, despite the positive factors associated with the new development of conventional rental housing in the Hereford and Deaf Smith County area, this county appears to have the lowest deficit of farmworker housing based on the number of farms that hire farm laborers. Interviews with local representatives have stated that many farms in the Deaf Smith County area highly mechanized and do not need significant farmworker labor forces. The farms in Castro and Parmer Counties appear to need more farmworker labor than the farms in Deaf Smith County. As such, there appears to be a potentially higher demand in these counties for farmworker housing. However, it is very important to note that this area may potentially be able to support a farmworker project due to available community services and the fact that farmworkers are accustomed to commuting between counties for employment. The ability of a project to draw support from an entire county or three-county area will be dependent upon design type (garden, townhouse, single-family), unit mix and bedroom types, amenities, rents, targeted AMHI and housing assistance, and location (proximity to community services, visibility, access, and surrounding land uses).

We identified and personally surveyed five conventional rental housing projects containing a total of 115 units within Castro County. This survey was conducted to establish the overall strength of the rental market. These rentals have a combined occupancy rate of 100.0%, indicating a clear lack of housing choices. Among these projects, three are three non-subsidized (market-rate) projects containing 55 units. The remaining two projects contain 60 government-subsidized units.

The following table illustrates the migrant farmworker demand for Castro County:

COUNTY	HIRED FARMWORKERS THAT WORK LESS THAN 150 DAYS	MINUS	TOTAL POTENTIAL BEDS OF EXISTING FARMWORKER HOUSING	EQUALS	FARMWORKER BEDS DEFICIT
CASTRO	873	-	344	=	529

SUMMARY OF CASTRO COUNTY FINDINGS

Castro County experienced a decline in total population and households between 2000 and 2008. This county is projected to experience the largest demographic decline over the next five years compared to the other two subject counties.

Over the past 10 years, Castro County experienced a decline in total employment of 13.3%, which coupled with the demographic decline, is an indication of the instability of the area. Given the increasing senior demographic base in Castro County, it appears the area is aging faster than new persons and employment opportunities are entering the county.

Despite the negative demographic and economic factors in Castro County, the housing market appears to be very strong, as there is a lack of available rental housing opportunities. As previously stated, all surveyed rental units within Castro County are 100.0% occupied. Based on our analysis of the Dimmitt area and the surrounding Castro County area, there are two existing conventional rental projects currently serving farmworkers. Azteca Apartments I and II (Map IDs 1 and 2), built in 1962 and 2007, respectively, were developed under the RD 514 and 516 programs by the Azteca Economic Development Corporation. Phase I of the project originally consisted of 48 one-bedroom units; however, recent renovations converted this project into 20 three-bedroom units and eight remaining one-bedroom units. The second phase of Azteca Apartments consists of eight two-bedroom units, 16 three-bedroom units, and eight four-bedroom units. As expected, since the first phase was constructed in 1962 and the second phase was constructed in 2007, the first phase has a C- overall quality rating, while the second phase has a B+ overall quality rating. The contract rents are priced accordingly.

Joe Franco, Executive Director of Azteca Economic Development Corporation manages the Azteca Apartments I and II. According to Mr. Franco, most of the employment for farmworkers in the area is at dairy farms. Three new dairies are expected to come online in Castro County within the next year. By his estimate, each of these dairies will employ approximately 20 people, for a total of 60 people. All 60 of these new employees will require housing. Mr. Franco also noted that there has been a "dynamic change" in what groups need housing in Castro County. Over the years, the need for housing has shifted from migrant farmworkers to permanent farmworkers employed at dairies and feed lots. One dairy in Castro County, in order to meet its workforce needs, is currently importing workers from Africa, Guatemala, and Mexico. Housing is being provided by the dairy in double-wide trailers subdivided into additional units, as no other housing is available. Although dairies may provide housing for employees, this is the exception rather than the standard. Farmworkers that are new to the area will typically stay with established family members in the area, if housing is not available for them, until a unit opens up elsewhere.

Based on the demand calculations found in Section V of this analysis, Castro County appears to have the smallest demographic support base for additional very low-income conventional rental units and senior rental units when compared to the other two subject counties. Combined with the decreasing demographic trends, Castro County does not appear to be the most favorable location for the additional development of rental housing.

However, despite these negative factors in the Dimmitt and Castro County areas, it should be noted that all surveyed rental housing projects are currently 100.0% occupied. Possibly no more than 20 new units of affordable general occupancy housing could be supported at this time. In addition, the existing farmworker housing projects are also fully occupied and maintain waiting lists. With the potential addition of three new dairy farms in the Castro County area, the need for additional farmworker housing appears to be positive, despite the demographic trends. The farmworker beds deficit in Castro County is considerably higher than that in Deaf Smith County. As such, Castro County could likely support a new small farmworker housing complex.

PARMER COUNTY

Parmer County: 885 square miles

We identified and personally surveyed eight conventional housing projects containing a total of 137 units within the Parmer County. This survey was conducted to establish the overall strength of the rental market. These rentals have a combined occupancy rate of 94.2%, a moderate rate for rental housing. However, it is important to note that the only project with a high share of vacancies is 6th Street/Avenue B South (Map ID 3), which currently has three vacancies among the six rentable units. This project is undergoing renovations and has an additional six units currently under construction. Six of the eight conventional rentals in the Parmer County area are all 100.0% occupied, indicating a strong rental market.

The following table illustrates the migrant farmworker demand for Parmer County:

COUNTY	HIRED FARMWORKERS THAT WORK LESS THAN 150 DAYS	MINUS	TOTAL POTENTIAL BEDS OF EXISTING FARMWORKER HOUSING	EQUALS	FARMWORKER BEDS DEFICIT
PARMER	1,027	-	144	=	883

SUMMARY OF PARMER COUNTY FINDINGS

Parmer County experienced a decline in total population and households between 2000 and 2008. This county is projected to experience a continued demographic decline over the next five years; however, not as significant a demographic decline as projected in Castro County.

Over the past 10 years, Parmer County experienced a slight decline in total employment of 0.6%. However, the unemployment rate in Parmer County has historically remained well below the state average, as well as the unemployment rates for Deaf Smith County and Castro County. Overall, the Parmer County economy has fluctuated, increasing between 1998 and 2003, only to decline between 2003 and 2008. Regardless, it is very important to note that in-place employment in Parmer County is 114.3% of the total county employment. This means that Parmer County has more employed persons coming to the county from other counties for work (daytime employment). It is likely that a large share of Deaf Smith County and Castro County residents are working in Parmer County. A high share of employed persons commuting to Parmer County from other areas for employment is an indication that there may be a lack of available housing within this county. This would suggest that Parmer County lacks housing choices for employed persons in the area. Considering our field survey of conventional rental units (discussed in Section IV and listed in full detail in Section VIII), there does appear to be a lack of rental housing in the area, as indicated by the fact that six of the eight projects surveyed are currently 100.0% occupied.

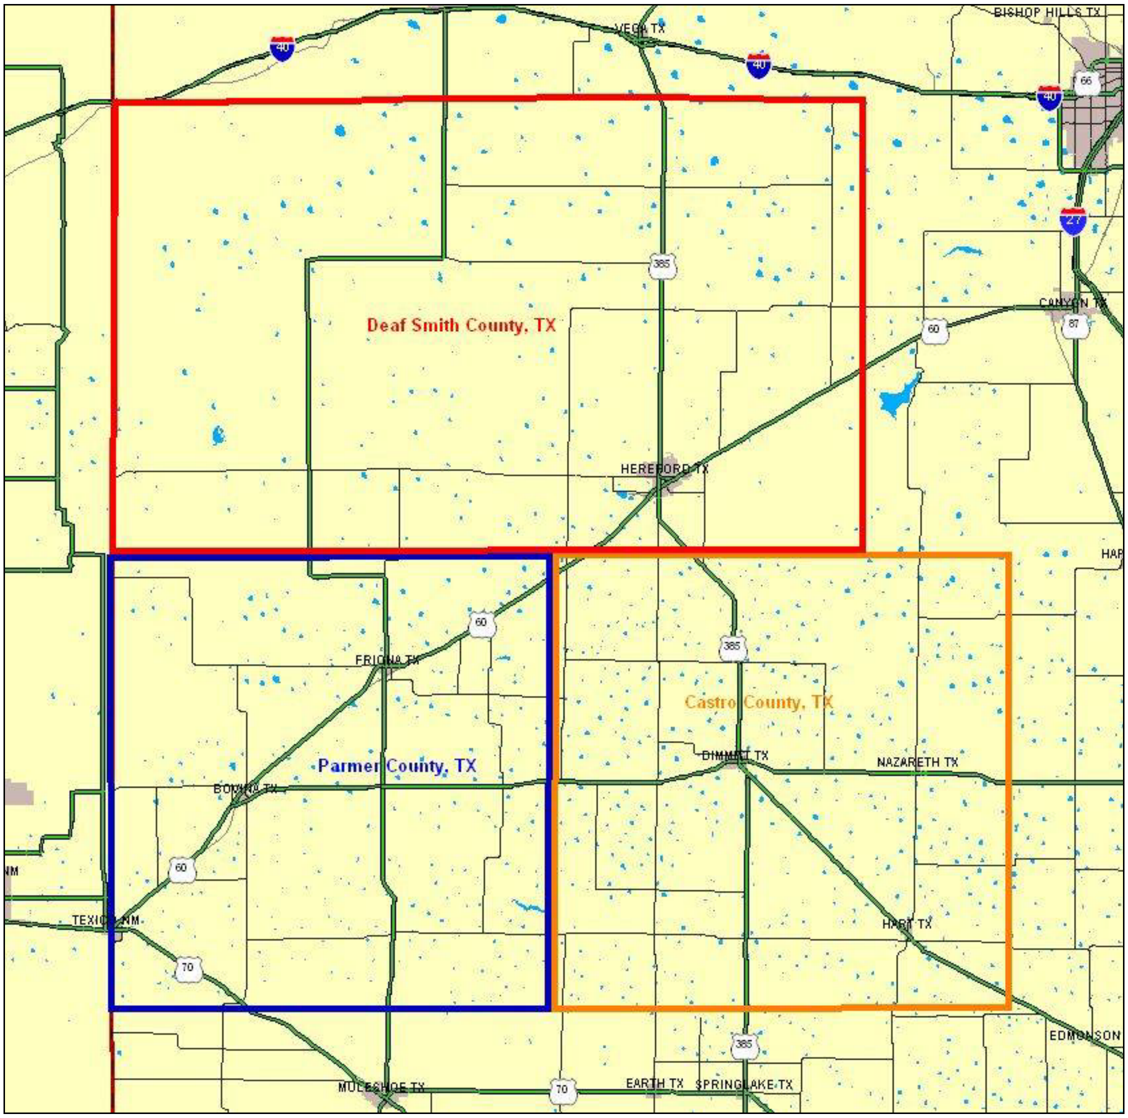
In addition, agricultural statistics provided by the most recent USDA National Agriculture Statistics Service (NASS) Census of Agriculture (2002) indicate that compared to Deaf Smith County and Castro County, Parmer County has the highest number of farms requiring hired farm laborers. In addition, Parmer County has the most hired farmworkers working in the county, compared to the other two subject counties. Given the strength of the overall rental market, there appears to be demographic support for farmworker housing. This is further illustrated by the fact that Parmer County has the largest farmworker beds deficit compared to the Deaf Smith and Castro Counties.

Based on the demand calculations found in Section V of this analysis, Parmer County appears to have a moderate demographic support base for additional very low-income conventional rental units and senior rental units when compared to the other two subject counties. Deaf Smith County has a larger demographic support base, while Castro County has a smaller demographic support base.

Overall, considering the in-place employment statistics, the existing farmworker housing beds deficit, and the increasing dairy industry in the Texas Panhandle, there appears to be support in Parmer County for additional farmworker housing.

III. GENERAL, DEMOGRAPHIC, AND ECONOMIC INFORMATION

The purpose of this analysis is to evaluate the general and demographic information of the three subject counties: Deaf Smith County, Castro County, and Parmer County. The following map illustrates the boundaries of the three subject counties.



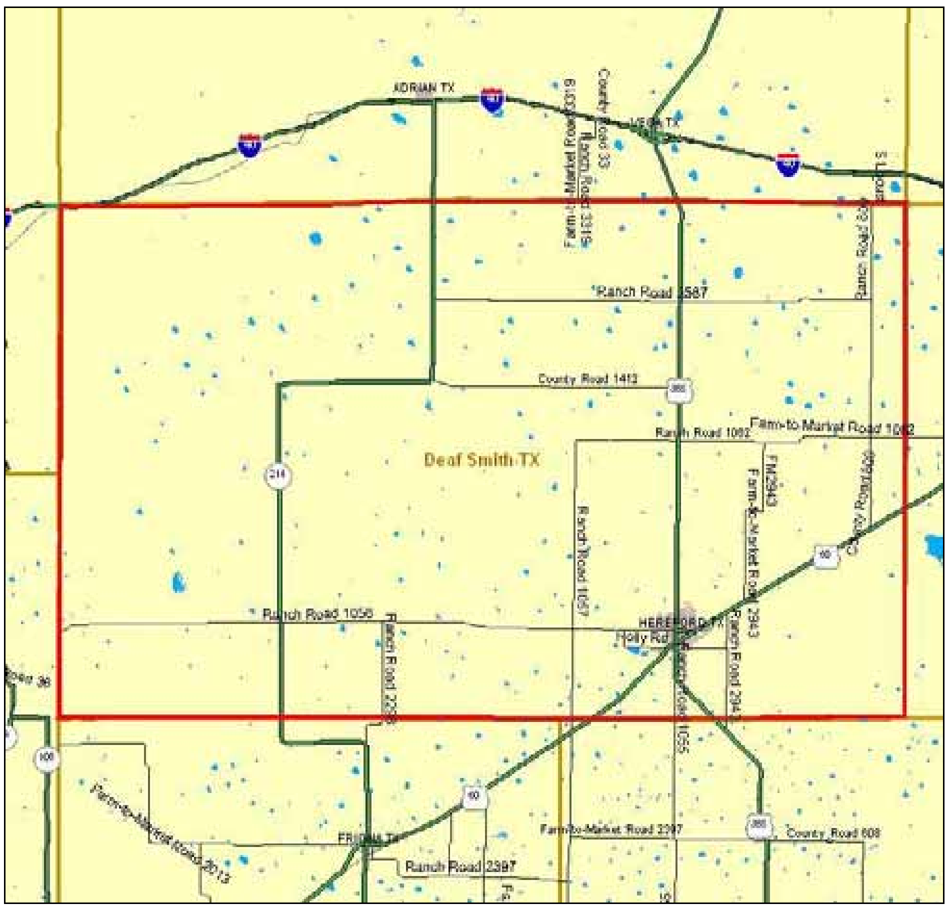
As illustrated in the preceding map, Deaf Smith County is notably larger than both Castro and Parma counties. We have evaluated the demographic and economic trends of each county later in this analysis. However, the following portion of this section of the analysis discusses the general characteristics and description of each county. Later in this section, the demographic and economic trends are illustrated simultaneously for comparison purposes.

A. GENERAL DESCRIPTION

1. DEAF SMITH COUNTY

The first area analyzed and discussed in this report is the largest of the three counties, Deaf Smith County. This county is located in the far northwestern portion of Texas and shares its western border with the state of New Mexico. The following are relevant facts about Deaf Smith County:

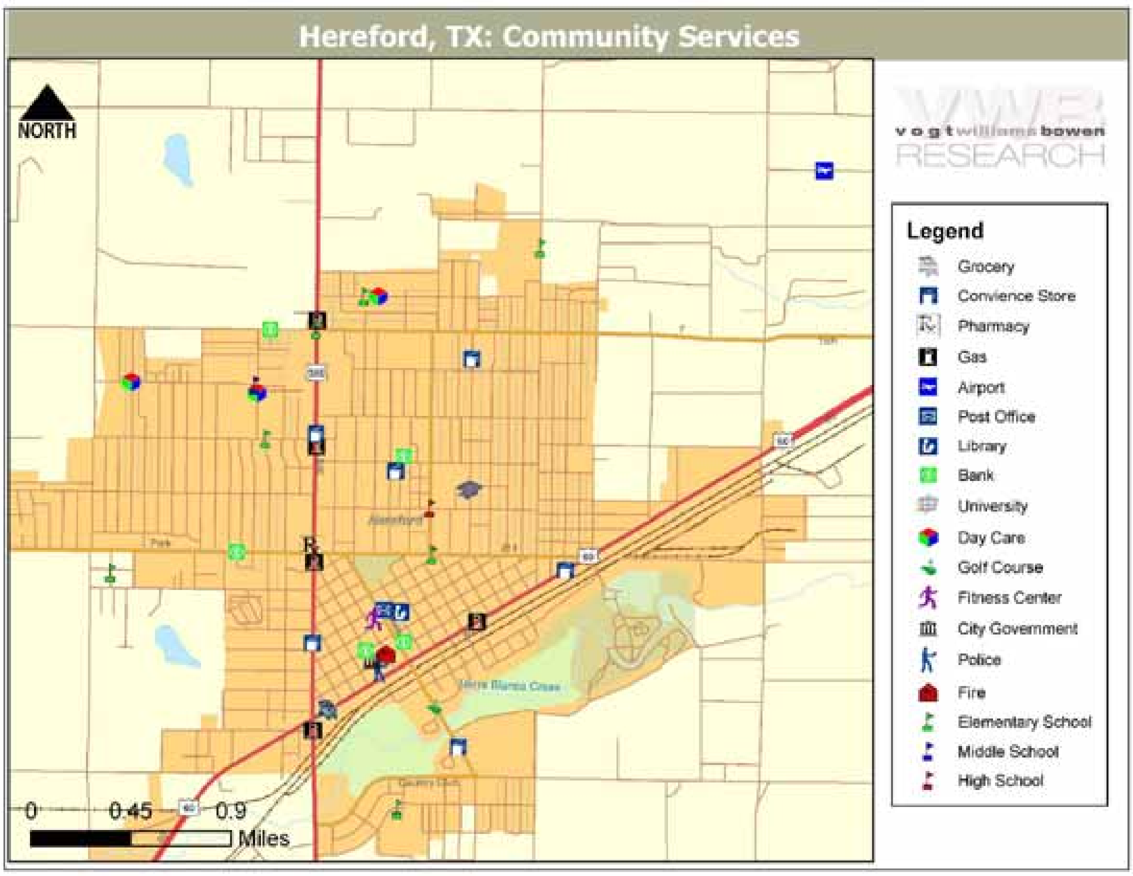
Deaf Smith County: 1,498 square miles
2008 Population: 18,644
2008 Households: 6,287
2008 Median Household Income: $35,976
2008 Median Home Value: $67,699



The largest city within Deaf Smith County is Hereford, which is located along U.S. Highway 60 and U.S. Highway 385 and is the county seat. Hereford is the largest city within all three subject counties (Deaf Smith, Castro, and Parmer), and is estimated to have a 2008 population of 14,646 with 4,911 households. The 2008 median household income in the city of Hereford is $35,812 and the median home value in 2008 is estimated to be $70,047.

Hereford City Hall and the offices of the county government are both located in the city. Hereford has access to numerous community services including grocery shopping, pharmacy, banking, employment opportunities, religious and educational institutions, medical and social services, recreational facilities, and community parks.

A Wal-Mart Supercenter is located on the north side of Hereford, which serves many purposes including grocery, pharmacy, and a major employment center. Along Main Street there are several small specialty shops and offices. Also in Hereford is a small branch of Amarillo College, a community aquatic center, and a rodeo arena. There are also numerous employment opportunities in close proximity, including feedlots and meat packaging facilities. The following map illustrates some of the key community services in the Hereford area:



Total crime risk for Deaf Smith County is below the national average with an overall personal crime index of 49 and property crime index of 63. Total crime risk for the state of Texas is above the national average with indices for personal and property crime of 114 and 127, respectively.

	CRIME RISK INDEX	
	DEAF SMITH COUNTY	**TEXAS**
TOTAL CRIME	**58**	**126**
PERSONAL CRIME	**49**	**114**
MURDER	16	110
RAPE	45	111
ROBBERY	17	115
ASSAULT	111	115
PROPERTY CRIME	**63**	**127**
BURGLARY	69	134
LARCENY	94	129
MOTOR VEHICLE THEFT	21	101

Source: Applied Geographic Solutions

Although the Deaf Smith County Total Crime risk (58) is higher than that of Castro County (42) and Parmer County (26), it is important to note that overall, the area is considered to be safe. Interviews with local law enforcement officers and Judge Tom Simons, the Deaf Smith County Judge, revealed that crime does not appear to be significant.

The homes in Hereford are primarily older ranch homes varying in condition for poor to excellent. Larger, better quality homes are typically located towards the outskirts of town, and in the county outside of town on large lots. According to ESRI demographic information, the median home value in 2008 within Deaf Smith County was $67,699.

The following pages contain photographs of significant land uses in the Hereford area.

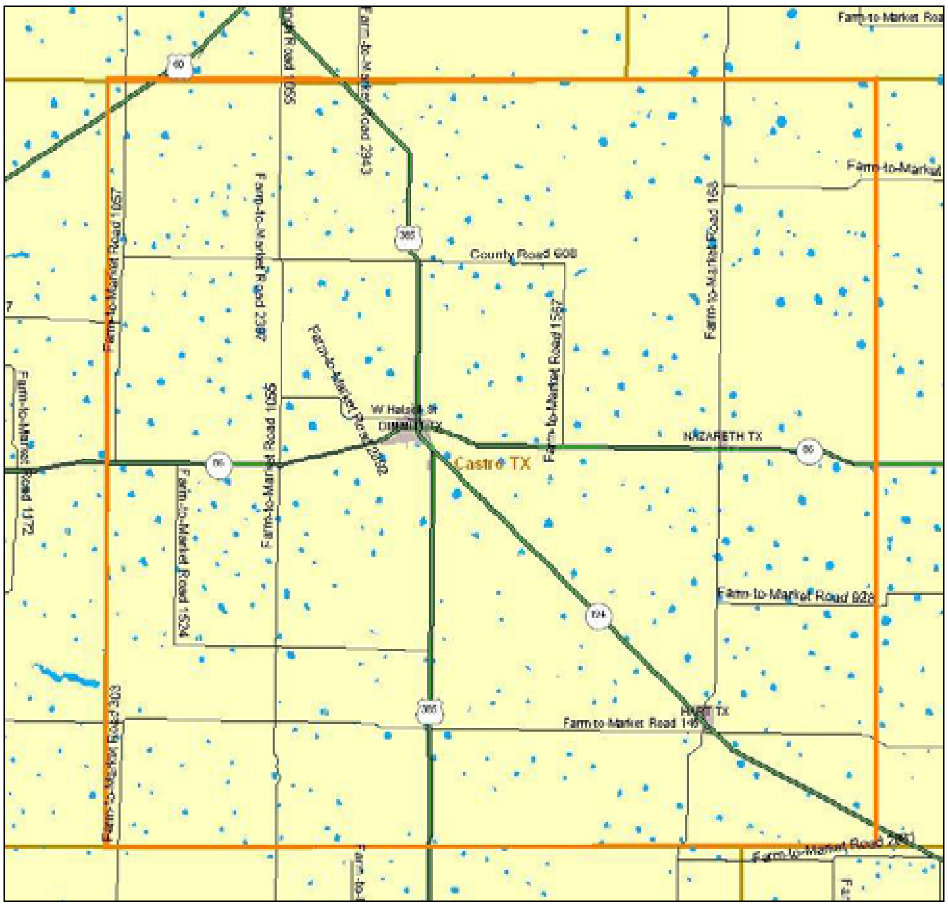
2. CASTRO COUNTY

Castro County is located south and southeast of Deaf Smith County. Castro County is the smallest county of the three subject counties in terms of population and total households. The physical square-mile size of the county is very similar to that of Parmer County, but notably smaller than Deaf Smith County. The following are relevant facts about Castro County:

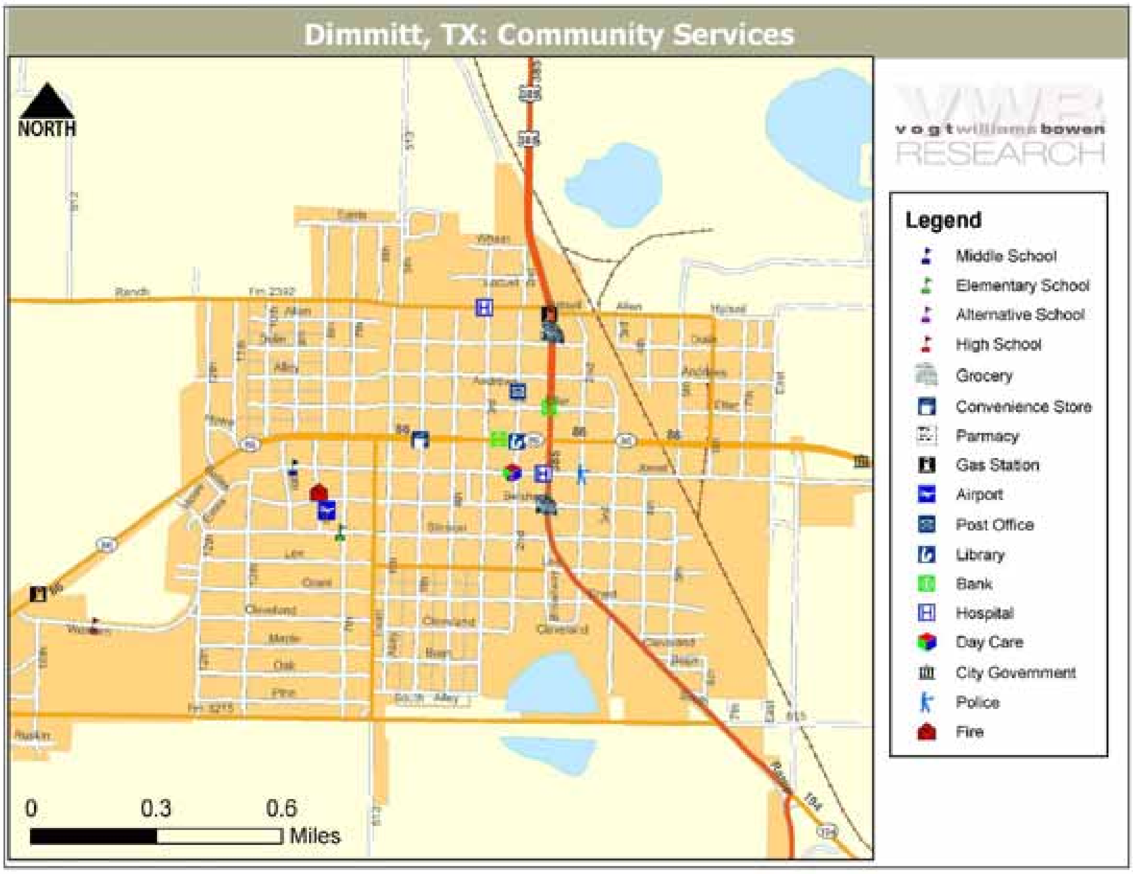
Castro County: 899 square miles
2008 Population: 7,623
2008 Households: 2,591
2008 Median Household Income: $36,918
2008 Median Home Value: $73,556



The largest city in Castro County is Dimmitt, which is located along U.S. Highway 385 and State Route 86. Dimmitt is also the county seat of Castro County. Dimmitt is estimated to have a 2008 population of 4,088 with 1,397 total households. The 2008 median household income in the city of Dimmitt is $35,337 and the median home value in 2008 is estimated to be $71,399.

Dimmitt and is home to the majority of county offices. Several small shops including a Dollar General Store, as well as other community services are located along Bedford Street, the main arterial roadway in Dimmitt. Also in Dimmitt is the Castro County Healthcare Medical Center, which is one of the area's major employers. There are also other employment opportunities within the city limits and the surrounding area, many of which are feedlots and meat packaging facilities.

The following map illustrates some of the key community services in the Dimmitt area:



Total crime risk for Castro County is well below the national average with an overall personal crime index of 35 and property crime index of 47. Total crime risk for the state of Texas is above the national average with indices for personal and property crime of 114 and 127, respectively.

	CRIME RISK INDEX	
	CASTRO COUNTY	TEXAS
TOTAL CRIME	**42**	**126**
PERSONAL CRIME	**35**	**114**
MURDER	4	110
RAPE	38	111
ROBBERY	10	115
ASSAULT	80	115
PROPERTY CRIME	**47**	**127**
BURGLARY	69	134
LARCENY	41	129
MOTOR VEHICLE THEFT	27	101

Source: Applied Geographic Solutions

As illustrated in the preceding table, the crime risk index for Castro County is very low. Parmer County has a lower total crime risk (26) and Deaf Smith County has a higher crime risk (58). Overall, the Castro County area is considered to be relatively safe, and crime is not considered to be a significant issue in the area.

The housing in Dimmitt is similar to the other two counties with mainly single-family homes in varying condition. Again, larger, better quality homes in the best condition are located on the periphery of Dimmitt and scattered throughout the county on large lots. According to ESRI demographic information, the median home value in 2008 within Castro County was $73,556.

The following pages contain photographs of land uses in the Dimmitt area.

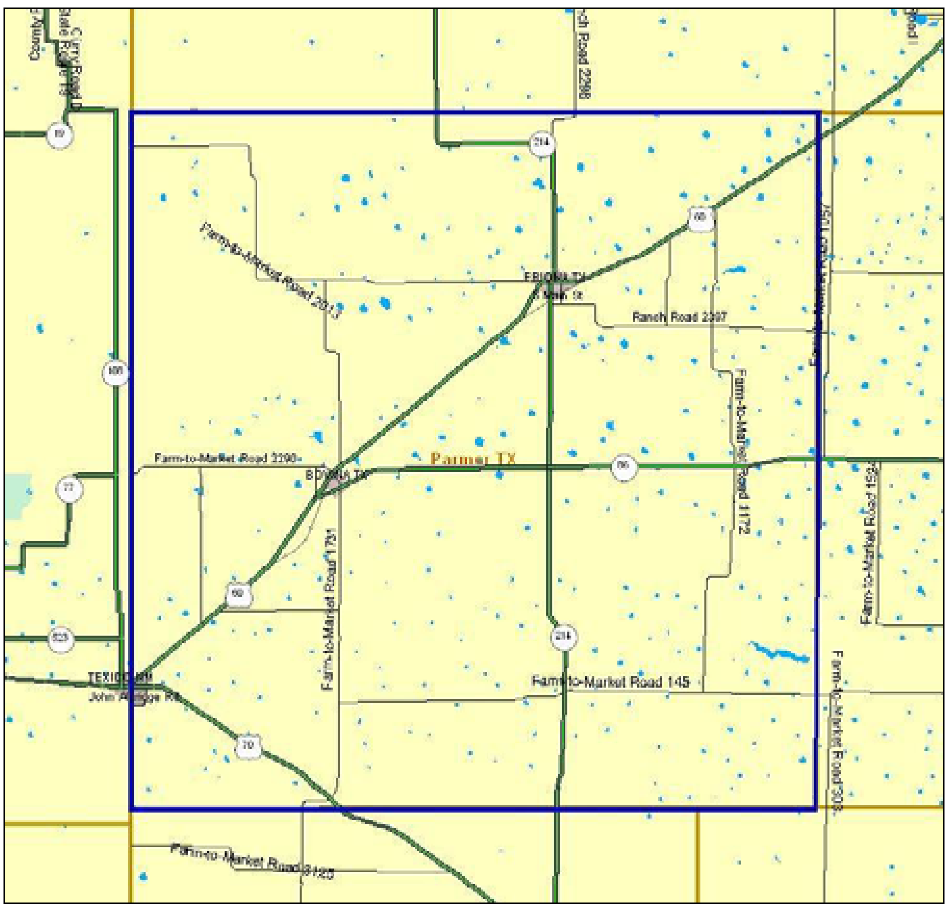
3. PARMER COUNTY

Parmer County is located south and southwest of Deaf Smith County, and directly west of Castro County. Although slightly larger in terms of population and households than Castro County, Parmer County is considered relatively similar in size. Compared to Deaf Smith County, Parmer and Castro counties are both considerably smaller in terms of square miles, population, and total households. The following are relevant facts about Parmer County:

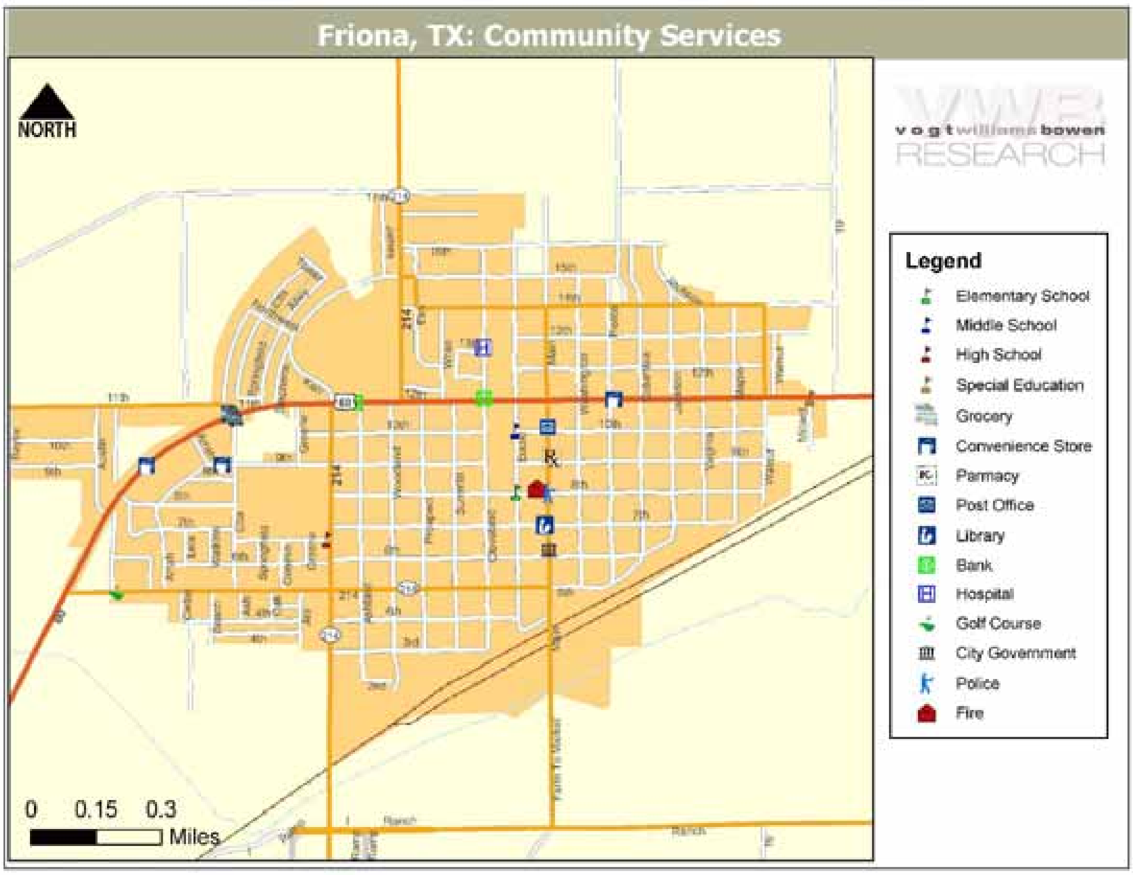
Parmer County: 885 square miles
2008 Population: 9,821
2008 Households: 3,274
2008 Median Household Income: $37,267
2008 Median Home Value: $74,768



The county seat is the city of Farwell, located near the New Mexico border along U.S. Highways 60, 70, and 84. The county government offices are located in Farwell where there are adequate employment opportunities but limited community services (compared to other large cities in the subject counties). There is a small medical clinic as well as other essential community services such as a small grocery store and gas station/convenience store.

Although Farwell is the county seat of Parmer County, the city of Friona, located along U.S. Highway 60 (approximately 25.0 miles northeast of Farwell), is the largest city in the county and has significantly more community services and employment opportunities. Friona is estimated to have a 2008 population of 3,881 with 1,293 total households. The 2008 median household income in the city of Friona is $39,811 and the median home value in 2008 is estimated to be $72,007.

There are various retail shops and small offices located on U.S. Highway 60 and State Route 214. Also, Friona has a city hall and public library near the center of town. There are adequate employment opportunities in the Friona area (compared to other cities in the subject counties), comprised mainly of cattle-related industries including feedlots and meat packaging facilities. The following map illustrates some of the key community services in the Friona area:



Total crime risk for Parmer County is significantly below the national average and virtually non-existent with an overall personal crime index of 21 and property crime index of 29. As previously stated, total crime risk for the state of Texas is above the national average with indices for personal and property crime of 114 and 127, respectively.

	CRIME RISK INDEX	
	PARMER COUNTY	**TEXAS**
TOTAL CRIME	**26**	**126**
PERSONAL CRIME	**21**	**114**
MURDER	26	110
RAPE	24	111
ROBBERY	9	115
ASSAULT	23	115
PROPERTY CRIME	**29**	**127**
BURGLARY	44	134
LARCENY	30	129
MOTOR VEHICLE THEFT	13	101

Source: Applied Geographic Solutions

As illustrated in the preceding table, the crime risk index for Parmer County is very low. Deaf Smith County and Castro County both have higher crime indices, with total crime risk indexes of 58 and 46, respectively. Overall, the Parmer County area is considered to be very safe, and crime is not considered to be a significant issue in the area.

The housing in both Farwell and Friona is comprised mainly of single-family homes in varying size and condition. The larger and newer homes are located towards the outskirts of town on much larger lots. According to ESRI demographic information, the median home value in 2008 within Parmer County was $74,768.

The following pages contain photographs of land uses in the Friona area.

B. DEMOGRAPHIC CHARACTERISTICS AND TRENDS

For comparison purposes, we have evaluated the demographic trends of each of the three counties together in the following analysis.

1. POPULATION TRENDS

Deaf Smith County is notably larger than Castro County and Parmer County, which are relatively similar in size to each other. Between 1990 and 2000, Deaf Smith County and Castro County experienced declines in population of 3.1% and 8.7%, respectively. During the same time period, the population in Parmer County increased slightly by 1.6%. The population bases for 1990, 2000, 2008 (estimated), and 2013 (projected) are summarized for all three subject counties area illustrated as follows:

		YEAR			
		1990 (CENSUS)	**2000 (CENSUS)**	**2008 (ESTIMATED)**	**2013 (PROJECTED)**
DEAF SMITH COUNTY	POPULATION	19,153	18,561	18,644	18,721
	POPULATION CHANGE	-	-592	83	77
	PERCENT CHANGE	-	-3.1%	0.4%	0.4%
CASTRO COUNTY	POPULATION	9,070	8,285	7,623	7,260
	POPULATION CHANGE	-	-785	-662	-363
	PERCENT CHANGE	-	-8.7%	-8.0%	-4.8%
PARMER COUNTY	POPULATION	9,863	10,016	9,821	9,686
	POPULATION CHANGE	-	153	-195	-135
	PERCENT CHANGE	-	1.6%	-1.9%	-1.4%

Source: 2000 Census; ESRI; VWB Research

Between 2000 and 2008, Deaf Smith County is the only county estimated to have experienced an increase in population, which rose by 0.4%. Castro County and Parmer County experienced declines in population during the same time period of 8.0% and 1.9%, respectively. These trends are projected to continue through 2013, as Deaf Smith County will continue to increase slightly, while Castro and Parmer Counties will continue to decline.

The following table illustrates the population bases by age for the three Texas counties:

POPULATION BY AGE	DEAF SMITH COUNTY 2008 (ESTIMATED) NUMBER	DEAF SMITH COUNTY 2008 (ESTIMATED) PERCENT	CASTRO COUNTY 2008 (ESTIMATED) NUMBER	CASTRO COUNTY 2008 (ESTIMATED) PERCENT	PARMER COUNTY 2008 (ESTIMATED) NUMBER	PARMER COUNTY 2008 (ESTIMATED) PERCENT
19 & UNDER	6,351	34.1%	2,558	33.6%	3,281	33.4%
20 TO 24	1,345	7.2%	503	6.6%	727	7.4%
25 TO 34	2,461	13.2%	861	11.3%	1,216	12.4%
35 TO 44	2,176	11.7%	850	11.1%	1,210	12.3%
45 TO 54	2,202	11.8%	1,100	14.4%	1,263	12.9%
55 TO 64	1,710	9.2%	796	10.4%	868	8.8%
65 TO 74	1,238	6.6%	532	7.0%	648	6.6%
75 & HIGHER	1,161	6.2%	424	5.6%	608	6.2%
TOTAL	18,644	100.0%	7,623	100.0%	9,821	100.0%

Source: 2000 Census; ESRI; VWB Research

As the preceding table illustrates, approximately 43.0% to 45.0% of all three subject counties are estimated to have a population base between the ages of 20 and 54 years old. It should also be noted that despite the projected decline in total population in Castro and Parmer counties over the next five years, the seniors population age 55 years and older is projected to increase in all three subject counties. This is indicative of an aging population base and the potential increasing need for affordable senior housing.

2. HOUSEHOLD TRENDS

Between 1990 and 2000, Parmer County experienced a 2.5% increase in total households, while Deaf Smith County remained stagnant and Castro County declined by 4.0%. The population bases for 1990, 2000, 2008 (estimated), and 2013 (projected) are summarized for all three subject counties as follows:

		YEAR 1990 (CENSUS)	2000 (CENSUS)	2008 (ESTIMATED)	2013 (PROJECTED)
DEAF SMITH COUNTY	HOUSEHOLDS	6,182	6,180	6,287	6,346
	HOUSEHOLD CHANGE	-	-2	107	59
	PERCENT CHANGE	-	<0.0%	1.7%	0.9%
CASTRO COUNTY	HOUSEHOLDS	2,877	2,761	2,591	2,486
	HOUSEHOLD CHANGE	-	-116	-170	-105
	PERCENT CHANGE	-	-4.0%	-6.2%	-4.1%
PARMER COUNTY	HOUSEHOLDS	3,241	3,322	3,274	3,235
	HOUSEHOLD CHANGE	-	81	-48	-39
	PERCENT CHANGE	-	2.5%	-1.4%	-1.2%

Source: 2000 Census; ESRI; VWB Research

Similar to population trends, between 2000 and 2008, Deaf Smith County is the only county estimated to have experienced an increase in total households, which rose by 1.7%. Castro County and Parmer County experienced declines in total households during the same time period of 6.2% and 1.4%, respectively. These trends are projected to continue through 2013, as Deaf Smith County households will continue to increase slightly, while Castro and Parmer counties total households will continue to decline.

The three subject counties household bases by age for 2008 are summarized as follows:

HOUSEHOLDS BY AGE	DEAF SMITH COUNTY 2008 (ESTIMATED)		CASTRO COUNTY 2008 (ESTIMATED)		PARMER COUNTY 2008 (ESTIMATED)	
	NUMBER	PERCENT	NUMBER	PERCENT	NUMBER	PERCENT
UNDER 25	384	6.1%	100	3.9%	174	5.3%
25 - 34	1,085	17.3%	402	15.5%	566	17.3%
35 - 44	1,125	17.9%	423	16.3%	615	18.8%
45 - 54	1,166	18.5%	599	23.1%	674	20.6%
55 - 64	980	15.6%	445	17.2%	475	14.5%
65 - 74	780	12.4%	329	12.7%	396	12.1%
75 - 84	575	9.1%	212	8.2%	262	8.0%
85 & HIGHER	193	3.1%	81	3.1%	114	3.5%
TOTAL	6,287	100.0%	2,591	100.0%	3,274	100.0%

Source: 2000 Census; ESRI; VWB Research

More than half of each of the three subject counties household bases are between the ages of 25 and 54 years of age. It should be noted that Castro County, which is projected to experience the most significant declines in population and households, has the lowest share of young households, under the age of 25. This is indicative of a likely continuing decline in households.

Households by tenure for the three counties in 2008 are distributed as follows:

TENURE	DEAF SMITH COUNTY 2008 (ESTIMATED)		CASTRO COUNTY 2008 (ESTIMATED)		PARMER COUNTY 2008 (ESTIMATED)	
	HOUSEHOLDS	PERCENT	HOUSEHOLDS	PERCENT	HOUSEHOLDS	PERCENT
OWNER-OCCUPIED	4,353	69.2%	1,882	72.6%	2,415	73.8%
RENTER-OCCUPIED	1,933	30.8%	709	27.4%	859	26.2%
TOTAL	6,287	100.0%	2,591	100.0%	3,274	100.0%

Source: 2000 Census; ESRI; VWB Research

Deaf Smith County has the highest share of renter-occupied households, which comprise 30.8% of all occupied housing units, while Castro County has a 27.4% renter share and Parmer County has a 26.2% renter share. These shares are typical of rural Texas counties.

The household size within the three subject counties, based on 2008 estimates, is distributed as follows:

	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY	
RENTER PERSONS PER HOUSEHOLD	2008 (ESTIMATED)		2008 (ESTIMATED)		2008 (ESTIMATED)	
	HOUSEHOLDS	PERCENT	HOUSEHOLDS	PERCENT	HOUSEHOLDS	PERCENT
1 PERSON	585	30.3%	170	24.0%	199	23.2%
2 PERSONS	333	17.2%	162	22.8%	211	24.5%
3 PERSONS	346	17.9%	153	21.6%	159	18.5%
4 PERSONS	268	13.8%	90	12.7%	150	17.4%
5+ PERSONS	402	20.8%	133	18.8%	141	16.4%
TOTAL	1,933	100.0%	709	100.0%	859	100.0%

Source: 2000 Census; ESRI; VWB Research

	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY	
OWNER PERSONS PER HOUSEHOLD	2008 (ESTIMATED)		2008 (ESTIMATED)		2008 (ESTIMATED)	
	HOUSEHOLDS	PERCENT	HOUSEHOLDS	PERCENT	HOUSEHOLDS	PERCENT
1 PERSON	799	18.3%	403	21.4%	459	19.0%
2 PERSONS	1,456	33.4%	638	33.9%	857	35.5%
3 PERSONS	660	15.2%	317	16.8%	336	13.9%
4 PERSONS	708	16.3%	214	11.4%	360	14.9%
5+ PERSONS	731	16.8%	311	16.5%	402	16.7%
TOTAL	4,353	100.0%	1,882	100.0%	2,415	100.0%

Source: 2000 Census; ESRI; VWB Research

As illustrated in the preceding table, Deaf Smith County has a higher share of small one-person renter households than the other two counties, but a smaller share of two-person households. Overall, Deaf Smith County also has the highest share of large five+ person renter households.

3. INCOME TRENDS

The distribution of households by income within the three counties are summarized as follows:

	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY	
HOUSEHOLD INCOME	2008 (ESTIMATED)		2008 (ESTIMATED)		2008 (ESTIMATED)	
	NUMBER	PERCENT	NUMBER	PERCENT	NUMBER	PERCENT
LESS THAN $10,000	811	12.9%	288	11.1%	392	12.0%
$10,000 - $19,999	826	13.1%	338	13.0%	392	12.0%
$20,000 - $29,999	891	14.2%	419	16.2%	501	15.3%
$30,000 - $39,999	951	15.1%	331	12.8%	486	14.8%
$40,000 - $49,999	718	11.4%	312	12.0%	370	11.3%
$50,000 - $59,999	563	9.0%	272	10.5%	283	8.6%
$60,000 - $74,999	518	8.2%	212	8.2%	329	10.0%
$75,000 - $99,999	505	8.0%	167	6.4%	241	7.4%
$100,000 & HIGHER	503	8.0%	253	9.8%	280	8.6%
TOTAL	6,286	100.0%	2,592	100.0%	3,274	100.0%
MEDIAN INCOME	$35,976		$36,918		$37,267	

Source: 2000 Census; ESRI; VWB Research

Parmer County has the highest median household income, while Castro County has the second highest, and Deaf Smith County has the lowest median household income. The median household incomes in Deaf Smith County is estimated to be $35,976, while the Castro County median household income is slightly higher at $36,918, and the Parmer County median household income is $37,267.

The distribution of senior (age 55+) households by income within the three counties are summarized as follows:

HOUSEHOLD INCOME (55+)	DEAF SMITH COUNTY 2008 (ESTIMATED)		CASTRO COUNTY 2008 (ESTIMATED)		PARMER COUNTY 2008 (ESTIMATED)	
	NUMBER	PERCENT	NUMBER	PERCENT	NUMBER	PERCENT

$20,000 - $29,999	301	11.9%	180	16.9%	179	14.4%
$30,000 - $39,999	399	15.8%	170	15.9%	192	15.4%
$40,000 - $49,999	361	14.3%	170	15.9%	192	15.4%
$50,000 - $59,999	205	8.1%	37	3.5%	59	4.7%
$60,000 - $74,999	108	4.3%	72	6.8%	66	5.3%
$75,000 - $99,999	34	1.3%	21	2.0%	25	2.0%
$100,000 & HIGHER	50	2.0%	20	1.9%	32	2.6%
TOTAL	2,527	100.0%	1,066	100.0%	1,246	100.0%
MEDIAN INCOME	$31,386		$32,787		$31,714	

Source: 2000 Census; ESRI; VWB Research

Castro County has the highest median senior (age 55+) household income, while Parmer County has the second highest, and Deaf Smith County has the lowest median senior household income. The median household income in Deaf Smith County is estimated to be $31,386, while the Parmer County median household income is slightly higher at $31,714, and the Castro County median household income is $32,787. Note that in all three counties, more than half of the total population has incomes below $30,000.

The following tables provide renter household income by household size for each of the three counties in 2008 (estimated).

RENTER HOUSEHOLDS	DEAF SMITH COUNTY 2008 ESTIMATED

Data from the preceding tables is used in our demand estimates.

C. ECONOMIC PROFILE AND ANALYSIS

1. LABOR FORCE PROFILE

Employment within the three Texas counties as of 2008 is distributed as follows:

	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY	
SIC GROUP	EMPLOYEES	PERCENT	EMPLOYEES	PERCENT	EMPLOYEES	PERCENT
AGRICULTURE & NATURAL RESOURCES	471	6.9%	442	20.1%	225	5.1%
MINING	3	0.0%	0	0.0%	0	0.0%
CONSTRUCTION	257	3.8%	15	0.7%	32	0.7%
MANUFACTURING	1,282	18.7%	63	2.9%	1,994	44.9%
TRANSPORTATION & UTILITIES	495	7.2%	122	5.5%	172	3.9%
WHOLESALE TRADE	478	7.0%	177	8.0%	363	8.2%
RETAIL TRADE	1,291	18.9%	250	11.4%	185	4.2%
F.I.R.E.	235	3.4%	56	2.5%	92	2.1%
SERVICES	2,051	30.0%	933	42.4%	1,200	27.0%
GOVERNMENT	279	4.1%	144	6.5%	144	3.2%
NON-CLASSIFIABLE	1	0.0%	0	0.0%	30	0.7%
TOTAL	6,843	100.0%	2,202	100.0%	4,437	100.0%

Source: 2000 Census; ESRI; VWB Research
Note: Due to the fact that this survey is conducted of establishments and not of residents, some employees may not live within the Site PMA. However, these employees are included in our labor force calculations because their places of employment are located within the Site PMA.

The Services industry plays a significant role in the local economy of all three counties. However, within Parmer County, the Manufacturing industry represents 44.9% of the entire county labor force. Similarly, Manufacturing represents a relatively high share of the Deaf Smith County economy. However, in Castro County, Manufacturing is not significant. Retail Trade is notable in Deaf Smith County and Castro County, but not in Parmer County. The employment by share is provided in the preceding table.

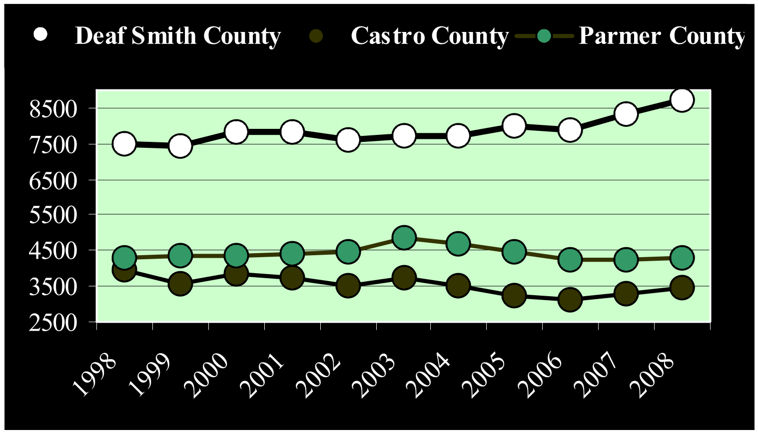
2. EMPLOYMENT TRENDS

The following tables were generated from the U.S. Department of Labor, Bureau of Labor Statistics and reflect employment trends within the county in which the site is located.

The following illustrates the total employment base for Deaf Smith, Castro and Parmer counties:

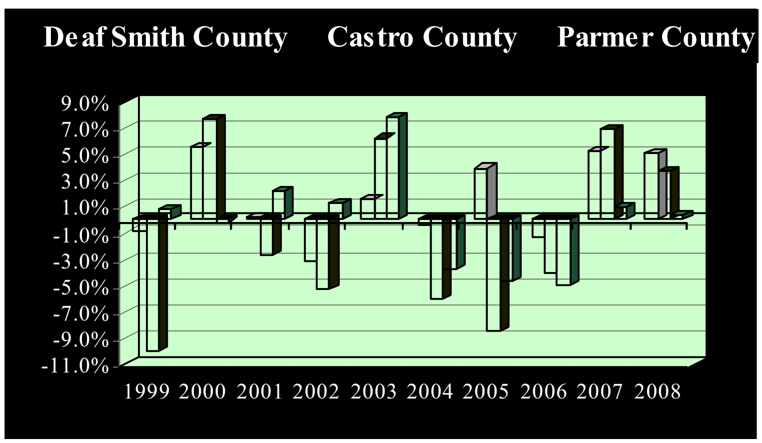
	TOTAL EMPLOYMENT			
YEAR	DEAF SMITH COUNTY	CASTRO COUNTY	PARMER COUNTY	TEXAS
1998	7,480	3,958	4,303	9,600,982
1999	7,418	3,559	4,341	9,766,299
2000	7,828	3,835	4,334	9,896,002
2001	7,841	3,730	4,427	9,991,920
2002	7,590	3,531	4,485	10,115,299
2003	7,716	3,752	4,840	10,228,640
2004	7,691	3,523	4,660	10,403,340
2005	7,996	3,222	4,442	10,592,626
2006	7,891	3,092	4,220	10,815,873
2007	8,307	3,308	4,261	10,992,828
2008*	8,729	3,432	4,279	11,205,744

Source: Department of Labor, Bureau of Labor Statistics
*Through July



Somewhat similar to total population and household trends, Deaf Smith County has experienced the largest increase in total employment over the past 10 years, increasing by 16.7%. Castro County and Parmer County have experienced declines in employment by 13.3% and 0.6%, respectively.

The following table contains the percent change in employment for Deaf Smith, Castro and Parmer counties:



Despite declines in the early part of the decade, all three counties experienced growth between 2006 and July 2008. This is a positive economic trend, especially considering the uncertain and fluctuating state of the national economy. The area's dependence on agriculture, farming, and food production has stabilized the economy over the last few years.

Unemployment rates for Deaf Smith, Castro and Parmer counties follow:

	UNEMPLOYMENT RATE			
YEAR	DEAF SMITH COUNTY	CASTRO COUNTY	PARMER COUNTY	TEXAS
1998	7.5%	4.6%	3.0%	4.9%
1999	5.9%	4.5%	2.6%	4.7%
2000	4.9%	3.7%	3.4%	4.4%
2001	4.6%	4.1%	3.7%	5.0%
2002	5.9%	4.8%	4.1%	6.4%
2003	5.8%	5.1%	4.1%	6.7%
2004	5.3%	5.0%	4.5%	6.0%
2005	4.6%	5.5%	3.9%	5.4%
2006	4.3%	4.7%	3.8%	4.9%
2007	3.7%	3.9%	3.3%	4.3%
2008*	3.5%	3.6%	3.2%	4.8%

Source: Department of Labor, Bureau of Labor Statistics
*Through July

The unemployment rates in the three subject counties have all remained between 3.2% and 5.8% over the past five years. Since 2005, all three counties have experienced declines in unemployment, which is a positive indication of the growing economic stability of this portion of Texas. Note that the overall Texas unemployment rate has historically remained higher than the three subject counties.

In-place employment reflects the total number of jobs within the county regardless of the employee's county of residence. The following illustrates the total in-place employment base for the three subject counties:

	IN-PLACE EMPLOYMENT								
	DEAF SMITH COUNTY			CASTRO COUNTY			PARMER COUNTY		
YEAR	EMPLOYMENT	CHANGE	% CHANGE	EMPLOYMENT	CHANGE	% CHANGE	EMPLOYMENT	CHANGE	% CHANGE
2001	5,942	-	-	2,546	-	-	4,743	-	-
2002	5,633	-309	-5.2%	2,384	-162	-6.4%	4,784	41	0.9%
2003	5,475	-158	-2.8%	2,387	3	0.1%	4,942	158	3.3%
2004	5,622	147	2.7%	2,327	-60	-2.5%	4,914	-28	-0.6%
2005	6,384	762	13.6%	2,200	-127	-5.5%	4,956	42	0.9%
2006	6,521	137	2.1%	2,235	35	1.6%	4,849	-107	-2.2%
2007	7,123	602	9.2%	2,438	203	9.1%	4,871	22	0.5%

Source: Department of Labor, Bureau of Labor Statistics

Data for 2007, the most recent year that year-end figures are available, indicates in-place employment in Deaf Smith County to be 81.6% of the total county employment, while the in-place employment in Castro County is 73.7% of the total county employment, and the in-place employment in Parmer County is 114.3% of the total county employment. This means that Deaf Smith County and Castro County have fewer employment opportunities in the respective county than employable persons seeking work. Conversely, Parmer County has more employed persons coming to the county from other counties for work (daytime employment). It is likely that a large share of Deaf Smith County and Castro County residents are working in Parmer County.

A high share of employed persons leaving the county for employment could have an adverse impact on residency with increasing energy costs. A high share of employed persons commuting to the county from other areas for employment is an indication that there may be a lack of available housing within that county. This would suggest that Parmer County lacks housing choices for employed persons in the area. Considering our field survey of conventional rental units (discussed in Section IV and listed in full detail in Section VIII), there does appear to be a lack of rental housing in the area, as indicated by the fact that six of the eight projects surveyed are currently 100.0% occupied.

3. MAJOR EMPLOYERS AND ECONOMIC INTERVIEWS

a. Major Employers in Deaf Smith County

EMPLOYER	INDUSTRY	NUMBER OF EMPLOYEES	STATUS
HEREFORD SERVICES	MANUFACTURING	500	STABLE
PANDA HEREFORD ETHANOL	ETHANOL PRODUCTION	500	STABLE
T&G SERVICE COMPANY, INC.	CLEANING SERVICES	400	STABLE
BLUE SKY PETFOODS	MANUFACTURING	300	STABLE
TEJAS INDUSTRIES	PET FOOD	300	STABLE
CAVINESS PACKING	MEAT PACKING	200	EXPANDING
AZTX CATTLE COMPANY	AGRICULTURE	150	STABLE
HEREFORD HIGH SCHOOL	EDUCATION	136	STABLE
KING'S MANOR METHODIST HOME	RETIREMENT HOME	125	STABLE
HEREFORD JUNIOR HIGH	EDUCATION	112	STABLE
	TOTAL	**2,723**	

Caviness Packing Company, currently the 6th largest employer in Deaf Smith County, is expected to add 250 to 300 employees by October 2008. Sheila Quirk of the Hereford Economic Development Corporation estimates that the average wage will be $10 per hour and above. Caviness Packing Company currently employs approximately 200 people.

A regional medical center is also planned along West 15th Street in Hereford, immediately east of a planned 260-unit (likely market-rate) apartment project. According to Steve Bartels, Assistant City Manager for Hereford, this medical center project will be constructed in two phases. The first phase of this regional medical center will consist of a clinic. This clinic is presently under construction, and is expected to open by the end of 2008. It is anticipated that employees for this clinic will be transferred from existing facilities in Hereford. Planning for the second phase of this development has yet to be finalized.

State of Texas Comptroller Susan Comps reported that the city of Hereford has experienced a 19.8% increase in sales tax revenue from December 2006 to December 2008 (Sources: Amarillo Globe-News; Texas A & M University Real Estate Center). This is a positive indication of the increasing amount of retail opportunities and economic spending, which is also tied to the increasing population.

In December 2007, White Energy opened a 100 million gallon ethanol plant in Hereford, the first in the state of Texas. This facility will mostly burn corn shipped from the Midwest by rail. Panda Energy also opened a 100 million gallon ethanol plant (the second in the state) in the first quarter of 2008. This plant presently uses cow manure in its process of converting crops into ethanol (Sources: Lubbock Avalanche-Journal; Texas A & M University Real Estate Center).

Dairy production in the Texas Panhandle, where Deaf Smith County is located, has increased dramatically since 2001. This increase is due in part to less expensive land and an ideal climate (i.e. low humidity and low precipitation) for dairy production. It is anticipated that the cow population in the Texas Panhandle will increase by approximately 20,000 cows annually for the next few years. It is also estimated that one dairy job is created for every 100 cows added to local dairies. Using this calculation, the Panhandle can expect to add 200 new dairy jobs annually (Sources: Associated Press; Texas A&M University Real Estate Center). Note that Deaf Smith, Castro, and Parmer counties only make up a small portion of the entire Panhandle.

b. Major Employers in Castro County

EMPLOYER	INDUSTRY	NUMBER OF EMPLOYEES	STATUS
DIMMITT INDEPENDENT SCHOOL DISTRICT	EDUCATION	142	STABLE
CASTRO COUNTY HOSPITAL DISTRICT	HEALTHCARE	53	STABLE
DEBRUCE GRAIN	AGRICULTURE	50*	STABLE
PIONEER DAIRY LABORATORY	TESTING LAB	40*	STABLE
CITY OF DIMMITT	GOVERNMENT	28	STABLE
	TOTAL	**313**	

*Estimated figures

As previously stated, dairy production in the Texas Panhandle, where Castro County is located, has increased dramatically since 2001. According to the Associated Press and Texas A&M University Real Estate Center, the Texas Panhandle can expect to add approximately 200 new dairy jobs annually. Note that Deaf Smith, Castro, and Parmer Counties only make up a small portion of the entire Panhandle.

Joe Franco, Executive Director of Azteca Economic Development Corporation, estimated that most of the employment for farm workers in Castro County is at dairy farms. Mr. Franco anticipates that three new dairies are expected to come online in Castro County within the next year. By his estimate, each of these dairies will employ approximately 20 people, for a total of 60 new employment positions.

Vanderham Dairy, an existing dairy located outside of the city of Hart, is expected to add an estimated 70 to 80 jobs. Due to the specialized nature of dairy work, Zach Vanderham of Vanderham Dairy expects that many of these jobs will be filled by people who live outside of the area. The planned increase in employment at Vanderham Dairy would most likely make this facility one of the five largest employers in Castro County.

c. Major Employers in Parmer County

EMPLOYER	INDUSTRY	NUMBER OF EMPLOYEES	STATUS
CARGILL MEAT SOLUTIONS	BEEF PACKING	2,000	EXPANDING
FRIONA INDEPENDENT SCHOOL DISTRICT	EDUCATION	235	STABLE
HI-PRO INC.	AGRICULTURE	114	STABLE
PARMER COUNTY COMMUNITY HOSPITAL	MEDICAL FACILITY	65	STABLE
PRAIRIE ACRES	NURSING HOME	85	STABLE
CATTLE TOWN INC.	CATTLE FEEDING	48	STABLE
CAPROCK INDUSTRIES	CATTLE FEEDING	43	STABLE
PACO FEEDERS	CATTLE FEEDING	40	STABLE
FRIONA FEED YARDS	CATTLE FEEDING	35	STABLE
FRIONA STATE BANK	FINANCIAL SERVICES	25	STABLE
	TOTAL	**2,690**	

Note that six of the top 10 employers in Parmer County are based in agriculture. The largest employer by far is Cargill Meat Solutions, which has a total of 2,000 employees. In fact, the 2,000 employees at Cargill Meat Solutions represent nearly 75.0% of the 2,690 employees at the 10 largest employers in Parmer County. With the anticipated expansion of Cargill Meat Solutions, coupled with the recent and planned growth of the dairy industry, it is anticipated that the share of jobs based in agriculture will continue to increase in Parmer County.

As previously stated, dairy production in the Texas Panhandle, where Parmer County is located, has increased dramatically since 2001. According to the Associated Press and Texas A&M University Real Estate Center, the Texas Panhandle can expect to add approximately 200 new dairy jobs annually.

Friona is the largest city in Parmer County. The Community Fact Sheet, published by the Friona Chamber of Commerce and Agriculture, states that "Friona is seeking to diversify and strengthen its agricultural base. The community is working earnestly to build an economic development program that embodies those characteristics that have caused the recent expansion of Cargill Corporation…" (Website: www.frionachamber.com).

D. AGRICULTURAL INFORMATION

Since the housing needs assessment of Deaf Smith, Castro and Parmer counties is significantly influenced by the agriculture industry, which dominates this region of Texas' economy, we have provided general agricultural statistics regarding to farmworkers and farm labor employment. This analysis will provide an understanding of the local factors impacting the housing market and the overall demand for housing (permanent and/or seasonal) in Deaf Smith, Castro and Parmer counties.

According to the National Center for Farmworker Health, Inc., it is estimated that there are over three million migrant and seasonal farmworkers in the United States. Based on the National Agricultural Workers Study (NAWS) completed in 1998 by the U.S. Department of Labor, approximately 81% of all farmworkers are foreign born with an estimated 95% born in Mexico, 2% in Latin America, 1% in Asia, and 1% in other countries.

Additionally, 56% of farmworkers surveyed migrated in order to secure employment. Of those 56%, 17% had at least two farm jobs more than 75.0 miles from their home base. Forty-four percent of farmworkers surveyed were non-migrants; working farm jobs less than 75.0 miles away from their home base. Nearly three-quarters of U.S. farmworkers earned less than $10,000 per year; three out of five farmworker families had incomes below the poverty level.

The USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture provides the most current detailed information regarding farmworkers and labor farms in each of the three subject counties. The following table illustrates the total number of farms within Deaf Smith, Castro and Parmer counties, as well as the total number of hired farm labor workers with payrolls over $1,000.

COUNTY	HIRED FARM LABOR FARMS	TOTAL FARM LABOR WORKERS
DEAF SMITH	226	1,072
CASTRO	251	1,393
PARMER	261	1,662

Source: USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture

As indicated in the previous table, Parmer County has the most total farms and hired farm labor workers of the three subject counties. Although Deaf Smith is the largest county in terms of population and total households, it has the fewest farms and hired farm labor farms.

The following table illustrates the breakdown of type of farms within each of the three subject counties.

ITEM	DEAF SMITH COUNTY	CASTRO COUNTY	PARMER COUNTY
OILSEED AND GRAIN FARMING	160	112	122
VEGETABLE AND MELON FARMING	4	-	17
FRUIT AND TREE NUT FARMING	-	-	-
GREENHOUSE, NURSERY, AND FLORICULTURE PRODUCTION	3	-	-
OTHER CROP FARMING	235	223	312
TOBACCO FARMING	-	-	-
COTTON FARMING	55	90	134
SUGARCANE, HAY, AND ALL OTHER CROP FARMING	180	133	178
BEEF CATTLE RANCHING AND FARMING	211	141	148
CATTLE FEEDLOTS	31	24	28
DAIRY CATTLE AND MILK PRODUCTION	4	4	4
HOG AND PIG FARMING	-	7	4
POULTRY AND EGG PRODUCTION	4	-	-
SHEEP AND GOAT FARMING	5	6	3
ANIMAL AQUACULTURE AND OTHER ANIMAL PRODUCTION	46	18	22
TOTAL FARMS	703	535	660

Source: USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture

The following table illustrates the number of hired farm labor farms and workers for each county.

COUNTY	HIRED FARM LABOR FARMS	HIRED FARMWORKERS (FARMS WITH $1,000+ PAYROLL)		
		TOTAL	150 DAYS OR MORE	LESS THAN 150 DAYS
DEAF SMITH	226	1,072	619	453
CASTRO	251	1,393	520	873
PARMER	261	1,662	635	1,027

Source: USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture

Although Deaf Smith County has the largest population, it has the fewest number of hired farm labor farms and farmworkers in the three subject counties. In addition, the hired farmworkers in Deaf Smith County are predominately those working 150 days or more per year. Conversely, the majority of hired farmworkers in Castro County and Parmer County work less than 150 days per year, indicating more migrant workers. This indicates potential need for migrant farmworker housing.

The following maps locate the 10 largest farms for each county in terms of sales volume and total employees. The following maps were derived from InfoUSA employment data sources. Due to the sensitivity of farmworker labor and migrant workers, many farmers do not report the actual number of employees to the government. Since the USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture is not reported to the government directly, farmers are typically more willing to provide accurate information. Therefore, we have mapped both the largest sales volume farms and the farms with the most reported employees. These maps for each county are illustrated on the preceding pages. Note that the location of each farm is the address reported to the government and InfoUSA and may not represent the actual physical location of the farm. However, based on data provided as well as on-site research, the farm locations appear to be accurate.

IV. HOUSING AND SUPPLY ANALYSIS

A. OVERVIEW OF HOUSING

The purpose of this analysis is to evaluate the need for additional housing in the subject counties: Deaf Smith County, Castro County, and Parmer County, Texas. For a general understanding of the three subject counties housing markets, the following table is a breakdown of existing occupied housing units by structure type. In the following overview of housing, we have compared information in Deaf Smith County, Castro County, and Parmer County. Later in this analysis, each county is evaluated in further detail.

	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY	
UNITS IN STRUCTURE	NUMBER	PERCENT	NUMBER	PERCENT	NUMBER	PERCENT
1; DETACHED	4,993	80.8%	2,281	82.6%	2,781	83.7%
1; ATTACHED	76	1.2%	26	0.9%	39	1.2%
2 TO 4	393	6.4%	80	2.9%	68	2.0%
5 TO 9	115	1.9%	53	1.9%	18	0.5%
10 TO 19	64	1.0%	14	0.5%	12	0.4%
20 TO 49	50	0.8%	0	0.0%	0	0.0%
50+	56	0.9%	0	0.0%	15	0.5%
MOBILE HOMES	428	6.9%	300	10.9%	381	11.5%
BOAT, RV, VANS	5	0.1%	7	0.3%	8	0.2%
TOTAL	6,180	100.0%	2,761	100.0%	3,322	100.0%

U.S. Census Bureau; Census 2000

According to the preceding table, mobile homes represent a popular housing option in Castro and Parmer counties, comprising 10.9% and 11.5%, respectively, of all housing by types. Mobile homes do not represent as significant a share of total housing units (6.9%) in Deaf Smith County.

Based on the 2000 Census, the following table is a distribution of the housing stock in Deaf Smith, Castro, and Parmer counties.

	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY	
HOUSING TYPE	HOUSING UNITS	PERCENT	HOUSING UNITS	PERCENT	PERCENT	PERCENT
TOTAL OCCUPIED	6,180	89.4%	2,761	86.3%	3,322	89.0%
OWNER-OCCUPIED	4,163	67.4%	1,964	71.1%	2,403	72.3%
RENTER-OCCUPIED	2,017	32.6%	797	28.9%	919	27.7%
VACANT	734	10.6%	437	13.7%	410	11.0%
TOTAL	6,914	100.0%	3,198	100.0%	3,732	100.0%

U.S. Census Bureau; Census 2000

Note that in 2000, Deaf Smith County had a 10.6% overall vacancy rate, while Castro County has a 13.7% overall vacancy rate, and Parmer County had a 11.0% vacancy rate. These vacancies can be attributed to numerous factors, including the age of the units, the overall quality, seasonal use, etc. The following table is a breakdown of vacancies by status as of the 2000 Census.

	DEAF SMITH COUNTY VACANCIES		CASTRO COUNTY VACANCIES		PARMER COUNTY VACANCIES	
VACANCY STATUS BY HOUSING UNITS	**NUMBER**	**PERCENT**	**NUMBER**	**PERCENT**	**NUMBER**	**PERCENT**
FOR RENT	220	30.0%	93	21.3%	99	24.1%
FOR SALE ONLY	106	14.4%	61	14.0%	66	16.1%
RENTED OR SOLD, NOT OCCUPIED	49	6.7%	38	8.7%	0	0.0%
FOR SEASONAL, RECREATIONAL, OR OCCASIONAL USE	43	5.9%	27	6.2%	32	7.8%
FOR MIGRANT WORKERS	9	1.2%	65	14.9%	15	3.7%
OTHER VACANT	307	41.8%	153	35.0%	198	48.3%
TOTAL	734	100.0%	437	100.0%	410	100.0%

U.S. Census Bureau; Census 2000

Castro County had the highest share of vacancies for migrant worker housing (14.9%), while Deaf Smith County and Parmer County only had 1.2% and 3.7%, respectively, vacant for migrant worker housing.

Based on the 2000 Census, the following is a distribution of the share of housing units in each of the three subject counties by year of construction.

	DEAF SMITH COUNTY HOUSING UNITS			CASTRO COUNTY HOUSING UNITS			PARMER COUNTY HOUSING UNITS		
YEAR	**OWNER**	**RENTER**	**TOTAL**	**OWNER**	**RENTER**	**TOTAL**	**OWNER**	**RENTER**	**PERCENT**
1999 TO MARCH 2000	0.4%	0.0%	0.3%	0.4%	0.0%	0.2%	0.8%	0.4%	0.7%
1995 TO 1998	2.3%	2.0%	2.2%	5.9%	2.3%	4.6%	3.8%	3.7%	3.6%
1990 TO 1994	1.5%	4.6%	2.5%	1.9%	3.6%	2.3%	3.2%	1.4%	2.7%

Source: 2000 Census

The general age of housing units in all three counties appears to be relatively similar. The largest share of total housing units for all subject counties were built between 1940 and 1959. With the second largest production of housing built between 1060 and 1979, Deaf Smith, Castro, and Parmer counties all have a dated housing stock. Note that the median year of construction for all housing units in Deaf Smith County was 1966, while the median year of construction for Castro County was 1963, and for Parmer County, it was 1962.

The following table is a distribution of owner-occupied and renter-occupied households considered to be living in substandard units (lacking complete plumbing facilities) in each of the three subject counties as of 2000.

	TENURE	SUBSTANDARD UNITS 2000 CENSUS				
		TOTAL HOUSING UNITS	PERCENT	COMPLETE PLUMBING FACILITIES	LACKING COMPLETE PLUMBING FACILITIES	PERCENT SUBSTANDARD
DEAF SMITH COUNTY	OWNER-OCCUPIED	4,163	67.4%	4,121	42	1.0%
	RENTER-OCCUPIED	2,017	32.6%	2,003	14	0.7%
	TOTAL	6,180	100.0%	6,124	56	0.9%

	RENTER-OCCUPIED	919	27.7%	898	21	2.3%
	TOTAL	3,322	100.0%	3,293	29	0.9%

Source: 2000 Census

Deaf Smith County has the highest share of owner-occupied households living in substandard housing, 1.0%. Parmer County has the highest share of renter-occupied households living in substandard housing, 2.3%. Overall, Deaf Smith County and Parmer County has a combined total of 0.9% of all occupied households living in substandard housing, while Castro County has a combined total of 1.1% of occupied households living in substandard housing.

The following table contains the tenure by occupants per room for each of the three subject counties. The purpose of this table is to illustrate the number of households living in overcrowded situations (those households with 1.01 or more occupants per room according to the 2000 Census).

	TENURE BY OCCUPANTS PER ROOM		
	DEAF SMITH COUNTY	CASTRO COUNTY	PARMER COUNTY
TOTAL	6,180	2,761	3,322
OWNER OCCUPIED	4,163	1,964	2,403
0.50 OR LESS OCCUPANTS PER ROOM	2,429	1,246	1,455
0.51 TO 1.00 OCCUPANTS PER ROOM	1,290	460	674
1.01 OCCUPANTS OR MORE PER ROOM	443	258	274
RENTER OCCUPIED	2,017	797	919
0.50 OR LESS OCCUPANTS PER ROOM	901	383	405
0.51 TO 1.00 OCCUPANTS PER ROOM	792	279	385
1.01 OCCUPANTS OR MORE PER ROOM	324	135	130

Source: 2000 Census

Over 16.0% of all renter households in Deaf Smith County were overcrowded, while in Castro County, 16.9% of all renter households were overcrowded, and in Parmer County 14.1% of all renter households were overcrowded. These demographics are used later in our demand calculations.

In addition to substandard and overcrowded housing situations, it is also important to evaluate the population living in poverty (according to the US Census Bureau) for each of the three counties.

	POVERTY STATUS 2000 CENSUS		
DEAF SMITH COUNTY	POPULATION LIVING IN POVERTY	3,815	20.6%
	POPULATION NOT LIVING IN POVERTY	14,746	79.4%
	TOTAL*	18,561	100.0%
CASTRO COUNTY	POPULATION LIVING IN POVERTY	1,575	19.0%
	POPULATION NOT LIVING IN POVERTY	6,710	81.0%
	TOTAL*	8,285	100.0%
PARMER COUNTY	POPULATION LIVING IN POVERTY	1,700	17.0%
	POPULATION NOT LIVING IN POVERTY	8,316	83.0%
	TOTAL*	10,016	100.0%

Source: Summary File 3, Census of Population and Housing, U.S. Bureau of the Census, 2000
* Population for whom poverty status is determined

According to the 2000 Census, Deaf Smith County has the highest share of population living in poverty, 20.6%. Parmer County has the lowest share of population living in poverty (17.9%), while Castro County has 19.0% of its population living in poverty. All shares, however, are relatively similar.

In addition to the evaluation of the area population living in poverty, we have also evaluated the share of rent overburdened households (those households paying more than 35% of their gross income towards rent). This share of renter overburdened households for Deaf Smith County, Castro County, and Parmer County is illustrated as follows.

PERCENTAGE OF RENT OVERBURDENED*	
DEAF SMITH COUNTY	22.9%
CASTRO COUNTY	15.9%
PARMER COUNTY	22.5%

Source: 2000 Census, Claritas
*Households paying more than 35% of their gross income to rent

Deaf Smith County has the highest share of rent overburdened households (22.9%), similar to the Parmer County 22.5% share. Castro County has a considerably lower share of rent overburdened households, 15.9%. As discussed earlier, Castro County has the highest share of households in substandard housing situations. Thus, it is reasonable that the households living in substandard units are not rent overburdened.

B. RENTAL HOUSING ANALYSIS

The following analysis includes a detailed survey of rental housing opportunities in each of the three subject counties. We have surveyed conventional rental housing units including market-rate, Tax Credit and government-subsidized apartments, for-sale homes, as well as farmworker housing. All properties surveyed were found through apartment guide listing, classified advertisements, the Multiple Listing Service, interviews with local real estate agents and professionals, government officials, and the personal observations of our analysts.

1. DEAF SMITH COUNTY

We identified and personally surveyed 18 conventional housing projects containing a total of 634 units within Deaf Smith County. This survey was conducted to establish the overall strength of the rental market. These rentals have a combined occupancy rate of 96.4%, a stable rate for rental housing. Among these projects, 12 are non-subsidized (market-rate and Tax Credit) projects containing 325 units. These non-subsidized units are 94.5% occupied. The remaining six projects contain 309 government-subsidized units, which are 98.4% occupied.

The following is a list of the 18 total conventional rental projects surveyed in the Deaf Smith County area.

MAP CODE	PROJECT NAME	PROJECT TYPE	YEAR BUILT	TOTAL UNITS	VACANT	OCCUPANCY RATE

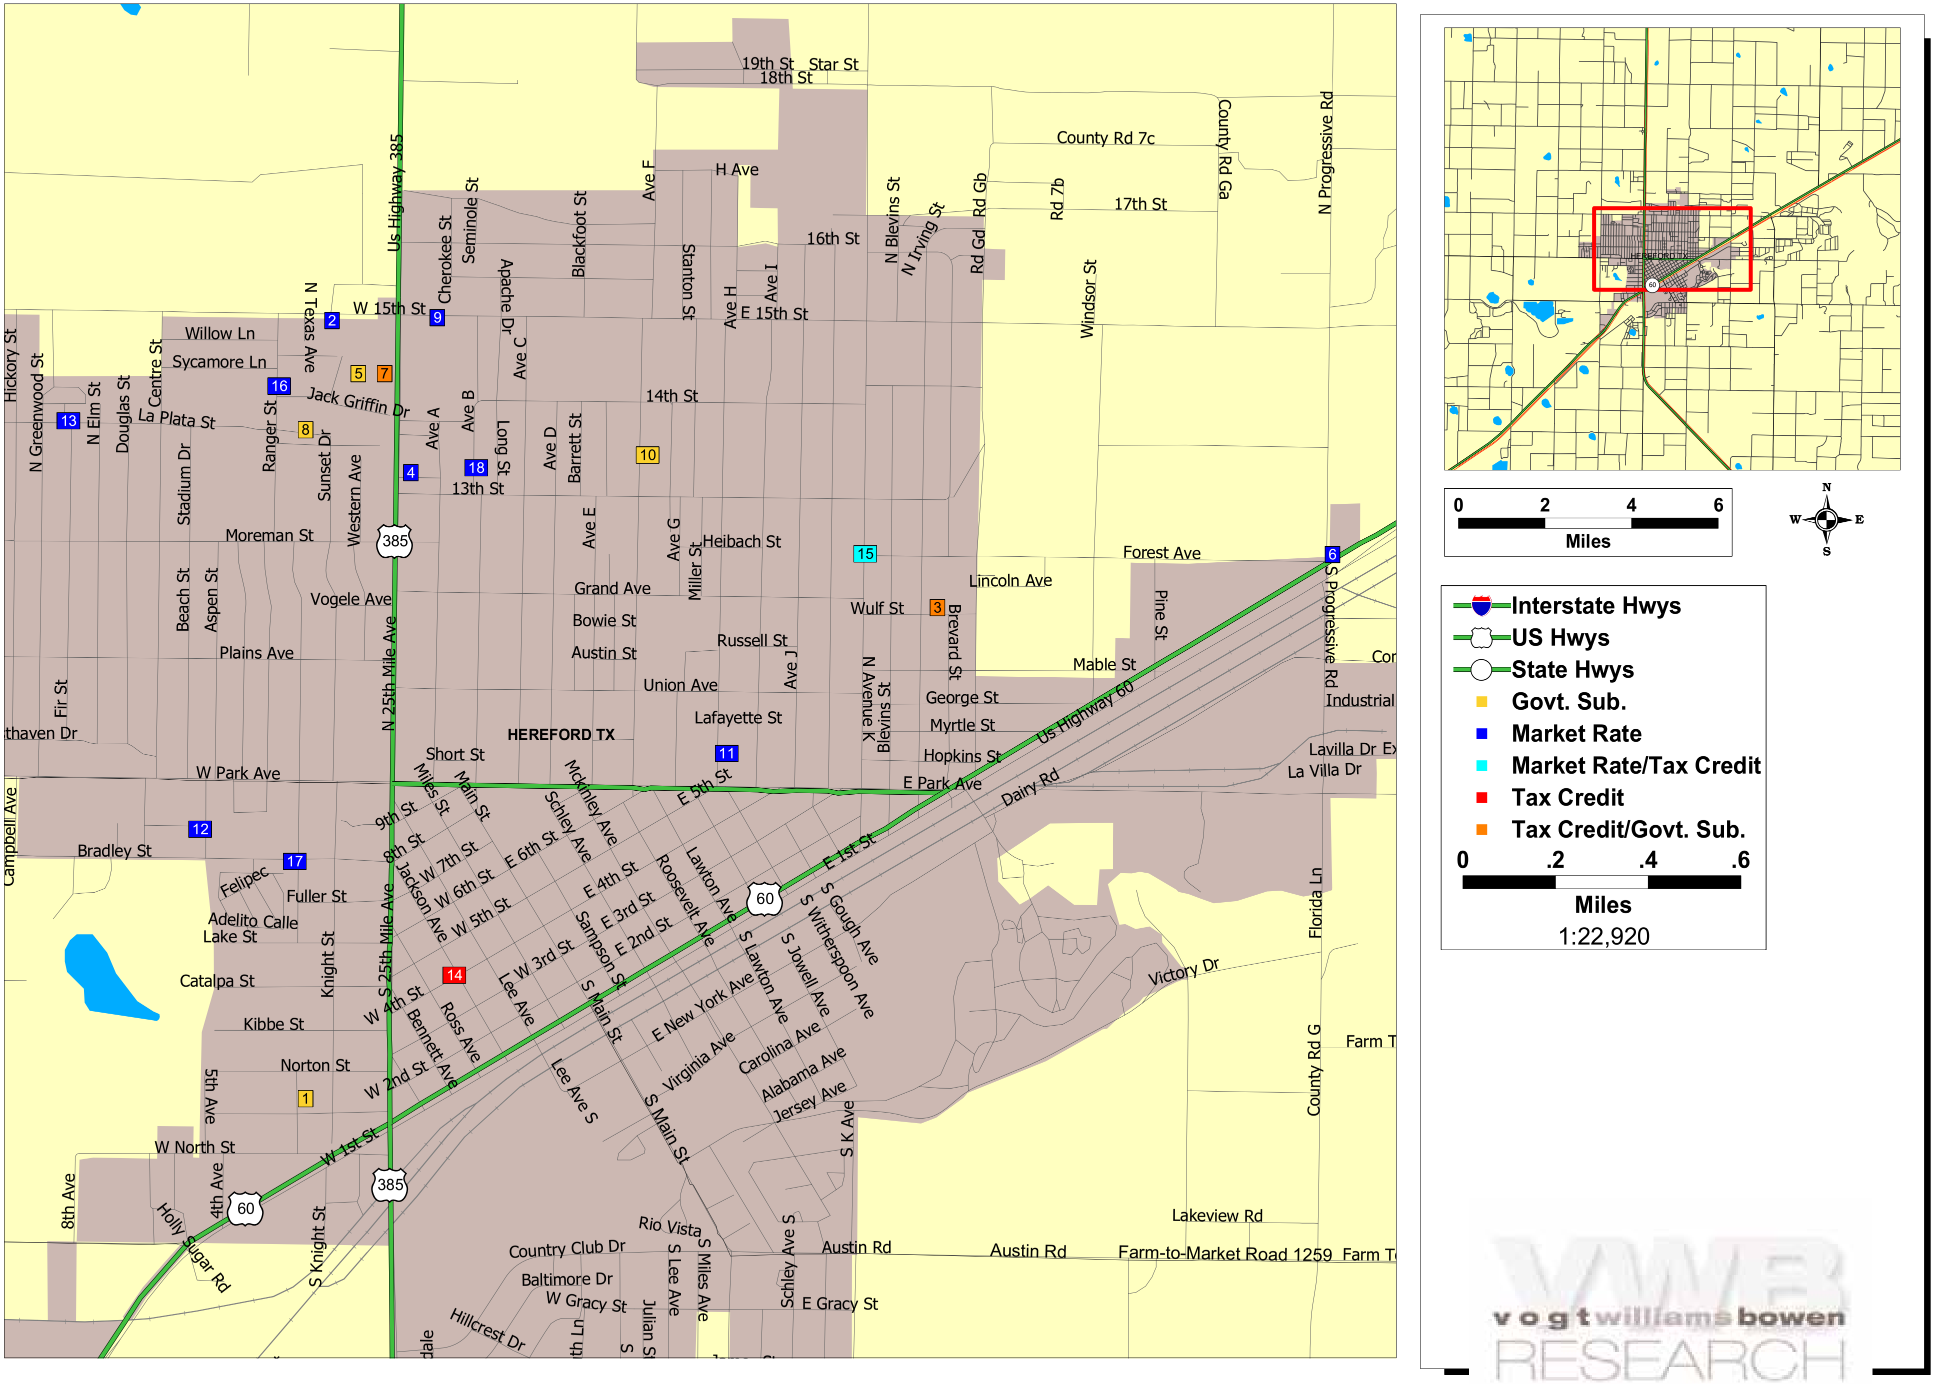
The map on the following page illustrates the map of the surveyed properties within Deaf Smith County. Note the map ID numbers coincide with the labels listed in the field survey of conventional rentals in Section VII of this analysis.

Deaf Smith County, TX: Apartment Locations



Conventional Non-Subsidized Apartments (Deaf Smith County)

The following table summarizes the breakdown of market-rate and Tax Credit units within Deaf Smith County:

MARKET RATE						
BEDROOMS	**BATHS**	**UNITS**	**DISTRIBUTION**	**VACANCY**	**%VACANT**	**MEDIAN GROSS RENT**
STUDIO	1.0	1	0.5%	0	0.0%	$411
ONE-BEDROOM	1.0	57	25.9%	7	12.3%	$530
TWO-BEDROOM	1.0	109	49.5%	6	5.5%	$630
TWO-BEDROOM	1.5	16	7.3%	0	0.0%	$555
TWO-BEDROOM	2.0	3	1.4%	0	0.0%	$610
THREE-BEDROOM	1.0	6	2.7%	0	0.0%	$460
THREE-BEDROOM	2.0	16	7.3%	0	0.0%	$828
FOUR-BEDROOM	2.0	12	5.5%	0	0.0%	$914
TOTAL MARKET RATE		**220**	**100.0%**	**13**	**5.9%**	**-**
TAX CREDIT						
BEDROOMS	**BATHS**	**UNITS**	**DISTRIBUTION**	**VACANCY**	**%VACANT**	**MEDIAN GROSS RENT**
ONE-BEDROOM	1.0	19	18.1%	0	0.0%	$482
TWO-BEDROOM	2.0	47	44.8%	0	0.0%	$578
THREE-BEDROOM	2.0	39	37.1%	5	12.8%	$668
TOTAL TAX CREDIT		**105**	**100.0%**	**5**	**4.8%**	**-**

Of these 325 non-subsidized units that were surveyed, 94.5% are occupied. More specifically, the market-rate units were 94.1% occupied and the Tax Credit units are 95.2% occupied, indicating a stable rental housing market.

The preceding table illustrates the median gross rents by bedroom type of all non-subsidized units surveyed. Gross rents include the collected rent plus the estimated cost of the tenant-paid utilities at each project. It is important when comparing and evaluating rent levels to consider gross rents, as they consider the cost of collected rent and utilities.

Over 59% of all non-subsidized apartments surveyed were built prior to 1980. These older apartments have a vacancy rate of 6.2%, slightly higher than the overall market. The following is a distribution of units surveyed by year built for the county:

YEAR BUILT	UNITS	VACANCY RATE
PRIOR TO 1960	32	0.0%
1960 – 1969	124	9.7%
1970 – 1979	37	0.0%
1980 – 1989	24	4.2%
1990 – 1999	0	0.0%
2000 – 2005	0	0.0%
2006	0	0.0%
2007	108	4.6%
2008*	0	0.0%
TOTAL	325	5.5%

*As of July

Only 108 conventional non-subsidized apartment units have been added to the market in more than 15 years. Of these 108 total new units in the market, 32 are found at Hereford Central Place (Map ID 14), a family Tax Credit project consisting of one-, two-, and three-bedroom units targeting households with incomes up to 60% of AMHI. The remaining 76 new non-subsidized units in the market are located at Tierra Blanca (Map ID 15), which contains market-rate and Tax Credit rental units found in one-, two-, and three-bedroom apartments. As such, the existing rental housing stock is considered to be old in the Hereford area.

Hereford Central Place opened in September 2007 and was fully occupied by December 2007, leasing more than eight units per month. This is a positive indication of the strong demand for modern, quality affordable rental housing in the Hereford area. In addition, Tierra Blanca opened in May 2007 and reached at 100.0% occupancy in November 2007. This represents an absorption rate of approximately 10 to 12 units per month, which is considered very good.

We rated each market-rate and LIHTC property surveyed on a scale of A through E. Our rating system is described as follows, with "+" and "-" variations assigned according to variances from the following general descriptions:

A – Upscale/high-quality property
B – Good condition and quality
C – Fair condition, in need of minor improvements
D – Poor condition
E – Serious disrepair, dilapidated

Following is a distribution by quality rating, units, and vacancies.

MARKET-RATE PROPERTIES				MEDIAN GROSS RENT			
QUALITY RATING	PROJECTS	TOTAL UNITS	VACANCY RATE	STUDIO	ONE-BR.	TWO-BR.	THREE-BR.
B+	1	3	0.0%	-	$612	$680	-
B	1	17	0.0%	$411	-	$667	$914
B-	2	44	2.3%	-	$517	$610	-
C	2	32	0.0%	-	-	$555	-
C-	1	37	0.0%	-	$530	$630	-
D+	1	30	40.0%	-	$537	$710	-
D	2	57	0.0%	-	$318	$416	$547
NON-SUBSIDIZED TAX CREDIT PROPERTIES				MEDIAN NET RENT			
QUALITY RATING	PROJECTS	TOTAL UNITS	VACANCY RATE	STUDIO	ONE-BR.	TWO-BR.	THREE-BR.
B+	2	105	4.8%	-	$482	$578	$668

As indicated in the preceding table, the highest vacancy rate is among units with an overall quality rating of D+. It is important to note that despite the low quality rating, management at this project is charging some of the highest rents in the market. Thus, the rent levels are likely a main reason for the high vacancy rate.

<u>Conventional Government-Subsidized Apartments (Deaf Smith County)</u>

Within Deaf Smith County, the six government-subsidized projects currently existing operate under the HUD Section 8, RD 514, 515, and 516 programs. Generally, these properties have few amenities, are older, and offer small unit sizes (square feet). The government-subsidized units in the county are summarized as follows.

BEDROOMS	UNITS	DISTRIBUTION	VACANT	PERCENT
ONE-BEDROOM/1.0 BATH	92	29.8%	5	5.4%
TWO-BEDROOM/1.0 BATH	112	36.2%	0	0.0%
THREE-BEDROOM/1.0 BATH	20	6.5%	0	0.0%
THREE-BEDROOM/1.5 BATH	63	20.4%	0	0.0%
FOUR-BEDROOM/1.5 BATH	16	5.2%	0	0.0%
FOUR-BEDROOM/2.0 BATH	6	1.9%	0	0.0%
TOTAL	309	100.0%	5	1.6%

There is a very low vacancy rate (1.6%) among the government-subsidized projects Deaf Smith County, indicating a very strong market for low-income housing. Four of the six government-subsidized projects are currently 100.0% occupied with waiting lists for government-subsidized units ranging from two households to 37 households.

According to Sherry Reeves, the Director of Housing for Panhandle Community Services, there are currently 274 Housing Choice Vouchers issued in the county. Ms. Reeves stated that there are currently 106 people on the waiting list for additional Vouchers; however, Vouchers have not been issued in seven years. This is an indication of very strong demand for low-income housing. The Fair Market Rents for Deaf Smith County are illustrated as follows.

FAIR MARKET RENTS	
STUDIO UNIT	$358
ONE-BEDROOM UNIT	$456
TWO-BEDROOM UNIT	$550
THREE-BEDROOM UNIT	$799
FOUR-BEDROOM UNIT	$910

A complete field survey of all conventional apartments we surveyed in Death Smith County is included in Section VII. “Field Survey – Deaf Smith County, Texas”.

<u>For-Sale Housing (Deaf Smith County)</u>

Real estate representatives were able to provide Multiple Listing Service data for the currently for-sale homes in Hereford. We identified 101 for-sale properties within the Hereford area. The following tables provide the average and median current asking price by bedroom type as well as the average and median home size (in square feet) for the for-sale homes in the area.

	ASKING PRICE			
BEDROOM TYPE	**LOW**	**HIGH**	**MEDIAN**	**AVERAGE**
TWO-BEDROOM	$28,000	$250,000	$60,000	$68,580
THREE-BEDROOM	$47,000	$255,000	$114,900	$115,032
FOUR-BEDROOM	$49,900	$250,000	$170,700	$163,257
FIVE-BEDROOM	$69,500	$230,454	$149,977	$149,977

	HOME SIZE (SQUARE FEET)			
BEDROOM TYPE	**LOW**	**HIGH**	**MEDIAN**	**AVERAGE**
TWO-BEDROOM	530	2,047	1,220	1,249
THREE-BEDROOM	936	3,739	1,757	1,823
FOUR-BEDROOM	1,556	3,679	2,525	2,612
FIVE-BEDROOM	3,717	3,717	3,717	3,717

The average for-sale asking price per square foot is $54.90 for two-bedroom units, $63.10 per square foot for three-bedroom homes, $62.50 per square foot for four-bedroom homes, and $40.35 per square foot for five-bedroom homes.

A description and photographs of a sampling of five currently for-sale homes in the area are provided on the following pages. These photographs provide an illustration of the type, size, and price of a variety of homes currently for-sale in the Hereford (Deaf Smith County) area.

$67,500

Considering the rural nature of the three subject counties, including Deaf Smith County and the Hereford area, the USDA Homeownership Direct Loan Program (Section 502) has been in effect in the area. The USDA 502 direct loan program offers mortgages for low-income homebuyers in rural areas. There is also a separate Section 502 loan guarantee program.

The purpose of the USDA Section 502 direct loan is to provide financing for low-income households to purchase, build, repair, renovate, or relocate homes. At least 40% of the funds appropriated each year must be used to assist families with incomes below 50% of AMHI. Households with incomes below 50% of AMHI are considered very low-income households, while households with incomes between 50% and 80% of AMHI are considered low-income households. In order to qualify for the Section 502 loan, applicants must be unable to obtain credit elsewhere, and have reasonable credit histories.

Section 502 loans offer limits for up to 33 years (38 years for those with incomes below 60% of AMHI and who cannot afford a 33-year term). For manufactured homes, the term is 30 years, and no down payment is required for any Section 502 loans. In Deaf Smith County, since 2001, there have been five USDA Section 502 loans allocated to individuals:

YEAR	COUNTY	LOCAL OFFICE	ASSISTANCE TYPE	TOTAL OBLIGATION AMOUNT
2001	DEAF SMITH	AMARILLO	SEC 502 LOAN	$37,500
2003	DEAF SMITH	AMARILLO	DIRECT 504 LOAN GRANT ONLY	$6,978
2005	DEAF SMITH	AMARILLO	DIRECT 502 LOAN GENERAL - LOW INCOME	$32,400
2005	DEAF SMITH	AMARILLO	DIRECT 504 LOAN GRANT ONLY	$7,500
2007	DEAF SMITH	AMARILLO	DIRECT 502 LOAN GENERAL - LOW INCOME	$63,998

According to ESRI Demographics, the median home value in Deaf Smith County was $72,227 in 2007. At an estimated interest rate of 6.0% and a 30-year term (and 95% LTV), the monthly mortgage for a $72,227 home is $514, including estimated taxes and insurance.

BUY VERSUS RENT ANALYSIS	
DEAF SMITH COUNTY AVERAGE HOME PRICE – ESRI	$72,227
MORTGAGED VALUE = 95% OF AVERAGE HOME PRICE	$68,616
INTEREST RATE – BANKRATE.COM – 6.0%	6.0%
TERM – 30 YEARS	30
MONTHLY PRINCIPAL & INTEREST	$411
ESTIMATED TAXES AND INSURANCE*	$103
ESTIMATED MONTHLY MORTGAGE PAYMENT:	$514

* Estimated at 25% of principal and interest.

The estimated typical mortgage for a home in Deaf Smith County is approximately $514 per month. It should be noted that based on our field survey of conventional rental units in the Deaf County area, the two-, three- and four-bedroom collected market-rate rents range from $300 to $800 per month, with the majority of rents in the $500 to $650 range. As such, it is likely that there is and will continue to be some competitive overlap between the for-sale and rental markets. However, most renters in the area are families that would likely neither be able to afford the down payment or have qualifying credit to purchase a home, especially given the current mortgage situation.

Migrant and Farmworker Housing (Deaf Smith County)

Based on our analysis of the Hereford area and surrounding Deaf Smith County area, there is only one existing conventional rental project serving farmworkers. This project, Amistad (Map ID 1), originally constructed 30 units in 1991 under the RD 514 and 516 programs. In 2000, an additional 20 units were constructed due to strong demand. While additional small motels are rented on a weekly basis during the migratory farmworker season, we were unable to obtain specific rental information from these small properties due to the sensitivity of the migrant farmworker situation and presence of illegal immigrants in the migrant farmworking community.

Angie Alonzo manages the Amistad Apartments in Hereford, the only farmworker project in Hereford. The biggest obstacle for her property is that many of these people that work at dairy farms will earn an overall wage that is above the maximum income to qualify for residency. For example, the hourly wage may be low, but these workers may work 60+ hours a week generating an income that exceeds the projects maximum allowable income. As a result, persons with higher incomes than allowed at this property must seek market-rate alternatives.

All Amistad residents employed as farmworkers are permanent residents of the complex. Ms. Alonzo has not had a migrant farmworker apply for housing in the past five to six years. By and large, migrant farmworker jobs in the Hereford area are not typically available due to advances in farming technology and the effectiveness of fertilizers. Ms. Alonzo also described the Hereford economy as “booming”, despite the downturns in the national economy, and she stated that there is a need for new rental housing in the area.

The following page illustrates a one-page field sheet for the Amistad Apartments.

*Through July

Since 2003, there have been 188 total building permits issued in Deaf Smith County. According to our field survey of conventional rentals, 108 were for Hereford Central Place and Tierra Blanca, local affordable rental projects built in 2007.

According to Steve Bartels, Assistant City Manager of Hereford, a 260-unit market-rate apartment project is planned on West 15th Street, in the northwest portion of Hereford. This project will be on a 22-acre parcel that was recently annexed into the city of Hereford. Plans have been sent to the city government for review, but no permits have been issued. This $9 million project is being developed by CMS Properties of Lubbock (806-794-1492; www.cmspropertiesinc.com). If this project is developed, it will be significantly larger than all other multifamily housing projects in the area. City representatives anticipate it is likely that the initially proposed 260-units will be decreased to a smaller size, as the Hereford area cannot support 260 new market-rate rental units.

2. CASTRO COUNTY

We identified and personally surveyed five conventional housing projects containing a total of 115 units within Castro County. This survey was conducted to establish the overall strength of the rental market. These rentals have a combined occupancy rate of 100.0%, indicating a clear lack of housing choices. Among these projects, three are three non-subsidized (market-rate) projects containing 55 units. The remaining two projects contain 60 government-subsidized units.

The following is a list of the five total conventional rental projects surveyed in the Castro County area.

MAP CODE	PROJECT NAME	PROJECT TYPE	YEAR BUILT	TOTAL UNITS	VACANT	OCCUPANCY RATE
1	Azteca Apts. Phase I	GSS	1962	48	0	100%
2	Azteca Apts. Phase II	GSS	2007	32	0	100%
3	121 E. Bedford St.	MRR	1929	6	0	100%
4	Northside Apts.	MRR	1992	24	0	100%
5	Dimmitt Gardens	MRR	1988	25	0	100%

PROJECT TYPE	PROJECT SURVEYED	TOTAL UNITS	VACANT	OCCUPANCY RATE
MRR – Market-Rate	3	55	0	100.0%
GSS – Government-Subsidized	2	60	0	100.0%

The map on the following page illustrates the surveyed properties within Castro County. Note the map ID numbers coincide with the labels listed in the field survey of conventional rentals in Section VIII of this analysis.

Conventional Non-Subsidized Apartments (Castro County)

The following table summarizes the breakdown of market-rate units within Castro County:

MARKET RATE						
BEDROOMS	**BATHS**	**UNITS**	**DISTRIBUTION**	**VACANCY**	**%VACANT**	**MEDIAN GROSS RENT**
ONE-BEDROOM	1.0	47	85.5%	0	0.0%	$487
TWO-BEDROOM	1.0	8	14.5%	0	0.0%	$555
TOTAL MARKET RATE		**55**	**100.0%**	**0**	**0.0%**	**-**

As previously stated and illustrated in the preceding table, the lack of available non-subsidized rental units in Castro County (especially in the city of Dimmitt) is a positive indication of the potential demand for additional rental housing.

The following is a distribution of units surveyed by year built for Castro County:

YEAR BUILT	UNITS	VACANCY RATE
PRIOR TO 1960	6	0.0%
1960 – 1969	0	0.0%
1970 – 1979	0	0.0%
1980 – 1989	25	0.0%
1990 – 1994	24	0.0%
1995 – 1999	0	0.0%
2000 – 2005	0	0.0%
2006	0	0.0%
2007	0	0.0%
2008*	0	0.0%
TOTAL	55	0.0%

*As of July

No conventional non-subsidized apartment units have been added to the market since 1992. However, Azteca Apartments Phase II was constructed in 2007. This is a 32-unit government-subsidized rental community targeting migrant farmworkers. We have discussed this project in further detail later in the Migrant and Farmworker Housing portion of this analysis.

We rated each market-rate property surveyed on a scale of A through E. Our rating system is described as follows, with "+" and "-" variations assigned according to variances from the following general descriptions:

A – Upscale/high-quality property
B – Good condition and quality
C – Fair condition, in need of minor improvements
D – Poor condition
E – Serious disrepair, dilapidated

Following is a distribution by quality rating, units, and vacancies.

MARKET-RATE PROPERTIES				MEDIAN GROSS RENT			
QUALITY RATING	PROJECTS	TOTAL UNITS	VACANCY RATE	STUDIO	ONE-BR.	TWO-BR.	THREE-BR.
B	2	30	0.0%	-	$487	$555	-
B-	1	25	0.0%	-	$487	$555	-

Due to the lack of vacancies in the market, there is a clear demand for all rental housing. Quality currently does not have an impact on demand, as there is a lack of available rental housing.

A complete field survey of all conventional apartments we surveyed in Castro County is included in Section VIII. "Field Survey – Castro County, Texas".

Conventional Government-Subsidized Apartments (Castro County)

Within Castro County, the two government-subsidized projects currently existing (Azteca Apartments I and II) operate under the RD 514 and 516 programs. While Azteca Apartments Phase I is considered to have an overall quality rating of C-, it should be noted that Azteca Apartments Phase II was recently constructed in 2007 and is considered to have a B+ quality rating. The aggregate unit breakdown of these two government-subsidized projects is summarized as follows.

BEDROOMS	UNITS	DISTRIBUTION	VACANT	PERCENT
ONE-BEDROOM/1.0 BATH	8	13.3%	0	0.0%
TWO-BEDROOM/1.0 BATH	8	13.3%	0	0.0%
THREE-BEDROOM/2.0 BATH	36	60.0%	0	0.0%
FOUR-BEDROOM/2.0 BATH	8	13.3%	0	0.0%
TOTAL	**60**	**100.0%**	**0**	**0.0%**

According to management at Azteca Economic Development Corporation, there is a very strong demand for farmworker housing in the area. Some units are occupied by multigenerational families due to the current lack of rental housing in the Castro County area. Additional details of these projects are discussed later in this analysis.

According to Sherry Reeves, the Director of Housing for Panhandle Community Services, there are currently 123 Housing Choice Vouchers issued in the county. Ms. Reeves stated that there are currently 14 people on the waiting list for additional Vouchers; however, Vouchers have not been issued in seven years. This is an indication of very strong demand for low-income housing. The Fair Market Rents for Castro County are illustrated as follows.

FAIR MARKET RENTS	
STUDIO UNIT	$448
ONE-BEDROOM UNIT	$450
TWO-BEDROOM UNIT	$550
THREE-BEDROOM UNIT	$733
FOUR-BEDROOM UNIT	$756

For-Sale Housing (Castro County)

Given the rural nature of the Castro County and Dimmitt, real estate representatives were unable to provide MLS data for the currently for-sale homes. However, we were able to obtain a listing of most currently for-sale homes in the Dimmitt area. The following tables contain the average and median current asking price by bedroom type as well as the average and median home size (in square feet) for the for-sale homes in the area.

	ASKING PRICE			
BEDROOM TYPE	**LOW**	**HIGH**	**MEDIAN**	**AVERAGE**
THREE-BEDROOM	$48,000	$109,000	$51,500	$65,000
FOUR-BEDROOM	$44,500	$44,500	$44,500	$44,500

	HOME SIZE (SQUARE FEET)			
BEDROOM TYPE	**LOW**	**HIGH**	**MEDIAN**	**AVERAGE**
THREE-BEDROOM	936	3,739	1,757	1,823
FOUR-BEDROOM	1,556	3,679	2,525	2,612

The average for-sale asking price per square foot is $36.87 per square foot for three-bedroom homes and $30.52 per square foot for four-bedroom homes.

A sampling of five currently for-sale homes in the area are illustrated on the following page. These photographs show the type, size, and price of a variety of homes currently for-sale in the Dimmitt (Castro County) area.

$44,500

As discussed in greater detail earlier in this analysis (on page IV-13), considering the rural nature of the three subject counties, including Castro County and the Dimmitt area, the USDA Homeownership Direct Loan Program (Section 502) has been in effect in the area. The USDA 502 direct loan program offers mortgages for low-income homebuyers in rural areas.

In Castro County, since 2001, there have been three USDA Section 502 loans allocated to individuals. The following shows each loan and the amount of the total obligation.

YEAR	COUNTY	LOCAL OFFICE	ASSISTANCE TYPE	TOTAL OBLIGATION AMOUNT
2004	CASTRO	AMARILLO	DIRECT 502 LOAN GENERAL – VERY LOW INCOME	$58,800
2005	CASTRO	AMARILLO	DIRECT 502 LOAN GENERAL – VERY LOW INCOME	$35,805
2006	CASTRO	AMARILLO	DIRECT 502 LOAN GENERAL – VERY LOW INCOME	$54,500

According to ESRI Demographics, the median home value in Castro County was $69,251 in 2007. At an estimated interest rate of 6.0% and a 30-year term (and 95% LTV), the monthly mortgage for a $69,251 home is $493, including estimated taxes and insurance.

BUY VERSUS RENT ANALYSIS	
CASTRO COUNTY AVERAGE HOME PRICE – ESRI	$69,251
MORTGAGED VALUE = 95% OF AVERAGE HOME PRICE	$65,788
INTEREST RATE – BANKRATE.COM – 6.0%	6.0%
TERM – 30 YEARS	30
MONTHLY PRINCIPAL & INTEREST	$394
ESTIMATED TAXES AND INSURANCE*	$99
ESTIMATED MONTHLY MORTGAGE PAYMENT:	$493

* Estimated at 25% of principal and interest.

The estimated typical mortgage for a home in Castro County is approximately $493 per month. It should be noted that based on our field survey of conventional rental units in the Castro County area, the surveyed units (one- and two-bedroom) collected market-rate rents range from $425 to $550 per month, with the majority of rents in the $425 to $475 range. As such, most rentals in the market are priced below the cost of a typical home ownership alternative. It should be noted that most renters in the area are families that would likely neither be able to afford the down payment or have qualifying credit to purchase a home, especially given the current mortgage situation. Thus, there does not appear to be any competitive impact between the rental and the for-sale markets in the Castro County.

Migrant and Farmworker Housing (Castro County)

Based on our analysis of the Dimmitt area and the surrounding Castro County area, there are two existing conventional rental projects currently serving farmworkers. Azteca Apartment I and II, built in 1962 and 2007, respectively, were developed under the RD 514 and 516 programs by the Azteca Economic Development Corporation. Phase I of the project originally consisted of 48 one-bedroom units; however, recent renovations converted this project into 20 three-bedroom units and eight remaining one-bedroom units. The second phase of Azteca Apartments consists of eight two-bedroom units, 16 three-bedroom units, and eight four-bedroom units. As expected, since the first phase was constructed in 1962 and the second phase was constructed in 2007, the first phase has a C- overall quality rating while the second phase has a B+ overall quality rating. The contract rents are priced accordingly.

Joe Franco, Executive Director of Azteca Economic Development Corporation manages the Azteca Apartments I and II. According to Mr. Franco, most of the employment for farmworkers in the area is at dairy farms. Three new dairies are expected to come online in Castro County within the next year. By his estimate, each of these dairies will employ approximately 20 people, for a total of 60 people. All 60 of these new employees will require housing.

At Azteca Apartments, only two or three families include migrant farmworkers. Mr. Franco suspects that these families will take permanent jobs, and will therefore become permanent residents. These migrant farmworkers currently drive silage trucks for area feed lots. Mr. Franco also noted that there has been a "dynamic change" as far as which groups need housing in Castro County. Over the years, the need for housing has shifted from migrant farmworkers to permanent farmworkers employed at dairies and feed lots. One dairy in Castro County to meet its workforce needs is currently importing workers from Africa, Guatemala, and Mexico. Housing is being provided by the dairy in double-wide trailers subdivided into additional units, as no other housing is available. Although dairies may provide housing for employees, this is the exception rather than the rule. Farmworkers that are new to the area will typically stay with established family members in the area, if housing is not available for them, until a unit opens up elsewhere. While additional small motels are rented on a weekly basis during the migratory farmworker season, information was unable to be obtained from these small properties due to the sensitivity of the migrant farmworker situation and presence of illegal immigrants in the migrant farmworking community.

The following page illustrates one-page field sheets for the first and second phase of the Azteca Apartments.

Source: SOCDS
*Through July

As shown in the preceding table, since 2003, the SOCDS website lists building permits for only five total units in Castro County. However, it is important to reiterate that Azteca Apartments Phase II completed the constructed of 32 units in 2007. In some instances, rural areas outside of city limits do not need to report building permits. Considering Azteca Apartments Phase II is located just outside of the city limits of Dimmitt, this was likely the case for this property.

According to interviews with local planned and development representatives for Dimmitt and Castro County, there are currently no plans for any additional new construction multifamily projects in the area.

3. PARMER COUNTY

Conventional Non-Subsidized Apartments (Parmer County)

We identified and personally surveyed eight conventional housing projects containing a total of 137 units within the Parmer County. This survey was conducted to establish the overall strength of the rental market. These rentals have a combined occupancy rate of 94.2%, a moderate rate for rental housing. However, it is important to note that the only project with a high share of vacancies is 6th Street/Avenue B South (Map ID 3), which currently has three vacancies among the six rentable units. This project is currently undergoing renovations and has an additional six units currently under construction. Management anticipates the project will be fully occupied within two months of completion of renovations. Excluding this project, Cottonwood Townhomes also has five vacancies, resulting in a 91.7% overall occupancy rate. The six remaining conventional rentals in the Parmer County area are all 100.0% occupied, indicating a strong rental market.

Among the eight surveyed projects, seven are non-subsidized (market-rate) projects containing 126 units. These non-subsidized units are 93.7% occupied. The remaining project contains 11 government-subsidized units, which are 100.0% occupied. The following is a list of the eight total conventional rental projects surveyed in the Parmer County area.

MAP CODE	PROJECT NAME	PROJECT TYPE	YEAR BUILT	TOTAL UNITS	VACANT	OCCUPANCY RATE
1	Cottonwood Twnhms.	MRR	1960	60	5	92%
2	1502 W. 5th St.	MRR	1970	10	0	100%
3	6th St./Ave. B South	MRR	1980	6	3	50%

Conventional Non-Subsidized Apartments (Parmer County)

The following table summarizes the breakdown of market-rate units within Parmer County:

MARKET RATE						
BEDROOMS	**BATHS**	**UNITS**	**DISTRIBUTION**	**VACANCY**	**%VACANT**	**MEDIAN GROSS RENT**
ONE-BEDROOM	1.0	21	16.7%	4	19.0%	$449
TWO-BEDROOM	1.0	73	57.9%	1	1.4%	$481
THREE-BEDROOM	1.5	32	25.4%	3	9.4%	$538
TOTAL MARKET RATE		**126**	**100.0%**	**8**	**6.3%**	**-**

Of these 126 non-subsidized units that were surveyed, 93.7% are occupied. As previously stated, this occupancy rate is primarily due to the vacancies at 6th Street/ Avenue B South (Map ID 3). Excluding this project, the remaining 120 market-rate units have a combined occupancy rate of 95.8%, which is considered good for market-rate rental housing.

Nearly 90.0% of all apartments surveyed were built prior to 1980, with the majority of units built in the 1960s. The following is a distribution of units surveyed by year built for the Site PMA:

YEAR BUILT	UNITS	VACANCY RATE
PRIOR TO 1960	10	0.0%
1960 – 1969	92	5.4%
1970 – 1979	10	0.0%
1980 – 1989	6	50.0%
1990 – 1994	8	0.0%
1995 – 1999	0	0.0%
2000 – 2005	0	0.0%
2006	0	0.0%
2007	0	0.0%
2008*	0	0.0%
TOTAL	126	6.3%

*As of July

No conventional apartment units have been added to the market since 1990. As such, the existing rental housing stock in Parmer County is considered to be old.

We rated each market-rate property surveyed on a scale of A through E. Our rating system is described as follows, with "+" and "-" variations assigned according to variances from the following general descriptions:

A – Upscale/high-quality property
B – Good condition and quality
C – Fair condition, in need of minor improvements
D – Poor condition
E – Serious disrepair, dilapidated

Following is a distribution by quality rating, units, and vacancies.

MARKET-RATE PROPERTIES				MEDIAN GROSS RENT			
QUALITY RATING	PROJECTS	TOTAL UNITS	VACANCY RATE	STUDIO	ONE-BR.	TWO-BR.	THREE-BR.
B+	1	8	0.0%	-	-	$655	-
B	1	6	50.0%	-	$537	-	-
B-	1	60	8.3%	-	$449	$481	$538
C+	2	18	0.0%	-	$444	$580	-
C-	1	24	0.0%	-	-	$480	-
D	1	10	0.0%	-	$295	$367	-

The preceding table illustrates that no direct correlation appears to exist in the Parmer County area between quality of units and vacancies. The B vacancies are due to the project currently being renovated in the area, 6th Street/Avenue B South. In addition, the B- vacancies are due to the fact that Cottonwood Townhomes are significantly larger in size (60 total units) than all other existing rental communities.

A complete field survey of all conventional apartments we surveyed in Parmer County is included in Section IX. "Field Survey – Parmer County, Texas".

Conventional Government-Subsidized Apartments (Parmer County)

The government-subsidized project within the Site PMA, Eastridge Manor (Map ID 4), operates under the Rural Development 515 program. Built in 1978, this project is considered to have a B- overall quality rating and competitive unit sizes. However, the only kitchen appliance included at this property is a range. The following table is a breakdown of bedroom types at Eastridge Manor.

BEDROOMS	UNITS	DISTRIBUTION	VACANT	PERCENT
ONE-BEDROOM/1.0 BATH	4	36.4%	0	0.0%
TWO-BEDROOM/1.0 BATH	7	63.6%	0	0.0%
TOTAL	11	100.0%	0	0.0%

As previously stated, Eastridge Manor is currently 100.0% occupied with a five-person waiting list for the next available two-bedroom units. This is a positive indication of the demand for affordable rental housing in the area.

According to Sherry Reeves, the Director of Housing for Panhandle Community Services, there are currently 54 Housing Choice Vouchers issued in the county. Ms. Reeves stated that there are currently two people on the waiting list for additional Vouchers; however, Vouchers have not been issued in seven years. This is an indication of strong demand for low-income housing. The Fair Market Rents for Parmer County are illustrated as follows.

FAIR MARKET RENTS	
STUDIO UNIT	$448
ONE-BEDROOM UNIT	$450
TWO-BEDROOM UNIT	$550
THREE-BEDROOM UNIT	$733
FOUR-BEDROOM UNIT	$756

For-Sale Housing (Parmer County)

Given the rural nature of the Parmer County and Friona, real estate representatives were unable to provide MLS data for the currently for-sale homes. However, we were able to obtain a listing of most currently for-sale homes in the Friona area. The following table contains the average current asking price by bedroom type for the for-sale homes in the area.

	ASKING PRICE			
BEDROOM TYPE	LOW	HIGH	MEDIAN	AVERAGE
TWO-BEDROOM	$72,000	$72,000	$72,000	$72,000
THREE-BEDROOM	$95,000	$145,000	$115,000	$118,333
FOUR-BEDROOM	$85,000	$128,000	$108,000	$107,000
FIVE-BEDROOM	$295,000	$295,000	$295,000	$295,000

A sampling of five currently for-sale homes in the area are illustrated on the following page. These photographs provide an indication of the type, size, and price of a variety of homes currently for-sale in the Friona (Parmer County) area.

2 BEDROOM/1.0-BATH

$72,000

As discussed in greater detail earlier in this analysis (on page IV-13), considering the rural nature of the three subject counties, including Parmer County and the Friona area, the USDA Homeownership Direct Loan Program (Section 502) has been in effect in the area. The USDA 502 direct loan program offers mortgages for low-income homebuyers in rural areas.

In Parmer County, since 2001, there have been three USDA Section 502 loans allocated to individuals. The following shows each loan and the amount of the total obligation.

YEAR	COUNTY	LOCAL OFFICE	ASSISTANCE TYPE	TOTAL OBLIGATION AMOUNT
2001	PARMER	AMARILLO	SEC 502 LOAN	$34,000
2001	PARMER	AMARILLO	SEC 504 GRANT	$7,500
2006	PARMER	AMARILLO	DIRECT 502 LOAN GENERAL – VERY LOW INCOME	$44,000

According to ESRI Demographics, the median home value in Parmer County was $70,139 in 2007. At an estimated interest rate of 6.0% and a 30-year term (and 95% LTV), the monthly mortgage for a $70,139 home is $499, including estimated taxes and insurance.

BUY VERSUS RENT ANALYSIS	
PARMER COUNTY AVERAGE HOME PRICE – ESRI	$70,139
MORTGAGED VALUE = 95% OF AVERAGE HOME PRICE	$66,632
INTEREST RATE – BANKRATE.COM – 6.0%	6.0%
TERM – 30 YEARS	30
MONTHLY PRINCIPAL & INTEREST	$399
ESTIMATED TAXES AND INSURANCE*	$100
ESTIMATED MONTHLY MORTGAGE PAYMENT:	$499

* Estimated at 25% of principal and interest.

As illustrated in the preceding table, the estimated typical mortgage for a home in Castro County is approximately $499 per month. It should be noted that based on our field survey of conventional rental units in the Castro County area, the surveyed units (one- and two-bedroom) collected market-rate rents range from $200 to $575 per month. Since Cottonwood Townhomes offers the most rental units in any one location, it should be noted that this property currently charges collected rents between $380 and $440. As such, most rentals in the market are priced below the cost of a typical home ownership alternative. It should be noted that most renters in the area are likely families that would likely neither be able to afford the down payment or have qualifying credit to purchase a home, especially given the current mortgage situation. Thus, there does not appear to be any competitive impact between the rental and the for-sale markets in the Parmer County.

Migrant and Farmworker Housing (Parmer County)

Based on our analysis of the Friona, Farwell, and Bovina areas, as well as the surrounding Parmer County area, there is one existing conventional rental project that has a large share (50% of the 60 total units) of farmworkers. Although this project, Cottonwood Townhomes, is not restricted to farmworkers and is actually a non-income-restricted market-rate project, we have included it in the following analysis, as it represents the most readily available rental opportunity.

According to management at this project, the farmworkers currently residing at the project typically work at either Cargill or daries, and the majority are permanent residents of the area. Temporary and migratory farmworkers typically reside in motels, trailers, or with family/friends.

The following page illustrates a one-page field sheet for Cottonwood Townhomes.

APARTMENT PROJECT PROFILE - PARMER, TEXAS

Map Code 1 **Total Units** 60 **Vacancies** 5	
Project Name Cottonwood Twnhms.	
Address 1300 Walnut Ave. Friona, TX 79035

Source: SOCDS

Since 2003, the SOCDS website lists building permits for only 26 total units in Parmer County. As such, there has been very minimal development of new housing in the area over the past five years. According to interviews with local planning and development representatives for Friona, Farwell, Bovina, and Castro County, there are currently no plans for any additional new construction multifamily projects in the area.

C. POTENTIAL SUPPORT FROM NEW MEXICO

Interviews with local representatives in the Clovis, New Mexico area were conducted in order to determine the the potential impact on the housing markets in Deaf Smith, Castro, and Parmer counties. Renee Ortiz, property manager for Eastern Plains Council of Governments, stated that while many residents of Clovis will commute to nearby counties (Deaf Smith, Castro, and Parmer counties) for employment, they rarely if ever move to those communities. The main reason so few people move the subject counties is a lack of community services in those communities compared to Clovis. The city of Clovis is larger than any city in the three subject counties.

Kim Stevenson, occupancy specialist for Region IV Housing Authority, works for the housing authority that covers Clovis and some of the surrounding areas in New Mexico. She stated that in her time at the housing authority she cannot remember anyone leaving Clovis for any of the three subject counties. She cited a lack of appropriate housing as the reason so few people move to the other counties.

Leighann Melancon, finance director and city clerk for the city of Clovis, spoke about the lack of community services in the three counties compared to Clovis. She felt that most people in the area would rather live in Clovis and commute to work given the disparity in housing and community services.

All three were in agreement that very few, if any, residents of Clovis would relocate to Deaf Smith, Castro, or Parmer. Potentially, if Hereford or any of the other large cities in the subject counties would develop and offer more community services and housing opportunities, there would be potential to draw housing support from the Clovis area. However, currently, there does not appear to be any significant draw from the Clovis area.

V. DEMAND ANALYSIS

A. INTRODUCTION

Pursuant to the Texas Department of Housing and Community Affairs RFP, two demand models are required as part of this analysis of affordable housing within the subject markets. These demand components include the following:

1. Demand based on strict need
   - Household growth
   - Cost overburdened households
   - Overcrowding;
   - Substandard housing; and,
   - Demand from other non-overlapping sources

2. Demand based upon traditional transitory patterns:
   - Household growth
   - Turnover; and
   - Demand from other non-overlapping sources

This analysis identifies demand for additional housing units for the most recent baseline data year (2008) and five years later (2013).

It is important to note that this analysis considers the number of income-appropriate household growth by household size. Projections based only on income often include estimates of smaller households even though they are over income-qualified due to their household size limitation (i.e. income analysis based on a five-person limit set at $46,000 includes two-person households with incomes above their maximum but below $46,000, thus overstating the number who are qualified).

Cost overburdened households are those renter households that pay more than 35% of their annual household income towards rent. Typically, such households will choose a comparable property (including new affordable housing product) if it is less of a rent burden.

Overcrowded housing is often considered housing units with 1.01 or more persons per room. These units are often occupied by multi-generational families or large families that are in need of more appropriately-sized and affordable housing units. Farmworkers are also often found in overcrowded conditions.

Substandard housing is typically considered product that lacks complete indoor plumbing facilities. Such housing is often considered to be of such poor quality and disrepair that is should be replaced.

Turnover of existing renters within a market each year represents a potential base of support for rental properties. Turnover is considered the number of households that move annually from one rental to another.

B. DETERMINATION OF INCOME ELIGIBILITY

The number of income-eligible households in the market is an important consideration in evaluating the market's potential to support affordable housing units. This section of the report establishes the window of affordability for each of the targeted income levels considered in this report.

a. Maximum Income Limits

Under affordable housing programs, household eligibility is based on household income not exceeding the targeted percentage of Area Median Household Income (AMHI), depending upon household size.

The maximum allowable incomes for the three counties are identical. The following table summarizes the maximum allowable income by household size for the three subject counties at various levels of AMHI.

HOUSEHOLD SIZE	MAXIMUM ALLOWABLE INCOME					
	30%	40%	50%	60%	80%	100%
ONE-PERSON	$9,150	$12,200	$15,250	$18,300	$24,400	$30,500
TWO-PERSON	$10,470	$13,960	$17,450	$20,940	$27,920	$34,900
THREE-PERSON	$11,760	$15,680	$19,600	$23,520	$31,360	$39,200
FOUR-PERSON	$13,080	$17,440	$21,800	$26,160	$34,880	$43,600
FIVE-PERSON	$14,130	$18,840	$23,550	$28,260	$37,680	$47,100

b. Minimum Income Requirements

Pursuant to TDHCA 2009 market study guidelines, the maximum rent to income ratio permitted for family projects is 35% and 50% for elderly projects.

For the purposes of this analysis, we have established the minimum income requirement for each county and each targeted income level by household size by using the maximum income limit for the next lowest targeted income. For example, the maximum income for a one-person household at 30% of AMHI in Deaf Smith County is $9,150. Therefore, we assume that the minimum income requirement for a one-person household at 40% of AMHI would be $9,150. This approach eliminates overlap between the various targeted income levels and prevents double-counting of eligible households in the market. It should be noted that the minimum income requirement for the 30% of AMHI units is $0. The following table summarizes the minimum annual income requirement for the subject counties and at each targeted income level (note: all three counties have the same income and rent restrictions).

HOUSEHOLD SIZE	MINIMUM ANNUAL INCOME REQUIREMENT					
	< 30%	40%	50%	60%	80%	100%
ONE-PERSON	$0	$9,150	$12,200	$15,250	$18,300	$24,400
TWO-PERSON	$0	$10,470	$13,960	$17,450	$20,940	$27,920
THREE-PERSON	$0	$11,760	$15,680	$19,600	$23,520	$31,360
FOUR-PERSON	$0	$13,080	$17,440	$21,800	$26,160	$34,880
FIVE-PERSON	$0	$14,130	$18,840	$23,550	$28,260	$37,680

c. **Income-Appropriate Range**

Based on the preceding analyses, the income-appropriate range at each target AMHI is as follows:

HOUSEHOLD SIZE	ANNUAL HOUSEHOLD INCOME RANGE					
	0%-30%	31% - 40%	41% - 50%	51% - 60%	61% - 80%	81% - 100%
ONE-PERSON	$0 - $9,150	$9,150 - $12,200	$12,200 - $15,250	$15,250 - $18,300	$18,300 - $24,400	$24,400 - $30,500
TWO-PERSON	$0 - $10,470	$10,470 - $13,960	$13,960 - $17,450	$17,450 - $20,940	$20,940 - $27,920	$27,920 - $34,900
THREE-PERSON	$0 - $11,760	$11,760 - $15,680	$15,680 - $19,600	$19,600 - $23,520	$23,520 - $31,360	$31,360 - $39,200
FOUR-PERSON	$0 - $13,080	$13,080 - $17,440	$17,440 - $21,800	$21,800 - $26,160	$26,160 - $34,880	$34,880 - $43,600
FIVE-PERSON	$0 - $14,130	$14,130 - $18,840	$18,840 - $23,550	$23,550 - $28,260	$28,260 - $37,680	$37,680 - $47,100

C. METHODOLOGY

Pursuant to TDHCA requirements, the following are the demand components used in our analysis:

a. **Household Growth.** The growth in the number of renter households is determined using the 2000 Census and projecting forward to the current year (2008). We have also conducted such an analysis evaluating the change in renter households between 2008 and 2013. We have used growth rates and projections established from ESRI, a reputable national data provider. This data was evaluated for all households, seniors (age 55+) and disabled households to the degree the data was available.

b. **Rent over-burdened households.** This calculation evaluates renter households paying more than 35% of their income toward rent. Based on the 2000 Census, depending upon targeted income level, the share of the renter households that were rent overburdened ranged from 10.9% to 51.2% in Deaf Smith County, 0.6% to 48.1% in Castro County, and 5.8% to 69.2% to Parmer County. These shares have been applied to the number of income eligible households within the market for the study year (either 2008 or 2013).

c. **Overcrowded Households.** Overcrowded households are defined as those with 1.01 persons or more per room. Households in substandard housing are adjusted for age, income band, and tenure that apply. Based on the 2000 Census, the share of all renter households living in overcrowded housing was 16.1% in Deaf Smith County, 16.9% in Castro County, and 14.1% in Parmer County. These shares were applied to the number of income-eligible renter households within each income band evaluated.

d. **Substandard Housing.** Substandard housing is considered occupied housing units that lack complete indoor plumbing. Based on the 2000 Census, the share of all renter households living in substandard housing was 0.7% in Deaf Smith County, 2.1% in Castro County, and 2.3% in Parmer County. We have applied these shares to the number of income-eligible renter households within each income band evaluated.

e. **Elderly homeowners likely to convert to rentership (senior projects only).** Based on information from the 2005 American Housing Survey in markets throughout the U.S., we have estimated that on average, just 1.4% of low-income senior homeowners will convert to a rental in a given year. This share has been applied to the number of income-qualified homeowner. The American Housing survey conducted interviews of seniors to determine residency status and previous residency of senior renters. Based on calculations from Table 3-9, Table 4-9 and Table 4-10, we determined that nationally, approximately 0.7% of all senior renter households moved from owner-occupied housing units in any one year. Considering the limited number of rental opportunities in many areas throughout the country, and the fact that the three subject counties are considered relatively rural, we have doubled this share of senior homeowners likely to convert to rentership, assuming a new senior rental alternatives were made available. Thus, the 1.4% senior homeowner conversion rate has been used in the following demand calculations.

f. **Turnover from existing renters.** Turnover is considered those renters that typically move out of a rental property in any given year. The turnover rates, based on IREM's 2007 report, is 62.9% for region VI, which includes the subject counties that are evaluated in this report. Note that IREM does not report specific information for non-metropolitan statistical areas. Therefore, while the actual turnover may be slightly lower in the subject counties due to the lack of available rental housing, we consider this 62.9% turnover rate to be accurate assuming a new rental project was built in one of these counties.

The components from the preceding paragraphs are combined to represent total demand for the proposed subject project.

D. DEMAND CALCULATIONS

a. Introduction

The following tables summarize projected demand for affordable housing for all renter households 2008 as well as 2013. Note the 2008 Baseline Total Renter Households includes *all* renter households, while the demand analysis only considers households earning up to 100% AMHI ($47,100). Therefore, the total Baseline Targeted Income-Qualified Renter Households for each income band does not equate to the total number of renter households in 2008. For example, there were a total of 1,933 renter households in the Deaf Smith County Submarket in 2008; out of this total, 1,591 were *income-qualified* renter households. This results in 342 renter households earning above $47,000.

b. General Occupancy Demand

The tables on the following page illustrate the appropriate income range by targeted AMHI level as well as the number of targeted income-eligible renter households.

Using the estimated share of demand for seniors 55+ by bedroom type and household size for MSAs in Texas within close proximity to the subject counties (which are not located in an MSA) (note: while some low-income seniors would respond to a three-bedroom unit, for the purposes of this analysis, we have only evaluated demand for one- and two-bedroom units):

DEMAND BY BEDROOM AND HOUSEHOLD SIZE		
	STUDIO / 1-BR.	2-BR.
1-PERSON HH	68%	24%
2-PERSON HH	36%	44%

Source: American Housing Survey
HH-Household

These percentages, as applied to the number of income-qualified renter households age 55+ in each county, are as follows:

DEAF SMITH COUNTY
SENIOR DEMAND BY BEDROOM TYPE, HOUSEHOLD SIZE & AMHI
2008 ESTIMATES

DEMAND BY BEDROOM TYPE AND HOUSEHOLD SIZE				
	AMHI	STUDIO / 1-BR.	2-BR.	TOTAL
1-PERSON HH	0%-30%	112	39	151
	31%-40%	22	8	30
	41%-50%	16	6	22
	51%-60%	16	6	22
	61%-80%	28	10	38
	81%-100%	24	9	33
2-PERSON HH	0%-30%	17	21	38
	31%-40%	5	7	12
	41%-50%	5	7	12
	51%-60%	5	6	11
	61%-80%	4	5	9
	81%-100%	2	2	4
TOTAL (%)	0%-30%	129 (68%)	60 (32%)	189
	31%-40%	27 (64%)	15 (36%)	42
	41%-50%	21 (62%)	13 (38%)	34
	51%-60%	21 (64%)	12 (36%)	33
	61%-80%	32 (68%)	15 (32%)	47
	81%-100%	26 (70%)	11 (30%)	37
OVERALL TOTALS		256	126	

Due to rounding, some of the above percentages may not total 100%. Also note that because we only considered demand for one- and two-bedroom units, the totals on this table will be less than the senior demand estimates reported earlier in this section, which included demand for all bedroom types.

C. DEMAND SUMMARY

The table below summarizes the preceding demand calculations. We have summarized demand into three categories: below 40% of AMHI; between 41% and 60% of AMHI; and between 61% and 100% of AMHI. Note that although most government-subsidized units actually target households with incomes up to 50% of AMHI and Tax Credit units often target households with incomes as low as 30% of AMHI, we used the income levels that are typical for specific program occupants. Typically, households with incomes below 40% of AMHI reside in government-subsidized units, while those with incomes between 41% and 60% typically reside in Tax Credit units, and households with incomes between 61% and 100% of AMHI often reside in non-income-restricted market-rate units. Although exceptions can certainly occur, this summary is considered the most likely illustration of potential demand for each of the three subject counties (both the *Strict Need Demand* and *Traditional* T*ransitory Demand* model estimates are shown).

The preceding tables illustrate the overall potential demand for each of the subject counties. It is important to be aware that the Strict Need Demand focuses on support from renter household growth, rent overburdened households, overcrowded households and substandard households (note: senior demand also include homeowner conversions). Based on this methodology in the subject counties, most of the demand will originate from rent overburdened households and those living in overcrowded housing. Minimal support is expected to originate from new renter household growth (some segments may actually decline) and households living in substandard housing units. These factors primarily indicate that these markets require more affordable housing units (responding to the need of rent overburdened households) and larger units or units with more bedrooms (responding to the need of overcrowded housing).

Demand based on the Traditional Transitory Demand model focuses on renter household growth and turnover from existing renters. As stated in the preceding paragraph, minimal support is expected to originate in any of the subject counties from new renter household growth. However, there is potential support for new renter housing that may originate from renter turnover. It is critical to understand, however, turnover is not necessarily a good measure of demand, as it only indicates movership within a market. Simply put, it evaluates households that will potentially be looking for new housing in the market, but may not be seeking or represent support for new rental development. Therefore, demand using turnover may overstate support.

Regardless of the total demand shown in either of these demand models, we anticipate that any new product will only be able to capture only a portion of the overall potential demand. Based on our experience in using and evaluating these demand models in various markets and states around the United States, it is anticipated that any new project can capture no more than 25% of very low-income units (typically government-subsidized) in any given county. For all other types of housing, we have estimated a 10% capture rate of the total demand in a given county. In fact, the ability of a project to draw support from an entire county may be limited, and at the very least will be determined by numerous factors such as design type (garden vs. townhouse), unit mix and bedroom types, amenities, rents, targeted AMHI, targeted household type (senior vs. family) and location (proximity to community services, employment opportunities, visibility, access, and surrounding land uses). Other factors that will also contribute to a project’s ability to draw support from a market will be the existing supply as well as any planned rental projects in the market, and the economic and demographic trends and characteristics of the market. As such, our demand projections assume that any new project will be well-designed, offer competitive rents and features, be within a good location and will ultimately have the ability to draw from the entire county in which it is located.

The following table summarizes the potential number of units that can be supported within a single project in each of the subject markets, assuming a project can capture 25% or 10% of the anticipated demand.

SENIOR HOUSING				
TOTAL NET DEMAND FOR AGE-RESTRICTED (55+) UNITS (0%-40% AMHI)	17	13	16	13
TOTAL NET DEMAND FOR AGE-RESTRICTED (55+) UNITS (41%-60% AMHI)	2	2	1	2
TOTAL NET DEMAND FOR AGE-RESTRICTED (55+) UNITS (61%-100% AMHI)	1	2	2	3

Regardless of the demand model used, most of the potential support for new product is in Deaf Smith County, where as many as 114 general occupancy units targeted to households with incomes under 40% of AMHI may be currently supported. Up to 51 age-restricted units could potentially be supported in Deaf Smith County. It is important to reiterate that many factors contribute to a project's ability to capture market support. Well-designed projects with marketable features, location, and rents could potentially capture a greater share than the 25% of 10% we used in this analysis. Conversely, while our estimates show that as many as 114 general occupancy units targeted to households with incomes of up to 40% of AMHI could be supported in Deaf Smith County, a poorly designed project, with inferior amenities and low quality, and disproportionately high rents may have difficulty capturing 25% or 10% of the market. Therefore, great planning and additional research should be conducted for each project being considered for development in each subject market.

The demand estimates on the preceding page also indicate that there is minimal support for additional low-income units in Castro and Parmer Counties, particularly senior units. While there are many rent overburdened and overcrowded households in these counties, any new product developed in this market may have difficulty attracting enough support. In the event that a well-designed and affordable project was built in either of these counties, it is anticipated that since most of its support would have to originate from existing rentals in the market, some existing projects may be adversely impacted and lease-up for the subject project(s) may be slower than typical. At this time, it appears that only a mixed income range project (0% to 60% of AMHI) targeting both seniors and families would be most beneficial.

It is recommended that a full site-specific market feasibility study be conducted for any rental project that is being considered for development in any of the three subject counties.

D. SPECIAL NEEDS HOUSEHOLDS

Persons with special needs, as defined by HUD, include persons with disabilities, persons with HIV/AIDS, elderly persons, frail elderly persons, persons with alcohol and/or drug addictions, victims of domestic violence, and public housing residents.

Demand from elderly households was described in the previous section. Information on persons with HIV/AIDS, alcohol and/or drug addictions, and victims of domestic violence is typically difficult to obtain and persons with such afflictions are often served and temporarily housed by or through a supportive service organization. Census data is available to estimate the number of persons with other types of disabilities. Based on 2000 Census data, it is estimated those (non-institutionalized) persons age 16+ with a sensory or physical disability within the Deaf Smith County, Castro County and Parmer County are as follows:

	PERSONS WITH DISABILITIES					
	DEAF SMITH COUNTY		CASTRO COUNTY		PARMER COUNTY	
	NUMBER	SHARE	NUMBER	SHARE	NUMBER	SHARE
SENSORY DISABILITY (BLINDNESS, DEAFNESS, VISION OR HEARING)	691	32.0%	223	30.1%	369	37.0%
PHYSICAL DISABILITY	1,466	68.0%	518	69.9%	628	63.0%
TOTAL PERSONS WITH DISABILITIES	**2,157**	**100.0%**	**741**	**100.0%**	**997**	**100.0%**

Source: 2000 Census; ESRI; VWB Research

Note there may be some overlap in the above categories of disability, causing the total number to appear higher. We have not included mentally disabled residents since this group does not require a specific housing product.

According to the 2000 Census, there are 2,157 persons in Deaf Smith County, 741 persons in Castro County, and 997 persons in Parmer County aged 16 and older with either a sensory or physical disability. It is reasonable to assume caregivers and/or family members are providing services to many of these people and are therefore not in one-person households. According to ESRI, approximately 30.8% of all occupied housing units in Deaf Smith County are renter-occupied, while 27.4% in Castro County and 26.2% in Parmer County are renter occupied. Applying these shares of renter households to the number of persons with disabilities results in approximately 664 persons with disabilities living in renter-occupied households in Deaf Smith County, 203 persons with disabilities living in renter-occupied households in Castro County, and 261 persons living with disabilities in renter-occupied households in Parmer County.

Based on the preceding analysis, in 2008, approximately 82.4% of all renter households in Deaf Smith County, 71.2% of all renter households in Castro County, and 80.0% of all renter households in Parmer County are income-qualified (incomes between 0% and 100% AMHI) renter households. Applying these shares to the number of persons with disabilities living in renter households results in 547 income-qualified persons with a disability living in a renter-occupied household in Deaf Smith County, 145 in Castro County, and 209 in Parmer County. This analysis is summarized below:

	DEAF SMITH COUNTY	CASTRO COUNTY	PARMER COUNTY
TOTAL PERSONS WITH DISABILITIES	2,157	741	997
(X) RENTER PERCENTAGE	30.8%	27.4%	26.2%
(=) RENTER HOUSEHOLDS WITH DISABLED RESIDENT	664	203	261

% BASELINE TARGETED INCOME-QUALIFIED RENTER HOUSEHOLDS	31.6%	9.6%	10.9%	12.6%	21.7%	13.6%
X DISABLED RENTER HOUSEHOLDS	209	209	209	209	209	209
TOTAL INCOME-QUALIFIED RENTER HOUSEHOLDS WITH DISABLED RESIDENT	66	20	23	26	45	28

The above analysis assumes persons with disabilities have incomes reflective of the general population. In reality, it is more likely persons with disabilities will have lower incomes than the general population; therefore, the above analysis understates the housing required to serve this component at lower incomes. If units were developed to 100% of the above level, a large number of vacancies would occur in the market since so many people are cared for in conventional units.

We recommend a site-specific development target no more than 2% to 5% of total demand for special needs households. Due to the limitations of accurate information available pertaining to special needs households, we strongly recommend any planned project involve extensive interviews with appropriate local service providers, caregivers, medical facilities, etc., to help determine the demand of special needs households within that market and the type or characteristics of the housing required.

E. FARMWORKER HOUSING DEMAND

Rural Development defines a farm worker household as a "household of one or more persons wherein at least one member of the household is a farm worker." "Farm worker" is defined by Rural Development as any laborer who is employed on a seasonal, temporary, or permanent basis in the planting, cultivating, harvesting or processing of agricultural or aquacultural products and who has derived at least 50% of his or her income in the immediately preceding 12 calendar months from such employment.

The methodology used by VWB Research to estimate support for rental housing units specified for farm workers is based on analyses of data provided by the 2002 Census of Agriculture and the 2001-2002 National Agriculture Workers Survey (NAWS) conducted by the U.S. Bureau of Labor Statistics.

According to the 2002 (most recent) Agriculture Census, the number of farms in Deaf Smith County, Castro County and Parmer County decreased between 1997 and 2002. However, given the lack of housing for farmworkers, local representatives stated that there has historically been a lack of affordable housing prior to 2000.

The following table illustrates the number of hired farm labor farms and workers for each county.

COUNTY	HIRED FARM LABOR FARMS	HIRED FARMWORKERS (FARMS WITH $1,000+ PAYROLL)		
		TOTAL	150 DAYS OR MORE	LESS THAN 150 DAYS
DEAF SMITH	226	1,072	619	453
CASTRO	251	1,393	520	873
PARMER	261	1,662	635	1,027

Source: USDA National Agriculture Statistics Service (NASS) 2002 Census of Agriculture

Although Deaf Smith County has the largest population, it has the fewest number of hired farm labor farms and farmworkers among the three subject counties. In addition, the hired farmworkers in Deaf Smith County are predominately those working 150 days or more per year. Conversely, the majority of hired farmworkers in Castro County and Parmer County work less than 150 days per year, indicating more migrant workers. This indicates potential need for migrant farmworker housing.

Based on the National Agricultural Workers Study (NAWS) completed in 1998 by the U.S. Department of Labor, nearly three-quarters of U.S. farmworkers earned less than $10,000 per year; three out of five farmworker families had incomes below the poverty level. Therefore, farmworkers often live in overcrowded homes in order to reduce their housing costs. More than half of all farmworkers live in overcrowded housing.

As previously stated in this analysis, there is one rental project (Amistad) in Hereford (Deaf Smith County) targeting farmworkers and two projects (Azteca Apartments I and II) in Dimmitt (Castro County) targeting farmworkers. In addition, in Friona (Parmer County), there is one conventional rental community (Cottonwood Townhomes) that is approximately 50% occupied by farmworkers. Based on national statistics as well as our interviews with local housing and farmworker representatives, it is typical for farmworkers to reside two persons per bedroom. In fact, many of the migrant farmworkers often overcrowd units with more than two persons per bedroom. For the purpose of this analysis, we have assumed two persons per bedroom for each of the aforementioned farmworker apartment complexes.

	AMISTAD 301 S. TEXAS AVE. HEREFORD, TX		AZTECA APARTMENTS I & II 3910 E. JONES ST. DIMMITT, TX		COTTONWOOD TOWNHOMES 1300 WALNUT AVE. FRIONA, TX	
BEDROOMS	UNITS	POTENTIAL FARMWORKERS *	UNITS	POTENTIAL FARMWORKERS *	UNITS	POTENTIAL FARMWORKERS *
ONE-BR.	-	-	-	-	4	8
TWO-BR.	24	96	16	24	10	40
THREE-BR.	20	120	16	96	16	96
FOUR-BR.	6	48	28	224	-	-
TOTAL	50	264	60	344	30	144

*Based on two-persons per bedroom

In Deaf Smith County (Hereford), Amistad has the potential to house approximately 264 farmworkers, while Azteca in Castro County (Dimmitt) has the potential to house approximately 344 farmworkers, and Cottonwood Townhomes in Parmer County (Friona) has the potential to house approximately 144 farmworkers (considering about half of the 60 total units are occupied by farmworkers).

Assuming that the hired farmworkers in each county that work less than 150 days per year reside at the aforementioned conventional apartment projects targeting farmworkers, we estimate a farmworker housing deficit for each county in the following table. It is estimated that farmworkers that work more than 150 days per year, and are not migrant, typically reside in other conventional low-income apartments.

COUNTY	HIRED FARMWORKERS THAT WORK LESS THAN 150 DAYS	MINUS	TOTAL POTENTIAL BEDS OF EXISTING FARMWORKER HOUSING	EQUALS	FARMWORKER BEDS DEFICIT
DEAF SMITH	453	-	264	=	189
CASTRO	873	-	344	=	529
PARMER	1,027	-	144	=	883

As indicated in the preceding table, the largest farmworker housing deficit (based on the number of hired migrant farmworkers and the existing conventional farmworker housing opportunities in each county) is in Parmer County. As illustrated in the table above, Parmer County has the largest migrant farmworker base and the fewest existing beds available in conventional farmworker housing. It is important to note that the farmworker beds deficit is based on the number of beds for each farmworker, rather than the number of potential units of farmworker housing, considering farmworkers often reside in overcrowded housing units, with an average of two persons per bedroom. The number of achievable units would be dependent upon the bedroom-types offered.

Based on our analysis of each of the three subject counties and the farmworker housing characteristics, it appears that due to the increasing dairy industry in the Texas Panhandle, farmworker housing is in increasing demand. Additional farmworker housing can likely be supported in each county. Numerous factors go into the specific achievability of a specific farmworker housing project. For instance, although Deaf Smith County has the fewest number of hired farmworkers (compared to Castro and Parmer Counties), this area may potentially be able to support a large project due to available community services and the fact that farmworkers are accustomed to commuting between counties for employment. The ability of a project to draw support from an entire county or three-county area will be dependent upon design type (garden, townhouse, single-family), unit mix and bedroom types, amenities, rents, targeted AMHI and housing assistance, and location (proximity to community services, visibility, access, and surrounding land uses).

Similar to the achievability of non-farmworker rental housing, it is anticipated that any new farmworker rental project can capture no more than a small share of the total demand (based on deficit) in a given county. While this preceding analysis illustrates the gap between the number of hired migrant farmworkers in each of the three subject counties and the existing conventional rental farmworker housing supply, it does not take into account additional farmworker housing opportunities, such as private single-family rentals, mobile home rentals or motels. Thus, caution must be exercised when determining the market potential of a specific farmworker housing project.

VI. FIELD SURVEY OF CONVENTIONAL RENTALS

DEAF SMITH COUNTY, TEXAS

The following section is a field survey of conventional rental properties. These properties were identified through a variety of sources including area apartment guides, yellow page listings, government agencies, the Chamber of Commerce, and our own field inspection. The intent of this field survey is to evaluate the overall strength of the existing rental market, identify trends that impact future development, and identify those properties that would be considered most comparable to the subject site.

The field survey has been organized by the type of project surveyed. Properties have been color coded to reflect the project type. Projects have been designated as market-rate, Tax Credit, government-subsidized, or a combination of the three project types. The field survey is organized as follows:

- A color-coded map indicating each property surveyed and the project type followed by a list of properties surveyed.
- Properties surveyed by name, address, telephone number, project type, year built or renovated (if applicable), number of floors, total units, occupancy rate, quality rating, rent incentives, and Tax Credit designation. Housing Choice Vouchers and Rental Assistance are also noted here. Note that projects are organized by project type.
- Distribution of non-subsidized and subsidized units and vacancies in properties surveyed.
- Listings for unit and project amenities, parking options, optional charges, utilities (including responsibility), and appliances.
- Collected rent by unit type and bedrooms.
- Unit size by unit type and bedrooms.
- Calculations of rent per square foot (all utilities are adjusted to reflect similar utility responsibility). Data is summarized by unit type.
- An analysis of units, vacancies, and median rent. Where applicable, non-subsidized units are distributed separately.
- An analysis of units added to the area by project construction date and, when applicable, by year of renovation.
- Aggregate data and distributions for all non-subsidized properties are provided for appliances, unit amenities and project amenities.

- A rent distribution is provided for all market-rate and non-subsidized Tax Credit units by unit type. Note that rents are adjusted to reflect common utility responsibility.
- Aggregation of projects by utility responsibility (market-rate and non-subsidized Tax Credit only).
- A utility allowance worksheet.

Note that other than the property listing following the map, data is organized by project types. Market-rate properties (blue designation) are first followed by variations of market-rate and Tax Credit properties. Non-government subsidized Tax Credit properties are red and government-subsidized properties are yellow. See the color codes at the bottom of each page for specific project types.

VII. FIELD SURVEY OF CONVENTIONAL RENTALS

CASTRO, TEXAS

The following section is a field survey of conventional rental properties. These properties were identified through a variety of sources including area apartment guides, yellow page listings, government agencies, the Chamber of Commerce, and our own field inspection. The intent of this field survey is to evaluate the overall strength of the existing rental market, identify trends that impact future development, and identify those properties that would be considered most comparable to the subject site.

The field survey has been organized by the type of project surveyed. Properties have been color coded to reflect the project type. Projects have been designated as market-rate, Tax Credit, government-subsidized, or a combination of the three project types. The field survey is organized as follows:

- A color-coded map indicating each property surveyed and the project type followed by a list of properties surveyed.
- Properties surveyed by name, address, telephone number, project type, year built or renovated (if applicable), number of floors, total units, occupancy rate, quality rating, rent incentives, and Tax Credit designation. Housing Choice Vouchers and Rental Assistance are also noted here. Note that projects are organized by project type.
- Distribution of non-subsidized and subsidized units and vacancies in properties surveyed.
- Listings for unit and project amenities, parking options, optional charges, utilities (including responsibility), and appliances.
- Collected rent by unit type and bedrooms.
- Unit size by unit type and bedrooms.
- Calculations of rent per square foot (all utilities are adjusted to reflect similar utility responsibility). Data is summarized by unit type.
- An analysis of units, vacancies, and median rent. Where applicable, non-subsidized units are distributed separately.
- An analysis of units added to the area by project construction date and, when applicable, by year of renovation.
- Aggregate data and distributions for all non-subsidized properties are provided for appliances, unit amenities and project amenities.

- A rent distribution is provided for all market-rate and non-subsidized Tax Credit units by unit type. Note that rents are adjusted to reflect common utility responsibility.

- Aggregation of projects by utility responsibility (market-rate and non-subsidized Tax Credit only).

- A utility allowance worksheet.

Note that other than the property listing following the map, data is organized by project types. Market-rate properties (blue designation) are first followed by variations of market-rate and Tax Credit properties. Non-government subsidized Tax Credit properties are red and government-subsidized properties are yellow. See the color codes at the bottom of each page for specific project types.

VIII. FIELD SURVEY OF CONVENTIONAL RENTALS

PARMER, TEXAS

The following section is a field survey of conventional rental properties. These properties were identified through a variety of sources including area apartment guides, yellow page listings, government agencies, the Chamber of Commerce, and our own field inspection. The intent of this field survey is to evaluate the overall strength of the existing rental market, identify trends that impact future development, and identify those properties that would be considered most comparable to the subject site.

The field survey has been organized by the type of project surveyed. Properties have been color coded to reflect the project type. Projects have been designated as market-rate, Tax Credit, government-subsidized, or a combination of the three project types. The field survey is organized as follows:

- A color-coded map indicating each property surveyed and the project type followed by a list of properties surveyed.
- Properties surveyed by name, address, telephone number, project type, year built or renovated (if applicable), number of floors, total units, occupancy rate, quality rating, rent incentives, and Tax Credit designation. Housing Choice Vouchers and Rental Assistance are also noted here. Note that projects are organized by project type.
- Distribution of non-subsidized and subsidized units and vacancies in properties surveyed.
- Listings for unit and project amenities, parking options, optional charges, utilities (including responsibility), and appliances.
- Collected rent by unit type and bedrooms.
- Unit size by unit type and bedrooms.
- Calculations of rent per square foot (all utilities are adjusted to reflect similar utility responsibility). Data is summarized by unit type.
- An analysis of units, vacancies, and median rent. Where applicable, non-subsidized units are distributed separately.
- An analysis of units added to the area by project construction date and, when applicable, by year of renovation.
- Aggregate data and distributions for all non-subsidized properties are provided for appliances, unit amenities and project amenities.

- A rent distribution is provided for all market-rate and non-subsidized Tax Credit units by unit type. Note that rents are adjusted to reflect common utility responsibility.

- Aggregation of projects by utility responsibility (market-rate and non-subsidized Tax Credit only).

- A utility allowance worksheet.

Note that other than the property listing following the map, data is organized by project types. Market-rate properties (blue designation) are first followed by variations of market-rate and Tax Credit properties. Non-government subsidized Tax Credit properties are red and government-subsidized properties are yellow. See the color codes at the bottom of each page for specific project types.

IX. QUALIFICATIONS

A. THE COMPANY

VWB Research is a real estate research firm established to provide accurate and insightful market forecasts for a broad range client base. The three principals of the firm, Robert Vogt, Tim Williams, and Patrick Bowen, have a combined 45 years of real estate market feasibility experience throughout the United States.

Serving real estate developers, syndicators, lenders, state housing finance agencies, and the U.S. Department of Housing and Urban Development (HUD), the firm provides market feasibility studies for affordable housing, market-rate apartments, condominiums, senior housing, student housing, and single-family developments.

B. THE STAFF

Robert Vogt has conducted and reviewed over 5,000 market analyses over the past 26 years for market-rate and Low-Income Housing Tax Credit apartments, as well as studies for single-family, golf course/residential, office, retail and elderly housing throughout the United States. Mr. Vogt is a founding member and the immediate past chairman of the National Council of Affordable Housing Market Analysts, a group formed to bring standards and professional practices to market feasibility. He is a frequent speaker at many real estate and state housing conferences. Mr. Vogt has a bachelor's degree in Finance, Real Estate, and Urban Land Economics from The Ohio State University.

Tim Williams has over 20 years of sales and marketing experience and over 10 years in the real estate market feasibility industry. He is a frequent speaker at state housing conferences and an active member of the National Council of State Housing Agencies and the National Housing and Rehabilitation Association. Mr. Williams has a bachelor's degree in English from Hobart and William Smith College.

Patrick Bowen has prepared and supervised market feasibility studies for all types of real estate products, including affordable family and senior housing, multifamily market-rate housing, and student housing, for more than 10 years. He has also prepared various studies for submittal as part of HUD 221(d) 3 & 4, HUD 202 developments, and applications for housing for Native Americans. Mr. Bowen has worked closely with many state and federal housing agencies to assist them with their market study guidelines. Mr. Bowen has his bachelor's degree in Legal Administration (with emphasis on business and law) from the University of West Florida.

Brian Gault has conducted fieldwork and analyzed real estate markets for eight years in more than 40 states. In this time, Mr. Gault has conducted a broad range of studies, including Low-Income Housing Tax Credit, luxury market-rate apartments, comprehensive community housing assessment, HOPE VI redevelopment, student housing analysis, condominium communities, and mixed-use developments. Mr. Gault has his bachelor's degree in Public Relations from the E.W. Scripps School of Journalism, Ohio University.

Nancy Patzer has over a decade of experience as a writer and researcher. Ms. Patzer's experience includes securing grant financing for a variety of communities and organizations and providing planning direction and motivation through research for organizations such as Community Research Partners/United Way of Central Ohio and the City of Columbus. As a project director for VWB Research, Ms. Patzer has conducted field research and provided insightful analysis in over 200 U.S. markets in the areas of housing, community and economic development, and senior residential care, among others. She holds a bachelor's degree in Journalism from the E.W. Scripps School of Journalism, Ohio University.

Andrew W. Mazak has over five years of experience in the real estate market research field. He has personally written more than 400 market feasibility studies in numerous markets throughout the United States, Canada, and Puerto Rico. These studies include the analysis of Low-Income Housing Tax Credit apartments, market-rate apartments, government-subsidized apartments, as well as student housing developments, condominium communities, and senior-restricted developments. Mr. Mazak attended Capital University in Columbus, Ohio, where he graduated with a bachelor's degree in Business Management and Marketing.

Nathan Young has four years of experience in the real estate profession. He has conducted field research and written market studies in more than 100 rural and urban markets throughout the United States. Mr. Young's real estate experience includes analysis of apartment (subsidized, Tax Credit, and market-rate), senior housing (i.e. nursing homes, assisted-living, etc.), student housing, condominium, retail, office, and self-storage facilities. Mr. Young has a bachelor's degree in Engineering (Civil) from The Ohio State University.

Jim Beery has more than 20 years experience in the real estate market feasibility profession. He has written market studies for a variety of development projects, including multifamily apartments (market-rate, affordable housing, and government-subsidized), residential condominiums, hotels, office developments, retail centers, recreational facilities, commercial developments, single-family developments, and assisted-living properties for older adults. Other consulting assignments include numerous community redevelopment and commercial revitalization projects. Mr. Beery has a bachelor's degree in Business Administration (Finance major) from The Ohio State University.

David S. Currier has conducted on-site market evaluations in more than 90 markets in 25 states, Canada, and the U.S. Virgin Islands. Mr. Currier has analyzed apartments (subsidized, Tax Credit, and upscale market-rate), senior housing (i.e. nursing homes, assisted-living, etc.), student housing, condominium, retail, office, and marinas. Mr. Currier has a bachelor's degree in Economics from the University of Colorado.

Walt Whitmyre has directed 165 real estate development projects in 15 different states. During his 30 years as a real estate professional, Mr. Whitmyre has been heavily involved in nearly every aspect of the industry. From concept design to construction, Mr. Whitmyre has been responsible for real estate developments totaling $400,000,000 and has acquired valuable insights from the perspectives of both developer and development team member. Mr. Whitmyre's expertise includes development team management, market feasibility studies, site due diligence, design evaluation, project budgeting, and jurisdictional entitlements. Mr. Whitmyre holds a bachelor's degree in Environmental Design/Architecture from the University of Colorado.

Rick Stein has over 15 years experience as a software developer and systems analyst. He has served as a consultant on a wide variety of information technology and urban planning projects throughout the region. He manages the Geographic Information Systems department at VWB, which is responsible for all mapping, demographic evaluation, and application development. Mr. Stein has earned a Bachelor of Science in Business Administration (specializing in Management Information Systems) from Bowling Green State University and a Master of City and Regional Planning from The Ohio State University. He is an active member of the American Planning Association and the Ohio Planning Conference.

Christi Kramer is the Marketing Coordinator at VWB Research. She has conducted qualitative and quantitative research in markets nationwide for apartments, student housing, condominiums, single-family, self-storage, and retail developments. In addition, Ms. Kramer has been involved in the production of over 1,000 studies and is familiar with the guidelines and requirements of state housing agencies. She has a bachelor's degree in Marketing from the University of Dayton School of Business Administration where she was also the Marketing Assistant.

June Davis is an administrative assistant with 19 years experience in market feasibility. Ms. Davis has overseen production on over 1,000 market studies for projects throughout the United States.

Field Staff – VWB Research maintains a field staff of professionals experienced at collecting critical on-site real estate data. Each member has been fully trained to evaluate site attributes, area competitors, market trends, economic characteristics, and a wide range of issues impacting the viability of real estate development.

MARKET ANALYSIS OF THE MCALLEN-EDINBURG-MISSION AND THE BROWNSVILLE-HARLINGEN METROPOLITAN STATISTICAL AREAS

Re: Market Analysis of the McAllen-Edinburg-Mission and the Brownsville-Harlingen Metropolitan Statistical Areas

Ms. Brenda Hull:

We are pleased to present our findings pursuant to your request. Thank you for the opportunity to be of service.

At your request, we prepared a Market Analysis of the McAllen-Edinburg-Pharr and Brownsville-Harlingen Metropolitan Statistical Areas (the McAllen and Brownsville MSAs) pursuant to the Request for Proposals submitted by the Texas Department of Housing and Community Affairs (TDHCA), including, but not limited to, the following:

- Characteristics, Current Demographic Data and Local Economy of the McAllen and Brownsville MSAs
- Analysis of Housing Survey Data in the McAllen and Brownsville MSAs - Existing, Under Construction, and Proposed
- Correlation of Supply and Demand in the McAllen and Brownsville MSAs, Summary and Conclusions

Please do not hesitate to contact us if there are any questions regarding the report or if Novogradac & Company LLP can be of further assistance. It has been our pleasure to assist you with this project.

Respectfully submitted,
Novogradac & Company LLP

MCALLEN-EDINBURG-MISSION, TX MSA
AND
BROWNSVILLE-HARLINGEN, TX MSA
Housing Market Analysis

PROJECT SUMMARY

Introduction
Novogradac & Company, LLP has prepared a Housing Market Study of the McAllen-Edinburg-Mission and Brownsville-Harlingen MSAs for the Texas Department of Housing and Community Affairs (TDHCA).

Methodology

Submarket Delineation
The McAllen-Edinburg-Mission Metropolitan Statistical Area consists of Hidalgo County in its entirety. The principal cities of the McAllen-Edinburg-Mission MSA are Edinburg, McAllen, Mission, Pharr, San Juan and Weslaco. The Brownsville-Harlingen Metropolitan Statistical Area consists of Cameron County in its entirety. The principal cities of the Brownsville-Harlingen MSA are Harlingen, Brownsville, and San Benito. We have consulted several research data sources to aid in determining the number of submarkets and their boundaries for each MSA. We have delineated seven submarkets in the McAllen-Edinburg-Mission MSA and four submarkets in the Brownsville-Harlingen MSA. The submarket boundaries were drawn taking into account competition among developments for residents, natural and man-made boundaries—such as bodies of water, freeways, etc.—and interviews with developers and other stakeholders in the area.

Community Characteristics, Current Demographic Data and Local Economy
We have provided an analysis of the changes and trends in the demographics and local economy for the McAllen and Brownsville MSAs and each individual submarket. This analysis examines the past ten years of demographic data, which will include population, household composition, age, ethnicity and gender, income, housing tenure, housing, affordability, industry, labor force and employment trends, and building permit data. The analysis also includes current and five-year projections of the demographic data.

Housing Supply
We attempted to identify all existing, proposed, and under construction LIHTC, subsidized and market rate developments in each Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers. Our survey collected data in each submarket to determine typical pricing, occupancy, sales or absorption pace, amenities offered, turnover, unit types and sizes, and assess the at-large community and the elements that prohibit or enhance housing availability and affordability. In addition, we have provided an inventory of all existing affordable housing, including Public Housing, Housing Choice Vouchers currently in use, waiting list information for affordable housing and a review of projects that are planned or under construction to assess each

submarket's and the MSA's ability to meet the need for housing and to estimate future housing trends.

Demand Analysis
As outlined in the study requirements, our estimate of demand for affordable rental housing in each submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

The following summarizes the demand analysis conclusions for each Submarket.

North Hidalgo County
All Households
The North Hidalgo County Submarket reports only 97 renter households, of which 73 earn below 100 percent of AMI. Over half of these renter households are earning below 40 percent of AMI. The analysis of income-qualified renter households in the Submarket indicates that, when turnover is factored in, there may be a need for 20 units of affordable housing targeting households earning less than 40 percent of AMI. With no identifiable rental developments in the Submarket, many of these households may be living in single-family rental houses, mobile homes, or in units that are older and possibly functionally obsolete. In addition, there may be some pent-up demand from owner households looking to improve their current housing situation.

Senior Households
According to the analysis of income-qualified renter households presented here, there is no quantifiable demand for affordable units targeting seniors in the North Hidalgo County Submarket. However, as with the analysis of all households, there may be some pent-up demand from senior homeowners looking transition from homeownership to lower maintenance rental housing.

West Hidalgo County
All Households
The analysis of income-qualified renter households in the West Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 25 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. The proposed reconstruction of 50 units to provide affordable units to households earning less than 30 percent of AMI should help to meet some of the continuing need for housing at the lowest income levels in the West Hidalgo County Submarket.

Senior Households
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 24 subsidized units serving low-income senior households in the West Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional subsidized or LIHTC units planned, there is likely an unmet need for additional affordable senior housing units in this Submarket.

West Central Hidalgo County
All Households
The analysis of income-qualified renter households in the West Central Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 25 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. This may explain the 6.0 percent average vacancy rate among family LIHTC properties in the Submarket, while market rate properties in the Submarket have an average vacancy rate of 2.9 percent. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. This suggests that the higher than average vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Senior Households
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 120 subsidized units serving low-income senior households in the West Central Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional LIHTC units planned, there is likely an unmet need for additional affordable senior housing units in this Submarket.

South Central Hidalgo County
All Households

As with the other Submarkets in the McAllen-Edinburg-Mission, TX MSA, the analysis of income-qualified renter households in the South Central Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 23 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less; however, occupancy rates a the surveyed family LIHTC and subsidized properties in the Submarket are very low, indicating that there is a sufficient number of income-qualified renter households to support existing affordable housing units. Even with an estimated 486 new family units and 142 new senior units targeting households at 30 to 60 percent of AMI in planning stages or under construction, the number of income-qualified households projected through 2012 shows a strong increase. Although the planned and under construction units will meet some of the affordable housing needs of the Submarket, a growing number of income qualified households indicates that the need for additional affordable housing units will persist in the Submarket.

Senior Households

Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are approximately 56 subsidized units serving low-income senior households in the South Central Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. The Submarket currently has 142 new subsidized and LIHTC units for seniors in the planning stages. While this will help to address the need for affordable housing targeting seniors in the Submarket, additional housing will likely still be needed for senior households at the very lowest income levels.

Southeast Hidalgo County
All Households

The analysis of income-qualified renter households in the Southeast Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that 28 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less, with the smallest number of income-qualified households falling in the 51 to 60 percent of AMI income group. This may explain the 3.8 percent average vacancy rate among family LIHTC properties in the Submarket, while market rate properties in the Submarket have an average vacancy rate of 2.3 percent. Additionally, it is of note that all of the vacant LIHTC units in the Submarket are at the 60 percent of AMI level. The income-qualified renter households at the 61 to 80 percent AMI level comprise the second largest income group in the Submarket. This suggests that the vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Senior Households

Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, a 100-unit senior public housing development in the Submarket is undergoing renovations with tax credit funds allocated in 2006. Although the goal of the development is to replace existing housing, tenants have been displaced and some lease-up of the property may be needed. It is for this reason that we have deducted the units from the demand analysis. The only LIHTC/USDA senior property we were able to interview has a waiting list of one year and a very low 2.0 percent turnover rate. Despite the possibility of serving some additional households with the renovated units, the analysis above indicates that there is likely still an unmet need for additional affordable senior housing units in this Submarket.

East Hidalgo County
All Households
The analysis of income-qualified renter households in the East Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that almost one-third of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Although the effective vacancy rate for family LIHTC units in the Submarket is zero percent, there are 183 new LIHTC units expected to enter the market in the next six to 18 months. With a limited number of income-qualified renter households at the 51 to 60 percent AMI level, new units at 60 percent of AMI may have difficulty attracting appropriately qualified tenants. Already, one of the family LIHTC properties in the Submarket is offering a concession of one month free rent. This indicates that the new units in the market may experience a somewhat slower than average absorption period, and concessions may be needed to attract and maintain tenants in units at the 60 percent set-aside. However, it should be noted that with a high incidence of overcrowding in the Submarket, additional demand may be generated from owner households looking to improve their current housing situation.

Senior Households
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 138 subsidized units serving low-income senior households in the East Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. The 30 units under construction at El Paraiso will help to meet this continuing need, without significant impact to existing affordable housing developments for seniors in the Submarket.

Central Hidalgo County

All Households

The analysis of income-qualified renter households in the Central Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that almost 23 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. This may explain the 13.2 percent average vacancy rate among family LIHTC properties in the Submarket, while market rate properties in the Submarket have an average vacancy rate of 6.5 percent. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. This suggests that the higher than average vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Interviews with property managers at the Submarket's LIHTC properties provide further anecdotal evidence that this is indeed the case. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Although there are no new family LIHTC units proposed for the market, and new units at the 60 percent of AMI level in the market may experience a somewhat slower than average absorption period, and concessions may be needed to attract and maintain tenants in units at the 60 percent set-aside. However, it should be noted that with a high incidence of overcrowding in the Submarket, additional demand may be generated from owner households looking to improve their current housing situation.

Senior Households

Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Villa Estrella Trevino is a proposed senior LIHTC development to be located in Edinburg. This development was allocated tax credit funding in 2007; it will offer 17 units at 30 percent of AMI, 144 units at 60 percent of AMI and seven market rate units. As shown in the demand analysis above, it appears that there is an insufficient number of income-qualified senior households at the 60 percent of AMI level to support the proposed number of units.

It should be noted that Villa Estrella Trevino is being developed in conjunction with the Edinburg Housing Authority. The housing authority currently reports a waiting list of over 1,000 households, one-third of which are senior households. Additionally, Edinburg's last affordable units for seniors were constructed in 1975. It is anticipated that many of the units at 60 percent of AMI may be occupied by Housing Choice Voucher Holders from the Edinburg Housing Authority waiting list. Based on the demand analysis of senior renter households, there appears to be adequate demand for additional affordable housing for seniors at the lowest income levels.

West Cameron County
All Households
The analysis of income-qualified renter households in the West Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that nearly 23 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. This may explain why the only vacant LIHTC units in the market are at the 60 percent AMI level. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. This suggests that the higher than vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. With no additional LIHTC or subsidized units planned, there is likely an unmet need for additional affordable housing units at the lowest income levels in this Submarket.

Senior Households
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 221 subsidized units serving low-income senior households in the West Cameron County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional LIHTC or subsidized units planned, there is likely an unmet need for additional affordable senior housing units in this Submarket.

South Cameron County
All Households
The analysis of income-qualified renter households in the South Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. It is estimated that by 2012, there will be an additional 828 renter households earning below 30 percent of the AMI. When this number is refined to account for households paying more than 35 percent of income as rent, households living in substandard units, households living in overcrowded conditions and turnover, there is potential demand from 653 of these households. With no additional planned subsidized or LIHTC units, and near 100 percent occupancy of existing affordable units, it is highly likely that there will be a continuing need for affordable housing in the Submarket.

Senior Households
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. In fact, senior households account for nearly 30 percent of the potential demand in the Submarket for units at less than 30 percent of the AMI. With no additional LIHTC or subsidized units for seniors planned, there is likely a continuing need for additional affordable senior housing units in this Submarket.

Central Cameron County
All Households
As will the other Submarkets, the analysis of income-qualified renter households in the Central Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 26 percent of households in the Submarket earn less than $15,000 annually. Currently, there are no LIHTC units serving the affordable housing needs of residents in the Submarket. The 81 units of subsidized housing for families in the Submarket are 100 percent occupied, with waiting lists reported. This evidence, along with the analysis of income-qualified renter households, indicates that there is a persistent need in the Submarket for additional affordable housing units targeting families. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Senior Households
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Similarly, there are no LIHTC units and only 38 subsidized units serving low-income senior households in the Central Cameron County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional LIHTC units planned, and waiting lists reported at the two existing subsidized senior developments, there is likely an unmet need for additional affordable senior housing units in this Submarket.

East Cameron County
All Households
The analysis of income-qualified renter households in the East Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that nearly 20 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. With no planned or proposed affordable housing units in the submarket, there may be moderate demand for additional affordable housing serving the very lowest income households.

Senior Households
Demand from income-qualified senior renter households is similar to that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI, with senior households accounting for nearly 33 percent of the demand at the lowest income levels in the Submarket. With no identified subsidized units for seniors in the submarket and none planned, there is likely an unmet need for a small number of affordable senior housing units in this Submarket.

Summary and Conclusions

Housing Choice Voucher Information

Data on the percentage of tenants using Housing Choice Vouchers was available from 24 of the surveyed LIHTC properties in the McAllen-Edinburg-Mission MSA. The survey indicates that approximately 40.8 percent of tenants in LIHTC properties are using Housing Choice Vouchers. In the Brownsville-Harlingen MSA, managers at 24 of the surveyed LIHTC properties report that approximately 33.9 percent of tenants are using Housing Choice Vouchers.

McAllen-Edinburg-Mission, TX MSA

We surveyed 96 properties in the McAllen-Edinburg-Mission, TX MSA. The table below summarizes the overall vacancy rates at the surveyed LIHTC, market rate and subsidized properties in each Submarket for the MSA.

Overall Vacancy Rates in McAllen-Edinburg-Mission, TX MSA				
Submarket Number	**Submarket Name**	**LIHTC/ Subsidized Vacancy Rate**	**Market Vacancy Rate**	**Overall Vacancy Rate**
1	North Hidalgo County	N/A	N/A	N/A
2	West Hidalgo County	0.0%	12.2%	12.2%
3	West Central Hidalgo County	3.1%	4.0%	3.5%

LIHTC Housing Market

The following tables summarize the LIHTC housing market in all Submarkets of the McAllen-Edinburg-Mission, TX MSA.

Age of LIHTC Housing in McAllen-Edinburg-Mission, TX MSA		
Years	**Number of Units**	**Percent of Housing Stock**
2000-Present	2,664	84.1%
1990-1999	505	15.9%
1980-1989	0	0.0%
1970-1979	0	0.0%
1960-1969	0	0.0%
Total	**3,169**	**100%**

As the table above shows, the majority of the LIHTC rental housing in the MSA was built after 2000. There are no LIHTC units in the market that were built before 1990.

McAllen-Edinburg-Mission, TX MSA ALL LIHTC Unit Mix		
Unit Type	Total Units (Comps)	Percent (Comps)
Studio	0	0%
1 BR	291	10%
2 BR	1,277	46%
3 BR	1,149	41%
4 BR	57	2%
Total	**2,774**	**100%**

As the table above shows, two- and three-bedroom units dominate the LIHTC housing market in the McAllen-Edinburg-Mission, TX MSA. Of the 2,774 LIHTC units surveyed, 46 percent of the units are two-bedrooms and 41 percent of the units are three-bedrooms. The 2,774 surveyed LIHTC units represent 87.2 percent of the total 3,180 LIHTC units in the MSA.

McAllen-Edinburg-Mission, TX MSA All LIHTC Unit Size Comparison			
Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	500	750	652
2 BR	750	1,119	901
3 BR	1,000	1,250	1,132
4 BR	1,360	1,360	1,360

The table above summarizes the square footages of the LIHTC units in the McAllen-Edinburg-Mission, TX MSA. One-bedroom LIHTC units average 652 square feet, two-bedroom LIHTC units average 901 square feet, three-bedroom LIHTC units average 1,132 square feet and four-bedroom LIHTC units average 1,360 square feet.

McAllen-Edinburg-Mission, TX MSA All LIHTC Rents			
Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	$182	$499	$381
2 BR	$210	$600	$461
3 BR	$258	$700	$539
4 BR	$374	$627	$573

The table above summarizes the LIHTC rents at the surveyed LIHTC properties in the McAllen-Edinburg-Mission, TX MSA. One-bedroom LIHTC units in the MSA are charging an average rent of $381. Two-bedroom LIHTC units are charging an average rent of $461. Three-bedroom units are charging an average of $539 and four-bedroom units are charging an average of $573. On average, the LIHTC rents are significantly lower than the market rate rents in the MSA, giving the LIHTC units a significant rent advantage.

Market Rate Housing Market

The following tables summarize the market rate housing market in all Submarkets of the McAllen-Edinburg-Mission, TX MSA.

Age of Market Rate Housing in McAllen-Edinburg-Mission, TX MSA		
Years	**Number of Units**	**Percent of Housing Stock**
2000-Present	1,361	36.1%
1990-1999	824	21.8%
1980-1989	1,018	27.0%
1970-1979	572	15.2%
Total	**3,775**	**100%**

As the table above shows, the majority of the market rate rental housing in the MSA was built after 2000 and during the 1980s.

McAllen-Edinburg-Mission, TX MSA All Market Rate Unit Mix

1 BR	$350	$1,000	$575
2 BR	$425	$940	$645
3 BR	$525	$1,350	$863

Studio market rate units in the MSA are charging an average rent of $565 and one-bedroom market rate units in the MSA are charging an average rent of $575. Two-bedroom market rate units are charging an average rent of $645 and three-bedroom market rate units in the MSA are charging an average rent of $863. On average, the market rents in the MSA are significantly higher than the LIHTC rents.

Brownsville-Harlingen, TX MSA

We surveyed 68 properties in the Brownsville-Harlingen, TX MSA. The tables below summarize the overall vacancy rates at the surveyed LIHTC, market rate and subsidized properties in each Submarket for the MSA. As some of the LIHTC properties surveyed also operated with rental subsidies, we have combined the LIHTC and subsidized properties into the same analysis.

Overall Vacancy Rates in Brownsville-Harlingen, TX MSA				
Submarket Number	Submarket Name	LIHTC/ Subsidized Vacancy Rate	Market Vacancy Rate	Overall Vacancy Rate
1	West Cameron County	4.4%	5.9%	5.0%
2	South Cameron County	3.7%	2.3%	2.9%

1 BR	500	1,015	695
2 BR	655	1,300	999
3 BR	1,000	1,600	1,266
4 BR	1,989	1,989	1,989

The table above summarizes the square footages of the market rate units in the Brownsville-Harlingen, TX MSA. Studio market rate units average 522 square feet, one-bedroom market rate units average 695 square feet, two-bedroom market rate units average 999 square feet, three-bedroom market rate units average 1,266 square feet and four-bedroom market rate units average 1,989 square feet.

Brownsville-Harlingen, TX MSA All Market Rents			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
Studio	$360	$409	$385
1 BR	$300	$881	$500
2 BR	$411	$964	$607
3 BR	$502	$1,010	$678
4 BR	$650	$650	$650

Studio market rate units in the MSA are charging an average rent of $385 and one-bedroom market rate units in the MSA are charging an average rent of $500. Two-bedroom market rate units are charging an average rent of $607 and three-bedroom market rate units in the MSA are charging an average rent of $678. Four-bedroom market rate units in the MSA are charging an average rent of $650. It should be noted one surveyed property offers four-bedroom units. According to property managers in the MSA, and based on the lack of rental rate increases in the market, rents are kept artificially low to maintain higher occupancy levels.

MCALLEN-EDINBURG-MISSION, TX MSA
REGIONAL AND COMMUNUNITY CHARACTERISTICS,
CURRENT DEMOGRAPHIC DATA AND REGIONAL ECONOMY

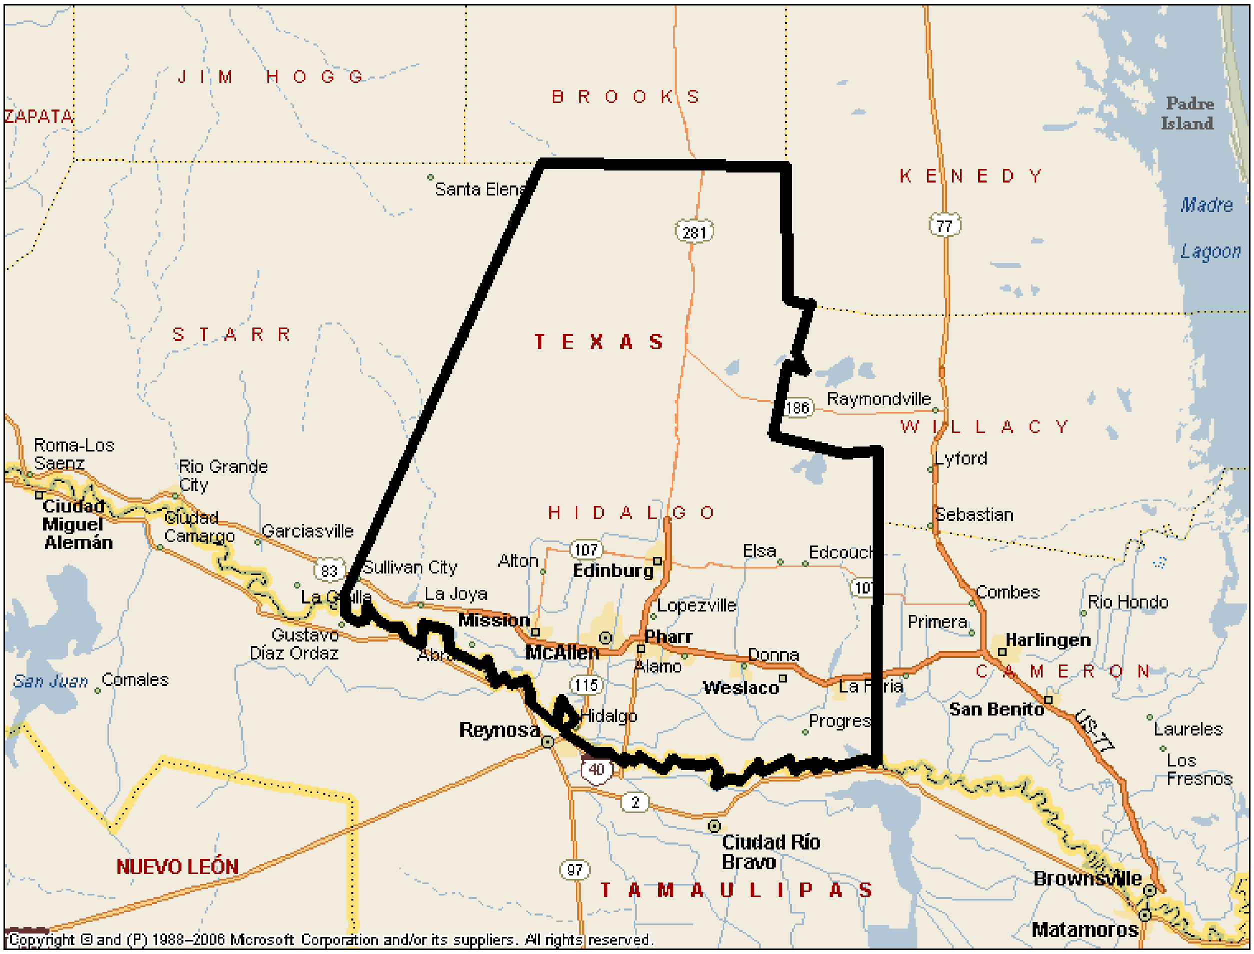
MCALLEN-EDINBURG-MISSION, TX MSA REGIONAL AND LOCAL AREA CHARACTERISTICS

INTRODUCTION

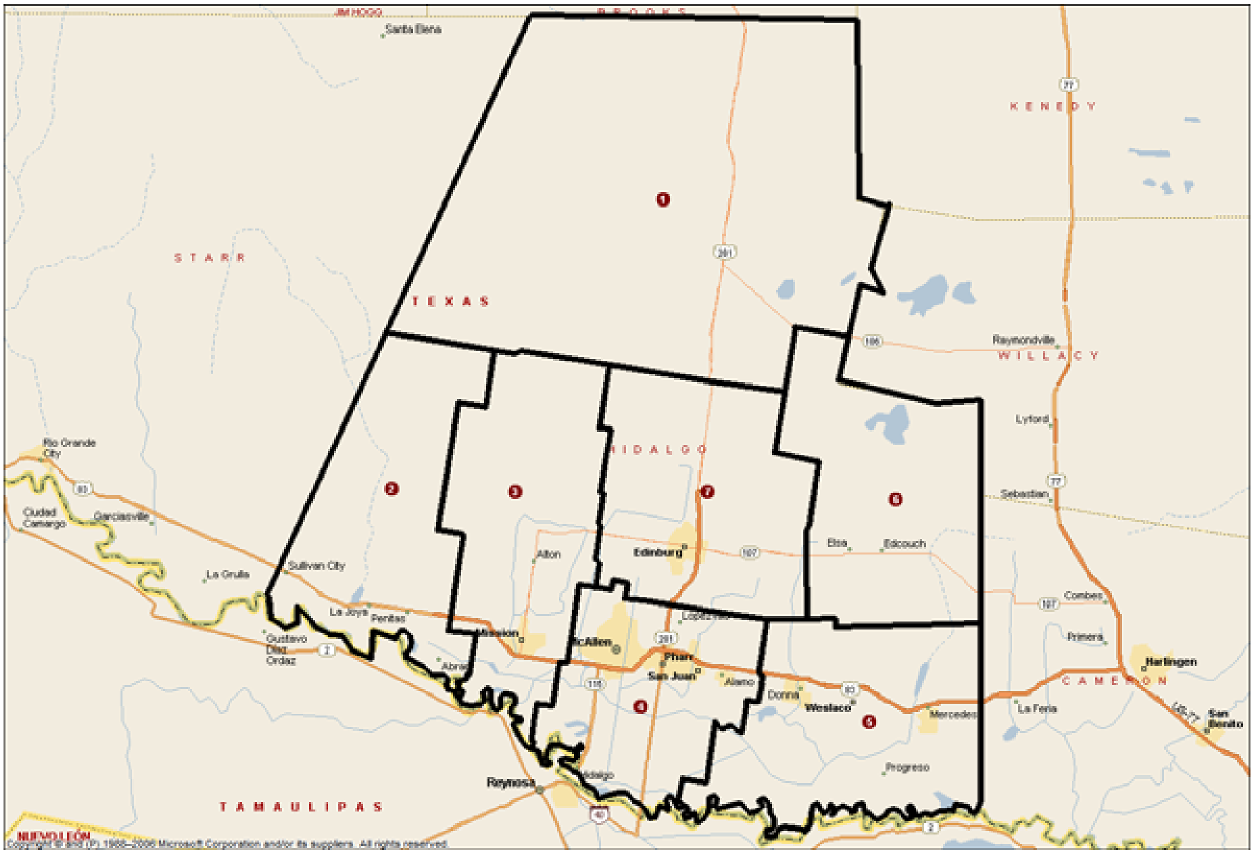
The following sections will project the estimated housing needs for the ensuing five-year period (2007-2012). The data is based on Novogradac and Company LLP research and analysis of ESRI Business Information Solutions and Census data as well as in-depth interviews with local market participants.

McAllen-Edinburg-Mission MSA

The primary market area is defined as the McAllen-Edinburg-Mission MSA, which is comprised entirely of Hidalgo County. This area was defined based on the client's specifications. The following map illustrates the boundaries of the PMA as defined above.



The following map shows the seven submarkets of the McAllen-Edinburg-Mission, TX MSA.



Submarket Number	Submarket Name
1	North Hidalgo County
2	West Hidalgo County
3	West Central Hidalgo County
4	South Central Hidalgo County
5	Southeast Hidalgo County
6	East Hidalgo County
7	Central Hidalgo County

Overview

The McAllen-Edinburg-Mission MSA is located in the Rio Grande Valley of south Texas, which is comprised of Hidalgo County and covers a land area of 1,570 square miles. Principal cities and towns in Hidalgo County include La Joya (estimated population 4,625), Sullivan City (4,407), Penitas (1,185), Mission (63,272), Alton (4,384), McAllen (126,411), Hidalgo (11,357), San Juan (32,319), Pharr (61,360), Lopezville (4,476), Edinburg (66,672), Alamo (16,287), Donna (16,449), Weslaco (32,092), Progreso (5,309), Mercedes (14,734), Elsa (6,608), and Edcouch (4,414) Hidalgo, Starr, and Willacy. The City of McAllen is in the geographic center the region.

ECONOMIC ANALYSIS

Previously an agriculture-based economy characterized by sporadic growth, the McAllen-Edinburg-Mission MSA's economy is currently experiencing a surge in development due primarily to growth in the international trade, retail trade, tourism, and manufacturing industries. A major international and domestic retail center, 40 of America's top 100 retailers reside in McAllen and approximately 80 of Fortune 500's global manufacturers have operations in the McAllen/Reynosa region, including AT&T, Bissel, Black & Decker, BMW, Delco, Drexel Meyer, Eaton, Emerson, GE, Johnson Controls, Nokia, R. R. Donnelley & Sons, Panasonic, Siemens, Sony, Symbol, TRW, West Bend and Whirlpool. Access to the U.S.-Mexico Border is a critical component to the stability of the McAllen-Edinburg-Mission MSA economy.

The City of McAllen has owned and operated the Hidalgo/Reynosa International Bridge, linking the Unites States and Mexico, since 1960. Typical two-way traffic volume consists of 26,000 vehicles (non-commercial transits) per day and over 10,000 pedestrians per day. The Pharr-Reynosa International Bridge, located four miles east of the Hidalgo/Reynosa crossing, has been open since January 1995 and two-way traffic is currently 13,694 cars and trucks per day. A third international bridge broke ground in June 2007 and is currently under construction. The Anzalduas International Crossing is the nation's newest crossing into northern Mexico and will be located just south of the City of McAllen in Hidalgo County. With the final federal approval processes completed by both the United States and Mexico, completion of the project is scheduled for June 2009. The Anzalduas International Crossing will connect the most efficient and modern distribution route between the United States, Mexico, and Canada, and has an estimated construction cost of $28,500,000.

Current economic indicators suggest that the MSA is experiencing the effects of the national economic downturn, despite recent years characterized by high growth in employment, wages, and population. According to the April 2008 Economic Pulse Report published by the McAllen Chamber of Commerce, The McAllen Economic Index (MEI) posted slight year-over-year negatives in March and April of 2008; March marks the first time a monthly index value has fallen below the same month the prior year in the history of the McAllen Economic Pulse. The McAllen metro area economy has slowed noticeably in recent months after peaking mid-year 2007. A number of year-over-year negatives conspired to push the April McAllen Economic Index down to 185.1, down from 185.2 in March, and 186.1 in February. The April 2008 index is 0.7 percent below the April 2007 MEI of 186.4.

General consumer activity in the metro area has slowed thus far in 2008 with inflation-adjusted retail sales down 3.7 percent in April 2008 compared to April of a year ago. The year-to-date retail total is about 2.5 percent lower as compared to the first four months of 2007. Metro area job growth continues at a moderate rate of approximately 2.5 percent, representing an estimated 5,300 jobs added over the last 12 months. The unemployment rate continues to decline, as well, and was 5.7 percent as of April 2008.

Auto sales have flattened, but are basically level for the year-to-date 2008; These numbers were very high in 2007 (the April '07 YTD total was over 20 percent higher than the YTD 2006 sales total). McAllen hotel/motel tax receipts are currently flat as well, but as previously mentioned, last year's numbers were high, so the economic contribution from travel and tourism remains high, but has leveled in recent months. Enplanements at McAllen International Airport indicate the same trends.

Construction activity has fallen off slightly in 2008; the value of all building permits issued was down about 25 percent in April (year-over-year), and down about 13 percent for the year-to-date. Homebuilding continues to sharply lower across the metro area with the number of new single-family residence permits down about 40 percent for the month and year-to-date. Sales of existing homes are up strongly; however; the number of closed sales in April was up nearly 34 percent compared to April of last year, and some 23 percent for the year-to-date. Prices have corrected slightly; however, the average sales prices is down about 10 percent.

RealtyTrac published a report dated July 25, 2008 in which it indicated that foreclosures nationwide increased 14 percent between first quarter 2008 and the second quarter of 2008. The report also shows that one in every 171 U.S. households received a foreclosure filing during this quarter. Overall, foreclosure activity in Texas was down six percent in July. According to the report, there were 182 properties in the McAllen-Edinburg-Mission MSA with foreclosure filings during second quarter 2008, which equates to one in every 1,318 homes in the MSA. This is well below the national average and indicates that the MSA may be less impacted than the nation as a whole by the ongoing mortgage crisis.

Major Employers

The following list is a list of the major employers in the McAllen-Edinburg-Mission MSA.

Rank	Company	Industry	Employees
1	Edinburg Consolidated I.S.D.	Education	3,600
2	McAllen I.S.D.	Education	3,595
3	Edinburg Regional Medical Center	Healthcare	3,000
4	University of Texas Pan American	Education	2,850
5	McAllen Medical Center	Healthcare	2,800
6	Hidalgo County	Government	2,211
7	Mission Consolidated I.S.D.	Education	2,140
8	City of McAllen	Government	1,801
9	Columbia Rio Grande Regional Hospital	Healthcare	975
10	South Texas Community College	Education	811

Source: McAllen Economic Development Corporation, Real Estate Center Market Overview 2007: July, 2008

Employment in the McAllen-Edinburg-Mission MSA is dominated by relatively stable industries and all ten of the major employers are in the education, healthcare, and government sectors. However, according to 2007 Employment by Industry demographics, retail trade and construction comprise approximately 24 percent of overall employment and are two of the top four industry sectors in the McAllen-Edinburg-Mission MSA. Retail trade and construction are typically more volatile sectors of the economy as compared to historically stable industries such as education, healthcare and government. Therefore, despite the lack of representation of these two principal industries in the major employers list, it is possible that the MSA will experience slowing growth due to the predominance of these two industries, despite other mitigating factors.

Employment Expansion/Contractions

According to the McAllen Chamber of Commerce, between January 1988 and March 2008, 250 new companies set up operations in McAllen and 326 in Reynosa for a total of 576 new facilities, resulting in the creation of over 120,000 new jobs in the region.

According to the McAllen Economic Development Corporation (MEDC), the construction of an automotive assembly plant is currently being proposed in McAllen in order to compete with the recent ground-breaking of a Chinese North American automotive assembly plant in Mexico. Further details were unavailable at this time.

According to the Reynosa Maquiladora and Manufacturers Association (RAMMAC), 28 new foreign firms are expected to begin operations in 2008 in the Northern Tamaulipas border, creating over 3,000 new jobs. Seventeen of these companies will build facilities and begin operations in the Reynosa area, while the other 11 firms will open plants in Rio Grande Valley communities like Mission, McAllen, Pharr and Edinburg, which are part of the McAllen-Edinburg-Mission MSA.

There are several new developments coming to the area. According to the 2008 Mission Border Business Guide, Vantage Luxury Hotel Condominiums will be a mid-rise, luxury hotel/condominium that will offer four- or five-star guest services. The project will be located in Mission. Ridge Commerce Center North at Sharyland is a 250,312 square foot Class A, industrial facility located in the 1,200 acre master-planned Sharyland Business Park. The proposed community will offer advantages to tenants such as its location and amenities. Sharyland Business Park is also directly adjacent to the Anzalduas International Crossing.

Employment Growth

The following table details historical employment and unemployment figures for the McAllen-Edinburg-Mission MSA from 1990 to May 2008.

EMPLOYMENT & UNEMPLOYMENT TRENDS

	McAllen-Edinburg-Mission MSA		McAllen-Edinburg-Mission MSA		USA
Year	Total Employment	% Change	Unemployment Rate	% Change	Unemployment Rate
1990	128,092	-	22.7%	-	5.7%
1991	129,524	1.1%	22.0%	-0.7%	6.9%
1992	133,803	3.3%	22.3%	0.3%	7.6%
1993	140,519	5.0%	20.6%	-1.7%	7.0%
1994	146,787	4.5%	19.9%	-0.7%	6.2%

* 2008 data is through May

Since 1990, total employment in the McAllen-Edinburg-Mission MSA has increased by almost 130,000 jobs. Additionally, over the past 18 years, La Joya has exhibited consistent positive growth. The unemployment rate has decreased 14 out of the last 18 years in Hidalgo County. This consistent growth is a strong indication of a sound economic base. However, 2006 exhibited the lowest employment growth in the past nine years, and this is likely a result of the national economic downturn. Though employment growth rebounded slightly in 2007, overall employment growth is currently in a period of moderation. As shown in the previous table, the unemployment rate in the MSA has decreased significantly since the 1990s and is currently at its lowest point on record. However, the unemployment rate remains higher in the MSA than the nation.

Employment by Industry

The table on the following table illustrates employment by industry for Hidalgo County in 2007.

2007 EMPLOYMENT BY INDUSTRY		
	Hidalgo County	
Occupation	Employed	Percent Employed
Agric/Forestry/Fishing/Hunting	5,955	2.54%
Mining	2,143	0.91%
Construction	25,549	10.90%
Manufacturing	13,071	5.58%
Wholesale Trade	9,652	4.12%
Retail Trade	30,163	12.87%
Transportation/Warehousing	9,335	3.98%
Utilities	1,438	0.61%
Information	2,704	1.15%
Finance/Insurance	5,917	2.53%
Real Estate/Rental/Leasing	3,399	1.45%
Prof/Scientific/Tech Services	6,868	2.93%
Mgmt of Companies/Enterprises	82	0.03%
Admin/Support/Waste Mgmt Srvcs	8,174	3.49%
Educational Services	36,869	15.73%
Health Care/Social Assistance	29,322	12.51%
Arts/Entertainment/Recreation	2,302	0.98%
Accommodation/Food Services	16,906	7.21%
Other Services (excl Publ Adm)	13,767	5.88%
Public Administration	10,715	4.57%
Total Employment	**234,331**	**100.0%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the MSA are the educational services, retail trade, healthcare/social assistance, and construction sectors. Approximately 52.0 percent of people in Hidalgo County work in these four industries. The health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing in the MSA.

As previously mentioned, the large number of people employed in the retail trade and construction industries could negatively impact employment in the MSA due to the current national economic downturn, which is affecting both of these sectors nationwide. However, as educational services and healthcare/social assistance are two historically stable sectors of the economy, the strong presence of these two industries should help mitigate losses in employment in other more volatile industries.

Colonias

One important component of the housing landscape in south Texas is the presence of the colonias. The Texas legislature has defined colonias as subdivisions lacking essential elements of infrastructure near the Mexico border. The United States Department of Housing and Urban Development (HUD) defines a colonia as an "unincorporated community located within 150 miles of the U.S.-Mexico border, with a population of less than 10,000 that is low and very low income, and which lacks safe, sanitary and sound housing, as well as services such as potable water, adequate sewage systems, drainage, streets and utilities." Data from the Federal Reserve Bank of Dallas Community Affairs Division indicates that Texas has the largest colonia population of any border states, with a 2007 estimated population of over 400,000 in nearly 2,300 colonias. According to data collected in 2006 by the Texas Legislature, Hidalgo County has the highest colonia population in the state, with 156,132 people in 934 colonias. Cameron County reports 178 colonias, with a population of 47,606. In an effort to improve the living situation of people in colonias, the Texas Legislature has authorized $175 million to fund roadway projects in the state's 23 border counties, which includes Hidalgo County and Cameron County. In addition, several state agencies, including TDHCA, have multiple initiatives in place to assist the residents of colonias.

Attempts by the government to collect demographic and socioeconomic data on colonias have been hampered by several issues, including language barriers and lack of resources to identify colonias. In the wake of the 2000 census, the Census Bureau completed ethnographic studies in four colonias in Texas, New Mexico and California to better identify the challenges in collecting data for this population. As a result, new guidelines defining Census Designated Places (CDPs) were issued in 2007 for use in the 2010 Census. New CDPs will be established for the 25 border counties in Texas, with much of the data regarding the location of colonias provided by the Texas State Attorney General's Office. It is anticipated that these efforts will allow the Census Bureau to survey colonias more accurately and, for the first time, provide detailed, searchable information regarding colonias populations.

Due to the limitations as discussed above, demographic data provided in this study may not fully reflect the estimated 203,000 people living in colonias in Hidalgo and Cameron Counties. Further, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand already accounted for through the analysis of Census data.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – MCALLEN-EDINBURG-MISSION MSA AND THE NATION

The following section provides an analysis of the demographic characteristics within the MSA. Data such as population, households and growth patterns are studied, to determine if the McAllen-Edinburg-Mission MSA is an area of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the MSA from 1990 through 2012.

Total Population		
Year	McAllen-Edinburg-Mission MSA	
	Number	Annual Change
1990	383,545	-
2000	569,463	4.85%
2007	732,166	3.94%
2012	865,301	3.64%
Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008		

The MSA is expected to grow at a slower rate from 2007 to 2012 compared to 2000 to 2007. However, the growth rate of the MSA from 2007 to 2012 is still very strong at 3.64 percent. The increase in the MSA growth rate is a positive indicator of the need for the affordable housing and is likely why so many individuals are employed in the construction sector in the PMA.

Households

The following table is a summary of the total households in the MSA from 1990 to 2012.

Total Number of Households		
Year	McAllen-Edinburg-Mission MSA	
	Number	Annual Change
1990	103,479	-
2000	156,824	5.16%
2007	205,804	4.31%
2012	244,775	3.79%
Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008		

Similar to the rate of population growth, the household growth rate in the MSA in 2007 was exceptionally strong, at 4.31 percent or larger. Although the growth rate is projected to decrease from 2007 through 2012, the rate of growth is still significant. As the number of households increases, there will be a larger pool of potential tenants, some of which will need affordable housing.

Average Household Size

The following table illustrates the average household size for the MSA from 2000 to 2012.

Average Household Size		
Year	McAllen-Edinburg-Mission MSA	
	Number	Annual Change
2000	3.60	-
2007	3.53	-0.27%
2012	3.51	-0.11%
Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008		

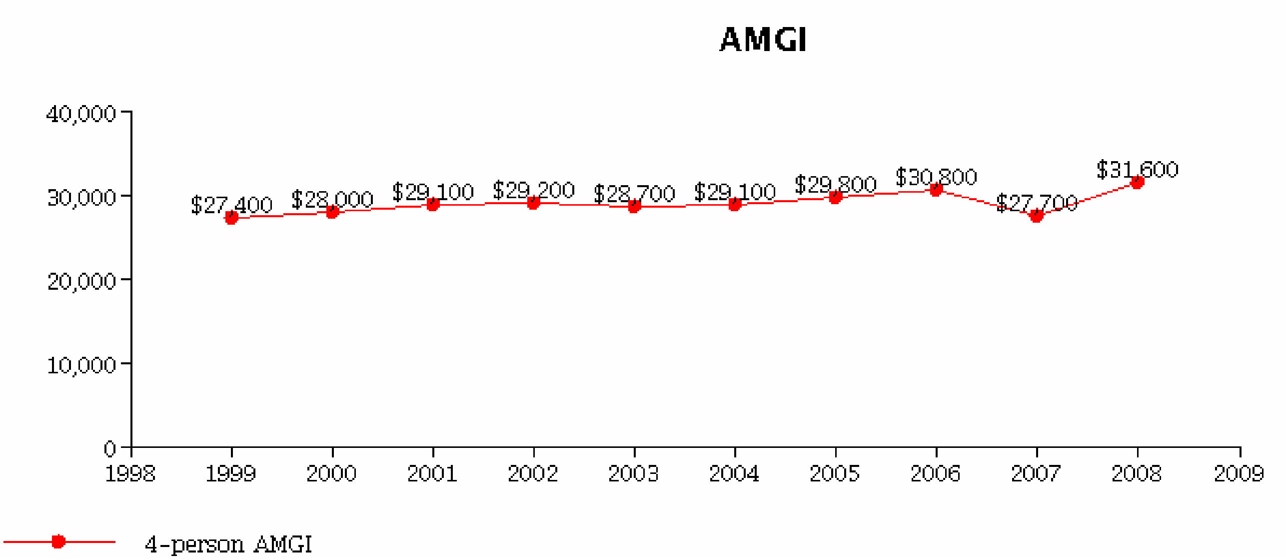
The average household size in the MSA is significantly larger than the national average size of 2.59 (not shown). The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the MSA.

Median Household Income Levels

The table below illustrates Median Household Income in the MSA.

Median Household Income		
Year	McAllen-Edinburg-Mission MSA	
	Number	Annual Change
2000	$24,843	-
2007	$30,519	3.15%
2012	$35,078	2.99%
Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008		

The median household income in the MSA is projected to grow at a slower rate from 2007 through 2012 than the previous seven years. The slower growth rate indicates an increasing need for affordable housing. It should be noted that for Section 42 LIHTC rent determination purposes, the area median income is used. The following chart illustrates the AMI level for a four-person household in the McAllen-Edinburg-Mission MSA.



The AMI has increased from 1999 to 2008 by approximately 13.3 percent, or an average of 1.6 percent annually. The AMI had one slight decrease in the AMGI from 1999 to 2006, followed by a large decrease from 2006 to 2007 and an increase again in 2008. The system and underlying data sources that HUD uses to establish income limits have changed, by shifting to data from the American Community Survey (ACS), which has replaced previous census reports. In 2007, two-thirds of the nation experienced flat or decreased AMI levels based largely on this methodology change. The overall rise in AMI levels indicates a healthy market where low-income households may be priced out by more affluent households.

Household Income

The following tables illustrate median household income in the MSA.

Household Income Distribution - McAllen-Edinburg-Mission MSA

Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage
<$10,000	35,778	17.4%	35,096	14.3%
$10,000-$14,999	16,023	7.8%	18,980	7.8%
$15,000-$19,999	18,277	8.9%	17,960	7.3%
$20,000-$24,999	16,249	7.9%	17,138	7.0%
$25,000-$29,999	14,856	7.2%	18,258	7.5%
$30,000-$34,999	14,483	7.0%	14,667	6.0%
$35,000-$39,999	11,537	5.6%	16,180	6.6%
$40,000-$44,999	11,210	5.4%	11,607	4.7%
$45,000-$49,999	7,584	3.7%	11,317	4.6%
$50,000-$59,999	15,755	7.7%	17,690	7.2%
$60,000-$74,999	15,188	7.4%	21,074	8.6%
$75,000-$99,999	12,488	6.1%	19,177	7.8%
$100,000-$124,999	7,409	3.6%	10,073	4.1%
$125,000-$149,999	3,767	1.8%	6,223	2.5%
$150,000-$199,999	2,290	1.1%	4,504	1.8%
$200,000-$249,999	1,246	0.6%	2,018	0.8%
$250,000-$499,999	1,370	0.7%	2,128	0.9%
$500,000+	294	0.1%	685	0.3%
Total	**205,804**	**100%**	**244,775**	**100%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 34.1 percent of the population in the MSA earned below $20,000 in 2007 and approximately 29.4 percent of the population in the MSA is projected to earn below $20,000 in 2012. In both instances, a significant portion of the population is projected to earn less than $20,000. This data provides strong support for affordable rental housing of all kinds in the MSA.

Tenure

The following table is a summary of the housing stock in the MSA.

TENURE PATTERNS MSA

Year	Owner-Occupied Units	Percentage Owner-Occupied	Renter-Occupied Units	Percentage Renter-Occupied
2000	114,580	73.06%	42,244	26.94%
2007	152,058	73.88%	53,746	26.12%
2012	180,420	73.71%	64,355	26.29%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Renter-occupied units made up approximately 26 percent of the total occupied units in the PMA in 2007. The percentage of renters is lower than the national average of approximately 33 percent (not shown). The low percentage of renters is likely due to the relatively undeveloped nature of large parts of the PMA.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 "5+ units" building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while "5+ units" building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008. The small percentage of multifamily permits issued indicates demand for multifamily housing of all kinds.

Conclusion

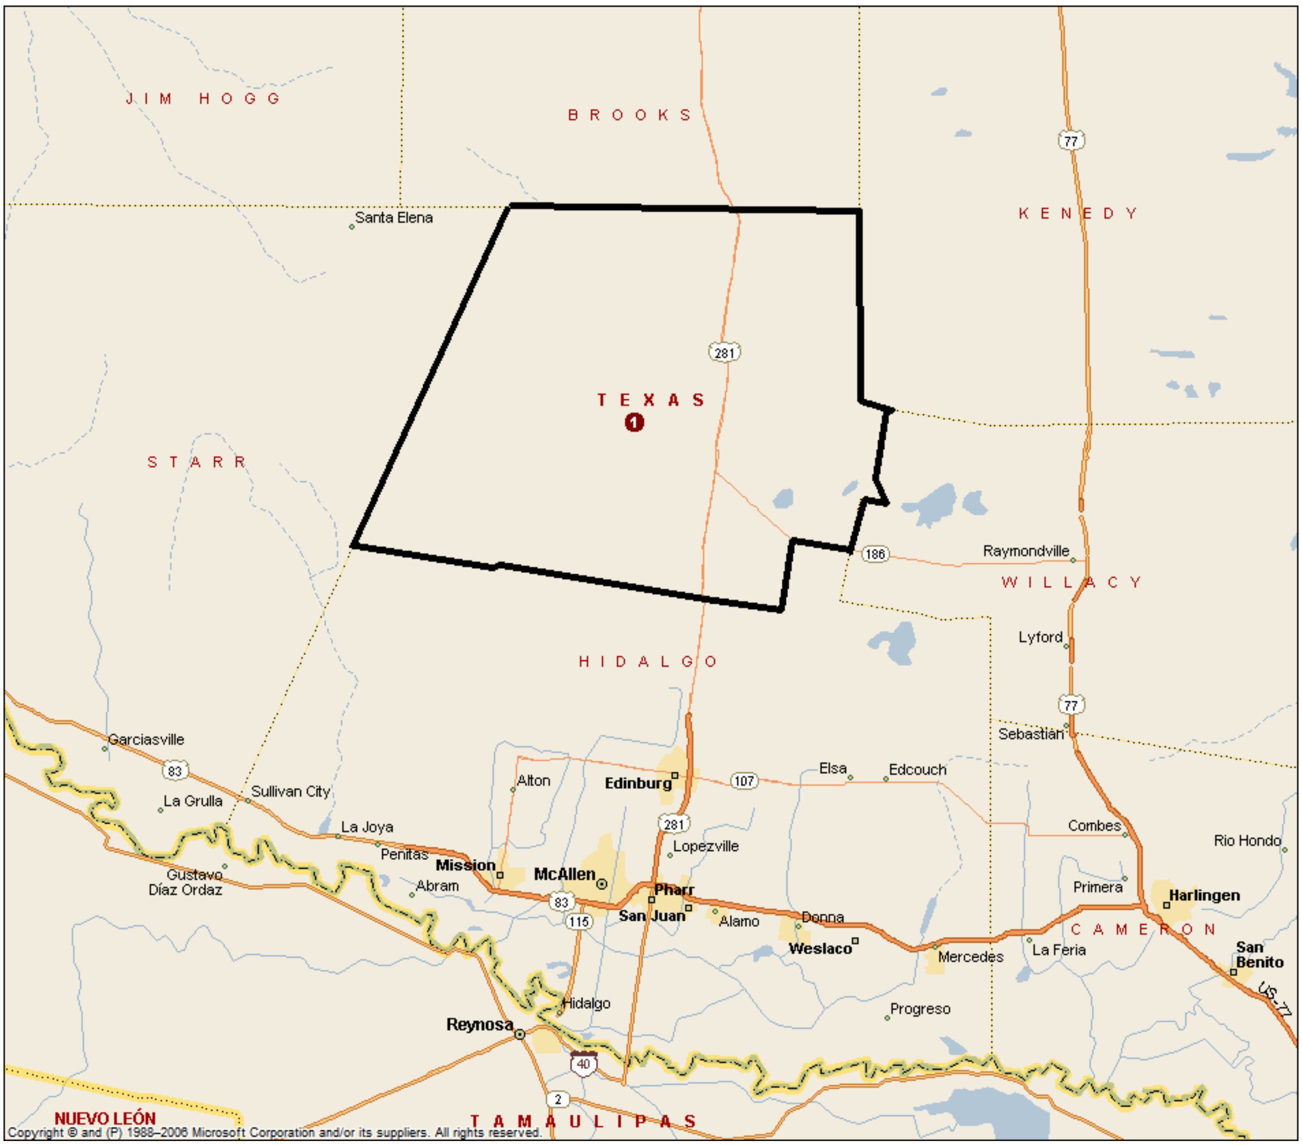
The MSA has demonstrated that it is an area of growth in terms of population, households, and income levels. The population and the number of households are both expected to increase from 2007 to 2012 at rates near or above 3.5 percent annually. The PMA has a larger average household size relative to the national average of 2.59, and a significant portion of its households earning below the AMI; furthermore, approximately 34.1 percent of the population in the MSA earned below $20,000 in 2007 and approximately 29.4 percent of the population in the MSA is projected to earn below $20,000 in 2012. These factors demonstrate a need for affordable housing of all kinds in the MSA.

1. NORTH HIDALGO COUNTY SUBMARKET ANALYSIS

NORTH HIDALGO COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The market area is defined as the North Hidalgo County Submarket, which is bounded to the north by the northern Hidalgo County line, to the east by the eastern Hidalgo County line, to the south by FM-490, and to the west by the western Hidalgo County line. This area was defined based on the client's specifications. The following map illustrates the boundaries of the Submarket as defined above.

North Hidalgo County Submarket Map



The North Hidalgo County Submarket is located in the undeveloped northernmost portion of Hidalgo County and includes the community of Linn/San Manuel. This Submarket is characterized primarily by rural and agricultural land and small sporadic ranching communities located a significant distance from locational amenities and essential services. The predominant form of housing in this Submarket is owner-occupied single-family homes in poor to good condition and 15 to 40 years in age.

Local Government

The North Hidalgo County Submarket includes the community of Linn/San Manuel. Linn/San Manuel, Texas is a Class U6 community or census designated place outside the boundaries of any neighboring incorporated cities in Hidalgo County. According to the U.S. Census, Linn is comprised of a land area of 48.6 square miles and had a population of 958 in 2000.

Employment by Industry

The following table illustrates employment by industry for the North Hidalgo County Submarket and McAllen-Edinburg-Mission MSA in 2007.

2007 EMPLOYMENT BY INDUSTRY				
	North Hidaldgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
Occupation	Number Employed	Percent Employed	Number Employed	Percent Employed

Total Employment	**580**	**100.0%**	**234,331**	**100.0%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the North Hidalgo County Submarket are the educational services, retail trade, construction and manufacturing sectors. Approximately 53.8 percent of people in Hidalgo County work in these four industries. The North Hidalgo County Submarket has a larger percentage of the workforce employed in the construction and manufacturing sectors and a smaller percentage of the workforce employed in the healthcare/social assistance sector, relative to the MSA. Although, educational services is typically a stable sector of the economy, industries such as retail trade, manufacturing, and construction, are particularly susceptible to fluctuations in the economy. Unlike the North Hidalgo County Submarket, the MSA benefits from the presence of another historically stable industry, healthcare/social assistance, in the top four employment sectors. The large number of people employed in the retail trade, construction, and manufacturing industries could negatively affect employment in the Submarket, due to the current national economic downturn. However, the presence of the educational services industry should help promote economic stability.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create demand for affordable rental housing.

Commute Patterns in the North Hidalgo County Submarket

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	47
5-9 min	76
10-14 min	20
15-19 min	53
20-24 min	35
25-29 min	16
30-34 min	62
35-39 min	7
40-44 min	6
45-59 min	77
60-89 min	18
90+ min	6
Average Travel Time	24.5 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The average travel time to work in the Submarket is the second-longest of the seven MSA submarkets. This is primarily due to the rural nature of most of the Submarket. There are very few employment centers and many workers are likely commuting to jobs in Edinburg, the closest large employment center proximate to the Submarket.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the North Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA. Data such as population, households and growth patterns are studied, to determine if the McAllen-Edinburg-Mission MSA and the North Hidalgo County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the North Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA from 1990 through 2012.

Total Population

Year	North Hidaldgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	1,235	-	383,545	-
2000	1,606	3.00%	569,463	4.85%
2007	2,020	3.56%	732,166	3.94%
2012	2,361	3.38%	865,301	3.64%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Growth in the Submarket has been slightly slower than growth in the MSA in all years of analysis. This is likely due to the rural nature of the North Hidalgo County Submarket. The majority of population growth in the MSA is located near the U.S. – Mexico border. However, both the Submarket and the MSA are showing strong growth from 2007 through 2012, although at a slower rate than from 2000 through 2007. The strong growth in the Submarket and the MSA is a positive indicator of the need for all forms of housing.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990, 2000, 2007 and 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages not shown).

Population by Age Group				
North Hidaldgo County Submarket				
Age Cohort	1990	2000	2007	2012
0-4	93	118	167	204
5-9	120	142	142	181
10-14	126	114	182	170

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	North Hidaldgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	354	-	103,479	-
2000	546	5.42%	156,824	5.15%
2007	714	4.24%	205,804	4.31%
2012	846	3.70%	244,775	3.79%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been exceptionally strong, at 4.24 percent or larger through 2007. Overall household growth in both the Submarket and MSA is expected to slow slightly from 2007 through 2012, though remain strong at 3.70 percent or higher. As the number of households increases, there will be a larger pool of potential tenants, some of which will need affordable housing.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	North Hidaldgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	2.88	-	3.60	-
2007	2.77	-0.53%	3.53	-0.27%
2012	2.74	-0.22%	3.51	-0.11%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly smaller than the MSA, but both are larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket, and the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	North Hidaldgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	$23,683	-	$24,843	-
2007	$28,945	3.06%	$30,519	3.15%
2012	$32,754	2.63%	$35,078	2.99%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 5.2 percent lower than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a slower rate from 2007 through 2012 than the previous seven years, as in the MSA. The Submarket's and MSA's median household incomes are 54.5 and 57.4 percent of the national average (not shown). The lower median income level indicates increasing need for affordable housing. It should be noted that for Section 42 LIHTC rent determination purposes, the area median income is used.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - North Hidalgo County Submarket				
Income Cohort	2007		2012

Total	**205,804**	**100%**	**244,775**	**100%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 33.7 percent of the population in the Submarket and 34.1 percent of the population in the MSA earned below $20,000 in 2007, with the largest percentage earning between zero dollars and $10,000. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 28.2 percent and 29.47 percent, respectively. This data provides strong support for affordable rental housing of all kinds in the Submarket and MSA.

Tenure

The following table is a summary of the tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Total Population						
	North Hidaldgo County Submarket		McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage
2000	470	86.1%	114,580	73.1%	42,244	26.9%
2007	617	86.4%	152,058	73.9%	53,746	26.1%
2012	729	86.2%	180,420	73.7%	64,355	26.3%

As the above tables illustrate, the housing market in the North Hidalgo County Submarket is dominated by owner-occupied units. The Submarket has a significantly smaller percentage of renter-occupied units when compared to the MSA. The small percentage of renter-occupied households is not unusual in rural markets, where owner-occupied housing is predominant among a small population. Additionally, no multifamily rental housing options were identified in the Submarket. It is likely that the renter-occupied units are comprised primarily of for-rent single-family homes and trailers.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. For the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	North Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	268	-	63,856	-
2000	501	8.7%	90,763	4.2%
2007	596	3.6%	116,831	4.0%
2012	668	2.4%	149,302	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Senior population growth in the North Hidalgo County Submarket increased significantly between 1990 and 2000, whereas senior population growth in the MSA grew at approximately half the rate exhibited by the Submarket, for the same time period. The senior population in both the Submarket and the MSA is expected to grow substantially from 2007 through 2012. The senior population growth rate in the MSA in 2012 is projected to be nearly double the growth rate in the North Hidalgo County Submarket.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the PMA from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	North Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	288	-	52,073	-
2007	357	3.3%	67,113	4.0%
2012	421	3.6%	85,658	5.5%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth is projected to increase through 2012. However, total household growth rates are expected to decrease, whereas senior household growth rates are expected to increase. The strong projected growth in senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME						
Year	McAllen-Edinburg-Mission, TX MSA		North Hidalgo County Submarket		USA	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
		All Ages				
2007	$30,519	-	$28,945	-	$53,154	-
2012	$35,078	2.59%	$32,754	2.32%	$62,503	3.52%
		Age 55+				
2007	$27,687	-	$23,659	-	$32,710	-
2012	$32,712	3.07%	$26,508	2.14%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP; July, 2008

As the previous table illustrates, the median senior household incomes in all three areas of analysis are well below those of all households. Of the three areas of analysis, the median senior household income is lowest in the Submarket and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The Submarket will experience slightly weaker median household income growth for all households and senior households when compared to the MSA, and the nation.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - North Hidalgo County Submarket (Age 55+)				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage

Total	**67,113**	**100%**	**85,658**	**100%**

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $36,100. The Submarket has the largest percentage of seniors earning less than $35,000 annually. Approximately 70 percent of those 55 and older in the Submarket are earning under $35,000 per year. This is attributed primarily to the Submarket's high percentage of senior households earning below $15,000 annually and the rural nature of the Submarket. The Submarket features significantly more senior households in these income brackets when compared to the MSA. By 2012, all areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 64.3 and 50.3 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. These factors indicate that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	North Hidalgo County Submarket				McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	266	92.4%	22	7.6%	43,784	84.1%	8,289	15.9%
2007	330	92.4%	27	7.6%	56,430	84.1%	10,683	15.9%
2012	389	92.4%	32	7.6%	72,023	84.1%	13,635	15.9%

Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008

As the above table illustrates, the senior housing market is dominated by owner-occupied units. The Submarket and MSA have a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above). The small percentage of renter-occupied senior households is not unusual in rural submarkets, where owner-occupied housing is predominant among a small population.

Senior Demographic Conclusion

Although the median senior household income for the Submarket is projected to increase from 2007 to 2012, growth in the national and MSA's median senior household income is projected to outpace growth in the Submarket. Both the MSA and PMA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $36,100. Approximately 70 percent of those 65 and older in the Submarket are earning under $35,000 per year. This is attributable primarily to the PMA's high percentage of senior households earning below $15,000 annually and the rural nature of the Submarket. The Submarket features significantly more senior households in these income brackets when compared to the MSA and national averages. The national average of senior households earning below $50,000 annually is 64 percent.

LOCAL MARKET INFORMATION

North Hidalgo County Submarket
The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare
There are no general practitioners, hospitals or urgent care clinics located in the North Hidalgo County Submarket. The primary major medical provider within proximity to the North Hidalgo County Submarket is the South Texas Health System, with seven facilities including Cornerstone Regional Hospital, Edinburg Children's Hospital, Edinburg Regional Medical Center, Edinburg Regional Rehabilitation Center, McAllen Heart Hospital, McAllen Medical Center, and South Texas Behavioral Health Center. The Edinburg Regional Medical Center is the nearest hospital to the Submarket, located approximately 30 to 40 miles south of the Submarket in Edinburg, Texas.

Transportation
The South Texas International Airport at Edinburg and McAllen Miller International Airport are located approximately 30 and 40 miles south of the North Hidalgo County Submarket, respectively. The South Texas International Airport at Edinburg is a public-use airport located approximately nine miles north of the Central Business District of Edinburg. The airport is owned and operated by the City of Edinburg and averaged 13 general aviation aircraft operations per day in 2005. The McAllen Miller International Airport (MFE) is the primary business airport of the Rio Grande Valley and provides non-stop flights to Dallas-Fort Worth, Houston, and Las Vegas via American Airlines, Continental Airlines, and Allegiant Air.

Highway access to Northern Hidalgo County Submarket can be accomplished via U.S. Highway 281. U.S. Highway 281 runs north/south from McAllen, Texas to Wichita Falls, Texas.

Education
There are no identifiable education service providers in the majority of the North Hidalgo County Submarket. The nearest Independent School Districts are the Edinburg Independent School District and McAllen Independent School District. The Edinburg Independent School District includes three high schools, four middle schools, and 27 elementary schools. The McAllen Independent School District includes three high schools, seven middle schools, and twenty elementary schools. The nearest universities are also located Edinburg and McAllen, approximately 30 to 40 miles south of the North Hidalgo County Submarket. The University of Texas Pan American in Edinburg, Texas, with 17,337 students, including 2,261 graduate students, is the tenth largest university in the state and the fifth largest in the UT system and offers 54 bachelor's degree programs, 50 master's, and two doctoral programs. McAllen offers five major colleges/universities including the San Antonio College of Medical and Dental Assistants, South Texas Community College, South Texas Vocational Technical Institute, and the University of Cosmetology Arts and Sciences.

Public Transportation
The North Hidalgo County Submarket does not offer public transportation.

Employment Centers

There are a limited number of employment centers in the North Hidalgo County Submarket. The majority of employment centers are located in Edinburg and McAllen, approximately 30 to 40 miles south of the Submarket. The largest Employer's in the McAllen-Mission-Edinburg MSA include the following:

Rank	Company	Industry	Employees
1	Edinburg Consolidated I.S.D.	Education	3,600
2	McAllen I.S.D.	Education	3,595
3	Edinburg Regional Medical Center	Healthcare	3,000
4	University of Texas Pan American	Education	2,850
5	McAllen Medical Center	Healthcare	2,800
6	Hidalgo County	Government	2,211
7	Mission Consolidated I.S.D.	Education	2,140
8	City of McAllen	Government	1,801
9	Columbia Rio Grande Regional Hospital	Healthcare	975
10	South Texas Community College	Education	811

Employment in the McAllen-Edinburg-Mission MSA is dominated by relatively stable industries, and all ten of the major employers are in the education, healthcare, and government sectors. However, according to 2007 employment by industry demographics, retail trade, construction, and manufacturing comprise approximately 35.8 percent of overall employment and are three of the top four industry sectors in the Submarket. Retail trade, construction, and manufacturing are typically more volatile sectors of the economy as compared to historically stable industries such as education and healthcare, which make up approximately 25.3 percent of employment in the Submarket. Therefore, due to the high concentration of retail trade, construction, and manufacturing industries in the Submarket, it is possible that the Submarket will experience slowing growth due to the predominance of these three industries, in conjunction with current economic conditions.

Identifiable employers within the Submarket and north of Edinburg include La Haciendas Ranch, San Vicente Ranch, Mundos Ranch, Stag Holding Limited, a United States Post Office, Donna's Place Restaurant, McCook Trading Post and Gas Station, Tropical Texas Behavioral Health Center, 4 E Hotel, Papouli's Greek Restaurant, and Homer's Food Store.

Proximity to Local Services

There are a limited number of locational amenities in the North Hidalgo County Submarket. The majority of locational amenities are located outside of the Submarket in Edinburg and McAllen, Texas south of the North Hidalgo County Submarket.

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (71.44 percent) in the North Hidalgo County Submarket was constructed from 1980 through 1998. The Submarket consists primarily of rural, undeveloped land with sporadic single-family housing. There were no identifiable multifamily developments in the Submarket. Based upon observations in the field, single-family housing in the Submarket typically ranges from poor to good condition and is 15 to 40 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 "5+ units" building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while "5+ units" building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008.

Interviews

The Housing Authority of the County of Hidalgo currently has jurisdiction over all un-incorporated areas of Hidalgo County, such as the North Hidalgo County Submarket.

Housing Authority of County of Hidalgo

The Housing Authority of the County of Hidalgo was established in 1948 in order to serve the local farmworking families and migrant farmworkers in the region. The Housing Authority of the County of Hidalgo currently administers Farm Labor Housing units and Public Housing units in Hidalgo County, as well as Section 8 Vouchers. According to Adela Montes, Deputy Director for the Housing Authority of the County of Hidalgo, there are currently 535 Farm Labor Housing units in two developments and 55 Public Housing units in two developments in Hidalgo County, excluding the City of McAllen. None of these developments is located in the North Hidalgo County Submarket. There are approximately 8,592 Housing Choice Vouchers budgeted for Hidalgo County and all are currently in use. Waiting Lists for Public Housing and Farm Labor Housing are currently open while the waiting list for Housing Choice Vouchers is closed. There are approximately 896 households on the waiting list for Housing Choice Vouchers. Of the 896 households, 162 are elderly households. There is no separate waiting list for special needs households in the Housing Choice Voucher Program. Currently, there are 104 elderly households participating in the Housing Choice Voucher Program in Hidalgo County. The number of households on the waiting list for Public Housing and Farm Labor Housing can be found below:

FARM LABOR HOUSING WAITING LIST – HIDALGO COUNTY

Name	1BR	2BR	3BR	4BR	Total
Northside Apartments	14HH	11HH	2HH	0HH	27HH
Memorial Apartments	N/A	N/A	N/A	N/A	46HH

Villa San Juanita Rutledge	N/A	N/A	15HH	24HH	39HH

The current payment standards for one-, two-, three-, and four-bedroom units are listed below. According to Adela Montes, the payment standards are 100 percent of the Fair Market Rents.

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

Planning/Development
There are currently no planning or development departments/agencies in operation in the North Hidalgo County Submarket. To our knowledge, there are no commercial or residential projects in the planning stages or under construction in the North Hidalgo County Submarket. The only census designated place/community in the North Hidalgo County Submarket is Linn/San Manuel, which does not currently maintain an economic development department or chamber of commerce.

LIHTC Family Supply
We attempted to identify all existing, proposed, and under construction family LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers. There were no identifiable family LIHTC properties in the North Hidalgo County Submarket. Based on the lack of available data, we did not complete a LIHTC family market analysis. There are no proposed or under construction family LIHTC properties in the North Hidalgo County Submarket.

LIHTC Senior Supply
We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers. There were no identifiable senior LIHTC properties in the North Hidalgo County Submarket. Based on the lack of available data, we did not complete a LIHTC senior market analysis. There are no proposed or under construction senior LIHTC properties in the North Hidalgo County Submarket.

Market Rate Family Supply
We attempted to identify all existing, proposed, and under construction family-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable family oriented market rate properties in the North Hidalgo County Submarket. Based on the lack of available data, we did not complete a market rate family market analysis. There are no proposed or under construction family-targeted market rate properties in the North Hidalgo County Submarket.

Market Rate Senior Supply
We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable senior market rate properties in the North Hidalgo County Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis. There are no proposed or under construction market rate properties in the North Hidalgo County Submarket.

Subsidized Family Supply

We attempted to identify all existing, proposed, and under construction family-oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials. There were no identifiable family subsidized properties in the North Hidalgo County Submarket. Based on the lack of available data, we did not complete a subsidized family market analysis. There are no proposed or under construction subsidized family properties in the North Hidalgo County Submarket.

Subsidized Family Senior

We attempted to identify all existing, proposed, and under construction senior-oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials. There were no identifiable senior subsidized properties in the North Hidalgo County Submarket. Based on the lack of available data, we did not complete a subsidized senior market analysis. There are no proposed or under construction subsidized senior properties in the North Hidalgo County Submarket.

It should be noted that while we were unable to identify any multifamily rental housing in the submarket, demographic data shows that there are 97 renter households in the submarket. These households may be living in single-family homes, mobile homes, etc.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the North Hidalgo County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the North Hidalgo County Submarket in 2007 is 714 and the total number of households in 2012 is projected to be 846. The total number of households age 55 and older in the Submarket for 2007 is 357, with a 2012 projection of 421 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 13.6 percent of the occupied housing unit households in the North Hidalgo County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 7.6 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a

one-person household in the income range between 31 percent and 40 percent of AMI. A minimum income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the North Hidalgo County Submarket (McAllen-Edinburg-Mission, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*	
1 Person	$0	$9,150	$9,150	$12,200	$12,200	$15,250	$15,250	$18,300	$18,300	$24,400	$24,400	$30,500
2 Person	$0	$10,500	$10,500	$13,960	$13,960	$17,450	$17,450	$20,940	$20,940	$27,920	$27,920	$34,900
3 Person	$0	$11,800	$11,800	$15,680	$15,680	$19,600	$19,600	$23,520	$23,520	$31,360	$31,360	$39,200
4 Person	$0	$13,100	$13,100	$17,440	$17,440	$21,800	$21,800	$26,160	$26,160	$34,880	$34,880	$43,600
5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households
Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the North Hidalgo County Submarket, Census 2000 data indicates that statistically there are no rent-overburdened households. Therefore, we have used zero percent for this calculation.

Substandard Housing
Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 6.0 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing
A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the North Hidalgo County Submarket, it is estimated that 9.4 percent of households are living in overcrowded units.

Movership or Turnover Rate
There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. There were no identifiable rental properties located in the North Hidalgo Submarket. Therefore, for the purpose of this analysis, we have used the Hidalgo County average family LIHTC turnover rate of 27.8 percent. With so few senior LIHTC properties able to provide turnover data in the MSA, we have used the average senior subsidized turnover rate of 6.5 percent.

Unstabilized Rental Units - Existing and Proposed
To our knowledge, there are no proposed or under construction properties of any type in the North Hidalgo County Submarket. With no identified proposed developments in the North Hidalgo County Submarket, no units were deducted from the either the family or senior demand analysis.

Annual Income-Qualified Renter Demand
Provided below are calculations of the total number of existing income-qualified renter households in the North Hidalgo County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Household Size	Total Renters - Baseline Year (2007)	Income-Qualified Renters - Baseline Year (2007)

Demand Analysis Conclusions

All Households

The North Hidalgo County Submarket reports only 97 renter households, of which 73 earn below 100 percent of AMI. Over half of these renter households are earning below 40 percent of AMI. The analysis of income-qualified renter households in the Submarket indicates that, when turnover is factored in, there may be a need for 20 units of affordable housing targeting households earning less than 40 percent of AMI. With no identifiable rental developments in the Submarket, many of these households may be living in single-family rental houses, mobile homes, or in units that are older and possibly functionally obsolete. In addition, there may be some pent-up demand from owner households looking to improve their current housing situation.

Senior Households

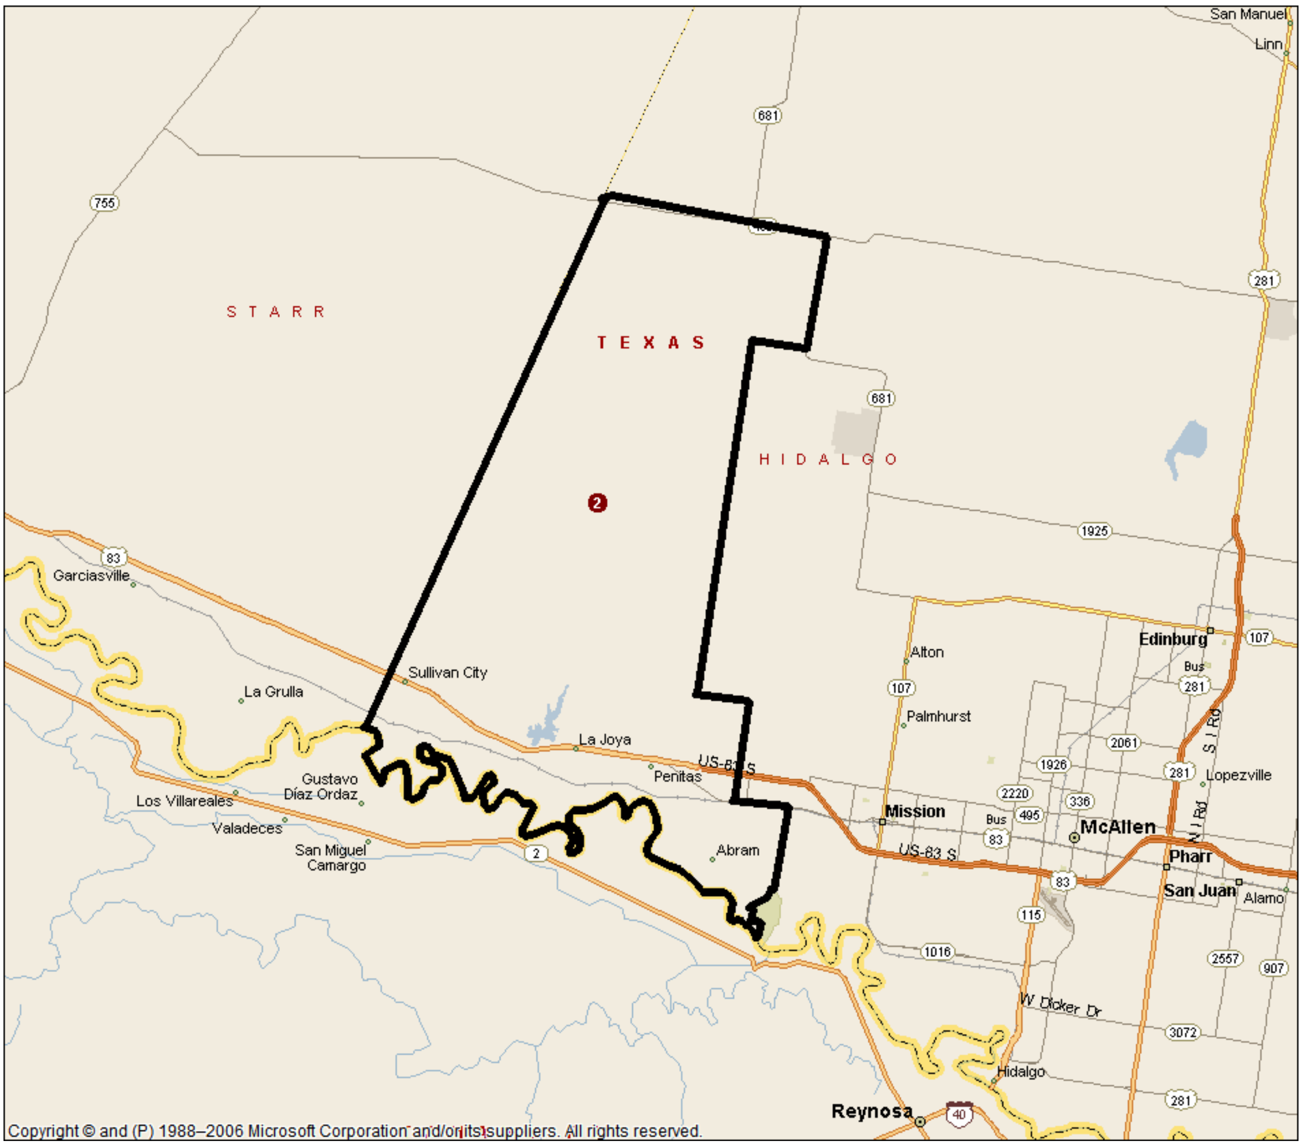
According to the analysis of income-qualified renter households presented here, there is no quantifiable demand for affordable units targeting seniors in the North Hidalgo County Submarket. However, as with the analysis of all households, there may be some pent-up demand from senior homeowners looking transition from homeownership to lower maintenance rental housing.

2. WEST HIDALGO COUNTY SUBMARKET ANALYSIS

WEST HIDALGO COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The market area is defined as the West Hidalgo County Submarket, which is bounded to the north by State Highway 490; to the east by State Highway 681 Mile 14 Road/State Highway 2058, Iowa Avenue, Buddy Owens Avenue, North Abram Road, U.S. Highway 83 (Business) and Bentsen State Park Road 43; to the south by the Texas-Mexico border; and to the west by the western Hidalgo County line. The following map illustrates the boundaries of the Submarket as defined above.

West Hidalgo County Submarket Map



The West Hidalgo County Submarket includes the communities/cities of Sullivan City, La Joya, Penitas and Abram. This Submarket is characterized primarily by vacant rural and agricultural land and small communities proximate to limited locational amenities and essential services. The land area in this Submarket is approximately 25 percent developed. The predominant form of housing in this Submarket is owner-occupied single-family homes in poor to excellent condition and 30 to less than five years in age. There is limited multifamily development in fair to good condition and 20 to five years in age. Development is located along U.S. Highway 83, which is the area's primary thoroughfare, in the City of La Joya and dissipates slowly in each direction.

Local Government

As previously mentioned, the West Hidalgo County Submarket includes the communities/cities of Sullivan City, La Joya, Penitas and Abram.

La Joya, Texas is a city in Hidalgo County and was formally incorporated under Type C-General Law Government, with an elected Mayor and two Commissioners. According to the U.S. Census, La Joya is comprised of a land area of 2.78 square miles and had a 2000 population of 3,303 and an estimated 2006 population of 4,625.

Sullivan City, Texas is a city in Hidalgo County and was formally incorporated in 1997. Sullivan City operates under a Mayor-Commissioner form of government with two elected Commissioners. According to the U.S. Census, Sullivan City is comprised of a land area of 3.58 square miles and had a 2000 population of 3,998 and an estimated 2006 population of 4,407.

Penitas, Texas is a city in Hidalgo County and is a Type A General Law City Type of Government, with a Mayor & 5 Aldermen. Penitas was formally incorporated in 1992. According to the U.S. Census, Penitas is comprised of a land area of 2.78 square miles and had a 2000 population of 1,167 and an estimated 2006 population of 1,185.

Abram, Texas is a community in un-incorporated Hidalgo County. According to the U.S. Census, Abram is comprised of a land area of 2.78 square miles and had a 2000 population of 5,444.

Employment by Industry

The following table illustrates employment by industry for the West Hidalgo County Submarket and McAllen-Edinburg-Mission MSA in 2007.

2007 EMPLOYMENT BY INDUSTRY				
	West Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the West Hidalgo County Submarket are the construction, educational services, health care/social assistance and retail trade sectors. Approximately 55.8 percent of people in West Hidalgo County work in these four industries. The West Hidalgo County Submarket has a larger number of persons employed in the construction and educational services sectors and a smaller number of people employed in the healthcare/social assistance and retail trade sectors, relative to the MSA. Although, educational services and health care/social services are typically stable sectors of the economy, industries such as retail trade and construction are particularly susceptible to fluctuations in the health of the economy. The large number of people employed in the retail trade and construction industries could negatively impact employment in the Submarket due to the current national economic downturn. However, the strong presence of the educational services and health care/social assistance industries should help promote economic stability.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing.

Commute Patterns in the West Hidalgo County Submarket
The table below summarizes commute times for the West Hidalgo County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	235
5-9 min	893
10-14 min	611
15-19 min	694
20-24 min	800
25-29 min	337
30-34 min	1,114
35-39 min	92
40-44 min	184
45-59 min	271
60-89 min	131
90+ min	173
Average Travel Time	25.8 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The West Hidalgo County Submarket has the longest average commute time of the seven Submarkets, with the largest share of workers reporting a daily commute of 30 to 34 minutes. This Submarket is mostly characterized as a rural area. The nearest major employment centers are in Mission and McAllen.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the West Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA. Data such as population, households and growth patterns are studied, to determine if the McAllen-Edinburg-Mission MSA and the West Hidalgo County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the West Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA from 1990 through 2012.

Total Population				
Year	West Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	12,352	-	383,545	-
2000	22,054	7.85%	569,463	4.85%
2007	26,404	2.72%	732,166	3.94%
2012	30,413	3.04%	865,301	3.64%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The Submarket showed exceptional growth from 1990 through 2000; however, growth rates in both areas of analysis are expected to slow through 2012. Growth in the Submarket is projected to be slightly slower than growth in the MSA from 2007 through 2012. However, growth rates will be over three percent, which is considered strong growth. The strong growth in the Submarket and the MSA is a positive indicator of the need for all forms of housing and likely why so many individuals are employed in the construction sector in the Submarket.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990 through 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group				
West Hidalgo County Submarket

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	West Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	3,147	-	103,479	-
2000	5,947	8.90%	156,824	-
2007	7,304	3.15%	205,804	4.31%
2012	8,471	3.20%	244,775	3.79%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been strong through 2007; however, household growth in the Submarket slowed significantly from 2000 to 2007. Household growth in the MSA is expected to slow slightly from 2007 through 2012, while household growth in the Submarket is expected to increase slightly over the same period. As the number of households increases, there will be a larger pool of potential tenants, some of which will need affordable housing.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	West Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.71	-	3.60	-
2007	3.61	-0.37%	3.53	-0.27%
2012	3.59	-0.11%	3.51	-0.11%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly larger than the MSA, and both are significantly larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket, and the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	West Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	20,230	-	24,843	-
2007	24,536	2.94%	30,519	3.15%
2012	27,828	2.68%	35,078	2.99%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 19.6 percent lower than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a slower rate from 2007 through 2012 than the previous seven years, as in the MSA. The area median income's for the Submarket and MSA are approximately 46.2 and 57.4 percent of the national average. The lower median income level indicates increasing need for affordable housing.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - West Hidalgo County Submarket				
Income Cohort	2007		2012

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 42.2 percent of the population in the Submarket and 34.1 percent of the population in the MSA earned below $20,000 in 2007, with the largest percentage earning between zero dollars and $10,000. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 36.8 percent and 29.4 percent, respectively, but in both instances, a significant portion of the population are projected to earn less than $20,000. This data provides strong support for affordable rental housing of all kinds in the Submarket and MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents to be over 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	West Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	2,073	-	63,856	-
2000	3,869	8.7%	90,763	4.2%
2007	4,689	2.9%	116,831	4.0%
2012	5,804	4.8%	149,302	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

The senior population in the Submarket showed exceptional growth from 1990 to 2000, with population growth rates in the MSA being approximately half that percentage within the same time period. Senior population growth in the Submarket increased at a slower rate than in the MSA from 2000 to 2007. Senior population growth in the MSA is expected to grow at a faster rate than the Submarket from 2007 through 2012.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	West Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	2,200	-	52,073	-
2007	2,660	2.9%	67,113	4.0%
2012	3,271	4.6%	85,658	5.5%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth is expected to be positive through 2012. However in contrast to senior population estimates, the household growth rate is expected to increase significantly through 2012. The strong projected growth in the senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME						
Year	McAllen-Edinburg-Mission, TX MSA		West Hidalgo County Submarket		USA	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
			All Ages			
2007	$30,519	-	$24,536	-	$53,154	-
2012	$35,078	2.59%	$27,828	2.40%	$62,503	3.52%
			Age 55+			
2007	$27,687	-	$25,685	-	$32,710	-
2012	$32,712	3.07	$31,573	3.73%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in the MSA and USA are below those of all households. However, in the West Hidalgo County Submarket, the median senior household income is above that of all households in both 2007 and 2012. Of the three areas of analysis, the median senior household income is lowest in the Submarket and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - West Hidalgo County Submarket (Age 55+)				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage
<$15,000	839	31.5%	909	27.8%
$15,000-$24,999	442	16.6%	468	14.3%
$25,000-$34,999	401	15.1%	408	12.5%
$35,000-$49,999	416	15.6%	619	18.9%
$50,000-$74,999	401	15.1%	564	17.2%
$75,000-$99,999	100	3.8%	182	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,600. Among these locations, the Submarket has the largest percentage of seniors earning less than $35,000 annually. Approximately 63.2 percent of those 55 and older in the Submarket are earning under $35,000 per year in 2007. This is attributable primarily to the Submarket’s high percentage of senior households earning below $15,000 annually and the relatively undeveloped nature of the Submarket. The Submarket features slightly more senior households in these income brackets when compared to the MSA. By 2012, all areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 54.6 and 50.3 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. Furthermore, the majority of senior households within the PMA will be earning less than $35,000, which is below the current AMI. This indicates that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	West Hidalgo County Submarket				McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	2,006	91.2%	194	8.8%	43,784	84.1%	8,289	15.9%
2007	2,425	91.2%	235	8.8%	56,430	84.1%	10,683	15.9%
2012	2,983	91.2%	288	8.8%	72,023	84.1%	13,635	15.9%
Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008								

As the above table illustrates, the senior housing market is dominated by owner-occupied units. The Submarket and MSA have a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above). The small percentage of renter-occupied senior households is not unusual in relatively undeveloped submarkets, where owner-occupied housing is predominant among a relatively small population

Senior Demographic Conclusion

Of the three areas of analysis, the median senior household income is lowest in the Submarket and highest nationally. Although the median senior household income for the Submarket is projected to increase from 2007 to 2012, growth in the national and MSA's median senior household income is projected to outpace growth in the Submarket. Both the MSA and Submarket feature significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $36,100. Approximately 63 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually and the relatively undeveloped nature of the Submarket. The Submarket features significantly more senior households in these income brackets when compared to the MSA and national averages.

LOCAL MARKET INFORMATION

West Hidalgo County Submarket

The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare

There are no hospitals or urgent care clinics located in the City of La Joya or in the West Hidalgo County Submarket. The primary major medical providers within proximity to the West Hidalgo County Submarket are the Mission Regional Medical Center in Misison, A&M Medical Center in McAllen, and McAllen Medical Center. The closest hospital to the West Hidalgo County Submarket is the Mission Regional Medical Center, located approximately 11.7 miles east of La Joya, Texas. The Mission Regional Medical Center is a non-profit 289-bed medical center which provides general hospital care to the Rio Grande Valley Region.

Transportation

The West Hidalgo County Submarket is served by the McAllen Miller International Airport, which is located approximately 16.5 miles east of the City of La Joya, in McAllen, Texas. The McAllen Miller International Airport (MFE) is the primary business airport of the Rio Grande Valley and provides non-stop flights to Dallas-Fort Worth, Houston, and Las Vegas via American Airlines, Continental Airlines, and Allegiant Air.

Highway access to the West Hidalgo County Submarket can be accomplished via U.S. Highway 83. U.S. Highway 83 runs east/west from Harlingen, Texas to Manitoba, Canada.

Education

The West Hidalgo County Submarket is served by the La Joya Independent School District. The La Joya Independent School District has nineteen elementary schools, six middle schools, four high schools, and one alternative center for education. The nearest universities are located in Edinburg and McAllen, approximately 15 to 20 miles east of La Joya along U.S. Highway 83 . The University of Texas Pan American in Edinburg, Texas, with 17,337 students, including 2,261 graduate students, is the 10th largest university in the state and the fifth largest in the UT system and offers 54 bachelor’s degree programs, 50 master’s, and two doctoral programs. McAllen offers five major colleges/universities including the San Antonio College of Medical and Dental Assistants, South Texas Community College, South Texas Vocational Technical Institute, and the University of Cosmetology Arts and Sciences.

Public Transportation

The West Hidalgo County Submarket does not offer public transportation.

Employment Centers

There are a limited number of employment centers in the West Hidalgo County Submarket. The majority of employment centers are located in Edinburg and McAllen, approximately 15 to 20 miles east of the Submarket. The largest employer's in the McAllen-Edinburg-Mission MSA include the following:

Rank	Company	Industry	Employees
1	Edinburg Consolidated I.S.D.	Education	3,600
2	McAllen I.S.D.	Education	3,595
3	Edinburg Regional Medical Center	Healthcare	3,000
4	University of Texas Pan American	Education	2,850
5	McAllen Medical Center	Healthcare	2,800
6	Hidalgo County	Government	2,211
7	Mission Consolidated I.S.D.	Education	2,140
8	City of McAllen	Government	1,801
9	Columbia Rio Grande Regional Hospital	Healthcare	975
10	South Texas Community College	Education	811

Employment in the McAllen-Edinburg-Mission MSA is dominated by relatively stable industries and all ten of the major employers are in the education, healthcare, and government sectors. However, according to 2007 employment by industry demographics, retail trade and construction comprise approximately 27.1 percent of overall employment and are two of the top four industry sectors in the Submarket, along with healthcare and education. Retail trade and construction are typically more volatile sectors of the economy as compared to historically stable industries such as education and healthcare. Therefore, due to the high concentration of retail trade and construction industries in the Submarket, it is possible that the Submarket will experience slowing growth due to the predominance of these two industries.

Identifiable employers within the Submarket include the La Joya ISD, City of La Joya, First National Bank, Dollar General, Thera-Care Rehabilitation Services, Tip Top Video, Fred Loya Insurance, Atlas Credit Loans, Citgo, Felix Meat Market, Starlite Burger, La Joya Police Department, United States Post Office, Auto Zone, Aziz Quick Stop, McDonalds, Whataburger, Advanced Auto Parts, O'Reilly Auto Parts, La Vista Hotel, Burger King.

Proximity to Local Services

There are a moderate number of locational amenities in the West Hidalgo County Submarket. The majority of locational amenities are located in and surrounding the City of La Joya, Texas.

HOUSING SUPPLY ANALYSIS

WEST HIDALGO COUNTY SUBMARKET HOUSING SUPPLY ANALYSIS

Age of the Housing Stock

The following table presents the age of the housing stock in the West Hidalgo County Submarket.

AGE OF HOUSING STOCK IN THE WEST HIDALGO COUNTY SUBMARKET

Years	Number of Units	Percent of Housing Stock
1999-3/2000	683	8.12%
1995-1998	1,572	18.69%
1990-1994	1,938	23.04%
1980-1989	2,666	31.70%
1970-1979	866	10.30%
1960-1969	284	3.38%
1950-1959	217	2.58%
1940-1949	113	1.34%
1939 and Before	71	0.84%
Total	**8,410**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (73.43 percent) in the West Hidalgo County Submarket was constructed from 1980 through 1998. The West Hidalgo County Submarket consists primarily of rural undeveloped land with limited single-family housing and limited multifamily housing. Based upon observations in the field, the predominant form of housing in this Submarket is owner-occupied single-family homes in poor to excellent condition and 30 to less than five years in age. There is limited multifamily development in fair to good condition and 20 to five years in age. The West Hidalgo County Submarket contains small pockets of newly constructed single-family housing, such as Las Tranquitas, an under-construction single-family home subdivision along U.S. Highway 83 on the westernmost border of La Joya's city limits. Las Tranquitas consists of 24 one-acre plus home-sites. The majority of these home-sites are for sale and undeveloped. The existing homes in this community are large upscale single-family homes. Commercial and residential development in this Submarket is currently expanding westward from La Joya along U.S. Highway 83 towards Sullivan City and the westernmost border of Hidalgo County.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 “5+ units” building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while “5+ units” building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008. The small percentage of multifamily permits issued indicates demand for multifamily housing of all kinds.

Interviews

The Housing Authority of the County of Hidalgo

The Housing Authority of the County of Hidalgo was established in 1948 in order to serve the local farmworking families and migrant farmworkers in the region. The Housing Authority of the County of Hidalgo currently administers Farm Labor Housing units and Public Housing units in Hidalgo County, as well as, Section 8 Vouchers. According to Adela Montes, Deputy Director for the Housing Authority of the County of Hidalgo, there are currently 535 Farm Labor Housing units in two developments and 55 Public Housing units in two developments in Hidalgo County, excluding the City of McAllen. None of these developments is located in the North Hidalgo County Submarket. There are approximately 8,592 Housing Choice Vouchers budgeted for Hidalgo County and all are currently in use. Waiting Lists for Public Housing and Farm Labor Housing are currently open while the waiting list for Housing Choice Vouchers is closed. There are approximately 896 households on the waiting list for Housing Choice Vouchers. Of the 896 households, 162 are elderly households. There is no separate waiting list for special needs households in the Housing Choice Voucher Program. Currently, there are 104 elderly households participating in the Housing Choice Voucher Program in Hidalgo County. The number of households on the waiting list for Public Housing and Farm Labor Housing can be found below:

FARM LABOR HOUSING WAITING LIST – HIDALGO COUNTY					
Name	**1BR**	**2BR**	**3BR**	**4BR**	**Total**
Northside Apartments	14HH	11HH	2HH	0HH	27HH
Memorial Apartments	N/A	N/A	N/A	N/A	46HH

PUBLIC HOUSING WAITING LIST – HIDALGO COUNTY					
Name	**1BR**	**2BR**	**3BR**	**4BR**	**Total**
Villa Sandoval-Longoria	N/A	54HH	23HH	23HH	100HH
Villa San Juanita Rutledge	N/A	N/A	15HH	24HH	39HH

The current payment standards for one-, two-, three-, and four-bedroom units are listed below. According to Adela Montes, the payment standards are 100 percent of the Fair Market Rents.

PAYMENT STANDARDS	
Units	**Payment Standards**
Studio	$470
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

La Joya Housing Authority

According to J. J. Garza, Director of the La Joya Housing Authority there is funding for 128 Housing Choice Vouchers in the City of La Joya and all are currently in use. The waiting list for Housing Choice Vouchers is comprised of 300 households and the waiting list is currently open. The waiting list includes elderly, disabled, and family households. Information regarding the number of households by target population on the waiting list was unavailable. There are currently 50 Public Housing units in two developments in La Joya, Tabasco I and Tabasco II. Mr. Garza noted that there is a particular need for large bedroom types and that there is a significant overall need for affordable housing in La Joya. According to Mr. Garza, there are plans to demolish Tabasco I and build a new 50-unit multifamily development, funded with tax credits. As part of this project, Tabasco II will also undergo major renovations and 20 more units will also be added, at some point in the future. The La Joya Housing Authority is in the process of acquiring funding from HUD for 50 additional Housing Choice Vouchers in order to relocate the current tenants of Tabasco I and II, once construction/rehabilitation begins. This project is currently in the planning stages and construction/rehabilitation is projected to begin in the latter portion of 2009. Though Mr. Garza was unable to confirm, the plans for Tabasco I and Tabasco II are consistent with plans for a proposed LIHTC rehabilitation project, which was allocated funding in July 2007, according to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs. The current payment standards for the City of La Joya are the same as the payment standards for Hidalgo County.

La Joya City Hall – Economic Development

We contacted the City Hall of La Joya in order to acquire information on economic development in the region. According to Mike Analiz with the city hall of La Joya, the cities of La Joya, Palmview, Sullivan City, and Penitas are in the process of becoming a consortium in order to designate the area encompassed by these four cities as a distinct Metropolitan Statistical Area. Mr. Alaniz noted that physical expansion of the City of La Joya is currently inhibited by the availability of land. The city recently acquired 800 acres to the north of La Joya. Approximately 2,000 additional acres surrounding La Joya is owned by a private entrepreneur named Milton West. City officials are currently working with Mr. West as part of an annexation process. With regards to commercial expansion, Mr. Alaniz noted that there is currently a Wal-mart store under construction along U.S. Highway 83, adjacent to Penitas. The Wal-mart store is expected to open by January 1, 2009, at the latest. Mr. Alaniz also noted that the La Joya ISD is the largest employer in the region and serves approximately 30,000 students from the surrounding cities.

LIHTC Family Supply

We attempted to identify all existing, proposed, and under construction family LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers. There were no identifiable family LIHTC properties in the West Hidalgo County Submarket. Based on the lack of available data, we did not complete a LIHTC family market analysis.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one proposed family targeted reconstruction/rehabilitation project that has been allocated in the in the West Hidalgo County Submarket since 2005, Champion Home at La Joya. Champion Home at La Joya was allocated in July of 2007 and will consist of the rehabilitation of an existing development located at 945 South Leo Street in La Joya, Texas. This development will have 50 three- and four-bedroom units set at 30 and 60 percent of the AMI, with 16 of the units set at 30 percent of the AMI and 34 of the units set at 60 percent of AMI. The units set at 30 percent of AMI will also be designated public housing units. Additionally, 100 percent of the units at 60 percent of AMI will be Subject to a project based Section 8 subsidy. Based upon observations in the field, construction of this project has not yet commenced. It should be noted that there are currently 50 Public Housing units in two developments in La Joya, Tabasco I and Tabasco II. According to Mr. Garza with La Joya Housing Authority, there are plans to demolish Tabasco I and build a new 50-unit multifamily development, funded with tax credits. As part of this project, Tabasco II will also undergo major renovations and 20 more units will also be added, at some point in the future. The La Joya Housing Authority is in the process of acquiring funding from HUD for 50 additional Housing Choice Vouchers in order to relocate the current tenants of Tabasco I and II, once construction/rehabilitation begins. This project is currently in the planning stages and construction/rehabilitation is projected to begin in the latter portion of 2009. Though Mr. Garza was unable to confirm, the plans for Tabasco I and Tabasco II are consistent with plans for a proposed LIHTC rehabilitation project, which was allocated funding in July 2007, according to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs.

LIHTC Senior Supply

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers. There is one existing senior LIHTC development located in the West Hidalgo Submarket, La Mansion de La Joya. La Mansion De La Joya is a senior targeted affordable development located in La Joya, Texas. This development consists of 24 single-story one- and two bedroom units, rehabilitated with tax credit funding in 1991. As this development also operates under a USDA Rural Rental Assistance subsidy, 100 percent of the tenants are paying no more than 30 percent of their gross income towards rent. This being the case, we feel an in depth analysis of this property is more appropriately addressed in the Subsidized Supply section that follows. There are no other existing LIHTC developments in this Submarket. Based on the lack of available data, we did not complete a LIHTC senior market analysis.

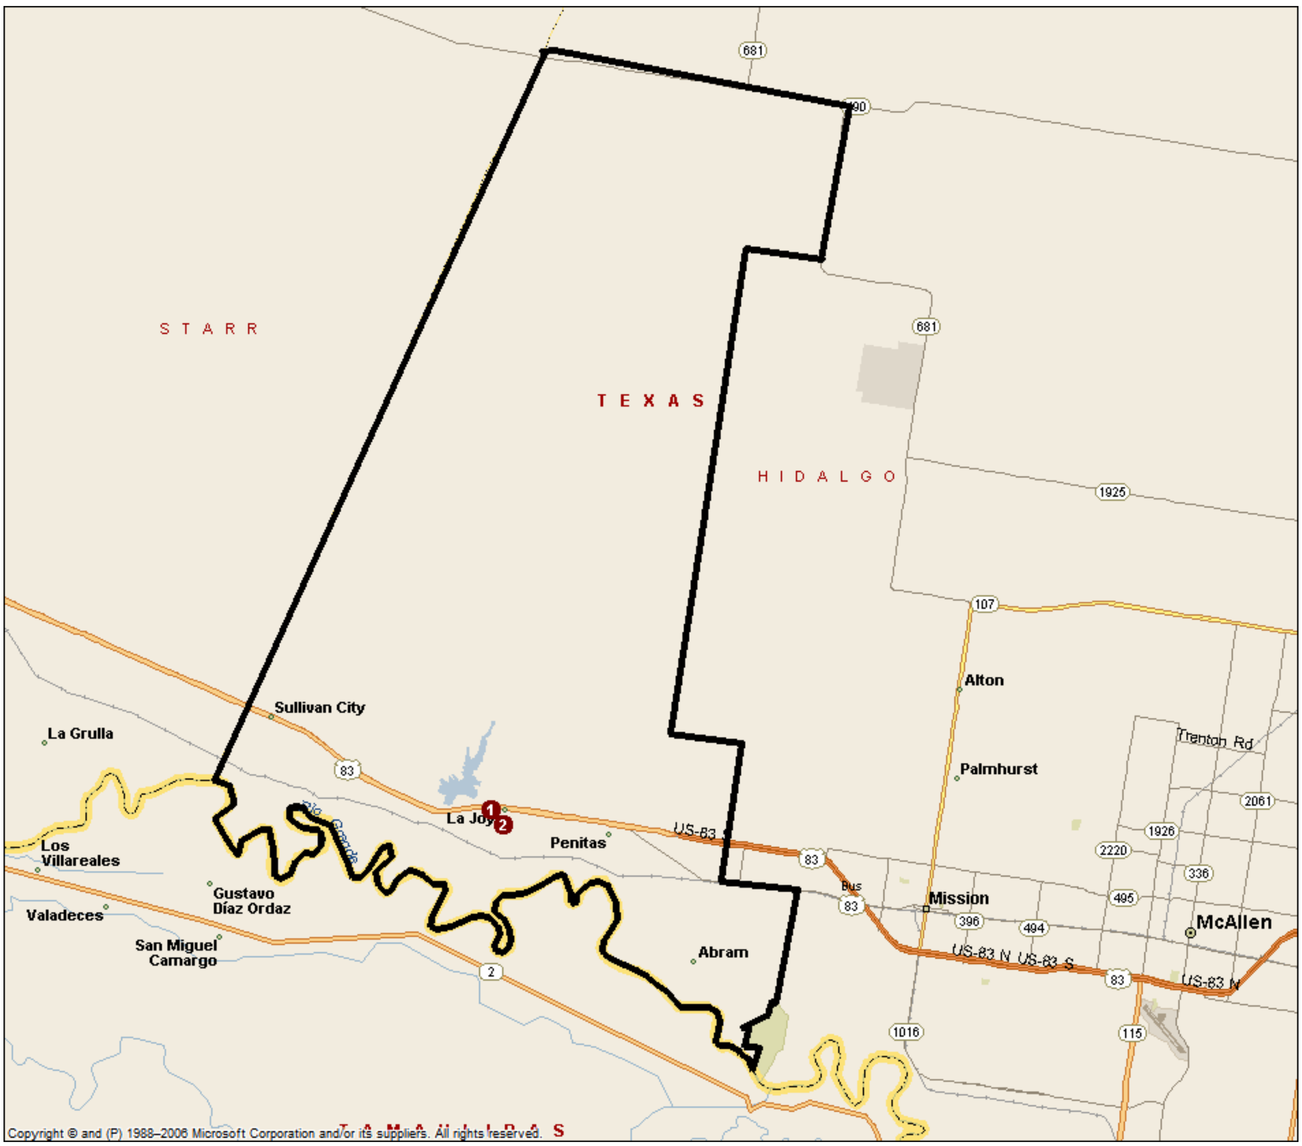
Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are no proposed or under construction senior LIHTC properties in the West Hidalgo County Submarket.

Market Rate Family Supply
We attempted to identify all existing, proposed, and under construction family oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials.

Novogradac was able to identify and survey two market rate family targeted multifamily developments in the West Hidalgo County Submarket, Lakeview Apartments and Duberne Apartments. Due to the limited amount of available market rate family data, we completed a limited market rate family market analysis.

The following map illustrates the location of the surveyed market rate family properties in the Submarket.



SURVEYED PROPERTIES			
Number	Name	Location	Type
1	Duberne Apartments	La Joya	Market – Family
2	Lakeview Apartments	La Joya	Market – Family

Market Rate Multifamily Market

The following pictures identify the market rate family properties in the Submarket.

Duberne Apartments

Lakeview Apartments

Excluded Properties

All identifiable market rate multifamily developments were surveyed. No properties were excluded from this analysis.

Proposed Construction

We contacted Mike Analiz with the City Hall of La Joya in order to determine if there is any proposed/under construction market rate multifamily development in the area. According to Mr. Mike Analiz, there are no market rate developments currently in the planning stages in the West Hidalgo County Submarket.

Unit Mix

The following table illustrates the unit mix in the family market rate rental property market.

Unit Mix - Market Family		
Unit Type	Total Units	Percent
1 BR	2	8%
2 BR	23	92%
3 BR	N/A	N/A
4 BR	N/A	N/A
Total	**25**	**100%**

We were unable to identify any properties with three- and four bedroom market rate units. Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.61 and is projected to decrease slightly by 2012 to 3.59. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, there are a large number of schools in the Submarket, suggesting that there is a high concentration of families in the area. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient market rate multifamily developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size

There is an insufficient amount of market rate multifamily development in the Submarket, on which to base an effective analysis of unit size. However, the following table illustrates the existing unit sizes in the family market rate rental property market.

Unit Size - Market Family			
Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	500	500	500
2 BR	800	950	875

Common and In-Unit Amenities

	Dubern Apartments	Lakeview Apartments
Comp #	1	2

The existing market rate multifamily properties in the West Hidalgo County Submarket offer limited in-unit and community amenities. The surveyed market rate properties offer no services, no security features, off-street-parking only, and no premium amenities. A basic appliance package is provided with only one comparable offering washer/dryer connections.

By-Unit Weighted Vacancy

There is an insufficient amount of market rate multifamily development in the Submarket, on which to base an effective analysis of weighted vacancy. However, the following table illustrates vacancy by unit type, for the surveyed properties.

Weighted Vacancy – Market Rate Family

Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	2	0	0.00%
2 BR	23	3	13.40%
3 BR	N/A	N/A	N/A
4 BR	N/A	N/A	N/A
Total	**25**	**3**	12.00%

Absorption
None of the surveyed market rate properties was able to provide absorption information.

Waiting List
None of the market rate family properties in the market maintain a waiting list.

Vacancy Levels
There is an insufficient amount of market rate multifamily development in the Submarket, on which to base an effective analysis of market vacancy. The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy		
Property Name	**Number of Units**	**Vacancy Rate**
Duberne Apartments	11	0.00%
Lakeview Apartments	14	21.40%
TOTAL SURVEYED	**25**	**12.20%**

Concessions
None of the market rate family properties in the market are offering concessions.

Turnover
There is an insufficient amount of market rate multifamily development in the Submarket, on which to base an effective analysis of market turnover. The two properties in our survey reported turnover rates of 42 and 50 percent annually.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

The one-bedroom market rate rents for the surveyed properties are below the maximum allowable rent limits at 40, 50, 60, 80 and 100 percent of AMI, as well, as the fair market rents. The two-bedroom market rate rents for the surveyed properties are below the maximum allowable gross rents limits at the 50, 60, 80, and 100 percent of AMI levels. Additionally, the one and two-bedroom rents for the surveyed properties are below the current payment standards for Hidalgo County.

Market Rate Family Supply Conclusion

Small unit types are currently prevalent in the Submarket. However, the Submarket's household size is significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, there are a large number of schools in the Submarket, suggesting that there is a high concentration of families in the area. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient market rate multifamily developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

The existing market rate multifamily properties in the West Hidalgo County Submarket offer limited in-unit and community amenities. The surveyed market rate properties offer no services, no security features, off-street-parking only, and no premium amenities. A basic appliance package is provided with only one comparable offering washer/dryer connections only.

None of surveyed properties is offering concessions and none of the properties currently maintains a waiting list. None of the surveyed properties was able to provide absorption information. The two properties in our survey reported turnover rates of 42 and 50 percent annually. Overall average vacancy is 12.2 percent; however, this percentage only reflects three vacant units.

Due to the lack of available data, we were able to perform only a limited market rate family market analysis, based primarily on demographic projections and anecdotal evidence of demand. The Submarket's 2007 population of 26,404 is expected to increase by approximately three percent to 30,413, by 2012. Similarly, the number of households in the Submarket is expected to increase at the same rate of growth as the population, from 2007 through 2012, resulting in a total of 8,471 households by 2012. As population and households increase and as commercial and residential expansion spread westward, the demand for multifamily rental housing of all kinds will likely increase. However, it should be noted that based on the current rental rates of existing market rate properties and the percentage of households in 2007 (42.2 percent) and 2012 (36.8 percent) earning less than $20,000 a year, the demand for affordable housing of all kinds will supersede the demand for market rate housing.

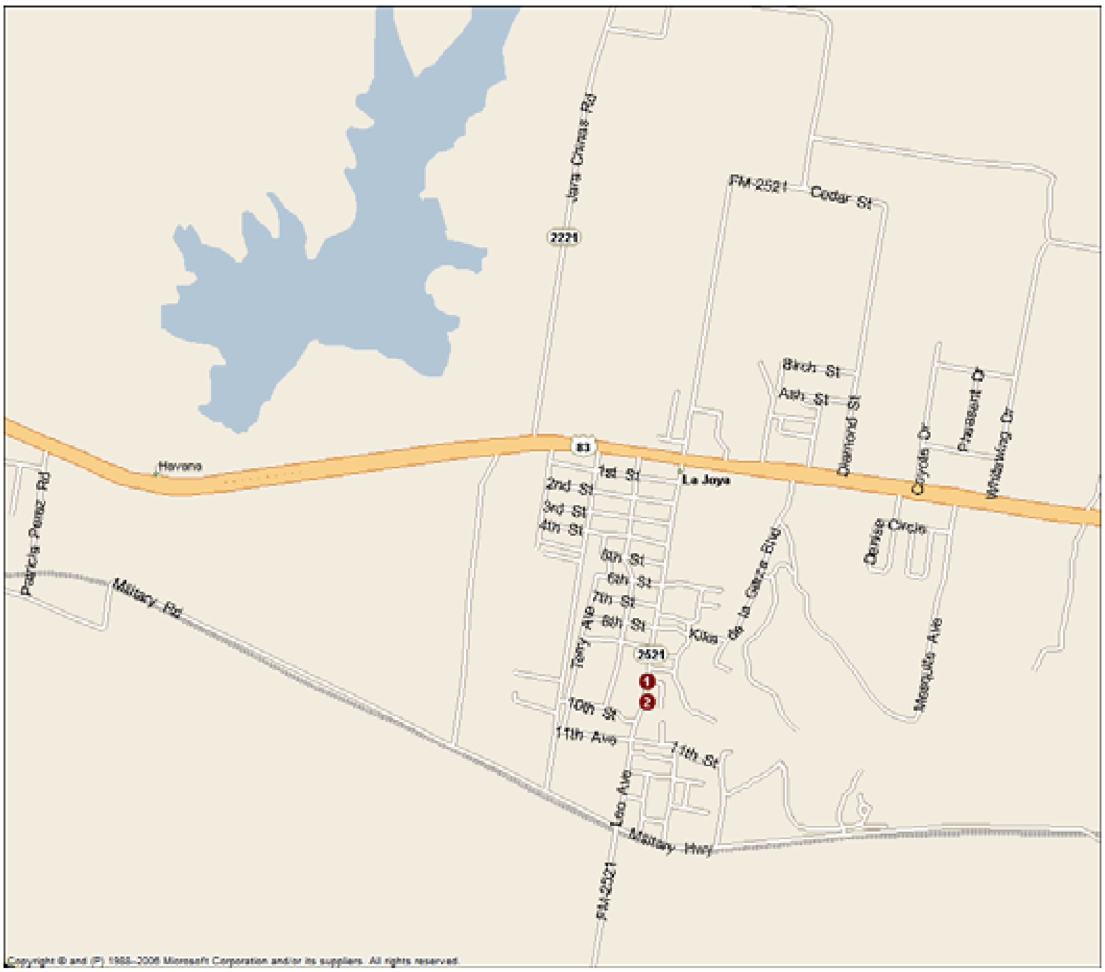
Market Rate Senior Supply

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable senior market rate properties in the West Hidalgo County Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis. There are no proposed or under construction market rate properties in the West Hidalgo County Submarket.

Subsidized Family Supply

We attempted to identify all existing, proposed, and under construction family-oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials. According to J. J. Garza, Director of the La Joya Housing Authority, there are currently 50 Public Housing units in two family targeted developments in La Joya, Tabasco I and Tabasco II. Both Tabasco I and Tabasco II are included in the analysis that follows. Based on the limited data regarding family-oriented subsidized properties, we performed only a limited subsidized family market analysis.

The following map illustrates the location of the surveyed subsidized properties in the Submarket.



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Tabasco I	La Joya	Public Housing – Family
2	Tabasco II	La Joya	Public Housing - Family

Subsidized Multifamily Market

The following pictures identify the subsidized family properties in the Submarket.

Tabasco I

Tabasco II

Excluded Properties

All of the identifiable family-targeted subsidized properties were surveyed and included in the analysis that follows. No properties were excluded from this analysis.

Proposed/Under Construction

According to Mr. Garza, there are plans to demolish Tabasco I and build a new 50-unit multifamily development, funded with tax credits. As part of this project, Tabasco II will also undergo major renovations and 20 more units will also be added, at some point in the future. The La Joya Housing Authority is in the process of acquiring funding from HUD for 50 additional Housing Choice Vouchers in order to relocate the current tenants of Tabasco I and II, once construction/rehabilitation begins. This project is currently in the planning stages and construction/rehabilitation is projected to begin in the latter portion of 2009. Though Mr. Garza was unable to confirm, the plans for Tabasco I and Tabasco II are consistent with plans for a proposed family LIHTC rehabilitation project, Champion Home at La Joya, which was allocated funding in July 2007, according to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs.

Unit Mix

The following table illustrates the unit mix in the family subsidized rental property market.

Unit Mix - Subsidized Family

Unit Type	Total Units	Percent
1 BR	N/A	N/A
2 BR	N/A	N/A
3 BR	41	82%
4 BR	9	18%
Total	**50**	**100%**

We were unable to identify any subsidized properties with one- and two bedroom units. Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.61 and is projected to decrease slightly by 2012 to 3.59. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, there are a large number of schools in the Submarket, suggesting that there is a high concentration of families in the area. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient market rate multifamily developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size

There is an insufficient amount of subsidized multifamily development in the Submarket, on which to base an effective analysis of unit size. However, the following table illustrates the existing unit sizes in the subsidized rental property market. According to management at both surveyed properties, unit sizes are estimates.

Unit Size - Subsidized Family

Unit Type	Tabasco I	Tabasco II
3 BR	1,100	1,100
4 BR	1,200	1,200

The existing subsidized multifamily properties in the West Hidalgo County Submarket offer limited in-unit and community amenities. The surveyed subsidized properties offer no services, no security features, car port parking at no additional cost, and no premium amenities. A basic appliance package is provided with washer/dryer connections only.

By-Unit Weighted Vacancy
There is an insufficient amount of subsidized multifamily development in the Submarket, on which to base an effective analysis of weighted vacancy. Additionally, none of the surveyed properties is currently exhibiting vacancies.

Absorption
None of the surveyed market rate properties was able to provide absorption information.

Waiting List
Both of the surveyed developments draw tenants from the La Joya Housing Authority's Public Housing waiting list, which currently has 1,049 households. Based on the extensive waiting list for Public Housing, we anticipate significant future demand for very low income affordable housing.

Vacancy Levels
There is an insufficient amount of subsidized multifamily development in the Submarket, on which to base an effective analysis of vacancy. Additionally, none of the surveyed properties is currently exhibiting vacancies and historical occupancy is typically 100 percent.

Concessions
None of the subsidized family properties in the market are offering concessions.

Turnover
There is an insufficient amount of subsidized multifamily development in the Submarket, on which to base an effective analysis of market turnover. The two properties in our survey reported turnover rates of 48 and 60 percent annually equating to approximately one unit per month in each development.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Comp #	Project	Type / Built / Renovated	Market / Subsidy	Units	#	%	Restriction	Rent (Adj.)	Size (SF)	Max Rent?	Wait List?	Units Vacant	Vacancy Rate

PAYMENT STANDARDS	
Units	**Payment Standards**
Studio	$470
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

There is an insufficient amount of subsidized multifamily development in the Submarket, on which to base an effective rental rate analysis. As both surveyed subsidized properties are Public Housing developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The rental rates quoted above are “flat rents”. The flat rents at both surveyed subsidized properties are well below the payment standards for Hidalgo County. Additionally, there are plans to demolish/reconstruct and renovate Tabasco I and Tabasco II, respectively, and provide an additional 20 public housing units at some point in the future. According to the Housing Authority of La Joya, the Public Housing waiting list is 1,049 households long, indicating significant demand for very low income affordable housing.

Subsidized Family Supply Conclusion

Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.61 and is projected to decrease slightly by 2012 to 3.59. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, there are a large number of schools in the Submarket, suggesting that there is a high concentration of families in the area. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient market rate multifamily developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

The existing subsidized multifamily properties in the West Hidalgo County Submarket offer limited in-unit and community amenities. The surveyed subsidized properties offer no services, no security features, car port parking at no additional cost, and no premium amenities. A basic appliance package is provided with washer/dryer connections only.

None of surveyed properties is offering concessions and none of the properties was able to provide absorption information. Both of the surveyed developments draw tenants from the La Joya Housing Authority's Public Housing waiting list. The two properties in our survey reported turnover rates of 48 and 60 percent annually. Both surveyed developments have 100 percent occupancy rates.

There is an insufficient amount of subsidized multifamily development in the Submarket, on which to base an effective rental rate analysis. As both surveyed subsidized properties are Public Housing developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The rental rates quoted above are "flat rents". The flat rents at both surveyed subsidized properties are well below the payment standards for Hidalgo County. Additionally, there are plans to demolish/reconstruct and renovate Tabasco I and Tabasco II, respectively, and provide an additional 20 public housing units at some point in the future. According to the Housing Authority of La Joya, the Public Housing waiting list is 1,049 households long, indicating significant demand for very low income affordable housing.

Subsidized Senior Supply

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There is one existing senior LIHTC/USDA subsidized development located in the West Hidalgo Submarket, La Mansion de La Joya. La Mansion De La Joya is a senior targeted affordable development which consists of 24 single-story one- and two bedroom units, rehabilitated with tax credit funding in 1991. This development operates under the LIHTC and USDA Rural Rental Assistance programs. However, 100 percent of the tenants are paying no more than 30 percent of their gross income towards rent. We were unable to contact this development by phone and in person, and therefore it has been excluded from the following limited supply analysis. There are no other existing senior targeted subsidized developments in this Submarket. Based on the lack of available data, no analysis was made of the senior subsidized market as the single subsidized senior development was unavailable.

There are no proposed or under construction subsidized senior properties in the North Hidalgo County Submarket. Pictures of La Mansion de La Joya are provided below:

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the West Hidalgo County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the West Hidalgo County Submarket in 2007 is 7,304 and the total number of households in 2012 is projected to be 8,471. The total number of households age 55 and older in the Submarket for 2007 is 2,660, with a 2012 projection of 3,271 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 16.0 percent of the occupied housing unit households in the West Hidalgo County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 8.8 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a one-person household in the income range between 31 percent and 40 percent of AMI. A minimum

income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the West Hidalgo County Submarket (McAllen-Edinburg-Mission, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*	
1 Person	$0	$9,150	$9,150	$12,200	$12,200	$15,250	$15,250	$18,300	$18,300	$24,400	$24,400	$30,500
2 Person	$0	$10,500	$10,500	$13,960	$13,960	$17,450	$17,450	$20,940	$20,940	$27,920	$27,920	$34,900
3 Person	$0	$11,800	$11,800	$15,680	$15,680	$19,600	$19,600	$23,520	$23,520	$31,360	$31,360	$39,200
4 Person	$0	$13,100	$13,100	$17,440	$17,440	$21,800	$21,800	$26,160	$26,160	$34,880	$34,880	$43,600
5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households

Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the West Hidalgo County Submarket, approximately 28.4 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing

Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 5.4 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing

A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the West Hidalgo County Submarket, it is estimated that 26.3 percent of households are living in overcrowded units.

Movership or Turnover Rate

There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. We were unable to identify any senior LIHTC properties in this Submarket. The two subsidized family developments in the Submarket are reporting turnover rates of 48 and 60 percent annually. The two market rate properties in the Submarket report turnover rates of 42 and 50 percent annually. Due to a lack of family LIHTC turnover data in this Submarket, we have use the average turnover rate for the four properties targeting family households in the Submarket. Therefore, a turnover rate of 50 percent applied to the following analysis.

We were unable to identify any senior LIHTC properties in this Submarket. With so few senior LIHTC properties able to provide turnover data in the MSA, we have used the average senior subsidized turnover rate of 6.5 percent.

Unstabilized Rental Units - Existing and Proposed

There is one proposed family targeted reconstruction/rehabilitation LIHTC project that has been allocated and not yet built in the in the West Hidalgo County Submarket. Champion Home at La Joya was allocated in July of 2007 and will consist of the rehabilitation of an existing development located at 945 South Leo Street in La Joya, Texas. This development will have 50 three- and four-bedroom units set at 30 and 60 percent of the AMI, with 16 of the units set at 30 percent of the AMI and 34 of the units set at 60 percent of AMI. Despite the difference in set-asides, the application submitted by the project developer indicates that all 50 units will operate either as Public Housing or Section 8. Based on this information, all 50 units have been deducted from the following analysis at the 30 percent of AMI level.

To our knowledge, there are no proposed or under construction senior LIHTC properties in the West Hidalgo County Submarket. With no identified proposed senior LIHTC properties in the West Hidalgo County Submarket, no units were deducted from the senior demand analysis.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the West Hidalgo County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Household Size	Total Renters - Baseline Year (2007)	Income-Qualified Renters - Baseline Year (2007)					
		≤ 30% AMI	31% - 40% AMI	41% - 50% AMI	51% - 60% AMI	61% - 80% AMI	81% - 100% AMI

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the West Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 25 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. The proposed reconstruction of 50 units to provide affordable units to households earning less than 30 percent of AMI should help to meet some of the continuing need for housing at the lowest income levels in the West Hidalgo County Submarket.

Senior Households

Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 24 subsidized units serving low-income senior households in the West Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional subsidized or LIHTC units planned, there is likely an unmet need for additional affordable senior housing units in this Submarket.

3. WEST CENTRAL HIDALGO COUNTY SUBMARKET ANALYSIS

WEST CENTRAL HIDALGO COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the West Hidalgo County Submarket, which is bounded to the north by State Highway 490; to the east by Wallace Road, Mile 14 North Road, North Ware Road, Monte Christo Road, Ware Road, Lark Avenue, and Taylor Road; to the south by the Texas-Mexico border; and to the west by Bentsen State Park Road 43, U.S. Highway 83 Business, Abram Road, 6 Mile Line Road, and Iowa Avenue. The following map illustrates the boundaries of the Submarket as defined above.

West Central Hidalgo County Submarket Map

The West Central Hidalgo County Submarket includes the communities/cities of Mission, Alton, La Homa, Doffing, Palmview and Palmhurst. Approximately 40 to 50 percent of the area in this Submarket can be characterized as developed and within close proximity to most locational amenities and essential services. The remaining 50 to 60 percent of the area in this Submarket contains very little development and offers limited access to locational amenities and essential services. Development is located along U.S. Highway 83, which is the area's primary thoroughfare, and dissipates slowly in each direction with limited development occurring along the U.S. Mexico border region and north of the community of Alton. The predominant form of housing in this Submarket is owner-occupied single-family homes in fair to excellent condition and less than five to 40 years in age. There is a moderate amount of multifamily development in poor to excellent condition and less than five to 40 years in age.

Local Government

As previously mentioned, the West Central Hidalgo County Submarket includes the communities/cities of Mission, Alton, La Homa, Doffing, Palmview and Palmhurst.

Mission, Texas is a city in Hidalgo County operating under a Mayor-Council form of government with three elected Council members. According to the U.S. Census, Mission is comprised of a land area of 24.1 square miles and had a 2000 population of 45,408.

Alton, Texas is a city in Hidalgo County operating under a Mayor-city Commission form of government with one elected city Commissioner. According to the U.S. Census, Alton is comprised of a land area of 2.1 square miles and had a 2000 population of 4,384.

La Homa, Texas is a census-designated place in Hidalgo County. According to the U.S. Census, La Homa is comprised of a land area of 6.9 square miles and had a 2000 population of 10,433.

Doffing, Texas is a census-designated place in Hidalgo County. According to the U.S. Census, Doffing is comprised of a land area of 4.3 square miles and had a 2000 population of 4,256.

Palmview, Texas is a city in Hidalgo County operating under a Mayor-Council form of government with an elected Mayor and five aldermen. According to the U.S. Census, Palmview is comprised of a land area of 2.4 square miles and had a 2000 population of 4,107.

Palmhurst, Texas is a community in Hidalgo County operating under a Mayor-Council form of government with a Mayor and unspecified number of aldermen. According to the U.S. Census, Palmhurst is comprised of a land area of 6.1 square miles and had a 2000 population of 4,872.

Employment by Industry

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the West Central Hidalgo County Submarket are the construction, educational services, retail trade, and health care/social assistance sectors. Approximately 52.6 percent of people in West Central Hidalgo County work in these four industries. The West Central Hidalgo County Submarket has a larger number of persons employed in the construction and retail trade sectors and a smaller number of people employed in the healthcare/social assistance and educational services sectors, relative to the MSA. Although educational services and health care/social services are typically stable sectors of the economy, industries such as retail trade and construction are particularly susceptible to fluctuations in the economy. The large number of people employed in the retail trade and construction industries could negatively impact employment in the Submarket due to the current national economic downturn. However, the strong presence of the educational services and health care/social assistance industries should promote economic stability.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing.

Commute Patterns in the West Central Hidalgo County Submarket

The table below summarizes commute times for the West Central Hidalgo County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	834
5-9 min	2,671
10-14 min	4,486
15-19 min	6,633
20-24 min	6,266
25-29 min	1,701
30-34 min	6,635
35-39 min	295
40-44 min	458
45-59 min	1,115
60-89 min	696
90+ min	797
Average Travel Time	23.5 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

By far, most workers in the Submarket have a commute time under 35 minutes. Given that the Submarket includes the more densely populated areas in and around Mission, this is not unexpected. It should be noted that 10.3 percent of workers report a travel time to work in excess of 35 minutes. Portions of the Submarket extend far enough to the north that workers living in rural areas will have extended commute times to places of employment.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the West Central Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA. Data such as population, households and growth patterns are studied, to determine if the McAllen-Edinburg-Mission MSA and the West Central Hidalgo County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the West Central Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA from 1990 through 2012.

Total Population				
Year	West Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	58,357	-	383,545	-
2000	109,538	8.77%	569,463	4.85%
2007	157,348	6.02%	732,166	3.94%
2012	193,796	4.63%	865,301	3.64%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Population growth rates in the Submarket have been significantly higher than growth rates in the MSA in all years of analysis. Both the Submarket and the MSA show strong growth from 2007 through 2012, although the Submarket will grow at a faster rate than the MSA from 2007 through 2012. Overall, the rate of population growth in the Submarket and MSA will decrease slightly from 2007 through 2012. However, growth rates in the Submarket and MSA from 2007 to 2012 are considered very strong and are a positive indicator of the need for all forms of housing and likely why so many individuals are employed in the construction sector in the Submarket.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990 through 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	West Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	15,461	-	103,479	-
2000	29,239	8.91%	156,824	5.15%
2007	42,868	6.43%	205,804	4.31%
2012	53,077	4.76%	244,775	3.79%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, household growth rates in the Submarket and MSA show positive gains through 2012, although the Submarket will grow at a faster rate than the MSA from 2007 through 2012. Household growth in the Submarket slowed from 2000 to 2007 and is expected to slow even further from 2007 through 2012; however, the growth rate in the Submarket from 2007 through 2012 is still very strong. Similarly, household growth in the MSA is expected to slow from 2007 through 2012.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	West Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.74	-	3.60	-
2007	3.67	-0.26%	3.53	-0.27%
2012	3.65	-0.11%	3.51	-0.11%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly larger than the MSA, and both are significantly larger than the national average size of 2.59 (not shown). The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket and the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	West Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	$24,388	-	$24,843	-
2007	$30,428	3.42%	$30,519	3.15%
2012	$35,054	3.04%	$35,078	2.99%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 0.3 percent lower than the median household income in the MSA in 2007. The median household income in the Submarket and in the MSA is projected to grow at a slower rate from 2007 through 2012 than the previous seven years. It should be noted that the median household income in the Submarket and MSA are approximately 57.2 and 57.4 percent of the national average in 2007. The lower median income levels in the Submarket and MSA indicate an increasing need for affordable housing.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - West Central Hidalgo County Submarket				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage
<$10,000	7,480	17.4%	7,635	14.4%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 34.9 percent of the population in the Submarket and 34.1 percent of the population in the MSA earned below $20,000 in 2007 with the lowest percentage earning between zero dollars and $10,000. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 30.2 percent and 29.4 percent, respectively, but in both instances, a significant portion of the population are projected to earn less than $20,000. This data provides strong support for affordable rental housing of all kinds in the Submarket and MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents is 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	West Central Hidalgo Submarket		McAllen-Edinburg-Mission, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	9,407	-	63,856	-
2000	16,030	7.0%	90,763	4.2%
2007	23,075	6.1%	116,831	4.0%
2012	31,314	7.1%	149,302	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Senior population trends in the MSA grew at a slower rate than in Submarket from 2000 through 2007. Senior population growth in both the West Central Hidalgo County Submarket and the MSA is expected to grow at an exceptional rate from 2007 through 2012, with growth in the Submarket exceeding that of the MSA.

The exceptional projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	West Central Hidalgo Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	9,089	-	52,073	-
2007	13,063	6.0%	67,113	4.0%
2012	17,592	6.9%	85,658	5.5%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth in the Submarket and MSA is expected to be exceptionally strong through 2012. Similar to senior population estimates, the household growth rate is expected to increase through 2012. The strong projected growth in the senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME						
Year	**McAllen-Edinburg-Mission, TX MSA**		**West Central Hidalgo County Submarket**		**USA**	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
			All Ages

2012	$35,078	2.59%	$35,054	2.64%	$62,503	3.52%
			Age 55+			
2007	$27,687	-	$28,416	-	$32,710	-
2012	$32,712	3.07	$33,727	3.15%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in all areas of analysis are below those of all households. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The median household income in the Submarket and MSA are approximately 42.8 and 42.6 percent of the national average in 2007.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - West Central Hidalgo Submaket (Age 55+)				
Income Cohort	**2007**		**2012**	
	Number	**Percentage**	**Number**	**Percentage**

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,600. Compared to the Submarket, the MSA has the largest percentage of seniors earning less than $35,000 annually, although negligibly so. Approximately 57.2 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The Submarket features slightly fewer senior households in these income brackets when compared to the MSA. By 2012, both areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 50.5 and 50.3 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. These factors indicate that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	West Central Hidalgo County Submarket				McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	7,949	87.5%	1,140	12.5%	43,784	84.1%	8,289	15.9%
2007	11,425	87.5%	1,638	12.5%	56,430	84.1%	10,683	15.9%
2012	15,385	87.5%	2,207	12.5%	72,023	84.1%	13,635	15.9%
Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008								

As the above table illustrates, the senior housing market is dominated by owner-occupied units in all areas of analysis. The Submarket and MSA have a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above). The small percentage of renter-occupied senior households is not unusual in developing submarkets, where owner-occupied housing is predominant.

Senior Demographic Conclusion

Although the median senior household income for the MSA is projected to increase from 2007 to 2012, growth in the national and Submarket's median senior household income is projected to outpace growth in the MSA. Both the MSA and Submarket feature significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $36,100. Approximately 57.2 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The Submarket features slightly less senior households in these income brackets when compared to the MSA and national averages.

LOCAL MARKET INFORMATION

West Central Hidalgo County Submarket

The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare

The majority of the healthcare providers in the West Central Hidalgo County Submarket are located in Mission. The primary major medical providers within proximity to the West Central Hidalgo County Submarket are the Mission Regional Medical Center in Mission, A&M Medical Center in McAllen, and McAllen Medical Center. The Mission Regional Medical Center is the Submarket's primary hospital and is a non-profit 289-bed medical center which provides general hospital care to the Rio Grande Valley Region. The A& M Medical Center and McAllen Medical Center are located east of the Submarket in the City of McAllen.

Transportation

The West Central Hidalgo County Submarket is served by the McAllen Miller International Airport, which is located approximately 5.5 miles east of the City of Mission, in McAllen, Texas. The McAllen Miller International Airport (MFE) is the primary business airport of the Rio Grande Valley and provides non-stop flights to Dallas-Fort Worth, Houston, and Las Vegas via American Airlines, Continental Airlines, and Allegiant Air.

Highway access to the West Central Hidalgo County Submarket can be accomplished via U.S. Highway 83. U.S. Highway-83 runs east/west from Harlingen, Texas to Manitoba, Canada.

Education

The West Central Hidalgo County Submarket is served by the Mission Consolidated Independent School District. The Mission Independent Consolidated School District has thirteen elementary schools, three middle schools, two high schools and an alternative campus for students considered to be at risk. The nearest universities are located outside of the Submarket in Edinburg and McAllen, approximately 5 to 15 miles east of Mission along U.S. Highway 83 . The University of Texas Pan American in Edinburg, Texas, with 17,337 students, including 2,261 graduate students, is the tenth largest university in the state and the fifth largest in the UT system and offers 54 bachelor's degree programs, 50 master's, and two doctoral programs. McAllen offers five major colleges/universities including the San Antonio College of Medical and Dental Assistants, South Texas Community College, South Texas Vocational Technical Institute, and the University of Cosmetology Arts and Sciences.

Public Transportation

Valley Transit Company serves the city of Mission and the West Central Hidalgo County Submarket. Valley Transit is a full-service bus company that serves South Central Texas and Northern Mexico with more than 50 daily schedules, as well as connections to nationwide travel on Greyhound Lines. The Valley Transit Travel Center and Bus Stop is located at 2107 Highway 83 West in Mission and is open 24 hours a day.

Employment Centers

There are a limited number of employment centers in the West Central Hidalgo County Submarket. The majority of employment centers are located in Mission. The largest employers in the city of Mission are:

Rank	Company	Industry	Employees
1	Mission CISD	Education	2,140
2	Sharyland ISD	Education	1,045
3	Mission Regional Medical Center	Healthcare	910
4	T-Mobile	Technology	893
5	City of Mission	Government	521
6	Wal-Mart Super Center	Retail	410
7	H.E.B. Grocery	Grocery	334
8	Vanity Fair Intimates	Retail Distribution Center	315
9	Target	Retail	240
10	Frito-Lay, Inc.	Food Distribution	220

Source: Mission Economic Development Authority: August 2008

Employment in the Submarket is dominated by relatively stable industries as four of the top five major employers are in the education, healthcare, and government sectors. However, according to 2007 employment by industry demographics, retail trade and construction comprise approximately 28 percent of overall employment and are two of the top four industry sectors in the Submarket. Retail trade and construction are typically more volatile sectors of the economy as compared to historically stable industries such as education and healthcare, and government. Therefore, due to the high concentration of retail trade and construction industries in the Submarket, it is possible that the Submarket will experience slowing growth.

Proximity to Local Services

There are a moderate number of locational amenities in the West Central Hidalgo County Submarket. The majority of locational amenities are located in and surrounding the City of Mission, Texas.

1950-1959	1,238	3.32%
1940-1949	609	1.63%
1939 and Before	463	1.24%
Total	**37,310**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (82.51 percent) in the West Central Hidalgo County Submarket was constructed from 1970 through 1998. The West Central Hidalgo County Submarket consists of moderate residential development including primarily of single-family homes with some multifamily housing. Based upon observations in the field, the predominant form of housing in this Submarket is owner-occupied single-family homes in fair to excellent condition and less than five to 40 years in age. There is a moderate amount of multifamily development in poor to excellent condition and less than five to 40 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 "5+ units" building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while "5+ units" building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008.

Interviews

Housing Authority of County of Hidalgo

The Housing Authority of the County of Hidalgo was established in 1948 in order to serve the local farmworking families and migrant farmworkers in the region. The Housing Authority of the County of Hidalgo currently administers Farm Labor Housing units and Public Housing units in Hidalgo County, as well as Section 8 Vouchers. According to Adela Montes, Deputy Director for the Housing Authority of the County of Hidalgo, there are currently 535 Farm Labor Housing units in two developments and 55 Public Housing units in two developments in Hidalgo County, excluding the City of McAllen. None of these developments is located in the West Central Hidalgo County Submarket. There are approximately 8,592 Housing Choice Vouchers budgeted for Hidalgo County, and all are currently in use. Waiting Lists for Public Housing and Farm Labor Housing are currently open while the waiting list for Housing Choice Vouchers is closed. There are approximately 896 households on the waiting list for Housing Choice Vouchers. Of the 896 households, 162 are elderly households. There is no separate waiting list for special needs households in the Housing Choice Voucher Program. Currently, there are 104 elderly households participating in the Housing Choice Voucher Program in Hidalgo County. The number of households on the waiting list for Public Housing and Farm Labor Housing can be found below:

FARM LABOR HOUSING WAITING LIST – HIDALGO COUNTY

Name	1BR	2BR	3BR	4BR	Total
Northside Apartments	14HH	11HH	2HH	0HH	27HH
Memorial Apartments	N/A	N/A	N/A	N/A	46HH

Villa Sandoval-Longoria	N/A	54HH	23HH	23HH	100HH
Villa San Juanita Rutledge	N/A	N/A	15HH	24HH	39HH

The current payment standards for one-, two-, three-, and four-bedroom units are listed below. According to Adela Montes, the payment standards are 100 percent of the Fair Market Rents.

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

Housing Authority of the City of Mission

According to Jaime Ayala in the Public Housing Office of the Housing Authority of the City of Mission, there are three multifamily developments and one senior/disabled development, for a total of 270 public housing units owned and operated by the city housing authority. Anacua Apartments was built in 1942 and offers 80 one-, two- and three-bedroom units in 26 duplexes and rowhouses. Aldea Apartments was built in 1983 and offers 48 one-, two- and three-bedroom units in 24 duplexes. The third multifamily public housing development consists of 52 three-, four- and five-bedroom single-family homes on scattered sites. The single-family homes were built between 1994 and 1995. The one senior and disabled development, Palm Plaza I, II and III, was built between 1967 and 1996 and offers 90 studio, one-, and two-bedroom units. According to Mr. Ayala, the public housing office shares a waiting list with the Section 8 office. As of July 2008, the waiting list had 1,422 households and was closed. Mr. Ayala expects the waiting list to re-open in 12 to 15 months. Preferences for the waiting list include veterans, victims of domestic violence and seniors and/or the disabled.

Mission Economic Development Authority

We contacted Daniel Silva with the Mission Economic Development Authority in Mission, Texas. According to Mr. Silva, there are two commercial projects currently under construction and in the planning stages. The first is a 400,000 square foot commercial development in the final phases of construction along Shary Road, south of U.S. Highway 83. Phase I is anchored by a Target and HEB Supermarket with the last four acre commercial pad currently under development. Phase II will consist of approximately 350,000 square feet of commercial development located just north of Phase I.

Though an exact location was unavailable, a Hampton Inn recently broke ground in the same area as the aforementioned Phase I and II commercial developments. Construction of the hotel is projected to be complete by December 2008.

There are currently three large condominium developments either under construction or in the planning stages in Mission. Infinity Global Development is currently in the process of constructing the 85-unit Vantage Luxury Condominium mid-rise tower. This project is approximately 40 percent complete. Unit pricing starts at $175,000 and all of the units were sold within months of breaking ground. An estimated completion date was unavailable. Infinity Global development currently has a site under contract for the second of the three planned condominium developments, which will consist of 135 luxury condominium units. Information on the third development is unavailable at this time.

Adjacent to the under construction Vantage Condominium tower is a luxury gated multifamily apartment development comprised of 60 units, which is currently under construction. Mr. Silva was unable to provide further information regarding this development. However, Mr. Silva did note that this project is also adjacent to a newly constructed apartment complex, developed by JMA Enterprises. Mr. Silva was unable to provide the name of this multifamily development.

There are two single-family home master planned communities currently in the planning stages in the southwest area of Mission. San Patricio Estates, being developed by Domit, will consist of solely single-family home sites, while Benston Palms will be a mixed-use development with single-family uses, commercial uses, multifamily uses and a senior retirement community. Further details on both of these projects were unavailable.

Alton City Hall – Commercial/Residential Planning and Development/Economic Development

We contacted David De Leon with the City of Alton for information regarding residential development. According to Mr. De Leon, Casa Alton, a newly allocated LIHTC property in Alton is currently under construction. An official timeline for completion of construction was not available, however, he expects that construction will be completed within the next two months. Mr. De Leon also noted that a market rate multifamily for sale and rental development consisting of 19 fourplexes is supposed to begin construction immediately. There are no other residential developments either proposed or under construction in Alton at this time.

Alton City Hall – Economic Development

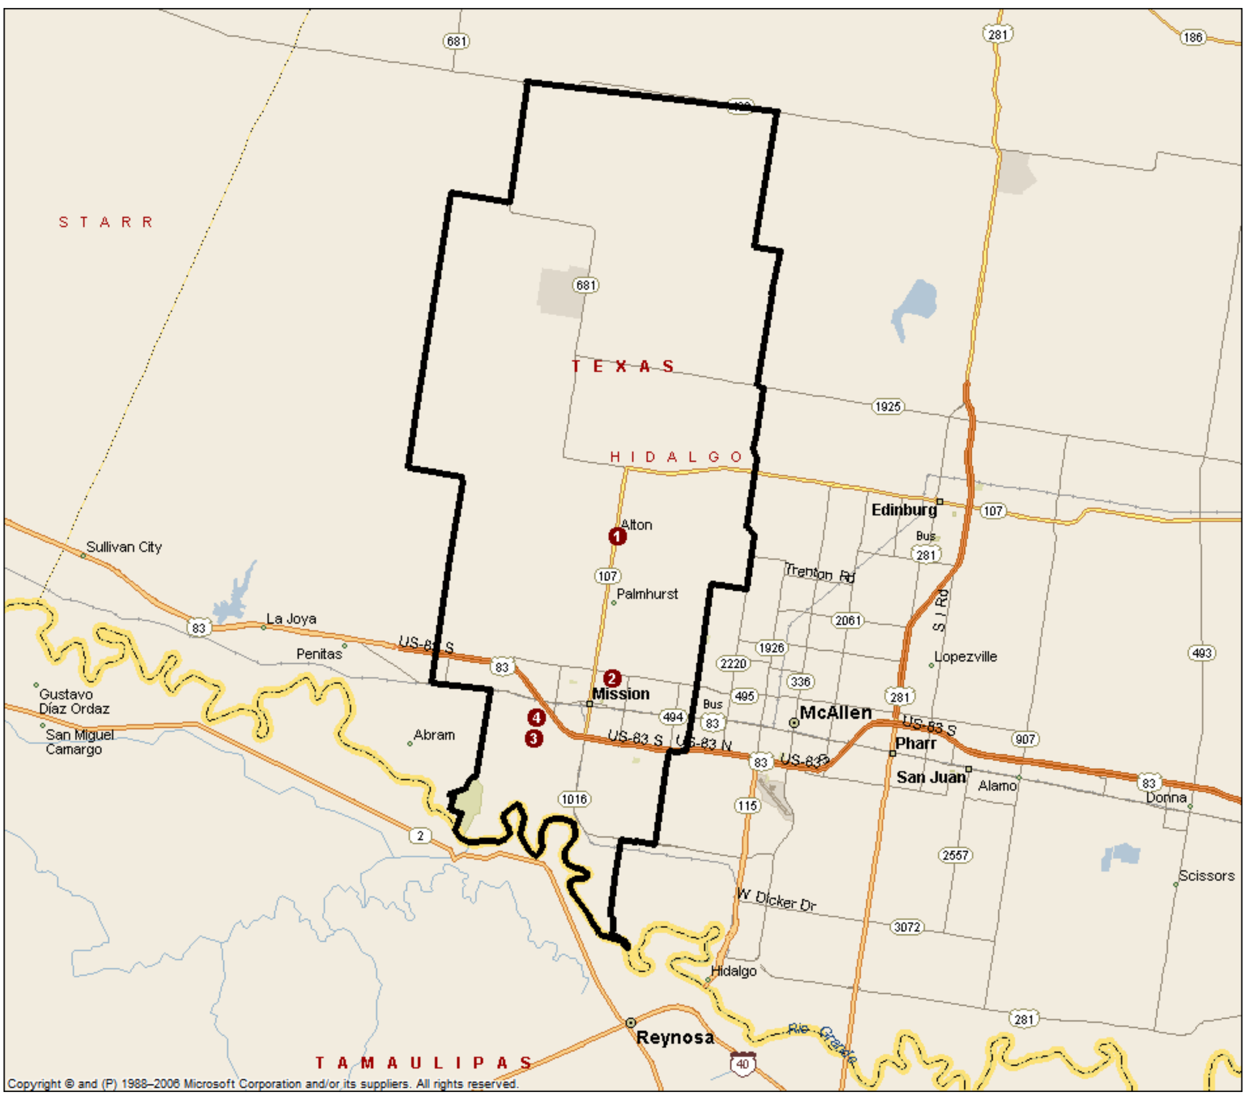
We contacted Steve Pena with the City of Alton for information regarding economic development. According to Mr. Pena, there are no commercial expansions or corporate relocations planned in the City of Alton in the near future.

LIHTC FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers.

Novogradac identified 27 family LIHTC developments ranging from one to 208 units each. Of the twenty-seven LIHTC developments, 1209 Keralum currently has 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. Therefore, this property has been excluded from the family LIHTC analysis and will be addressed in the family subsidized analysis section. Of the twenty-six remaining family LIHTC developments, four properties constructed between 2002 and 2007, with a total of 644 units, were able to provide current property and market data.

A map of the surveyed properties can be found below:



SURVEYED PROPERTIES			
Number	Name	Location	Type
1	La Villa De Alton	Alton	LIHTC – Family
2	Pueblo De Paz Apartments	Mission	LIHTC/Market – Family
3	Rio De Vida Apartments	Mission	LIHTC/Market – Family
4	Vida Que Canta Apartments	Mission	LIHTC – Family

The following pictures identify surveyed LIHTC family properties in the Submarket:

Pueblo De Paz Apartments

Rio De Vida Apartments

Vida Que Canta Apartments

Excluded Properties

Novogradac identified 27 family LIHTC developments ranging from one to 208 units each. Of the 27 family LIHTC developments, Novogradac has excluded 23 LIHTC developments from our analysis. One of the excluded LIHTC properties, 1209 Keralum, currently has 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. This property has been excluded from the LIHTC analysis and will be addressed in the subsidized family market analysis section. The subsequent table lists the 23 remaining family LIHTC properties in the PMA that were excluded from this analysis and the basis for their exclusion. Multiple attempts were made to contact each of the excluded properties with no success. Of the excluded properties below, only 1209 Keralum, Maryland 1, Chaparral Heights I and II, and 905 West 24th Street are currently listed on the most recent 2008 Property Inventory published by the Texas Department of Housing and Community Affairs. Additionally, all of the excluded properties below, except for Chaparral Heights II (1995) were allocated in 1992 or prior. Therefore, it is likely that the majority of the LIHTC properties listed below are no longer within their compliance period and are operating as market rate properties. It should be noted that the majority of the LIHTC properties listed below have less than 12 units and do not offer on-site management.

EXCLUDED PROPERTIES LIST

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are two family properties in the West Central Hidalgo Submarket, which have received an allocation in the last three years, Vida Que Canta and Casa Alton. Vida Que Canta Apartments, located in Mission, received an allocation in 2005 and was constructed in 2006. This property has been stabilized for a year or more and is being used in the supply analysis that follows. Vida Que Canta received a small allocation of funding in early 2008; however, further information regarding this lesser allocation was unavailable.

Casa Alton is a proposed LIHTC development located just north of the City of Mission in Alton, Texas. This development was allocated tax credit funding in the final allocation cycle of 2007; it will offer 76 one-, two-, three-, and four-bedroom units at 30, 40, 50, and 60 percent of AMI, as well as, market rate units. The one-, two-, three-, and four-bedroom units will be 750, 947, 1,068, and 1,251 square feet in size, respectively. The property's 76 units will be located in 19 single-story fourplex style buildings. This property is currently under construction. Calls made to the project manager have not been returned as of the date of this study and, therefore, no timeline for start or end of construction or a projected placed in service date was available.

Unit Mix
The following table illustrates the unit mix in the family LIHTC rental property market.

Unit Mix - LIHTC Family		
Unit Type	**Total Units**	**Percent**
1 BR	52	8.00%
2 BR	307	47.70%
3 BR	285	44.30%
4 BR	N/A	N/A
Total	**644**	**100%**

We were unable to identify any properties with four-bedroom LIHTC units. Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.67 and is projected to decrease slightly by 2012 to 3.65. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

Unit Size
The following table illustrates the existing unit sizes in the family LIHTC rental property market.

Unit Size - LIHTC Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	720	750	735
2 BR	900	977	932
3 BR	1,100	1,250	1,162

The surveyed one-, two, and three-bedroom LIHTC units are 4.7, 8.0, and 6.6 percent smaller than the surveyed average unit sizes for the one-, two-, and three-bedroom market rate units in the Submarket

Premium Amenities				
Other Amenities				

The existing LIHTC multifamily properties in the West Central Hidalgo County Submarket offer a moderate amount of in-unit and community amenities. Most of the surveyed LIHTC properties offer unit amenities that include patios/balconies, central air conditioning, ceiling fans, ovens, dishwashers, garbage disposals, microwaves, and refrigerators. Washers/dryers and washer/dryer connections are not prevalent in the family LIHTC market. Most of the surveyed LIHTC properties offer community amenities including carport parking, a clubhouse, a central laundry facility, off-street parking, on-site management, a picnic area, playground, and swimming pool. Security features such as perimeter fencing and limited access are prevalent in the Submarket. Only one of the surveyed properties offered a premium amenity, such as daycare, however it is not considered a LIHTC market standard in the Submarket. Additionally, no non-shelter services are offered by the surveyed LIHTC properties in the Submarket.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type for the surveyed properties. La Villa de Alton has been excluded from this analysis as it is still in the lease-up stage.

Weighted Vacancy - LIHTC Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	32	0	0.00%
2 BR	276	18	6.52%
3 BR	260	16	6.15%
4 BR	N/A	N/A	N/A
Total	**568**	**34**	6.00%

It should be noted that the surveyed market rate properties in the Submarket have an average weighted vacancy rate of 2.90 percent. Affordable properties typically exhibit vacancy rates lower than that of market rate properties. The vacant units found at the surveyed LIHTC family properties are comprised entirely of units at the 60 percent of AMI set-aside and the market rate units. The higher than average weighted vacancy rate for the two- and three-bedroom units in the Submarket could be indicative of a lack of income qualified tenants for the 60 percent of AMI units.

Absorption

The following table lists the absorption rates for the surveyed properties.

Absorption – LIHTC Family		
Property Name	**Number of Units**	**Absorption Rate**
La Villa De Alton	76	9.5 units per month
Vida Que Canta	160	16 units per month
Rio De Vida	208	12 units per month
AVERAGE		**12.5 units per month**

Three of the four surveyed properties were able to provide absorption information, resulting in an overall average absorption rate of 12.5 units per month, as compared to the average absorption rate of the surveyed market rate properties, of 8.5 percent.

Waiting Lists

The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – LIHTC Family		
Property Name	**Number of Units**	**Households**
La Villa De Alton	76	15
Pueblo De Paz Apartments	200	For 2BR and 3BR at 40% AMI
Rio De Vida Apartments	208	None
Vida Que Canta Apartments	160	15

Three of the four surveyed family LIHTC properties currently maintain small waiting lists. The average length for the waiting lists at LIHTC properties in the Submarket is 15 households, as compared to the majority of the market rate properties in the Submarket which do not maintain a waiting list.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties. La Villa de Alton has been excluded from this analysis, as it is still in the leasing stages.

Vacancy – LIHTC Family		
Property Name	**Number of Units**	**Vacancy Rate**
Pueblo De Paz Apartments	200	5.00%
Rio De Vida Apartments	208	11.10%
Vida Que Canta Apartments	160	0.60%
AVERAGE		**5.57%**

Overall vacancy at the surveyed family LIHTC properties is slightly higher than the surveyed market rate properties in the Submarket, which have an overall average vacancy rate of 3.95 percent. All of the surveyed LIHTC properties were constructed between 2002 and 2007 and all of the surveyed LIHTC properties offer some units at lower set-asides. The overall average vacancy rate appears slightly lower than is typical considering the age, condition, and unit mix of the surveyed LIHTC properties.

Concessions

None of the LIHTC properties in the market are offering concessions.

Turnover

The following table summarizes turnover rates at the surveyed properties. La Villa de Alton has been excluded from this analysis, as it is still in the leasing stages.

Turnover – LIHTC Family		
Property Name	**Number of Units**	**Turnover**
Pueblo De Paz Apartments	200	37%
Rio De Vida Apartments	208	23%
Vida Que Canta Apartments	160	30%
AVERAGE	**568**	**30%**

The range of turnover rates at the surveyed family LIHTC properties in the Submarket is lower than the average turnover rate of the surveyed market rate properties (41 percent).

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions. Adjustments to utilities have not been made.

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The rents at all of the surveyed LIHTC properties, including those of the market rate units, are below the current payment standards for Hidalgo County. None of the surveyed LIHTC properties have rents set at the maximum allowable levels.

LIHTC Family Supply Conclusion

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.67 and is projected to decrease slightly by 2012 to 3.65. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

The existing LIHTC multifamily properties in the West Central Hidalgo County Submarket offer a moderate amount of in-unit and community amenities. Most of the surveyed LIHTC properties offer unit amenities that include patios/balconies, central air, ceiling fans, ovens, dishwashers, garbage disposals, microwaves, and refrigerators. Washers/dryers and washer/dryer connections are not prevalent in the family LIHTC market. Most of the surveyed LIHTC properties offer community amenities including carport parking, a clubhouse, a central laundry facility, off-street parking, on-site management, a picnic area, playground, and swimming pool. Security features such as perimeter fencing and limited access are prevalent in the Submarket. No premium amenities or services are offered by the surveyed LIHTC properties in the Submarket.

The surveyed one-, two, and three-bedroom LIHTC units are 4.7, 8.0, and 6.6 percent smaller than the surveyed average unit sizes for the one-, two-, and three-bedroom market rate units in the Submarket. Three of the four surveyed properties were able to provide absorption information, resulting in an overall average absorption rate of 12.5 units per month, as compared to the average absorption rate of the surveyed market rate properties, of 8.5 percent. The average length for the waiting lists at LIHTC properties in the Submarket is 15 households, as compared to the majority of the market rate properties in the Submarket which do not maintain a waiting list. Overall vacancy at the surveyed family LIHTC properties is slightly higher than the surveyed market rate properties in the Submarket, which have an overall average vacancy rate of 3.95 percent. The range of turnover rates at the surveyed family LIHTC properties in the Submarket is lower than the average turnover rate of the surveyed market rate properties (41 percent).

The rents at all of the surveyed LIHTC properties, including those of the market rate units, are below the current payment standards for Hidalgo County. None of the surveyed LIHTC properties have rents set at the maximum allowable levels.

LIHTC SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers.

Novogradac identified two senior LIHTC developments, 624 Keralum aka 4-Plex Apartments and Los Naranjos, with four and 30 units, respectively. Los Naranjos is a combination LIHTC/USDA development with 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. Therefore, this property has been excluded from the senior LIHTC analysis and will be addressed in the senior subsidized analysis section. We attempted to contact 624 Keralum multiple times in person and over the phone to no success. Therefore, due to the lack of available data, we were unable to perform a senior LIHTC market analysis.

Proposed/Under Construction

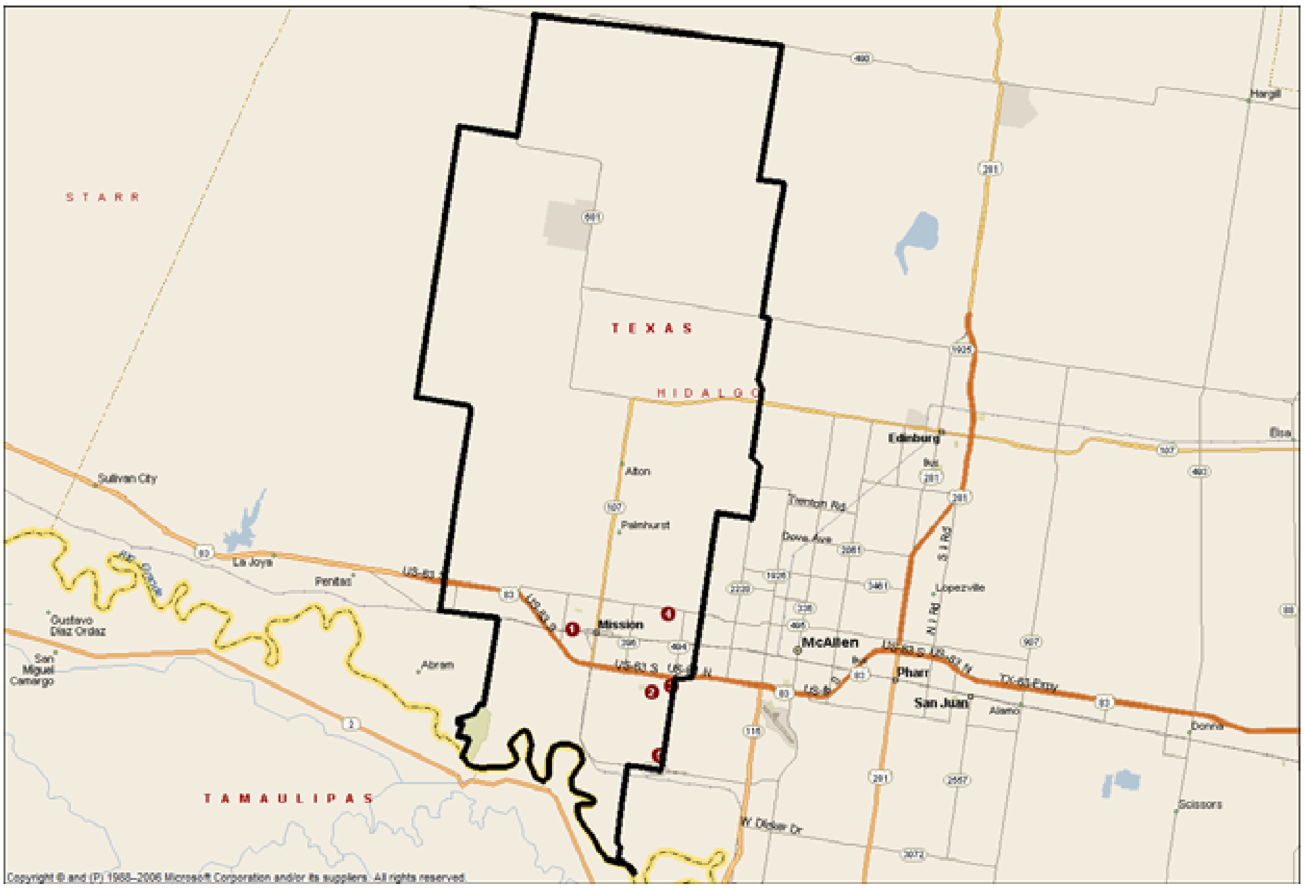
According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are no proposed or under construction senior LIHTC properties in the West Central Hidalgo County Submarket..

MARKET RATE FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials.

Novogradac was able to identify and survey five family market rate developments in the West Central Hidalgo County Submarket: San Pedro at Sharyland Apartments, River Oaks Garden Apartments, Reserve at Cimarron, Las Villas De San Augustin and Greenlawn Apartments. Due to the limited amount of available market rate family data, we completed a limited market rate family market analysis.

The following map illustrates the location of the surveyed market rate family properties in the Submarket.



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Greenlawn Apartments	Mission	Market – Family
2	Las Villas de San Agustin	Mission	Market – Family
3	Reserve at Cimarron	Mission	Market – Family
4	River Oaks Garden Apartments	Mission	Market – Family
5	San Pedro at Sharyland Apartments	Mission	Market - Family

Reserve at Cimarron

River Oaks Garden Apartments

San Pedro at Sharyland Apartments

Excluded Properties

The following table illustrates all of the excluded market rate properties in the Submarket. There are no other identifiable market rate properties in the Submarket. We have only excluded properties that we were unable to contact either in person or over the phone or properties that are fully furnished and/or corporate apartments. We attempted to contact the excluded properties multiple times with no success. Therefore, we were unable to confirm the target population for each development; we assume all of the following properties are family-oriented.

Name	Location	Type	Reason for Exclusion
Texan Guest Ranch Apartments	Mission	Market – Family	Fully Furnished
Mission Village	Mission	Market – Family	Could not contact
Shary Creek Apartments	Mission	Market – Family	Could not contact
Ocean Tower	Mission	Market – Family	Could not contact

Proposed Construction

According to the property manager at Las Villas De San Augustin, there is a market rate property currently under construction near the property. The property, Villa Rose, is expected to be completed in approximately two months, but further details were unavailable. We contacted Daniel Silva with the Mission Economic Development Authority in Mission, Texas. According to Mr. Silva, there is a luxury gated multifamily apartment development comprised of 60 units, which is currently under construction, adjacent to the under construction Vantage Condominium tower. Mr. Silva was unable to provide further information regarding this development. However, Mr. Silva did note that this project is also adjacent to a newly constructed apartment complex, developed by JMA Enterprises. Mr. Silva was unable to provide the name of this multifamily development.

Unit Mix

The following table illustrates the unit mix in the family market rate rental property market. It should be noted that market rate properties unable to provide unit mixes and have been excluded from this analysis.

Unit Mix - Market Family		
Unit Type	**Total Units**	**Percent**
1 BR	122	33%
2 BR	210	56%
3 BR	40	11%
Total	**372**	**100%**

We were unable to identify any four-bedroom market rate units. Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.67 and is projected to decrease slightly by 2012 to 3.65. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient market rate multifamily developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family market rate rental property market.

Unit Size – Market Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	695	830	771
2 BR	954	1,100	1,013
3 BR	1,200	1,278	1,249

The average unit sizes of the market rate family one-, two-, and three-bedroom units in the Submarket are 4.6, 8.0, and 7.0 percent larger, respectively, than the one-, two-, and three-bedroom units at family LIHTC properties.

Other Amenities					

The surveyed market rate properties in the West Central Hidalgo County Submarket offer a moderate amount of in-unit and community amenities. The majority of the surveyed market rate properties offer washer/dryer hookups and/or appliances in the units. Three of the five surveyed properties offer security features of some kind.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit types for the surveyed properties. It should be noted that any properties unable to provide vacancy by unit type or still in lease-up have been excluded from this analysis.

Weighted Vacancy - Market Family			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	26	0	0.0%
2 BR	78	3	3.8%
Total	**104**	**3**	2.9%

The average weighted vacancy rate for the surveyed market rate properties is approximately half that of the surveyed LIHTC properties (6.0 percent).

Absorption

Two of the surveyed market rate properties were able to provide absorption rates of 10 units per month and seven units per month, resulting in an absorption rate of 8.5 units per month, as compared to surveyed LIHTC properties which have an average absorption rate of 12.5 units per month.

Waiting List

Two of the market rate family properties in the market maintain a waiting list short waiting lists less than five households in length for one through three-bedroom units. Waiting lists are not prevalent at the market rate properties in the Submarket.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties. It should be noted any properties currently in leas-up have been excluded from this analysis.

Vacancy – Market Family			
Property Name	Number of Units	Vacant Units	Vacancy Rate
Greenlawn Apartments	24	3	12.50%
Las Villas de San Augustin	80	0	0.00%
Reserve at Cimarron	152	5	3.30%
River Oaks Garden Apartments	67	0	0.00
AVERAGE	**323**	**8**	**2.5%**

The average vacancy rates for the market rate properties in the Submarket is slightly lower than the average vacancy rate of the LIHTC properties in the market (5.57 percent).

Concessions

Only one market rate property is offering concessions. Concessions are not prevalent in the market.

Turnover

Four of the five surveyed market rate properties were able to provide turnover information. The following table illustrates turnover information in the market.

Turnover – Market Family

Property Name	Number of Units	Turnover
Greenlawn Apartments	24	N/A
Las Villas de San Augustin	80	60%
Reserve at Cimarron	152	47%
