River Oaks Garden Apartments	67	27%
San Pedro at Sharyland Apartments	268	31%
AVERAGE		**41%**

Annual turnover rates reported range from 27 percent to 60 percent, with an average of 41 percent, which is slightly higher than the average turnover rate of the surveyed LIHTC properties in the Submarket (30 percent).

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The rental rates for all, but one, of the surveyed market rate properties are above the current payment standards for Hidalgo County. The average market rents for the one, two, and three-bedroom units at the surveyed market rate properties are $704, $827, and $1,003. The market rate rents at all, but one, of the surveyed properties are above the LIHTC 60 percent of AMI maximum allowable level.

Market Supply Conclusion

Small unit types are currently prevalent in the Submarket. However, the Submarket's household size is significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient market rate multifamily developments on which to base an effective analysis, demographic projections, and anecdotal evidence indicate possible unmet demand for larger bedroom types.

The surveyed market rate properties in the West Central Hidalgo County Submarket offer a moderate amount of in-unit and community amenities. The majority of the surveyed market rate properties offer washer/dryer hookups and/or appliances in the units. Three of the five surveyed properties offer security features of some kind.

The average unit sizes of the market rate family one-, two-, and three-bedroom units in the Submarket are 4.6, 8.0, and 7.0 percent larger, respectively, than the one-, two-, and three-bedroom units at family LIHTC properties. The average weighted vacancy rate for the surveyed market rate properties is approximately half that of the surveyed LIHTC properties (6.0 percent).

Two of the surveyed market rate properties were able to provide absorption rates of 10 units per month and seven units per month, resulting in an absorption rate of 8.5 units per month, as compared to surveyed LIHTC properties which have an average absorption rate of 12.5 units per month. Waiting lists are not prevalent at the market rate properties in the Submarket. The average vacancy rates for the market rate properties in the Submarket (2.5 percent) is slightly lower than the average vacancy rate of the LIHTC properties in the market (5.57 percent). Annual turnover rates reported range from 27 percent to 60 percent, with an average of 41 percent, which is slightly higher than the average turnover rate of the surveyed LIHTC properties in the Submarket (30 percent).

The rental rates for all, but one, of the surveyed market rate properties are above the current payment standards for Hidalgo County. The average market rents for the one, two, and three-bedroom units at the surveyed market rate properties are $704, $827, and $1,003. The market rate rents at all, but one, of the surveyed properties are above the LIHTC 60 percent of AMI maximum allowable level.

MARKET RATE SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable existing senior market rate properties in the West Central Hidalgo County Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis.

Proposed Construction

We were unable to identify any proposed or under construction market rate senior developments in the Submarket.

SUBSIDIZED FAMILY SUPPLY

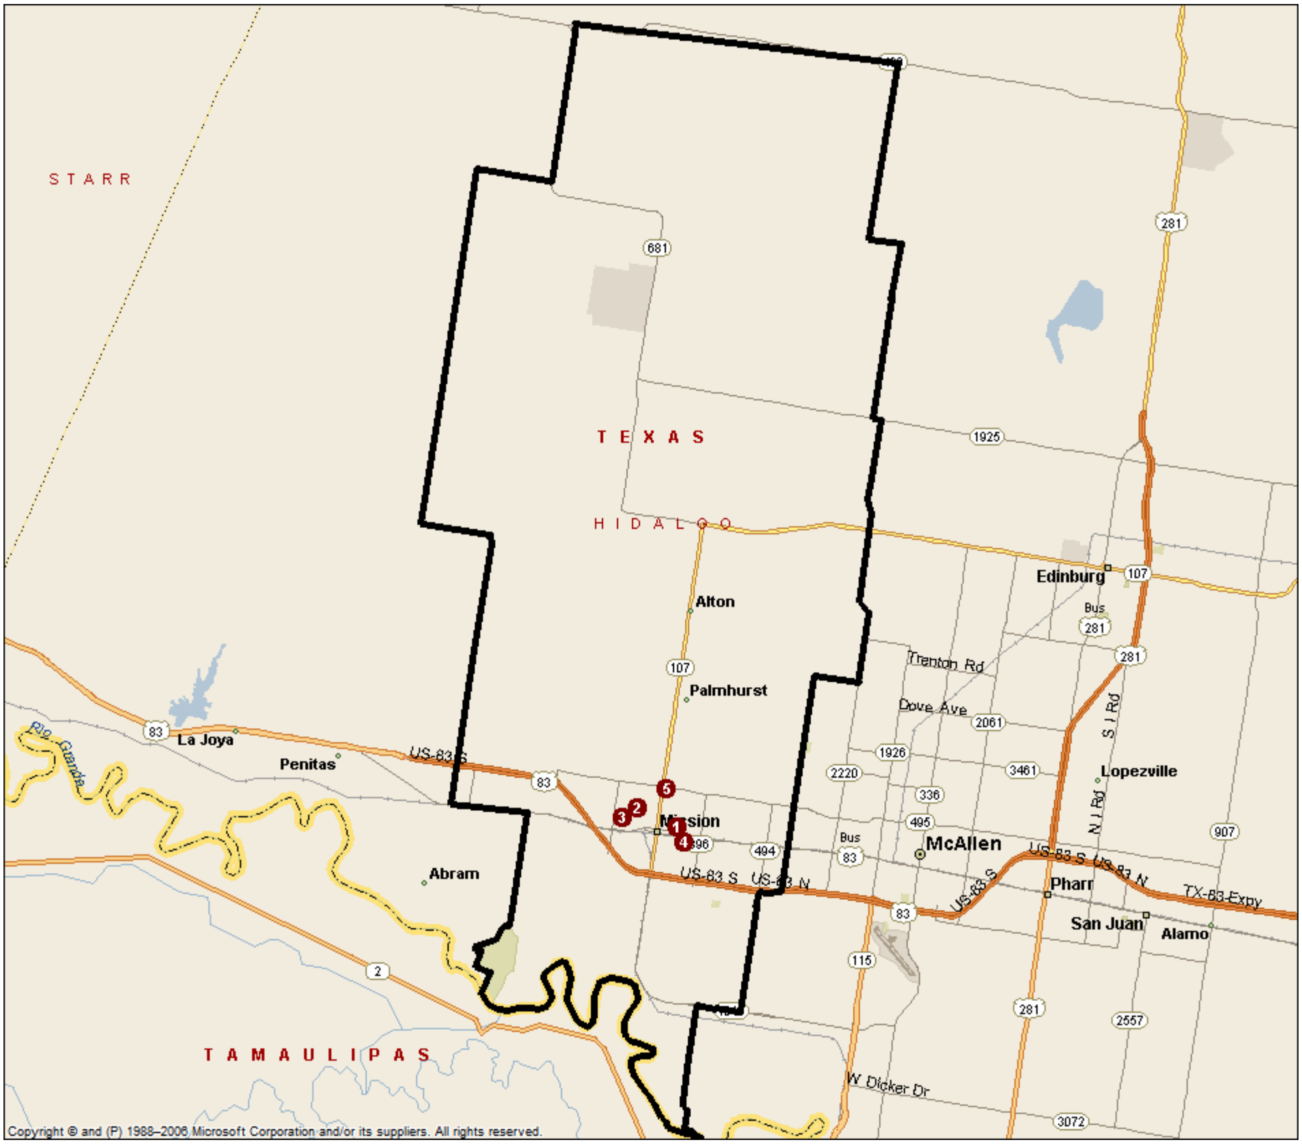
We attempted to identify all existing, proposed, and under construction family oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are six existing family-targeted subsidized developments located in the West Central Hidalgo Submarket. We were able to acquire information on five of the six existing family-oriented subsidized developments. Of the five subsidized family properties, 1209 Keralum is a LIHTC property with 100 percent of tenants using housing choice vouchers, enabling them to pay no more than 30 percent of their annual gross income towards rent. Mission Village Apartments is a Section 8 development with 100 percent of tenants paying no more than 30 percent of their annual gross income towards the contract rents. The remaining three developments, Anacua Apartments, Aldea Apartments, 52 scattered-site single-family homes, are public housing developments administered by the Mission Housing Authority.

According to Jamie Ayala, with the Housing Authority of the City of Mission, Anacua Apartments was built in 1942 and offers 80 one-, two- and three-bedroom units in 26 duplexes and rowhouses. Aldea Apartments was built in 1983 and offers 48 one-, two- and three-bedroom units in 24 duplexes. The third multifamily public housing development consists of 52 three-, four- and five-bedroom single-family homes on scattered sites. The single-family homes were built between 1994 and 1995. Addresses for the 52 scattered site single-family homes were unavailable. Although information regarding occupancy, unit mix, and amenities was available for these three developments, Mr. Ayala was unable to provide the majority of the market information and rental rates.

Based on the lack of available data, we completed only a limited subsidized family market analysis.

The following map illustrates the location of the surveyed family-oriented subsidized properties in the Submarket.



SURVEYED FAMILY PROPERTIES

Number	Name	Location	Type
1	1209 Keralum	Mission	LIHTC/Section8 – Family
2	52 Scattered-Site Single-family Homes	Mission	Public Housing – Family
3	Aldea Apartments	Mission	Public Housing – Family
4	Anacua Apartments	Mission	Public Housing – Family
5	Mission Village Apartments	Mission	LIHTC/Section 8– Family

Subsidized Multifamily Market
The following pictures identify the surveyed subsidized family properties in the Submarket.

1209 Keralum

52 scattered-site single-family homes

Aldea Apartments

Anacua Apartments

Mission Village Apartments

Excluded Properties
We were unable to acquire information on El Rosario Homes, a family-targeted Section 8 development located at 1802 Nicholson Avenue in Mission. El Rosario Homes offers three- and four-bedroom units. Additional information regarding El Rosario Homes was unavailable. We attempted to contact this property multiple times, but our calls have not been returned as of the date of this study.

Proposed Construction
We attempted to contact Jamie Ayala, with the Housing Authority of the City of Mission, however our phone calls have not been returned as of the date of this study.

Unit Mix
The following table illustrates the unit mix in the family subsidized rental property market.

Unit Mix - Subsidized Family		
Unit Type	**Total Units**	**Percent**
1 BR	29	12.95%
2 BR	67	29.91%
3 BR	93	41.52%
4 BR	33	14.73%
5 BR	2	0.89%
Total	**224**	**100%**

Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.67 and is projected to decrease slightly by 2012 to 3.65. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the subsidized rental property market.

Unit Size - Subsidized Family			
Unit Type	**Minimum Surveyed**	**Maximum Surveyed**	**Surveyed Average**
1 BR	500	850	598
2 BR	700	750	726
3 BR	900	1,300	1,030
4 BR	1,134	1,400	1,267
5 BR	1,500	1,500	1,500

It should be noted that there was only one property with five-bedroom units in the Submarket. The subsidized one, two and three-bedroom average unit sizes are 18.6, 22.1, and 11.4 percent smaller, respectively, than the one, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. There were no four and five bedroom units among the surveyed LIHTC developments.

The existing subsidized multifamily properties in the West Central Hidalgo County Submarket offer limited in-unit and community amenities. The majority of the surveyed subsidized properties offer no services, no security features, and no premium amenities. Tile flooring versus carpet flooring is common among the subsidized properties. The majority of the surveyed properties offer car port parking at no additional cost. A basic appliance package is provided with washer connections only in most units, except for Mission Village Apartments, which offers only a central laundry facility.

By-Unit Weighted Vacancy

The following table illustrates the weighted vacancy rates in the subsidized rental property market.

Weighted Vacancy - Subsidized Family			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	29	0	0.00%
2 BR	67	1	1.50%
3 BR	93	1	1.10%
4 BR	33	0	0.00%
5 BR	2	0	0.00%
Total	**224**	**2**	**0.90%**

The average weighted vacancy of the subsidized properties in the Submarket (0.90 percent) is significantly lower than the average weighted vacancy of the surveyed LIHTC properties in the Submarket (6.0 percent).

Absorption

None of the surveyed subsidized properties was able to provide absorption information.

Waiting List

The following table illustrates the waiting lists in the subsidized rental property market.

Waiting Lists – Subsidized Family		
Property Name	Number of Units	Households
1209 Keralum	4	From the Waiting List at Mission Housing Authority; 1,422 HH
52 Scattered-Site Single-family Homes	52	From the Waiting List at Mission Housing Authority; 1,422
Aldea Apartments	48	From the Waiting List at Mission Housing Authority; 1,422
Anacua Apartments	80	From the Waiting List at Mission Housing Authority; 1,422
Mission Village Apartments	40	30 HH

All but one, of the surveyed developments draw tenants from the Mission Housing Authority's combined waiting list for Housing Choice Vouchers and Public Housing units. This waiting list currently has 1,422 households and is significantly longer that the average length of the waiting lists of the LIHTC properties (15 households).

Vacancy Levels
The following table illustrates the vacancy rates in the subsidized rental property market.

Vacancy – Subsidized Family			
Property Name	**Number of Units**	**Vacant Units**	**Vacancy Rate**
1209 Keralum	4	0	0.00%
52 Scattered-Site Single-family Homes	52	0	0.00%
Aldea Apartments	48	1	2.10%
Anacua Apartments	80	1	1.30%
Mission Village Apartments	40	0	0.00%
AVERAGE	**224**	**2**	**0.9%**

The overall average vacancy rate of the surveyed subsidized properties in the Submarket (0.9 percent) is significantly lower than the overall average vacancy rate of the surveyed LIHTC properties in the market (5.57 percent).

Concessions
None of the subsidized family properties in the market are offering concessions.

Turnover
Only two properties in our survey were able to provide turnover rates of 1 and 20 percent, respectively, for an average turnover rate of 10.5 percent as compared to the average turnover rate of the surveyed LIHTC properties (30 percent).

PAYMENT STANDARDS	
Units	**Payment Standards**
Studio	$470
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

Only two surveyed subsidized properties to provide rental rates. The rents at both surveyed subsidized properties are well below the payment standards for Hidalgo County. According to the Mission Housing Authority, the combined waiting list for Housing Choice Vouchers and Public Housing is 1,422 households long, indicating significant demand for very low income affordable housing.

Subsidized Family Supply Conclusion

Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.67 and is projected to decrease slightly by 2012 to 3.65. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 39 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

The existing subsidized multifamily properties in the West Central Hidalgo County Submarket offer limited in-unit and community amenities. The majority of the surveyed subsidized properties offer no services, no security features, and no premium amenities. Tile flooring versus carpet flooring is common among the subsidized properties. The majority of the surveyed properties offer car port parking at no additional cost. A basic appliance package is provided with washer connections only in most units, except for Mission Village Apartments, which offers only a central laundry facility.

None of surveyed properties is offering concessions and none of the properties was able to provide absorption information. The subsidized one, two and three-bedroom average unit sizes are 18.6, 22.1, and 11.4 percent smaller, respectively, than the one, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. There were no four and five bedroom units among the surveyed LIHTC developments. The average weighted vacancy of the subsidized properties in the Submarket (0.90 percent) is significantly lower than the average weighted vacancy of the surveyed LIHTC properties in the Submarket (6.0 percent).

All but one, of the surveyed developments draw tenants from the Mission Housing Authority's combined waiting list for Housing Choice Vouchers and Public Housing units. This waiting list currently has 1,422 households and is significantly longer that the average length of the waiting lists of the LIHTC properties (15 households). Only two properties in our survey were able to provide turnover rates of 1 and 20 percent, respectively, for an average turnover rate of 10.5 percent as compared to the average turnover rate of the surveyed LIHTC properties (30 percent). The overall average vacancy rate of the surveyed subsidized properties in the Submarket (0.9 percent) is significantly lower than the overall average vacancy rate of the surveyed LIHTC properties in the market (5.57 percent)

Only two surveyed subsidized properties to provide rental rates. The rents at both surveyed subsidized properties are well below the payment standards for Hidalgo County.

.

SUBSIDIZED SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are four existing senior subsidized developments located in the West Central Hidalgo Submarket, Mission Palms Retirement Homes, Villas De Arnaldo Ramirez, Los Naranjos and Palm Plaza I, II, and III, which operate as one property. We were able to acquire information on two of the four subsidized senior properties.

Los Naranjos is a combination LIHTC/USDA senior/disabled property with 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. Palm Plaza I, II, and III is a three-phase senior/disabled public housing development constructed in 1967, 1969, and 1996. According to Jaime Ayala in the Public Housing Office of the Housing Authority of the City of Mission, Palm Plaza I, II and III offers 90 studio, one-, and two-bedroom units. Although information regarding occupancy, unit mix, and amenities was available for Palm Plaza, Mr. Ayala was unable to provide the majority of the market information and rental rates.

Based on the lack of available data, we completed only a limited subsidized senior supply analysis.

The following map illustrates the location of the surveyed senior subsidized properties in the Submarket.

SURVEYED SENIOR PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Los Naranjos	Alton	LIHTC/USDA – Senior/Disabled
2	Palm Plaza I, II, III	Mission	Public Housing – Senior/Disabled

Palm Plaza II and III

Excluded Properties

We were unable to acquire information on Villas De Arnaldo Ramirez and Mission Palms Retirement Housing. We attempted to contact these properties multiple times, but our calls have not been returned as of the date of this study.

EXCLUDED PROPERTIES LIST				
Name	Address	Type	No. of Units	Reason For Exclusion
Villas De Arnaldo Ramirez	1305 Matamoros Street	Section 8	N/A	Could not Contact
Mission Palms Retirement Housing	900 Los Ebanos Road	Section 8	N/A	Could not Contact

Proposed Construction

We attempted to contact Jamie Ayala, with the Housing Authority of the City of Mission, however our phone calls have not been returned as of the date of this study.

Unit Mix

The following table illustrates the unit mix in the senior subsidized rental property market.

Unit Mix - Subsidized Senior		
Unit Type	Total Units	Percent
0 BR	30	25.00%
1 BR	84	70.00%
2 BR	6	5.00%
Total	**120**	**100.00%**

Small unit types are currently prevalent in the senior subsidized Submarket.

Unit Size

Management at Los Naranjos was unable to provide unit size information. The following table illustrates the existing unit sizes for Palm Plaza I, II, and III.

Unit Size - Subsidized Senior			
Unit Type	0 Bedroom	1 Bedroom	2 Bedroom
Palm Plaza I,II, and III	450	500	750

Other Amenities		
Other	n/a	n/a

The existing senior subsidized multifamily properties in the West Central Hidalgo County Submarket offer moderate in-unit and community amenities. The majority of the surveyed subsidized properties offer no non-shelter services, no security features, and no premium amenities. Tile flooring versus carpet flooring is common among the subsidized properties. The surveyed properties offer only off-street parking. A basic appliance package is provided with in unit washer/dryer connections found at the newer property, Los Naranjos, and a central laundry facility only at Palm Plaza. Overall, as a newly constructed combination USDA/LIHTC property, Los Naranjos offers a superior in unit and community amenities package, relative to the amenities offered by Palm Plaza I, II, and III. For example, Palm Plaza does not offer central air conditioning, onsite-management, or balconies/patios. However, Palm Plaza does offer elevators and hand rails. As a single story property, Los Naranjos does not require elevators.

By-Unit Weighted Vacancy
None of the surveyed subsidized senior properties is currently exhibiting vacancies.

Absorption
None of the surveyed subsidized senior properties was able to provide absorption information.

Waiting List
The following table illustrates the waiting lists in the subsidized rental property market.

Waiting Lists – Subsidized Senior

Property Name	Number of Units	Households
Los Naranjos	30	4HH
Palm Plaza I, II, and III	90	Undetermined

Los Naranjos currently maintains a waiting list of four households. Palm Plaza draws tenants from the Housing Authority of the City of Mission's combined waiting list for Housing Choice Vouchers and Public Housing units. This waiting list currently has 1,422 households; however, the number of senior/disabled households on the waiting list was unavailable.

Vacancy Levels
There are currently no vacancies at the surveyed senior subsidized properties.

Concessions
None of the subsidized family properties in the market are offering concessions.

Turnover
The one property able to provide turnover information currently has a turnover rate of 10 percent.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Only Los Naranjos was able to provide information on rental rates. Los Naranjos is a LIHTC/USDA property with 100 percent of the tenants paying no more than 30 percent of their annual gross in income towards rent. The one and two-bedroom rents at Los Naranjos are well below the payment standards for Hidalgo County. According to the Mission Housing Authority, the combined waiting list for Housing Choice Vouchers and Public Housing is 1,422 households long, indicating significant demand for very low income affordable housing.

Subsidized Senior Supply Conclusion

Small unit types are currently prevalent in the senior subsidized Submarket. The existing senior subsidized multifamily properties in the West Central Hidalgo County Submarket offer moderate in-unit and community amenities. The majority of the surveyed subsidized properties offer no non-shelter services, no security features, and no premium amenities. Tile flooring versus carpet flooring is common among the subsidized properties. The surveyed properties offer only off-street parking. A basic appliance package is provided with in unit washer/dryer connections at only one of the properties.

Neither of the senior subsidized properties is offering concessions, was able to provide absorption information, or currently has any vacancies. Only Los Naranjos was able to provide turnover information. Los Naranjos currently has a turnover rate of 10 percent. Los Naranjos currently maintains a waiting list of four households. Palm Plaza draws tenants from the Housing Authority of the City of Mission's combined waiting list for Housing Choice Vouchers and Public Housing units. This waiting list currently has 1,422 households; however, the number of senior/disabled households on the waiting list was unavailable.

Only Los Naranjos was able to provide information on rental rates. Los Naranjos is a LIHTC/USDA property with 100 percent of the tenants paying no more than 30 percent of their annual gross in income towards rent. The one and two-bedroom rents at Los Naranjos are well below the payment standards for Hidalgo County. According to the Mission Housing Authority, the combined waiting list for Housing Choice Vouchers and Public Housing is 1,422 households long, indicating significant demand for very low income affordable housing.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the West Central Hidalgo County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the West Central Hidalgo County Submarket in 2007 is 42,868 and the total number of households in 2012 is projected to be 53,077. The total number of households age 55 and older in the Submarket for 2007 is 13,063, with a 2012 projection of 17,592 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 20.1 percent of the occupied housing unit households in the West Central Hidalgo County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 12.5 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a one-person household in the income range between 31 percent and 40 percent of AMI. A minimum income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the West Central Hidalgo County Submarket (McAllen-Edinburg-Mission, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*	
1 Person	$0	$9,150	$9,150	$12,200	$12,200	$15,250	$15,250	$18,300	$18,300	$24,400	$24,400	$30,500

5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households

Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the West Central Hidalgo County Submarket, approximately 30.0 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing

Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 4.1 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing

A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the West Central Hidalgo County Submarket, it is estimated that 25.9 percent of households are living in overcrowded units.

Movership or Turnover Rate

There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the three stabilized family LIHTC properties surveyed in the Submarket is approximately 30 percent.

The one surveyed senior LIHTC properties in this Submarket also carries an additional USDA subsidy. Therefore, for the purpose of this analysis, we have used the average senior subsidized property turnover rate of 10 percent.

Unstabilized Rental Units - Existing and Proposed

Casa Alton is a proposed LIHTC development located just north of the City of Mission in Alton, Texas. This development was allocated tax credit funding in the final allocation cycle of 2007; it will offer 76 one-, two-, three-, and four-bedroom units at 30, 40, 50, and 60 percent of AMI, as well as, market rate units. These units have been deducted from the following demand analysis, with the market rate units deducted from demand at 81 to 100 percent of AMI.

La Villa De Alton started leasing in January 2008 and is currently 81.6 percent occupied. As this property has not yet reached a stabilized occupancy rate, its 76 units at 30 and 60 percent of AMI have been deducted from the following demand analysis.

To our knowledge, there are no proposed or under construction senior LIHTC properties in the West Central Hidalgo County Submarket. With no identified senior LIHTC properties in the West Central Hidalgo County Submarket, no units were deducted from the senior demand analysis.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the West Central Hidalgo County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the subsequent tables:

2007 All Households – Without Turnover

Household Size	Total Renters - Baseline Year (2007)	Income-Qualified Renters - Baseline Year (2007)

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the West Central Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 25 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. This may explain the 6.0 percent average vacancy rate among family LIHTC properties in the Submarket, while market rate properties in the Submarket have an average vacancy rate of 2.9 percent. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. This suggests that the higher than average vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Senior Households

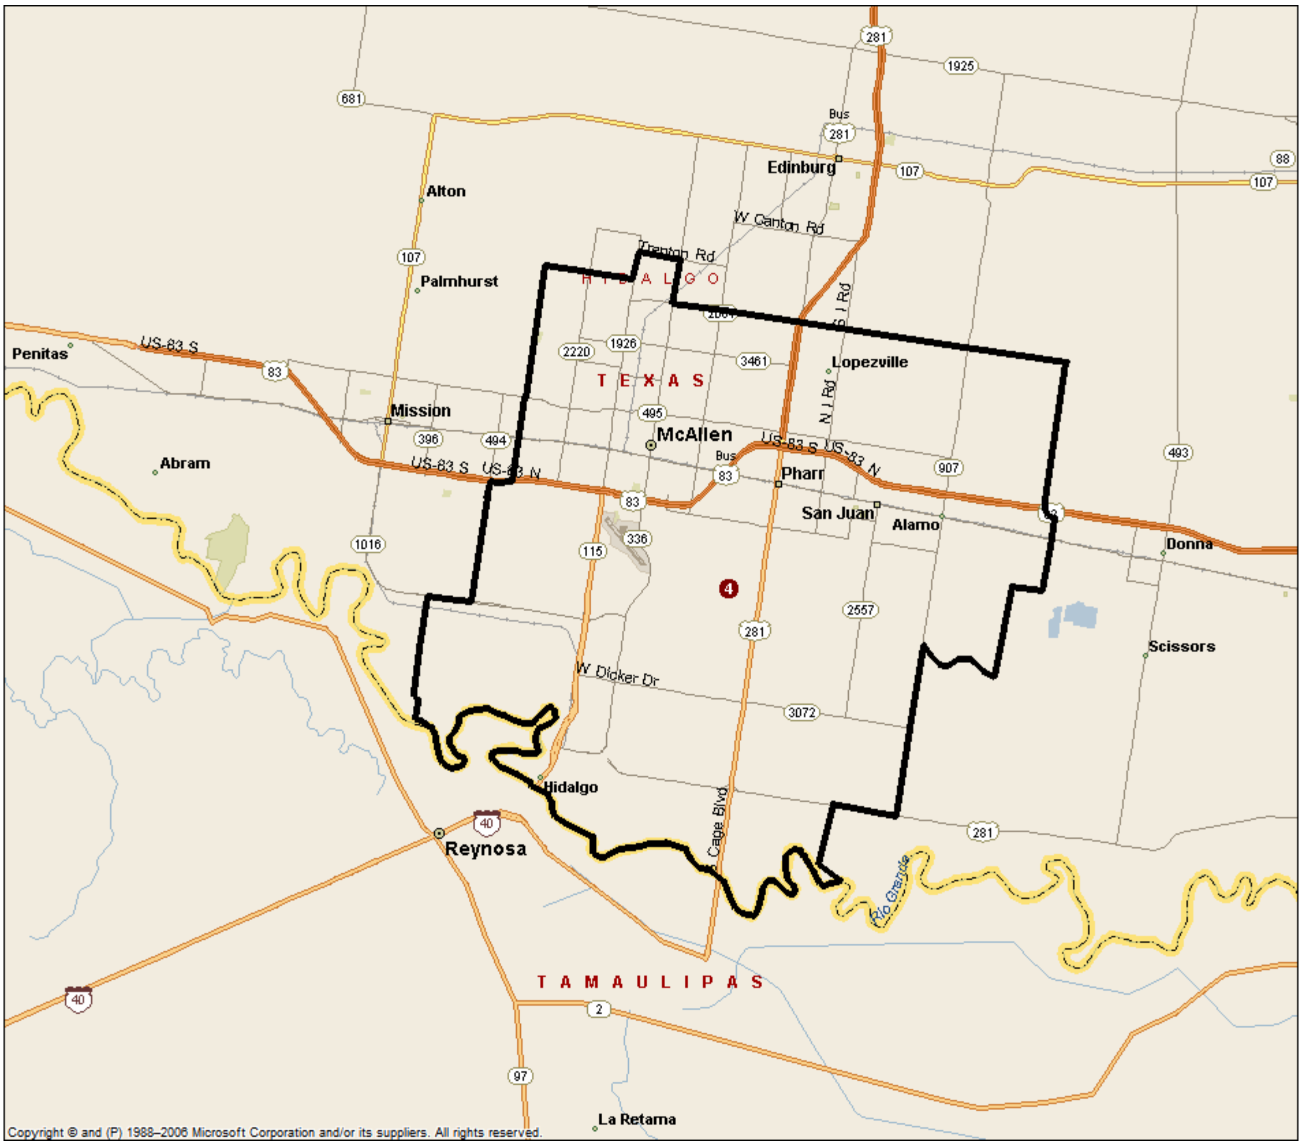
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 120 subsidized units serving low-income senior households in the West Central Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional LIHTC units planned, there is likely an unmet need for additional affordable senior housing units in this Submarket.

4. SOUTH CENTRAL HIDALGO COUNTY SUBMARKET ANALYSIS

SOUTH CENTRAL HIDALGO COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the South Hidalgo County Submarket, which is bounded to the north by Lark Avenue, Trenton Road, and Owassa Road; to the east by Valverde Road, Lakes Avenue, Border Road, Main Floodway Road, and South Alamo Road; to the south by the Texas-Mexico border; and to the west by Stewart Road, West Military Highway, Sharyland Road, U.S. Highway 83, and Taylor Road.. The following map illustrates the boundaries of the Submarket as defined above.

South Central Hidalgo County Submarket Map



The South Central Hidalgo County Submarket includes the communities/cities of McAllen, Pharr, San Juan, Lopezville, Hidalgo and Alamo. Approximately 50 to 70 percent of the area in this Submarket can be characterized as developed and within close proximity to most locational amenities and essential services. The remaining 30 to 50 percent of the land in this Submarket contains moderate to little development and offers relatively limited access to locational amenities and essential services. Development is located along U.S. Highway 83, which is the area's primary thoroughfare, and dissipates slowly in each direction with limited development occurring along the U.S. Mexico border region near the community of Hidalgo. The predominant form of housing in this Submarket is owner-occupied single-family homes in fair to excellent condition and less than five to 50 years in age. There is a significant amount of multifamily development in fair to excellent condition and less than five to 40 years in age.

Local Government

As previously mentioned, the South Central Hidalgo County Submarket includes the communities/cities of McAllen, Pharr, San Juan, Lopezville, Hidalgo and Alamo.

McAllen, Texas is the largest city in Hidalgo County and operates under a city manager/city Council form of government chartered on January 31, 1927. According to the City of McAllen website, the city is comprised of a land area of 46.7 square miles and has a population of 130,831.

Pharr, Texas is a city in Hidalgo County operating under a Mayor-Council form of government with one elected Mayor and six elected Commissioners. According to the U.S. Census, Pharr is comprised of a land area of 20.8 square miles and had a 2000 population of 46,660.

San Juan, Texas is a city in Hidalgo County. According to the U.S. Census, San Juan is comprised of a land area of 11.0 square miles and had a 2000 population of 26,229.

Lopezville, Texas is a census-designated place in Hidalgo County. According to the U.S. Census, Lopezville is comprised of a land area of 1.8 square miles and had a 2000 population of 4,476.

Hidalgo, Texas is a city in Hidalgo County. Hidalgo was incorporated in 1876. According to the U.S. Census, Hidalgo is comprised of a land area of 4.4 square miles and had a 2000 population of 7,322.

Alamo, Texas is a city in Hidalgo County operating under a Mayor-Council form of government with one elected Mayor and four elected Commissioners. According to the U.S. Census, Alamo is comprised of a land area of 5.7 square miles and had a 2000 population of 14,760.

Employment by Industry

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the South Central Hidalgo County Submarket are the educational services, retail trade, healthcare/social assistance, and construction sectors. Approximately 51 percent of people in South Central Hidalgo County work in these four industries. The Submarket has a larger number of persons employed in the retail trade sector and a smaller number of people employed in the construction, healthcare/social assistance and educational services sectors, relative to the MSA. Although, educational services and health care/social services are typically stable sectors of the economy, industries such as retail trade and construction are particularly susceptible to fluctuations in the economy. The large number of people employed in the retail trade and construction industries could negatively impact employment in the Submarket due to the current national economic downturn. However, the strong presence of the educational services and health care/social assistance industries should help promote economic stability.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing.

Commute Patterns in the South Central Hidalgo County Submarket

The table below summarizes commute times for the South Central Hidalgo County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	1,866
5-9 min	7,971
10-14 min	13,472
15-19 min	16,740
20-24 min	10,734
25-29 min	2,723
30-34 min	7,551
35-39 min	359
40-44 min	756
45-59 min	1,334
60-89 min	1,171
90+ min	1,020
Average Travel Time	19.3 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The South Central Hidalgo County Submarket has the shortest average commute time of the seven Submarkets. This Submarket includes McAllen, which is the largest population center in the MSA. Most of the area's major employers are within close proximity to McAllen, resulting in short commutes for employees.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the South Central Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA. Data such as population, households and growth patterns are studied, to determine if the McAllen-Edinburg-Mission MSA and the South Central Hidalgo County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population growth in the South Central Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA from 1990 through 2012.

Total Population				
Year	South Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	156,204	-	383,545	-
2000	207,576	3.29%	569,463	4.85%
2007	256,001	3.22%	732,166	3.94%
2012	298,163	3.29%	865,301	3.64%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Growth in the Submarket has been slightly slower than growth in the MSA in all years of analysis. Both the Submarket and the MSA show strong growth from 2007 through 2012, although the MSA will grow at a faster rate than the Submarket from 2007 through 2012. Overall, the rate of population growth in the MSA will decrease slightly from 2007 through 2012, while the rate of population growth in the Submarket will increase slightly from 2007 through 2012. The strong growth in the Submarket and the MSA is a positive indicator of the need for all forms of housing.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990 through 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group				
South Central Hidalgo County Submarket				
Age Cohort	**1990**	**2000**	**2007**	**2012**

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	South Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	43,622	-	103,479	-
2000	59,634	3.67%	156,824	5.15%
2007	74,654	3.47%	205,804	4.31%
2012	87,319	3.39%	244,775	3.79%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been strong through 2007; household growth in the Submarket slowed slightly from 2000 to 2007 and the trend is expected to continue through 2012. Similarly, household growth in the MSA is expected to slow from 2007 through 2012. However, overall household growth is strong and as the number of households increases, there will be a larger pool of potential tenants, suggesting a need for all forms of housing.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	South Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.46	-	3.60	-
2007	3.41	-0.20%	3.53	-0.27%
2012	3.40	-0.06%	3.51	-0.11%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly smaller than the MSA and both are significantly larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket and the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	South Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	$26,065	-	$24,843	-
2007	$32,123	3.21%	$30,519	3.15%
2012	$36,853	2.94%	$35,078	2.99%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 5.0 percent higher than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a slower rate from 2007 through 2012 than the previous seven years, as in the MSA. It should be noted that the median household income in the Submarket and MSA were approximately 60.4 and 57.4 percent of the national average in 2007. The lower median income level indicates increasing need for affordable housing in the Submarket.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - South Central Hidalgo County Submarket

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 31.8 percent of the population in the Submarket and 34.1 percent of the population in the MSA earned below $20,000 in 2007, with the largest percentage earning between zero dollars and $10,000. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 27.2 percent and 29.4 percent, respectively. However, in both instances, a significant portion of the population is projected to earn less than $20,000. This data provides strong support for affordable rental housing of all kinds in the Submarket and MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents to be over 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	South Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	27,670	-	63,856	-
2000	36,536	3.2%	90,763	4.2%
2007	45,011	3.2%	116,831	4.0%
2012	55,466	4.6%	149,302	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Senior population growth in the South Central Hidalgo County Submarket increased at a slightly slower pace, relative to the MSA from 2000 to 2007. Senior population growth in both the Submarket and the MSA is expected to grow at a strong rate from 2007 through 2012, with growth in the MSA exceeding that of the Submarket.

The exceptional projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	South Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	20,796	-	52,073	-
2007	25,582	3.2%	67,113	4.0%
2012	31,396	4.5%	85,658	5.5%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth in the Submarket and MSA is expected to be strong through 2012. The household growth rate in the MSA will exceed that of the Submarket from 2007 through 2012; however, the Submarket's household growth rate of 4.5 percent is considered very strong. The strong projected growth in senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME

Year	McAllen-Edinburg-Mission, TX MSA		South Central Hidalgo County Submarket		USA	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
			All Ages			
2007	$30,519	-	$32,213	-	$53,154	-
2012	$35,078	2.59%	$36,853	2.52%	$62,503	3.52%
			Age 55+			
2007	$27,687	-	$30,759	-	$32,710	-
2012	$32,712	3.07	$35,856	2.84%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in all areas of analysis are below those of all households. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The median household income in the Submarket and MSA were approximately 39.6 and 42.6 percent of the national average in 2007.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - South Central Hidalgo County Submarket (Age 55+)				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage

Total	**67,113**	**100%**	**85,658**	**100%**

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,600. When compared to the Submarket, the MSA has the largest percentage of seniors earning less than $35,000 annually, although negligibly so. Approximately 54.4 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The Submarket features slightly fewer senior households in these income brackets when compared to the MSA. By 2012, both areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 47.6 and 50.3 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. These factors indicate that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	South Central Hidalgo County Submarket				McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	16,974	81.6%	3,822	18.4%	43,784	84.1%	8,289	15.9%
2007	20,880	81.6%	4,702	18.4%	56,430	84.1%	10,683	15.9%
2012	25,626	81.6%	5,770	18.4%	72,023	84.1%	13,635	15.9%

Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008

As the above table illustrates, the senior housing market is dominated by owner-occupied units in all areas of analysis. The Submarket and MSA have a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above). The small percentage of renter-occupied senior households is not unusual in developing submarkets, where owner-occupied housing is predominant.

Senior Demographic Conclusion

Although the median senior household income for the Submarket is projected to increase from 2007 to 2012, growth in the national and MSA's median senior household income is projected to outpace growth in the Submarket. Both the MSA and Submarket feature significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,600. Approximately 54.4 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The Submarket features slightly less senior households in these income brackets when compared to the MSA and national averages.

LOCAL MARKET INFORMATION

South Central Hidalgo County Submarket

The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare

The majority of the healthcare providers in the South Central Hidalgo County Submarket are located in McAllen. The primary major medical providers in the South Central Hidalgo Submarket are the Rio Grande Regional Hospital, A&M Medical Center in McAllen, McAllen Heart Hospital, Texas Children's Hospital, and McAllen Medical Center. The McAllen Medical Center offers 441 licensed beds and approximately 400 physicians in 50 medical specialties.

Transportation

The South Central Hidalgo County Submarket is served by the McAllen Miller International Airport, which is located in McAllen, Texas. The McAllen Miller International Airport (MFE) is the primary business airport of the Rio Grande Valley and provides non-stop flights to Dallas-Fort Worth, Houston, and Las Vegas via American Airlines, Continental Airlines, and Allegiant Air.

Highway access to the South Central Hidalgo County Submarket can be accomplished via U.S. Highway 83. U.S. Highway 83 runs east/west from Harlingen, Texas to Manitoba, Canada.

Education

The South Central Hidalgo County Submarket is served by the McAllen Independent School District. The McAllen Independent School District has 21 elementary schools, six middle schools, and three high schools. The nearest universities are located in Edinburg and McAllen. The University of Texas-Pan American in Edinburg, Texas, with 17,337 students, including 2,261 graduate students, is the 10th largest university in the state and the fifth largest in the UT system and offers 54 bachelor's degree programs, 50 master's, and two doctoral programs. McAllen offers four additional colleges/universities including the San Antonio College of Medical and Dental Assistants, South Texas Community College, South Texas Vocational Technical Institute, and the University of Cosmetology Arts and Sciences.

Public Transportation

The South Central Hidalgo County Submarket is served by McAllen Express Transit, which operates six routes and one para-transit vehicle throughout the city of McAllen. Average monthly ridership is approximately 27,048 passengers. The $3.4 million Central Station serves as the main hub for McAllen Express Transit's six routes. Central Station is equipped with 14 bus bays, a 250-seat lobby, 14 ticket counters, and various commercial and retail uses. During its second year of operation Central Station hosted approximately 1.3 million people and approximately 60,709 people depart from Central Station per month.

Employment Centers

There are a significant number of employment centers in the South Central Hidalgo County Submarket. However, information regarding largest employers by submarket was unavailable. The largest Employers in the McAllen-Edinburg-Mission MSA include the following:

Rank	Company	Industry	Employees
1	Edinburg Consolidated I.S.D.	Education	3,600
2	McAllen I.S.D.	Education	3,595
3	Edinburg Regional Medical Center	Healthcare	3,000
4	University of Texas Pan American	Education	2,850
5	McAllen Medical Center	Healthcare	2,800
6	Hidalgo County	Government	2,211
7	Mission Consolidated I.S.D.	Education	2,140
8	City of McAllen	Government	1,801
9	Columbia Rio Grande Regional Hospital	Healthcare	975
10	South Texas Community College	Education	811

Employment in the McAllen-Edinburg-Mission MSA is dominated by relatively stable industries and all ten of the major employers are in the education, healthcare, and government sectors. However, according to 2007 employment by industry demographics, the educational services, retail trade, healthcare/social assistance, and construction sectors comprise approximately 51 percent of overall employment and are the top four industry sectors in the Submarket. Retail trade and construction are typically more volatile sectors of the economy as compared to historically stable industries such as education and healthcare, which make up approximately 26.9 percent of employment in the Submarket. Therefore, due to the high concentration of retail trade and construction industries in the Submarket, it is possible that the Submarket will experience slowing growth as a result of the national economic downturn.

Proximity to Local Services

There are a significant number of locational amenities in the South Central Hidalgo County Submarket. The majority of locational amenities are located in and surrounding the City of McAllen, Texas.

HOUSING SUPPLY ANALYSIS

SOUTH CENTRAL HIDALGO COUNTY SUBMARKET HOUSING SUPPLY ANALYSIS

Age of the Housing Stock

The following table presents the age of the housing stock in the South Central Hidalgo County Submarket.

AGE OF HOUSING STOCK IN PMA

Years	Number of Units	Percent of Housing Stock
1999-3/2000	3,718	5.15%
1995-1998	10,155	14.08%
1990-1994	8,628	11.96%
1980-1989	19,722	27.34%
1970-1979	15,341	21.27%
1960-1969	7,008	9.71%
1950-1959	4,122	5.71%
1940-1949	1,929	2.67%
1939 and Before	1,513	2.10%
Total	**72,136**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (74.65 percent) in the South Central Hidalgo County Submarket was constructed from 1970 through 1998. Approximately 50 to 70 percent of the area in this Submarket can be characterized as developed and within close proximity to most locational amenities and essential services. The remaining 30 to 50 percent of the area in this Submarket contains moderate to little development and offers relatively limited access to locational amenities and essential services. Development is located along U.S. Highway 83, which is the area's primary thoroughfare, and dissipates slowly in each direction with limited development occurring along the U.S. Mexico border region near the community of Hidalgo. The South Central Hidalgo County Submarket consists of primarily single-family homes and multifamily housing. Based upon observations in the field the predominant form of housing in this Submarket is owner-occupied single-family homes in fair to excellent condition and less than five to 50 years in age. There is a significant amount of multifamily development in fair to excellent condition and less than five to 40 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas. Building Permit Activity was not available by submarket.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 "5+ units" building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while "5+ units" building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008. The small percentage of multifamily permits issued indicates demand for multifamily housing of all kinds.

Interviews

Housing Authority of County of Hidalgo

The Housing Authority of the County of Hidalgo was established in 1948 in order to serve the local farmworking families and migrant farmworkers in the region. The Housing Authority of the County of Hidalgo currently administers Farm Labor Housing units and Public Housing units in Hidalgo County, as well as Section 8 Vouchers. According to Adela Montes, Deputy Director for the Housing Authority of the County of Hidalgo, there are currently 535 Farm Labor Housing units in two developments and 55 Public Housing units in two developments in Hidalgo County, excluding those administered the City of McAllen. Two of these developments, Villa San Juanita Rutledge and Memorial Apartments, are located in the South Central Hidalgo County Submarket and will be addressed in the subsidized family supply analysis section of this Submarket discussion. There are approximately 8,592 Housing Choice Vouchers budgeted for Hidalgo County and all are currently in use. Waiting Lists for Public Housing and Farm Labor Housing are currently open, while the waiting list for Housing Choice Vouchers is closed. There are approximately 896 households on the waiting list for Housing Choice Vouchers. Of the 896 households, 162 are elderly households. There is no separate waiting list for special needs households in the Housing Choice Voucher Program. Currently, there are 104 elderly households participating in the Housing Choice Voucher

Program in Hidalgo County. The number of households on the waiting list for Public Housing and Farm Labor Housing can be found below:

FARM LABOR HOUSING WAITING LIST – HIDALGO COUNTY					
Name	1BR	2BR	3BR	4BR	Total
Northside Apartments	14HH	11HH	2HH	0HH	27HH
Memorial Apartments	N/A	N/A	N/A	N/A	46HH

PUBLIC HOUSING WAITING LIST – HIDALGO COUNTY					
Name	1BR	2BR	3BR	4BR	Total
Villa Sandoval-Longoria	N/A	54HH	23HH	23HH	100HH
Villa San Juanita Rutledge	N/A	N/A	15HH	24HH	39HH

The current payment standards for one-, two-, three-, and four-bedroom units are listed below. According to Adela Montes, the payment standards are 100 percent of the Fair Market Rents.

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

McAllen Housing Authority

We spoke to Elena Salsedo, Section 8 Supervisor for the McAllen Housing Authority. Ms. Salsedo noted that there are currently 1,179 Housing Choice Vouchers designated for the City of McAllen and 1,079 are currently in use. The waiting list re-opened in July 2008 and there are currently 213 applicants on the list resulting in a one to 1.5 year wait for a voucher. There are approximately 52 elderly/disabled households on the current waiting list. The current payment standards are the same as those reported by the Housing Authority of the County of Hidalgo. Ms. Salsedo also noted that there are currently 49 units of Public Housing being administered by McAllen's Housing Authority. Vine Terrace is a 49-unit public housing development with one, two-, three-, and four-bedroom units. This development is addressed in the subsidized family supply section of this Submarket. There were previously 149 additional units of Public Housing in one development. However this development has been demolished and a combination LIHTC/Section 8/Public Housing development, comprised of two phases named Retama Village I and II, is currently being built upon the site of the former public housing development.

Retama Village I, located in McAllen, Texas, received a LIHTC allocation in 2006. The development is a proposed new construction, family oriented, multifamily complex consisting of 128-units in nine two-and three-story garden style buildings. Field observations confirm that this project is currently under construction. Retama Village will offer window coverings, ovens/ranges, garbage disposals, dishwashers, refrigerators with ice makers, microwaves, washer/dryer connections, ceiling fans, and individual heat and air conditioning. Community amenities will include BBQ grills, a picnic area, central laundry, business center, computer room, perimeter fencing, community room, fitness center, and two playgrounds. There will be 18 one-bedroom, 30 two-bedroom, and 16 three-bedroom public housing units. The remaining 64 one, two, and three bedroom units will be restricted to households earning less than 60 percent of the AMI.

Retama Village II, located in McAllen, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, family oriented, multifamily complex consisting of 74 units in 16 two- story garden style buildings. Field observations confirm that this development is still in the planning stages. Information regarding in-unit and community amenities for Retama Village II was unavailable. There will be 6 one-bedroom, 13 two-bedroom, and 6 three-bedroom public housing units. The remaining 49 one-, two-, and three-bedroom units will be restricted to households earning less than 60 percent of the AMI.

Pharr Housing Authority
We made numerous attempts to contact the Pharr Housing Authority, both in person and over the phone. However our calls were not returned as of the date of this study.

Hidalgo Housing Authority
We made numerous attempts to contact the Hidalgo Housing Authority, both in person and over the phone. However our calls were not returned as of the date of this study.

Alamo Housing Authority
We spoke to Anna with the Alamo Housing Authority. There are currently 120 vouchers designated for the City of Alamo and 119 vouchers are currently in use. The waiting list for vouchers is currently closed and has approximately 200 applicants, resulting in a six-month to one-year waiting list. Anna noted that there is a preference for three- and four-bedroom units and senior households are having trouble finding one-bedroom units. Approximately ten percent of the households on the waiting list are senior households. Anna noted that there is one public housing development administered by the Alamo Housing Authority, Macario Villareal, comprised of 20 single-family homes. This development is addressed in the subsidized family supply section of this Submarket. The payment standards for the City of Alamo are below. It is worth noting that Alamo's payment standards are below the payment standards published by the Hidalgo County Housing Authority.

PAYMENT STANDARDS

Units	Payment Standards
Studio	$447
One-bedroom	$494
Two-bedroom	$579
Three-bedroom	$694
Four-bedroom	$797

San Juan Housing Authority
We made numerous attempts to contact the San Juan Housing Authority, both in person and over the phone. However our calls were not returned as of the date of this study.

McAllen Commercial/Residential Development and Planning

We attempted to contact Rodrigo Sanchez, with the City of McAllen Planning Division. However, our inquiries have not been addressed as of the date of this study. We attempted to contact Robert Gomez with the Building Permits division with the City of McAllen in order to find information on proposed market rate multifamily development in the City of McAllen. However our information request has not been returned as of the date of this study.

Based on observations in the field, there is an under construction multifamily development within close proximity to St. Antimo Apartments, Stonewood Apartments, and Atrium Villa. Mosaic Apartments and Lofts will be a luxury market rate gated community, with a tenant lounge/café, Wi-Fi in all common areas, indoor/outdoor pool and spa, 24 hour fitness center, indoor basketball court, and private media room available to all residents. There will be 21 open and traditional floor plans comprised of one-, two-, and three-bedroom units. In-unit amenities will include washer/dryer hookups, attached garages, and intrusion alarms. This project is now leasing and was scheduled to open in late summer 2008; however, based upon observations in the field, the project is still under construction and approximately three quarters complete.

We conducted an Internet search for multifamily development in McAllen. According to a May 2008 news report published by the Texas A&M Real Estate Center, a Mexican developer broke ground in May 2008 on a new $16 million condominium project in South McAllen near La Plaza Mall. The five-story residential property off South 10th Street will target the growing number of affluent Mexican nationals looking to purchase property in McAllen. The four-building project, called the Luxe Gallery Condominiums, will have 88 units when complete. The Luxe Gallery is the newest in a string of proposed high-end condominium projects in Greater McAllen. With the Luxe Gallery, the developer is hoping to attract Mexican visitors with easy access to La Plaza Mall, as well as to U.S. Highway 83 and the Hidalgo-Reynosa International Bridge. The units will range from 1,450 to 1,900 sf. The least expensive unit will cost about $230,000, which is more than double the average home price in Hidalgo County. Approximately one quarter of the condominium units have already been sold. The first building will house 16 units and is scheduled to open in May 2009.

The aforementioned news report also notes that local developer Fred Harms hopes to finish the first of 37 under construction townhomes this summer. The townhome project is called Barrio Antiguo and the homes range from $180,000 to $220,000. The price is similar to other single-family units in the neighborhood near Date Palm Avenue and North Sixth Street. Like other new condo and townhome projects in the Valley, Barrio Antiguo developers are targeting people who do not want the trouble of keeping up with a large property. Some developers are also looking to add an affordable option to one of the Rio Grande Valley's most expensive housing markets.

Sam Saxena, a mortgage broker who lives in McAllen, is building a 192-unit development on Jackson Road in North McAllen. Latitude 360 targets young professionals. Units start at about $90,000 for 1,000 sf. Most other homes in the area cost more than $120,000.

McAllen Economic Development

According to the McAllen Chamber of Commerce, between January 1988 and March 2008, 250 new companies relocated to McAllen and 326 new companies relocated to Reynosa for a total of 576 new facilities. This resulted in the creation of over 120,000 new jobs in the region.

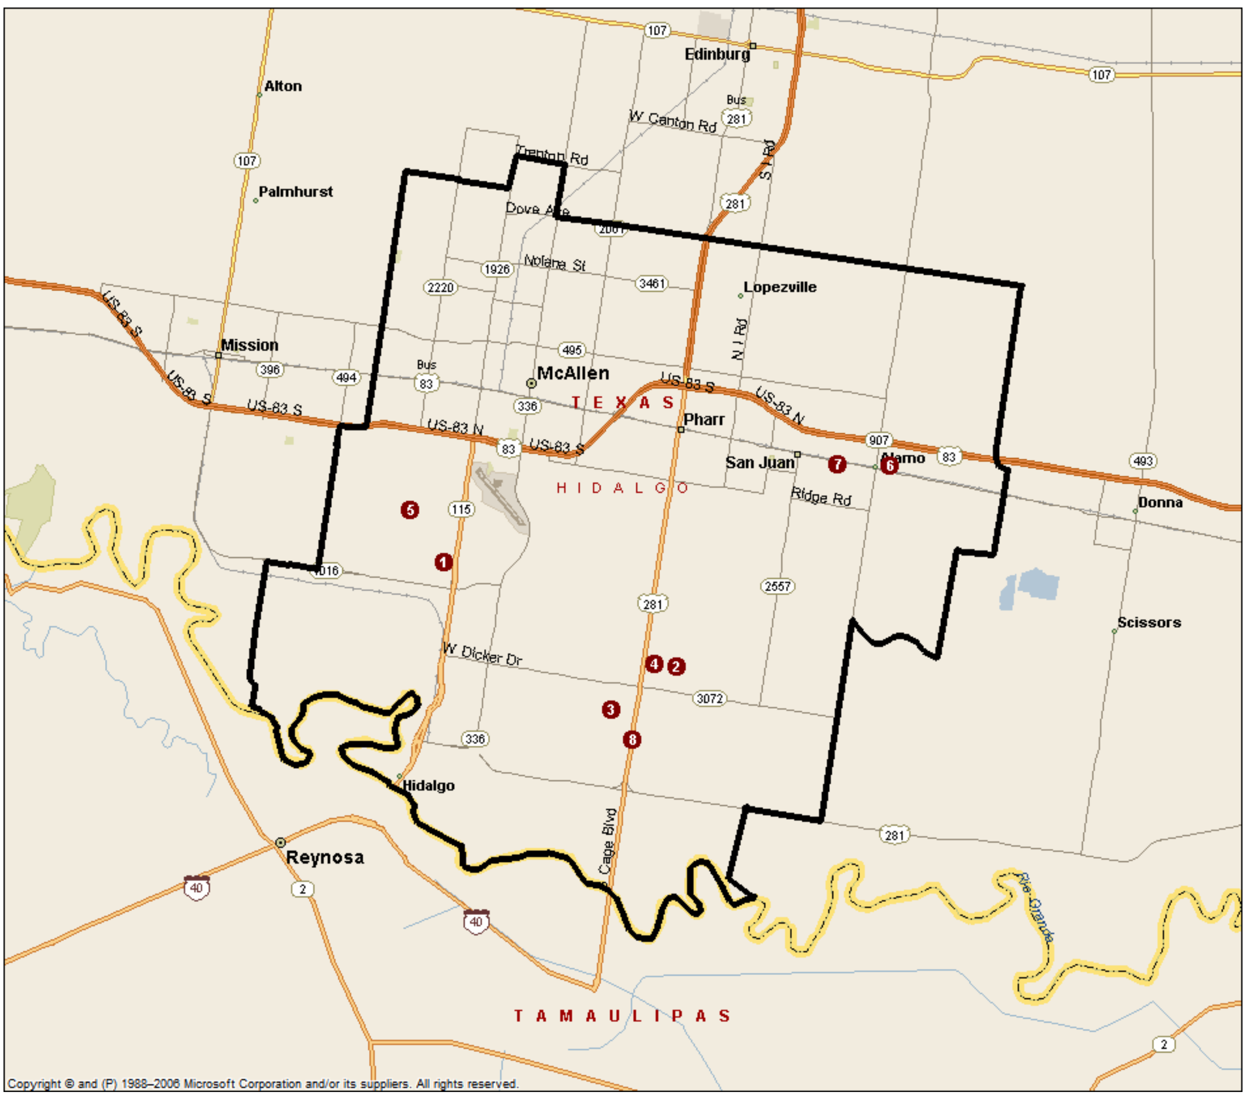
According to the McAllen Economic Development Corporation (MEDC), the construction of an automotive assembly plant is currently being proposed in McAllen in order to compete with the recent ground-breaking of a Chinese North American automotive assembly plant in Mexico. Further details were unavailable at this time.

According to the Reynosa Maquiladora and Manufacturers Association (RAMMAC), 28 new foreign firms are expected to begin operations in 2008 in the Northern Tamaulipas border region, creating over 3,000 new jobs. Seventeen of these companies will build facilities and begin operations in the Reynosa area, while the other 11 firms will open plants in Rio Grande Valley communities such as Mission, McAllen, Pharr and Edinburg, which are part of the McAllen-Edinburg-Mission MSA.

LIHTC FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers.

Novogradac identified 16 family-oriented LIHTC developments in the South Central Hidalgo County Submarket. Of the 16 family LIHTC developments, five properties offer an alternate subsidy or had 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. These five properties have been excluded from the LIHTC analysis and will be addressed in the subsidized family market analysis section that follows. Information was available for eight of the eleven remaining stabilized LIHTC properties in the Submarket. Multiple attempts were made to contact each of the three remaining LIHTC properties with no success. The excluded properties and reasons for exclusion can be found on the excluded properties list on the following pages. A map of the surveyed properties can be found below:



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	El Patrimonio	McAllen	LIHTC/Market – Family
2	El Pueblo Dorado	Pharr	LIHTC/Market – Family
3	Jardines De La Fuente	Pharr	LIHTC/Market – Family
4	Las Canteras Apts.	Pharr	LIHTC – Family
5	Padre de Vida Apts.	McAllen	LIHTC – Family
6	Rudy Villareal Oak Square Apts.	Alamo	LIHTC – Family
7	Sun Meadow Apts.	Alamo	LIHTC – Family
8	Valley View Apartments	Pharr	LIHTC – Family

The following pictures identify the surveyed LIHTC family properties in the Submarket:

Jardines De La Fuente

Las Canteras Apartments

Padre De Vida Apartments

Rudy Villareal Oak Square Apartments

Sun Meadow Apartments

Valley View Apartments

Excluded Properties

Multiple attempts were made to contact each of the three excluded LIHTC properties with no success. It should be noted that the three existing and stabilized LIHTC properties with no alternate form of subsidy were constructed from 1988 through 1989. Furthermore, none of the three aforementioned properties are currently listed on the most recent 2008 Property Inventory published by the Texas Department of Housing and Community Affairs. Therefore, it is likely that the three LIHTC properties are no longer within their compliance period and are operating as market rate properties. None of the three LIHTC properties have more than 10 units or offer on-site management.

The excluded properties and reasons for exclusion can be found on the excluded properties list on the following page:

EXCLUDED PROPERTIES LIST				
Name	Address	Type	No. of Units	Reason For Exclusion
400 East Ulex	400 East Ulex	LIHTC-Family	2	Could not Contact
4608 North D Street	4608 North D Street	LIHTC-Family	4	Could not Contact

Old Fort Highway Apartments	1101E Pirae Drive	LIHTC/USDA-Family	39	100 percent of tenants paying 30 percent of income

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are eight family-oriented LIHTC developments in the South Central Hidalgo Submarket, which have received an allocation in the last three years.

RECENT LIHTC ALLOCATIONS					
Name	Address	Type	No. of Units	Status	Date of Allocation
Poinsettia Apartments aka Rudy Villareal Oak Square Apartments	Between N. 9th St. & N. 10th St. at Duranta Ave.	LIHTC-Family	100	Complete; being used in the LIHTC supply analysis	2005/2008
Alamo Village Apartments	504 North 9th Street	LIHTC/Section 8-Family	56	A/R; Complete; being used in subsidized supply analysis	2005/2008
Retama Village I & II	2301 Jasmine Avenue	LIHTC/Public Housing-Family	128	Under Construction/Planning Stages	2006/2007
Las Vista Apartments	2401 La Vista Avenue	LIHTC/Section 8-Family	48	Undergoing renovations; being used in subsidized supply analysis	2006
Las Canteras Apartments	400 East Thomas Road	LIHTC-Family	100	Complete; being used in the LIHTCsupply analysis	2004/2007
Sunset Terrace Apartments	920 West Villegas	LIHTC/Public Housing-Family	100	Planning Stages	2007
Parkview Terrace	211 W. Audrey	LIHTC/Public Housing-Family	100	Planning Stages	2008
San Juan Village	400 North Iowa	LIHTC/USDA-Family	86	A/R; Complete; being used in subsidized supply analysis	2005/2008

Poinsettia Apartments aka Rudy Villareal Oak Square Apartments was constructed in 2007 and opened in November of 2007. This property began pre-leasing in the beginning of September 2007 and was fully leased by June 2008, and is being used in the supply analysis that follows.

Retama Village I, located in McAllen, Texas, received a LIHTC allocation in 2006. The development is a proposed new construction, family oriented multifamily complex consisting of 128-units in nine two- and three-story garden style buildings. Prior to construction, an existing public housing development constructed in 1951 was demolished. Field observations confirm that this project is currently under construction. Retama Village will offer window coverings, ovens/ranges, garbage disposals, dishwashers, refrigerators with ice makers, microwaves. washer/dryer connections, ceiling fans, and individual heat and air conditioning. Community amenities will include BBQ grills, a picnic area, central laundry, business center, computer room, perimeter fencing, community room, fitness center, and two playgrounds. There will be 18 one-bedroom, 30 two-bedroom, and 16 three-bedroom public housing units. The remaining 64 one, two, and three bedroom units will be restricted to households earning less than 60 percent of the AMI.

Retama Village II, located in McAllen, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, family oriented, multifamily complex consisting of 74 units in 16 two-story garden style buildings. Prior to construction, 74 existing public housing units constructed in 1951 were demolished. Field observations confirm that this development is still in the planning stages. Information regarding in-unit and community amenities for Retama Village II was unavailable. There will be 6 one-bedroom, 13 two-bedroom, and 6 three-bedroom public housing units. The remaining 49 one, two, and three bedroom units will be restricted to households earning less than 60 percent of the AMI.

Sunset Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, family oriented, multifamily complex consisting of 100-units in 20 two-story garden style buildings. Prior to construction on the site, an existing 100-unit public housing multifamily duplex development will be demolished. Information regarding in-unit and community amenities for Sunset Terrace was unavailable. There will be 12 one-bedroom, 16 two-bedroom, and 12 three-bedroom public housing units. The remaining 60 one, two, and three bedroom units will be restricted to households earning less than 60 percent of the AMI. Calls made to the development contact, Roy Navarro with the Housing Authority of the City of Pharr, have not been returned as of the date of this study. However, observations in the field confirm that the vacant public housing development is still located on the site and demolition and reconstruction have not yet commenced.

Parkview Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2008. The development is a proposed reconstruction of an existing public housing complex. This development will be a family oriented, multifamily complex consisting of 100-units in 20 residential buildings. Prior to construction on the site, an existing 100-unit public housing multifamily development, 40 years in age, will be demolished. Information regarding in-unit and community amenities for Sunset Terrace was unavailable. There will be 9 one-bedroom, 12 two-bedroom, and 9 three-bedroom public housing units. The remaining 70 one-, two-, and three-bedroom units will be restricted to households earning less than 50 and 60 percent of the AMI. Due to the recent allocation date of this development, it is assumed that this project is still in the planning stages.

Alamo Village Apartments, La Vista Apartments, and San Juan Village are all LIHTC properties with an additional subsidy allowing 100 percent of the tenants to pay no more than 30 percent of their annual gross income towards rent. Alamo Village Apartments and San Juan Village Apartments are acquisition/rehabilitation projects that are currently complete and being used in the family subsidized market analysis section. La Vista Apartments is currently undergoing renovations and is also addressed in the family subsidized market analysis section.

Unit Mix

The following table illustrates the unit mix in the family LIHTC rental property market.

Unit Mix - LIHTC Family		
Unit Type	**Total Units**	**Percent**
1 BR	91	8.60%
2 BR	556	52.90%
3 BR	405	38.50%
Total	**1,052**	**100%**

We were unable to identify any properties with four-bedroom LIHTC units. Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.41 and is projected to decrease slightly by 2012 to 3.40. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 36 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family LIHTC rental property market.

Unit Size - LIHTC Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	516	750	646
2 BR	783	1,119	928
3 BR	1,100	1,198	1,153

The average sizes of the surveyed one, two, and three-bedroom units are 10.2, 8.0, and 8.6 percent smaller, respectively, than the average one-, two-, and three-bedroom unit sizes of the surveyed market rate developments.

The existing LIHTC multifamily properties in the South Central Hidalgo County Submarket offer a moderate to extensive amount of in-unit and community amenities. Most of the surveyed LIHTC properties offer unit amenities that include patios/balconies, min-blinds, central air, ceiling fans, ovens, dishwashers, garbage disposals, and refrigerators. Half of the surveyed properties offer microwaves. In-unit washers/dryer appliances are not prevalent in the family LIHTC market however, all except two of the surveyed properties offered washer/dryer connections. The majority of the surveyed LIHTC properties offer community amenities including carport parking, a clubhouse, a central laundry facility, off-street parking, on-site management, a playground, and a swimming pool. Half of the surveyed properties offer a business center or computer room. Perimeter fencing is prevalent in the Submarket, however, other security features such as a security patrol or limited access are not as common. The majority of the surveyed properties do not offer premium amenities or non-shelter services.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties. Las Canteras was unable to provide a numerical breakdown by unit type, and therefore this development's 100 units have been excluded from this analysis.

Weighted Vacancy - LIHTC Family

Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	91	3	3.30%
2 BR	590	3	0.05%
3 BR	405	4	1.00%
Total	**1,052**	**10**	1.00%

The surveyed market rate properties in the Submarket have a higher average weighted vacancy rate of 4.20 percent. The vacant units found at the surveyed LIHTC family properties are comprised entirely of units at the 60 percent of AMI set-aside and the market rate units. Overall, the surveyed LIHTC properties are exhibiting very low weighted vacancy rates, which is indicative of demand for affordable housing.

Absorption

The following table lists the absorption rates for the surveyed properties.

Absorption – LIHTC Family

Property Name	Number of Units	Absorption Rate
El Pueblo Dorado	176	20 units per month
Jardines De La Fuente	200	19 units per month
Padre De Vida	180	15 units per month
Rudy Villareal Oak Square Apartments	100	11 units per month
Valley View Apartments	128	18 units per month
AVERAGE		**16.6 units per month**

Five of the eight surveyed properties were able to provide absorption information, resulting in an average absorption rate of 16.6 units per month. El Pueblo Dorado was constructed in 2002 while, Jardines De La Fuente, Padre De Vida, and Valley View Apartments were constructed in 2004. The most recently constructed surveyed development is Rudy Villareal Oak Square Apartments, which was constructed in 2007 and opened in November of 2007. This property began pre-leasing in the beginning of September 2007 and was fully leased by June 2008 for an absorption rate of 11 units per month. It appears as if the absorption rate for newly constructed properties in the Submarket has been slowing since 2002.

Waiting Lists

The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – LIHTC Family		
Property Name	**Number of Units**	**Households**
El Patrimonio	192	None
El Pueblo Dorado	176	None
Jardines De La Fuente	200	10HH for 2BR units at 30% and 40% AMI; 10 HH for 3BR units at 30%, 40%, 50% AMI
Las Canteras Apts.	100	Yes; 2-3HH per unit type
Padre De Vida Apts.	180	None
Rudy Villareal Oak Square Apts.	100	Yes; no number given
Sun Meadow Apts.	76	25HH
Valley View Apartments	128	10HH

Jardines de La Fuente maintains a waiting list for only the units at the lower AMI levels and El Patrimonio, Padre De Vida and El Pueblo Dorado do not maintain waiting lists. El Patrimonio, El Pueblo Dorado, and Jardines de la Fuente offer 50, 44, and 40 market rate units respectively, which represent 26, 25, and 20 percent of their total units, respectively. Additionally, the existing vacancies at El Patrimonio and El Pueblo Dorado are found in the units at 60 percent of AMI and market rate units. Demand appears to be strong overall in the Submarket, especially for units at the lower AMI levels, as five of the eight surveyed LIHTC properties currently maintain short to moderate waiting lists, resulting in an average waiting list of approximately 12 households.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – LIHTC Family		
Property Name	**Number of Units**	**Vacancy Rate**
El Patrimonio	192	2.10%
El Pueblo Dorado	176	1.10%
Jardines De La Fuente	200	0.00%
Las Canteras Apts.	100	0.00%
Padre De Vida Apts.	180	0.00%
Rudy Villareal Oak Square Apts.	100	2.00%
Sun Meadow Apts.	76	0.00%
Valley View Apartments	128	1.60%
AVERAGE		**0.85%**

The average vacancy rate of the surveyed family LIHTC properties is very low, relative to the average vacancy rate of the surveyed market rate properties in the Submarket (3.03 percent).

Concessions
None of the LIHTC family properties in the market are offering concessions. Concessions do not appear to be prevalent in the family LIHTC market.

Turnover
The following table summarizes turnover rates at the surveyed properties.

Turnover – LIHTC Family		
Property Name	**Number of Units**	**Turnover**
El Patrimonio	192	39%
El Pueblo Dorado	176	34%
Jardines De La Fuente	200	18%
Las Canteras Apts.	100	15%
Padre De Vida Apts.	180	16%
Rudy Villareal Oak Square Apts.	100	N/A
Sun Meadow Apts.	76	38%
Valley View Apartments	128	24%
AVERAGE		**26.3%**

The average turnover rate of the surveyed LIHTC properties in the Submarket is negligibly lower than the average turnover rate of the surveyed market rate properties in the Submarket (27 percent).

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

PAYMENT STANDARDS

Units	Payment Standards
Studio	$470
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

All of the units at the surveyed LIHTC properties, including the market rate units, are below the current payment standards for Hidalgo County. Five of the eight the surveyed LIHTC properties have rents set at the maximum allowable levels for all set-asides. It should be noted, however, that despite confirmation from management that these five properties have rents at the 2008 maximum allowable levels, rental rates appear to be notably lower than the 2008 maximum allowable rent limits listed above.

Management at Rudy Viallreal Oak Square Apartments and Jardines De La Fuente were unable to confirm whether rents are at the maximum allowable levels; however, the surveyed rents appear to be lower than the maximum allowable rent limits. Management at Sun Meadow Apartments confirmed that the units at 60 percent of AMI are not at the maximum allowable levels. The surveyed family LIHTC properties were constructed from 2001 through 2007. Three of the surveyed properties offer market rate units and seven of the surveyed properties offer units at the 50 percent of AMI level or lower. The overall average vacancy rate at the LIHTC properties is approximately 0.85 percent, which is very low. Additionally, the vacant units found at the surveyed LIHTC family properties are comprised entirely of units at the 60 percent of AMI set-aside and the market rate units. Five of the eight surveyed family LIHTC properties currently maintain small waiting lists, specifically for the units at the lower AMI levels.

LIHTC Supply Conclusion

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.41 and is projected to decrease slightly by 2012 to 3.40. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 36 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

The existing LIHTC multifamily properties in the South Central Hidalgo County Submarket offer a moderate to extensive amount of in-unit and community amenities. Most of the surveyed LIHTC properties offer unit amenities that include patios/balconies, min-blinds, central air, ceiling fans, ovens, dishwashers, garbage disposals, and refrigerators. Half of the surveyed properties offer microwaves. In-unit washers/dryer appliances are not prevalent in the family LIHTC market however, all except two of the surveyed properties offered washer/dryer connections. The majority of the surveyed LIHTC properties offer community amenities including carport parking, a clubhouse, a central laundry facility, off-street parking, on-site management, a playground, and a swimming pool. Half of the surveyed properties offer a business center or computer room. Perimeter fencing is prevalent in the Submarket however, other security features such as a security patrol or limited access are not as common. The majority of the surveyed properties do not offer premium amenities or non-shelter services.

Five of the eight surveyed properties were able to provide absorption information, resulting in an average absorption rate of 16.6 units per month. None of surveyed properties is offering concessions and five of the eight of the properties currently maintain small waiting lists with an average length of 12 households. The average vacancy rate of the surveyed family LIHTC properties (0.85 percent) is very low, relative to the average vacancy rate of the surveyed market rate properties in the Submarket (3.03 percent). The average turnover rate of the surveyed LIHTC properties in the Submarket (26.3 percent) is negligibly lower than the average turnover rate of the surveyed market rate properties in the Submarket (27 percent).

All of the units at the surveyed LIHTC properties, including the market rate units, are below the current payment standards for Hidalgo County. Five of the eight the surveyed LIHTC properties have rents set at the maximum allowable levels for all set-asides.

LIHTC SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers.

Novogradac identified one existing senior LIHTC development, Las Brisas. Las Brisas is a combination LIHTC/USDA development with 100 percent of the tenants paying no more than 30 percent of their annual gross income towards rent. Therefore this property has been excluded from the senior LIHTC analysis and will be addressed in the senior subsidized analysis section. Due to the lack of available data, we were unable to perform a senior LIHTC market analysis.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are three proposed senior LIHTC properties in the South Central Hidalgo County Submarket, Bluebonnet Senior Village, Mesquite Terrace, and Villas at Beaumont.

Mesquite Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, senior-oriented development consisting of 106 units in 5 one-story and three-story buildings. Unit amenities will include mini-blinds, dishwashers, garbage disposals, refrigerators, ovens/ranges, ceiling fans, microwaves, icemakers, and washer/dryer connections in some units. Community amenities will include a community garden, an accessible walking path, central laundry, controlled access gates, a community porch, perimeter fencing, a community room, a fitness center, a library, a 24-hour public telephone, secure access entry to residential buildings, an activity room, off-street parking and service coordination. There will be six studio, 13 one-bedroom, and one two-bedroom public housing units. The remaining 86 studio, one-, and two-bedroom units will be restricted to households earning less than 60 percent of the AMI. Observations in the field confirm that although the project has broken ground, construction has not yet commenced.

Bluebonnet Senior Village, located in Alamo, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, senior-oriented development consisting of 36-units in 2 two- and three-story elevator serviced buildings. Prior to construction, an existing 12-unit public housing development will be demolished. Field observations confirm that the public housing development has already been demolished; however, the project in not currently under construction. Bluebonnet Senior Village will offer window coverings, ovens/ranges, garbage disposals, dishwashers, refrigerators with ice makers, microwaves, washer/dryer connections, and ceiling fans. Community amenities will include off-street parking, a central laundry room, a community room, and a senior activity room. There will be 30 one-bedroom and 6 two-bedroom units at 30 and 60 percent of AMI. However all 36 of the units will also be subject to a Project based Section 8 contract, whereby tenants will pay no more than 30 percent of their annual income towards rent.

Villas at Beaumont, located in McAllen, Texas, received a LIHTC allocation in 2008. The development is a proposed new construction multi-story senior-oriented development consisting of 36 units in one elevator-serviced building plus one adjoining clubhouse building. This development will offer 2 one-bedroom units at 30 percent of AMI, 13 one-bedroom units at 50 percent of AMI, and 21 one-bedroom units at 60 percent of AMI. All thirty six units will also have an underlying Project-Based Section 8 Subsidy. Due to the recent allocation date of this development, it is assumed that this project is still in the planning stages.

MARKET RATE SUPPLY

We attempted to identify all existing, proposed, and under construction market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials.

Novogradac identified 53 family-oriented market rate developments in the South Central Hidalgo County Submarket. Market information was available for 33 of the 53 family market rate properties in the Submarket. Multiple attempts were made to contact each of the 20 remaining family market rate properties with no success. The excluded properties and reasons for exclusion can be found on the excluded properties list on the following pages.

The following map illustrates the location of the surveyed market rate family properties in the Submarket.

Excluded Properties

The following table illustrates all of the excluded market rate properties in the Submarket. There are no other identifiable market rate properties in the Submarket. We have only excluded properties that we were unable to contact either in person or over the phone or properties that are fully furnished and/or corporate apartments. We attempted to contact the excluded properties multiple times with no success. Therefore, we were unable to confirm the target population for each development; we assume all of the following properties are family-oriented.

Proposed Construction

We attempted to contact Rodrigo Sanchez, with the City of McAllen Planning Division. However, our inquiries have not been addressed as of the date of this study. We attempted to contact Robert Gomez with the Building Permits division in order to find information on proposed market rate development in the City of McAllen. However our information request has not been returned as of the date of this study.

Based on observations in the field, there is an under construction multifamily development within close proximity to St. Antimo Apartments, Stonewood Apartments, and Atrium Villa. This Development, Mosaic Apartments and Lofts will be a luxury market rate gated community, with a tenant lounge/café, Wi-Fi in all common areas, indoor/outdoor pool and spa, 24 hour fitness center, indoor basketball court, and private media room available to all residents. There will be 21 open and traditional floor plans comprised of one-, two-, and three-bedroom units. In-unit amenities will include washer/dryer hookups, attached garages, and intrusion alarms. This project is now leasing and was scheduled to open in late summer 2008; however, based upon observations in the field, the project is still under construction and approximately three quarters complete.

We conducted an Internet search for multifamily development in McAllen. According to a May 2008 news report published the by the Texas A&M Real Estate Center, a Mexican developer broke ground in May 2008 on a new $16 million condominium project in South McAllen near La Plaza Mall. The five-story residential property off South 10th Street will target the growing number of affluent Mexican nationals looking to purchase property in McAllen. The four-building project, called the Luxe Gallery Condominiums, will have 88 units when completed. The Luxe Gallery is the newest in a string of proposed high-end condominium projects in Greater McAllen. With the Luxe Gallery, the developer is hoping to attract Mexican visitors with easy access to La Plaza Mall, as well as to U.S. Highway 83 and the Hidalgo-Reynosa International Bridge. The units will range from 1,450 to 1,900 sf. The least expensive unit will cost about $230,000 - more than double the average home price in Hidalgo County. Approximately one quarter of the condominiums have already been sold. The first building will house 16 units and is scheduled to open in May 2009.

The aforementioned news report also notes that local developer Fred Harms hopes to finish the first of 37 under construction townhomes this summer. The townhome project is called Barrio Antiguo and the homes range from $180,000 to $220,000. The price is similar to other single-family units in the neighborhood near Date Palm Avenue and North Sixth Street. Like other new condo and townhome projects in the Valley, Barrio Antiguo developers are targeting people who do not want the trouble of keeping up with a large property. Much of the increased interest in McAllen-area property is coming from shoppers from Mexico. Some developers are also looking to add an affordable option to one of the Rio Grande Valley's most expensive housing markets.

Sam Saxena, a mortgage broker who lives in McAllen, is building a 192-unit development on Jackson Road in North McAllen. Latitude 360 targets young professionals. Units start at about $90,000 for 1,000 sf. Most other homes in the area cost more than $120,000.

Unit Mix

The following table illustrates the unit mix in the family market rate rental property market. It should be noted that properties unable to provide unit mixes and have been excluded from this analysis.

Unit Mix - Market Family

Unit Type	Total Units	Percent
0 BR	4	0.20%
1 BR	934	39.30%
2 BR	1,334	56.00%
3 BR	106	4.50%
Total	**2,378**	**100%**

We were unable to identify any four-bedroom market rate units. Smaller unit types are currently prevalent in the Submarket. However, demographic projections show that the average household size in the Submarket in 2007 was 3.41 and is projected to decrease negligibly by 2012 to 3.40. The Submarket’s household size is significantly larger than the national average of 2.59 and just slightly smaller than that of the MSA. Additionally, demographic estimates show that approximately 36 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012. Though smaller bedroom types are currently prevalent in the market, demographic projections evidence indicates a possible unmet demand for larger bedroom types.

Demographic projections show that approximately 22.5 percent of the housing in the Submarket is overcrowded.

Unit Size

The following table illustrates the existing unit sizes in the family market rate rental property market. It should be noted that there was only one surveyed property with studio units; therefore a unit size analysis was not performed on this unit type.

Unit Size – Market Family			
Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	500	1,072	719
2 BR	800	1,702	1,009
3 BR	1,000	1,687	1,262

The surveyed market rate properties in the Submarket had a one-bedroom average unit size of 719 square feet, two-bedroom average unit size of 1,009 square feet and a three-bedroom average unit size of 1,262 square feet. The average unit sizes of the market rate family one-, two-, and three-bedroom units in the Submarket are approximately 10.0, 8.0, and 9.0 percent larger, respectively, than the one-, two-, and three-bedroom units at family LIHTC properties.

The surveyed market rate properties in the Submarket offer limited to extensive amount of in-unit and community amenities. The majority of the surveyed market rate properties offer in-unit amenities including window coverings, carpeting, central air, dishwashers, garbage disposals, ovens, and refrigerators. The majority of the surveyed properties offer community amenities including a central laundry, off-street parking, on-site management, and a swimming pool. Five of the 33 surveyed properties offer in-unit washers/dryers and 14 of the surveyed properties offer washer/dryer connections in the units. Less than half of the surveyed properties offer security features of some kind. Approximately one third of the surveyed properties offer carport or garage parking.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit types for the surveyed properties. Due to the limited number of studio units in the market, a weighted vacancy for this unit type was not calculated. It should be noted that properties unable to provide unit mixes and have been excluded from this analysis.

Weighted Vacancy - Market Family

Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	934	26	2.80%
2 BR	1,334	65	4.90%
3 BR	106	9	8.50%
Total	**2,378**	**100**	**4.20%**

Weighted vacancy rates are highest in the three-bedroom units, followed by the two-bedroom units. One- and two-bedroom units are prevalent in the market and have the lowest weighted vacancy rates, indicating demand for smaller unit types, despite demographic projections that suggest otherwise. The average weighted vacancy of the surveyed market rate properties is slightly higher than that of the average weighted vacancy of the surveyed LIHTC properties (1.0 percent).

Absorption

Two of the surveyed market rate properties were able to provide absorption information, resulting in average absorption rate of 14 units per month as compared to the average absorption rate of the surveyed LIHTC properties (16.6 units per month).

Absorption – Market Family		
Property Name	**Number of Units**	**Absorption Rate**
Las Misiones at the Grove	118	12 units per month
Stonewood Apartments	77	16 units per month
AVERAGE		**14 units per month**

The following table lists the identifiable market rate properties constructed within the last two years in the South Central hidalgo Submarket. Although we were able to acquire most of the pertinent market data from the following properties, information regarding absorption was unavailable.

Recently Constructed – Market Family		
Property Name	**Number of Units**	**Date of Construction**
Dimel Apartments	24	2004
District Apartments	144	2006
Dominion Estates	40	2006
East Crockett Apartments	61	2003/2005
Redwood Apartments	70	2004
St. Antimo Apartments	68	2003/2004
Villas De Nolana	120	2004

Waiting List

Four of the market rate family properties in the market maintain a waiting list with an average length less of than five households. Waiting lists at market rate properties do not appear to be common in the Submarket; however, the small waiting lists for the one- and two-bedroom units at the four properties below indicate a demand for smaller unit types.

Waiting Lists – Market Family		
Property Name	**Number of Units**	**Households**
Crossings Apartments	62	5HH
Doveco Apartments	35	Yes; none given
Jackson Square	128	3HH for the 1BR
Peppertree Apartments	84	Yes for the large 1BR and the 2BR's

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – Market Family			
Property Name	Number of Units	Vacant Units	Vacancy Rate
Atrium Villa Apartments	61	2	3.30%
Brentwood Apartments	48	2	4.20%
Cedar Hut Apartments	88	7	8.00%

Rayburn Village Apartments	31	2	6.50%
Redwood Apartments	70	0	0.00%
Seville Place Apartments	160	12	7.50%
St. Antimo Apartments	68	0	0.00%
Stonewood Apartments	77	2	2.60%
Tamarack Apartments	100	20	20.00%
The Rincon Apartments	232	9	3.90%
Villas De Nolana	120	0	0.00%
Vintage Square Apartments	108	2	1.90%
AVERAGE	**2,378**	**100**	**4.2%%**

The average vacancy rate of the surveyed market rate properties is 4.2 percent as compared to the average vacancy rate of the surveyed LIHTC properties.

Concessions

Five of the 33 surveyed properties are offering concessions. Concessions do not appear to be prevalent in the market.

Concessions – Market Family	
Property Name	**Concessions**
District Apartments	2 Weeks free with 1 year lease on select 2BR
Jackson Square Apartments	Reduced Rents on 2BR x 2BA only
Las Misiones at the Grove	One free month with a 13 month lease
Tamarack Apartments	Half off the 2nd month's rent
Villas de Nolana	One month free

Turnover

Twenty-five of the 33 surveyed market rate properties were able to provide turnover information. The following table illustrates turnover information in the market.

Turnover – Market Family		
Property Name	**Number of Units**	**Turnover**
Atrium Villa Apartments	61	20%
Cedarwood Domit Apartments	40	30%
Crossings Apartments	62	15%
Dallas Heights Apartments	8	20%
Dimel Apartments	24	50%
District Apartments	144	25%
Dominion Apartments	40	25%
Dominion Estates	24	25%
East Crockette Apartments	61	25%
Hearthstone	300	30%
Jackson Square Apartments	128	28%
Las Haciendas Apartments	74	32%
Las Misiones at the Grove	118	30%
Lindburgh Square Apartments	48	25%
Marianna's Apartments	34	35%
Northwood Domit Apartments	124	27%
Palm Garden Apartments	60	30%
Plaza Royale Apartments	88	9%
Rayburn Village Apartments	31	20%
Redwood Apartments	70	34%
St. Antimo Apartments	68	20%
Stonewood Apartments	77	30%
The Rincon Apartments	232	30%
Villas De Nolana	120	20%
Vintage Square Apartments	108	33%
AVERAGE		**27%**

Annual turnover rates reported range from 9 percent to 50 percent, with an average of 27 percent, as compared to the average turnover rate of the surveyed LIHTC properties (26.3 percent).

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

PAYMENT STANDARDS	
Units	**Payment Standards**
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The average market rents for the one, two, and three-bedroom units at the surveyed market rate properties are $573, $660, and $896. Fifty-five percent of the one-bedroom units, 53 percent of the two-bedroom units, and 64 percent of the three-bedroom units in the market offer rents that are higher than the current payment standards for one-, two-, and three-bedroom units, respectively.

The market rate one-bedroom rents at 59 percent of the surveyed properties are above the LIHTC 60 percent of AMI maximum allowable level. The market rate two-bedroom rents at 57 percent of the surveyed properties are above the LIHTC 60 percent of AMI maximum allowable level. The market rate three-bedroom rents at 82 percent of the surveyed properties are above the LIHTC 60 percent of AMI maximum allowable level. The average market rents for the one-, two-, and three-bedroom units in the market are approximately14.5 percent, 10.9 percent, and 24.1 percent higher than the 2008 maximum allowable rents for one-, two-, and three-bedroom units, respectively.

Market Supply Conclusion

Smaller unit types are currently prevalent in the Submarket. However, demographic projections show that the average household size in the Submarket in 2007 was 3.41 and is projected to decrease negligibly by 2012 to 3.40. The Submarket's household size is significantly larger than the national average of 2.59 and just slightly smaller than that of the MSA. Additionally, demographic estimates show that approximately 36 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012. Though smaller bedroom types are currently prevalent in the market, demographic projections indicate a possible unmet demand for larger bedroom types.

The surveyed market rate properties in the South Central Hidalgo County Submarket offer a limited to extensive amount of in-unit and community amenities. The majority of the surveyed market rate properties offer in-unit amenities including window coverings, carpeting, central air, dishwashers, garbage disposals, ovens, and refrigerators. The majority of the surveyed properties offer community amenities including a central laundry, off-street parking, on-site-management, and a swimming pool. Five of the 33 surveyed properties offer in-unit washers/dryers and 14 of the surveyed properties offer washer/dryer connections in the units. Less than half of the surveyed properties offer security features of some kind. Approximately one third of the surveyed properties offer carport or garage parking.

The average unit sizes of the market rate one-, two-, and three-bedroom units in the Submarket are approximately 10.0, 8.0, and 9.0 percent larger, respectively, than the one-, two-, and three-bedroom units at the family LIHTC properties. The average weighted vacancy of the surveyed market rate properties (4.20) is slightly higher than that of the average weighted vacancy of the surveyed LIHTC properties (1.0 percent). Two of the surveyed market rate properties were able to provide absorption information, resulting in average absorption rate of 14 units per month as compared to the average absorption rate of the surveyed LIHTC properties (16.6 units per month). Four of the market rate family properties maintain a waiting list with an average length of less than five households, as compared to the surveyed LIHTC properties which have waiting lists which average 12 households in length.

The average vacancy rate of the surveyed market rate properties is 4.2 percent. Five of the 33 surveyed properties are offering concessions. Concessions do not appear to be prevalent in the market. Annual turnover rates reported range from 9 percent to 50 percent, with an average of 27 percent, compared to the average turnover rate of the surveyed LIHTC properties (26.3 percent).

The average market rents for the one, two, and three-bedroom units at the surveyed market rate properties are $573, $660, and $896. The average market rents for the one-, two-, and three-bedroom units in the market are approximately14.5 percent, 10.9 percent, and 24.1 percent higher than the 2008 maximum allowable rents at 60 percent of AMI for one-, two-, and three-bedroom units, respectively.

MARKET RATE SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There was one identifiable existing senior market rate multifamily rental property in the South Central Hidalgo County Submarket, Brook Ridge Retirement.

Brook Ridge Retirement is a 106-unit independent living age restricted property constructed in 1995. This development is restricted to seniors age 55 and older and is currently exhibiting an occupancy rate of approximately 95 percent. The average age at this property is 87 and 90 percent of the current residents are from the immediate area. The average turnover rate is 20 percent and none of the tenants are Housing Choice Voucher holders. This property offers studio, one-, and two-bedroom units 425, 600, and 800 square feet in size. Vacancies are evenly spread between the studio and two-bedroom units with one-bedroom units exhibiting the lowest vacancy rate. Rental rates are $1,300, $1,850, and $2,400 for the studio, one, and two-bedroom units respectively, and include weekly housekeeping, three daily meals, and scheduled transportation. Rental rates are based on single-person occupancy. Additional occupants cost $480 extra per month. According to management, this property is difficult to market due to the high rental rates, which many of the area residents cannot afford. The property relies on residents moving back or retiring from areas such as Dallas and from various northern states.

Based on the lack of available data, we did not complete a market rate senior market analysis.

Proposed Construction

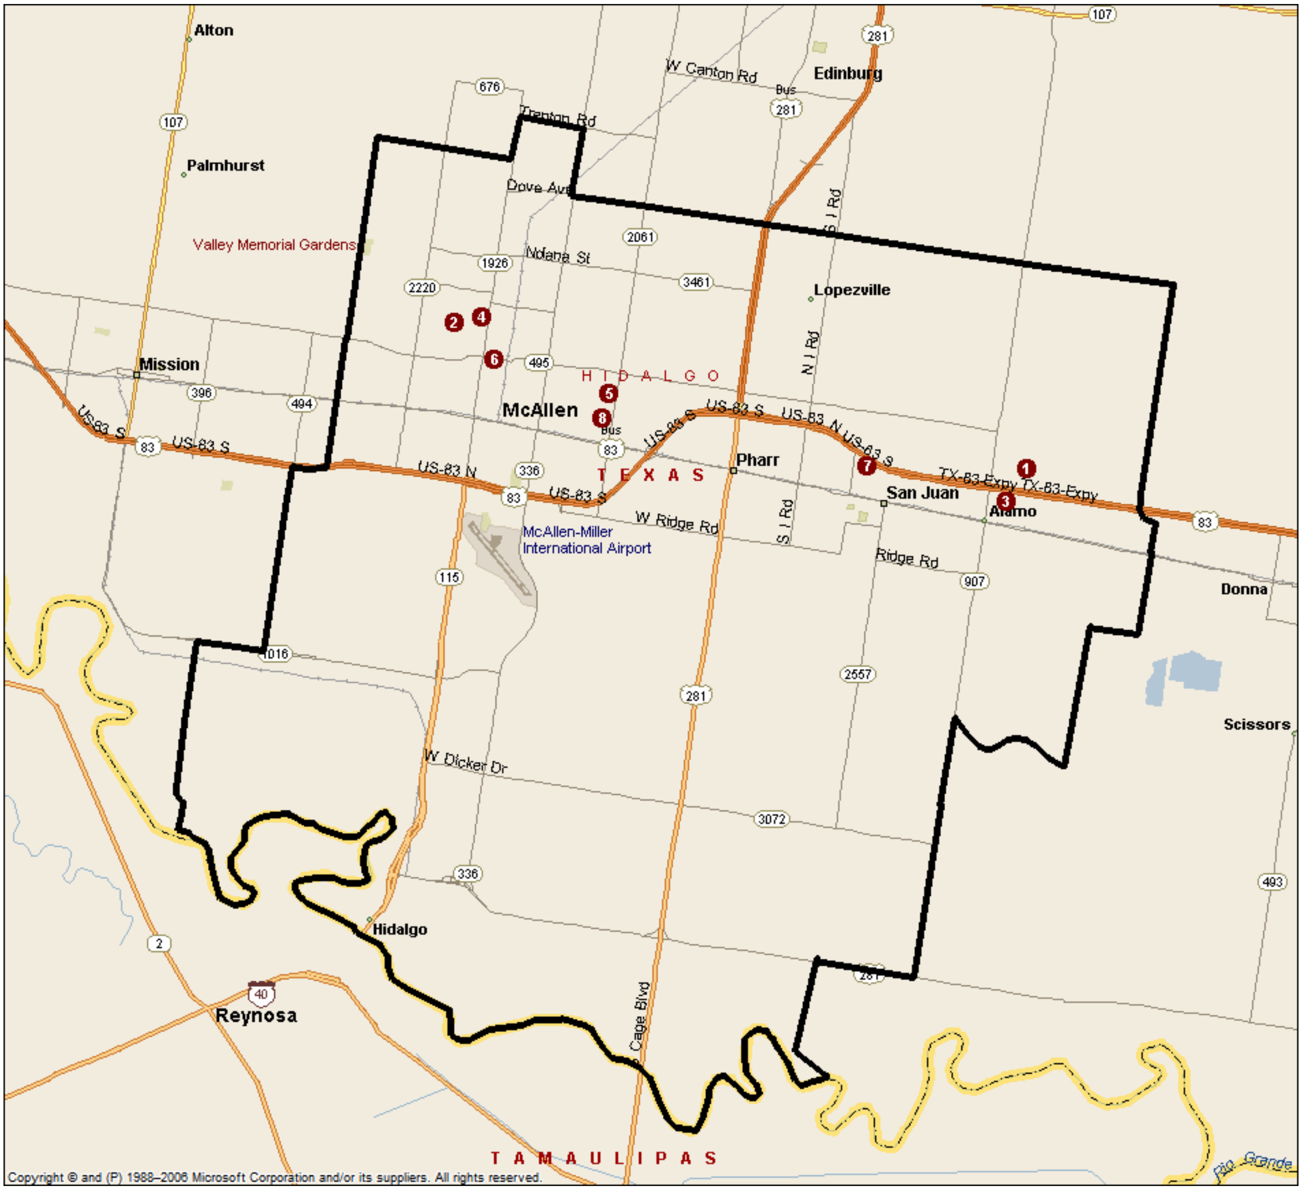
We were unable to identify any proposed market rate senior rental properties in the Submarket.

SUBSIDIZED FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are fourteen existing family-targeted subsidized developments located in the South Central Hidalgo Submarket, five of which are also LIHTC properties. Alamo Village, La Vista Apartments, San Juan Village, Raintree Apartments, and Old Fort Highway Apartments are LIHTC properties with 100 percent of the tenants paying no more than 30 percent of their annual gross income towards rent, and therefore have been included in the subsidized family rental analysis. Three of the subsidized housing developments are public housing/farm labor housing projects located in McAllen and Alamo. We were able to acquire information on eight of the thirteen family-oriented subsidized properties. Multiple attempts were made to contact each of the six remaining family subsidized properties with no success. The excluded properties and reasons for exclusion can be found on the excluded properties list on the following pages.

The following map illustrates the location of the surveyed market rate family properties in the Submarket.



SURVEYED FAMILY PROPERTIES

San Juan FLH	700 Maldonado Drive	USDA	36	Could not Contact

Proposed Construction

We spoke to Elena Salsedo, the Section 8 Supervisor for the McAllen Housing Authority. Ms. Salsedo noted that there were previously 149 additional units of Public Housing in one development. However, this development has been demolished and a two-phase LIHTC/Section 8/Public Housing project, named Retama Village I and II, is currently being built upon the site of the former public housing development.

Retama Village I, located in McAllen, Texas, received a LIHTC allocation in 2006. The development is a proposed new construction, family oriented, multifamily complex consisting of 128-units in nine two- and three-story garden style buildings. Field observations confirm that this project is currently under construction. Retama Village II, located in McAllen, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, family oriented, multifamily complex consisting of 74 units in 16 two- story garden style buildings. Field observations confirm that this development is still in the planning stages. Information regarding in-unit and community amenities for Retama Village II was unavailable. There will be 6 one-bedroom, 13 two-bedroom, and 6 three-bedroom public housing units. The remaining 49 one-, two-, and three-bedroom units will be restricted to households earning less than 60 percent of the AMI.

Sunset Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, family oriented, multifamily complex consisting of 100-units in 20 two-story garden style buildings. Prior to construction on the site, an existing 100-unit public housing multifamily duplex development will be demolished. Information regarding in-unit and community amenities for Sunset Terrace was unavailable. There will be 12 one-bedroom, 16 two-bedroom, and 12 three-bedroom public housing units. The remaining 60 one-, two-, and three-bedroom units will be restricted to households earning less than 60 percent of the AMI. Calls made to the development contact, Roy Navarro with the Housing Authority of the City of Pharr, have not been returned as of the date of this study. However, observations in the field confirm that the public housing development is still located on the site and demolition and reconstruction have not yet commenced.

Parkview Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2008. The development is a proposed reconstruction of an existing public housing complex. This development will be a family oriented, multifamily complex consisting of 100-units in 20 residential buildings. Prior to construction on the site, an existing 100-unit public housing multifamily development, 40 years in age, will be demolished. Information regarding in-unit and community amenities for Sunset Terrace was unavailable. There will be 9 one-bedroom, 12 two-bedroom, and 9 three-bedroom public housing units. The remaining 70 one-, two-, and three-bedroom units will be restricted to households earning less than 50 and 60 percent of the AMI. Due to the recent allocation date of this development it is assumed that this project is still in the planning stages.

Unit Mix

The following table illustrates the unit mix in the family subsidized rental property market. Properties unable to provide a breakdown by unit type have been excluded from the unit mix analysis.

Unit Mix - Subsidized Family

Unit Type	Total Units	Percent
1 BR	89	14.00%
2 BR	245	38.60%
3 BR	282	44.40%
4 BR	19	3.00%
Total	**635**	**100%**

Large unit types are currently prevalent among the subsidized properties in the Submarket. Similarly, large unit types are also prevalent in the family LIHTC properties in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.41 and is projected to decrease negligibly by 2012 to 3.40. The Submarket's household size is significantly larger than the national average of 2.59 and just slightly smaller than that of the MSA. Additionally, demographic estimates show that approximately 36 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012, suggesting an unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the subsidized rental property market. Properties unable to provide unit sizes have been excluded from the unit size analysis.

Unit Size - Subsidized Family			
Unit Type	Minimum Surveyed	Maximum Surveyed	Surveyed Average
1 BR	551	778	685
2 BR	658	928	803
3 BR	839	1,039	955
4 BR	1,210	1,210	1,210

The surveyed one-, two-, three-, and four-bedroom subsidized units have average sizes of 685, 803, 955 and 1,210 square feet, respectively. It should be noted that there was only one property with unit size information available for four-bedroom units in the Submarket. The subsidized one-, two-, and three-bedroom average unit sizes are 5.7 percent larger, 13.5 percent smaller, and 17.2 percent smaller, respectively, than the one-, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. There were no four-bedroom units among the surveyed market rate and LIHTC developments.

Services								
Security								
Premium Amenities								
Other Amenities								
Other	n/a	Headstart program next door	n/a	n/a	n/a	n/a	n/a	n/a

The existing subsidized multifamily properties in the Submarket offer limited in-unit and community amenities, specifically in the public housing developments and farm labor developments. Common in-unit amenities offered by the properties include window coverings, central air, ovens, and refrigerators. The majority of the properties offer washer/dryer connections but no in-unit washer/dryer appliances are offered. Common community amenities include a central laundry, off-street parking, on-site management, and a playground. Vine Terrace is located proximate to a Headstart program. However, the properties do not offer any security features, non-shelter services, premium amenities, or covered parking of any kind.

By-Unit Weighted Vacancy

The following table illustrates the weighted vacancy rates in the subsidized rental property market. Properties unable to provide a breakdown by unit type were excluded from the weighted vacancy analysis.

Weighted Vacancy - Subsidized Family			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	89	4	4.50%
2 BR	245	16	6.53%
3 BR	282	11	3.90%
4 BR	19	0	0.00%
Total	**635**	**31**	**4.90%**

The average weighted vacancy of the surveyed subsidized properties (4.90 percent) is higher than the average weighted vacancy of the surveyed LIHTC properties (1.0 percent).

Absorption

None of the surveyed subsidized properties was able to provide absorption information.

Waiting List

The following table illustrates the waiting lists in the subsidized rental property market.

Waiting Lists – Subsidized Family		
Property Name	Number of Units	Households
Macario Villareal Apartments	20	100 HH
Vine Terrace	49	52HH
Alamo Village	56	Yes; number not provided
La Vista Apartments	48	10HH
Memorial Apartments	246	50HH
Pecan Village Apartments	70	7HH
San Juan Village Apartments	86	25HH
Valley View Apartments	80	1BR-2HH; 2BR-5HH; 3BR-8HH

The average length of the waiting lists at the surveyed subsidized properties is 37 households which is significantly higher than the average length of the waiting lists of the surveyed LIHTC properties (12 households). All of the surveyed developments maintain short to extensive waiting lists. Based on this information, we anticipate significant future demand for affordable housing.

Vacancy Levels

The following table illustrates the vacancy rates in the subsidized rental property market.

Vacancy – Subsidized Family			
Property Name	**Number of Units**	**Vacant Units**	**Vacancy Rate**
Macario Villareal Apartments	20	0	0.00%
Vine Terrace	49	0	0.00%
Alamo Village	56	0	0.00%
La Vista Apartments	48	16	33.30%
Memorial Apartments	246	12	4.90%
Pecan Village Apartments	70	0	0.00%
San Juan Village Apartments	86	1	1.20%
Valley View Apartments	80	2	2.50%
AVERAGE	**655**	**31**	**4.7%**

All but one of the surveyed developments are exhibiting low vacancy rates. Management at La Vista apartments noted that the current high vacancy rate is due to an ongoing renovation process; all available units are fully occupied, resulting in an effective occupancy rate of 100 percent. The average vacancy rate assuming La Vista Apartments is fully occupied is 4.7 percent, as compared to the average vacancy rate of the surveyed LIHTC properties. The notably low average vacancy rate and extensive waiting lists at the subsidized properties is indicative of the demand for affordable housing in the Submarket.

Concessions

None of the subsidized family properties in the market are offering concessions.

Turnover

Only two properties in our survey were able to provide rates of 7 and 30 percent, respectively, resulting in an average turnover rate of 18.5, as compared to the surveyed LIHTC properties which have an average turnover rate of 26.3 percent.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

PAYMENT STANDARDS	
Units	**Payment Standards**
Studio	$470
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

All but two of the surveyed properties have one-, two-, three-, and four-bedroom units below the current payment standards for Hidalgo County. La Vista Apartments and San Juan Village Apartments are combination LIHTC/Section 8 developments with 100 percent of the tenants paying no more than 30 percent of their annual gross income towards rent. The one-bedroom units at both of these developments have rental rates which are slightly above the current payment standards.

Subsidized Family Supply Conclusion

Large unit types are currently prevalent in the subsidized properties in the Submarket. Similarly, large unit types are also prevalent in the family LIHTC properties in the Submarket. It should be noted that smaller unit types are prevalent in the family market rate developments in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.41 and is projected to decrease negligibly by 2012 to 3.40. The Submarket's household size is significantly larger than the national average of 2.59 and just slightly smaller than that of the MSA. Additionally, demographic estimates show that approximately 36 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012, suggesting an unmet demand for larger bedroom types.

The existing subsidized multifamily properties in the West Central Hidalgo County Submarket offer limited in-unit and community amenities, specifically in the public housing developments and farm labor developments. Common in-unit amenities offered by the comparable properties include window coverings, central air, ovens, and refrigerators. The majority of the properties offer washer/dryer connections but no in-unit washer/dryer appliances are offered. Common community amenities include a central laundry, off-street parking, on-site management, and a playground. Vine Terrace is located proximate to a Headstart program. However, the properties do not offer any security features, non-shelter services, premium amenities, or covered parking of any kind.

The surveyed one-, two-, three-, and four-bedroom subsidized units have average sizes of 685, 803, 955 and 1,210 square feet, respectively. The subsidized one-, two-, and three-bedroom average unit sizes are 5.7 percent larger, 13.5 percent smaller, and 17.2 percent smaller, respectively, than the one-, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. None of surveyed properties is offering concessions and none of the properties was able to provide absorption information. The average weighted vacancy of the surveyed subsidized properties (4.90 percent) is higher than the average weighted vacancy of the surveyed LIHTC properties (1.0 percent).

The average length of the waiting lists at the surveyed subsidized properties is 37 households which is significantly higher than the average length of the waiting lists of the surveyed LIHTC properties (12 households). Only two properties in our survey were able to provide rates of 7 and 30 percent, respectively, resulting in an average turnover rate of 18.5, as compared to the surveyed LIHTC properties which have an average turnover rate of 26.3 percent. The average vacancy rate of the surveyed subsidized properties is 4.7 percent as compared to the surveyed LIHTC properties (0.85 percent).

All but two of the surveyed properties have one-, two-, three-, and four-bedroom units below the current payment standards for Hidalgo County. La Vista Apartments and San Juan Village Apartments are combination LIHTC/Section 8 developments with 100 percent of the tenants paying no more than 30 percent of their annual gross income towards rent. The one-bedroom units at both of these developments have rental rates which are slightly above the current payment standards.

SUBSIDIZED SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are four existing senior subsidized developments located in the South Central Hidalgo Submarket, Casa De Amigos II, Casa de Amigos VI, Casa Linda, and Las Brisas. We were unable able to acquire information on any of the four subsidized senior properties. Based on the lack of available data, we were unable to complete subsidized senior supply analysis.

Excluded Properties

We attempted to contact the following properties multiple times, but our calls have not been returned as of the date of this study.

EXCLUDED PROPERTIES LIST

Name	Address	Type	No. of Units	Reason For Exclusion
Casa De Amigos II	1100 E Dallas Ave	Senior - Section 8	N/A	Could not Contact
Casa De Amigos VI	200 E Helmer Street	Senior - Section 8	N/A	Could not Contact
Casa Linda	301 S Fifth Street	Senior - USDA	32	Could not Contact
Las Brisas	1119 South Tower Road	Senior - LIHTC/USDA	26	Could not Contact

Proposed Construction

There are three senior oriented LIHTC developments with subsidized components in the planning stages in the South Central Hidalgo Submarket.

Mesquite Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, senior-oriented development consisting of 106 units in five one- and three-story buildings. Unit amenities will include mini-blinds, dishwashers, garbage disposals, refrigerators, ovens/ranges, ceiling fans, microwaves, icemakers, and washer/dryer connections in some units. Community amenities will include a community garden, an accessible walking path, central laundry, controlled access gates, a community porch, perimeter fencing, a community room, a fitness center, a library, a 24-hour public telephone, secure access entry to residential buildings, an activity room, off-street parking and service coordination. There will be six studio, 13 one-bedroom, and one two-bedroom public housing units. The remaining 86 studio, one-, and two-bedroom units will be restricted to households earning less than 60 percent of the AMI. Observations in the field confirm that although the project has broken ground, construction has not yet commenced.

Bluebonnet Senior Village, located in Alamo, Texas, received a LIHTC allocation in 2007. The development is a proposed new construction, senior-oriented development consisting of 36 units in 2 two-and three-story elevator serviced buildings. Prior to construction, an existing 12-unit public housing development will be demolished. Field observations confirm that the public housing development has already been demolished. However, the project in not currently under construction. Bluebonnet Senior Village will offer window coverings, ovens/ranges, garbage disposals, dishwashers, refrigerators with ice makers, microwaves, washer/dryer connections, and ceiling fans. Community amenities will include off-street parking, a central laundry room, a community room, and a senior activity room. There will be 30 one-bedroom and 6 two-bedroom units at 30 and 60 percent of AMI. However all 36 of the units will also be subject to a Project Based Section 8 contract whereby tenants will pay no more than 30 percent of their annual income towards rent.

Villas at Beaumont, located in McAllen, Texas, received a LIHTC allocation in 2008. The development is a proposed new construction, senior-oriented development consisting of 36-units in one multi-story elevator serviced building plus one adjoining clubhouse building. This development will offer 2 one-bedroom units at 30 percent of AMI, 13 one bedroom units at 50 percent of AMI, and 21 one-bedroom units at 60 percent of AMI. All thirty-six units will also have an underlying Project Based Section 8 Subsidy. Due to the recent allocation date of this development, it is assumed that this project is still in the planning stages.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the South Central Hidalgo County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the South Central Hidalgo County Submarket in 2007 is 74,654 and the total number of households in 2012 is projected to be 53,077. The total number of households age 55 and older in the Submarket for 2007 is 25,582, with a 2012 projection of 31,396 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 30.0 percent of the occupied housing unit households in the South Central Hidalgo County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 18.4 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a one-person household in the income range between 31 percent and 40 percent of AMI. A minimum income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the South Central Hidalgo County Submarket (McAllen-Edinburg-Mission, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*	
1 Person	$0	$9,150	$9,150	$12,200	$12,200	$15,250	$15,250	$18,300	$18,300	$24,400	$24,400	$30,500
2 Person	$0	$10,500	$10,500	$13,960	$13,960	$17,450	$17,450	$20,940	$20,940	$27,920	$27,920	$34,900
3 Person	$0	$11,800	$11,800	$15,680	$15,680	$19,600	$19,600	$23,520	$23,520	$31,360	$31,360	$39,200

5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households
Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the South Central Hidalgo County Submarket, approximately 29.6 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing
Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 2.0 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing
A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the South Central Hidalgo County Submarket, it is estimated that 22.5 percent of households are living in overcrowded units.

Movership or Turnover Rate
There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the stabilized family LIHTC properties surveyed in the Submarket is approximately 26.3 percent.

We identified one senior LIHTC/USDA property in this Submarket. We were not able to contact this property. With so few senior LIHTC properties able to provide turnover data in the MSA, we have used the average senior subsidized turnover rate of 6.5 percent.

Unstabilized Rental Units - Existing and Proposed
Retama Village I, located in McAllen, Texas, received a LIHTC allocation in 2006. There will be 64 public housing units and 64 units will be restricted to households earning less than 60 percent of the AMI. Retama Village II, located in McAllen, Texas, received a LIHTC allocation in 2007. There will be 25 public housing units and 49 units restricted to households earning less than 60 percent of the AMI. Sunset Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2007. There will be 40 public housing units and 60 units restricted to households earning less than 60 percent of the AMI. These 455 units have been deducted from the following demand analysis.

To our knowledge, there are two proposed or under construction senior LIHTC properties in the South Central Hidalgo County Submarket. Mesquite Terrace Apartments, located in Pharr, Texas, received a LIHTC allocation in 2007. There will be 20 public housing units and 86 restricted to households earning less than 60 percent of the AMI. Bluebonnet Senior Village, located in Alamo, Texas, received a LIHTC allocation in 2007. There will be units at 30 and 60 percent of AMI. However all 36 of the units will also be Subject to a Project based Section 8 contract whereby tenants will pay no more than 30 percent of their annual income towards rent. These 142 units have been deducted from the following senior demand analysis. These units also are deducted from the analysis of all households, as demand from all households includes households age 55 and older.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the South Central Hidalgo County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Household Size	Total Renters - Baseline Year (2007)	Income-Qualified Renters - Baseline Year (2007)					
		≤ 30% AMI	31% - 40% AMI	41% - 50% AMI	51% - 60% AMI	61% - 80% AMI	81% - 100% AMI

Demand Analysis Conclusions

All Households

As with the other Submarkets in the McAllen-Edinburg-Mission, TX MSA, the analysis of income-qualified renter households in the South Central Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 23 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less; however, occupancy rates a the surveyed family LIHTC and subsidized properties in the Submarket are very low, indicating that there is a sufficient number of income-qualified renter households to support existing affordable housing units. Even with an estimated 486 new family units and 142 new senior units targeting households at 30 to 60 percent of AMI in planning stages or under construction, the number of income-qualified households projected through 2012 shows a strong increase. Although the planned and under construction units will meet some of the affordable housing needs of the Submarket, a growing number of income qualified households indicates that the need for additional affordable housing units will persist in the Submarket.

Senior Households

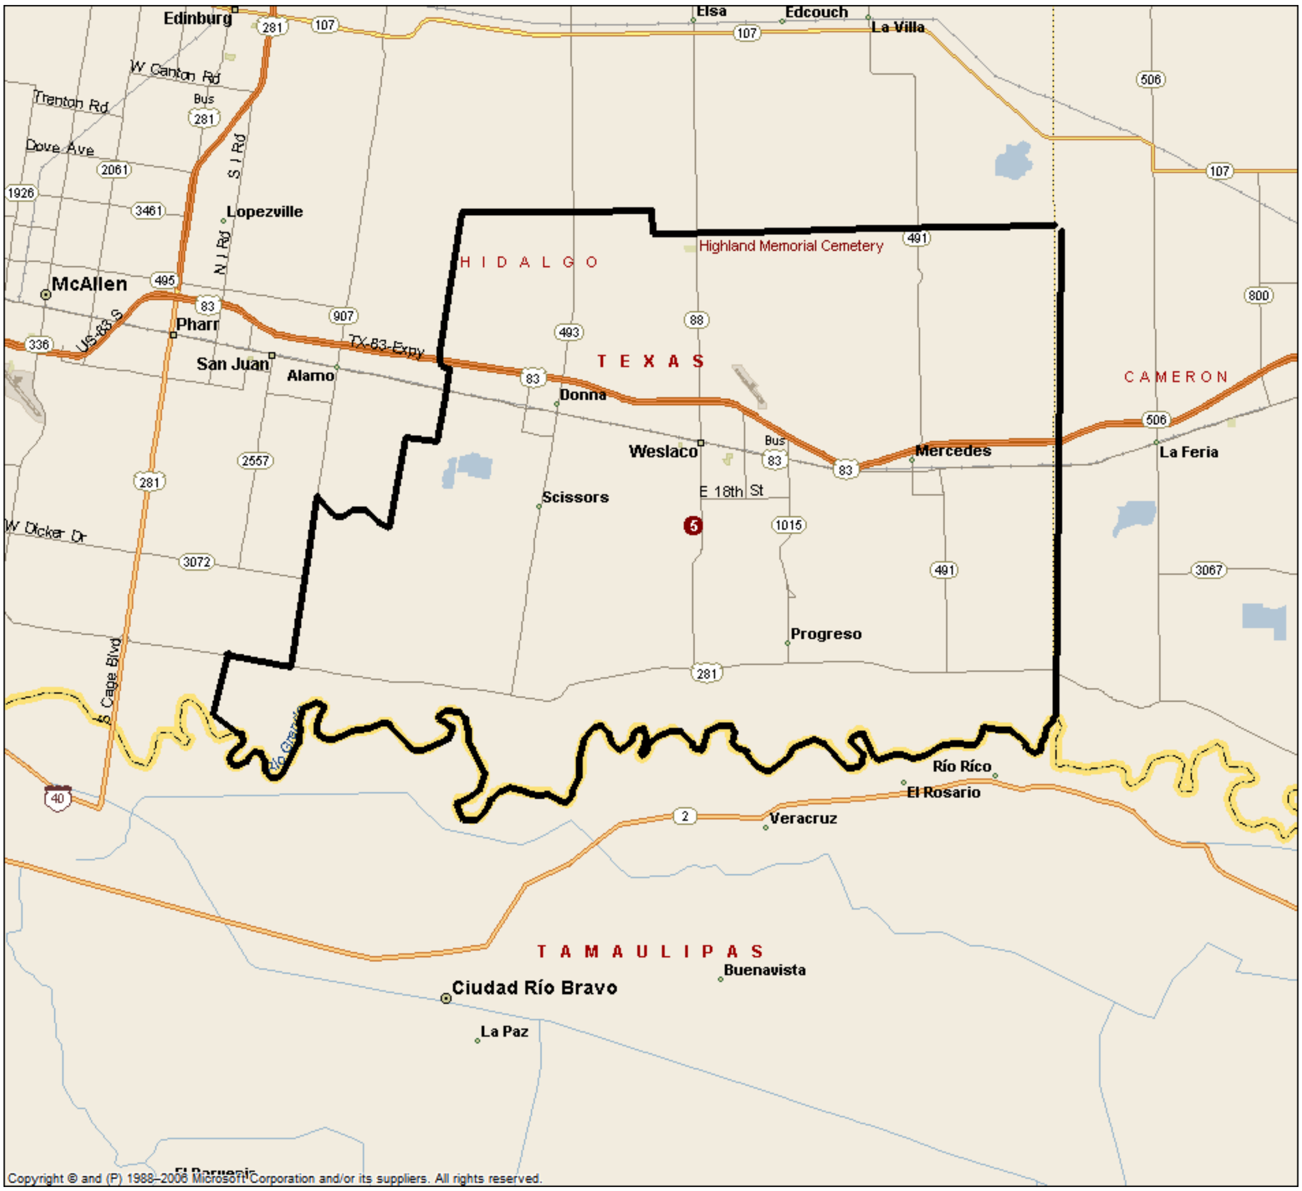
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are approximately 56 subsidized units serving low-income senior households in the South Central Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. The Submarket currently has 142 new subsidized and LIHTC units for seniors in the planning stages. While this will help to address the need for affordable housing targeting seniors in the Submarket, additional housing will likely still be needed for senior households at the very lowest income levels.

5. SOUTHEAST HIDALGO COUNTY SUBMARKET ANALYSIS

SOUTHEAST HIDALGO COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the Southeast County Submarket, which is bounded to the north by Roosevelt Road, Mile 12 ½ Road North, Mile 6 Road West, and Mile 12 Road North; to the east by Mile 3 East; to the south by the U.S. Mexico Border; and to the west by Stewart Road, Military Highway 281, South Alamo Road/FM-907, Main Floodway Road, Border Road, Lakes Avenue, and Valverde Road. The following map illustrates the boundaries of the Submarket as defined above.

Southeast Hidalgo County Submarket Map



The Southeast Hidalgo County Submarket includes the communities/cities of Donna, Weslaco, and Mercedes. Approximately 40 to 50 percent of the area in this Submarket can be characterized as developed and within close proximity to most locational amenities and essential services. The remaining 50 to 60 percent of the area in this Submarket contains very little development and offers limited access to locational amenities and essential services. Development is located along U.S. Highway 83, which is the area's primary thoroughfare, and dissipates slowly in each direction with limited development occurring along the U.S. Mexico border region. The predominant form of housing in this Submarket is owner-occupied single-family homes in fair to excellent condition and less than five to 40 years in age. There is a moderate amount of multifamily development in poor to excellent condition and less than five to 40 years in age.

Local Government

As previously mentioned, the Southeast Hidalgo County Submarket includes the communities/cities of Donna, Weslaco, and Mercedes.

Weslaco, Texas is a city in Hidalgo County operating under a Commission-manager form of government. Weslaco was incorporated in 1919 and the city charter was adopted in 1927. According to the City of Weslaco website, Weslaco is comprised of a land area of 13.1 square miles and has an estimated population of 30,416.

Donna, Texas is a city in Hidalgo County operating under a Council-manager form of government. According to the U.S. Census, Donna is comprised of a land area of 5.1 square miles and had a 2000 population of 14,768.

Mercedes, Texas is a city in Hidalgo County. According to the U.S. Census, Mercedes is comprised of a land area of 8.6 square miles and had a 2000 population of 17,649.

Employment by Industry

The following table illustrates employment by industry for the Southeast Hidalgo County Submarket and McAllen-Edinburg-Mission MSA in 2007.

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the Southeast Hidalgo County Submarket are the educational services, health care/social assistance, retail trade, and construction sectors. Approximately 52.7 percent of people in the Submarket work in these four industries. The Submarket has a larger number of persons employed in the educational services and healthcare/social assistance sectors and a smaller number of people employed in the retail trade and construction sectors, relative to the MSA. Although educational services and health care/social services are typically stable sectors of the economy, industries such as retail trade and construction are particularly susceptible to fluctuations in the economy. The large number of people employed in the retail trade and construction industries could negatively impact employment in the Submarket due to the current national economic downturn. However, the strong presence of the educational services and health care/social assistance industries should promote economic stability.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing.

Commute Patterns in the Southeast Hidalgo County Submarket

The table below summarizes commute times for the Southeast Hidalgo County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	750
5-9 min	3,567
10-14 min	5,712
15-19 min	5,766
20-24 min	3,924
25-29 min	1,314
30-34 min	4,921
35-39 min	409
40-44 min	236
45-59 min	930
60-89 min	652
90+ min	466
Average Travel Time	21.1 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The largest share of workers in the Southeast Hidalgo County Submarket has a travel time to work of 15 to 19 minutes. The employment centers of Weslaco, Donna and Mercedes are accessible by most workers in less than 35 minutes.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the Southeast Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA. Data such as population, households and growth patterns are studied to determine if the McAllen-Edinburg-Mission MSA and the Southeast Hidalgo County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the Southeast Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA from 1990 through 2012.

Total Population				
Year	Southeast Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	78,368	-	383,545	-
2000	102,051	3.02%	569,463	4.85%
2007	131,745	4.01%	732,166	3.94%
2012	156,484	3.76%	865,301	3.64%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Both the Submarket and the MSA show strong growth from 2007 through 2012, although the Submarket will grow at a faster rate than the MSA from 2007 through 2012. Overall, the rate of population growth in the Submarket and MSA will decrease slightly from 2007 through 2012. However, growth rates in the Submarket and MSA from 2007 to 2012 are considered very strong and are a positive indicator of the need for all forms of housing and likely why so many individuals are employed in the construction sector in the Submarket.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990 through 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group				
Southeast Hidalgo County Submarket

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	Southeast Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	20,711	-	103,479	-
2000	27,955	3.50%	156,824	4.76%
2007	36,802	4.37%	205,804	4.31%
2012	43,954	3.89%	244,775	3.79%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to population growth, the household growth in the submarket and MSA show positive gains from 2007 through 2012, although the Submarket will grow at a faster rate than the MSA from 2007 through 2012. Household growth in the Submarket increased from 2000 to 2007 but is expected to decrease slightly from 2007 through 2012; however, the growth rate in the Submarket from 2007 through 2012 is still very strong. Similarly, household growth in the MSA is expected to slow from 2007 through 2012.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	Southeast Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.64	-	3.60	-
2007	3.57	-0.27%	3.53	-0.27%
2012	3.55	-0.11%	3.51	-0.11%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly larger than the MSA, and both are significantly larger than the national average size of 2.59 (not shown). The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket and the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	Southeast Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	$22,735	-	$24,843	-
2007	$27,466	2.87%	$30,519	3.15%
2012	$31,173	2.70%	$35,078	2.99%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 10 percent lower than the median household income in the MSA in 2007. The median household income in the Submarket and in the MSA is projected to grow at a slower rate from 2007 through 2012 than the previous seven years. It should be noted that the median household income in the Submarket and MSA were approximately 51.7 and 57.4 percent of the national average in 2007. The lower median income levels in the Submarket and MSA indicate an increasing need for affordable housing.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - Southeast Hidalgo County Submarket				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 37.4 percent of the population in the Submarket and 34.1 percent of the population in the MSA earned below $20,000 in 2007 with the lowest percentage earning between zero dollars and $10,000. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 32.7 percent and 29.4 percent, respectively, but in both instances, a significant portion of the population are projected to earn less than $20,000. This data provides strong support for affordable rental housing of all kinds in the Submarket and MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents is 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	Southeast Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	13,861	-	63,856	-
2000	18,451	3.3%	90,763	4.2%
2007	23,309	3.6%	116,831	4.0%
2012	29,871	5.6%	149,302	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

In contrast to general population trends in the MSA from 2007 through 2012, the senior population in the MSA is expected to increase dramatically from 2007 through 2012. Similarly, senior population growth in the Submarket is also expected to increase dramatically from 2007 through 2012, relative to the general population in the Submarket from 2007 through 2012. Senior population growth in both the Submarket and the MSA is expected to grow at an exceptional rate from 2007 through 2012, with growth in the Submarket similar to that of the MSA.

The exceptional projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	Southeast Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	10,807	-	52,073	-
2007	13,809	3.8%	67,113	4.0%
2012	17,753	5.7%	85,658	5.5%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth in the Submarket and MSA is expected to be exceptionally strong through 2012. Similar to senior population estimates, the household growth rate is expected to increase through 2012. The strong projected growth in the senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME						
Year	**McAllen-Edinburg-Mission, TX MSA**		**Southeast Hidalgo County Submarket**		**USA**	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
			All Ages			
2007	$30,519	-	$27,466	-	$53,154	-
2012	$35,078	2.59%	$31,173	2.38%	$62,503	3.52%
			Age 55+			
2007	$27,687	-	$26,093	-	$32,710	-
2012	$32,712	3.07	$30,744	3.01%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in all areas of analysis are below those of all households. Of the three areas of analysis, the median senior household income is lowest in the Submarket and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The senior median household income in the Submarket and MSA were approximately 79.8 and 84.6 percent, respectively, of the national average in 2007.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - Southeast Hidaldo County Submarket (Age 55+)				
Income Cohort	2007		2012

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,600. Compared to the MSA, the Submarket had the largest percentage of seniors earning less than $35,000 annually in 2007. Approximately 60.1 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The MSA features slightly fewer senior households in these income brackets when compared to the Submarket. By 2012, both areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 52.6 and 50.3 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. These factors indicate that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	Southeast Hidalgo County Submarket				McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	9,050	83.7%	1,757	16.3%	43,784	84.1%	8,289	15.9%
2007	11,564	83.7%	2,245	16.3%	56,430	84.1%	10,683	15.9%
2012	14,867	83.7%	2,886	16.3%	72,023	84.1%	13,635	15.9%

Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008

As the above table illustrates, the senior housing market is dominated by owner-occupied units in all areas of analysis. The Submarket and MSA have a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above). The small percentage of renter-occupied senior households is not unusual in developing submarkets, where owner-occupied housing is predominant.

Senior Demographic Conclusion

Although the median senior household income for the Submarket is projected to increase from 2007 to 2012, growth in the national and MSA's median senior household income is projected to outpace growth in the Submarket. Both the MSA and Submarket feature significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $36,100. Approximately 60.1 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The Submarket features slightly more senior households in these income brackets when compared to the MSA and national averages.

LOCAL MARKET INFORMATION

Southeast County Submarket

The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare

There is one primary health care provider serving the Southeast Hidalgo County Submarket, the South Texas Branch Knapp Medical Center, located in Weslaco. The Knapp Medical Center is a non-profit 233-bed medical center which provides general hospital care to a rural and city population of approximately 175,000 people. The Knapp Medical Center has 220 physicians and has a medical staff of over 1,000. Additionally, there are 11 home health care agencies, 206 doctors, nine dentists, four nursing homes, and nine pharmacies located in Weslaco. Mercedes, Texas has seven physicians, three medical clinics, and one dentist.

Transportation

The Southeast Hidalgo County Submarket is served by the McAllen Miller International Airport, which is located approximately 18 miles east of Weslaco, Texas. The McAllen Miller International Airport (MFE) is the primary business airport of the Rio Grande Valley and provides non-stop flights to Dallas-Fort Worth, Houston, and Las Vegas via American Airlines, Continental Airlines, and Allegiant Air.

Highway access to the Southeast Hidalgo County Submarket can be accomplished via U.S. Highway 83. U.S. Highway-83 runs east/west from Harlingen, Texas to Manitoba, Canada.

Education

The Southeast Hidalgo County Submarket is served by the Weslaco Independent School District, the Mercedes Independent School District, Donna Independent School District, the Progresso Independent School District, and the South Texas Independent School District. The Weslaco Independent School District has ten elementary schools, four middle schools, one secondary school, three high schools, and two alternative schools with a total enrollment of 15,703 and 1,024 teachers. The Mercedes Independent School District has five elementary schools, one middle school, and three high schools with a total enrollment of 5,072. The Progresso Independent School District has one high school, two middle schools and one elementary school. The South Texas Independent School District serves junior high and high school students in the Rio Grande Valley. The district stretches over three counties, Cameron, Hidalgo and Willacy, and overlaps 28 other school districts in an area 3,643 miles in size. The district is comprised of five magnet schools, two of which are located in Mercedes, Texas, South Texas High school for Health Professions and The Science Academy of South Texas.

The nearest community college is the Weslaco branch of the South Texas Community College System. The nearest universities are located outside of the Submarket in Edinburg and McAllen, approximately 5 to 15 miles east of Mission along U.S. Highway 83. The University of Texas Pan American in Edinburg, Texas has 17,337 students, including 2,261 graduate students and is the tenth largest university in the state and the fifth largest in the UT system. McAllen offers five major colleges/universities including the San Antonio College of Medical and Dental Assistants, South

Texas Community College, South Texas Vocational Technical Institute, and the University of Cosmetology Arts and Sciences.

Public Transportation

Valley Transit Company serves the city of Weslaco and the Southeast Hidalgo County Submarket. Valley Transit is a full-service bus company that serves South Central Texas and Northern Mexico with more than 50 daily schedules, as well as connections to nationwide travel on Greyhound Lines. The nearest Valley Transit Travel Center and Bus Stop is located at 113 East 3rd Street in Weslaco and is open 24 hours a day.

Employment Centers

There are a moderate to extensive number of employment centers in the Southeast Hidalgo County Submarket. The majority of employment centers are located in Weslaco. The largest employers in the city of Weslaco are:

Rank	Company	Industry	Employees
1	Weslaco ISD	Education	2,276
2	Knapp Medical Center	Healthcare	1,000+
3	Wal-Mart	Retail	500
4	Woodcrafters	Manufacturing	376
5	City of Weslaco	Government	367
6	H-E-B #1	Retail	255
7	Payne Auto Group	Retail	246
8	South Texas College	Education	240
9	H-E-B #2	Retail	186
10	Texas A&M Research Center	Education	180

Source: City of Weslaco website: August 2008

The largest employers in the city of Mercedes are:

Rank	Company	Industry	Employees
1	Mercedes ISD	Education	850
2	South Texas ISD	Education	430
3	H&H Meats	Manufacturing	370
4	L&G Concrete	Construction	300
5	Magic Valley Electric Co-Op	Utilities	160
6	H-E-B	Retail	145
7	C&C Bakery, Inc.	Retail	100
8	Rios of Mercedes	Retail	65
9	Borden’s Inc.	Manufacturing	55
10	Queen City Apparel Master	Manufacturing	43

Based on the largest employers above, employment in the Submarket is dominated by the education, healthcare, retail, and manufacturing sectors. According to 2007 employment by industry demographics, the top four employment sectors in the Southeast Hidalgo County Submarket are the educational services, health care/social assistance, retail trade, and construction sectors. Approximately 52.7 percent of people in the Submarket work in these four industries. The demographic data and anecdotal data suggest that the Submarket is dominated by the education, healthcare and retail industries. Though there is a discrepancy regarding the dominance of the construction industry versus the manufacturing industry, when comparing both sets of data, it is important to note that the top two employers overall are education and healthcare, which are historically stable industries. Retail trade and construction/manufacturing are typically more volatile sectors of the economy as compared to historically stable industries such as education and healthcare. Therefore, despite the prevalence of the retail trade and construction/manufacturing industries in the Submarket, the high concentration of people employed in education and healthcare industries should promote economic stability throughout the current economic downturn.

Proximity to Local Services

There are a moderate to extensive number of locational amenities in the Southeast Hidalgo County Submarket. The majority of locational amenities are located in and surrounding the cities of Weslaco and Mercedes, Texas.

HOUSING SUPPLY ANALYSIS

SOUTHEAST HIDALGO COUNTY SUBMARKET HOUSING SUPPLY ANALYSIS

Age of the Housing Stock

The following table presents the age of the housing stock in the Southeast Hidalgo County Submarket.

AGE OF HOUSING STOCK IN PMA

Years	Number of Units	Percent of Housing Stock
1999-3/2000	1,345	3.74%
1995-1998	5,205	14.48%
1990-1994	4,831	13.44%
1980-1989	8,793	24.46%
1970-1979	6,616	18.40%
1960-1969	4,361	12.13%
1950-1959	2,390	6.65%
1940-1949	1,242	3.45%
1939 and Before	1,171	3.26%
Total	**35,954**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (70.78 percent) in the West Central Hidalgo County Submarket was constructed from 1970 through 1998. The Submarket consists of moderate residential development including primarily of single-family homes with some multifamily housing. Based upon observations in the field, the predominant form of housing in this Submarket is owner-occupied single-family homes to excellent condition and less than five to 40 years in age. There is a moderate amount of multifamily development in poor to excellent condition and less than five to 40 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 "5+ units" building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while "5+ units" building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008.

Interviews

Housing Authority of County of Hidalgo

The Housing Authority of the County of Hidalgo was established in 1948 in order to serve the local farmworking families and migrant farmworkers in the region. The Housing Authority of the County of Hidalgo currently administers Farm Labor Housing units and Public Housing units in Hidalgo County, as well as Housing Choice Vouchers. According to Adela Montes, Deputy Director for the Housing Authority of the County of Hidalgo, there are currently 535 Farm Labor Housing units in two developments and 55 Public Housing units in two developments in Hidalgo County, excluding those administered by the McAllen Housing Authority. Two of these developments are located in the Southeast Hidalgo County Submarket, Northside Apartments and Villa Sandoval-Longoria. There are approximately 8,592 Housing Choice Vouchers budgeted for Hidalgo County, and all are currently in use. Waiting Lists for Public Housing and Farm Labor Housing are currently open while the waiting list for Housing Choice Vouchers is closed. There are approximately 896 households on the waiting list for Housing Choice Vouchers. Of the 896 households, 162 are elderly households. There is no separate waiting list for special needs households in the Housing Choice Voucher Program. Currently, there are 104 elderly households participating in the Housing Choice Voucher Program in Hidalgo County. The number of households on the waiting list for Public Housing and Farm Labor Housing can be found below:

FARM LABOR HOUSING WAITING LIST – HIDALGO COUNTY					
Name	1BR	2BR	3BR	4BR	Total
Northside Apartments	14HH	11HH	2HH	0HH	27HH
Memorial Apartments	N/A	N/A	N/A	N/A	46HH

PUBLIC HOUSING WAITING LIST – HIDALGO COUNTY					
Name	1BR	2BR	3BR	4BR	Total
Villa Sandoval-Longoria	N/A	54HH	23HH	23HH	100HH
Villa San Juanita Rutledge	N/A	N/A	15HH	24HH	39HH

The current payment standards for one-, two-, three-, and four-bedroom units are listed below. According to Adela Montes, the payment standards are 100 percent of the Fair Market Rents.

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

Housing Authority of the City of Weslaco

According to Jaime Villa, Section 8 Director in the Housing Authority of the City of Weslaco, there are currently 484 Housing Choice Vouchers designated for the City of Weslaco. Approximately 480 of the vouchers are currently in use. According to Mr. Villa, the payment standards being used in Weslaco match those published by the Housing Authority of the County of Hidalgo. The waiting list for housing choice vouchers is currently open and the waiting list has approximately 500 applicants. According to Mr. Villa, three-bedroom units are in high demand and approximately five percent of the applicants on the waiting list are senior/disabled households. There are two family public housing developments currently being administered by the Weslaco Housing Authority, Sevilla Apartments and Centerpointe Homes. There is one senior-targeted public housing development, Alta Vista Senior Towers, currently undergoing renovations and scheduled to be completed in September of 2009.

Housing Authority of the City of Donna

According to Norma Guytan, Section 8 Director in the Housing Authority of the City of Donna, there are currently 296 Housing Choice Vouchers designated for the City of Donna. Approximately 280 of the vouchers are currently in use. According to Ms. Guytan, the payment standards being used in Donna are as follows:

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$567
Two-bedroom	$669
Three-bedroom	$803
Four-bedroom	$923

The payment standards being used by the Donna Housing Authority are notably higher than those published by the Housing Authority of the County of Hidalgo. The waiting list for housing choice vouchers is currently closed and the waiting list has approximately 250 to 300 applicants. According to Ms. Guytan, two- and three-bedroom units are in high demand and approximately 10 percent of the applicants on the waiting list are senior/disabled households. There is one family public housing development currently being administered by the Donna Housing Authority, Mesa Vista.

Housing Authority of the City of Mercedes

According to Irma Perez, Section 8 Director in the Housing Authority of the City of Mercedes, there are currently 290 Housing Choice Vouchers designated for the City of Donna. Approximately 247 of the vouchers are currently in use. According to Ms. Perez, the payment standards being used in Mercedes are as follows:

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$464
Two-bedroom	$548
Three-bedroom	$657
Four-bedroom	$755

The payment standards being used by the Mercedes Housing Authority are notably lower than those published by the Housing Authority of the County of Hidalgo. The waiting list for housing choice vouchers is currently closed and the waiting list has approximately 200 applicants. Ms. Perez was unaware of the number of senior/disabled applicants on the waiting list. Ms Perez did not have information regarding Public Housing in Mercedes and our phone calls to the public housing contact have not been returned as of the date of this study.

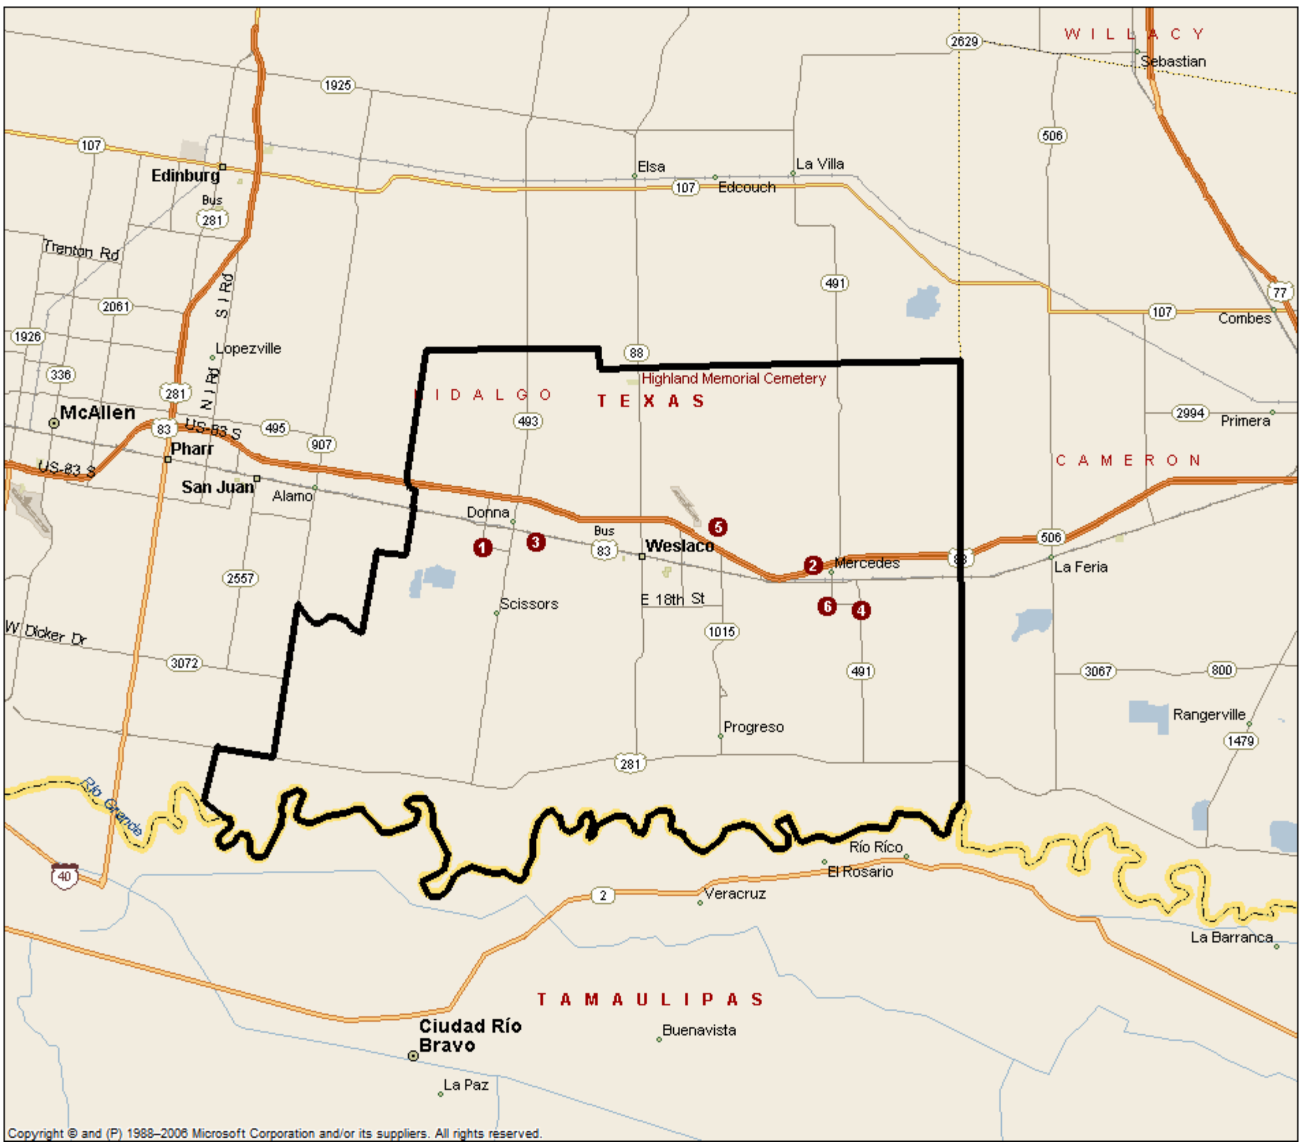
City of Weslaco Planning and Code Enforcement

We attempted to contact Adrian Torres and David Sifuentes with the Planning and Code enforcement divisions of the City of Weslaco, Texas. However, our inquiries regarding proposed or under construction multifamily development have not bee addressed as of the date of this study.

LIHTC Family Supply

We attempted to identify all existing, proposed, and under construction family LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers.

Novogradac identified 10 family LIHTC developments in the Southeast Hidalgo County Submarket. Of the 10 LIHTC developments, Oak Haven, Mesa Vista, Sevilla, and Centerpointe Homes have either an underlying USDA or Section 8 subsidy and are comprised entirely or in part of public housing units. Therefore, these properties have been excluded from the family LIHTC analysis and will be addressed in the family subsidized analysis section. The six of the remaining family LIHTC developments were able to provide current property and market data. The excluded properties list on the following pages lists the four family LIHTC properties in the PMA that were excluded from this analysis and the basis for their exclusion. A map of the surveyed properties can be found below:



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Amistad Apartments	Donna	LIHTC/Market – Family
2	Anacuitas Manor Apartments	Mercedes	LIHTC – Family
3	Arbor Cove	Donna	LIHTC/Market – Family
4	Casa Saldana	Mercedes	LIHTC/Market – Family
5	La Estancia Apartments	Weslaco	LIHTC/Market – Family
6	La Herencia Apartments	Mercedes	LIHTC – Family

The following pictures identify the surveyed LIHTC family properties in the Submarket:

Amistad Apartments

Anacuitas Manor Apartments

Arbor Cove

Casa Saldana

La Estancia Apartments

La Herencia Apartments

Excluded Properties

The excluded properties list below lists the four family LIHTC properties in the PMA that were excluded from this analysis and the basis for their exclusion.

EXCLUDED PROPERTIES LIST				
Name	**Address**	**Type**	**No. of Units**	**Reason For Exclusion**
Oak Haven Apartments	513 W Frontage Road	LIHTC/USDA	24	Superceding subsidy
Mesa Vista	1301 South Salinas Street	LIHTC/Public Housing	76	Superceding subsidy
Sevilla Apartments	600 North Airport	LIHTC/Public Housing	80	Superceding subsidy/ scheduled for demolition
Centerpointe Homes	3401 Diamond Boulevard	LIHTC/Section 8/Public Housing	30	Superceding subsidy

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are five family properties in the Southeast Hidalgo Submarket, which have received an allocation in the last three years.

RECENT LIHTC ALLOCATIONS					
Name	**Address**	**Type**	**No. of Units**	**Status**	**Date of Allocation**
Sevilla Apartments	600 North Airport Road	LIHTC/Public Housing-Family	80	Currently scheduled for demolition and reconstruction	2005/2008
Centerpointe Homes	3401 Diamond Boulevard	LIHTC/Section 8/Public Housing-Family	36	Complete and 100 percent occupied; being used in family subsidized supply analysis	2006
Casa Saldana	1225 N FM 491	LIHTC/Market-Family	196	Complete and 98.5 percent occupied; being used in family LIHTC analysis	2004/2007
Mesa Vista	1301 South Salinas	LIHTC/Public Housing-Family	76	Complete and 100 percent occupied; being used in family subsidized supply analysis	2005/2008
Arbor Cove	2805 Fordyce	LIHTC-Family	120	Complete and 99.2 percent occupied; being used in family LIHTC analysis	2004/2007

The only property scheduled for construction or renovation is Sevilla Apartments in Weslaco. Sevilla Apartments received a large LIHTC allocation in 2005 and then a smaller allocation again in 2008. The project is a proposed rehabilitation of a family oriented, multifamily public housing complex consisting of 80-units in 22 residential buildings and constructed in 1976. According to the property manager, the existing public housing development will be demolished and reconstruction will take place using tax credit funding. However, according to the 2005 LIHTC application, the existing public housing is scheduled for renovation as opposed to reconstruction. In either case, observations in the field confirm that renovation/demolition or reconstruction have not yet commenced. Upon rehabilitation/reconstruction, there will be 80 one-, two-, and three-bedroom units restricted to households earning less than 30 and 60 percent of the AMI. As previously mentioned, the units currently operate as public housing with a subsidy based on the Housing Authority's HUD-approved Annual Contributions Contract. However, once the units have been rehabilitated/reconstructed, the development will no longer receive the HUD subsidy.

All of the remaining recently allocated properties are fully constructed and stabilized. We are not aware of any other proposed or under construction family-oriented LIHTC developments in the Submarket.

Unit Mix

The following table illustrates the unit mix in the family LIHTC rental property market. Management at Casa Saldana was unable to provide a breakdown by unit type and therefore was excluded from this analysis.

Unit Mix - LIHTC Family		
Unit Type	**Total Units**	**Percent**
1 BR	64	11.5%
2 BR	194	34.9%
3 BR	241	43.3%
4 BR	57	10.3%
Total	**556**	**100%**

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.57 and is projected to decrease slightly by 2012 to 3.55. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family LIHTC rental property market. Only one property is offering four-bedroom units and therefore an analysis of the four-bedroom unit size has not been conducted.

Unit Size - LIHTC Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	570	750	640
2 BR	800	990	920
3 BR	1,015	1,240	1,127

The one, two, and three-bedroom unit sizes for the surveyed LIHTC properties in the market are 19.2 percent smaller, 1.8 percent larger, and 10.8 percent larger than the surveyed market rate one-, two-, and thee-bedroom units in the Submarket.

The existing LIHTC multifamily properties in the Submarket offer a moderate amount of in-unit and community amenities. Most of the surveyed LIHTC properties offer unit amenities that include balconies/patios, window covers, carpeting, central air, dishwashers, ceiling fans, garbage disposals, ovens, refrigerators, and walk-in-closets. Washers/dryers and washer/dryer connections are not prevalent in the family LIHTC market. Most of the surveyed LIHTC properties offer community amenities including a clubhouse/community room, a central laundry, off-street parking, on-site management, a playground, and a swimming pool. Approximately half of the properties offer a business center/computer room and picnic areas. Security features such as perimeter fencing and limited access are prevalent in the Submarket. Only two of the surveyed properties offered non-shelter services such as an afterschool program, daycare and tutoring; it is not considered a LIHTC market standard in the Submarket. Additionally, premium amenities are offered by the surveyed LIHTC properties in the Submarket.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type for the surveyed properties. Management at Casa Saldana was unable to provide a breakdown by unit type and therefore was excluded from this analysis.

Weighted Vacancy - LIHTC Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	64	7	10.93%
2 BR	194	10	5.15%
3 BR	241	7	2.90%
4 BR	57	0	0.00%
Total	**556**	**25**	**4.50%**

The highest weighted vacancy rates in the Submarket are found in the smaller bedroom types. It should be noted that the surveyed market rate properties in the Submarket have an average weighted vacancy rate of 3.40 percent. Affordable properties typically exhibit vacancy rates lower than that of market rate properties. The vacant units found at the surveyed LIHTC family properties are comprised entirely of units at the 60 percent of AMI set-aside and the market rate units. The higher than average weighted vacancy rate for the LIHTC unit in the Submarket could be indicative of a lack of income qualified tenants for the 60 percent of AMI units.

Absorption

Only one property, Casa Saldana, constructed in 2006, was able to provide an absorption rate of 12.4 units per month.

Waiting Lists

The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – LIHTC Family		
Property Name	**Number of Units**	**Households**
Amistad Apartments	76	None
Anacuitas Manor	72	10HH
Arbor Cove	120	LIHTC units only; 12 HH
Casa Saldana	196	LIHTC units only; 15HH
La Estancia	128	None
La Herencia	160	None

Three of the six surveyed family LIHTC properties currently maintain small waiting lists with an average length of 12 households per month.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – LIHTC Family		
Property Name	**Number of Units**	**Vacancy Rate**
Amistad Apartments	76	6.60%
Anacuitas Manor	72	1.40%
Arbor Cove	120	0.80%
Casa Saldana	196	1.50%
La Estancia	128	5.50%
La Herencia	160	6.90%
AVERAGE	**752**	**3.78%**

Overall vacancy at the surveyed family LIHTC properties is slightly higher than the surveyed market rate properties in the Submarket, which have an overall average vacancy rate of 2.28 percent. All of the surveyed LIHTC properties were constructed between 1998 and 2006 and all of the surveyed LIHTC properties offer some units at lower set-asides. The overall average vacancy rate appears slightly higher than is typical considering the age, condition, and unit mix of the surveyed LIHTC properties.

Concessions

Only one of the LIHTC properties in the market is offering a concession. Concessions are not prevalent in the market

Turnover

The following table summarizes turnover rates at the surveyed properties.

Turnover – LIHTC Family		
Property Name	**Number of Units**	**Turnover**
Amistad Apartments	76	47%
Anacuitas Manor	72	33%
Arbor Cove	120	27%
Casa Saldana	196	50%
La Estancia	128	47%
La Herencia	160	15%
AVERAGE		**36.5%**

The average turnover rate for the LIHTC family properties in the market (36.5 percent) is higher than the turnover rates for the subsidized and market rate properties in the Submarket, with 21.2 percent and 26.5 percent, respectively.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

PAYMENT STANDARDS	
Units	**Payment Standards**
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The surveyed rents at all of the surveyed LIHTC properties, including those of the market rate units, are below the current payment standards for Hidalgo County. Five of the six surveyed properties have rents set at the maximum allowable levels.

LIHTC Family Supply Conclusion

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.57 and is projected to decrease slightly by 2012 to 3.55. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

The existing LIHTC multifamily properties in the Submarket offer a moderate amount of in-unit and community amenities. Most of the surveyed LIHTC properties offer unit amenities that include balconies/patios, window covers, carpeting, central air, dishwashers, ceiling fans, garbage disposals, ovens, refrigerators, and walk-in-closets. Washers/dryers and washer/dryer connections are not prevalent in the family LIHTC market. Most of the surveyed LIHTC properties offer community amenities including a clubhouse/community room, a central laundry, off-street parking, on-site management, a playground, and a swimming pool. Approximately half of the properties offer a business center/computer room and picnic areas. Security features such as perimeter fencing and limited access are prevalent in the Submarket. Only two of the surveyed properties offered non-shelter services such as an afterschool program, daycare or tutoring; it is not considered a LIHTC market standard in the Submarket. Additionally, premium amenities are offered by the surveyed LIHTC properties in the Submarket

Concessions are not prevalent in the market and three of the six properties currently maintain small waiting lists with an average length of approximately 12 households. Only Casa Saldana was able to provide an absorption rate of 12.4 units per month. Overall vacancy at the surveyed family LIHTC properties (3.78 percent) is slightly higher than the surveyed market rate properties in the Submarket, which have an overall average vacancy rate of 2.28 percent. The average turnover rate for the LIHTC family properties in the market (36.5 percent) is higher than the turnover rates for the subsidized and market rate properties in the Submarket, with 21.2 percent and 26.5 percent respectively.

The surveyed rents at all of the surveyed LIHTC properties, including those of the market rate units, are below the current payment standards for Hidalgo County. Five of the six surveyed properties have rents set at the maximum allowable levels.

LIHTC SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers.

Novogradac identified one senior LIHTC development, La Sombra Apartments with 50 units. La Sombra is a combination LIHTC/USDA development with 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. Therefore, this property has been excluded from the senior LIHTC analysis and will be addressed in the senior subsidized analysis section.

Proposed/Under Construction

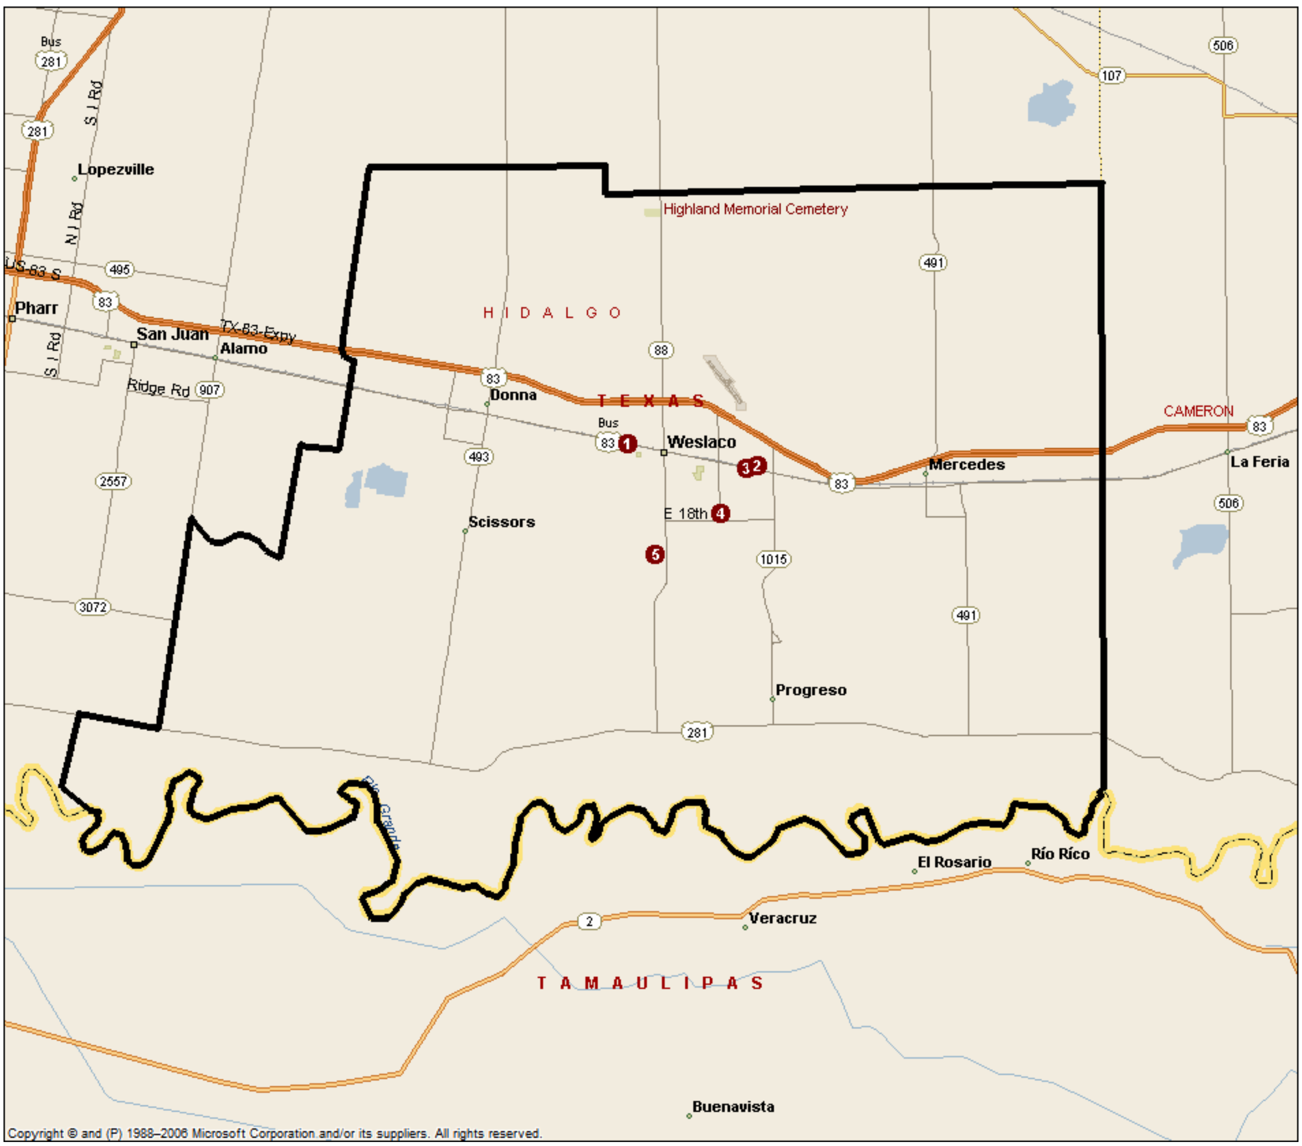
According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one proposed or under construction senior LIHTC property in the Southeast Hidalgo County Submarket, Alta Vista Senior Towers. Alta Vista Senior Towers is a midrise age-restricted public housing development comprised of 100 studio and one-bedroom units. This property was constructed in 1973 and is currently undergoing renovations. The existing tenants have been relocated and the project is expected to be complete by the end of Spring 2009. Upon renovation, the units at the 30 percent of AMI level will be public housing units and the units at the 60 percent of AMI level will be Project Based Section 8 units.

MARKET RATE FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials.

Novogradac identified seven family market rate properties in the Submarket. Of the seven properties, four were able to provide market data. We attempted to contact each of the remaining developments multiple times with no success. A table of the excluded properties and the reasons for exclusion can be found on the following pages.

The following map illustrates the location of the surveyed market rate family properties in the Submarket.



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Keystone Apartments	Weslaco	Market – Family
2	Los Encinos Apartments	Weslaco	Market – Family
3	Mi Ka Sa Apartments	Weslaco	Market – Family
4	Sangria Sunset	Weslaco	Market - Family

Sangria Sunset

Excluded Properties

The following table illustrates all of the excluded market rate properties in the Submarket. We attempted to contact the excluded properties multiple times with no success. Therefore, we were unable to confirm the target population for each development; we assume all of the following properties are family-oriented.

EXCLUDED PROPERTIES LIST

Name	Address	Type	No. of Units	Reason For Exclusion
Hal-Zee Apartments	222 S Westgate Drive	Market-Family	N/A	Could not Contact
Bridge Hollow Apartments	1522 S Bridge Avenue	Market-Family	N/A	Could not Contact
Dream World Apartments	2604 S Bridge Avenue	Market-Family	N/A	Could not Contact

Proposed Construction

We attempted to contact Adrian Torres and David Sifuentes with the Planning and Code enforcement divisions of the City of Weslaco, Texas. However, our inquiries regarding proposed or under construction market rate multifamily development have not bee addressed as of the date of this study.

Unit Mix

The following table illustrates the unit mix in the family market rate rental property market.

Unit Mix - Market Family		
Unit Type	**Total Units**	**Percent**
1 BR	102	38.5%
2 BR	118	44.5%
3 BR	45	17.0%
Total	**265**	**100%**

Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.57 and is projected to decrease slightly by 2012 to 3.55. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012. Though smaller bedroom types are currently prevalent in the market, demographic projections evidence indicates a possible unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family market rate rental property market.

Unit Size – Market Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	550	1,017	792
2 BR	796	1,017	903
3 BR	995	1,014	1,005

The one, two, and three-bedroom unit sizes for the surveyed market rate properties in the market are 19.2 percent larger, 1.8 percent smaller, and 10.8 percent smaller than the surveyed LIHTC one-, two-, and thee-bedroom units in the Submarket.

\

The surveyed market rate properties in the Southeast Hidalgo County Submarket offer a limited amount of in-unit and community amenities. The majority of the surveyed market rate properties offer in-unit amenities including window covers, carpeting, central air, ovens, and refrigerators. Half of the properties offer balconies/patios, garbage disposals, ceiling fans, and balconies/patios. The majority of the market rate surveyed properties offer off-street parking. Half of the surveyed properties offer carports at an additional cost, on-site management, and a swimming pool.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit types for the surveyed properties.

Weighted Vacancy - Market Family			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	102	3	2.94%
2 BR	118	6	5.10%
3 BR	45	0	0.00%
Total	**265**	**9**	**3.40%**

The average weighted vacancy rate for the surveyed market rate properties is slightly lower than the average weighted vacancy rate of the surveyed LIHTC properties, of 4.50 percent.

Absorption

One of the market rate properties was able to provide an absorption rate of five units per month, which is significantly slower than the absorption rate of the surveyed LIHTC property of 12.4 units per month.

Waiting List

None of the market rate properties maintain a waiting list. Waiting lists are not prevalent in the Submarket.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – Market Family			
Property Name	Number of Units	Vacant Units	Vacancy Rate
Keystone Apartments	136	2	1.50%
Los Encinos Apartments	19	0	0.00%
Mi Ka Sa Apartments	18	0	0.00%
Sangria Sunset	92	7	7.60%
AVERAGE	**265**	**9**	**3.4%**

The average vacancy rate for the market rate properties is slightly lower than that of the surveyed average vacancy of LIHTC properties of 3.78 percent.

Concessions

None of the surveyed market rate properties is offering concessions. Concessions are not prevalent in the Submarket, with respect to market rate properties.

Turnover

All of the surveyed market rate properties were able to provide turnover information. The following table illustrates turnover information in the market.

Turnover – Market Family		
Property Name	**Number of Units**	**Turnover**
Keystone Apartments	136	48%
Los Encinos Apartments	19	21%
Mi Ka Sa Apartments	18	5%
Sangria Sunset	92	32%
AVERAGE		**26.5%**

Annual turnover rates reported range from 5 percent to 48 percent, with an average of 26.5 percent. Average turnover for the LIHTC properties in the market is slightly higher at 36.5 percent.

PAYMENT STANDARDS	
Units	**Payment Standards**
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The average market rents for the one-, two-, and three-bedroom units at the surveyed market rate properties are $553, $594, and $782. The average one-, two-, and three-bedroom market rents are $37 higher, $15 lower, and $52 higher, respectively, than the current payment standards for the one-, two-, and three-bedroom units in Hidalgo County. The average one-, two-, and three-bedroom market rents are $63, $6, and $102 higher, respectively, than the 2008 maximum allowable rents at 60 percent of AMI for the one-, two-, and three-bedroom units in Hidalgo County.

Market Supply Conclusion

Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.57 and is projected to decrease slightly by 2012 to 3.55. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012. Though smaller bedroom types are currently prevalent in the market, demographic projections evidence indicates a possible unmet demand for larger bedroom types.

The surveyed market rate properties in the Southeast Hidalgo County Submarket offer a limited amount of in-unit and community amenities. The majority of the surveyed market rate properties offer in-unit amenities including window covers, carpeting, central air, ovens, and refrigerators. Half of the properties offer balconies/patios, garbage disposals, ceiling fans, and balconies/patios. The majority of the market rate surveyed properties offer off-street parking. Half of the surveyed properties offer carports at an additional cost, on-site management, and a swimming pool.

The one-, two-, and three-bedroom unit sizes for the surveyed market rate properties in the market are 19.2 percent larger, 1.8 percent smaller, and 10.8 percent smaller than the surveyed market rate one-, two-, and thee-bedroom units in the Submarket. The average weighted vacancy rate for the surveyed market rate properties is slightly lower than the average weighted vacancy rate of the surveyed LIHTC properties, of 4.50 percent. Annual turnover rates reported range from 5 percent to 48 percent, with an average of 26.5 percent. Average turnover for the LIHTC properties in the market is slightly higher at 36.5 percent.

One of the market rate properties was able to provide an absorption rate of five units per month, which is significantly slower than the absorption rate of the surveyed LIHTC property of 12.4 units per month. None of the market rate properties maintains a waiting list. Waiting lists are not prevalent in the Submarket. None of the surveyed market rate properties is offering concessions. Concessions are not prevalent in the Submarket, with respect to market rate properties. The average vacancy rate for the market rate properties is slightly lower than that of the surveyed average vacancy of LIHTC properties of 3.78 percent.

The average market rents for the one-, two-, and three-bedroom units at the surveyed market rate properties are $553, $594, and $782. The average one-, two-, and three-bedroom market rents are $37 higher, $15 lower, and $52 higher, respectively, than the current payment standards for the one-, two, and three-bedroom units in Hidalgo County. The average one-, two-, and three-bedroom market rents are $63, $6, and $102 higher, respectively, than the 2008 maximum allowable rents at 60 percent of AMI for the one-, two, and three-bedroom units in Hidalgo County.

Market Rate Senior Supply

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable existing senior market rate properties in the Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis.

Proposed Construction

We were unable to identify any proposed or under construction market rate senior developments in the Submarket.

Subsidized Family Supply

We attempted to identify all existing, proposed, and under construction family oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are thirteen existing family-targeted subsidized developments located in the Southeast Hidalgo Submarket. We were able to acquire information on seven of the thirteen existing family-oriented subsidized developments. Two of the six remaining subsidized developments, Sevilla Apartments and Mercedes Palms are undergoing renovations/reconstruction and have therefore been excluded from this analysis. We attempted to contact each of the four remaining developments multiple times with no success. A table of the excluded properties and the reasons for exclusion can be found on the following pages.

The following map illustrates the location of the surveyed family-oriented subsidized properties in the Submarket.

SURVEYED FAMILY PROPERTIES

Excluded Properties

The table below lists the six family subsidized properties in the Submarket that were excluded from this analysis and the basis for their exclusion.

EXCLUDED PROPERTIES LIST				
Name	Address	Type	No. of Units	Reason For Exclusion
Oak Haven Apartments	513 W Frontage Road	LIHTC/USDA	24	Could not Contact
Armory Housing Project	101 Armory Road	Section 8	N/A	Could not Contact
Queens Village	108 E 8th Street	Section 8	N/A	Could not Contact
La Merced Homes	4135 S Virginia Avenue	Section 8	N/A	Could not Contact
Sevilla Apartments	600 North Airport Road	LIHTC/Public Housing	80	Undergoing renovations/reconstruction
Mercedes Palms	685 Chapman Street	Section 8	N/A	Undergoing renovations

Proposed Construction

Sevilla Apartments, a public housing development located in Weslaco, Texas, received a large LIHTC allocation in 2005 and then a smaller allocation again in 2008. The project is a proposed rehabilitation of a family oriented, multifamily public housing complex consisting of 80-units in 22 residential buildings, constructed in 1976. According to the property manager, the existing public housing development will be demolished and reconstruction will take place using tax credit funding. However, according to the 2005 LIHTC application, the existing public housing is scheduled for renovation as opposed to reconstruction. In either case, observations in the field confirm that renovation/demolition or reconstruction have not yet commenced. Upon rehabilitation/reconstruction, there will be 80 one-, two-, and three-bedroom units restricted to households earning less than 30 and 60 percent of the AMI. As previously mentioned, the units currently operate as public housing with a subsidy based on the Housing Authority's HUD-approved Annual Contributions Contract. However, once the units have been rehabilitated/reconstructed the development will no longer receive the HUD subsidy.

According to Irma Perez, Section 8 Director in the Housing Authority of the City of Mercedes, there is one Project Based Section 8 development in Mercedes, currently undergoing renovations. The tenants have been relocated for the duration of the renovations, but Ms. Perez was unable to provide further details.

Unit Mix

The following table illustrates the unit mix in the family subsidized rental property market. Properties unable to provide a breakdown by unit type have been excluded from this analysis.

Unit Mix - Subsidized Family

Unit Type	Total Units	Percent
1 BR	55	11.0%
2 BR	215	43.0%
3 BR	190	38.0%
4 BR	40	8.0%
Total	**500**	**100%**

Large unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.57 and is projected to decrease slightly by 2012 to 3.55. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012.

Unit Size

The following table illustrates the existing unit sizes in the subsidized rental property market. Properties unable to provide information regarding unit sizes are prevalent in the Submarket.

Unit Size - Subsidized Family			
Unit Type	Minimum Surveyed	Maximum Surveyed	Surveyed Average
1 BR	571	710	641
2 BR	834	963	887
3 BR	1,009	1,438	1,175
4 BR	1,210	1,215	1,213

The surveyed one-, two, three-, and four-bedroom subsidized units have average sizes of 641, 887, 1,175 and 1,213 square feet, respectively. The subsidized one-, two-, and three-bedroom average unit sizes are similar, 3.6 percent smaller, and 4.1 percent larger, respectively, than the one, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. There were no four-bedroom units among the surveyed market rate and LIHTC developments.

The existing subsidized multifamily properties in the Southeast Hidalgo County Submarket offer limited in-unit and community amenities. The majority of the properties in the market offer in-unit amenities including balconies/patios, window covers, ovens, and refrigerators. The majority of the properties offer community amenities including off-street parking and on-site management. The majority of the surveyed subsidized properties offer no non-shelter services, no security features, and no premium amenities. Tile flooring versus carpet flooring is common among the subsidized properties. A basic appliance package is provided with washer connections only in most units.

Weighted Vacancy
The following table illustrates the weighted vacancy rates in the subsidized rental property market. Properties unable to provide a breakdown by unit type were excluded from the weighted vacancy analysis.

Weighted Vacancy - Subsidized Family

Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	55	0	0.00%
2 BR	215	10	4.70%
3 BR	190	5	2.63%
4 BR	40	0	0.00%
Total	**500**	**15**	**3.00%**

The average weighted vacancy of the surveyed subsidized properties (3.0 percent) is lower than the average weighted vacancy of the surveyed LIHTC properties (4.5 percent).

Absorption
Two properties were able to provide absorption rates of 12 units per month and 8 units per month, resulting in an average absorption rate of 10 units per month, as compared to the surveyed family LIHTC properties (12.4 percent).

Waiting List
The following table illustrates the waiting lists in the subsidized rental property market.

Waiting Lists – Subsidized Family

Property Name	Number of Units	Households
Centerpointe Homes	36	5HH
Mesa Vista Apartments	76	10HH
Donna Village	57	8HH
Northside Apartments	289	27HH
Sunrise Village Apartments	39	<15HH
Villa Sandoval-Longoria	35	55HH
Weslaco Village Apartments	44	45HH

The average length of the waiting lists at the surveyed subsidized properties is approximately 24 households, which is significantly higher than the average length of the waiting lists of the surveyed LIHTC properties (12 households). All of the surveyed developments maintain short to extensive waiting lists. Based on this information, we anticipate significant future demand for affordable housing.

Vacancy Levels

The following table illustrates the vacancy rates in the subsidized rental property market.

Vacancy – Subsidized Family			
Property Name	**Number of Units**	**Vacant Units**	**Vacancy Rate**
Centerpointe Homes	36	0	0.00%
Mesa Vista Apartments	76	0	0.00%
Donna Village	57	1	1.80%
Northside Apartments	289	14	4.80%
Sunrise Village Apartments	39	0	0.00%
Villa Sandoval-Longoria	35	0	0.00%
Weslaco Village Apartments	44	0	0.00%
AVERAGE	**500**	**15**	**3.00%**

The average vacancy rate of the surveyed subsidized properties (3.0 percent) is slightly lower than the average vacancy rate of the surveyed LIHTC properties (3.78 percent).

Concessions

None of the subsidized family properties in the market are offering concessions.

Turnover

Turnover – Subsidized Family		
Property Name	**Number of Units**	**Households**
Centerpointe Homes	36	20%
Mesa Vista Apartments	76	N/A
Donna Village	57	21%
Northside Apartments	289	50%
Sunrise Village Apartments	39	5%
Villa Sandoval-Longoria	35	10%
Weslaco Village Apartments	44	N/a
AVERAGE	500	21.2

Five of the seven surveyed subsidized properties were able to provide turnover rates ranging from 5 to 50 percent, resulting in an average turnover rate of 21.2 percent, as compared to the surveyed LIHTC properties which have an average turnover rate of 36.5 percent.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Rent and Square Footage Ranking

PAYMENT STANDARDS	
Units	**Payment Standards**
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

All of the surveyed properties have one-, two-, three-, and four-bedroom units below the current payment standards for Hidalgo County.

Subsidized Family Supply Conclusion

Large unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.57 and is projected to decrease slightly by 2012 to 3.55. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012.

The surveyed one-, two-, three-, and four-bedroom subsidized units have average sizes of 641, 887, 1,175 and 1,213 square feet, respectively. The subsidized one-, two-, and three-bedroom average unit sizes are similar, 3.6 percent smaller, and 4.1 percent larger, respectively, than the one-, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. There were no four-bedroom units among the surveyed market rate and LIHTC developments.

The average weighted vacancy of the surveyed subsidized properties (3.0 percent) is lower than the average weighted vacancy of the surveyed LIHTC properties (4.5 percent). Two properties were able to provide absorption rates of 12 units per month and 8 units per month, resulting in an average absorption rate of 10 units per month, as compared to the surveyed family LIHTC properties (12.4 percent). The average length of the waiting lists at the surveyed subsidized properties is approximately 24 households, which is significantly higher than the average length of the waiting lists of the surveyed LIHTC properties (12 households).

The average vacancy rate of the surveyed subsidized properties (0.94) is notably lower than the average vacancy rate of the surveyed LIHTC properties (3.78 percent). None of the subsidized family properties in the market are offering concessions. Five of the seven surveyed subsidized properties were able to provide turnover rates ranging from 5 to 50 percent, resulting in an average turnover rate of 21.2 percent, as compared to the surveyed LIHTC properties which have an average turnover rate of 36.5 percent.

All of the surveyed properties have one-, two-, three-, and four-bedroom units below the current payment standards for Hidalgo County.

Subsidized Senior Supply

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are three existing senior subsidized developments located in the Southeast Hidalgo Submarket. We were able to acquire information on one of the three subsidized senior properties. We attempted to contact each of the two properties multiple times with no success. A table of the excluded properties can be found below:

EXCLUDED PROPERTIES LIST				
Name	Address	Type	No. of Units	Reason For Exclusion
Villas Residencial aka Amigos Del Valle	334 E 5th Street	Section 8	N/A	Could not Contact
Casa De Amigos V	2100 W 6th Street	Section 8	N/A	Could not Contact

La Sombra is a combination LIHTC/USDA development with 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. La Sombra is an age-restricted/disabled development comprised of 50 one- and two-bedroom units. There are 42 one-bedroom units and 8 two-bedroom units. The property is currently 100 percent occupied with a year long waiting list for all units. Approximately 35 percent of the tenants are disabled tenants. Annual turnover is approximately two percent. A photo of La Sombra is shown below.

La Sombra Apartments

Based on the lack of available data, we were unable to complete a subsidized senior supply analysis.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one proposed or under construction senior LIHTC property in the Southeast Hidalgo County Submarket, Alta Vista Senior Towers. Alta Vista Senior Towers is a midrise age-restricted public housing development comprised of 100 studio and one-bedroom units. This property was constructed in 1973 and is currently undergoing renovations. The existing tenants have been relocated and the project is expected to be complete by the end of Spring 2009. Upon renovation, the units at the 30 percent of AMI level will be public housing units and the units at 60 percent of AMI will be Project Based Section 8 units.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the Southeast Hidalgo County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the Southeast Hidalgo County Submarket in 2007 is 36,802 and the total number of households in 2012 is projected to be 43,954. The total number of households age 55 and older in the Submarket for 2007 is 13,809, with a 2012 projection of 17,753 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 26.9 percent of the occupied housing unit households in the Southeast Hidalgo County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 16.3 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a

one-person household in the income range between 31 percent and 40 percent of AMI. A minimum income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the Southeast Hidalgo County Submarket (McAllen-Edinburg-Mission, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*

5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households

Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the Southeast Hidalgo County Submarket, approximately 27.4 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing

Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 3.4 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing

A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the Southeast Hidalgo County Submarket, it is estimated that 25.8 percent of households are living in overcrowded units.

Movership or Turnover Rate

There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the stabilized family LIHTC properties surveyed in the Submarket is approximately 36.5 percent.

We were unable to identify any senior LIHTC properties in this Submarket. Therefore, for the purpose of this analysis, we have used Submarket's average senior subsidized turnover rate of 2.0 percent.

Unstabilized Rental Units - Existing and Proposed

Sevilla Apartments, located in Weslaco, Texas, received a large initial LIHTC allocation in 2005 and then a smaller allocation again in 2008. Upon rehabilitation/reconstruction, there will be eight units restricted to households earning less than 30 percent of the AMI and 72 units restricted to households earning less than 60 percent of the AMI. The units currently operate as public housing with a subsidy based on the Housing Authority's HUD-approved Annual Contributions Contract. However, once the units have been rehabilitated/reconstructed the development will no longer receive the HUD subsidy. As such, these units have been deducted from the following demand analysis.

There is one proposed senior LIHTC property in the Southeast Hidalgo County Submarket. Alta Vista Senior Towers is currently a midrise, age-restricted public housing development comprised of 100 studio and one-bedroom units. Tax credits were awarded in 2006 and upon renovation, units at the 30 percent of AMI level will be public housing units and the units at 60 percent of AMI will be Project-Based Section 8 units. These units are deducted from the analysis of all households and senior households, as demand from all households includes households age 55 and older.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the Southeast Hidalgo County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Household Size	Total Renters - Baseline Year (2007)	Income-Qualified Renters - Baseline Year (2007)

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the Southeast Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that 28 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less, with the smallest number of income-qualified households falling in the 51 to 60 percent of AMI income group. This may explain the 3.8 percent average vacancy rate among family LIHTC properties in the Submarket, while market rate properties in the Submarket have an average vacancy rate of 2.3 percent. Additionally, it is of note that all of the vacant LIHTC units in the Submarket are at the 60 percent of AMI level. The income-qualified renter households at the 61 to 80 percent AMI level comprise the second largest income group in the Submarket. This suggests that the vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Senior Households

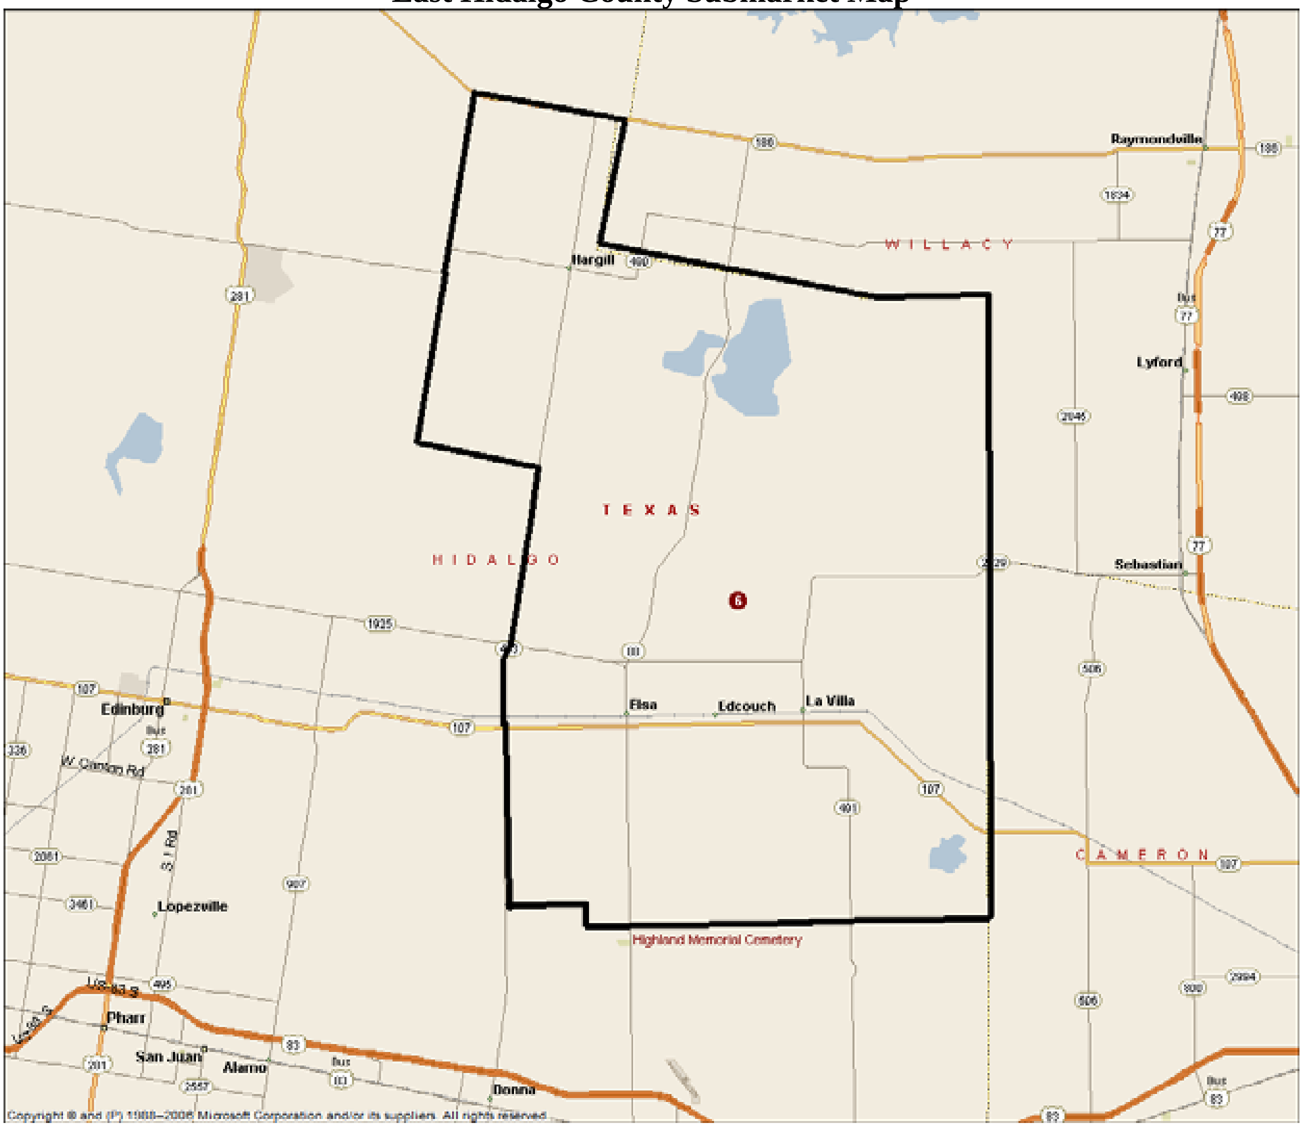
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, a 100-unit senior public housing development in the Submarket is undergoing renovations with tax credit funds allocated in 2006. Although the goal of the development is to replace existing housing, tenants have been displaced and some lease-up of the property may be needed. It is for this reason that we have deducted the units from the demand analysis. The only LIHTC/USDA senior property we were able to interview has a waiting list of one year and a very low 2.0 percent turnover rate. Despite the possibility of serving some additional households with the renovated units, the analysis above indicates that there is likely still an unmet need for additional affordable senior housing units in this Submarket.

6. EAST HIDALGO COUNTY SUBMARKET ANALYSIS

EAST HIDALGO COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The East Hidalgo County Submarket encompasses 174.6 square miles and is defined as the area bounded to the north by the Hidalgo County line and State Route 186; to the east by the Hidalgo County line; to the south by Roosevelt Road and 12 Mile Road North; and to the west by Brush Line Road and La Blanca Road. The following map illustrates the boundaries of the Submarket as defined above.

East Hidalgo County Submarket Map



The East Hidalgo County Submarket includes the communities/cities of Elsa, Edcouch, La Villa, Monte Alto, and La Blanca. Approximately 10 to 20 percent of the area in this Submarket can be characterized as developed and within close proximity to most locational amenities and essential services. The remaining 80 to 90 percent of the area in this Submarket contains very little development and offers limited access to locational amenities and essential services. Development is located along State Route 107, which serves the Submarket's two largest cities – Elsa and Edcouch. With the exception of a few small communities, the areas of the Submarket surrounding Elsa and Edcouch are sparsely developed. The predominant form of housing in this Submarket is owner-occupied single-family homes in poor to good condition and 15 to 45 years in age. There is a limited amount of multifamily development in average to good condition and 10 to 20 years in age.

Local Government

As previously mentioned, the East Hidalgo County Submarket includes the communities/cities of Elsa, Edcouch, La Villa, Monte Alto, and La Blanca.

Elsa, Texas is a city in Hidalgo County operating under a Mayor-city Commission form of government with four elected city Commissioners. According to the U.S. Census, Elsa is comprised of a land area of 1.4 square miles and had a 2000 population of 5,549.

Edcouch, Texas is a city in Hidalgo County operating under a Mayor-city Commission form of government. According to the U.S. Census, Edcouch is comprised of a land area of 0.9 square miles and had a 2000 population of 3,342.

La Villa, Texas is a city in Hidalgo County operating under a Mayor-Council form of government. According to the U.S. Census, La Villa is comprised of a land area of 0.3 square miles and had a 2000 population of 1,305.

Monte Alto, Texas is a census-designated place in Hidalgo County. According to the U.S. Census, Monte Alto is comprised of a land area of 2.2 square miles and had a 2000 population of 1,611.

La Blanca, Texas is a census-designated place in Hidalgo County. According to the U.S. Census, La Blanca is comprised of a land area of 4.2 square miles and had a 2000 population of 2,351.

Employment by Industry

The following table illustrates employment by industry for the East Hidalgo County Submarket and McAllen-Edinburg-Mission MSA in 2007.

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the East Hidalgo County Submarket are the educational services, health care/social assistance, retail trade and construction sectors. Approximately 52.4 percent of people in East Hidalgo County work in these four industries. The East Hidalgo County Submarket has a larger number of persons employed in the healthcare/social assistance and educational services sectors and a smaller number of people employed in the construction and retail trade sectors, relative to the MSA. Although educational services and health care/social services are typically stable sectors of the economy, industries such as retail trade and construction are particularly susceptible to fluctuations in the economy. The large number of people employed in the retail trade and construction industries could negatively impact employment in the Submarket due to the current national economic downturn. However, the strong presence of the educational services and health care/social assistance industries should promote economic stability.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing.

Commute Patterns in the East Hidalgo County Submarket

The table below summarizes commute times for the East Hidalgo County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	201
5-9 min	926
10-14 min	903
15-19 min	1,266
20-24 min	990
25-29 min	379
30-34 min	1,541
35-39 min	190
40-44 min	188
45-59 min	308
60-89 min	175
90+ min	100
Average Travel Time	22.8 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The East Hidalgo County Submarket is primarily rural, which results in longer commute time for area workers. The largest share of workers reports a daily travel time of 30 to 34 minutes. There are two small employment centers in the Submarket, Elsa and Edcouch. It is likely that the longer commute times are attributable to employees traveling to jobs in Edinburg or Weslaco.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the East Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA. Data such as population, households and growth patterns are studied, to determine if the McAllen-Edinburg-Mission MSA and the East Hidalgo County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the East Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA from 1990 through 2012.

Total Population				
Year	East Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual	Number	Annual Change
1990	20,796	-	383,545	-
2000	28,200	3.56%	569,463	4.85%
2007	35,578	3.61%	732,166	3.94%
2012	41,678	3.43%	865,301	3.64%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Population growth rates in the Submarket have been slightly lower than growth rates in the MSA in all years of analysis. Both the Submarket and the MSA show strong growth from 2007 through 2012, although the MSA will grow at a faster rate than the Submarket from 2007 through 2012. Overall, the rate of population growth in the Submarket and MSA will decrease slightly from 2007 through 2012. However, growth rates in the Submarket and MSA from 2007 to 2012 are considered very strong and are a positive indicator of the need for all forms of housing and likely explain why many individuals are employed in the construction sector in the Submarket.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990 through 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group				
East Hidalgo County Submarket				
Age Cohort	1990	2000	2007	2012

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	East Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual	Number	Annual Change
1990	5,051	-	103,479	-
2000	7,053	3.96%	156,824	5.16%
2007	9,117	4.04%	205,804	4.31%
2012	10,752	3.59%	244,775	3.79%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, household growth rates in the Submarket and MSA have both been strong through 2007. Household growth in the Submarket increased from 2000 to 2007, but is expected to slow from 2007 through 2012; however, the growth rate in the Submarket from 2007 through 2012 is still very strong. Similarly, household growth in the MSA is expected to slow from 2007 through 2012.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	East Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual	Number	Annual Change
2000	4.00	-	3.60	-
2007	3.90	-0.34%	3.53	-0.27%
2012	3.88	-0.10%	3.51	-0.11%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is larger than the MSA, and both are significantly larger than the national average size of 2.59 (not shown). The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket and the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	East Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual	Number	Annual Change
2000	$19,621	-	$24,843	-
2007	$23,151	2.48%	$30,519	3.15%
2012	$26,381	2.79%	$35,078	2.99%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 31.8 percent lower than the median household income in the MSA in 2007. The median household income in the Submarket and in the MSA is projected to grow at a slower rate from 2007 through 2012 than the previous seven years. It should be noted that the median household income in the Submarket and MSA are approximately 43.6 and 57.4 percent of the national average in 2007. The lower median income levels in the MSA and particularly the Submarket indicate an increasing need for affordable housing.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - East Hidalgo County Submarket				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage
<$10,000	2,110	23.1%	2,070	19.3%
$10,000-$14,999	889	9.8%	1,074	10.0%
$15,000-$19,999	953	10.5%	986	9.2%
$20,000-$24,999	896	9.8%	927	8.6%
$25,000-$29,999	813	8.9%	1,011	9.4%
$30,000-$34,999	712	7.8%	779	7.2%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 43.3 percent of the population in the Submarket and 34.1 percent of the population in the MSA earned below $20,000 in 2007, with the highest percentage earning between zero dollars and $10,000. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 38.4 percent and 29.4 percent, respectively. However, in both instances, a significant portion of the population is projected to earn less than $20,000. This data provides strong support for affordable rental housing of all kinds in the Submarket and MSA.

Senior Demographic Trends

Among the demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents is 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	East Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
Year	Number	Annual	Number	Annual Change
1990	2,810	-	63,856	-
2000	3,757	3.4%	90,763	4.2%
2007	4,923	4.3%	116,831	4.0%
2012	6,307	5.6%	149,302	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Senior population trends in the MSA mirrored general population trends in the MSA from 2000 through 2007. Senior population growth in both the East Hidalgo County Submarket and the MSA is expected to grow at a faster rate from 2007 through 2012, with growth in the Submarket equal to that of the MSA.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	East Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual	Number	Annual Change
2000	2,275	-	52,073	-
2007	2,959	4.1%	67,113	4.0%
2012	3,797	5.7%	85,658	5.5%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth in the Submarket and MSA is expected to be exceptionally strong through 2012. Although the rate of senior population growth is expected to slow through 2012, the rate of senior household growth is expected to increase. The strong projected growth in the senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME						
Year	**McAllen-Edinburg-Mission, TX MSA**		**East Hidalgo County Submarket**		**USA**	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*

2007	$30,519	-	$23,151	-	$53,154	-
2012	$35,078	2.59%	$26,381	2.79%	$62,503	3.52%
			Age 55+			
2007	$27,687	-	$21,067	-	$32,710	-
2012	$32,712	3.07%	$23,373	2.19%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in all areas of analysis are below the median incomes reported for all households. Of the three areas of analysis, the median senior household income is lowest in the Submarket and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The median household income for seniors in the Submarket and MSA are approximately 64.4 and 84.6 percent of the national average in 2007.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - East Hidalgo County Submarket (Age 55+)				
Income	2007		2012	
Cohort	Number	Percentage	Number	Percentage

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,600. Compared to the MSA, the Submarket has a significantly larger percentage of seniors earning less than $35,000 annually. Approximately 74.1 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007. This is attributable primarily to the Submarket’s high percentage of senior households earning below $15,000 annually. By 2012, both areas of analysis will see decreases in the number of seniors earning less than $35,000 annually. However, it is estimated that 67.2 percent of seniors in the Submarket and 50.3 percent of seniors in the MSA will still be earning less than $35,000 annually by 2012. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. These factors indicate that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	East Hidalgo County Submarket				McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	2,010	88.4%	265	11.6%	43,784	84.1%	8,289	15.9%
2007	2,614	88.4%	345	11.6%	56,430	84.1%	10,683	15.9%
2012	3,355	88.4%	442	11.6%	72,023	84.1%	13,635	15.9%

Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008

As the above table illustrates, the senior housing market is dominated by owner-occupied units in all areas of analysis. The Submarket and MSA have a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above). The small percentage of renter-occupied senior households is not unusual in developing submarkets, where owner-occupied housing is predominant.

Senior Demographic Conclusion

Although the median senior household income for the East Hidalgo County Submarket is projected to increase from 2007 to 2012, growth in the national and MSA median senior household income is projected to outpace growth in the Submarket. Both the MSA and Submarket feature considerable portions of the senior population with household incomes lower than the Area Median Income (AMI) of $36,100. Significantly, 74.1 percent of those 55 and older in the Submarket were earning under $35,000 per year in 2007, with nearly 37 percent earning less than $15,000 per year. The Submarket features more senior households in these income brackets when compared to the MSA and national averages. Overall, these trends indicate that there is demographic support in the Submarket for affordable housing targeting senior households.

LOCAL MARKET INFORMATION

East Hidalgo County Submarket
The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare
There are several general practitioners, pediatricians, dentists and clinics located in the East Hidalgo County Submarket. Most are concentrated in Elsa and Edcouch, with limited medical services in the surrounding rural areas of the submarket, particularly in the northern portion of the Submarket. The South Texas Health System, with seven facilities including Cornerstone Regional Hospital, Edinburg Children's Hospital, Edinburg Regional Medical Center, Edinburg Regional Rehabilitation Center, McAllen Heart Hospital, McAllen Medical Center, and South Texas Behavioral Health Center serves much of the regions healthcare needs. The Knapp Medical Center in Weslaco, approximately 15 miles south of Elsa and Edcouch, is the closest major facility to the Submarket, with 233 private rooms and an emergency department.

Transportation
The South Texas International Airport at Edinburg and McAllen Miller International Airport are located approximately 30 and 40 miles south of the East Hidalgo County Submarket, respectively. The South Texas International Airport at Edinburg is a public-use airport located approximately nine miles north of the Central Business District of Edinburg. The airport is owned and operated by the City of Edinburg and averaged 13 general aviation aircraft operations per day in 2005. The McAllen Miller International Airport (MFE) is the primary business airport of the Rio Grande Valley and provides non-stop flights to Dallas-Fort Worth, Houston, and Las Vegas via American Airlines, Continental Airlines, and Allegiant Air.

The East Hidalgo County Submarket is accessible via State Route 107, which connects Elsa, Edcouch and La Villa to Edinburg and U.S. Highway 281 to the west and U.S. Highway 77 to the east. U.S. Highway 281 runs north/south from McAllen, Texas to Wichita Falls, Texas. U.S. Highway 77 is also a north/south route which extends from Harlingen and Brownsville in south Texas to Waco in central Texas.

Education
There are at least three Independent School Districts providing education services in the East Hidalgo County Submarket. The Edcouch-Elsa ISD serves 5,400 students from the cities of Edcouch and Elsa and high school students from Monte Alto. The district operates one early childhood center, four elementary schools, one middle school, one junior high school and one high school. The Monte Alto ISD has one elementary school and one middle school. The La Villa ISD, which serves the unincorporated community of Laguna Seca in addition to the city of La Villa, operates an elementary school, middle school and high school with a total of 800 students.

The nearest universities are located in Edinburg and McAllen, approximately 15 to 20 miles south of the East Hidalgo County Submarket. The University of Texas Pan American in Edinburg, Texas, with 17,337 students, including 2,261 graduate students, is the tenth largest university in the state and the fifth largest in the UT system and offers 54 bachelor's degree programs, 50 master's, and two doctoral programs. McAllen offers five major colleges/universities including the San Antonio College of Medical and Dental Assistants, South Texas Community College, South Texas Vocational Technical Institute, and the University of Cosmetology Arts and Sciences.

Public Transportation

Currently, there is no public transportation available to residents in the East Hidalgo County Submarket. The Valley Transit Company is a full-service bus company based in Mission that serves South Central Texas and Northern Mexico with more than 50 daily schedules, as well as connections to nationwide travel on Greyhound Lines. The Valley Transit Travel Center and Bus Stop is located at 2107 Highway 83 West in Mission and is open 24 hours a day.

Employment Centers

There are a limited number of employment centers in the East Hidalgo County Submarket. The majority of employment centers are located in Edinburg and McAllen, approximately 15 to 20 miles west and southwest of the Submarket's two largest cities – Elsa and Edcouch. The largest employers in the McAllen-Mission-Edinburg MSA include the following:

Rank	Company	Industry	Employees
1	Edinburg Consolidated I.S.D.	Education	3,600
2	McAllen I.S.D.	Education	3,595
3	Edinburg Regional Medical Center	Healthcare	3,000
4	University of Texas Pan American	Education	2,850
5	McAllen Medical Center	Healthcare	2,800
6	Hidalgo County	Government	2,211
7	Mission Consolidated I.S.D.	Education	2,140
8	City of McAllen	Government	1,801
9	Columbia Rio Grande Regional Hospital	Healthcare	975
10	South Texas Community College	Education	811

Employment in the McAllen-Edinburg-Mission MSA is dominated by relatively stable industries, and all ten of the major employers are in the education, healthcare, and government sectors. According to 2007 employment by industry demographics, educational services, health care/social assistance, retail trade and construction comprise approximately 52.4 percent of overall employment and are three of the top four industry sectors in the Submarket. Retail trade, construction, and manufacturing are typically more volatile sectors of the economy as compared to historically stable industries such as education and healthcare, which make up approximately 35.2 percent of employment in the Submarket. The high concentration of education and healthcare employment in the Submarket may serve to anchor and stabilize the Submarket's economy, even as sectors such as construction and retail trade show a slowing growth trend.

Proximity to Local Services

There are a moderate number of locational amenities in the East Hidalgo County Submarket. The majority of locational amenities are located in Elsa and Edcouch.

1950-1959	527	6.67%
1940-1949	383	4.85%
1939 and Before	328	4.15%
Total	**7,904**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (79.38 percent) in the East Hidalgo County Submarket was constructed from 1960 through 1998, with over a quarter of the Submarket's units built between 1980 and 1989. The East Hidalgo County Submarket consists of moderate residential development including primarily of single-family homes with some multifamily housing. Based upon observations in the field the predominant form of housing in this Submarket is owner-occupied single-family homes in poor to good condition and 15 to 45 years in age. There is a limited amount of multifamily development in average to good condition and 10 to 20 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 "5+ units" building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while "5+ units" building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008.

Although building permit activity was not available by Submarket, limited data was available for the cities of Elsa and Edcouch, which represent the Submarket's two largest municipalities. Building permit activity data obtained from U.S. Census Bureau estimates indicate that there were 156 multifamily units permitted in Edcouch between 1997 and June 2008. According to the same source, Elsa has recorded no multifamily building permits since 1997.

Interviews

Housing Authority of County of Hidalgo

The Housing Authority of the County of Hidalgo was established in 1948 in order to serve the local farmworking families and migrant farmworkers in the region. The Housing Authority of the County of Hidalgo currently administers Farm Labor Housing units and Public Housing units in Hidalgo County, as well as Housing Choice Vouchers. According to Adela Montes, Deputy Director for the Housing Authority of the County of Hidalgo, there are currently 535 Farm Labor Housing units in two developments and 55 Public Housing units in two developments in Hidalgo County, excluding the City of McAllen. None of these developments is located in the East Hidalgo County Submarket. There are approximately 8,592 Housing Choice Vouchers budgeted for Hidalgo County, and all are currently in use. Waiting Lists for Public Housing and Farm Labor Housing are currently open while the waiting list for Housing Choice Vouchers is closed. There are approximately 896 households on the waiting list for Housing Choice Vouchers. Of the 896 households, 162 are elderly households. There is no separate waiting list for special needs households in the Housing Choice Voucher Program. Currently, there are 104 elderly households participating in the Housing Choice Voucher Program in Hidalgo County. The number of households on the waiting list for Public Housing and Farm Labor Housing can be found below:

FARM LABOR HOUSING WAITING LIST – HIDALGO COUNTY					
Name	**1BR**	**2BR**	**3BR**	**4BR**	**Total**
Northside Apartments	14HH	11HH	2HH	0HH	27HH
Memorial Apartments	N/A	N/A	N/A	N/A	46HH

PUBLIC HOUSING WAITING LIST – HIDALGO COUNTY

Villa Sandoval-Longoria	N/A	54HH	23HH	23HH	100HH
Villa San Juanita Rutledge	N/A	N/A	15HH	24HH	39HH

City of Elsa Housing Authority

According to Margaret Moreno of the Elsa Housing Authority, there are 132 Housing Choice Vouchers allocated to Elsa. There are 124 Housing Choice Vouchers currently in use, with less than 10 percent returned due to an inability to find appropriate housing. The waiting list for Housing Choice Vouchers is comprised of 115 households, with an average wait time of eight months. The waiting list is open. Attempts to obtain data regarding public housing in Elsa were unsuccessful as of the date of this report.

The current payment standards for one-, two-, three- and four-bedroom units in Elsa and Hidalgo County are listed below. The payment standards are 100 percent of the Fair Market Rents for the area.

PAYMENT STANDARDS	
Units	**Payment Standards**
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

City of Edcouch Housing Authority

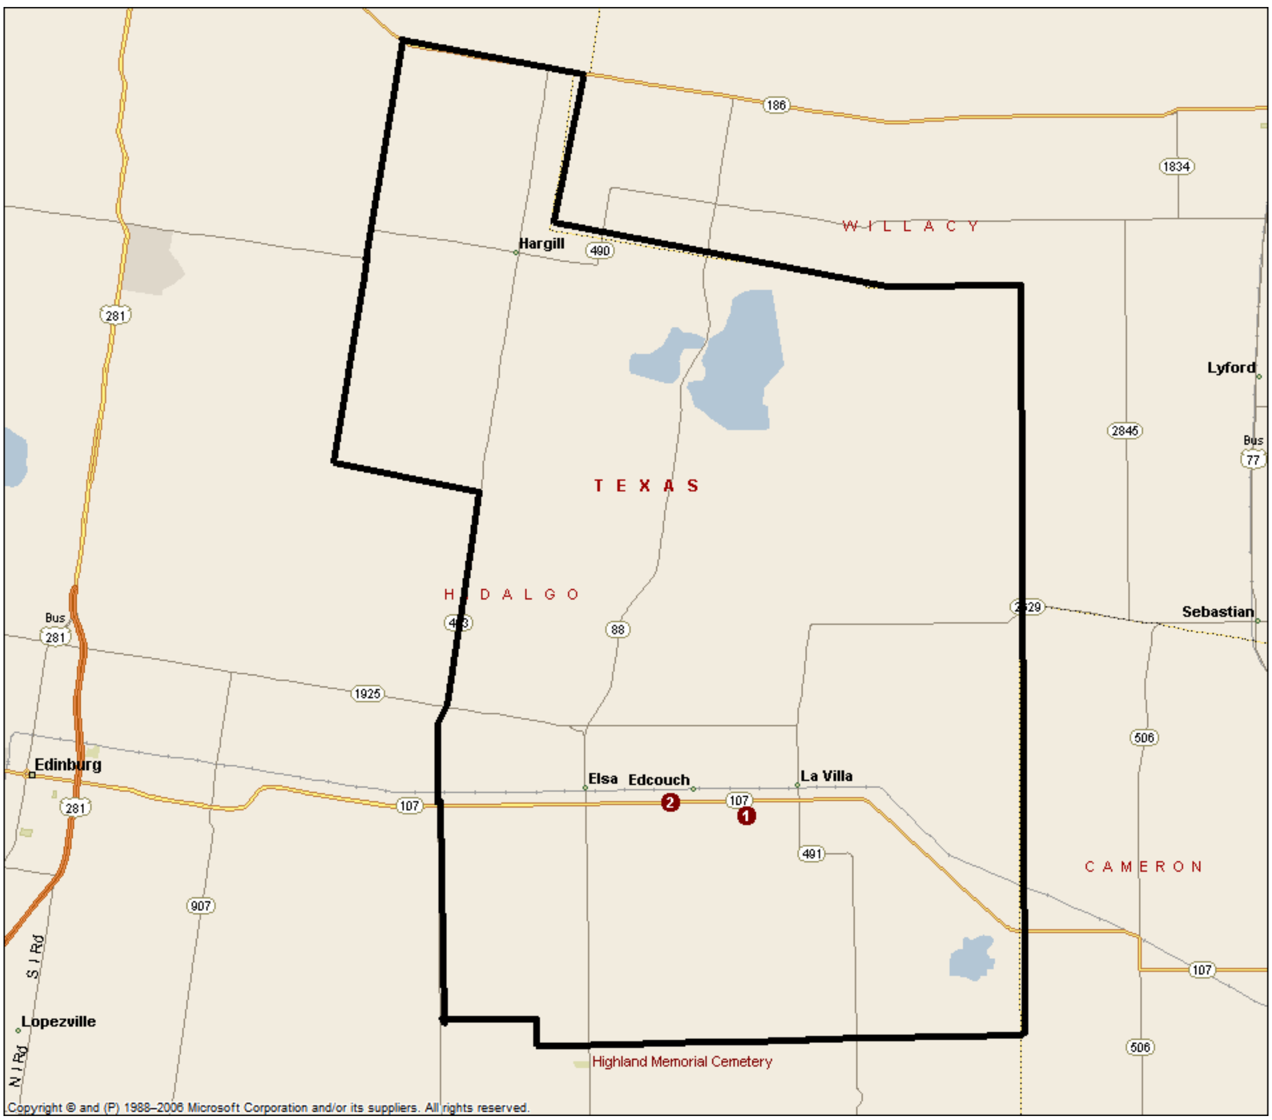
We made multiple attempts to contact the housing authority of Edcouch both over the phone and in person. As of the date of this report, no response has been received.

LIHTC FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers.

Novogradac identified two family LIHTC developments totaling 87 units located in the East Hidalgo County Submarket. Delta Estates Apartments, a 64-unit development in Edcouch, was constructed in 2000. Los Laureles, a 23-unit family property also located in Edcouch, received an allocation of tax credits in 1994. Although the management at Los Laureles indicated that the property operates under Section 8 and Rural Development guidelines, there are no additional subsidized developments for families in the Submarket. Therefore, we have included Los Laureles in the following family LIHTC analysis.

A map of the surveyed properties can be found below:



SURVEYED PROPERTIES			
Number	Name	Location	Type
1	Delta Estates Apartments	Edcouch	LIHTC – Family
2	Los Laureles Apartments	Edcouch	LIHTC/USDA/Section 8 - Family

The following pictures identify the surveyed family LIHTC properties located in the Submarket:

Delta Estates Apartments

Los Laureles Apartments

Excluded Properties
None of the identified family LIHTC properties in the Submarket are excluded from this analysis.

Proposed/Under Construction
According to the Texas Department of Housing and Community Affairs, there are two family properties in the East Hidalgo County Submarket that have received an allocation in the last three years, Casa Edcouch and Maeghan Pointe. Casa Edcouch is an under construction LIHTC development located near the intersection of Mile 16 and Mile 4 in Edcouch. This development was allocated tax credit funding 2006 and will offer 73 units for families. Calls made to the developer have not been returned as of the date of this study and, therefore, no additional detail regarding unit mix, amenities and proposed rents was available.

Maeghan Pointe, located at the intersection of State Route 107 and Mile 6, was awarded an allocation in 2008. It will offer 80 two-, three- and four-bedroom units for families earning at or below 30, 50 and 60 percent of AMI. According to the application submitted by the developer, there will be five units at 30 percent of AMI, 28 units at 50 percent of AMI and 47 units at 60 percent of AMI. Proposed community amenities include a swimming pool, playground, fitness center and computer lab. A current construction timeline was not available, but it is anticipated that this property will have units available sometime in 2009.

Unit Mix

The following table illustrates the unit mix in the family LIHTC rental property market.

Unit Mix - LIHTC Family		
Unit Type	**Total Units**	**Percent**
1 BR	12	13.79%
2 BR	44	50.57%
3 BR	31	35.64%
Total	**87**	**100%**

The majority of the LIHTC units in the Submarket are two-bedroom units, followed by three-bedroom units. We were unable to identify any properties with four-bedroom LIHTC units. Demographic projections show that the average household size in the Submarket in 2007 was 3.90, which is projected to decrease slightly by 2012 to 3.88. However, the Submarket's household size is still significantly larger than the national average of 2.59 and larger than that of the MSA. Demographic estimates show that approximately 41 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family LIHTC rental property market. Los Laureles was unable to provide square footage data and is not included in the table below.

Unit Size - LIHTC Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	623	623	623
2 BR	867	867	867
3 BR	1,076	1,076	1,076

The surveyed one-, two, and three-bedroom LIHTC units are 623, 867, and 1,076 square feet, respectively. Delta Estates Apartments, which was constructed in 2000, is representative of the newly constructed properties in the East Hidalgo Submarket.

Common and In-Unit Amenities

	Delta Estates Apartments	Los Laureles Apts

Perimeter Fencing	yes	no
Premium Amenities		
Other Amenities		
Other	n/a	n/a

The existing LIHTC multifamily properties in the East Hidalgo County Submarket offer a moderate amount of in-unit and community amenities, with Delta Estates Apartments offering a more comprehensive amenity package than Los Laureles. Both of the surveyed LIHTC comparables offer unit amenities that include central air conditioning, ovens, garbage disposals, and refrigerators. Washer/dryer connections are available at Los Laureles. The extended amenities at Delta Estates Apartments include a patio/balcony, ceiling fan, walk-in closets, basketball court, community room, picnic area, swimming pool and perimeter fencing with limited access gates. There are no non-shelter services offered by the surveyed LIHTC properties in the Submarket.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type for the surveyed family LIHTC properties.

Weighted Vacancy - LIHTC Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	12	0	0.0%
2 BR	44	2	4.5%
3 BR	31	0	0.0%
Total	**87**	**2**	**2.3%**

Los Laureles is reporting two vacant two-bedroom units at 60 percent of AMI. However, it should be noted that both of the units are pre-leased, resulting in an effective vacancy rate of zero percent. The very low vacancy rate among the surveyed family LIHTC units indicates that there may be a continuing need for affordable one-, two- and three-bedroom units in the East Hidalgo County Submarket.

Absorption

None of the surveyed properties were able to provide absorption information. Both properties were constructed in 2000 or earlier.

Waiting Lists

The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – LIHTC Family		
Property Name	**Number of Units**	**Waiting List**
Delta Estates Apartments	64	2BR units only
Los Laureles Apartments	23	3 Households

Both of the surveyed family LIHTC properties currently maintain small waiting lists. Delta Estates only maintains a waiting list for its two-bedroom units at 50 and 60 percent of AMI. Los Laureles reports a list of three households waiting for all unit types.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – LIHTC Family		
Property Name	**Number of Units**	**Vacancy Rate**
Delta Estates Apartments	64	3.1%
Los Laureles Apartments	23	0.0%
AVERAGE	**87**	**2.3%**

Overall vacancy at the surveyed family LIHTC properties is very low at 2.3 percent. As noted earlier, both of the vacant units at Delta Estates are pre-leased, resulting in an effective vacancy rate of zero percent for family LIHTC units in the Submarket. Vacancy rates may temporarily increase as approximately 150 new family LIHTC units become available over the next six to 18 months.

Concessions

Delta Estates Apartments is currently offering one-month free rent for all unit types. This may indicate that the property is having difficulty attracting income qualified households at the 50 and 60 percent AMI levels. Los Laureles, which also operates as a Rural Development and Section 8 property, is not offering any concessions at this time.

Turnover

The following table summarizes turnover rates at the surveyed properties.

Turnover – LIHTC Family		
Property Name	**Number of Units**	**Turnover**
Delta Estates	64	19%
Los Laureles	23	9%
AVERAGE	**87**	**14%**

The range of turnover rates at the surveyed family LIHTC properties in the Submarket appears to be well within range of typical turnover rates for multifamily properties in a developing area.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions. Adjustments to utilities have not been made.

Comp #	Project	Type / Built / Renovated	Market / Subsidy	Units	#	%	Restriction	Rent (Adj.)	Size (SF)	Max Rent?	Wait List?	Units Vacant	Vacancy Rate

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The rents at all of the surveyed LIHTC comparables, including those of the market rate units, are below the current payment standards for Hidalgo County. None of the surveyed LIHTC properties have rents set at the maximum allowable levels.

LIHTC Family Supply Conclusion

Novogradac identified two family LIHTC developments totaling 87 units located in the East Hidalgo County Submarket. Delta Estates Apartments and Los Laureles Apartments, with a total of 87 units, target households earning 30 percent, 50 percent and 60 percent of the AMI. Although the management at Los Laureles indicated that the property operates under Section 8 and Rural Development guidelines, there are no additional subsidized developments for families in the Submarket. Therefore, we have included Los Laureles in the family LIHTC analysis. No identified family LIHTC properties were excluded from the analysis.

According to the Texas Department of Housing and Community Affairs, there are two family properties in the East Hidalgo County Submarket that have received an allocation in the last three years, Casa Edcouch and Maeghan Pointe. When completed over the next six to 18 months, these two properties will offer over 150 newly constructed family LIHTC units in the Submarket. While the average effective vacancy rate among family LIHTC units is zero percent, the addition of new units to the market may cause some increase in the vacancy rate, particularly for units at the 50 and 60 percent set-aside. Delta Estates is currently offering one-month of free rent to attract tenants to units at the 50 and 60 percent set-aside, indicating there may be a lack of renters at this income level in the Submarket.

LIHTC SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers.

Novogradac identified four senior LIHTC developments with a total of 138 units in the East Hidalgo County Submarket. All four properties carry an additional USDA rental subsidy. Therefore, these properties have been excluded from the senior LIHTC analysis and will be addressed in the senior subsidized analysis section. Therefore, due to the lack of senior LIHTC properties, we were unable to perform a senior LIHTC market analysis.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one senior LIHTC property under construction in the East Hidalgo County Submarket. El Paraiso, located at 200 South Mile 2W Road in Edcouch, is expected to open in late 2008 or early 2009. It will offer a total of 30 units to senior households earning 30, 40, 50 and 60 percent of AMI, with some units also carrying HOME fund restrictions. There will be 26 one-bedroom units measuring 651 square feet and four two-bedroom units with 800 square feet. Units will have washer/dryer connections and ceiling fans. Proposed property amenities include a clubhouse, on-site management and a central laundry facility.

MARKET RATE FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. We identified two potential market rate developments in the Submarket. Evergreen Apartments, located in Elsa, had a disconnected phone number. Messages left at a phone number for Northside Apartments in Edcouch were not returned. Based on the lack of available data, we did not complete a market rate analysis.

Proposed Construction

We attempted to contact Elsa City Hall and Edcouch City Hall in order to acquire information on proposed market rate development in the Submarket. However, our calls have not been returned as of the date of this study. Field observations indicate that there are no market-rate developments planned, proposed or under construction in the East Hidalgo County Submarket.

MARKET RATE SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable existing senior market rate properties in the East Hidalgo County Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis.

Proposed Construction

We attempted to contact Elsa City Hall and Edcouch City Hall in order to acquire information on proposed market rate development in the Submarket. However, our calls have not been returned as of the date of this study. Field observations indicate that there are no market-rate developments planned, proposed or under construction in the East Hidalgo County Submarket.

SUBSIDIZED FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

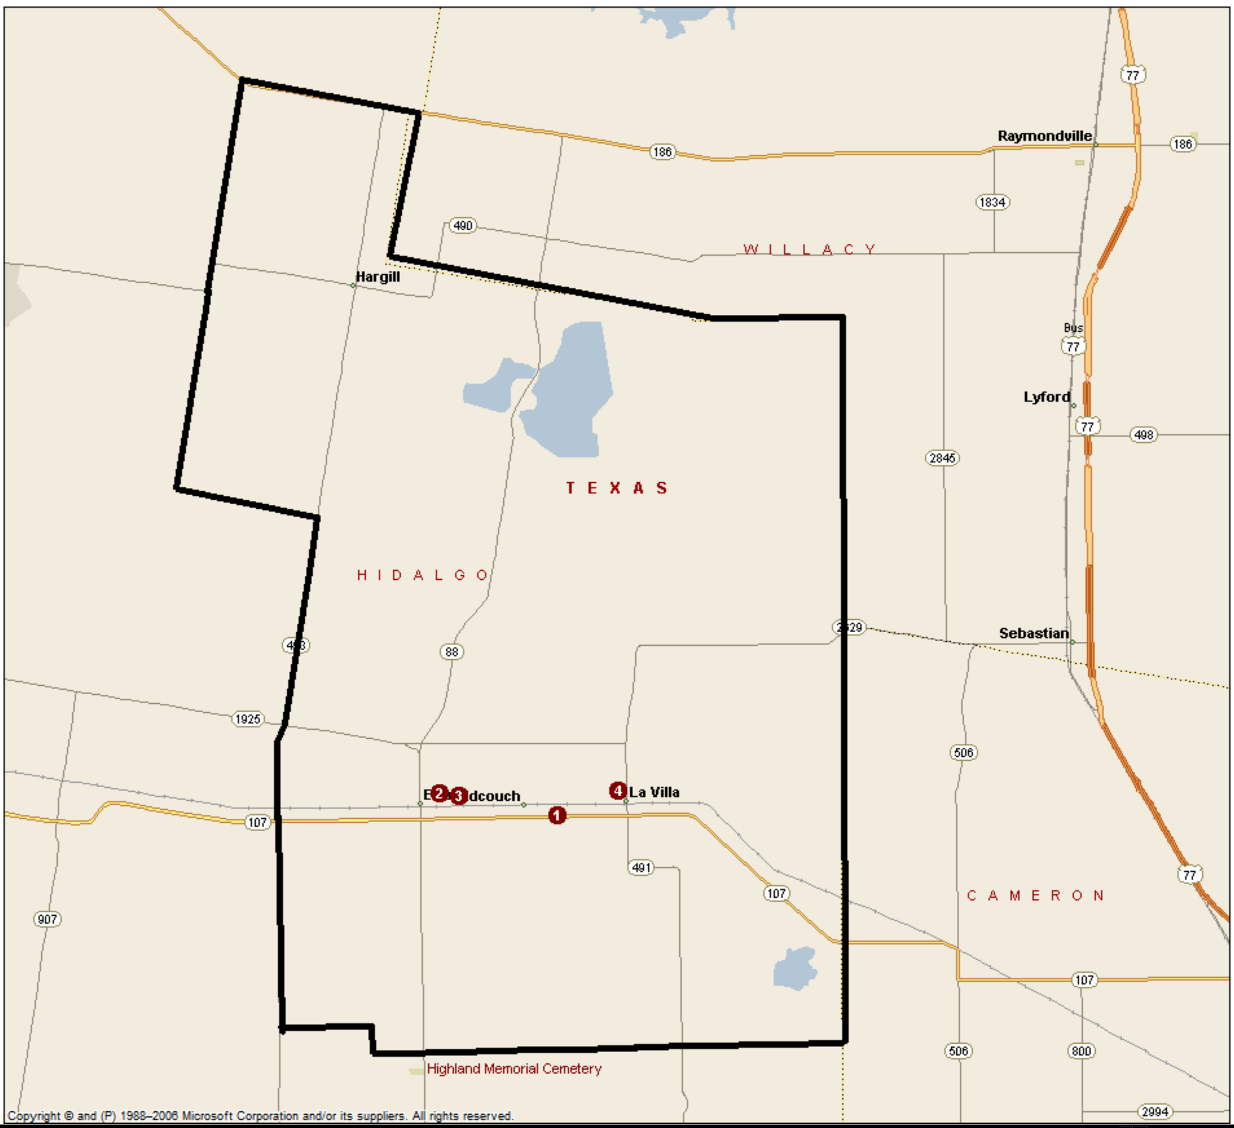
As stated earlier, there is one subsidized family development in the East Hidalgo County Submarket. Los Laureles, a 23-unit family property also located in Edcouch, operates under Section 8 and Rural Development guidelines, but also received an allocation of tax credits in 1994. There are no additional family-targeted subsidized developments in the Submarket. Therefore, we included Los Laureles in the previous family LIHTC analysis.

SUBSIDIZED SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

Novogradac identified four subsidized senior developments with a total of 138 units in the East Hidalgo County Submarket. All four properties have also received LIHTC allocations, but effectively operate as subsidized developments. Cielo Lindo Apartments in Edcouch have 30 one- and two-bedroom units restricted under the USDA's Rural Development program. La Posada and La Posada II, both located in Elsa, have a total of 74 units carrying USDA restrictions. La Reina Apartments in La Villa is a 30 unit USDA development.

The following map illustrates the location of the surveyed senior subsidized comparables in the Submarket.



SURVEYED SUBSIDIZED SENIOR PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Cielo Lindo	Edcouch	Senior – USDA/LIHTC
2	La Posada	Elsa	Senior – USDA/LIHTC
3	La Posada II	Elsa	Senior – USDA/LIHTC
4	La Reina	La Villa	Senior – USDA/LIHTC

The following pictures identify the surveyed subsidized senior properties located in the Submarket:

Cielo Lindo

La Posada

La Posada II

La Reina

Excluded Properties

None of the identified senior subsidized properties in the Submarket are excluded from this analysis.

Proposed/Under Construction

Information from the planning departments of Elsa and Edcouch indicate that there are no market-rate senior-oriented developments planned, proposed or under construction in the East Hidalgo County Submarket. As stated in the senior LIHTC discussion, there is one senior LIHTC property under construction in the East Hidalgo County Submarket. El Paraiso, located at 200 South Mile 2W Road in Edcouch, is expected to open in late 2008 or early 2009. Some of the units will be restricted at 30 percent of AMI, which targets households with incomes similar to those of tenants served by subsidized housing.

Unit Mix

The following table illustrates the unit mix in the subsidized senior rental property market.

Unit Mix – Subsidized Senior		
Unit Type	**Total Units**	**Percent**
1 BR	126	91.3%
2 BR	12	8.7%
Total	**138**	**100%**

As expected, most of the subsidized senior units in the Submarket are one-bedroom units, with very few two-bedroom units. Senior households are typically comprised of one or two persons. Most are seeking to downsize from single-family homes and tend to seek smaller unit types with less maintenance and upkeep requirements.

Unit Size

Unit sizes were not available for Cielo Lindo Apartments. La Posada, La Posada II and La Reina, which are all managed by the same company, report an estimated one-bedroom size of 650 square feet and an estimated two-bedroom size of 800 square feet.

Common and In-Unit Amenities

Premium Amenities				
Other Amenities				
Other	n/a	n/a	n/a	n/a

The existing subsidized senior properties in the East Hidalgo County Submarket offer similar in-unit amenities, including washer/dryer hookups and a patio/balcony. Cielo Lindo Apartments, one of the newest subsidized senior developments in the Submarket, also offers exterior storage. All of the surveyed properties offer a community room/clubhouse, with the exception of Cielo Lindo. There are no non-shelter services offered by the surveyed subsidized senior properties in the Submarket.

By-Unit Weighted Vacancy
There are no vacant subsidized senior units in the East Hidalgo County Submarket. This, along with the waiting lists detailed in a subsequent section, indicate that there is strong demand for units affordable to seniors at the very lowest income levels.

Absorption
None of the surveyed properties were able to provide absorption information. All properties were constructed in 2003 or earlier.

Waiting Lists
The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – Subsidized Senior		
Property Name	**Number of Units**	**Waiting List**
Cielo Lindo	34	3 Households
La Posada	40	Yes; number unavailable
La Posada II	34	Yes; number unavailable
La Reina	30	Yes; number unavailable

All of the surveyed senior subsidized properties currently maintain small waiting lists. The total number of households on the waiting lists at La Posada, La Posada II and La Reina was unavailable.

Vacancy Levels
Overall vacancy at the surveyed senior subsidized properties in the Submarket is zero percent. The addition of 30 senior LIHTC units to the Submarket in the next six months is expected to have little impact on the vacancy rate of the existing properties.

Concessions
None of the surveyed senior subsidized properties are offering concessions.

Turnover
The following table summarizes turnover rates at the surveyed properties.

Turnover – Subsidized Senior		
Property Name	**Number of Units**	**Turnover**
Cielo Lindo	34	N/A
La Posada	40	8%
La Posada II	34	6%
La Reina	30	7%
AVERAGE		**7%**

The range of turnover rates at the surveyed subsidized senior properties in the Submarket are very low and average approximately 7 percent. Senior properties typically report lower turnover rates than properties targeting families. The lower than average turnover rate in this Submarket is reflective of a lack of housing choices for seniors at lower income levels.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions. Adjustments to utilities have not been made.

Comp #	Project	Type / Built / Renovated	Market / Subsidy	Units	#	%	Restriction	Rent (Adj.)	Size (SF)	Max Rent?	Wait List?	Units Vacant	Vacancy Rate

Rent and Square Footage Ranking

Subsidized Senior Supply Conclusion

Novogradac identified four subsidized senior developments with a total of 138 units in the East Hidalgo County Submarket. All four properties have also received LIHTC allocations, but effectively operate as subsidized developments. Cielo Lindo Apartments in Edcouch have 30 one- and two-bedroom units restricted under the USDA's Rural Development program. La Posada and La Posada II, both located in Elsa, have a total of 74 units carrying USDA restrictions. La Reina Apartments in La Villa is a 30 unit USDA development.

There are no vacant subsidized senior units in the East Hidalgo County Submarket. This, along with the waiting lists detailed in a subsequent section, indicate that there is strong demand for units affordable to seniors at the very lowest income levels. The average turnover rate for the surveyed subsidized senior properties in the Submarket is very low at approximately 7 percent. The lower than average turnover rate in this Submarket may also reflect a lack of housing choices for seniors at lower income levels.

El Paraiso, a 30-unit senior LIHTC property, is currently under construction in Edcouch. Some of the units will be restricted at 30 percent of AMI, which targets households with incomes similar to those of tenants served by subsidized housing. The addition of these units to the Submarket in the next six months is expected to have little impact on the vacancy rate of the existing subsidized senior properties.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the East Hidalgo County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the East Hidalgo County Submarket in 2007 is 9,117 and the total number of households in 2012 is projected to be 10,752. The total number of households age 55 and older in the Submarket for 2007 is 2,959, with a 2012 projection of 3,797 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 18.5 percent of the occupied housing unit households in the East Hidalgo County Submarket in 2007. For senior households age 55 and older, the percentage of renters is 11.6 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a

one-person household in the income range between 31 percent and 40 percent of AMI. A minimum income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the East Hidalgo County Submarket (McAllen-Edinburg-Mission, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income

Rent-Overburdened Households
Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the East Hidalgo County Submarket, approximately 23.1 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing
Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 5.7 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing
A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the East Hidalgo County Submarket, it is estimated that 28.2 percent of households are living in overcrowded units.

Movership or Turnover Rate
There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the two stabilized family LIHTC properties surveyed in the Submarket is approximately 14 percent.

The four identified senior LIHTC properties in this Submarket also carry additional USDA subsidies. Therefore, for the purpose of this analysis, we have used the average senior subsidized property turnover rate of 7.0 percent.

Unstabilized Rental Units - Existing and Proposed
Maeghan Pointe was awarded an allocation in 2008. It will offer 80 two-, three- and four-bedroom units for families earning at or below 30, 50 and 60 percent of AMI. According to the application submitted by the developer, there will be five units at 30 percent of AMI, 28 units at 50 percent of AMI and 47 units at 60 percent of AMI. These units have been deducted from the following demand analysis.

Casa Edcouch is an under construction LIHTC development located near the intersection of Mile 16 and Mile 4 in Edcouch. This development was allocated tax credit funding 2006; it will offer 73 units for families. Calls made to the developer have not been returned as of the date of this study and, therefore, no additional detail regarding unit mix, amenities and proposed rents was available. For purposes of this analysis, we will assume that the distribution of units among income set-asides is similar to that of the proposed Maeghan Pointe. Therefore, we have deducted five units at 30 percent of AMI, 25 units at 50 percent AMI and 43 units at 60 percent of AMI from the following demand analysis.

There is one senior LIHTC property under construction in the East Hidalgo County Submarket. El Paraiso is expected to open in late 2008 or early 2009. It will offer a total of 30 units to senior households earning 30, 40, 50 and 60 percent of AMI, with some units also carrying HOME fund restrictions. The representative for El Paraiso was unable to give detail regarding the number of units at each income set-aside. For purposes of this analysis, we have assumed that the units are distributed evenly among all four set-asides. These units are deducted from the analysis of all households and senior households, as demand from all households includes households age 55 and older.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the East Hidalgo County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the subsequent tables:

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the East Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that almost one-third of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Although the effective vacancy rate for family LIHTC units in the Submarket is zero percent, there are 183 new LIHTC units expected to enter the market in the next six to 18 months. With a limited number of income-qualified renter households at the 51 to 60 percent AMI level, new units at 60 percent of AMI may have difficulty attracting appropriately qualified tenants. Already, one of the family LIHTC properties in the Submarket is offering a concession of one month free rent. This indicates that the new units in the market may experience a somewhat slower than average absorption period, and concessions may be needed to attract and maintain tenants in units at the 60 percent set-aside. However, it should be noted that with a high incidence of overcrowding in the Submarket, additional demand may be generated from owner households looking to improve their current housing situation.

Senior Households

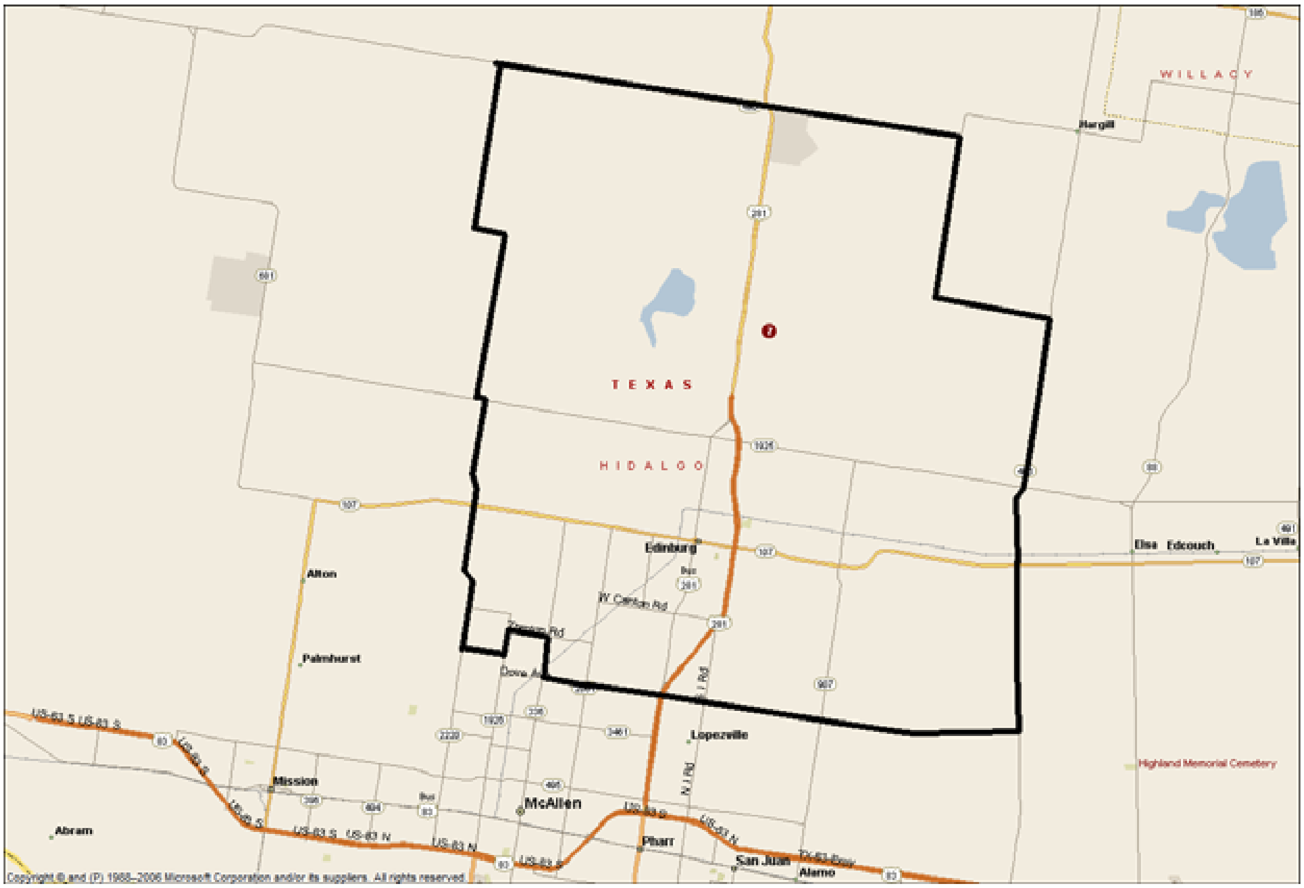
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 138 subsidized units serving low-income senior households in the East Hidalgo County Submarket and an increase in income-qualified senior renter households projected through 2012. The 30 units under construction at El Paraiso will help to meet this continuing need, without significant impact to existing affordable housing developments for seniors in the Submarket.

7. CENTRAL HIDALGO COUNTY SUBMARKET ANALYSIS

CENTRAL HIDALGO COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the Central Hidalgo County Submarket, which is bounded to the east by La Blanca Road and Brush Line Road; to the south by Trenton Road, East Dove Avenue, Owassa Road and Roosevelt Road; to the north by FM 490, and to the west by Wallace Road and Ware Road. The following map illustrates the boundaries of the Submarket as defined above.

Central Hidalgo County Submarket Map



The Central Hidalgo County Submarket is comprised of the city of Edinburg. Approximately 40 to 50 percent of the area in this Submarket can be characterized as developed and within close proximity to most locational amenities and essential services. The remaining 50 to 60 percent of the area in this Submarket contains very little development and offers limited access to locational amenities and essential services. The majority of development occurs along U.S. Highway 281 and intensifies in a southerly direction towards McAllen; development dissipates slowly north of the Edinburg city limits. The predominant form of housing in this Submarket is owner-occupied single-family homes in fair to excellent condition and less than five to 40 years in age. There is a moderate amount of multifamily development in poor to excellent condition and less than five to 40 years in age.

Local Government

As previously mentioned, the Central Hidalgo County Submarket includes the City of Edinburg, which is the county seat of Hidalgo. Edinburg is a city in Hidalgo County operating under a City Council-City Manager form of government, with one Mayor and four Council members. Edinburg was incorporated in 1919 and the city charter was adopted in 1928. According to the City of Edinburg website, Edinburg is comprised of a land area of 36.67 square miles and has an estimated population of 55,297.

Employment by Industry

The table on the following table illustrates employment by industry for the Central Hidalgo County Submarket and McAllen-Edinburg-Mission MSA in 2007.

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the Central Hidalgo County Submarket are the educational services, health care/social assistance, retail trade and construction sectors. Approximately 52.2 percent of people in Central Hidalgo County work in these four industries. The Submarket has a larger number of persons employed in the educational services and health care sectors and a smaller number of people employed in the construction and retail trade sectors, relative to the MSA. Although, educational services and health care/social services are typically stable sectors of the economy, industries such as retail trade and construction are particularly susceptible to fluctuations in the health of the economy. The large number of people employed in the retail trade and construction industries could negatively impact employment in the Central Hidalgo County Submarket, due to the current national economic downturn. However, the strong presence of the educational services and health care/social assistance industries should promote economic stability.

It should be noted that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing in the Submarket.

Commute Patterns in the Central Hidalgo County Submarket

The table below summarizes commute times for the Central Hidalgo County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	982
5-9 min	3,817

Average Travel Time	19.9 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The Submarket reports an average travel time to work of 19.9 minutes, which is shorter than the average for the MSA. The largest employment center is the Submarket is Edinburg, which is also where most of the Submarket’s population is clustered, resulting in shorter commute times.

Population, Household, and Income Trends – Submarket and MSA

The following section provides an analysis of the demographic characteristics within the Central Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA. Data such as population, households and growth patterns are studied, to determine if the McAllen-Edinburg-Mission MSA and the Central Hidalgo County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the Central Hidalgo County Submarket and McAllen-Edinburg-Mission, TX MSA from 1990 through 2012.

Total Population

Year	Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	56,233	-	383,545	-
2000	98,438	7.51%	569,463	4.85%
2007	123,070	3.45%	732,166	3.94%
2012	142,406	3.14%	865,301	3.64%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Growth in the Submarket has been slightly slower than growth in the MSA in all years of analysis, except from 1990 to 2000. The majority of population growth in the MSA is located near the U.S. – Mexico border. However, both the Submarket and the MSA are showing strong growth from 2007 through 2012, although the MSA will grow at a faster rate than from 2000 through 2007. The strong growth in the Submarket and the MSA is a positive indicator of the need for the affordable housing and likely why so many individuals are employed in the construction sector in the Submarket.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 2007. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group				
Central Hidalgo County Submarket

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	15,133	-	103,479	-
2000	26,450	7.48%	156,824	5.16%
2007	34,345	4.12%	205,804	4.31%
2012	40,356	3.50%	244,775	3.79%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been strong through 2007; however, household growth in the Submarket slowed significantly from 2000 to 2007. Household growth in the Submarket and MSA is expected to slow slightly from 2007 through 2012. As the number of households increases, there will be a larger pool of potential tenants, some of which will need affordable housing.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.57	-	3.60	-
2007	3.45	-0.46%	3.53	-0.27%
2012	3.42	-0.17%	3.51	-0.11%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly smaller than the MSA, and both are larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket, but especially the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	28,260	-	24,843	-
2007	34,797	3.19%	30,519	3.15%
2012	39,876	2.92%	35,078	2.99%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 12.3 percent higher than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a slightly slower rate from 2007 through 2012 than the previous seven years, as in the MSA. The lower median income level indicates increasing need for affordable housing.

Household Income

The following tables illustrate median household income in both the Submarket and MSA.

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 30 percent of the population in the Submarket and 34.1 percent of the population in the MSA earned below $20,000 in 2007. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 26 percent and 29.4 percent, respectively, but in both instances, a significant portion of the population are projected to earn less than $20,000. This data provides strong support for affordable rental housing in the Submarket and MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents is 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)

	Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
Year	Number	Annual	Number	Annual Change
1990	7,767	-	63,856	-
2000	11,619	5.0%	90,763	4.2%
2007	15,228	4.3%	116,831	4.0%
2012	19,872	6.1%	149,302	5.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

As the table illustrates, similar to the general population trends, the senior population in both the Submarket and the MSA increased between 2000 and 2007. Senior population growth in the Central Hidalgo County Submarket and the MSA increased significantly between 2000 and 2007. Senior population growth in both the Central Hidalgo County Submarket and the MSA is expected to grow at a faster rate from 2007 through 2012.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)

Year	Central Hidalgo County Submarket		McAllen-Edinburg-Mission, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	6,618	-	52,073	-
2007	8,683	4.3%	67,113	4.0%
2012	11,428	6.3%	85,658	5.5%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth is projected to increase through 2012 with growth rates also increasing through 2012. Senior household growth rates are expected to increase from 2007 through 2012. The strong projected growth in the senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME						
Year	**McAllen-Edinburg-Mission, TX MSA**		**Central Hidalgo County Submarket**		**USA**	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*

2007	$30,519	-	$34,797	-	$53,154	-
2012	$35,078	2.59%	$39,876	2.55%	$62,503	3.52%
			Age 55+			
2007	$27,687	-	$29,288	-	$32,710	-
2012	$32,712	3.07	$35,795	3.63%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in all areas of analysis are below those of all households. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The senior median household income in the Submarket and MSA were approximately 89.5 and 84.6 percent, respectively, of the national average in 2007.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - Central Hidalgo County Submarket (Age 55+)						
Income	2007		Projected Mkt Entry		2012

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the submarket and MSA significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,600. Among these locations, the Submarket has the largest percentage of seniors earning less than $35,000 annually. Approximately 54.1 percent of those 55 and older in the Submarket are earning under $35,000 per year. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually and the rural nature of the submarket. The Submarket features similar numbers of senior households in these income brackets when compared to the MSA. By 2012, all areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 46.5 and 50.3 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. Furthermore, the majority of senior households within the Submarket will be earning less than $25,000, which is below the current AMI. This indicates that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	Central Hidalgo County Submarket				McAllen-Edinburg-Mission, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	5,529	83.5%	1,089	16.5%	43,784	84.1%	8,289	15.9%
2007	7,254	83.5%	1,429	16.5%	56,430	84.1%	10,683	15.9%
2012	9,548	83.5%	1,880	16.5%	72,023	84.1%	13,635	15.9%
Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008								

As the above table illustrates, the senior housing market is dominated by owner-occupied units. The Submarket has a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above) and the MSA. The small percentage of renter-occupied senior households is not unusual in rural submarkets, where owner-occupied housing is predominant among a reduced population.

Senior Demographic Conclusion

Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Although the median senior household income for all areas of analysis is projected to increase from 2007 to 2012, growth in the Submarket and MSA's median senior household income is projected to outpace growth in the Submarket. Both the MSA and Submarket significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of \$36,100. Approximately 54 percent of those 55 and older in the Submarket are earning under \$35,000 per year. This is attributable primarily to the Submarket's high percentage of senior households earning below \$15,000 annually and the rural nature of the Submarket. The Submarket features significantly more senior households in these income brackets when compared to the MSA and national averages. The national average of senior households earning below \$50,000 annually is 64 percent.

LOCAL MARKET INFORMATION

Central Hidalgo County Submarket

The following sections will provide an analysis of the demographic characteristics within the Submarket.

Healthcare

The majority of the general practitioners, hospitals and urgent care clinics in the Central Hidalgo County Submarket are located in the city of Edinburg. The primary major medical provider within proximity to the Central Hidalgo County Submarket is the South Texas Health System, with seven facilities including Cornerstone Regional Hospital, Edinburg Children's Hospital, Edinburg Regional Medical Center, Edinburg Regional Rehabilitation Center, McAllen Heart Hospital, McAllen Medical Center, South Texas Behavioral Health Center. The Edinburg Regional Medical Center is the nearest hospital to the Submarket, located within the Submarket in Edinburg, Texas.

Transportation

The South Texas International Airport at Edinburg, located in the Central Hidalgo County Submarket and McAllen Miller International Airport, located approximately 6.0 miles south of the Central Hidalgo County Submarket, are the major airports for the Submarket. The South Texas International Airport at Edinburg is a public-use airport located approximately nine miles north of the central business district of Edinburg. The airport is owned and operated by the City of Edinburg and averaged 13 general aviation aircraft operations per day in 2005. The McAllen Miller International Airport (MFE) is the primary business airport of the Rio Grande Valley and provides non-stop flights to Dallas-Fort Worth, Houston, and Las Vegas via American Airlines, Continental Airlines, and Allegiant Air.

Access to the Central Hidalgo County Submarket can be accomplished via US Highway 281. US Highway 281 runs north/south from McAllen, Texas to Wichita Falls, Texas.

Education

The University of Texas Pan American in Edinburg, Texas, with 17,337 students, including 2,261 graduate students, is the 10th largest university in the state and the fifth largest in the UT system and offers 54 bachelor's degree programs, 50 master's, and two doctoral programs. The nearest Independent School District is the Edinburg Independent School District. The Edinburg Independent School District includes three high schools, four middle schools, and 27 elementary schools

.

Public Transportation

Valley Transit is a full-service bus company that serves the Central Hidalgo County Submarket and all of South Central Texas and Northern Mexico with more than 50 daily schedules, as well as connections to nationwide travel on Greyhound Lines. The main travel center for the Central Hidalgo County Submarket is located in Edinburg at the Stripes (Citgo) Gas Station and transportation is available from that stop 24 hours a day, seven days a week.

Employment Centers

The majority of employment centers in the Central Hidalgo County Submarket are located in Edinburg. The largest employers in the City of Edinburg include the following:

Rank	Company	Industry	Employees
1	Edinburg Consolidated I.S.D.	Education	3,600
2	Edinburg Regional Medical Center	Healthcare	3,000
3	University of Texas Pan American	Education	2,850
4	Hidalgo County	Government	2,211
5	U.S. Customs and Border Patrol	Government	1,609
6	Wal-Mart	Retail	885
7	City of Edinburg	Government	505
8	HEB Food Stores	Grocery	440
9	TelePerformance	Call Center	355
10	Lopez Unit	State Prison	350

Based on the largest employers above, employment in the Submarket is dominated by the education, healthcare, and government sectors. According to 2007 employment by industry demographics, the top four employment sectors in the Central Hidalgo County Submarket are the educational services, health care/social assistance, retail trade and construction sectors. Approximately 52.2 percent of people in Central Hidalgo County work in these four industries. The demographic data and anecdotal data suggest that the Submarket is dominated by the education and healthcare industries. Though there is a discrepancy regarding the dominance of the retail and construction industries, when comparing both sets of data, it is important to note that the top two employers overall are education and healthcare, which are historically stable industries. Retail trade and construction are typically more volatile sectors of the economy as compared to historically stable industries such as education and healthcare. Therefore, despite the demographic projections indicating a prevalence of the retail trade and construction/manufacturing industries in the Submarket, the high concentration of people employed in education and healthcare industries should promote economic stability throughout the current economic downturn.

Proximity to Local Services

There are a moderate number of locational amenities in the Central Hidalgo County Submarket. The majority of locational amenities are located in and surrounding the cities of Edinburg and McAllen, Texas.

HOUSING SUPPLY ANALYSIS

CENTRAL HIDALGO COUNTY SUBMARKET HOUSING SUPPLY ANALYSIS

Age of the Housing Stock

The following table presents the age of the housing stock in the Central Hidalgo County Submarket.

AGE OF HOUSING STOCK IN THE CENTRAL HIDALGO COUNTY SUBMARKET

Years	Number of Units	Percent of Housing Stock
1999-3/2000	2,346	7.83%
1995-1998	6,618	22.10%
1990-1994	4,645	15.51%
1980-1989	7,277	24.30%
1970-1979	4,793	16.00%
1960-1969	2,040	6.81%
1950-1959	1,037	3.46%
1940-1949	697	2.33%
1939 and Before	499	1.67%
Total	**29,952**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (77.91 percent) in the Central Hidalgo County Submarket was constructed from 1970 through 1998. The Central Hidalgo County Submarket is comprised of the city of Edinburg. Approximately 40 to 50 percent of the area in this Submarket can be characterized as developed and within close proximity to most locational amenities and essential services. The remaining 50 to 60 percent of the area in this Submarket contains very little development and offers limited access to locational amenities and essential services. The majority of development occurs along U.S. Highway 281 and intensifies in a southerly direction towards McAllen; development dissipates slowly north of the Edinburg city limits. The predominant form of housing in this Submarket is owner-occupied single-family homes in fair to excellent condition and less than five to 40 years in age. There is a moderate amount of multifamily development in poor to excellent condition and less than five to 40 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2008 for Hidalgo County, Texas. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Hidalgo County, TX - 1997 to May 2008

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,373	140	41	1,554
1998	2,539	305	138	2,982
1999	4,397	152	109	4,658
2000	3,665	83	106	3,854
2001	3,500	130	764	4,394
2002	6,069	487	335	6,891
2003	6,691	419	950	8,060
2004	5,180	760	590	6,530
2005	7,125	662	953	8,740
2006	6,501	517	532	7,550
2007	5,125	364	707	6,196
2008*	1,340	124	105	1,569
Total	**53,505**	**4,143**	**5,330**	**62,978**
Average**	**4,742**	**365**	**475**	**5,583**

*Only includes through May 2008 ** Does not include 2008 permits

There were 5,330 "5+ units" building permits issued in Hidalgo County from 1997 to May 2008. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2008, at 85 percent, while "5+ units" building permits constitute approximately 8.5 percent of all permits issued from 1997 through May 2008.

Interviews

Housing Authority of County of Hidalgo

The Housing Authority of the County of Hidalgo was established in 1948 in order to serve the local farmworking families and migrant farmworkers in the region. The Housing Authority of the County of Hidalgo currently administers Farm Labor Housing units and Public Housing units in Hidalgo County, as well as Housing Choice Vouchers. According to Adela Montes, Deputy Director for the Housing Authority of the County of Hidalgo, there are currently 535 Farm Labor Housing units in two developments and 55 Public Housing units in two developments in Hidalgo County, excluding those administered by the McAllen Housing Authority. None of these developments are located in the Central Hidalgo County Submarket. There are approximately 8,592 Housing Choice Vouchers budgeted for Hidalgo County, and all are currently in use. Waiting Lists for Public Housing and Farm Labor Housing are currently open while the waiting list for Housing Choice Vouchers is closed. There are approximately 896 households on the waiting list for Housing Choice Vouchers. Of the 896 households, 162 are elderly households. There is no separate waiting list for special needs households in the Housing Choice Voucher Program. Currently, there are 104 elderly households participating in the Housing Choice Voucher Program in Hidalgo County. The number of households on the waiting list for Public Housing and Farm Labor Housing can be found below:

FARM LABOR HOUSING WAITING LIST – HIDALGO COUNTY					
Name	1BR	2BR	3BR	4BR	Total
Northside Apartments	14HH	11HH	2HH	0HH	27HH
Memorial Apartments	N/A	N/A	N/A	N/A	46HH

PUBLIC HOUSING WAITING LIST – HIDALGO COUNTY					
Name	1BR	2BR	3BR	4BR	Total
Villa Sandoval-Longoria	N/A	54HH	23HH	23HH	100HH
Villa San Juanita Rutledge	N/A	N/A	15HH	24HH	39HH

The current payment standards for one-, two-, three-, and four-bedroom units are listed below. According to Adela Montes, the payment standards are 100 percent of the Fair Market Rents.

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

Housing Authority of the City of Edinburg

According to Janie Salinas, Section 8 Director in the Housing Authority of the City of Edinburg, there are currently 970 Housing Choice Vouchers designated for the City of Edinburg. All of the vouchers are currently in use.

The current payment standards for one-, two-, three-, and four-bedroom units in Edinburg are listed below. The payment standards being used by the Edinburg Housing Authority are slightly lower than the payment standards published by the Hidalgo County Housing Authority.

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$511
Two-bedroom	$573
Three-bedroom	$711
Four-bedroom	N/A

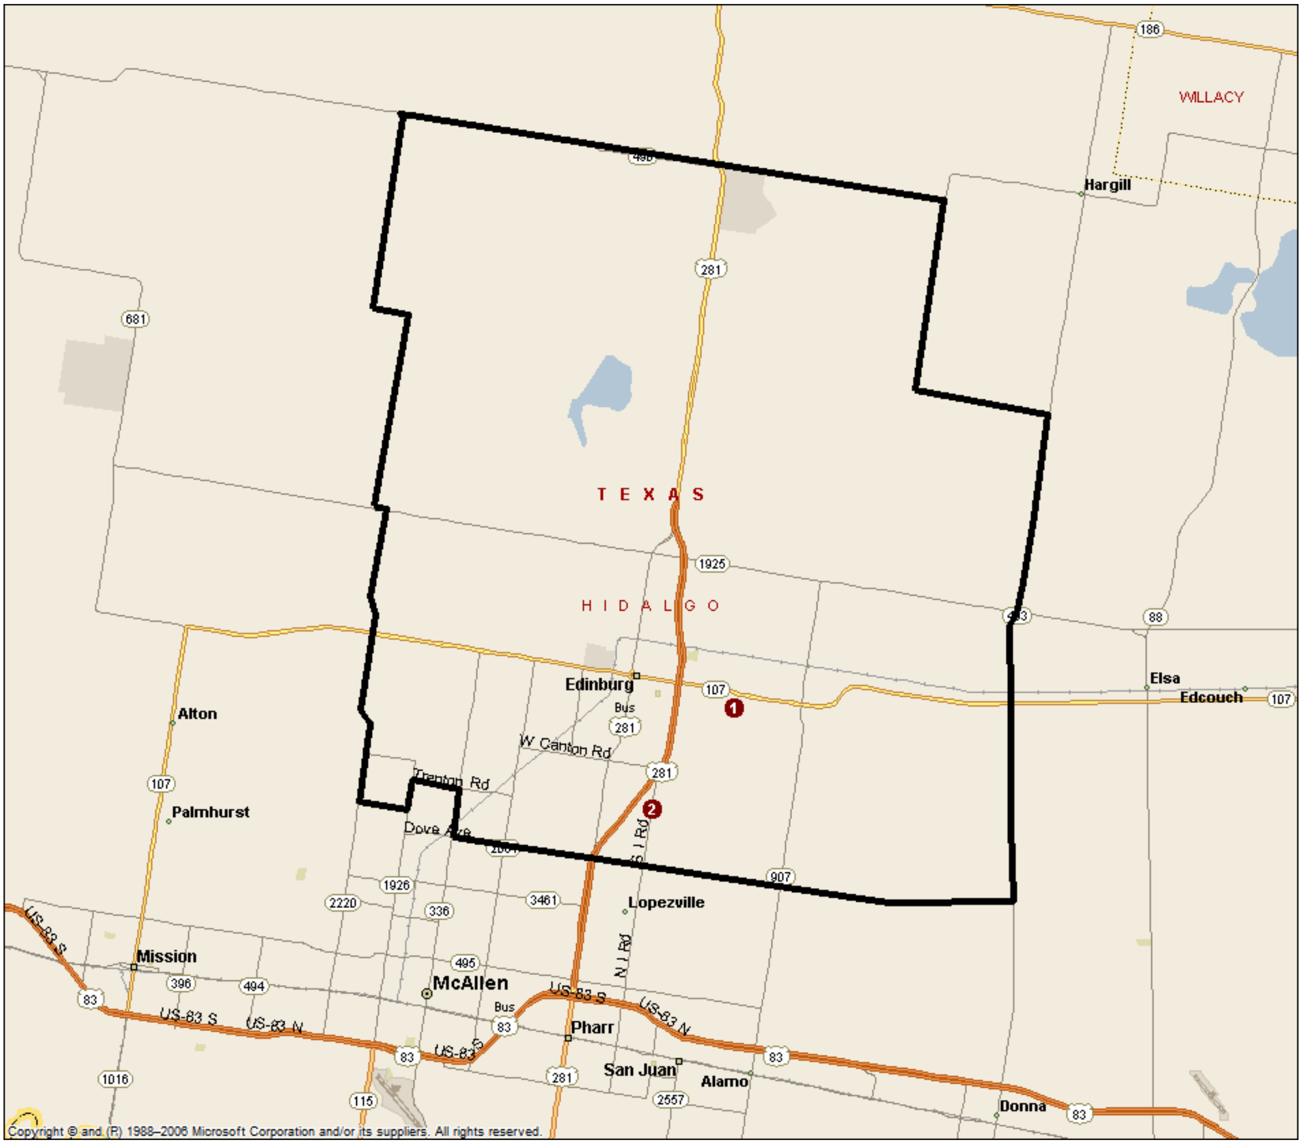
The waiting list for housing choice vouchers is currently open and the waiting list has approximately 800 to 1,000 applicants. According to Ms. Salinas, two- and three-bedroom units are in high demand and approximately 25 percent of the applicants on the waiting list are senior/disabled households. Ms. Salinas was unable to provide information regarding public housing developments currently being administered by the Edinburg Housing Authority. We attempted to contact the Public Housing Director with the Edinburg Housing Authority; however, our phone calls have not been returned as of the date of this study.

LIHTC Family Supply
We attempted to identify all existing, proposed, and under construction family LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers.

Novogradac identified nine family LIHTC developments in the Central Hidalgo County Submarket. Of the nine LIHTC developments, Kingswood Village has a Project Based Section 8 subsidy allowing the tenants to pay no more than 30 percent of their annual gross income towards rent. Therefore, this property has been excluded from the family LIHTC analysis and will be addressed in the family subsidized analysis section. Two of the remaining family LIHTC developments were able to provide current property and market data.

The table on the following pages lists the six family LIHTC properties in the PMA that were excluded from this analysis and the basis for their exclusion. Multiple attempts were made to contact each of the excluded properties with no success. It should be noted that all of the excluded properties below were allocated in 1992 or prior. Therefore, it is likely that the majority of the LIHTC properties listed below are no longer within their compliance period and are operating as market rate properties. It should be noted that the majority of the LIHTC properties listed below have less than five units and do not offer on-site management.

A map of the surveyed properties can be found below:



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Island Palms	Edinburg	LIHTC – Family
2	The Galilean	Edinburg	LIHTC – Family

The following pictures identify the surveyed LIHTC family properties in the Submarket:

Project 93-03	2103 Cypress St.	LIHTC-Family	2	Could not Contact
Project 93-04	1421 El Recreo Circle	LIHTC-Family	4	Could not Contact
Kingswood Village	502 South 29th Avenue	LIHTC/Section 8 - Family	80	Superceding Subsidy

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one family property in the Central Hidalgo Submarket which has received an allocation in the last three years.

RECENT LIHTC ALLOCATIONS					
Name	Address	Type	No. of Units	Status	Date of Allocation
Kingswood Village	502 South 29th Avenue	LIHTC/Section 8 - Family	80	Renovated in 2007; Fully occupied and being used in the family subsidized analysis	2005

We are not aware of any other proposed or under construction family-oriented LIHTC developments in the Submarket.

Unit Mix

The following table illustrates the unit mix in the family LIHTC rental property market.

Unit Mix - LIHTC Family		
Unit Type	Total Units	Percent
1 BR	76	16.60%
2 BR	184	40.20%
3 BR	198	43.20%
Total	**458**	**100%**

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.45 and is projected to decrease slightly by 2012 to 3.42. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family LIHTC rental property market.

Unit Size – LIHTC Family			
Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	500	500	500
2 BR	750	900	825
3 BR	1,000	1,100	1,050

The one, two, and three-bedroom unit sizes for the surveyed LIHTC properties in the market are 27.0, 12.0 and 8.7 percent smaller than the surveyed market rate one-, two-, and thee-bedroom units in the Submarket.

Other	n/a	n/a

The existing LIHTC multifamily properties in the Submarket offer a moderate to extensive amount of in-unit and community amenities. The surveyed LIHTC properties offer unit amenities that include balconies/patios, window covers, carpeting, central air, dishwashers, ceiling fans, garbage disposals, ovens, refrigerators, and washer-dryer hook-ups in one property only. The surveyed LIHTC properties offer community amenities including a clubhouse/community room, central laundry, off-street parking, on-site management, a playground, and a swimming pool. One of the surveyed properties offeres non-shelter services such as daycare. Security features are offered by one surveyed LIHTC property in the Submarket.

By-Unit Weighted Vacancy

Management at Island Palms was unable to provide a breakdown by unit type and therefore no analysis was performed.

Absorption

None of the surveyed properties were able to provide absorption information.

Waiting Lists

Neither of the surveyed LIHTC properties maintains a waiting list.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – LIHTC Family		
Property Name	**Number of Units**	**Vacancy Rate**
Island Palms	250	19.20%
The Galilean Apartments	208	7.20%
AVERAGE		**13.2%**

Overall vacancy at the surveyed family LIHTC properties is higher than the surveyed market rate properties in the Submarket, which have an overall average vacancy rate of 6.53 percent. The overall average vacancy rate appears slightly higher than is typical considering the age, condition, and unit mix of the surveyed LIHTC properties. According to management at both properties, there are insufficient income qualified households at the higher AMI levels; this is due specifically to the properties' proximity to Pan-American University.

Concessions

None of the LIHTC properties in the market are offering concessions. Concessions are not prevalent in the market.

Turnover

Only one surveyed property, Island Palms, was able to provide a turnover rate of 32 percent.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Project	Type / Built / Renovated	Market / Subsidy	Units	#	%	Restriction	Rent (Adj.)	Size (SF)	Max Rent?	Wait List?	Units Vacant	Vacancy Rate

PAYMENT STANDARDS	
Units	**Payment Standards**
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The surveyed rents at all of the LIHTC properties, including those of the market rate units, are below the current payment standards published by the Hidalgo County and The Edinburg Housing Authority. One of the surveyed properties reported rents set at the maximum allowable levels. However, the rental rates at the surveyed properties appear to be significantly below the 50 percent and 60 percent of AMI rent levels.

LIHTC Family Supply Conclusion

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.45 and is projected to decrease slightly by 2012 to 3.42. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate an unmet demand for larger bedroom types.

The existing LIHTC multifamily properties in the Submarket offer a moderate to extensive amount of in-unit and community amenities. The surveyed LIHTC properties offer unit amenities that include balconies/patios, window covers, carpeting, central air, dishwashers, ceiling fans, garbage disposals, ovens, refrigerators, and washer-dryer hook-ups in one property only. The surveyed LIHTC properties offer community amenities including a clubhouse/community room, central laundry, off-street parking, on-site management, a playground, and a swimming pool. One of the surveyed properties offered non-shelter services such as daycare. Security features are offered by one surveyed LIHTC property in the Submarket.

The one, two, and three-bedroom unit sizes for the surveyed LIHTC properties in the market are 27.0, 12.0 and 8.7 percent smaller than the surveyed market rate one-, two-, and thee-bedroom units in the Submarket. Overall vacancy at the surveyed family LIHTC properties is slightly higher (13.2 percent) than the surveyed market rate properties in the Submarket, which have an overall average vacancy rate of 6.53 percent. The overall average vacancy rate appears slightly higher than is typical considering the age, condition, and unit mix of the surveyed LIHTC properties. According to management at both properties, there are insufficient income qualified households at the higher AMI levels; this is due specifically to the properties' proximity to Pan-American University

The surveyed rents at all of the LIHTC properties, including those of the market rate units, are below the current payment standards published by the Hidalgo County and The Edinburg Housing Authority. One of the surveyed properties reported rents set at the maximum allowable levels. However, the rental rates at the surveyed properties appear to be significantly below the 50 percent and 60 percent of AMI rent levels.

LIHTC Senior Supply

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers.

Novogradac identified one senior LIHTC development, Edinburg Senior Towers aka Providence at Edinburg with 100 units. Edinburg Senior Towers aka Providence at Edinburg is a combination LIHTC/Section 8 development with 100 percent of tenants paying no more than 30 percent of their annual gross income towards rent. Therefore, this property has been excluded from the senior LIHTC analysis and will be addressed in the senior subsidized analysis section.

Proposed/Under Construction

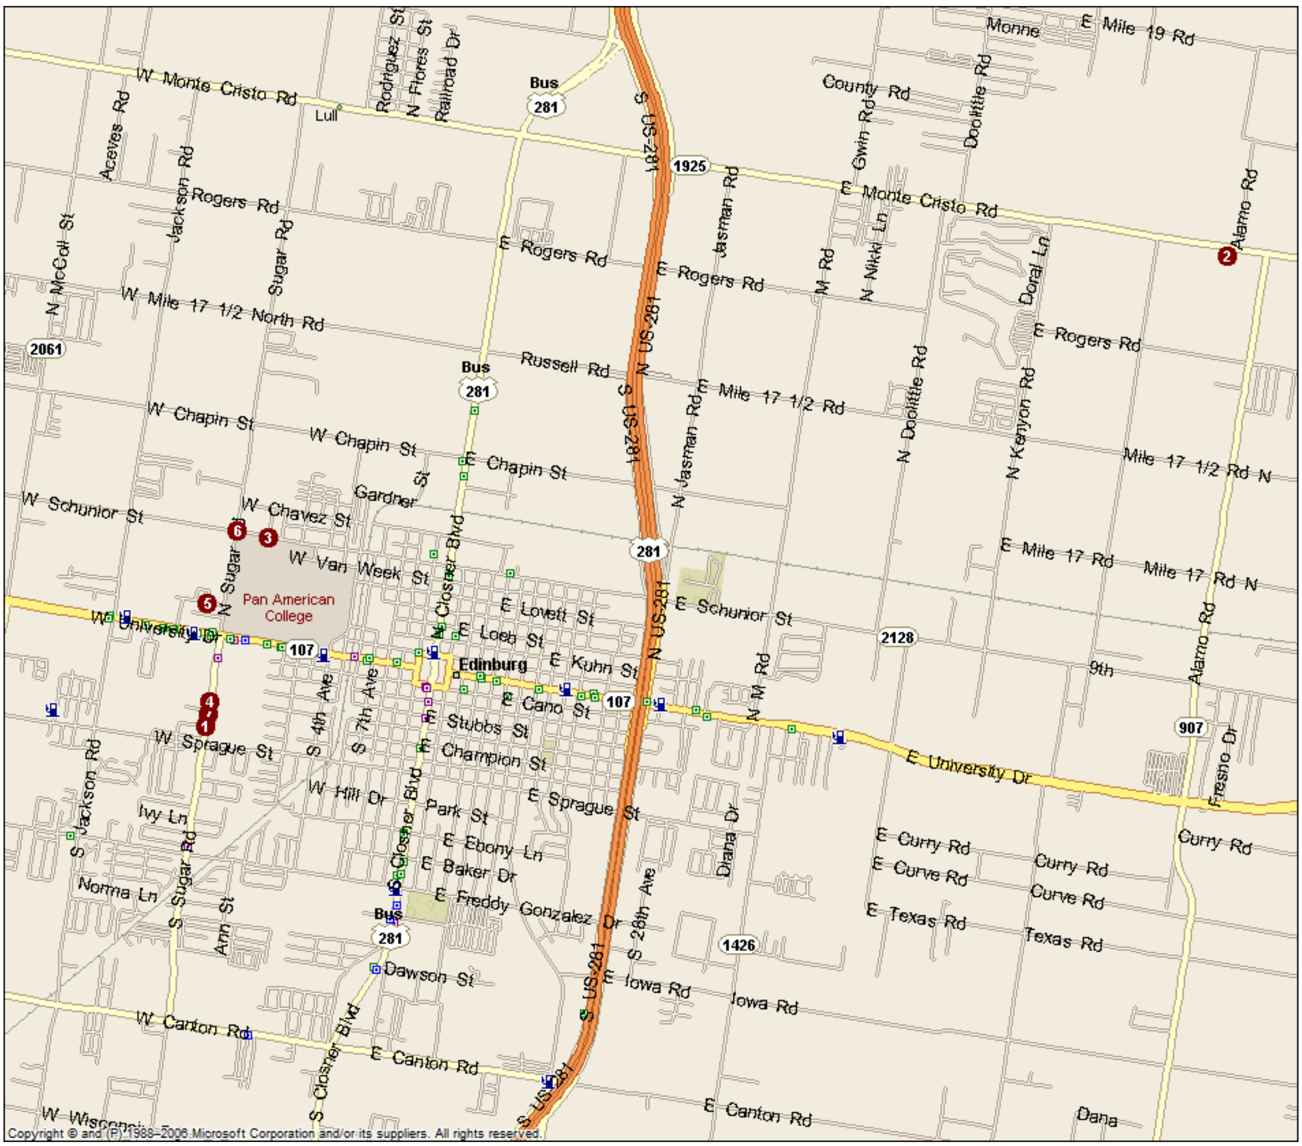
According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one proposed or under construction senior LIHTC property in the Central Hidalgo County Submarket, Villa Estella Trevino. Villa Estella Trevino will be a newly constructed age-restricted property with 161 one- and two-bedroom units set at the 30 and 60 percent of AMI levels. However, this development will be administered by the Edinburg Housing Authority and will have a superceding subsidy allowing the senior tenants to pay no more than 30 percent of their annual income towards rent.

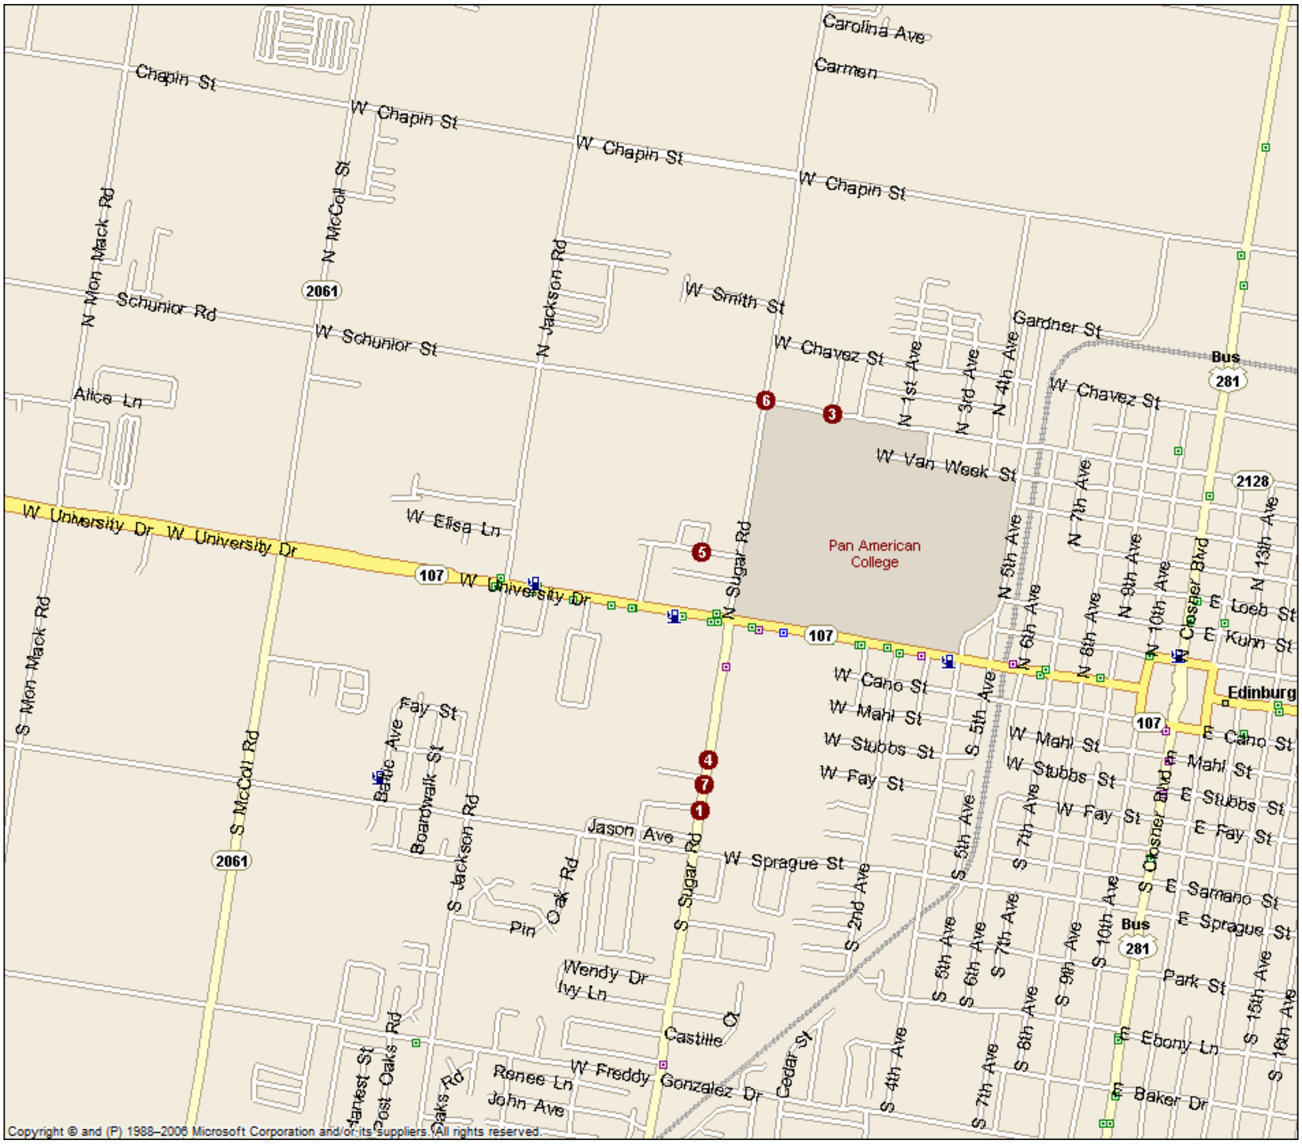
Market Rate Family Supply

We attempted to identify all existing, proposed, and under construction family market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials.

Novogradac identified 14 family market rate properties in the Submarket. Of the fourteen properties, seven were able to provide market data. We attempted to contact each of the remaining developments multiple times with no success. A table of the excluded properties and the reasons for exclusion can be found on the following pages.

The following map illustrates the location of the surveyed market rate family properties in the Submarket.





SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Ashtree Apartments	Edinburg	Market Rate - Family

Proposed Construction

We attempted to contact the City of Edinburg Planning and Zoning Departments. However, our inquiries regarding proposed or under construction market rate multifamily development have not been addressed as of the date of this study.

Unit Mix

The following table illustrates the unit mix in the family market rate rental property market.

Unit Mix - Market Family		
Unit Type	**Total Units**	**Percent**
1 BR	435	60.4%
2 BR	261	36.3%
3 BR	24	3.3%
Total	**720**	**100%**

Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.45 and is projected to decrease slightly by 2012 to 3.42. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012. Though smaller bedroom types are currently prevalent in the market, demographic projections evidence indicates a possible unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family market rate rental property market.

Unit Size – Market Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	570	890	685
2 BR	859	1,008	938
3 BR	1,150	1,150	1,150

The one, two, and three-bedroom unit sizes for the surveyed market rate properties in the market are 27.0, 12.0, and 8.7 percent larger than the surveyed LIHTC one-, two-, and thee-bedroom units in the Submarket.

Other	n/a	n/a	n/a	n/a	n/a	n/a	n/a

The surveyed market rate properties in the Central Hidalgo County Submarket offer a moderate amount of in-unit and community amenities. The majority of the surveyed market rate properties offer in-unit amenities including balconies/patios, window covers, carpeting, central air, dishwashers, garbage disposals, ovens, walk-in-closets, and refrigerators. Washer/dryer connections and in-unit appliances are not prevalent in the market. The majority of the market rate surveyed properties offer a central laundry, off-street parking, on-site-management, and a swimming pool. Security measures are present but not prevalent in the market. No premium amenities or non-shelter services are provided by the properties.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit types for the surveyed properties.

Weighted Vacancy - Market Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	435	32	7.36%
2 BR	261	11	4.21%
3 BR	24	4	1.67%
Total	**720**	**47**	6.53%

The average weighted vacancy rate for the surveyed market rate properties is 6.53 percent.

Absorption

One of the market rate properties was able to provide an absorption rate of ten units per month.

Waiting List

One of the market rate properties maintains a waiting list for its one-bedroom units. Though the number of households on the waiting list was not available, it should be noted that the majority of the households are university students. Waiting lists are not prevalent in the Submarket.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – Market Family			
Property Name	**Number of Units**	**Vacant Units**	**Vacancy Rate**
Ashtree Apartments	82	2	2.40%
E.R,G. Properties	32	0	0.00%
El Bosque Apartments	216	26	12.00%
Heritiage Square	204	12	5.90%
Oak Tree Apartments	20	1	5.00%
Rockridge Apartments	75	1	1.30%
University Manor Apartments	91	5	5.50%
AVERAGE	**720**	**47**	**6.53%**

The average vacancy rate for the market rate properties (6.53 percent) is lower than that of the surveyed average vacancy of LIHTC properties of 13.2 percent. This is due largely to an insufficient number of income qualified households, due to the prevalence of student tenants.

Concessions

None of the surveyed market rate properties are offering concessions. Concessions are not prevalent in the Submarket.

Turnover

All but one of the surveyed market rate properties were able to provide turnover information. The following table illustrates turnover information in the market.

Turnover – Market Family		
Property Name	**Number of Units**	**Turnover**
Ashtree Apartments	82	20%
E.R,G. Properties	32	N/A
El Bosque Apartments	216	44%
Heritiage Square	204	30%
Oak Tree Apartments	20	20%
Rockridge Apartments	75	16%
University Manor Apartments	91	40%
AVERAGE		**28.3**

Annual turnover rates reported range from 16 percent to 44 percent, with an average of 28.3 percent. Average turnover for the LIHTC properties in the market is slightly higher at 32 percent.

PAYMENT STANDARDS	
Units	**Payment Standards**
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

The average market rents for the one-, two-, and three-bedroom units at the surveyed market rate properties are $453, $542, and $625. The average one-, two-, and three-bedroom market rents are $63 lower, $67 lower, and similar, respectively, than the current payment standards for the one-, two, and three-bedroom units in Hidalgo County. The average one-, two-, and three-bedroom market rents are $37, $46, and $55 lower than the 2008 maximum allowable rents at 60 percent of AMI for the one-, two-, and three-bedroom units in Hidalgo County.

Market Supply Conclusion

Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.45 and is projected to decrease slightly by 2012 to 3.42. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012. Though smaller bedroom types are currently prevalent in the market, demographic projections evidence indicates a possible unmet demand for larger bedroom types.

The surveyed market rate properties in the Central Hidalgo County Submarket offer a moderate amount of in-unit and community amenities. The majority of the surveyed market rate properties offer in-unit amenities including balconies/patios, window covers, carpeting, central air, dishwashers, garbage disposals, ovens, walk-in-closets, and refrigerators. Washer/dryer connections and in-unit appliances are not prevalent in the market. The majority of the market rate surveyed properties offer a central laundry, off-street parking, on-site-management, and a swimming pool. Security measures are present but not prevalent in the market. No premium amenities or non-shelter services are provided by the properties.

The one-, two-, and three-bedroom unit sizes for the surveyed market rate properties in the market are 27.0, 12.0, and 8.7 percent larger than the surveyed market rate one-, two-, and thee-bedroom units in the Submarket. The average weighted vacancy rate for the surveyed market rate properties is 6.53 percent. Annual turnover rates reported range from 16 percent to 44 percent, with an average of 28.3 percent. Average turnover for the LIHTC properties in the market is slightly higher at 32 percent.

One of the market rate properties maintains a waiting list for its one-bedroom units. Though the number of households on the waiting list was not available, it should be noted that the majority of the households are university students. Waiting lists are not prevalent in the Submarket. The average vacancy rate for the market rate properties (6.53 percent) is lower than that of the surveyed average vacancy of LIHTC properties of 13.2 percent. This is due largely to an insufficient number of income qualified households, due to the prevalence of student tenants. None of the surveyed market rate properties are offering concessions. Concessions are not prevalent in the Submarket.

The average market rents for the one-, two-, and three-bedroom units at the surveyed market rate properties are $453, $542, and $625. The average one-, two-, and three-bedroom market rents are $63 lower, $67 lower, and similar, respectively, than the current payment standards for the one-, two, and three-bedroom units in Hidalgo County. The average one-, two-, and three-bedroom market rents are $37, $46, and $55 lower than the 2008 maximum allowable rents at 60 percent of AMI for the one-, two-, and three-bedroom units in Hidalgo County.

Market Rate Senior Supply

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable existing senior market rate properties in the Central Hidalgo County Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis.

Proposed Construction

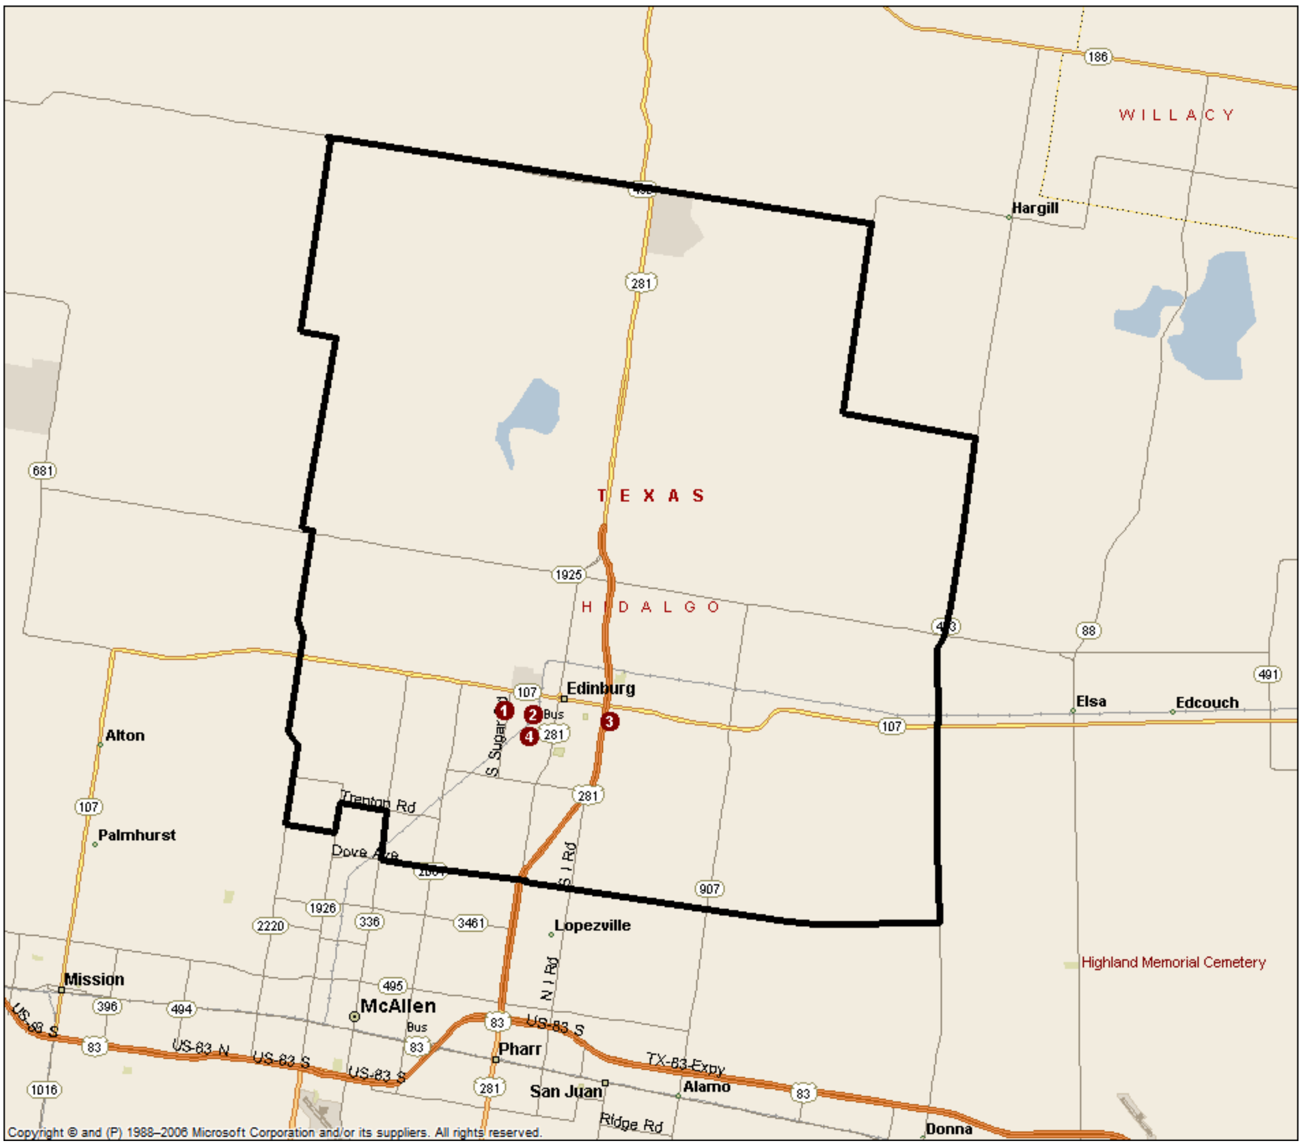
We were unable to identify any proposed or under construction market rate senior developments in the Submarket.

Subsidized Family Supply

We attempted to identify all existing, proposed, and under construction family oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are four existing family-targeted subsidized developments located in the Central Hidalgo Submarket. We were able to acquire information on all of subsidized developments.

The following map illustrates the location of the surveyed family-oriented subsidized properties in the Submarket.



SURVEYED FAMILY PROPERTIES			
Number	Name	Location	Type
1	Champion Gardens	Edinburg	Section 8 – Family
2	Edinburg Village Apartments	Edinburg	Section 8 Family
3	Kingswood Village	Edinburg	LIHTC/Section 8 – Family
4	Sherwood Apartments	Edinburg	Section 8 - Family

Subsidized Multifamily Market

The following pictures identify the surveyed subsidized family properties in the Submarket.

Champion Gardens

Edinburg Village Apartments

Kingswood Village

Sherwood Apartments

Excluded Properties

We were able to acquire information on all of the family-oriented subsidized developments.

Proposed Construction

We attempted to contact the City of Edinburg Planning and Zoning Departments. However, our inquiries regarding proposed or under construction subsidized multifamily development have not been addressed as of the date of this study. According to the Edinburg Housing Authority, there are no proposed family targeted developments at this time.

Unit Mix

The following table illustrates the unit mix in the family subsidized rental property market. Properties unable to provide a breakdown by unit type have been excluded from this analysis.

Unit Mix - Subsidized Family

Unit Type	Total Units	Percent
1 BR	36	11.7%
2 BR	127	41.0%
3 BR	126	40.8%
4 BR	20	6.50%
Total	**309**	**100**

Large unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.45 and is projected to decrease slightly by 2012 to 3.42. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012.

Unit Size

The following table illustrates the existing unit sizes in the subsidized rental property market. Properties unable to provide information regarding unit sizes are prevalent in the Submarket.

Unit Size - Subsidized Family

Unit Type	Minimum Surveyed	Maximum Surveyed	Surveyed Average
1 BR	576	628	601
2 BR	700	1,008	839
3 BR	971	1,140	1,043
4 BR	1,140	1,183	1,162

The surveyed one-, two, three-, and four-bedroom subsidized units have average sizes of 601, 839, 1,043 and 1,162 square feet, respectively. The subsidized one-, two-, and three-bedroom average unit sizes are similar, 16.8 percent larger, and 0.6 percent smaller, respectively, than the one-, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. There were no four-bedroom units among the surveyed market rate and LIHTC developments.

The existing subsidized multifamily properties in the Central Hidalgo County Submarket offer limited in-unit and community amenities. The majority of the properties in the market offer window covers, central air, ovens and refrigerators. The majority of the properties offer community amenities including central laundry, off-street parking and on-site management. The majority of the surveyed subsidized properties offer no non-shelter services and no premium amenities.

Weighted Vacancy

The following table illustrates the weighted vacancy rates in the subsidized rental property market. Properties unable to provide a breakdown of vacancies by unit type were excluded from the weighted vacancy analysis.

Weighted Vacancy - Subsidized Family			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	20	0	0.00%
2 BR	78	2	2.57%
3 BR	110	4	3.63%
4 BR	20	1	5.00%
Total	**228**	**7**	**3.07%**

The average weighted vacancy of the surveyed subsidized properties is 3.07 percent.

Absorption

None of the subsidized family properties were able to provide an absorption rate.

Waiting List

The following table illustrates the waiting lists in the subsidized rental property market.

Waiting Lists – Subsidized Family		
Property Name	Number of Units	Households
Champion Gardens	81	24HH
Edinburg Village Apartments	100	40HH
Kingswood Village	80	10HH
Sherwood Apartments	48	60-80HH

The average length of the waiting lists at the surveyed subsidized properties is approximately 54 households. All of the surveyed developments maintain extensive waiting lists. Based on this information, we anticipate significant future demand for affordable housing.

Vacancy Levels
The following table illustrates the vacancy rates in the subsidized rental property market.

Vacancy – Subsidized Family			
Property Name	**Number of Units**	**Vacant Units**	**Vacancy Rate**
Champion Gardens	81	18	22.20%
Edinburg Village Apartments	100	5	5.00%
Kingswood Village	80	0	0.00%
Sherwood Apartments	48	2	4.20%
AVERAGE	**309**	**25**	**8.1%**

The average vacancy rate of the surveyed subsidized properties (8.1 percent) is lower than the average vacancy rate of the surveyed LIHTC properties (13.2 percent).

Concessions
None of the subsidized family properties in the market are offering concessions.

Turnover

Turnover – Subsidized Family		
Property Name	**Number of Units**	**Households**
Champion Gardens	81	44%
Edinburg Village Apartments	100	36%
Kingswood Village	80	10%
Sherwood Apartments	48	25%
AVERAGE	**309**	**28.8%**

All of the subsidized properties were able to provide turnover rates ranging from 10 to 44 percent, resulting in an average turnover rate of 28.8 percent.

Rent and Square Footage Ranking

PAYMENT STANDARDS	
Units	Payment Standards
One-bedroom	$516
Two-bedroom	$609
Three-bedroom	$730
Four-bedroom	$839

All of the surveyed properties have one-, two-, three-, and four-bedroom units below the current payment standards for Hidalgo County.

Subsidized Family Supply Conclusion

Large unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.45 and is projected to decrease slightly by 2012 to 3.42. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, demographic estimates show that approximately 38 percent of the population in 2007 was age 19 years or younger and this trend is expected to remain stable through 2012.

The surveyed one-, two, three-, and four-bedroom subsidized units have average sizes of 601, 839, 1,043 and 1,162 square feet, respectively. The subsidized one, two, and three-bedroom average unit sizes are similar, 16.8 percent larger, and 0.6 percent smaller, respectively, than the one, two-, and three-bedroom average unit sizes found at the LIHTC properties in the Submarket. There were no four-bedroom units among the surveyed market rate and LIHTC developments.

The average weighted vacancy of the surveyed subsidized properties is 3.07 percent. None of the subsidized family properties were able to provide an absorption rate. The average length of the waiting lists at the surveyed subsidized properties is approximately 54 households. All of the surveyed developments maintain extensive waiting lists. Based on this information, we anticipate significant future demand for affordable housing. The average vacancy rate of the surveyed subsidized properties (8.1 percent) is lower than the average vacancy rate of the surveyed LIHTC properties (13.2 percent). None of the subsidized family properties in the market are offering concessions. All of the subsidized properties were able to provide turnover rates ranging from 10 to 44 percent, resulting in an average turnover rate of 28.8 percent.

All of the surveyed properties have one-, two-, three-, and four-bedroom units below the current payment standards for Hidalgo County.

Subsidized Senior Supply

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There is one existing senior comparable in the Central Hidalgo Submarket. Edinburg Senior Towers is a combination LIHTC/Project Based Section 8 Development comprised of 100 studio and one-bedroom units. This development is 94 percent occupied and the waiting list is administered by the Edinburg Housing Authority. This property was recently renovated with tax credits; however, 100 percent of the tenants pay no more than 30 percent of their annual income towards rent. Due to the lack of available data, we have not performed a s senior subsidized rental analysis.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one proposed or under construction senior LIHTC property in the Central Hidalgo County Submarket, Villa Estella Trevino. Villa Estella Trevino will be a newly constructed age-restricted property with 161 one- and two-bedroom units set at the 30 and 60 percent of AMI levels. However, this development will be administered by the Edinburg Housing Authority and will have a superceding subsidy allowing the senior tenants to pay no more than 30 percent of their annual income towards rent.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the Central Hidalgo County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the Central Hidalgo County Submarket in 2007 is 34,345 and the total number of households in 2012 is projected to be 40,356. The total number of households age 55 and older in the Submarket for 2007 is 8,683, with a 2012 projection of 11,428 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 28.7 percent of the occupied housing unit households in the Central Hidalgo County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 16.5 percent, which is the highest senior renter percentage of the seven Hidalgo County Submarkets.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a

one-person household in the income range between 31 percent and 40 percent of AMI. A minimum income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the Central Hidalgo County Submarket (McAllen-Edinburg-Mission, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*	
1 Person	$0	$9,150	$9,150	$12,200	$12,200	$15,250	$15,250	$18,300	$18,300	$24,400	$24,400	$30,500
2 Person	$0	$10,500	$10,500	$13,960	$13,960	$17,450	$17,450	$20,940	$20,940	$27,920	$27,920	$34,900
3 Person	$0	$11,800	$11,800	$15,680	$15,680	$19,600	$19,600	$23,520	$23,520	$31,360	$31,360	$39,200

5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households

Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the Central Hidalgo County Submarket, approximately 28.8 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing

Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 2.9 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing

A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the Central Hidalgo County Submarket, it is estimated that 22.3 percent of households are living in overcrowded units.

Movership or Turnover Rate

There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the stabilized family LIHTC properties surveyed in the Submarket is approximately 32 percent.

We were unable to identify any senior LIHTC properties in this Submarket. With so few senior LIHTC properties able to provide turnover data in the MSA, we have used the average senior subsidized turnover rate of 6.5 percent.

Unstabilized Rental Units - Existing and Proposed

There are no proposed or under construction family LIHTC or subsidized properties in the Central Hidalgo County Submarket. Villa Estrella Trevino is a proposed senior LIHTC development to be located in Edinburg. This development was allocated tax credit funding in 2007; it will offer 17 units at 30 percent of AMI, 144 units at 60 percent of AMI and seven market rate units. These units have been deducted from the following demand analysis, with the market rate units deducted from demand at 81 to 100 percent of AMI.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the Central Hidalgo County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the Central Hidalgo County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that almost 23 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. This may explain the 13.2 percent average vacancy rate among family LIHTC properties in the Submarket, while market rate properties in the Submarket have an average vacancy rate of 6.5 percent. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. This suggests that the higher than average vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Interviews with property managers at the Submarket's LIHTC properties provide further anecdotal evidence that this is indeed the case. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Although there are no new family LIHTC units proposed for the market, and new units at the 60 percent of AMI level in the market may experience a somewhat slower than average absorption period, and concessions may be needed to attract and maintain tenants in units at the 60 percent set-aside. However, it should be noted that with a high incidence of overcrowding in the Submarket, additional demand may be generated from owner households looking to improve their current housing situation.

Senior Households

Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Villa Estrella Trevino is a proposed senior LIHTC development to be located in Edinburg. This development was allocated tax credit funding in 2007; it will offer 17 units at 30 percent of AMI, 144 units at 60 percent of AMI and seven market rate units. As shown in the demand analysis above, it appears that there is an insufficient number of income-qualified senior households at the 60 percent of AMI level to support the proposed number of units.

It should be noted that Villa Estrella Trevino is being developed in conjunction with the Edinburg Housing Authority. The housing authority currently reports a waiting list of over 1,000 households, one-third of which are senior households. Additionally, Edinburg's last affordable units for seniors were constructed in 1975. It is anticipated that many of the units at 60 percent of AMI may be occupied by Housing Choice Voucher Holders from the Edinburg Housing Authority waiting list. Based on the demand analysis of senior renter households, there appears to be adequate demand for additional affordable housing for seniors at the lowest income levels.

BROWNSVILLE-HARLINGEN, TX MSA REGIONAL COMMUNUNITY CHARACTERISTICS, CURRENT DEMOGRAPHIC DATA AND REGIONAL ECONOMY

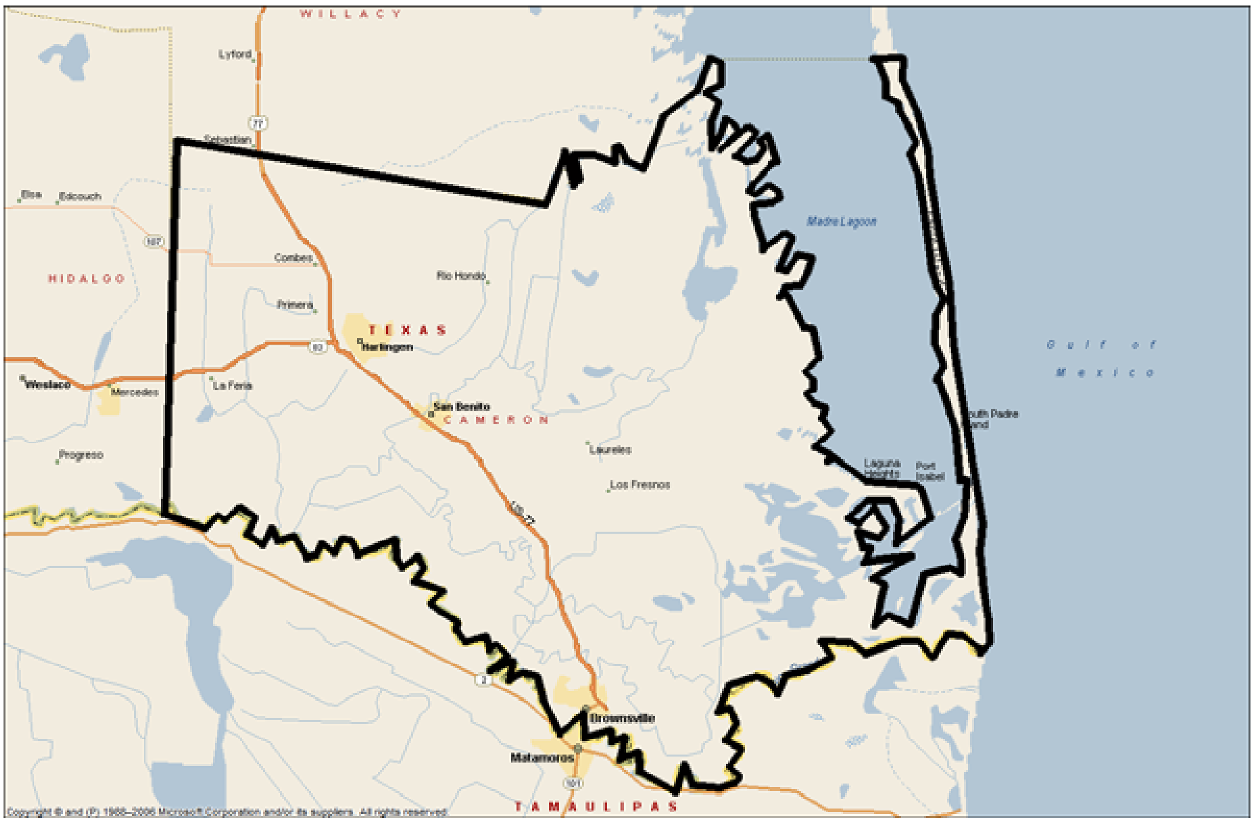
BROWNSVILLE-HARLINGEN, TX MSA REGIONAL AND LOCAL AREA CHARACTERISTICS

Introduction

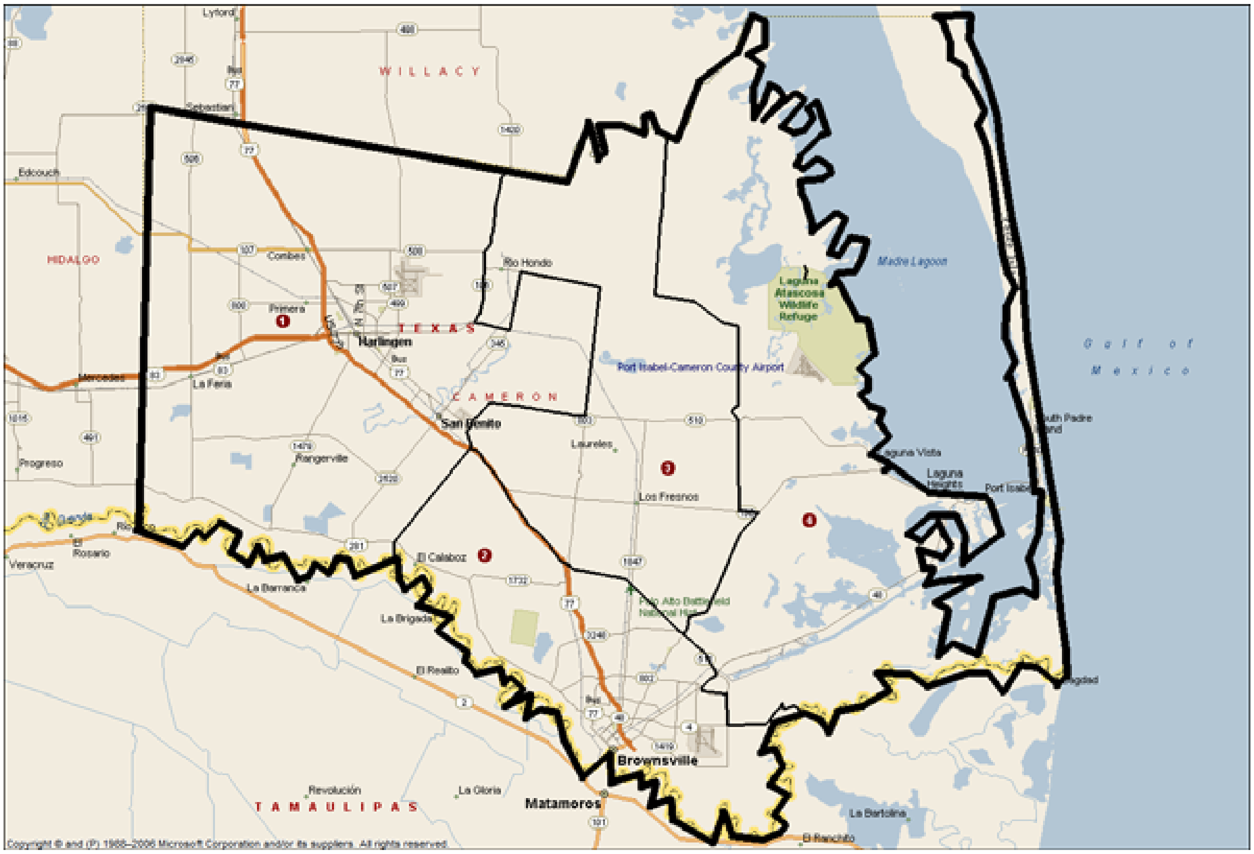
The following sections will project the estimated housing needs for the ensuing five-year period (2007-2012). The Data is based on Novogradac and Company LLP research and analysis of ESRI Business Information Solutions and Census data as well as in-depth interviews with local market participants.

Brownsville-Harlingen, TX MSA

The primary market area is defined as the Brownsville-Harlingen, TX MSA, which is comprised entirely of Cameron County. This area was defined based on the client's specifications. The following map illustrates the boundaries of the PMA as defined above.



The following map shows the four submarkets of the Brownsville-Harlingen, TX MSA.



Submarket Number	Submarket Name
1	West Cameron County
2	South Cameron County
3	Central Cameron County
4	East Cameron County

Overview

The Brownsville-Harlingen, TX MSA is located in the Rio Grande Valley of south Texas, which is comprised of the four southernmost counties in Texas, including Cameron, Hidalgo, Starr and Willacy Counties. Cameron County is the southernmost county in the state of Texas and covers a land area of 1,276 square miles. Principal cities and towns in Cameron County include Brownsville (estimated population 139,722), Harlingen (66,498), La Feria (6,115), Los Fresnos (4,512), Palm Valley (1,298), Port Isabel (4,865), Rio Hondo (1,942) and San Benito (25,005). The City of Brownsville is the county seat of Cameron County.

Economic Analysis

The Brownsville-Harlingen MSA is the largest MSA in the Rio Grande Valley. The South Texas region's rate of job growth will outpace that of the state of Texas through 2012. The Brownsville-Harlingen MSA's population is growing rapidly, at a rate that has exceeded the state average since 2002. Forbes magazine ranked the Brownsville-Harlingen MSA number two nationally in cost of living and also ranked the MSA in terms of job growth and cost of doing business.

Retail activity in Brownsville has grown by 56 percent since 2000. New retailers have contributed to the sales tax base, which increased from $1.3 billion in 2000 to $1.8 billion in 2006. According to the Brownsville Economic Development Corporation, the city is scheduled to get a second Ross store, a Conn's and a Kohl's outlet by the end of 2008.

The current construction of a loop from Reynosa to the outskirts of Matamoros is expected to facilitate the drive for shoppers coming to Brownsville and South Padre Island from Mexico. The retail sector is expected to remain strong over the next few years.

According to the most recent statistics for the city of Brownsville, building permit valuation for new commercial construction increased from $5.6 million in October 2006 to $25.5 million in October 2007. The increase is due to new commercial projects that broke ground in the fourth quarter of 2007. In total permits, valuations increased from $14.9 million in October 2006 to $43.4 million for the same time period last year.

RealtyTrac published a report dated July 25, 2008 in which it indicated that foreclosures nationwide increased 14 percent between first quarter 2008 and the second quarter of 2008. The report also shows that one in every 171 U.S. households received a foreclosure filing during this quarter. Overall, foreclosure activity in Texas was down six percent in July. According to the report, there were 265 properties in the Brownsville-Harlingen MSA with foreclosure filings during second quarter 2008, which equates to one in every 530 homes in the MSA. This is well below the national average and indicates that the MSA may be less impacted than the nation as a whole by the ongoing mortgage crisis.

Major Employers

The following tables show the major employers in Brownsville and Harlingen, TX. It should be noted that the number of employees for the Brownsville major employers was not available at the time of this report.

Brownsville Top Ten Employers

Rank	Company	Industry
1	Brownsville Independent School District	Education
2	AMFELS	Manufacturing
3	University of Texas at Brownsville	Education
4	Cameron County	Government
5	Wal-Mart	Retail
6	City of Brownsville	Government
7	Convergys Corp.	Call Center
8	HEB Food Stores	Retail
9	Valley Regional Medical Center	Healthcare
10	Valley Baptist Medical Center	Healthcare

Harlingen Top Ten Employers

Rank	Company	Industry	Employees
1	Harlingen CISD	Education	2,582
2	Valley Baptist Medical Center	Healthcare	1,962
3	Vicki Roy Home Health	Healthcare	978
4	Advanced Call Center Technologies	Call center	865
5	Dish Network	Call center	842
6	City of Harlingen	Government	555
7	Texas State Technical College	Education	534
8	Harlingen Medical Center	Healthcare	463
9	West Corporation	Call Center	425
10	HEB	Grocery/Retail	363

Source: Harlingen Economic Development Corporation, Real Estate Center Market Overview 2008: July2008

Employment in the Brownsville-Harlingen MSA is dominated by relatively stable industries, as almost all ten of the major employers are in the education, healthcare, manufacturing and government sectors. However, according to 2007 Employment by Industry demographics, retail trade and construction comprise approximately 24 percent of overall employment and are two of the top four industry sectors in the Brownsville-Harlingen MSA. Retail trade and construction are typically more volatile sectors of the economy as compared to historically stable industries such as education, healthcare and government. Therefore, despite lack of representation of these two principal industries in the major employers list, it is possible that the MSA will experience slowing growth due to the predominance of these two industries, despite other mitigating factors.

Employment Expansion/Contractions

According to the Brownsville Economic Development Corporation, between January 2007 and March 2008, eight new companies have set up operations or expanded in Brownsville, resulting in the creation of over 2,000 new jobs in the region. Lowes, T-Mobile, Kohl's and Conn's are just some of the businesses moving into the area.

T-Mobile USA opened a customer service facility in Brownsville at the end of 2007. The Brownsville center will provide customer service to more than 26 million T-Mobile customers and will employ 750 people. The 78,000 square-foot facility opened in February 2008. In other call center activity, Teleperformance, the world's co-leader in contact center outsourcing, is renovating a 65,000 square-foot facility and plans to employ about 1,000 people in positions such as contact center agent, management and support staff. Other back-office operations that opened in 2007 and 2008 include ORION Marketing Group and American Customer Care, both of which are operating out of the University of Texas at Brownsville ITEC Campus.

Two new maquiladora parks have boosted the Brownsville industrial space from 10 a year ago to 12 today. La Ventana Industrial Park and Los Palmares Industrial Park both opened in 2007. The Shaw Group, a leading global provider of services to private and government clients, was the first to take a plot of land at La Ventana, where it broke ground on a 50-acre site for a 370,000-plus square foot facility. The Fortune 500 company plans to hire 1,200 employees and will provide manufacturing services for the oilrig industry.

Other major manufacturing companies adding to the Brownsville-Matamoros landscape include Kwalu, Fisher, Horton Company, Fisher Dynamics, Flanders, Organic Fuel, AMEREX, Paladin, Gyropanel and DURR. In all, Brownsville has five industrial parks and Matamoros has seven. Brownsville-Matamoros added 2,285 jobs in the manufacturing sector and 997,000 square feet in industrial space in 2007.

We attempted to contact the Harlingen Economic Development Corporation; however, our attempts have been unsuccessful as of the date of this report.

Employment Growth

The following table details historical employment and unemployment figures for the Brownsville-Harlingen MSA from 1990 to May 2008.

EMPLOYMENT & UNEMPLOYMENT TRENDS

	Brownsville-Harlingen, TX MSA		Brownsville-Harlingen, TX MSA		USA
Year	Total Employment	% Change	Unemployment Rate	% Change	Unemployment Rate
1990	90,534	-	12.9%	-	5.7%
1991	92,705	2.4%	15.2%	2.3%	6.9%
1992	96,974	4.6%	14.6%	-0.6%	7.6%
1993	102,253	5.4%	13.5%	-1.1%	7.0%
1994	106,551	4.2%	13.0%	-0.5%	6.2%
1995	106,945	0.4%	12.9%	-0.1%	5.7%
1996	108,575	1.5%	12.8%	-0.1%	5.5%
1997	111,134	2.4%	12.5%	-0.3%	5.0%
1998	111,120	0.0%	12.8%	0.3%	4.6%
1999	114,518	3.1%	10.0%	-2.8%	4.3%
2000	118,079	3.1%	7.0%	-3.0%	4.0%
2001	120,553	2.1%	7.9%	0.9%	4.8%
2002	126,521	5.0%	9.0%	1.1%	5.8%
2003	129,147	2.1%	9.5%	0.5%	6.0%
2004	130,223	0.8%	8.8%	-0.7%	5.6%
2005	130,398	0.1%	7.6%	-1.2%	5.2%
2006	134,081	2.8%	6.6%	-1.0%	4.7%
2007	134,474	0.3%	6.0%	-0.6%	4.7%
2008 YTD	134,939	-0.1%	5.9%	-0.7%	5.3%

Source: U.S. Bureau of Labor Statistics and Real Estate Center at Texas A&M University.

* 2008 data is through May

Since 1990, total employment in the Brownsville-Harlingen MSA has increased by approximately 44,405 jobs. The unemployment rate has decreased 13 out of the last 18 years in the MSA. This consistent growth is a strong indication of a sound economic base. However, 2008 exhibited the lowest employment growth in the past nine years and this is likely a result of the economic downturn. Overall employment growth is currently in a period of moderation. As shown in the previous table, the unemployment rate in the MSA has decreased significantly since the 1990s and is currently at its lowest point on record. However, the unemployment rate remains higher in the MSA than the nation.

Employment by Industry

The table on the following table illustrates employment by industry for Cameron County in 2007.

2007 EMPLOYMENT BY INDUSTRY		
	Cameron County	
Occupation	Number	Percent Employed
Agric/Forestry/Fishing/Hunting	1,880	1.45%
Mining	313	0.24%
Construction	10,939	8.43%
Manufacturing	10,171	7.84%
Wholesale Trade	4,015	3.09%
Retail Trade	15,385	11.86%
Transportation/Warehousing	5,515	4.25%
Utilities	1,059	0.82%
Information	1,382	1.07%
Finance/Insurance	3,623	2.79%
Real Estate/Rental/Leasing	3,254	2.51%
Prof/Scientific/Tech Services	3,792	2.92%
Mgmt of Companies/Enterprises	0	0.00%
Admin/Support/Waste Mgmt Srvcs	4,437	3.42%
Educational Services	19,834	15.29%
Health Care/Social Assistance	17,688	13.63%
Arts/Entertainment/Recreation	1,445	1.11%
Accommodation/Food Services	10,429	8.04%
Other Services (excl Publ Adm)	7,726	5.96%
Public Administration	6,847	5.28%
Total Employment	**129,734**	**100.0%**
Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008		

The top four employment sectors in Cameron County are the educational services, healthcare/social assistance, retail trade and construction sectors. Approximately 49.2 percent of people in Cameron County work in these four industries. The health care/social assistance, construction, retail trade and educational services sector all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing in the MSA. The lower paying incomes demonstrate the need for affordable housing in the MSA.

As previously mentioned, the large number of people employed in the retail trade and construction industries could negatively impact employment in the MSA, due to the current national economic downturn, which is affecting both of these sectors nationwide. However, as educational services and healthcare/social assistance are two historically stable sectors of the economy, the strong presence of these two industries should help mitigate losses in employment in other industries.

Colonias

One important component of the housing landscape in south Texas is the presence of the colonias. The Texas legislature has defined colonias as subdivisions lacking essential elements of infrastructure near the Mexico border. The United States Department of Housing and Urban Development (HUD) defines a colonia as an "unincorporated community located within 150 miles of the U.S.-Mexico border, with a population of less than 10,000 that is low and very low income, and which lacks safe, sanitary and sound housing, as well as services such as potable water, adequate sewage systems, drainage, streets and utilities." Data from the Federal Reserve Bank of Dallas Community Affairs Division indicates that Texas has the largest colonia population of any border states, with a 2007 estimated population of over 400,000 in nearly 2,300 colonias. According to data collected in 2006 by the Texas Legislature, Hidalgo County has the highest colonia population in the state, with 156,132 people in 934 colonias. Cameron County reports 178 colonias, with a population of 47,606. In an effort to improve the living situation of people in colonias, the Texas Legislature has authorized $175 million to fund roadway projects in the state's 23 border counties, which includes Hidalgo County and Cameron County. In addition, several state agencies, including TDHCA, have multiple initiatives in place to assist the residents of colonias.

Attempts by the government to collect demographic and socioeconomic data on colonias have been hampered by several issues, including language barriers and lack of resources to identify colonias. In the wake of the 2000 census, the Census Bureau completed ethnographic studies in four colonias in Texas, New Mexico and California to better identify the challenges in collecting data for this population. As a result, new guidelines defining Census Designated Places (CDPs) were issued in 2007 for use in the 2010 Census. New CDPs will be established for the 25 border counties in Texas, with much of the data regarding the location of colonias provided by the Texas State Attorney General's Office. It is anticipated that these efforts will allow the Census Bureau to survey colonias more accurately and, for the first time, provide detailed, searchable information regarding colonias populations.

Due to the limitations as discussed above, demographic data provided in this study may not fully reflect the estimated 203,000 people living in colonias in Hidalgo and Cameron Counties. Further, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand already accounted for through the analysis of Census data.

.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – BROWNSVILLE-HARLINGEN MSA AND THE NATION

The following section provides an analysis of the demographic characteristics within the Subject's market area. Data such as population, households and growth patterns are studied, to determine if the Brownsville-Harlingen MSA is an area of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the MSA from 1990 through 2012.

Total Population		
Year	Brownsville-Harlingen MSA	
	Number	Annual Change
1990	260,081	-
2000	335,155	2.89%
2007	395,777	2.49%
2012	440,338	2.25%
Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008		

The MSA expected to grow at a slower rate from 2007 to 2012, compared to 2000 to 2007. However, the growth rate of the MSA from 2007 to 2012 is still very strong, at 2.25 percent. The increase in the MSA growth rate is a positive indicator of the need for the affordable housing and likely why so many individuals are employed in the construction sector in the MSA.

Households

The following table is a summary of the total households in the MSA from 1990 to 2012.

Total Number of Households		
Year	Brownsville-Harlingen, MSA	
	Number	Annual Change
1990	73,260	-
2000	97,231	3.27%
2007	115,710	2.62%
2012	129,283	2.35%
Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008		

Similar to the rate of population growth, the household growth rate of the MSA in 2007 was strong, at 2.62 percent. Although the growth rate is projected to decrease from 2007 through 2012, the rate of growth is still significant for a developed area. As the number of households increases, there will be a larger pool of potential tenants, some of which will need affordable housing.

Average Household Size

The following table illustrates the average household size for the MSA from 2000 to 2012.

Average Household Size		
Year	Brownsville-Harlingen, MSA	
	Number	Annual Change
2000	3.40	-
2007	3.38	-0.08%
2012	3.37	-0.06%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the MSA is significantly larger than the national average size of 2.59 (not shown). The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the MSA.

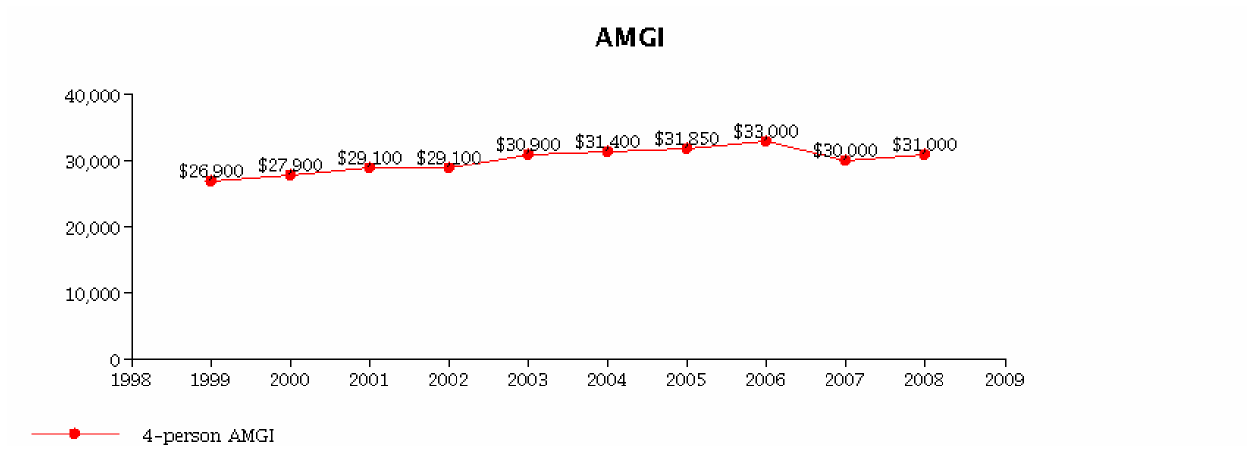
Median Household Income Levels

The table below illustrates Median Household Income in the MSA.

Median Household Income		
Year	Brownsville-Harlingen, MSA	
	Number	Annual Change
2000	26,151	-
2007	31,951	3.06%
2012	36,647	2.94%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the MSA is projected to grow at a slower rate from 2007 through 2012 than the previous seven years. The lower median income level indicates increasing need for affordable housing. It should be noted that for Section 42 LIHTC rent determination purposes, the area median income is used. The following chart illustrates the AMI level for a four-person household in the Brownsville-Harlingen MSA.



Source: Novogradac & Company, LLP, July 2008.

The AMI has increased from 1999 to 2008 by approximately 15.2 percent, or an average of 1.7 percent annually. The AMI has only had one decrease from 2006 to 2007 and an increase again in 2008. The system and underlying data sources that HUD uses to establish income limits have changed, by shifting to data from the American Community Survey (ACS), which has replaced previous census reports. In 2007, two-thirds of the nation experienced flat or decreased AMI levels based largely on this methodology change. The overall rise in AMI levels indicates a healthy market where low-income households may be priced out by more affluent households.

Household Income

The following tables illustrate median household income in the MSA.

Household Income Distribution - Brownsville-Harlingen MSA				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage
<$10,000	19,922	17.2%	18,316	14.2%
$10,000-$14,999	9,501	8.2%	10,395	8.0%
$15,000-$19,999	8,170	7.1%	8,371	6.5%
$20,000-$24,999	8,499	7.3%	7,682	5.9%
$25,000-$29,999	8,359	7.2%	9,161	7.1%
$30,000-$34,999	7,996	6.9%	7,705	6.0%
$35,000-$39,999	6,362	5.5%	8,376	6.5%
$40,000-$44,999	5,893	5.1%	5,998	4.6%
$45,000-$49,999	5,029	4.3%	4,950	3.8%
$50,000-$59,999	9,108	7.9%	11,048	8.5%
$60,000-$74,999	9,668	8.4%	11,896	9.2%
$75,000-$99,999	7,438	6.4%	11,067	8.6%
$100,000-$124,999	4,603	4.0%	5,735	4.4%
$125,000-$149,999	2,026	1.8%	3,478	2.7%
$150,000-$199,999	1,470	1.3%	2,439	1.9%
$200,000-$249,999	723	0.6%	1,162	0.9%
$250,000-$499,999	783	0.7%	1,142	0.9%
$500,000+	159	0.1%	361	0.3%
Total	**115,709**	**100%**	**129,282**	**100%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 32.5 percent of the population in the MSA earned below $20,000 in 2007 and approximately 28.7 percent of the population in the MSA is projected to earn below $20,000 in 2012. In both instances, a significant portion of the population is projected to earn less than $20,000. This data provides strong support for affordable rental housing in the MSA.

Tenure

The following table is a summary of the housing stock in the MSA.

TENURE PATTERNS MSA

Year	Owner-Occupied Units	Percentage Owner-Occupied	Renter-Occupied Units	Percentage Renter-Occupied
2000	65,848	67.72%	31,383	32.28%
2007	79,970	69.11%	35,740	30.89%
2012	89,195	68.99%	40,087	31.01%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Renter occupied units made up approximately 31 percent of the total occupied units in the MSA in 2007. The percentage of renters is slightly lower than the national average of approximately 33 percent (not shown). The low percentage of renters is likely due to the limited supply of rental housing in the MSA.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2007 for Cameron County, Texas. 2008 data was not available.

BUILDING PERMITS: Cameron County, TX 1997 to 2007

Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,601	40	257	1,898
1998	1,400	166	161	1,727
1999	1,058	229	150	1,437
2000	2,086	121	150	2,357
2001	1,595	142	102	1,839
2002	2,211	136	475	2,822
2003	3,200	81	163	3,444
2004	2,203	198	213	2,614
2005	1,981	197	116	2,294
2006	2,670	74	261	3,005
2007	1,800	131	138	2,069
Total	**21,805**	**1,515**	**2,186**	**25,506**
Average	**1,982**	**138**	**199**	**2,319**

There were 2,186 "5+ units" building permits issued in Cameron County from 1997 to 2007. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2007, at 85 percent, while "5+ units" building permits constitute approximately 8.6 percent of all permits issued from 1997 through 2007. The small percentage of multifamily permits issued indicates demand for multi-family housing of all kinds.

Conclusion

The MSA has demonstrated that it is an area of growth in terms of population, household, and income levels. The population and the number of households are both expected to increase from 2007 to 2012 at rates near or above 3.5 percent annually. The MSA has a larger average household size relative to the national average of 2.59, and a significant portion of its households earning below the AMI; furthermore, approximately 32.5 percent of the population in the MSA earned below $20,000 in 2007 and approximately 28.7 percent of the population in the MSA is projected to earn below $20,000 in 2012. These factors demonstrate a need for affordable housing of all kinds.

1. WEST CAMERON COUNTY SUBMARKET ANALYSIS

WEST CAMERON COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the West Cameron County Submarket, which is bounded to the north, west and south by the Cameron County line and to the east by FM 1420, FM 106, Cemetery Road/Coston Road, US Highway 77 and FM 732. This area was defined based on the client's specifications. The following map illustrates the boundaries of the Submarket as defined above.

West Cameron County Submarket Map

Local Government

The major cities in the West Cameron County submarket include Harlingen, San Benito and La Feria.

Harlingen is located entirely in Cameron County and operates under a mayor-commission form of government with five elected city commissioners. The 2000 census reported a total population of 57,564. Harlingen has a total area of 34.3 square miles.

San Benito is located in Cameron County and operates under a mayor-city commission form of government with four elected city commissioners. The population was 25,005 at the 2000 census. San Benito has a total area of 11.2 square miles.

La Feria is a city in Cameron County. In November 1989, the city of La Feria adopted a Home-Rule charter. The city operates under a mayor-commission form of government with five elected city commissioners. The population was 6,115 at the 2000 census. La Feria has a total area of 2.0 square miles.

Employment by Industry

The table on the following table illustrates employment by industry for the West Cameron County Submarket and Brownsville-Harlingen MSA in 2007.

2007 EMPLOYMENT BY INDUSTRY				
	West Cameron County Submarket		Brownsville-Harlingen, TX MSA	
Occupation	Number	Percent Employed	Number Employed	Percent Employed

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the West Cameron County Submarket are the health care/social assistance, educational services, retail trade and construction sectors. Approximately 50.3 percent of people in Cameron County work in these four industries. The West Cameron County Submarket has a similar number of persons employed in the educational services, retail trade and construction sectors and a larger number of people employed in the healthcare/social assistance sector, relative to the MSA. Although, educational services is typically a stable sector of the economy, industries such as retail trade and construction, are particularly susceptible to fluctuations in the health of the economy. Additionally, the West Cameron County Submarket and the MSA benefit from the presence of another historically stable industry, healthcare/social assistance, which is one of the top four employment sectors. The large number of people employed in the retail trade and construction industries could negatively impact employment in the West Cameron County Submarket, due to the current national economic downturn. However, the strong presence of the healthcare/social assistance and educational services industries should help bolster the economic stability of the West Cameron County Region.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing in the Submarket.

Commute Patterns in the West Cameron County Submarket

The table below summarizes commute times for the West Cameron County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	1,533
5-9 min	6,124
10-14 min	9,503
15-19 min	8,735
20-24 min	5,349
25-29 min	1,439
30-34 min	4,348
35-39 min	506
40-44 min	841
45-59 min	1,606
60-89 min	837
90+ min	676
Average Travel Time	19.8 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The West Cameron County Submarket has the shortest average commute time of the four identified Submarkets. The largest share of workers reports a daily travel time to work of 10 to 14 minutes. From this data, it appears that the Submarket's major employers, located in Harlingen, are located within 35 minutes of the majority of the working population.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the West Cameron County Submarket and Brownsville-Harlingen, TX MSA. Data such as population, households and growth patterns are studied to determine if the Brownsville-Harlingen MSA and the West Cameron County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the West Cameron County Submarket and Brownsville-Harlingen, TX MSA from 1990 through 2012.

Total Population

Year	West Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	105,412	-	260,120	-
2000	129,182	2.25%	335,227	2.89%
2007	146,617	1.86%	395,867	2.50%
2012	160,914	1.95%	440,440	2.25%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Growth in the Submarket has been slightly slower than growth in the MSA in all years of analysis. However, both the Submarket and the MSA are showing strong growth from 2007 through 2012, although at a slower rate than from 2000 through 2007. The strong growth in the Submarket and the MSA is a positive indicator of the need for the affordable housing and likely why so many individuals are employed in the construction sector in the Submarket.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 2007. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group					
West Cameron County Submarket					
Age Cohort	**1990**	**2000**	**2007**	**Projected Mkt**	**2012**

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	West Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	32,151	-	73,278	-
2000	40,315	2.54%	97,267	3.27%
2007	46,385	2.08%	115,756	2.62%
2012	51,241	2.09%	129,335	2.35%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been strong through 2007. Household growth in the MSA is expected to slow slightly from 2007 through 2012, while household growth in the Submarket is expected to remain consistent. As the number of households increases, there will be a larger pool of potential tenants, some of which will need affordable housing.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	West Cameron County		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.16	-	3.40	-
2007	3.12	-0.17%	3.38	-0.08%
2012	3.10	-0.13%	3.37	-0.06%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly smaller than the MSA, but both are larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket, but especially in the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	West Cameron County		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	28,127	-	26,156	-
2007	34,454	3.10%	31,956	3.06%
2012	39,294	2.81%	36,654	2.94%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 7.3 percent higher than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a slower rate from 2007 through 2012 than the previous seven years, as in the MSA. The lower median income level indicates increasing need for affordable housing.

Household Income

The following tables illustrate median household income in both the Submarket and MSA.

Household Income Distribution - West Cameron County Submarket

Total	**115,756**	**100%**	**129,335**	**100%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 29.2 percent of the population in the Submarket and 32.5 percent of the population in the MSA earned below $20,000 in 2007. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 25.6 percent and 28.7 percent, respectively, but in both instances, a significant portion of the population is projected to earn less than $20,000. This data provides strong support for affordable rental housing in the Submarket and MSA.

Senior Demographic Trends

Among the demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 65 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report the average age of residents to be over 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	West Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	16,180	-	35,359	-
2007	18,657	2.1%	42,259	2.7%
2012	21,877	3.5%	50,724	4.0%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

As the table illustrates, similar to the general population trends, the senior population in both the Submarket and the MSA increased between 2000 and 2007. Senior population growth in the West Cameron County Submarket is expected to grow at a slightly slower rate than the MSA from 2007 through 2012.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the PMA from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	West Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	16,180	-	35,359	-
2007	18,657	2.1%	42,259	2.7%
2012	21,877	3.5%	50,724	4.0%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth is projected to increase through 2012 with growth rate also increasing through 2012. In contrast to general household growth rates, senior household growth rates are expected to increase from 2007 through 2012. The strong projected growth of senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME

Year	Brownsville-Harlingen, TX MSA		West Cameron County Submarket		USA	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
			All Ages			
2007	$31,956	-	$34,454	-	$53,154	-
2012	$36,654	2.94%	$39,294	2.81%	$62,503	3.52%
			Age 55+			
2007	$28,614	-	$31,530	-	$32,710	-
2012	$34,145	3.87%	$36,835	3.37%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in all three areas of analysis are below those of all households. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The Submarket will experience slightly weaker median household income growth for all households and senior households when compared to the MSA, and the nation.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - West Cameron County Submarket (Age 55+)				
Income Cohort	**2007**		**2012**

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. Among these locations, the MSA has the largest percentage of seniors earning less than $35,000 annually. Approximately 56 percent of those 55 and older in the MSA are earning under $35,000 per year. This is attributable primarily to the MSA's high percentage of senior households earning below $15,000 annually. The Submarket features a similar number of senior households in these income brackets when compared to the MSA. By 2012, all areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 46.6 and 48.5 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. Furthermore, the majority of senior households within the Submarket will be earning less than $25,000, which is below the current AMI. This indicates that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket for 2000.

Tenure Patterns - Elderly Population (Age 55+)								
	West Cameron County Submarket				Brownsville-Harlingen, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	13,601	84.1%	2,579	15.9%	28,551	80.7%	6,808	19.3%
2007	15,683	84.1%	2,974	15.9%	34,122	80.7%	8,137	19.3%
2012	18,390	84.1%	3,487	15.9%	40,958	80.7%	9,766	19.3%

Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008

As the above table illustrates, the senior housing market is dominated by owner-occupied units. The Submarket has a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above) and the MSA. The small percentage of renter-occupied senior households is not unusual in rural submarkets, where owner-occupied housing is predominant among a reduced population.

Senior Demographic Conclusion

Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Although the median senior household income for the MSA is projected to increase from 2007 to 2012, growth in the national and Submarket's median senior household income is projected to outpace growth in the Submarket. Both the MSA and Submarket have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. Approximately 54 percent of those 55 and older in the Submarket are earning under $35,000 per year. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The Submarket features similar numbers of senior households in these income brackets when compared to the MSA and national averages. The national average of senior households earning below $50,000 annually is 64 percent.

LOCAL MARKET INFORMATION

West Cameron County Submarket

The following sections will provide an analysis of the demographic characteristics within the Submarket.

Healthcare

The West Cameron County Submarket offers several hospitals and medical facilities, the majority of which are located in the city of Harlingen. The Harlingen Medical Center (HMC) is the advanced general acute care hospital in Harlingen. HMC specializes in advanced cardiovascular care, orthopedics, neurology, obstetrics and gynecology. The hospital opened in 2003 and provides comprehensive medical care for the majority of the Rio Grande Valley. Valley Baptist Medical Center (VBMC) is a 600-bed hospital that serves as the regional trauma center.

Transportation

Valley International Airport, located in Harlingen, is the major airport for the West Cameron County Submarket. Valley International Airport has a service area that encompasses the lower Rio Grande Valley and northern Mexico, serving more than two million people on both sides of the US-Mexico border. It is the largest international airport in the region and handles approximately 45 percent of all passenger traffic in the Rio Grande Valley.

Access to West Cameron County Submarket can be accomplished via US Highways 77 and 83. US Highway 77 connects to Interstate 37 at Corpus Christi and U.S. Highway 83 connects with Interstate 35 at Laredo.

The Free Trade Bridge at Los Indios, located 10 miles south of Harlingen in the West Cameron County Submarket, is said to be the most time-efficient border crossing station. The international bridge offers a full U.S. Customs inspection facility and accesses a four-lane highway in Northern Mexico.

The Port of Harlingen is located four miles east of Harlingen in the West Cameron County Submarket.

Education

The West Cameron County Submarket is served by the Harlingen Consolidated School District and the South Texas Independent School District. The Harlingen Consolidated School District includes two high schools, five middle schools, and 17 elementary schools. The South Texas Independent School District operates magnet schools that draw students from Cameron, Hidalgo and Willacy Counties. The South Texas Academy of Medical Technology is the only South Texas ISD school in the West Cameron County submarket. Harlingen has a branch of the Texas State Technical College, a two-year technical school offering Associate of Applied Science degrees.

Public Transportation

Rio Metro Harlingen, operated by the Lower Rio Grande Valley Development Council, offers public transportation to the West Cameron County Submarket. Rio Metro Harlingen offers flexible routes and passengers may request curbside pickups by calling a day in advance to make reservations. Rio Metro Harlingen offers retail and medical oriented routes.

Employment Centers

The majority of employment centers in the West Cameron County Submarket are located in Harlingen. The largest employers in the City of Harlingen include the following:

Harlingen Top Ten Employers

Rank	Company	Industry	Employees
1	Harlingen CISD	Education	2,582
2	Valley Baptist Medical Center	Healthcare	1,962
3	Vicki Roy Home Health	Healthcare	978
4	Advanced Call Center Technologies	Call center	865
5	Dish Network	Call center	842
6	City of Harlingen	Government	555
7	Texas State Technical College	Education	534
8	Harlingen Medical Center	Healthcare	463
9	West Corporation	Call Center	425
10	HEB	Grocery/Retail	363

HOUSING SUPPLY ANALYSIS

WEST CAMERON COUNTY SUBMARKET HOUSING SUPPLY ANALYSIS

Age of the Housing Stock

The following table presents the age of the housing stock in the West Cameron County Submarket.

AGE OF HOUSING STOCK IN WEST CAMERON COUNTY SUBMARKET		
Years	**Number of Units**	**Percent of Housing Stock**
1999-3/2000	2,228	4.45%
1995-1998	5,485	10.96%
1990-1994	3,980	7.95%
1980-1989	11,997	23.98%
1970-1979	9,608	19.20%
1960-1969	5,419	10.83%
1950-1959	5,144	10.28%
1940-1949	3,159	6.31%
1939 and Before	3,012	6.02%
Total	**50,032**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (66.54 percent) in the West Cameron County Submarket was constructed from 1979 through 1989. The West Cameron County Submarket consists primarily of developed land with moderate to extensive single-family housing and multi-family housing. Based upon observations in the field single-family housing in the Submarket typically ranges from fair to good condition and is less than five to 40 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2007 for Cameron County, Texas. Data was not available for 2008. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Cameron County, TX - 1997 to 2007				
Year	**Single-family and Duplex**	**Three and Four-Family**	**Five or More Family**	**Total Units**
1997	1,601	40	257	1,898
1998	1,400	166	161	1,727
1999	1,058	229	150	1,437
2000	2,086	121	150	2,357
2001	1,595	142	102	1,839
2002	2,211	136	475	2,822
2003	3,200	81	163	3,444
2004	2,203	198	213	2,614
2005	1,981	197	116	2,294
2006	2,670	74	261	3,005
2007	1,800	131	138	2,069
Total	**21,805**	**1,515**	**2,186**	**25,506**
Average	**1,982**	**138**	**199**	**2,319**

There were 2,186 “5+ units” building permits issued in Cameron County from 1997 to 2007. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2007, at 85 percent, while “5+ units” building permits constitute approximately 8.6 percent of all permits issued from 1997 through 2007. The small percentage of multifamily permits issued indicates there may be demand for multifamily housing of all kinds.

Interviews

Cameron County Housing Authority

We spoke with Guadalupe Garcia with the Cameron County Housing Authority. According to Ms. Garcia, the Housing Authority is allocated 1,080 Housing Choice Vouchers and 1,006 vouchers are currently in use. Ms. Garcia estimated that there were 878 households on the waiting list as of July 2008, and the waiting list is currently open. We attempted to contact Yolanda Santa Maria with the Public Housing Office of the Cameron County Housing Authority, but our calls have been unreturned as of the date of this report. The current payment standards for one-, two-, three-, and four-bedroom units are listed below.

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

Housing Authority of the City of Harlingen

We attempted to contact the Housing Authority of the City of Harlingen to gather information pertaining to the Housing Choice Voucher and Public Housing Programs; however, as of the date of this report, our attempts have been unsuccessful.

LIHTC Family Supply

We attempted to identify all existing, proposed, and under construction LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers.

Novogradac identified 10 family LIHTC developments in the West Cameron County Submarket. Of the 10 LIHTC developments, four properties constructed between 1996 and 2003, with a total of 500 units, were able to provide current property and market data. The reasons for exclusion of the remaining properties can be found on the excluded properties list on the following pages. Based on the lack of available data, we did not complete a LIHTC senior market analysis. A map of the surveyed properties can be found below:

SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Canal Place Apartments	San Benito	LIHTC – Family
2	Rosemont of Highland Gardens	Harlingen	LIHTC/Market – Family
3	Sundance Apartments	Harlingen	LIHTC/Market – Family
4	Windstar Apartments	Harlingen	LIHTC – Family

The following pictures identify the surveyed LIHTC family properties in the Submarket:

Canal Place Apartments

Rosemont of Highland Gardens

Sundance Apartments

Windstar Apartments

Excluded Properties

Novogradac has excluded six LIHTC developments from our analysis. The following table lists the properties in the Submarket that were excluded from this analysis and the basis for their exclusion. It should be noted that the majority of the LIHTC properties listed below have less than 12 units, were constructed/allocated from 1987 to 1992 and may be out of the 15 year compliance period and do not offer on-site management.

Name	Location	Type	Reason for Exclusion
Second North Corporation	Harlingen	LIHTC – Family	Could not contact
Second Adams Corporation	Harlingen	LIHTC – Family	Could not contact
Devco Arroyo Estates	San Benito	LIHTC – Family	Could not contact
Alcott & Alcott	Harlingen	LIHTC – Family	Could not contact
Rangerville Park Subdivision	Rangerville	LIHTC – Family	Could not contact
La Alameda	Harlingen	LIHTC – Family	Could not contact
Santa Rosa Village	Santa Rosa	LIHTC – Family	Could not contact

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one property in the West Cameron County Submarket, which has received an allocation in the last three years. Santa Rosa Village, located in Santa Rosa, received an allocation in 2005 and was constructed in 2006. Despite numerous attempts to contact the property manager both in person and over the phone, our calls have not been returned as of the date of this report. Santa Rosa Village received a LIHTC allocation, but operates as a Section 8 development for seniors. Santa Rosa Village also received a small allocation of funding in early 2008; however, further information regarding this lesser allocation was unavailable.

We attempted to contact the Harlingen Planning Department numerous times to obtain information on multifamily developments that are currently under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful. However, based on our physical site inspection of the Submarket, there do not appear to be any multifamily developments under construction or in the planning stages at this time.

Unit Mix

The following table illustrates the unit mix in the family LIHTC rental property market. It should be noted that Sundance Apartments was unable to provide a unit mix and has been excluded from this analysis.

Unit Mix - LIHTC Family

Unit Type	Total Units	Percent
1 BR	N/A	N/A
2 BR	105	32.4%
3 BR	147	45.4%
4 BR	72	22.2%
Total	**324**	**100%**

The majority of the LIHTC units in the Submarket are three-bedroom units, followed by two-bedroom units. Sundance Apartments is the only property in the Submarket to offer one-bedroom units. Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.12 and is projected to decrease slightly by 2012 to 3.10. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 33 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family LIHTC rental property market.

Unit Size - LIHTC Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	575	575	575
2 BR	834	990	929
3 BR	1,016	1,211	1,132
4 BR	1,263	1,292	1,278

The surveyed one-, two, three- and four-bedroom LIHTC units have an average size of 575, 929, 1,132, and 1,278 square feet, respectively. All of the developments were constructed from 1996 to 2003 and unit sizes are representative of the newly constructed properties in the West Cameron County Submarket.

Community and In-Unit Amenities

Premium Amenities				
Other Amenities				
Other	n/a	n/a	n/a	n/a

The existing LIHTC multifamily properties in the West Cameron County Submarket offer a moderate amount of in-unit and community amenities. Most of the surveyed LIHTC comparables offer unit amenities that include central air, ovens, dishwashers and refrigerators. Washer/dryer connections are common in the family LIHTC market. Most of the surveyed LIHTC comparables offer community amenities including a clubhouse, a central laundry facility, playground, and swimming pool. Security features such as perimeter fencing and limited access are prevalent in the Submarket. No premium amenities or services are offered by the surveyed LIHTC properties in the Submarket.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties. It should be noted that Sundance Apartments was unable to provide vacancy by unit type or a complete unit mix and has been excluded from this analysis.

Weighted Vacancy - LIHTC Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	N/A	N/A	N/A
2 BR	105	3	2.9%
3 BR	147	1	0.7%
4 BR	72	1	1.4%
Total	**324**	**5**	**1.5%**

Of the surveyed unit types, the three-bedroom units have the lowest weighted vacancy in the Submarket. The vacant units found at the surveyed LIHTC family properties are comprised entirely of units at the 60 percent of AMI set-aside and the market rate units, which may indicate a difficulty in finding income-qualified households.

Absorption

One of the four surveyed LIHTC properties was able to provide absorption information. Rosemont of Highland Gardens opened in 2003 and reported an absorption rate of 10.2 units per month, for an absorption period of approximately 17 months.

Waiting Lists

The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – LIHTC Family		
Property Name	**Number of Units**	**Waiting List**
Canal Place Apartments	72	20 HH for 2 and 3 BR units
Rosemont of Highland Gardens	172	5 HH for 2 BR LIHTC units, 5 HH for 3 BR units @ 50%, 2 HH for 4 BR units @ 50 %
Sundance Apartments	176	None
Windstar Apartments	80	90 HH for 2 BR units and 80 HH for 3 BR units

Three of the four surveyed family LIHTC properties currently maintain waiting lists. Waiting lists range in size from two households to 90 households for two-, three- and four-bedroom units.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – LIHTC Family		
Property Name	**Number of Units**	**Vacancy Rate**
Canal Place Apartments	72	1.4%
Rosemont of Highland Gardens	172	2.3%
Sundance Apartments	176	2.3%
Windstar Apartments	80	0.0%
AVERAGE	**500**	**1.5%**

All of the surveyed LIHTC properties were constructed between 1996 and 2003 and all of the surveyed LIHTC properties offer some units at 50 and/or 60 percent of AMI. The overall average vacancy rate appears slightly lower than is typical considering the age, condition, and unit mix of the surveyed LIHTC properties.

Concessions

None of the LIHTC family properties in the market are offering concessions. Concessions do not appear to be prevalent in the family LIHTC market.

Turnover

The following table summarizes turnover rates at the surveyed properties.

Turnover – LIHTC Family		
Property Name	**Number of Units**	**Turnover**
Canal Place Apartments	72	17%
Rosemont of Highland Gardens	172	30%
Sundance Apartments	176	30%
Windstar Apartments	80	20%
AVERAGE	**500**	**24.25%**

The range of turnover rates at the surveyed family LIHTC properties in the Submarket appears to be well within range of typical turnover rates for multifamily properties.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Rosemont of Highland Gardens is the only LIHTC property in the market achieving the LIHTC maximum allowable rents. The surveyed family LIHTC properties were constructed from 1996 through 2003 and all offer some units at 50 and/or 60 percent of AMI. The overall average vacancy rate at the LIHTC properties is approximately 1.5 percent. Additionally, the vacant units found at the surveyed LIHTC family properties are comprised entirely of units at the 60 percent of AMI set-aside and the market rate units. Three of the four surveyed family LIHTC properties currently maintain waiting lists, specifically for two- and three-bedroom units. Market data from the surveyed family LIHTC developments suggests a demand for LIHTC units at the lower AMI levels and potentially insufficient income qualified demand for units at 60 percent of AMI.

LIHTC Supply Conclusion

Novogradac identified 10 LIHTC developments in the West Cameron County Submarket. Of the 10 LIHTC developments, four properties constructed between 1996 and 2003, with a total of 500 units, were able to provide current property and market data.

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one property in the West Cameron County Submarket, which has received an allocation in the last three years. Santa Rosa Village, located in Santa Rosa, received an allocation in 2005 and was constructed in 2006. Despite numerous attempts to contact the property manager both in person and over the phone, our calls have not been returned as of the date of this report. Santa Rosa Village received a LIHTC allocation, but operates as a Section 8 development for seniors. Santa Rosa Village also received a small allocation of funding in early 2008; however, further information regarding this lesser allocation was unavailable.

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.12 and is projected to decrease slightly by 2012 to 3.10. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 33 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate demand for larger bedroom types.

The existing LIHTC multi-family properties in the West Cameron County Submarket offer a moderate amount of in-unit and community amenities. Most of the surveyed LIHTC comparables offer unit amenities that include central air, ovens, dishwashers and refrigerators. Washer/dryer connections are common in the family LIHTC market. Most of the surveyed LIHTC comparables offer community amenities including a clubhouse, a central laundry facility, playground, and swimming pool. Security features such as perimeter fencing and limited access are prevalent in the Submarket. No premium amenities or services are offered by the surveyed LIHTC properties in the Submarket.

None of surveyed comparables is offering concessions and three of the four surveyed family LIHTC properties currently maintain waiting lists. Waiting lists range in size from two households to 90 households for two-, three- and four-bedroom units. One of the four surveyed LIHTC properties was able to provide absorption information. Rosemont of Highland Gardens opened in 2003 and reported an absorption rate of 10.2 units per month, for an absorption period of approximately 17 months. The range of turnover rates at the surveyed family LIHTC properties in the Submarket appears to be well within range of typical turnover rates for multifamily properties.

Rosemont of Highland Gardens is the only LIHTC property in the market achieving the LIHTC maximum allowable rents. The surveyed family LIHTC properties were constructed from 1996 through 2003 and all offer some units at 50 and/or 60 percent of AMI. The overall average vacancy rate at the LIHTC properties is approximately 1.5 percent. Additionally, the vacant units found at the surveyed LIHTC family properties are comprised entirely of units at the 60 percent of AMI set-aside and the market rate units. Three of the four surveyed family LIHTC properties currently maintain waiting lists, specifically for two- and three-bedroom units. Market data from the surveyed family LIHTC developments suggests a demand for LIHTC units at the lower AMI levels and potentially insufficient income qualified demand for units at 60 percent of AMI.

LIHTC SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers. There is one existing senior LIHTC development located in the West Cameron County Submarket, Las Palmas. Las Palmas is a senior targeted affordable development located in La Feria, Texas. This development consists of 36 single-story one- and two bedroom units and was allocated in 1998. This development also operates under a USDA Rural Rental Assistance subsidy. Our attempts to contact this property both in person and over the phone were unsuccessful as of the date of this report. There are no other existing LIHTC developments in this Submarket. Based on the lack of available data, we did not complete a LIHTC senior market analysis.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there is one property in the West Cameron County Submarket, which has received an allocation in the last three years. Santa Rosa Village, located in Santa Rosa, received an allocation in 2005 and was constructed in 2006. Despite numerous attempts to contact the property manager both in person and over the phone, our calls have not been returned as of the date of this report. Santa Rosa Village received a LIHTC allocation, but operates as a Section 8 development for seniors. Santa Rosa Village also received a small allocation of funding in early 2008; however, further information regarding this lesser allocation was unavailable.

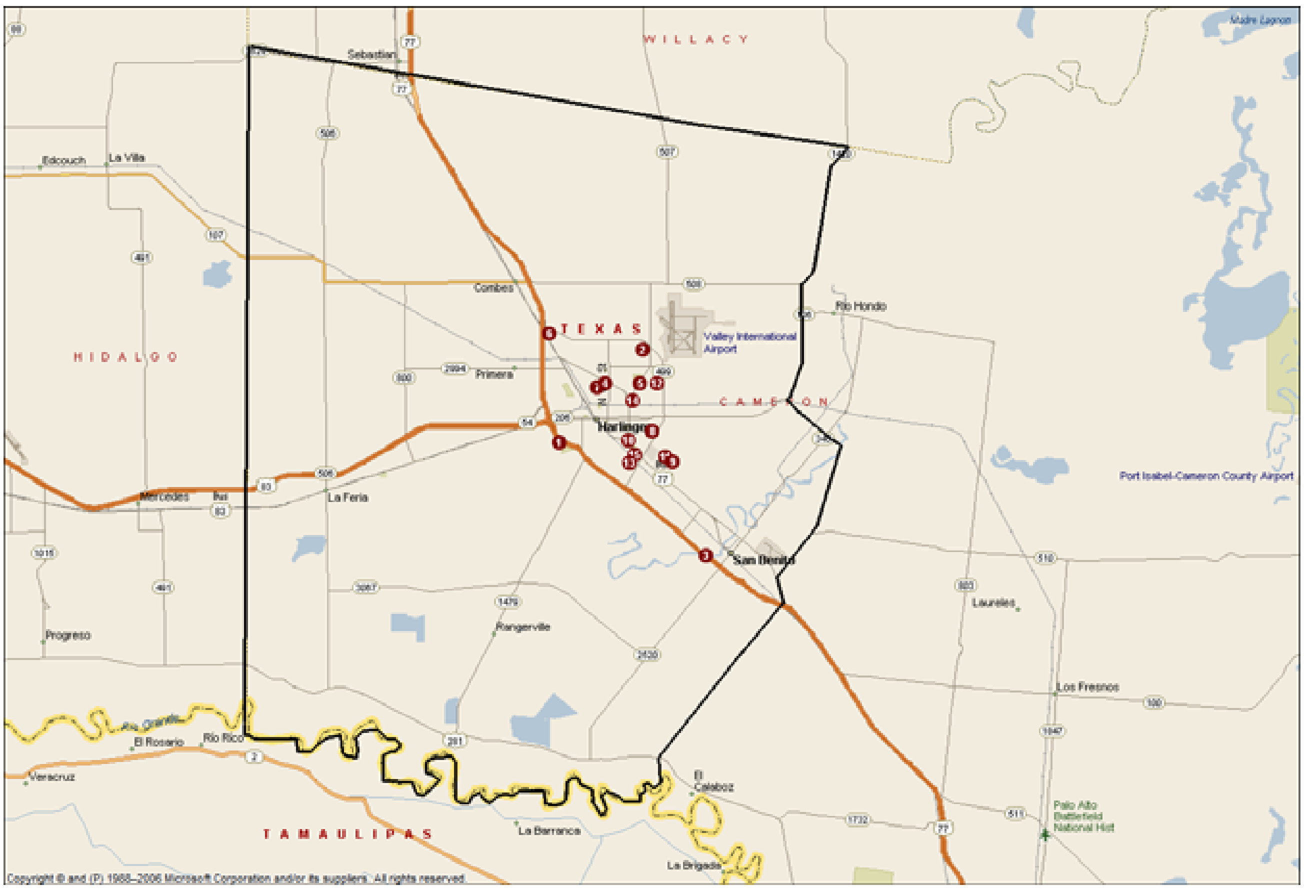
We attempted to contact the Harlingen Planning Department numerous times to obtain information on multifamily developments that are currently under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful. However, based on our physical site inspection of the Submarket, there do not appear to be any multifamily developments under construction or in the planning stages at this time.

MARKET RATE FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials.

Novogradac was able to identify 26 market rate multifamily developments in the West Cameron County Submarket, but we were only able to survey 18 of the properties. Based on the lack of available data, we did not complete a market rate senior market analysis.

The following map illustrates the location of the surveyed market rate family comparables in the Submarket.



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Buckingham Manor	Harlingen	Market – Family
2	Casa Granada Apartments	Harlingen	Market – Family

Excluded Properties

The following table illustrates excluded market rate properties in the Submarket. We have only excluded properties that we were unable to contact either in person or over the phone or properties that are fully furnished and/or corporate apartments.

Name	Location	Type	Reason for Exclusion
Star Village Apartments	Harlingen	Market – Family	Has not been built
La Posada Apartments	Harlingen	Market – Family	Could not contact
La Casita Apartments	Harlingen	Market – Family	Could not contact
One Hundred Seventy Nine Weekly	Harlingen	Market – Family	Could not contact
Sunrise Villa	Harlingen	Market – Family	Could not contact
Granada Apartments	Harlingen	Market – Family	Could not contact
Town & Country Apartments	Harlingen	Market – Family	Could not contact
Denim Park Apartments	Harlingen	Market – Family	Could not contact

Proposed Construction

We attempted to contact the Harlingen Planning Department numerous times to obtain information on multifamily developments that are currently under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful. However, based on our physical site inspection of the Submarket, there do not appear to be any multifamily developments under construction or in the planning stages at this time.

Unit Mix

The following table illustrates the unit mix in the family market rate rental property market. It should be noted that Cornerstone Apartments, Palm Terrace Apartments, Parkwood Townhomes, St. James Apartments and Timber Apartments were unable to provide unit mixes and have been excluded from this analysis.

Unit Mix - Market Family		
Unit Type	**Total Units**	**Percent**
1 BR	542	42.4%
1.5 BR	26	2.0%
2 BR	654	51.2%
3 BR	55	4.3%
Total	**1,277**	**100%**

The majority of the market rate units in the Submarket are two-bedroom units, followed by one-bedroom units and three-bedroom units. We were unable to identify any four bedroom market rate units. Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.12 and is projected to decrease slightly by 2012 to 3.10. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 34 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Market data, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family market rate rental property market.

Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
Studio	545	545	545
1 BR	500	1,015	698
1.5 BR	760	1,005	846
2 BR	655	1,250	990
3 BR	1,065	1,517	1,250

The surveyed market rate properties in the Submarket had a studio-bedroom average unit size of 545 square feet, a one-bedroom average unit size of 698 square feet, a 1.5-bedroom average unit size of 846 square feet, a two-bedroom average unit size of 990 square feet and a three-bedroom average unit size of 1,250 square feet.

The surveyed market rate properties in the West Cameron County Submarket offer a moderate amount of in-unit and community amenities. Washer/dryer hookups and/or appliances are not common in the market. Six of the 18 surveyed properties offer security features of some kind.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type for the surveyed properties. It should be noted that Cornerstone Apartments, Palm Terrace Apartments, Parkwood Townhomes, St. James Apartments and Timber Apartments were unable to provide vacancy by unit type and have been excluded from this analysis.

Weighted Vacancy - Market Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	542	29	5.4%
1.5 BR	26	0	0.0%
2 BR	654	60	9.2%
3 BR	55	4	7.3%
Total	**1,277**	**93**	**7.3%**

It should also be noted that Somerset Apartments is reporting the highest vacancy in the market. According to the property manager, new management took over earlier in the year and, as a result, there have been numerous evictions due to lease violations and failure to pay rent.

Absorption

The surveyed comparables were built from 1962 to 2003. None of the surveyed comparables were able to provide absorption information.

Waiting List

Four of the market rate family properties in the market maintain a waiting list. Cornerstone Apartments maintains a waiting list for the one-bedroom units. The property manager was unable to estimate the number of households on the waiting list. Heather Apartments maintains a waiting list of eight households for all units. St. James Apartments maintains a waiting list of two households for the two-bedroom units with 1.5 and two baths and for the three-bedroom units. Timber Apartments maintains a waiting list for all unit types. The property manager was unable to estimate the number of households on the waiting list. Of the four properties with waiting lists, property managers at Cornerstone Apartments, St. James Apartments and Timber Apartments mentioned displaced residents from Hurricane Dolly were the main reason for the waiting lists. Waiting lists at market rate properties do not appear to be common in the Submarket.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Property Name	Rent Structure	Total Units	Vacant Units	Vacancy Rate
Buckingham Manor	Market	68	2	2.9%
Casa Granada Apartments	Market	108	17	15.7%
Corbie Apartments	Market	10	0	0.0%
Cornerstone Apartments	Market	168	2	1.2%
Heather Apartments	Market	70	0	0.0%
Madrid Apartments	Market	32	2	6.2%
Maryland Apartments	Market	90	11	12.2%
Oak Terrace Apartments	Market	240	0	0.0%
Oakridge Apartments	Market	16	0	0.0%
Palm Terrace Apartments	Market	124	4	3.2%
Parkwood Townhomes	Market	50	4	8.0%
Reata Apartments	Market	144	2	1.4%
Riverview Apartments	Market	72	9	12.5%
Sierra Apartments	Market	208	1	0.5%
Skyline on Grimes Apartments	Market	120	5	4.2%
Somerset Apartments	Market	99	44	44.4%
St. James Apartments	Market	120	2	1.7%
Timber Apartments	Market	61	1	1.6%
Total		**1,732**	**104**	**6.0%**

Somerset Apartments is reporting the highest vacancy rate in the market at 44.4 percent. According to the property manager, new management took over earlier in the year and, as a result, there have been numerous evictions due to lease violations and failure to pay rent. If Somerset Apartments is removed from the analysis, the average vacancy rate in the market is 4.2 percent, which is considered good.

Concessions

Three of the market rate comparables currently offer concessions. Reata Apartments is offering $250 off the first month’s rent for all units. Skyline on Grimes Apartments is offering $100 off the first month’s rent for two-bedroom units. Somerset Apartments is offering reduced rents on all unit types. Somerset Apartments currently has the highest vacancy rate in the market and the property manager stated that concessions are being offered to increase occupancy at the property.

Turnover

The following table illustrates turnover information in the market.

Property Name	Rent Structure	Turnover
Buckingham Manor	Market	35%
Casa Granada Apartments	Market	N/A
Corbie Apartments	Market	10%
Cornerstone Apartments	Market	36%
Heather Apartments	Market	34%
Madrid Apartments	Market	37%
Maryland Apartments	Market	26%
Oak Terrace Apartments	Market	20%
Oakridge Apartments	Market	10%
Palm Terrace Apartments	Market	25%
Parkwood Townhomes	Market	N/A
Reata Apartments	Market	25%
Riverview Apartments	Market	N/A
Sierra Apartments	Market	17%
Skyline on Grimes Apartments	Market	40%
Somerset Apartments	Market	N/A
St. James Apartments	Market	30%
Timber Apartments	Market	15%
Total		**25.7%**

Annual turnover rates reported range from 10 percent to 40 percent, with an average of 25.7 percent.

Rent and Square Footage Ranking

Rent and Square Footage Ranking

2008 LIHTC Maximum Allowable Gross Rent Limits							
Bedrooms	30%	40%	50%	60%	80%	100%	FMR
Efficiency	$228	$305	$381	$457	$610	$762	$423
1 Bedroom	$245	$327	$408	$490	$698	$872	$488
2 Bedroom	$294	$392	$490	$588	$784	$980	$559
3 Bedroom	$340	$453	$566	$680	$872	$1,090	$691
4 Bedroom	$379	$506	$632	$759	$942	$1,177	$781
5 Bedroom	$418	$558	$698	$837	$1,012	$1,265	-

The studio-bedroom market rate rent for the surveyed comparables is $360. The one-bedroom market rate rents for the surveyed comparables range from $300 to $700, with an average rent of $456. The one-and-a-half-bedroom market rate rents for the surveyed comparables range from $399 to $881, with an average rent of $640. The two-bedroom market rate rents for the surveyed comparables range from $411 to $900, with an average rent of $554. The three-bedroom market rate rents for the surveyed comparables range from $502 to $780, with an average rent of $655. The studio-bedroom average market rent of $360 is above the LIHTC maximum allowable rent limits at 30 and 40 percent AMI, but below the maximum allowable rent limits at 50, 60, 80 and 100 percent of AMI, as well as the fair market rent. The one-bedroom average market rent of $456 is above the LIHTC maximum allowable rent limits at 30, 40 and 50 percent of AMI, but below the maximum allowable rent limits at 60, 80 and 100 percent of AMI, as well as the fair market rent. The two-bedroom average market rent of $554 is above the LIHTC maximum allowable rent limits at 30, 40 and 50 percent of AMI, but is below the LIHTC maximum allowable rents at 60, 80 and 100 percent of AMI, as well as the fair market rent. The three-bedroom average market rent of $655 is above the LIHTC maximum allowable rents at 30, 40 and 50 percent of AMI, but is below the maximum allowable rent limits at 60, 80 and 100 percent of AMI, as well as the fair market rent.

Market Supply Conclusion

Novogradac was able to identify 26 market rate multifamily developments in the West Cameron County Submarket, but were only able to survey 18 of the properties. Based on the lack of available data, we did not complete a market rate senior market analysis. We contacted the City of Harlingen's planning department to determine if there are any additional proposed/under construction market rate multifamily developments in the area. As of the date of this report, our phone calls have not been returned.

Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.12 and is projected to decrease slightly by 2012 to 3.10. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 34 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Market data, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

The surveyed market rate properties in the West Cameron County Submarket offer a moderate amount of in-unit and community amenities. Washer/dryer hookups and/or appliances are not common in the market. Six of the 18 surveyed properties offer security features of some kind.

Three of the market rate comparables currently offer concessions. Reata Apartments is offering $250 off the first month's rent for all units. Skyline on Grimes Apartments is offering $100 off the first month's rent for two-bedroom units. Somerset Apartments is offering reduced rents on all unit types. Four of the market rate family properties in the market maintain a waiting list. Cornerstone Apartments maintains a waiting list for the one-bedroom units. The property manager was unable to estimate the number of households on the waiting list. Heather Apartments maintains a waiting list of eight households for all units. St. James Apartments maintains a waiting list of two households for the two-bedroom units with 1.5 and two baths and for the three-bedroom units. Timber Apartments maintains a waiting list for all unit types. The property manager was unable to estimate the number of households on the waiting list. Of the four properties with waiting lists, property managers at Cornerstone Apartments, St. James Apartments and Timber Apartments mentioned displaced residents from Hurricane Dolly were the main reason for the waiting lists. Waiting lists at market rate properties do not appear to be common in the Submarket. The surveyed comparables were built from 1962 to 2003. None of the surveyed comparables were able to provide absorption information. Annual turnover rates reported range from 10 percent to 40 percent, with an average of 25.7 percent. The market rate properties in the West Cameron County Submarket have an average vacancy rate of 6.0 percent, which is considered good.

The Submarket's 2007 population of 146,617 is expected to increase by approximately 1.95 percent to 160,914, by 2012. Similarly, the number of households in the Submarket is expected to increase at a similar rate of growth as the population, from 2007 through 2012, resulting in a total of 51,241 households by 2012. As population and households increase, along with commercial and residential expansion, the demand for multifamily rental housing of all kinds will likely increase, as well. However, it should be noted that based on the current rental rates of existing market rate properties in the Submarket and the percentage of households in the Submarket in 2007 (29.2 percent) and

2012 (25.6 percent) earning less than $20,000 a year, the demand for affordable housing of all kinds will supercede the demand for market rate housing.

Market Rate Senior Supply

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable senior market rate properties in the West Cameron County Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis. There are no proposed or under construction market rate senior properties in the West Cameron County Submarket.

SUBSIDIZED FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family-oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are eight multifamily subsidized properties in the Submarket. We were able to contact five of the properties.

The following map illustrates the location of the surveyed subsidized family comparables in the Submarket.

SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	La Hermosa	San Benito	Public Housing – Family
2	Harrison Manor	Harlingen	Section 8 – Family
3	North Star Village Apartments	Harlingen	Section 8 – Family
4	Robinhood Apartments	Harlingen	Section 8 – Family
5	Villa San Benito Apartments	San Benito	Section 8 - Family

Subsidized Multifamily Market

The following pictures identify the surveyed subsidized family properties in the Submarket. We were unable to obtain a photo of La Hermosa.

Harrison Manor

North Star Village Apartments

Robinhood Apartments

Villa San Benito

Excluded Properties

The following table illustrates excluded subsidized family properties in the Submarket. We have only excluded properties that we were unable to contact either in person or over the phone or properties that are fully furnished and/or corporate apartments.

Name	Location	Type	Reason for Exclusion
Casa De Amigos III	Harlingen	Section 8 – Family	Could not contact
Santa Rosa Village Apartments	Harlingen	Section 8 – Family	Could not contact
Las Palmas	Harlingen	USDA – Family	Could not contact

Proposed/Under Construction

We attempted to contact Yolanda Santa Maria in the Public Housing office of the Cameron County Housing Authority both in person and over the phone to determine if there are any public housing developments under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful.

Unit Mix

The following table illustrates the unit mix in the family subsidized rental property market. It should be noted that La Hermosa and Robinhood Apartments were unable to provide complete unit mixes and have been excluded from this analysis.

Unit Mix - Subsidized Family

Unit Type	Total Units	Percent
1 BR	60	36.1%
2 BR	76	45.6%
3 BR	30	18.1%
Total	**166**	**100%**

The majority of the subsidized units in the Submarket are two-bedroom units, followed by one-bedroom units. Demographic projections show that the average household size in the Submarket in 2007 was 3.12 and is projected to decrease slightly by 2012 to 3.10. However, the Submarket's household size is still significantly larger than the national average of 2.59 but slightly smaller than that of the MSA. Demographic estimates show that approximately 34 percent of the population in the Submarket in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. We were unable to identify four-bedroom units in the market. Though there is a lack of subsidized multifamily developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size

There is an insufficient amount of subsidized multifamily development in the Submarket on which to base an effective analysis of unit size. However, the following table illustrates the existing unit sizes in the subsidized rental property market. It should be noted that La Hermosa was unable to provide unit sizes and has been excluded from this analysis.

Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	570	638	605
2 BR	660	816	739
3 BR	802	920	879

The surveyed subsidized family properties in the Submarket had a one-bedroom average unit size of 605 square feet, a two-bedroom average unit size of 739 square feet and a three-bedroom average unit size of 879 square feet.

Other Amenities					
Other	n/a	n/a	n/a	n/a	n/a

The existing subsidized multifamily properties in the West Hidalgo County Submarket offer limited in-unit and community amenities. The surveyed subsidized comparables offer no services, no security features and no premium amenities. A basic appliance package is provided, with washer/dryer connections only offered at La Hermosa.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties.

Weighted Vacancy - Market Family			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	60	1	1.7%
2 BR	76	1	1.3%
3 BR	30	0	0.0%
Total	**166**	**2**	**1.2%**

Absorption

None of the surveyed subsidized family properties were able to provide absorption information. All of the comparables were built prior to 1984.

Waiting List

The following table illustrates waiting lists at the family subsidized comparable properties.

Property Name	Rent Structure	Waiting List
La Hermosa	Public Housing	100 HH for all unit types
Harrison Manor	Section 8	90 HH for all unit types
North Star Village Apartments	Section 8	25 HH for 1BR units
Robinhood Apartments	Section 8	90 HH for all unit types
Villa San Benito Apartments	Section 8	6 – 12 months long for all unit types

Based on the extensive waiting lists for subsidized housing, we anticipate significant future demand for very low income affordable housing.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Property Name	Rent Structure	Total Units	Vacant Units	Vacancy Rate
La Hermosa	Public Housing	46	0	0.0%
Harrison Manor	Section 8	50	1	2.0%
North Star Village Apartments	Section 8	56	0	0.0%
Robinhood Apartments	Section 8	69	0	0.0%
Villa San Benito Apartments	Section 8	60	1	1.7%
Total		**281**	**2**	**0.7%**

The average vacancy rate of the subsidized family comparables in the market is 0.7 percent, which is considered excellent and indicates strong demand for very low income affordable housing.

Concessions

None of the subsidized family properties in the market are offering concessions.

Turnover

The following table illustrates turnover information in the market.

Property Name	Rent Structure	Turnover
La Hermosa	Public Housing	25%
Harrison Manor	Section 8	15%
North Star Village Apartments	Section 8	N/A
Robinhood Apartments	Section 8	10%
Villa San Benito Apartments	Section 8	15%
Total		**16.25%**

Annual turnover rates reported range from 10 percent to 25 percent, with an average of 16.25 percent.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Rent and Square Footage Ranking

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

As the surveyed subsidized properties are Public Housing and Section 8 developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The rental rates quoted above are “flat rents”. The flat rents at the majority of the surveyed subsidized properties are well below the payment standards for Cameron County. According to the Cameron County Housing Authority, the Housing Choice Voucher waiting list is 878 households long, indicating significant demand for very low income affordable housing.

Subsidized Family Supply Conclusion

There are five existing Public Housing/Section 8 subsidized developments located in the West Cameron County Submarket.

The majority of the subsidized units in the Submarket are two-bedroom units, followed by one-bedroom units. Demographic projections show that the average household size in the Submarket in 2007 was 3.12 and is projected to decrease slightly by 2012 to 3.10. However, the Submarket’s household size is still significantly larger than the national average of 2.59 but slightly smaller than that of the MSA. Demographic estimates show that approximately 34 percent of the population in the Submarket in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient subsidized multi-family developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

The existing subsidized multi-family properties in the West Hidalgo County Submarket offer limited in-unit and community amenities. The surveyed subsidized comparables offer no services, no security features and no premium amenities. A basic appliance package is provided with washer/dryer connections only offered at La Hermosa.

None of surveyed comparables are offering concessions and none of the comparables were able to provide absorption information. All of the surveyed subsidized family properties maintain extensive waiting lists. Annual turnover rates reported range from 10 percent to 25 percent, with an average of 16.25 percent. The average vacancy rate of the subsidized family comparables is 0.7 percent.

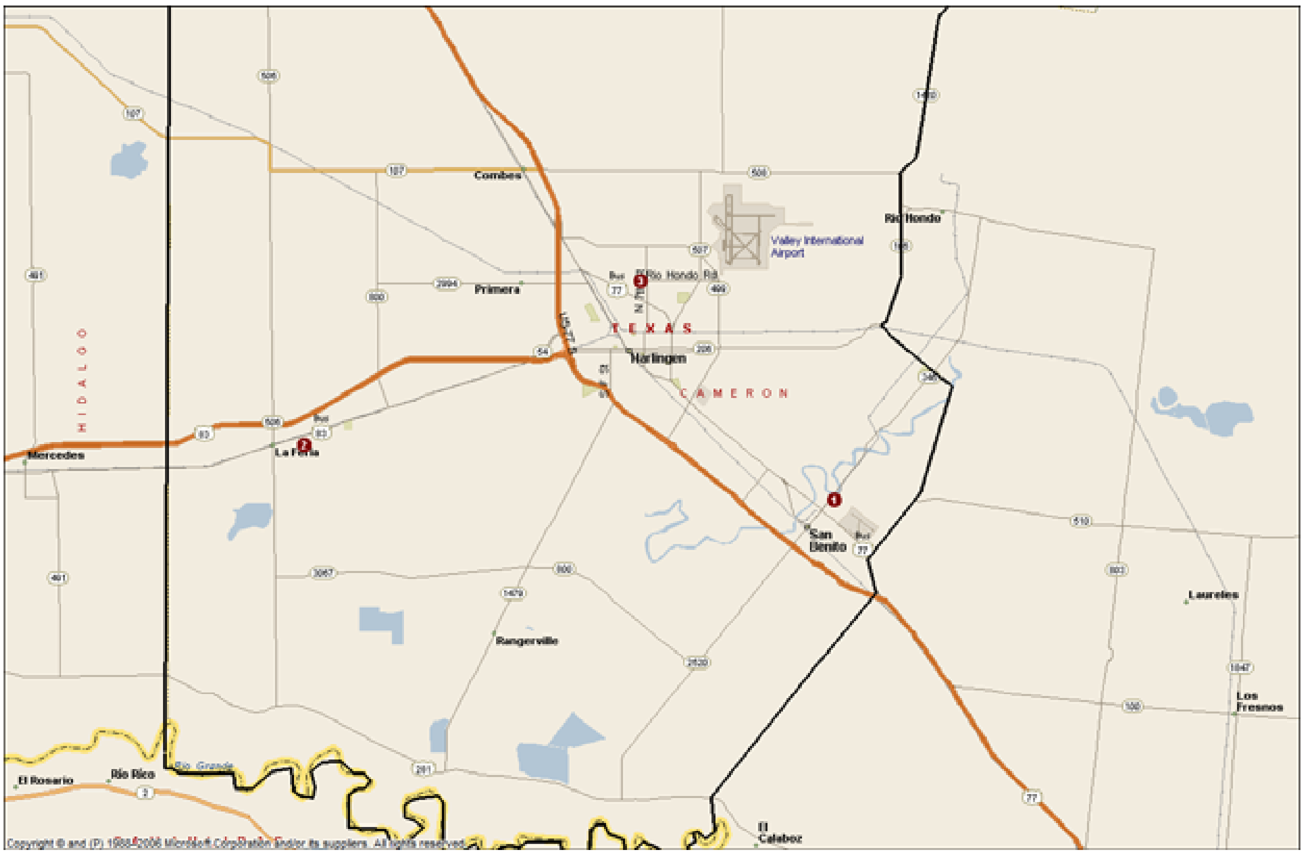
As the surveyed subsidized properties are Public Housing and Section 8 developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The rental rates quoted above are “flat rents”. The flat rents at the majority of the surveyed subsidized properties are well below the payment standards for Cameron County. According to the Cameron County Housing Authority, the Housing Choice Voucher waiting list is 878 households long, indicating significant demand for very low income affordable housing.

Subsidized Senior Supply

We attempted to identify all existing, proposed, and under construction senior-targeted subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are three senior-targeted subsidized developments in the Submarket. We were able to contact all of the subsidized senior properties in the Submarket; therefore, we have not excluded any comparable properties from our analysis.

The following map illustrates the location of the surveyed subsidized senior comparables in the Submarket.



SURVEYED PROPERTIES			
Number	Name	Location	Type
1	Palmville	San Benito	Public Housing – Senior
2	Buena Vida Apartments	La Feria	USDA – Senior
3	The Palms Retirement Center	Harlingen	Section 8 - Senior

Subsidized Senior Market

The following pictures identify the surveyed subsidized senior properties in the Submarket. We were unable to obtain photos of Palmville.

The Palms Retirement Center

Buena Vida Apartments

Excluded Properties

We were able to contact all of the subsidized senior properties in the Submarket; therefore, we have not excluded any comparable properties from our analysis.

Proposed/Under Construction

We attempted to contact Yolanda Santa Maria in the Public Housing office of the Cameron County Housing Authority both in person and over the phone to determine if there are any public housing developments under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful.

Unit Mix

There is an insufficient amount of subsidized senior development in the Submarket on which to base an effective analysis of unit size. However, the following table illustrates the unit mix in the senior subsidized rental property market. There are 221 total senior subsidized units in the Submarket. It should be noted that Palmville and The Palms Retirement Center were unable to provide complete unit mixes and have been excluded from this analysis.

Unit Mix - Subsidized Senior

Unit Type	Total Units	Percent
1 BR	40	69.0%
2 BR	18	31.0%
Total	**58**	**100%**

The majority of the subsidized units in the Submarket are two-bedroom units, followed by one-bedroom units. Palmville and The Palms Retirement Center offer studio units as well. Demographic estimates show that approximately 22 percent of the population in the Submarket in 2007 was age 55 years or older. This trend is expected to remain stable through 2012. Though there is a lack of sufficient subsidized senior developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for smaller bedroom types.

Unit Size

There is an insufficient amount of subsidized senior development in the Submarket, on which to base an effective analysis of unit size. However, the following table illustrates the existing unit sizes in the subsidized rental property market. It should be noted that Palmville was unable to provide unit sizes and has been excluded from this analysis.

Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
0 BR	350	350	350
1 BR	500	650	575
2 BR	820	820	820

The surveyed subsidized senior properties in the Submarket had a studio average unit size of 350 square feet, a one-bedroom average unit size of 575 square feet and a two-bedroom average unit size of 820 square feet.

The existing subsidized senior properties in the West Cameron County Submarket offer limited in-unit and community amenities. The surveyed subsidized comparables offer no services, no security features and no premium amenities. A basic appliance package is provided with central air conditioning only offered at Buena Vida Apartments.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties. It should be noted that the table below only includes Buena Vista Apartments; Palmville and The Palms Retirement Center were unable to provided vacancy by unit type.

Weighted Vacancy – Subsidized Senior			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	40	3	7.5%
2 BR	18	0	0.0%
Total	**58**	**3**	**5.2%**

It should also be noted that there is one vacant studio unit in the Submarket, at The Palms Retirement Center.

Absorption

None of the surveyed subsidized senior properties were able to provide absorption information.

Waiting List

The following table illustrates waiting lists at the family subsidized comparable properties.

Property Name	Rent Structure	Waiting List
Palmville	Public Housing	15 HH for all unit types
Buena Vida Apartments	USDA	10 HH for all unit types
The Palms Retirement Center	Section 8	15 HH for all unit types

Palmville and The Palms Retirement Center draw tenants from the Public Housing and Section 8 waiting lists for their respective housing authorities. The waiting list information given by the property managers was based on the housing authority waiting list information. Buena Vida Apartments maintains a waiting list, even though there are vacancies at the property, due to those units being in turnover. Based on the current waiting lists for senior subsidized housing, we anticipate significant future demand for very low income affordable senior housing.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Property Name	Rent Structure	Total Units	Vacant Units	Vacancy Rate
Palmville	Public Housing	100	0	0.0%
Buena Vida Apartments	USDA	58	3	5.2%
The Palms Retirement Center	Section 8	63	2	3.2%
Total		**221**	**2**	**0.9%**

The average vacancy rate in the market is 0.9 percent, which is considered excellent.

Concessions

None of the subsidized family properties in the market are offering concessions.

Turnover

The following table illustrates turnover information in the market.

Property Name	Rent Structure	Turnover
Pamville	Public Housing	10%
Buena Vida Apartments	USDA	10%
The Palms Retirement Center	Section 8	15%
Total		**11.7%**

Annual turnover rates reported range from 10 percent to 15 percent, with an average of 11.7 percent. Turnover in the senior subsidized properties is lower than in the family subsidized properties.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Rent and Square Footage Ranking

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

There is an insufficient amount of subsidized senior development in the Submarket, on which to base an effective rental rate analysis. It should be noted that The Palms Retirement Center, a Section 8 senior comparable, could not provide actual rents and the property manager stated that tenants just pay 30 percent of their gross annual income. As the remaining surveyed subsidized properties are Public Housing and USDA developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The rental rates quoted above are "flat rents". The flat rents at both surveyed subsidized properties are well below the payment standards for Cameron County. According to the Cameron County Housing Authority, the Housing Choice Voucher waiting list is 878 households long, indicating significant demand for very low income affordable housing. We were unable to maintain the number of seniors on the Housing Choice Voucher or Public Housing waiting lists.

Subsidized Senior Supply Conclusion

There are three senior-targeted subsidized developments in the Submarket. There are no other existing subsidized developments in this Submarket.

The majority of the subsidized units in the Submarket are two-bedroom units, followed by one-bedroom units. Palmville and The Palms Retirement Center offer studio units as well. Demographic estimates show that approximately 22 percent of the population in the Submarket in 2007 was age 55 years or older. This trend is expected to remain stable through 2012. Though there is a lack of sufficient subsidized senior developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for smaller bedroom types.

The existing subsidized senior properties in the West Cameron County Submarket offer limited in-unit and community amenities. The surveyed subsidized comparables offer no services, no security features and no premium amenities. A basic appliance package is provided with central air conditioning only offered at Buena Vida Apartments.

None of surveyed comparables are offering concessions and none of the comparables were able to provide absorption information. All three senior subsidized comparables maintain waiting lists. Annual turnover rates reported range from 10 percent to 15 percent, with an average of 11.7 percent. The average vacancy rate is 0.9 percent.

There is an insufficient amount of subsidized senior development in the Submarket, on which to base an effective rental rate analysis. As the remaining surveyed subsidized properties are Public Housing and USDA developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The rental rates quoted above are "flat rents". The flat

rents at both surveyed subsidized properties are well below the payment standards for Cameron County. According to the Cameron County Housing Authority, the Housing Choice Voucher waiting list is 878 households long, indicating significant demand for very low income affordable housing. We were unable to obtain the number of seniors on the Housing Choice Voucher or Public Housing waiting lists.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the West Cameron County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the West Cameron County Submarket in 2007 is 46,385 and the total number of households in 2012 is projected to be 51,241. The total number of households age 55 and older in the Submarket for 2007 is 18,657, with a 2012 projection of 17,592 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 29.2 percent of the occupied housing unit households in the West Cameron County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 15.9 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a one-person household in the income range between 31 percent and 40 percent of AMI. A minimum

income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the West Cameron County Submarket (Brownsville-Harlingen, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*

4 Person	$0	$13,100	$13,100	$17,440	$17,440	$21,800	$21,800	$26,160	$26,160	$34,880	$34,880	$43,600
5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households

Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the West Cameron County Submarket, approximately 26.9 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing

Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 1.6 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing

A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the West Cameron County Submarket, it is estimated that 16.9 percent of households are living in overcrowded units.

Movership or Turnover Rate

There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the stabilized family LIHTC properties surveyed in the Submarket is approximately 24.3 percent.

We were unable to identify any senior LIHTC properties in this Submarket. Therefore, for the purpose of this analysis, we have used the Submarket's average senior subsidized turnover rate of 20 percent.

Unstabilized Rental Units - Existing and Proposed

To our knowledge, there are no proposed or under construction subsidized or LIHTC properties in the West Cameron County Submarket. Therefore, no units were deducted from the senior demand analysis.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the West Cameron County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the West Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that nearly 23 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. This may explain why the only vacant LIHTC units in the market are at the 60 percent AMI level. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. This suggests that the higher than vacancy rate among 60 percent AMI units could be due to households that are both over and under income-qualified. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. With no additional LIHTC or subsidized units planned, there is likely an unmet need for additional affordable housing units at the lowest income levels in this Submarket.

Senior Households

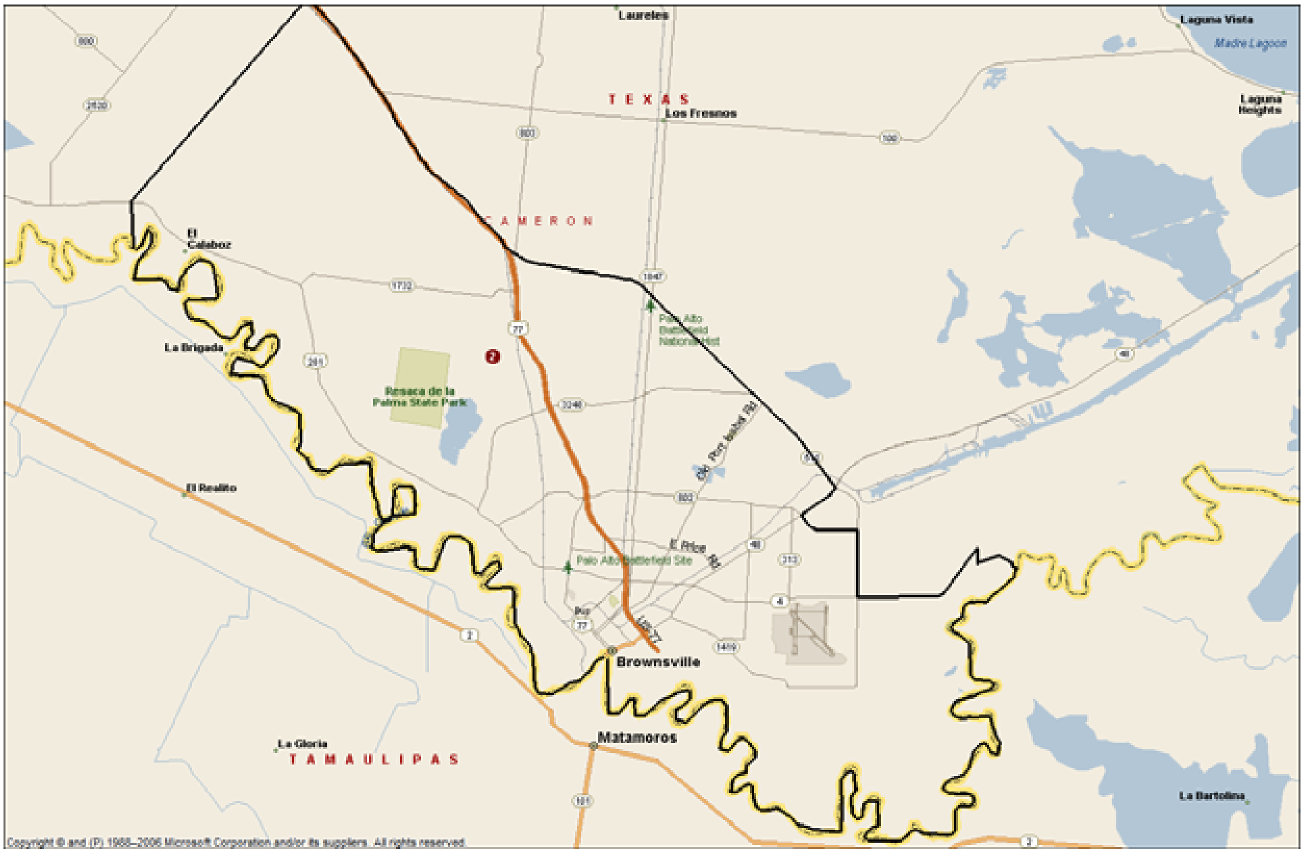
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Currently, there are only 221 subsidized units serving low-income senior households in the West Cameron County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional LIHTC or subsidized units planned, there is likely an unmet need for additional affordable senior housing units in this Submarket.

2. SOUTH CAMERON COUNTY SUBMARKET ANALYSIS

SOUTH CAMERON COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the South Cameron County Submarket, which is bounded to the south and east by the Cameron County line, to the west by FM 732 and to the north by US Highway 77 and FM 511. The following map illustrates the boundaries of the Submarket as defined above.

South Cameron County Submarket Map



The South Cameron County Submarket is located in the southernmost portion of Cameron County and includes the cities of Brownsville and Olmito. This Submarket is characterized primarily by limited to extensive development. The predominant form of housing in this Submarket is owner-occupied single-family homes in fair to good condition and less than 5 to 40 years in age.

Local Government

The South Cameron County Submarket includes the cities of Brownsville and Olmito.

Brownsville has a Council-Manager style of government. The Mayor and six City Commissioners, two At-Large and four District, serve staggered four year terms. The 2000 U.S. Census population was 139,722. Brownsville has a total area of 83 square miles.

Olmito, Texas is a census-designated place in Cameron County. The population was 1,198 at the 2000 census. Olmito has a total area of 0.7 square miles.

Employment by Industry

The following table illustrates employment by industry for the South Cameron County Submarket and Brownsville-Harlingen, TX MSA in 2007.

2007 EMPLOYMENT BY INDUSTRY

	South Cameron County Submarket		Brownsville-Harlingen, TX MSA

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the North Hidalgo County Submarket are the educational services, retail trade, health care/social assistance and manufacturing sectors. Approximately 50 percent of people in the Submarket work in these four industries. The South Cameron County Submarket has a larger number of persons employed in the educational services, retail and manufacturing sectors and a smaller number of people employed in the healthcare/social assistance sector, relative to the MSA. Although the educational services and health care/social assistance industries are typically stable sectors of the economy, industries such as retail trade and manufacturing are particularly susceptible to fluctuations in the health of the economy.

The large number of people employed in the retail trade and manufacturing industries could negatively affect employment in the South Cameron County Submarket, due to the current national economic downturn. However, the presence the educational services and health care/social assistance industries should help bolster the economic stability of the South Cameron County region.

It should be noted, that the health care/social assistance, manufacturing, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create demand for affordable rental housing in the Submarket.

Commute Patterns for the South Cameron County Submarket

The following table shows the commute times for the South Cameron County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	1,103
5-9 min	5,178
10-14 min	9,590
15-19 min	12,380
20-24 min	8,376
25-29 min	2,041
30-34 min	5,890
35-39 min	487
40-44 min	618
45-59 min	1,272
60-89 min	982
90+ min	884
Average Travel Time	20.8 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The average commute time for workers in the South Cameron County Submarket is 20.8 minutes. The largest percentage of employees reports a commute time between 15 and 19 minutes. This is reflective of the location of Brownsville in the Submarket. Workers commuting to Brownsville from the rural northwest portion of the Submarket likely account for the workers reporting commute times in excess of 45 minutes.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the South Cameron County Submarket and Brownsville-Harlingen, TX MSA. Data such as population, households and growth patterns are studied to determine if the Brownsville-Harlingen, TX MSA and the South Cameron County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the South Cameron County Submarket and Brownsville-Harlingen, TX MSA from 1990 through 2012.

Total Population				
Year	South Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	128,232	-	260,120	-
2000	163,961	2.79%	335,227	2.89%
2007	197,686	2.84%	395,867	2.50%
2012	221,242	2.38%	440,440	2.25%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Growth in the Submarket has been slightly faster than growth in the MSA in all years of analysis, with the exception of 2000. The majority of population growth in the MSA is located near the U.S. – Mexico border. Both the Submarket and the MSA are showing strong growth from 2007 through 2012, although the MSA is projected to grow at a slower rate than from 2000 through 2007. The strong growth in the Submarket and the MSA is a positive indicator of the need for the affordable housing.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990, 2000, 2007 and 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages not shown.

Population by Age Group

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	South Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	33,411	-	73,278	-
2000	44,267	3.25%	97,267	3.27%
2007	53,806	2.97%	115,756	2.62%
2012	60,471	2.48%	129,335	2.35%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been strong through 2007. Household growth in both the Submarket and MSA is expected to slow slightly from 2007 through 2012. As the number of households increases, there will be a larger pool of potential tenants, some of which will need affordable housing.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	South Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.67	-	3.40	-
2007	3.64	-0.11%	3.38	-0.08%
2012	3.63	-0.05%	3.37	-0.06%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly larger than the MSA, but both are larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket and MSA.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	South Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	24,529	-	26,156	-
2007	30,176	3.18%	31,956	3.06%
2012	34,734	3.02%	36,654	2.94%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 5.9 percent lower than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a faster rate from 2007 through 2012 than the MSA. The lower median income level indicates increasing need for affordable housing.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - South Cameron County Submarket				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 35.8 percent of the population in the Submarket and 32.5 percent of the population in the MSA earned below $20,000 in 2007. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 31.8 percent and 28.7 percent, respectively; however, in both instances, a significant portion of the population is projected to earn less than $20,000. This data provides strong support for affordable rental housing in the Submarket and MSA.

Tenure

The following table is a summary of the tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

TENURE PATTERNS SOUTH CAMERON COUNTY SUBMARKET				
Year	Owner-Occupied Units	Percentage Owner-Occupied	Renter-Occupied Units	Percentage Renter-Occupied
2000	28,048	63.36%	16,219	36.64%
2007	35,300	65.61%	18,506	34.39%
2012	39,765	65.76%	20,706	34.24%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

TENURE PATTERNS BROWNSVILLE-HARLINGEN, TX MSA				
Year	Owner-Occupied Units	Percentage Owner-Occupied	Renter-Occupied Units	Percentage Renter-Occupied
2000	65,875	67.73%	31,392	32.27%
2007	80,004	69.11%	35,752	30.89%
2012	89,234	68.99%	40,101	31.01%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As the above table illustrates, the housing market in the South Cameron County Submarket is dominated by owner-occupied units. The Submarket has a slightly higher percentage of renter-occupied units when compared to the MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 55 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents to be over 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)

	South Cameron County Submarket		Brownsville-Harlingen, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	18,913	-	46,569	-
2000	25,683	3.6%	61,192	3.1%
2007	31,432	3.1%	73,931	2.9%
2012	38,300	4.4%	89,074	4.1%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

As the table illustrates, similar to the general population trends, the senior population in both the Submarket and the MSA increased between 2000 and 2007. Senior population growth in the South Cameron County Submarket increased significantly between 2000 and 2007. The senior population in both the South Cameron County Submarket and the MSA is expected to grow at a faster rate from 2007 through 2012. The senior population growth rate in the MSA in 2012 is projected to be similar to the growth rate in the South Cameron County Submarket.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	South Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	14,448	-	35,359	-
2007	17,493	2.9%	42,259	2.7%
2012	21,370	4.4%	50,724	4.0%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth is projected to increase through 2012. However, total household growth rates are expected to decrease, whereas, senior household growth rates are expected to increase. Similarly, in contrast to general household growth rates, senior household growth rates are expected to increase from 2007 through 2012. The strong projected growth in senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME

Year	McAllen-Edinburg-Mission, TX MSA		North Hidalgo County Submarket		USA	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
		All Ages				
2007	$31,956	-	$30,176	-	$53,154	-
2012	$36,654	2.94%	$34,734	3.02%	$62,503	3.52%
		Age 55+				
2007	$28,614	-	$24,494	-	$32,710	-
2012	$34,145	3.87%	$30,757	5.11%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in all three areas of analysis are well below those of all households. Of the three areas of analysis, the median senior household income is lowest in the Submarket and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. The MSA will experience slightly weaker median household income growth for all households and senior households when compared to the Submarket and the nation.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - South Cameron County Submarket (Age 55+)

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. The Submarket has the largest percentage of seniors earning less than $35,000 annually. Approximately 60 percent of those 55 and older in the Submarket are earning under $35,000 per year. This is attributed primarily to the Submarket's high percentage of senior households earning below $15,000 annually. The Submarket features slightly more senior households in these income brackets when compared to the MSA. By 2012, all areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 52.2 and 48.5 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. Furthermore, the majority of senior households within the Submarket will be earning less than $25,000, which is below the current AMI. This indicates that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	South Cameron County Submarket				Brownsville-Harlingen, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	10,888	75.4%	3,560	24.6%	28,551	80.7%	6,808	19.3%
2007	13,183	75.4%	4,310	24.6%	34,122	80.7%	8,137	19.3%
2012	16,104	75.4%	5,266	24.6%	40,958	80.7%	9,766	19.3%
Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008								

As the above table illustrates, the senior housing market is dominated by owner-occupied units. The Submarket has a slightly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above) and the MSA.

Senior Demographic Conclusion

Of the three areas of analysis, the median senior household income is lowest in the Submarket and highest nationally. The median senior household income for the Submarket is projected to increase from 2007 to 2012 and growth in the national and Submarket's median senior household income is projected to outpace growth in the MSA. Both the MSA and Submarket have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. Approximately 60 percent of those 55 and older in the Submarket are earning under $35,000 per year. This is attributable primarily to the PMA's high percentage of senior households earning below $15,000 annually. The Submarket features slightly more senior households in these income brackets when compared to the MSA and national averages. The national average of senior households earning below $50,000 annually is 64 percent.

LOCAL MARKET INFORMATION

South Cameron County Submarket

The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare

The primary major medical providers in the South Cameron County Submarket are the Valley Regional Medical Center and the Valley Baptist Health System. Valley Regional Medical center is a new 214-bed acute care hospital located in Brownsville. Valley Regional is a designated Trauma Center and offers services such as Emergency Care, Neonatal Intensive Care, Neurosurgery, Cardiac Surgery and Orthopedic Surgery. The hospital underwent an expansion during 2004, which added a second Intensive Care Unit and 16 medical and surgical beds. Valley Baptist Health System is one of the largest in South Texas with more than 800 beds. Valley Baptist has locations in Brownsville and Harlingen and offers Cardiovascular Services, Day Surgery, Home Health, Hospice, Intensive Care Units, Emergency Departments, Outpatient Services, Pediatrics and Radiology.

Transportation

The Brownsville/South Padre Island International Airport is located in the South Cameron County Submarket. The airport is used for general aviation and is served by one commercial airline, Continental Airlines, with an average of seven flights a day to Houston-Intercontinental Airport.

Highway access to South Cameron County Submarket can be accomplished via US Highway 281 and US Highway 77/U.S. Highway 83 . US Highway 281 runs north/south from McAllen, Texas to Wichita Falls, Texas. US Highway 77 runs north/south from Sioux City, Iowa to Brownsville, Texas at Veteran's International Bridge on the U.S. – Mexico border. U.S. Highway 83 runs north/south from Westhope, North Dakota to Brownsville, Texas.

Education

The South Cameron County Submarket is served by the Brownsville Independent School District and the Los Fresnos Consolidated Independent School District. The Brownsville Independent School District includes five high schools, 10 middle schools, 33 elementary schools and four special needs schools. The Los Fresnos Consolidated Independent School District includes one high school, three middle schools and eight elementary schools. The University of Texas at Brownsville (UTB) and Texas Southmost College (TSC) are located in the South Cameron County Submarket. The partnership between UTB and TSC offers Certificates and Associate, Bachelor and Graduate degrees in liberal arts, the sciences and professional programs.

Public Transportation

The Brownsville Urban System (BUS) provides mass transit services to the South Cameron County Submarket. BUS is the largest mass transit system in the Rio Grande Valley and is the only mass transit system in Cameron County. As of Summer 2008, BUS operates 13 fixed routes.

Employment Centers

The majority of employment centers in the South Cameron County Submarket are located in Brownsville. The largest employers in the City of Brownsville include the following:

Rank	Company	Industry
1	Brownsville Independent School District	Education
2	AMFELS	Manufacturing
3	University of Texas at Brownsville	Education
4	Cameron County	Government
5	Wal-Mart	Retail
6	City of Brownsville	Government
7	Convergys Corp.	Call Center
8	HEB Food Stores	Retail
9	Valley Regional Medical Center	Healthcare
10	Valley Baptist Medical Center	Healthcare

Source: Brownsville Economic Development Corporation, Real Estate Center Market Overview 2008: July2008

It should be noted that the number of employees for the major employers in Brownsville was not available at the time of this report.

Proximity to Local Services

The majority of locational amenities in the South Cameron County Submarket are located in Brownsville.

HOUSING SUPPLY ANALYSIS

SOUTH CAMERON COUNTY SUBMARKET HOUSING SUPPLY ANALYSIS

Age of the Housing Stock

The following table presents the age of the housing stock in the South Cameron County Submarket.

AGE OF HOUSING STOCK IN SOUTH CAMERON COUNTY SUBMARKET		
Years	Number of Units	Percent of Housing Stock
1999-3/2000	1,660	3.35%
1995-1998	6,034	12.18%
1990-1994	5,177	10.45%
1980-1989	12,820	25.89%
1970-1979	10,994	22.20%
1960-1969	5,340	10.78%
1950-1959	3,669	7.41%
1940-1949	2,140	4.32%
1939 and Before	1,689	3.41%
Total	**49,523**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (70.72 percent) in the South Cameron County Submarket was constructed from 1970 through 1998. The South Cameron County Submarket consists primarily of developed land with moderate to extensive single-family housing and multi-family housing. Based upon observations in the field single-family housing in the Submarket typically ranges from fair to good condition and is less than five to 40 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2007 for Cameron County, Texas. Data was not available for 2008. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Cameron County, TX - 1997 to 2007				
Year	Single-family and Duplex	Three and Four-Family	Five or More Family	Total Units
1997	1,601	40	257	1,898
1998	1,400	166	161	1,727
1999	1,058	229	150	1,437
2000	2,086	121	150	2,357
2001	1,595	142	102	1,839
2002	2,211	136	475	2,822
2003	3,200	81	163	3,444
2004	2,203	198	213	2,614
2005	1,981	197	116	2,294
2006	2,670	74	261	3,005
2007	1,800	131	138	2,069
Total	**21,805**	**1,515**	**2,186**	**25,506**
Average	**1,982**	**138**	**199**	**2,319**

There were 2,186 “5+ units” building permits issued in Cameron County from 1997 to 2007. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2007, at 85 percent, while “5+ units” building permits constitute approximately 8.6 percent of all permits issued from 1997 through 2007. The small percentage of multifamily permits issued indicates demand for multi-family housing of all kinds.

Interviews

Cameron County Housing Authority

We spoke with Guadalupe Garcia with the Cameron County Housing Authority. According to Ms. Garcia, the Housing Authority is allocated 1,080 Housing Choice Vouchers and 1,006 vouchers are currently in use. Ms. Garcia estimated that there were 878 households on the waiting list as of July 2008 and the waiting list is currently open. The current payment standards for one-, two-, three-, and four-bedroom units are listed below.

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

Brownsville Housing Authority

We spoke with Miguel Herrera, Assistant Director of the Brownsville Housing Authority. According to Mr. Herrera, the Housing Authority is allocated 2,015 Housing Choice Vouchers and all vouchers are currently in use. Mr. Herrera estimated that there are 521 households on the waiting list and the waiting list is currently open for elderly and/or disabled households. Approximately 70 percent of the households on the waiting list are senior. The current payment standards for one-, two-, three- and four-bedroom units are listed below.

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$537
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$859

We also spoke with Juan Martinez in the Public Housing office of the Brownsville Housing Authority. According to Mr. Martinez, the Housing Authority manages three public housing developments in Brownsville, with a total of 246 units. Mr. Martinez was unable to provide specifics on occupancy or waiting lists.

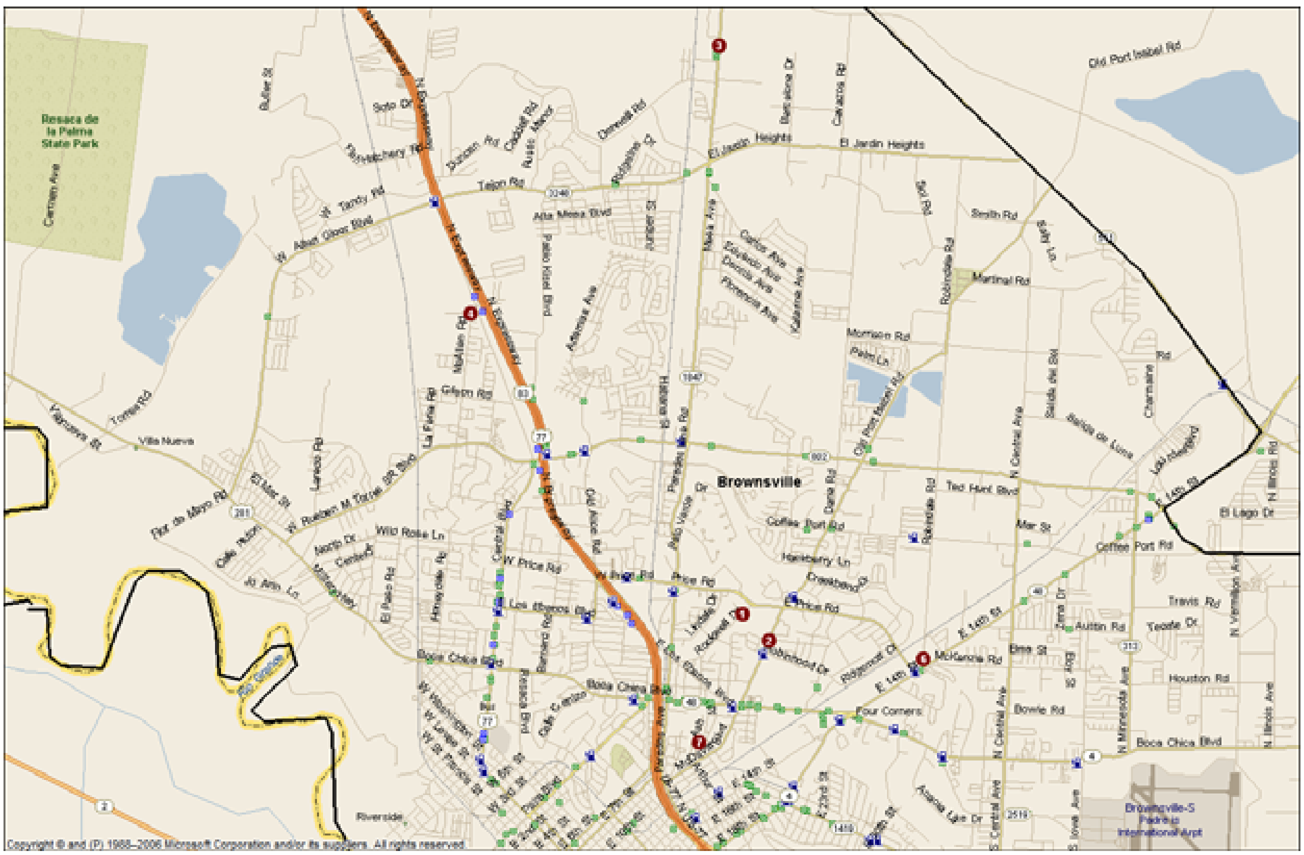
Planning/Development

We attempted to contact the Planning Department of the City of Brownsville to obtain information on any multifamily development currently under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful. However, based on our physical inspection of the Submarket, there do not appear to be any multifamily developments currently under construction or in the planning stages.

LIHTC Supply

We attempted to identify all existing, proposed, and under construction LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, and property managers.

Novogradac identified nine LIHTC developments in the South Cameron County Submarket. Of the nine LIHTC developments, seven properties constructed between 1968 and 2008, with a total of 1,050 units, were able to provide current property and market data. The reasons for exclusion of the remaining properties can be found on the excluded properties list on the following pages. A map of the surveyed properties can be found below:



SURVEYED PROPERTIES			
Number	Name	Location	Type
1	Cunningham Manor	Brownsville	LIHTC – Family
2	La Villita Phases I & II	Brownsville	LIHTC – Family
3	Paseo Plaza Apartments	Brownsville	LIHTC – Family
4	Rancho Del Cielo	Brownsville	LIHTC – Family
5	Rancho Del Cielo Phase II	Brownsville	LIHTC – Family
6	Rosemont of Eldorado	Brownsville	LIHTC – Family
7	Tropical Gardens at Boca Chica	Brownsville	LIHTC/Market/Section 8/Public Housing - Family

Tropical Gardens at Boca Chica

Excluded Properties

Novogradac has excluded two family LIHTC developments from our analysis. The following table lists the properties in the Submarket that were excluded from this analysis and the basis for their exclusion.

Name	Location	Type	Reason for Exclusion
Villa Del Sol	Brownsville	LIHTC – Family	Could not contact
Sunset Haven	Brownsville	LIHTC – Family	Under construction

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are nine properties in the South Cameron County Submarket, which have received an allocation in the last three years. La Villita Apartments, Cunningham Manor Apartments and Tropical Gardens at Boca Chica received allocations in 2005, 2006 and 2007, and have all been used as LIHTC comparables in the supply analysis. Rockwell Manor Apartments, Candlewick Apartments and Los Ebanos Apartments were all allocated in 2007. Rockwell Manor was utilized as a subsidized comparable property later in this report. Candlewick Apartments and Los Ebanos Apartments received LIHTC allocations but operate as Section 8 family development. Despite numerous attempts to contact the property managers of Candlewick Apartments and Los

Ebanos Apartments both in person and over the phone, our attempts have been unsuccessful as of the date of this report.

We attempted to contact the Planning Department of the City of Brownsville to obtain information on any multifamily development currently under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful. However, based on our physical inspection of the Submarket, there do not appear to be any multifamily developments currently under construction or in the planning stages.

Unit Mix

The following table illustrates the unit mix in the family LIHTC rental property market.

Unit Mix - LIHTC Family		
Unit Type	**Total Units**	**Percent**
1 BR	186	17.7%
2 BR	431	41.0%
3 BR	337	32.1%
4 BR	96	9.1%
Total	**1,050**	**100%**

The majority of the LIHTC units in the Submarket are two-bedroom units, followed by three-bedroom units. Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.64 and is projected to decrease slightly by 2012 to 3.63. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 37.5 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family LIHTC rental property market.

Unit Size - LIHTC Family			
Unit Type	**Surveyed Min**	**Surveyed Max**	**Surveyed Average**
1 BR	627	750	671
2 BR	713	1,044	885
3 BR	960	1,183	1,081
4 BR	1,219	1,324	1,262

The surveyed one-, two, three- and four-bedroom LIHTC units have an average size of 671, 885, 1,081, and 1,262 square feet, respectively. All of the developments were constructed from 1968 to 2008. It should be noted that Cunningham Manor, built in 1968 and renovated in 2008, is the oldest property in the market and has the smallest units in the market. The remaining LIHTC family comparables are more representative of unit sizes in the South Cameron County Submarket.

The existing LIHTC multifamily properties in the South Cameron County Submarket offer an extensive amount of in-unit and community amenities. All of the surveyed LIHTC comparables offer unit amenities that include central air, ovens and refrigerators. Most of the surveyed LIHTC comparables offer dishwashers and balcony/patios. Washer/dryer connections are common in the family LIHTC market. Most of the surveyed LIHTC comparables offer community amenities including a clubhouse, a central laundry facility, playground, and swimming pool. Security features are not common in the Submarket; however, two of the LIHTC properties offer security features of some kind. Daycare services are available at three of the properties.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties. It should be noted that Cunningham Manor is currently undergoing renovations and is in the process of converting to a LIHTC property from a market rate property. The property manager could not provide vacancies by unit type; therefore, Cunningham Manor has been excluded from this analysis.

Weighted Vacancy - LIHTC Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	186	0	0.0%
2 BR	431	0	0.0%
3 BR	337	0	0.0%
4 BR	96	0	0.0%
Total	**1,050**	**0**	**0.0%**

All of the surveyed LIHTC comparable properties are reporting zero percent vacancy. This is indicative of a good supply of income qualified tenants.

Absorption

Four of the seven surveyed LIHTC properties were able to provide absorption information. La Villita Phases I and II opened in 2005 and reported an absorption rate of 25 units per month, for an absorption period of approximately eight months. Rancho Del Cielo Phase II opened in 2000 and reported an absorption rate of eight units per month, for an absorption period of 15 months. Rosemont of Eldorado opened in 2003 and reported an absorption rate of 13 units per month, for an absorption period of approximately 11 months. Tropical Gardens at Boca Chica opened in 2006 and reported an absorption rate of 26 units per month, for an absorption period of approximately six months.

Waiting Lists

The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – LIHTC Family		
Property Name	**Number of Units**	**Waiting List**
Cunningham Manor	104	None
La Villita Phases I & II	208	10 HH for 1BR units, 7 HH for 2BR units, 2 HH for 3BR units
Paseo Plaza Apartments	184	100 HH for all units, but mostly 2BR units
Rancho Del Cielo	130	None
Rancho Del Cielo Phase II	120	None
Rosemont of Eldorado	146	20 HH for all unit types
Tropical Gardens at Boca Chica	158	10 HH for 1BR units @ 60%, 28 HH for 1BR Section 8 units, 9 HH for 2BR units @50%, 8 HH for 2Br units @ 60%, 1 HH for 2BR market rate units, 35 HH for 2BR Section 8 units, 3 HH for 3BR units @50%, 3 HH for 3BR units @60% and 16 HH for 3BR Section 8 units

Five of the seven surveyed family LIHTC properties currently maintain waiting lists. Waiting lists range in size from one household to 100 households for one-, two- and three-bedroom units.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Vacancy – LIHTC Family		
Property Name	**Number of Units**	**Vacancy Rate**
Cunningham Manor	104	50.0%
La Villita Phases I & II	208	0.0%
Paseo Plaza Apartments	184	0.0%
Rancho Del Cielo	130	0.0%
Rancho Del Cielo Phase II	120	0.0%
Rosemont of Eldorado	146	0.0%
Tropical Gardens at Boca Chica	158	0.0%
AVERAGE	**1,050**	**7.14**

It should be noted that Cunningham Manor is currently undergoing renovations and is in the process of converting to a LIHTC property from a market rate property and some residents have been displaced during renovations. If Cunningham Manor is taken out of the analysis, the overall average vacancy rate for the surveyed LIHTC comparables is zero percent, which is considered excellent.

Concessions

None of the LIHTC family properties in the market are offering concessions. Concessions do not appear to be prevalent in the family LIHTC market.

Turnover

The following table summarizes turnover rates at the surveyed properties.

Turnover – LIHTC Family		
Property Name	**Number of Units**	**Turnover**
Cunningham Manor	104	N/A
La Villita Phases I & II	208	14%
Paseo Plaza Apartments	184	15%
Rancho Del Cielo	130	12%
Rancho Del Cielo Phase II	120	15%
Rosemont of Eldorado	146	35%
Tropical Gardens at Boca Chica	158	9%
AVERAGE	**1,050**	**16.7%**

The range of turnover rates at the surveyed family LIHTC properties in the Submarket appears to be well within range of typical turnover rates for multifamily properties.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

According to the property managers, most of the surveyed LIHTC comparables are achieving maximum allowable rents. The surveyed family LIHTC properties were constructed from 1968 through 2006 and all offer some units at 30, 40, 50 and/or 60 percent of AMI. It should be noted that Cunningham Manor is currently undergoing renovations and is in the process of converting to a LIHTC property from a market rate property and some residents have been displaced during renovations. If Cunningham Manor is taken out of the analysis, the overall average vacancy rate for the surveyed LIHTC comparables is zero percent, which is considered excellent. Five of the seven surveyed family LIHTC properties currently maintain waiting lists, specifically for one-, two- and three-bedroom units.

LIHTC Supply Conclusion

Novogradac identified nine LIHTC developments in the West Cameron County Submarket. Of the seven LIHTC developments, four properties constructed between 1968 and 2008, with a total of 1,050 units, were able to provide current property and market data.

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are nine properties in the South Cameron County Submarket, which have received an allocation in the last three years. La Villita Apartments, Cunningham Manor Apartments and Tropical Gardens at Boca Chica received allocations in 2005, 2006 and 2007, and have all been used as LIHTC comparables in the supply analysis. Rockwell Manor Apartments, Candlewick Apartments and Los Ebanos Apartments were all allocated in 2007. Rockwell Manor was utilized as a subsidized comparable property later in this report. Candlewick Apartments and Los Ebanos Apartments received LIHTC allocations but operate as Section 8 family development. Despite numerous attempts to contact the property managers of Candlewick Apartments and Los Ebanos Apartments both in person and over the phone, our attempts have been unsuccessful as of the date of this report.

We attempted to contact the Planning Department of the City of Brownsville to obtain information on any multifamily development currently under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful. However, based on our physical inspection of the Submarket, there do not appear to be any multifamily developments currently under construction or in the planning stages.

Larger unit types are prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.64 and is projected to decrease slightly by 2012 to 3.63. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 37.5 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Demographic projections and anecdotal evidence indicate demand for larger bedroom types.

The existing LIHTC multifamily properties in the South Cameron County Submarket offer an extensive amount of in-unit and community amenities. All of the surveyed LIHTC comparables offer unit amenities that include central air, ovens and refrigerators. Most of the surveyed LIHTC comparables offer dishwashers and balcony/patios. Washer/dryer connections are common in the family LIHTC market. Most of the surveyed LIHTC comparables offer community amenities including a clubhouse, a central laundry facility, playground, and swimming pool. Security features are not common in the Submarket; however, two of the comparable LIHTC properties offer security features of some kind. No premium amenities or services are offered by the surveyed LIHTC properties in the Submarket.

None of surveyed comparables is offering concessions and five of the seven surveyed family LIHTC properties currently maintain waiting lists. Waiting lists range in size from one household to 100 households for one-, two- and three-bedroom units. Four of the seven surveyed LIHTC properties were able to provide absorption information. La Villita Phases I and II opened in 2005 and reported an absorption rate of 25 units per month, for an absorption period of approximately eight months. Rancho Del Cielo Phase II opened in 2000 and reported an absorption rate of eight units per month, for an absorption period of 15 months. Rosemont of Eldorado opened in 2003 and reported an absorption rate of 13 units per month, for an absorption period of approximately 11 months. Tropical Gardens at Boca Chica opened in 2006 and reported an absorption rate of 26 units per month, for an absorption period of approximately six months. The range of turnover rates at the surveyed family LIHTC properties in the Submarket appears to be well within range of typical turnover rates for multifamily properties, with an average turnover rate of 16.7 percent.

According to the property managers, most of the surveyed LIHTC comparables are achieving maximum allowable rents. The surveyed family LIHTC properties were constructed from 1968 through 2006 and all offer some units at 30, 40, 50 and/or 60 percent of AMI. It should be noted that Cunningham Manor is currently undergoing renovations and is in the process of converting to a LIHTC property from a market rate property and some residents have been displaced during renovations. If Cunningham Manor is taken out of the analysis, the overall average vacancy rate for the surveyed LIHTC comparables is zero percent, which is considered excellent. Five of the seven surveyed family LIHTC properties currently maintain waiting lists, specifically for one-, two- and three-bedroom units.

LIHTC Senior Supply

We attempted to identify all existing, proposed, and under construction senior LIHTC developments in the Submarket using Novogradac's online database, LIHTC property inventories published by the Texas Department of Housing and Community Affairs, observations in the field, various Internet search methods, and interviews with local housing authorities, providers, and property managers. There are three existing senior LIHTC developments located in the South Cameron County Submarket. Sunset Haven is a senior-targeted LIHTC development located in Brownsville. The property was allocated in 2006 and consists of 100-units. As of the date of this report, our attempts to contact Sunset Haven both in person and over the phone have been unsuccessful. Villa del Sol is a senior-targeted LIHTC development located in Brownsville. The property was allocated in 2007 and consists of 199 units, 189 of which are LIHTC senior units. As of the date of this report, our attempts to contact Villa del Sol both in person and over the phone have been unsuccessful. Valley Resaca Palms is a senior-targeted LIHTC development located in Brownsville. The property was allocated in 1995 and consists of 250 units. As of the date of this report, our attempts to contact Valley Resaca Palms both in person and over the phone have been unsuccessful; however, it is possible that the property is out of the 15 year compliance period for LIHTC properties. There are no other existing senior LIHTC developments in this Submarket. Based on the lack of available data, we did not complete a LIHTC senior market analysis.

Proposed/Under Construction

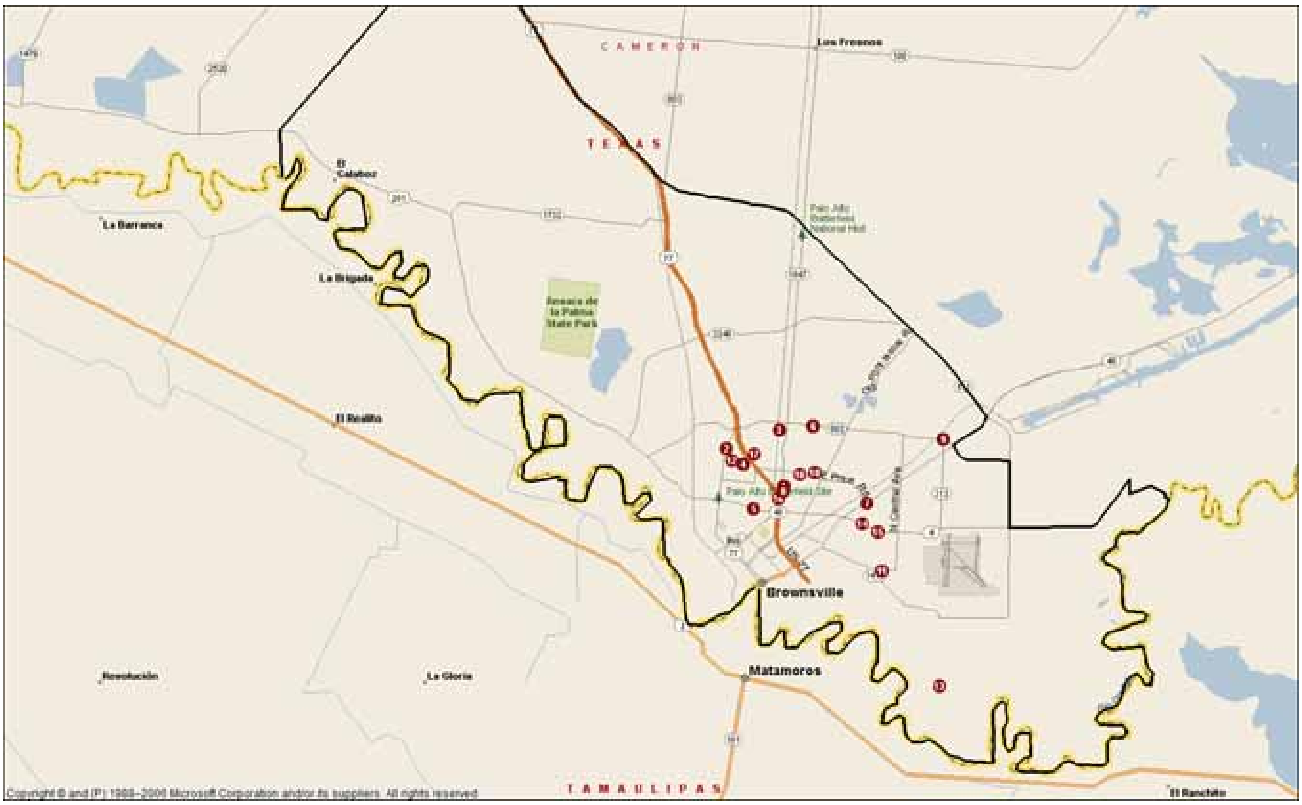
According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are no proposed or under construction senior LIHTC properties in the South Cameron County Submarket.

MARKET RATE FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials.

Novogradac was able to identify 34 market rate multifamily developments in the South Cameron County Submarket, but were only able to survey 18 of the properties.

The following map illustrates the location of the surveyed market rate family comparables in the Submarket.



SURVEYED PROPERTIES

Morningside Plaza Apartments	Brownsville	Market – Family	Could not contact
Travis Apartments	Brownsville	Market – Family	Could not contact
Olmito Garden Apartments	Olmito	Market – Family	Could not contact
Rancho Viejo Rentals	Brownsville	Market – Family	Could not contact

Proposed Construction

We attempted to contact the Planning Department of the City of Brownsville to obtain information on any multifamily development currently under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful. However, based on our physical inspection of the Submarket, there do not appear to be any multifamily developments currently under construction or in the planning stages.

Unit Mix

The following table illustrates the unit mix in the family market rate rental property market. It should be noted that La Residencia Apartments and Resaca Jardin were unable to provide unit mixes and have been excluded from this analysis.

Unit Mix - Market Family		
Unit Type	**Total Units**	**Percent**
Studio	48	2.7%
1 BR	734	41.6%
2 BR	822	46.5%
3 BR	158	8.9%
4 BR	4	0.2%
Total	**1,766**	**100%**

The majority of the market rate units in the Submarket are two-bedroom units, followed by one-bedroom units and three-bedroom units. Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.64 and is projected to decrease slightly by 2012 to 3.63. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 37 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Market data, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size

The following table illustrates the existing unit sizes in the family market rate rental property market.

Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
Studio	498	498	498
1 BR	528	814	668
2 BR	724	1,300	1,004
3 BR	1,000	1,600	1,257
4 BR	1,989	1,989	1,989

The surveyed market rate properties in the Submarket had a studio-bedroom average unit size of 498 square feet, a one-bedroom average unit size of 668 square feet, a two-bedroom average unit size of 1,004 square feet, a three-bedroom average unit size of 1,257 and a four-bedroom average unit size of 1,989 square feet.

The surveyed market rate properties in the West Cameron County Submarket offer a moderate amount of in-unit and community amenities. Four of the 18 surveyed properties offer security features of some kind.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties. It should be noted that La Residencia Apartments and Resaca Jardin were unable to provide vacancy by unit type and have been excluded from this analysis.

Weighted Vacancy - Market Family

Unit Type	Total Units	Vacant Units	Percent Vacant
Studio	48	4	8.3%
1 BR	734	10	1.4%
2 BR	822	29	3.5%
3 BR	158	3	1.9%
4 BR	4	0	0.0%
Total	**1,766**	**46**	**2.6%**

It should be noted that the average at La Residencia Apartments and Resaca Jardin is 1.9 percent.

Absorption

Two of the surveyed market rate comparables were able to provided absorption information. La Mansion Del Paseo opened in 2001 and reported an absorption pace of 12 units per month, for an absorption period of seven months. Las Palmas Apartments opened in 2002 and reported an absorption pace of 10 units per month, for an absorption period of approximately 14 months.

Waiting Lists

The following table lists the number of households on the waiting lists for the surveyed properties.

Waiting Lists – LIHTC Family		
Property Name	**Number of Units**	**Waiting List**
Bonaventure Apartments	100	15 HH for all unit types
Borders Apartments	296	None
Brazos on Colony Apartments	152	None
Casa Grande Apartments	116	None
La Hacienda Apartments	132	None
La Mansion Del Paseo	84	14 HH for 1BR and 3BR units
La Residencia Apartments	244	Yes, for 1BR and 3BR units
Landing Apartments	32	None
Las Brisas Apartments	72	None
Las Palmas Apartments	144	None
Las Resacas Apartments	92	None
Los Cedros	136	None
Marrr Apartments	66	None
Resaca Jardin	52	None
Towne East Apartments	76	None
Tulane Apartments	64	3 HH for 1BR units
Villa Madrid Apartments	172	10 HH 3BR units
Villas De San Miguel	32	Yes for 2 BR units

Six of the 18 surveyed family market rate properties currently maintain waiting lists. Waiting lists range in size from three households to 15 households for one-, two- and three-bedroom units.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Property Name	Rent Structure	Total Units	Vacant Units	Vacancy Rate
Bonaventure Apartments	Market	100	0	0.0%
Borders Apartments	Market	296	9	3.0%
Brazos On Colony Apartments	Market	152	12	7.9%
Casa Grande Apartments	Market	116	3	2.6%
La Hacienda Apartments	Market	132	3	2.3%
La Mansion Del Paseo	Market	84	0	0.0%
La Residencia Apartments	Market	244	5	2.0%
Landing Apartments	Market	32	0	0.0%
Las Brisas Apartments	Market	72	2	2.8%
Las Palmas Apartments	Market	144	1	0.7%
Las Resacas Apartments	Market	92	8	8.7%
Los Cedros Apartments	Market	136	2	1.5%
Marrr Apartments	Market	66	0	0.0%
Resaca Jardin	Market	52	0	0.0%
Towne East Apartments	Market	76	2	2.6%
Tulane Apartments	Market	64	0	0.0%
Villa Madrid Apartments	Market	172	0	0.0%
Villas De San Miguel	Market	32	0	0.0%
Total		**2,062**	**47**	**2.3%**

Vacancy rates range from zero percent to 8.7 percent, with an average vacancy rate of 2.3 percent, which is considered excellent.

Concessions

One of the market rate comparables is currently offering concessions. Brazos on Colony Apartments is offering $100 off the first month's rent for all units. Concessions do not appear to be common in the market, which is indicative of a strong rental housing market.

Turnover

The following table illustrates turnover information in the market.

Property Name	Rent Structure	Turnover
Bonaventure Apartments	Market	20%
Borders Apartments	Market	28%
Brazos on Colony Apartments	Market	40%
Casa Grande Apartments	Market	9%
La Hacienda Apartments	Market	27%
La Mansion Del Paseo	Market	40%
La Residencia Apartments	Market	30%
Landing Apartments	Market	40%
Las Brisas Apartments	Market	33%
Las Palmas Apartments	Market	12%
Las Resacas Apartments	Market	25%
Los Cedros Apartments	Market	31%
Marrr Apartments	Market	18%
Resaca Jardin	Market	23%
Towne East Apartments	Market	31%
Tulane Apartments	Market	20%
Villa Madrid Apartments	Market	24%
Villas De San Miguel	Market	25%
Total		**26.4%**

Annual turnover rates reported range from nine percent to 40 percent, with an average of 26.4 percent.

Rental Rate Analysis

Rent and Square Footage Ranking

Rent and Square Footage Ranking

2008 LIHTC Maximum Allowable Gross Rent Limits							
Bedrooms	30%	40%	50%	60%	80%	100%	FMR
Efficiency	$228	$305	$381	$457	$610	$762	$423
1 Bedroom	$245	$327	$408	$490	$698	$872	$488
2 Bedroom	$294	$392	$490	$588	$784	$980	$559
3 Bedroom	$340	$453	$566	$680	$872	$1,090	$691
4 Bedroom	$379	$506	$632	$759	$942	$1,177	$781
5 Bedroom	$418	$558	$698	$837	$1,012	$1,265	-

The average studio-bedroom market rate rent for the surveyed comparables is $409. The one-bedroom market rate rents for the surveyed comparables range from $395 to $779, with an average rent of $527. The two-bedroom market rate rents for the surveyed comparables range from $445 to $964, with an average rent of $646. The three-bedroom market rate rents for the surveyed comparables range from $525 to $1,010, with an average rent of $689. The average four-bedroom market rate rents for the surveyed comparables is $650. The studio-bedroom average market rent of $409 is above the LIHTC maximum allowable rent limits at 30, 40 and 50 percent AMI, but below the maximum allowable rent limits at 60, 80 and 100 percent of AMI, as well as the fair market rent. The one-bedroom average market rent of $527 is above the LIHTC maximum allowable rent limits at 30, 40, 50 and 60 percent of AMI, as well as the fair market rent but below the maximum allowable rent limits at 80 and 100 percent of AMI. The two-bedroom average market rent of $646 is above the LIHTC maximum allowable rent limits at 30, 40, 50 and 60 percent of AMI, as well as the fair market rent, but is below the LIHTC maximum allowable rents at 80 and 100 percent of AMI. The three-bedroom average market rent of $689 is above the LIHTC maximum allowable rents at 30, 40, 50 and 60 percent of AMI, but is below the maximum allowable rent limits at 80 and 100 percent of AMI, as well as the fair market rent. The four-bedroom average market rent of $650 is above the LIHTC maximum allowable rents at 30, 40 and 50 percent AMI, but below the maximum allowable rent limits at 60, 80 and 100 percent of AMI, as well as the fair market rent.

Market Supply Conclusion

We identified 34 market rate multifamily developments in the South Cameron County Submarket, but were only able to interview 18 of the properties.

The majority of the market rate units in the Submarket are two-bedroom units, followed by one-bedroom units and three-bedroom units. Small unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.64 and is projected to decrease slightly by 2012 to 3.63. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 37 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Market data, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

The surveyed market rate properties in the West Cameron County Submarket offer a moderate amount of in-unit and community amenities. Four of the 18 surveyed properties offer security features of some kind.

One of the market rate comparables is currently offering concessions. Brazos on Colony Apartments is offering $100 off the first month's rent for all units. Concessions do not appear to be common in the market. Six of the 18 surveyed family LIHTC properties currently maintain waiting lists. Waiting lists range in size from three households to 15 households for one-, two- and three-bedroom units. Two of the surveyed market rate comparables were able to provided absorption information. La Mansion Del Paseo opened in 2001 and reported an absorption pace of 12 units per month, for an absorption period of seven months. Las Palmas Apartments opened in 2002 and reported an absorption pace of 10 units per month, for an absorption period of approximately 14 months. Annual turnover rates reported range from nine percent to 40 percent, with an average of 26.4 percent. Vacancy rates range from zero percent to 8.7 percent, with an average vacancy rate of 2.3 percent, which is considered excellent.

MARKET RATE SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior-oriented market rate developments in the Submarket using Novogradac's online database, observations in the field, various Internet search methods, and interviews with local housing providers, property managers, and city and county planning and development officials. There were no identifiable senior market rate properties in the West Cameron County Submarket. Based on the lack of available data, we did not complete a market rate senior market analysis. There are no proposed or under construction market rate properties in the South Cameron County Submarket.

SUBSIDIZED FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family-oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

We identified 11 family subsidized properties and one family LIHTC/subsidized property in the Submarket, but were only able to interview six properties.

The following map illustrates the location of the surveyed subsidized comparables in the Submarket.

SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Ancira Apartments	Brownsville	Public Housing – Family
2	Bougainvillea Apartments	Brownsville	Public Housing – Family
3	Buena Vida Apartments	Brownsville	Public Housing – Family

Subsidized Multifamily Market

The following pictures identify the surveyed subsidized family properties in the Submarket.

Ancira Apartments

Bougainvillea Apartments

Buena Vida Apartments

Tropical Gardens at Boca Chica

Victoria Gardens

Rockwell Manor Apartments

Excluded Properties

The following table illustrates excluded family subsidized properties in the Submarket. We have only excluded properties that we were unable to contact either in person or over the phone or properties that are fully furnished and/or corporate apartments.

Name	Location	Type	Reason for Exclusion
Candlewick Townhomes	Brownsville	Section 8 – Family	Could not contact
El Santander	Brownsville	Section 8 – Family	Could not contact
Los Ebanos Apartments	Brownsville	Section 8 – Family	Could not contact

Proposed/Under Construction

We attempted to contact Yolanda Santa Maria in the Public Housing office of the Cameron County Housing Authority both in person and over the phone to determine if there are any public housing developments under construction or in the planning stages in the Submarket. As of the date of this report, our attempts have been unsuccessful.

Unit Mix

The following table illustrates the unit mix in the family subsidized rental property market. It should be noted that Ancira Apartments, Buena Vida Apartments and Victoria Gardens were unable to provide complete unit mixes and have been excluded from this analysis.

Unit Mix - Subsidized Family		
Unit Type	**Total Units**	**Percent**
1 BR	48	20.5%
2 BR	80	34.2%
3 BR	90	38.5%
4 BR	16	6.8%
Total	**234**	**100%**

The majority of the subsidized units in the Submarket are three-bedroom units, followed by two-bedroom units. Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.64 and is projected to decrease slightly by 2012 to 3.63. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, there are a large number of schools in the Submarket, suggesting that there is a high concentration of families in the area. Demographic estimates show that approximately 37 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient subsidized family developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size

There is an insufficient amount of subsidized multi-family development in the Submarket, on which to base an effective analysis of unit size. It should be noted that Bougainvillea Apartments and Victoria Gardens were unable to provide unit sizes. However, the following table illustrates the existing unit sizes in the subsidized rental property market.

Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	559	1,096	723
2 BR	682	1,450	961
3 BR	950	1,664	1,174
4 BR	1,142	1,142	1,142

The surveyed subsidized properties in the Submarket had a one-bedroom average unit size of 723 square feet, a two-bedroom average unit size of 961 square feet, a three-bedroom average unit size of 1,174 and a four-bedroom average unit size of 1,142 square feet.

The existing subsidized family properties in the South Cameron County Submarket offer limited in-unit and community amenities. The surveyed subsidized comparables offer no services, no security features and no premium amenities, with the exception of Tropical Gardens at Boca Chica, a LIHTC/Section 8/Market property. A basic appliance package is provided at all properties, with washer/dryer connections offered at four properties.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties. It should be noted that Ancira Apartments, Buena Vida Apartments and Victoria Gardens were unable to provide vacancy by unit type and have been excluded from this analysis.

Weighted Vacancy - Subsidized Family			
Unit Type	**Total Units**	**Vacant Units**	**Percent Vacant**
1 BR	48	0	0.0%
2 BR	80	1	1.3%
3 BR	90	0	0.0%
4 BR	16	0	0.0%
Total	**234**	**1**	**0.4%**

Absorption

Tropical Gardens at Boca Chica opened in 2006 and reported an absorption rate of 26 units per month, for an absorption period of approximately six months.

Waiting List

Tropical Gardens at Boca Chica maintains a waiting list of 28 households for the one-bedroom Section 8 units, 35 households for the two-bedroom Section 8 units and 16 households for the three-bedroom Section 8 units. The remaining surveyed subsidized developments draw tenants from the Brownsville Housing Authority Public Housing and Section 8 waiting list, which currently has 521 households on it and is between 6 months and a year in wait time. Based on the extensive waiting list for Public Housing and Section 8, we anticipate significant future demand for very low income affordable housing.

Vacancy Levels

The following table summarizes overall vacancy levels at the surveyed properties.

Property Name	Rent Structure	Total Units	Vacant Units	Vacancy Rate
Ancira Apartments	Public Housing	45	0	0.0%
Bougainvillea Apartments	Public Housing	50	1	2.0%
Buena Vida Apartments	Public Housing	N/A	1	N/A
Tropical Gardens at Boca Chica	LIHTC/Section 8	58	0	0.0%
Victoria Gardens	Public Housing	46	2	4.3%
Rockwell Manor Apartments	Section 8	126	0	0.0%
Total		**267**	**4**	**1.5%**

Vacancy rates range from zero percent to 4.3 percent, with an average vacancy rate of 1.5 percent, which is considered excellent.

Concessions
None of the subsidized family properties in the market are offering concessions.

Turnover
The following table illustrates turnover information in the market.

Property Name	Rent Structure	Turnover
Ancira Apartments	Public Housing	N/A
Bougainvillea Apartments	Public Housing	24%
Buena Vida Apartments	Public Housing	16%
Tropical Gardens at Boca Chica	LIHTC/Section 8	9%
Victoria Gardens	Public Housing	15%
Rockwell Manor	Section 8	N/A
Total		**16.0%**

Annual turnover rates reported range from nine percent to 24 percent, with an average of 16.0 percent.

Rental Rate Analysis

The rental rates displayed below have been adjusted for concessions.

Rent and Square Footage Ranking

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

There is an insufficient amount of subsidized multifamily developments in the Submarket, on which to base an effective rental rate analysis. As the surveyed subsidized properties are Public Housing and Section 8 developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The rental rates quoted above are “flat rents”. The flat rents at the surveyed subsidized properties are well below the payment standards for Cameron County. According to the Housing Authority of Brownsville, the Public Housing and Section 8 waiting list is 521 households long, indicating significant demand for very low income affordable housing.

Subsidized Family Supply Conclusion

We identified 11 family subsidized properties and one family LIHTC/subsidized property in the Submarket, but were only able to interview six properties.

The majority of the subsidized units in the Submarket are three-bedroom units, followed by two-bedroom units. Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.64 and is projected to decrease slightly by 2012 to 3.63. However, the Submarket’s household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Additionally, there are a large number of schools in the Submarket, suggesting that there is a high concentration of families in the area. Demographic estimates show that approximately 37 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient subsidized family developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

The existing subsidized family properties in the South Cameron County Submarket offer limited in-unit and community amenities. The surveyed subsidized properties offer no security features and no premium amenities, with the exception of Tropical Gardens at Boca Chica, a LIHTC/Section 8/Market property. A basic appliance package is provided at all properties, with washer/dryer connections offered at four properties.

None of the surveyed comparables are offering concessions. Tropical Gardens at Boca Chica reported an absorption rate of 26 units per month, for an absorption period of approximately six months. Tropical Gardens at Boca Chica maintains a waiting list of 28 households for the one-bedroom Section 8 units, 35 households for the two-bedroom Section 8 units and 16 households for the three-bedroom Section 8 units. The remaining surveyed subsidized developments draw tenants from the Brownsville Housing Authority Public Housing and Section 8 waiting list, which currently has 521 households on it and is between 6 months and a year in wait time. Based on the extensive waiting list for Public Housing and Section 8, we anticipate significant future demand for very low income affordable housing. Annual turnover rates reported range from nine percent to 24 percent, with an average of 16.0 percent. Vacancy rates range from zero percent to 4.3 percent, with an average vacancy rate of 1.5 percent, which is considered excellent.

There is an insufficient amount of subsidized multi-family development in the Submarket, on which to base an effective rental rate analysis. As the surveyed subsidized properties are Public Housing and Section 8 developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. The flat rents at the surveyed subsidized properties are well below the payment standards for Cameron County. According to the Housing Authority of Brownsville, the Public Housing and Section 8 waiting list is 521 households long, indicating significant demand for very low income affordable housing.

SUBSIDIZED SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

There are three existing senior Section 8 subsidized developments located in the South Cameron County Submarket. Casa de Amigos I is a senior targeted subsidized development which consists of one- and two-bedroom units and is located in Brownsville. Casa Del Mar Apartments is a senior targeted subsidized development which consists of one-bedroom units and is located in Brownsville. Lindale Village Apartments is a senior targeted subsidized development which consists of one-bedroom units and is located in Brownsville. Despite numerous attempts to contact these properties both in person and over the phone, our attempts have been unsuccessful as of the date of this report. There are no other existing senior targeted subsidized developments in this Submarket. Based on the lack of available data, no analysis was made of the senior subsidized market as the single subsidized senior development was unavailable.

There are no proposed or under construction subsidized senior properties in the South Cameron County Submarket.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the South Cameron County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the South Cameron County Submarket in 2007 is 53,806 and the total number of households in 2012 is projected to be 60,471. The total number of households age 55 and older in the Submarket for 2007 is 17,493, with a 2012 projection of 21,370 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 34.4 percent of the occupied housing unit households in the South Cameron County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 23.0 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a one-person household in the income range between 31 percent and 40 percent of AMI. A minimum

income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the South Cameron County Submarket (Brownsville-Harlingen, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*	
1 Person	$0	$9,150	$9,150	$12,200	$12,200	$15,250	$15,250	$18,300	$18,300	$24,400	$24,400	$30,500
2 Person	$0	$10,500	$10,500	$13,960	$13,960	$17,450	$17,450	$20,940	$20,940	$27,920	$27,920	$34,900

5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households

Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the South Cameron County Submarket, approximately 33.8 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing

Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 2.0 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing

A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the South Cameron County Submarket, it is estimated that 26.3 percent of households are living in overcrowded units.

Movership or Turnover Rate

There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the stabilized family LIHTC properties surveyed in the Submarket is approximately 16.7 percent.

Attempts to contact the three identified senior LIHTC properties in this Submarket were unsuccessful as of the date of this report. Additionally, despite several attempts, we have been unable to contact the one senior subsidized property identified in the Submarket. Therefore, for the purpose of this analysis, we have used the average of all senior LIHTC and subsidized properties identified and surveyed in the MSA. This average turnover rate is 24 percent.

Unstabilized Rental Units - Existing and Proposed

To our knowledge, there are no proposed or under construction subsidized or LIHTC properties in the South Cameron County Submarket. Therefore, no units were deducted from the senior demand analysis.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the South Cameron County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Household Size	Total Renters - Baseline Year (2007)	Income-Qualified Renters - Baseline Year (2007)

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the South Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. It is estimated that by 2012, there will be an additional 828 renter households earning below 30 percent of the AMI. When this number is refined to account for households paying more than 35 percent of income as rent, households living in substandard units, households living in overcrowded conditions and turnover, there is potential demand from 653 of these households. With no additional planned subsidized or LIHTC units, and near 100 percent occupancy of existing affordable units, it is highly likely that there will be a continuing need for affordable housing in the Submarket.

Senior Households

Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. In fact, senior households account for nearly 30 percent of the potential demand in the Submarket for units at less than 30 percent of the AMI. With no additional LIHTC or subsidized units for seniors planned, there is likely a continuing need for additional affordable senior housing units in this Submarket.

3. CENTRAL CAMERON COUNTY SUBMARKET ANALYSIS

CENTRAL CAMERON COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the Central Cameron County Submarket, which is bounded to the north by Fresnol Road, FM 1561 and General Brant Road; to the east by San Roman Road and Old Port Isabel Road; to the south by US Highway 77 and FM 511; and to the west by Nelson Road/Cosey Road. The following map illustrates the boundaries of the Submarket as defined above.

Central Cameron County Submarket Map

The Central Cameron County Submarket includes the cities of Los Fresnos, Laureles and Rio Hondo. This Submarket is characterized primarily by vacant land and small communities proximate to limited locational amenities and essential services. The predominant form of housing in this Submarket is owner-occupied single-family homes in poor to very good condition and less than 5 to 40 years in age. There is limited multi-family development in fair to very good condition and five to 20 years in age.

Local Government

As previously mentioned, the West Hidalgo County Submarket includes the cities of Los Fresnos, Laureles and Rio Hondo.

Los Fresnos, Texas is a city in Cameron County and operates under a mayor-council form of government with four elected council members. According to the U.S. Census, Los Fresnos is comprised of a land area of 2.5 square miles and had a 2000 population of 4,512.

Rio Hondo, Texas is a city in Cameron County and operates under a mayor-council form of government. According to the U.S. Census, Rio Hondo is comprised of a land area of 1.5 square miles and had a 2000 population of 1,942.

Laureles, Texas is a census-designated place (CDP) in Cameron County. According to the U.S. Census, Laureles is comprised of a land area of 4.9 square miles and had a 2000 population of 3,285.

Employment by Industry

The table on the following page illustrates employment by industry for the Central Cameron County Submarket and Brownsville-Harlingen, TX MSA in 2007.

2007 EMPLOYMENT BY INDUSTRY

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the Central Cameron County Submarket are the educational services, health care/social assistance, retail trade and construction sectors. Approximately 50 percent of people in Central Cameron County work in these four industries. The Central Cameron County Submarket has a larger number of persons employed in the health care/social assistance, construction and educational services sectors and a smaller number of people employed in the retail trade sectors, relative to the MSA. Although, educational services and health care/social services are typically stable sectors of the economy, industries such as retail trade and construction are particularly susceptible to fluctuations in the health of the economy. The large number of people employed in the retail trade and construction industries could negatively impact employment in the Central Cameron County Submarket, due to the current national economic downturn. However, the strong presence of the educational services and health care/social assistance industries should help bolster the economic stability of the Central Cameron County Submarket.

It should be noted, that the health care/social assistance, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing in the Submarket.

Commute Patterns for the Central Cameron County Submarket
The following table shows the commute times for the Central Cameron County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	295
5-9 min	746
10-14 min	684
15-19 min	998
20-24 min	1,389
25-29 min	590
30-34 min	1,918
35-39 min	126
40-44 min	205
45-59 min	429
60-89 min	160
90+ min	123
Average Travel Time	24.4 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The average reported commute time of 24.4 minutes is the highest of the four Submarkets in the MSA. This submarket encompasses the rural area between Harlingen and Brownsville. Local workers commuting to jobs in either city are likely responsible for the longer than average commute times.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the Central Cameron County Submarket and Brownsville-Harlingen, TX MSA. Data such as population, households and growth patterns are studied, to determine if the Brownsville-Harlingen, TX MSA and the Central Cameron County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the Central Cameron County Submarket and Brownsville-Harlingen, TX MSA from 1990 through 2012.

Total Population				
Year	Central Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	14,325	-	260,120	-
2000	23,481	6.39%	335,227	2.89%
2007	28,236	2.79%	395,867	2.50%
2012	31,693	2.45%	440,440	2.25%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

Growth in the Submarket has been slightly faster than growth in the MSA in all years of analysis. This is likely due to the largely undeveloped nature of the Central Cameron County Submarket. The majority of population growth in the MSA is located near the U.S. – Mexico border. However, both the Submarket and the MSA are showing strong growth from 2007 through 2012, although the MSA will grow at a slightly slower rate than the Submarket from 2007 through 2012. The strong growth in the Submarket and the MSA is a positive indicator of the need for the affordable housing and likely why so many individuals are employed in the construction sector in the Submarket.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990 through 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group				
Central Cameron County Submarket

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	Central Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	4,031	-	73,278	-
2000	6,573	6.31%	97,267	3.27%
2007	7,955	2.90%	115,756	2.62%
2012	8,956	2.52%	129,335	2.35%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been strong through 2007; however, household growth in the Submarket slowed significantly from 2000 to 2007. Household growth in the MSA and Submarket is expected to slow slightly from 2007 through 2012.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	Central Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	3.57	-	3.40	-
2007	3.55	-0.08%	3.38	-0.08%
2012	3.54	-0.06%	3.37	-0.06%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The average household size in the Submarket is slightly larger than the MSA, and both are larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket, but especially the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	Central Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	23,773	-	26,156	-
2007	28,616	2.81%	31,956	3.06%
2012	32,818	2.94%	36,654	2.94%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The median household income in the Submarket was approximately 11.7 percent lower than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a slightly faster rate from 2007 through 2012 than the previous seven years. The lower median income level indicates increasing need for affordable housing in the Submarket.

Household Income

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

As illustrated, approximately 35 percent of the population in the Submarket and 32.5 percent of the population in the MSA earned below $20,000 in 2007. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 31 percent and 28.7 percent, respectively, but in both instances, a significant portion of the population are projected to earn less than $20,000. This data provides strong support for affordable rental housing in the Submarket and MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 65 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents to be over 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	Central Cameron County Submarket		Brownsville - Harlingen, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	2,636	-	46,569	-
2000	3,920	4.9%	61,192	3.1%
2007	4,880	3.4%	73,931	2.9%
2012	6,082	4.9%	89,074	4.1%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

As the table illustrates, similar to the general population trends, the senior population in both the Submarket and the MSA increased between 2000 and 2007. Senior population growth in the Central Cameron County Submarket increased at a faster rate than the MSA from 2000 and 2007. Senior population growth in both the Central Cameron County Submarket and the MSA is expected to grow at a similar rate from 2007 through 2012.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	Central Cameron County Submarket		Brownsville - Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	2,315	-	35,359	-
2007	2,825	3.0%	42,259	2.7%
2012	3,451	4.4%	50,724	4.0%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth is expected to be positive through 2012. However in contrast to senior population estimates, the household growth rate is expected to increase significantly through 2012. The strong projected growth in the senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME

Year	Brownsville-Harlingen, TX MSA		Central Cameron County Submarket		USA	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
			All Ages			
2007	$31,956	-	$28,616	-	$53,154	-
2012	$36,654	2.94%	$32,818	2.94%	$62,503	3.52%
			Age 55+			
2007	$28,614	-	$28,748	-	$32,710	-
2012	$34,145	3.87%	$32,901	2.89%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in the MSA and USA are below those of all households. However, in the Central Cameron County Submarket, the median senior household income is above that of all households in both 2007 and 2012. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - Central Cameron County Submarket (Age 55+)				
Income Cohort	2007		2012

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. Among these locations, the Submarket has the largest percentage of seniors earning less than $35,000 annually. Approximately 60.2 percent of those 55 and older in the Submarket are earning under $35,000 per year. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually and the rural nature of the submarket. The Submarket features significantly more senior households in these income brackets when compared to the MSA. By 2012, all areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 52.7 and 48.5 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. Furthermore, the majority of senior households within the PMA will be earning less than $25,000, which is below the current AMI. This indicates that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	Central Cameron County Submarket				Brownsville-Harlingen, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	2,048	88.5%	267	11.5%	28,551	80.7%	6,808	19.3%
2007	2,499	88.5%	326	11.5%	34,122	80.7%	8,137	19.3%
2012	3,053	88.5%	398	11.5%	40,958	80.7%	9,766	19.3%
Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008								

As the above table illustrates, the senior housing market is dominated by owner-occupied units. The Submarket has a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above) and the MSA. The small percentage of renter-occupied senior households is not unusual in rural submarkets, where owner-occupied housing is predominant among a reduced population

Senior Demographic Conclusion

The median senior household incomes in the MSA and USA are below those of all households. However, in the Central Cameron County Submarket, the median senior household income is above that of all households in both 2007 and 2012. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. Both the MSA and Submarket significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. Approximately 60.2 percent of those 55 and older in the Submarket are earning under $35,000 per year. This is attributable primarily to the Submarket's high percentage of senior households earning below $15,000 annually and the rural nature of the Submarket. The Submarket features significantly more senior households in these income brackets when compared to the MSA and national averages. The national average of senior households earning below $50,000 annually is 64 percent.

LOCAL MARKET INFORMATION

Central Cameron County Submarket
The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare
There are no hospitals or urgent care clinics located in the in the Central Cameron County Submarket. The primary major medical providers within proximity to the Central Cameron County Submarket are the Valley Baptist Medical Center and the Harlingen Medical Center, both in Harlingen. The closest hospital to the Central Cameron County Submarket is the Valley Baptist Medical Center, located approximately 5.8 miles east of the Submarket.

Transportation
The Central Cameron County Submarket is served by the Valley International Airport, which is located approximately 5.7 miles east of the Submarket, in Harlingen, Texas. The Valley International Airport provides non-stop flights to Dallas-Love Field, Houston-Hobby, Houston-Intercontinental and Austin via Continental Airlines, ExpressJet Airlines and Southwest Airlines.

Highway access to the West Hidalgo County Submarket can be accomplished via US Highway 77. US Highway 77 runs north/south from Sioux City, Iowa to Brownsville, Texas.

Education
The Central Cameron County Submarket is served by the Los Fresnos Consolidated Independent School District and the Rio Hondo Independent School District. The Los Fresnos Consolidated Independent School District has eight elementary schools, three middle schools and one high school. The Rio Hondo Independent School District has one elementary school (Grades PreK-2), one intermediate school (Grades 3-5), one middle school and one high school. The nearest universities are located in Brownsville and Harlingen. The University of Texas at Brownsville (UTB) and Texas Southmost College (TSC) are located in Brownsville, approximately 7.0 miles east of the Central Cameron County Submarket. The partnership between UTB and TSC offers Certificates and Associate, Bachelor and Graduate degrees in liberal arts, the sciences and professional programs.

Public Transportation
The Central Cameron County Submarket does not offer public transportation.

Employment Centers

There are a limited number of employment centers in the Central Cameron County Submarket. The majority of employment centers are located in Brownsville and Harlingen. It should be noted that the number of employees for the Brownsville major employers was not available at the time of this report. The largest employers in the cities of Brownsville and Harlingen include the following:

Brownsville Top Ten Employers

Rank	Company	Industry
1	Brownsville Independent School District	Education

1950-1959	357	4.43%
1940-1949	280	3.47%
1939 and Before	349	4.33%
Total	**8,061**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

The majority of the housing stock (73.07 percent) in the Central Cameron County Submarket was constructed from 1970 through 1998. This Submarket is characterized primarily by vacant land and small communities proximate to limited locational amenities and essential services. The predominant form of housing in this Submarket is owner-occupied single-family homes in poor to very good condition and less than 5 to 40 years in age. There is limited multi-family development in fair to very good condition and five to 20 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2007 for Cameron County, Texas. Data was not available for 2008. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Cameron County, TX - 1997 to 2007				
Year	**Single-family and Duplex**	**Three and Four-Family**	**Five or More Family**	**Total Units**
1997	1,601	40	257	1,898
1998	1,400	166	161	1,727
1999	1,058	229	150	1,437
2000	2,086	121	150	2,357
2001	1,595	142	102	1,839
2002	2,211	136	475	2,822
2003	3,200	81	163	3,444
2004	2,203	198	213	2,614
2005	1,981	197	116	2,294
2006	2,670	74	261	3,005
2007	1,800	131	138	2,069
Total	**21,805**	**1,515**	**2,186**	**25,506**
Average	**1,982**	**138**	**199**	**2,319**

There were 2,186 “5+ units” building permits issued in Cameron County from 1997 to 2007. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2007, at 85 percent, while “5+ units” building permits constitute approximately 8.6 percent of all permits issued from 1997 through 2007. The small percentage of multifamily permits issued indicates demand for multi-family housing of all kinds.

Interviews

Cameron County Housing Authority

We spoke with Guadalupe Garcia with the Cameron County Housing Authority. According to Ms. Garcia, the Housing Authority is allocated 1,080 Housing Choice Vouchers and 1,006 vouchers are currently in use. Ms. Garcia estimated that there were 878 households on the waiting list as of July 2008 and the waiting list is currently open. The current payment standards for one-, two-, three-, and four-bedroom units are listed below.

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

Los Fresnos Housing Authority

We spoke with Carmen Silva, Director of the Los Fresnos Housing Authority. According to Ms. Silva, the housing authority has 102 Housing Choice Vouchers designated for the city of Los Fresnos. All 102 vouchers are currently in use. The waiting list is currently closed and has approximately 100 households on it. There are approximately six senior households on the waiting list. The housing authority owns three public housing developments in Los Fresnos, for a total of 38 units. These developments are discussed in detail in the subsidized supply analysis section later in this report. The payment standards for the Los Fresnos Housing Authority are below:

PAYMENT STANDARDS

Units	Payment Standards
Studio	$423
One-bedroom	$488
Two-bedroom	$559
Three-bedroom	$691
Four-bedroom	$781

Los Fresnos and Rio Hondo Planning and Development

We attempted to contact the planning departments of the cities of Los Fresnos and Rio Hondo to determine if there are any multifamily developments under construction or coming down the pipeline in the Submarket. Despite numerous attempts to contact the planning departments both in person and over the phone, our attempts have been unsuccessful as of the date of this report. However, based on our physical site inspection of the Submarket, there do not appear to be any multifamily developments under construction or in the planning stages in the Submarket at this time.

LIHTC SUPPLY
There are no existing LIHTC developments in this Submarket. Based on the lack of available data, we did not complete a LIHTC family or senior supply analysis.

Proposed/Under Construction
According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are no LIHTC family or senior properties that have received an allocation in the Submarket.

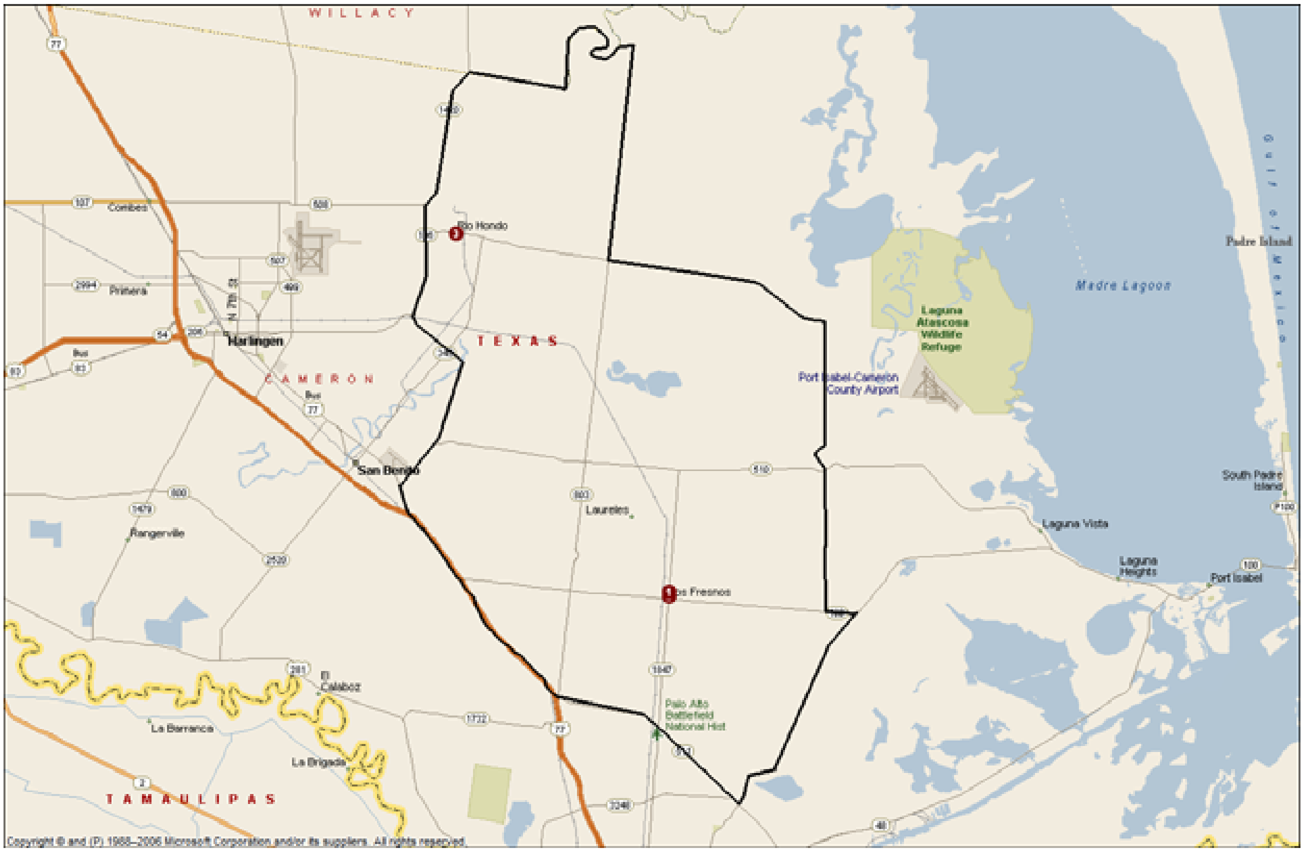
MARKET RATE SUPPLY
There are no existing market rate developments in the Submarket. Based on the lack of available data, we did not complete a market rate family or senior supply analysis.

Proposed/Under Construction
We attempted to contact the planning departments of the cities of Los Fresnos and Rio Hondo to determine if there are any multifamily developments under construction or coming down the pipeline in the Submarket. Despite numerous attempts to contact the planning departments both in person and over the phone, our attempts have been unsuccessful as of the date of this report. However, based on our physical site inspection of the Submarket, there do not appear to be any multifamily developments under construction or in the planning stages in the Submarket at this time.

SUBSIDIZED FAMILY SUPPLY
We attempted to identify all existing, proposed, and under construction family-oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

We identified and interviewed three family subsidized properties in the Submarket, Loma Linda Apartments, Villa de Carmen and Rio Hondo Village.

The following map illustrates the location of the surveyed subsidized family comparables in the Submarket.



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Loma Linda Apartments	Los Fresnos	Public Housing – Family
2	Villa De Carmen	Los Fresnos	Public Housing – Family
3	Rio Hondo Village	Rio Hondo	Section 8 - Family

Subsidized Multifamily Market

The following pictures identify the surveyed subsidized family properties in the Submarket.

Loma Linda Apartments

Villa De Carmen

Rio Hondo Village

Excluded Properties

We were able to interview all identified family subsidized properties in the Submarket and have not excluded any properties.

Proposed/Under Construction

According to Carmen Silva, Director of the Los Fresnos Housing Authority, there are not public housing units under construction or in the planning stages in the Submarket.

Unit Mix
The following table illustrates the unit mix in the family subsidized rental property market.

Unit Mix - Subsidized Family		
Unit Type	**Total Units**	**Percent**
1 BR	8	9.9%
2 BR	26	32.1%
3 BR	41	50.6%
4 BR	6	7.4%
Total	**81**	**100%**

The majority of the subsidized units in the Submarket are three-bedroom units, followed by two-bedroom units. Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.55 and is projected to decrease slightly by 2012 to 3.54. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 37 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient subsidized family developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

Unit Size
The following table illustrates the existing unit sizes in the subsidized family rental property market.

Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	725	725	725
2 BR	800	824	812
3 BR	987	1,100	1,029
4 BR	1,200	1,788	1,494

The surveyed family subsidized properties in the Submarket had a one-bedroom average unit size of 725 square feet, a two-bedroom average unit size of 812 square feet, a three-bedroom average unit size of 1,029 and a four-bedroom average unit size of 1,494 square feet.

The existing subsidized family properties in the South Cameron County Submarket offer limited in-unit and community amenities. Washer/dryer hookups are common in the market. A basic appliance package is provided at all properties.

By-Unit Weighted Vacancy

The following table illustrates vacancy by unit type, for the surveyed properties.

Weighted Vacancy - Subsidized Family			
Unit Type	Total Units	Vacant Units	Percent Vacant
1 BR	8	0	0.0%
2 BR	26	0	0.0%
3 BR	41	0	0.0%
4 BR	6	0	0.0%
Total	**81**	**0**	**0.0%**

Absorption

None of the surveyed subsidized family comparables were able to provide absorption information.

Waiting List

Loma Linda Apartments and Villa De Carmen draw tenants from the Los Fresnos Housing Authority Public Housing waiting list, which currently has 25 households on it. Rio Hondo Village maintains a waiting list of approximately 20 households for all unit types. Based on the waiting lists for Public Housing and Section 8 units, we anticipate significant future demand for very low income affordable housing.

Vacancy Levels

All surveyed subsidized family properties have a vacancy rate of zero percent, which is indicative of significant demand for very low income affordable housing.

Concessions

None of the subsidized family properties in the market are offering concessions.

Turnover

The following table illustrates turnover information in the market.

Property Name	Rent Structure	Turnover
Loma Linda Apartments	Public Housing	10%
Villa De Carmen	Public Housing	12%
Rio Hondo Village	Section 8	24%
Total		**15.3%**

Annual turnover rates reported range from 10 percent to 24 percent, with an average of 15.3 percent.

Rental Rate Analysis

Rent and Square Footage Ranking

CAMERON COUNTY HOUSING AUTHORITY PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

There is an insufficient amount of subsidized family development in the Submarket, on which to base an effective rental rate analysis. Loma Linda and Villa De Carmen were unable to provide rents; however, as they are Public Housing developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. Rio Hondo Village was able to provide "flat rents". The flat rents at Rio Hondo Village are well below the payment standards for Cameron County.

Subsidized Family Supply Conclusion

We identified and interviewed three family subsidized properties in the Submarket, Loma Linda Apartments, Villa de Carmen and Rio Hondo Village.

The majority of the subsidized units in the Submarket are three-bedroom units, followed by two-bedroom units. Large unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.55 and is projected to decrease slightly by 2012 to 3.54. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 37 percent of the population in 2007 was age 19 years or younger. This trend is expected to remain stable through 2012. Though there is a lack of sufficient subsidized family developments on which to base an effective analysis, demographic projections and anecdotal evidence indicate a possible unmet demand for larger bedroom types.

The existing subsidized family properties in the South Cameron County Submarket offer limited in-unit and community amenities. Washer/dryer hookups are common in the market. A basic appliance package is provided at all properties.

None of surveyed comparables are offering concessions. None of the surveyed subsidized family comparables were able to provide absorption information. Loma Linda Apartments and Villa De Carmen draw tenants from the Los Fresnos Housing Authority Public Housing waiting list, which currently has 25 households on it. Rio Hondo Village maintains a waiting list of approximately 20 households for all unit types. Based on the waiting lists for Public Housing and Section 8 units, we anticipate significant future demand for very low income affordable housing. Annual turnover rates reported range from 10 percent to 24 percent, with an average of 15.3 percent. All surveyed subsidized family properties have a vacancy rate of zero percent, which is indicative of significant demand for very low income affordable housing.

There is an insufficient amount of subsidized family development in the Submarket, on which to base an effective rental rate analysis. Loma Linda and Villa De Carmen were unable to provide

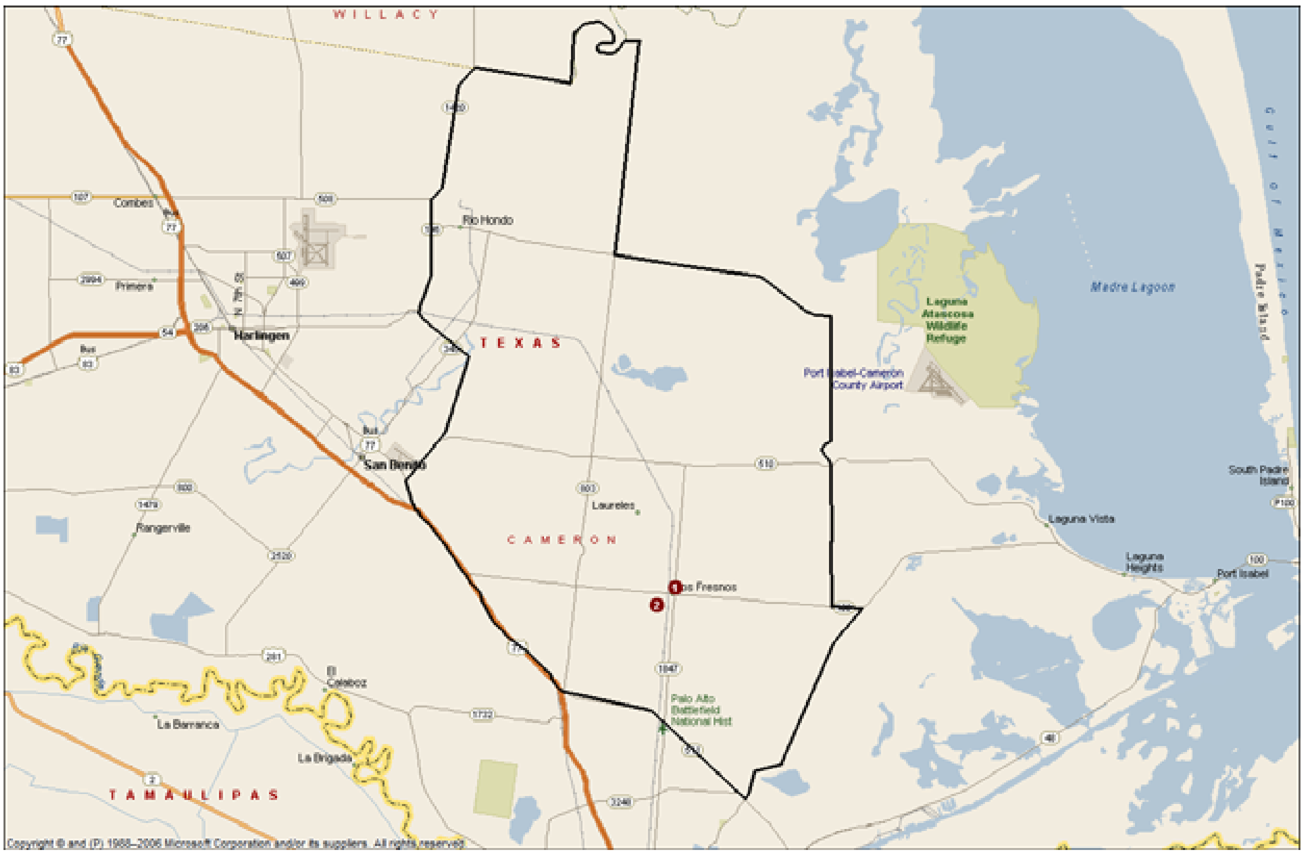
rents; however, as they are Public Housing developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent. Rio Hondo Village was able to provide “flat rents”. The flat rents at Rio Hondo Village are well below the payment standards for Cameron County.

SUBSIDIZED SENIOR SUPPLY

We attempted to identify all existing, proposed, and under construction senior subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

We identified and interviewed two senior subsidized properties in the Submarket, Hibiscus Apartments and Raintree Apartments.

The following map illustrates the location of the surveyed subsidized senior comparables in the Submarket.



SURVEYED PROPERTIES			
Number	**Name**	**Location**	**Type**
1	Hibiscus Apartments	Los Fresnos	Public Housing – Senior
2	Raintree Apartments	Los Fresnos	USDA - Senior

Subsidized Senior Market
The following pictures identify the surveyed subsidized senior properties in the Submarket.

Hibiscus Apartments

Raintree Apartments

Excluded Properties
We were able to interview all identified senior subsidized properties in the Submarket and have not excluded any properties.

Proposed/Under Construction
According to Carmen Silva, Director of the Los Fresnos Housing Authority, there are no public housing units under construction or in the planning stages in the Submarket.

Unit Mix

The following table illustrates the unit mix in the senior subsidized rental property market.

Unit Mix - Subsidized Family		
Unit Type	**Total Units**	**Percent**
1 BR	28	73.7%
2 BR	10	26.3%
Total	**38**	**100%**

The majority of the subsidized units in the Submarket are one-bedroom units, followed by two-bedroom units. Smaller unit types are currently prevalent in the Submarket. Demographic projections show that the average household size in the Submarket in 2007 was 3.55 and is projected to decrease slightly by 2012 to 3.54. However, the Submarket's household size is still significantly larger than the national average of 2.59 and just slightly larger than that of the MSA. Demographic estimates show that approximately 17 percent of the population in 2007 was age 55 years or older. This trend is expected to remain stable through 2012.

Unit Size

The following table illustrates the existing unit sizes in the subsidized senior rental property market.

Unit Type	Surveyed Min	Surveyed Max	Surveyed Average
1 BR	500	500	500
2 BR	700	750	725

The surveyed senior subsidized properties in the Submarket had a one-bedroom average unit size of 500 square feet and a two-bedroom average unit size of 725 square feet.

Raintree Apartments maintains a waiting list of approximately 15 households for all unit types. Based on the waiting lists for Public Housing and Section 8 units, we anticipate significant future demand for very low income affordable housing. Annual turnover rates reported range from 10 percent to 50 percent, with an average of 30 percent. All surveyed subsidized senior properties have a vacancy rate of zero percent, which is indicative of significant demand for very low income affordable housing.

There is an insufficient amount of subsidized senior development in the Submarket on which to base an effective rental rate analysis. Hibiscus Apartments and Raintree Apartments were unable to provide rents; however, as they are Public Housing developments, tenants can pay from zero up to 30 percent of their gross annual income towards rent.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the Central Cameron County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the Central Cameron County Submarket in 2007 is 7,955 and the total number of households in 2012 is projected to be 8,956. The total number of households age 55 and older in the Submarket for 2007 is 2,825, with a 2012 projection of 3,451 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 17.1 percent of the occupied housing unit households in the Central Cameron County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 11.5 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a

one-person household in the income range between 31 percent and 40 percent of AMI. A minimum income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the Central Cameron County Submarket (Brownsville-Harlingen, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income

5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households
Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the Central Cameron County Submarket, approximately 24.1 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing
Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 3.9 percent of units in the Submarket are determined to be substandard. Of the four Cameron County Submarkets, the Central Cameron County Submarket has the highest percentage of substandard units.

Overcrowded Housing
A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the Central Cameron County Submarket, it is estimated that 23.7 percent of households are living in overcrowded units.

Movership or Turnover Rate
There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. There are no family LIHTC properties identified in the Submarket. Therefore, we have used the average annual turnover rate for the subsidized family properties surveyed in the Submarket, which is 15.3 percent.

We were unable to identify any senior LIHTC properties in this Submarket. Therefore, for the purpose of this analysis, we have used the Submarket's average subsidized turnover rate of 30 percent.

Unstabilized Rental Units - Existing and Proposed
To our knowledge, there are no proposed or under construction subsidized or LIHTC properties in the Central Cameron County Submarket. Therefore, no units were deducted from the demand analysis.

Annual Income-Qualified Renter Demand
Provided below are calculations of the total number of existing income-qualified renter households in the Central Cameron County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

Demand Analysis Conclusions

All Households

As will the other Submarkets, the analysis of income-qualified renter households in the Central Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that over 26 percent of households in the Submarket earn less than $15,000 annually. Currently, there are no LIHTC units serving the affordable housing needs of residents in the Submarket. The 81 units of subsidized housing for families in the Submarket are 100 percent occupied, with waiting lists reported. This evidence, along with the analysis of income-qualified renter households, indicates that there is a persistent need in the Submarket for additional affordable housing units targeting families. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households.

Senior Households

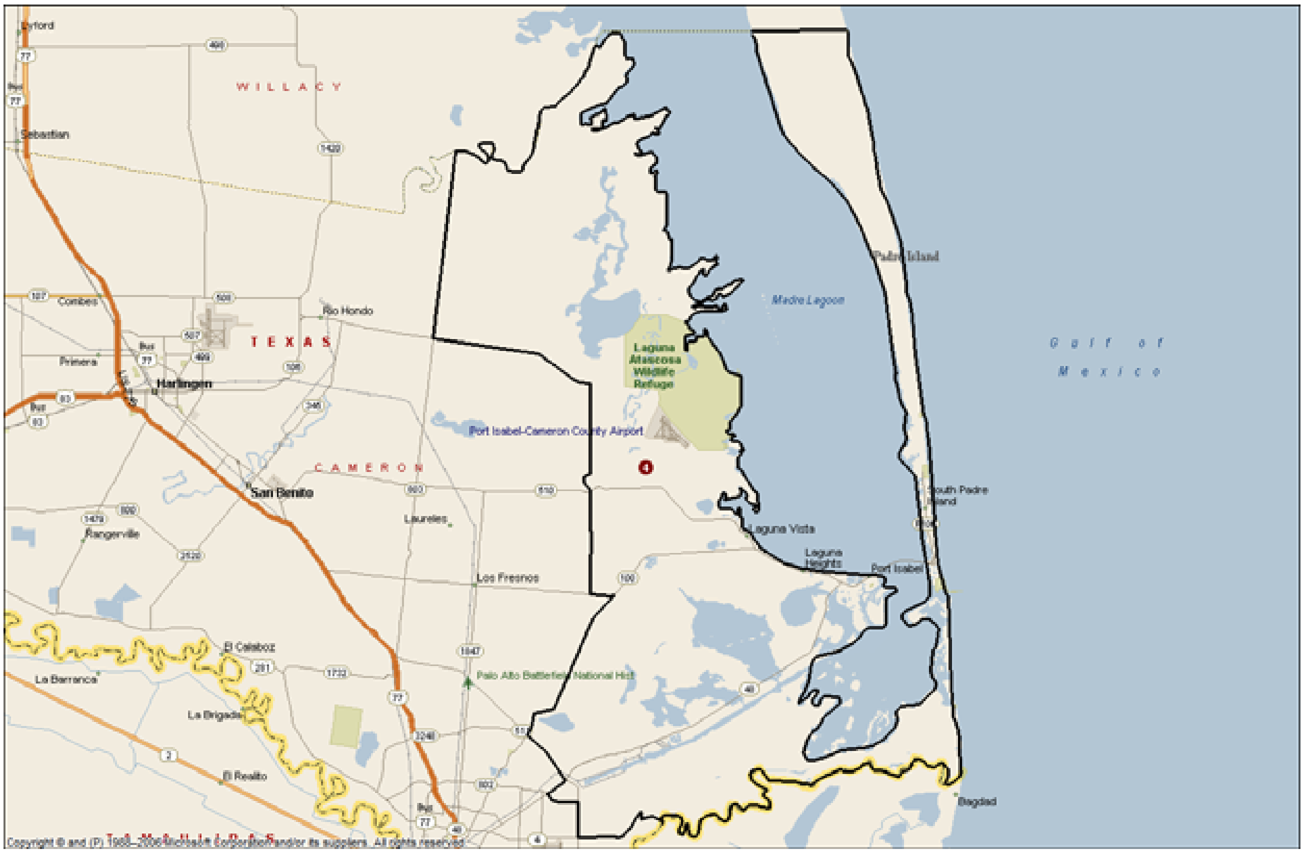
Demand from income-qualified senior renter households generally mirrors that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI. Similarly, there are no LIHTC units and only 38 subsidized units serving low-income senior households in the Central Cameron County Submarket and an increase in income-qualified senior renter households projected through 2012. With no additional LIHTC units planned, and waiting lists reported at the two existing subsidized senior developments, there is likely an unmet need for additional affordable senior housing units in this Submarket.

4. EAST CAMERON COUNTY SUBMARKET ANALYSIS

EAST CAMERON COUNTY SUBMARKET DEMOGRAPHIC CHARACTERISTICS AND TRENDS

The primary market area is defined as the East Cameron County Submarket, which is bounded to the north by General Brant Road; to the east by the Gulf of Mexico; to the south by the Cameron County line and to the west by San Roman Road and Old Port Isabel Road. The following map illustrates the boundaries of the Submarket as defined above.

East Cameron County Submarket Map



The East Cameron County Submarket includes the communities/cities of Laguna Vista, Laguna Heights, Port Isabel and South Padre Island. This Submarket is characterized primarily by areas of limited development proximate to limited locational amenities and essential. The predominant form of housing in this Submarket is owner-occupied single-family homes in poor to very good condition and less than five to 40 years in age. There is a limited amount of multi-family development in fair to good condition and less than five to 30 years in age.

Local Government

As previously mentioned, the East Cameron County Submarket includes the communities/cities of Laguna Vista, Laguna Heights, Port Isabel and South Padre Island.

Laguna Vista, Texas is a town in Cameron County. According to the U.S. Census, Laguna Vista is comprised of a land area of 2.2 square miles and had a 2000 population of 1,658.

Laguna Heights, Texas is a census-designated place in Cameron County. According to the U.S. Census, Laguna Heights is comprised of a land area of 0.3 square miles and had a 2000 population of 1,990.

Port Isabel, Texas is a city in Cameron County. According to the U.S. Census, Port Isabel is comprised of a land area of 2.9 square miles and had a 2000 population of 4,865.

South Padre Island, Texas is a resort community in Cameron County. According to the U.S. Census, South Padre Island is comprised of a land area of 1.9 square miles and had a 2000 population of 2,422.

Employment by Industry

The table on the following table illustrates employment by industry for the East Cameron County Submarket and Brownsville-Harlingen, TX MSA in 2007.

2007 EMPLOYMENT BY INDUSTRY

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The top four employment sectors in the East Cameron County Submarket are the accommodation/food services, educational services, retail trade and construction industries. Approximately 46.9 percent of people in East Cameron County work in these four industries. The East Cameron County Submarket has a larger number of persons employed in the accommodation/food services industry and a smaller number of people employed in the educational services, retail trade and construction industries, relative to the MSA. Although, educational services is a typically stable sector of the economy, industries such as accommodation/food services, retail trade and construction are particularly susceptible to fluctuations in the health of the economy. The large number of people employed in the accommodation/food services, retail trade and construction industries could negatively impact employment in the East Cameron County Submarket, due to the current national economic downturn. However, the strong presence of the educational services industry should help bolster the economic stability of the East Cameron County Submarket.

It should be noted, that the accommodation/food services, construction, retail trade and educational services sectors all tend to provide lower paying jobs, as well as a broad range of incomes. Thus, these industries should create an abundance of demand for affordable rental housing in the Submarket.

Commute Patterns for the East Cameron County Submarket
The following table shows the commute times for the East Cameron County Submarket.

TRAVEL TIME TO WORK

Travel Time	Workers age 16+
< 5 min	450
5-9 min	906
10-14 min	1,137
15-19 min	1,235
20-24 min	744
25-29 min	174
30-34 min	706
35-39 min	147
40-44 min	170
45-59 min	188
60-89 min	113
90+ min	141
Average Travel Time	20.6 minutes

Source: ESRI Demographics, 2007; Novogradac & Company LLP, August 2008

Although this Submarket is quite rural and located away from major employment centers in Harlingen and Brownsville, a large share of workers report commute times between 10 and 19 minutes. This indicates that people may be living and working close to jobs in Post Isabel and South Padre Island.

POPULATION, HOUSEHOLD, AND INCOME TRENDS – SUBMARKET AND MSA

The following section provides an analysis of the demographic characteristics within the East Cameron County Submarket and Brownsville-Harlingen, TX MSA. Data such as population, households and growth patterns are studied, to determine if the Brownsville-Harlingen, TX MSA and the East Cameron County Submarket are areas of growth or contraction. Note that data provided by ESRI is effective as of July 1, 2007. Data from the U.S. Census has an effective date of March 1, 2000. Therefore, an adjustment of 7.25 years has been made between the 2000 and 2007 demographics to account for the four month difference.

Population

The table below illustrates population in the East Cameron County Submarket and Brownsville-Harlingen, TX MSA from 1990 through 2012.

Total Population				
Year	East Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	12,151	-	260,120	-
2000	18,603	5.31%	335,227	2.89%
2007	23,328	3.50%	395,867	2.50%
2012	26,591	2.80%	440,440	2.25%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Growth in the Submarket has been faster than growth in the MSA in all years of analysis. The majority of population growth in the MSA is located near the U.S. – Mexico border. However, both the Submarket and the MSA are showing strong growth from 2007 through 2012, although the Submarket will grow at a faster rate than from 2007 through 2012. The strong growth in the Submarket and the MSA is a positive indicator of the need for the affordable housing.

Population by Age

The following graph illustrates population by age in the Submarket and MSA for 1990 through 2012. It should be noted that the current population by age distribution in the MSA is similar to national averages.

Population by Age Group				
East Cameron County Submarket				
Age Cohort	1990	2000	2007	2012
0-4	947	1,491	1,982	2,238

Households

The following table is a summary of the total households in the Submarket and MSA from 1990 to 2012.

Total Number of Households				
Year	East Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
1990	3,685	-	73,278	-
2000	6,112	6.59%	97,267	3.27%
2007	7,610	3.38%	115,756	2.62%
2012	8,667	2.78%	129,335	2.35%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

Similar to the rate of population growth, the household growth rates of the Submarket and MSA have both been strong through 2007; however, household growth in the Submarket slowed significantly from 2000 to 2007. Household growth in the MSA and Submarket is expected to slow slightly from 2007 through 2012.

Average Household Size

The following table illustrates the average household size for the Submarket and MSA from 2000 to 2012.

Average Household Size				
Year	East Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	2.95	-	3.40	-
2007	2.99	0.19%	3.38	-0.08%
2012	3.00	0.07%	3.37	-0.06%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The average household size in the Submarket is slightly smaller than the MSA, but both are larger than the national average size of 2.59. The large average household size is anticipated to remain relatively stable through the 2012, which will keep demand high for larger unit types in the Submarket, but especially the MSA as a whole.

Median Household Income Levels

The table below illustrates Median Household Income in the Submarket and MSA.

Median Household Income				
Year	East Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	27,920	-	26,156	-
2007	34,255	3.13%	31,956	3.06%
2012	38,978	2.76%	36,654	2.94%

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The median household income in the Submarket was approximately 6.7 percent higher than the median household income in the MSA in 2007. The median household income in the Submarket is projected to grow at a slower rate from 2007 through 2012 than the previous seven years, as in the MSA. The lower median income level indicates increasing need for affordable housing.

Household Income

The following tables illustrate household income distribution in both the Submarket and MSA.

Household Income Distribution - East Cameron County Submarket

Total	**115,756**	**100%**	**129,335**	**100%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

As illustrated, approximately 26.9 percent of the population in the Submarket and 32.5 percent of the population in the MSA earned below $20,000 in 2007. By 2012, the population earning below $20,000 in the Submarket and MSA is expected to decrease slightly to approximately 23.1 percent and 28.7 percent, respectively, but in both instances, a significant portion of the population are projected to earn less than $20,000. This data provides strong support for affordable rental housing in the Submarket and MSA.

Senior Demographic Trends

Among those demographics discussed are trends in population, number of households, age, and income. In addition to analyzing overall demographic trends, we have also separately analyzed and discussed trends specific to the senior subpopulation, which includes those 65 years of age and older. The majority of age-restricted properties offer units to seniors ages 55, 62, or 65 and older. Despite the varying age restrictions at senior properties, property managers typically report that the average age of residents to be over 55 years of age. Therefore, for the purposes of this analysis, we have included demographic characteristics of the senior population ages 55 and over.

Senior Population

The table below illustrates senior population trends in the Submarket and MSA from 2000 through 2012.

Total Senior Population (55+)				
	East Cameron County Submarket		Brownsville-Harlingen, TX MSA	
Year	Number	Annual Change	Number	Annual Change
1990	2,334	-	46,569	-
2000	4,101	7.6%	61,192	3.1%
2007	5,743	5.5%	73,931	2.9%
2012	7,081	4.7%	89,074	4.1%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

As the table illustrates, similar to the general population trends, the senior population in both the Submarket and the MSA increased between 2000 and 2007. Senior population growth in the East Cameron County Submarket increased at a significantly faster rate the MSA from 2000 and 2007. Senior population growth in both the East Cameron County Submarket and the MSA is expected to grow at a similar rate from 2007 through 2012.

The strong projected growth in the senior population in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years. Additionally, the increasing senior populations, (typically one- and two-person households) may be a contributing factor to the projected decline in the average household size within the Submarket from 2007 to 2012.

Senior Households

The table below illustrates senior household trends in the Submarket and MSA from 2000 through 2012.

Total Number of Senior Households (55 +)				
Year	East Cameron County Submarket		Brownsville-Harlingen, TX MSA	
	Number	Annual Change	Number	Annual Change
2000	2,416	-	35,359	-
2007	3,284	5.0%	42,259	2.7%
2012	4,026	4.5%	50,724	4.0%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Similar to senior population estimates and projections, senior household growth is expected to be positive through 2012. The strong projected growth in the senior households in all areas of analysis is an indicator that age-restricted housing will be in strong demand in upcoming years.

Senior Median Household Income

The following table illustrates the median household incomes in the Submarket, MSA, and nation from 2007 to 2012 for both all households and specifically for senior households.

MEDIAN HOUSEHOLD INCOME

Year	Brownsville-Harlingen, TX MSA		East Cameron County Submarket		USA	
	Number	*Annual Change*	*Number*	*Annual Change*	*Number*	*Annual Change*
		All Ages				
2007	$31,956	-	$34,255	-	$53,154	-
2012	$36,654	2.94%	$38,978	2.76%	$62,503	3.52%
		Age 55+				
2007	$28,614	-	$38,216	-	$32,710	-
2012	$34,145	3.87%	$47,315	4.76%	$41,086	5.12%

Source: ESRI Business Demographics 2007; Novogradac and Company LLP, July, 2008

As the above table illustrates, the median senior household incomes in the MSA and USA are below those of all households. However, in the East Cameron County Submarket, the median senior household income is above that of all households in both 2007 and 2012. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally.

Senior Household Income

The tables below illustrate senior household income in the Submarket and MSA for 2007 and 2012.

Household Income Distribution - East Cameron County (Age 55+)				
Income Cohort	2007		2012	
	Number	Percentage	Number	Percentage
<$15,000	652	19.9%	667	16.6%

Source: ESRI Demographics 2007; Novogradac & Company LLP, July 2008

Both the Submarket and MSA have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. Among these locations, the MSA has the largest percentage of seniors earning less than $35,000 annually. Approximately 56 percent of those 55 and older in the MSA are earning under $35,000 per year. This is attributable primarily to the MSA's high percentage of senior households earning below $15,000 annually. The MSA features significantly more senior households in these income brackets when compared to the Submarket. By 2012, all areas of analysis will have seen decreases in the number of seniors earning less than $35,000 annually. However, within the Submarket and MSA, it is estimated that 36 and 48.5 percent of seniors will still be earning less than $35,000 annually for these two areas, respectively. It should be noted that these estimates are most likely a function of inflation rather than a demographic trend. Furthermore, the majority of senior households within the MSA will be earning less than $25,000, which is below the current AMI. This indicates that affordable housing for the senior population will remain in demand.

Tenure

The following table is a summary of the senior tenure patterns of the housing stock in the Submarket and MSA for 2000 through 2012.

Tenure Patterns - Elderly Population (Age 55+)								
	East Cameron County Submarket				Brownsville-Harlingen, TX MSA			
	Owner-Occupied Units		Renter-Occupied Units		Owner-Occupied Units		Renter-Occupied Units	
Year	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
2000	2,014	83.4%	402	16.6%	28,551	80.7%	6,808	19.3%
2007	2,738	83.4%	546	16.6%	34,122	80.7%	8,137	19.3%
2012	3,356	83.4%	670	16.6%	40,958	80.7%	9,766	19.3%
Source: ESRI Demographics 2007; Novogradac & Company LLP, August 2008								

As the above table illustrates, the senior housing market is dominated by owner-occupied units. The Submarket has a significantly smaller percentage of senior renter-occupied units when compared to the national average (28 percent, not shown above) and the MSA. The small percentage of renter-occupied senior households is not unusual in rural submarkets, where owner-occupied housing is predominant among a reduced population.

Senior Demographic Conclusion

The median senior household incomes in the MSA and USA are below those of all households. However, in the East Cameron County Submarket, the median senior household income is above that of all households in both 2007 and 2012. Of the three areas of analysis, the median senior household income is lowest in the MSA and highest nationally. Similar to projected median household income growth for all households, the median household income growth for senior households is expected to be strongest nationally. Both the MSA and Submarket have significant portions of the senior population with household incomes lower than the Area Median Income (AMI) of $31,000. Approximately 56 percent of those 55 and older in the MSA are earning under $35,000 per year. This is attributable primarily to the MSA’s high percentage of senior households earning below $15,000 annually. The MSA features significantly more senior households in these income brackets when compared to the Submarket and national averages. The national average of senior households earning below $50,000 annually is 64 percent.

LOCAL MARKET INFORMATION

East Cameron County Submarket
The following sections will provide an analysis of the local market characteristics within the Submarket.

Healthcare
There are no hospitals or urgent care clinics located in the East Cameron County Submarket. The primary major medical providers within proximity to the Central Cameron County Submarket are the Valley Regional Medical center and the Valley Baptist Health System. Valley Regional Medical center is a new 214-bed acute care hospital located in Brownsville. Valley Regional is a designated Trauma Center and offers services such as Emergency Care, Neonatal Intensive Care, Neurosurgery, Cardiac Surgery and Orthopedic Surgery. The hospital underwent an expansion during 2004, which added a second Intensive Care Unit and 16 medical and surgical beds. Valley Baptist Health System is one of the largest in South Texas with more than 800 beds. Valley Baptist has locations in Brownsville and Harlingen and offers Cardiovascular Services, Day Surgery, Home Health, Hospice, Intensive Care Units, Emergency Departments, Outpatient Services, Pediatrics and Radiology.

Transportation
The East Cameron County Submarket is served by the Brownsville South Padre International Airport, which is located approximately 17 miles east of the City of Port Isabel, in Brownsville, Texas. The Brownsville South Padre International Airport provides non-stop flights to Houston-Intercontinental via Continental Airlines.

Education
The East Cameron County Submarket is served by the Port Isabel School District. The Port Isabel School District has two elementary schools, one middle school and one high school. The University of Texas at Brownsville (UTB) and Texas Southmost College (TSC) are located in close proximity to the East Cameron County Submarket. The partnership between UTB and TSC offers Certificates and Associate, Bachelor and Graduate degrees in liberal arts, the sciences and professional programs.

Public Transportation
The East Cameron County Submarket does not offer public transportation.

Employment Centers

There are a limited number of employment centers in the East Cameron County Submarket. The majority of employment centers are located in Brownsville and Harlingen. It should be noted that the number of employees for the Brownsville major employers was not available at the time of this report. The largest employers in the cities of Brownsville and Harlingen include the following:

Brownsville Top Ten Employers

Rank	Company	Industry
1	Brownsville Independent School District	Education
2	AMFELS	Manufacturing
3	University of Texas at Brownsville	Education

HOUSING SUPPLY ANALYSIS

EAST CAMERON COUNTY SUBMARKET HOUSING SUPPLY ANALYSIS

Age of the Housing Stock

The following table presents the age of the housing stock in the East Cameron County Submarket.

AGE OF HOUSING STOCK IN EAST CAMERON COUNTY SUBMARKET		
Years	**Number of Units**	**Percent of Housing Stock**
1999-3/2000	324	2.69%
1995-1998	1,293	10.74%
1990-1994	1,628	13.52%
1980-1989	4,492	37.32%
1970-1979	2,848	23.66%
1960-1969	892	7.41%
1950-1959	286	2.38%
1940-1949	139	1.15%
1939 and Before	136	1.13%
Total	**12,038**	**100.00%**

Source: ESRI Demographics, 2007; Novogradac & Company LLP, July 2008

The majority of the housing stock (85.24 percent) in the East Cameron County Submarket was constructed from 1970 through 1998. This Submarket is characterized primarily by areas of limited development proximate to limited locational amenities and essential. The predominant form of housing in this Submarket is owner-occupied single-family homes in poor to very good condition and less than five to 40 years in age. There is a limited amount of multi-family development in fair to good condition and less than five to 30 years in age.

Building Permit Activity

The following table depicts residential building activity from 1997 to 2007 for Cameron County, Texas. Data was not available for 2008. Building Permit Activity was not available by Submarket.

BUILDING PERMITS: Cameron County, TX - 1997 to 2007				
Year	**Single-family and Duplex**	**Three and Four-Family**	**Five or More Family**	**Total Units**
1997	1,601	40	257	1,898
1998	1,400	166	161	1,727
1999	1,058	229	150	1,437
2000	2,086	121	150	2,357
2001	1,595	142	102	1,839
2002	2,211	136	475	2,822
2003	3,200	81	163	3,444
2004	2,203	198	213	2,614
2005	1,981	197	116	2,294
2006	2,670	74	261	3,005
2007	1,800	131	138	2,069
Total	**21,805**	**1,515**	**2,186**	**25,506**
Average	**1,982**	**138**	**199**	**2,319**

There were 2,186 “5+ units” building permits issued in Cameron County from 1997 to 2007. Single-family and duplex permits make up the vast majority of all permits issued from 1997 to 2007, at 85 percent, while “5+ units” building permits constitute approximately 8.6 percent of all permits issued from 1997 through 2007. The small percentage of multifamily permits issued indicates demand for multi-family housing of all kinds.

Interviews

Cameron County Housing Authority

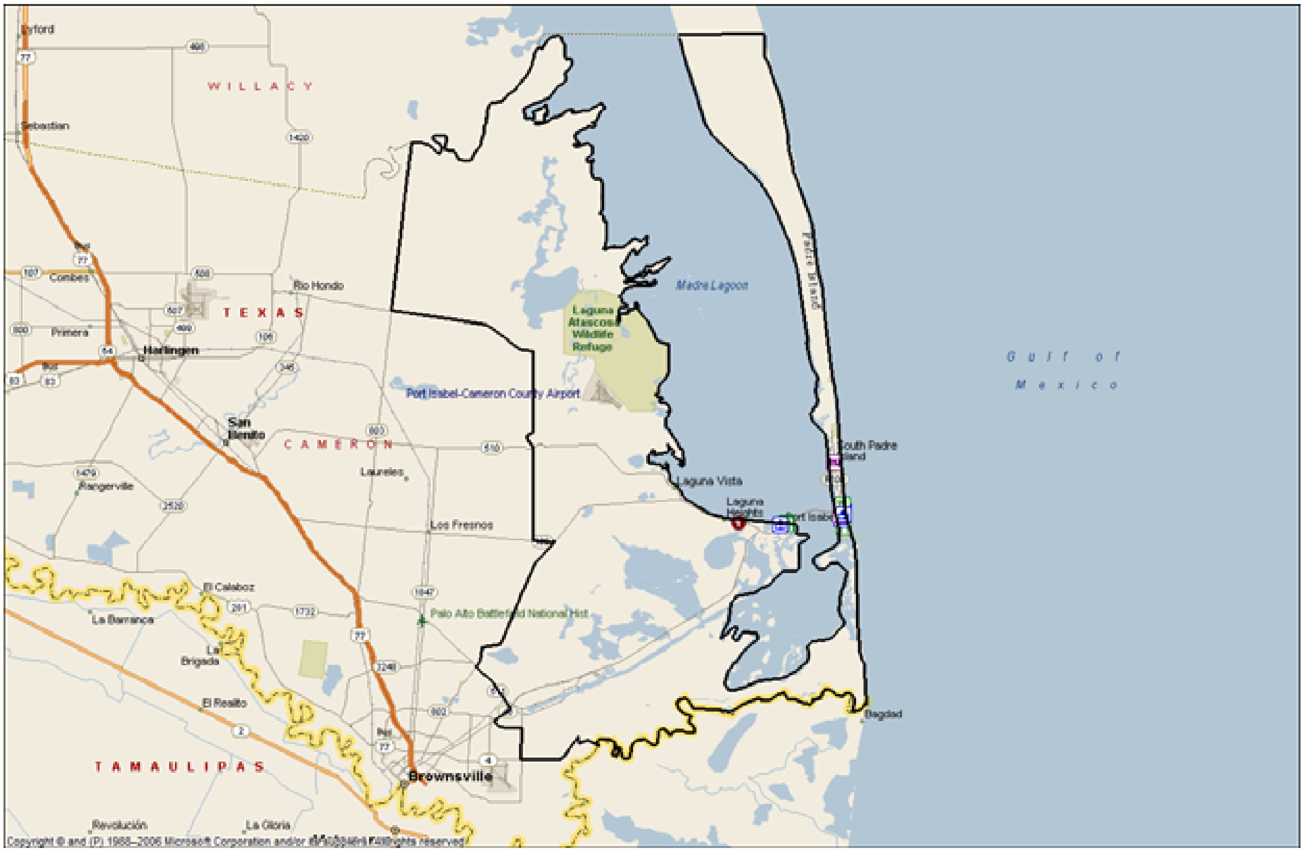
We spoke with Guadalupe Garcia with the Cameron County Housing Authority. According to Ms. Garcia, the Housing Authority is allocated 1,080 Housing Choice Vouchers and 1,006 vouchers are currently in use. Ms. Garcia estimated that there were 878 households on the waiting list as of July 2008 and the waiting list is currently open. The current payment standards for one-, two-, three-, and four-bedroom units are listed below.

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

LIHTC FAMILY SUPPLY

We were able to identify two LIHTC family properties in the Submarket, Bahia Palms Apartments and Beacon Bay Townhomes. We were able to obtain information for one property, Beacon Bay Townhomes. The map below shows the location of Beacon Bay Townhomes.



Beacon Bay Townhomes, located in Port Isabel, was allocated in 2000 and built in 2001. According to the property manager, the property sustained significant damage from Hurricane Dolly in July 2008 and approximately 50 percent of the 76 units are currently off-line. The manager noted that occupancy prior to the hurricane was 100 percent and there was a waiting list with 20 households for all units. Beacon Bay Townhomes offers one-, two- and three-bedroom units at 50 and 60 percent of AMI. All of the rents, with the exception of the three-bedroom units at 60 percent of AMI, are below the Cameron County Housing Authority's payment standards. The 2008 maximum allowable LIHTC rents for Cameron County are below:

2008 LIHTC Maximum Allowable Gross Rent Limits

Bedrooms	30%	40%	50%	60%	80%	100%	FMR
Efficiency	$228	$305	$381	$457	$610	$762	$423
1 Bedroom	$245	$327	$408	$490	$698	$872	$488
2 Bedroom	$294	$392	$490	$588	$784	$980	$559
3 Bedroom	$340	$453	$566	$680	$872	$1,090	$691
4 Bedroom	$379	$506	$632	$759	$942	$1,177	$781
5 Bedroom	$418	$558	$698	$837	$1,012	$1,265	-

Beacon Bay Townhomes is not achieving maximum allowable LIHTC rents for any of the units at 50 and 60 percent AMI. The property reported an annual turnover rate of 15 percent and was unable to provide absorption information. There are no concessions currently being offered. The property offers a basic in-unit and community amenity package, but does not offer any security features or premium services. A photo of Beacon Bay Townhomes is shown below.

Beacon Bay Townhomes

Excluded Properties

We excluded one LIHTC family property, Bahia Palms, because we were unable to contact the property. Bahia Palms, located in Laguna Vista, was allocated in 2004. The property offers 64 LIHTC units. No other information was available at the time of this report.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are no LIHTC family properties that have received an allocation in the Submarket.

LIHTC SENIOR SUPPLY

There are no existing senior LIHTC developments in the Submarket. Based on the lack of available data, we did not complete a senior LIHTC supply analysis.

Proposed/Under Construction

According to the 2008 Property Inventory published by the Texas Department of Housing and Community Affairs, there are no LIHTC senior properties that have received an allocation in the Submarket.

MARKET RATE SUPPLY

There are no existing market rate developments in the Submarket. Based on the lack of available data, we did not complete a market rate family or senior supply analysis.

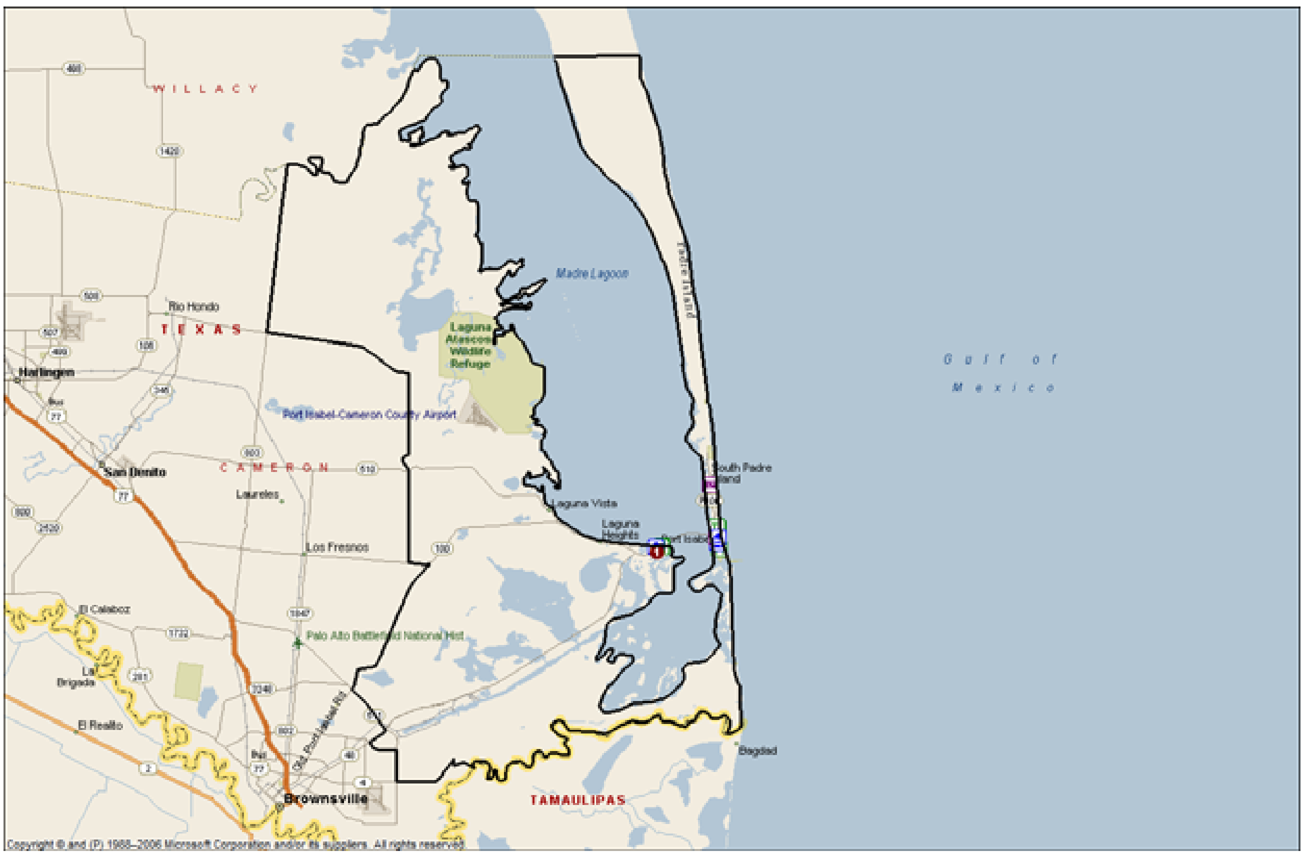
Proposed/Under Construction

We attempted to contact the planning departments of the cities of Port Isabel and South Padre Island to determine if there are any multifamily developments under construction or coming down the pipeline in the Submarket. Despite numerous attempts to contact the planning departments both in person and over the phone, our attempts have been unsuccessful as of the date of this report. However, based on our physical site inspection of the Submarket, there do not appear to be any multifamily developments under construction or in the planning stages in the Submarket at this time.

SUBSIDIZED FAMILY SUPPLY

We attempted to identify all existing, proposed, and under construction family-oriented subsidized developments in the Submarket using Novogradac's online database, HUD's online rental housing search database, the USDA's online rental housing search database, observations in the field, various Internet search methods, and interviews with local housing authorities, housing providers, property managers, and city planning and development officials.

We identified and interviewed one family subsidized property in the Submarket, Villa Madre Apartments. The map below shows the location of Villa Madre Apartments:



Villa Madre Apartments, located in Port Isabel, is a family Section 8 property built in 1970. The property offers one-, two- and three-bedroom apartments at 522 square feet, 722 square feet and 800 square feet, respectively. The property has a total of 52 units and is currently 100 percent occupied, with a waiting list. According to the property manager, the contract rents are $435 for a one-bedroom, $524 for a two-bedroom and $608 for a three-bedroom. All of the rents are below the

Cameron County Housing Authority's payment standards. The 2008 payment standards for the Cameron County Housing Authority are below:

PAYMENT STANDARDS

Units	Payment Standards
One-bedroom	$536
Two-bedroom	$615
Three-bedroom	$760
Four-bedroom	$860

Villa Madre Apartments reported an annual turnover rate of 20 percent and was unable to provide absorption information. There are no concessions currently being offered. The property offers a very limited in-unit and community amenity package and does not offer any security features or premium services. A photo of Villa Madre Apartments is shown below.

Villa Madre Apartments

Excluded Properties

We were able to obtain information on the one subsidized family property in the Submarket; therefore, we have not excluded any family subsidized properties.

SUBSIDIZED SENIOR SUPPLY

There are no existing senior subsidized developments in the Submarket. Based on the lack of available data, we did not complete a subsidized senior supply analysis.

DEMAND ANALYSIS

AFFORDABLE HOUSING DEMAND ANALYSIS

As outlined in the study requirements, our estimate of demand for affordable rental housing in the East Cameron County Submarket is based on current households and is presented by household size, income level and targeted population. Existing income-qualified renter households are further refined to account for household growth over a five-year projection period, percentage of rent-overburdened households, percentage of households residing in substandard housing, percentage of households in overcrowded housing, and the Submarket's turnover rate. Additionally, we have adjusted our demand estimates to account for accommodation of affordable housing demand through any planned, proposed or unstabilized LIHTC units in the Submarket.

The number of income-qualified renter households is calculated for each of six income cohorts: less than 30 percent of AMI, 31 to 40 percent of AMI, 41 to 50 percent of AMI, 51 to 60 percent of AMI, 61 to 80 percent of AMI and 81 to 100 percent of AMI. With the use of demographics provided by HISTA, we are able to examine each of these six income groups by household size to include one-, two-, three- and four-person households and households with five or more persons. This insures that income-qualified households will not be double counted. Separate analyses are presented for all renter households and senior renter households, defined as age 55 and older.

There is very limited demographic and income data for colonias households available through the census and other government agencies. For this reason, it is likely that the percentage of substandard and overcrowded housing units, as reported by the Census and used in our demand analysis, does not reflect the prevalence of substandard and overcrowded housing throughout the colonias. These households may represent potential demand for affordable housing beyond the demand accounted for through the analysis of Census data.

DEMAND FROM EXISTING HOUSEHOLDS

Number of Existing Households for the Current Year

The total number of households in the East Cameron County Submarket in 2007 is 7,610 and the total number of households in 2012 is projected to be 8,667. The total number of households age 55 and older in the Submarket for 2007 is 3,284, with a 2012 projection of 4,026 households. This is a beginning point for our analysis.

Number of Renters

Information provided to us by ESRI indicates that of the occupied housing units, renter households make up approximately 30.6 percent of the occupied housing unit households in the East Cameron County Submarket in 2007. For seniors age 55 and older, the percentage of renters is 16.6 percent.

Maximum Income Guidelines

Maximum income guidelines for tax credit properties are determined by HUD and are based on the area's Average Income. Typically, minimum income levels are calculated based on the assumption that lower income families should pay no more than 35 percent of their income to gross rent. Often times, lower income families pay a higher percentage of income as rent due to their income level. Although higher income households generally spend a smaller portion of their income on rent, the area is not dominated by high income households. In order to avoid overstating potential demand this analysis assumes that none of the income bands will overlap. For example, the maximum income for a one-person household at 30 percent of AMI is considered the minimum income for a one-person household in the income range between 31 percent and 40 percent of AMI. A minimum

income of zero dollars is used in calculating demand from households earning 30 percent of AMI or less.

The minimum and maximum household eligible income ranges for the East Cameron County Submarket (Brownsville-Edinburg, TX MSA) are detailed in the table on the following page.

INCOME LIMITS

Household Size	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income	Minimum Allowable Income	Maximum Allowable Income
	< 30% AMI		*31% - 40% AMI*		*41% - 50% AMI*		*51% - 60% AMI*		*61% - 80% AMI*		*81% - 100% AMI*	
1 Person	$0	$9,150	$9,150	$12,200	$12,200	$15,250	$15,250	$18,300	$18,300	$24,400	$24,400	$30,500
2 Person	$0	$10,500	$10,500	$13,960	$13,960	$17,450	$17,450	$20,940	$20,940	$27,920	$27,920	$34,900
3 Person	$0	$11,800	$11,800	$15,680	$15,680	$19,600	$19,600	$23,520	$23,520	$31,360	$31,360	$39,200
4 Person	$0	$13,100	$13,100	$17,440	$17,440	$21,800	$21,800	$26,160	$26,160	$34,880	$34,880	$43,600
5+ Person	$0	$14,150	$14,150	$18,840	$18,840	$23,550	$23,550	$28,260	$28,260	$37,680	$37,680	$47,100

Rent-Overburdened Households

Households are determined to be rent-overburdened if they are paying more than 35 percent of household income as rent. In the East Cameron County Submarket, approximately 25.9 percent of households, including senior households, are considered rent-overburdened.

Substandard Housing

Substandard housing is generally defined as housing units identified in the Census that lack complete plumbing facilities. According to Census 2000 estimates, approximately 1.3 percent of units in the Submarket are determined to be substandard.

Overcrowded Housing

A housing unit is considered overcrowded if there are more than 1.00 persons per room. According to a report issued in 2002 by the Fannie Mae Foundation, Census 2000 data indicates that the southwestern United States, which includes Texas, has a higher than average incidence of households living in overcrowded housing units. The report further concludes that while Texas and California contain less than one-fifth of the nation's households, these two states account for two-fifths of overcrowded households. In the East Cameron County Submarket, it is estimated that 18.4 percent of households are living in overcrowded units.

Movership or Turnover Rate

There are numerous sources of information regarding turnover rate, or the percent of renter households who move in a year. The most reliable source is that of the market participants in the Submarket. As discussed in the *Housing Supply Analysis* section, we attempted to interview comparable properties regarding information the turnover rate experienced on an annual basis. The average annual turnover rate for the stabilized family LIHTC properties surveyed in the Submarket is approximately 15 percent.

We were unable to identify any senior LIHTC or subsidized properties in this Submarket. Therefore, for the purpose of this analysis, we have used the average of all senior LIHTC and subsidized properties identified and surveyed in the MSA. This average turnover rate is 24 percent.

Unstabilized Rental Units - Existing and Proposed

To our knowledge, there are no proposed or under construction subsidized or LIHTC properties in the East Cameron County Submarket. Therefore, no units were deducted from the demand analysis.

Annual Income-Qualified Renter Demand

Provided below are calculations of the total number of existing income-qualified renter households in the East Cameron County Submarket in 2007 and 2012. Two analyses have been presented. The first calculates total demand, both currently present and moving into the market, adjusted for income eligibility and renter status, as well as the percentage of rent-overburdened households and substandard and overcrowded housing units. An additional calculation, which accounts for all of the previous variables and incorporates the turnover rate, is also provided.

Note that in the subsequent tables, the total number of income-qualified renter households is not equal to the total number of renter households. This is due to the fact that we have only analyzed households earning between zero and 100 percent of the AMI. There are additional renter households in the Submarket with annual incomes greater than 100 percent of the AMI.

Again, this analysis avoids overstating demand by avoiding overlapping income bands. It should be noted that the percentage of rent overburdened households may also include some of the households that are living in substandard and/or overcrowded housing units. This would result in some potential overlap. This analysis assumes that rent overburdened households, households living in substandard housing and households in overcrowded units each represent a separate component of demand. As these are quantifiable sources of demand, the sum of these calculations results in a maximum number of income-qualified renter households.

The calculations of potential household demand by income cohort and household size for all households and senior households are shown in the following tables:

2007 All Households – Without Turnover

Demand Analysis Conclusions

All Households

The analysis of income-qualified renter households in the East Cameron County Submarket indicates that the need for affordable housing is greatest among households earning less than 30 percent of AMI. This is not unexpected given that nearly 20 percent of households in the Submarket earn less than $15,000 annually. Demand at the 30 percent through 60 percent AMI levels is somewhat less. The number of income-qualified renter households at the 61 to 80 percent AMI level is the second largest in the Submarket. Through 2012, demand from income-qualified renter households is expected to increase among all income levels, with the highest growth among the very lowest income households. With no planned or proposed affordable housing units in the submarket, there may be moderate demand for additional affordable housing serving the very lowest income households.

Senior Households

Demand from income-qualified senior renter households is similar to that of all households. Again, most of the affordable housing demand for seniors in the Submarket appears to be among households earning less than 30 percent of AMI, with senior households accounting for nearly 33 percent of the demand at the lowest income levels in the Submarket. With no identified subsidized units for seniors in the submarket and none planned, there is likely an unmet need for a small number of affordable senior housing units in this Submarket.

Relating to Agency Performance Evaluation

16. A copy of the agency's current internal audit plan.

TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS
INTERNAL AUDIT PLAN
FISCAL YEAR 2009 (REVISED)

INTERNAL AUDITS		
Project	**General Objectives**	**Estimated Completion Date**
CDBG Disaster Recovery Program (carryover from FY2008)	Phase II: Testing of Set Ups and Draws To assess whether the Department's payment and draw processing provides reasonable assurance that sub-recipient requests for reimbursement of expenditures: ➢ comply with applicable laws, regulations, policies, and contract provisions, ➢ are adequately supported (including support for allowable activities, costs and eligibility to participate in the program), ➢ are properly posted to the accounting and program systems, and ➢ are properly authorized or approved. *(Note: This project was delayed from FY 2007 in order to have a sufficient number of payments to test.)*	CANCELLED – The State Auditor's Office tested set ups and draws as part of their follow-up audit of the Disaster Recovery Program.
HOME Program – Loan Servicing and Recycling of Program Income	To determine: ➢ if loan servicing results in the maximum affordability period, ➢ loans are completed in compliance with relevant laws, regulations, and policies, and ➢ the amount of program income that has been recycled over the past three years.	Completed in April 2009
CDBG Disaster Recovery Program (carryover from FY2008)	Phase III: Sub-recipient Monitoring • To evaluate the sub-recipient monitoring procedures, processes and on-site visits to assess whether the program ensures that sub-recipients: ➢ comply with applicable laws, regulations, program rules, and contract terms, ➢ operate within expenditure budgets and limits, ➢ expend administration and program funds at allowable rates, and ➢ meet contract performance goals. • To assess whether monitoring results are communicated to sub-recipients and any findings or exceptions are noted, tracked and monitored until resolved.	CANCELLED – The State Auditor's Office tested sub-recipient monitoring as part of their follow-up audit of the Disaster Recovery Program.

INTERNAL AUDITS		
Project	**General Objectives**	**Estimated Completion Date**
Self-Assessment of the Internal Audit Division's Quality Assurance Program	To conduct the self-assessment of the internal audit division as required by the *International Standards for the Professional Practice of Internal Auditing* (*Standards*) and to determine if the internal audit division: ➢ Completes audit working papers in accordance with the *Standards*, ➢ Has developed and implemented policies and procedures that comply with the *Standards*, and ➢ Performs ongoing quality assurance and monitoring as required by the *Standards*. *Note: This project was added as a result of the January 2009 revision to the Standards and is a requirement for all internal audit functions.*	Completed in May 2009
4% Non-Competitive Housing Tax Credit Program	To review the 4% Non-Competitive Housing Tax Credit Program for the 2008 tax application cycle to: ➢ identify significant risks, ➢ evaluate whether there are adequate controls in place to address the risks, and ➢ determine whether the Department has complied with all program requirements.	Moved from June 2009 to August 2009 to allow the Multifamily staff additional time to complete the tax credit cycle
Section 8 – Housing Choice Voucher Program	To review the Section 8 Housing Choice Voucher Program to determine if: ➢ The revised rules, policies and procedures adequately address the significant risks and compliance requirements associated with the program, ➢ The program is operated in compliance with the newly revised rules, policies and procedures, ➢ The processes for awarding local provider contracts and distributing Section 8 vouchers results in a fair and equitable process, and ➢ the program is functioning as intended.	Cancelled - The Section 8 Housing Choice Voucher Program rules, policies and procedures have not yet been revised.
Follow-up on the Fall 2008 Audits of the Bootstrap and Self Help Center Programs	To follow-up on the fall 2008 internal audits of the Bootstrap and Self-Help Center Programs to determine the progress made by the Office of Colonia Initiatives in implementing the audit recommendations. *(Note: This audit was requested by the board at the December 2008 audit committee meeting.)*	July 2009

OTHER ACTIVITIES These are required activities that are part of Internal Audit's overall responsibilities.		
Follow-Up on Status of Prior Internal Audit Issues	To independently verify corrective actions taken by management in response to prior internal audit issues. Follow-up projects will be pursued during the course of current related audits when the issues have been reported as implemented by management. We will also prioritize and evaluate issues that have been reported as implemented on an ongoing basis (as time allows.)	Ongoing
Tracking the Status of Prior Audit Issues	To track the status of prior audit issues for management/board reporting purposes.	Ongoing
Fraud Hotline	To provide tracking, follow-up and disposal of issues identified as a result of fraud hotline communications.	Ongoing
FY 2009 Annual Audit Plan	To develop an annual audit plan for FY 2010 as required by the Texas Internal Auditing Act.	September 2009
FY 2008 Annual Internal Audit Report	To prepare an annual internal auditing report for FY 2008 pursuant to the Texas Internal Auditing Act.	November 2008 - Completed
Internal Audit Charter	To revise the Internal Audit Division's charter to comply with new standards set by the Institute for Internal Auditing.	January 2009 - Completed
Coordinate External Auditors	To coordinate and assist external auditors. This includes attending entrance and exit conferences, providing information, audit reports and working papers, and coordinating with management to ensure a prompt and accurate response to draft audit reports.	As Needed
Prepare for Peer Review	To complete the peer review self-assessment and prepare for the required fall 2009 peer review of the internal audit division.	October 2009
Support ARRA Efforts	To provide support for the Department in reviewing issues related to the American Recovery and Reinvestment Act (ARRA) funds, and to support and advise the Department's management in developing internal controls over the ARRA funds. This includes serving as the point of contact for the Government Accountability Office (GAO) in their review of the ARRA funds.	Ongoing

TABLE OF CONTENTS

INTRODUCTION

"Beginning in 1991, Texas embarked on a comprehensive strategic planning process for all state agencies within the executive branch of government. House Bill 2009, Seventy-second Legislature, Regular Session, 1991, which inaugurated the process, established the requirements and time frame under which Texas completed its first planning cycle.

House Bill 2009 was subsequently codified as Chapter 2056 of the Government Code.

In 1993, Chapter 2056 of the Government Code was amended to consolidate certain planning requirements and to change the required planning horizon from six years to five years (i.e., the second year of the current biennium and the next two biennia). Agencies must complete and submit plans every two years; however, they may engage in planning on a continual basis and may adjust plans internally as changing conditions dictate.

Strategic planning is a long-term, iterative, and future oriented process of assessment, goal setting, and decision-making that maps an explicit path between the present and a vision of the future. It includes a multiyear view of objectives and strategies for the accomplishment of agency goals. Clearly defined outcomes and outputs provide feedback that leads to program performance that influences future planning, resource allocation, and operating decisions. The strategic planning process incorporates and sets direction for all agency operations.

A Strategic Plan is a formal document that communicates an agency's goals, directions, and outcomes to various audiences, including the Governor and the Legislature, client and constituency groups, the general public, and the agency's employees." [1]

The Texas Department of Housing and Community Affairs (TDHCA or Department) Strategic Plan for Fiscal Years 2009–2013 (the Plan) outlines its approach to addressing the affordable housing and community service needs of lower income Texans. The Plan was developed within the context of the State's overall goals and budget to generate specific outcomes that tie directly to the Department's budget structure. TDHCA will use the Plan to help meet needs of the citizens of Texas through sound, transparent, accountable, and effective actions.

[1] From the "Introduction" to the Instructions for Preparing and Submitting Agency Strategic Plans Fiscal Years 2009-2013.

STATEWIDE VISION, MISSION, AND PHILOSOPHY

THE VISION FOR TEXAS STATE GOVERNMENT

"Working together, I know we can accomplish our mission and address the priorities of the people of Texas. My administration is dedicated to creating greater opportunity and prosperity for our citizens, and to accomplish that mission, I am focused on the following critical priorities:

- *Assuring open access to an educational system that not only guarantees the basic core knowledge necessary productive citizens but also emphasizes excellence and accountability in all academic and intellectual undertakings;*
- *Creating and retaining job opportunities and building a stronger economy that will lead to more prosperity our people and a stable source of funding for core priorities;*
- *Protecting and preserving the health, safety, and well-being of our citizens by ensuring healthcare is accessible and affordable and by safeguarding our neighborhoods and communities from those who intend us harm;*
- *Providing disciplined, principled government that invests public funds wisely and efficiently. I appreciate your commitment to excellence in public service."*

RICK PERRY
Governor of Texas[2]

THE MISSION OF TEXAS STATE GOVERNMENT

"Texas state government must be limited, efficient, and completely accountable. It should foster opportunity and economic prosperity, focus on critical priorities, and support the creation of strong family environments for our children. The stewards of the public trust must be men and women who administer state government in a fair, just, and responsible manner. To honor the public trust, state officials must seek new and innovative ways to meet state government priorities in a fiscally responsible manner.

Aim high...we are not here to achieve inconsequential things!" [3]

THE PHILOSOPHY OF TEXAS STATE GOVERNMENT

The task before all state public servants is to govern in a manner worthy of this great state. We are a great enterprise, and as an enterprise we will promote the following core principles:

- *First and foremost, Texas matters most. This is the overarching, guiding principle by which we will make decisions. Our state, and its future, is more important than party, politics, or individual recognition.*
- *Government should be limited in size and mission, but it must be highly effective in performing the tasks it undertakes.*
- *Decisions affecting individual Texans, in most instances, are best made by those individuals, their families, and the local government closest to their communities.*
- *Competition is the greatest incentive for achievement and excellence. It inspires ingenuity and requires individuals to set their sights high. Just as competition inspires excellence, a*

[2] Instructions for Preparing and Submitting Agency Strategic Plans Fiscal Years 2009-2013.
[3] Instructions for Preparing and Submitting Agency Strategic Plans Fiscal Years 2009-2013.

sense of personal responsibility drives individual citizens to do more for their future and the future of those they love.

- *Public administration must be open and honest, pursuing the high road rather than the expedient course. We must be accountable to taxpayers for our actions.*
- *State government has a responsibility to safeguard taxpayer dollars by eliminating waste and abuse, and providing efficient and honest government. Finally, state government should be humble, recognizing that all its power and authority is granted to it by the people of Texas, and those who make decisions wielding the power of the state should exercise their authority cautiously and fairly.*[4]

Descriptions of ways TDHCA works to fulfill the Vision, Mission, and Philosophy of Texas State Government are provided in the following section which details TDHCA's impact on the corresponding statewide goals and benchmarks for Texas State Government.

[4] Instructions for Preparing and Submitting Agency Strategic Plans Fiscal Years 2009-2013.

RELEVANT STATEWIDE GOALS AND BENCHMARKS

TDHCA's strategies directly or peripherally impact the following statewide goals and associated benchmarks.

EDUCATION - PUBLIC SCHOOLS

Priority Goal

To ensure that all students in the public education system acquire the knowledge and skills to be responsible and independent Texans by:

- ensuring students graduate from high school and are ready for college, a two-year institution, other post-secondary training, or the workforce;
- continuing to develop reading, math, and science skills at appropriate grade level through graduation; and
- demonstrating exemplary performance in foundation subjects.

Benchmarks

- High school graduation rate
- Percent of students who demonstrate satisfactory performance on the Texas Assessment of Knowledge and Skills
- Percent of students from third grade and above who are able to read at or above grade level
- Percent of students from third grade and above who perform at or above grade level in math
- Percent of students who achieve mastery of the foundation subjects of reading, English language arts, math, social studies, and science

The provision of affordable and safe housing affects family stability and childhood outcomes. Residing in substandard housing exposes families to hazards such as lead paint that can limit lifelong educational and economic achievement.[5] The presence of dust, molds, and roach allergens in the home increases the incidence of asthma and allergies which leads to increased absences from school. The inability to make rent or mortgage payments on a consistent basis means families may frequently move in response to changes in the family's financial situation. Disruptive moves during childhood and adolescence negatively impact school performance.[6] When families struggle to satisfy their daily needs, school performance declines. Overcrowded housing conditions also adversely impact childhood development. Ensuring that students have stable living environments is crucial to their success at school.

TDHCA addresses the priority goals and benchmarks in the following ways.

- TDHCA activities result in lower rental and mortgage payments for families, repairs to and replacement of substandard housing, and reduced utility payments. This assistance helps

5 Centers for Disease Control, "Blood Lead Level in Young Children 1996-1999," Morbidity and Mortality Weekly (December 22, 2000).

6 Robert Haveman, Barbara Wolf, and James Spaulding, "Childhood Events and Circumstances Influencing High School Completion," Demography 28:1 (1991): 133-57. U.S. General Accounting Office, Elementary School Children: May Change Schools Frequently, Harming Their Education (Washington, D.C.: GAO/HEHS-94-45, 1994).

families provide a safe and stable home environment for their children – conditions that are conducive to promoting educational achievement.

- In addition to providing housing that is safe, decent, and affordable, TDHCA activities often provide supportive services and amenities that are geared towards helping educate children. Examples of this assistance include supportive services provided by rental housing developments and community action agencies that TDHCA has funded. Such services include class room space and equipment, nutrition, after school care, computer training, and health and human services care for children that help eliminate barriers to educational success.
- Through the Emergency Shelter Grants Program TDHCA funds organizations providing homelessness prevention activities by assisting families that are homeless or threatened with homelessness.

HEALTH AND HUMAN SERVICES

Priority Goal

To promote the health, responsibility, and self-sufficiency of individuals and families by:

- making public assistance available for those most in need through an efficient and effective system; and
- continuing to create partnerships with local communities, advocacy groups, and the private and not-for-profit sectors.

Benchmarks

- Percent of long-term care clients served in the community
- Percent of adult welfare participants in job training who enter employment
- Percent of Texas population receiving food stamps
- Incidence of confirmed cases of abuse, neglect, or death of children, the elderly, or spouses per 1,000 population
- Rate of substance abuse and alcoholism among Texans
- Percent of people completing vocational rehabilitation services and remaining employed

TDHCA addresses the priority goals and benchmarks in the following ways.

- Housing opportunities for people with disabilities are often restricted by low incomes. The 2000 census estimates that 553,934 disabled individuals over age five live below the poverty level in Texas. Many people with disabilities may be unable to work, and receive Supplemental Security Income (SSI) or Social Security Disability Insurance (SSDI) benefits as their principal source of income. TDHCA's rental assistance vouchers provided through the US Department of Housing and Urban Development's (HUD) HOME and Housing Choice Voucher (Section 8) programs can be used to help people live independently and remain in their own homes. To help persons with special needs own their own homes, TDHCA has made available HOME Program funds to help persons with disabilities purchase a home, access homebuyer education, access down payment and closing cost assistance, and receive funding for architectural barrier removal.
- TDHCA's multifamily properties offer valuable services to tenants that range from job training programs, computer labs, and literacy programs, to matched savings plans that can be used to fund educational opportunities. Local community action agencies funded through

TDHCA's Community Services Block Grant Program, Comprehensive Energy Assistance Program, and other community affairs programs provide essential services, including access to child care, transportation, job training and employment services, utility assistance, and educational programs. These activities are of great value to persons trying to improve their chance of getting and keeping a job and help promote long term self sufficiency.

- Battered women who live in poverty are often forced to choose between staying in abusive relationships or homelessness. According to the National Coalition for the Homeless, half of women with children experiencing homelessness left their last place of residence because of domestic violence. In 2006, there were 186,868 reported family violence incidents in Texas. Through TDHCA's community services programs, many victims of domestic violence are able to access shelter and supportive services that help them become self sufficient.
- The US Conference of Mayors survey reports that 30 percent of homeless persons has an addiction disorder.[7] The Texas Department of State Health Services reports that, of adult clients admitted to TCADA-funded programs in 2006, 12 percent were homeless.[8] Homeless persons with substance abuse problems may require supportive services. Through the Emergency Shelter Grants Program (ESGP), TDHCA funds organizations that provide shelter and related services for homeless persons, as well as intervention services to persons threatened with homelessness. Activities include renovating buildings for use as shelters; medical and psychological counseling; assistance in obtaining permanent housing; and homeless prevention services, such as rent and utility assistance. In addition, the TDHCA Housing Tax Credit program has funded Single Room Occupancy developments that serve the extremely low-income population that is previously homeless or at risk of homelessness.

ECONOMIC DEVELOPMENT

Priority Goal

To provide an attractive economic climate for current and emerging industries that fosters economic opportunity, job creation, capital investment, and infrastructure development by:

- promoting a favorable and fair system to fund necessary state services;
- addressing transportation needs;
- promoting a favorable business climate; and
- developing a well trained, educated, and productive workforce.

Benchmarks

- Number of employees in targeted industry sectors
- Number of new non-government, non-farm jobs created
- Per capita gross state product
- Texas unemployment rate
- Number of Texans receiving job training services

[7] National Coalition for the Homeless, *Who is Homeless?*
[8] Texas Department of State Health Services, "Characteristics of Adult Clients at Admission to State-Funded Treatment Programs by Drug Type" http://www.dshs.state.tx.us/sa/Research/statewide-totals/ (accessed May 30, 2008).

The provision of affordable housing also has an economic impact on communities. As is the case with market rate real estate production, an economic benefit accompanies the construction of affordable housing. Construction directly creates jobs, wages, and tax revenues. It also provides indirect economic benefits as the construction creates demand for goods and services. According to a study by the National Association of Home Builders,[9] the construction of:

- 100 single-family homes generates 284 full-time local jobs; $16 million in local income; and $1.8 million in taxes and other revenue for local governments.
- 100 multifamily units generates 133 full-time local jobs; $7 million in local income; and $710,000 in taxes and other revenue for local governments.

The economic growth of communities can be adversely impacted when job growth is not matched with corresponding growth in affordable housing opportunities. For businesses, the ability to attract and retain labor is partly dependent on the availability of decent and affordable housing.[10] As expressed at many TDHCA public hearings, affordable housing's affect on economic development is of particular concern to rural areas. The relative geographic isolation of some rural communities means they cannot rely on nearby communities for housing that can help support their growth opportunities.

A report from the Joint Center for Housing Studies of Harvard University[11] sums it up well:
"Housing is just as important to communities, because livability and competitiveness go hand in hand. Communities that can attract and retain investment and labor are more likely to succeed in the evolving global economy. Simply put, a suitable living environment is a precursor to economic vitality. So, too, is decent housing. Housing that is excessively costly for the local workforce undermines workers' ability to afford the basic necessities of food, clothing, childcare, health care, and education.

Communities that want to be competitive or regain their competitiveness must provide housing for the full range of workers, from middle-income households and high-end earners to those in the moderate- and lower income range. Achieving a jobs-housing balance that preserves economic diversity is key to success."

TDHCA addresses the priority goals and benchmarks in the following ways.

- The following table shows TDHCA funding allocated during fiscal year 2007 and the corresponding number of housing units to be built or rehabilitated. As described above, this activity has a significant economic impact in the communities where the construction will occur.

[9] National Association of Homebuilders, "The Local Impact of Homebuilding," http://www.nahb.org/generic.aspx?sectionID=784&genericContentID=35601 (Accessed 5/30/08).

[11] Jack F. Kemp, Kent W. Colton, Henry G. Cisneros, Nicolas P. Retsinas, *Opportunity and Progress, A Bipartisan Platform For National Housing Policy, Special Preview Edition (*Cambridge, Massachusetts: Joint Center for Housing Studies of Harvard University, 2004), 3.

Household Type	Activity	Committed Funds	# of Units Constructed or Renovated
Renter	New Construction	$168,850,824	9,081
	Rehab. Construction	$36,490,721	3,517
Owner	Rehabilitation Assistance	$21,172,691	378

- In addition to the economic benefits derived from constructing housing units with the help of TDHCA resources, as described in the "Health and Human Services" goals and benchmarks section of this report, the rental development and community services programs help persons in need by providing essential employment related services. These services include access to computers, the internet, child care, transportation, job training and employment services, and education services.
- Local governments, organizations, and developers receiving TDHCA funds typically use local labor and companies to complete the work, thus supporting the local economy. For example, local community action agencies operating the Weatherization Assistance Program use local contractors to make energy efficient repairs and improvements.

REGULATORY

Priority Goal

To ensure Texans are effectively and efficiently served by high-quality professionals and businesses by:

- implementing clear standards;
- ensuring compliance;
- establishing market-based solutions; and
- reducing the regulatory burden on people and business.

Benchmarks

- Percent of state professional licensee population with no documented violations
- Percent of new professional licensees as compared to the existing population
- Percent of documented complaints to professional licensing agencies resolved within six months
- Percent of new and renewed professional licenses issued via internet
- Percent of state financial institutions and credit providers rated "safe and sound" and/or in compliance with state requirements
- Percent increase in utilization of the state business portal

TDHCA addresses the priority goals and benchmarks in the following ways.

- TDHCA's Portfolio Management and Compliance Division (PMC), in coordination with agency programs, ensures that compliance with federal and state programs is achieved. PMC focuses on maintaining required long term affordability standards, justifying tenant income certification records. PMC also works closely with the program areas to ensure that applicants for funding who have previously received assistance from TDHCA are in compliance with the terms and requirements of those contracts.

- The Manufactured Housing Division (MHD) licenses and regulates those who manufacture, sell, broker, and install manufactured homes. MHD issues and maintains records on manufactured home ownership and location, inspects manufactured home installations, and investigates and oversees the resolution of consumer complaints. It maintains offices in Austin, Dallas/Ft. Worth, Houston, San Antonio, Lubbock, Tyler, Waco, and Edinburg, as well as offers professional license renewals through Texas Online. The Manufactured Housing Division also licenses and inspects migrant farmworker housing facilities and assist the Compliance Division in inspecting TDHCA-monitored multifamily properties.
- Regarding the soundness of financial institutions and credit providers, the Financial Service, Bond Finance, and Single Family Finance Production divisions offer current and future first time home buyers the ability to purchase homes at below market rate with down payment assistance without affecting state debt. Standard & Poor's has awarded TDHCA Bonds with the highest bond rating as a result of efficient and effective accounting practices and for having a low cost of issuance per bond.

GENERAL GOVERNMENT

Priority Goal

To provide citizens with greater access to government services while reducing service delivery costs and protecting the fiscal resources for current and future taxpayers by:

- supporting effective, efficient, and accountable state government operations;
- ensuring the state's bonds attain the highest possible bond rating; and
- conservatively managing the state's debt.

Benchmarks

- Total state spending per capita
- Percent change in state spending, adjusted for population and inflation
- Ratio of federal dollars received to federal tax dollars paid
- Number of state employees per 10,000 population
- Number of state services accessible by internet
- Total savings realized in state spending by making reports/documents/processes available on the internet
- Affordability of homes as measured by the Texas Housing Affordability Index

TDHCA addresses the priority goals and benchmarks in the following ways.

- TDHCA ensures that all programs follow the citizen participation and public hearing requirements as outlined in the Texas Government Code. Hearing locations are accessible to all who choose to attend and are held at times accessible to both working and non-working persons. A database has been developed that includes citizen and nonprofit organizations, local governments, state legislators, public housing authorities, and local public libraries so that, when a public hearing or public comment period is scheduled, all interested parties are notified. Additionally, pertinent information is posted in the Texas Register, in Breaking Ground (the TDHCA newsletter), and on TDHCA's website. Participation and comments are encouraged and can be submitted either at a public hearing or in writing via mail, fax, email, and, in some cases, directly at the TDHCA website.

- TDHCA values and relies on community input to direct resources to meet its goals and objectives. In an effort to provide the public with an opportunity to more effectively give input on TDHCA's policies, rules, planning documents, and programs, TDHCA has consolidated most of its public hearings related to policy and rule development. Each year, a hearing on all TDHCA programs will be held in each State Service Region the Department uses for planning and reporting purposes. After the regional hearings are held, a separate Board hearing is held specifically on the State Low Income Housing Plan, TDHCA's key annual planning and policy document, so comment may be provided directly to the Board. Staff is available at each hearing to answer questions and lend technical assistance to attendees.
- All TDHCA program funds are distributed and used with the intention of delivering the highest possible level of assistance. Before being recommended to the Board for approval, all multifamily housing production applications are thoroughly underwritten by the Real Estate Analysis Division to ensure the proposed activity is both financially feasible and uses the minimum required amount of assistance. All of the Department's internal operations are thoroughly scrutinized by funding source reporting requirements, internal and external audits, and the LBB budgeting and performance measurement system to provide for the most efficient and effective provision of services.
- In support of the agency mission, TDHCA has a strong commitment to providing the citizens of Texas open, online access to information about every agency program and service through detailed web pages, a posted library of agency publications, and customer search tools to find local assistance providers for buying homes, renting, home repair and weatherization, and utility bill payments.
- The TDHCA Interactive page is the website's portal to online services. In addition to the services mentioned above, the Interactive page provides a link to the Manufactured Housing online database of ownership, license, installation, and inspections records. It also includes a Contractor Tools section, which provides both housing and community affairs program subrecipients access to systems for reporting and maintaining contract and compliance data.
- Virtually every report or document that TDHCA produces is available on the website. In the six months from November 2007 to April 2008, the public website received approximately 218,000 visitors. During the same period visitors requested an estimated 627,000 pages including PDF document files. The Manufactured Housing online database garnered an estimate number of 32,000 visitors and 450,200 page requests by Web visitors for the period. In addition, the Division of Policy and Public Affairs' Information Clearinghouse accommodated a total amount of 25,300 visitors and 23,170 page requests.
- Through the Central Database project, TDHCA automated the processes associated with contract management, draw requests, and compliance reporting. TDHCA housing program personnel administer 2,252 contracts in the TDHCA Contract System (515 contracts with a status other than closed), and over 1,600 accounts are in place for subrecipients who submit electronic contract activity setups and draw requests. Additionally, there are currently 2,463 accounts in place for property owners and managers who submit online status reports on 1,964 active properties with over 216,958 units through the Compliance Monitoring and Tracking System.

- While TDHCA's activities do not directly impact the Texas housing affordability index, which is based on local area income levels and home prices, its single family loan products certainly allow many more people to buy their own home then would otherwise be possible.

TDHCA MISSION

To help Texans achieve an improved quality of life through the development of better communities.

TDHCA PHILOSOPHY

CUSTOMERS

- Advocacy: The Department will actively encourage, support, and promote an improved quality of life for extremely low, very low, low, and moderate income Texans.
- Service: The Department will be responsive to every constituent request and provide every customer with prompt, courteous service.
- Partnership: The Department will foster an atmosphere that is conducive to encouraging and forming public and private partnerships that are responsive to the needs of extremely low, very low, low, and moderate income Texans.
- Equity: The Department will establish processes for the public's full participation in programs and the fair allocation of resources.
- Respect: The Department believes in the worth of all persons and their need for decent, safe, and affordable housing.

OPERATIONS

- Integrity: The Department will conduct business openly, free of bias, and according to the highest ethical and professional standards.
- Accountability: The Department will be answerable and responsive to the Texas Legislature, external customers/consumers, and its various funding sources.
- Efficiency: The work of the Department will be accomplished in the most direct, cost-effective manner.
- Leveraging: Each program will encourage the public and private sector to contribute additional resources that maximize the economic impact of and expand the level of assistance provided by state and federal dollars.

STAFF

- Quality: Each employee will strive for excellence in the work performed.
- Creativity: Department staff will continually seek innovative methods for performing work in their respective fields.
- Respect: The Department recognizes that its employees are the critical element in accomplishing its mission and goals. Therefore, it pledges to support their continued professional development and provide opportunities for reward based on their performance. In doing so, it also pledges to promote a collaborative and positive work environment for all employees.

EXTERNAL/INTERNAL ASSESSMENT

I. OVERVIEW OF AGENCY SCOPE AND FUNCTIONS

A. Statutory Basis

Chapter 2306 of the Texas Government Code outlines the functions of TDHCA as follows:

Sec. 2306.001. Purposes. The purposes of the department are to:

1) *assist local governments in*
   A) *providing essential public services for their residents; and*
   B) *overcoming financial, social, and environmental problems;*
2) *provide for the housing needs of individuals and families of low and very low income and families of moderate income;*
3) *contribute to the preservation, development, and redevelopment of neighborhoods and communities, including cooperation in the preservation of government-assisted housing occupied by individuals and families of very low and extremely low income;*
4) *assist the governor and the legislature in coordinating federal and state programs affecting local government;*
5) *inform state officials and the public of the needs of local government;*
6) *serve as the lead agency for:*
   A) *addressing at the state level the problem of homelessness in this state;*
   B) *coordinating interagency efforts to address homelessness; and*
   C) *addressing at the state level and coordinating interagency efforts to address any problem associated with homelessness, including hunger.*
7) *serve as a source of information to the public regarding all affordable housing resources and community support services in the state.*

B. Historical Perspective

The following events have shaped TDHCA's current organizational structure and program responsibilities.

- In 1991, the 72nd Texas Legislature created TDHCA from the Texas Housing Agency, the Texas Department of Community Affairs, and the Community Development Block Grant (CDBG) Program from the Texas Department of Commerce.
- On September 1, 1992, two programs were transferred to TDHCA from the Texas Department of Human Services: the Low Income Home Energy Assistance Program (LIHEAP) and the Emergency Nutrition and Temporary Emergency Relief Program.
- On September 1, 1995, in accordance with House Bill 785, regulation of manufactured housing was transferred to the Department.
- On September 1, 2001, in accordance with House Bill 7, the CDBG and Local Government Services programs were transferred to the newly created Office of Rural Community Affairs (ORCA). However, TDHCA, through an interagency contract with ORCA, administers 2.5 percent of the CDBG funds used for the Self-Help Centers along the Texas-Mexico border.
- Also on September 1, 2001, in accordance with Senate Bill 322, the Manufactured Housing Division became an independent entity administratively attached to TDHCA.

- In a recent effort to improve efficiency and effectiveness, the Department implemented a significant reorganization of certain housing related activities and administrative structures.
- TDHCA's programs continue to evolve in response to statutory changes, federal program changes, and public participation.

C. Affected Populations

As established by §2306.001(2), TDHCA is to "provide for the housing needs of individuals and families of low, very low, and extremely low income and families of moderate income…" Per Section 2306.004, individuals and families of the following:

- "extremely low income" earn not more than 30 percent of the area median income or applicable federal poverty line, as determined under Section 2306.123 or Section 2306.1231.
- "very low income" earn not more than 60 percent of the area median income or applicable federal poverty line, as determined under Section 2306.123 or Section 2306.1231.
- "low income" earn not more than 80 percent of the area median income or applicable federal poverty line, as determined under Section 2306.123 or Section 2306.1231,

Section 2306.004 also defines ""Family of moderate income" to be a family:

"(A) that is determined by the board to require assistance, taking into account:

(i) the amount of the total income available for housing needs of the individuals and families;

(ii) the size of the family;

(iii) the cost and condition of available housing facilities;

(iv) the ability of the individuals and families to compete successfully in the private housing market and to pay the amounts required by private enterprise for sanitary, decent, and safe housing; and

(v) standards established for various federal programs determining eligibility based on income; and

(B) that does not qualify as a family of low income."

For the single family bond funded loans, moderate income would include homebuyers with household incomes up to 115 percent of the area median family income and 140 percent of the area median family income for targeted areas.

Within these income categories, there are households that have special needs which further complicate their ability to find housing. The US Department of Housing and Urban Development (HUD) has designated the homeless, persons with disabilities, the elderly, persons with alcohol and/or drug addictions, persons with HIV/AIDS, and public housing residents as special needs populations requiring special attention. TDHCA also considers colonia residents and migrant farmworkers to be special needs populations with unique needs.

The varying state and federal income categories can cause some confusion when TDHCA reports on the income levels of its assistance recipients in documents with different audiences such as the State Low Income Housing Plan, LBB Performance Measures, and the HUD Consolidated Planning documents.

D. Main Functions

To achieve its mission, TDHCA provides the following types of assistance.

Housing and Community Services Assistance

Types of housing and community services assistance may include:

- housing assistance for individual households (homebuyer mortgage and down payment assistance, home repair, and rental payment assistance);
- funding for the development of apartments (new construction or rehabilitation of rental units);
- energy assistance (utility payments or home weatherization activities);
- assistance for homeless persons and emergency relief for individuals or families in crisis poverty (transitional housing, energy assistance, home weatherization, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and other emergency assistance); and
- capacity building assistance (training and technical assistance, assistance with operating costs, and predevelopment loans to help local housing organizations develop housing).

With the exception of most of its community services assistance, TDHCA's funding resources are awarded through formal, published processes. As such, funding is distributed to entities that, in turn, provide assistance to households in need. This distribution is done using a number of techniques.

- Almost all housing development, rehabilitation, and rental assistance related funding is awarded through formal request for proposals and notices of funding availability.
- First time homebuyer mortgage and down payment assistance is allocated through a network of participating lenders.
- Community services funds are predominantly allocated through a network of community based organizations who receive their funding on an annual, ongoing basis.

Funding for the services listed above include the US Department of Housing and Urban Development (HUD), US Department of Treasury (DoT), US Department of Health and Human Services (DHHS), and US Department of Energy (DoE), and Texas general revenue funds.

Manufactured Housing Activities

TDHCA's Manufactured Housing Division (MHD)[12] administers the Texas Manufactured Housing Standards Act. The act ensures that manufactured homes are well-constructed and

[12] The Manufactured Housing Division is an independent entity within TDHCA that is administratively attached, but has its own Board of Directors and Executive Director.

safe, are installed correctly, that consumers are provided fair and effective remedies, and that measures are taken to provide economic stability for the Texas manufactured housing industry. MHD's services include issuances of Statement of Ownership and Location (SOL) research; training and license issuances to individuals for manufactured housing manufacturing, retailing, rebuilding, installations, broker, or sales; records and releases on tax and mortgage liens; installation inspections; consumer complaints; and federal oversight under a cooperative agreement with HUD.

Information Resources

TDHCA is a housing and community services informational resource for individuals, local governments, the Legislature, community organizations, advocacy groups, and members of the housing development community. Examples of information it provides include: general information on TDHCA activities, US Census data analysis, and consumer information on available housing and supportive service assistance statewide. A primary method by which this information is made available is TDHCA's interactive consumer assistance website at http://www.tdhca.state.tx.us/assist_main.htm.

In all of its activities, TDHCA strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process. *Table 1. Summary of TDHCA Functions* briefly describes the activities assisted by and households served by each TDHCA program.

E. Public Perception

TDHCA is seen as a financial and administrative resource that helps provide essential services and affordable housing opportunities to Texans who qualify for this assistance based on their income level. Additionally, the Department is seen as a resource for educational materials and technical assistance for housing, housing related, and community services matters.

A common misperception is that TDHCA has regulatory authority over all aspects of housing throughout the state, from homeowners associations to the home building industry. As a result, requests are often made to intercede in issues that are not related to departmental business. There is also some confusion regarding the roles, duties, and jurisdictions of TDHCA and federal, state, and local housing agencies. TDHCA staff seeks to clarify the Department's role through its website and publications, and by directing inquiries to appropriate service providers.

TDHCA is perceived as an organization that focuses on providing affordable housing assistance to very low income and low income persons and families. The basic structures of its largest multifamily rental funding sources, Housing Tax Credit and Multifamily Bond programs, mainly serve households at or below 50 and 60 percent of the area median income. Those developments that are able to utilize very limited funds from another affordable housing program, such as the HOME program, are often able to reach households with even lower incomes.

Table 1: Summary of TDHCA Functions

Activity	Program	Program Description	Eligible Households
Multifamily Development	HOME Investment Partnerships Program (HOME)	Loans or grants to develop or preserve affordable rental housing	<80% AMFI
	Housing Trust Fund (HTF)	Loans or grants for rental housing development, predevelopment, and other industry innovations	<80% AMFI
	Housing Tax Credit (HTC)	Tax credits to develop or preserve affordable rental housing	<60% AMFI
	Multifamily Bond (MFB)	Loans to develop or preserve affordable rental housing	<60% AMFI
	Community Development Block Grant (CDBG)	Targeted disaster recovery assistance to preserve affordable rental housing	<80% AMFI
Rental Assistance	HOME Program	Loans for entities to provide tenant-based rental assistance for two years	<80% AMFI
	Section 8 Housing Choice Vouchers	Acts as a public housing authority to offer tenant-based rental assistance vouchers in certain areas	<50% AMFI
Single Family Development	HOME Program	Loans or grants for entities to construct single family housing and offer down payment assistance	<80% AMFI
	Colonia Model Subdivision	Loans for Community Housing Development Organizations (CHDOs) to develop residential subdivisions as an alternative to colonias	<60% AMFI
Home Purchase Assistance and Home Repair Assistance	Contract for Deed Conversion Initiative	Facilitates colonia-resident ownership by converting contracts for deed into traditional mortgages	<60% AMFI
	Grant Assistance	Grants in conjunction with the First Time Homebuyer Program for down payment and closing costs	<80% AMFI
	HOME Program	Loan and grants for entities to offer down payment and closing cost assistance	<80% AMFI
	HOME Program	Loans and grants for entities to provide home repair assistance	<80% AMFI
	Lone Star Loan	Market-rate loans with second liens for down payment assistance	<115% AMFI
	Mortgage Credit Certificate	Annual tax credit based on the interest paid on the homebuyer's mortgage loan	<115% AMFI
	Texas Bootstrap Loan	Funds entities to offer owner-builder loans programs	<60% AMFI
	Texas First Time Homebuyer	Low-interest loans for first time homebuyers	<115% AMFI
	Community Development Block Grant (CDBG)	Targeted disaster recovery funding to provide home repair assistance	<80% AMFI
Homebuyer Education	Colonia Consumer Education Services	Homebuyer education offered through Colonia Self-Help Centers and Office of Colonia Initiatives (OCI) field offices	<115% AMFI (All)
	Texas Statewide Homebuyer Education	Training for nonprofits to provide homebuyer education	<115% AMFI (All)
Community Affairs Activities	Community Services Block Grant (CSBG)	Funds local agencies to provide essential services and poverty programs	<50% AMFI
	Emergency Shelter Grants (ESGP)	Funds entities to provide shelter and related services to the homeless	<30% AMFI (Homeless)
	Comprehensive Energy Assistance (CEAP)	Funds local agencies to offer energy education, financial assistance, and HVAC replacement	<50% AMFI
	Weatherization Assistance (WAP)	Funds local agencies to provide minor home repairs to increase energy efficiency	<50% AMFI
Manufactured Housing	Manufactured Housing Division	Regulates the manufactured housing industry. Licenses manufactured housing professionals, titles homes, inspects homes, and investigates manufactured housing complaints.	All

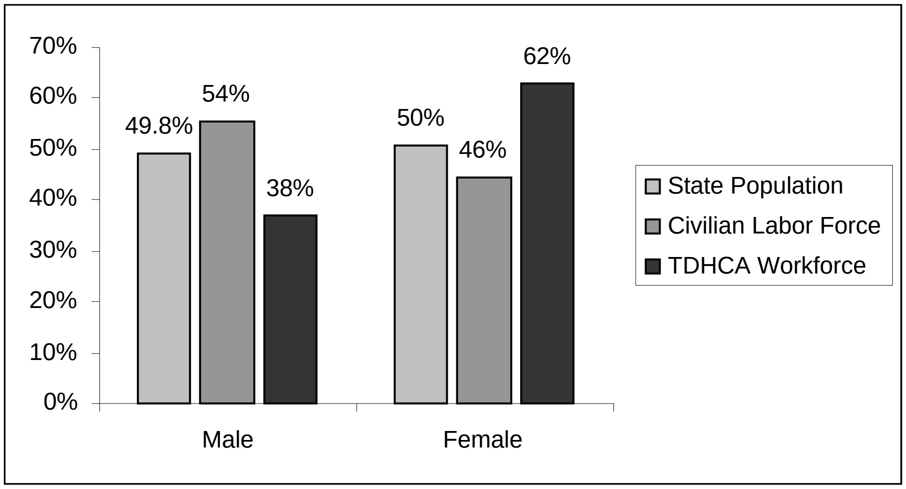
At times, a conflict exists between the actual characteristics of and the public perception of "affordable housing." This conflict is fed by some public perceptions as to the residents' income levels and employment status; construction quality, design, and density of the developments; and socio-economic impacts on the surrounding neighborhood. TDHCA is sometimes perceived as placing affordable rental housing in neighborhoods without adequately addressing the concerns of area residents. Because the development of any type of housing involves partnerships between the community, developers, and government, the Board and TDHCA staff go to great lengths to encourage developers to communicate and work with neighborhood groups to ensure their voice is heard throughout the process. TDHCA takes seriously its obligation to evaluate community input on funding decisions, including making neighborhood input a scoring criterion for the HTC Program. Public comment is solicited throughout the state as part of the housing application process, and public comment is taken before and during each Board meeting. This comment is balanced with the goal of ensuring that low income Texans have opportunities to live in desirable parts of their community with access to the area's employment, educational, health, and social amenities.

II. ORGANIZATIONAL ASPECTS

A. Size and Composition of Workforce

As of May 1, 2008, TDHCA had a total headcount of 285 employees. The agency is authorized to have 298 total full-time equivalents (FTEs). Additionally, TDHCA was allocated funds for the Community Development Block Grant (CDBG) disaster recovery program as part of the disaster relief efforts after Hurricane Rita. There are 12 FTEs that are budgeted for this program currently. Out of the 285 employees there are 10 FTEs allocated as part of the CDBG disaster recovery relief program. These FTEs are not counted as part of the FTE cap per Article IX under "federally funded" rule but are included in the FTE count for EEO reporting purposes. These FTEs are considered temporary positions and will be part of TDHCA for at least the next biennium or until federal disaster funds are expended.

The following charts profile TDHCA's workforce and include both full-time and part-time employees. The TDHCA workforce is comprised of 38 percent males and 62 percent females. As shown in the table below, the TDHCA workforce has a higher representation of female workers than the state population and civilian workforce.



Workforce by Age

Approximately 62 percent of TDHCA's workforce is over the age of 40. This indicates that the workforce has a high level of overall work experience. TDHCA continues to be successful in the recruitment and retention of employees in this age group. The average age of TDHCA employees is 44.

Employee Tenure

Approximately 46 percent of TDHCA employees have less than 5 years of TDHCA service, 25 percent with 6-10 years of experience, 23 percent with 11-15 years of experience, and 6.3 percent with more than 15 years experience. The average number of years of service for Department employees is 11 years. TDHCA continually strives to ensure that employees are appropriately compensated; to improve internal communications through a variety of venues; to promote training and career development; and coordinate employee service recognition activities to motivate employees and to improve employee retention.

Age

Age Group	Population	Percentage
Under 30	21	7.4%
30-39	87	31%
40-49	84	29.4%
50 – 59	77	27%
60 and over	16	5.6%
Total	285	

As of April 30, 2008

Employee Tenure

Tenure Range	# of Employees	% of Total
<1 year	35	12.3%
1 – 5	97	34%
6 – 10	71	25%
11 – 15	66	23%
16 – 20	11	3.9%
21 – 25	3	1.1%
26 – 30	2	07%
30 +	-	-
Totals	285	100%

As of April 30, 2008

TDHCA's Workforce and the Statewide Civilian Workforce

The tables and charts that follow compare the percentage of African American, Hispanic, and Female TDHCA employees (as of April 30, 2008) to the statewide civilian workforce as reported by the Texas Workforce Commission Civil Rights Division. Overall, the race and ethnic composition of the TDHCA workforce is very diverse and exceeds the state percentages.

However, there are four areas where TDHCA's Equal Employment Opportunity (EEO) employment percentages are less than the state's percentages:

- Female Technicians (The presence of under-representation in this category is thought to be caused in large part by the small number of employees in this category).
- Female-Official/Administration (This category shows a slight under-representation, less than one percent, for females as compared to the state).
- African American-Official Administration
- African-American Technicians

TDHCA targets recruitment resources that reach out to the workforce in the under-represented categories so that the applicant pool represents the ethnicity and gender to meet EEO goals of the state.

Description of TDHCA Workforce by Ethnicity and Gender

	African American		Hispanic		White		Other		Total	
Equal Employment Opportunities (EEO) Categories*	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
A - Administrators and Officials	-	-	3		9	7	-	-	12	7
P - Professionals	7	22	19	54	31	56	1	6	58	138
T - Technician	3	-	8	2	21	5	-	-	32	7
Q - Para-professionals	1	4	-	6	-	3	-	-	1	13
C - Administrative Support	2	3	0	6	3	2	-	-	5	12
Total by Race/Ethnicity & Gender	13	29	30	68	64	74	1	6	108	177
Percent of Total by Race/Ethnicity & Gender (%)	5	10	11	24	29	26	0.4	2	38	62
Total by Race/Ethnicity	42		98		138		7		285	
Pct of Total by Race/Ethnicity	15%		34%		48%		2%			

*A – Administrators and Officials: directors, employees establishing broad policy and exercising responsibility for execution of those policies.

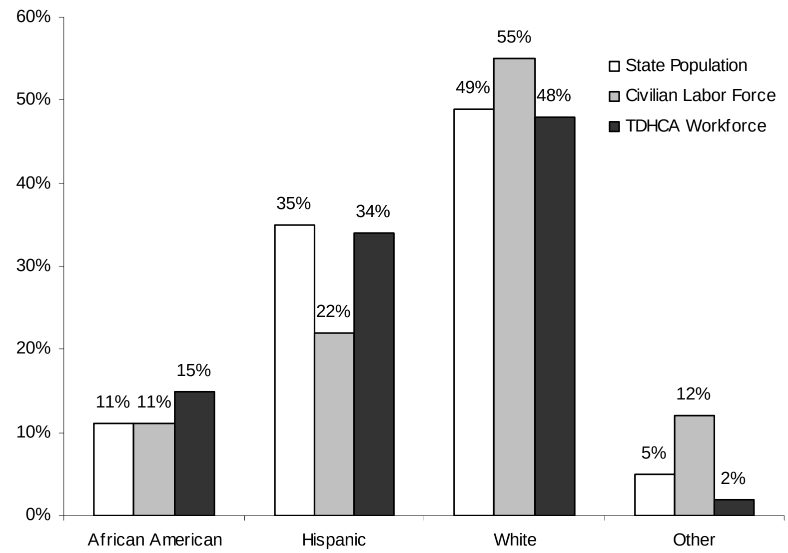
P – Professionals: accountants: systems analysts, attorneys, occupations requiring specialized training or education.

T – Technician: computer technicians, occupations requiring basic scientific or technical knowledge.

Q – Para-professionals: persons performing some of the duties of professionals in a supportive role.

C – Administrative Support: these include clerical payroll clerks, legal assistants, office machine operators, statistical clerks, and bookkeepers.

Comparison of TDHCA Workforce by Race/Ethnicity to State Population and Civilian Workforce



Source: US Census, 2006 American Community Survey; TDHCA Human Resources Data; Uniform Statewide Payroll System (2008 data); and Bureau of Labor Statistics (2004)

TDHCA's workforce is in close correlation to the State population by race and ethnicity.

Comparison of TDHCA EEO and Statewide Employment Statistics

	% African American		% Hispanic		% Females	
Job Category	TDHCA	State	TDHCA	State	TDHCA	State
Officials/Administrators	-	6.6%	16%	14.2%	37%	37.3%
Professionals	15%	8.3%	37.2%	13.4%	70.4%	53.2%
Technicians	7.6%	12.4%	25.6%	20.2%	17.9%	53.8%
Para-Professionals	35.7%	13.8%	42.8%	40.70%	92.8%	39%
Administrative Support	29.4%	11.2%	35.2%	24.10%	70.5%	64.7%

Agency Turnover

Percent of Workforce Eligible to Retire

Of the current 285 employees, there are 17 employees or 6 percent who are currently eligible to retire under the "Rule of Eighty". Ten of these employees are from the Manufactured Housing Division and all of these employees work in the field offices as Inspectors. Within the next biennium there will be 11 additional employees eligible to retire under the "Rule of Eighty". This will be a total of 10 percent employees eligible for retirement.

Of the current 285 employees there will be 8 employees or 3 percent that will be eligible to retire as a result of reaching the age of sixty with five years of service in the next biennium.

It should be noted that TDHCA currently has six retiree rehires. Management is aware of the impact they will have on the loss of knowledge and skill base and is continually looking at methods to replace this knowledge through:

- Employee Development
- Mentoring Program
- Cross divisional training

Projected Employee Turnover Rate over the Next Five Years
In FY2007 the turnover rate for TDHCA was at its lowest point in comparison to the previous turnover rates. As shown by the chart below, TDHCA's turnover rates have historically been under the state turnover rates and have fluctuated.

Historical Employee Turnover Rate

Entity	FY2003	FY2004	FY2005	FY2006	FY2007
Statewide Turnover	18.2%	42.1%	19.1%	17.9%	19.2%
TDHCA Turnover	16.6%	13.4%	15%	12.5%	8.6%

Source: SAO E-Class as of 4/21/08. Turnover rates include interagency transfers.

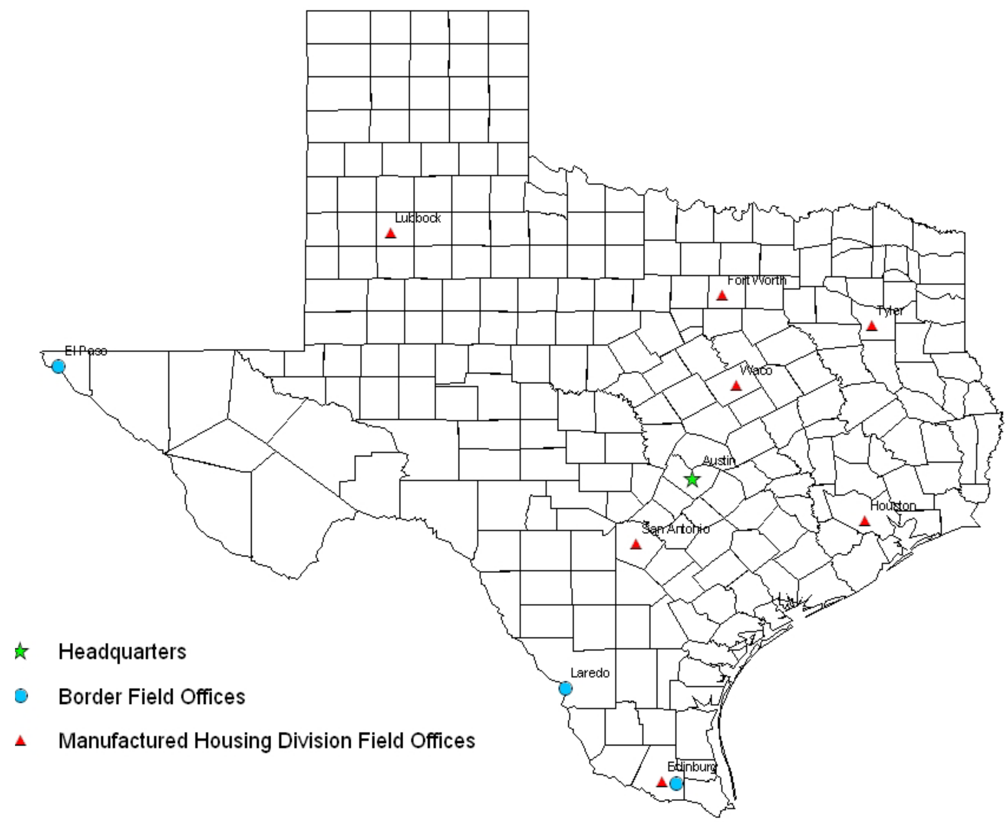
B. Organizational Structure and Process
TDHCA is organized under four divisions that report to the Executive Director: Administration, Programs, Legal Services, and Public Affairs. Within the Programs Division, activities are organized under the following categories: Community Affairs, Office of Colonia Initiatives, HOME, Homeownership, Multifamily Finance Production, Real Estate Analysis, and Housing Resource Center. Within the Administration Division, activities are organized under the following categories: Administrative Support, Bond Finance, Financial Administration, Information Systems, and Portfolio Management and Compliance (PMC). The Internal Audit Division reports directly to the Board. The Manufactured Housing Division operates within TDHCA as an administratively attached but independent entity. An organizational chart of the Department is provided as Appendix B.

TDHCA's Executive Director is employed by the Board with the approval of the Governor. The Executive Director is responsible for administering the work of the Department. The seven-member Governing Board, appointed by the Governor with advice and consent of the Senate, works with the Executive Director to develop policies and programs to meet the needs of the mission and goals of the Department.

C. Geographical Location of Agency

TDHCA's headquarters is located in the state owned State Insurance Building Annex at 221 East 11th Street, Austin, TX 78701. The Office of Colonia Initiatives has Border Field Offices located in Edinburg, El Paso, and Laredo. The Manufactured Housing Division has field offices located throughout the state in Dallas-Ft. Worth, Edinburg, Houston, Lubbock, San Antonio, Tyler, and Waco.

Figure 1: TDHCA Locations



D. Location of Service Populations and Regions

TDHCA is committed to equitably and effectively serving citizens in all areas of the state. For its general planning and reporting purposes, a 13 region geographic configuration of the state's 254 counties is used. These state service regions, which were developed by the Texas Comptroller of Public Accounts, are referenced in §2306.111(d) of the Texas Government Code which calls for the regional allocation of TDHCA's HOME, HTC, and HTF funding. A map of the regions are shown below in Figure 2.

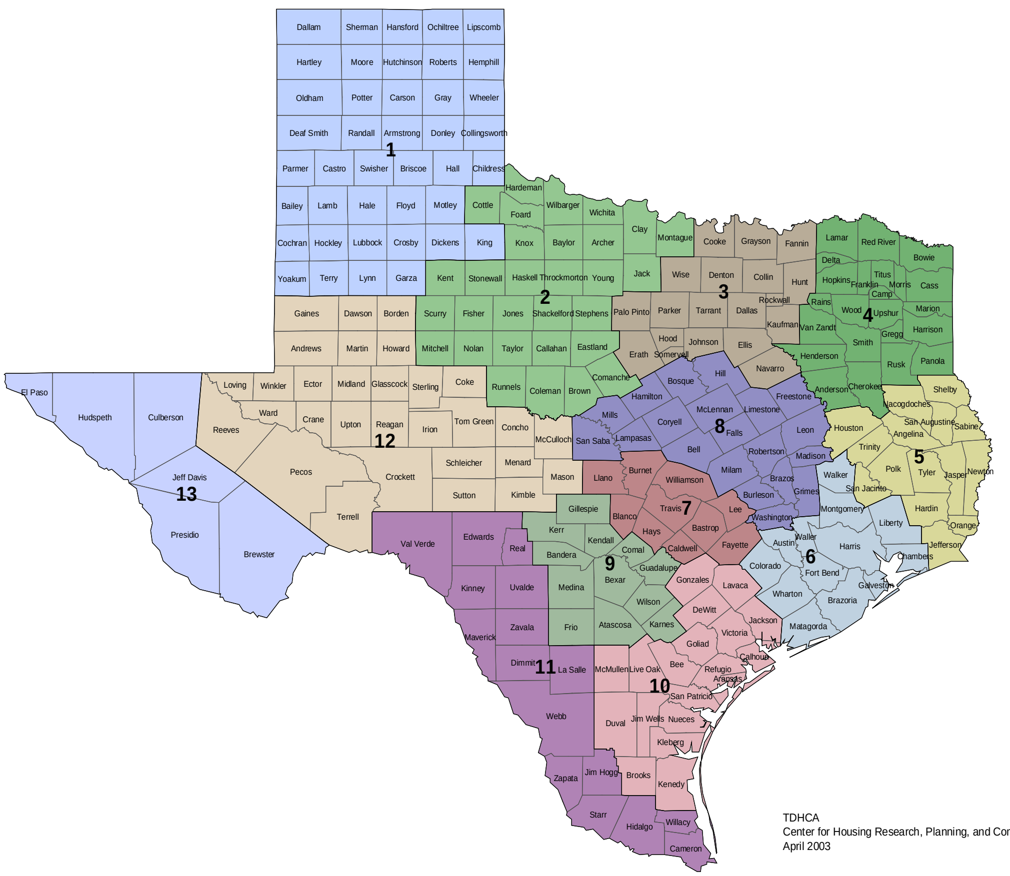
TDHCA funding is regionally allocated via the following:

- HOME, HTC, and HTF funding is allocated by formula to be distributed within each region. It should be noted that in some instances funding from these programs that is used to fulfill federal, state, or board mandated set-asides may be exempted from the regional distribution formula.

- MFB financing is allocated statewide based on a lottery method controlled by the Texas Bond Review Board.
- Community Affairs funding for the Emergency Shelter Grants Program, Community Services Block Grant, Comprehensive Energy Assistance Program, and Weatherization Assistance Program funding is allocated statewide through a network of subcontractors. Each subcontractor receives a funding allocation based on the level of need within the counties they serve. There may be multiple subcontractors within each region.
- A statewide network of participating lenders is used to distribute the single family bond financing. The final distribution of funding is based on consumer demand.

As described below, a wide variety of program regulations, market conditions, and legislative requirements affect TDHCA's statewide resource distribution.

Figure 2: TDHCA Service Regions



Colonias

TDHCA has specific policy goals, strategies, and programs designed to support the improvement of living conditions of colonia and border residents along the Texas-Mexico border region. A “colonia,” Spanish for “neighborhood” or “community,” is a geographic area located within 150 miles of the Texas-Mexico border that has a majority population comprised of individuals and families of low and very low income who lack safe, sanitary, and sound housing. This includes a lack of basic services such as potable water, adequate sewage systems, drainage, streets, utilities, paved roads, and plumbing. As discussed in detail in the “III. Fiscal Aspects” section of the Plan beginning on page 32, there are a number of Legislative Riders that dedicate specific amounts of TDHCA funding to serve these communities.

Rural and Urban Needs

As the migration of population and industries continues to urban and suburban areas, the less-populous areas of the state are faced with an aging housing stock and households with lower incomes than their urban or suburban counterparts. To address the income disparity and reduced access to housing and community services resources (e.g., larger communities and regions have greater access to bonds, a large tax base, and investment capital) in less-populous areas, TDHCA gives focused consideration to rural areas when developing its housing programs and the rules that govern these programs.

Specific examples of how TDHCA addresses rural needs include:

- It is legislatively required that 95 percent of the TDHCA HOME funding be allocated to non-participating jurisdiction areas. Because participating jurisdictions (PJs), which are larger metropolitan cities and more populous counties, receive HOME program funds directly from HUD, TDHCA directs its HOME program allocation to non-PJ areas of the state. The remaining 5 percent of HOME funds may be expended in any area of the state, but only if it funds an activity that serves persons with disabilities.
- §§2306.111(d) and 2306.1115 require that the regional allocation formula used to distribute HOME, HTC, and HTF funding consider existing housing need and available resources to meet this need in rural and urban areas.
- TDHCA and ORCA jointly administer the HTC Program rural allocation. ORCA helps develop and approves all thresholds, scoring, and underwriting criteria for the rural allocation. The resulting joint outreach, training, and rural area capacity building efforts help increase participation in the rural set-aside.
- The TDHCA Section 8 Housing Choice Voucher Program specifically serves households in small cities and rural communities that are not served by similar local or regional housing voucher programs.

Regional Allocation Plans

As required by federal or state laws, depending on the program, TDHCA has developed regional allocation formulas for many of its programs. These formulas are based on objective measures of need and available resources that help ensure an equitable distribution of funding across the state.

2008 HOME, HTC, and HTF Regional Allocation Formula

Sections 2306.111(d) and 2306.1115 of the Texas Government Code require that TDHCA use a Regional Allocation Formula (RAF) to allocate its HOME, HTC, and HTF funding. This RAF objectively measures the affordable housing need and available resources in 13 State Service Regions used for planning purposes. Within each region, the RAF further targets funding to rural and urban areas.

As a dynamic measure of need, the RAF is revised annually to reflect updated demographic and resource data; respond to public comment; and better assess regional housing needs and available resources. The RAF is submitted annually for public comment.

Slightly modified versions of the RAF are used for HOME, HTC, and HTF because the programs have different eligible activities, households, and geographical service areas. For example, because 95 percent of HOME funding must be set aside for non-PJs, the HOME RAF only uses need and available resource data for non-PJs.

For the 2008 fiscal year, the RAF uses the following 2000 US Census data to calculate this regional need distribution:

- Poverty: Number of persons in the region who live in poverty.
- Cost Burden: Number of households with a monthly gross rent or mortgage payment to monthly household income ratio that exceeds 30 percent.
- Overcrowded Units: Number of occupied units with more than one person per room.
- Units with Incomplete Kitchen or Plumbing: Number of occupied units that do not have all of the following: sink with piped water; range or cook top and oven; refrigerator, hot and cold piped water, flush toilet, and bathtub or shower.

There are a number of other funding sources that can be used to address affordable housing needs. To mitigate any inherent inequities in the regional allocation of these funds, the RAF compares each region’s level of need to its level of resources. For the 2008 RAF, resources from the following sources were used: HTC, HTF, HUD (HOME, Housing Opportunities for Persons with AIDS (HOPWA), public housing authority (PHA) capital funding, and Section 8 funding), Bond Financing, and United States Department of Agriculture (USDA) housing programs.

2008 Emergency Shelter Grants Program (ESGP) Allocation Formula

ESGP funds are reserved according to the percentage of poverty population identified in each of the 13 state service regions. The top scoring applications in each region are recommended for funding, based on the amount of funds available for that region. Any application that receives a score below 70 percent of the highest raw score from the region is not considered for funding.

2008 Community Service Block Grant (CSBG) Allocation Formula

Allocations to the 46 CSBG–eligible entities are based on two factors: (1) the number of persons living in poverty within the designated service delivery area for each organization and (2) a calculation of population density. Poverty population is given 98 percent weight, and the ratio of inverse population density is given 2 percent weight. The formula also includes a base award for each organization before the factors are applied, as well as a floor, or minimum award. In FY 2008, the Department will utilize the 2000 Census population figures at 125 percent of poverty, a base of $50,000, and a floor at $150,000.

2008 Comprehensive Energy Assistance Program (CEAP) and Weatherization Assistance Program (WAP) Allocation Formula

The allocation formula for the Comprehensive Energy Assistance and Weatherization Assistance programs uses the following five factors and corresponding weights to distribute its funds by county: county non-elderly poverty household factor (40 percent); county elderly poverty household factor (40 percent); county inverse poverty household density factor (5 percent); county median income variance factor (5 percent); and county weather factor (10 percent).

Other Factors that Affect the Distribution of Funds

In order to simplify the application process and direct monies quickly to address rural needs, HOME funds are awarded through an 'open-cycle' (first-come, first-served) application process. Under the 2008 HOME Investment Partnership Program rules, threshold criteria incentivizes income targeting, uses the Affordable Housing Needs Score (AHNS), requires a minimal match contribution and is conditioned on successful completion of previous HOME awards. Additionally, this process includes a review of past performance requiring good standing with the Department at the time of award. If applicants have received awards previously and have been deobligated due to non-performance of a contract, they are ineligible to receive funds from the HOME program for a period no less than 12 months. This process ensures the integrity of the RAF as required by Chapter 2306, compliance with federal program regulations, and state program rules. By incentivizing those applicants targeting lower income populations and utilizing the AHNS, the Department is able to ensure that the neediest Texans receive program benefit.

For applications that involve HTCs, applicants must receive a resolution from the local governing body for approval to add new units if the application is proposing new construction that is within one mile of an existing development that has received an allocation of Housing Tax Credits or Private Activity Bonds for new construction within the last three years and that serves the same population type (elderly/elderly or family/family). This applies to applications proposing New Construction and Adaptive Reuse in counties with over one million in population. Additionally, applications proposing development in a city or county that has more than twice the state average per capita of affordable housing units supported by Housing Tax Credits or Private Activity Bonds must receive a resolution from the local governing body for approval to develop in that city or county. This applies to applications proposing New Construction, Adaptive Reuse, and Acquisition/Rehabilitation.

E. Human Resource Strengths and Weaknesses

The following is an outline of human resource strengths and weaknesses in the areas of training, experience, compensation/benefits, turnover rates, impact of early retirements, succession planning, strength of policy, etc.

Human Resources Strengths

- The Department's turnover for fiscal year 2007 (8.6%) was at its lowest point in comparison to the previous fiscal years and in comparison to fiscal year 2007 state turnover rate of 17.4%. The low turnover rate indicates that staff is committed to its clients and to the Department in carrying out its mission and goals.
- The Department is committed to providing staff with opportunities to attend continuing education courses to enhance their educational background and skills. The Department recently increased the amount of financial assistance for employees who are interested in pursuing under graduate and post graduate education.
- The Department's workforce has a depth of institutional knowledge of the programs. Staff has demonstrated a strong commitment to its clients and customers in providing public service to Texas communities and advocacy groups.
- The Department has a highly diverse workforce which creates an environment of higher employee morale, increases creativity, and leads to a higher retention of employees.
- The average staff tenure for the Department is 11 years. The Department has employees with in-depth institutional knowledge and highly skilled technical staff in the areas of housing finance and federal programs.

Human Resources Weaknesses

- The Department needs to improve its current method of evaluating staff as part of the annual performance review process. The Department will focus on securing a new system next fiscal year that will provide objective means to measure staff performance.
- While the Department has made great stride in equitable and fair pay among staff, this continues to be an area of weakness. The Department continues to address this issue through continued review of salary actions, reviewing salaries for pay equity, and granting pay equity adjustment.
- The Manufactured Housing Division has a projected retirement of at least 11 employees currently. Should this staff decide to retire the Division does not have a plan on how to recruit and fill these positions immediately.
- The Department is currently understaffed relative to our FTE cap of 298.

F. Capital Assets

Strengths and Weaknesses

Technological capital asset strengths include:

- Secure, low cost, high performance, and highly available gigabit local area network and high speed wide area network (WAN). TDHCA's WAN, implemented in 2003, is part of the TEX-AN telecommunications service and allows seven Manufactured Housing and three OCI regional offices to connect to the TDHCA local area network.
- Third party enterprise business applications, including PeopleSoft Financials 8.8, Mitas Automated Accounting and Loan Administration software, HAPPY Section 8 software, and custom enterprise business applications, including contract systems for housing and community affairs programs and the Compliance Monitoring and Tracking System.
- Supported personal computer and laptop operating systems, office productivity software, and other specialized end user software installed as required for each Department employee.
- A mixture of mid-range and low-end servers that house TDHCA business applications.
- A small, well designed, server room facility that is shared with the Office of the Comptroller of Public Accounts.

Technological capital asset weaknesses include:

Current use of an end-of-life legacy system for the Manufactured Housing Division (MHD). However, TDHCA is on schedule with its FY 2008-2009 Manufactured Housing System Upgrade project. TDHCA plans to launch the new system in FY 2009.

The system will support all major MHD business functions, including titling, installation and tracking, tax lien processing, licensing, and consumer complaint activities. Key Manufactured Housing System Upgrade goals are to:

- rebuild the system on a platform and with a design that resolves current difficulties in maintaining the system,
- Web-enable services such as submitting titling applications, tax liens, and notices of installations, and
- expand the use of Texas Online beyond manufactured housing license renewals to include providing customers the ability to pay for new licenses and pay titling fees online.

Needs and Prioritization

Throughout the FY 2009-2013 time period, TDHCA will focus on the following technology initiatives in support of Department objectives:

- Manufactured Housing System Upgrade (FY 2008-2009 capital budget project)
- PeopleSoft Financials version upgrades to stay up-to-date with the Office of the Comptroller of Public Accounts Integrated Statewide Accounting System (ISAS) version of PeopleSoft Financials
- Yearly upgrades of the Mitas Automated Accounting and Loan Servicing systems
- Frequent upgrades of the HAPPY Housing Pro Section 8 System
- IT security and disaster preparedness
- Web site enhancements to provide customers easier access to information

- Enhancement projects for the Department's custom systems
- Continued technical support for Department employees and external customers

G. Agency Use of Historically Underutilized Businesses

It is TDHCA's policy to demonstrate a good faith effort to provide procurement and contracting opportunities for all minority-owned and women-owned businesses. TDHCA understands and recognizes the challenges that occur during the bid process for these businesses. Therefore, it is committed to the recruitment and promotion of Historically Underutilized Businesses (HUBs) in all procurement processes. TDHCA's General Policies and Procedures for Historically Underutilized Businesses is referenced in Texas Administrative Code, Title 10, Part 1, Chapter 1, SubChapter A, Rule §1.6. A Department HUB Coordinator has also been designated, in accordance with Section 2161.062, Government Code.

TDHCA continues to achieve the state goals for procurement awards to HUBs and subcontracting of HUB vendors through staff education on procurement policy rules and procedures, and through aggressively recruiting and assisting HUB businesses. TDHCA also participates in vendor forums during the fiscal year, both exhibiting and co-hosting forums.

H. Key Organizational Events and Areas of Change and Impact on Organization

In the second quarter of FY 2007, TDHCA reorganized several divisions to realign certain programs by funding stream. All components of the HOME Investment Partnerships Program, including multifamily and single family finance, and aspects of program monitoring and compliance, were reconsolidated under the new HOME Program Division. This division also manages the Housing Trust Fund. TDHCA's other single-family housing programs, including the First Time Homebuyer Program, Mortgage Credit Certificate Program, Texas Loan Star Program, and Texas Statewide Homebuyer Education Program, are administered by the Texas Homeownership Division.

I. Use and Anticipated Use of Consultants and Contractors

To effectively achieve its mission, TDHCA will continue to use consultants and contract workers in areas where their unique skills and experience represents the most effective use of the State's resources. Three divisions that expect the greatest ongoing use of consultants are Portfolio Management and Compliance, Information Systems, and Bond Finance.

Portfolio Management and Compliance (PMC)

TDHCA monitored the FDIC's Affordable Housing Program under a Memorandum of Understanding. The day to day oversight of the properties was outsourced to Monitoring Data Systems Inc. In April of 2008, TDHCA provided the FDIC with notice of termination of the MOU effective September 1, 2008. Therefore, the Department will no longer contract with Monitoring Data Systems Inc. The full time employee positions that were dedicated to this function will monitor TDHCA funded properties.

The Internal Revenue Service requires State Housing Finance Agencies to use local health, safety, and building codes or the Uniform Physical Condition Standards to assess the physical condition of HTC developments. In Texas, building codes vary from city to city and many areas do not have code enforcement at all. To ensure a uniform inspection standard is used state wide, the Department has elected to use Uniform Physical Condition Standards inspections for tax credit developments. Since March of 2005 TDHCA outsourced the Uniform Physical Condition Standards through a competitive process. In January of 2008, TDHCA contracted with two firms to provide these services; Onsite Insight and the Inspection Group.

TDHCA monitors received training in the Uniform Physical Condition Standards inspection protocol in November of 2007 to diminish dependence on an outside contractor. In the future, TDHCA staff will be conducting the bulk of these inspections. Only high risk developments will be outsourced until sufficient internal expertise and experience is attained.

In the past, TDHCA worked with ICF Consulting, Inc. to increase staff and administrator capacity in the HOME program. TDHCA staff has not needed the assistance of ICF in the last year. It is not anticipated that technical assistance will be needed from ICF in the future.

Information Systems (IS) Division

TDHCA's Information Systems Division makes limited, targeted use of consultants for approved capital budget projects and software development support. In the current biennium, the Department has employed one contract developer to assist in the support of PeopleSoft Financials 8.8 and two contract developers to help support the Community Affairs Contract System and the Community Development Block Grant module of the Housing Contract System. Additionally, the Department plans to utilize two contract developers for the Manufactured Housing Systems Upgrade, a FY 2008-2009 capital budget project. Consultants are used for projects and support in cases where specialized skills or additional staffing are needed for a specific timeframe.

Bond Finance

The Bond Finance division uses the following types of consultants:

- Bond Counsel – A nationally recognized law firm or firms experienced in the issuance of mortgage revenue bonds.
- Financial Advisor – Typically an investment banking firm experienced in issuance of mortgage revenue bonds.
- Master Servicer/Administrator – A financially sound bank or trust company experienced in tax compliance review and loan servicing for tax-exempt single family mortgage revenue bond programs.
- Disclosure Counsel – A law firm experienced in securities laws particularly as it relates to disclosure of information by securities issuers to the private markets.
- Rating Agencies – A national rating agency which analyzes bond issues and assigns a rating to them to indicate to prospective bondholders the investment quality of the issue.

- Interest Rate Swap Advisor – Primarily monitors interest rate swaps used to hedge single family mortgage revenue bonds.
- Guaranteed Investment Contract Broker – Provides reinvestment services for single family mortgage revenue bond issues, single family commercial paper issues, and/or multifamily mortgage revenue bond issues.

III. FISCAL ASPECTS

A. Size of Budget

The following chart provides historical funding levels by goal. Goal A: Affordable Housing includes appropriated and non-appropriated resources as below described. The non-appropriated HTCs, single family, and multifamily non-appropriated amounts are estimates in fiscal years 2008–2009.

One significant change in the bill pattern was associated with Goal B. Over the 2002–03 biennium, ORCA was created with the passage of House Bill 7 (77th Legislative, Regular Session). With the creation of ORCA, CDBG funds, CDBG general revenue (GR) Match, and GR associated with Local Government Services were shifted from TDHCA to ORCA. This reduced TDHCA's federal funds by $167,090,099 and GR funds by $2,955,133 (Article IX, Section 10.95, and Contingency for House Bill 7). The funding amounts for Goal B for 2006-2009 represent funding for TDHCA's OCI and Housing Resource Center divisions.

Table 9: Appropriated Funds

	2004	*2005*	*2006*	*2007*	*2008*	*2009*
Goal A: Affordable Housing	$63,200,684	$57,193,100	$60,085,072	$56,500,789	$51,740,565	51,772,518
Goal B: Colonia Service Centers (Pre 79th Leg.)	$713,186	$680,177	$-	$-	$-	$-
Goal B: Info. & Tech. Assist. (Post 79th Leg.)	$-	$-	$1,354,939	$1,357,663	$1,447,412	$1,450,647
Goal C: Poor and Homeless	$79,457,061	$79,379,015	$83,059,961	$83,002,846	$84,766,853	$84,762,697
Goal D: Ensure Compliance	$3,072,650	$2,991,874	$4,240,709	$4,278,876	$4,006,867	$3,983,682
Goal E: Manufactured Housing	$4,804,136	$4,824,009	$3,840,814	$3,840,815	$4,473,928	$4,630,222
Goal F: Indirect Administration	$6,690,989	$6,700,482	$6,389,609	$6,317,595	$6,171,621	$6,216,236
Total Appropriated Funds	$157,938,706	$151,768,657	$158,971,104	$155,298,584	$152,607,246	$152,816,002

B. Method of Finance

The methods of finance for appropriated funds since the fiscal year (FY) 04–05 biennium are shown below.

Table 13: Methods of Finance

	2004	*2005*	*2006*	*2007*	*2008*	*2009*
Federal Funds	$131,040,487	$130,979,680	$135,505,609	$135,387,385	$128,733,144	$128,697,779
Appropriated Receipts	$14,480,704	$14,353,145	$15,460,458	$15,418,498	$16,586,560	$16,787,596
General Revenue (GR)	$11,484,471	$5,485,384	$7,109,007	$3,596,671	$7,219,287	$7,262,372
Earned Federal Funds	$850,077	$867,481	$813,030	$813,030	$-	$-
Interagency Contracts	$82,967	$82,967	$83,000	$83,000	$68,255	$68,255
Total Appropriated Funds	$157,938,706	$151,768,657	$158,971,104	$155,298,584	$152,607,246	$152,816,002

Source: General Appropriation Bills 78th through 80th Legislative Sessions

Federal Funds: These funds are the Department's primary appropriated funding source. Federal funds make up 84 percent of the total funds appropriated to the Department in the 2008–2009 biennium. As such, these funding levels are subject to change to reflect priorities at the federal level. Short term expectations for each of the funding sources is described in "VII. Impact of Federal Statutes/ Regulations, Description of Current and Anticipated Federal Activities," Page 61. HUD and DHHS are TDHCA's largest federal grantor agencies.

Appropriated Receipts: These funds represent approximately 11 percent of the total funds appropriated to the Department. The funds are comprised of fees collected to administer the Department's housing programs or from its regulation of the manufactured housing industry. Compliance and application fee revenues provide a method of finance to support and administer the HTC Program. Fees to issue Mortgage Revenue Bonds are used to support programs and other indirect administrative costs. The Manufactured Housing Division also generates revenue through fee collections. The majority of the fees collected are pursuant to the issuance of titles, licenses and from installation inspections. The Legislature allocates the fees to the Department as Appropriated Receipts and General Revenue.

General Revenue: These funds make up 5 percent of total funds appropriated to the Department. The HTF is the primary program receiving GR funds and is the only affordable housing program funded by State funds.

Earned Federal Funds: As of the 2008-2009 biennium, these funds are regarded as General Revenue under the General Appropriations Act and are therefore not reflected as a separate Method of Finance.

Interagency Contracts: This source, which is less than 1 percent of the Department's funding, currently supports Goal B: Colonia Service Centers and originate from ORCA.

The Department applies for new federal funding as it becomes available. Should it receive additional federal funds, FTE and travel waiver requests may be submitted, depending on the increased workload new federal programs require. Currently, the Department has complied with FTE and travel limitations as set forth in the appropriation bills.

C. Per Capita and Other States' Comparisons

The majority of funding for TDHCA comes either directly from the federal government or through federally authorized tax credits or bonds. In general, funding amounts for these programs are based on a state's population. For this reason Texas, the second most populous state in the nation, receives a relatively large amount of federal funds. In contrast, when comparing levels of state appropriations through trust funds or other designated sources, Texas falls far behind the rest of the country. For 2006, the most recent year with comparable data, the State of Texas appropriated approximately $3 million to provide for the HTF. Using the U.S. Census Bureau's state population estimate of 23,507,783, Texas' per capita spending on affordable housing is $0.13. Table 14 provides comparisons of state-appropriated housing funds from the other five largest states in the nation.

Table 14: Comparison of State Per Capita (Sorted by State Funding Level)

State	*2006 Population*	*2006 State Funding*	*Per Capita Spending*
California	36,457,549	$35,901,613	$0.98
New York	19,306,183	$100,200,000	$5.19
Florida	18,089,889	$442,892,623	$24.48
Illinois	12,831,970	$82,850,000	$6.46
Pennsylvania	12,440,621	$25,000,000	$2.01
Texas	23,507,783	$3,049,869	$0.13

Sources: US Census Bureau; *Factbook: 2006 National Council of State Housing Agencies Annual Survey Results*, State Housing Finance Agencies.

D. Budgetary Limitations

Statutory and Federal Restrictions

State and federal statutes and regulations place many restrictions on the use of TDHCA funds. These restrictions affect a wide variety of program characteristics including limitations on eligible household income levels and allowable rents, maximum loan sizes, and funding allocation scoring and distribution criteria. Additionally, these programs have complex portfolio management and compliance requirements. A few specific examples of budgetary directives found in federal and state statute and regulations that regulate the use of specific funding include:

- 24 Code of Federal Regulations, Section 92.300(a)(1), requires that 15 percent of total HOME Investment Partnerships Program funds be reserved for use by community housing development organizations (CHDOs).
- §2306.111(c) requires that 95 percent of the TDHCA HOME funding be allocated to non-participating jurisdiction areas. Because participating jurisdictions (PJs), which are larger metropolitan cities and more populous counties, receive HOME program funds directly from HUD, TDHCA directs its HOME program allocation to non-PJ areas of the state. The remaining 5 percent of HOME funds may be expended in any area of the state, but only if it funds an activity that serves persons with disabilities.
- §2306.111(d) requires that the regional allocation formula used to distribute HOME, HTC, and HTF funding, consider existing housing need and available resources to meet this need in rural and urban areas.
- Section 2306.7581(a-1), Texas Government Code, requires the Department to provide $3 million per year in Housing Trust Funds toward the Texas Bootstrap Home Loan (“Owner-Builder”) Program.

Appropriations Riders

The Department will fully comply with all caps on funding and FTEs. The following section describes the Riders from the 2008-2009 Bill Pattern (Article VII, 3-7, General Appropriations Act, 80th Regular Session, and House Bill 1)

“Rider 1: Performance Measure Targets. The following is a listing of the key performance measure target levels for the Department of Housing and Community Affairs. It is the intent of the Legislature that appropriations made by this Act be utilized in the most efficient and effective manner possible to achieve the intended mission of the Department of Housing and Community Affairs. In order to achieve the objectives and service standards established by this Act, the Department of Housing and Community Affairs shall make every effort to attain the following designated key performance target levels associated with each item of appropriation.

	2008	**2009**
A. Goal: AFFORDABLE HOUSING		
Outcome (Results/Impact):		
% of Households/Individuals of Very Low, Low, and Moderate Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance	0.91%	0.87%
% of Households/Individuals of Very Low Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance	0.28%	0.27%
% of Households/Individuals of Low Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance	3.15%	3.02%
% of Households/Individuals of Moderate Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance	0.10%	0.08%
A.1.1. Strategy: MRB PROGRAM - SINGLE FAMILY		
Output (Volume):		
# of Households Assisted with Single Family Mortgage Revenue Bond Funds	2,016	1,716
A.1.2. Strategy: HOME PROGRAM - SINGLE FAMILY		
Output (Volume):		
# of Households Assisted with Single Family HOME Funds	1,255	1,255
A.1.3. Strategy: HTF – SINGLE FAMILY		
Output (Volume):		
# of Households Assisted through the Single Family HTF Program	228	209
A.1.4. Strategy: SECTION 8 RENTAL ASSISTANCE		
Output (Volume):		
# of Households Assisted through Statewide Housing Assistance Payments Program	1,494	1,494
A.1.5. Strategy: FEDERAL TAX CREDITS		
Output (Volume):		
# of Households Assisted through the HTC Program	12,261	11,779
A.1.6. Strategy: HOME PROGRAM – MULTIFAMILY		
Output (Volume):		
# of Households Assisted with Multifamily HOME Funds	500	526
A.1.8. Strategy: MRB PROGRAM-MULTIFAMILY		
Output (Volume):		
# of Households Assisted through the Multifamily MRB Program	2,393	2,217
B. Goal: INFORMATION & TECHNICAL ASSISTANCE		
B.1.1. Strategy: HOUSING RESOURCE CENTER		
Output (Volume):		
# of Information and Technical Assistance Requests Completed	4,900	4,900
B.2.1. Strategy: COLONIA SERVICE CENTERS		
Output (Volume):		
# of On-site Technical Assistance Visits Conducted Annually from the Field Offices	800	800

C. Goal: POOR AND HOMELESS PROGRAMS		
Outcome (Results/Impact):		
% of Persons in Poverty That Received Homeless and Poverty-related Assistance	12.32%	12.32%
% of Very Low Income Households Receiving Energy Assistance	4.12%	4.12%
C.1.1. Strategy: POVERTY-RELATED FUNDS		
Output (Volume):		
# of Persons Assisted through Homeless and Poverty-related Funds	512,244	512,244
# of Persons Assisted That Achieve Incomes above Poverty Level	2,200	2,200
# of Shelters Assisted	73	73
C.2.1. Strategy: ENERGY ASSISTANCE PROGRAMS		
Output (Volume):		
# of Households Assisted through the Comprehensive Energy Assistance Program	51,502	51,502
# of Dwelling Units Weatherized by the Department	3,004	2,960
D. Goal: ENSURE COMPLIANCE		
D.1.1. Strategy: MONITOR HOUSING REQUIREMENTS		
Output (Volume):		
Total # of Onsite Reviews Conducted	915	965
D.1.2. Strategy: MONITOR CONTRACT REQUIREMENTS		
Output (Volume):		
Total # of Monitoring Reviews Conducted	12,715	12,765
E. Goal: MANUFACTURED HOUSING		
Outcome (Results/Impact):		
% of Consumer Complaint Inspections Conducted within 30 Days of Request	100%	100%
% of Complaints Resulting in Disciplinary Action	15%	15%
E.1.1. Strategy: TITLING AND LICENSING		
Output (Volume):		
# of Manufactured Housing Statements of Ownership and Location Issued	90,000	90,000
# of Licenses Issued	4,000	4,000
E.1.2. Strategy: INSPECTIONS		
Output (Volume):		
# of Routine Installation Inspections Conducted	6,000	6,000
Explanatory:		
# of Installation Reports Received	20,000	20,000
E.1.3. Strategy: ENFORCEMENT		
Output (Volume):		
# of Complaints Resolved	1,250	1,250
Efficiencies:		
Average Time for Complaint Resolution (Days)	180	180
Explanatory:		
# of Jurisdictional Complaints Received	1,200	1,200

"Rider 2: Capital Budget. None of the funds appropriated above may be expended for capital budget items except as listed below. The amounts shown below shall be expended only for the purposes shown and are not available for expenditure for other purposes. Amounts appropriated above and identified in this provision as appropriations either for "Lease Payments to the Master Lease Purchase Program" or for items with an "(MLPP)" notation shall be expended only for the purpose of making lease-purchase payments to the Texas Public Finance Authority pursuant to Government Code § 1232.103. Upon approval from the Legislative Budget Board, capital budgeted funds listed below under "Acquisition of Information Resource Technologies" may be used to lease information resources hardware and/or software versus the purchase of information resources hardware and/or software, if determined by agency management to be in the best interest of the State of Texas.

Item	*2008*	*2009*
Acquisition of Information Resource Technologies		
(1) Manufactured Housing Systems Upgrade	$175,000	$175,000
(2) Purchase of Information Technologies-Scheduled Replacement of Items	$200,000	$190,000
Total, Acquisition of Information Resource Technologies	$375,000	$365,000
Total, Capital Budget	$375,000	$365,000

Method of Financing (Capital Budget):

Community Affairs Federal Fund No. 127	$55,998	$71,382
Appropriated Receipts	$319,002	$293,618
Total, Method of Financing	$375,000	$365,000

"Rider 3: Low/Moderate Income Housing Construction. Out of the funds appropriated above, no less than $500,000 each year of the biennium shall be expended on low/moderate income housing construction in enterprise zone areas.

"Rider 4: Appropriations Limited to Revenue Collections. Fees, fines, and other miscellaneous revenues as authorized and generated by the agency shall cover, at a minimum, the cost of the appropriations made above for the strategy items in Goal E, Manufactured Housing, the cost of the appropriations required for manufactured housing consumer claims payments according to the Occupations Code § 1201, Manufactured Housing Standards Act, as well as the "other direct and indirect costs" associated with this goal, appropriated elsewhere in this Act. "Other direct and indirect costs" for Goal E, Manufactured Housing, are estimated to be $911,408 for fiscal year 2008 and $956,749 for fiscal year 2009. In the event that actual and/or projected revenue collections are insufficient to offset the costs identified by this provision, the Legislative Budget Board may direct that the Comptroller of Public Accounts reduce the appropriation authority provided above to be within the amount of revenue expected to be available.

"Rider 5: Housing Assistance. To the extent allowed by state and federal program guidelines the department shall adopt an annual goal to apply no less than $30,000,000 of the funds available from the Housing Trust Fund, HOME Program, Section 8 Program, and Housing Tax-Credit Program's total housing funds toward housing assistance for individuals and families earning less than 30 percent of the Area Median Family Income (AMFI). No less than 20 percent of the funds available from the Housing Trust Fund, HOME Program, Section 8 Program, and Housing Tax-Credit Program shall be spent for individuals and families earning between 31 percent and 60 percent of the area median family income. To the extent allowed by state and federal program guidelines in those counties where the area median family income is lower than the state average median family income, the department shall use the average state median income in interpreting this rider. The department shall provide an annual report to the Legislative Budget Board documenting its expenditures in each income category.

"Rider 6: Conversions of Executory Contracts.
a. Out of the funds appropriated above, the department shall spend not less than $4,000,000 for the biennium for the sole purpose of contract for deed conversions for families that reside in a colonia and earn 60 percent or less of the applicable area median family income. It is the intent of the Legislature that the department shall make a good-faith effort to complete at least 200 contract for deed conversions by August 31, 2009.

b. The Department of Housing and Community Affairs shall provide a quarterly report to the Legislative Budget Board detailing the number of, and cost for each, contract for deed conversions completed.

"Rider 7: Bond Refinancing. The department shall transfer any funds acquired through refinancing of bonds to the Housing Trust Fund. The first $3,000,000 each fiscal year in savings from the refinancing of any bonds shall be used to fund mortgage loans under the Bootstrap Self-Help Housing Loan Program.

"Rider 8: Colonia Set-Aside Program Allocation. The Office of Rural Community Affairs shall allocate 2.5 percent of the yearly allocation of Community Development Block Grant (CDBG) monies to support the operation of the Colonia Self-Help Centers and shall transfer such funds to the Department of Housing and Community Affairs on September 1 each year of the biennium.

Consistent with federal rules and regulations, the funds provided from ORCA to the Colonia Self-Help Center in El Paso county shall be used to provide internet access and training for parents and their children attending elementary schools in colonias, to establish technology centers within those elementary school libraries, to purchase wireless devices and laptop computers to loan out from the technology centers, and improve internet access for students and parents.

"Rider 9: Appropriation: Housing Trust Fund Interest Earnings and Loan Repayments. Interest earnings and loan repayments received from loans made through the Housing Trust Fund program from the General Revenue Fund are included above in Strategy A.1.3, Housing Trust Fund - Single Family, estimated to be $900,000 each year.

"Rider 10: Housing Trust Fund Deposits to the Texas Treasury Safekeeping Trust Company.
a. Out of funds appropriated above in Strategy A.1.3, Housing Trust Fund - Single Family, $2,503,295 in fiscal year 2008 and $2,503,296 in fiscal year 2009 shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, at the beginning of each fiscal year. The amounts to be transferred in fiscal years 2008 and 2009 include an estimated $900,000 in each fiscal year from interest earnings and loan repayments received, identified above in Rider 9, Appropriation: Housing Trust Fund Interest Earnings and Loan Repayments.

b. Out of funds appropriated above in Strategy A.1.7, Housing Trust Fund - Multifamily, $187,000 in fiscal year 2008 and $187,000 in fiscal year 2009 shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, at the beginning of each fiscal year.

c. Interest earnings and loan repayments received from loans made through the Housing Trust Fund program from the General Revenue Fund shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, for the same purpose.

d. The Department of Housing and Community Affairs shall provide an annual report to the Legislative Budget Board, the House Appropriations Committee, and the Senate Finance Committee no later than October 1 detailing the agency's plan to expend funds from the Housing Trust Fund during the current fiscal year.

e. Notwithstanding limitations on appropriation transfers contained in the General Provisions of this Act, the Department of Housing and Community Affairs is hereby authorized to direct agency resources and transfer such amounts appropriated above, not to exceed $2,500,000 in General Revenue each fiscal year, between Strategy A.1.3, Housing Trust Fund - Single Family and Strategy A.1.7, Housing Trust Fund - Multifamily.

f. Out of funds appropriated above in Strategy A.l.3, Housing Trust Fund - Single Family and Strategy A.1.7, Housing Trust Fund - Multifamily, an amount not to exceed $2,500,000 in both strategies in fiscal year 2008 and an amount not to exceed $2,500,000 in fiscal year 2009 in both strategies above amounts required in Sections (a) and (b) of this rider, shall be deposited in the Housing Trust Fund in the Texas Treasury Safekeeping Trust Company established under Government Code, Chapter 2306, no later than October 1 of each fiscal year.

“Rider 11: Mortgage Revenue Bond Program. The Department of Housing and Community Affairs shall operate the First-Time Homebuyer Mortgage Revenue Bond Program in a manner that maximizes the creation of very low-income single family housing by ensuring that at least 30 percent of the lendable bond proceeds are set aside for a period of one year for individuals and families at 60 percent and below the area median family income (AMFI), while assuring the highest reasonable bond rating. In an effort to facilitate the origination of single family mortgage loans to individuals and families at 60 percent and below the AMFI, the department shall utilize down payment and closing cost assistance or other assistance methods.

“Rider 12: Additional Appropriated Receipts.
a. Except during an emergency as defined by the Governor, no appropriation of appropriated receipts in addition to the estimated amounts above may be expended by the Department of Housing and Community Affairs unless:

(1) the department's governing board files a finding of fact along with a written plan outlining the source, use, and projected impact of the funds on performance measures with the Legislative Budget Board and the Governor and indicating that additional appropriations are required to maintain adequate levels of program performance; and,

(2) neither the Legislative Budget Board nor the Governor issue a written disapproval not later than 10 business days within receipt of the finding of fact and the written plan.

b. This provision does not apply to appropriated receipts included in the amounts appropriated above that are collected under Object Codes 3719 and 3802. Appropriated receipts collected under these revenue object codes are governed under provisions found in Article IX, Sec 8.03 and Article IX Sec 12.02.

“Rider 13: Manufactured Homeowner Consumer Claims. Included above in Goal E, Manufactured Housing, the Manufactured Housing Division of the Department of Housing and Community Affairs is appropriated an amount required for the purpose of paying manufactured housing consumer claims from Appropriated Receipts according to the Occupations Code Chapter 1201, Manufactured Housing Standards Act, from Statement of Ownership and Location (SOL) issuance fees involving manufactured housing that are collected during the 2008-09 biennium. No General Revenue is appropriated for the payment of these claims.

“Rider 14: CDBG Disaster Reporting Requirement. The Department of Housing and Community Affairs shall provide a quarterly report to the Governor, the Legislative Budget Board, the House Appropriations Committee, the Senate Finance Committee and to those members of the Legislature representing counties eligible for Community Development Block Grant (CDBG) Disaster funding, detailing the receipt and expenditures of CDBG disaster funds received by the Department.

"Rider 15: Affordable Housing Research and Information Program. Out of funds appropriated above in Strategy B.l.l, Housing Resource Center, the Department of Housing and Community Affairs shall conduct the Affordable Housing Research and Information Program with the assistance of the Office of Rural Community Affairs, to the extent allowed by state law, in order to avoid a duplication of effort. It is the intent of the Legislature that no funds shall be transferred between the Department of Housing and Community Affairs and the Office of Rural Community Affairs for this purpose."

E. Degree to which Current Budget Meets Current and Expected Needs

In FY 2007, TDHCA was able to assist 0.89 percent of the State's 2,298,318 Very Low Income, Low Income, and moderate households in need. It served about 13.6 percent of the State's 4,172,890 persons whose income is less than 125 percent of the poverty level. As discussed in detail in "IV. Service Population Demographics", page 42, the state's level of housing need is only expected to increase in the future given current funding levels and economic conditions.

F. Capital and/or Leased Needs Due for Renewal

The 2009 projection is $13,944 for an OCI field office in Edinburg, and $23,720 for Manufactured Housing field office leases in Houston, Lubbock and Tyler. The Manufactured Housing Division also leases postage meters for their field offices for $4,512 annually.

The Department's personal computers and laptops are composed of some hardware which will be replaced in future fiscal years in accordance with the Department's personal computer replacement schedule. The schedule calls for four years of use prior to replacement in most cases.

Projected capital improvement needs for the FY 2010-2011 biennium will be described on a project-by-project basis in the TDHCA Information Technology Detail, which will be submitted along with TDHCA's FY 2010-2011 Legislative Appropriations Request in August 2008.

IV. SERVICE POPULATION DEMOGRAPHICS

Overview

This section identifies how population groups TDHCA serves are expected to change within the timeframe of this Strategic Plan. The analysis includes information on historical population characteristics, current characteristics, and future trends.

Information in this section is primarily obtained from the US Census and Texas State Data Center (TSDC) reports and tabulations. The TSDC prepares population projections according to four scenarios: the zero migration scenario, which assumes that growth occurs through natural (birth and death) increases; the one-half 1990-2000 (0.5) migration scenario, which assumes rates of migration equal one-half of the 1990s rate; the 1990-2000 (1.0) migration scenario, which assumes a migration rate equal to the 1990s; and the 2000-2002 migration scenario, which takes into account post-2000 growth.[13] Comparing projections, the TSDC 0.5 migration scenario most closely resembles the projections prepared by the US Census, so TDHCA is using data from this TSDC scenario in the Strategic Plan. This is also the scenario most recommended by the TSDC for use in long-term planning.

Because of methodology differences between these sources, exact figures may vary between sources. For example, Texas population projections for 2010 are 24,330,612 from the TSDC 0.5 migration scenario, 24,648,888 from the US Census. However, the two figures differ by only 318,276, or approximately 1% of the highest projected total population.

Additionally, this section contains a significant amount of information from the Center for Demographic and Socioeconomic Research and Education (Center), which is the lead entity for the TSDC, and the Office of the State Demographer. The Center's *Texas Challenge in the Twenty-First Century* publication has projection data for a variety of subjects and scenarios, and is a comprehensive source for many factors affecting the state.

Overall Population Growth

Historically, Texas has been one of the fastest growing states in the nation. According to US Census data, the Texas population expanded by nearly a quarter (22.8 percent) between 1990 and 2000, far exceeding the national growth average of 13.2 percent for the same decade. The increase in state population by 3,865,310 persons was the largest of any decade in Texas history. More than one of every nine persons added to the population of the United States in the 1990s was added in Texas.

For 2000, the US Census reported that 20,851,820 individuals lived in Texas, second only to California in terms of total state population. According to July 2004 estimates compiled by the US Census, Texas's population had grown by 7.9 percent since April 2000 to 22,490,022 people, again exceeding the national growth rate of 4.3 percent for the same period.

For the 2009-2013 Strategic Plan period, both sources estimate that the Texas population will increase by at least 1.37 percent each year. The US Census projects a 6.28 percent growth rate from 2009 to 2013, while the TSDC 0.5 migration scenario projects a 6.05 percent growth rate.

[13] Texas State Data Center, Populations Estimates and Projections Program, "2006 Methodology for Texas Population Projections," (October 2006) http://txsdc.utsa.edu/tpepp/2004projections/2004_txpopprj_method.php.

Table 15: Texas Population Projections: 10-Year Period 2008-2018

Year	US Census Projection	Annual Change		TSDC 0.5 Projection	Annual Change	
		Number	Percent		Number	Percent
2008	23,898,665			23,614,468		
2009	24,273,816	375,151	1.57%	23,971,476	357,008	1.51%
2010	24,648,888	375,072	1.55%	24,330,612	359,136	1.50%
2011	25,026,846	377,958	1.53%	24,692,184	361,572	1.49%
2012	25,409,783	382,937	1.53%	25,056,035	363,851	1.47%
2013	25,797,428	387,645	1.53%	25,421,611	365,576	1.46%

Sources: US Census, TSDC

Future population trends point to continued rapid growth. The US Census projects that the population in Texas will reach 33,317,744 in 2030, which represents a 59.8 percent change from 2000 figures, and more than double the projected national growth rate of 29.2 percent.[14]

These population projections have a major effect on the need for housing. According to the 2000 US Census, Texas had a 90.6 percent housing occupancy rate. Without the construction of new units and/or the rehabilitation of existing substandard and future substandard units, the need for decent and affordable housing will be significant.

In terms of disability status, the 2000 US Census found 3.6 million people with some type of long lasting condition of disability in Texas, representing 19.2 percent of the total non-institutionalized population aged 5 and older. The Center projects that the total number of incidences involving disabilities will increase by 202.2 percent from 2000 to 2040.[15]

Aging Population

According to the 2000 US Census, 2,072,532 persons, or 9.9 percent of the total Texas population, are age 65 or older. The Census projected that, for 2005, individuals age 65 and older totaled 2,268,604 and comprised 10.0 percent of the total Texas population.

[14] US Census, "Interim Projections: Ranking of Census 2000 and Projected 2030 State Population and Change 2000 to 2030," http://www.census.gov/population/projections/PressTab1.xls.

[15] Center for Demographic and Socioeconomic Research and Education, *Texas Challenge in the Twenty-First Century: Implications of Population Change for the Future of Texas*, by Steve H. Murdock et. al. (Texas A&M University System, December 2002), 139, http://txsdc.utsa.edu/download/pdf/TxChall2002.pdf.

There is an identified aging trend in Texas. In 1980, the median age was 28.0; in 1990, the median age was 30.8; and in 2000, the median age was 32.2.[16] Furthermore, it is assumed that this trend will continue, with nearly one-in-five individuals (nearly 20 percent) with an age of 65 or older by the middle of this century.

Population projections point to an increased aging population in Texas. Comparing age groups, individuals 65 and older are projected to be the population with the highest growth. An increasingly older population leads to growth in owner-occupied housing because older households tend to have higher rates of homeownership.[17] Furthermore, with an increasingly elderly population over age 65, home repair programs, including those that include home modifications for accessibility, may grow in demand.

An American Association of Retired Persons study found that 90 percent of elderly persons expressed a desire to stay in their own homes as long as possible.[18] Of all elderly households, 80 percent own their own homes.[19] In general, more elderly homeowners live in older homes than the majority of the population; in 2005, the median year of construction for homes owned by elderly households was 1966.[20] Due to their age, homes owned by the elderly are often in need of repair, weatherization, and energy assistance.

For those persons who cannot or do not wish to remain in their own homes, TDHCA multifamily development activities help provide affordable rental units. In many cases, these units are part of apartment developments specifically designed for and occupied by older households. These developments have design features, amenities, and supportive services geared to their specific needs and preferences.

Race and Ethnicity

Texas is experiencing a shift toward racial and ethnic diversity. During the 1980s, the White population increased by 10.1 percent, but by only 7.6 percent during the 1990s; the Black population increased by 16.8 percent during the 1980s and 22.5 percent during the 1990s; the Hispanic population increased by 45.4 percent during the 1980s and 53.7 during the 1990s; and the Other racial/ethnic population increased by 88.8 percent during the 1980s and 81.2 percent during the 1990s.[21] The 2000 US Census found that the racial composition of the state was 52 percent White, 32 percent Hispanic, 12 percent Black, and 4 percent Other.

[21] Center for Demographic and Socioeconomic Research and Education, *Texas Challenge in the Twenty-First Century*, xxv.

Future projections point to a shift from a majority White population to a majority of other racial and ethnic groups. According to TSDC projections using the 0.5 migration scenario, Whites are expected to comprise 50 percent of the total Texas population in 2009, and 49.4 percent of the total population in 2011. The White population is expected to grow by only 0.5 percent from 2009 to 2013, while the Hispanic population is expected to grow by 6.7 percent during this period.

This racial shift is expected to have important implications on Texas households as a whole. Because of the rapid growth of Hispanic and Other populations, the expected result is a higher proportion of married-couple and married-couple-with-children households.[22] As for income, unless the wealth of non-White populations changes, the income distributions of households will shift towards lower income categories because of the rapid growth of Hispanic and Black populations, which tend to have lower incomes.[23] Furthermore, the growth of non-White populations, which tend to have higher rates of rentership, is projected to fuel the need for rental housing.[24]

Income

According to the 2000 US Census, the median household income in 1999 was $39,927, which was less than the national median of $41,994. Historically, the median income in Texas has tended to grow. In 1999 dollars, the Census reports that, in 1969, the household median income in Texas was $29,535; in 1979, the median income was $35,744; and in 1989, the median income was $35,246.[25] The 2006 American Community Survey administered by the US Census reports that the median household income (in 2006 dollars) was $44,922.

The Center has computed projected incomes in Texas for 2000, 2010, 2020, 2030, and 2040. Projections based on the 0.5 migration scenario are provided for 2000, 2010, and 2020 below, and demonstrate an increasing proportion of the population with incomes below $40,000. The authors state that the median household income will actually decline by $5,061 between 2000 and 2040 (in 2000 constant dollars) based on the 0.5 migration scenario.[26] This decline is attributed to the rapid increase of Hispanic and Black populations and assumes that the socioeconomic gap between these groups and Whites will not change.

[25]US Census, "Table S1: Median Household Income by State: 1969,1979,1989, 1999, http://www.census.gov/hhes/www/income/histinc/state/state1.html

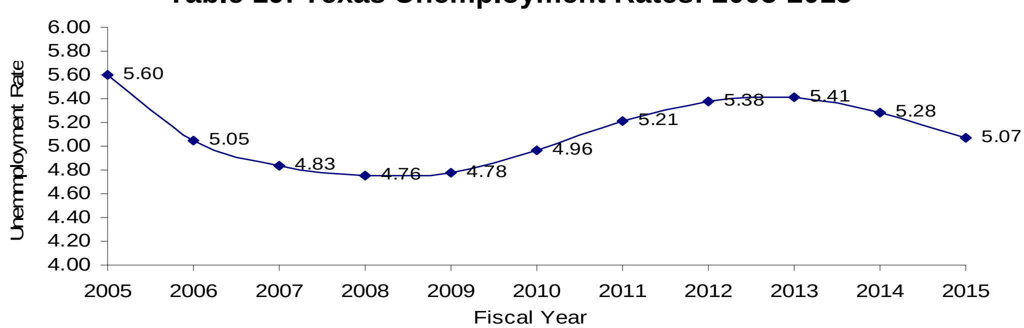
If this projection towards lower incomes does indeed occur, then the need for housing and other assistance will be great. A higher proportion of households at the lowest levels will place an even higher demand on social services, energy assistance, and rental assistance programs. In terms of homeownership, the Office of the Comptroller predicts that the prime interest rate will generally increase from 5.7 percent in 2005 to 8 percent in 2010.[27] Lower incomes and the higher cost of borrowing money may push the dream of homeownership out of reach for many more households in the future.

A major factor influencing income is the unemployment rate. According to the Comptroller's Spring 2006 Fiscal Year Economic Forecast, the unemployment rate is projected to increase during the 2009-2013 planning period. Unemployment affects the demand for services, including rental assistance, energy assistance, and emergency financial assistance.

Table 19: Texas Unemployment Rates: 2005-2015



Source: Texas Office of the Comptroller

[27] Texas Office of the Comptroller, "Spring 2006 Fiscal Year Economic Forecast," http://www.window.state.tx.us/ecodata/fcst06spr/ (accessed May 17, 2006).

Poverty

The 2000 US Census reported that 15.4 percent of persons in Texas were below the poverty level, which was significantly higher than the national rate of 12.4 percent. According to the 2006 American Community Survey, the poverty rate for Texas is 16.9 percent compared to the national rate of 13.3 percent. Analyzing past Census data, Texas has historically had a poverty rate higher than that of the national average.

Based on Center for Demographic and Socioeconomic Research and Education projections for 2000, 2010, 2020, 2030, and 2040, the rate of families in poverty will increase. Projections based on the 0.5 migration scenario are provided for 2000, 2010, and 2020 below.

Table 20: Texas Families in Poverty: 2000, 2010, and 2020

	2000		2010		2020	
Family Type	Number	Percent	Number	Percent	Number	Percent
Family households	598,325	11.4%	783,058	12.3%	983,798	13.1%

Increasing poverty populations will increase the demand for social services and emergency assistance, including rental assistance, energy assistance, and health and human services. In fact, the Center for Demographic and Socioeconomic Research and Education projects that the enrollment for Temporary Assistance for Needy Families, Food Stamps, and Medicaid will greatly increase between 2000 and 2040.[28]

Population Distribution

The US Office of Management and Budget classifies areas as metropolitan statistical areas (MSAs) based on US Census data. These MSAs are comprised of core counties that have a high population density and surrounding counties that have economic integration with the core counties. Non-MSA counties are primarily rural. There are 25 designated MSAs in Texas that cover 77 of the 254 total counties, see Figure 3: Texas MSA Counties below.

In 2000, of the 20,851,820 people residing in the state, 86.1 percent resided in MSAs and 13.9 percent resided in non-MSAs. For year 2008, the TSDC, using its 0.5 migration scenario, projected that 86.8 percent of the population is living in MSAs compared to 13.2 percent

[28] Center for Demographic and Socioeconomic Research and Education, *Texas Challenge in the Twenty-First Century*, 329.

residing in non-MSAs. This trend of MSA growth is projected to occur in the long term. In 2015, it is projected that 87.3 percent of the population will reside in the current MSA counties, and only 12.7 percent of the population will reside in non-MSA counties. For the 2007-2011 planning period, the population in MSA areas is expected to increase by 1,316,209 or 6.5 percent, whereas the population in non-MSA areas is expected to increase by only 116,043, or 3.75 percent.

In addition to a greater share of the population, these metropolitan areas also generally have a greater share of industry and jobs, which leaves less-populous areas with dilapidated housing stock and households with lower incomes. According to the US Department of Housing and Urban Development, the FY 2005 median income for Texas Metropolitan areas was $55,500 compared to $42,400 for non-metropolitan areas.[29] The 2000 Census estimated this gap to be $47,961 for metro areas and $36,724 for non-metro areas.

V. Technological Developments

A. Impact of Technology on Current Operations

The business of the Department continues to be enhanced by technology. Today, almost all agency services have a Web component. By using the TDHCA Interactive link on the agency Web site, households in need can directly access systems that support housing, community services, energy assistance, and manufactured housing information and services.

The Department's custom-designed applications are created using a combination of Oracle PL/SQL and Java. Both development languages are Web-enabled; the latter is platform independent and license free. The database platform that backs new development work is

Oracle. Agency operations are greatly impacted by new development work, which involves redesigning, integrating, and converting legacy applications to a Web-based environment.

TDHCA's financial management systems are PeopleSoft Financials and the Mitas Automated Accounting and Loan Servicing systems. In cooperation with the Office of the Comptroller of Public Accounts, the Department upgraded to the current Integrated Statewide Accounting System version of PeopleSoft Financials in FY 2007. The Mitas Loan Servicing system was implemented on September 1, 2003, and replaced and integrated the functions of four systems on separate platforms.

The Department supports both its internal and external technology-based services through a combination of Sun Solaris, Linux, FreeBSD, and Windows servers and gigabit-per-second enabled Cisco networking equipment. TDHCA's computing environment includes multiple Web, application, email, file, and database servers that work together to form the Department's Internet presence and to meet internal computing and network needs. Workgroup collaboration is facilitated by file sharing; intranet pages and postings; shared databases; and MS Exchange features such as email, Outlook WebAccess, calendars, and scheduling.

B. Impact of Anticipated Technological Advances

In the FY 2009-2013 time period, TDHCA's Information Systems Division will continue to focus on the Department's mission, goals, and objectives. All current and future projects involving technology will support the business of the agency, and the Department will continue to make use of technology described in this and past Strategic Plans.

C. Degree of Agency Automation and Telecommunications

The Department's Internet and intranet Web servers continue to serve as front-ends used to disseminate information to the public and employees and as places to update and maintain the Department's data in a dynamic fashion. A number of applications have been converted from legacy systems into a Web format, making these applications accessible using a Web browser. They can be accessed from the network or remotely using any Internet connection.

TDHCA's financial management system closely follows Office of the Comptroller of Public Accounts procedures to simplify interfaces and data exchange between the two agencies. Additionally, financial information is shared with other agency applications through interfaces and real-time database links.

Using desktop management software, TDHCA's Information Systems Division (ISD) can automatically deploy software applications, quickly rebuild PCs and laptops, and electronically obtain hardware and software inventory from individual workstations. These products allow staff to control personal computer configurations more effectively and provide faster support to Department employees.

Any agency employee can electronically submit a help desk request for a hardware or software problem. These requests are assigned according to the nature of the problem to be handled by appropriate ISD staff. Project and software enhancement requests go through a formal change control process that requires originating division director and then steering committee approval.

As technology and TDHCA systems evolve, ISD continuously aims to improve ease of data access, provide secure data exchanges, and increase the cost effectiveness of information technology solutions. In these efforts, ISD management works with senior management and the steering committee to ensure alignment with business objectives and proper IT governance.

D. Anticipated Need for Automation

The Department renews its software and hardware maintenance contracts and disaster recovery services on a yearly basis. The planned FY 2009 contracts for server hardware and software installed on servers are listed in the Department's Planned Procurement Schedule.

The Department leases one T-1 circuit for Internet services and ten fractional T-1 circuits for TDHCA's regional offices through the Department of Information Resources.

Budgeted costs for planned IT acquisitions, contracts, and service renewals will be detailed in the TDHCA Information Technology Detail and Legislative Appropriations Request. Actual costs are maintained in the Department's financial management system.

E. Technology Initiative Alignment

"Technology Initiative Alignment" is the strategic alignment of technology initiatives with agency business needs and priorities. This alignment promotes collaboration between the agency's business and IT leaders, and promotes innovative technology solutions that enable the agency to achieve its objectives. The agency's governance structure guides the creation of technology initiatives to ensure that these initiatives align with the agency's business needs and priorities. Additionally, strategically aligning agency technology initiatives with the statewide technology objectives in the State Strategic Plan (The Texas Transformation) drives economies of scale, increases interoperability among the state's information systems, and promotes interagency collaboration.

TDHCA TECHNOLOGY INITIATIVE ALIGNMENT					
TECHNOLOGY INITIATIVE	RELATED AGENCY OBJECTIVE	RE-LATED SSP STRATEGY/ (IES)	STATUS	ANTICIPATED BENEFIT(S)	INNOVATION, BEST PRACTICE, BENCH-MARKING
Improve security policies and practices.	All goals/objectives.	3-1	Planned	Decreases the risk of unintended access to agency information.	Benchmarking: TDHCA will use online DIR IT Security and National Institute of Standards and Technology resources.
Maintain, upgrade, secure, and enhance TDHCA's programmatic and financial systems for managing loans and grants.	Goal/Objective 1-1. Increase Availability of Safe/Decent/Affordable Housing – Make Loans/Grants/Incentives to Fund/Develop/Preserve Housing	3-1 4-2 5-1	Current	Ensures that agency systems for managing loans and grants are in alignment with changing business processes, financial transactions are securely exchanged with the Comptroller's Office and other organizations, and program participants have the ability to report to TDHCA online.	
Redesign TDHCA Web site to provide customers easier access to information.	Goal/Objective 2-1. Provide Information and Assistance – Provide Information and Assistance for Housing and Community Services	4-1 5-1	Current	Provides visitors easier access to information by asking them to select a customer type.	Benchmarking: TDHCA conducted a review of Web sites of other housing finance agencies, Texas state agencies, and businesses.
Host and maintain the Texas Interagency Council for the Homeless Web site.	Goal/Objective 3-1. Improve Poor/Homeless Living Conditions & Reduce VLI Energy Costs – Ease Hardships for 16% of Homeless & Very Low Income Persons Each Year	4-4	Current	Assists the council in fulfilling major functions, including helping coordinate the delivery of services for the homeless in Texas and maintaining a central resource and information center for the homeless.	
Maintain, upgrade, secure, and enhance TDHCA's monitoring systems.	Goal/Objective 4-1. Ensure Compliance with Program Mandates – Monitor Developments & Subrecipient Contracts for Compliance	3-1 5-1	Current	Reduces paper processing through online reporting by property managers; increases efficiency through an enterprise architecture in which common data elements are shared with other agency systems.	

Deploy a new Manufactured Housing System that supports all major MH business functions and provides customers with the ability to retrieve MH information and submit forms and associated payments online.	Goal/Objective 5-1. Regulate Manufactured Housing Industry – Operate a Regulatory System To Ensure Responsive SOL/Licensing/Other	1-3 4-1 5-1	Current	Provides MH customers with increased access and flexibility; reduces data entry required by MH staff.	Best Practice: Use of Texas Online for all online payments.

VI. Economic Variables

This section identifies key economic variables affecting the Department's activities. This discussion includes: a brief description of each variable, the extent to which each variable affects service populations; potential changes to each variable; and possible responses to address these changes.

Foreclosures

The recent nationwide increase in home foreclosures is seen as an unintended side effect of extending homeownership opportunities to higher risk households with limited incomes and wealth.[30] According to RealtyTrac, a real estate statistics firm, the number of homes in some stage of foreclosure increased 112% in the first quarter of 2008 compared to the same quarter in 2007.[31] The same report indicated that Texas had the 17th highest rate of foreclosure filings in the nation for this quarter. Texas experienced a 28.8% increase in foreclosure filings this quarter over the same quarter in 2007. Nearly all of the state's largest metropolitan areas, including Dallas, Fort Worth/Arlington, Houston/Baytown/Sugar Land, Austin/Round Rock, San Antonio, and McAllen/Edinburg, shouldered significant increases in the rate of filings during this period.

The current housing predicament could have a variety of implications. A glut of owners losing their homes adds to the number of households competing for low-cost rentals. At the same time, increasing foreclosures threaten renters living in foreclosed properties with sudden eviction, according to a report from Harvard University's Joint Center for Housing Studies.

In response to this homeownership crisis, TDHCA has joined with NeighborWorks America, as well as representatives from local governments, the financial industry, and the non-profit sector to form the Texas Foreclosure Prevention Task Force. The primary activity of the Task Force is to raise awareness about the nationally endorsed bilingual Homeowner's HOPE Hotline (1-888-995-HOPE) available to homeowners struggling with their mortgage payments. Additionally, the Task Force supports the outreach efforts of local foreclosure

[30] "America's Rental Housing: The Key to a Balanced National Policy," Harvard University Joint Center for Housing Studies. April 30, 2008.
[31] "U.S. Foreclosure Activity Increases 23 Percent in First Quarter," RealtyTrac. April 29, 2008. www.realtytrac.com/ContentManagement/PressRelease.aspx

prevention initiatives and monitors mortgage default patterns and trends in Texas through ongoing research to support timely intervention.

The households assisted through TDHCA's low-interest mortgages and down payment programs are verified for credit worthiness and to ensure that the household can comfortably afford the mortgage. Furthermore, all TDHCA mortgages are stable 30-year, fixed rate mortgages, which help households to avoid the pitfalls of adjustable rate loans.

Tightened Lending Standards

In the wake of the nationwide subprime mortgage and home foreclosure crisis, banks and other lending institutions have tightened their lending standards and terms. In a survey conducted by the Federal Reserve in January 2008, more than half of banks said they had toughened lending requirements even on loans to borrowers with strong credit.[32] This trend limits the availability of home loans to borrowers, particularly those with weaker credit histories. Additionally, a return to higher down payment requirements has reintroduced a hurdle that had been reduced for some homebuyers in recent years by low down payment loans.[33] A March 2008 assessment by the Associated Press, based on industry data and interviews with lenders, estimated that lending standards are now the strictest they have been "in 20 years."[34]

The Department's down payment assistance and low interest home mortgage loan programs help very low and low income Texans overcome obstacles to homeownership. Down payment assistance is available through the Department's Texas First Time Homebuyer Program to qualified applicants and the American Dream Downpayment Initiative, administered by the HOME Division. Additionally, the Department's Texas State Homebuyer Education Program certifies providers who offer classes to prospective buyers.

Energy Costs

Energy costs often constitute the largest single housing expense after food and shelter for lower income families. For low-income households, utility costs often consume 17 percent or more of annual gross incomes and account for nearly one-fourth of total housing costs. More than 60 percent of TDHCA Energy Assistance applicant households spend more than 30 percent of household incomes on home energy. Increasing energy costs increase the demand for energy-related assistance. Between 2003 and 2007, the average benefit amount for home energy in Texas increased an average of 16 percent, from $359 in 2003 to $598 in 2007. That trend could increase the 2008 average household benefit amount to more than $700.

[33] "Lending Standards Tighten For Many," Texas Real Estate Center, March 2008. http://recenter.tamu.edu/mnews/newsSearch.asp?MODE=RECON&CID=2077
[34] "Lending Standards As Strict As 20 Years Ago," Associated Press, March 22, 2008. http://www.heraldextra.com/content/view/259795/18/

Texas residential electricity prices rose an estimated 31 percent after the 2005 hurricanes, Katrina and Rita, and another 36 percent in 2006. As a preferred fuel for generating electricity, the price of natural gas directly affects the price of electricity. Moderating natural gas prices in 2007 can be credited for a 9-10 percent decrease in residential electricity prices. Nevertheless, something else again happened in the first 4 months of 2008. Natural gas prices increased by approximately 65 percent -- to about $11 per 1,000 cubic feet (mcf) – between December 2007 and April 2008.

TDHCA Energy Assistance programs, funded by the U.S. Department of Health and Human Services' Low-Income Home Energy Assistance Program (LIHEAP), assist low and very low-income households make short-term home energy payments, weatherize homes, make other home energy efficiency improvements, and otherwise encourage home energy efficiency. LIHEAP and U.S. Department of Energy (DOE) grants enable TDHCA to assist about 5-6% of the income-eligible population – households with incomes at or below 125% of federal poverty guidelines (adjusted annually).

TDHCA will continue to effectively administer its Low-Income Home Energy Assistance Program and DOE Weatherization Assistance programs to help with the needs created by rising home energy costs.

Rental Submarket Characteristics

TDHCA's rental development activities are directly affected by submarket rent levels and vacancy rates as these issues affect the feasibility of all rental housing developments. Therefore, changes in the rental market directly impact what types of development are feasible and where affordable units can be built. To address local concerns over concentration issues, local governments may create standards and regulations within their consolidated planning documents that limit the amount of affordable housing that may be constructed within their community and provide the local governing entity the ability to increase the quantity of affordable housing above the level approved in the plan through the passing of a resolution.

A specific example of how the Department's activities are affected by market characteristics can be found in the allocation of mortgage revenue bond funds. The Department issues tax-exempt and taxable multifamily mortgage revenue bonds to fund loans to for-profit and qualifying nonprofit 501(c)(3) organizations to finance the costs of acquiring, constructing and equipping of affordable rental housing units. As with all of the Department's rental activities, properties financed through this program are subject to income and rent restrictions for lower income tenants and persons with special needs, tenant service programs, quality and amenity threshold criteria and other requirements as determined by the Department and its governing Board. While these developments are similar to those funded by Housing Tax Credits (HTC) (and are eligible to receive tax credits along with the bonds), the bond programs and the HTC program are administered and allocated differently.

- The Private Activity Bond Program is administered by the Texas Bond Review Board utilizing local and state qualified bond issuers, initially through a non-competitive lottery process. Due to the participation of other bond issuers, the Department has less control over where developments are located. Because the Department is the only HTC allocating agency for the state, developers must also apply to the Department for the HTC portion of the bond transaction. Therefore the Department attempts to assist local governing entities with submarket concentration issues as a result of the allocation of the HTC portion of the bond truncation through the use of various controls including, but not limited to, a one mile statutory limitation that restricts the new construction of affordable housing within one mile of another affordable housing development; another statutory restriction that prohibits the new construction of affordable housing in cities or counties that currently contain two times the state average of affordable housing on a per capita basis without the approval of the local governing entity; and the Department's policy to not exceed a twenty-five percent capture rate related to market demand and available housing units.

- Unlike the HTC program, the use of these funds is not financially feasible statewide without additional financial support through other funding sources. As compared to HTCs, the bonds have higher administrative costs due to the complexity of the transaction. The funding structure also requires higher rent levels in order to achieve a feasible cash flow. Because the higher rents are required, the bond transactions primarily occur in the state's four largest metropolitan areas (Dallas/Fort Worth, Austin, San Antonio, and Houston). Because the transactions are harder to structure, the desirability of sites in certain "qualified" census tracts that are designated by the Treasury to receive additional credits is increased. Again, this can add to submarket concentration concerns.

Destruction of Homes and Displacement of Populations Due to Natural Disasters

In August 2005, Texas absorbed more than 500,000 evacuees from the Gulf Coast areas devastated by Hurricane Katrina. Based on anecdotal evidence, state officials estimate 125,000 evacuees still reside in Texas, two and half years after the hurricane. The majority of this evacuee population remains in the Houston area. In September 2005, the Texas Coast was directly hit by Hurricane Rita. More than 75,000 homes in the 29 affected counties suffered major damage or were destroyed.[35] The effort to fully repair the damage in this region continues today.

The Community Development Block Grant (CDBG) Disaster Recovery programs administered through TDHCA address damage caused by Hurricane Rita with some programs targeted to Katrina evacuees offered through the City of Houston and Harris County.

[35] Office of the Governor, *Texas Rebounds*, (Austin, TX: Office of the Governor, February 2006).

Factors Affecting Developers

Recent turmoil in the housing and financial markets has also had a ripple affect on the developers of low-income housing. Developers utilizing the Housing Tax Credit program have encountered a contracting market for those credits, since uncertainties in the housing market and the volatility of the mortgage market have reduced investor activity. Housing developers are also experiencing an adverse shift in terms and availability on loans for land acquisition, land development, and construction, according to a report by the National Association of Homebuilders.[36]

Additional factors putting pressure on developers are increasing construction costs and the rising cost of utilities due to higher energy costs. Because utility costs are deducted from Housing Tax Credit program rent limits, utilities reduce the amount of rent that can be collected from each unit. Developers face a problem when utility costs rise faster than rent limits, and net rental income is reduced. Tax credit rent limits have been stagnant in many areas of the country, partly due to changes made by HUD for determining area median incomes. Rising expenses, such as construction and insurance costs, also compound this issue.

VII. Impact of Federal Statutes/ Regulations

A. Role of Federal Involvement

Of TDHCA's program funding, 95 percent comes directly from the Federal Government. Since almost all of its funds are derived from federal sources, TDHCA activities and the corresponding beneficiaries have been and continue to be dictated by federal statutes. A brief description of each of those sources is provided below.

B. Description of Current and Anticipated Federal Activities

Community Development Block Grant Program (CDBG)

Source: US Department of Housing and Urban Development

Statute: 42 USCA § 5301 *et seq*.

Regulations: 24 CFR part 570

Purpose: The primary purpose of CDBG is to develop viable communities by providing decent housing and a suitable living environment and by expanding economic opportunities, principally for low and moderate income persons. While ORCA administers the state's formula allocation of CDBG funds, TDHCA, as lead agency, and ORCA are jointly administering CDBG funding provided for rebuilding after Hurricane Rita. ORCA also provides CDBG funds for the operation of seven Colonia Self-Help Centers. A second allocation of $428.6 million in supplemental CDBG disaster recovery funding was allocated by the federal government to further hurricane recovery efforts. This round of funding is currently being administered by TDHCA and ORCA, with a large portion of the funds distributed through a third party project management firm, ACS State and Local Solutions.

Community Services Block Grant Program (CSBG)

Source: US Department of Health and Human Services

Statute: 42 USCA § 9901 *et seq*.

Purpose: CSBG funds provide administrative support to the Community Action Network (Network) in Texas, organizations serving migrant seasonal farmworkers, and Native Americans. CSBG funds provide support which enables the Network to operate a comprehensive array of programs that address needs of low-income persons in the areas of education, nutrition, emergency services, employment, housing, health, income management, programs to assist persons obtain self-sufficiency, and information and referral services to link persons with other services available in the community. In many rural areas of the State, the Community Action Agency is one of a handful of organizations providing emergency services and services which help transition persons out of poverty into self-sufficiency.

Status: The FY 2008 Health and Human Services Appropriations Act (PL 109-149) provided $643 million for the CSBG, an increase of 3.65% from FY 2007. The Administration's budget requests for FY 2008 proposed elimination of the CSBG program. Texas will receive $31.3 million in CSBG funds in FY 2008. A cut or loss of funding of CSBG would have a devastating impact on estimated 481,598 low income persons in Texas who are served annually by programs supported with CSBG funds. Due to the availability of CSBG funds in 2007, the Network in Texas was able to leverage approximately $511million dollars of state, local, and private funds and resources.

Emergency Shelter Grants Program (ESGP)

Source: US Department of Housing and Urban Development

Statute: 42 USCA § 11371 *et seq.*

Regulations: 24 CFR part 576

Purpose: The purpose of the ESGP program is to rehabilitate or convert buildings for use as emergency shelters for the homeless, to pay certain operating expenses and essential services in connection with emergency shelters for the homeless, and to provide homeless prevention activities.

Status: The U.S. Department of Housing and Urban Development's Community Planning and Development Program (CPD) 2008 allocations for the Community Development Block Grant; HOME Investment Partnership, including the American Dream Downpayment Initiative; Housing Opportunities for Persons with AIDS (HOPWA); and Emergency Shelter Grants (ESG) totaled $385 million. Texas received $11 million in ESG funds and of this, the Texas Department of Housing and Community Affairs received $5.26 million.

Home Investment Partnerships Program (HOME)

Source: US Department of Housing and Urban Development

Statute: 42 USC §§ 12701-12839

Regulations: 24 CFR Part 92

Purpose: The HOME Investment Partnerships Program provides housing assistance for Low Income, Very Low Income, and Extremely Low Income people through homebuyer/downpayment assistance, tenant-based rental assistance, new construction or rehabilitation of owner-occupied housing and investment in the acquisition and/or new construction or rehabilitation of affordable multifamily housing. Status: The FY 2008 HUD Appropriations Act (PL 110-161) provides approximately $1.7 billion for the HOME program, an approximate three percent (3%) decline in allocation compared to FY 2007. For FY 2008, TDHCA anticipates receiving $40,043,285, a combined $39,776,588 in HOME Investment Partnership Program funds and $266,637 in American Dream Downpayment Initiative (ADDI) funding to be distributed by HOME program staff.

Housing Tax Credit Program (HTC)

Source: US Treasury Department

Statute: 26 USCA § 42 (Internal Revenue Code of 1986, as amended)

Purpose: The HTC program provides credits against federal income taxes for owners of qualified low income rental housing projects and the allocation of available tax credit amounts.

Status: It is projected based on the per capita allocation formula that the state will receive $63,000,000 in Housing Tax Credits in 2008 ($48 million in competitive credits and $15 million in non-competitive credits associated with tax exempt bond financing).

Mortgage Revenue Bond Programs (MRBs)

Source: US Treasury Department

Statute: 26 USCA § 143 (Internal Revenue Code of 1986, as amended)

Purpose: Under the MRB program, the Department issues mortgage revenue bonds to help lower income working families buy their first homes with low interest loans. It includes a multifamily bond program and several single family bond programs.

Status: It is projected that the MRB program will receive $89,000,000 in 2008. The actual part of this amount that will be utilized may change significantly based on market conditions in the parts of the state where the bonds are supported by income levels and allowable rents.

Low Income Home Energy Assistance Program (LIHEAP)

Source: US Department of Health and Human Services

Statute: 42 USCA § 8621

Purpose: The LIHEAP program provides direct financial assistance for energy needs of low income persons through the Comprehensive Energy Assistance Program (CEAP), and to partially fund the Weatherization Assistance Program (see below).

Status: The Health and Human Services (HHS) received appropriated funds from the Consolidated Appropriations Act, 2008 (P.L. 110-161), which provided $1.98 billion for LIHEAP. The Administration has proposed reducing LIHEAP funding to $1.7 billion in FY 2009. Texas will receive approximately $44.16 million in LIHEAP funding for FY 2009. If LIHEAP is cut to $1.7 billion for FY 2009, Texas' share is likely to drop to $37.81 million.

Weatherization Assistance Program (WAP)

Source: US Department of Energy (DOE) and US Department of Health and Human Services

Statute: 42 USCA § 6861

Regulations: 10 CFR part 440

Purpose: WAP provides residential weatherization and other cost-effective energy-related home repair to increase the energy efficiency of dwellings owned or occupied by low income persons.

Status: The FY 2008 DOE award to the State of Texas is $5,549,413. The Department estimates the proposed funding for FY 2009 to be level funding at approximately $5.5 million. The WAP receives approximately 15% of the LIHEAP allocation.

Section 8 Housing Assistance Program (Section 8)

Source: US Department of Housing and Urban Development

Statute: 42 USCA § 1437f

Regulations: 24 CFR 882.101 *et seq.*

Purpose: Section 8 provides rent subsidy vouchers to families and individuals, including the elderly and persons with disabilities, whose annual gross income does not exceed 50 percent of HUD's median income guidelines. The statewide program is designed specifically for needy families in small cities and rural communities not served by similar local or regional programs.

Status: The FY 2008 HUD Appropriations Act (PL 110-161) provides $15.9 billion for the Section 8 program. TDHCA, which administers 1,064 vouchers out of 144,000 in the state, will receive approximately $5.6 million for FY 2008 activities.

VIII. Other Legal Issues

The Texas Legislature has given local governments significant discretion over applications in areas where a potential over concentration of HTC units may exist. The Department works to ensure that local governments are aware of possible TDHCA funding awards in their community through an extensive notification process. With the provision of these notifications, local officials and community organizations are encouraged to comment on the need and impact of the development on local community. Such comments are considered in the final approval of the Board of the application.

In some programs, state and local support for an application is part of the scoring criteria in the application process. The Department's Multifamily Bond applications include scoring criteria that provides "points" for public comment from local officials. HTC and MRB applications receive points for receiving a commitment for local funding or in-kind contributions (i.e., donations of land, waivers of fees such as building permits, water and sewer tap fees or similar contributions) that would benefit the development. Applicants may also receive points for developing in locations with city or county-sponsored zones or districts or rehabilitating an existing Residential Development that is part of a Community Revitalization Plan.

Local governments control each applicant's ability to provide evidence of proper zoning for the development site and consistency with local consolidated planning documents. In instances where the property is not currently zoned for housing, the local government may deny a requested zoning change which would make the development ineligible for consideration.

Local governments have significant input on applications in their local areas.

- For applications that involve HTCs, applicants must receive a resolution from the local governing body for approval to add new units if the application is proposing new construction that is within one mile of an existing development that has received an allocation of Housing Tax Credits or Private Activity Bonds for new construction within the last three years and that serves the same population type (elderly/elderly or family/family). This applies to applications proposing New Construction and Adaptive Reuse in counties with over one million in population.
- Additionally, applications proposing development in a city or county that has more than twice the state average per capita of affordable housing units supported by Housing Tax Credits or Private Activity Bonds must receive a resolution from the local governing body for approval to develop in that city or county. This applies to applications proposing New Construction, Adaptive Reuse, and Acquisition / Rehabilitation.

While they do not impact TDHCA directly, the following local governmental issues can be barriers to the provision of affordable housing.

- Zoning provisions: A municipality's zoning authority governs the type and direction of growth within their boundaries. Ordinances may be passed to encourage affordable housing through measures such as lowering minimum lot sizes, decreasing building set-back requirements, and lowering minimum square footages of homes. However, ordinances that prohibit these types of activities can drive land and construction costs up to the point that affordable housing cannot be built.
- Impact Fees and Development Fees: As a condition of permit approval, municipalities may assess fees to pay for infrastructure costs. These impact fees increase the cost of developing all types of housing including affordable housing.

IX. Self-Evaluation and Opportunities For Improvement

A. Effectiveness and Efficiency of the Department

Performance Measures

This section discusses TDHCA's performance with measures established by the 80th Legislature or by the Department. Goals one through five were established by the General Appropriations Act through interactions between TDHCA, the LBB, and the Legislature.

GOAL 1: TDHCA will increase and preserve the availability of safe, decent and affordable housing for very low, low, and moderate income persons and families.

Strategy 1.1
Provide mortgage financing and homebuyer assistance through the Single Family Mortgage Revenue Bond Program

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of single family households assisted through the First Time Homebuyer Program	1,727	2,727	158%	2,016

Explanation of Variance: Loan originations were higher in 2007 than anticipated due to the receipt of additional volume cap. Additionally, increased market interest rates generated higher demand for the Department's lower interest rate products.

Strategy 1.2
Provide funding through the HOME Program for affordable single family housing

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of single family households assisted with HOME funds	1,834	413	22.5%	1,255

Explanation of Variance: The total number of assisted units was lower than anticipated in 2007 due to a biennial funding cycle for 2006-2007 which resulted in fewer applications for the homebuyer assistance and tenant-based rental assistance activities.

Strategy 1.3
Provide funding through the HTF program for affordable single family housing

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of single family households assisted through the Housing Trust Fund	100	115	115%	228

Explanation of Variance: Performance was higher than anticipated in 2007 due to the closing out of previous fiscal year contracts and an elevated amount of technical assistance provided by the Department to ensure that the nonprofit organizations are meeting their performance benchmarks.

Strategy 1.4
Provide tenant-based rental assistance through Section 8 certificates

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted with tenant-based rental assistance	2,100	1,064	51%	1,494

Explanation of Variance: The targeted number was developed prior to a change in how the U.S. Department of Housing and Urban Development provides Section 8 Housing Assistance Program (HAP) funds. Provided funds are no longer based on the number of Housing Choice Vouchers available. In addition, the target was developed prior to the transfer of 560 vouchers to a local public housing authority.

Strategy 1.5 Provide federal tax credits to develop rental housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted with HTCs	18,832	12,998	69%	12,291

Explanation of Variance: Approximately $3.7 million credits out of the 2007 credit allocation were awarded to developments that had previously received credits in 2004. These additional credits were due to substantial increases in construction costs associated with hurricane disasters. Because of the increase in construction costs, fewer units are produced on an annual basis.

Strategy 1.6 Provide funding through the HOME Program for affordable multifamily housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted with HOME funds	647	144	22.3%	500

Explanation of Variance: The HOME and Housing Tax Credit programs operated concurrent application cycles. Due to the competitiveness of the cycle, not all applicants that applied for both sources of funds were competitive in the Housing Tax Credit round and eligible for an award. Therefore, the awarding of HOME funds was limited to those applications that were competitive and received a Housing Tax Credit award.

Strategy 1.7 Provide funding through the Housing Trust Fund for affordable multifamily housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted through the Housing Trust Fund	255	0	0%	784

Explanation of Variance: The 2007 funding for the HTF was utilized to meet the statutorily required minimum of $3,000,000 funding for the Bootstrap Loan Program.

Strategy 1.8 Provide funding through the Mortgage Revenue Bond Program for affordable multifamily housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of households assisted through the Mortgage Revenue Bond Program	3,500	2,997	86%	2,393

Explanation of Variance: Due to overall market and economic conditions, the bond program has not been as attractive as it has been in the past. This lead to a reduction in the applications submitted. In the past, the Department has received several applications towards the end of the year which enable the Department to CarryForward additional allocation into the following year. In 2006, the Department did not receive additional applications at the end of the year and therefore did not have the additional allocation to CarryForward into 2007. This reduced the total amount of bond allocation issued by the Department. The increase in construction costs also affected the bond program, by reducing the number of units produced due to higher costs.

GOAL 2: TDHCA will promote improved housing conditions for extremely low, very low, and low income households by providing information and technical assistance.

Strategy 2.1
Provide information and technical assistance to the public through the Public Affairs Division and the Housing Resource Center

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of information and technical assistance requests completed	5,400	3,824	70.8%	4,900

Explanation of Variance: A new toll free number for the entire agency has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center.

Strategy 2.2
To provide technical assistance to colonias through field offices

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of on-site technical assistance visits conducted annually from the field offices	600	963	160.5%	800

Explanation of Variance: Technical assistance visits to units of local government and nonprofit organizations continued to increase due to various changes to the programs administered through the field offices.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target*
Number of colonia residents receiving assistance	1,700	827	48.6%	7,650

Explanation of Variance: The Border Field Offices focus on empowering the non-profit organizations to work with the colonia residents on a one-on-one basis. The units of local government and non-profit organizations provide the direct assistance to colonia residents on behalf of the Department. Therefore, the number of direct contacts between the Department and the colonia residents has decreased.

*Note that the definition of the measure has changed for 2008 and now includes assistance provided through the Colonia Self-Help Centers as well as the Colonia field offices.

Strategy Measure (C)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of entities and/or individuals receiving informational resources	1,200	631	52.5%	1,000

Explanation of Variance: Marketing of Colonia Initiatives, including the number of entities and/or individuals requesting and receiving information resources is a key performance goal. These figures were expected to increase upon the release of the Texas Bootstrap Loan Program NOFA in 2007. However, the new Texas Bootstrap Reservation System has delayed the release of the NOFA.

GOAL 3: TDHCA will improve living conditions for the poor and homeless and reduce the cost of home energy for very low income Texans.

Strategy 3.1
Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of persons assisted through homeless and poverty related funds.	440,000	565,822	128.6%	512,244

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). The Department revised the reporting procedures for CSBG subrecipients allowing subrecipients to report all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of persons assisted that achieve incomes above poverty level.	2,000	3,087	154.4%	2,200

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Strategy Measure (C)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of shelters assisted through the Emergency Shelter Grant Program.	70	76	108.5%	73

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

Strategy 3.2
Administer the state energy assistance programs by providing grants to local organizations for energy related improvements to dwellings occupied by very low income persons and for assistance to very low income households for heating and cooling expenses and energy related emergencies.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of households assisted through the Comprehensive Energy Assistance Program.	63,200	83,529	132%	51,502

Explanation of Variance: High home energy prices contributed to higher demand for energy assistance.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of dwelling units weatherized through the Weatherization Assistance Program.	4,800	5,404	112%	3,004

Explanation of Variance: The Department is above target for the year as a result of advantageous weather enabling higher weatherization production.

GOAL 4: TDHCA will ensure compliance with the Texas Department of Housing and Community Affairs' federal and state program mandates.

Strategy 4.1
The Portfolio Management and Compliance Division will monitor and inspect for Federal and State housing program requirements.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Total number of monitoring reviews conducted.	4,554	5,555	122%	5,072

Explanation of Variance: More onsite monitoring reviews were scheduled than were anticipated.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Total number of units administered	237,195	229,744	96.9%	242,766

Strategy 4.2
The Portfolio Management and Compliance Division will administer and monitor federal and state subrecipient contracts for programmatic and fiscal requirements.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Total number of monitoring reviews conducted	9,220	11,474	124.5%	12,715

Explanation of Variance: All monitoring requests received by the Department require a review. Monitoring reviews include set up and draw reviews. As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration. Because several contracts expired during the quarter, the Department received a larger number of draw requests than projected.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of contracts administered	350	358	102.3%	430

GOAL 5: To protect the public by regulating the manufactured housing industry in accordance with state and federal laws.

Strategy 5.1
Provide titling and licensing services in a timely and efficient manner.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of manufactured housing statements of ownership and location issued.	89,000	86,035	96.7%	90,000

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of licenses issued	4,435	2,602	58.7%	4,000

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Strategy 5.2
Conduct inspections of manufactured homes in a timely manner.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of routine installation inspections conducted	8,000	4,603	57.5%	6,000

Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.76%.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of non-routine installation inspections conducted	2,500	2,100	84%	2,200

Explanation of Variance: Education and enforcement keep the number of inspections with deviations low, which is desirable.

Strategy 5.3
To process consumer complaints, conduct investigations, and take administrative actions to protect the general public and consumers.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of complaints resolved	1,700	1,052	61.9%	1,250

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.

Goals Six through eight are established in legislation as riders to TDHCA's appropriations, as found in the General Appropriations Act.

GOAL 6: TDHCA will target its housing finance programs resources for assistance to extremely low income households.*

Strategy 6.1
The housing finance divisions shall adopt an annual goal to apply $30,000,000 of the division's total housing funds toward housing assistance for individuals and families earning less than 30 percent of median family income.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Amount of housing finance division funds applied towards housing assistance for individuals and families earning less than 30 percent of median family income.	$30,000,000	$19,535,526	65.12%	$30,000,000

Explanation of Variance: Fewer Section 8 vouchers and a lower than anticipated number of units assisted by the HOME program contributed to the 2007 performance for this target. HUD transferred a large number of Section 8 vouchers to a large consortium and also adjusted the methodology for distributing Section 8 funds. Both of these contributed to the lower than anticipated assistance for households earning less than 30 percent of median family income. In addition, a double funding cycle for the HOME single family funds resulted in fewer applications for 2007, the second year of the double year cycle.

Note: For more information, see Rider 4 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.

GOAL 7: TDHCA will target its housing finance resources for assistance to very low income households.*

Strategy 7.1
The housing finance divisions shall adopt an annual goal to apply no less than 20% of the division's total housing funds toward housing assistance for individuals and families earning between 31% and 60% of median family income.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Percent of housing finance division funds applied towards housing assistance for individuals and families earning between 31% and 60% of median family income.	20%	50.5%	253%	20%

Explanation of Variance: The majority of TDHCA housing programs serve households under 60% of median family income.

GOAL 8: TDHCA will provide contract for deed conversions for families who reside in a colonia and earn 60 percent or less of the applicable area median family income

Strategy 8.1
Help colonia residents become property owners by converting their contracts for deed into traditional mortgages.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Amount of TDHCA funds applied towards contract for deed conversions for colonia families earning less than 60% of median family income.	$2,000,000	$0	0%	$2,000,000

Explanation of Variance: TDHCA has delayed the release of additional funds pending changes to encourage the efficient allocation of program funds. TDHCA has updated the program rules and anticipates the release of a NOFA for the 2006 and 2007 funding in FY 2008.

Note: For more information, see Rider 11 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.

The following TDHCA-designated goal addresses the housing needs of persons with special needs.

GOAL 9: TDHCA will work to address the housing needs and increase the availability of affordable and accessible housing for persons with special needs.

Strategy 9.1
Dedicate no less than 20% of the HOME project allocation for applicants that target persons with special needs.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Percent of the HOME project allocation awarded to applicants that target persons with special needs.	20%	24%	122%	20%

Strategy 9.2:
Compile information and accurately assess the housing needs of and the housing resources available to persons with special needs.

Strategy Activities:

- Assist counties and local governments in assessing local needs for persons with special needs.
- Work with State and local providers to compile a statewide database of available affordable and accessible housing.
- Set up a referral service to provide this information at no cost to the consumer.
- Promote awareness of the database to providers and potential clients throughout the State through public hearings, the TDHCA web site as well as other provider web sites, TDHCA newsletter, and local informational workshops.

Strategy 9.3:
Increase collaboration between organizations that provide services to special needs populations and organizations that provide housing.

Strategy Activities:

- Promote the coordination of housing resources available among State and federal agencies and consumer groups that serve the needs of special needs populations.
- Continue working with agencies, advocates, and other interested parties in the development of programs that will address the needs of persons with special needs.

- Increase the awareness of potential funding sources for organizations to access, to serve special needs populations, through the use of TDHCA planning documents, web site, and newsletter.

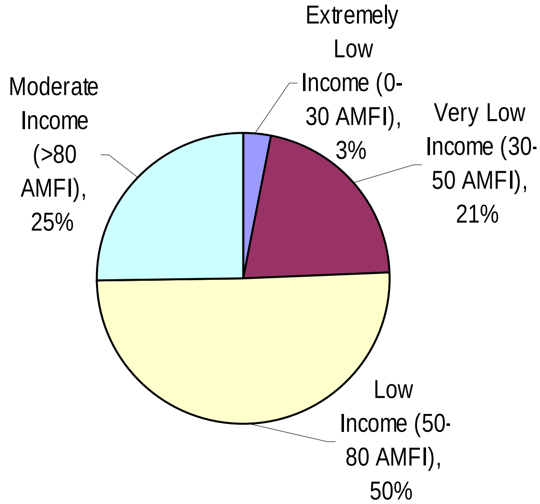
Strategy 9.4:
Discourage the segregation of persons with special needs from the general public.

Strategy Activities:
- Increase the awareness of the availability of conventional housing programs for persons with special needs.
- Support the development of housing options and programs, which enable persons with special needs to reside in noninstitutional settings.

Serving Critical Populations

As shown in the figures below, the distribution of TDHCA's housing resources in fiscal year 2007 showed a clear prioritization of assistance to individuals and households with the lowest incomes. The vast majority of households served by the Department were classified as extremely low income, very low income, and extremely low income.

Total Funding by Income Level, FY 2007



Total Households Served by Income Level, FY 2007

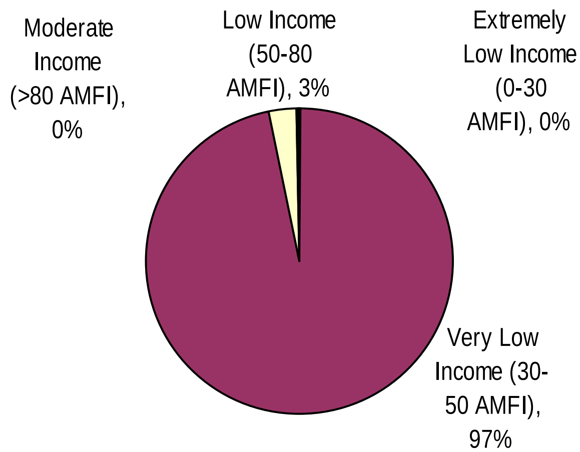


Table 23: TDHCA Funding and Households/Persons Served by Income Category, FY 2007 - All Activities

Income Type	Committed Funds	# of Households or Individuals Served*	% of Committed Funds	% of Households or Individuals Served
ELI (0-30 AMFI)	$19,605,793	1,491	3%	0%
Very Low Income (30-50 AMFI)	$136,010,258	682,277	21%	98%
Low Income (50-80 AMFI)	$321,261,371	12,732	50%	2%
Moderate Income and Up (>80 AMFI)	$162,494,849	1269	25%	0%
Total for All Incomes	$639,372,271	697,769	100%	100%

*Includes ESG and CSBG, which are allocated to individuals.

Industry Best Practices

TDHCA is an active member of the following housing and community service industry groups.

- National Council of State Housing Agencies. This organization is comprised of housing finance agencies from of every state, the District of Columbia, Puerto Rico, and the Virgin Islands, and more than 350 profit and nonprofit firms in the affordable housing field. In addition to being a good source of research information on these agencies' activities, this organization holds a number of conferences and training sessions throughout the year where its members meet to discuss best practices and success stories.
- National Association for State Community Services Programs. Membership in this organization includes state administrators of both the CSBG and WAP. The organization was created to provide research, analysis, training and technical assistance to state CSBG and WAP offices, the Community Action Network, community action agencies and state associations, in order to increase their capacity to prevent and reduce poverty.
- National Energy Assistance Directors' Association. Membership in this organization consists of state administrators and tribal directors of the LIHEAP. The organization is the primary educational and policy organization for the state and tribal directors of the LIHEAP. The organization also works closely with the National Association for State Community Services Programs, representing the state weatherization program offices and the National Association of State Energy Officials to more effectively share ideas on the delivery of state energy services through the Energy Programs Consortium.

Insights Gained and Implemented Programmatic Changes

The Department undergoes regular audits and monitoring reviews including reviews by its Internal Auditing Division, its external certified independent auditors, its funding source agencies, and the SAO.

Independent audits of its financial statements are conducted on an annual basis, regular audits of its major federal programs in connection with Federal Single Audits coordinated by the SAO, various monitoring reviews of its federal programs by its Federal funding agencies, as well as reviews of particular functions or processes by its internal auditors.

Other periodic oversight reviews of TDHCA's activities include:

- State Office of Risk Management reviews of physical safety practices.
- Comptroller of Public Accounts reviews of compliance with state laws and rules concerning expenditures and processing requirements of the uniform statewide accounting system.
- State Energy Conservation Office reviews of the administration of these funds.

The results of these audits and reviews have improved TDHCA's controls designed to: achieve the objectives and goals of the agency, comply with program rules and regulations, and safeguard the Department's assets. Some specific examples include:

- Quality assurance and control procedures have been enhanced for the Section 8 program to better: assess participant eligibility, protect voucher holder rights, ensure that reasonable rents are charged, and calculate utility allowances. Processes and controls have been added to ensure the proper execution of property owner contracts, the satisfaction of housing quality standards, and timely deficiency correction. Additionally, access to computer systems has been improved to protect the quality of the Section 8 data, to ensure that transactions cannot be passed on for payment without proper approval, and to protect the systems against unauthorized changes to computer code and data.
- Enhancements have been made to the RAF to consider required available housing resources to address statutory requirements relating to the allocation of HOME, HTC, and HTF program dollars.
- The risk assessment process used to identify high-risk subrecipients for field monitoring visits has been enhanced to include a complete population of subrecipients to be considered, standard operating procedures and documentation standards.
- The review of Federal Single Audits performed on its subrecipients has been enhanced to better use the information for monitoring planning purposes. Controls have been improved to ensure audit findings are forwarded to and considered by staff responsible for performing risk assessments of subrecipients for identifying high-risk subrecipients that warrant greater monitoring attention. Processes have been improved to ensure that corrective actions for audit findings are taken in a more timely fashion, when appropriate, and that management decisions are issued in a timely fashion. The Department has made its single audit review process more efficient by limiting the extent of its review to that which is required by the Federal Single Audit Act.

- The Department has improved its time accounting procedures to ensure employees salaries are properly allocated to federal programs.

TDHCA has also implemented a risk management program to accomplish similar objectives to its oversight audits and reviews. While the program was designed to ensure compliance with Executive Order RP36, July 2004, relating to preventing, detecting, and eliminating fraud, waste and abuse, it is also designed to identify, prioritize, assess, document, report, monitor and address other financial, operating, and legal risks of the Department.

HOME Contract Administration

The Department has made significant recent progress in the administration of the HOME Program.

- In December 2003, the TDHCA Contract System was rolled out. The system allows administrators to enter draw information, itemize costs, set up contract activities (project setups), enter match information, enter project completion report data, and view programmatic and financial information associated with their contracts in real time. The system gathered a substantial amount of contract information that was not previously captured, which provided an opportunity to run reports on contractual performance and real time program beneficiary information. This system has significantly helped the Department improve program efficiency and more effectively track and monitor contract performance.
- Procedures designed to further improve efficiency and accountability in HOME program administration have been implemented. These procedures include analyzing commitments and expenditures through data analysis and added incentives for administrators to perform according to contractual terms.
- A concerted effort has been made to update, add, and correct information previously entered in HUD's Integrated Disbursement and Information System. This system is the mechanism used by HUD to produce the HUD score card, which reports on performance in the areas of HOME commitment, expenditure, leveraging, low-income benefit, and rental assistance. Access to HUD's system has been appropriately restricted to preclude individuals from having the ability to both initiate and approve draw downs of HOME funds, which might result in disbursement of funds in error or without proper authorization.
- The Department has improved its environmental compliance and enforcement program over the HOME program to ensure compliance with HUD regulations.
- Controls have been added to ensure that LBB performance measurement information for the number of households the HOME program serves by income level is adequately supported and retained.
- TDHCA also analyzed the processes and mechanisms in place from a programmatic view point. From this review, it completed multiple projects designed to provide better guidance to Administrators and staff. The result is improved program compliance. Some of these projects include development of: new and updated manuals, a technical assistance function, and plans to address areas of program administration weakness.

The combination of these activities ensures that the Department satisfies HOME program requirements and ensures that funds are spent accountably.

B. Agency Characteristics Requiring Improvement

Communication Regarding the Need for Affordable Housing

While statistics and anecdotal evidence support the enormous need for affordable housing, the Department has determined that additional efforts need to be made to communicate that need to public officials and organizations that can help to address this need in their communities. To that end, staff has made a strong effort to meet with elected officials and neighborhood groups to help them understand TDHCA's programs and processes and how to participate in those processes effectively. The Department has also established general and specific program email distribution lists to announce funding opportunities, hearings, or other events within the Department.

Communication with Customers

From the 2008 Report of Customer Service, 72 percent of respondents stated that they were satisfied with their experience with TDHCA and 69 percent said TDHCA staff responded to their emails and voice messages in a timely manner. However, 19 percent disagreed with the statement that TDHCA automated phone system is easy to navigate and helps them reach the correct division or individual when they call. Staff believes that a primary reason for the dissatisfaction rate is caused by a lengthy phone menu for the automated system. Staffing limitations have also led to lengthy wait times experienced by some callers to the Manufactured Housing telephone line. TDHCA is constantly making changes to improve the telephone systems, including updating the menu of the automated phone system and will work to increase satisfaction with the system in the future.

C. Key Obstacles

A number of macro issues that present obstacles to TDHCA's ongoing efforts are below provided in alphabetical order.

Fiscal: The largest obstacle TDHCA faces is the limited amount of financial resources available for affordable housing. Even with all of its resources, TDHCA can serve only about 1 percent of those in need. The most apparent obstacle to meeting underserved housing needs in Texas is a severe shortage of affordable housing stock. There is a corresponding shortage of funding sources to maintain and increase this housing stock. With few exceptions, every housing program administered by TDHCA receives far more applications than could be funded from available resources. This is evidence that there is significant interest on the part of both the nonprofit and for-profit sectors to produce the housing that is needed. While layering, leveraging, and partnering helps to stretch available funds, there is no amount of innovation that will overcome this lack of funding.

Geographic: Only the Manufactured Housing Division has a somewhat statewide presence with its field office locations in Dallas-Ft. Worth, Edinburg, Houston, Lubbock, San Antonio, Tyler, and Waco. While OCI has field offices located in two of the state service regions along the Texas-Mexico border, there are no field offices for housing and community development activities in any of the state's other 11 regions. Due to fiscal and FTE constraints that make the provision of local field offices unfeasible, it is very difficult to establish and maintain a regional and local presence in a state as large as Texas.

Lack of Organizational Capacity: A lack of organizational capacity, in both experience and financial resources, often makes it difficult for smaller communities to address their affordable housing issues. As compared to larger metropolitan areas, these communities have fewer resources that can be used a matching funds, staff members (if any) to put together an application and oversee an application is funding is obtained.

Local Opposition to Affordable Housing: It is a common perception that affordable housing helps contribute to overcrowded schools, increased crime rates, traffic congestion, and general neighborhood deterioration that will lower the surrounding property values. As a result, developments requesting funding from TDHCA can experience significant opposition. TDHCA continues to work to educate the general public on affordable housing issues and encourages developers to interact directly with neighborhood organizations throughout the application process. This educational process is done with such tools as the public hearing process, TDHCA's website and publications, and the application scoring criteria for rental development funding.

Technological: Since TDHCA was created in 1991, its program data has tended to be stored and accessed in a number of separate databases. These separate data sources have been an obstacle to effective agency operations. Through the Central Database project, TDHCA has managed to consolidate much of this data into a single source. This has allowed for processes associated with contract management, draw requests, and compliance reporting to be automated. Nevertheless, gaps still remain in unifying TDHCA's 15-plus programs' varying reporting requirements, report formats, and data storage methods have made performance reporting and analysis difficult. A Central Database project to consolidate many of the various databases is ongoing.

D. Opportunities

Human Resources

<u>Retention Programs</u>

In an effort to ensure employees are fairly and equitably compensated, a recent Department-wide classification audit was conducted by the State Auditor's Office to determine misclassifications for the Department. The audit found only 8 positions that required reclassification and pay scale adjustment. Additionally, the Department has purchased wage surveys to compare the organization to its peers nationally. Pay studies will continue to analyze, study, and identify areas of concern. Such studies help to ensure that employees are compensated at rates that are comparable with what they would earn elsewhere.

Internal Communications

The Department has strengthened internal efforts to ensure that communications to employees increase through the development of an agency-wide Intranet communication page called the TDHCA Electronic Water Cooler, a quarterly agency newsletter, quarterly *HR Herald* newsletter, increased division and section meetings, agency-wide communication memos as the need arises, and Departmental agency-wide communications meetings. An events planning committee is also active to help coordinate events that will work to build morale and to recognize employee achievements.

Organizational Training and Employee Development

In February 2008, TDHCA participated in an Organizational Excellence Survey sponsored by the University of Texas. The survey helps TDHCA leadership by providing information about work force issues that impact the quality of service ultimately delivered its customers. The data provide information not only about employees' perceptions of the effectiveness of their own organization, but also about employees' satisfaction with their employer. This will help management work to address TDHCA's strengths and weaknesses as seen through the eyes of its employees. Results of this survey are described in Appendix F.

In 2007 TDHCA convened a committee of staff members to study the options for an employee mentoring program at the Department. Such a program would pair employees with more-senior staff members with the goal of improving cross-divisional communication and employee morale. The proposed program is still under consideration.

Technology

Throughout the FY 2009-2013 time period, TDHCA will focus on the following technology initiatives in support of Department objectives:

- Manufactured Housing System Upgrade (FY 2008-2009 capital budget project)
- PeopleSoft Financials version upgrades to stay up-to-date with the Office of the Comptroller of Public Accounts Integrated Statewide Accounting System (ISAS) version of PeopleSoft Financials
- Yearly upgrades of the Mitas Automated Accounting and Loan Servicing systems
- Frequent upgrades of the HAPPY Housing Pro Section 8 System
- IT security and disaster preparedness
- Web site enhancements to provide customers easier access to information
- Enhancement projects for the Department's custom systems
- Continued technical support for Department employees and external customers

The internet, through the TDHCA list serve and website, continues to offer new opportunities to communicate directly with the department's customers. A recent example of the use of online technology is the use of a low cost, efficient online surveying program from a company called Survey Monkey. In May 2008, this survey instrument was used to conduct the paperless 2008 Customer Service Survey.

Political

The Department welcomes the opportunity to engage in discussions with all members of the Texas Legislature regarding matters of affordable housing and community affairs. More specifically, the Department would like to increase the members' awareness of these matters as well as legislative district-specific information on funding totals and purposes within each district. Economic development in the state also relies heavily upon the existence and availability of affordable housing and the Department seeks to convey this idea to the Legislature. The increased dialogue between the Department and the state's policy-makers would provide more complete information for the Legislature as they deliberate on the important matters of affordable housing and community affairs.

E. Working with Federal, State, and Local Entities to Achieve Success

Because the efficiency of service provision and the capacity of available resources to create successful housing and housing-related endeavors can be greatly increased through partnerships with federal, state, regional, and local organizations, TDHCA strives to develop and maintain partnerships with a wide variety of groups.

Coordination with Federal Agencies

As discussed in detail in the “Description of Current and Anticipated Federal Activities” contained in Section VII, TDHCA works with a number of Federal organizations to allocate its funding. These organizations include the US Department of Housing and Urban Development, US Department of the Treasury, the US Department of Health and Human Services, and the US Department of Energy. TDHCA works to establish effective working relationships with these organizations’ personnel at both the national and regional level. In addition to ensuring that planning and oversight efforts are accomplished successfully, these partnerships leads to joint marketing of programs, cross program client referrals, and technical assistance with workshops and other training efforts.

As a provider of services to rural Texas communities, TDHCA has an ongoing relationship with USDA Rural Development. Collaborations have been achieved through several TDHCA programs (HTC, HTF, HOME) in the form of multifamily developments and single family homeownership initiatives.

Coordination with State Agencies

Below is a listing of state agencies that TDHCA works with on an ongoing basis.

- Office of Rural Community Affairs (ORCA): TDHCA and ORCA have entered into an interagency contract to jointly administer the rural regional allocation of the HTC Program. TDHCA and ORCA jointly provide outreach and training to promote rural area capacity building, develop threshold requirements and scoring criteria for the rural applications, and score the applications. ORCA also participates in the site inspection of rural developments proposed under the rural allocation. TDHCA and ORCA coordinate services in seven Colonia Self-Help Centers to provide housing and technical assistance to improve the quality of life for colonia residents.

- Texas Interagency Council for the Homeless: TDHCA serves as a member of, and provides administrative support to, the Texas Interagency Council for the Homeless—a council comprised of six member state agencies.
- Texas Department of Aging and Disability Services (DADS): TDHCA, in cooperation with the DADS, the Texas Health and Human Services Commission, and local PHAs, administers a housing voucher pilot program developed by HUD, the DHHS, and the Institute on Disability at the University of New Hampshire. “Project Access” helps low income persons with disabilities transition from nursing facilities into the community by providing access to affordable housing.
- Texas State Affordable Housing Corporation (TSAHC): TDHCA works with TSAHC to share data and information in the development of the State of Texas Low Income Housing Plan and Annual Report. TSAHC also performs asset management activities, including on-site inspections and financial feasibility reviews, for TDHCA MFB properties, as well as manages the bank account for the TDHCA Texas Statewide Homebuyer Education Program.

Coordination with Local and Regional Governments and Other Organizations

Most recently in 2006, TDHCA conducted a major outreach effort to better understand local needs for specific types of funding and services. This outreach was in the form of a Community Needs Survey that was made available online to community leaders across the state. These leaders included state senators and representatives, city mayors and county judges, city managers, housing and community development departments, US Department of Agriculture regional offices, public housing authorities, councils of governments, community action agencies, and HOPWA administrative agencies.

This survey provided the respondents with opportunity to describe their community's specific housing, assistance, and community development issues. The survey findings will help determine how to most effectively use existing resources, help develop future assistance programs, and will be used as a description of local need in TDHCA planning documents. This data is particularly useful to the Department because it helps inform decisions on what activities will be particularly encouraged through the application process. For example, the survey results help determine whether or not a higher percentage of funding should be dedicated towards new versus rehab multifamily development or if more funding is needed for owner occupied rehabilitation than down payment assistance. Knowing what kind of assistance is in great demand allows set aside amounts and scoring priorities in the program rules to be adjusted accordingly.

Organizations that TDHCA continues to partner with across the state include the following.

- Local Utility Companies: Partnerships with financial commitments between the Weatherization Assistance Program and Southwestern Electric Power Company, Southwestern Public Service Company, Entergy, and El Paso Electric, provide energy conservation measures to very low and extremely low income utility customers.
- NeighborWorks America. TDHCA continues to contract with NeighborWorks America to facilitate the Texas Statewide Homebuyer Education Program training. The program also

collaborates with several other partners including TSAHC, JP Morgan Chase, Fannie Mae, the Texas Home of Your Own Coalition, and Texas C-BAR to implement the trainings.

- Texas Association of Realtors: In December 2004, the Department entered into a partnership with the Texas Association of Realtors and Fannie Mae to develop an educational outreach campaign to help first time homebuyers access low-cost mortgage financing.
- Texas Homeless Network: TDHCA collaborates with the Texas Homeless Network through TDHCA's work on the Texas Interagency Council on Homelessness to build the capacity of homeless coalitions across the State of Texas, enabling them to become more effective in the communities they serve.
- Texas Loan Star Program: Through a partnership between TDHCA and CitiMortgage, the Texas Loan Star Program provides financing for a market-rate, 30-year first lien mortgage loan for qualifying borrowers residing in the state of Texas. In addition, the program provides financing for closing costs up to 8 percent of the mortgage amount through a 20-year second lien mortgage loan. As little as $500 is required from the borrowers' own funds towards the transaction.

F. Access to Key Resources

Technological

Open source software will continue to have a positive impact on the Department's IT architecture. TDHCA's IS Division has made evaluation of this alternative, which is free of software licensing costs, a standard part of the process of selecting technical products to meet agency operational needs.

Community/Business Resources

There is an existing network of local service providers which represent a substantial community resource. TDHCA will continue to work closely to help support the ongoing efforts of the following types of organizations: community action agencies, community development corporations, PHAs, CHDOs, faith-based organizations, nonprofit and for-profit entities. The dedicated efforts of these organizations allow the State to make the most of limited funding.

Employees' Attitudes and Possibilities for Change

In February of 2008, TDHCA participated in the Survey of Organizational Excellence sponsored by the University of Texas with a response rate of 85 percent. This survey forms the basis of the following observations concerning TDHCA's strengths and weaknesses according to the employees of the Department:

In reviewing the following sections, the following scoring categorizations are useful:

- Scores of 400 or higher indicate areas of substantial strength.
- Scores above 300 indicate employees perceive the issue more positively than negatively.

- Scores below 300 indicate employees perceive the issue more negatively than positively.
- Scores below 200 indicate areas of concern for the Department. They should receive immediate attention. No items in the TDHCA survey scored below the 200 range.

In comparison to the 2005 Survey or Organizational Excellence the Department scores improved. The chart below shows the comparison of scores for 2005 versus 2008. All the scores increased in 2008 with the exception of one score that remained the same.

Score Legend

♦	5 highest scores
◊	5 lowest scores

CONS#	CONSTRUCT NAME	SCORE 2005	SCORE 2008	POINTS DEVIATED
1	Supervisor Effectiveness	◊ 330	◊ 348	+18
2	Fairness	343	362	+19
3	Team Effectiveness	◊ 327	◊ 345	+18
4	Diversity	342	364	+22
5	Fair Pay	◊ 274	◊ 302	+28
6	Physical Environment	♦ 377	♦ 377	Same
7	Benefits	359	373	+14
8	Employment Development	352	♦ 377	+25
9	Change Oriented	◊ 334	◊ 348	+14
10	Goal Oriented	346	362	+16
11	Holographic	343	353	+10
12	Strategic	♦ 384	♦ 386	+2
13	Quality	♦ 375	♦ 388	+13
14	Internal	◊ 326	◊ 333	+7
15	Availability	♦ 369	373	+4
16	External	♦ 373	♦ 376	+3
17	Job Satisfaction	362	367	+5
18	Time and Stress	356	368	+12
19	Burnout	358	368	+10
20	Empowerment	351	362	+11

Areas of Strength

The Department's strengths lie in the perception employees have according to the following: Qualify, Strategic, Physical Environment, Employee Development, and External. They are discussed below in the order of scores received, from highest to lowest.

- ***Quality (388):*** Describes the degree to which the quality principles, such as customer service and continuous improvement are a part of the organizational culture.
- ***Strategic (386):*** This reflects employees' thinking about how the Department's Strategic Orientation culture responds to external influences that should a play a role in defining the mission, vision, services and products. This implies the ability of the Department to seek out and work with relevant external entities.
- ***Physical Environment (377):*** Describes the employees' perceptions of the total work atmosphere and the degree to which employees believe it is a "safe" working

environment. This category addresses the "feel" of the workplace as perceived by the employee.

Note: The surveying effort occurred after the Department's move to a new building with substantially different working environment and parking situation.

- ***Employee Development: (377)*** This category is an assessment of the priority given to employee's personal and job growth. It provides insight into whether the culture of the organization sees human resources as the most important resource or as one of many resources. It directly addresses the degree to which the organization is seeking to maximize gains from investment in employees.
- ***External (376):*** This category looks at how information flows into the Department from external sources, and conversely, how information flows from inside the organization to external constituents. It addresses the ability of Department staff to synthesize and apply external information to work performed by the Department.

Areas of Concern

Areas where TDHCA did not score as high were Fair Pay, Internal Communication, Team Effectiveness, Supervisor Effectiveness, and Change Orientation issues as described below from lowest score to highest scores. While Fair Pay is the lowest score, it is still viewed as more positive than negative.

- ***Fair Pay (302)***: Fair Pay is a common negative perception across most, if not all, state agencies. This category addresses perceptions of the overall compensation package offered by the Department. It describes how well the compensation package "holds up" when employees compare it to similar jobs in other organizations.
- ***Internal (333):*** This captures the flow of communication within the Department from the top down, bottom up, and across divisions. It addresses the extent to which communication exchanges are open and candid and move the Department toward goal achievement.
- ***Team Effectiveness (345):*** This describes employees' perceptions of the people within the Department with whom they work on a daily basis to accomplish their jobs (the work group or team). Also, it gathers data about how effective employees think their work group is as well as the extent to which the Department's environment supports cooperation among employees.
- ***Supervisor Effectiveness (348):*** This category provides insight into the nature of supervisory relationships in the Department, including the quality of communications, leadership, thoroughness, and fairness that employees perceive exists between supervisors and them. This category helps organizational leaders determine the extent to which supervisory relationships are a positive element of the organization.
- ***Change Oriented (348)*****:** This category describes employees' perceptions of the Department's capability and readiness to change based on new information and ideas. It also addresses the Department's aptitude to process information timely and to act upon it effectively. Most importantly, it also examines the organization's capacity to draw upon, develop, and utilize the strengths of all in the Department for improvement.

Strategies for Improvement

The Department will continue to capitalize on the information derived from the 2008 Survey of Organizational Excellence.

Improving Areas of Concern

- ***Fair Pay***: While Fair Pay continues to be the lowest scoring category for the Department this category has improved based on the last survey score. There have been many ways the Department has addressed fair pay to include:
    - Review of all pay actions for equity among similar positions.
    - Providing each Division Director with equity reports for the division and an equity report for Department positions.
    - A Department-wide classification audit was conducted by the State Auditor's Office to determine misclassifications for the Department. There were only 8 positions that needed to be reclassified as part of this audit. The Department requires that employee classifications be reviewed during each employee annual performance review to ensure that position classifications are appropriate.
    - The Department participated in a National Housing Organization Compensation Survey. This survey allows the Department to review salaries of other similar positions in comparison to Department salaries.

Enhancing Strengths

- The Department is committed to instilling a culture of diversity, transparency, professionalism, and integrity. The Department will continue to analyze organizational development through review of program organizational structure to ensure that processes and program goals and objectives are being met with the most streamlined measures and are functioning effectively and efficiently.
- The Department will continue to have open communications with staff and will promote an environment that allows employees to improve their skills and abilities through continuing education, external training, in-house training, and other training resources as needed.

TDHCA GOALS, OBJECTIVES, AND STRATEGIES AND THE ASSOCIATED OUTCOME, EFFICIENCY, EXPLANATORY, AND OUTPUT MEASURES

Goal 1.
To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families.

Objective 1.
Make loans, grants, and incentives available to fund eligible housing activities and preserve/create single and multifamily units for very low, low, and moderate income households.

Outcome Measures
1. Percent of Households/Individuals of Very Low, Low, and Moderate Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance
2. Percent of Households/Individuals of Very Low Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance
3. Percent of Households/Individuals of Low Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance
4. Percent of Households/Individuals of Moderate Income Needing Affordable Housing That Subsequently Receive Housing or Housing-related Assistance
5. Percent of Multifamily Rental Units Benefiting Very Low, Low and Moderate Income Households
6. Percent of Single Family Finance Division Funding for Affordable Housing Assistance that is Allocated within Established Time Frames
7. Percent of Multifamily Finance Division Funding for Affordable Housing Assistance that is Allocated within Established Time Frames

Strategy 1.
Provide federal mortgage loans, through the department's Mortgage Revenue Bond (MRB) Program, which are below the conventional market interest rates to very low, low, and moderate income homebuyers.

Efficiency Measures
1. Average Loan Amount per Household Assisted through the First Time Homebuyer Program
2. Average Loan Amount per Household Assisted through the Down Payment Assistance Program
3. Average Loan/Grant Amount per Household Assisted with New Construction Activities
4. Average Loan/Grant Amount per Household Assisted with Rehabilitation Activities
5. Average Amount per Household Assisted the Mortgage Credit Certificate Program

Explanatory Measures
1. Number of Households Assisted through the First Time Homebuyer Program
2. Number of Households Assisted through the Down Payment Assistance Program
3. Number of Households Assisted through New Construction Activities
4. Number of Households Assisted through Rehabilitation Activities
5. Number of Households Assisted through the Mortgage Credit Certificate Program

Output Measures
1. Number of Households Assisted with Single Family Mortgage Revenue Bond Funds

Strategy 2.
Provide federal housing loans and grants through the HOME Investment Partnership (HOME) Program for very low and low income families, focusing on the construction of single family housing in rural areas of the state through partnerships with the private sector.

Efficiency Measures
1. Average Amount per Household for New Construction Activities
2. Average Amount per Household for Rehabilitation Activities
3. Average Amount per Household Assisted with CHDO Mortgage Financing and Homebuyer Assistance Funds
4. Average Amount per Household Assisted with Non-CHDO Mortgage Financing and Homebuyer Assistance Funds
5. Average Amount per Household Receiving Tenant-based Rental Assistance

Explanatory Measures
1. Number of Households Assisted through New Construction Activities
2. Number of Households Assisted through Rehabilitation Activities
3. Number of Households Assisted through CHDO Mortgage Financing/Homebuyer Assistance
4. Number of Households Assisted through Non-CHDO Mortgage Financing/Homebuyer Assist
5. Number of Households Assisted through Tenant-based Rental Assistance

Output Measures
1. Number of Households Assisted with Single Family HOME Funds

Strategy 3.
Provide state housing loans and grants through the HTF for very low and low income households.

Efficiency Measures
1. Average Amount per Household for New Construction Activities
2. Average Amount per Household for Rehabilitation Activities

Explanatory Measures
1. Number of Households Assisted through New Construction Activities
2. Number of Households Assisted through Rehabilitation Activities

Output Measures
1. Number of Households Assisted through the Single Family HTF Program

Strategy 4.
Provide federal rental assistance through Section 8 certificates and vouchers for very low income households.

Efficiency Measures
1. Average Amount Tenant-based Rental Assistance per Household

Output Measures
1. Number of Households Assisted through Statewide Housing Assistance Payments Program

Strategy 5.
Provide federal tax credits to develop rental housing for very low and low income households.

Efficiency Measures
1. Average Amount of Credits per Household for New Construction Activities
2. Average Total Development Costs per Household for New Construction Activities
3. Average Amount of Credits per Household for Rehabilitation Activities
4. Average Total Development Costs per Household for Rehabilitation Activities

Explanatory Measures
1. Number of Households Assisted through New Construction Activities
2. Number of Households Assisted through Rehabilitation Activities

Output Measures
1. Number of Households Assisted through the HTC Program

Strategy 6.
Provide federal housing loans and grants through the HOME Investment Partnership (HOME) Program for very low and low income families, focusing on the construction of multifamily housing units in rural areas of the state through partnerships the private sector.

Efficiency Measures
1. Average Amount per Household for CHDO New Construction Activities
2. Average Total Development Costs per Household for CHDO New Construction Activities
3. Average Amount per Household for Non-CHDO New Construction Activities
4. Average Total Development Costs per Household for Non-CHDO New Construction Activities
5. Average Amount per Household for CHDO Rehabilitation/Acquisition Activities
6. Average Total Development Costs per Household for CHDO Rehabilitation/Acquisition Act
7. Average Amount per Household for Non-CHDO Rehabilitation/Acquisition Activities
8. Average Total Development Costs per Household for Non-CHDO Rehabilitation/Acquisition Activities

Explanatory Measures
1. Number of Households Assisted through CHDO New Construction Activities
2. Number of Households Assisted through Non-CHDO New Construction Activities
3. Number of Households Assisted through CHDO Rehabilitation/Acquisition Activities
4. Number of Households Assisted through Non-CHDO Rehabilitation/Acquisition Activities

Output Measures
1. Number of Households Assisted with Multifamily HOME Funds

Strategy 7.
Provide state housing loans and grants through the HTF for very low and low income households.

Efficiency Measures
1. Average Amount per Household for New Construction Activities
2. Average Total development Costs per Household for New Construction Activities
3. Average Amount per Household for Rehabilitation Activities
4. Average Total Development Costs per Household for Rehabilitation Activities

Explanatory Measures
1. Number of Households Assisted through New Construction Activities
2. Number of Households Assisted through Rehabilitation Activities

Output Measures
1. Number of Households Assisted through the Multifamily HTF Program

Strategy 8.
Provide federal mortgage loans through the department's Mortgage Revenue Bond (MRB) program for the acquisition, restoration, construction and preservation of multifamily rental units for very low, low and moderate income families.

Efficiency Measures
1. Average Amount per Household for New Construction Activities
2. Average Total Development Costs per Household for New Construction Activities
3. Average Amount per Household for Rehabilitation/Acquisition Activities
4. Average Total Development Costs per Household for Rehabilitation Activities

Explanatory Measures
1. Number of Households Assisted through New Construction Activities
2. Number of Households Assisted through Rehabilitation Activities

Output Measures
1. Number of Households Assisted through the Multifamily Mortgage Revenue Bond Program

Goal 2.
Promote improved housing conditions for extremely LI, VLI, and low income households by providing information and technical assistance.

Objective 1.
Provide information and technical assistance regarding affordable housing resources and community support services.

Outcome 1.
Percent of Short Term and Long Term Information and Technical Assistance Requests Fulfilled within Established Time Frames

Strategy 1.
Provide information and technical assistance to the public through the Housing Resource Center

Output Measures
1. Number of Information and Technical Assistance Requests Completed
2. Number of Short Term Information and Technical Assistance Requests Completed
3. Number of Long Term Information and Technical Assistance Requests Completed

Objective 2.
Promote and enhance homeownership opportunities along with the development of safe neighborhoods and effective community services for colonia residents and/or residents of LI, VLI, and ELI along the Texas-Mexico border.

Strategy 1.
Assist colonias, border communities, and non-profits through Department programs, Border Field Offices, and Colonia Self-Help Centers.

Output Measures
1. Number of Technical Assistance Contacts and Visits Conducted by Border Field Offices
2. Number of Colonia Residents Receiving Technical Assistance Annually through the Colonia Field Offices
3. Number of Entities and/or Individuals Receiving Informational Resources

Goal 3.
Improve living conditions for the poor and homeless and reduce cost of home energy for very low income Texans.

Objective 1.
To ease hardships of poverty and homelessness for 16 percent of the population of very low income persons each year.

Outcome Measures
1. Percent of persons in Poverty That Received Homeless and Poverty-related Assistance
2. Percent of Emergency Shelters Assisted
3. Percent of persons Assisted That Achieve Incomes above Poverty Level

Strategy 1.
Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.

Efficiency Measures
1. Average Agency Administrative Cost per person Assisted

Explanatory Measures
1. Total Number of Emergency Shelters
2. Total Number of persons in Poverty

Output Measures

1. Number of persons Assisted through Homeless and Poverty-related Funds
2. Number of persons Assisted That Achieve Incomes above Poverty Level
3. Number of Shelters Assisted

Objective 2.
To reduce cost of home energy for 6 percent of very low income households each year at or below 125 percent of poverty

Outcome 1.
Percent of Very Low Income Households Receiving Energy Assistance

Strategy 1.
Administer state energy assistance programs by providing grants to local organizations for energy related improvements to dwellings occupied by very low income persons and general assistance to very low income households for heating and cooling expenses and energy-related emergencies.

Efficiency Measures
1. Average Cost per Household Served
2. Average Cost per Home Weatherized

Explanatory Measures
1. Number of Very Low Income Households Eligible for Energy Assistance

Output Measures
1. Number of Households Assisted through the Comprehensive Energy Assistance Program
2. Number of Dwelling Units Weatherized by the Department

Goal 4.
Ensure compliance with Department of Housing and Community Affairs federal and state program mandates.

Objective 1.
Administer and monitor housing developments and subrecipient contracts to determine compliance with federal and state program requirements.

Outcome Measures
1. Percent of Multifamily and/or Single Family Rental Properties Monitored Annually
2. Percent of Contracts Administered Annually by the PMC Division
3. Percent of Properties Monitored by the PMC Division that are in Material Non-compliance

Strategy 1.
Monitor and inspect for federal and state housing program requirements.

Efficiency Measures
1. Average Cost to Monitor a Rental Property

Explanatory Measures
1. Total Number of Developments in the Compliance Monitoring Portfolio
2. Total Number of Units Administered

Output Measures
1. Total Number of Monitoring Reviews Conducted
2. Total Number of Desk Reviews Conducted
3. Total Number of Onsite Reviews Conducted
4. Total Number of Information and Technical Assistance Requests Completed
5. Total Number of Application-related Instruments Processed

Strategy 2.
Administer and monitor federal and state subrecipient contracts for programmatic and fiscal requirements.

Efficiency Measures
1. Average Cost to Monitor a Contract

Explanatory Measures
1. Number of Contracts Administered

Output Measures
1. Total Number of Monitoring Reviews Conducted
2. Number of Single Audit Reviews Conducted
3. Total Number of Desk Reviews Conducted
4. Total Number of Onsite Reviews Conducted
5. Total Number of Information and Technical Assistance Requests Completed

Goal 5.
Protect the public by regulating the manufactured housing industry in accordance with state and federal laws.

Objective 1.
Operate a regulatory system to ensure responsive handling of Statement of Ownership and Location and license applications, inspection reports, and complaints as follows: 25 percent installation inspections; 97 percent of applications within established timeframes; and 99 percent of consumer complaint inspections within 30 calendar days of a request.

Outcome Measures
1. Percent of Applications Processed within Established Time Frames
2. Percent of Consumer Complaint Inspections Conducted within 30 Days of Request
3. Percent of Complaints Resulting in Disciplinary Action
4. Percent of Documented Complaints Resolved within Six Months
5. Recidivism Rate for Those Receiving Disciplinary Action

Strategy 1.
Provide services for Statement of Ownership and Location and licensing in a timely and efficient manner.

Efficiency Measures
1. Average Cost per Manufactured Housing Statement of Ownership and Location Issued

Explanatory Measures

1. Number of Manufactured Homes of Record in Texas

Output Measures
1. Number of Manufactured Housing Statements of Ownership and Location Issued
2. Number of Licenses Issued

Strategy 2.
Conduct inspections of manufactured homes in a timely and efficient manner.

Efficiency Measures
1. Average Cost per Inspection

Explanatory Measures
1. Number of Installation Reports Received
2. Number of Installation Inspections with Deviations

Output Measures
1. Number of Routine Installation Inspections Conducted
2. Number of Non-routine Inspections Conducted

Strategy 3.
Process consumer complaints, conduct investigations, and take administrative actions to protect general public and consumers.

Efficiency Measures
1. Average Cost per Complaint Resolved
2. Average Time for Complaint Resolution (Days)

Explanatory Measures
1. Number of Jurisdictional Complaints Received

Output Measures
1. Number of Complaints Resolved

Strategy 4.
Provide for the processing of occupational licenses, registrations, or permit fees through TexasOnline. Estimated and nontransferable.

Goal 6.
Indirect administrative and support costs.

Objective 1.
Indirect administrative and support costs.

Strategies
1. Central administration.
2. Information resource technologies.
3. Operating/support.

TECHNOLOGY INITIATIVE ALIGNMENT

"Technology Initiative Alignment" is the strategic alignment of technology initiatives with agency business needs and priorities. This alignment promotes collaboration between the agency's business and IT leaders, and promotes innovative technology solutions that enable the agency to achieve its objectives. The agency's governance structure guides the creation of technology initiatives to ensure that these initiatives align with the agency's business needs and priorities. Additionally, strategically aligning agency technology initiatives with the statewide technology objectives in the State Strategic Plan (The Texas Transformation) drives economies of scale, increases interoperability among the state's information systems, and promotes interagency collaboration.

TDHCA TECHNOLOGY INITIATIVE ALIGNMENT

TECHNOLOGY INITIATIVE	RELATED AGENCY OBJECTIVE	RE-LATED SSP STRATEGY/ (IES)	STATUS	ANTICIPATED BENEFIT(S)	INNOVATION, BEST PRACTICE, BENCH-MARKING
Improve security policies and practices.	All goals/objectives.	3-1	Planned	Decreases the risk of unintended access to agency information.	Benchmarking: TDHCA will use online DIR IT Security and National Institute of Standards and Technology resources.
Maintain, upgrade, secure, and enhance TDHCA's programmatic and financial systems for managing loans and grants.	Goal/Objective 1-1. Increase Availability of Safe/Decent/Affordable Housing – Make Loans/Grants/Incentives to Fund/Develop/Preserve Housing	3-1 4-2 5-1	Current	Ensures that agency systems for managing loans and grants are in alignment with changing business processes, financial transactions are securely exchanged with the Comptroller's Office and other organizations, and program participants have the ability to report to TDHCA online.	
Redesign TDHCA Web site to provide customers easier access to information.	Goal/Objective 2-1. Provide Information and Assistance – Provide Information and Assistance for Housing and Community Services	4-1 5-1	Current	Provides visitors easier access to information by asking them to select a customer type.	Benchmarking: TDHCA conducted a review of Web sites of other housing finance agencies, Texas state agencies, and businesses.
Host and maintain the Texas Interagency Council for the Homeless Web site.	Goal/Objective 3-1. Improve Poor/Homeless Living Conditions & Reduce VLI Energy Costs – Ease Hardships for 16% of Homeless & Very Low Income Persons Each Year	4-4	Current	Assists the council in fulfilling major functions, including helping coordinate the delivery of services for the homeless in Texas and maintaining a central resource and information center for the homeless.	

Maintain, upgrade, secure, and enhance TDHCA's monitoring systems.	Goal/Objective 4-1. Ensure Compliance with Program Mandates – Monitor Developments & Subrecipient Contracts for Compliance	3-1 5-1	Current	Reduces paper processing through online reporting by property managers; increases efficiency through an enterprise architecture in which common data elements are shared with other agency systems.	
Deploy a new Manufactured Housing System that supports all major MH business functions and provides customers with the ability to retrieve MH information and submit forms and associated payments online.	Goal/Objective 5-1. Regulate Manufactured Housing Industry – Operate a Regulatory System To Ensure Responsive SOL/Licensing/Other	1-3 4-1 5-1	Current	Provides MH customers with increased access and flexibility; reduces data entry required by MH staff.	Best Practice: Use of Texas Online for all online payments.

APPENDIX A. DESCRIPTION OF TDHCA'S PLANNING PROCESS

TDHCA's planning process involves a comprehensive approach that includes cooperation, assessment, analysis, and public input. The agency's planning process is used for activities such as developing or revising a rule, creating required state or federal reporting documents, and establishing long-term planning documents. This process centers around forming agency policies and programs on the basis of reliable data, staff expertise, and informed public input from consumers, advocates, housing providers, and legislative members.

In general, the planning process involves the following steps:
1. review of legislative and/or regulatory requirements,
2. development of a timeline,
3. data collection
4. analysis and policy development,
5. legal and executive review,
6. public comment acceptance and response
7. board review and approval (if appropriate), and
8. implementation.

The development of policy for a planning document is used as an example in the following discussion. The planning process begins with the review of the legislative and/or regulatory requirements by legal staff and the appropriate divisional staff. After the requirements are determined, divisional staff will establish a timeline for the planning process through implementation.

A focused effort is made to collect information required to develop the draft policy. Appropriate staff is consulted for their expertise and to request any required supporting TDHCA data. A round table discussion with members of the public may be held to insure that a variety of viewpoints on the relevant issues are obtained. Relevant demographic, economic, and subjective data is also typically assembled from outside sources. This data is obtained from a wide variety of appropriate sources, such as the US Census, Texas State Data Center, Real Estate Center, surveys, and interviews.

The assembled data are then analyzed and used to develop preliminary policies to address the identified need. These policies are developed to be consistent with the goals, objectives, and performance measures as outlined in the TDHCA Plan and reported to the LBB and the Governor's Office of Budget, Planning, and Policy. After the draft policy has been developed, a document is drafted to communicate it to all stakeholders. The draft is then reviewed by legal and executive staff, and is also approved by the TDHCA Board. Any outstanding issues are resolved, and the document (or a summary of the document) is published in the *Texas Register* for public comment. Announcements about the document and the public comment period are also sent out over the agency's list serve and by any legislatively required means.

While quantifying the housing needs of Texas is vital to the TDHCA planning process, it is also essential to reconcile the data with local needs to establish regional priorities. Because of this, the next phase of planning revolves around dialogue with consumers and interested parties. All data and resulting conclusions are made available to the public followed by public comment periods and public hearings.

In addition to the many special topic hearings held each year, TDHCA holds a set of consolidated public hearings annually (Consolidated Hearings) to cover all aspects of the Department's services and the provision of those services. The Consolidated Hearings are held throughout the state in cities selected to reach all regions of Texas. The hearings ensure that TDHCA customers have direct contact with agency staff. The discussions at the public hearings focus on the state's affordable housing and community service needs, agency programs, and agency policies as outlined in the draft *State of Texas Low Income Housing Plan and Annual Report* and the *State of Texas Consolidated Plan*.

TDHCA strongly encourages public involvement in the agency's policy development process. In addition to public hearings, written comment is accepted by mail and e-mail during the public comment periods. At the close of the public comment period, public input is reviewed and reasoned responses are developed. All public comment, both written comment and the hearing transcripts, is published on the agency website with the reasoned responses.

After all information is compiled, policies developed, and public comment is taken, the planning document is finalized. General agency policies are outlined in the *State of Texas Low Income Housing Plan*. Individual programs may have specific documents that govern their activities (i.e., the Qualified Allocation Plan for the HTC Program).

Where required by statute or the Board, documents are brought before the Department's Board for approval. The Department's Board meets once a month to review funding and policy recommendations and reports. All department policies are brought before the Board and are open for public comment at the meeting. The final document is posted for public review seven days before the meeting. Action is taken on the item by the Board. If approved, the policy will be implemented.

For the programs that are competitive and open to various nonprofit and for-profit entities, the Department holds application and implementation workshops. These workshops are used to inform program customers of the services available from TDHCA, as well as train organizations on the implementation of the programs for which they have successfully applied. These workshops present the public the opportunity to address program policies.

In addition to the planning process for rules, policies, and reports, TDHCA also has additional tools it uses for agency planning. One tool used is performance measurement. Performance measurement allows the agency to review its effectiveness. Agency and program effectiveness feeds into the strategic planning process by showing goals that have been met and by showing areas that need additional attention.

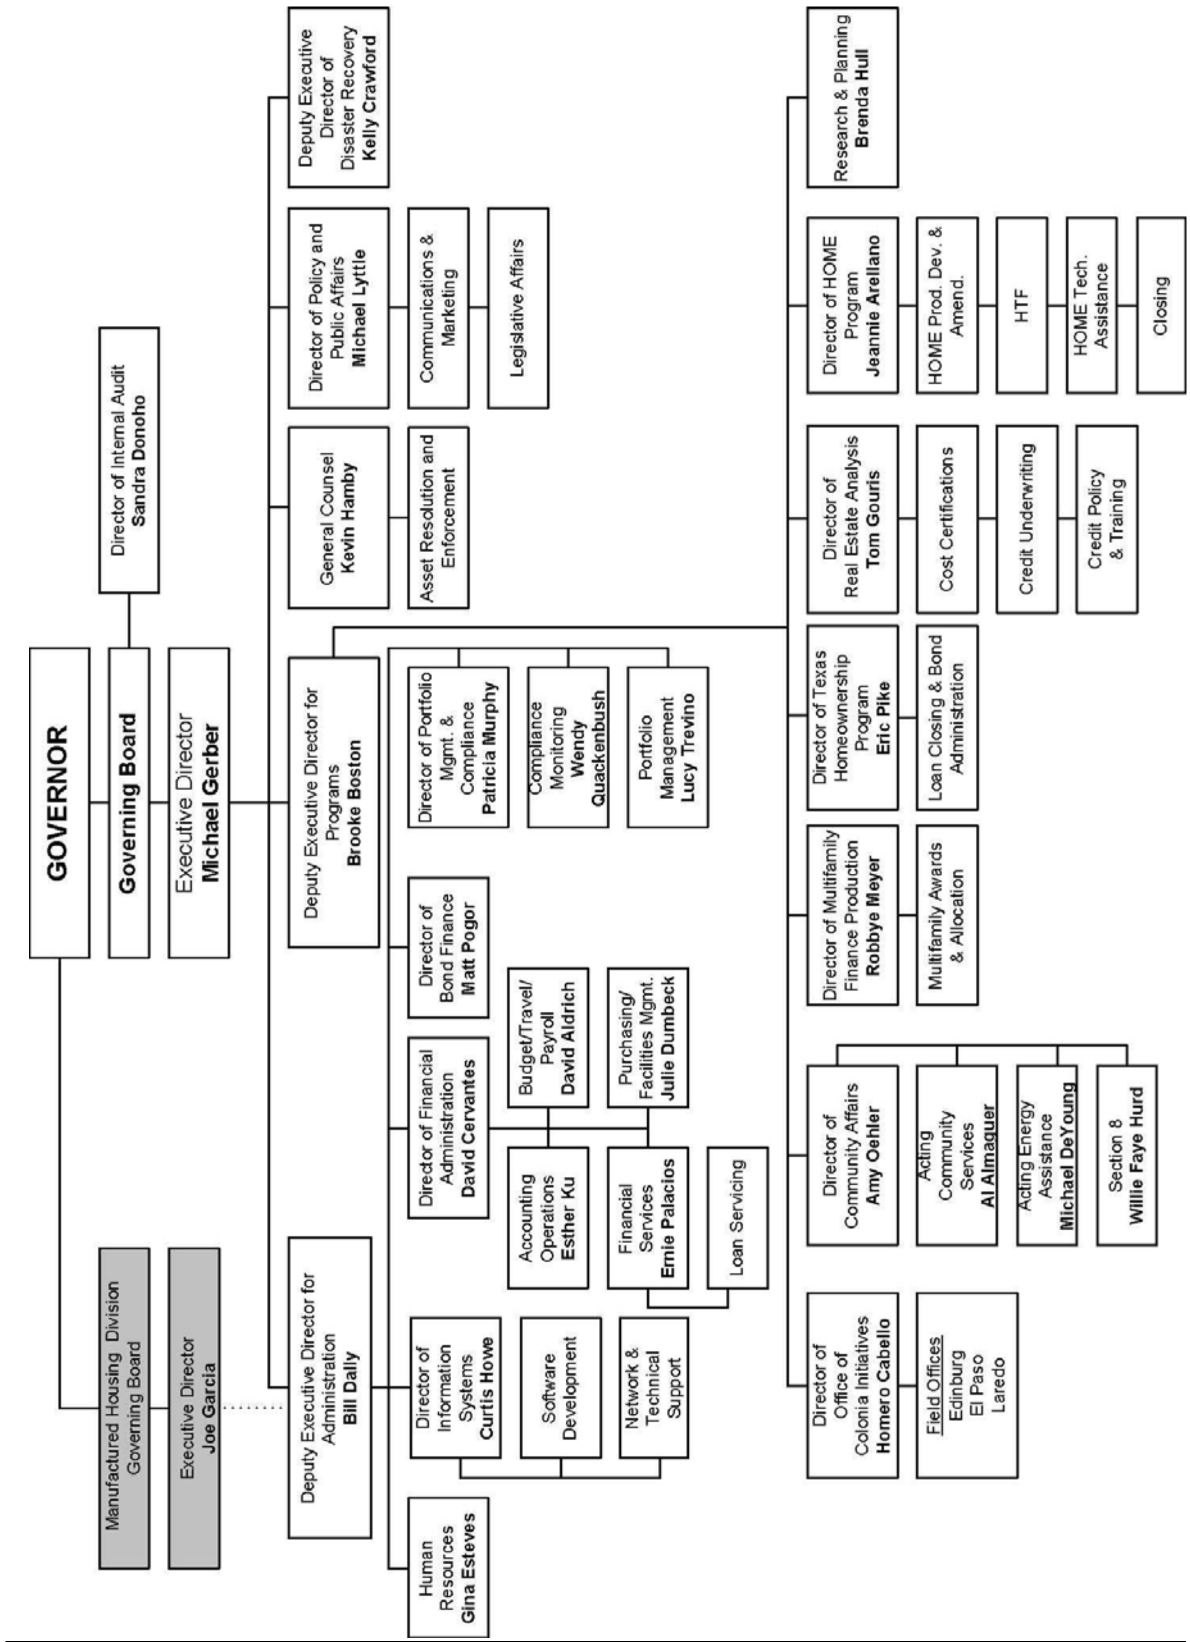
TDHCA also uses the Legislative Appropriations Request as a planning component. Funding by agency strategy allows the agency to express the priorities of the strategic plan in financial terms. Strategies, which are ways to accomplish key objectives, become the basic building blocks for the budgeting and expenditure of state funds. Objectives, strategies, and measures funded in the LAR relate specifically to the primary functions or areas of the agency.

TDHCA has recently implemented a new Strategic Planning Steering Committee (the Committee). The Committee is comprised of senior level staff with experience and expertise in all aspects of the programs and policies of the Department. The goal of the Committee is to provide the Executive team of the Department with recommendations regarding agency-wide short- and long-term planning and policy making decisions. The Committee will also assist in helping to ensure consistency and accuracy in the Department's planning and policy documents. The Committee has been very involved in the development of the 2010-2011 Legislative Appropriations Request, including detailed review of proposed budget structure changes, exceptional items, rider changes, performance measure targets and strategy level budget development. The Committee will continue to review and make recommendations throughout the upcoming planning process including the development of the *State of Texas Consolidated Plan* and the *State of Texas Low Income Housing Plan and Annual Report.*

Finally, TDHCA uses enterprise risk management as part of the agency's planning process. Risk management identifies and measures critical operational, strategic, and environmental risks. The process involves the following steps: identify key processes, identify risks that threaten key processes, rate severity and probability of each risk, and decide what internal controls can be used to avoid/reduce risk. The results of this assessment are then used to implement risk mitigation. This activity is an important component of strategic planning because it helps to clarify the agency's key processes and ensure that they are successfully maintained.

TDHCA continues to work toward a comprehensive approach to planning, focusing on its missions, goals, and objectives, and establishing meaningful performance measures to report its progress toward those goals and objectives.

APPENDIX B. CURRENT ORGANIZATIONAL CHART



APPENDIX C. FIVE-YEAR PROJECTIONS FOR OUTCOMES

Key Outcome Measures are shown in bold.

1 Increase Availability of Safe/Decent/Affordable Housing	2008	2009	2010	2011	2012	2013
1 Make Loans/Grants/Incentives to Fund/Develop/Preserve Housing						
% of Households/Individuals of Very Low, Low, and Moderate Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Assistance	0.74%	0.74%	0.72%	0.71%	0.71%	0.71%
% of Households/Individuals of Very Low Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Assistance	0.26%	0.25%	0.26%	0.26%	0.26%	0.26%
% of Households/Individuals of Low Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Assistance	2.43%	2.39%	2.36%	2.35%	2.35%	2.35%
% of Households/Individuals of Moderate Income Needing Affordable Housing that Subsequently Receive Housing or Housing-Related Assistance	0.16%	0.13%	0.11%	0.11%	0.11%	0.11%
% of Multi-family Rental Units Benefiting Very Low, Low and Moderate Income Households	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
% of Single Family Finance Division Funding for Affordable Housing Assistance that Is Allocated Within Established Time Frames	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
% of Multifamily Finance Division Funding for Affordable Housing Assistance that Is Allocated Within Established Time Frames	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
2 Provide Information and Technical Assistance						
1 Provide Info & Technical Assistance for Housing and Community Services						
% of Short Term and Long Term Information and Technical Assistance Requests Fulfilled Within Established Time Frames	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
3 Improve Poor/Homeless Living Conditions & Reduce VLI Energy Costs						
1 Ease Hardships for 16% of Homeless & Very Low Income Persons Each Year						
% of Persons in Poverty that Received Homeless and Poverty-related Assistance	12.35%	12.38%	12.35%	12.35%	12.35%	12.35%
% of Emergency Shelters Assisted	8.34%	8.23%	8.23%	8.23%	8.23%	8.23%
% of Persons Assisted that Achieve Incomes above Poverty Level	0.08%	0.07%	0.07%	0.07%	0.07%	0.07%
2 Reduce Cost of Home Energy for 6% of Very Low Income Households						
% of Very Low Income Households Receiving Energy Assistance	4.12%	4.11%	3.85%	3.85%	3.85%	3.85%
4 Ensure Compliance with Program Mandates						
1 Monitor Developments and Subrecipient Contracts for Compliance						
% of Multifamily and/or Single Family Rental Properties Monitored Annually	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
% of Contracts Administered Annually by the PMC Division	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
% of Properties Monitored by the PMC Division that Are in Material Non-compliance	10.00%	10.00%	10.00%	10.00%	10.00%	10.00%

5 Regulate Manufactured Housing Industry	2008	2009	2010	2011	2012	2013
1 Operate a Regulatory System Ensure Responsive SOL/Licensing/Other						
% of Applications Processed within Established Time Frames	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
% of Consumer Complaint Inspections Conducted within 30 Days of Request	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%
% of Complaints Resulting in Disciplinary Action	15.00%	15.00%	20.00%	20.00%	20.00%	20.00%
% of Documented Complaints Resolved within Six Months	75.00%	75.00%	75.00%	75.00%	75.00%	75.00%
Recidivism Rate for those Receiving Disciplinary Action	5.00%	5.00%	5.00%	5.00%	5.00%	5.00%

APPENDIX D. LIST OF MEASURE DEFINITIONS

OUTCOME MEASURE DEFINITIONS

1.1.1 Outcome

Definition: The percentage of households/individuals of very low, low, and moderate income that need housing and subsequently receive housing or housing related assistance represents services provided by the Housing Trust program, the HOME program, the Section 8 program, the HTC program, the Single Family Bond program, and the MFB program.

Data Limitations: The Department contracts with local entities to administer it's various housing programs. The intake, eligibility review and actual service is provided at the local level. The reporting of households served is provided by the contracted entity. Reported performance is considered reliable.

Data Source: The number of households served is maintained by each housing program and reported quarterly. Data is entered by staff and maintained in the agency's computer system.

Methodology: The percent of households assisted is based on: (numerator) an actual count of households/individuals using TDHCA's housing programs and (denominator) the most recent census data of Texans who need affordable housing.

Purpose: This measure addresses the extent to which services are provided by all housing programs and calculates the level of service compared to the need. This measure is important because it identifies the total population in need and of that population identifies how many households/individuals the housing programs were able to serve.

1.1.2 Outcome

Definition: The percentage of very low income households receiving housing assistance represents services provided by the Housing Trust program, the HOME program, the Section 8 program, the HTC program, the Single Family Bond program, and the MFB program.

Data Limitations: The Department contracts with local entities to administer it's various housing programs. The intake, eligibility review and actual service is provided at the local level. The reporting of households served is provided by the contracted entity. Reported performance is considered reliable.

Data Source: The number of very low income households served is maintained by each housing program and reported quarterly. Data is entered by staff and maintained in the agency's computer system.

Methodology: The percent of households of very low income served with housing or housing related assistance is based on: (numerator) an actual count of households/individuals using TDHCA's housing programs and (denominator) the most recent census data of very low income Texans who need affordable housing.

Purpose: The measure addresses the extent to which services are provided by all housing programs for very low income and calculates the level of service provided to the very low income population.

1.1.3 Outcome

Definition: The percentage of low income households receiving housing assistance represents services provided by the Housing Trust program, the HOME program, the Section 8 program, the HTC program, the Single Family Bond program, and the MFB program.

Data Limitations: The Department contracts with local entities to administer it's various housing programs. The intake, eligibility review and actual service is provided at the local level. The reporting of households served is provided by the contracted entity. Reported performance is considered reliable.

Data Source: The number of low income households served is maintained by each housing program and reported quarterly. Data is entered by staff and maintained in the agency's computer system.

Methodology: The percent of households of low income served with housing or housing related assistance is based on: (numerator) an actual count of households/individuals using TDHCA's housing programs and (denominator) the most recent census data of low income Texans who need affordable housing.

Purpose: The measure addresses the extent to which services are provided by all housing programs for low income and calculates the level of service provided to the low income population. This measure is important because it identifies, of the number of low income, how many low income households/individuals the housing programs were able to serve.

1.1.4 Outcome

Definition: The percentage of moderate income households receiving housing assistance represents services provided by the Single Family Bond program.

Data Limitations: The Department contracts with a Master Servicer to maintain data of households served. The intake, eligibility review and actual service is provided at the local level. The reporting of households served is provided by the Master Servicer. Reported performance is considered reliable.

Data Source: The number of moderate income households served is maintained by the Single Family Bond program and reported quarterly. Data is provided by the Master Servicer, entered by staff and maintained in the agency's computer system.

Methodology: The percent of households of moderate income served with housing or housing related assistance is based on: (numerator) an actual count of moderate income households/individuals using TDHCA's housing programs and (denominator) the most recent census data of moderate income Texans who need affordable housing.

Purpose: The measure addresses the extent to which services are provided by the Single Family Bond program, which is the only housing program serving the moderate income population. This measure is important because it identifies, of the number of moderate income, how many moderate income households/individuals the Single Family Bond program was able to serve.

1.1.5 Outcome

Definition: Under the multifamily bond programs, developers/borrowers can designate either 20% of the units in each property at 50% area median family income or 40% of the units at 60% area median family income. It is not possible to determine on a projection basis the overall percentage of units within these categories that will be financed in a given year.

Data Limitations: The number of units available for very low and low income households is reported by the project developer. Performance depends on the allocation of volume cap by state lottery conducted by the Texas Bond Review Board.

Data Source: The number of very low and low income households served is maintained by the MFB program and reported quarterly. Data is entered by staff and maintained in the agency's computer system.

Methodology: To calculate the percentage of units financed at the end of the year for any category, divide the number of total units within each category by the number of total units financed.

Purpose: The measure addresses the number of units in a development that have been designated for very low and low income families. This measure is important because it measures how effectively the MFB program has been in providing rental units to very low and low income households/individuals.

1.1.6 Outcome

Definition: This measure tracks the percentage of funds allocated by the single family finance division within established time frames.

Data Limitations: No limitations.

Data Source: The allocation of funds is tracked by the division for each separate program. Data is entered by staff and maintained in the agency's computer system.

Methodology: The percent of funds allocated on time will be based on (numerator) total funds to be allocated by the deadline established for each program and (denominator) the total amount of funds allocated.

Purpose: To ensure that the agency is distributing housing funds from several sources in a timely manner.

1.1.7 Outcome

Definition: This measure that tracks the percentage of funds allocated by the multifamily finance division within established time frames.

Data Limitations: No limitations

Data Source: The allocation of funds is tracked by the division for each separate program. Data is entered by staff and maintained in the agency's computer system.

Methodology: The percent of funds allocated on time will be based on (numerator) total funds allocated by the deadline established for each program and (denominator) the total amount of funds allocated.

Purpose: To ensure that the agency is distributing housing funds from several sources in a timely manner.

2.1.1 Outcome

Definition: This measure tracks the percentage of information and technical assistance requests completed within established time frames by the Center for Housing Research, Planning, and Communications.

Data Limitations: No limitations

Data Source: The receipt and response to requests is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The percent of requests completed on time will be based on (numerator) total requests completed by the deadline established and (denominator) the total amount of requests completed.

Purpose: To ensure that the Department is responding to consumer information and technical assistance requests in a timely manner.

3.1.1 Outcome

Definition: The percentage of very low income persons (persons at or below 125% of poverty) receiving assistance divided by the total number of persons at or below 125% of poverty in Texas. Information on the number of persons assisted is submitted to the Department by subrecipients.

Data Limitations: No limitations of data.

Data Source: The percent of very low income persons (at or below 125% of poverty) that received assistance through all Community Services programs as reported in the monthly performance reports submitted to the Department by subrecipients. Subrecipients track the data manually on a daily basis and submit it to the Department in a monthly performance report.

Methodology: Based on the monthly performance reports submitted by subrecipients, the Department determines the percent of very low income persons served by dividing the total number of low income persons (at or below 125% of poverty) by the total number of persons at or below 125% of poverty in Texas: 4,172,890 as per 2000 US Census. Monthly performance information is entered in the Department's database and maintained by the Department.

Purpose: The measure identifies the percent of the very low income population (persons at or below 125% of poverty) assisted by Community Services programs. This measure is important because it identifies the impact Community Services programs have had on the target population.

3.1.2 Outcome

Definition: The percent of emergency shelters assisted is based on the number of shelters/service providers assisted through ESGP funds during the fiscal year. Each project funded through ESGP subrecipients is counted as a shelter assisted.

Data Limitations: No limitations of data.

Data Source: The total number of shelters is determined by counting the number of shelters/services providers included in the ESGP mailing list maintained by the Community Services section. The Department counts each project funded through ESGP subrecipients as a shelter assisted. The Department tracks this information from contract records.

Methodology: The percent of emergency shelters assisted is based on the number of shelters/service providers assisted through ESGP funds during the fiscal year divided by the number of homeless shelters/service providers that exist in Texas.
Purpose: The measure identifies the percent of all homeless shelters/service providers in Texas that receive assistance in a fiscal year. This measure is important because it indicates how effective the program has been in providing assistance to emergency shelters in the State.

3.1.3 Outcome
Definition: The percent of persons assisted in the CSBG program that achieve incomes above 125% of poverty is the number of persons assisted that achieve incomes above 125% of poverty, and maintain that income level for a minimum of 90 days, divided by the total number of persons at or below 125% of poverty in Texas.
Data Limitations: No limitations.
Data Source: Subrecipients report this information in their monthly performance report The data is entered on the Department's database and maintained by the Department.
Methodology: The percentage of very low income persons (persons at or below 125% of poverty) maintaining that level of income for a minimum of 90 days divided by the total number of persons at or below 125% of poverty in Texas (4,172,890). Information on the number of persons assisted is submitted to the Department by subrecipients.
Purpose: Subrecipients are required to track the number of persons assisted that achieve incomes above 125% of poverty as a result of efforts by the subrecipients.

3.2.1 Outcome
Definition: The percentage of very low income households receiving energy assistance represents all Energy Assistance programs. Information on the number of households assisted is submitted to the Department by subrecipients.
Data Limitations: No limitations of data.
Data Source: The percent of very low income households that received energy assistance through all Energy Assistance programs is based on data reported in the Monthly Funding Financial Performance Reports and the Progress Expenditure/Monthly Fund Request Reports. According to the publication entitled "LIHEAP Home Energy Notebook for Fiscal Year 2001", issued April 7, 2003 to LIHEAP grantees by the Office of Community Services of the US Department of Health and Human Services, the number of income-eligible households for Texas is 1,324,059.
Methodology: The data is entered in an automated system and maintained by the Department. The percent of very low income households receiving energy assistance is calculated by dividing the number of very low income households receiving CEAP or WAP assistance by the most current census data representing the number of households at or below 125% of poverty in Texas (1,324,059 income-eligible households).
Purpose: The measure identifies the percent of the very low income population assisted by Energy Assistance programs. This measure indicates how effectively the Department has provided energy related services to the target population and the impact of the programs statewide.

4.1.1 Outcome

Definition: Measure represents the percentage of HTC (HTC), Affordable Housing Disposition, HOME, Tax-Exempt Bond, HTF, and other affordable housing rental projects monitored annually through on-site, in-depth, or desk reviews of tenant files. Onsite reviews also include a property and unit inspection.

Data Limitations: No limitations of data.

Data Source: Projects are monitored through on-site, in-depth, or desk reviews. Data is gathered from Departmental databases.

Methodology: The percent is derived by dividing the actual number of rental projects monitored by the total number of rental projects required to be monitored in the TDHCA Compliance portfolio.

Purpose: The Compliance section was formed to address long term compliance responsibilities of the various housing programs administered by TDHCA. The measure is important because it identifies the percent of projects monitored. Each program dictates the frequency and type of monitoring.

4.1.2 Outcome

Definition: The percent of contracts administered by PMC. Administration means ongoing contract administration activities and/or compliance monitoring reviews.

Data Limitations: No limitations

Data Source: Contracts are tracked through Department databases.

Methodology: The percent is derived by dividing the actual number of contracts administered by the number of contracts required to be administered in the contract portfolio.

Purpose: This measure identifies the percentage of contracts administered by PMC.

4.1.3 Outcome

Definition: Measure represents the percentage of HTC (HTC), Affordable Housing Disposition, HOME, Tax-Exempt Bond, HTF, and other affordable housing rental developments monitored that are determined to be in material non-compliance. Material non-compliance is identified through on-site monitoring reviews and in-depth desk reviews.

Data Limitations: No limitations.

Data Source: Information is tracked in Departmental databases.

Methodology: The percent is derived by dividing the total number of rental developments in material non-compliance by the number of rental developments monitored.

Purpose: This measure will report the developments that are in "material non-compliance" status.

5.1.1 Outcome

Definition: The percentage of Statement of Ownership & Location (SOL) and License applications processed within established time frames as opposed to those that are not.

Data Limitations: No limitations of data.

Data Source: Both the Statement of Ownership & Location and Licensing functional areas of the Manufactured Housing Division review a random selection of 25 or more applications (per month) within a reporting period.

Methodology: To obtain the percentage, divide the number of applications that are processed within the required time frame by the total number reviewed by random selection. The percentage is attained by combining the results of the SOL and Licensing functional areas. Information is manually prepared.

Purpose: Applications are processed within established time frames. The time frame for SOL applications is 10 working days; the time frame for Licensing applications is 7 working days. The importance is to measure the ability of the agency to process applications in a timely manner.

5.1.2 Outcome

Definition: The percentage of consumer complaint inspections conducted within 30 days is based on the number of consumer and industry requested inspections completed within 30 calendar days from the date that an inspection is requested.

Data Limitations: No limitations of data.

Data Source: Information is maintained in the Consumer Complaint Tracking System (CCTS).

Methodology: To obtain the percentage, divide the total number of inspections conducted within the required 30 calendar days by the total number of required inspections conducted within the reporting period.

Purpose: Consumer complaints must be addressed as required by the Act. The importance is to measure the ability of the agency to conduct consumer complaint inspections in a timely manner and to comply with the requirements set forth in the Act.

5.1.3 Outcome

Definition: The percentage of complaints that result in disciplinary action, including agreed orders, reprimands, warnings, suspensions, probation, revocation, restitution and/or penalties on which the board or executive director has acted when violations cannot be resolved informally.

Data Limitations: No limitations of data.

Data Source: Information is maintained in the Consumer Complaint Tracking System (CCTS).

Methodology: To obtain the percentage, divide the number of closed complaints with a disciplinary action by the total number of jurisdictional complaints closed.

Purpose: Efforts are made to informally resolve complaints. Violations of manufactured housing standards that cannot be resolved result in disciplinary actions. It is important that the consumers and the manufactured housing industry have an expectation that the agency will ensure fair and effective enforcement of the Act.

5.1.4 Outcome

Definition: The percentage of complaints resolved within a period of 6 months (183 days) or less from the date of receipt as opposed to complaints which take longer than six months to resolve.

Data Limitations: No limitations of data.

Data Source: Information is maintained in the Consumer Complaint Tracking System (CCTS).

Methodology: The number of jurisdictional complaints resolved within a period of six months (183 days) or less from the date of receipt divided by the total number of jurisdictional complaints resolved.

Purpose: Of the number of complaints resolved, the measure identifies those complaints that have been resolved within six months. It is important to ensure the timely enforcement of the Act, which is an agency goal.

5.1.5 Outcome

Definition: The recidivism rate for those receiving disciplinary action is the percentage of offenders who were repeat offenders during the most recent three-year period. A repeat offender is an individual or license holder with two or more disciplinary actions taken by the executive director or board within the current and preceding two fiscal years.

Data Limitations: No limitations of data.

Data Source: Information is maintained in the Consumer Complaint Tracking System (CCTS).

Methodology: To obtain the percentage, calculate the number of individuals or license holders against whom two or more disciplinary actions were taken by the executive director or board within the current and preceding two fiscal years divided by the total number of individuals or license holders receiving disciplinary actions within the current and preceding two fiscal years.

Purpose: The measure is intended to show how effectively the agency enforces its regulatory requirements and prohibitions. It is important that the agency enforce its act and rules strictly enough to ensure that consumers are protected from unsafe, incompetent and unethical practices by the license holder.

OUTCOME, EFFICIENCY, AND EXPLANATORY MEASURE DEFINITIONS

1.1.1.1 Efficiency

Definition: A measure that tracks the average First Time Homebuyer Program loan without down payment assistance amount per household assisted.

Data Limitations: No limitations

Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The total amount of the loans will be summed and divided by the corresponding number of households.

Purpose: This measure identifies the costs and efficiency of loans without down payment assistance made through the First Time Homebuyer Program.

1.1.1.2 Efficiency

Definition: A measure that tracks the average First Time Homebuyer loan with down payment assistance per household assisted.

Data Limitations: No limitations

Data Source: The number and amounts of the loans are tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The total dollar amount of loans will be summed and divided by the corresponding number of loans.

Purpose: This measure identifies the costs and efficiency of loans with down payment assistance made through the First Time Homebuyer Program.

1.1.1.3 Efficiency

Definition: A measure that tracks the average amount of loans/grants for new construction utilizing single family bond funds.

Data Limitations: No limitations

Data Source: The numbers and amounts of the loans/grants are tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The total dollar amount of loans/grants for new construction utilizing single family bond funds will be summed and divided by the projected number of households assisted through new construction utilizing single family bond funds.

Purpose: This measure identifies the costs associated with new construction utilizing single family bond funds.

1.1.1.4 Efficiency

Definition: A measure that tracks the average amount of loans/grants for rehabilitation utilizing single family bond funds.

Data Limitations: No limitations

Data Source: The numbers and amounts of the loans/grants are tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The total dollar amount of loans/grants for rehabilitation utilizing single family bond funds will be summed and divided by the projected number of households assisted through rehabilitation utilizing single family bond funds.

Purpose: This measure identifies the costs associated with rehabilitation utilizing single family bond funds.

1.1.1.5 Efficiency

Definition: A measure that tracks the average Mortgage Credit Certificate (MCC) amount.

Data Limitations: There are no data limitations.

Data Source: The numbers and amounts of the MCCs are tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The total dollar amount of the MCCs will be summed and divided by the number of MCCs.

Purpose: This measure identifies the cost and efficiency of MCCs.

1.1.1.1 Explanatory
Definition: A measure that tracks the number of households receiving loans without down payment assistance through the First Time Homebuyer Program.
Data Limitations: No Limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of loans without down payment assistance funded through the First Time Homebuyer Program.
Purpose: To track the amount households receiving loans without down payment assistance through the First Time Homebuyer Program.

1.1.1.2 Explanatory
Definition: A measure that tracks the number of households receiving loans with down payment assistance through the First Time Homebuyer Program.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of loans with down payment assistance funded through the First Time Homebuyer Program. Performance is measured when loans are funded.
Purpose: To track the number of households receiving loans with down payment assistance through the First Time Homebuyer Program.

1.1.1.3 Explanatory
Definition: A measure that tracks the projected number of households assisted utilizing single family bond program funds for new construction.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of projected households assisted through new construction utilizing single family bond funds. Performance is measured when loans are funded.
Purpose: To track the amount of households assisted through new construction activities utilizing single family bond funds.

1.1.1.4 Explanatory
Definition: A measure that tracks the projected number of households assisted through rehabilitation utilizing single family bond funds.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The number will be a count of projected households assisted through rehabilitation utilizing single family bond funds. Performance is measured when loans are funded.
Purpose: To track the number of households assisted through rehabilitation activities utilizing single family bond funds.

1.1.1.5 Explanatory
Definition: A measure that tracks the number of Mortgage Credit Certificates (MCCs).
Data Limitations: There are no data limitations.
Data Source: The number of MCCs is tracked by the Single Family Finance Production Division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of the issued MCCs.
Purpose: This measure identifies the number of households receiving MCCs.

1.1.1.1 Output
Definition: A measure that tracks the projected number of households assisted with single family mortgage revenue bond funds.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of projected households assisted through the single family bond funds. Performance is measured when loans are funded.
Purpose: To track the total number of households assisted with single family mortgage revenue bond funds.

1.1.2.1 Efficiency
Definition: A measure that tracks the average amount per unit of single family HOME grants for new construction.
Data Limitations: No limitations
Data Source: The number and amounts of the grants are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The total dollar amount of new construction activities utilizing HOME funds will be totaled and divided by the projected number of units assisted through new construction utilizing HOME funds.
Purpose: This measure identifies the costs associated with new construction activities utilizing HOME funds.

1.1.2.2 Efficiency
Definition: A measure that tracks the average amount per household of loans/grants for rehabilitation utilizing single family HOME funds.
Data Limitations: No limitations
Data Source: The numbers and amounts of the loans/grants are tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The total dollar amount of rehabilitation utilizing HOME funds will be summed and divided by the projected number of households assisted through rehabilitation utilizing HOME funds.
Purpose: This measure identifies the costs associated with rehabilitation utilizing HOME funds.

1.1.2.3 Efficiency
Definition: A measure that tracks the average amount per household of mortgage financing and homebuyer assistance grants utilizing single family HOME CHDO funds.
Data Limitations: No limitations
Data Source: The amounts of the financing and grants and number of units are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The total dollar amount of mortgage financing and homebuyer assistance funds awarded utilizing HOME CHDO funds will be summed and divided by the projected number of units assisted through financing and homebuyer assistance activities.
Purpose: This measure identifies the costs associated with financing affordable housing utilizing HOME CHDO funds.

1.1.2.4 Efficiency
Definition: A measure that tracks the average amount per household of homebuyer assistance loans and/or grants utilizing single family HOME non-CHDO funds.
Data Limitations: No limitations
Data Source: The number and amounts of the loans/grants are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The total dollar amount of homebuyer assistance loans/grants utilizing HOME non-CHDO funds will be summed and divided by the projected number of households assisted through homebuyer assistance activities.
Purpose: This measure identifies the costs associated with financing affordable housing and measures the efficiency of allocating HOME non-CHDO funds.

1.1.2.5 Efficiency
Definition: A measure that tracks the average amount per household of tenant based rental assistance utilizing HOME funds.
Data Limitations: No limitations
Data Source: The numbers and amounts are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The total dollar amount of tenant based rental assistance utilizing HOME funds will be summed and divided by the projected number of households assisted through tenant based rental assistance utilizing HOME funds.
Purpose: This measure identifies the costs associated with tenant based rental assistance utilizing HOME funds.

1.1.2.1 Explanatory

Definition: A measure that tracks the projected number of households assisted utilizing single family HOME funds for new construction.

Data Limitations: No limitations

Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The number will be a count of projected households assisted utilizing HOME funds for new construction. Performance is measured when contracts are awarded.

Purpose: To track the number of households assisted utilizing HOME funds for new construction.

1.1.2.2 Explanatory

Definition: A measure that tracks the projected number of households assisted through single family HOME funds for rehabilitation.

Data Limitations: No limitations

Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The number will be a count of projected households assisted through HOME funds for rehabilitation. Performance is measured when contracts are awarded or loans are funded.

Purpose: To track the number of households assisted through HOME funds for rehabilitation.

1.1.2.3 Explanatory

Definition: A measure that tracks the projected number of households assisted through single family HOME CHDO funds for mortgage financing and homebuyer assistance.

Data Limitations: No limitations

Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The number will be a count of projected households assisted through HOME CHDO funds for mortgage financing and homebuyer assistance. Performance is measured when contracts are awarded.

Purpose: To track the number of households assisted through HOME CHDO funds for mortgage financing and homebuyer assistance.

1.1.2.4 Explanatory

Definition: A measure that tracks the projected number of households assisted through single family HOME non-Community Development Housing Organization (non-CHDO) funds for homebuyer assistance.

Data Limitations: No limitations

Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The number will be a count of projected households assisted through HOME non-CHDO funds for financing and homebuyer assistance. Performance is measured when contracts are awarded.
Purpose: To track the number of households assisted through HOME non-CHDO funds for homebuyer assistance.

1.1.2.5 Explanatory
Definition: A measure that tracks the projected number of households assisted through HOME tenant based rental assistance.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of projected households assisted through HOME tenant based rental assistance. Performance is measured when contracts are awarded.
Purpose: To track the number of households assisted through HOME tenant based rental assistance.

1.1.2.1 Output
Definition: A measure that tracks the projected number of households assisted through HOME funds in the single family finance division.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of projected households assisted through HOME funds. Performance is measured when contracts are awarded.
Purpose: To track the amount of households assisted through single family HOME funds.

1.1.3.1 Efficiency
Definition: A measure that tracks the average amount per unit of loans/grants for new construction utilizing the HTF.
Data Limitations: No limitations
Data Source: The numbers and amounts of the loans/grants are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The total dollar amount of loans/grants for new construction utilizing the HTF will be summed and divided by the projected number of households assisted through new construction utilizing the HTF.
Purpose: This measure identifies the costs associated with new construction utilizing the HTF.

1.1.3.2 Efficiency
Definition: A measure that tracks the average amount per unit of loans/grants for rehabilitation utilizing the HTF.
Data Limitations: No limitations

Data Source: The numbers and amounts of the loans/grants are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The total dollar amount of loans/grants for rehabilitation utilizing the HTF will be summed and divided by the projected number of households assisted through rehabilitation utilizing the HTF.
Purpose: This measure identifies the costs associated with rehabilitation utilizing the HTF.

1.1.3.1 Explanatory
Definition: A measure that tracks the projected number of households assisted through new construction utilizing the HTF.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of projected households assisted through new construction utilizing the HTF. Performance is measured when loans are funded.
Purpose: To track the number of households assisted through new construction utilizing the HTF.

1.1.3.2 Explanatory
Definition: A measure that tracks the projected number of households assisted through rehabilitation utilizing the HTF.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of projected households assisted through rehabilitation utilizing the HTF. Performance is measured when loans are funded.
Purpose: To track the number of households assisted through rehabilitation utilizing the HTF.

1.1.3.1 Output
Definition: A measure that tracks the projected number of households assisted through the HTF in the single family finance division.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number will be a count of projected households assisted through HTF funds. Performance is measured when loans are funded.
Purpose: To track the amount of households assisted through single family HTF funds.

1.1.4.1 Efficiency
Definition: The average cost per household served represents an average of the local operators payments and TDHCA administrative expenditures.
Data Limitations: No limitations

Data Source: Expenditures are tracked through the Department's financial automated system.

Methodology: The average cost per household served is the sum of local operators payments and TDHCA administrative expenditures divided by the total number of contracts executed and managed, i.e., total new and renewed contracts added to the number of contracts in place September 1.

Purpose: The measure identifies the efficiency in costs to provide Section 8 services to a very low income household.

1.1.4.1 Output

Definition: The number of very low income households receiving rent supplements represents the total number of households participating in the Section 8 certificate program and the Housing Choice Voucher program.

Data Limitations: No limitations

Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The number will be a count of projected households assisted through Section 8 tenant based rental assistance. The performance figure reported for the first quarter represents the total number of households receiving Section 8 assistance as of September 1. Subsequent quarters report only new contracts executed for the reporting period.

Purpose: To track the amount of households assisted through Section 8 tenant based rental assistance.

1.1.5.1 Efficiency

Definition: A measure that tracks the projected average amount of credits per low income unit of new construction utilizing the HTC program.

Data Limitations: Federal regulations establish the amount of tax credits available.

Data Source: The projected number of low income units and amount of credits for new construction is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: This figure will be calculated by dividing the sum of total new construction tax credits awarded by the number of restricted units to be newly constructed. This calculation will include both 9% and 4% Housing Tax Credit awards. 9% credit activity will be considered at the time the Board approves the award. 4% credit activity will be considered at the time the bond transaction closes. At the close of the fiscal year, this data will be updated to accurately reflect any awards that will not actually be utilized do to problems with the transaction.

Purpose: This measure identifies the subsidy associated with developing affordable housing units and measures the efficiency of allocating tax credits.

1.1.5.2 Efficiency

Definition: A measure that tracks the average total development costs per unit of new construction utilizing the HTC program.

Data Limitations: Information is based on preliminary estimates by the applicants.

Data Source: The projected total number of units in the development and total development costs for new construction is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of total new construction development costs by the number of restricted units to be newly constructed. This calculation will include both 9% and 4% Housing Tax Credit awards. 9% credit activity will be considered at the time the Board approves the award. 4% credit activity will be considered at the time the bond transaction closes. At the close of the fiscal year, this data will be updated to accurately reflect any awards that will not actually be utilized do to problems with the transaction.
Purpose: This measure identifies the total development costs associated with developing affordable housing units. Although useful to track, this measure is outside of the Department's control.

1.1.5.3 Efficiency
Definition: A measure that tracks the projected average amount of credits per rehabilitated and acquired low income unit utilizing HTCs.
Data Limitations: Federal regulations establish the amount of tax credits available.
Data Source: The projected number of low income units and amount of credits for rehabilitation and acquisition is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of total annual rehabilitation tax credits awarded by the number of restricted units to be rehabilitated. This calculation will include both 9% and 4% Housing Tax Credit awards. 9% credit activity will be considered at the time the Board approves the award. 4% credit activity will be considered at the time the bond transaction closes. At the close of the fiscal year, this data will be updated to accurately reflect any awards that will not actually be utilized do to problems with the transaction.
Purpose: This measure identifies the subsidy associated with rehabilitating and acquiring affordable housing and measures the efficiency of allocating tax credits.

1.1.5.4 Efficiency
Definition: A measure that tracks the average total development costs per rehabilitated and acquired unit utilizing HTCs.
Data Limitations: Information is based on preliminary estimates by the applicants.
Data Source: The total development costs and the projected total number of units in the development is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of total rehabilitation development costs by the number of restricted units to be rehabilitated. This calculation will include both 9% and 4% Housing Tax Credit awards. 9% credit activity will be considered at the time the Board approves the award. 4% credit activity will be considered at the time the bond transaction closes. At the close of the fiscal year, this data will be updated to

accurately reflect any awards that will not actually be utilized do to problems with the transaction.
Purpose: This measure identifies the total development costs associated with rehabilitating and acquiring affordable housing.

1.1.5.1 Explanatory
Definition: A measure that tracks the projected number of low income new construction units assisted through the HTC program.
Data Limitations: Federal regulations establish the amount of tax credits available.
Data Source: The projected number of units is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all units to be newly constructed as proposed in awarded applications. This calculation will include both 9% and 4% Housing Tax Credit awards. 9% credit activity will be considered at the time the Board approves the award. 4% credit activity will be considered at the time the bond transaction closes. At the close of the fiscal year, this data will be updated to accurately reflect any awards that will not actually be utilized do to problems with the transaction.
Purpose: To track the number of new construction units assisted through the HTC program.

1.1.5.2 Explanatory
Definition: A measure that tracks the projected number of low income rehabilitation and acquisition units assisted through the HTC program.
Data Limitations: Federal regulations establish the amount of tax credits available.
Data Source: The projected number of units is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all units to be rehabilitated as proposed in awarded applications. This calculation will include both 9% and 4% Housing Tax Credit awards. 9% credit activity will be considered at the time the Board approves the award. 4% credit activity will be considered at the time the bond transaction closes. At the close of the fiscal year, this data will be updated to accurately reflect any awards that will not actually be utilized do to problems with the transaction.
Purpose: To track the number of rehabilitation and acquisition units assisted through the HTC program.

1.1.5.1 Output
Definition: A measure that tracks the projected number of low income units financed through the multifamily division utilizing HTCs.
Data Limitations: No limitations
Data Source: The number of units is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all units to be newly constructed or rehabilitated as proposed in awarded applications. This calculation will include both 9% and 4% Housing Tax Credit awards. 9% credit activity will be considered at the time the Board approves the award. 4% credit activity will be considered at the time the bond transaction

closes. At the close of the fiscal year, this data will be updated to accurately reflect any awards that will not actually be utilized do to problems with the transaction.
Purpose: To track the total amount of multifamily units assisted utilizing the HTC program.

1.1.6.1 Efficiency
Definition: A measure that tracks the projected average amount or loans/grants per low income unit of new construction utilizing HOME CHDO funds.
Data Limitations: No limitations
Data Source: The projected number of low income units and amount of funds utilized for new construction is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The total dollar amount of new construction assistance utilizing HOME CHDO funds will be summed and divided by the projected number of new construction low income units assisted utilizing HOME CHDO funds.
Purpose: This measure identifies the loan/grant amount associated with developing housing units and measures the efficiency of utilizing HOME CHDO funds.

1.1.6.2 Efficiency
Definition: A measure that tracks the projected average total development costs of HOME CHDO new construction.
Data Limitations: Information is based on preliminary estimates by the applicants.
Data Source: The projected total number of units in the development and total development costs for new construction is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This measure will be calculated by dividing the sum of HOME CHDO new construction total development costs estimated in awarded applications by the corresponding number of restricted units to be newly constructed.
Purpose: This measure identifies the total development costs associated with developing affordable housing units.

1.1.6.3 Efficiency
Definition: A measure that tracks the projected average amount per low income unit of new construction utilizing HOME non-CHDO funds.
Data Limitations: No limitations
Data Source: The projected number of low income units and amount of funds utilized for new construction is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the amount of HOME Non-CHDO new construction funds awarded by the corresponding number of restricted units to be newly constructed.
Purpose: This measure identifies the loan/grant amount associated with developing affordable housing units and measures the efficiency of utilizing HOME non-CHDO funds.

1.1.6.4 Efficiency

Definition: A measure that tracks the average total development costs per unit of HOME non-CHDO new construction.

Data Limitations: Information is based on preliminary estimates by the applicants.

Data Source: The projected total number of units in the development and total development costs for new construction is tracked by the division. Data is entered by staff and maintained in the agency’s computer system.

Methodology: This figure will be calculated by dividing the sum of HOME Non-CHDO total development costs estimated in awarded applications by the corresponding number of restricted units to be newly constructed.

Purpose: This measure identifies the total development costs associated with developing affordable housing units.

1.1.6.5 Efficiency

Definition: A measure that tracks the projected average amount per low income unit of rehabilitation and acquisition utilizing HOME CHDO funds.

Data Limitations: No limitations

Data Source: The projected number of low income units and amount of funds utilized for rehabilitation and acquisition is tracked by the division. Data is entered by staff and maintained in the agency’s computer system.

Methodology: This measure will be calculated by dividing the amount of HOME CHDO rehabilitation/acquisition funds awarded by the corresponding number of units to be rehabilitated or acquired. This figure will not include CHDO Operating Grants or Predevelopment Loans.

Purpose: This measure identifies the amount associated with the rehabilitation and acquisition of affordable housing units and measures the efficiency of utilizing HOME CHDO funds.

1.1.6.6 Efficiency

Definition: A measure that tracks the projected average total development costs of HOME CHDO rehabilitation and acquisition.

Data Limitations: Information is based on preliminary estimates by the applicants.

Data Source: The projected total number of units in the development and total development costs for rehabilitation and acquisition is tracked by the division. Data is entered by staff and maintained in the agency’s computer system.

Methodology: This measure will be calculated by dividing the sum of HOME CHDO rehabilitation/acquisition total development costs estimated in awarded applications by the corresponding number of units to be rehabilitated or acquired. This figure will not include CHDO Operating Grants or Predevelopment Loans.

Purpose: This measure identifies the total development costs associated with the rehabilitation and acquisition of affordable housing units.

1.1.6.7 Efficiency

Definition: A non-key measure that tracks the projected average amount per low income unit of rehabilitation and acquisition utilizing HOME non-CHDO funds.

Data Limitations: No limitations

Data Source: The projected number of low income units and amount of funds utilized for rehabilitation and acquisition is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: This measure will be calculated by dividing the amount of HOME Non-CHDO rehabilitation/acquisition funds awarded by the corresponding number of units to be rehabilitated or acquired. This figure will not include CHDO Operating Grants or Predevelopment Loans.

Purpose: This measure identifies the amount associated with the rehabilitation and acquisition of affordable housing units and measures the efficiency of utilizing HOME non-CHDO funds.

1.1.6.8 Efficiency

Definition: A measure that tracks the average total development costs per unit of HOME non-CHDO rehabilitation and acquisition.

Data Limitations: Information is based on preliminary estimates by the applicants.

Data Source: The projected total number of units in the development and total development costs for rehabilitation and acquisition is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: The total development costs of rehabilitation and acquisition assistance utilizing HOME non-CHDO funds will be summed and divided by the projected total number of rehabilitation and acquisition units.

Purpose: This measure identifies the total development costs associated with the rehabilitation and acquisition of affordable housing units.

1.1.6.1 Explanatory

Definition: A measure that tracks the projected number of households assisted utilizing multifamily HOME CHDO funds for new construction.

Data Limitations: No limitations

Data Source: The projected number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: This figure will be calculated as the sum of all restricted units awarded HOME CHDO funds for new construction activities. This figure will not include CHDO Operating Grants or Predevelopment Loans.

Purpose: To track the number of households assisted utilizing HOME CHDO funds for new construction.

1.1.6.2 Explanatory

Definition: A measure that tracks the projected number of households assisted utilizing multifamily HOME non-CHDO (non-CHDO) funds for new construction.

Data Limitations: No limitations

Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units awarded HOME Non-CHDO funds for new construction activities.
Purpose: To track the number of households assisted through HOME non-CHDO funds for new construction.

1.1.6.3 Explanatory
Definition: A measure that tracks the projected number of households assisted utilizing multifamily HOME CHDO funds for rehabilitation and acquisition.
Data Limitations: No limitations
Data Source: The projected number of units is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units awarded HOME CHDO funds for rehabilitation or acquisition activities. This figure will not include CHDO Operating Grants or Predevelopment Loans.
Purpose: To track the number of households assisted utilizing HOME CHDO funds for rehabilitation and acquisition.

1.1.6.4 Explanatory
Definition: A measure that tracks the projected number of households assisted utilizing multifamily HOME non-CHDO (non-CHDO) funds for rehabilitation and acquisition.
Data Limitations: No limitations
Data Source: The projected number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units awarded HOME Non-CHDO funds for rehabilitation or acquisition activities.
Purpose: To track the number of households assisted through HOME non-CHDO funds for rehabilitation and acquisition.

1.1.6.1 Output
Definition: A measure that tracks the projected number of households assisted through the multifamily division utilizing HOME funds.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units awarded HOME funds for rental development activities by the MF Division. This figure will not include CHDO Operating Grants or Predevelopment Loans.
Purpose: To track the total amount of multifamily units assisted utilizing HOME funds.

1.1.7.1 Efficiency
Definition: A measure that tracks the projected average loan/grant amount per low income unit of HTF (HTF) new construction.

Data Limitations: No limitations
Data Source: The projected number of low income units and amount of funds is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of all funds awarded for new rental development activities by the total number of estimated units as represented in applications to be newly constructed. This calculation may include wards for predevelopment loans, capacity building grants, and any other special initiative administered by the HTF.
Purpose: This measure identifies the average costs associated with developing affordable housing units and measures the efficiency of awarding HTF monies.

1.1.7.2 Efficiency
Definition: A measure that tracks the projected average total development costs per unit of HTF (HTF) new construction.
Data Limitations: Information is based on preliminary estimates by the applicants.
Data Source: The projected total number of units in the development and total development costs is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of total new development costs estimated in awarded applications by the projected number units to be newly constructed. This figure may include awards from the rental development, predevelopment, capacity building or any other special initiative administered by the Housing Trust Fund.
Purpose: This measure identifies the total development costs associated with developing affordable housing units.

1.1.7.3 Efficiency
Definition: A measure that tracks the average loan/grant amount per low income unit of HTF (HTF) rehabilitation and acquisition.
Data Limitations: No limitations
Data Source: The projected number of low income units and amount of funds is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of all funds awarded for rehabilitation rental development activities by the total number of estimated units as represented in applications to be rehabilitated. This calculation may include awards for predevelopment loans, capacity building grants, and any other special initiative administered by the HTF.
Purpose: This measure identifies the costs associated with rehabilitating and acquiring affordable housing units and measures the efficiency of awarding HTF monies.

1.1.7.4 Efficiency
Definition: A measure that tracks the average total development costs per unit of HTF (HTF) rehabilitation and acquisition activities.
Data Limitations: Information is based on preliminary estimates by the applicants.

Data Source: The projected total number of units in the development and total development costs is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of total rehabilitation development costs estimated in awarded applications by the number of units to be rehabilitated. This calculation my include awards for predevelopment loans, capacity building grants, and any other special initiative administered by the HTF.
Purpose: This measure identifies the total development costs associated with rehabilitating and acquiring affordable housing units.

1.1.7.1 Explanatory
Definition: A measure that tracks the projected number of households assisted through new construction activities using the HTF (HTF) program.
Data Limitations: No limitations
Data Source: The projected number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units planned to be developed through new construction by applicants for rental development, predevelopment, capacity building, or any other program administered by the Housing Trust Fund. This calculation may income awards for predevelopment loans, capacity building grants, and any other special initiative administered by the Housing Trust Fund.
Purpose: To track the number of households assisted through new construction activities using the HTF program.

1.1.7.2 Explanatory
Definition: A measure that tracks the projected number of households assisted through rehabilitation and acquisition activities using the HTF (HTF) program.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units planned to be developed through rehabilitation by applicants for rental development, predevelopment, capacity building, or any other program administered by the Housing Trust Fund. This calculation may income awards for predevelopment loans, capacity building grants, and any other special initiative administered by the Housing Trust Fund.
Purpose: To track the number of households assisted through rehabilitation and acquisition using the HTF program.

1.1.7.1 Output
Definition: A measure that tracks the projected number of households assisted through the multifamily division utilizing the HTF (HTF) program.
Data Limitations: No limitations
Data Source: The number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.

Methodology: This figure will be calculated as the sum of all restricted units planned to be developed by applicants awarded funds for rental development. This calculation may include awards for predevelopment loans, capacity building grants, and any other special initiative administered by the Housing Trust Fund.
Purpose: To track the total amount of multifamily units assisted utilizing the HTF program.

1.1.8.1 Efficiency
Definition: A measure that tracks the projected average amount of bonds per low income unit of Mortgage Revenue Bond (MRB) new multifamily construction.
Data Limitations: No limitations
Data Source: The projected number of low income units and amount of bonds for new construction is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the total value of mortgage revenue bonds awarded by the number of units to be newly constructed.
Purpose: This measure identifies the average amount of bonds associated with developing affordable housing and measures the efficiency of awarding multifamily MRB funds. Although useful to track, this measure is outside of the Department's control.

1.1.8.2 Efficiency
Definition: A measure that tracks the projected average total development costs per unit of Mortgage Revenue Bond (MRB) new multifamily construction.
Data Limitations: Information is based on preliminary estimates by the applicants.
Data Source: The projected total number of units in the development and total development costs for new construction is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of total development costs estimated in applications by the number of units to be newly constructed.
Purpose: This measure identifies the costs associated with developing affordable housing units.

1.1.8.3 Efficiency
Definition: A measure that tracks the projected average bond amount per low income unit of multifamily Mortgage Revenue Bond (MRB) rehabilitation and acquisition.
Data Limitations: No limitations
Data Source: The projected number of low income units and amount of bonds is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the total value of mortgage revenue bonds awarded by the number of units to be rehabilitated.
Purpose: This measure identifies the average amount of bonds associated with rehabilitating and acquiring affordable housing and measures the efficiency of awarding multifamily MRB funds.

1.1.8.4 Efficiency
Definition: A measure that tracks the projected average total development costs per unit of multifamily Mortgage Revenue Bond (MRB) rehabilitation and acquisition.
Data Limitations: Information is based on preliminary estimates from the applicants.
Data Source: The projected total number of units in the development and amount of total development costs is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated by dividing the sum of total development costs estimated in applications by the number of units to be rehabilitated.
Purpose: This measure identifies the total development costs amount associated with rehabilitating and acquiring affordable housing units.

1.1.8.1 Explanatory
Definition: A measure that tracks the projected number of households assisted through new construction activities utilizing the multifamily Mortgage Revenue Bond (MRB) program.
Data Limitations: No limitations
Data Source: The projected number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units to be newly constructed as proposed in awarded applications.
Purpose: To track the number of households assisted through new construction units assisted utilizing multifamily MRB program.

1.1.8.2 Explanatory
Definition: A measure that tracks the projected number of households assisted through rehabilitation and acquisition activities utilizing the multifamily Mortgage Revenue Bond (MRB) program.
Data Limitations: No limitations
Data Source: The projected number of households is tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units to be rehabilitated as proposed in awarded applications.
Purpose: To track the number of households assisted through rehabilitation and acquisition activities utilizing the multifamily MRB program.

1.1.8.1 Output
Definition: A measure that tracks the projected number of low income units financed through the multifamily division utilizing mortgage revenue bond funds.
Data Limitations: No limitations
Data Source: The number of units is tracked by the division for each separate program. Data is entered by staff and maintained in the agency's computer system.
Methodology: This figure will be calculated as the sum of all restricted units to be newly constructed or rehabilitated as proposed in awarded applications.

Purpose: To track the total amount of low income multifamily units assisted utilizing mortgage revenue bond funds.

2.1.1.1 Output
Definition: A measure tracking the number of information and technical assistance requests completed by the Center for Housing Research, Planning, and Communications.
Data Limitations: No limitations
Data Source: The requests are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number of requests received is a total of the requests entered into the division database.
Purpose: To track the consumer information and technical assistance requests received and fulfilled.

2.1.1.2 Output
Definition: A measure tracking the number of short term (completed by phone) information and technical assistance requests completed by the Center for Housing Research, Planning, and Communications.
Data Limitations: No limitations
Data Source: The requests are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number of short term requests received is a total of the short term requests entered into the division database.
Purpose: To track the short term consumer information and technical assistance requests received.

2.1.1.3 Output
Definition: A measure tracking the number of long term (completed by email or mail) information and technical assistance requests completed by the Center for Housing Research, Planning, and Communications.
Data Limitations: No limitations
Data Source: The requests are tracked by the division. Data is entered by staff and maintained in the agency's computer system.
Methodology: The number of long term requests received is a total of the long term requests entered into the division database.
Purpose: To track the long term consumer information and technical assistance requests received.

2.2.1.1 Output
Definition: The number of technical assistance visits is based on actual on-site technical assistance visits conducted by the field offices' staff. Technical assistance visits includes: meeting with local governments (cities & counties) staff and nonprofits providing agency information on programs and services; follow-up on contract compliance measures with

Colonia Self-Help Centers; and general interview sessions with individuals to provide referral services to other office and agencies available to address issues of concern.
Data Limitations: No limitations.
Data Source: Actual on-site visits are reported by staff.
Methodology: On-site visits are manually tracked by staff and maintained in the Department's database.
Purpose: The purpose of the measure is to identify the level technical assistance provided to Colonia residents as required by Senate Bill 1509. This measure is important because it identifies the effectiveness of the program and compliance with legislative mandates.

2.2.1.2 Output
Definition: The number of Colonia residents receiving assistance annually through the Colonia Self-Help Centers. This includes the following types of assistance: housing rehabilitation, new construction, surveying and platting, construction skills training, tool library access for self-help construction, housing finance; credit and debt counseling, infrastructure constructions and access, and capital access for mortgages.
Data Limitations: Deviation from targeted performance could occur if participation of Colonia residents is lower than expected.
Data Source: Actual assistance provided.
Methodology: The Self Help Centers will provide a quarterly report on the assistance provided. This data will be maintained in the Department's records.
Purpose: This measure is important because it identifies the effectiveness of the program in providing assistance to Colonia residents with a wide array of services.

2.2.1.3 Output
Definition: The number of persons educated as a result of Senate Bill 336 is calculated by adding together the number of people: attending training/lectures, calling and/or receiving information; the number of publications distributed (newsletter, magazine, or paper), population viewing or hearing media public service spots (calculated by radio or TV station).
Data Limitations: Deviation from targeted performance could occur if participation of Colonia residents is lower than expected.
Data Source: Actual persons receiving services.
Methodology: Information is manually tracked by staff.
Purpose: The Office of Colonia Initiatives is responsible for developing and implementing the Contract For Deed Consumer Education Program (Senate Bill 336) for residents who purchase residential land under a contract for deed. This measure is important because it supports Senate Bill 336 and identifies the effectiveness of the program.

3.1.1.1 Efficiency
Definition: The average agency administrative cost per person assisted represents personnel costs, operating costs, capital expenditures and indirect expenditures as identified in the LAR. The Department's fiscal section calculates expenditures related to personnel, operations, capital items, and indirect costs.

Data Limitations: A possible limitation could be limitations on obtaining expenditure data for the reported period.
Data Source: The total number of persons served is gathered from the subrecipients' monthly performance reports.
Methodology: The efficiency measure is determined by dividing the total administrative expenditure of Community Service funds by the total number of clients served in Community Service programs.
Purpose: The purpose of the measure shows the efficiency in costs to administer the program.

3.1.1.1 Explanatory
Definition: Figure represents the estimated number of emergency shelters in Texas.
Data Limitations: There is no accurate way to count the actual number of emergency shelters in Texas.
Data Source: The estimated number of emergency shelters is based on the total number of entities on the ESGP mailing list less those entities that do not represent shelters.
Methodology: Number is estimated.
Purpose: The purpose of the measure is to identify the number of emergency shelters available to assist homeless individuals.

3.1.1.2 Explanatory
Definition: Figure represents the most recent census data.
Data Limitations: Information is collected every ten years.
Data Source: Information is obtained from the most recent census data.
Methodology: Number is actual.
Purpose: The purpose of the measure identifies the number of persons at or below 125% of poverty (4,172,890) and identifies the number of persons in need.

3.1.1.1 Output
Definition: This measure tracks the number of persons assisted through homeless and poverty related programs.
Data Limitations: A possible limitation could be subrecipients failing to submit required reports on a timely basis.
Data Source: Subrecipients track the data on a daily basis, incorporate it in a monthly performance report, and electronically submit the information to the Department. The monthly performance report information is entered in the Department database and maintained by the Department.
Methodology: Performance reported is actual number.
Purpose: The purpose of the measure is to identify the number of persons at or below 125% of poverty assisted by all Community Services programs.

3.1.1.2 Output
Definition: Measure relates to the number of persons assisted that achieve incomes above 125% of poverty level for a minimum of 90 days.

Data Limitations: A possible limitation could be subrecipients failing to submit required reports on a timely basis.
Data Source: The number of persons achieving incomes above 125% of poverty is reported in the subrecipients' monthly performance reports. Subrecipients are required to track the number of persons assisted that achieve incomes above the poverty level as a result of efforts by the subrecipients. Subrecipients report this information in their monthly performance report. The data is entered on the Department database and maintained by the Department.
Methodology: Performance reported is actual number.
Purpose: The purpose of the measure is to identify the number of persons the program has helped to achieve incomes above the poverty level.

3.1.1.3 Output
Definition: Measure relates to the number of shelters assisted through ESGP funds.
Data Limitations: No limitations on data.
Data Source: The Department tracks information from contract records. The Department tracks this information from contract records. Assistance to a shelter is reported only once a year during the quarter the contract is initiated.
Methodology: Performance reported is actual number. The Department counts each project funded through ESGP contractors as a shelter assisted.
Purpose: The purpose of the measure is to identify the effectiveness of the program and the number of shelters the program is able to fund.

3.2.1.1 Efficiency
Definition: The average cost per household served is calculated based on the number of households assisted by CEAP and WAP from the Monthly Funding Performance Report from subrecipients and the administrative expenditures report from TDHCA Budget and Accounting section.
Data Limitations: Performance reports received past the due date from subrecipients could result in incomplete data. Increase or decrease in funding could create a variance in the targeted goal.
Data Source: The average cost per household served is calculated based on the number of households assisted by CEAP and WAP from the subrecipient Monthly Funding Performance Report divided by the administrative expenditures as reported by TDHCA Budget and Accounting Section.
Methodology: Calculations are based on the total administrative expenditures including indirect cost for the Energy Assistance section divided by the total number of households served.
Purpose: The measure identifies the average administrative cost to provide service to a household.

3.2.1.2 Efficiency

Definition: The statewide average cost to weatherize a home includes the cumulative cost of labor, materials, and program support for all completed units in the state divided by the number of completed units.

Data Limitations: Increase or decrease in funding could create a variance in the targeted goal.

Data Source: Monthly expenditures and performance reports are entered by subrecipients through the Department's online reporting system.

Methodology: Calculations are based on the cumulative cost of labor, materials, and program support for all completed units in the state divided by the number of completed units.

Purpose: The measure identifies the average cost to perform weatherization on a home.

3.2.1.1 Explanatory

Definition: The number of very low income households income-eligible for energy assistance in Texas is determined based on the maximum eligibility limit of 125% of the Federal OMB poverty guidelines.

Data Limitations: No limitations.

Data Source: According to the publication entitled LIHEAP Home Energy Notebook for Fiscal Year 2001, issued on April 7, 2003 (via transmittal no. LIHEAP-IM-2003-7) to LIHEAP grantees by the Office of Community Services of the US Department of Health and Human Services, the number of very income-eligible households for LIHEAP grantees by the Office of Community Services of the US Department of Health and Human Services, the number of very income-eligible households for Survey (CPS) 1999-2001.

Methodology: Data represents an actual number.

Purpose: The purpose of the measure is to identify the eligibility population of the state. It is important because it identifies the level of need in the state.

3.2.1.1 Output

Definition: The number of households assisted through the Comprehensive Energy Assistance Program (CEAP) represents the number of unduplicated households receiving services under the four program components, consisting of co-pay, elderly/disabled Energy Crisis Program, and the heating and cooling systems components. Each of these program components provides stand-alone services. A household may be assisted by more than one component depending on needs.

Data Limitations: Targeted performance could be impacted by changes in funding levels, the price of energy and extremes in temperature.

Data Source: Monthly expenditures and performance reports are entered by subrecipients through the Department's online reporting system.

Methodology: Number is actual.

Purpose: The LIHEAP program provides direct financial assistance for energy needs of low income persons through the Comprehensive Energy Assistance Program (CEAP). The measure is important because it identifies the effectiveness of the CEAP program through the number of households receiving CEAP.

3.2.1.2 Output

Definition: The number of dwelling units weatherized is based on Monthly Progress Expenditure/Monthly Fund Request Reports submitted to the Department by the weatherization subrecipients.

Data Limitations: Targeted performance could be impacted by changes in funding levels.

Data Source: Monthly expenditures and performance reports are entered by subrecipients through the Department's online reporting system. Performance data from these reports is entered in an automated system and maintained by the Department. Performance figures represent an unduplicated number of weatherization units from the Department's DOE and LIHEAP Weatherization programs.

Methodology: The performance number reported represents the actual number of dwelling units weatherized.

Purpose: The WAP program provides residential weatherization and other cost-effective energy-related home repair to increase the energy efficiency of dwellings owned or occupied by low-income persons. The measure is important because it identifies the effectiveness of the program through the number of homes receiving weatherization services.

4.1.1.1 Efficiency

Definition: The average cost to monitor a rental development includes the resources needed to provide determination of program compliance and effectiveness of rental programs.

Data Limitations: No limitations.

Data Source: Expenditure data is maintained in the Department's automated information systems.

Methodology: The average cost is derived by dividing the total budgeted cost for rental development monitoring activities by the number of rental developments monitored.

Purpose: The measure identifies the average cost to monitor a rental development.

4.1.1.1 Explanatory

Definition: The total number of rental developments in the TDHCA compliance monitoring portfolio. This number represents the portfolio for which the PMC division is responsible. This includes developments monitored by on-site file review, desk review, a combination of onsite and desk reviews, or other compliance activities depending on program requirements. Program development totals vary throughout the year.

Data Limitations: No limitations.

Data Source: Program totals are maintained by the Department's databases.

Methodology: Figure represents actual number of developments in the compliance monitoring portfolio.

Purpose: The measure provides the total number of housing developments in the compliance monitoring portfolio.

4.1.1.2 Explanatory
Definition: Total number of housing units in the multi and single family rental developments monitored by the Department. The total number includes both restricted and unrestricted units. Units under construction as well as units available for lease are included in the total.
Data Limitations: No limitations.
Data Source: Unit totals are maintained by the Department's databases.
Methodology: Figure represents actual number of units constructed or rehabilitated.
Purpose: The measure provides information of the total rental units monitored by the Department.

4.1.1.1 Output
Definition: Measure represents the number of both onsite and desk reviews conducted under rental monitoring programs.
Data Limitations: No limitations.
Data Source: The data is gathered by program from Department data bases.
Methodology: Number is actual.
Purpose: The measure meets statutory and agency requirements.

4.1.1.2 Output
Definition: Measure represents the number of desk reviews conducted under rental programs. In addition to on-site reviews, monthly, quarterly, and-or annual compliance reporting is required. These reports are a vehicle for measuring overall and ongoing compliance with rent, income, and other controls and requirements. The frequency in the number of reports is determined by program requirement, and may vary depending on the level of compliance. Desk reviews conducted also include the review of Fair Housing Sponsor Reports, substantial construction certification reviews, construction inspection reviews, and other reviews.
Data Limitations: No limitations.
Data Source: The data is gathered by program from Department data bases.
Methodology: Number is actual.
Purpose: The measure meets statutory and agency requirements.

4.1.1.3 Output
Definition: Measure represents the number of on-site, in-depth desk reviews (done in lieu of on-site reviews for projects with 10 or less units), and 8609 inspections conducted under rental programs. The reviews provide the best measure of program compliance and effectiveness of affordable housing programs. The frequency of reviews is either statutorily or agency required, therefore the number meets or exceeds the specific program requirement.
Data Limitations: No limitations.
Data Source: The data is gathered by program from Department databases.
Methodology: The number reported is the actual number of reviews performed.
Purpose: The measure meets statutory and agency requirements.

4.1.1.4 Output

Definition: Measure represents the number of technical assistance calls, Open Records Requests, complaints and other public requests processed and the number of trainings conducted.

Data Limitations: No limitations.

Data Source: The data is gathered by program from Department databases.

Methodology: Number is actual.

Purpose: The measure meets statutory requirements and program objectives.

4.1.1.5 Output

Definition: Measure represents the number of application-related instruments processed, including Compliance Status Reports, Land Use Restriction Agreements, and application site inspections.

Data Limitations: No limitations.

Data Source: The data is gathered by program from Department databases.

Methodology: Number is actual.

Purpose: The measure meets statutory and agency requirements.

4.1.2.1 Efficiency

Definition: The average cost to administer a contract includes the resources needed for effective contract management.

Data Limitations: No limitations.

Data Source: Expenditure data is maintained in the Department's automated information systems.

Methodology: The average cost is derived by dividing the total budgeted cost for contract administration activities by the number of contracts administered.

Purpose: The measure identifies the average cost to administer a contract.

4.1.2.1 Explanatory

Definition: The total number of contracts administered by PMC. This number represents the portfolio of contract responsibility, whether or not a contract is processed and/or monitored through desk or onsite reviews, or other contract administration activities depending on program requirements. Measure includes contracts for all activities, including Single Family Rehabilitation; Tenant Based Rental Assistance, Rental Housing Development, Down-Payment Assistance, and other types of contract activity.

Data Limitations: No limitations

Data Source: Data on contracts administered is maintained in the Department's database.

Methodology: Figure represents actual number of contracts administered.

Purpose: The measure provides the total number of active contracts administered.

4.1.2.1 Output

Definition: Measure represents the number of onsite reviews, desk reviews, and single audit reviews conducted as part of contract administration in PMC.

Data Limitations: No limitations.

Data Source: The data is gathered from Department data bases.
Methodology: Number is actual.
Purpose: The measure meets statutory and program requirements.

4.1.2.2 Output
Definition: The number of desk reviews conducted of Federal and State grant sub-recipients. Single Audits are required annually if the federally mandated expenditure threshold is exceeded as defined by OMB Circular A-133. OMB Circular A-133 defines which single audit reports must be submitted to the pass-through agency. These reports are used to measure overall and ongoing compliance with program requirements, financial accountability of Federal and State grants and the overall internal controls of the sub-recipient.
Data Limitations: No limitations.
Data Source: The data is gathered from Department data bases.
Methodology: Number is actual.
Purpose: The measure meets statutory and program requirements.

4.1.2.3 Output
Definition: Measure represents the number of desk reviews conducted as part of contract administration in PMC. This measure includes setup, draw, desk, environmental, quality control, re-certification, amendment, revision and other desk reviews.
Data Limitations: No limitations.
Data Source: The data is gathered by program from Department data bases.
Methodology: Number is actual.
Purpose: The measure meets statutory and program requirements.

4.1.2.4 Output
Definition: Measure represents the number of financial and programmatic onsite monitoring reviews and the number of technical assistance onsite reviews conducted as part of contract administration in PMC.
Data Limitations: No limitations.
Data Source: The data is gathered by program from Department databases.
Methodology: The number reported is the actual number of onsite reviews conducted.
Purpose: The measure meets program requirements.

4.1.2.5 Output
Definition: Measure represents the number of technical assistance calls, Open Records Requests, complaints and other public requests processed and the number of trainings conducted.
Data Limitations: No limitations.
Data Source: The data is gathered by program from Department data bases.
Methodology: Number is actual.
Purpose: The measure meets statutory and program objectives.

5.1.1.1 Efficiency

Definition: The average cost to the Department of the processing of an Statement of Ownership and Location (SOL) application based on total funds expended and encumbered during the reporting period for the issuance of manufactured housing SOLs. Cost includes department overhead, salaries (permanent and temporary personnel), supplies, travel, postage, and other costs directly related to SOLs , including document review, handling, proofing, and notification.

Data Limitations: No limitations of data.

Data Source: The data is maintained in the USAS system.

Methodology: To obtain the average, divide the total funds by the total number of SOLs issued in a reporting period.

Purpose: The measure shows the efficiency in costs to issue a SOL.

5.1.1.1 Explanatory

Definition: The number of Manufactured Homes of record in Texas represents the total number of manufactured homes with an existing record in the official manufactured housing database that is maintained by the department.

Data Limitations: No limitations of data.

Data Source: Automated compilation through the Department’s Tracking System.

Methodology: Actual number.

Purpose: The measure represents the total number of manufactured homes in Texas for which the Department has an ownership and location record.

5.1.1.1 Output

Definition: The total number of manufactured housing Statements of Ownership and Location (SOL) issued for which a fee is charged (includes SOLs issued as a result of changes in ownership, location, lien information, election, and use).

Data Limitations: No limitations.

Data Source: Data is computer generated (Department's Tracking System) reports and accounting receipts.

Methodology: Number is actual.

Purpose: This measure identifies the total number of SOLs issued in a reporting period. It is important because it shows the workload associated with issuing SOLs.

5.1.1.2 Output

Definition: The total number of manufactured housing licenses issued to qualifying applicants (applicant types broker, installer, manufacturer, retailer, retailer/broker, retailer/broker/installer, retailer/installer, salvage rebuilder and salespersons). The number calculated includes reprints of and revisions to existing licenses.

Data Limitations: No limitations.

Data Source: Data is computer generated through the Licensing Tracking System.

Methodology: Number is actual.

Purpose: This measure identifies the total number of licenses issued in a reporting period. It is important because it shows the workload associated with issuing licenses.

5.1.2.1 Efficiency

Definition: The average cost to the Department of each inspection based on the total funds expended and encumbered during the reporting period to conduct or attempt inspections, including both installation and non-routine inspections. Cost includes department overhead, salaries (permanent and temporary personnel), supplies, travel; postage, and other costs directly related to the enforcement of the inspection function.

Data Limitations: No limitations.

Data Source: USAS, Installation Tracking System and Travel Database.

Methodology: To obtain the average, divide the total funds expended by the total number of routine and non-routine inspections (completed and/or attempted) within the reporting period.

Purpose: The measure identifies the cost efficiency to perform or attempt an inspection.

5.1.2.1 Explanatory

Definition: The total number of installation reports received within a reporting period. Installation reports are received from lenders, retailers, installers, consumers, and other sources.

Data Limitations: No limitations.

Data Source: Source: Installation Tracking System.

Methodology: Actual number.

Purpose: The measure provides information on the total number of installation reports received.

5.1.2.2 Explanatory

Definition: The total number of installation inspections with deviations documented. An inspector may list several violations on a single installation inspection, but it only accounts for one reported deviation.

Data Limitations: No limitations.

Data Source: Source: Installation Tracking System.

Methodology: Actual number.

Purpose: The measure provides information on the total number of installation inspections with deviations. The importance of this measure is to ensure that homes are installed in a safe manner to prevent injury to consumers and the general public.

5.1.2.1 Output

Definition: The total number of routine inspections conducted to inspect the anchoring and support systems of manufactured homes (includes reviewing installation report for completeness, inspecting stabilizing devices to confirm that the installer used approved materials, inspecting the home for proper installation, and verifying that the installer is licensed with TDHCA). Unsuccessful attempted inspections (identified as skirted, not accessible, unable to locate, or no unit at location) are not included in the number reported.

Data Limitations: No limitations.

Data Source: Collection of data is based on the Installation Tracking System.

Methodology: Number is actual.
Purpose: The measure identifies the total number of inspections performed (attempted inspections are not included) in a reporting period. It is important because it shows the workload for inspections.

5.1.2.2 Output
Definition: The total number of special/complex inspections performed upon request from the public, other regulated entities, or as part of a complaint investigation. Special inspections consist of, but are not limited to the following: consumer complaints, habitability, permanent foundations, SAA, and retailer monitoring.
Data Limitations: No limitations.
Data Source: Collection of data is based on the Inspector's Travel Voucher Database.
Methodology: The number is retrieved from the Travel Voucher Database by generating a report which lists the inspections conducted within the reporting period.
Purpose: The measure identifies the total number of inspections performed in a reporting period. It is important because it identifies inspections that result from unusual or special circumstances.

5.1.3.1 Efficiency
Definition: The average cost to the Department to resolve a complaint based on the total funds expended and encumbered during the reporting period for complaint processing, investigation, and resolution divided by the number of complaints resolved. Cost includes department overhead, salaries (permanent and temporary personnel), supplies, travel, postage, subpoena expenses, and other costs directly related to the agency's enforcement function.
Data Limitations: No limitations.
Data Source: Data is obtained from either a management report from the Department's Financial Administration Division or USAS, and the Consumer Complaint Tracking System.
Methodology: To obtain the average, divide the total funds expended by the total number of resolved complaints within the reporting period. Non-jurisdictional complaints (closed as DISJ) are not included in this measure.
Purpose: The measure identifies the efficiency in costs for resolving a complaint.

5.1.3.2 Efficiency
Definition: The average length of time to resolve a jurisdictional complaint, for jurisdictional complaints resolved during the reporting period. The number of days to reach a resolution is calculated from the initial date of receipt of a consumer complaint to the date closed.
Data Limitations: No limitations.
Data Source: CCTS.
Methodology: The total number of calendar days per jurisdictional complaint resolved, summed for all complaints resolved during the reporting period, that elapsed from receipt of a request for agency intervention to the date upon which final action on the complaint was taken (numerator) is, divided by the number of complaints resolved during the reporting

period (denominator). The calculation excludes complaints determined to be non-jurisdictional of the agency's statutory responsibilities.
Purpose: The measure tracks the average number of days spent to resolve a complaint. The measure is important because it shows how efficient the division has been in resolving complaints.

5.1.3.1 Explanatory
Definition: The total number of complaints received in a reporting period that are within the agency's jurisdiction of statutory responsibility.
Data Limitations: No limitations.
Data Source: The number is retrieved from the Consumer Complaint Tracking System.
Methodology: Actual number.
Purpose: The measure provides information on the total number of jurisdictional complaints. This measure is important to determine the division's workload.

5.1.3.1 Output
Definition: The total number of complaints resolved during the reporting period upon which final action was taken by the board or the Department through informal and formal means. Non-jurisdictional complaints (closed as DISJ) are not included in this measure.
Data Limitations: No limitations.
Data Source: Data is maintained in the Consumer Complaint Tracking System.
Methodology: Actual number.
Purpose: The measure shows the workload associated with resolving complaints. The measure is important because it also identifies consumer problems.

APPENDIX E. IMPLEMENTING THE TEXAS TRANSFORMATION

Managed Service Delivery

1. Has the agency considered use of managed services in order to focus more on its business needs?

1. Yes, in the last quarter of FY 2008, TDHCA plans to post an RFO for a hosted employee performance management system that would be completely maintained and supported by a vendor. Additionally, the Mitas Automated Accounting and Loan Servicing System is currently a managed service from an application support standpoint, and TDHCA is considering moving to a hosted solution so that the server environment would also be managed by the vendor. Finally, ACS contracts with TDHCA to manage a large portion of the Community Development Block Grant Disaster Recovery program, and the vendor is responsible for the information systems that support the parts of the program they manage.

Managed IT Supply Chain

2. Does the agency leverage and obtain additional value from the Information and Communications Technology (ICT) Cooperative Contracts program; for example, by further negotiating not-to-exceed pricing?

2. Yes, TDHCA utilizes the ICT Cooperative Contracts program for IT purchases whenever the product or service is available (which is almost all cases). For example, all contract programmers from FY 2005 forward have been hired using DIR's IT Staffing Services.

Security and Privacy

3. Describe the agency's strategies to align with the State Enterprise Security Plan (http://www.dir.state.tx.us/pubs/securityplan2007/index.htm).

3. Strategies that are currently in place to align with the State Enterprise Security Plan include the following:

- Use DIR's security testing services once per year.
- Use and maintain network security hardware and software to prevent intrusions.
- Maintain security policies and distribute them to users of agency systems.
- Report major incidents to DIR immediately and minor incidents through the monthly reporting process.
- Follow a structured account management process.

In June 2008, TDHCA will begin an IT security project which will result in improved policies and practices and new strategies such as a better security risk assessment process, intrusion detection, and portable device security.

4. Describe the agency's policies, practices and programs, implemented or planned, that comply with relevant statutes and administrative rules to ensure the privacy of confidential data. Consider federal privacy requirements (e.g., the Health Insurance Portability and Accountability Act or the Family Educational Rights and Privacy Act) that apply to the agency. List the organizational units (program, offices, IT, legal, etc.) that manage privacy functions. Describe any future plans for improvement.

4. The information maintained by TDHCA that has confidential elements includes some financial data and some household data for subrecipients of funds and program participants. The Department does not maintain medical data or student information. TDHCA addresses privacy through a combination of policies and procedures. Policies include a series of internal security-related SOPs, an IT security policy for vendors who maintain personally identifiable information of agency program participants, and IT security guidance documents for subrecipients of community services and energy assistance program funds. Procedures involve account management and access rights on each system with confidential data, the use of digital signatures and encryption in file transfers such as those between TDHCA and Texas Online and the Office of the Comptroller of Public Accounts, and network security at the router and firewall level.

In June 2008, TDHCA will begin an IT security project which will result in improved policies and practices and new strategies such as a better security risk assessment process, intrusion detection, and portable device security.

Technology Policy, Best Practices, and Partnerships

5. What current practices or plans are in place to improve usability and searchability of the agency's Web content? (2007 SSP, Strategy 4 1)

5. TDHCA is currently engaged in a Web site redesign project. The main goal of the project is to provide visitors with easier access to information by asking them to select their customer type. Additionally, the Web site currently includes a search engine.

6. What current practices or plans are in place to improve life cycle management of agency data and information? Include the agency's approach and ability to meet future open records and e-discovery requests. (2007 SSP, Strategy 4-1)

6. TDHCA's Records Management SOP contains agency policies and procedures for both hard copy and electronic records. The SOP defines records management terminology as well as storage, retrieval, and disposition policies. The Department's Records Retention Schedule (referenced in the SOP) defines the life cycle of each record and indicates whether the copy of record is in hard copy or electronic format.

TDHCA's approach to meeting open records and e-discovery requests is defined in the Department's Public Information Request (PIR) SOP. Some of the procedures related to PIRs include 1) logging and tracking the status of the request in the TDHCA's PIR System, 2) consulting the Legal Division and Office of the Attorney General as needed, 3) checking the Records Retention Schedule, 4) determining what information systems or paper files would be involved in responding to the request, 5) estimating costs, and 6) responding to the requestor within ten days of the request.

7. Describe agency methods and standards (federal, state, industry), implemented or planned, intended to enhance data sharing (i.e., improve interoperability) with other entities. (2007 SSP, Strategy 4-2)

7. TDHCA follows Office of the Comptroller of Public Accounts data sharing standards for exchanging financial information associated with contracts for the Community Development Block Grant Disaster Recovery, Community Services Block Grant, Comprehensive Energy Assistance Program, Emergency Shelters Grant Program, HOME, Housing Trust Fund, and Weatherization Assistance Program contracts. The Department follows Texas Online data sharing standards for exchanging Manufactured Housing license renewal payments and related information.

Core Missions

8. Does the agency have any plans to simplify or reduce the number of existing software platforms (e.g., operating systems, application development environments, database systems, office suites, other COTS applications)? If no, is the agency fully leveraging its technology to support both its current and future business environment?

8. Yes, TDHCA plans to reduce the number of operating system platforms in FY 2009, 2010, and 2011. The Department currently supports multiple desktop operating systems. In FY 2009, most desktop operating systems will be migrated to one platform. Additionally, application and network utility servers currently run on a mix of Windows Server (three versions), Solaris, Linux, and FreeBSD operating systems. TDHCA plans to eliminate some of these server platforms by FY 2011.

9. Describe any current or planned activities targeted at reducing the environmental resource consumption of technology equipment (recycling, consolidating, virtualizing, buying energy efficient equipment, etc.).

9. TDHCA plans to evaluate server virtualization options in FY 2009 with a goal of reducing the number of servers in use in future fiscal years.

APPENDIX F. WORKFORCE PLAN

INTRODUCTION

Each state agency is required to conduct a strategic planning staffing analysis and develop a workforce plan that follows guidelines developed by the State Auditor. This workforce plan addresses the agency's critical staffing and training needs, including the need for experienced employees to impart knowledge to their potential successors pursuant to Section 2056.002, Government Code.

AGENCY OVERVIEW

This section describes the mission, strategic goals, objectives, and business functions of the agency. Potential changes to these items over the next five years is also discussed.

TDHCA Mission

To help Texans achieve an improved quality of life through the development of better communities.

TDHCA Philosophy

Customers

- Advocacy: The Department will actively encourage, support, and promote an improved quality of life for extremely low, very low, low, and moderate income Texans.
- Service: The Department will be responsive to every constituent request and provide every customer with prompt, courteous service.
- Partnership: The Department will foster an atmosphere that is conducive to encouraging and forming public and private partnerships that are responsive to the needs of extremely low, very low, low, and moderate income Texans.
- Equity: The Department will establish processes for the public's full participation in programs and the fair allocation of resources.
- Respect: The Department believes in the worth of all persons and their need for decent, safe, and affordable housing.

Operations

- Integrity: The Department will conduct business openly, free of bias, and according to the highest ethical and professional standards.
- Accountability: The Department will be answerable and responsive to the Texas Legislature, external customers/consumers, and its various funding sources.
- Efficiency: The work of the Department will be accomplished in the most direct, cost-effective manner.
- Leveraging: Each program will encourage public and private sector participation and the use of additional resources to maximize economic impact.
- Diversity: The Department recognizes the need for a diverse working environment. The Department will strive to continue to recruit and retain a diverse workforce to reflect the diversity of Texas.

Staff

- Quality: Department staff will be committed in providing extraordinary services to it's customers and employees in the work they perform.
- Creativity: Department staff will continually seek innovative methods for performing work in their respective fields.
- Respect: The Department recognizes that its employees are the critical element in accomplishing its mission and goals. Therefore, it pledges to support their continued professional development and provide opportunities for reward based on their performance. In doing so, it also pledges to promote a collaborative and positive work environment for all employees.

TDHCA's Goals, Objectives, and Strategies to Fulfill its Mission

Goal 1.

To increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families.

Objective 1. Make loans, grants, and incentives available to fund eligible housing activities and preserve/create single and multifamily units for very low, low, and moderate income households.

Strategy 1. Provide federal mortgage loans, through the department's Mortgage Revenue Bond (MRB) Program, which are below the conventional market interest rates to very low, low, and moderate income homebuyers.

Strategy 2. Provide federal housing loans and grants through the HOME Investment Partnership (HOME) Program for very low and low income families, focusing on the construction of single family housing in rural areas of the state through partnerships with the private sector.

Strategy 3. Provide state housing loans and grants through the HTF for very low and low income households.

Strategy 4. Provide federal rental assistance through Section 8 certificates and vouchers for very low income households.

Strategy 5. Provide federal tax credits to develop rental housing for very low and low income households.

Strategy 6. Provide federal housing loans and grants through the HOME Investment Partnership (HOME) Program for very low and low income families, focusing on the construction of multifamily housing units in rural areas of the state through partnerships the private sector.

Strategy 7. Provide state housing loans and grants through the HTF for very low and low income households.

Strategy 8. Provide federal mortgage loans through the department's Mortgage Revenue Bond (MRB) program for the acquisition, restoration, construction and preservation of multifamily rental units for very low, low and moderate income families.

Goal 2. Promote improved housing conditions for extremely LI, VLI, and low income households by providing information and technical assistance.

Objective 1. Provide information and technical assistance regarding affordable housing resources and community support services.

Strategy 1. Provide information and technical assistance to the public through the Center for Housing Research, Planning, and Communications.

Objective 2. Promote and enhance homeownership opportunities along with the development of safe neighborhoods and effective community services for colonia residents and/or residents of LI, VLI, and ELI along the Texas-Mexico border.

Strategy 1. Provide technical assistance to colonias through field offices.

Goal 3.

Improve living conditions for the poor and homeless and reduce cost of home energy for very low income Texans.

Objective 1. To ease hardships of poverty and homelessness for 16 percent of the population of very low income persons each year.

Strategy 1. Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.

Objective 2. To reduce cost of home energy for 6 percent of very low income households each year at or below 125 percent of poverty

Strategy 1. Administer state energy assistance programs by providing grants to local organizations for energy related improvements to dwellings occupied by very low income persons and general assistance to very low income households for heating and cooling expenses and energy-related emergencies.

Goal 4. Ensure compliance with Department of Housing and Community Affairs federal and state program mandates.

Objective 1. Administer and monitor housing developments and subrecipient contracts to determine compliance with federal and state program requirements.

Strategy 1. Monitor and inspect for federal and state housing program requirements.

Strategy 2. Administer and monitor federal and state subrecipient contracts for programmatic and fiscal requirements.

Goal 5. Protect the public by regulating the manufactured housing industry in accordance with state and federal laws.

Objective 1. Operate a regulatory system to ensure responsive handling of Statement of Ownership and Location and license applications, inspection reports, and complaints as follows: 25 percent installation inspections; 97 percent of applications within established timeframes; and 99 percent of consumer complaint inspections within 30 calendar days of a request.

Strategy 1. Provide services for Statement of Ownership and Location and licensing in a timely and efficient manner.

Strategy 2. Conduct inspections of manufactured homes in a timely and efficient manner.

Strategy 3. Process consumer complaints, conduct investigations, and take administrative actions to protect general public and consumers.

Strategy 4. Provide for the processing of occupational licenses, registrations, or permit fees through TexasOnline.

Core Business Functions

TDHCA business functions can be broadly grouped into three categories: providing housing and community services assistance, regulating the manufactured housing industry, serving as an informational resource. To ensure the success of the Department's efforts in these areas, a variety of supporting functions are required. These support areas include financial administration, human resources, information systems, portfolio management and compliance, policy and public affairs, purchasing, and real estate analysis.

Housing and Community Services Assistance

Types of housing and community services assistance include:

- housing assistance for individual households (homebuyer mortgage and down payment, home repair, and rental payment assistance);
- funding for the development of apartments (new construction or rehabilitation of rental units);
- energy assistance (utility payments or home weatherization activities);
- assistance for homeless persons and emergency relief for individuals or families in crisis poverty (transitional housing, energy assistance, home weatherization, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and other emergency assistance); and
- capacity building assistance (training and technical assistance, assistance with operating costs, and predevelopment loans to help local housing organizations develop housing).

Manufactured Housing Activities

TDHCA's Manufactured Housing Division is an independent entity within TDHCA. It is administratively attached, but it has its own Board of Directors. This division administers the Texas Manufactured Housing Standards Act. The act ensures that manufactured homes are well-constructed, safe, and installed correctly; that consumers are provided fair and effective remedies; and that measures are taken to provide economic stability for the Texas manufactured housing industry. Services of the Manufactured Housing Division include issuances of SOL research; training and license issuances to individuals for manufactured housing manufacturing, retailing, rebuilding, installations, broker, or sales; records and releases on tax and mortgage liens; installation inspections; consumer complaints; and federal oversight under a cooperative agreement with HUD.

Information Resources

TDHCA is an informational resource for individuals, federal, state, and local governments, the Legislature, community organizations, advocacy groups, housing developers, and supportive services providers. Examples of information provided includes: general information on TDHCA activities, application and implementation technical assistance, housing need data and analysis, and direct consumer information on available assistance statewide. This information is provided through a myriad of communication methods: a 1-800 phone line, publications and guidebooks, via email and the TDHCA website, public hearings, trainings and workshops, planning roundtables, field offices, mass mailings, television, radio, and print media, speaking engagements, and conferences.

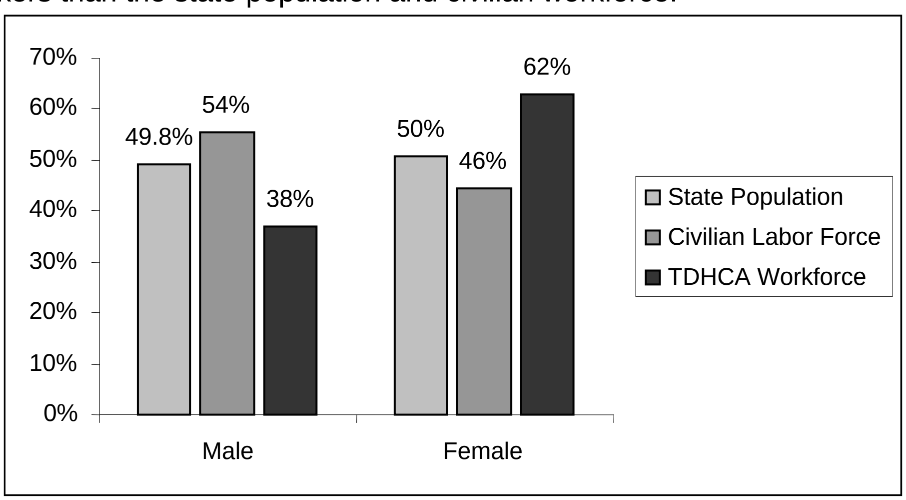
In all of its activities, TDHCA strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process.

Anticipated Changes to the Mission, Strategies, and Goals over the Next Five Years
The Department does not anticipate any significant changes of the mission, strategies and goals over the next five years.

CURRENT WORKFORCE PROFILE (SUPPLY ANALYSIS)
This section describes the agency's current workforce by assessing whether current employees have the knowledge, skills, and abilities needed to address critical business issues in the future.

Demographic Information
As of May 1, 2008, TDHCA had a total headcount of 285 employees. The agency is authorized to have 298 total full-time equivalents (FTEs). Additionally, TDHCA was allocated funds for the CDBG disaster recovery program as part of the disaster relief efforts after Hurricane Rita. There are 12 FTEs that are budgeted for this program currently. Out of the 285 employees there are 10 FTES allocated as part of the CDBG disaster recovery relief program. These FTEs are not counted as part of the FTE cap per Article IX under "federally funded" rule but are included in the FTE count for EEO reporting purposes. These FTEs are considered temporary positions and will be part of TDHCA for at least the next biennium or until federal disaster funds are expended.

The following charts profile TDHCA's workforce and include both full-time and part-time employees. The TDHCA workforce is comprised of 38 percent males and 62 percent females As shown in the table below, the TDHCA workforce has a higher representation of female workers than the state population and civilian workforce.



Workforce by Age

Approximately 62 percent of TDHCA's workforce is over the age of 40. This indicates that the workforce has a good level of overall work experience. TDHCA continues to be successful in the recruitment and retention of employees in this age group. The average age of TDHCA employees is 44.

Employee Tenure

Approximately 46 percent of TDHCA employees have less than 5 years of TDHCA service, 25 percent with 6-10 years of experience, 23 percent with 11-15 years of experience, and 6.3 percent with more than 15 years experience. The average number of years of service for Department employees is 11 years. TDHCA continually strives to ensure that employees are appropriately compensated; to improve internal communications through a variety of venues, to promote training and career development; and coordinate employee service recognition activities to motivate employees and to improve employee retention.

Age

Age Group	Population	Percentage
Under 30	21	7.4%
30-39	87	31%
40-49	84	29.4%
50 – 59	77	27%
60 and over	16	5.6%
Total	285	

As of April 30, 2008

Employee Tenure

Tenure Range	# of Employees	% of Total
<1 year	35	12.3%
1 – 5	97	34%
6 – 10	71	25%
11 – 15	66	23%
16 – 20	11	3.9%
21 – 25	3	1.1%
26 – 30	2	07%
30 +	-	-
Totals	285	100%

As of April 30, 2008

TDHCA's Workforce Compared with the Statewide Civilian Workforce

The tables and charts below compare the percentage of African American, Hispanic, and Female TDHCA employees (as of April 30, 2008) to the statewide civilian workforce as reported by the Texas Workforce Commission Civil Rights Division. Overall, the race and ethnic composition of the TDHCA workforce is very diverse and exceeds the state percentages.

However, there are four areas where TDHCA's Equal Employment Opportunity (EEO) employment percentages are less than the state's percentages:

- Female Technicians (The presence of under-representation in this category is thought to be caused in large part by the small number of employees in this category).
- Female-Official/Administration (This category shows a slight under-representation, less than one percent, for females as compared to the state).
- African American-Official Administration
- African-American Technicians

TDHCA targets recruitment resources that reach out to the workforce in the under-represented categories so that the applicant pool represents the ethnicity and gender to meet EEO goals of the state.

Description of TDHCA Workforce by Ethnicity and Gender

	African American		Hispanic		White		Other		Total	
Equal Employment Opportunities (EEO) Categories*	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
A - Administrators and Officials	-	-	3		9	7	-	-	12	7
P - Professionals	7	22	19	54	31	56	1	6	58	138
T - Technician	3	-	8	2	21	5	-	-	32	7
Q - Para-professionals	1	4	-	6	-	3	-	-	1	13
C - Administrative Support	2	3	0	6	3	2	-	-	5	12
Total by Race/Ethnicity & Gender	13	29	30	68	64	74	1	6	108	177
% of Total by Race/Ethnicity & Gender	5%	10 %	11 %	24 %	29 %	26 %	.4 %	2%	38 %	62 %
Total by Race/Ethnicity	42		98		138		7		285	
% of Total by Race/Ethnicity	15%		34%		48%		2%			

*A – Administrators and Officials: directors, employees establishing broad policy and exercising responsibility for execution of those policies.

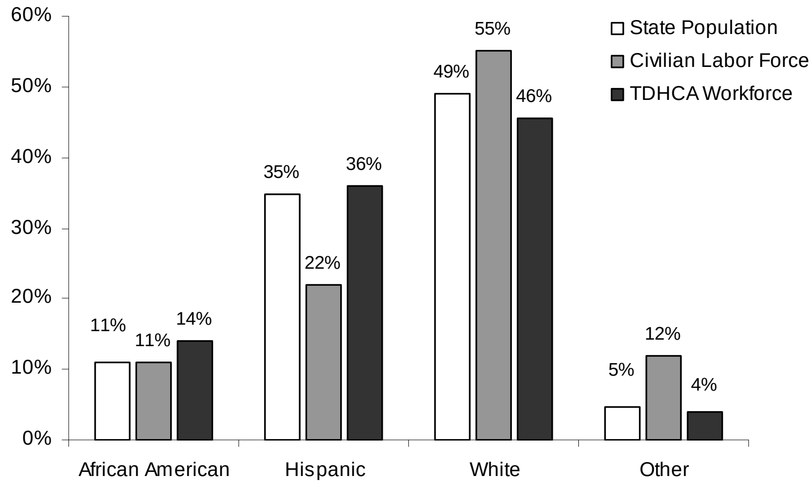
P – Professionals: accountants: systems analysts, attorneys, occupations requiring specialized training or education.

T – Technician: computer technicians, occupations requiring basic scientific or technical knowledge.

Q – Para-professionals: persons performing some of the duties of professionals in a supportive role.

C – Administrative Support: these include clerical payroll clerks, legal assistants, office machine operators, statistical clerks, and bookkeepers.

Comparison of TDHCA Workforce by Race/Ethnicity to State Population and Civilian Workforce



Source: US Census, 2006 American Community Survey; TDHCA Human Resources Data; Uniform Statewide Payroll System (2008 data); and Bureau of Labor Statistics (2004)

TDHCA's workforce is in close correlation to the State population by race and ethnicity.

Comparison of TDHCA EEO and Statewide Employment Statistics

	% African American		% Hispanic		% Females	
Job Category	TDHCA	State	TDHCA	State	TDHCA	State
Officials/Administrators	-	6.6%	16%	14.2%	37%	37.3%
Professionals	15%	8.3%	37.2%	13.4%	70.4%	53.2%
Technicians	7.6%	12.4%	25.6%	20.2%	17.9%	53.8%
Para-Professionals	35.7%	13.8%	42.8%	40.70%	92.8%	39%
Administrative Support	29.4%	11.2%	35.2%	24.10%	70.5%	64.7%

Source: TDHCA Human Resources Data and Bureau of Labor Statistics, Geographic Profile, 2004 for the state of Texas.

Agency Turnover

Percent of Workforce Eligible to Retire

Of the current 285 employees, there are 17 employees or 6 percent who are currently eligible to retire under the "Rule of Eighty". Ten of these employees are from the Manufactured Housing Division and all of these employees work in the field offices as Inspectors. Within the next biennium there will be 11 employees eligible to retire under the "Rule of Eighty". This will be a total of 10 percent employees eligible for retirement.

Of the current 285 employees there will be 8 employees or 3 percent that will be eligible to retire as a result of reaching the age of sixty with five years of service in the next biennium.
Source: Comptroller's Office of Public Accountants

It should be noted that TDHCA currently has six retiree rehires. Management is aware of the impact they will have on the loss of knowledge and skill base and is continually looking at methods to replace this knowledge through:

- Employee Development
- Mentoring Program
- Cross divisional training

Projected Employee Turnover Rate over the Next Five Years

In FY2007 the turnover rate for TDHCA was at its lowest point in comparison to the previous turnover rates. As shown by the chart below, TDHCA's turnover rates have historically been under the state turnover rates and have fluctuated.

Historical Employee Turnover Rate

Entity	FY2003	FY2004	FY2005	FY2006	FY2007
Statewide Turnover	18.2%	42.1%	19.1%	17.9%	19.2%
TDHCA Turnover	16.6%	13.4%	15%	12.5%	8.6%

Source: SAO E-Class as of 4/21/08. Turnover rates include interagency transfers.

Workforce Skills Critical to the Mission and Goals of the Agency

Due to the complexity and shear volume of regulations associated with the many funding programs the Department oversees, a depth of experience and skills are critical to accomplish the mission and goals of the Department that include:

- Mortgage and loan management
- Environmental science
- Underwriting
- Asset Management

Other critical skills the Department's workforce needs in order to effectively accomplish its business functions and provide a high level of customer service include:

- Leadership and management skills
- Analysis/research/planning/problem solving
- Financial management, financial analysis, and accounting expertise
- Knowledge of the legislative system
- Knowledge of the housing market industry
- Mentoring and coaching
- Marketing
- Multi-lingual
- Outreach and technical assistance
- Computer skills ranging from entry level data entry to highly skilled information systems programmers
- Customer service skills

- Investigative/inspection related knowledge
- Sophisticated oral and written communication skills
- Legal analysis

Use of Consultants

To effectively achieve its mission, TDHCA will continue to use consultants and contract workers in areas where their unique skills and experience represents the most effective use of the State's resources. Two divisions that expect the greatest ongoing use of consultants are IS, and Bond Finance.

ISD

TDHCA's Information Systems Division makes limited, targeted use of consultants for approved capital budget projects and software development support. In the current biennium, the Department has employed one contract developer to assist in the support of PeopleSoft Financials 8.8 and two contract developers to help support the Community Affairs Contract System and the Community Development Block Grant module of the Housing Contract System. Additionally, the Department plans to utilize two contract developers for the Manufactured Housing Systems Upgrade, an FY 2008-2009 capital budget project. Consultants are used for projects and support in cases where specialized skills or additional staffing are needed for a specific timeframe.

Bond Finance

Bond Finance uses the following types of consultants:

- Bond Counsel – A nationally recognized law firm or firms experienced in the issuance of mortgage revenue bonds.
- Financial Advisor – Typically an investment banking firm experienced in issuance of mortgage revenue bonds.
- Master Servicer/Administrator – A financially sound bank or trust company experienced in tax compliance review and loan servicing for tax-exempt single family mortgage revenue bond programs.
- Disclosure Counsel – A law firm experienced in securities laws particularly as it relates to disclosure of information by securities issuers to the private markets.
- Rating Agencies – A national rating agency which analyzes bond issues and assigns a rating to them to indicate to prospective bondholders the investment quality of the issue.
- Interest Rate Swap Advisor – Primarily monitors interest rate swaps used to hedge single family mortgage revenue bonds.
- Guaranteed Investment Contract Broker – Provides reinvestment services for single family mortgage revenue bond issues, single family commercial paper issues, and/or multifamily mortgage revenue bond issues.

FUTURE WORKFORCE PROFILE (DEMAND ANALYSIS)

This section describes the Department's future business and staffing outlook. This analysis helps to identify trends, future influences, and challenges for the agency's business functions, new and at-risk business, and workforce composition.

Expected Workforce Changes Driven by Factors such as Changing Missions, Goals, Strategies, Technology, Work, Workloads, and Work Processes

A. Expected Workforce Changes

- Increase in workload of Uniform Physical Condition Inspections of multifamily housing units
- Increase in workload of compliance monitoring of multifamily housing units
- Retirement of employees with significant institutional knowledge and expertise
- Increased emphasis on technology upgrades to better serve the Department and it's customers
- Increased diversity in employee background, characteristics, and demographics
- Decrease in the CDBG disaster recovery staff as funds are expended
- Difficulty in attracting and retaining qualified applicants for certain positions that are impacted by the compensation compare to the private sector

Future Workforce Skills Needed

In addition to those skills described above in the "Workforce Skills Critical to the Mission and Goals of the Agency" section it is expected that the following skills will also be needed:

- Recruitment of multilingual employees to assist customers, translate documents, provide assistance at public hearings, conduct roundtables and gather public comment.
- As the Department continues to use technology to provide services to the Department and customers this will require advanced computer skills in systems design and analysis, web design and development, and the willingness to learn how to use more advanced technology systems.
- The PMC Division will need skilled inspectors to conduct multifamily housing units.
- Because of the projected retirement of employees within the next biennium the Department will need to recruit for highly skilled and experienced employees.

Anticipated Increase or Decrease in the Number of Employees Needed to Do the Work

It is anticipated that at least 4 additional FTEs will be needed to perform the work in the portfolio management and physical inspections unit within the PMC Division. Other workforce demands will be addressed with the current FTEs allocated to the Department. The Department does not expect a decrease in FTE's and any change in increased work loads will be addressed through streamlining of process and optimum use of technology.

Anticipated Use of Consultants

It is anticipated that the IS and Bond Finance divisions will continue to use consultants to complete their ongoing work in the roles above described in the Current Workforce profile section.

GAP ANALYSIS

Anticipated surplus or shortage of employees

Based on the workforce analysis it is anticipated there will be a shortage of institutional knowledge, skills and experience due to projected retirements. It is also anticipated that there may be a shortage of skilled inspectors for the Manufactured Housing Division based on the projected retirements for the field offices. The Manufactured Housing Division will need to determine how to fill Field Inspector positions and Field Management positions. The Department does not anticipate a surplus of employees.

Anticipated surplus or shortage of skills

Due to the changing workforce of the Department it is anticipated that there may be a shortage of the following skills:

- Employees with valued institutional knowledge, program knowledge, expertise, and experience
- IS staff with advanced technological skills and the ability to identify changing needs of the technology for the Department.
- Key management positions with the knowledge and skills to carry out the mission, goals and objectives of the Department
- Employees with skills to manage and work with a diverse and multi-generational working environment

STRATEGY DEVELOPMENT

This section describes strategies for workforce transition.

Specific Goals to Address Workforce Competency Gaps or Surpluses

To plan for TDHCA's future workforce needs, the following goals have been developed.

Gap	**Retention of institutional knowledge, program knowledge, expertise and experience**
Goal	To retain a workforce of institutional knowledge, program knowledge, expertise, and experience
Rationale	• There are 11 employees eligible to retiree that are within the

	Manufactured Housing Division and have extensive knowledge and skills as Inspectors • Transferring the knowledge of employees who are eligible to retire is critical to developing a skilled and experienced workforce • To develop and train staff to fill positions through attrition • To maintain a workforce that can carry out the mission, goals and objectives of the Department
Action Steps	• Work with senior management to identify key positions in their divisions and determine critical competencies and skills needed for those positions and how senior management will develop or recruit for these positions • Provide employee training to develop critical skills needed • Encourage management to provide employees who are seeking new challenges with opportunities for cross/rotational training • Implement the approved Mentoring Program • Encourage experienced employees to participate in the mentoring program • Encourage management to create training and development plans to increase competency in those employees that have demonstrated the potential and interest to assume higher level positions as vacancies occur • Establish recruitment resources that market specific to the housing industry to gain a diverse pool of applicants • Work with senior management to fill critical positions quickly • Continue to conduct the Organizational Excellence Survey to determine trends in employee satisfaction and address areas or trends that could be affecting employee turnover • Provide diversity training for Department staff periodically • Provide staff with flextime, telecommuting and other avenues to balance work and family needs.

Gap	**IS staff with advanced technology skills**
Goal	To provide the Department with technology that will increase efficiency of information for customers and staff, increase customer satisfaction, and provided streamlining of technology based programs
Rationale	• Training is needed to stay current with emerging technology

	There are increased requests for changes to IT systems to betters serve our customers and staff
Action Steps	• Continue to develop IT staff • Determine anticipated changes needed to systems and allow for training and staff development of new technologies • Cross functional training of IT staff • Develop plans for future needs of the Department web-based programs

Gap	**Key management positions with the knowledge and skills to carry out the mission, goals and objectives of the Department**
Goal	Develop a succession plan to identify key management positions and develop an applicant pool of potential candidates to fill these management positions
Rationale	Management in key positions is essential to carry out the goals and mission of the Department without interruption to the program areas
Action Steps	• Encourage employees currently in a Team Leader, Project Manager and Manager positions to attend training to increase leadership and management skills. • Promote employees when opportunities present themselves. • Conduct 360 surveys of management staff to identify gaps in leadership skills and focus on improving those skills • Identify key skills needed for key management positions and provide training opportunities, rotational/cross functional training Encourage management to mentor employee with the potential and desire for leadership roles

Gap	**Employees with skills to manage and work with a diverse and multi-generational working environment**
Goal	Ability to manage and lead a diverse workforce and continue to carry out the mission and goals of the Department
Rationale	As the workforce continues to change there is an increase in multi-generational and diverse backgrounds entering the workforce. Employees will need to be able to work with and manage people with differing opinions and work ethics and continue to recruit and retain employees
Action Steps	• Provide multi-generational training to employees and how to work as a team with differing views.

	• Conduct team building retreats • Continue to celebrate multi-cultural events at the Department to promote diversity and an opportunity for staff to participate in these events

APPENDIX G. SURVEY OF ORGANIZATIONAL EXCELLENCE RESULTS AND UTILIZATION PLANS

Employees' Attitudes and Possibilities for Change

In February of 2008, TDHCA participated in the Survey of Organizational Excellence sponsored by the University of Texas with a response rate of 85 percent. This survey forms the basis of the following observations concerning TDHCA's strengths and weaknesses according to the employees of the Department:

In reviewing the following sections, the following scoring categorizations are useful:

- Scores of 400 or higher indicate areas of substantial strength.
- Scores above 300 indicate employees perceive the issue more positively than negatively.
- Scores below 300 indicate employees perceive the issue more negatively than positively.
- Scores below 200 indicate areas of concern for the Department. They should receive immediate attention. No items in the TDHCA survey scored below the 200 range.

In comparison to the 2005 Survey or Organizational Excellence the Department scores improved. The chart below shows the comparison of scores for 2005 versus 2008. All the scores increased in 2008 with the exception of one score that remained the same.

Score Legend

♦	5 highest scores
◊	5 lowest scores

CONS#	CONSTRUCT NAME	SCORE 2005	SCORE 2008	POINTS DEVIATED
1	Supervisor Effectiveness	◊ 330	◊ 348	+18
2	Fairness	343	362	+19
3	Team Effectiveness	◊ 327	◊ 345	+18
4	Diversity	342	364	+22
5	Fair Pay	◊ 274	◊ 302	+28
6	Physical Environment	♦ 377	♦ 377	Same
7	Benefits	359	373	+14
8	Employment Development	352	♦ 377	+25
9	Change Oriented	◊ 334	◊ 348	+14
10	Goal Oriented	346	362	+16
11	Holographic	343	353	+10
12	Strategic	♦ 384	♦ 386	+2
13	Quality	♦ 375	♦ 388	+13
14	Internal	◊ 326	◊ 333	+7
15	Availability	♦ 369	373	+4
16	External	♦ 373	♦ 376	+3
17	Job Satisfaction	362	367	+5
18	Time and Stress	356	368	+12
19	Burnout	358	368	+10
20	Empowerment	351	362	+11

Areas of Strength

The Department's strengths lie in the perception employees have according to the following: Qualify, Strategic, Physical Environment, Employee Development, and External. They are discussed below in the order of scores received, from highest to lowest.

- ***Quality (388):*** Describes the degree to which the quality principles, such as customer service and continuous improvement are a part of the organizational culture.
- ***Strategic (386):*** This reflects employees' thinking about how the Department's Strategic Orientation culture responds to external influences that should a play a role in defining the mission, vision, services and products. This implies the ability of the Department to seek out and work with relevant external entities.
- ***Physical Environment (377):*** Describes the employees' perceptions of the total work atmosphere and the degree to which employees believe it is a "safe" working environment. This category addresses the "feel" of the workplace as perceived by the employee.

Note: The surveying effort occurred after the Department's move to a new building with substantially different working environment and parking situation.

- ***Employee Development: (377)*** This category is an assessment of the priority given to employee's personal and job growth. It provides insight into whether the culture of the organization sees human resources as the most important resource or as one of many resources. It directly addresses the degree to which the organization is seeking to maximize gains from investment in employees.
- ***External (376):*** This category looks at how information flows into the Department from external sources, and conversely, how information flows from inside the organization to external constituents. It addresses the ability of Department staff to synthesize and apply external information to work performed by the Department.

Areas of Concern

Areas where TDHCA did not score as high were Fair Pay, Internal Communication, Team Effectiveness, Supervisor Effectiveness, and Change Orientation issues as described below from lowest score to highest scores. While Fair Pay is the lowest score, it is still viewed as more positive than negative.

- ***Fair Pay (302)***: Fair Pay is a common negative perception across most, if not all, state agencies. This category addresses perceptions of the overall compensation package offered by the Department. It describes how well the compensation package "holds up" when employees compare it to similar jobs in other organizations.
- ***Internal (333):*** This captures the flow of communication within the Department from the top down, bottom up, and across divisions. It addresses the extent to which communication exchanges are open and candid and move the Department toward goal achievement.
- ***Team Effectiveness (345):*** This describes employees' perceptions of the people within the Department with whom they work on a daily basis to accomplish their jobs (the work group or team). Also, it gathers data about how effective employees think their work

group is as well as the extent to which the Department's environment supports cooperation among employees.

- ***Supervisor Effectiveness (348):*** This category provides insight into the nature of supervisory relationships in the Department, including the quality of communications, leadership, thoroughness, and fairness that employees perceive exists between supervisors and them. This category helps organizational leaders determine the extent to which supervisory relationships are a positive element of the organization.
- ***Change Oriented (348)*****:** This category describes employees' perceptions of the Department's capability and readiness to change based on new information and ideas. It also addresses the Department's aptitude to process information timely and to act upon it effectively. Most importantly, it also examines the organization's capacity to draw upon, develop, and utilize the strengths of all in the Department for improvement.

Strategies for Improvement

The Department will continue to capitalize on the information derived from the 2008 Survey of Organizational Excellence.

<u>Improving Areas of Concern</u>

- ***Fair Pay***: While Fair Pay continues to be the lowest scoring category for the Department this category has improved based on the last survey score. There have been many ways the Department has addressed fair pay to include:
  - Review of all pay actions for equity among similar positions.
  - Providing each Division Director with equity reports for the division and an equity report for Department positions.
  - A Department-wide classification audit was conducted by the State Auditor's Office to determine misclassifications for the Department. There were only 8 positions that needed to be reclassified as part of this audit. The Department requires that employee classifications be reviewed during each employee annual performance review to ensure that position classifications are appropriate.
  - The Department participated in a National Housing Organization Compensation Survey. This survey allows the Department to review salaries of other similar positions in comparison to Department salaries.

<u>Enhancing Strengths</u>

- The Department is committed to instilling a culture of diversity, transparency, professionalism, and integrity. The Department will continue to analyze organizational development through review of program organizational structure to ensure that processes and program goals and objectives are being met with the most streamlined measures and are functioning effectively and efficiently.
- The Department will continue to have open communications with staff and will promote an environment that allows employees to improve their skills and abilities through continuing education, external training, in-house training, and other training resources as needed.

APPENDIX H. HISTORICALLY UNDERUTILIZED BUSINESS PLAN

GOAL

The Texas Department of Housing and Community Affairs strives to provide procurement and contracting opportunities for all businesses, with efforts to maximize inclusion of minority and women owned businesses.

OBJECTIVE

The Department shall make a good faith effort to maximize the award of goods and services to HUBs in all facets of contracting, subcontracting, and purchases. Through all reasonable means, the Department strives to award procurement and subcontracting opportunities to minority and women owned businesses.

STRATEGY

The following programs have been developed and are part of TDHCA's good faith effort to achieve these goals:

- HUB Orientation/Assistance Package
- Actively participate in Economic Opportunity Forums (EOFs) enhancing the vendor knowledge of procurement opportunities at the Department.
- Utilization of the Electronic State Business Daily web-site provides opportunity to all HUBs and HUB subcontractors to acquire and participate in the Department's bid opportunities.
- Multiple Awards of single requisitions to enhance HUB vendor participation.
- Specifications, delivery dates, and guidelines are reasonable and concise.
- Ensuring that specifications and terms and conditions reflect the actual needs.
- Inclusion of contractors with reference list of Certified HUBs for subcontracting opportunities.
- Ensuring subcontracting plans are appropriately and accurately included in services and commodities contracts of which the value exceeds $100,000. Evaluation of the contractor compliance with subcontracting plans as applicable in contracts of $100,000 or greater.

OUTPUT MEASURES

Table I. HUB Goals and TDHCA Performance

Category	TDHCA Performance		TDHCA Goals for 2008
	2006	**2007**	
Heavy Construction	N/A	N/A	N/A
Building Construction	N/A	N/A	N/A
Special Trades Contracts	100%	N/A	20.0%
Professional Services Contracts	32.8%	39.9%	15.0%
Other Services Contracts	36.9%	60.2%	25.0%
Commodities Contracts	75.2%	85.9%	25.0%
Grand Total HUB Participation	42.6%	62.1%	

Table II. TDHCA Performance – Fiscal Year 2006

Category	TDHCA Performance		Percentage Spent With HUBS	Statewide Goal
	Total Dollar Amount Spent	Total Dollar Amount Spent With HUBS		
Heavy Construction	N/A	N/A	N/A	11.9%
Building Construction	N/A	N/A	N/A	26.1%
Special Trades Contracts	4,950.00	4,950.00	100%	57.2%
Professional Services Contracts	219,408.00	72,000.00	32.8%	20.0%
Other Services Contracts	2,648,163.00	979,327.00	36.9%	33.0%
Commodities Contracts	519,326.00	390,941.00	75.2%	12.6%
Grand Total Expenditures	3,391,848.00	1,447,218.00	42.6%	

B. TDHCA Performance – Fiscal Year 2007

Category	TDHCA Performance		Percentage Spent With HUBS	Statewide Goal
	Total Dollar Amount Spent	Total Dollar Amount Spent With HUBS		
Heavy Construction	N/A	N/A	N/A	11.9%
Building Construction	N/A	N/A	N/A	26.1%
Special Trades Contracts	N/A	N/A	N/A	57.2%
Professional Services Contracts	212,149.00	84,700.00	39.9%	20.0%
Other Services Contracts	1,974,614.00	1,189,822.00	60.2%	33.0%
Commodities Contracts	354,762.00	304,877.00	85.9%	12.6%
Grand Total Expenditures	2,541,526.00	1,579,399.00	62.1%	

EXTERNAL/INTERNAL ASSESSMENT

TDHCA continues to increase the use of HUBs through education of staff on procurement policy rules and procedures; through aggressively recruiting and educating prospective HUB businesses; assisting HUBs with the state HUB Certification program; and participation in EOFs with other state entities, local and federal entities and elected officials. Through participation in these Forums, TDHCA has developed new vendor relationships and continues to pursue new avenues for HUB participation. TDHCA has established and exceeded the previous years goals for procurement from HUB and subcontracting of HUB vendors.

February 2007

REPORT ON THE
2006 COMMUNITY NEEDS SURVEY

TABLE OF CONTENTS

INTRODUCTION

In 2006, the Texas Department of Housing and Community Affairs (TDHCA) conducted the 2006 TDHCA Community Needs Survey (CNS), which was designed to provide TDHCA with an understanding of housing and community assistance needs at the local level. The survey gave local officials and housing and community service professionals, who are most familiar with the unique characteristics of their communities, an opportunity to inform TDHCA about how their needs can be most effectively addressed. Data collected by the survey will serve as a valuable resource in program planning when determining how to best target funds and serve local communities.

CNS HISTORY

TDHCA developed and collected surveys in 2000 and 2003, which included approximately 200 and 27 questions respectively. The number of questions was reduced for the 2003 survey in the interest of brevity and to ensure the continuation of a high response rate. The 2000 CNS was distributed to approximately 1,450 mayors and county judges, and resulted in a 55 percent response rate. The 2003 CNS was mailed to over 2,000 cities, counties, local housing departments, US Department of Agriculture (USDA) field offices, public housing authorities, and councils of governments, with a response rate of 38.3 percent.

The 2000 and 2003 CNS results were used as a component of TDHCA's Affordable Housing Needs Score, which awards location points for the Housing Tax Credit, Housing Trust Fund, and HOME Investment Partnerships programs. Because of low response rates to these surveys, the Department has since removed the CNS component from the score due to limited population representation. The 2006 CNS will be used for informational purposes and as a guide when making programmatic decisions.

REPORT ON THE 2006 COMMUNITY NEEDS SURVEY

The *Report on the 2006 Community Needs Survey* contains analysis of data collected by the CNS. Survey responses will provide TDHCA with local and regional perspectives when considering programmatic changes. The results will also be incorporated into the *State of Texas Low Income Housing Plan and Annual Report* and US Department of Housing and Urban Development Consolidated Plans as resources describing local need.

SURVEY METHOD

Beginning in March 2006 and ending May 2006, the Department conducted an online 2006 CNS to examine housing and community service needs at the local level. TDHCA used an online survey software called Zoomerang (www.zoomerang.com) to develop a short survey that asked respondents about their community's need for housing, homeless assistance, community development, special needs populations, energy assistance, and other needs.

SURVEY QUESTIONS

The Survey contained 18 total questions, including an opportunity at the conclusion for the respondent to add comments. The first six questions asked the respondent for their contact information, including name, e-mail address, organization, city, county, and respondent type. The city, county, and respondent type fields were mandatory so that the Department could track which organizations and areas responded to the survey.

The remainder of the questions focused on subjects related to housing and community services needs. The Department developed questions and answer choices so that need could be gauged across assistance categories, as well as compare assistance types within program areas. Some questions asked the respondent to choose a single answer, some questions asked for rankings, and some asked for yes or no answers. In attempt to maximize the user-friendliness of the survey, TDHCA chose not to require answers for each question. This way respondents would not feel obligated to spend time answering questions they did not want to.

2006 CNS Questions

Question Subject	Question and Answer Choices
Name	Filled in by Respondent
E-mail Address	Filled in by Respondent
Organization	Filled in by Respondent
City	Filled in by Respondent
County	Filled in by Respondent
Respondent Type	Respondent chose from the following options: • State Representative • State Senator • Mayor • County Judge • City Manager • Housing/Planning Dept. • USDA Local Office • Public Housing Authority • Council of Governments • Community Action Agency • Housing Opportunities for Persons with AIDS (HOPWA) Agency
General Need	Rank your community's needs for the following types of general housing assistance activities from highest to lowest level of need (1 indicates the highest need). Each ranking number may be used only once across the set of activities. • Housing Assistance (Homebuyer Down Payment, Home Repair, and Rental Payment Assistance) • Development of Apartments (New Construction or Rehabilitation of Rental Units) • Energy Assistance (Utility Payments or Home Weatherization Activities) • Assistance for Homeless Persons

	• Capacity Building Assistance (Training and Technical Assistance, Assistance with Operating Costs, and Predevelopment Loans to Help Local Housing Organizations Develop Housing)
Housing Assistance	If there is a need for direct housing assistance to households in your community, which activity has the greatest need? (Select One) • Assistance to Purchase a Home • Home Repair Assistance • Rental Payment Assistance • There is a Minimal Need for Direct Housing Assistance in my Community • No Opinion
Development of Apartments	With regard to rental development in your area, which activity is most needed? (Select One) • Rehabilitation of Existing Rental Units • Construction of New Rental Units • The Need for Both Types of Rental Housing is Approximately the Same • There is a Minimal Need for Rental Housing Development in my Community • No Opinion
Energy Assistance	With regard to energy assistance, which activity is most needed? (Select One) • Educational Activities • Repair and Replacement of HVAC Equipment • Utility Payment Assistance • Weatherization and Minor Home Repairs to Increase Energy Efficiency • There is a Minimal Need for Energy Assistance in my Community • No Opinion
Assistance for Homeless Persons	If there is a homeless population in your community, which activity is most needed to address this population? (Select One) • Creation or Renovation of Short-Term, Emergency Shelters • Essential Services for the Homeless (Counseling, Job Training, Assistance in Obtaining Housing) • Homeless Prevention Services (Rent and Utility Assistance and Case Management) • Maintenance and Operation Costs for Homeless Facilities • There is a Minimal Need for Assistance for Homeless Persons in my Community • No Opinion
Capacity Building	If local housing organizations need assistance to increase their ability to apply for funding and develop affordable housing, which activity is most needed? (Capacity building activities help to increase the ability of local organizations to apply for funding and develop affordable housing.) (Select one) • Assistance with Operating Costs • Predevelopment Loans • Training and Technical Assistance • There is a Minimal Need for Capacity Building Assistance in my Community • No Opinion
Special Needs Populations	Which low income population is most in need of assistance in your community? (Select One) • Poverty-Level Households • Elderly Households • Persons with Disabilities • Persons with HIV/AIDS • Homeless Persons • No Opinion
Migrant Farm Workers	In there a need for migrant or seasonal farm worker housing in your area? • Yes • No • No Opinion
Fair Housing and	Is there a need for information and training on fair housing laws to help mitigate housing

Discrimination	discrimination occurring in your community? • Yes • No • No Opinion
Community Development	Rank your community's need for the following types of community development activities from highest to lowest level of need (1 indicates the highest need). Each ranking number may be used only once across the set of activities. • Public Infrastructure (Water, Sewer, Drainage, Street Improvements) • Economic Development (Job Creation or Retention) • Community Facilities (Community Centers and Parks) • Disaster Recovery for Damaged Infrastructure • Community Planning • Housing
Working with TDHCA	Do you need more detailed information on the affordable housing and community affairs programs offered by the Texas Department of Housing and Community Affairs? • Yes • No • No Opinion
Additional Comments	Filled in by Respondent

SURVEY TIMELINE

On Wednesday, March 1, 2006, TDHCA launched the survey on the website. Announcement postcards were initially mailed to the survey group, and subsequent electronic communication was used to further publicize the survey. The survey was available for completion until Friday, May 5, 2006.

ENTITIES SURVEYED

With the CNS, TDHCA's goal was to develop a better understanding of the housing and community services needs at the local level. As a result, TDHCA chose to survey local officials and housing and community service agencies because they are most familiar with the unique characteristics of their communities. TDHCA sent the CNS to the following individuals and entities: State Representatives (150 individuals), State Senators (31 individuals), Mayors (1,226 individuals), County Judges (254 individuals), City Managers (289 individuals), Housing/Planning Departments (43 entities), USDA Local Offices (31 entities), Public Housing Authorities (401 entities), Councils of Governments (24 entities), Community Action Agencies (47 entities), and Housing Opportunities for Persons with AIDS (HOPWA) agencies (33 entities).

In past surveys, TDHCA contacted state representatives and senators for support in encouraging local officials to fill out the survey. For the 2006 CNS, TDHCA decided to include these state representatives and senators in the survey respondent pool itself, as they have unique perspectives on and knowledge of issues affecting their districts. Furthermore, because as state representatives and senators they have an oversight responsibility of TDHCA, staff was interested in obtaining their ideas on housing and community affairs subjects.

Mayors, county judges, and city managers were surveyed due to their broad knowledge and involvement in local issues. Councils of governments also have broad knowledge and involvement in local issues, and many also administer local housing and community services programs. Housing and planning departments, USDA local offices, public housing authorities, and community action agencies were surveyed due to their specific involvement in housing and community affairs programs and services. HOPWA agencies were included because they administer US Department of Housing and Urban Development HOPWA dollars, which fund rental and emergency assistance activities for persons with HIV/AIDS, and have distinct perspectives as a health services provider.

SURVEY NOTICES

In early March 2006, TDHCA began the notification process to advertise the availability of the survey. This effort included distribution of postcards and e-mails to survey groups. This notification included a brief description of the survey and directed recipients to a website for more information and a link to the online survey. Additionally, The Texas Association of Regional Councils, Texas Municipal League, and the Texas State Office of the United States Department of Agriculture directly encouraged their members to respond to the survey at the request of TDHCA. Approximately, 2 weeks before the survey closed, a follow up postcard was sent to everyone who had not previously submitted the survey. State senators and representatives received a letter informing them of the survey, as well as a follow-up e-mail from TDHCA staff.

In order to limit the respondent pool to the targeted groups and ensure the reliability of response rates and data, TDHCA did not make the survey web address public. Only those individuals receiving the announcement postcard and subsequent reminders were given the address of the website needed to complete the survey.

E-mail notices and postcard mailings included the following language:

> The TDHCA Community Needs Survey just won't be the same without everyone's input. If you haven't already done so, please take a moment to complete the brief online survey at http://www.tdhca.state.tx.us/needs-survey.htm. This is your chance to tell us how to best address Texas' affordable housing and community development needs. The survey data will help determine the most effective use of existing resources and develop future assistance programs. If you have already completed the survey, thank you for your valuable time and input!

The survey was further publicized in the March 2006 edition of the TDHCA newsletter, *Breaking Ground*.

SURVEY RESPONSES

The Department received 434 responses to the CNS. Based on these responses, the Department received the following feedback.

RESPONSE RATES

TDHCA notified a total of 2,529 individuals and entities of the 2006 CNS. As of the close of the survey on Friday, May 5, 2006, TDHCA's survey software reported 434 completed surveys, which represents a 17.2 percent response rate.

Comparing respondent types, housing and planning departments had the highest response rate with 93 percent, while community action agencies were second at 76.6 percent.

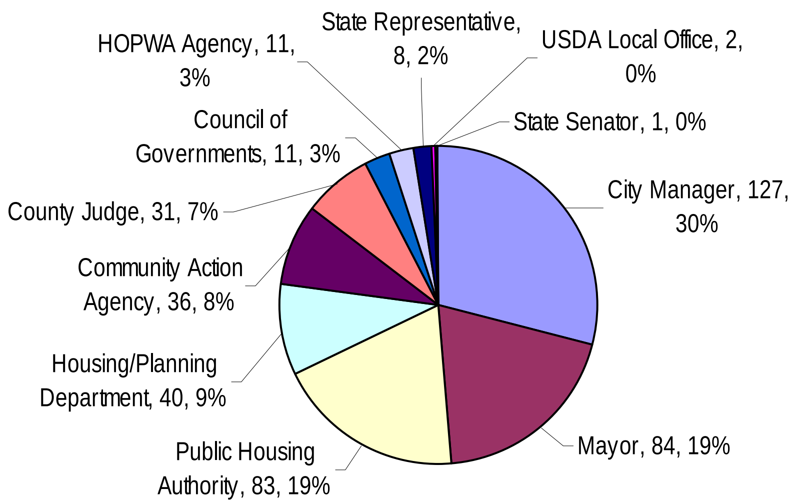
CNS Response Rate by Respondent Type

Respondent Type	Number of Organizations	Number of Responses	Response Rate
State Representative	150	8	5.3%
State Senator	31	1	3.2%
Mayor	1,226	84	6.9%
County Judge	254	31	12.2%
City Manager	289	127	43.9%
Housing/Planning Department	43	40	93.0%
USDA Local Office	31	2	6.5%
Public Housing Authority	401	83	20.7%
Council of Governments	24	11	45.8%
Community Action Agency	47	36	76.6%
HOPWA Agency	33	11	33.3%
Total	2,529	434	17.2%

RESPONDENT TYPE

TDHCA surveyed a variety of different individuals and entities involved in housing and community affairs activities in order to capture broad perspectives on the needs facing their communities. The chart below depicts the breakdown of CNS respondents according to respondent type. The greatest percentage of respondents was city managers, comprising 30 percent of the total respondent pool. State representatives and state senators were among the smallest percentages of the pool.

All Respondents by Type or Affiliation (434 Total)



City managers, mayors, and county judges, who together comprise a majority 56 percent of respondents, offer unique perspectives as they perform city service or are locally elected. Housing and planning departments, USDA local offices, public housing authorities, councils of governments, community action agencies, and HOPWA agencies, which together comprise 42 percent of respondents, offer the perspectives of service providers. This mix of respondents representing the general public as well as those representing people receiving assistance will provide balanced viewpoints of local need.

Results are organized by survey question, analyzed first by all survey respondents statewide, then by each region. Total percentages may not add due to rounding.

ALL RESPONDENTS

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. Overall, Housing Assistance Activities was the category most often ranked the highest, while Energy Assistance Activities was the next most likely to receive a priority rank. Assistance for Homeless Persons appeared to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

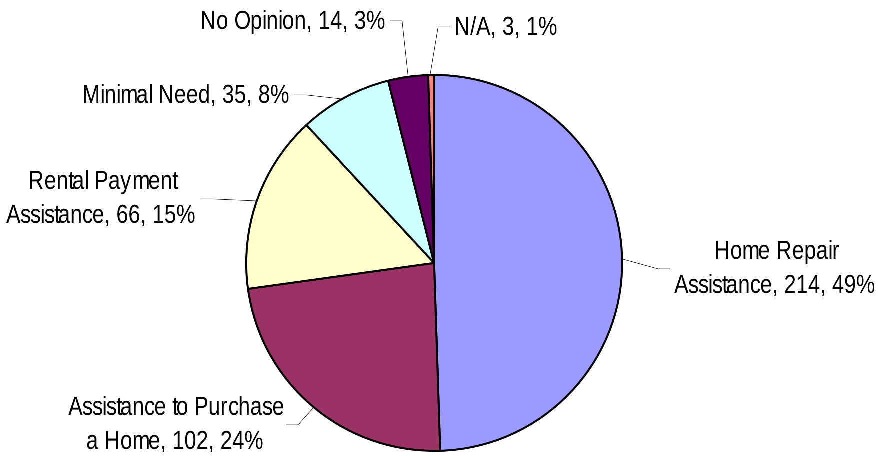
Ranking of Need for Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	47% 142	22% 68	18% 54	7% 22	1% 2	5% 15	100% 303
2. Development of Apartments	19% 60	20% 62	26% 81	15% 48	13% 42	8% 24	101% 317
3. Energy Assistance	22% 76	33% 112	25% 86	13% 43	3% 11	4% 12	100% 340
4. Assistance for Homeless Persons	6% 21	8% 27	13% 45	20% 71	39% 139	16% 56	102% 359
5. Capacity Building Assistance	13% 51	12% 50	17% 70	25% 102	21% 85	12% 47	100% 405

HOUSING ASSISTANCE

Of all respondents, almost half indicated home repair assistance as the greatest need in their respective communities. Home purchasing assistance was the next most selected, with a quarter of the responses. Less than 10 percent considered need for housing assistance to be minimal.

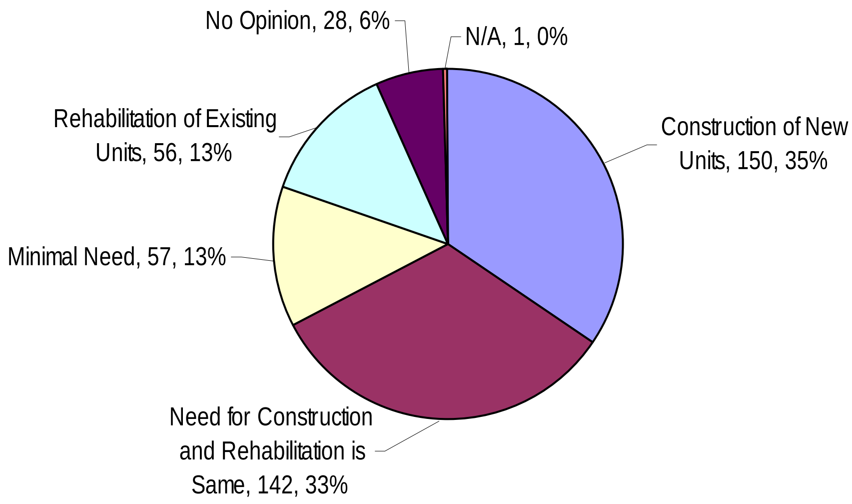
Housing Assistance Activity with Greatest Need (434 Respondents)



DEVELOPMENT OF RENTAL UNITS

A large majority of the total respondents, 68 percent, stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

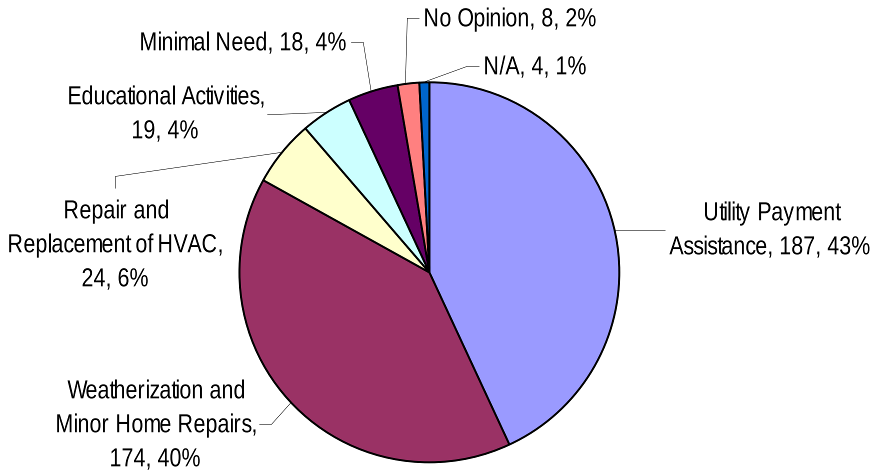
Rental Development Activity with Greatest Need (434 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all respondents, while assistance with weatherization and minor home repairs was a close second. These two activities dominated the responses in this category.

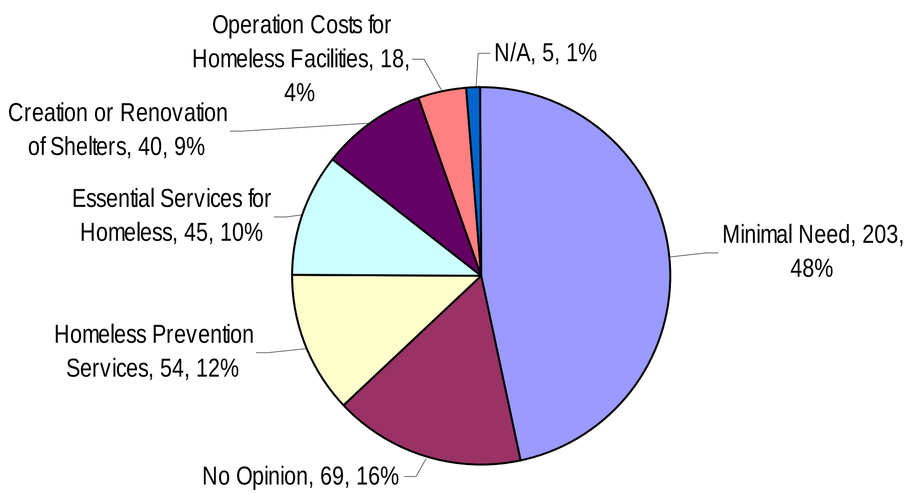
Energy Assistance Activity with Greatest Need (434 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Most respondents statewide did not indicate a great necessity for homeless assistance activities. Almost half of all respondents said there was only a minimal need for such activities in their communities and another 16 percent had no opinion. Of the respondents who did identify need, a similar percentage indicated homeless prevention, essential services, and creation or renovation of shelters.

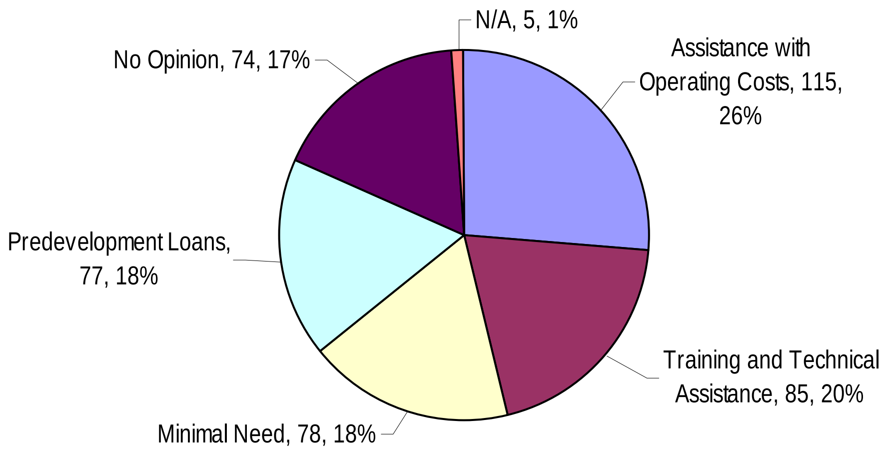
Homeless Assistance Activity with Greatest Need (434 Respondents)



CAPACITY BUILDING ASSISTANCE

Assistance with operating costs was selected by more than a quarter of the respondents as the most needed capacity building activity. Opinion was roughly divided evenly between the remaining activity categories, with a significant portion also indicating a minimal need or giving no opinion.

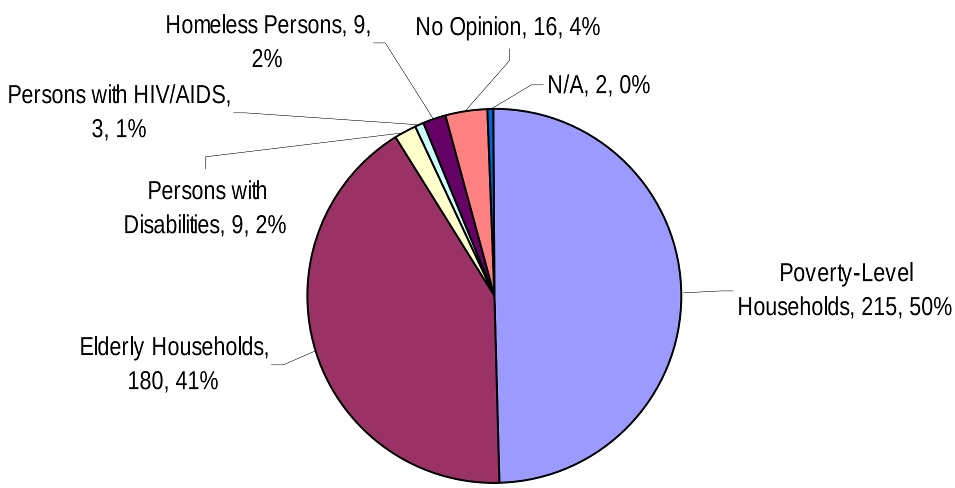
Capacity Building Activity with Greatest Need (434 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents, half indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most selected group, indicated in more than 40 percent of the responses. These two population groups together dominated the responses in this category.

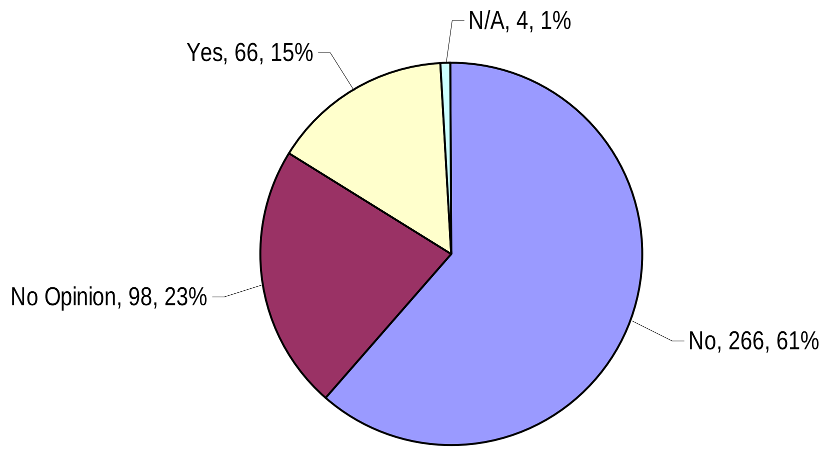
Population Most in Need of Assistance (434 Respondents)



MIGRANT FARM WORKERS

A significant majority of all respondents saw no need for migrant farm worker or seasonal housing in their communities. Only 15% stated that a need existed.

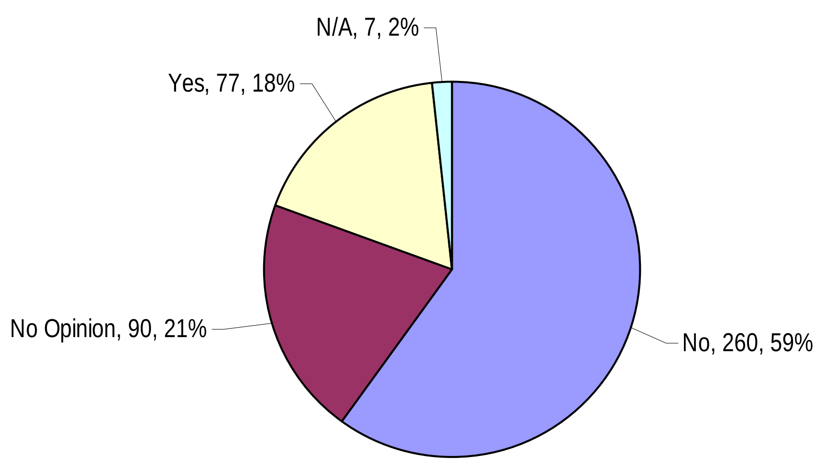
Need For Migrant Farm Worker Housing (434 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of all respondents stated there was no need for training on fair housing laws in their communities. Only 18 percent said a need was present.

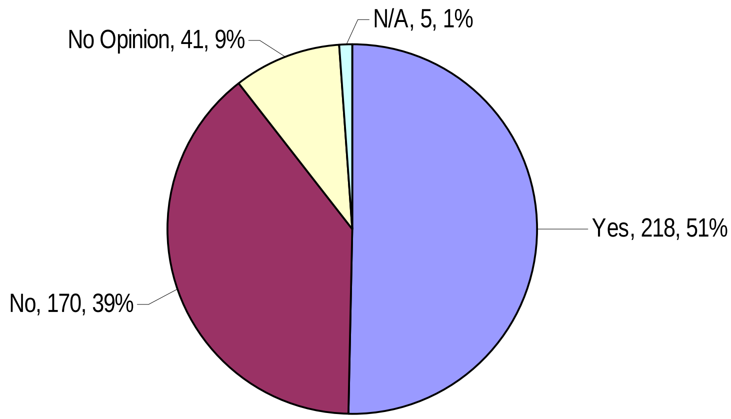
Need for Fair Housing Training (434 Respondents)



WORKING WITH TDHCA

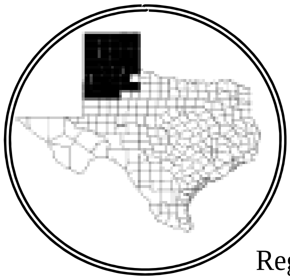
Just over half of all respondents said there was a need for information on the programs offered by TDHCA. At the same time, however, a large portion indicated they were sufficiently informed about the Department.

Need for Information from TDHCA (434 Respondents)



SUMMARY

Home repair assistance was the most commonly identified housing assistance need across the state, registering more support in the survey than home purchasing assistance. In the area of rental development, more respondents put an emphasis on new-unit construction than on rehabilitation of existing units. Utility payment assistance and weatherization assistance registered equal numbers of advocates in the survey, as both activities exceeded the other energy assistance options in number of responses. Most respondents statewide did not indicate a great necessity for homeless assistance activities. In terms of capacity building, assistance with operating costs was most commonly identified as the greatest need statewide. When assessing populations most in need of assistance, survey respondents indicated poverty-level and elderly populations ahead of other special needs groups by large margins. While some border regions were prominent exceptions, most statewide respondents did not point to a need for migrant farm worker housing or for fair housing training in their communities. Asked whether TDHCA needed to provide more information about its programs, respondents were relatively split down the middle. Half said more information was necessary, while the other half said no or expressed no opinion.



REGION 1

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. In Region 1, Housing Assistance and Energy Assistance Activities were the two categories most often ranked the highest by respondents. Energy Assistance appears to be a greater priority to respondents from the region than from the state as a whole. Assistance for Homeless Persons appears to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

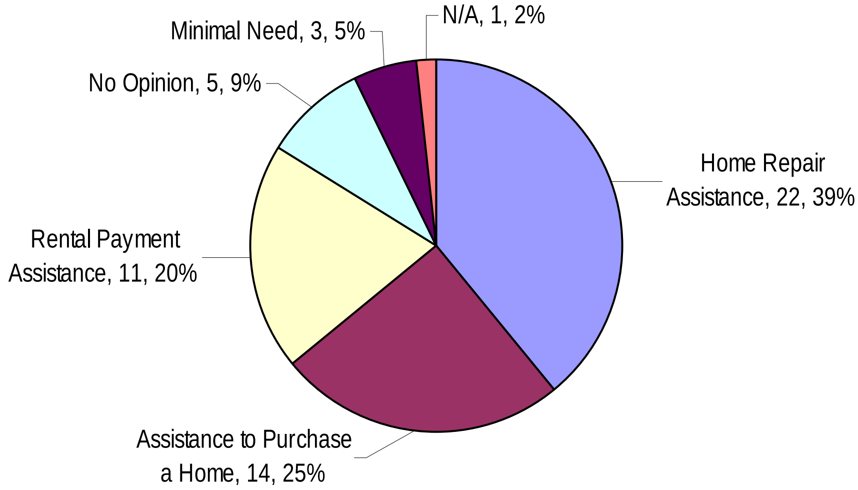
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	28% 11	33% 13	23% 9	13% 5	0% 0	5% 2	100% 40
2. Development of Apartments	24% 10	22% 9	27% 11	15% 6	10% 4	2% 1	100% 41
3. Energy Assistance	36% 17	21% 10	17% 8	17% 8	6% 3	2% 1	100% 47
4. Assistance for Homeless Persons	6% 3	6% 3	10% 5	19% 9	38% 18	21% 10	100% 48
5. Capacity Building Assistance	13% 7	11% 6	18% 10	18% 10	24% 13	16% 9	100% 55

HOUSING ASSISTANCE

Of all respondents, almost 40 percent indicated home repair assistance as the greatest need in their communities. Home purchasing assistance was the next most selected, with a quarter of the responses. Only 5 percent considered the need for housing assistance to be minimal.

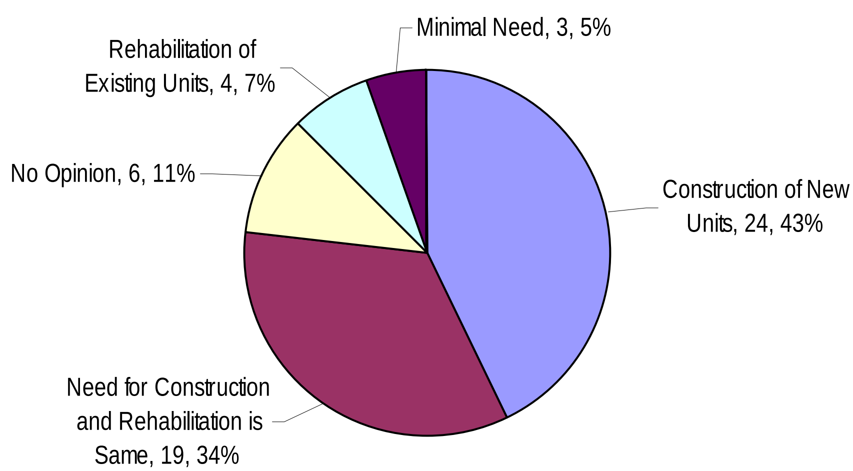
Housing Assistance Activities with Greatest Need (56 Respondents)



DEVELOPMENT OF RENTAL UNITS

Paralleling the responses received from the state as a whole, a large majority of the total respondents in Region 1 stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

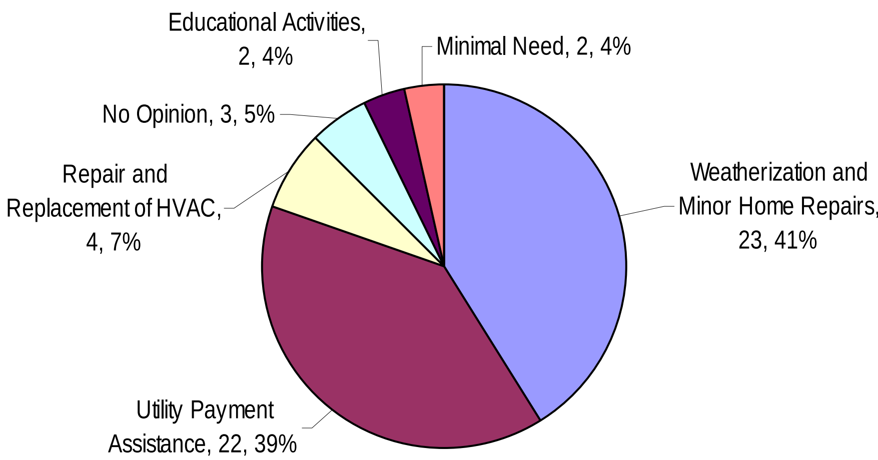
Rental Development Activity with Greatest Need (56 Respondents)



ENERGY ASSISTANCE

Assistance with weatherization and minor home repairs was the most commonly identified need amongst all respondents in the region, while Utility payment assistance was a close second. These two activities dominated the responses in this category, paralleling the responses from the state as a whole.

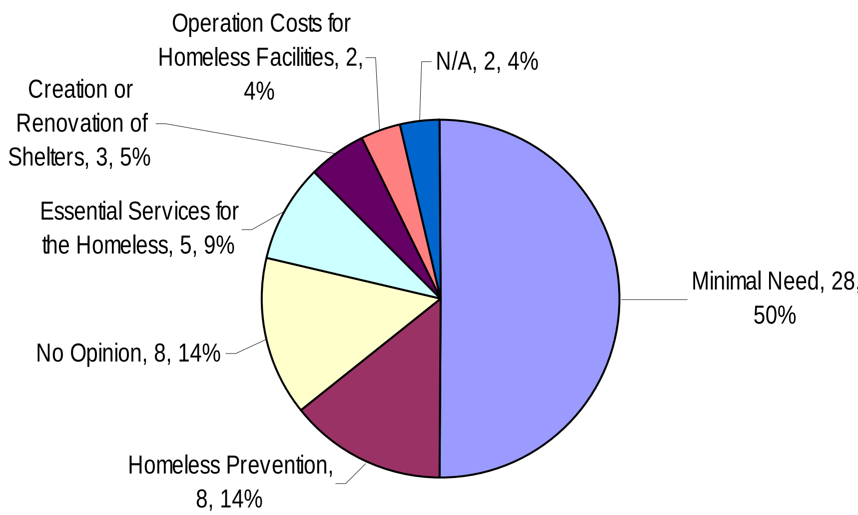
Energy Assistance Activity with Greatest Need (56 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 1 did not indicate a pressing need for homeless assistance activities. Half of all respondents said there was only a minimal need for such activities in their communities and another 14 percent had no opinion. Of the respondents who did identify need, a similar number indicated homeless prevention and essential services.

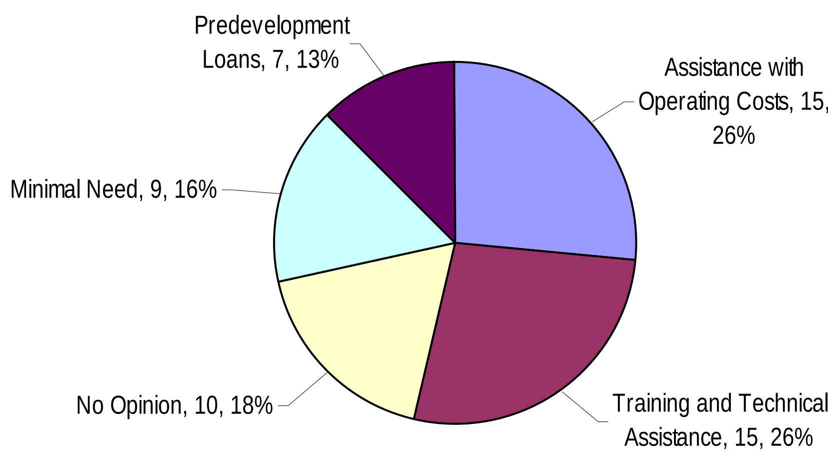
Homeless Assistance with Greatest Need (56 Respondents)



CAPACITY BUILDING

Of all respondents in Region 1, more than half selected either training and technical assistance or assistance with operating costs as the most needed capacity building activities, with both identified by 26 percent of the respondents. A significant portion also indicated a minimal need or gave no opinion.

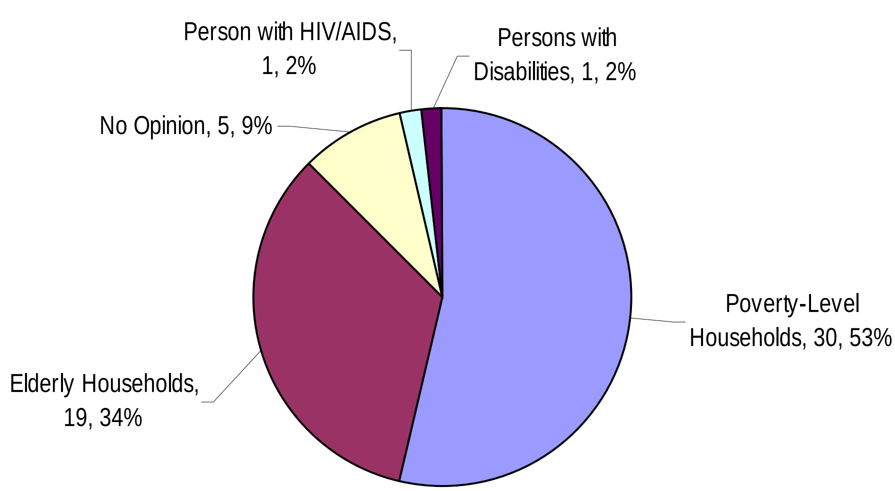
Capacity Building Activity with Greatest Need (56 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, over half indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most popular choice, selected by more than one third of the respondents. These two population groups together dominated the responses in this category, paralleling the responses from the state as a whole.

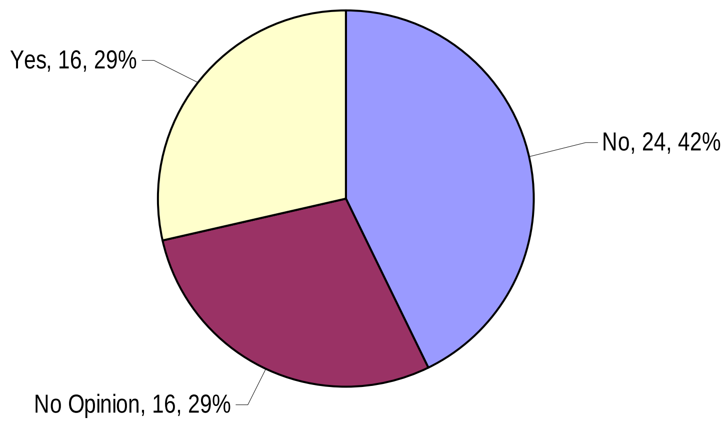
Population Most in Need of Assistance (56 Respondents)



MIGRANT FARM WORKERS

Although a large percent of respondents in the region said there was no need for migrant farm worker or seasonal housing in their communities, the percentage that did identify a need in the region, 29 percent, was significantly greater than the 15 percent of total statewide respondents who said there was a need.

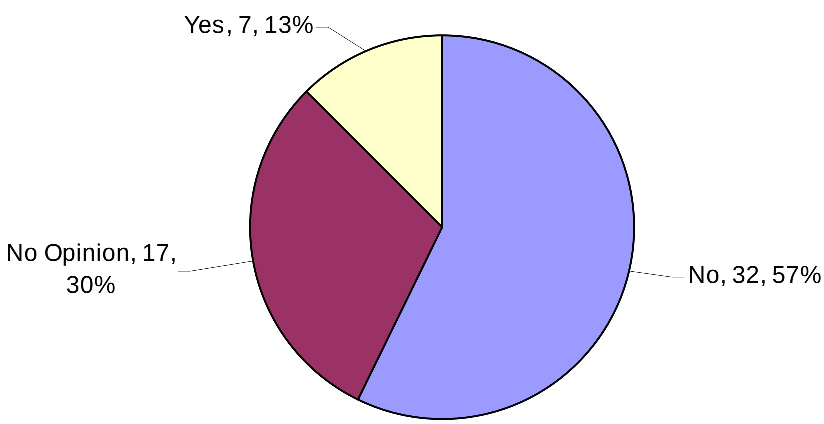
Need For Migrant Farm Worker Housing (56 Respondents)



FAIR HOUSING AND DISCRIMINATION

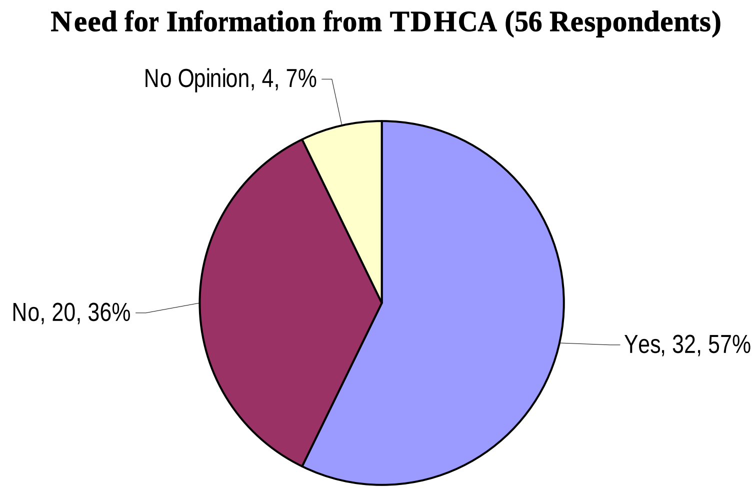
A majority of all respondents stated there was no need for training on fair housing laws in their communities. Only 13 percent stated a need was present.

Need for Fair Housing Training (56 Respondents)



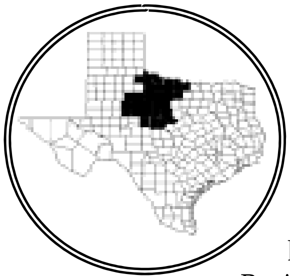
WORKING WITH TDHCA

Over half of all respondents said there was a need for more information on the programs offered by TDHCA. At the same time, however, more than a third indicated they were already sufficiently informed about the Department.



SUMMARY

The survey response from Region 1 generally mirrored that from the state as a whole. Region 1 differed, however, in the category of migrant farm worker housing. A higher percentage of respondents in this region said there was a need for such temporary housing than did respondents statewide.



REGION 2

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. In Region 2, Housing Assistance and Energy Assistance Activities were the two categories most often ranked the highest by respondents. Energy Assistance appears to be a greater priority to respondents from this region than from the state as a whole. Assistance for Homeless Persons appears to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

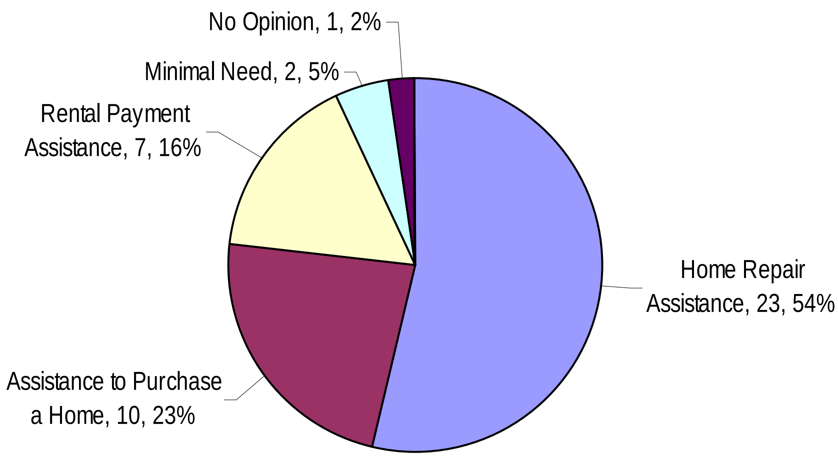
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	29% 7	29% 7	25% 6	4% 1	0%	13% 3	100% 24
2. Development of Apartments	21% 6	18% 5	25% 7	7% 2	18% 5	11% 3	100% 28
3. Energy Assistance	33% 11	30% 10	21% 7	6% 2	3% 1	6% 2	100% 33
4. Assistance for Homeless Persons	11% 4	3% 1	19% 7	16% 6	38% 14	14% 5	100% 37
5. Capacity Building Assistance	14% 6	12% 5	12% 5	24% 10	19% 8	19% 8	100% 42

HOUSING ASSISTANCE

Of all respondents in Region 2, more than half indicated home repair assistance as the greatest need in their respective communities. Home purchasing assistance was the next most selected, with nearly a quarter of the responses. Only 5 percent stated that there was a minimal need for housing assistance.

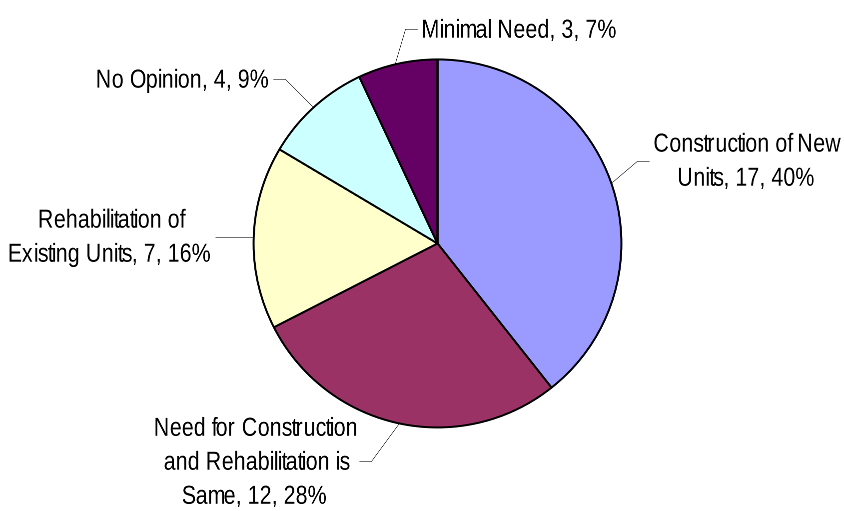
Housing Assistance Activity with Greatest Need (43 Respondents)



DEVELOPMENT OF RENTAL UNITS

Paralleling the responses received from the state as a whole, a large majority of the total respondents in Region 2 stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

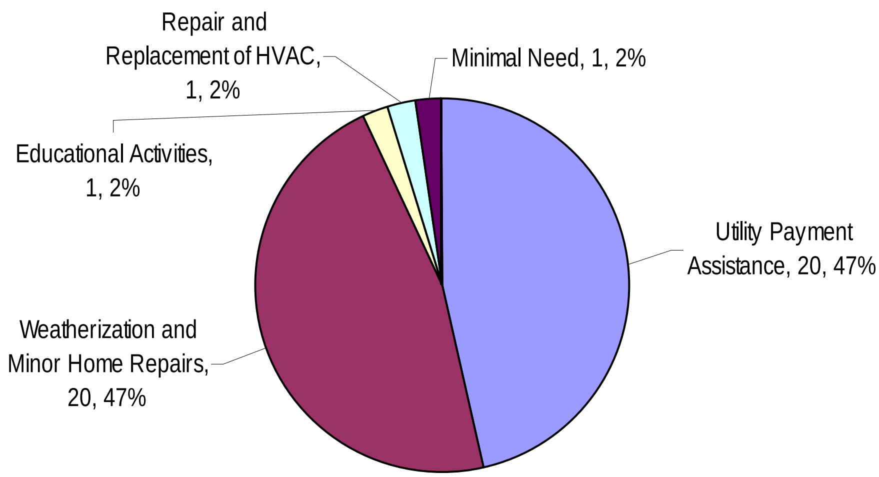
Rental Development Activity with Greatest Need (43 Respondents)



ENERGY ASSISTANCE

Utility payment assistance and assistance with weatherization and minor home repairs were identified as the greatest needs by equal percentages of respondents in the region. These two activities dominated the responses in this category, paralleling the state as a whole.

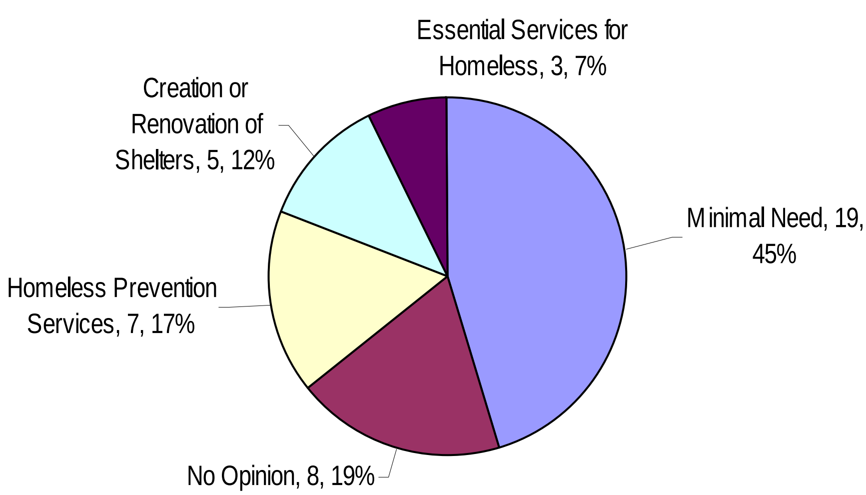
Energy Assistance Activity with Greatest Need (43 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 2 did not indicate a pressing need for homeless assistance activities. Close to half of all respondents said there was only a minimal need for such activities in their communities and another 19 percent had no opinion. Of the respondents who did identify need, a similar number indicated creation or renovation of temporary shelters and homeless prevention.

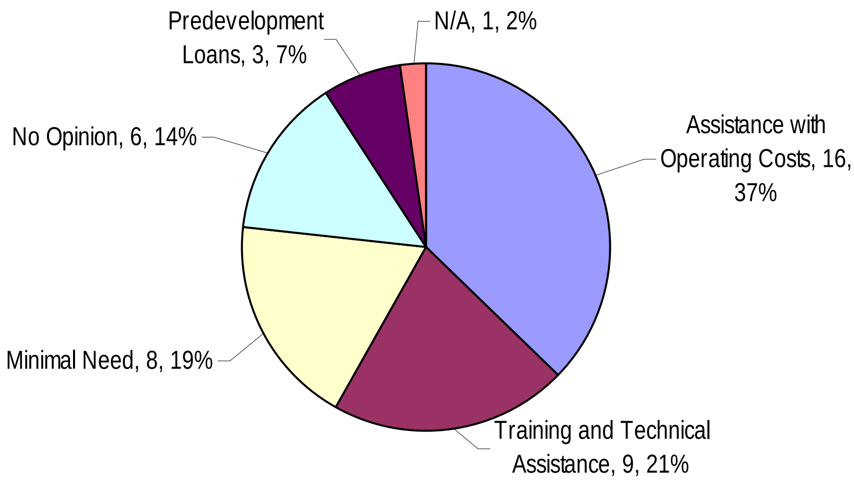
Homeless Assistance Activity with Greatest Need (43 Respondents)



CAPACITY BUILDING

Of all respondents in the region, more than half selected either training and technical assistance or assistance with operating costs as the most needed capacity building activities. A significant portion also indicated a minimal need or gave no opinion.

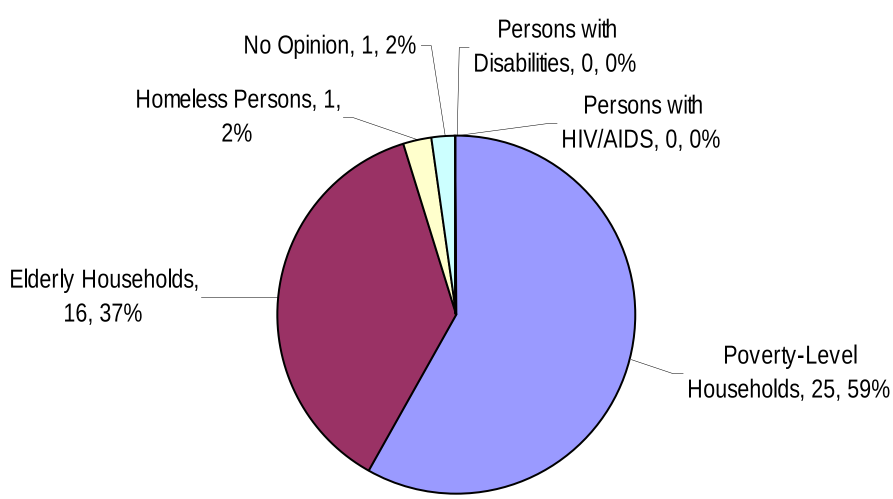
Capacity Building Activity with Greatest Need (43 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, almost 60 percent indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most popular choice, selected by more than one third of the respondents. These two population groups together dominated the responses in this category, paralleling the responses from the state as a whole.

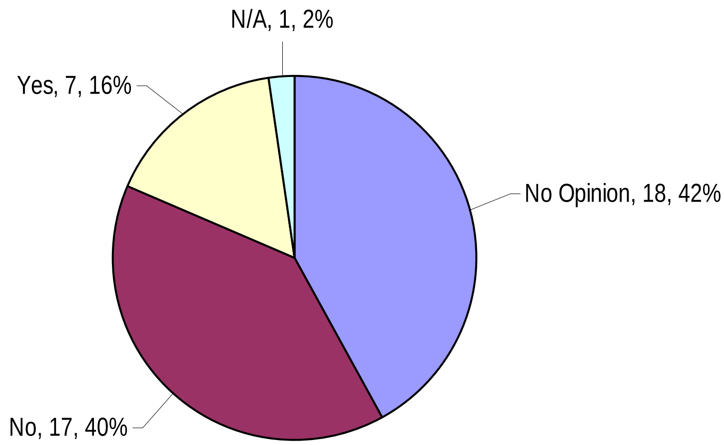
Population Most in Need of Assistance (43 Respondents)



MIGRANT FARM WORKERS

A much larger percentage of respondents from Region 2 had no opinion on the issue of migrant farm worker housing than respondents from the state as a whole. Another equally significant percentage saw no need in their communities for such temporary housing.

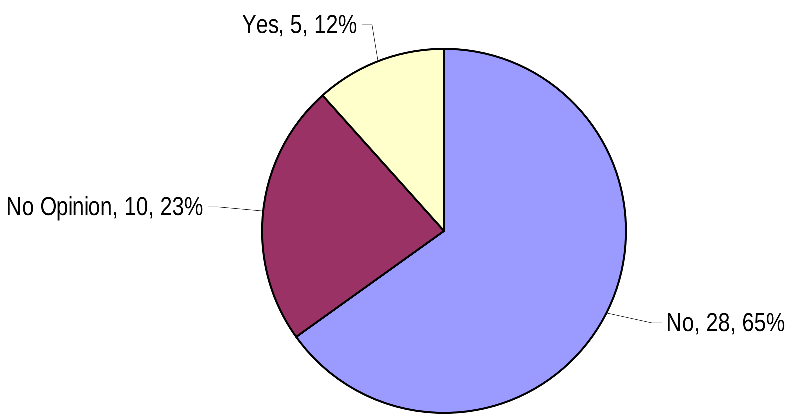
Need for Migrant Farm Worker Housing (43 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of all respondents in the region stated there was no need for training on fair housing laws in their communities. Only 12 percent stated a need was present.

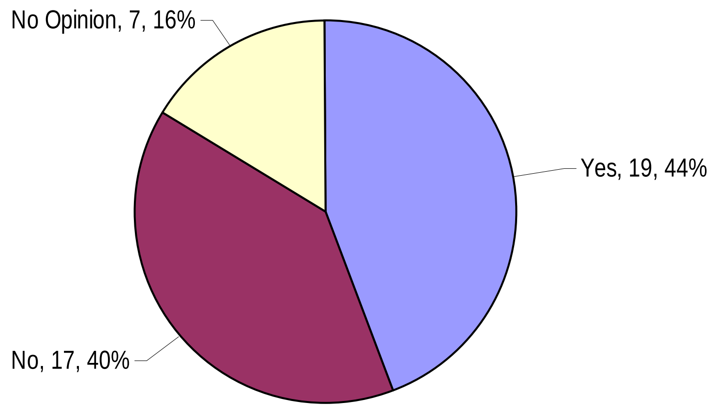
Need for Fair Housing Training (43 Respondents)



WORKING WITH TDHCA

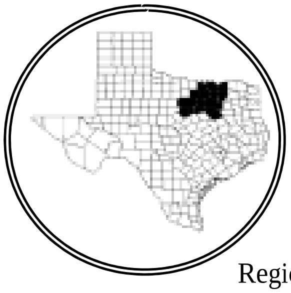
A large percentage of the region's respondents said there was a need for more information about the programs offered by TDHCA. At the same time, however, a similar portion indicated they were already sufficiently informed about the Department.

Need for Information from TDHCA (43 Respondents)



SUMMARY

The survey response from Region 2 generally mirrored that from the state as a whole. Region 2 differed, however, in the category of migrant farm worker housing. A much larger percentage of respondents from the region as compared to statewide had no opinion on the issue of migrant farm worker.



REGION 3

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. In Region 3, Housing Assistance Activities was the category most often ranked the highest by respondents, while Energy Assistance Activities was the next most likely to receive a priority rank. Assistance for Homeless Persons appeared to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

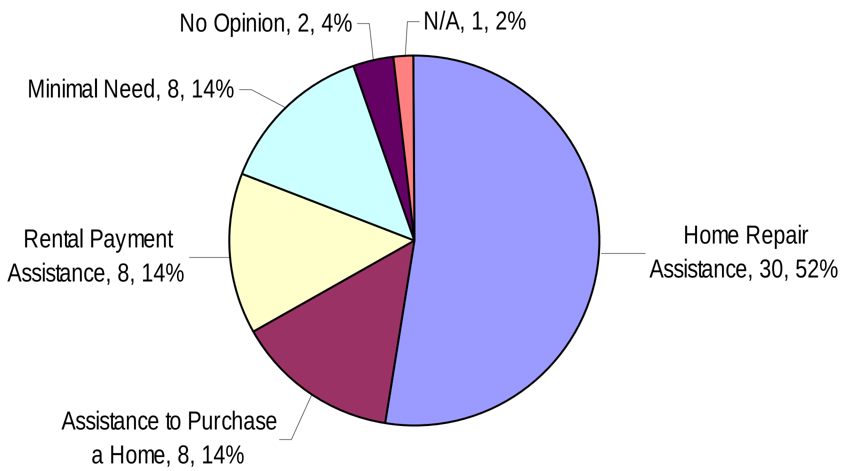
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	51% 20	21% 8	15% 6	5% 2	0%	8% 3	100% 39
2. Development of Apartments	5% 2	16% 6	22% 8	22% 8	19% 7	16% 6	100% 37
3. Energy Assistance	29% 14	29% 14	27% 13	10% 5	2% 1	2% 1	100% 48
4. Assistance for Homeless Persons	2% 1	7% 3	13% 6	17% 8	41% 19	20% 9	100% 46
5. Capacity Building Assistance	6% 3	15% 8	19% 10	24% 13	17% 9	20% 11	100% 54

HOUSING ASSISTANCE

Of all respondents, more than half indicated home repair assistance as the greatest need in their communities. Home purchasing assistance and rental payment assistance were both identified by equal, smaller percentages of the respondents.

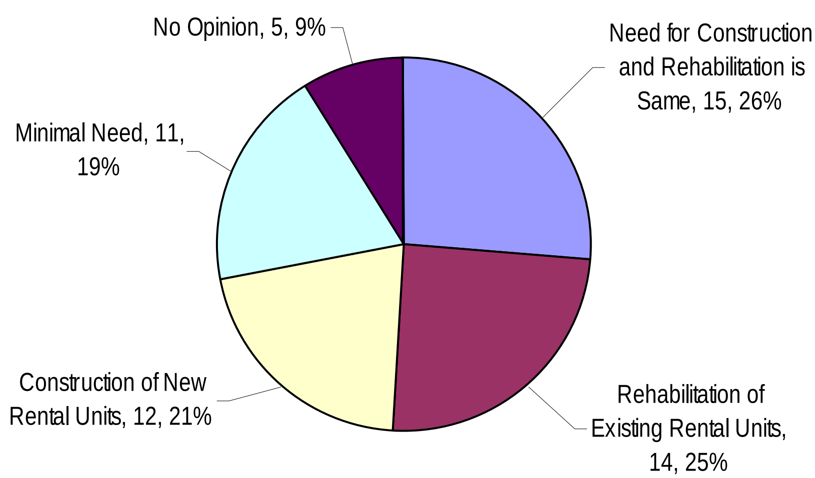
Housing Assistance Activity with Greatest Need (57 Respondents)



DEVELOPMENT OF RENTAL UNITS

Construction of new rental units appears to be a lesser priority to respondents in Region 3 than to those from the state as a whole. Only 47 percent of the region's respondents stated that new construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units, compared to 68 percent of the statewide respondents indicating the same opinion.

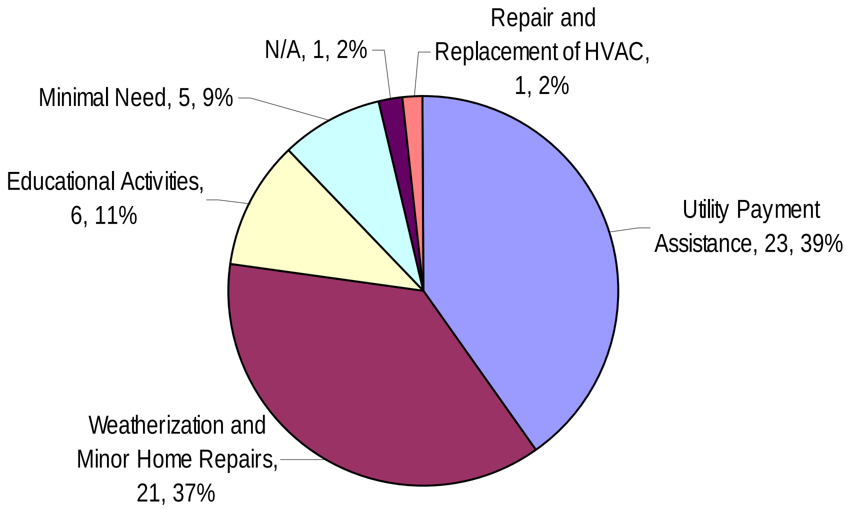
Rental Development Activity with Greatest Need (57 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all Region 3 respondents, while assistance with weatherization and minor home repairs was a close second. These two activities dominated the responses in this category, paralleling the state as a whole.

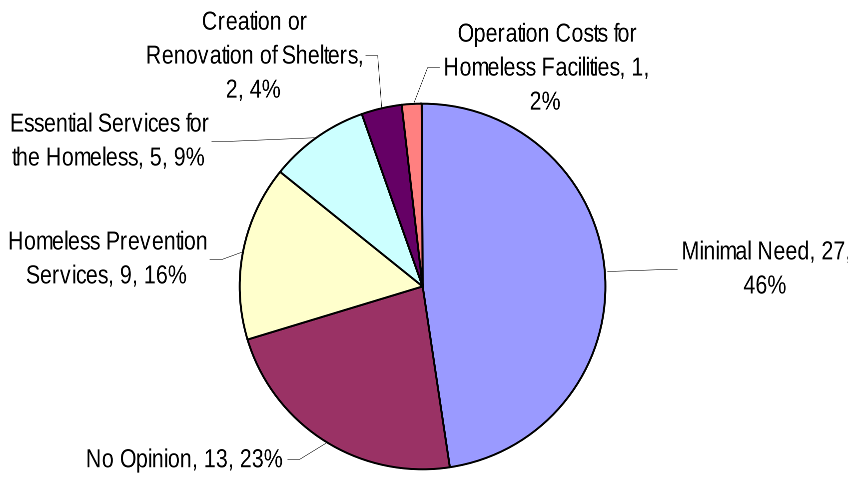
Energy Assistance Activity with Greatest Need (57 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 3 did not indicate a pressing need for homeless assistance activities. Nearly half of all respondents said there was only a minimal need for such activities in their communities and another 23 percent had no opinion. Of the respondents who did identify a need, most indicated homeless prevention services.

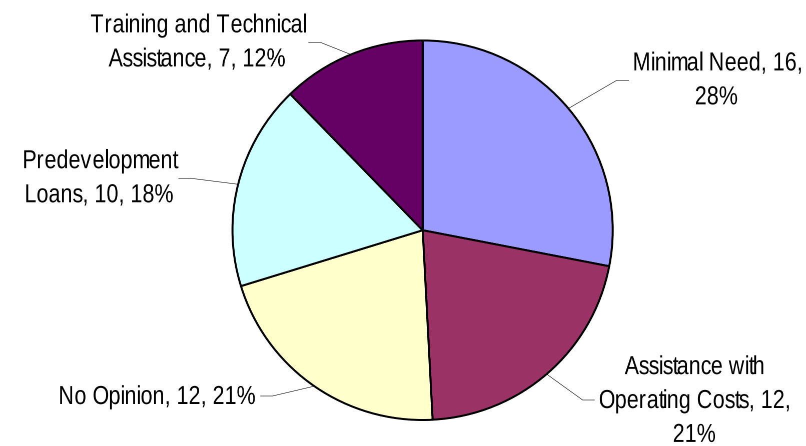
Homeless Assistance Activity with Greatest Need (57 Respondents)



CAPACITY BUILDING

Assistance with operating costs was the most identified capacity building activity in Region 3. However, a higher percentage of the region's respondents identified a minimal need or had no opinion than did respondents statewide.

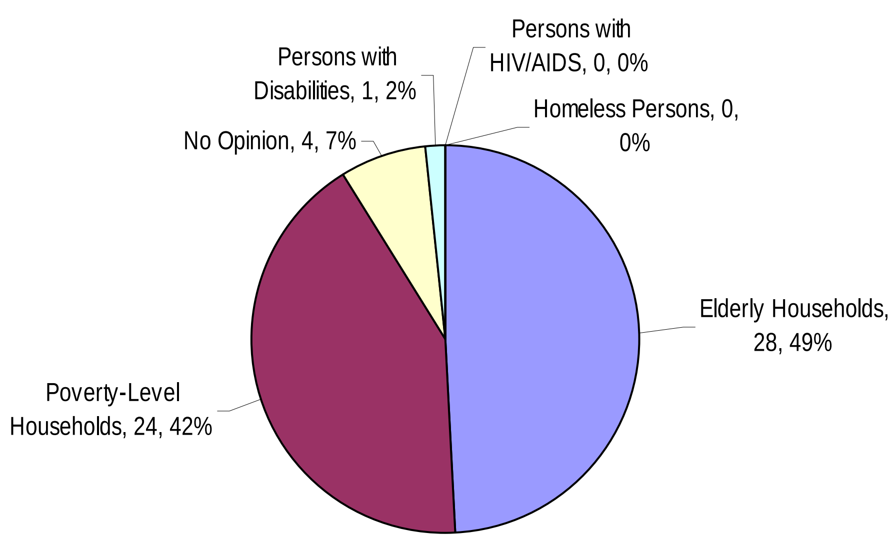
Capacity Building Activity with Greatest Need (57 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, almost half indicated elderly households as the population most in need of assistance in their communities. Poverty-level households was the second most popular choice, selected by more than 40 percent of the respondents. These two population groups together dominated the responses in this category, paralleling the responses from the state as a whole.

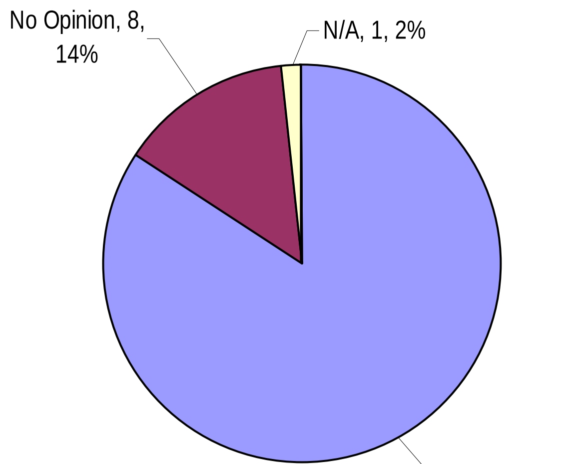
Population Most in Need of Assistance (57 Respondents)



MIGRANT FARM WORKERS

The vast majority of respondents in the region saw no need for migrant farm worker or temporary housing in their communities. While some respondents had no opinion on the issue, none said there was a need.

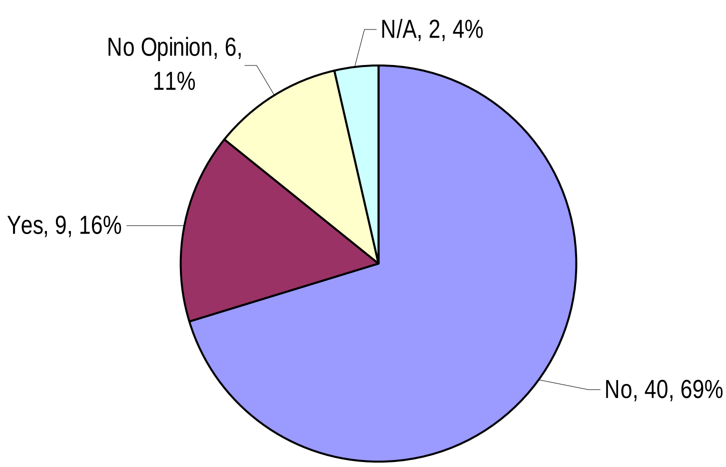
Need for Migrant Farm Worker Housing (57 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of respondents in the region stated there was no need for training on fair housing laws in their communities. Only 16 percent stated a need was present.

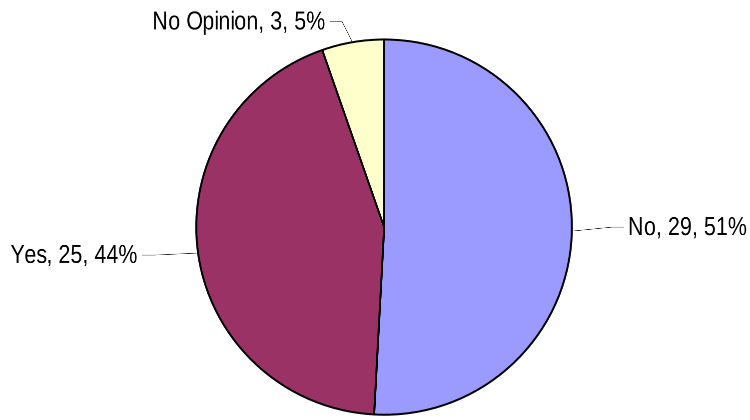
Need for Fair Housing Training (57 Respondents)



WORKING WITH TDHCA

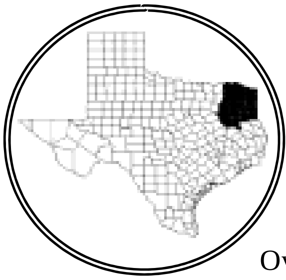
Just over half of all respondents said there was a need for more information on the programs offered by TDHCA. At the same time, however, a similarly large portion indicated they were already sufficiently informed about the Department.

Need for Information from TDHCA (57 Respondents)



SUMMARY

The survey response from Region 3 generally mirrored that from the state as a whole. Variances arose, however in several categories. For one, rehabilitation of existing rental units appears to be a greater priority to respondents in Region 3 than to those from the rest of the state. The region also contained the most respondents of any region who stated migrant farm worker housing was unnecessary in their communities.



REGION 4

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. Overall, Housing Assistance Activities was the category most often ranked the highest by the region's respondents, while Energy Assistance Activities was the next most likely to be selected as a top priority. Assistance for Homeless Persons appears to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

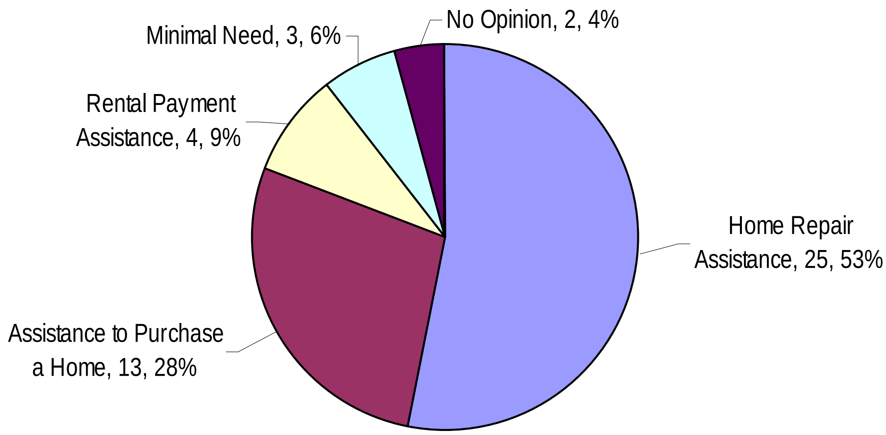
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	47% 15	19% 6	22% 7	6% 2	0%	6% 2	100% 32
2. Development of Apartments	15% 6	17% 7	29% 12	20% 8	7% 3	12% 5	100% 41
3. Energy Assistance	26% 10	33% 13	23% 9	10% 4	0%	8% 3	100% 39
4. Assistance for Homeless Persons	0%	12% 5	7% 3	22% 9	29% 12	29% 12	100% 41
5. Capacity Building Assistance	10% 4	10% 4	17% 7	24% 10	31% 13	10% 4	100% 42

HOUSING ASSISTANCE

Of all respondents in Region 4, more than half indicated home repair assistance as the greatest need in their respective communities. Home purchasing assistance was the next most selected, with over a quarter of the responses. Only 6 percent considered the need for housing assistance to be minimal.

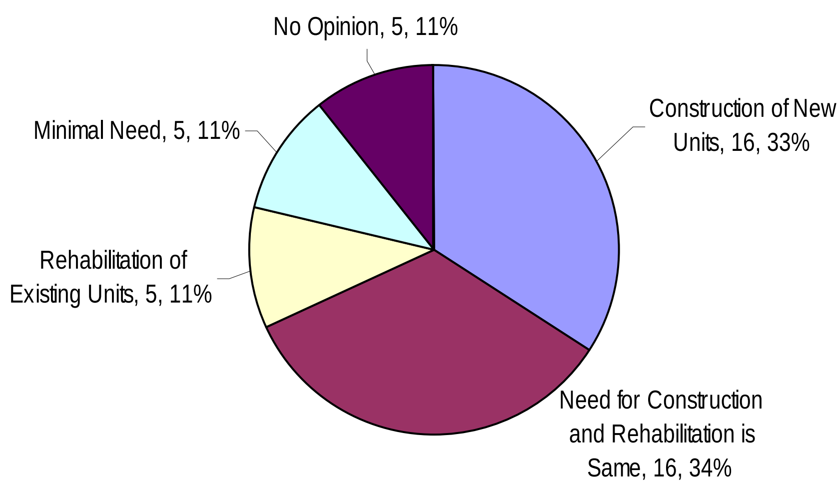
Housing Assistance with Greatest Need (47 Respondents)



DEVELOPMENT OF RENTAL UNITS

Paralleling the responses received from the state as a whole, a large majority of the total respondents in Region 4 stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

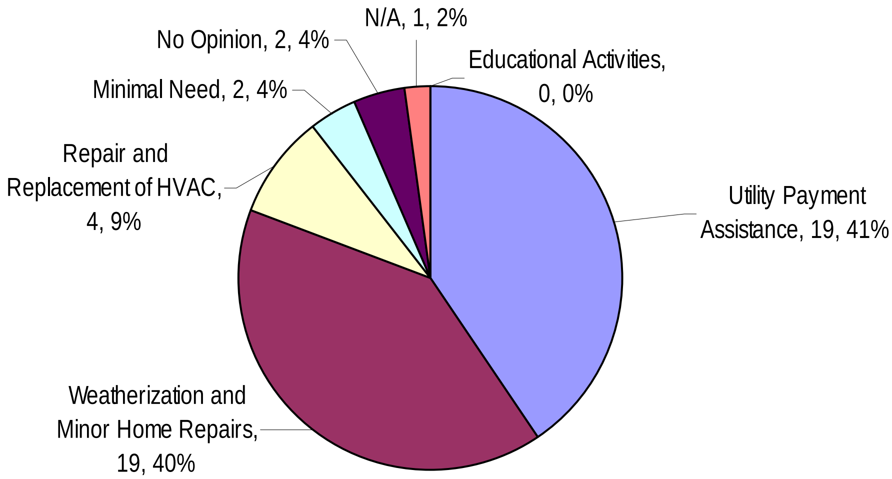
Rental Development with Greatest Need (47 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all Region 4 respondents, while assistance with weatherization and minor home repairs was a close second. These two activities dominated the responses in this category, paralleling the state as a whole.

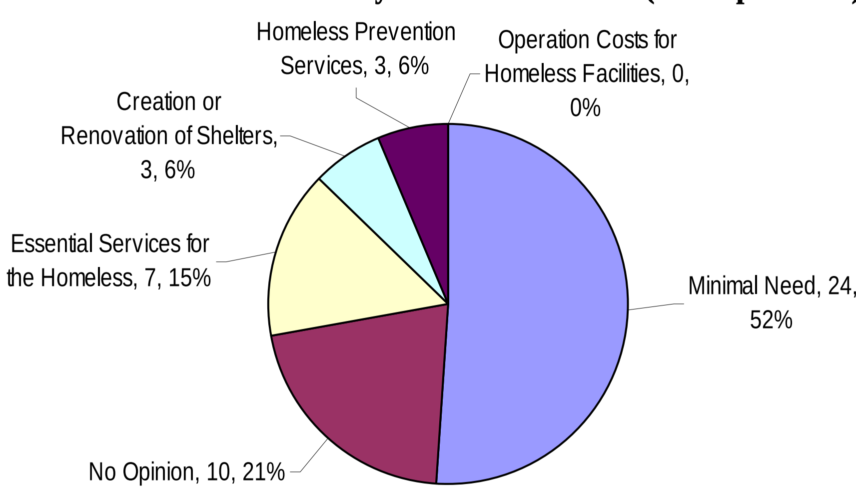
Energy Assistance Activity with Greatest Need (47 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 4 did not indicate a pressing need for homeless assistance activities. More than half of all respondents said there was only a minimal need for such activities in their communities and another 21 percent had no opinion. Of the respondents who did identify a need, most indicated essential services.

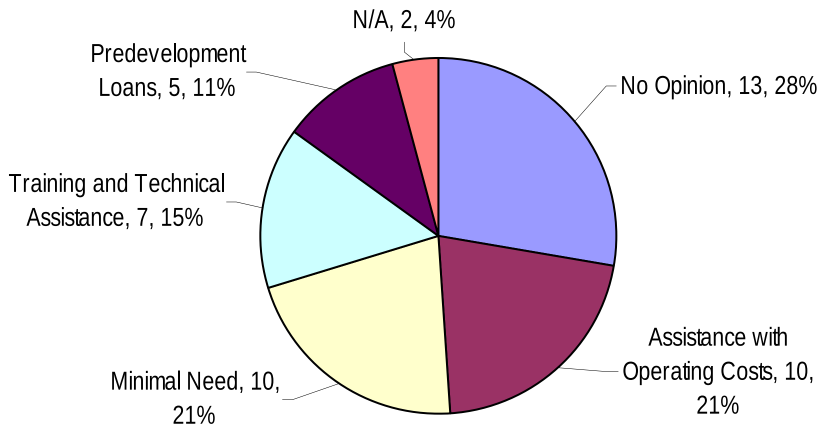
Homeless Assistance Activity with Greatest Need (47 Respondents)



CAPACITY BUILDING

Assistance with operating costs was the most identified capacity building activity in Region 4. However, a higher percentage of the region's respondents identified a minimal need or had no opinion than did respondents statewide.

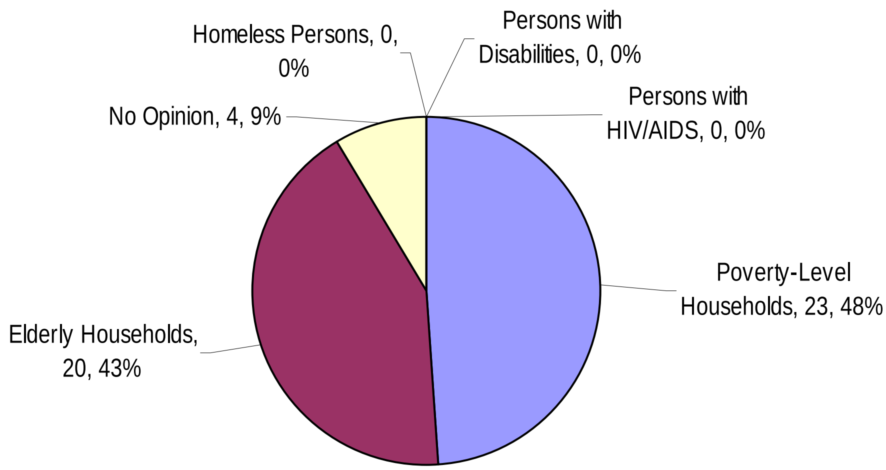
Capacity Building Activity with Greatest Need (47 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, almost half indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most selected group, indicated in more than 40 percent of the responses. These two population groups together dominated the responses in this category, similar to responses from the state as a whole.

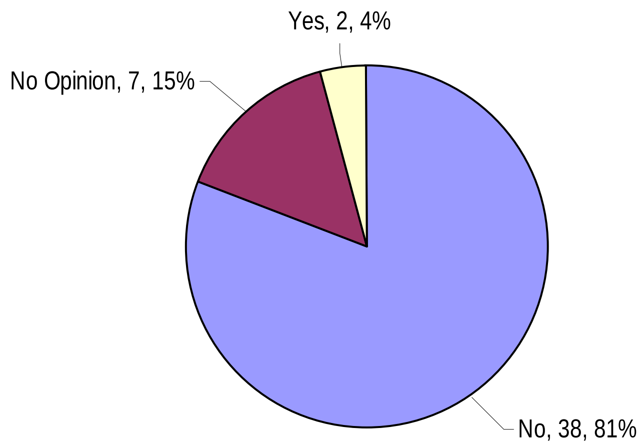
Population Most in Need of Assistance (47 Respondents)



MIGRANT FARM WORKERS

A significant majority of all respondents saw no need for migrant farm worker or seasonal housing in their communities. Only 4% stated that a need existed.

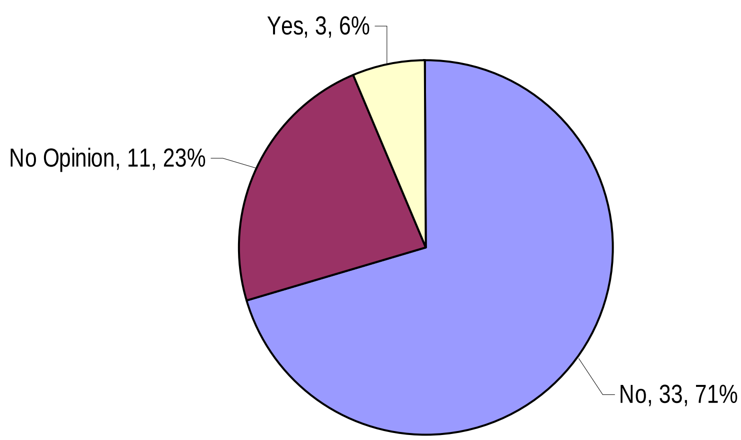
Need for Migrant Farm Worker Housing (47 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of respondents in the region stated there was no need for training on fair housing laws in their communities. Only 6 percent stated a need was present.

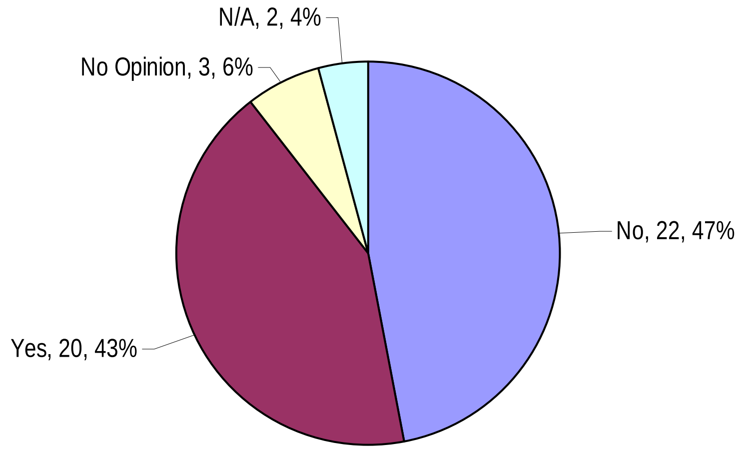
Need for Fair Housing Training (47 Respondents)



WORKING WITH TDHCA

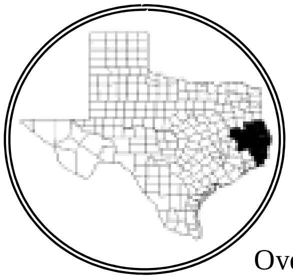
Just under half of all respondents said there was a need for more information on the programs offered by TDHCA. At the same time, however, a similarly large portion indicated they were already sufficiently informed about the Department.

Need for Information from TDHCA (47 Respondents)



SUMMARY

The survey response from Region 4 generally mirrored the response from the state as a whole. In Region 4, however, a higher percentage of respondents identified a minimal need for capacity building assistance or had no opinion on the subject than did most respondents statewide.



REGION 5

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. Overall, Housing Assistance Activities was the category most often ranked the highest by the region's respondents, while Energy Assistance Activities was the next most likely to be selected as a top priority. Assistance for Homeless Persons appears to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

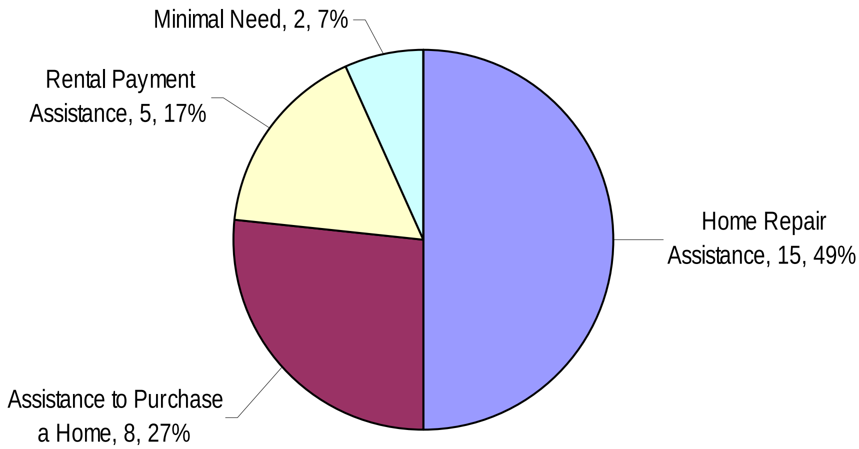
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	68% 17	20% 5	4% 1	4% 1	4% 1	0%	100% 25
2. Development of Apartments	17% 4	29% 7	38% 9	13% 3	4% 1	0%	24
3. Energy Assistance	13% 3	43% 10	17% 4	17% 4	9% 2	0%	23
4. Assistance for Homeless Persons	8% 2	0%	20% 5	20% 5	36% 9	16% 4	100% 25
5. Capacity Building Assistance	11% 3	7% 2	19% 5	33% 9	26% 7	4% 1	100% 27

HOUSING ASSISTANCE

Of all respondents in Region 2, nearly half indicated home repair assistance as the greatest need in their respective communities. Home purchasing assistance was the next most selected, more than a quarter of the responses. Only 7 percent considered the need for housing assistance to be minimal.

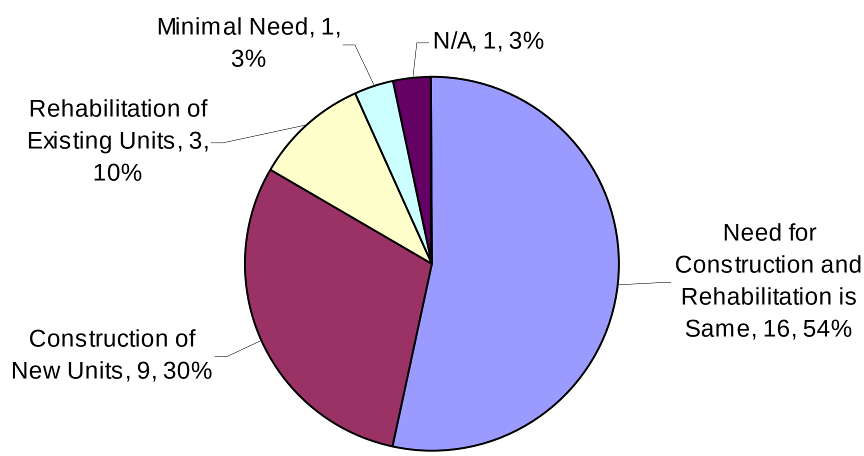
Housing Assistance Activity with Greatest Need (30 Respondents)



DEVELOPMENT OF RENTAL UNITS

Paralleling the responses received from the state as a whole, a large majority of the total respondents in Region 5 stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A smaller percentage indicated only rehabilitation as the most pressing need.

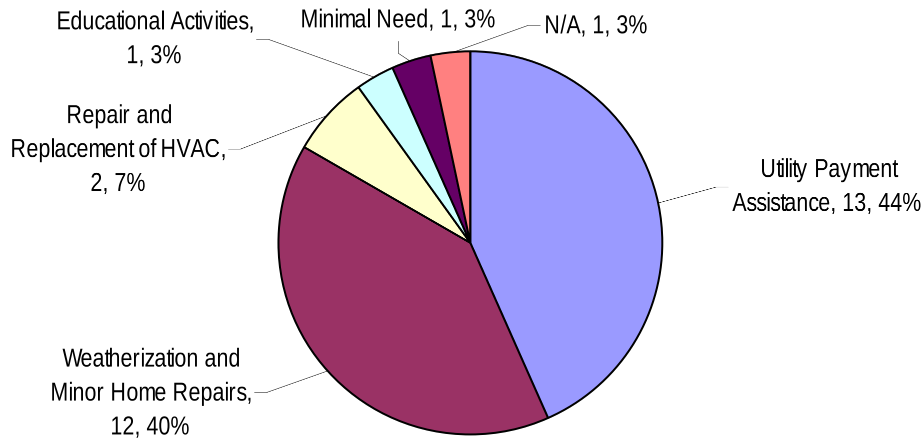
Rental Development Activity with Greatest Need (30Respondents)



ENERGY ASSISTANCE

Utility payment assistance and assistance with weatherization and minor home repairs were identified as the greatest needs by similar percentages of respondents in the region. These two activities dominated the responses in this category, paralleling the state as a whole.

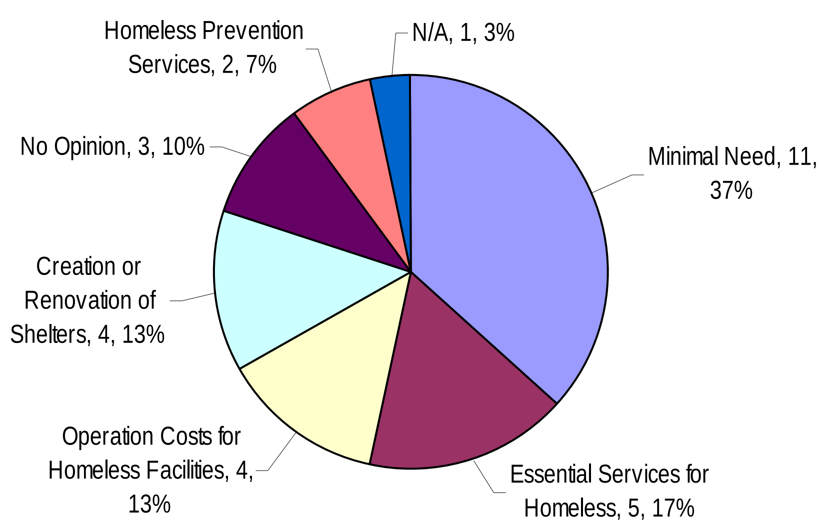
Energy Assistance Activity with Greatest Need (30 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Homeless assistance appears to be a somewhat greater priority to respondents in Region 5 than to the state as a whole, with fewer respondents in the region dismissing homeless assistance as a minimal need than in most regions. Of those respondents who identified need, a similar number indicated essential services, facility operation costs, and creation or renovation of temporary shelters.

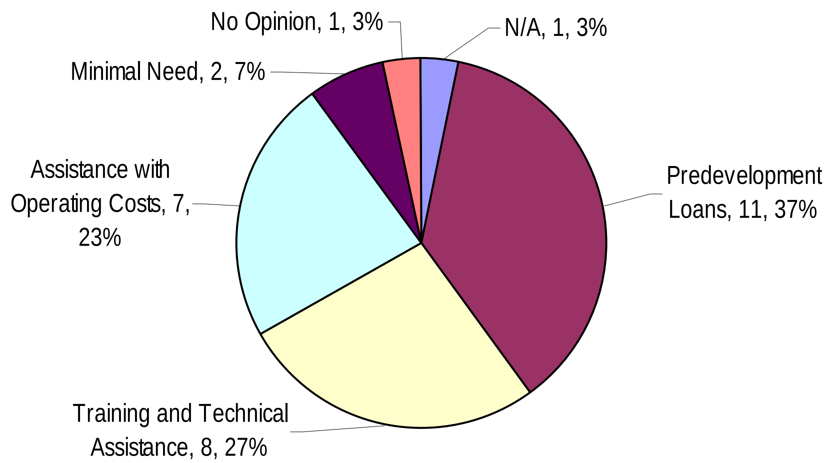
Homeless Assistance Activity with Greatest Need (30 Respondents)



CAPACITY BUILDING

Differing from the state as a whole, the most commonly identified capacity building need in Region 5 was Predevelopment loans. Operating cost assistance, the need chosen by most respondents across the state, was only the third most popular answer in this region.

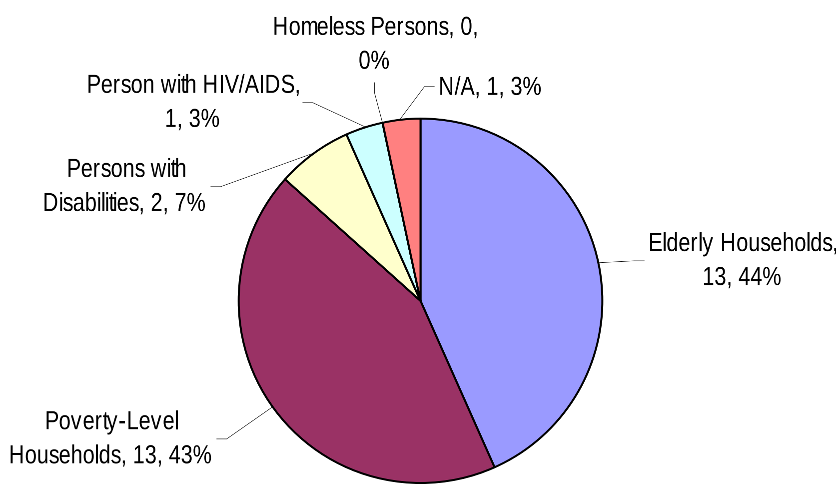
Capacity Building Activity with Greatest Need (30 Respondents)



SPECIAL NEEDS POPULATIONS

Equally substantial percentages of respondents indicated elderly and poverty-level households as the populations most in need of assistance in their communities. These two population groups together dominated the responses in this category, similar to the responses from the state as a whole.

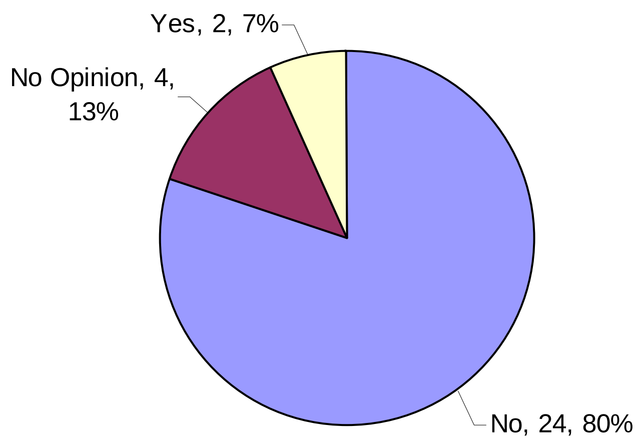
Population Most in Need of Assistance (30 Respondents)



MIGRANT FARM WORKERS

A significant majority of all respondents saw no need for migrant farm worker or seasonal housing in their communities. Only 15% stated that a need existed.

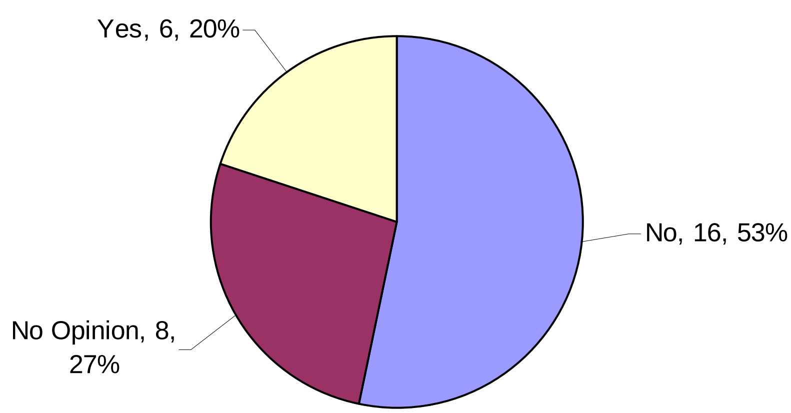
Need for Migrant Farm Worker Housing (30 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of all respondents in the region stated there was no need for training on fair housing laws in their communities. 20 percent indicated a need was present.

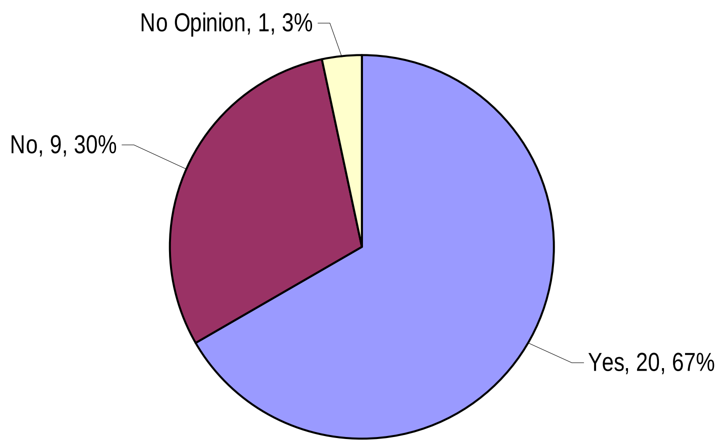
Need for Fair Housing Training (30 Respondents)



WORKING WITH TDHCA

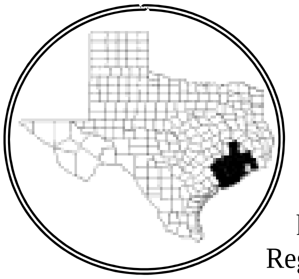
Differing from the state as a whole, in which about half of respondents stated there was a need for more information about TDHCA programs, in Region 5 this opinion was shared by more than two-thirds of respondents.

Need for Information from TDHCA (30 Respondents)



SUMMARY

The survey response from Region 5 generally mirrored response from the state as a whole. However, homeless assistance appears to be a somewhat greater priority to respondents in Region 5 than to the rest of the state, with fewer respondents in this region dismissing homeless assistance as a minimal need. Also differing from the state as a whole, the most commonly identified capacity building need in Region 5 was Predevelopment loans. Statewide, this option was only the fourth most popular capacity building answer choice.



REGION 6

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. In Region 3, Housing Assistance Activities was the category most often ranked the highest by respondents, while Energy Assistance Activities was the next most likely to receive a priority (1 or 2) rank. Assistance for Homeless Persons, the category most often assigned a low rank, appeared to be the least relevant to the respondents.

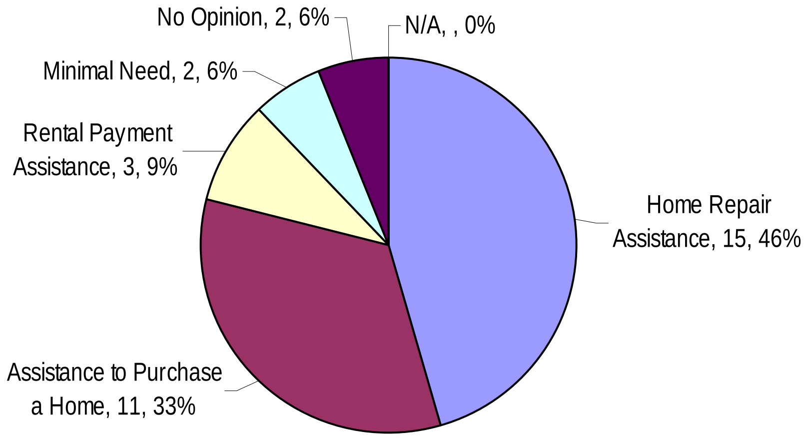
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	73% 16	14% 3	5% 1	0%	5% 1	5% 1	100% 22
2. Development of Apartments	14% 3	14% 3	27% 6	9% 2	23% 5	14% 3	100% 22
3. Energy Assistance	7% 2	41% 11	37% 10	7% 2	0%	7% 2	100% 27
4. Assistance for Homeless Persons	0%	8% 2	12% 3	38% 10	31% 8	12% 3	100% 26
5. Capacity Building Assistance	6% 2	18% 6	21% 7	24% 8	18% 6	12% 4	100% 33

HOUSING ASSISTANCE

Of all respondents, close to half indicated home repair assistance as the greatest need in their respective communities. Home purchasing assistance was the next most selected, with a third of the responses. Only 6 percent considered the need for housing assistance to be minimal.

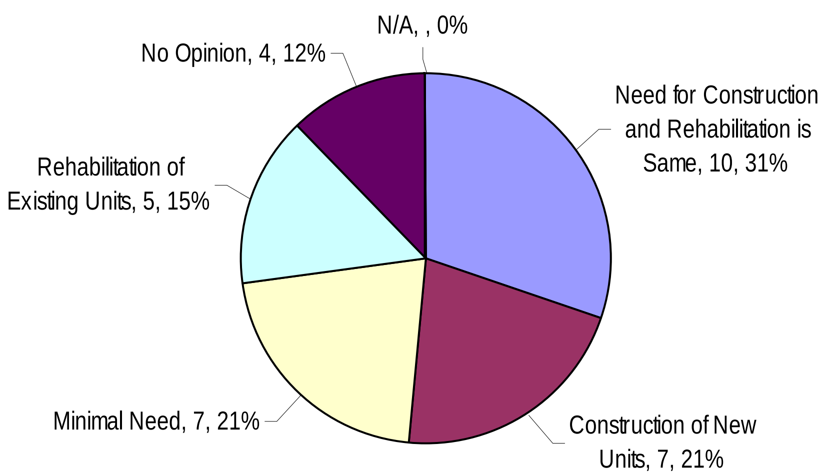
Housing Assistance Activity with Greatest Need (33 Respondents)



DEVELOPMENT OF RENTAL UNITS

Construction of new rental units and rehabilitation of existing units appear to be equally important to the respondents of Region 6. This differs from the response statewide, which favored new construction by a significant margin.

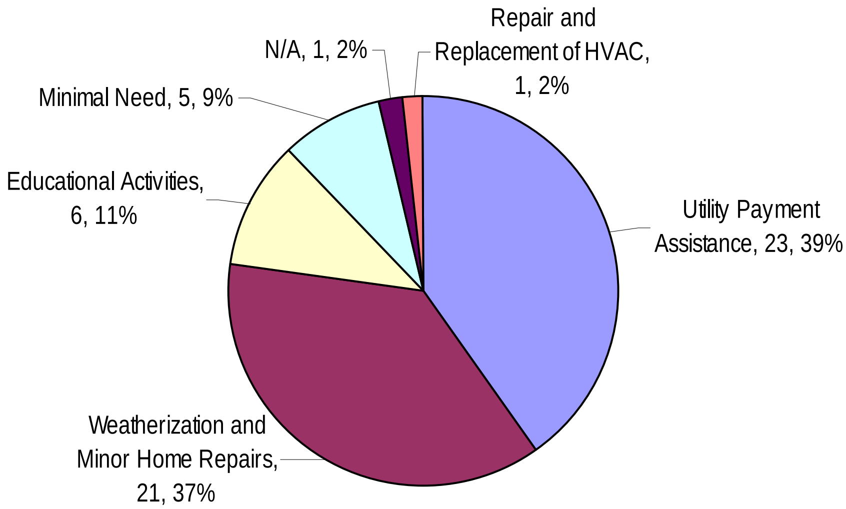
Rental Development Activity with Greatest Need (33 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all Region 6 respondents, while assistance with weatherization and minor home repairs was a close second. These two activities dominated the responses in this category, similar to the state as a whole.

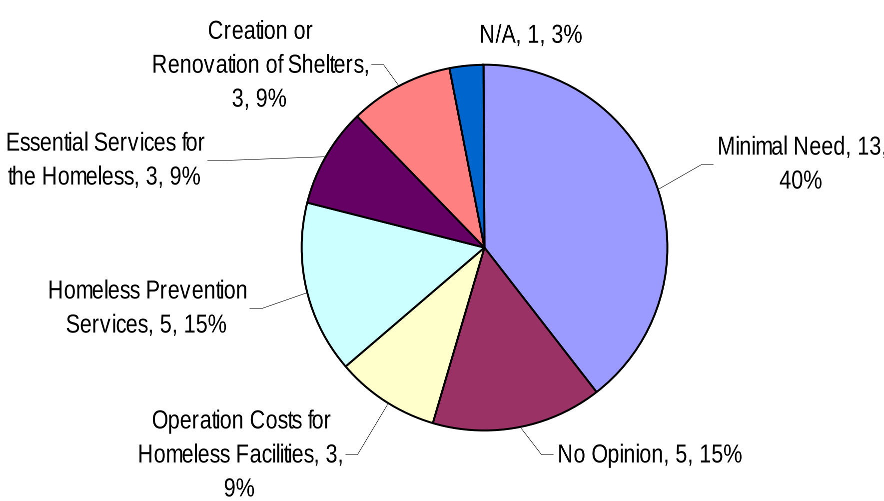
Energy Assistance Activity with Greatest Need (33 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 6 did not indicate a pressing need for homeless assistance activities. More than half of all respondents either said there was only a minimal need for such activities or had no opinion on the issue. Of the respondents who did identify a need, most indicated homeless prevention services.

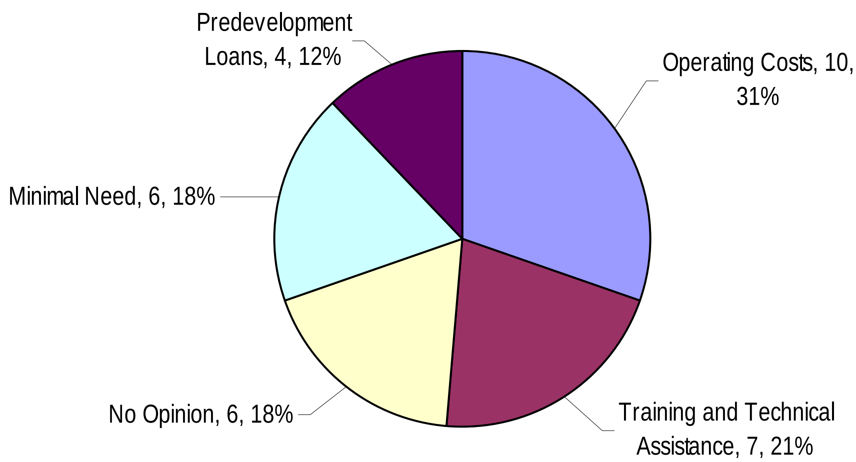
Homeless Assistance Activity with Greatest Need (33 Respondents)



CAPACITY BUILDING

Of all respondents in the region, more than half selected either training and technical assistance or assistance with operating costs as the most needed capacity building activities. A significant portion also indicated a minimal need or gave no opinion.

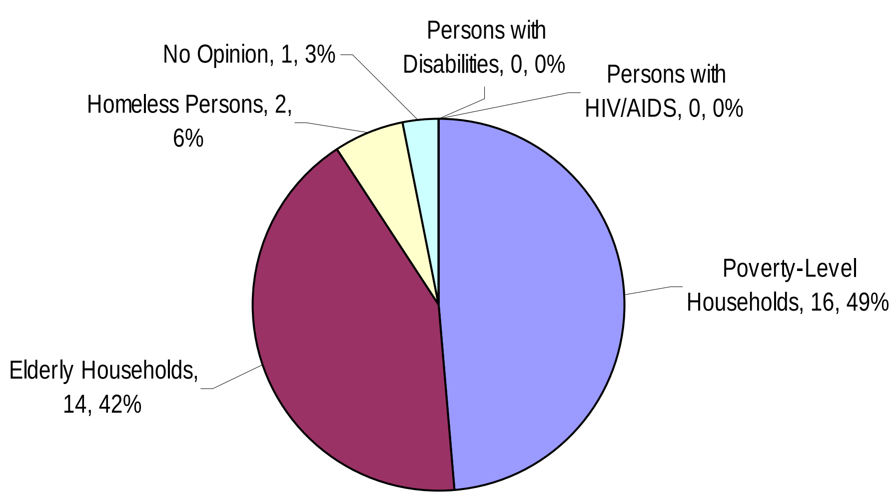
Capacity Building Activity with Greatest Need (33 Respondents)



SPECIAL NEEDS POPULATIONS

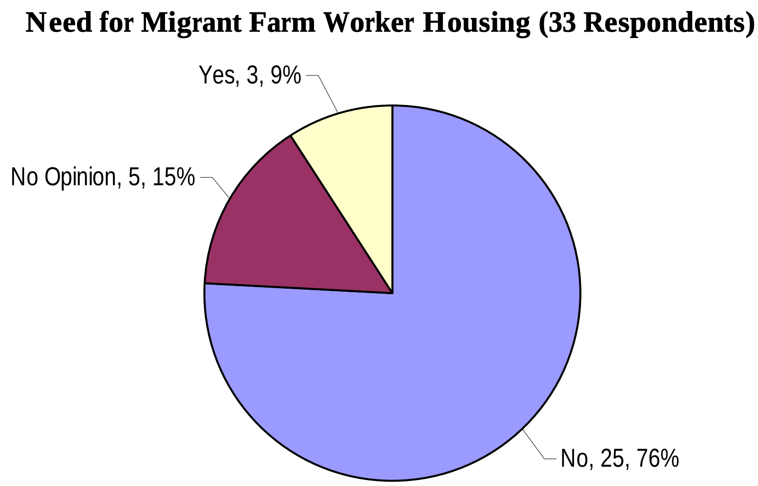
Of all respondents in the region, almost half indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most popular choice, indicated in more than 40 percent of the responses. These two population groups together dominated the responses in this category, paralleling the responses from the state as a whole.

Population Most in Need of Assistance (33 Respondents)



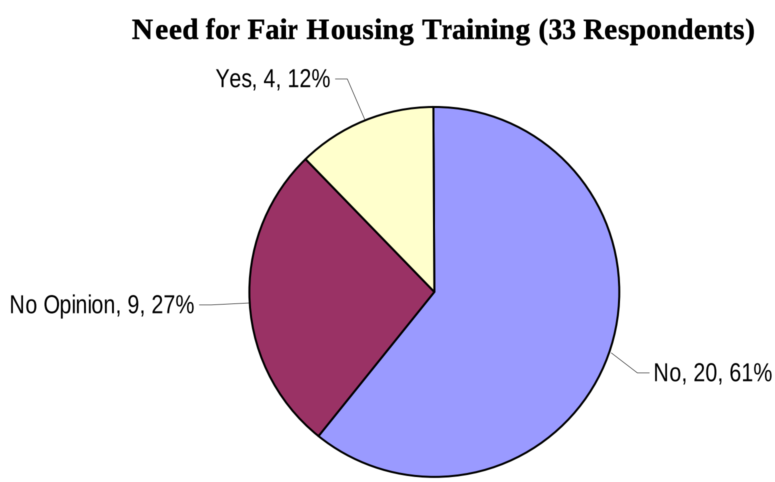
MIGRANT FARM WORKERS

A significant majority of the region's respondents saw no need for migrant farm worker or seasonal housing in their communities. Only 9% stated that a need existed.



FAIR HOUSING AND DISCRIMINATION

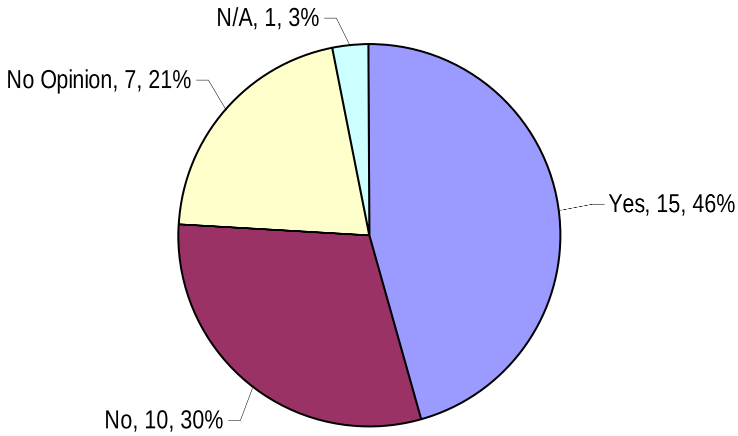
A majority of respondents in the region stated there was no need for training on fair housing laws in their communities. Only 12 percent stated a need was present.



WORKING WITH TDHCA

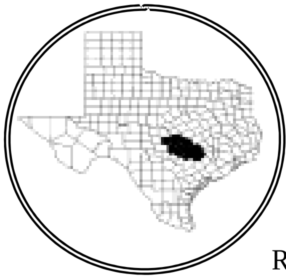
Differing from the statewide opinion, less than half of Region 6 respondents saw a need for more information about TDHCA programs. The majority said either there was no need or gave no opinion.

Need for Information from TDHCA (33 Respondents)



SUMMARY

The survey response from Region 6 generally mirrored response from the state as a whole. There was no strong divergence from the statewide response trends.



REGION 7

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. In Region 7, Development of Apartments and Housing Assistance Activities were the two categories most often ranked the highest by respondents. Development of Apartments appears to be a greater priority to respondents from the region than from the state as a whole. Assistance for Homeless Persons appears to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

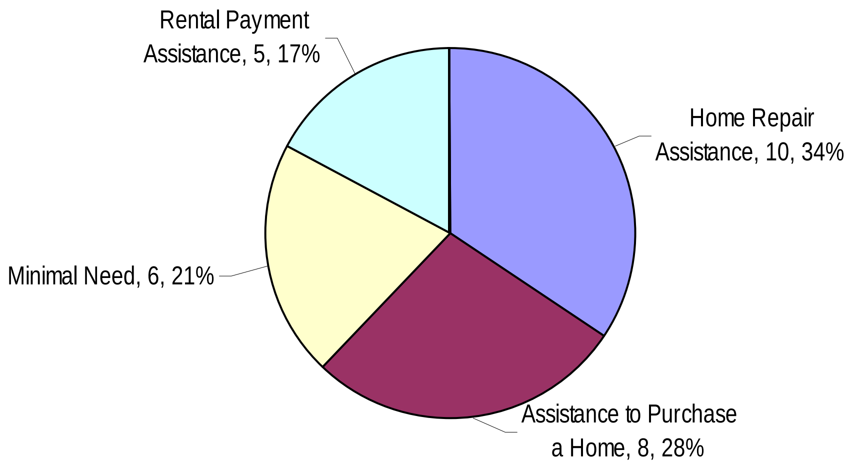
7.1. Ranking of Need for General Housing Assistance

	Number of responses per need rank, and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	27% 6	23% 5	36% 8	9% 2	0%	5% 1	100% 22
2. Development of Apartments	32% 7	32% 7	18% 4	9% 2	9% 2	0%	100% 22
3. Energy Assistance	14% 3	23% 5	36% 8	23% 5	5% 1	0%	100% 22
4. Assistance for Homeless Persons	0%	13% 3	9% 2	17% 4	57% 13	4% 1	100% 23
5. Capacity Building Assistance	21% 6	18% 5	7% 2	25% 7	29% 8	0%	100% 28

HOUSING ASSISTANCE

In Region 7, home repair assistance and home purchasing assistance were both indicated as the top need by similar percentages, each with around a third of the responses. The percentage of respondents stating that a minimal need existed for housing assistance was significantly higher than in the state as a whole.

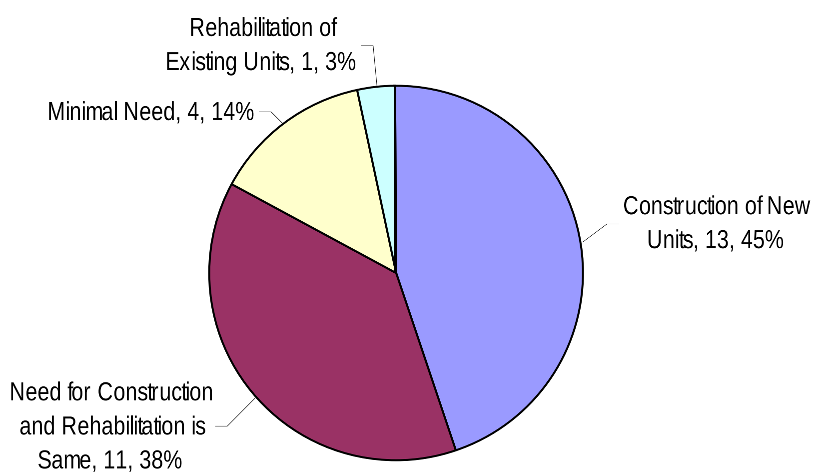
Housing Assistance with Greatest Need (29 Respondents)



DEVELOPMENT OF RENTAL UNITS

Paralleling the responses received from the state as a whole, a large majority of the total respondents in Region 7 stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

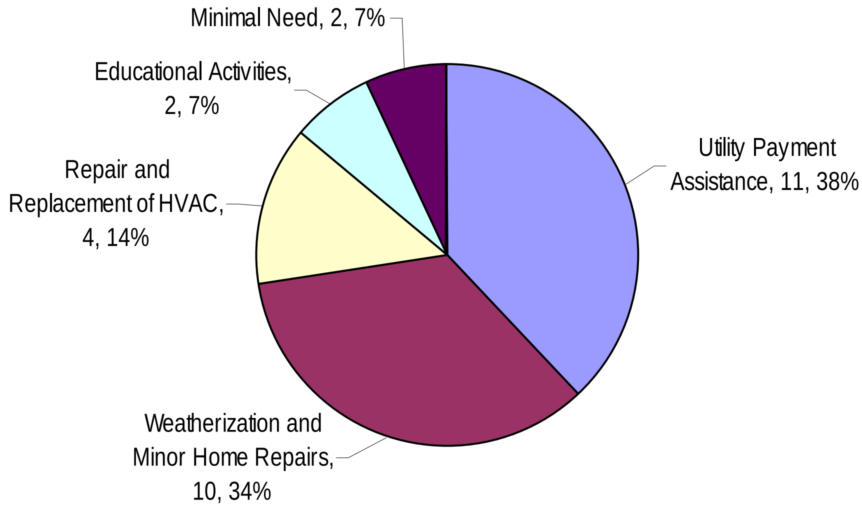
Rental Development with Greatest Need (29 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all Region 7 respondents, while assistance with weatherization and minor home repairs was a close second. Paralleling the state as a whole, these two activities dominated the responses in this category.

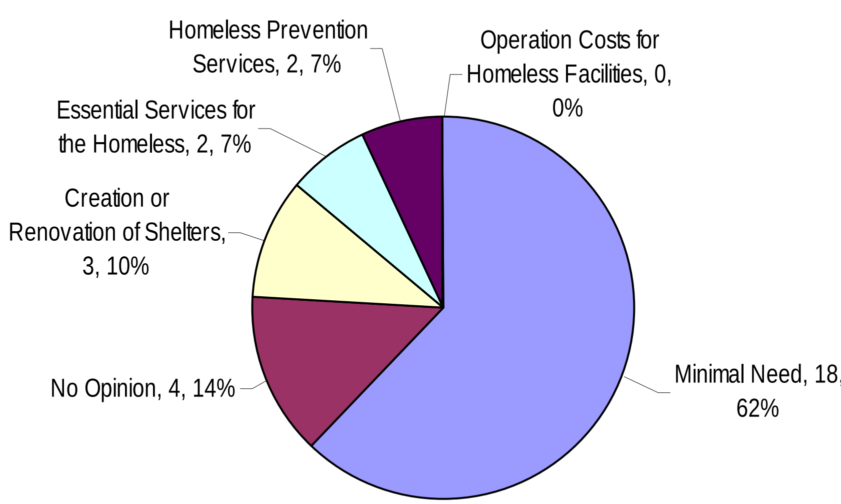
Energy Assistance Activity with Greatest Need (47 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 7 did not indicate a pressing need for homeless assistance activities. More than 60 percent of all respondents said there was only a minimal need for such activities in their communities and another 14 percent had no opinion. Of the respondents who did identify a need, a similar number indicated homeless prevention, essential services, and creation or renovation of shelters.

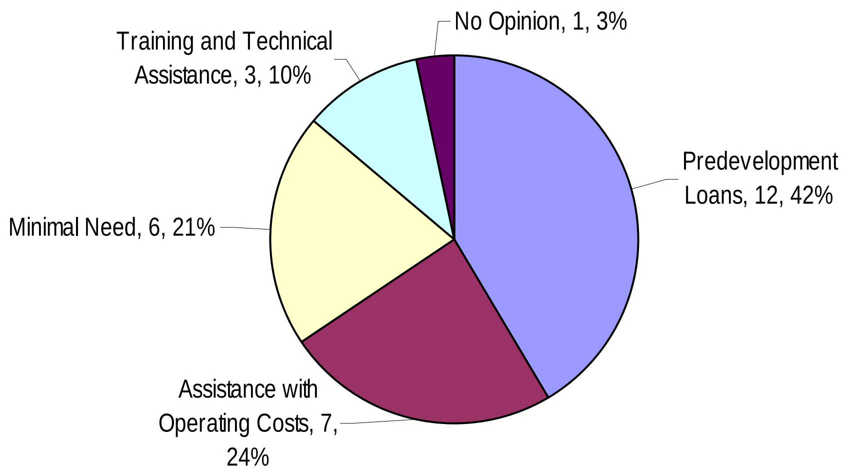
Homeless Assistance Activity with Greatest Need (47 Respondents)



CAPACITY BUILDING

Predevelopment loans appear to be a greater priority in Region 7 than in the state as a whole. Assistance with operating costs was also identified, as in most regions, by a significant percentage of respondents.

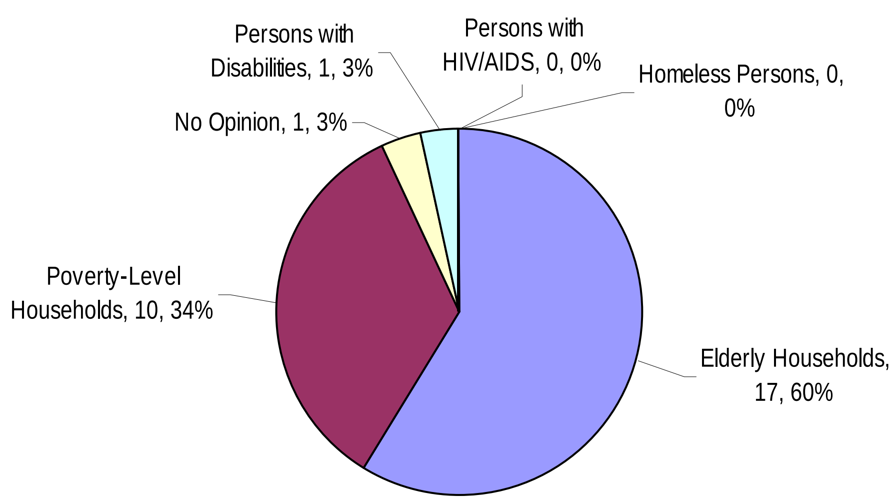
Capacity Building Activity with Greatest Need (29 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, 60 percent indicated elderly households as the population most in need of assistance in their communities. Poverty-level households was the second most selected group, indicated in more than one third of the responses. These two population groups together dominated the responses in this category, paralleling the statewide results.

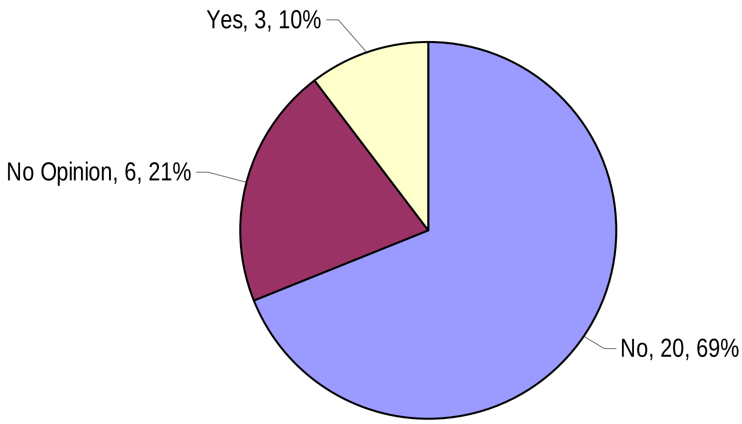
Population Most in Need of Assistance (29 Respondents)



MIGRANT FARM WORKERS

A significant majority of all respondents saw no need for migrant farm worker or seasonal housing in their communities. Only 10 percent stated that a need existed.

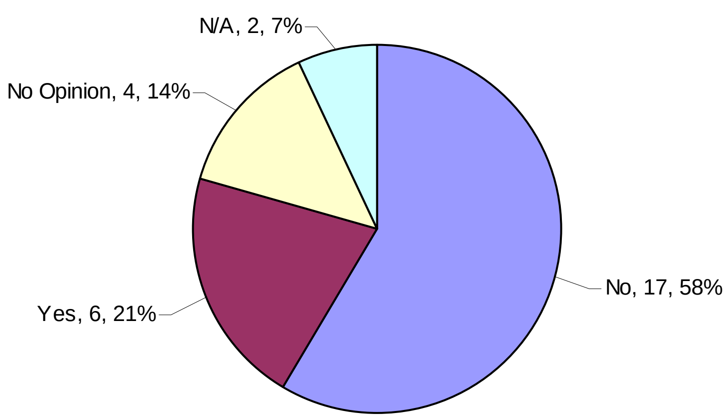
Need for Migrant Farm Worker Housing (29 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of respondents in the region stated there was no need for training on fair housing laws in their communities. Only 7 percent stated a need was present.

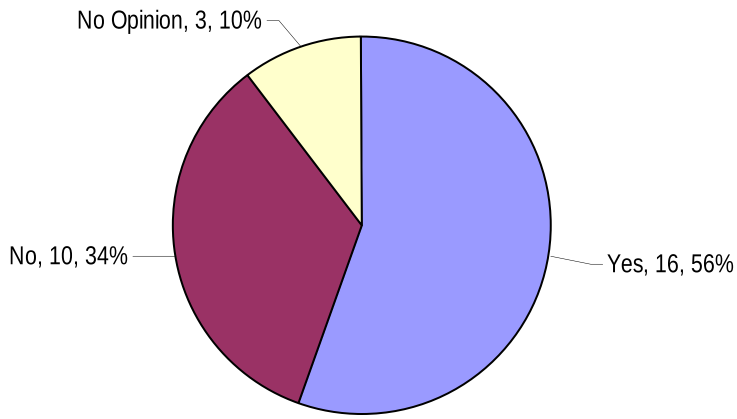
Need for Fair Housing Training (29 Respondents)



WORKING WITH TDHCA

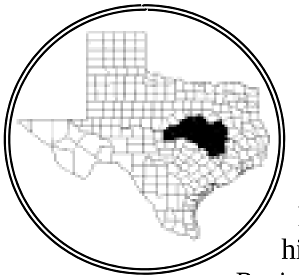
More than half of all respondents said there was a need for more information on the programs offered by TDHCA. At the same time, however, one third indicated they were already sufficiently informed about the Department.

Need for Information from TDHCA (29 Respondents)



SUMMARY

The survey response from Region 7 generally mirrored response from the state as a whole. A few variances, however, should be noted. In the question of housing assistance need, a significantly greater percentage of respondents in Region 7 than in the state as a whole answered that need was minimal. Additionally, assistance for elderly populations and predevelopment loans for capacity building both appear to be higher priorities in this region than they are statewide.



REGION 8

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. In Region 8, Housing Assistance and Energy Assistance Activities were the two categories most often ranked the highest by respondents. Assistance for Homeless Persons appeared to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

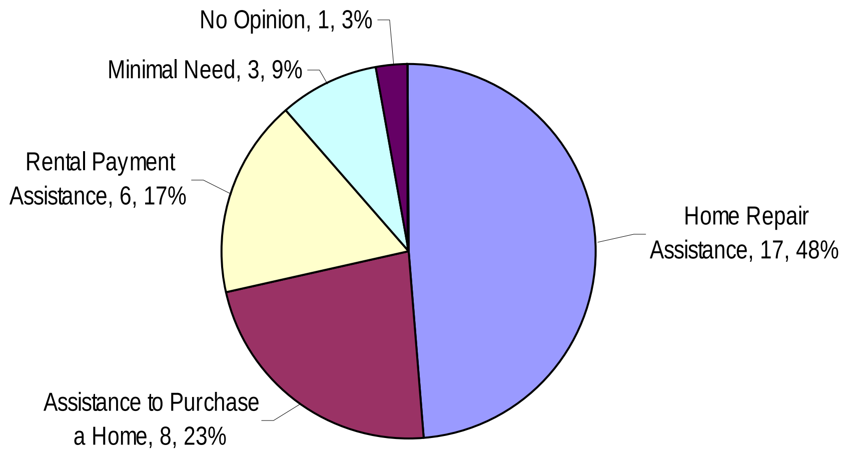
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	28% 7	16% 4	32% 8	16% 4	0%	8% 2	100% 25
2. Development of Apartments	18% 5	14% 4	25% 7	21% 6	11% 3	11% 3	100% 28
3. Energy Assistance	21% 6	32% 9	21% 6	14% 4	7% 2	4% 1	100% 28
4. Assistance for Homeless Persons	10% 3	7% 2	7% 2	23% 7	40% 12	13% 4	100% 30
5. Capacity Building Assistance	18% 6	9% 3	12% 4	24% 8	21% 7	15% 5	100% 33

HOUSING ASSISTANCE

Of all respondents, nearly half indicated home repair assistance as the greatest need in their communities. Home purchasing assistance and rental payment assistance were both identified by similar numbers of respondents.

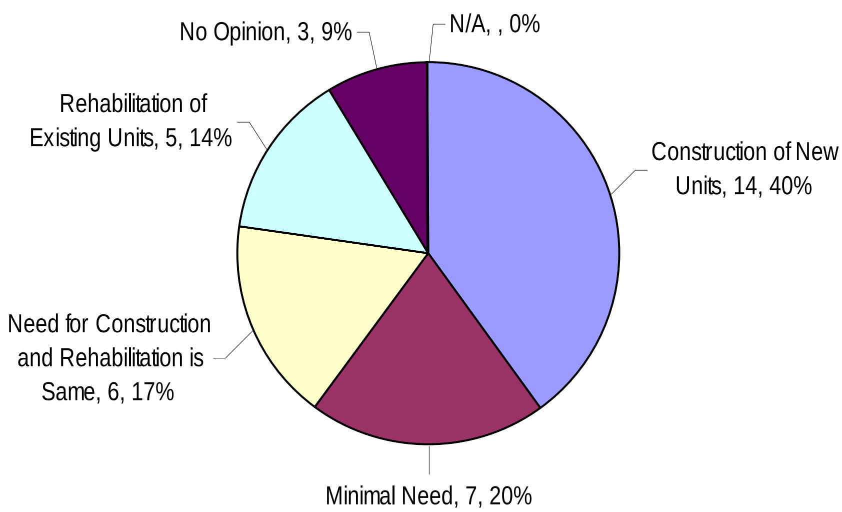
Housing Assistance Activity with Greatest Need (35 Respondents)



DEVELOPMENT OF RENTAL UNITS

A majority of the total respondents, 57 percent, stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A significantly smaller percentage indicated only rehabilitation as the most pressing need.

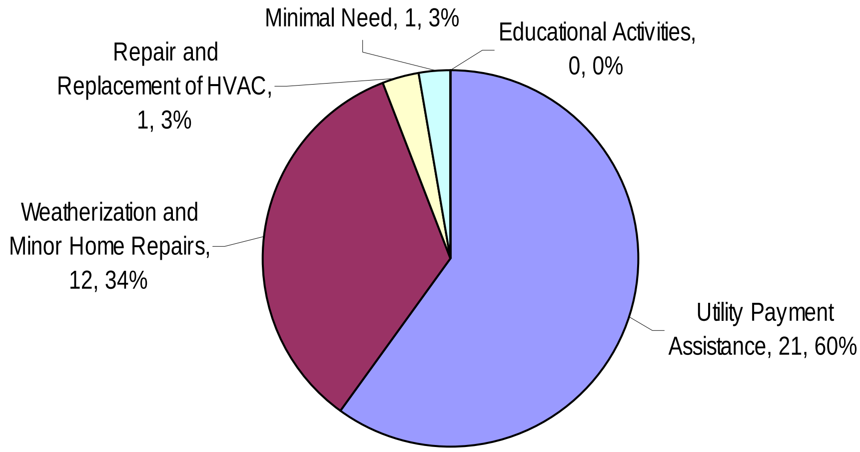
Rental Development Activity with Greatest Need (35 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all Region 8 respondents, while assistance with weatherization and minor home repairs was next most popular response. These two activities dominated the responses in this category, paralleling responses from the state as a whole.

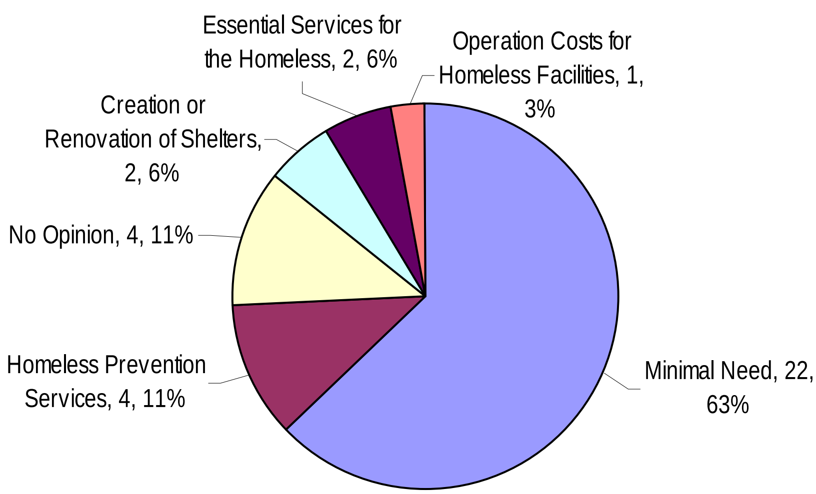
Energy Assistance Activity with Greatest Need (35 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 8 did not indicate a pressing need for homeless assistance activities. Over 60 percent of all respondents said there was only a minimal need for such activities in their communities. Of the respondents who did identify a need, most indicated homeless prevention services.

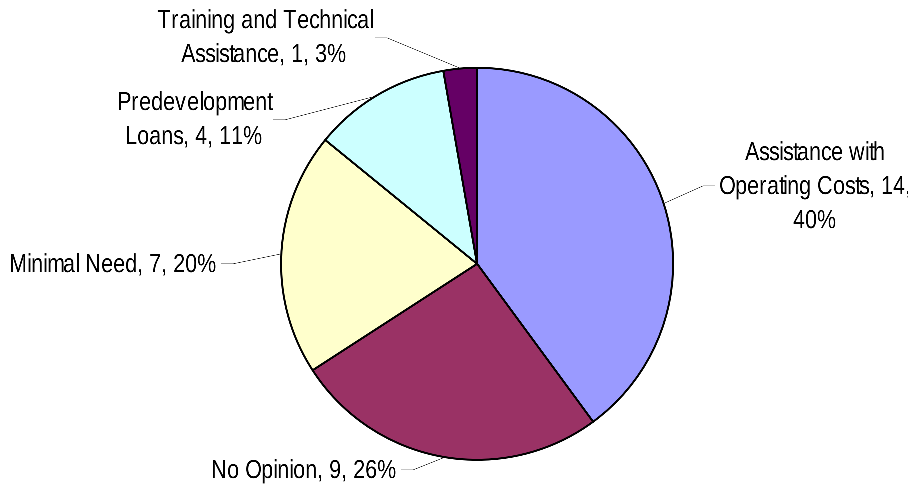
Homeless Assistance Activity with Greatest Need (35 Respondents)



CAPACITY BUILDING

Assistance with operating costs was the most identified capacity building activity in Region 8. However, a higher percentage of the region's respondents identified a minimal need or had no opinion than did respondents statewide.

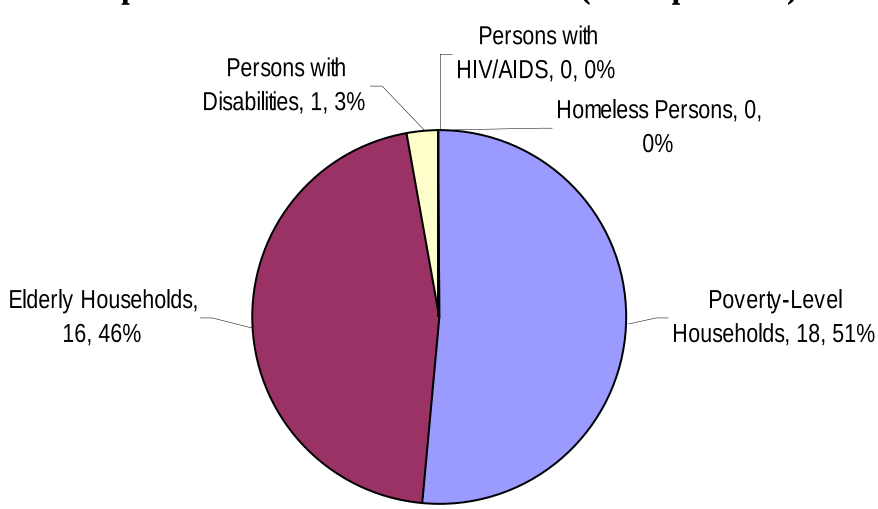
Capacity Building Activity with Greatest Need (35 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, almost half indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most popular choice, selected by more than 40 percent of the respondents. These two population groups together dominated the responses in this category, paralleling the responses from the state as a whole.

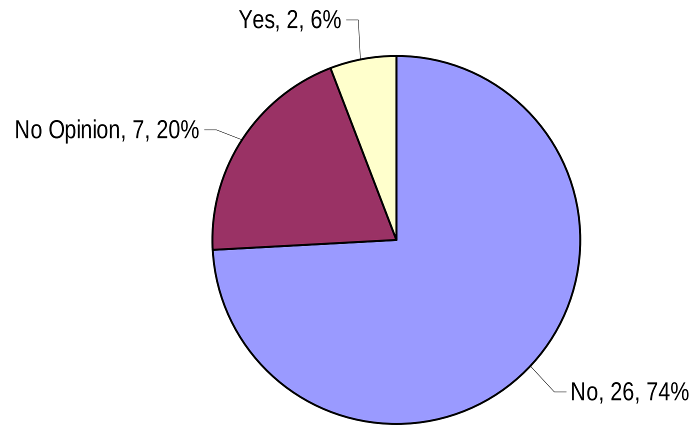
Population Most in Need of Assistance (35 Respondents)



MIGRANT FARM WORKERS

The vast majority of respondents in the region saw no need for migrant farm worker or temporary housing in their communities. Only 6 percent said a need existed.

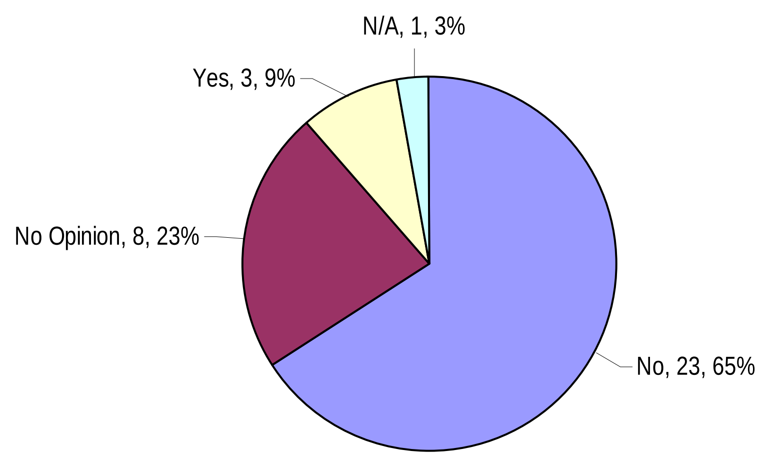
Need for Migrant Farm Worker Housing (35 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of respondents in the region stated there was no need for training on fair housing laws in their communities. Only 9 percent stated a need was present.

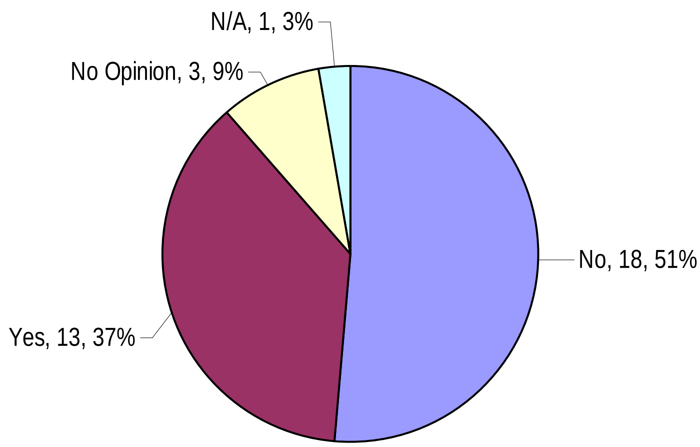
Need for Fair Housing Training (35 Respondents)



WORKING WITH TDHCA

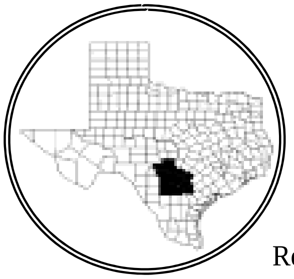
Just over half of all respondents indicated they were sufficiently informed about the programs offered by TDHCA. At the same time, however, a smaller but significant number said there was a need for more information.

Need for Information from TDHCA (35 Respondents)



SUMMARY

The survey response from Region 8 generally mirrored response from the state as a whole. The region differed slightly, however, in the category of capacity building. A higher percentage of the region's respondents identified a minimal need or had no opinion about capacity building activities than did respondents statewide.



REGION 9

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. In Region 9, Housing Assistance and Energy Assistance Activities were the two categories most often ranked the highest by respondents. Assistance for Homeless Persons appeared to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

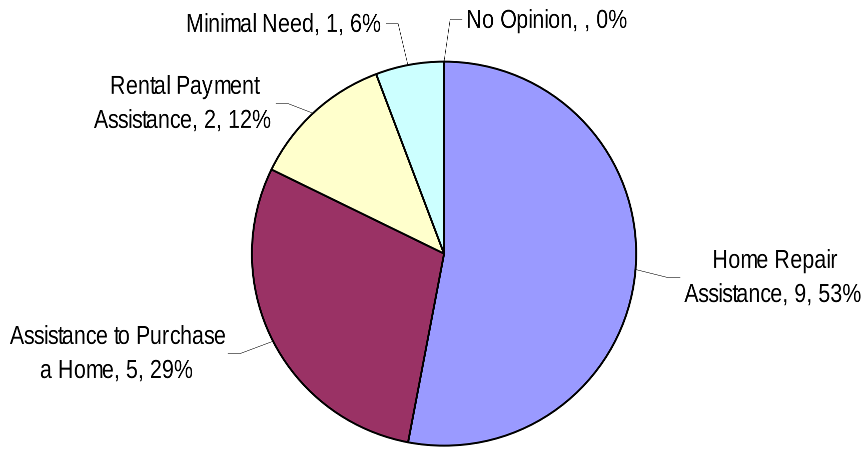
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	28% 7	16% 4	32% 8	16% 4	0%	8% 2	100% 25
2. Development of Apartments	18% 5	14% 4	25% 7	21% 6	11% 3	11% 3	100% 28
3. Energy Assistance	21% 6	32% 9	21% 6	14% 4	7% 2	4% 1	100% 28
4. Assistance for Homeless Persons	10% 3	7% 2	7% 2	23% 7	40% 12	13% 4	100% 30
5. Capacity Building Assistance	18% 6	9% 3	12% 4	24% 8	21% 7	15% 5	100% 33

HOUSING ASSISTANCE

Of all respondents, more than half indicated home repair assistance as the greatest need in their communities. Home purchasing assistance was the next most selected, with over one quarter of the responses. Only 6 percent considered the need for housing assistance to be minimal.

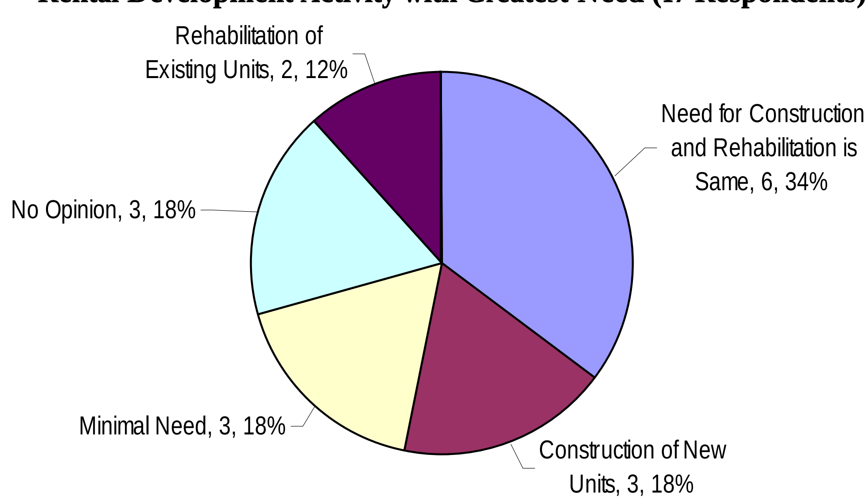
Housing Assistance Activity with Greatest Need (17 Respondents)



DEVELOPMENT OF RENTAL UNITS

Respondent opinion divided almost evenly between the greater importance of new construction of rental units or rehabilitation of existing units.

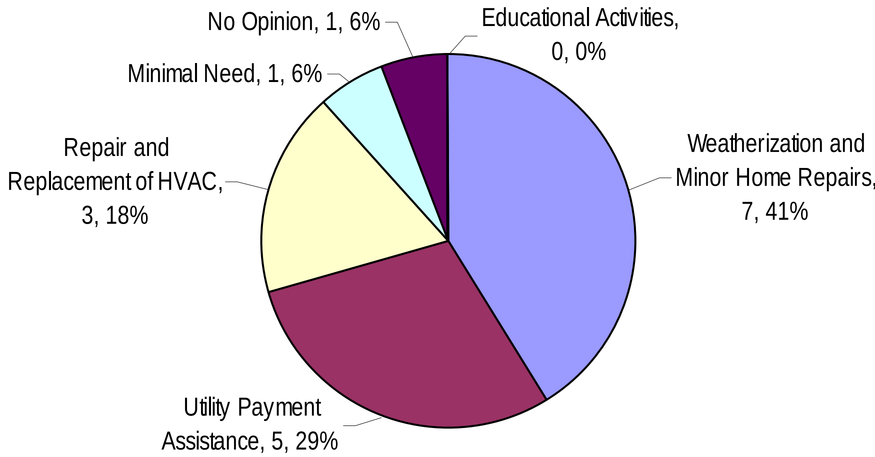
Rental Development Activity with Greatest Need (17 Respondents)



ENERGY ASSISTANCE

Assistance with weatherization and minor home repairs was the most commonly identified need amongst all Region 9 respondents, while utility payment assistance was the next most popular response.

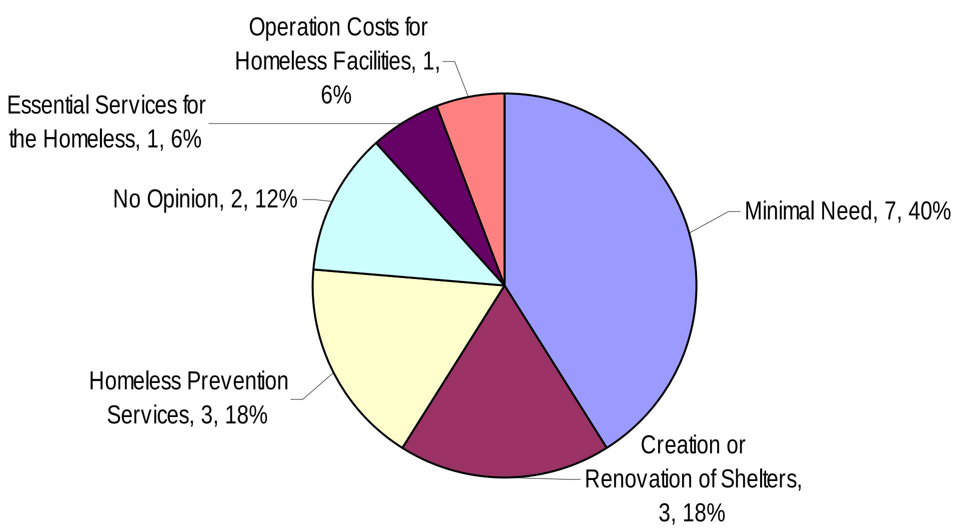
Energy Assistance Activity with Greatest Need (17 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 9 did not indicate a pressing need for homeless assistance activities. More than half of all respondents said there was either a minimal need for such activities in their communities or had no opinion on the issue. Of the respondents who did identify a need, most indicated creation or renovation of shelters or homeless prevention services.

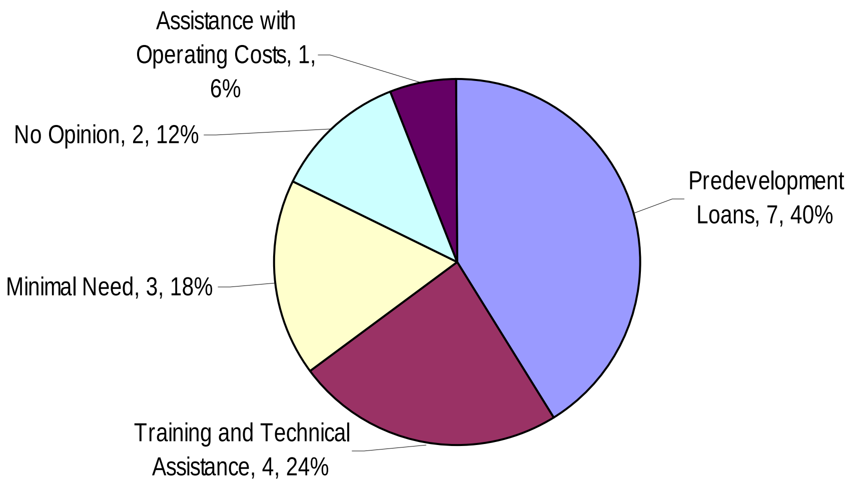
Homeless Assistance Activity with Greatest Need (17 Respondents)



CAPACITY BUILDING

Predevelopment loans, with 40% of the category's responses, appear to be a greater priority in Region 9 than in the state as a whole. Operating cost assistance, the need chosen by most respondents across the state, was only the fifth most popular answer in this region.

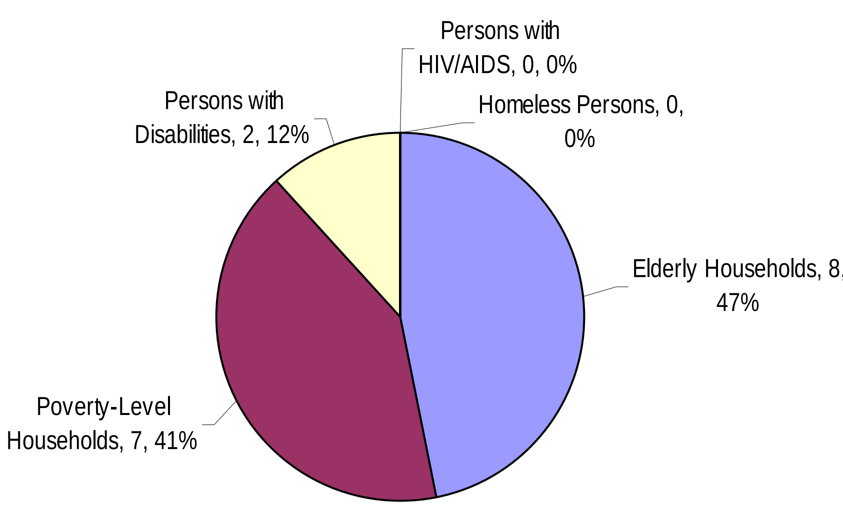
Capacity Building Activity with Greatest Need (17 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, almost half indicated elderly households as the population most in need of assistance in their communities. Poverty-level households was the second most popular choice, selected by more than 40 percent of the respondents. These two population groups together dominated the responses in this category, paralleling the responses from the state as a whole.

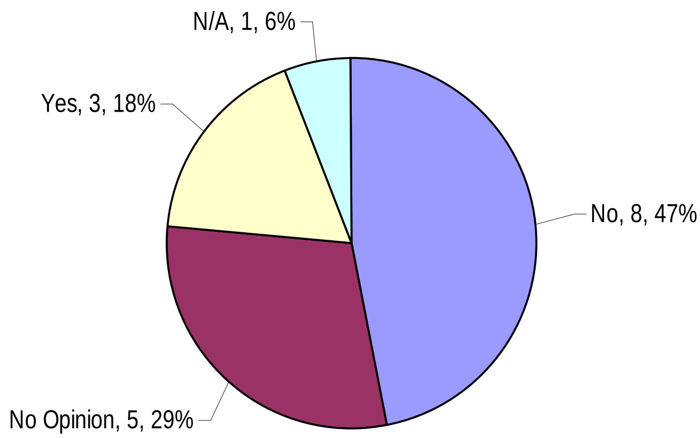
Population Most in Need of Assistance (17 Respondents)



MIGRANT FARM WORKERS

Almost half of respondents in the region saw no need for migrant farm worker or temporary housing in their communities. Another large percentage, about 30 percent, had no opinion on the issue.

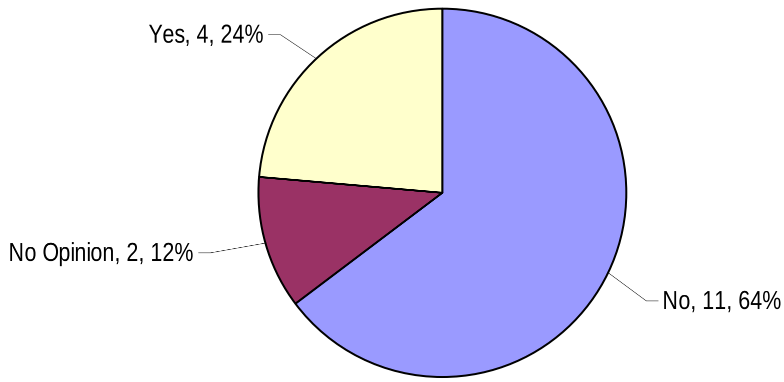
Need for Migrant Farm Worker Housing (17 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of respondents in the region stated there was no need for training on fair housing laws in their communities, but about one quarter said such training was indeed needed. This distribution of opinion is similar to the responses from the state as a whole.

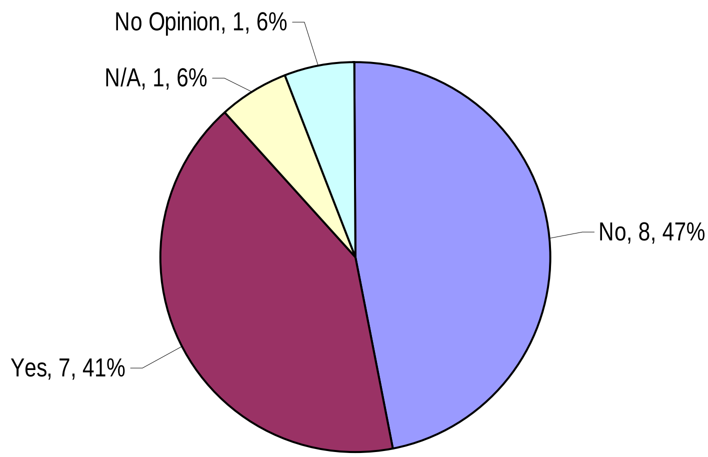
Need for Fair Housing Training (17 Respondents)



WORKING WITH TDHCA

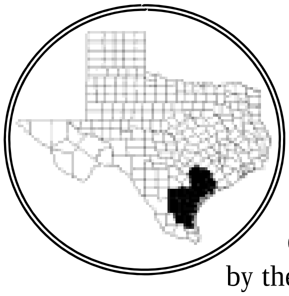
Almost half of all respondents indicated they were sufficiently informed about the programs offered by TDHCA. At the same time, however, a smaller but significant number said there was a need for more information.

Need for Information from TDHCA (17 Respondents)



SUMMARY

The survey response from Region 9 generally mirrored response from the state as a whole. The region differed slightly, however, in the category of capacity building. Predevelopment loans, chosen by 40% of the respondents, appear to be a greater priority in Region 9 than to those statewide.



REGION 10

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. Overall, Housing Assistance Activities was the category most often ranked the highest by the region's respondents, while Energy Assistance Activities was the next most likely to be selected as a top priority. Assistance for Homeless Persons appears to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

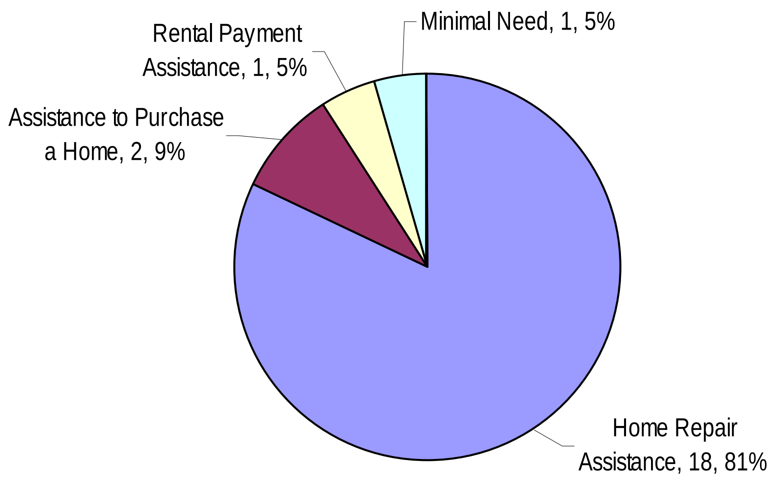
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	53% 8	20% 3	20% 3	7% 1	0%	0%	100% 15
2. Development of Apartments	19% 3	19% 3	31% 5	13% 2	13% 2	6% 1	100% 16
3. Energy Assistance	18% 3	41% 7	24% 4	18% 3	0%	0%	100% 17
4. Assistance for Homeless Persons	0%	17% 3	11% 2	11% 2	50% 9	11% 2	100% 18
5. Capacity Building Assistance	29% 6	0%	10% 2	33% 7	14% 3	14% 3	100% 21

HOUSING ASSISTANCE

More than 80 percent of Region 10's respondents identified home repair assistance as the greatest housing need, a figure comparatively greater than the 49 percent offering the same opinion statewide. Correspondingly, only a minor percentage of this region's respondents said that need for housing assistance was minimal.

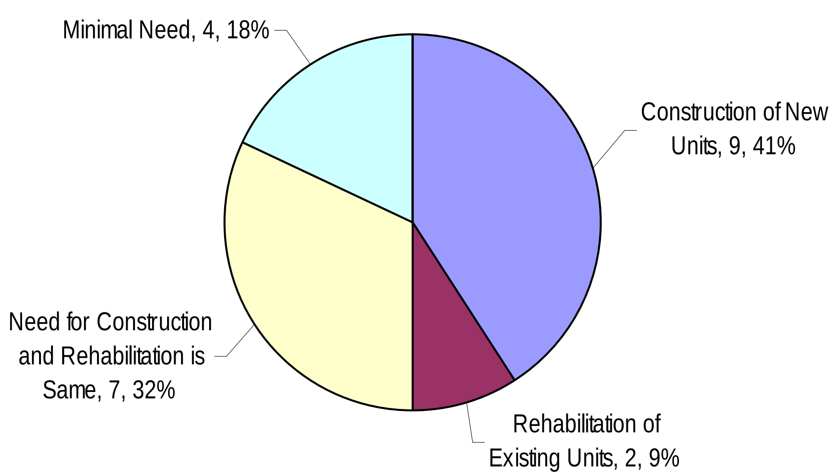
Housing Assistance Activity with Greatest Need (22 Respondents)



DEVELOPMENT OF RENTAL UNITS

A large majority of the total respondents, 73 percent, stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

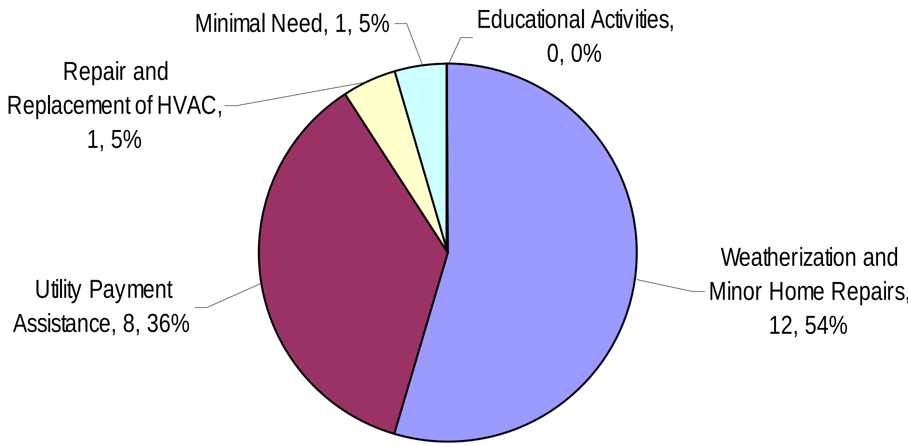
Rental Development Activity with Greatest Need (22 Respondents)



ENERGY ASSISTANCE

Assistance with weatherization and minor home repairs was the most commonly identified need amongst all Region 10 respondents, while utility payment assistance was the next most popular response. These two activities dominated the responses in this category, paralleling responses from the state as a whole.

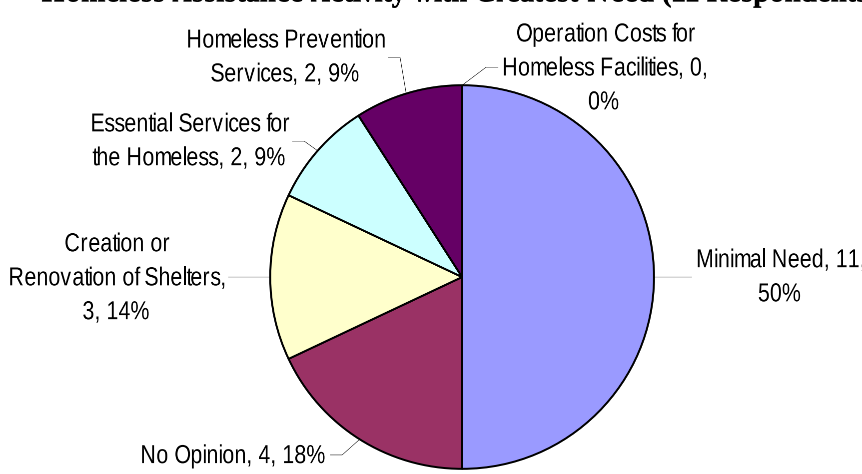
Energy Assistance Activity with Greatest Need (22 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 10 did not indicate a pressing need for homeless assistance activities. Half of all respondents said there was only a minimal need for such activities in their communities. Smaller percentages indicated homeless prevention, essential services, and creation or renovation of shelters in similar numbers.

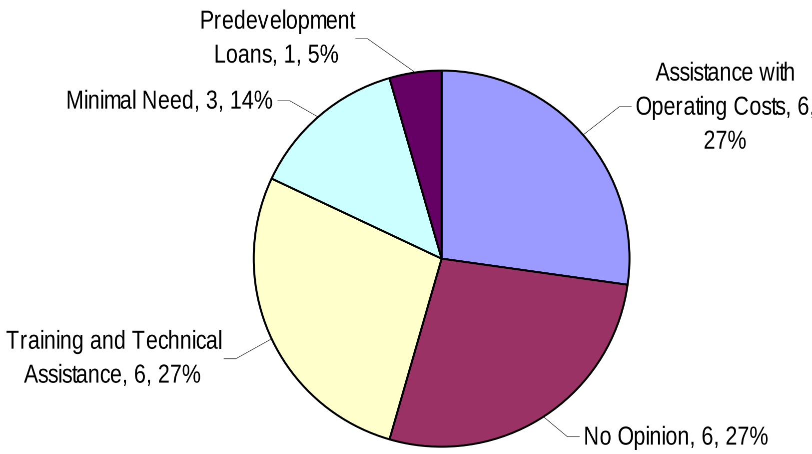
Homeless Assistance Activity with Greatest Need (22 Respondents)



CAPACITY BUILDING

Training and technical assistance and assistance with operating costs were the two most selected capacity building activities.

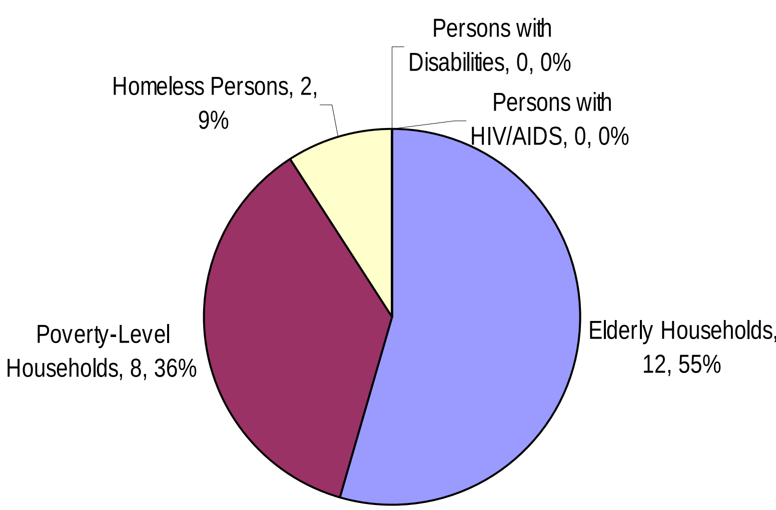
Capacity Building Activity with Greatest Need (22 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, more than half indicated elderly households as the population most in need of assistance in their communities. Poverty-level households was the second most popular choice, selected by more than one third of the respondents. These two population groups together dominated the responses in this category, paralleling the responses from the state as a whole.

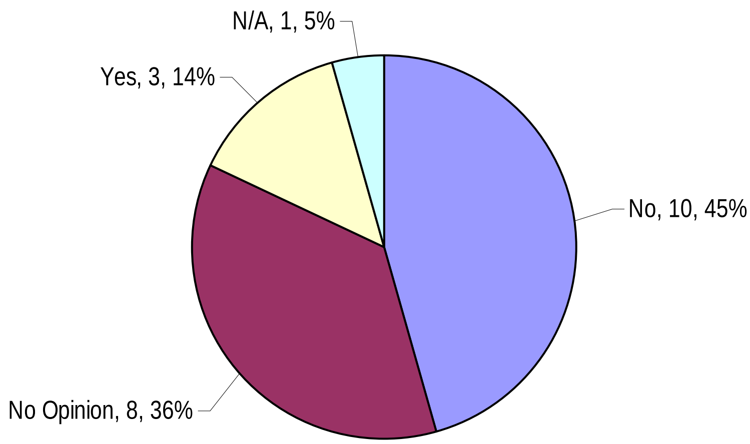
Population Most in Need of Assistance (22 Respondents)



MIGRANT FARM WORKERS

Similar to the response statewide, almost half of respondents in Region 10 saw no need for migrant farm worker or temporary housing in their communities. Another large percentage, more than one third, had no opinion on the issue.

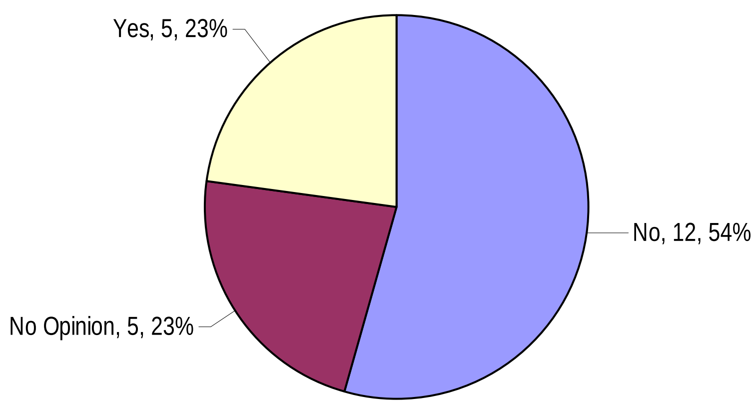
Need for Migrant Farm Worker Housing (22 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of respondents in the region stated there was no need for training on fair housing laws in their communities, but about one quarter said such training was indeed needed. This distribution of opinion is similar to the responses from the state as a whole.

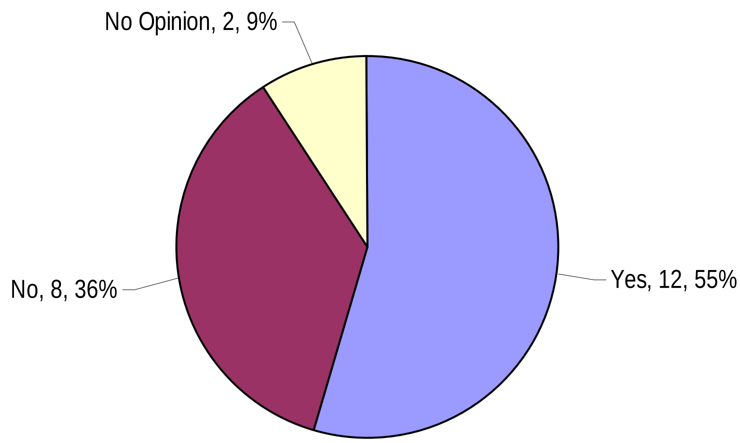
Need for Fair Housing Training (22 Respondents)



WORKING WITH TDHCA

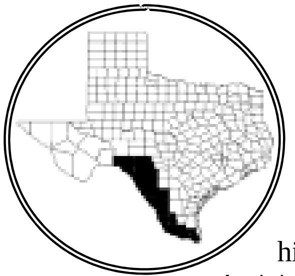
More than half of all respondents indicated there was a need for more information about the programs offered by TDHCA. At the same time, however, a smaller but significant number said they were already sufficiently informed.

Need for Information from TDHCA (22 Respondents)



SUMMARY

The survey response from Region 10 generally mirrored response from the state as a whole. Although a majority of respondents statewide identified home repair assistance as the most important housing need, the need for this type of assistance was particularly emphasized in Region 10. Respondents there indicated home repair assistance in a greater percentage than in any other region.



REGION 11

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. Overall, Housing Assistance Activities was the category most often ranked the highest by the region's respondents, while Energy Assistance and Rental Development Activities were the next most popular choices. Assistance for Homeless Persons, the category most likely to receive the lowest rank, appears to be the least relevant category to the respondents.

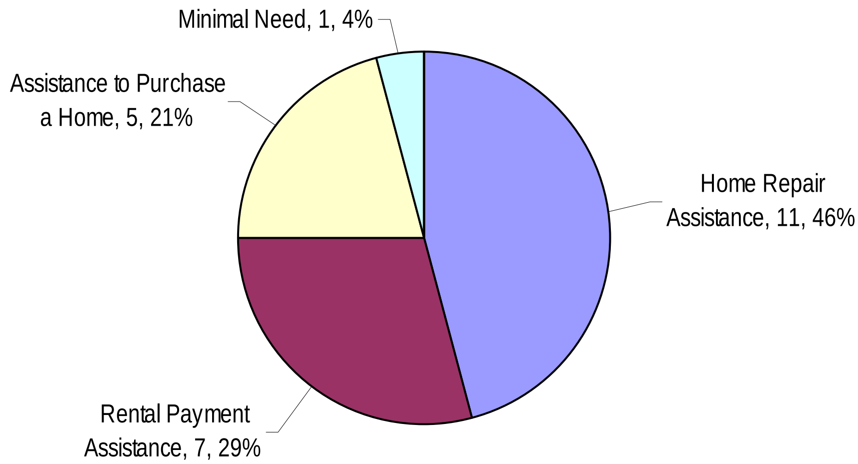
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	62% 8	15% 2	0%	15% 2	0%	8% 1	100% 13
2. Development of Apartments	31% 4	31% 4	31% 4	0%	8% 1	0%	100% 13
3. Energy Assistance	13% 2	47% 7	33% 5	0%	0%	7% 1	100% 15
4. Assistance for Homeless Persons	11% 2	6% 1	22% 4	22% 4	33% 6	6% 1	100% 18
5. Capacity Building Assistance	18% 4	18% 4	23% 5	18% 4	23% 5	0%	100% 22

HOUSING ASSISTANCE

Of all respondents in the region, almost half indicated home repair assistance as the greatest need in their respective communities. Rental Payment assistance was the next most selected, with more than one quarter of the responses. Only 4 percent stated that there was a minimal need for housing assistance.

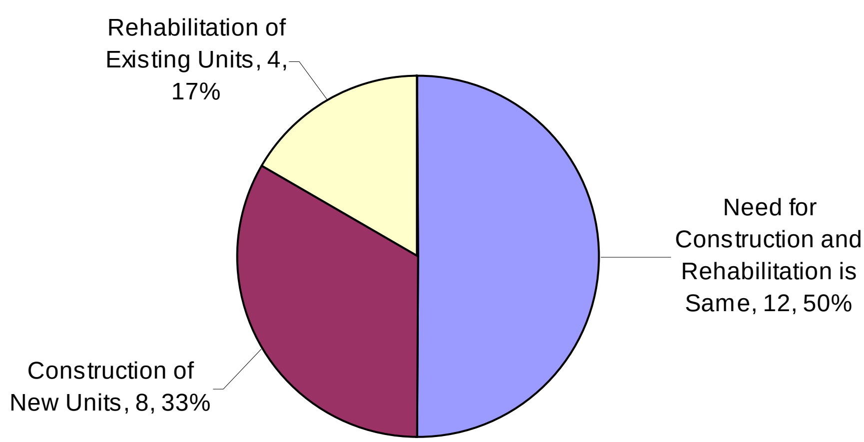
Housing Assistance Activity with Greatest Need (24 Respondents)



DEVELOPMENT OF RENTAL UNITS

A large majority of the total respondents, 83 percent, stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A smaller percentage indicated only rehabilitation as the most pressing need.

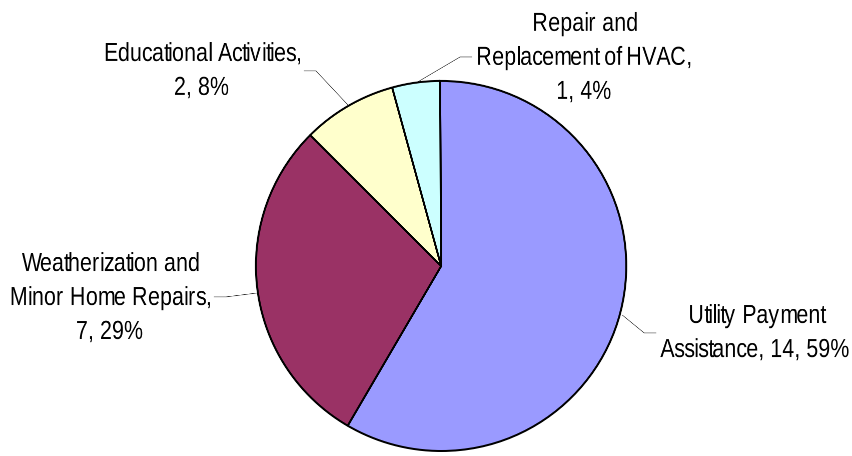
Rental Development Activity with Greatest Need (24 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all respondents in the region, while assistance with weatherization and minor home repairs was a close second. These two activities dominated the responses in this category, paralleling responses from the state as a whole.

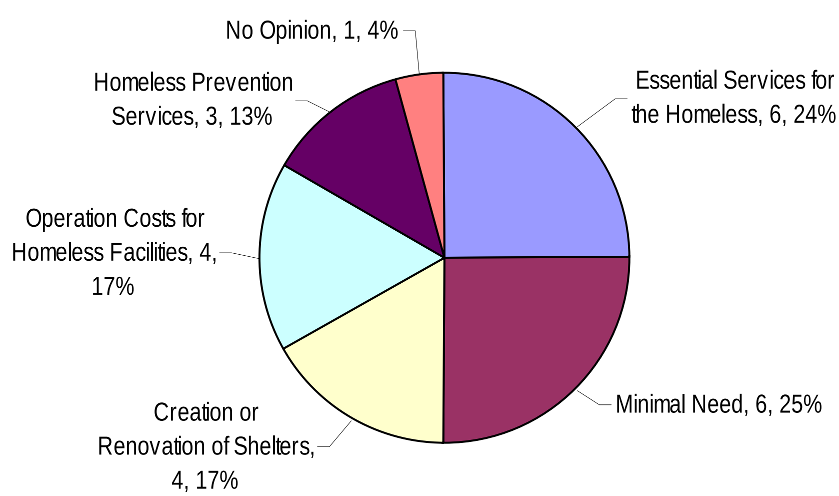
Energy Assistance Activity with Greatest Need (24 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

More respondents in Region 11 indicated a need for homeless assistance than did those in other regions. Only one quarter in Region 11 said there was a minimal need, compared to nearly 50 percent statewide. Additionally, similar numbers of Region 11 respondents identified facility operation costs, essential services, and creation or renovation of shelters as the most important needs.

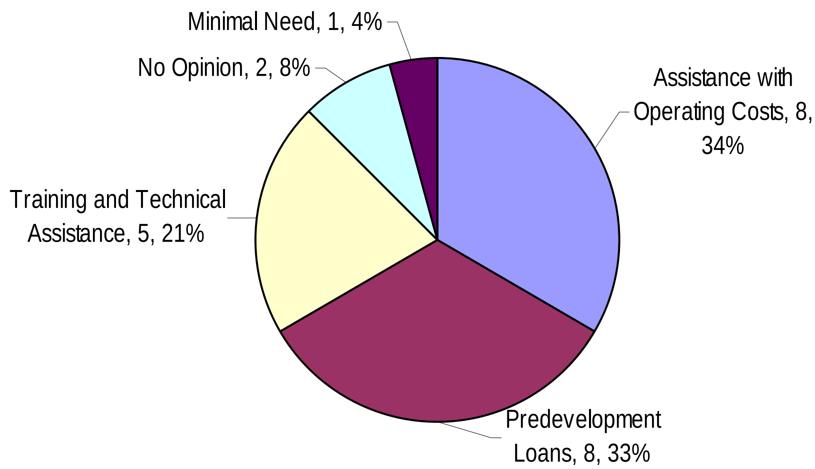
Homeless Assistance Activity with Greatest Need (24 Respondents)



CAPACITY BUILDING

Operating cost assistance and predevelopment loans were the two most selected capacity building activities. A significantly smaller percentage of respondents answered "there is a minimal need" or "no opinion" than in the state as a whole.

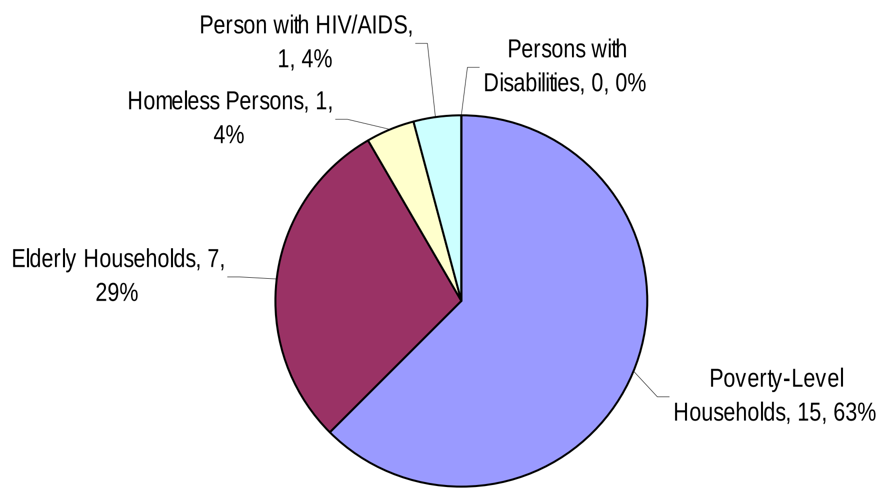
Capacity Building Activity with Greatest Need (24 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, more than 60 percent indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most popular choice, selected by more than one quarter of the respondents. These two population groups together dominated the responses in this category, similar to the responses from the state as a whole.

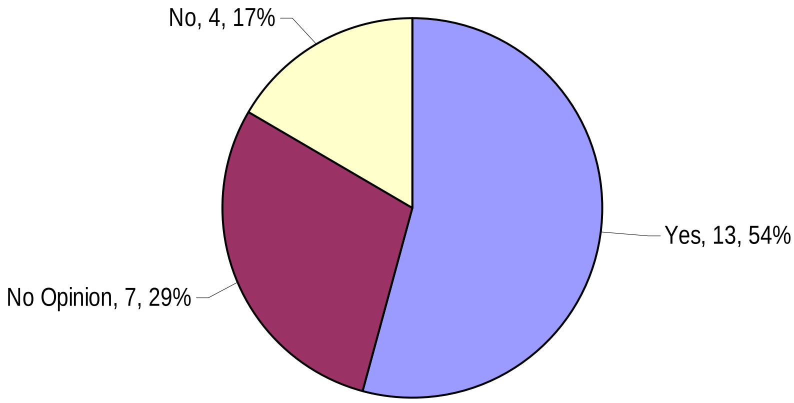
Population Most in Need of Assistance (24 Respondents)



MIGRANT FARM WORKERS

In stark contrast to overall statewide response, in which need for migrant farm worker housing was not given wide support, more than half of respondents in Region 11 indicated a need for such temporary housing in their communities.

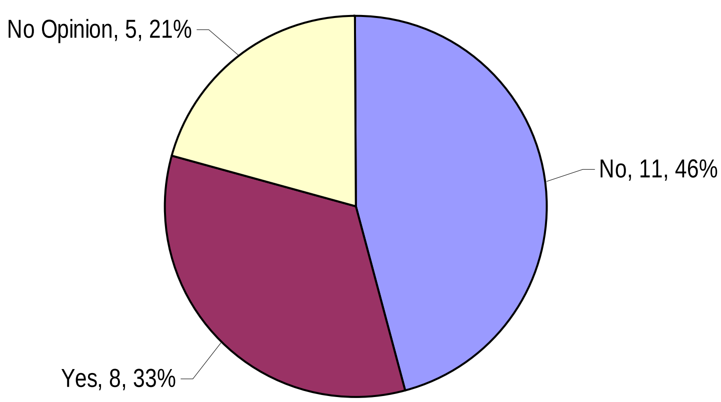
Need for Migrant Farm Worker Housing (24 Respondents)



FAIR HOUSING AND DISCRIMINATION

A larger percentage of the region's respondents (33 percent) identified a need for fair housing training than did respondents from the state as a whole (18 percent).

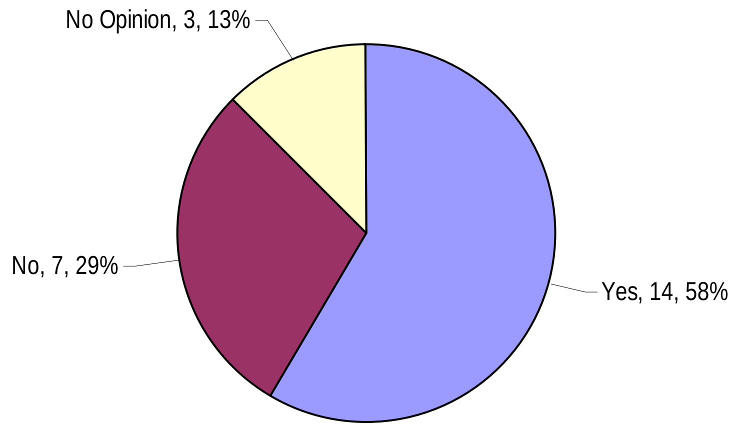
Need for Fair Housing Training (24Respondents)



WORKING WITH TDHCA

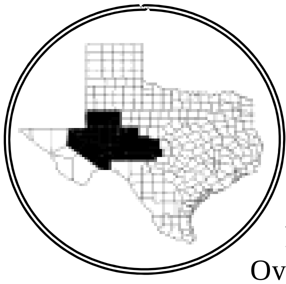
More than half of all respondents indicated there was a need for more information about the programs offered by TDHCA. At the same time, however, a smaller but significant number said they were already sufficiently informed.

Need for Information from TDHCA (24 Respondents)



SUMMARY

The survey response from Region 11 generally mirrored response from the state as a whole. However, the region differed in a few categories. First, in contrast with overall statewide response, more than half of respondents in this border region indicated a need for migrant farm worker housing. Also, larger percentages of the region's respondents identified needs for homeless assistance and fair housing training and than did respondents from the state as a whole.



REGION 12

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. Overall, Housing Assistance Activities was the category most often ranked the highest by the region's respondents, while Energy Assistance Activities was the next most likely to be selected as a top priority (ranked 1 or 2). Assistance for Homeless Persons appears to be the least relevant category to the respondents, with a majority ranking it as the least needed or giving no opinion on the category.

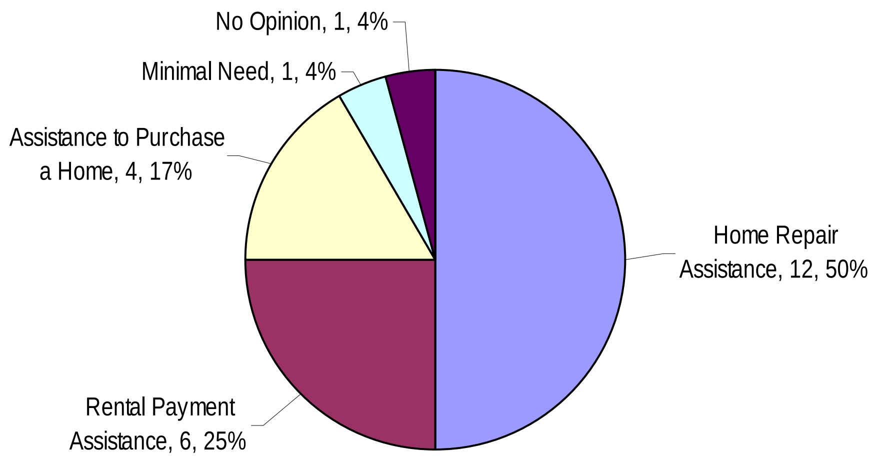
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	50% 10	30% 6	15% 3	5% 1	0%	0%	100% 20
2. Development of Apartments	30% 6	10% 2	10% 2	15% 3	25% 5	10% 2	100% 20
3. Energy Assistance	12% 2	41% 7	35% 6	12% 2	0%	0%	100% 17
4. Assistance for Homeless Persons	9% 2	5% 1	14% 3	18% 4	45% 10	9% 2	100% 22
5. Capacity Building Assistance	9% 2	18% 4	23% 5	27% 6	14% 3	9% 2	100% 22

HOUSING ASSISTANCE

Of all respondents in the region, half indicated home repair assistance as the greatest need in their respective communities. Rental Payment assistance was the next most selected, with one quarter of the responses. Only 4 percent stated that there was a minimal need for housing assistance.

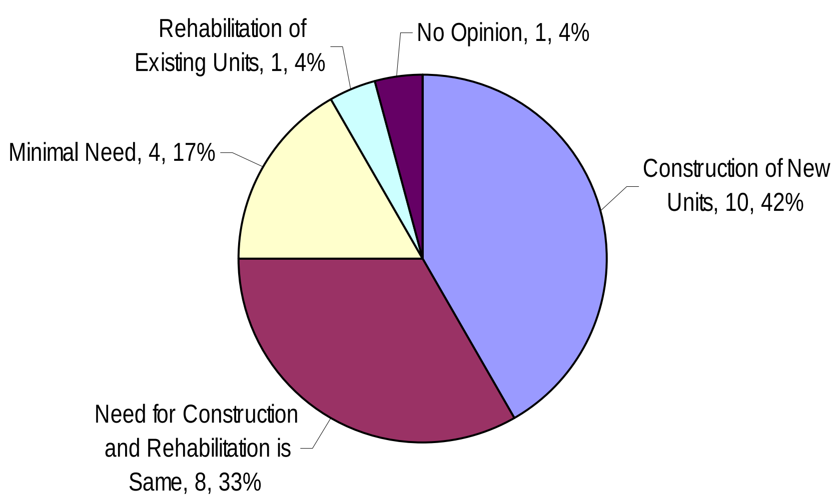
Housing Assistance Activity with Greatest Need (24 Respondents)



DEVELOPMENT OF RENTAL UNITS

A large majority of the total respondents, 75 percent, stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

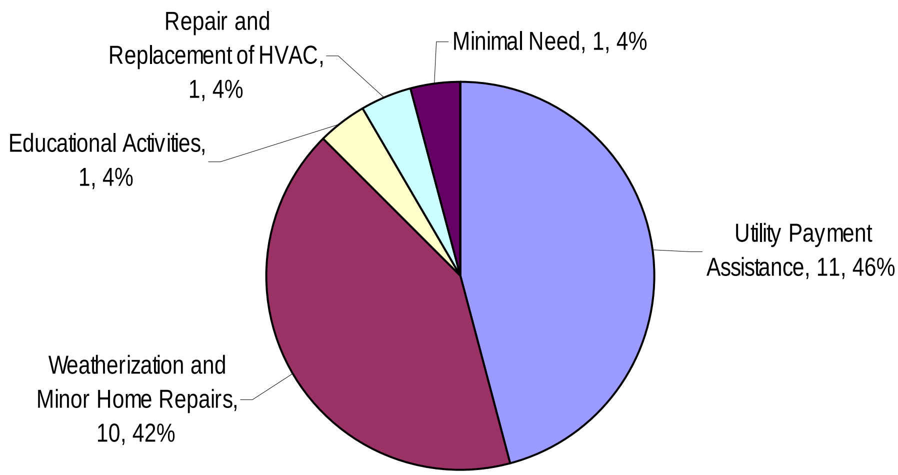
Rental Development Activity with Greatest Need (24 Respondents)



ENERGY ASSISTANCE

Utility payment assistance was the most commonly identified need amongst all respondents in the region, while assistance with weatherization and minor home repairs was a close second. These two activities dominated the responses in this category, paralleling responses from the state as a whole.

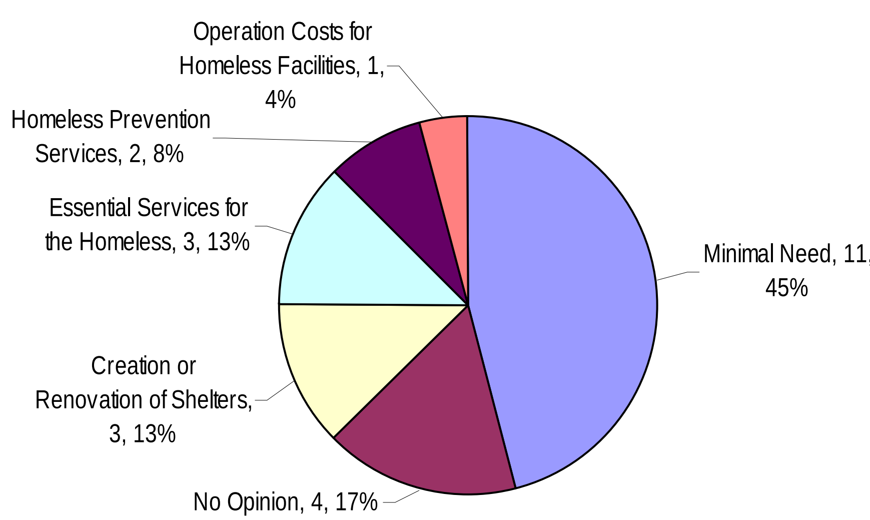
Energy Assistance Activity with Greatest Need (24 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

Like the state as a whole, most respondents in Region 12 did not indicate a pressing need for homeless assistance activities. Nearly half of all respondents said there was only a minimal need for such activities in their communities. Those who did identify need indicated essential services and creation or renovation of shelters in equal percentages.

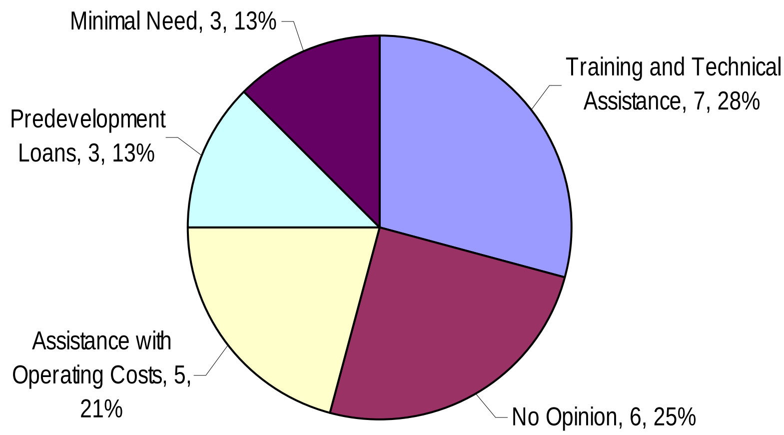
Homeless Assistance Activity with Greatest Need (24 Respondents)



CAPACITY BUILDING

Technical and training assistance and assistance with operating costs were the two most selected capacity building activities. At the same time, more than one third of respondents in the region stated need was minimal or gave no opinion on the issue.

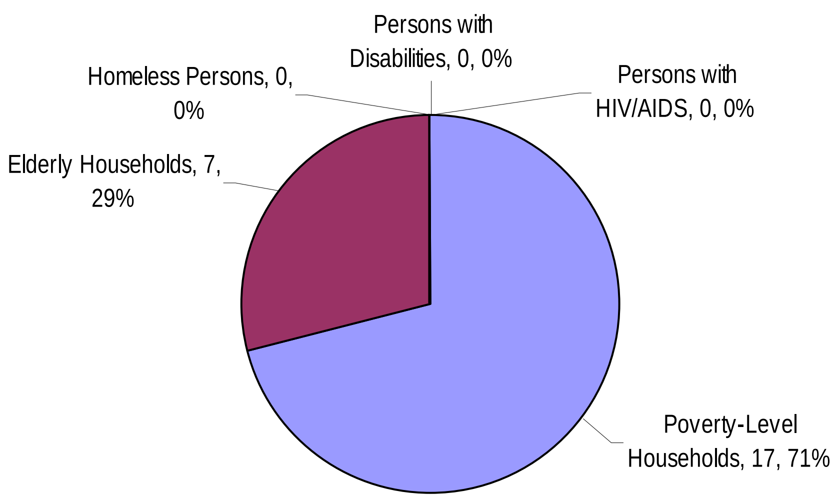
Capacity Building Activity with Greatest Need (24 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, more than 70 percent indicated poverty-level households as the population most in need of assistance in their communities. Elderly households was the second most popular choice, selected by more than one quarter of the respondents. These two population groups together dominated the responses in this category, similar to the responses from the state as a whole.

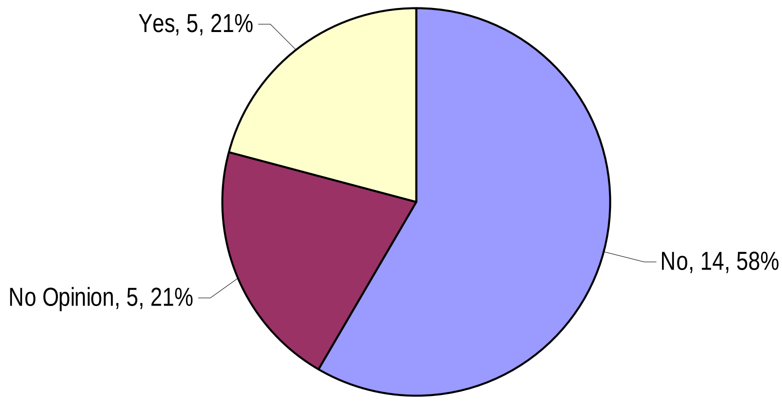
Population Most in Need of Assistance (24 Respondents)



MIGRANT FARM WORKERS

A majority of all respondents saw no need for migrant farm worker or seasonal housing in their communities. Less than one quarter stated that a need existed.

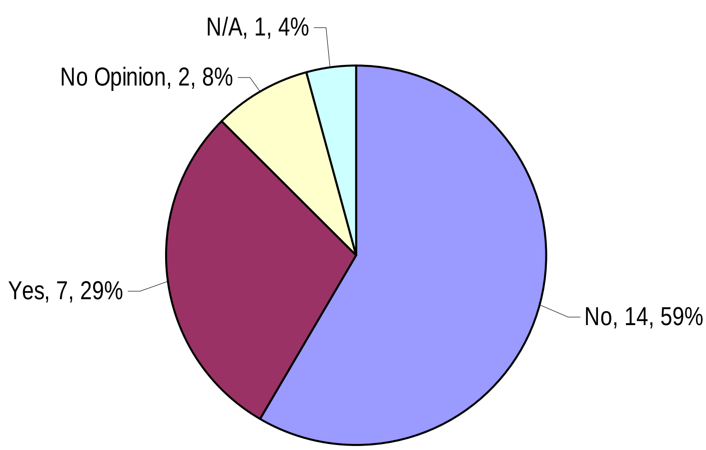
Need for Migrant Farm Worker Housing (24 Respondents)



FAIR HOUSING AND DISCRIMINATION

A majority of all respondents stated there was no need for training on fair housing laws in their communities. However, the percentage who stated there was indeed a need was higher in Region 12 than in the state as a whole.

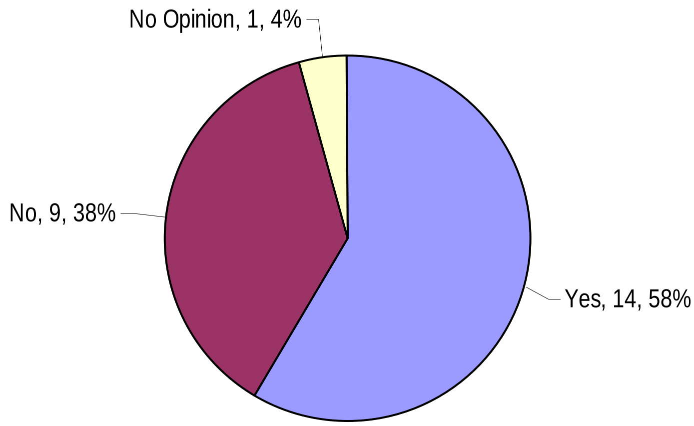
Need for Fair Housing Training (24Respondents)



WORKING WITH TDHCA

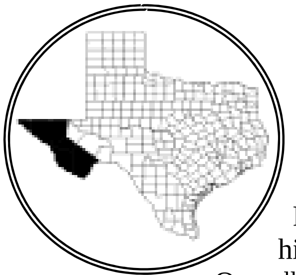
More than half of all respondents indicated there was a need for more information about the programs offered by TDHCA. At the same time, however, a smaller but significant number said they were already sufficiently informed.

Need for Information from TDHCA (24 Respondents)



SUMMARY

The survey response from Region 12 generally mirrored response from the state as a whole. One difference, however, was noteworthy in the special needs populations category. Although poverty-level households was the population most identified as in-need across the state, respondents in Region 12 pointed to poverty-level households in a greater percentage than in any other region.



REGION 13

GENERAL NEED

Respondents ranked five general categories of housing assistance activities from highest to lowest level of need, with 1 indicating the highest and 5 the lowest. Overall, Housing Assistance Activities was the category most often ranked the highest by Region 13's respondents, while Development of Apartments was the next most likely to be selected as a top priority. Assistance for Homeless Persons, the category most likely to receive the lowest rank, appears to be the least relevant category to the respondents.

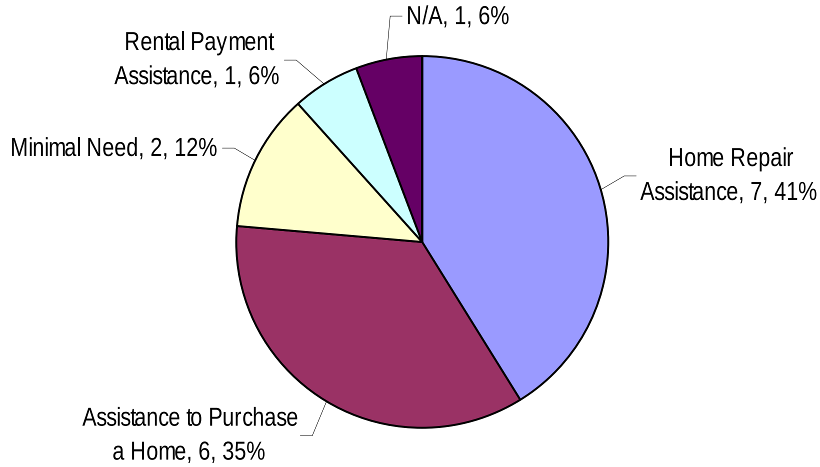
Ranking of Need for General Housing Assistance

	Number of responses per need rank (1 highest, 5 lowest), and percent of total responses within each activity						
Answer Choice	1	2	3	4	5	No Opinion	Total Responses
1. Housing Assistance	58% 7	33% 4	8% 1	0%	0%	0%	100% 12
2. Development of Apartments	43% 3	0%	29% 2	14% 1	14% 1	0%	100% 7
3. Energy Assistance	0%	56% 5	22% 2	22% 2	0%	0%	100% 9
4. Assistance for Homeless Persons	27% 3	9% 1	18% 2	9% 1	36% 4	0%	100% 11
5. Capacity Building Assistance	17% 2	8% 1	42% 5	17% 2	17% 2	0%	100% 12

HOUSING ASSISTANCE

Home repair assistance and rental payment assistance were the two most selected housing assistance needs in the region. This is similar to the responses from the state as a whole.

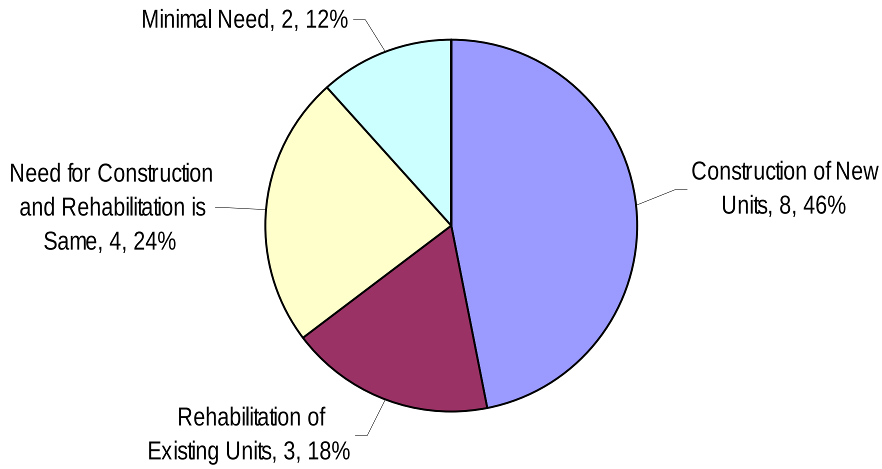
Housing Assistance Activity with Greatest Need (17 Respondents)



DEVELOPMENT OF RENTAL UNITS

A majority of the total respondents, 70 percent, stated that new rental-unit construction was either the greatest overall need, or that it was equally as necessary as rehabilitation of existing units. A much smaller percentage indicated only rehabilitation as the most pressing need.

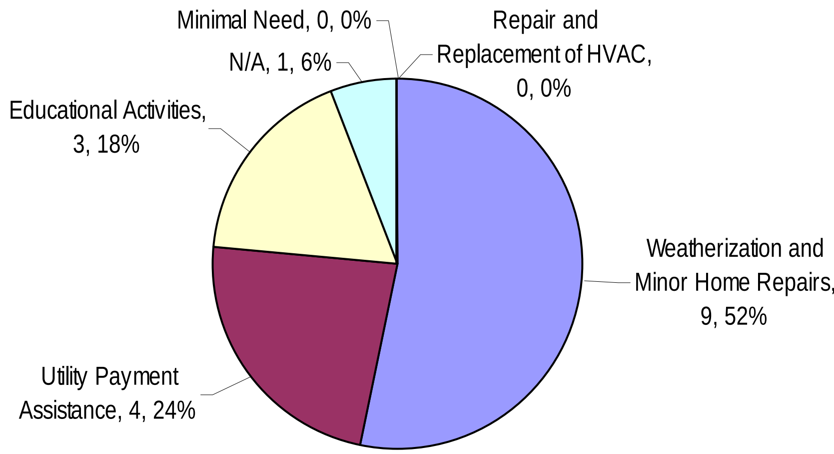
Rental Development Activity with Greatest Need (17 Respondents)



ENERGY ASSISTANCE

Differing from the other regions, a majority of Region 13's respondents identified weatherization and minor home repairs as the greatest energy assistance need in their communities. Utility payment assistance was the second most selected activity.

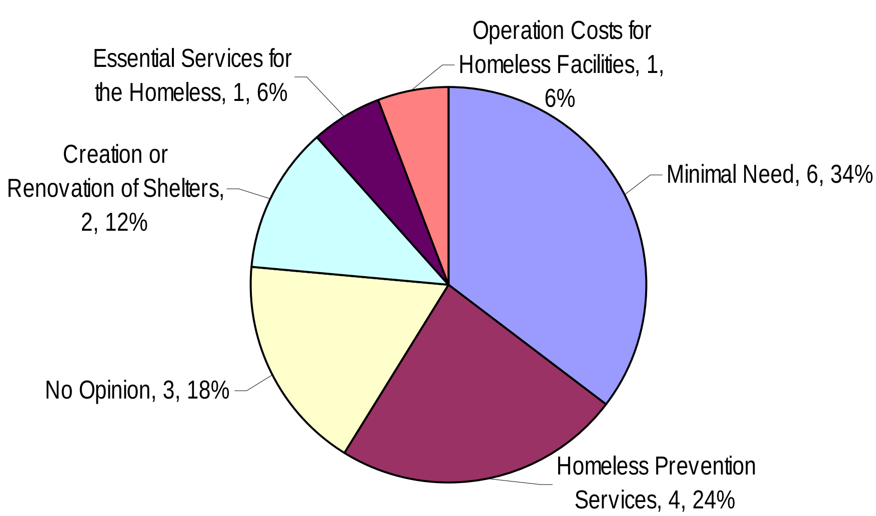
Energy Assistance Activity with Greatest Need (17 Respondents)



ASSISTANCE FOR HOMELESS PERSONS

More respondents in Region 13 indicated a need for homeless assistance than did those in most of the state. Only about one third in Region 13 said there was a minimal need, compared to nearly 50 percent statewide. Additionally, a quarter of Region 13 respondents identified homeless prevention services as the most important need.

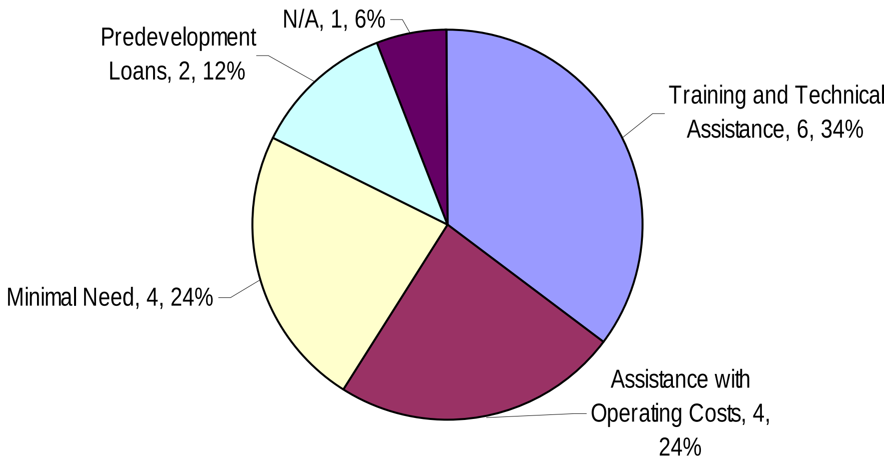
Homeless Assistance Activity with Greatest Need (17 Respondents)



CAPACITY BUILDING

Technical and training assistance and assistance with operating costs were the two most selected capacity building activities. At the same time, nearly a quarter of respondents in the region stated capacity building need was minimal.

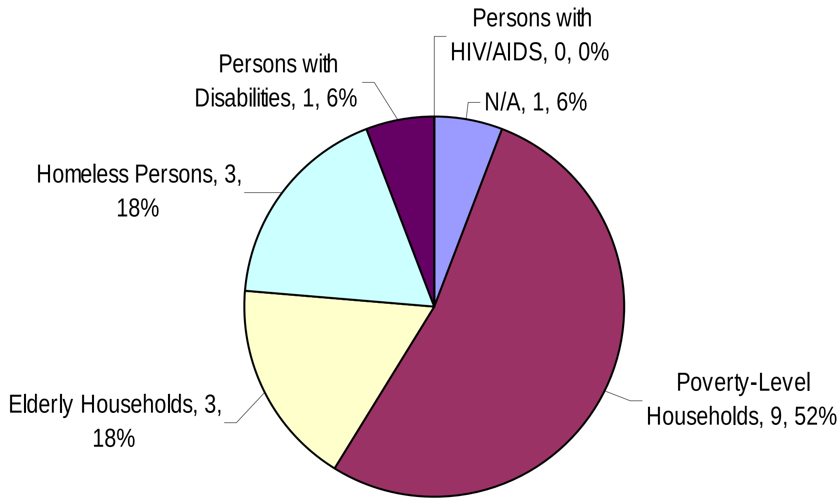
Capacity Building Activity with Greatest Need (17 Respondents)



SPECIAL NEEDS POPULATIONS

Of all respondents in the region, more than half indicated poverty-level households as the population most in need of assistance in their communities. Elderly households and homeless persons were the second most popular choices, selected by 18 percent each.

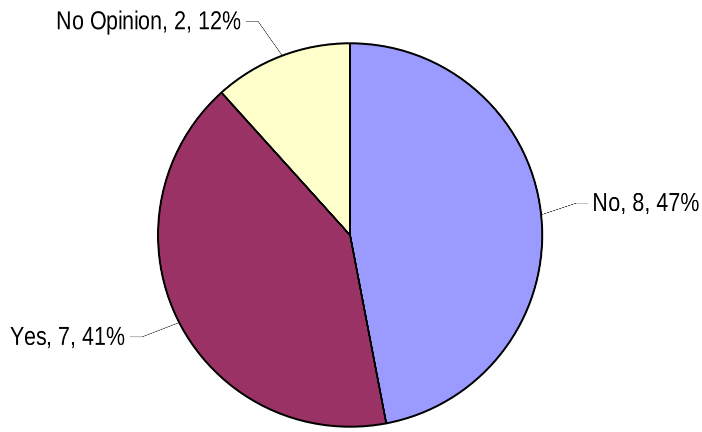
Population Most in Need of Assistance (17 Respondents)



MIGRANT FARM WORKERS

Similar percentages of respondents answered "yes" and "no" to the question of whether migrant farm worker housing was needed in the region. Even though there is no clear majority in either direction, this marks a significantly higher percentage or respondents indicating a need for this type of housing than is seen in the responses from the state as a whole.

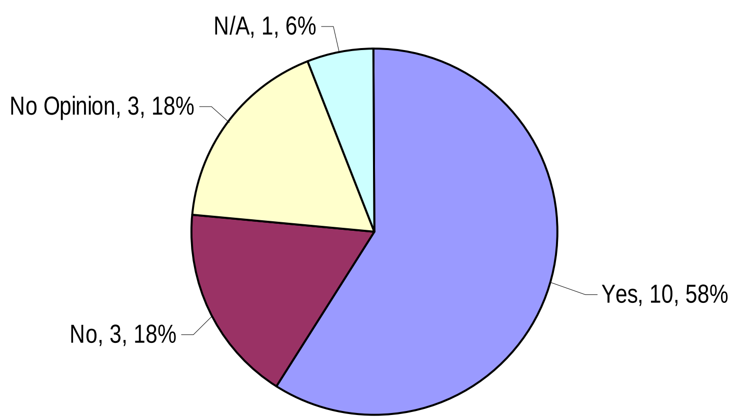
Need for Migrant Farm Worker Housing (17 Respondents)



FAIR HOUSING AND DISCRIMINATION

In stark contrast to overall statewide response, in which need for fair housing training was not given wide support, more than half of respondents in Region 13 indicated a need for such training in their communities.

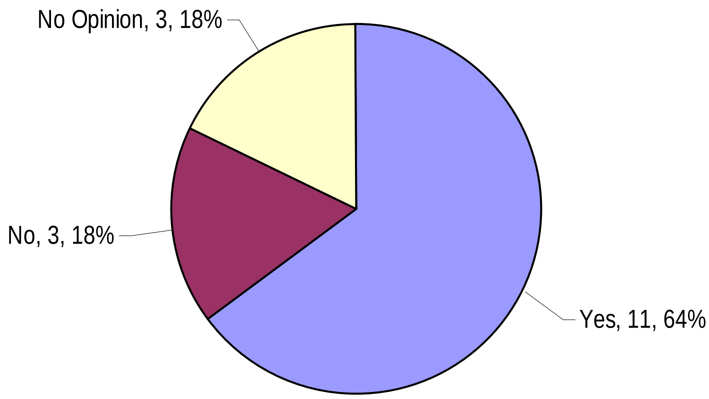
Need for Fair Housing Training (17Respondents)



WORKING WITH TDHCA

More than 60 percent of all respondents indicated there was a need for more information about the programs offered by TDHCA, the highest percentage of any region.

Need for Information from TDHCA (17 Respondents)



SUMMARY

The survey response from Region 13 generally mirrored response from the state as a whole. The region differed, however, in the category of Working with TDHCA. More respondents here than in any other region indicated there was a need for better information about the Department's programs. Also, in contrast to statewide opinion, more than half of respondents in Region 13 indicated a need for fair housing training.

SURVEY ANALYSIS

This section analyzes the findings of the survey. The analysis identifies changes that would improve the survey itself, a summary of findings regarding the quality of service provided, and Department improvements to be made in response to the survey.

SURVEY CHANGES

In general, TDHCA was satisfied with the quality of responses received. The questions reflected each customer service element, and answers enabled the Department to examine each customer area and make necessary changes. Approximately 41.2 percent of respondents filled out the “Additional Comments” question, which provided valuable insight from customers. The main change TDHCA would make to the survey is to reach a broader and more random sample population.

Because this survey only reached those who have e-mail or visit the website, future surveys will incorporate those who do not have such access. This might include surveying people over the phone when they call seeking information, mailing surveys to clients who received assistance from TDHCA subgrantees, and making surveys available to customers who visit the Department (such as individuals who visit the Manufactured Housing Division for title assistance). TDHCA would also specifically distribute the survey to organizations and developers utilizing TDHCA funds. A better sample population will also enable the Department to determine confidence levels so that a reliable statement that reflects all TDHCA customers can be determined. Furthermore, a fixed survey population will enable the Department to calculate a definite response rate.

SURVEY FINDINGS

TDHCA takes the Survey results seriously, and welcomes customer service comments on how it can improve its ratings in future surveys. Survey respondents expressed a 69 percent general satisfaction rate with TDHCA. The customer service element with the highest overall satisfaction rate was the Website, with 74 percent of respondents agreeing that the TDHCA website contains clear and accurate information (including forms and instructions) on programs, services, and events.

The customer service element with the highest percentage of “disagree” selections was Communications and Service Timeliness, both with 16 percent of respondents disagreeing with the statements, “I can easily and quickly reach a TDHCA staff member by phone or e-mail” and “My requests for information or assistance are answered in a timely manner.” Staff believes that a significant reason for higher dissatisfaction rates for these two elements is unfamiliarity with the new TDHCA main telephone line. Another factor is lengthy wait times experienced by some callers to the Manufactured Housing telephone line due to limited staffing. TDHCA is constantly making changes to improve the telephone systems and to improve satisfaction with the system.

CUSTOMER SERVICE IMPROVEMENTS

Over the past year, TDHCA has strived to improve how the Department interacts with its customers and distributes information. Improvements listed by customer service category and suggestions by survey respondents are included on the next few pages.

FACILITY

In December 2005, TDHCA relocated from its location at 5th Street and Sabine in commercial space to the State-owned space at 221 East 11th Street. Though this location is convenient to the State Capitol and other State agencies, this location does not have free parking nearby. A few survey responses mentioned that parking for the new building was an issue, especially due to metered spots and the difficulty in locating parking spaces for those with disabilities. While there are parking spots designated for people with disabilities at the building, TDHCA is generally unable to address parking issues.

Another comment concerned the lack of customer meeting space near the lobby of the building. TDHCA has found that, at times, there is a shortage of meeting rooms. Due to this, TDHCA's Staff Services Section has developed an online meeting room reservation system so that TDHCA staff can see which rooms are available for use and plan accordingly. There are four meeting rooms now available on the first floor near the lobby available for meeting with customers.

STAFF

A great majority of survey respondents agreed that TDHCA staff is knowledgeable and courteous. Some comments specifically named TDHCA staff members that have done an especially good job. These staff members are being presented with a certificate that emphasizes appreciation by a customer. A couple comments did mention that some divisions and staff members say or do one thing while another division or staff members does another. Another mentioned that, as a subgrantee, having multiple people work on a contract makes it difficult to receive information and answers. This report and the detailed comments are being provided to all directors and managers.

COMMUNICATIONS

In January 2006, TDHCA introduced a main toll-free number for consumers. In addition, an Automated Attendant system was implemented that enables callers to be connected directly with the division of their choice. The use of this system also eliminates the need for a dedicated employee to answer the main telephone line, but callers are still able to talk to an employee when exiting the system. Survey comments expressed frustration with the phone system and the inability to reach a live person. Since the system was implemented, TDHCA has made changes as problems and improvements have been identified, and will continue to do so as necessary.

The Manufactured Housing Division maintains a separate toll-free number, but this division also has a choice on the Automated Attendant system on the main TDHCA line. Many survey comments concerned telephone wait times for customers contacting the Manufactured Housing Division. Staff recognizes that, at certain times of the day, there may be a shortage of staff available to answer calls; however, full-time employees dedicated to customer service phone calls has been increased from five in FY 2005 to eight in FY 2006. Manufactured Housing staff work as quickly as possible to answer all phone calls, but customers are also encouraged to send their questions by e-mail. Customers are also able to visit the website for title, tax lien, license, and inspection records.

One comment specifically requested a staff directory for the website in order to contact individuals and divisions directly, rather than using the phone system. This directory is now available online.

WEBSITE

TDHCA strives to make all information and documents available on the website, as well as make website materials accessible to persons with vision impairments.

There was a mix of comments regarding the website; some wrote that the website was "great" and it was easy to find information, others wrote that the website was "not friendly," difficult to use, or that it was not updated. However, nearly 75 percent of respondents agreed that the website contains clear and accurate information.

TDHCA is constantly seeking ways to reorganize and improve the website so that it is easier for stakeholders, households seeking information, and industry professionals to locate information of interest. Various changes have been made to the website over the past year, which the Department believes are useful improvements.

In response to Hurricanes Katrina and Rita, the Department created a searchable database of rental properties for households seeking housing. TDHCA pulled information from other housing agencies so that the list contained properties from other funding sources in addition to TDHCA-funded rental properties. This database also included the number of vacant units at the property, as reported and updated by property managers. Due to the positive response to this system, TDHCA has kept the vacancy search online.

In addition, TDHCA has made improvements to its existing housing assistance search. For those searching for TDHCA-funded properties in their area, property owners are able to include information such as unit size, number of units, units with accessibility features, and vacancies in their search records.

In July 2004, the Manufactured Housing Division offered the ability to renew manufactured housing industry licenses online. This has streamlined the license process and has allowed industry professionals to receive their renewals quickly and easily. In addition, manufactured housing tax lien information was added to the website in June 2005, and the ability to search for tax liens on a home without an ownership record was added in April 2006.

The Department's newsletter, *Breaking Ground*, is also posted on the website. In March 2006, the newsletter went from being an Adobe PDF document posted to the website to an HTML webpage document. Staff believes that this reduces loading times for readers.

COMPLAINT-HANDLING PROCESS

A fairly high number of survey respondents chose that they were "neutral/unsure" how to file a complaint. Staff suspects that this response choice was high because many respondents have not had a reason to file a complaint, so they have not used the process. TDHCA currently has a link called "File a Complaint" on the front page of the website. Overall, TDHCA and the Manufactured Housing Division are pleased with the complaint processes and no changes have been implemented or are intended.

SERVICE PROMPTNESS

TDHCA strives to answer all phone calls, e-mails, and letters as quickly as possible. The majority of survey respondents agreed that requests for information and assistance are answered by TDHCA staff in a timely manner. However, this was one of the categories with the highest rate of "disagree" responses.

A few commenters noted that they have experienced lengthy waits for return phone calls. TDHCA is currently considering revising the TDHCA Compact with Texans to include specific Department policies and timelines for return calls and correspondence. These policies would be distributed to all staff members.

PRINTED INFORMATION

TDHCA produces various forms of written information including website text, printed and bound documents required by state and federal mandates, legal forms and documents for program compliance, titling and licensing documents for manufactured housing, and a variety of other documents.

While most survey respondents agreed that TDHCA documents are clear and accurate, a few noted that some forms were redundant or that they allowed for misinterpretation. TDHCA values these comments and is always looking for ways to improve its forms and applications.

TDHCA will implement a marketing and communications plan in 2007 that outlines the Department's overall communications policies and projects. This plan includes numerous printed information projects that the Department produces and distributes widely.
