13	El Paso	206,539	5.2%				
	Total	4,000,000	100.0%		19.1%		80.9%

[47] Due to the relatively small regional funding amounts, the HTF funds will be allocated regionally, but without specified rural and urban/exurban allocations. The overall statewide rural and urban/exurban distribution of funds will be maintained in awarding the funds.

RAF Methodology

Measuring Affordable Housing Need

The first part of the RAF determines the funding allocation based solely on objective measures of each region's share of the State's affordable housing need. The RAF uses the following four 2000 US Census need measures to calculate this regional need distribution.

- *Poverty*: Number of persons in the region who live in poverty
- *Cost Burden*: Units with a monthly gross rent or mortgage payment to monthly household income ratio that exceeds 30 percent
- *Overcrowded Units*: Units with more than one person per room
- *Units with Incomplete Kitchen or Plumbing*: Units that do not have all of the following: a sink with piped water; a range or cook top and oven; refrigerator, hot and cold piped water, a flush toilet, and a bathtub or shower

Because the need measures used in the RAF reflect the three programs' eligible households and activities, the following data characteristics apply.

- Except for the poverty data, the data relates to households at or below 80 percent of the Area Median Family Income (AMFI).
- Since HTC and HTF programs are primarily sources of renter assistance, the HTC and HTF formula primarily uses renter data. Poverty data is the exception as separate renter and owner poverty data is not available. Since HOME activities serve both renters and owners, renter and owner data is used.

Each need measure is weighted to reflect its perceived relevance in assessing affordable housing need. Because of the significant number of persons in poverty and its value as an overall measure of need, half the formula weight is associated with this measure. The other half of the measure weight is proportionately allocated based on the relative size of the remaining measures. As the relative size of the measure populations does not vary significantly between the renter only and the renter and owner data, the renter and owner data is used to assign the weight percentages. The population size of each measure is provided in the table below: Size of the Measure Populations. The resulting measure weights are as follows: poverty = 50 percent, cost burden = 36 percent, overcrowding = 12 percent, and substandard housing = 2 percent.

Size of the Measure Populations

Poverty	Renter Cost Burden	Renter Overcrowding	Incomplete Kitchen or Plumbing
3,117,609	1,263,817	435,309	58,065

The following steps calculate each region's share of the State's affordable housing need:

1. The total RAF funding is multiplied by each measure weight. This product is the portion of the need based funding distribution that is associated with that measure.
2. Each measure's associated funding amount is regionally distributed based on the regional dispersion of its affected persons or households

3. The regional funding distributions of the four measures are summed. This total is the region's need based funding amount. If the RAF only considered affordable housing need, this is the funding each region would receive.
4. Each region's need based funding amount is divided by the total RAF funding. This quotient is the region's need based percentage, which indicates the region's share of the State's affordable housing need.

Measuring Available Housing Resources

Section 2306.111(d) of the Government Code requires the RAF to consider available housing resources in the region. In theory, if the methodology used to measure regional need is accurate, then the regional resource distribution should reflect the observed need distribution. A region with a negative resource and need difference is considered to be "under allocated." This region should have received a larger portion of the available resources to address their need. Similarly, a region with a positive difference is considered "over allocated." Conversely, it should have received a smaller portion of the available resources. To address differences between the regional need and resource distributions, the RAF uses a resource funding adjustment to shift a portion of the need based funding distribution from over allocated to under allocated regions.

Because the resources used in the RAF reflect the three programs' eligible households and activities, the following data characteristics apply.

- HTC and HTF formula only uses sources of rental funding
- HOME formula uses sources of rental and owner funding
- HOME formula only considers resources in non–participating jurisdictions

The following resources are used in the HOME and HTC/HTF RAFs.

- HUD Emergency Shelter Grant Funds (ESG) (TDHCA and Participating Jurisdiction)
- HUD HOME Funds (TDHCA & Participating Jurisdiction)
- HUD Housing for Persons with AIDS (HOPWA) Funding
- HUD Section 8 Tenant-Based Rental Assistance (TDHCA and Public Housing Authorities)
- HUD PHA Capital Funding
- United States Department of Agriculture (USDA) Multifamily Development Funding
- USDA Rental Assistance
- Housing Tax Credits (9% and 4% associated with tax-exempt bond financing)[48]
- Multifamily Tax-Exempt Bond Financing (Texas Bond Review Board)[49]

The HOME RAF also includes the following sources of owner funding.

- USDA 502 and 504 Loans and Grants
- Single Family Bond Financing (TDHCA and Housing Finance Corporations)

[48] The value of the HTCs is an estimate of the capital raised through the sale of the credits.

[49] The value of the bonds has been reduced to 20 percent of the total bond amount. This 20 percent adjustment is an estimate of the value of the bonds over an equivalent market-rate loan that was developed by the TDHCA Real Estate Analysis Division and the TDHCA Center for Housing Research, Planning, and Communications. The HTCs associated with these bonds are valued at their full estimated syndicated value.

The following steps calculate the regional distribution of available housing resources.

1. The available resources are summed by region and for the state.
2. The resulting regional resource totals are divided by the state resource total. This quotient is the region's resource percentage, which indicates the region's share of the State's resources.

The following steps calculate the resource funding adjustments and resulting regional funding amounts.

1. The difference between each region's resource percentage and need percentage is calculated.
2. The over allocated (positive) differences are summed to calculate the State's over allocated resource difference. Each over allocated region's corresponding share of this percentage is also calculated.
3. The State's over allocated resource difference is multiplied by the total RAF funding amount. This product is the State resource funding adjustment.
4. Each over allocated region's share of the State resource funding adjustment is calculated. The resulting base resource funding adjustment is subject to an adjustment limit[50]. The resulting resource funding adjustment is then subtracted from the region's need based funding amount.
5. Each under allocated region's share of the State's under allocated resource difference is calculated. The resulting percentage is multiplied by the total amount of over allocated resource funding adjustments to calculate the region's resource funding adjustment. The region's need based funding amount is then increased by this amount.

Rural and Exurban/Urban Need

Section 2306.111(d) of the Government Code requires the RAF to consider rural and urban/exurban areas in its distribution of program funding. To ensure an equitable distribution of funding to these areas, the regional distribution of rural and urban/exurban need and resources is compared. As was done with the regional funding distribution part of the formula, resource funding adjustments are made to address differences between the resource and need distributions to these geographical areas.

The rural and urban/exurban definitions used in the RAF are the following:

Rural - A place that is

1. outside the boundaries of a metropolitan statistical area (MSA); or
2. within the boundaries of a MSA, if the place has a population of 20,000 or less and does not share a boundary with a place that has a population greater than 20,000.

Urban/Exurban

1. Any place that does not satisfy the Rural place definition; or
2. an area located outside the boundaries of a place and in a census tract that has a population density greater than 1,200[51] people per square mile.

The following steps calculate the rural and urban/exurban resource funding adjustments and resulting area funding amounts.

---

[50] It has been determined that the primary source of the resource and need mismatches is multifamily bond funding. Because of the source's non-competitive funding distribution method and an inability to serve smaller metropolitan places, it is thought that region's that receive high levels of multifamily bonds, should not be overly penalized. Therefore, a region's over allocated resource adjustment cannot exceed an amount equal to the percentage of the state's non-regionally dispersed resources multiplied by the region's need based funding amount.

[51] 1,200 persons per square mile is approximately equal to the average population density of urban categorized places with a population less than 100,000.

1. The percentage of need in rural and urban/exurban places is calculated for each region.
2. The region's funding amount is multiplied by these rural and urban/exurban area percentages. This product provides each area's need based funding amount.
3. Each region's percentage of resources in rural and urban/exurban places is calculated
4. The difference between each region's rural and urban/exurban percentage of need and percentage of resources is calculated. This provides each area's resource and need difference.
5. Each positive (over allocated) resource and need difference is multiplied by the region's funding amount. This product is the region's resource funding adjustment.
6. The resource funding adjustment is subtracted from the over allocated area's need based funding amount and is added to the under allocated area's need based funding amount.

Each year as part of the public comment process for the SLIHP, the Department prepares a detailed write up of the Regional Allocation Formula (RAF) Distribution and Methodology. This write up is available upon request and is published on the Department's website.

2005 TDHCA Affordable Housing Needs Score

The scoring criteria used to evaluate HOME, Housing Trust Fund (HTF), and Housing Tax Credit (HTC) applications include an Affordable Housing Needs Score (AHNS). While not legislatively required, the AHNS is extension of the Regional Allocation Formula (RAF) concept in that it provides a comparative assessment of each county and place's[52] level of need relative to other areas within the 13 Uniform State Service Regions. Through the AHNS, applicants are encouraged to request funding to serve communities that have a high proportion of the region's affordable housing need.

Measures of Need

The AHNS calculation uses the same affordable housing need measures (poverty, cost burden, overcrowding, incomplete kitchen or plumbing), weighting factors, rural and urban/exurban area definitions, and program activity considerations as the RAF.

The following steps calculate the AHNS.

1. For each measure, the data is used to quantify the area's level of affordable housing need in two ways.
   a. The ratio of the county's level of need to the region's level of need is calculated. This ratio shows the distribution of the measure across the region.
   b. The ratio of the area's measure population to the area's total related population (i.e., for rental cost burden it would be total renters) is calculated. This ratio shows the concentration of the measure within an area.
2. The corresponding measure weights are assigned to the distribution of the measure and concentration of the measure ratios.
3. The area's weighted measure ratios are summed to calculate the area's overall distribution of need percentage and concentration of need percentage.

52 County scores are not generated for rental development activities. Development sites located outside the boundaries of a place (as designated by the US Census) will utilize the score of the place whose boundary is closest to the development site. County scores reflect the average score of all the places within the county.

4. Up to three points are separately assigned to the area's distribution of need and concentration of need percentages. This assignment is made using a sliding scale that compares the area's need with that of the other places in the region. The scale is set up to group a fairly equal number of the region's areas within each range of the sliding point scale.
5. Each area's resulting distribution of need points and concentration of need points are combined to generate a score of up to six points for the area's AHNS.

To assist with the rural and urban/exurban distribution of funds required under the RAF, each area and corresponding AHNS is classified according to the RAF's geographic area definitions.

Each year as part of the public comment process for the SLIHP, the Department prepares a detailed write up of the Affordable Housing Need Score Methodology. This write up and the corresponding scores are available upon request and is published on the Department's website.

Questions and Comments

For questions and comments on the RAF, contact Stephen Schottman at the TDHCA Center for Housing Research, Planning, and Communications at sschottm@tdhca.state.tx.us or (512) 305-9038.

Emergency Shelter Grants Program (ESGP) Allocation Formula

ESGP funds are reserved according to the percentage of poverty population identified in each of the 13 state service regions (i.e., 3.95 percent of the available ESGP funds were reserved for Region 1 with 3.95 percent of the state's poverty population). The top scoring applications in each region are recommended for funding, based on the amount of funds available for that region. Any application that receives a score below 70 percent of the highest raw score from the region is not considered for funding.

Community Services Block Grant Program (CSBG) Allocation Formula

Allocations to the 48 CSBG–eligible entities are based primarily on two factors: (1) the number of persons living in poverty within the designated service delivery area for each organization and (2) a calculation of population density. Poverty population is given 98 percent weight, and the ratio of inverse population density is given 2 percent weight. The formula also includes a base award of $50,000 for each organization before the factors are applied, as well as a floor, or minimum award. In FY 2005, the base will be $150,000.

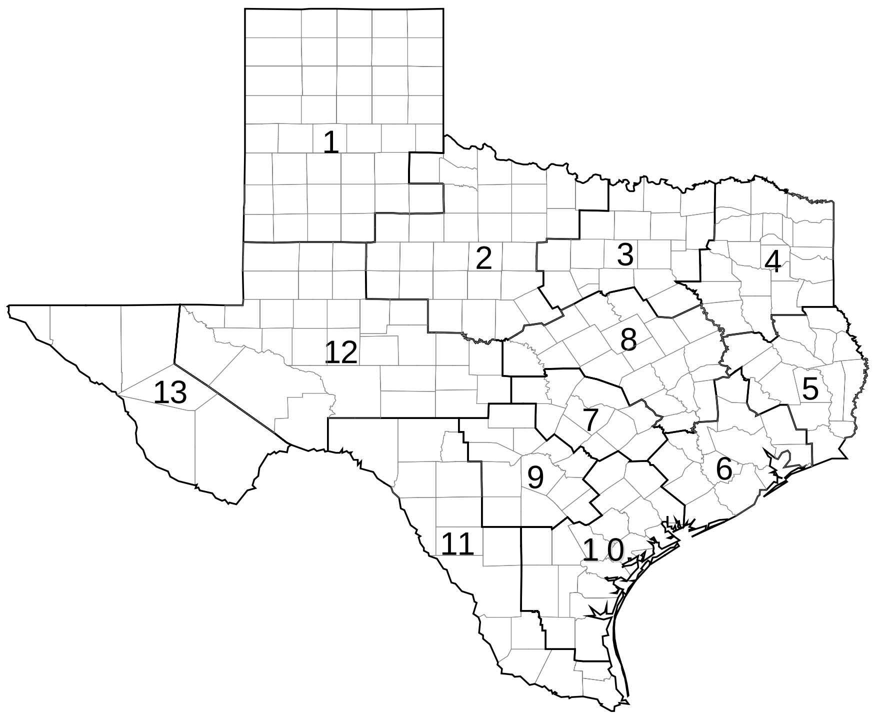
Comprehensive Energy Assistance Program and Weatherization Assistance Program Allocation Formula

The allocation formula for the Comprehensive Energy Assistance and Weatherization Assistance programs uses the following five factors and corresponding weights to distribute its funds by county: county non-elderly poverty household factor (40 percent); county elderly poverty household factor (40 percent); county inverse poverty household density factor (5 percent); county median income variance factor (5 percent); and county weather factor (10 percent).

UNIFORM STATE SERVICE REGIONS

The Department uses 13 Uniform State Service Regions for research and planning purposes. These regions follow the Texas Comptroller of Public Accounts' grouping that creates 13 regions to better identify the unique characteristics of the border counties and to treat larger metropolitan areas as distinct regions. The Uniform State Service Regions are shown below.

Uniform State Service Regions

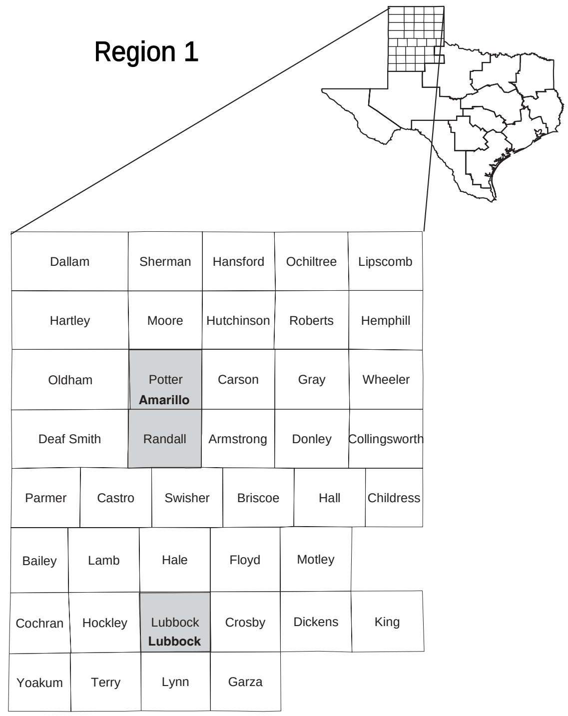


The size and diversity of the state of Texas necessitates tailored regional plans. Each of the following Uniform State Service Region plans includes a general demographic description, a needs assessment, an estimate of the existing housing supply, and the Department's funding distribution plans for the next year.

The first part of each plan describes regional characteristics including demographic information, general housing attributes, and public opinion on regional housing need. Following the introduction is a needs assessment analyzing multifamily and single family housing need and regional need for community service activities. The rental factors examined include poverty, housing cost burden, and the number of physically inadequate and overcrowded housing units. The owner-occupied factors considered are housing cost burden and physically inadequate and overcrowded housing. In order to gain a complete picture of the regional housing supply, the plan includes housing data from the US Census, total TDHCA assistance in the region, and consideration of other sources of assisted housing. The last section of the regional plan also describes the Department's allocation plan for the area.

REGION 1

This 41-county region in the northwest corner of Texas encompasses over 39,500 square miles of the Panhandle. According to the Census, the total population in Region 1 is 780,733, representing a 6.3 percent increase from 1990. Slightly less than 48 percent of the population lives in the urban areas, including Amarillo and Lubbock, and the rest live in rural areas of the region. The figure to the side shows Region 1 with the metropolitan statistical areas shaded.



According to the Texas Comptroller, the region will experience a 1.7 percent annual employment growth rate. The areas that have experienced the highest annual employment growth over the past 20 years are services to business, healthcare, and tourism and entertainment. The region specializes in specific economic areas including the ordnance and ammunition industry as demonstrated by the nuclear weapons operations near Amarillo. The oil and gas industry, as well as the agriculture and cattle industry, are other regional specializations.[53]

Of the 288,175 housing units in the region, 66.3 percent are owner occupied and 33.7 percent are occupied by renters, according to 2000 Census data. Approximately 3.7 percent of the state's population lives in Region 1, but regional housing permits for 2003 represent only 2.3 percent of the state's total housing starts.[54]

Almost three-quarters of the respondents to the most recent Community Needs Survey in the region report a severe or significant affordable housing problem in their area. Most prefer rental housing assistance to owner-occupied housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Recent Regional Advisory Committee meeting reports in Region 1 identified several areas of concern that could be addressed by the Department. Focus groups prioritized funding for emergency homeless shelters and energy assistance and weatherization activities. The lack of homebuyer education was also mentioned. The scarcity of affordable rental housing and the need to address the substandard housing problems in the area ranked as high concerns for the region. Finally, the lack of effective communication—including program marketing and public education on affordable housing—was identified as an issue requiring attention.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 2000 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The most recent Census data shows that 122,991 people in the region live in poverty, representing a 16.4 percent poverty rate. Almost 48 percent of the 29,555 renter households with extreme housing cost burden (paying more than 30 percent of income towards housing costs) earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 31 percent of the households with extreme housing cost burden. Only 17 percent of the households with extreme cost burden are low income and 4 percent are moderate income and above.

In Region 1 there are 1,638 renter households that lack kitchen and/or plumbing facilities. Almost one-third of them (553 households) earn under 30 percent of the area median income, 322 households earn between 31 and 50 percent, and 301 households earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 9,294 overcrowded renter households, almost 22 percent are extremely low income, 22 percent are very low income, another 28 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a lack of a strong expressed preference among the various rental assistance activities. For the respondents the renovation of existing rental housing and new housing development rank only slightly higher than rental payment assistance.

Single Family Housing Need

Region 1 has 3.7 percent of the state's owner households (28,912 households) with extreme housing cost burden. Almost 30 percent of that total is extremely low income households. 24 percent, or 7,021 households, are very low income; 24 percent are low income; and the rest are moderate income and above.

There are 1,154 owner households in Region 1 that lack kitchen and/or plumbing facilities; a significant number of these households are extremely low income (20 percent). Fourteen percent of the households lacking kitchen and/or plumbing are very low income and 19 percent are low income. Region 1 has 3.3 percent of the state's overcrowded owner households. Of the 9,245 overcrowded households, almost 10 percent are extremely low income. Thirteen percent are very low income, 26 percent are low income, and the remaining households are moderate income and above.

In the two metropolitan areas of the region, over 56 percent of the households have sufficient income to afford the median-priced home; this is slightly higher than the state average of 55 percent and lower than the national average of 52 percent.[55]

According to the Community Needs Survey respondents from Region 1, home purchase assistance is more important than the renovation of existing owner-occupied housing and the development of new owner-occupied housing.

Community Services Need

Region 1 has 4.5 percent of the state's poverty households; 8,897 households are elderly and 37,710 households are headed by individuals under 65 years of age. Fourteen percent of the Community Needs Survey respondents report a severe or significant homeless problem in their area; this is lower than the state average of 23 percent. There is a strong preference for specific TDHCA weatherization and energy activities. Utility payment assistance is more important than measures to increase energy efficiency and activities that repair and replace existing HVAC equipment. Energy-related education activities rank the lowest among energy assistance and weatherization activities for the region.

Housing Supply

According to the most recent US Census, there are 322,045 housing units in Region 1 and 288,175 are occupied. Of the total housing stock, almost 75 percent are one unit; 15.9 percent are over two units; and the rest are mobile homes, boats, and RVs.

The Department has assisted approximately 4,240 multifamily and 949 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 9,389 units. Almost all of these units are multifamily; there have been 25 homeownership units. The housing finance corporations in the region have produced 1,252 multifamily units and assisted 1,683 single family households.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $6,354,759 in Region 1 in 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Multifamily development accounted for 32 percent of the total dollar amount committed during the past year; the next largest activity was single family owner-occupied assistance activities with 27 percent of the total dollar amount committed. Multifamily rehabilitation was the third largest activity with 12 percent of the total committed amount. All of the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

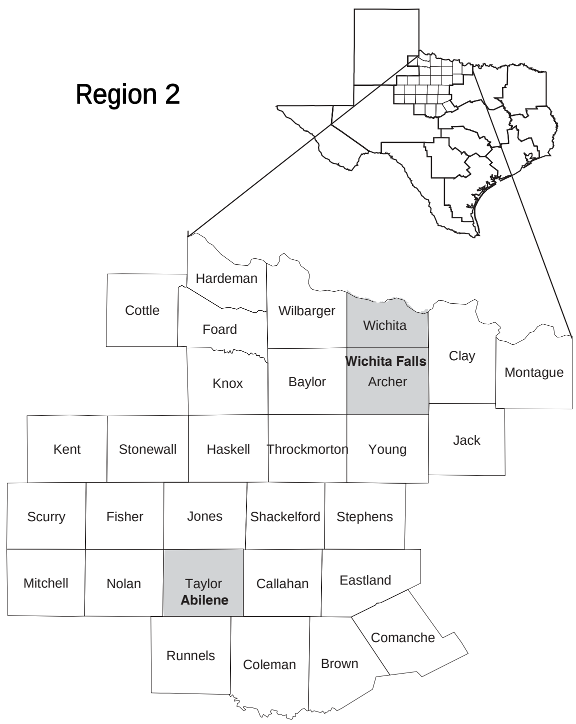
[1] Number served is individuals.

Other sources of housing assistance arrived in the region in 2004. Region 1 received approximately $3.4 million worth of single family assistance. Almost $38.3 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $2.3 million worth of HOME funds dedicated to either single family or multifamily activities. The housing finance corporations in Region 1 produced 151 multifamily units and assisted 39 single family households in 2004.

The Department's Regional Allocation Formula distributes 5.4 percent of the state's 2005 HOME funds to the region. Of that funding, 100 percent will go to rural areas, approximately $1,403,135. Region 1 also receives 4.3 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the tax credit allocation 31.9 percent will go to rural areas and 68.1 percent will go to urban areas.



REGION 2

Region 2 surrounds the metropolitan areas of Wichita Falls and Abilene, shaded in the figure to the left. The region has a majority rural population at 59 percent. A total of 549,267 people live in the area, or 2.6 percent of the state's population. Estimated population figures through 2003 show a slight decrease.[56]

The region's employment is expected to grow at the same rate that it has experienced since 1995, about 1 percent annual growth. According to the Texas Comptroller, delivering a high-tech educated workforce is one of the economic challenges of the region. Region 2 plays a smaller role in the state's economy than it did 30 years ago; other regions have experienced much higher rates of population and employment growth. The areas of economic specialization for the region include the oil and gas industries and the manufactured housing industry. Employment in the oil and gas industries has declined nationwide over the past decades, while the manufactured housing industry has experienced growth during the 1990s.[57]

There are 206,388 occupied housing units in the region: 69.1 percent are owner occupied and 30.9 percent are occupied by renters, according to 2000 Census data. Approximately 2.6 percent of the state's population lives in the area, but regional housing permits for 2003 represent only 0.5 percent of the state's total housing starts.[58]

Almost three-quarters of the respondents to the most recent Community Needs Survey in the region report a severe or significant affordable housing problem in their area. Most prefer rental housing assistance to owner-occupied housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Recent Regional Advisory Committee meeting attendees from Region 2 suggest that the department direct the limited housing assistance funding in the area towards existing housing stock rather than new construction. Also, duplicating housing assistance across state and federal funding types is inefficient and should be minimized. The focus group specified some areas in the TDHCA application process that could be improved. One suggestion was a renewal form for previous successful applicants rather than a full application. Another suggested that the application process for state funding is too complex and involves a lot of paperwork, and more training is required.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 2000 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate for Region 2 is 15 percent, representing 77,647 people. More than 45 percent of the 16,557 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent almost 35 percent of the households with extreme housing cost burden. Approximately 16.3 percent of the households are low income and 3.4 percent are moderate income and above.

In Region 2, 968 renter households lack kitchen and/or plumbing facilities. More than one-third of them earn under 30 percent of the area median income, 17 percent of the households earn between 31 and 50 percent, and 24.5 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 3,906 overcrowded renter households, more than 22 percent are extremely low income, 18 percent are very low income, another 30 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

Single Family Housing Need

Region 2 has 2.8 percent of the state's owner households with extreme housing cost burden, or 22,471 households. The region's share of owner households with extreme housing cost burden is higher than the region's share of the state's population at 2.6 percent. Slightly more than 30 percent of the owner households with extreme cost burden are extremely low income households. Twenty-six percent are very low income, 22 percent are low income, and the rest are moderate income and above.

There are 919 owner households in the region that lack kitchen and/or plumbing facilities; many of these households are extremely low income (27.5 percent). Seventeen percent of the households lacking kitchen and/or plumbing are very low income and 18.5 percent are low income. The remaining households are moderate income and above. Region 2 has 1.5 percent of the state's overcrowded owner households. Of the 4,325 overcrowded households, 9.5 percent are extremely low income. Almost 13 percent are very low income, 27 percent are low income, and the remaining households are moderate income and above.

In Abilene, one of the major metropolitan areas of the region, 75 percent of the households can afford the median-priced home. For Wichita Falls the percentage is 69; both of these rates are higher than the state average of 55 percent and the national average of 52 percent.[59]

According to the Community Needs Survey respondents from Region 2, the renovation of existing owner-occupied housing is much more important than home purchase assistance and the development of new owner-occupied housing.

Community Services Need

Region 2 has 3.2 percent of the state's poverty households; 8,100 households are elderly (4.2 percent of the state's total) and 23,414 households are headed by individuals under 65 years of age (2.8 percent of the state's total).

Twelve percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region; this is lower than the state average of 23 percent. Among the different types of homeless assistance, short-term homeless shelters rank higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 2 has a strong preference for utility payment assistance. Measures to increase energy efficiency and assistance with HVAC systems rank next in importance. Energy-related educational activities are the least preferred of the energy-related activities.

Housing Supply

According to the most recent US Census, there are 243,506 housing units in the region and 84 percent are occupied. Of the total housing stock, almost 77 percent are one unit; 12 percent are over two units; and the rest are mobile homes, boats, and RVs.

The Department has assisted approximately 3,530 multifamily and 700 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 7,503 units; all of this assistance has been multifamily. The housing finance corporations have produced 280 multifamily units and assisted 772 single family households.

Housing and Community Services Assistance

The Department allocated $4,342,563 in Region 2 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family owner-occupied assistance accounted for 40 percent of the total dollar amount committed during the past year; community affairs activities were the next largest activity group with 25 percent of the total dollar amount committed. All of the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

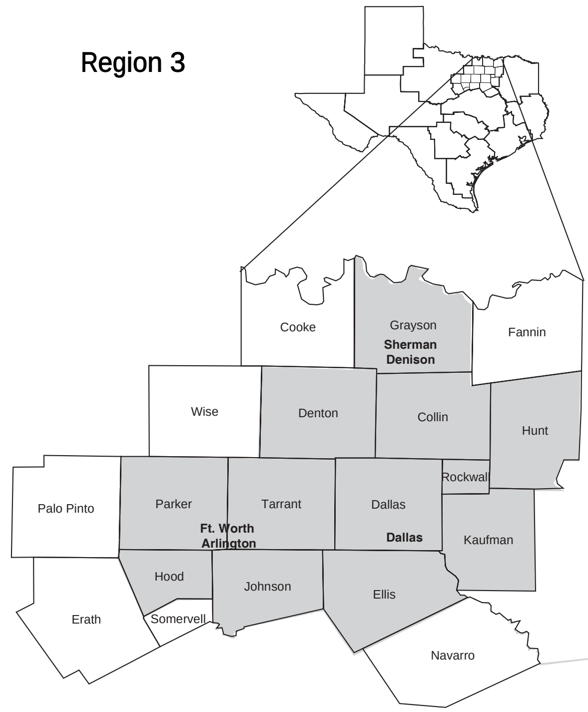
Other sources of housing assistance arrived in the region in 2004. Region 2 received over $10.8 million worth of single family assistance in bond funds and various USDA homeownership loan programs. More than $17.3 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1.2 million worth of HOME funds dedicated to either single family or multifamily activities. In 2004, the area housing finance corporations assisted 156 single family households with mortgages.

The Department's Regional Allocation Formula distributes 4.3 percent of the state's 2005 HOME funds to the region. Of that funding, 97.5 percent will go to rural areas, or approximately $1,083,904. Region 2 also receives 2.8 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Forty-five percent of the Housing Tax Credit funding will go to rural areas, about $506,070; and 55 percent will go to urban areas, approximately $609,941.

REGION 3



Region 3, including the metropolitan areas of Dallas, Fort Worth, Arlington, Sherman, and Denison, is the state's most populous region. Population estimates for 2003 report 5,898,978 people in the region.[60] That is a 7.5 percent change from Census 2000 figures, higher than the state increase of 5.6 percent.

The region's employment is expected to grow by 1.7 percent per year through 2005, slightly higher than the state's projected annual growth rate. The growth in Region 3 will be slower than it has been in the past; this may cause some challenges for the region while adjusting to this slower pace of economic growth. The annual increase of gross regional product over the past 30 years has been a remarkable 4.7 percent. The industry with the highest growth rate over the past 20 years is the business services industry. This reflects a growing trend towards outsourcing and an increasing number of specially trained contract workers. The healthcare industry is the sector with the second highest growth rate, reflecting national trends. Future growth will be concentrated in some areas that are well-suited to the region, computer services and health care.[61]

There are 2,004,826 occupied housing units in the region: 60.9 percent are owner-occupied and 39.1 percent are occupied by renters, according to 2000 Census data. Region 3 has the second highest rate of renter-occupied housing. Approximately 26.3 percent of the state's population lives in the area, and regional housing permits for 2003 represent 30.1 percent of the state's total housing starts.[62]

Almost three-quarters of the respondents to the most recent Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 3 identified problems, successes, and recommendations related to the suggested topics: communication, special needs, funding distribution, and education. Communication and education issues are basically very minor in Region 3. Overall, TDHCA has done a very good job of notifying potential applicants of funding and training opportunities and has disseminated appropriate information in a timely manner. A separation of rural and urban programs is strongly recommended. Special needs populations appear to be adequately served under the various programs and funding streams currently available. Some program regulations should be reviewed to

better serve this population. Funding distribution issues can be summarized by the fact that there is simply never enough money to adequately address all the needs in a state this large.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 2000 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 10.9 percent, representing 588,688 people. More than 38 percent of the 206,011 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 33 percent of the households with extreme housing cost burden. Approximately 24 percent of the households are low income and the rest are moderate income and above.

In Region 3, 10,144 renter households lack kitchen and/or plumbing facilities, which is 23.6 percent of the state's total. Approximately 29 percent earn less than 30 percent of the area median income, almost 21 percent of the households earn between 31 and 50 percent, and 22 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 114,914 overcrowded renter households, almost 23 percent are extremely low income, 22.4 percent are very low income, another 26.5 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

Single Family Housing Need

Region 3 has 26.8 percent of the state's owner households with extreme housing cost burden, or 216,038 households. Slightly more than 23 percent of the owner households with extreme cost burden are extremely low income households. Nineteen percent are very low income, 26 percent are low income, and the rest are moderate income and above.

There are 6,044 owner households in the region that lack kitchen and/or plumbing facilities; almost 23 percent of these households are extremely low income. More than 14 percent of the households lacking kitchen and/or plumbing are very low income and 20 percent are low income. The remaining households are moderate income and above. Region 3 has 20.3 percent of the state's overcrowded owner households. Of the 57,504 overcrowded households, 10 percent are extremely low income. Sixteen percent are very low income, 29 percent are low income, and the remaining households are moderate income and above.

The areas with the highest percentage of households that can afford the median-priced home are Collin County, Denton County, Irving, and Sherman-Denison, all over 61 percent. Dallas has the lowest percentage at 57 percent.[63]

According to the Community Needs Survey respondents from Region 3, the renovation of existing owner-occupied housing is slightly more important than the development of new owner-occupied housing and home purchase assistance.

Community Services Need

Region 3 has 19.1 percent of the state's poverty households; 32,129 households are elderly (16.6 percent of the state's total) and 165,495 households are headed by individuals under 65 years of age (19.7 percent of the state's total).

Twenty-three percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 3 has a strong preference for utility payment assistance, reflecting the state trend. The repair and replacement of HVAC equipment ranks next in importance, followed by weatherization measures to increase energy efficiency. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 2,140,641 housing units in the region and 93.7 percent are occupied; this is the highest occupancy rate among all of the regions. Of the total housing stock, 64 percent are one unit; 30 percent are over two units; and the rest are mobile homes and boats.

The Department has assisted approximately 67,890 multifamily and 6,570 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 53,835 units; all but 54 have been multifamily. The housing finance corporations have assisted 13,221 multifamily units and 4,676 single family households in the region.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $150,842,908 in Region 3 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Multifamily development accounted for 83 percent of the total dollar amount committed during the past year. Almost 98 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

[1] Number served is individuals.

Other sources of housing assistance arrived in the region in 2004. Region 3 received over $32.6 million worth of single family assistance in bond funds and various USDA homeownership loan programs. More than $376.1 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $19.8 million worth of HOME funds dedicated to either single family or multifamily activities. In 2004, the housing finance corporations assisted 14 multifamily units with 7 other developments under construction. There were 175 single family households assisted by HFCs in 2004.

The Department's Regional Allocation Formula distributes 18.7 percent of the state's 2005 HOME funds to the region. Of that funding, 23.6 percent will go to rural areas, approximately $1,146,126. The other $3,715,913 will go to urban areas. Region 3 also receives 18.4 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Approximately 8.5 percent of the HTC allocation will go to rural areas and 91.5 percent will go to urban areas.

REGION 4

Region 4, located in the northeast corner of the state, surrounds the urban areas of Texarkana, Longview-Marshall, and Tyler. According to the 2000 Census, 4.9 percent of the state's population lives in Region 4, or 1,015,648 people. As indicated by population estimates through 2003, the region has experienced 2.8 percent growth; this is lower than the state increase of 5.6 percent.[64] Region 4 has the highest percentage of rural population in the state at 77.5 percent.

Similar to population trends, employment in the region over the next 5 years will increase at a slightly lower rate compared to the state. Region 4 is projected to grow at 1.3 percent each year and the state will grow by 1.6 percent. The region's share of the state's employment and gross regional product has declined between 1970 and 2000, partially due to extremely high growth rates in other regions. The industry with the highest growth rate over the past 20 years is the business services industry. This is a result of a growing trend towards outsourcing and an increasing number of specially trained contract workers. The healthcare industry is the sector with the second highest growth rate, reflecting national trends. Regional economic specialties include oil and gas and forest-related industries; both of these areas have experienced declining employment.[65]

There are 380,468 occupied housing units in the region; 73.8 percent are owner occupied and 26.2 percent are occupied by renters, according to 2000 Census data. Region 4 has the highest rate of owner-occupied housing among the Uniform State Service Regions. Approximately 4.9 percent of the state's population lives in the area, and regional housing permits for 2003 represent 1.25 percent of the state's total housing starts.[66]

Approximately 73 percent of the respondents to the most recent Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee attendees from Region 4 represented several sectors of the housing industry including private developers, nonprofits, housing authorities, and grant consultants. Some of the identified housing problems include the poor quality of affordable housing and existing obstacles to development such as prohibitive land costs, onerous lead-based paint restrictions, and building codes. Other identified housing problems include a lack of mortgage products for buyers of affordable housing

[64] Texas State Data Center and Office of the State Demographer, "Texas Population Estimates Program."
[65] Texas Comptroller of Public Accounts, "Texas Regional Outlook."
[66] Real Estate Center at Texas A&M University, "Building Permit Activity."

and a scarcity of housing development in downtown areas. Homebuyer and consumer education were mentioned as priorities for the region.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 2000 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 15.7 percent, representing 152,036 people. Forty six percent of the 27,100 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 33.7 percent of the households with extreme housing cost burden. Approximately 16 percent of the households are low income and the remainder are moderate income and above.

In the region, 2,108 renter households lack kitchen and/or plumbing facilities; this is 5 percent of the state's total. Approximately 34 percent earn less than 30 percent of the area median income, 20 percent of the households earn between 31 and 50 percent, and 17 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn over 80 percent of the area median income. Of the 8,851 overcrowded renter households, 22 percent are extremely low income, 19 percent are very low income, another 25 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

Single Family Housing Need

Region 4 has 6.1 percent of the state's owner households with extreme housing cost burden, or 49,419 households. Thirty-one percent of the owner households with extreme cost burden are extremely low income households. Twenty-three percent are very low income, 23 percent are low income, and the rest are moderate income and above.

There are 2,742 owner households in the region that lack kitchen and/or plumbing facilities; about 28 percent of these households are extremely low income. Sixteen percent of the households lacking kitchen and/or plumbing are very low income and 19 percent are low income. The remaining households are moderate income and above. Region 4 has 3.6 percent of the state's overcrowded owner households. Of the 10,259 overcrowded households, 12 percent are extremely low income. Fourteen percent are very low income, 24 percent are low income, and the remaining households are moderate income and above.

In the urban area of Longview-Marshall, approximately 65 percent of the households can afford the median-priced home. For Tyler the figure is 58 percent.[67]

The Community Needs Survey respondents from Region 4 do not express any preference for the different types of owner-occupied housing assistance. The renovation of existing housing, purchase assistance, and new housing development all rank about the same in importance.

Community Services Need

Region 4 has 5.7 percent of the state's poverty households; 15,592 households are elderly (8.1 percent of the state's total) and 43,499 households are headed by individuals under 65 years of age (5.2 percent of the state's total).

Twenty percent of the Community Needs Survey respondents report a severe or significant homeless problem in their area. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 4 has a strong preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 434,792 housing units in the region and 87.5 percent are occupied. Of the total housing stock, 71 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs.

The Department has assisted approximately 7,050 multifamily and 1,371 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 9,826 multifamily units in Region 4. The housing finance corporations in the region have created 706 multifamily units and assisted 689 single family households.

Housing and Community Services Assistance

The Department allocated $14,410,952 in Region 4 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family owner-occupied assistance accounted for 56 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 18 percent of the total dollar amount committed. All the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

Other sources of housing assistance arrived in the region in 2004. Region 4 received over $5.7 million worth of single family assistance in the form of various USDA homeownership loan programs. Approximately $32.6 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1 million worth of HOME funds dedicated to either single family or multifamily activities. There is one housing finance corporation–assisted multifamily development under construction in the region.

The Department's Regional Allocation Formula distributes 11.6 percent of the state's 2005 HOME funds to the region. Of the approximate $3,021,376 total, 78.5 percent will go to rural areas. Region 4 also receives 5 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 46.1 percent will go to rural areas and 53.9 percent will go to urban areas.

REGION 5

Region 5 encompasses a 15-county area in east Texas including the urban areas of Beaumont and Port Arthur. According to the 2000 Census, 740,952 people live in the region. Most of the population lives in rural areas, over 70 percent. Population estimates through 2003 show a 1.3 percent growth rate for the area, compared to the 5.6 percent growth for the state as a whole.[68]

Over the next few years to 2005, the employment in the area is expected to grow at the same rate it did for the period of 1995 to 2000, 1.5 percent. The region's share of the state's employment, population, and gross regional product has declined between 1970 and 2000. The industry with the highest growth rate over the past 20 years is the business services industry. This reflects a growing trend towards outsourcing and an increasing number of specially trained contract workers. The healthcare industry is the sector with the second highest growth rate, same as national trends. The regional economic specialties include the oil and gas industries and the forest-related industries, both of these areas have experienced declining employment numbers.[69]

There are 275,122 occupied housing units in the region, 73.4 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 3.6 percent of the state's population lives in the area, and regional housing permits for 2003 represent 1.07 percent of the state's total housing starts.[70]

Approximately 80 percent of the respondents to the most recent Community Needs Survey report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

The Regional Advisory Committee meeting attendees agreed that there has been no progress made in addressing the housing crisis since the RAC last year. If anything, the region's needs are greater and the resources are more limited. A local organization reported that a recent homeless count in the region indicates that homelessness has risen significantly since last year. It was observed that until mayors, county judges, commissioners, and council members attend the RAC, very little will be accomplished. The group felt that there is not the social awareness, nor the political will, to address the housing issue.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 2000 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is approximately 17.1 percent, higher than the state rate of 15.4 percent. More than 50 percent of the 21,116 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 33 percent of the households with extreme housing cost burden. Approximately 14 percent of the households are low income and remainder are moderate income and above.

In the region, 1,460 renter households lack kitchen and/or plumbing facilities; this is 3.4 percent of the state's total. Approximately 38 percent earn less than 30 percent of the area median income, more than 20 percent of the households earn between 31 and 50 percent, and 19 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 6,868 overcrowded renter households, 29 percent are extremely low income, 18 percent are very low income, another 22 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over other rental housing activities. The renovation of existing housing is more important than rental payment assistance in the region.

Single Family Housing Need

Region 5 has 4.1 percent of the state's owner households with extreme housing cost burden, or 32,849 households. Slightly more than 36 percent of the owner households with extreme cost burden are extremely low income households. Twenty-three percent are very low income, 21.4 percent are low income, and the rest are moderate income and above.

There are 1,876 owner households in the region that lack kitchen and/or plumbing facilities; almost 30 percent of these households are extremely low income. Approximately 13 percent of the households lacking kitchen and/or plumbing are very low income; 20 percent are low income. The remaining households are moderate income and above. Region 5 has 3 percent of the state's overcrowded owner households. Of the 8,491 overcrowded households, 11 percent are extremely low income. Approximately 11 percent are very low income, 23 percent are low income, and the remaining households are moderate income and above.

In the Port Arthur area, 68 percent of the households can afford the median-priced home. For Lufkin the figure is 66 percent.[71]

[71] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 5 express a slight preference for new housing development; the renovation of existing housing and purchase assistance ranked next in importance.

Community Services Need

Region 5 has 4.6 percent of the state's poverty households; 11,148 households are elderly (5.8 percent of the state's total) and 36,076 households are headed by individuals under 65 years of age (4.3 percent of the state's total).

Twenty-one percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 5 has a strong preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 325,047 housing units in the region and 84.7 percent are occupied. Of the total housing stock, 69.3 percent are one unit, 11 percent are over two units, and 18.6 percent are mobile homes. Boats and RVs make up the rest of the housing stock.

The Department has assisted approximately 5,260 multifamily and 1,050 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 10,897 units, most have been multifamily units. The housing finance corporations in the region have assisted 860 multifamily units and 214 single family households.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $8,427,014 in Region 5 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family owner-occupied assistance accounted for 31 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 30 percent of the total dollar amount committed. All of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

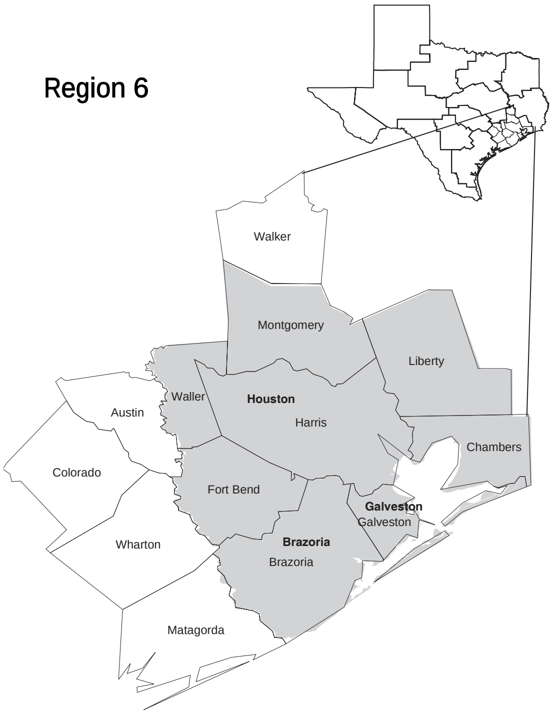
Other sources of housing assistance arrived in the region in 2004. Region 5 received over $6.9 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $46.9 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $2.1million worth of HOME funds dedicated to either single family or multifamily activities. The area housing finance corporations assisted 63 single family households in the region.

The Department's Regional Allocation Formula distributes 6.2 percent of the state's 2005 HOME funds to the region, about $1,620,998. Of that funding, 85.9 percent will go to rural areas. Region 5 also receives 3 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the total Housing Tax Credit funding 59.9 percent will go to rural areas and 40.1 percent will go to urban areas.



REGION 6

Region 6 includes the urban areas of Houston, Brazoria, and Galveston. According to the US Census, 4,854,454 people live in the region. Over 66 percent of the population lives in urban areas. Population estimates through January 2003 show a 6.8 percent increase, higher than the state as a whole.[72]

Employment in the region is projected to grow at 1.6 percent, the same annual growth rate as the state. Region 6 was one of the fastest growing areas in the state over the past 30 years. There have been three distinct economic eras in the region's history. From 1970 to 1982, employment grew at a 5.7 percent annual rate. From 1982 to 1988, there was no change in the rate, and from 1988 to 2000, the region has seen a 2.8 percent growth rate. These eras reflect the region's history with the oil and gas industry and the real estate business. The industry with the highest employment growth since 1980 is services to business. The healthcare industry is the sector with the second highest growth rate, reflecting national trends. The main regional economic specialty is oil and gas.[73]

There are 1,702,792 occupied housing units in the region, 60.9 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 23.3 percent of the state's population lives in the area, and regional housing permits for 2003 represent 32.4 percent of the state's total housing starts.[74]

Approximately 77 percent of the respondents to the most recent Community Needs Survey report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 6 identified problems, successes, and recommendations related to the suggested topics: communication, special needs, funding distribution, and education. Some of the successes of communication include a local clearinghouse of housing related information, and the TDHCA website. The meeting attendees agreed that TDHCA could improve the use of local media outlets. Special needs as a category is not adequately nor consistently defined. TDHCA has improved its funding distribution to rural areas, although there is room for improvement. It was noted that there are not funds for educational programs.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 2000 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 13.8 percent. Approximately 43 percent of the 168,355 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 33 percent of the households with extreme housing cost burden. Approximately 19 percent of the households are low income and the remainder percent are moderate income and above.

In the region, 9,614 renter households lack kitchen and/or plumbing facilities; this is 22 percent of the state's total. Approximately 34 percent earn less than 30 percent of the area median income, almost 20 percent of the households earn between 31 and 50 percent, and 21 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 117,586 overcrowded renter households, 25 percent are extremely low income, approximately 24 percent are very low income, another 25.6 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over other rental housing activities. The renovation of existing housing is more important than rental payment assistance in the region.

Single Family Housing Need

Region 6 has 21 percent of the state's owner households with extreme housing cost burden, or 173,411 households. Approximately 26 percent of the owner households with extreme cost burden are extremely low income households. Twenty percent are very low income, 24.2 percent are low income, and the rest are moderate income and above.

There are 6,691 owner households in the region that lack kitchen and/or plumbing facilities; almost 25 percent of these households are extremely low income. Almost 15 percent of the households lacking kitchen and/or plumbing are very low income and 19 percent are low income. The remaining households are moderate income and above. Region 6 has 23.3 percent of the state's overcrowded owner households. Of the 66,212 overcrowded households, 11 percent are extremely low income. Sixteen percent are very low income, 27.6 percent are low income, and the remaining households are moderate income and above.

In the Houston area, approximately 56 percent of the households can afford the median-priced home. For Fort Bend and Montgomery County the figure is 68 and 65 percent, respectively.[75]

[75] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 6 express a slight preference for new housing development; the renovation of existing housing and purchase assistance rank next in importance.

Community Services Need

Region 6 has 20.5 percent of the state's poverty households; 32,192 households are elderly (16.7 percent of the state's total) and 179,586 households are headed by individuals under 65 years of age (21.4 percent of the state's total).

Thirty-two percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 6 has a strong preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 1,853,854 housing units in the region and 91.9 percent are occupied. Of the total housing stock, 71 percent are one unit; 18 percent are over two units; and the rest are mobile homes, RVs, and boats.

The Department has assisted approximately 54,680 multifamily and 5,300 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 28,052 units, most have been multifamily units. The housing finance corporations in the region have assisted 31,530 multifamily units and 1,561 single family households.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $155,213,823 in Region 6 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Multifamily development accounted for 82 percent of the total dollar amount committed during the past year. Approximately 98 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

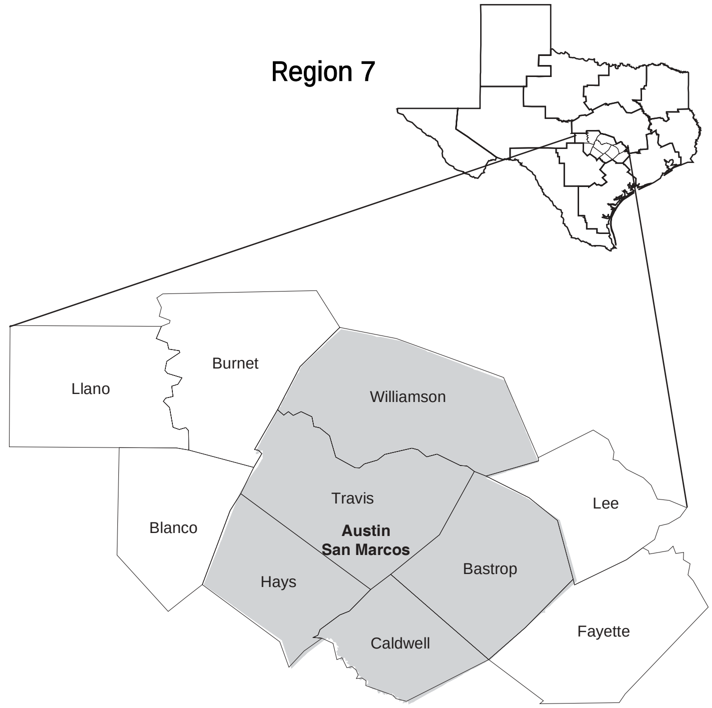
Other sources of housing assistance arrived in the region in 2004. Region 6 received over $41.9 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $333.5 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $21.9 million worth of HOME funds dedicated to either single family or multifamily activities. In 2004, the area Housing finance corporations produced 1456 multifamily units. There were 355 single family households assisted by HFCs in 2004.

The Department's Regional Allocation Formula distributes 10.3 percent of the state's 2005 HOME funds to the region. Of that funding, 32.5 percent, approximately $873,299 will go to rural areas; the other 67.5 percent will go to urban areas. Region 6 also receives 19.5 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 7.6 percent will go to rural areas and 92.4 percent will go to urban areas.

REGION 7



The urban area of Austin-San Marcos is at the center of Region 7. According to the US Census, 1,346,833 people live in the region. Over 68 percent of the population lives in urban areas. Population estimates through January 2003 show a 7.5 percent increase, the second highest growth in the state.[76]

Employment in the region is projected to grow at 1.2 percent between 2000 and 2005. The rate will pick up during the latter part of the period. Region 7 was the fastest growing area in the state over the past 30 years; the region's share of the state's growth has increased as well. The areas with the highest employment growth since 1980 are services to business and high tech, communications, aviation, and electronics. The high tech growth that occurred during the late 1980s and 1990s is due to Region 7 companies such as Dell, IBM, Motorola, Samsung, MCC, and AMD. The region has experienced a recent economic decline in the high tech areas and will require time to rebound.[77]

There are 510,555 occupied housing units in the region, 60 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 6.5 percent of the state's population lives in the area, and regional housing permits for 2003 represent 9.1 percent of the state's total housing starts.[78]

Approximately 91 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem; this is the highest percentage in the state. There is a preference for rental housing assistance over owner-occupied housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 7 discussed three issues: the definition of affordable housing; the trends and issues for the region; and which programs are working towards the goal of increasing the supply of affordable housing. Meeting attendees identified two segments of population in need of affordable housing: the working poor and very low income households. These two segments require unique solutions. Affordable housing is a regional problem that lacks regional attention. As the region's population continues to increase and wages remain stable, there will be a lack of affordable homes for workers near their jobs. The group identified specific programs that work well, including the City of Austin's Neighborhood Planning Program, Section 8 housing voucher program, and the Texas Jump Start financial literacy program.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 11.1 percent. Approximately 41 percent of the 68,118 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent about 32 percent of the households with extreme housing cost burden. Twenty-three percent of the households are low income and the remainder are moderate income and above.

In the region, 2,869 renter households lack kitchen and/or plumbing facilities; this is 6.7 percent of the state's total. Approximately 41 percent earn less than 30 percent of the area median income, almost 20 percent of the households earn between 31 and 50 percent, and another 20 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 22,581 overcrowded renter households, 24 percent are extremely low income, 23 percent are very low income, another 25 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for renovation of existing housing over other rental housing activities. Rental payment assistance is more important than in the region new housing development.

Single Family Housing Need

Region 7 has seven percent of the state's owner households with extreme housing cost burden, or 56,638 households. Slightly more than 20 percent of the owner households with extreme cost burden are extremely low income households. Almost 18 percent are very low income, 28.7 percent are low income, and the rest are moderate income and above.

There are 2,013 owner households in the region that lack kitchen and/or plumbing facilities; almost 26 percent of these households are extremely low income. More than 14 percent of the households lacking kitchen and/or plumbing are very low income and 21 percent are low income. The remaining households are moderate income and above. Region 7 has 4.3 percent of the state's overcrowded owner households. Of the 12,315 overcrowded households, 8.4 percent are extremely low income. Almost 17 percent are very low income, 28.4 percent are low income, and the remaining households are moderate income and above.

In the Austin area, approximately 64 percent of the households can afford the median-priced home.[79]

[79] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 7 express a slight preference for the renovation of existing housing; purchase assistance and new housing development rank next in importance.

Community Services Need

Region 7 has 5.1 percent of the state's poverty households; 6,601 households are elderly (3.5 percent of the state's total) and 46,549 households are headed by individuals under 65 years of age (5.5 percent of the state's total).

Twenty-nine percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 7 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 545,761 housing units in the region and 93.5 percent are occupied. Of the total housing stock, 62 percent are one unit, 30 percent are over two units, and the rest are mobile homes, boats.

The Department has assisted approximately 18,125 multifamily and 4,450 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 10,454 units; all but 30 units have been multifamily. The housing finance corporations have produced 6,334 multifamily units; and assisted 1,082 single family households.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $91,222,656 in Region 7 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family financing and homebuyer assistance accounted for 75 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 19 percent of the total dollar amount committed. Approximately 79 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

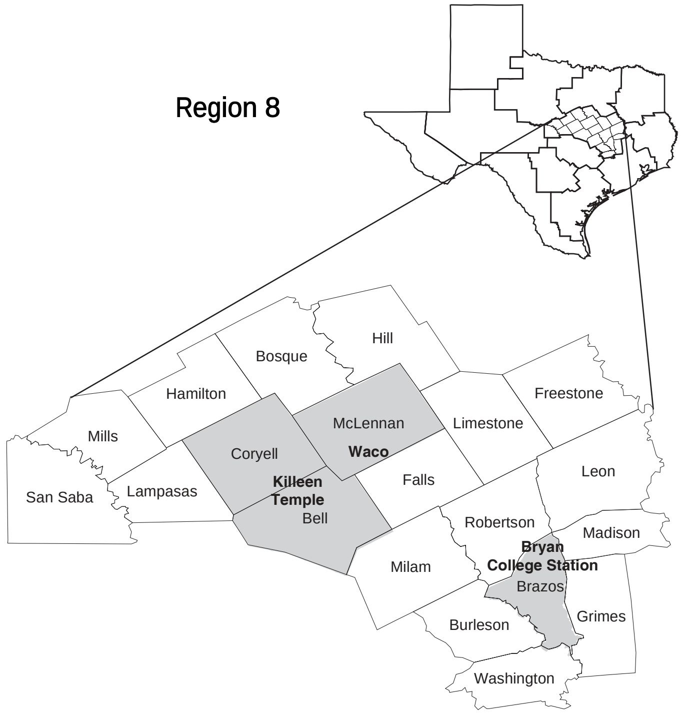
[1] Number served is individuals.

Other sources of housing assistance arrived in the region in 2004. Region 7 received over $28.7 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $82.8 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $4.7 million worth of HOME funds dedicated to either single family or multifamily activities. There were 135 single family households assisted by the area housing finance corporations in 2004.

The Department's Regional Allocation Formula distributes 4.2 percent of the state's 2005 HOME funds to the region. Of that funding, 51.2 percent will go to rural areas, approximately $554,654. The remaining $529,350 will go to urban areas. Region 7 also receives 7 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 7.5 percent, or $211,087, will go to rural areas and 92.5 percent, or $2,604,048 will go to urban areas.



REGION 8

Region 8, located in the center of the state, surrounds the urban areas of Waco, Bryan, College Station, Killeen, and Temple. According to the US Census, 963,139 people live in the region. Over 55 percent of the population lives in urban areas. Population estimates through January 2003 show a 3.7 percent increase.[80]

Employment in the region is projected to grow at 1.3 percent between 2000 and 2005. The region, one of the fastest growing areas in the state in the past, will not continue to experience such high rates of growth. The areas with the highest employment growth since 1980 are services to business, tourism, and personal services. The growth in tourism and personal services is a reflection of the wealth effect of growing per-capita personal income. The industries that are projected to add the most jobs through 2005 include state and local government, eating and drinking places, and health services.[81]

There are 344,575 occupied housing units in the region, 61 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 4.6 percent of the state's population lives in the area, and regional housing permits for 2003 represent 3.14 percent of the state's total housing starts.[82]

Approximately 76 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 8 identified problems, successes, and recommendations related to the suggested topics: communication, special needs, funding distribution, and education. The group discussed the definition of affordable housing versus subsidized housing and the need for elected officials to possess a complete understanding of the affordable housing programs available. The meeting attendees identified a need for homeless shelters to address the problem of persons living in abandoned or condemned housing in the region. There is a need for solid demographic information on the special needs populations in the area. With regard to the current funding distribution, the group identified a need for rental and owner housing in rural areas. The application process for housing funds is complex and daunting. There is a problem with overcrowded housing and a need for

[80] Texas State Data Center and Office of the State Demographer, "Texas Population Estimates Program."
[81] Texas Comptroller of Public Accounts, "Texas Regional Outlook."
[82] Real Estate Center at Texas A&M University, "Building Permit Activity"

housing infill programs. The group identified a desire for additional homebuyer education counseling and improved communication regarding funding opportunities.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

The poverty rate according to the 2000 Census is 16.7 percent. Approximately 47 percent of the 42,797 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent almost 30 percent of the households with extreme housing cost burden. Approximately 19 percent of the households are low income and the remainder are moderate income and above.

In the region, 1,831 renter households lack kitchen and/or plumbing facilities; this is 4.3 percent of the state's total. Approximately 33 percent earn less than 30 percent of the area median income, more than 19 percent of the households earn between 31 and 50 percent, and 19.4 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 12,409 overcrowded renter households, 23 percent are extremely low income, 18 percent are very low income, another 28 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for renovation of existing housing over other rental housing activities. Rental payment assistance is more important than in the region new housing development.

Single Family Housing Need

Region 8 has 4.5 percent of the state's owner households with extreme housing cost burden, or 36,129 households. Twenty-seven percent of the owner households with extreme cost burden are extremely low income households. Twenty-one percent are very low income, 25 percent are low income, and the rest are moderate income and above.

There are 1,798 owner households in the region that lack kitchen and/or plumbing facilities; 26.5 percent of these households are extremely low income. Just over 19 percent of the households lacking kitchen and/or plumbing are very low income and 18.4 percent are low income. The remaining households are moderate income and above. Region 8 has 3.1 percent of the state's overcrowded owner households. Of the 8,900 overcrowded households, 8.3 percent are extremely low income. Almost 12 percent are very low income, 26 percent are low income, and the remaining households are moderate income and above.

In the Bryan-College Station area only approximately 41 percent of the households can afford the median-priced home. For Killeen-Fort Hood, 75 percent can afford the median-priced home.[83]

The Community Needs Survey respondents from Region 8 express a slight preference for the renovation of existing housing; purchase assistance and new housing development rank next in importance.

Community Services Need

Region 8 has 5.6 percent of the state's poverty households; 10,531 households are elderly (5.4 percent of the state's total) and 47,640 households are headed by individuals under 65 years of age (5.7 percent of the state's total).

Twenty-seven percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 8 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 387,627 housing units in the region and 88.9 percent are occupied. Of the total housing stock, 67 percent are one unit, 20 percent are over two units, 12 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 8,630 multifamily and 1,873 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 12,769 units; all but 280 units have been multifamily. The housing finance corporations in Region 8 have assisted 104 multifamily households and 848 single family households.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $8,088,769in Region 8 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family owner-occupied assistance accounted for 31 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 26 percent of the total dollar amount committed. All of the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

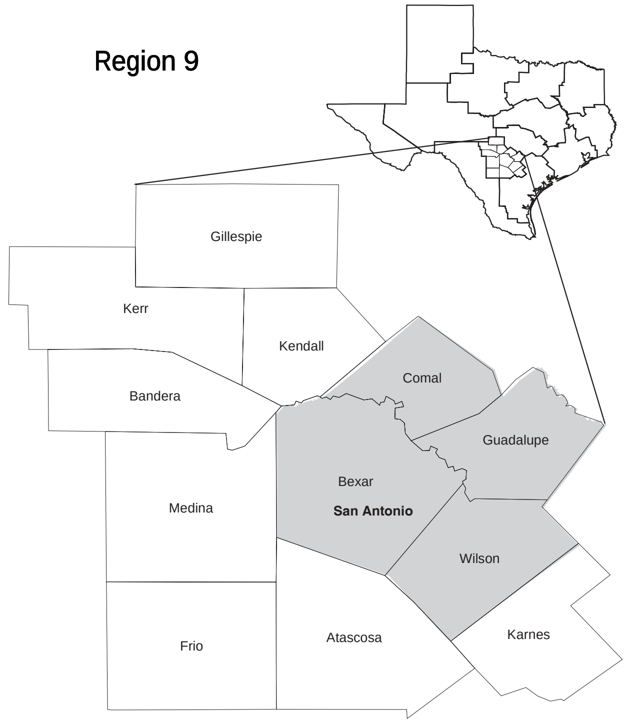
Other sources of housing assistance arrived in the region in 2004. Region 8 received over $8.2 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $43.7 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $3.4 million worth of HOME funds dedicated to either single family or multifamily activities. The housing finance corporations assisted 74 single family households in 2004.

The Department's Regional Allocation Formula distributes 4.1 percent of the state's 2005 HOME funds to the region. Of that funding, 69.7 percent will go to rural areas, approximately $748,314. The other 30.3 percent will go to urban areas. Region 8 also receives 6 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 22 percent will go to rural areas and 78 percent will go to urban areas.

REGION 9



San Antonio is the main metropolitan area in Region 9. According to the US Census, 1,807,868 people live in the region, 73 percent in urban areas. Population estimates through January 2003 show a 5.2 percent increase.[84]

Employment in the region is projected to grow at the same rate as the state, 1.6 percent annual increase between 2000 and 2005. The region experienced high growth rates in the 1990s, while the growth will continue; it will not be as dramatic as before. The region's growth has remained strong over the past few decades partially because the region is not dependent on the oil and gas industries. The areas with the highest employment growth since 1980 are services to business, high tech, communications, tourism, and personal services. The growth in the high tech, communications, aviation, and electronics industry reflects the siting of Southwestern Bell in the region. The industries that are projected to add the most jobs through 2005 include retail, local government, construction, and eating and drinking places.[85]

There are 636,796 occupied housing units in the region, 65 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 8.7 percent of the state's population lives in the area, and regional housing permits for 2003 represent 7.6 percent of the state's total housing starts.[86]

Approximately 79 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is no clear preference for owner-occupied housing assistance or rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 9 identified problems, successes, and recommendations related to the suggested topics related to affordable housing: communication, special needs, funding distribution, and education. The group concluded that although more funding would close the gap between the need for affordable housing and the supply, funding alone is not the answer. The process needs to be improved for both private and public entities. The group expressed a desire to receive feedback from TDHCA on the points and issues raised in the RAC meetings.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 267,118 people that live in poverty in the region, a poverty rate of 15.2 percent. Approximately 39 percent of the 62,012 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 31.4 percent of the households with extreme housing cost burden. Approximately 23 percent of the households are low income and the remainder are moderate income and above.

In the region, 3,284 renter households lack kitchen and/or plumbing facilities; this is 7.6 percent of the state's total. Approximately 35 percent earn less than 30 percent of the area median income, more than 14 percent of the households earn between 31 and 50 percent, and 23 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 28,877 overcrowded renter households, 25 percent are extremely low income, 21 percent are very low income, another 25.5 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a slight preference for new housing development over other rental housing activities. Rental payment assistance is more important in the region than the renovation of existing housing.

Single Family Housing Need

Region 9 has 8.9 percent of the state's owner households with extreme housing cost burden, or 71,630 households. Slightly more than 24 percent of the owner households with extreme cost burden are extremely low income households. Twenty percent are very low income; 24 percent are low income; and the rest are moderate income and above.

There are 3,270 owner households in the region that lack kitchen and/or plumbing facilities; approximately 22 percent of these households are extremely low income. Just over 20 percent of the households lacking kitchen and/or plumbing are very low income and 19 percent are low income. The remaining households are moderate income and above. Region 9 has 9 percent of the state's overcrowded owner households. Of the 25,439 overcrowded households, 10 percent are extremely low income. Sixteen percent are very low income, 26 percent are low income, and the remaining households are moderate income and above.

In the San Antonio area approximately 63 percent of the households can afford the median-priced home.[87]

[87] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 9 do not express a preference for the renovation of existing housing, purchase assistance, or new housing development.

Community Services Need

Region 9 has 8.5 percent of the state's poverty households; 17,887 households are elderly (9.34 percent of the state's total) and 70,207 households are headed by individuals under 65 years of age (8.4 percent of the state's total).

Twenty percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 9 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 689,862 housing units in the region and 92.3 percent are occupied. Of the total housing stock, 69 percent are one unit, 22 percent are over two units, 8 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 13,390 multifamily and 1,362 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 24,967 units; all but 95 units have been multifamily. The housing finance corporations in the region have produced 6,966 multifamily units and assisted 490 single family households.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $20,549,784 in Region 9 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family owner-occupied assistance accounted for 29 percent of the total dollar amount committed during the past year; the next largest activity was multifamily development with 28 percent of the total dollar amount committed. Approximately 96 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

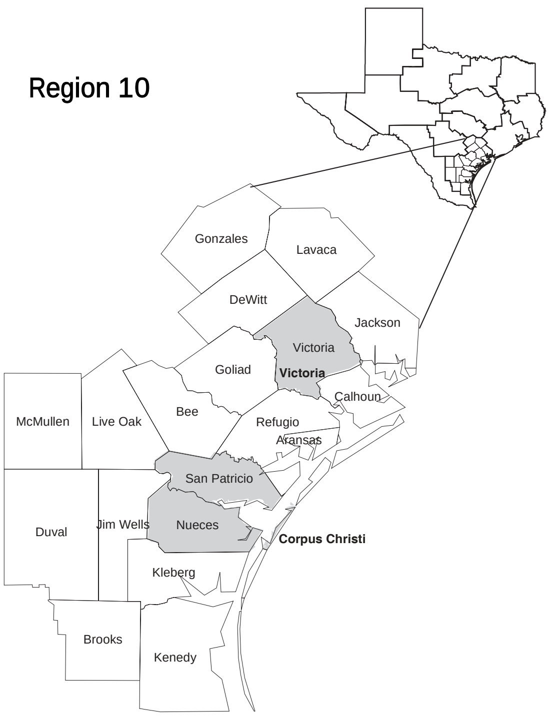
Other sources of housing assistance arrived in the region in 2004. Region 9 received over $37.4 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $114.9 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received approximately $8 million worth of HOME funds dedicated to either single family or multifamily activities. In 2004, the housing finance corporations assisted 387 single family households.

The Department's Regional Allocation Formula distributes 4.6 percent of the state's 2005 HOME funds to Region 9. Of the total $1,198,520 approximate funding, 65 percent will go to rural areas and 35 will go to urban areas. Region 9 also receives 8.1 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit Funding, 10.4 percent will go to rural areas and 89.6 percent will go to urban areas.



REGION 10

Region 10, including the urban areas of Corpus Christi and Victoria, is located in the south eastern part of the state on the Gulf of Mexico. Half of the total population of 732,917 people lives in urban areas. Population estimates through January 2003 show a 1.0 percent increase.[88]

Employment in the region between 2000 and 2005 is projected continue to grow at the same rate as the past 30 years, 1.7 percent annual increase. Since 1970, the region has experienced less growth than the state in terms of employment, population, and gross regional product. The areas with the highest employment growth since 1980 are health care, reflecting national trends, and services to business, as a result of the outsourcing trend in business. The regional specialties include the oil and gas industries and health care. The industries that are projected to add the most employment between 2000 and 2005 are health services, construction, and retail trade.[89]

There are 256,428 occupied housing units in the region, 66.8 percent are owner occupied and the rest are occupied by renters according to 2000 Census data. Approximately 3.5 percent of the state's population lives in the area, and regional housing permits for 2003 represent 1.4 percent of the state's total housing starts.[90]

Approximately 87 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 10 identified problems, successes, and recommendations related to the suggested affordable housing topics: communication, special needs, funding distribution, and education. The group recommended improved communication in the form of an email distribution list and a consumer website with housing resources. Communicating with unincorporated communities and colonias require additional effort. Persons with disabilities face difficulties in locating affordable housing; the group suggested funding set asides for specific programs. The region is unique in its high poverty rate, number of non-English speakers, and high unemployment rate and therefore there is a greater need for rental housing rather than homeownership opportunities. There is a need for a common definition of affordable housing.

89 Texas Comptroller of Public Accounts, "Texas Regional Outlook."
90 Real Estate Center at Texas A&M University, "Building Permit Activity."

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 132,214 people that live in poverty in the region, a rate of 18.7 percent. Approximately 40 percent of the 23,006 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 32 percent of the households with extreme housing cost burden. Approximately 21 percent of the households are low income and the remainder are moderate income and above.

In the region, 1,497 renter households lack kitchen and/or plumbing facilities; this is 3.4 percent of the state's total. Approximately 34 percent earn less than 30 percent of the area median income, less than 16 percent of the households earn between 31 and 50 percent, and 24 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 10,429 overcrowded renter households, almost 30 percent are extremely low income, 20 percent are very low income, another 22 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show no significant preference between new housing development and the renovation of existing housing. Rental payment assistance is the least important of the three rental housing assistance activities.

Single Family Housing Need

Region 10 has 3.5 percent of the state's owner households with extreme housing cost burden, or 28,552 households. Slightly more than 30 percent of the owner households with extreme cost burden are extremely low income households. Twenty-two percent are very low income, 21.6 percent are low income, and the rest are moderate income and above.

There are 1,783 owner households in the region that lack kitchen and/or plumbing facilities; 33 percent of these households are extremely low income. Almost 23 percent of the households lacking kitchen and/or plumbing are very low income and 18 percent are low income. The remaining households are moderate income and above. Region 10 has 3.9 percent of the state's overcrowded owner households. Of the 10,929 overcrowded households, 11 percent are extremely low income. A little more than 14 percent are very low income, 22 percent are low income, and the remaining households are moderate income and above.

In the Corpus Christi area approximately 56 percent of the households can afford the median-priced home; for Victoria the figure is 68 percent.[91]

[91] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

The Community Needs Survey respondents from Region 10 prefer home purchase assistance over the renovation of existing housing. New housing development is the least important owner-occupied housing assistance.

Community Services Need

Region 10 has 4.4 percent of the state's poverty households; 10,783 households are elderly (5.6 percent of the state's total) and 34,422 households are headed by individuals under 65 years of age (4.1 percent of the state's total).

Twenty-seven percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 10 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 298,494 housing units in the region and 86 percent are occupied. Of the total housing stock, 71 percent are one unit, 18 percent are over two units, 10 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 4,421 multifamily and 1,708 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 8,452 units; all have been multifamily. The housing finance corporations have assisted 750 multifamily units and 1,446 single family households.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $22,514,714 in Region 10 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family owner-occupied assistance accounted for 63 percent of the total dollar amount committed during the past year; the next largest activity was single family financing and homebuyer assistance with 20 percent of the total dollar amount committed. Approximately 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

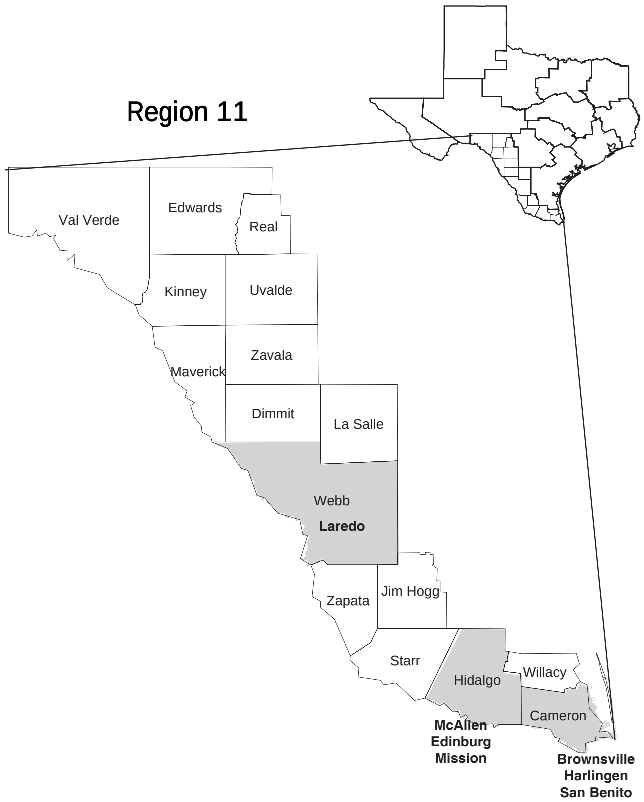
Other sources of housing assistance arrived in the region in 2004. Region 10 received over $6.7 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $18.9 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $1.8 million worth of HOME funds dedicated to either single family or multifamily activities. In 2004, 56 single family households received assistance.

The Department's Regional Allocation Formula distributes 6.6 percent of the state's 2005 HOME funds to Region 10. Of that funding, 66 percent will go to rural areas, approximately $1,129,898. The remaining 34 percent, or $582,112, will go to urban areas. Region 10 also receives 5 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 31.4 percent will go to rural areas and 68.6 percent will go to urban areas.



REGION 11

Region 11 is a 16-county area along the border of Mexico. The main urban areas in the region are Brownsville-Harlingen, McAllen-Edinburg, Del Rio, and Laredo. Almost 59 percent of the population lives in urban areas. Population estimates through January 2003 show a 8.4 percent increase, from 1,343,330 to 1,455,917.[92]

Region 11 is projected to be the fastest growing region in the state, a 2.8 percent annual growth rate. This growth will continue the trend experienced in the region since 1970. The areas with the highest employment growth since 1980 are health care, reflecting national trends and regional population growth, and services to business, as a result of the outsourcing trend in business. The regional specialties include transportation, apparel, and health services. The region's proximity to Mexico leads to the specialization of the transportation functions related to international trade. The industries that are projected to add the most employment between 2000 and 2005 are local government, retail trade, health services, and construction.[93]

There are 378,275 occupied housing units in the region: 71 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 6.4 percent of the state's population lives in the area, and regional housing permits for 2003 represent 7.6 percent of the state's total housing starts.[94]

Approximately 90 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area, the second highest percentage among the regions. There is a strong preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 11 identified problems, successes, and recommendations related to the suggested affordable housing topics: communication, special needs, funding distribution, and education. The group suggested that more meetings and public hearings would improve communication in the region. The existing special needs programs could be enhanced by more coordination among the service providers. Meeting attendees agreed with the process of evaluating a

[92] Texas State Data Center and Office of the State Demographer, "Texas Population Estimates Program."
[93] Texas Comptroller of Public Accounts, "Texas Regional Outlook."

region's need when distributing funds. Homebuyer education should be mandatory prior to the purchase of a home.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 455,366 people that live in poverty in the region; this is the highest poverty rate in the state. Approximately 53.5 percent of the 25,023 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 29 percent of the households with extreme housing cost burden. Approximately 13 percent of the households are low income and the remainder are moderate income and above.

In the region, 4,751 renter households lack kitchen and/or plumbing facilities; this is 11 percent of the state's total. Approximately 52 percent earn less than 30 percent of the area median income, just over 23 percent of the households earn between 31 and 50 percent, and 13.4 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 31,457 overcrowded renter households, 37 percent are extremely low income, 23 percent are very low income, another 20 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over the renovation of existing housing and rental payment assistance.

Single Family Housing Need

Region 11 has 5.4 percent of the state's owner households with extreme housing cost burden, or 43,599 households. Slightly less than 36 percent of the owner households with extreme cost burden are extremely low income households. About 25 percent are very low income, 20.6 percent are low income, and the rest are moderate income and above.

There are 8,043 owner households in the region that lack kitchen and/or plumbing facilities; approximately 38 percent of these households are extremely low income. More than 25 percent of the households lacking kitchen and/or plumbing are very low income and 20 percent are low income. The remaining households are moderate income and above. Region 11 has 17.2 percent of the state's overcrowded owner households. Of the 48,736 overcrowded households, 17 percent are extremely low income. Almost 20 percent are very low income, 25 percent are low income, and the remaining households are moderate income and above.

The Community Needs Survey respondents from Region 11 prefer home purchase assistance over new housing development. The renovation of existing housing is the least important owner-occupied housing assistance.

Community Services Need

Region 11 has 11.3 percent of the state's poverty households; 23,614 households are elderly (12.2 percent of the state's total) and 93,382 households are headed by individuals under 65 years of age (11.1 percent of the state's total).

Forty-three percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region; this is the highest percentage in the state. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 11 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 457,406 housing units in the region and 82.7 percent are occupied. Of the total housing stock, 66 percent are one unit, 14 percent are over two units, 18 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 7,348 multifamily and 6,059 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 22,049 units; all but 83 have been multifamily. The housing finance corporations have assisted 703 single family households in the region.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $38,162,687 in Region 11 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family financing and homebuyer assistance accounted for 54 percent of the total dollar amount committed during the past year; multifamily development and single family owner-occupied assistance each represent 10 percent of the total dollar amount committed. Approximately 98 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

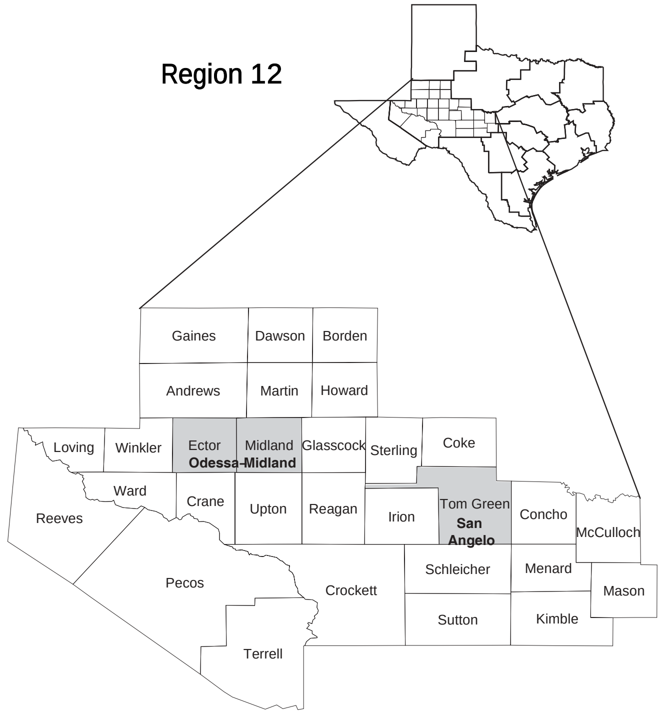
Other sources of housing assistance arrived in the region in 2004. Region 11 received over $25.9 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $62 million was spent in the region for a range of multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $7 million worth of HOME funds dedicated to either single family or multifamily activities. Housing finance corporations assisted 41 single family households in 2004.

The Department's Regional Allocation Formula distributes 16.9 percent of the state's 2005 HOME funds to Region 11. Of the total $4,383,924 approximate funding, 63.4 percent will go to rural areas and 36.6 to urban areas. Region 11 also receives 12.9 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 27.8 percent will go to rural areas and 72.2 percent will go to urban areas.

REGION 12



Region 12 in west Texas surrounds the urban areas of Odessa-Midland and San Angelo. Census 2000 population for the region is 524,884 and 56 percent live in urban areas. Population estimates through 2003 show a slight increase of 0.5 percent.[95]

Employment in Region 12 is expected to grow at an annual rate of 1.7 percent for the period between 2000 and 2005. This is higher than the 1.1 percent growth experienced between 1995 and 2000. Compared with the rest of the state since 1970, the region's share of employment, population, and gross regional product has declined. The areas with the highest employment growth since 1980 are health care, reflecting national trends and regional population growth, and services to business, and local government. The area's economic specialties include industries related to the oil and gas business. The industries that are projected to add the most employment between 2000 and 2005 are retail trade, local government, oil and gas services, and wholesale trade.[96]

There are 189,582 occupied housing units in the region, 70 percent are owner occupied and the rest are occupied by renters, according to 2000 Census data. Approximately 2.5 percent of the state's population lives in the area, and regional housing permits for 2003 represent 0.4 percent of the state's total housing starts.[97]

Approximately 81 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 12 identified problems, successes, and recommendations related to the suggested affordable housing topics: communication, special needs, funding distribution, and education. There is a need for improved communication between federal, state, and local agencies. Meeting attendees identified a need for programs directed towards people with disabilities and the elderly population in the region. Additional credit counseling and homebuyer education programs are needed.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 85,063 people that live in poverty in the region. Approximately 48 percent of the 14,243 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 34 percent of the households with extreme housing cost burden. Approximately 15 percent of the households are low income and the remainder are moderate income and above.

In the region, 1,103 renter households lack kitchen and/or plumbing facilities; this is 2.6 percent of the state's total. Approximately 32 percent earn less than 30 percent of the area median income, almost 23 percent of the households earn between 31 and 50 percent, and 18.5 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 5,372 overcrowded renter households, 26 percent are extremely low income, 18 percent are very low income, another 26 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over the renovation of existing housing and rental payment assistance.

Single Family Housing Need

Region 12 has 2.6 percent of the state's owner households with extreme housing cost burden, or 20,719 households. Slightly more than 30 percent of the owner households with extreme cost burden are extremely low income households. Almost 25 percent are very low income, 23 percent are low income, and the rest are moderate income and above.

There are 1,138 owner households in the region that lack kitchen and/or plumbing facilities; approximately 23 percent of these households are extremely low income. Almost 20 percent of the households lacking kitchen and/or plumbing are very low income and 23 percent are low income. The remaining households are moderate income and above. Region 12 has 2.6 percent of the state's overcrowded owner households. Of the 7,320 overcrowded households, 10 percent are extremely low income. Just over 16 percent are very low income, 31 percent are low income, and the remaining households are moderate income and above.

In the Odessa-Midland area, 73 percent of households can afford the median-priced home. In San Angelo, 64 percent can afford the median-priced home. [98]

[98] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

In terms of owner-occupied housing assistance, Community Needs Survey respondents from Region 12 prefer the renovation of existing housing over new housing development. Home purchase assistance is the least important owner-occupied housing assistance.

Community Services Need

Region 12 has 3 percent of the state's poverty households; 6,744 households are elderly (3.5 percent of the state's total) and 24,271 households are headed by individuals under 65 years of age (2.9 percent of the state's total).

Eighteen percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank about equal in importance with transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 12 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 221,968 housing units in the region and 85.4 percent are occupied. Of the total housing stock, 72 percent are one unit, 16 percent are over two units, 12 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 3,500 multifamily and 1,155 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 5,465 units; all have been multifamily. Housing finance corporations have assisted 24 multifamily units and 93 single family households in the region.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $4,232,658 in Region 12 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family owner-occupied assistance accounted for 35 percent of the total dollar amount committed during the past year. All of the funds committed in the region went to assist extremely low, very low, and low income families and individuals.

Other sources of housing assistance arrived in the region in 2004. Region 12 received over $701,000 worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $16.5 million was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received approximately $1 million worth of HOME funds dedicated to either single family or multifamily activities. Housing finance corporations assisted 3 single family households.

The Department's Regional Allocation Formula distributes 5.2 percent of the state's 2005 HOME funds to Region 12. Of that funding, 39.8 percent will go to rural areas, approximately $540,459. The other 60.2 percent will go to urban areas. Region 12 also receives 3 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 28.6 percent, or $337,227, will go to rural areas and 71.4 percent, or $843,367.

REGION 13

El Paso is the main urban area in Region 13. The region spreads along the Texas-Mexico border in the southwestern tip of the state. The population for the region according to the 2000 US Census is 704,318. Slightly less than 89 percent live in urban areas; this is the highest urban percentage in the state. Population estimates through 2003 show an increase of 3.8 percent to 730,908.[99]

Employment in Region 13 is expected to grow at an annual rate of 1.6 percent for the period between 2000 and 2005. The region experienced high levels of growth in the period between 1970 and 2000, an annual growth rate in gross regional product of 3.5 percent. The region's share of the state's economy has grown as well. The areas with the highest employment growth since 1980 are services to business, health care, and tourism and entertainment. The industries that are projected to add the most employment between 2000 and 2005 are local government, retail trade, and eating and drinking places.[100]

There are 219,261 occupied housing units in the region, 64 percent are owner occupied and the rest are rentals, according to 2000 Census data. Approximately 3.4 percent of the state's population lives in the area, and regional housing permits for 2003 represent 2.9 percent of the state's total housing starts.[101]

Approximately 78 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area. There is a preference for owner-occupied housing assistance over rental housing assistance. The following section on regional need indicators provides additional detail on the different types of housing need.

Regional Advisory Committee meeting attendees from Region 13 identified problems, successes, and recommendations related to the suggested affordable housing topics: communication, special needs, funding distribution, and education. Meeting attendees expressed frustration with revised procedures related to the funding application process. There is a need for new programs that address the fact that many people in the region do not qualify for conventional home loans. The meeting attendees request that additional weight be given to the poverty rate when determining the allocation of funding. Predatory lending education is needed.

Need Indicators

The housing need indicators analyzed in this section include poverty rates, housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. Most of the following information comes from the 1990 CHAS database, except where noted. See tables with regional data in the Regional Plans Summary following the regional plans.

Multifamily Housing Need

According to the 2000 Census, there are 165,122 people that live in poverty in the region; representing the second highest poverty rate in the state at 23.9 percent. Approximately 40 percent of the 22,151 renter households with extreme housing cost burden earn less than 30 percent of the area median income (extremely low income). Those earning between 31 percent and 50 percent of the area median income (very low income) represent 32 percent of the households with extreme housing cost burden. Approximately 20 percent of the households are low income and the remainder are moderate income and above.

In the region, 1,679 renter households lack kitchen and/or plumbing facilities; this is 3.9 percent of the state's total. Approximately 28 percent earn less than 30 percent of the area median income, just over 32 percent of the households earn between 31 and 50 percent, and 18 percent earn between 51 and 80 percent. The remaining households that live in physically inadequate housing earn above 80 percent of the area median income. Of the 15,170 overcrowded renter households, 28 percent are extremely low income, 25 percent are very low income, another 24 percent are low income, and the rest of the overcrowded households are moderate income and above.

Results from the Community Needs Survey show a preference for new housing development over the renovation of existing housing and rental payment assistance.

Single Family Housing Need

Region 13 has 3.3 percent of the state's owner households with extreme housing cost burden, or 26,451 households. Slightly less than 24 percent of the owner households with extreme cost burden are extremely low income households. About 22 percent are very low income, 27.5 percent are low income, and the rest are moderate income and above.

There are 1,879 owner households in the region that lack kitchen and/or plumbing facilities; approximately 19.5 percent of these households are extremely low income. Less than 22 percent of the households lacking kitchen and/or plumbing are very low income and 28 percent are low income. The remaining households are moderate income and above. Region 13 has 4.9 percent of the state's overcrowded owner households. Of the 13,918 overcrowded households, 9 percent are extremely low income. Almost 15 percent are very low income, 23.4 percent are low income, and the remaining households are moderate income and above.

In the El Paso area, 60 percent of households can afford the median-priced home.[102]

[102] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index."

In terms of owner-occupied housing assistance, Community Needs Survey respondents from Region 13 prefer new housing development over the renovation of existing housing. Home purchase assistance is the least important owner-occupied housing assistance.

Community Services Need

Region 13 has 4.6 percent of the state's poverty households; 9,083 households are elderly (4.7 percent of the state's total) and 38,561 households are headed by individuals under 65 years of age (4.6 percent of the state's total).

Forty-one percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region; this is the second highest rate in the state. Among the different types of homeless assistance, short-term homeless shelters rank higher in importance with transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 13 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

Housing Supply

According to the most recent US Census, there are 236,572 housing units in the region and 92.7 percent are occupied. Of the total housing stock, 68 percent are one unit, 23 percent are over two units, 8 percent are mobile homes, and the rest are boats and RVs.

The Department has assisted approximately 3,740 multifamily and 2,100 single family households in the region. According to the Texas Housing Association, the public housing authorities in the area have assisted 12,290 units; all but 50 have been multifamily. Housing finance corporations have produced 378 multifamily units and assisted 288 single family households in the region.

Housing and Community Services Assistance for 2004 and 2005

The Department allocated $24,174,255 in Region 13 in FY 2004. Note that this regional total does not include several of the Community Affairs programs; totals for the CFNP, CEAP, and WAP programs are not available at the regional level. Single family financing and homebuyer assistance accounted for 79 percent of the total dollar amount committed during the past year. Approximately 99 percent of the total funds committed in the region went to assist extremely low, very low, and low income families and individuals.

Other sources of housing assistance arrived in the region in 2004. Region 13 received over $41.1 million worth of single family assistance in bond funds and various USDA homeownership loan programs. Approximately $32.4 was spent in the region for various multifamily activities including tenant-based rental assistance and other USDA multifamily programs. Participating jurisdictions in the region received over $4.1 million worth of HOME funds dedicated to either single family or multifamily activities. Housing finance corporations assisted 288 single family households in 2004.

The Department's Regional Allocation Formula distributes 1.9 percent of the state's 2005 HOME funds to Region 13. Of that funding, 64.6 percent will go to rural areas, approximately $313,031. The remaining 35.4 percent will go to urban areas. Region 13 also receives 5.2 percent of the state's Housing Tax Credit and Housing Trust Fund allocations. Of the Housing Tax Credit funding, 12.8 percent will go to rural areas and 87.2 percent will go to urban areas.

REGIONAL PLANS SUMMARY

The housing and community service needs of the different regions of Texas are as varied as the regions themselves. The Department strives to identify these regional needs and offer activities and programs that fit the characteristics of each area of the state. This section summarizes the information from the regional plans in the previous section. This summary contains the tables referenced in the regional plans and describes the sources and limitations of the data utilized in the needs assessments.

GENERAL INFORMATION ON POPULATION AND HOUSING

The most populous regions of the state according to the 2000 Census are Regions 3 and 6, together representing almost 50 percent of the state. Regions 3, 7, and 11 are the fastest growing areas as indicated by population estimates.

Table 1: Population by Region

Service Region	Population 2000 Census	Percent of State's Population	Population Estimate Jan 1, 2003	Percent Change 2000 to 2003

The regions with the highest number of persons in poverty are Regions 6, 3, and 11, see Table 2. The state poverty rate is 15.4 percent. The regions with the highest rate of poverty are along the border, Regions 13 and 11 with poverty rates of 23.9 percent and 34.4 percent respectively.

Table 2: Population and Poverty, 2000

Service Region	Persons in Poverty	Percent of State Poverty Total	Population for whom Poverty Status is Determined	Percent of Regional Population in Poverty

Information on the number of housing permits provides information on the regional housing industry. The regions with the highest share of the state's housing permits are also the most populous regions: 3 and 6 (see Table 4). Across the state, there were over three times as many single family permits as multifamily permits.

Table 4: Housing Permits, 2003

Service Region	Multifamily Housing Permits	Percent of State	Single Family Housing Permits	Percent of State	Total Housing Permits	Percent of State

NEED INDICATORS

Table 5 shows the number of renter households with cost burden greater than 30 percent by income group. The highest numbers of very low income households with extreme cost burden are found in Region 3 with a total of 206,011 households and Region 6 with 168,355 households.

Table 5: Number of Renter Households with Extreme Cost Burden by Income Group, 2000

Service Region	All Incomes	0% to 30%	31% to 50%	51% to 80%	81% to 95%	95% and Above

The number of rental units lacking complete plumbing and/or kitchen facilities is one of the indicators of housing need that does not follow the pattern of population, see Table 6. Regions 3 and 6 have the highest number of units lacking facilities and are also the regions with the highest number of renter households. Region 11, however, is ranked sixth in terms of renter population and third in number of renter units lacking kitchen and/or plumbing facilities.

Table 6: Number of Renter Units Lacking Kitchen and/or Plumbing by Affordability Category, 2000

COLONIA ACTION PLAN

OVERVIEW

The Texas Department of Housing and Community Affairs Colonia Action Plan for 2004–2005 discusses housing and community development needs in the colonias, describes the Department's policy goals, summarizes the strategies and programs designed to meet these goals, and describes some of the projected outcomes to support the improvement of living conditions of colonia and border residents along the Texas-Mexico border region. This plan focuses on colonias as defined by state statute.

The overall goal of the Department with respect to colonias is to improve the living conditions and lives of border residents in Texas. As a result, TDHCA provides planning, housing, and housing-related assistance.

Performance measures for colonia activities, as reported to the Legislative Budget Board, focus on outreach and technical assistance efforts of the Department—specifically the number of on-site technical assistance visits conducted annually from the Border Field Offices. The targeted performance number for the 2004–2005 biennium is 747 technical assistance visits a year.

It should be noted that there is no single or dedicated source of funds for colonia-focused programs and services administered by the Department, except the Colonia Self-Help Centers, which are funded with Community Development Block Grant funds. In the past, funding has been provided from the Housing Trust Fund, the HOME Program, Single Family Bond proceeds, and the Community Development Block Grant (CDBG) Program.

COLONIA NEEDS

In today's world, Texas colonias are considered an observable fact. Their beginnings date back to the 1950s. As a response to the reconstruction era, Texans adopted a state constitution to minimize the powers of government. By making counties subdivisions of the state with no home rule powers, Texans guaranteed that no county could take an action or adopt a rule until it is first voted on by the state. As a result all regulatory powers originate with cities and the state. Areas outside city limits are "regulation free zones" until problems become so serious that the entire state is ready to empower a county to address them.[103]

These regulatory free zones enabled colonia developers to purchase tracts of land with a marginal agricultural value. Some of these tracts were flood prone and drained poorly; some were too hilly to irrigate; some were land with a declining value due to changes in agricultural economics. These developers platted their tracts, bulldozed roads, and sold the undeveloped lots on 10- to 20-year contracts for deed starting anywhere from $8,000 to $20,000 at an interest rate of 10 percent to 17 percent annually.[104] A contract for deed is an instrument used to sell land. Title to the property is not transferred until the balance is paid in full.

WHAT IS A COLONIA?

A "colonia," Spanish for "neighborhood" or "community," is a geographic area located within 150 miles of the Texas-Mexico border that has a majority population comprised of individuals and families of low and very low income who lack safe, sanitary, and sound housing. This includes a lack of basic services such as potable water, adequate sewage systems, drainage, streets, utilities, paved roads, and plumbing. With living conditions often compared to Third World countries, the colonias present one of the most critical housing needs in the state. Housing in the colonias is primarily constructed with scarce materials, and professional builders are rarely used. Residents frequently start with makeshift structures of wood, cardboard, or other materials, and as finances allow, continue to improve their homes.

Colonia residents tend to be young, predominately Hispanic, low to very low income, and employed in low-paying employment sectors. According to the most recent data available, 36.6 percent of colonia residents are children (compared to 29 percent statewide). Nearly all are Hispanic and 27.4 percent speak Spanish as their primary language. However, contrary to common perception, more than 75 percent of colonia residents were born in the US and 85 percent are US citizens.

The workforce tends to be young and unskilled; consequently, wages are low. Primary occupations are seasonal in nature; agriculture service providers and construction-related jobs account for more than 50 percent of the workforce.[105] A study by the Texas A&M University Center for Housing and Urban Development indicated that unemployment levels in five Rio Grande Valley colonias ranged from 20 percent to as high as 70 percent, compared with the overall state unemployment rate of only 7 percent.

According to a survey by the Texas Department of Health of residents in 96 colonias in 6 border counties, almost half of the colonia households make less than $834 a month. Nearly 70 percent of the residents never graduated from high school.[106]

As indicated in a Status Report by the Center for Housing and Urban Development at Texas A&M University, there are approximately 1,450 colonias in the Texas, which are home to over 350,000 Texans. Future projections indicate the population may reach as high as 700,000 residents by the year 2010.[107]

LIVING CONDITIONS

As previously noted, the lack of even the most basic infrastructure including potable water and adequate sewage systems has contributed to the proliferation of disease. Compounded with a lack of adequate medical insurance and a shortage of healthcare facilities, reported cases of viral disease in the colonias far exceed statewide levels.

According to a study by the University of Texas System Texas-Mexico Border Health Coordination Office, diseases such as Hepatitis A, Salmonellosis, Shigellosis, and Tuberculosis occurred at a much higher rate

[105] G. Rogers, J. Glaser, P. Johnston, T. Black, A. Kamath, and R. Gonzalez, *Cinco Colonia Areas: Baseline Conditions in the Lower Rio Grande Valley* (College Station, TX: Center for Housing and Urban Development, College of Architecture, Texas A&M University, 1993).
[106] The Border Economy, Federal Reserve Bank of Dallas, http://www.dallasfed.org/research/border/tbe_issue.pdf, June 2001.
[107] LBJ School of Public Affairs, University of Texas at Austin, January 1996; and Texas Department of Housing and Community Affairs.

in the colonias than the rest of the state.[108] The rate of reported Hepatitis A, for example, was more than double the statewide rate. Other health problems included high rates of gastroenteritis and other water-quality-related problems.[109] Medical services are rarely available and this compounds health problems in the colonias. Due to these stumbling blocks, children in the colonias experience slower growth and lower educational development rates.

The scarcity of potable water is another daily hardship for colonia residents. According to data from the Texas Department of Human Services, the use of untreated water for drinking, washing, bathing, and cooking ranged from 4 percent to 13 percent in colonia households.[110] Many residents rely on large plastic drums for the storage of water. More often, water is transferred to the house by bucket or plastic containers. Reports of water used for bathing, washing, and even cooking drawn from ditches where sewage and agricultural chemicals gather are not uncommon.

In addition to a lack of adequate wastewater infrastructure, most roadways located in colonias are unpaved or continue to be of very poor quality. A survey of residents of the El Cenizo colonia conducted by TDHCA indicated that 50 percent of the roads within the colonia were classified as "deteriorated" or "poor."[111] Water from heavy rains tends to collect, and when combined with inadequate waste removal systems, forms into pools of raw sewage, which again causes health problems for colonia residents.

Plumbing facilities are also a problem in the colonias. Approximately 50 percent of houses in rural colonias and 20 percent in urban colonias have incomplete plumbing facilities. Additionally, 40 percent in rural colonias and 15 percent in urban colonias lack a complete kitchen. For more information on the housing needs of border counties, see the Housing Analysis and Action Plan section of this report, Regions 11 and 13.

While each colonia is different and may have needs unique to that area, most share the same general characteristics. Unfortunately, these and other concerns are all part of the day-to-day life for most colonia residents 365 days a year. A bad situation is made even worse due to a profound lack of the most basic of necessities: safe, sanitary, and decent housing.

Housing and Housing-Related Needs[112]

An increasing amount of attention has been placed on colonias over the past several years. This attention has been focused on eliminating their presence rather than addressing the reason for their existence. One key to improving the conditions of colonias is the availability of affordable housing programs. While it is important to eradicate the conditions that exist in colonias; it is equally important to address the circumstances that enable such an environment to develop.

[110] US Census, Texas Department of Human Services, 1990
[111] Texas Department of Housing and Community Affairs, Office of Colonia Initiatives, *A Study of the People of El Cenizo, Texas* (Austin, TX: Texas Department of Housing and Community Affairs, April 1997).
[112] A portion of the information in this Action Plan is derived from the six Colonia Self-Help Centers' Needs Assessments.

While colonia residents have been resourceful and creative in providing for themselves, they continue to have several needs, including the following:

- Increased affordable housing opportunities such as down payment assistance, low interest loans, and flexible underwriting guidelines
- Conversion of contracts for deed to conventional mortgages, with transfer of title and homeowner education
- Construction and rehabilitation education and assistance
- Access to information regarding available resources
- Access to adequate infrastructure

Typically colonia residents do not have access to traditional financing or professional assistance when they purchase a home. They have limited credit or even nonexistent credit histories, and, for some, it is difficult to save for the down payment required to qualify for a conventional mortgage. Credit and debt counseling, including money management and financial literacy training, is lacking in colonia areas. There is also a need for flexible housing assistance such as low-interest-rate loans with underwriting guidelines appropriate for nontraditional borrowers.

The contract for deed has been the most common method of financing the purchase of colonia properties, due to the lack of underwriting guidelines by developers. Often, developers charge outrageous interest rates—as high as 14 to 18 percent—including higher late fees. Traditionally, developers would not record the contract for deed, making it easy to reclaim the property without legal process, while retaining any physical improvements made on the property.

Home construction, improvement, and maintenance require access to resources and skills. Many colonia residents do not have the resources to contract for home improvement, and choose to undertake the work on their own. Within the colonias, there is a need for education on several topics related to construction and rehabilitation such as surveying, platting, and general construction skills. There is also a scarcity of construction tools available for use by colonia residents.

Occasionally there is funding available to communities and organizations in the colonias to support local programs. Training is needed on how to locate funding and, once the funding is identified, how to write a successful grant proposal.

Interagency coordination and financial backing at the state and federal level needs to continue to address colonia issues. While many housing professionals recognize that the level of coordination and dialogue has increased in recent years, and that many communities in the border region acknowledge an increase in funding for infrastructure development, much work remains. In the context of affordable housing (construction and financing mechanisms) and infrastructure development (potable water, wastewater treatment, paved streets, etc.). TDHCA is committed to interagency cooperation.

POLICY GOALS

In 1995, in an effort to place more emphasis on addressing the needs of colonias, the Office of Colonia Initiatives (OCI) was created and charged with the responsibility of coordinating all Department and legislative initiatives involving border issues and managing a portion of the Department's existing programs targeted at colonias. OCI's fundamental goal is to improve the living conditions and lives of border residents, and to educate the public regarding the services that TDHCA has to offer.

The OCI Division was created to

- expand housing opportunities to colonia and border residents living along the Texas-Mexico border;
- increase knowledge and awareness of programs and services available through the Department;
- implement initiatives that promote improving the quality of life of colonia residents and border communities;
- empower and enhance organizations building capacity to better serve the targeted population;
- provide comprehensive education to colonia and border residents;
- develop cooperative working relationships between other state, federal, and local organizations to leverage resources and exchange information;
- promote comprehensive planning of communities along the Texas-Mexico border to better understand community and resident needs;
- serve as a catalyst for colonia residents by allowing input into major funding decisions that will affect border communities.

The OCI Division assists the Department's program divisions by coordinating activities in the colonias and border communities. Currently, the OCI Division headquarters and Border Field Offices (in Edinburg, Laredo, and El Paso) employ eight employees that provide consumer education, housing and financial assistance, and community services along the Texas-Mexico border region to colonia and border residents and state, federal, and local organizations.

ACTION PLAN

The Colonia Action Plan includes a strategic vision for housing, community development, and community services. This two-year Action Plan outlines how various initiatives will be implemented in 2004–2005. The activities focus on the needs identified in the Housing and Housing-Related Needs section on page 139.

The initiatives described within the Action Plan have been divided into two categories: (1) Increase Affordable Housing Opportunities and (2) Housing Construction and Rehabilitation, Access to Infrastructure, and Information Regarding Resources. Each category contains the following information:

- Legislative mandate: directive by the legislature
- Purpose: intent of the program
- Funding: financial support
- Activities to date: actions and successes
- Strategic approach: plan to further ongoing activities

INCREASE AFFORDABLE HOUSING OPPORTUNITIES

The following Department initiatives focus on increasing affordable housing opportunities in the colonias.

Texas Bootstrap Loan Program

The Texas Bootstrap Loan (Bootstrap) Program is required under Subchapter FF, Chapter 2306, Texas Government Code, to make available $3 million for mortgage loans to very low income families (at or below 60 percent of the area median family income), not to exceed $30,000 per unit. This program is a self-help construction program, which is designed to provide very low income families an opportunity to help themselves through the form of sweat equity. All participants under this program are required to provide at least 60 percent of the labor necessary to construct or rehabilitate the home, and all applicable building codes will be adhered to under this program. In addition, nonprofit organizations can combine these funds with other sources, such as those from private lending institutions, local governments, or any other sources; however, all combined loans cannot exceed $60,000 per unit.

The Department is required to set aside at least two-thirds, or $2,000,000, of the available funds for owner-builders whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code. The majority of the counties are located along the Texas-Mexico border region. The remainder of the funding, one-third, or $1,000,000, will be available to Department-certified nonprofit owner-builder programs statewide.

For the 2004 fiscal year, the Bootstrap Program was funded with $3 million from the Housing Trust Fund. The total dollars awarded through the program was $3 million. There were 11 total applications; 9 applications were recommended and approved for funding by the Department's Board, and are estimated to benefit 111 families.

The most important component of the program is the increase of homeownership for very low income Texans by providing loan funds to purchase or refinance real property on which to build new residential housing or improve existing residential housing. The Department has successfully replicated this initiative on a statewide basis. This initiative can remedy some of the living standards and provide the "American

Dream" to many low income families. The objective is to continue expanding affordable housing through self-help construction. OCI will market the program to certified nonprofit organizations and Colonia Self-Help Centers. The measurable output will be the number of certified nonprofit organizations applying for this program. This will enhance the development of affordable housing through self-help construction statewide.

Contract for Deed Conversion Initiative

The 78th Legislature passed Appropriations Rider 10, a legislative directive requiring the Department to spend no less than $4 million on contract for deed conversions for families that reside in a colonia and earn 60 percent or less of the applicable area median family income (AMFI), and convert no less than 400 contracts for deeds into traditional notes and deeds of trust by August 31, 2005.

The intent of the program is to help colonia residents become property owners by converting their contracts for deeds into traditional mortgages. Participants in this program must not earn more than 60 percent of AMFI and the property must be their primary residence. The properties proposed for this initiative must be located in a colonia as identified by the Texas Water Development Board colonia list or meet the Department's definition of a colonia.

After residents convert their contracts for deeds to traditional loans, the program provides colonia residents with the opportunity to seek funding for construction, rehabilitation, and other benefits that come with owning property.

For 2004 and 2005, TDHCA will set aside $4 million through the HOME Investment Partnerships Program. As stipulated in the legislation, the Department must do no less than 400 contract for deed conversions and spend no less then $4 million for the biennium. In reality, each conversion costs approximately $20,000, with an additional $20,000 in owner-occupied housing rehabilitation to meet, at a minimum, colonia housing standards, but preferably housing quality standards. This only allows for 100 conversions with the allotted $4 million, not allowing the Department to meet its goal of 400.

For fiscal years 2004 and 2005, the Department will use funding through the HOME Program to implement this initiative

Housing Construction and Rehabilitation, Access to Adequate Infrastructure, and Information Regarding Resources

The following Department initiatives focus on constructing and rehabilitating housing and infrastructure in the colonias, and providing information to colonia organizations and residents.

Colonia Self-Help Centers Program

Chapter 2306, Subchapter Z, of the Texas Government Code established the Colonia Self-Help Centers (SHCs) in Cameron/Willacy, El Paso, Hidalgo, Starr, and Webb counties. The legislative directive also allows the TDHCA to establish a Colonia SHC in any other county if the county is designated as an economically distressed area. The Department opened two additional Colonia SHCs in Maverick and Val Verde County.

Five colonias in each county are identified to receive concentrated attention from the appropriate Colonia SHC. Operation of Colonia SHCs is carried out through a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the ability to perform the functions of a Colonia SHC. The law also requires the establishment of a Colonia Resident Advisory Committee (C-RAC) to advise the Department on the needs of colonia residents, activities to be provided, and programs to be undertaken in the selected colonias. Each county selects two residents to serve on this committee; one of the two residents must reside in a colonia serviced by the Colonia SHC. In addition, the law requires the Department's Board to appoint members to the C-RAC, made up of a primary and secondary representative from each county. The C-RAC members meet 30 days prior to making an award to a Colonia SHC. The C-RAC has been instrumental in voicing the concerns of the targeted populations, and has helped both the Department and the Colonia SHCs develop useful tools and programs to address the needs of colonia residents.

Colonia SHCs provide concentrated on-site technical assistance to low and very low income individuals and families, including housing and community development activities, infrastructure improvements, and outreach and education. Some of the activities that are offered to the colonia residents are rehabilitation, new construction, surveying and platting, construction skills training, tool library access for self-help construction, housing finance, credit and debt counseling, grant writing, infrastructure constructions and access, contract for deed conversions, and capital access for mortgages, to improve the quality of life for colonia residents in ways that go beyond the provision of basic infrastructure.

The program serves 28 designated colonias in the six counties with approximately 10,000 colonia residents as beneficiaries of these services. Beneficiaries must be at or below 80 percent of the area median family income. County governments subcontract with Colonia SHCs in their respective county for the provision of housing and infrastructure services, and provide technical assistance to oversee their implementation of contractual responsibilities.

Operation of Colonia SHCs is funded from the US Department of Housing and Urban Development's Texas Community Development Block Program (CDBG) 2.5 percent colonia set-aside. CDBG funds can only be provided to eligible units of general local governments; therefore, the Department must enter into a contract with each affected county government. TDHCA provides administrative and general oversight to ensure programmatic and contract compliance to meet legislative intent. The Department maintains a relationship with the unit of general local government and Colonia SHC operator(s) to ensure that the housing and community development activities within each respective contract are achieved. In addition, Colonia SHCs are encouraged to seek funding from other sources to help them achieve their goals and performance measures.

Colonia SHC funds are awarded every two years. In FY 2002, the total dollars allocated through the program was $1,374,663. Of that funding, $227,713 went to the Colonia SHC in Hidalgo County and $1,146,950 went to the Colonia SHC serving Cameron and Willacy counties. A total of $972,287 was awarded to the Colonia SHC in Hidalgo County in FY 2003.

One goal for the Colonia SHCs over the next biennium is to increase the level of funding available. The Department will strive to expand the number of beneficiaries receiving assistance through the Colonia SHCs. By limiting salary and operating expenses to 25 to 30 percent of the total award, at least 70 to 75 percent of the allocated funds can be utilized to assist additional beneficiaries. Another way to expand the number of beneficiaries is to identify funding from other Department and external (i.e., USDA Rural Development, HUD, the Housing Assistance Council, Fannie Mae, etc.) sources that can be added to the annual allocation for the Colonia SHCs. The Department will encourage Colonia SHCs to apply for affordable housing programs.

Another goal of the Colonia SHCs is to expand the program to other communities along the Texas-Mexico border. The Department will target potential counties and colonias that can benefit from Colonia SHC activities, and work with units of local government to identify and determine potential sites for other Colonia SHCs.

Colonia Model Subdivision Loan (CMSL) Program

The 77th Legislature adopted Subchapter GG, Chapter 2306 of the Texas Government Code, to create the Colonia Model Subdivision Loan Program. The intent of this program is to provide low-interest or interest-free loans through a competitive scoring criteria to promote the development of new, high-quality residential subdivisions that provide alternatives to substandard colonias, and housing options affordable to individuals and families of extremely low and very low income that would otherwise move into substandard colonias.

Any subdivision created under this program must fully comply with all state and local laws, including any process established by state or locality for subdividing real property.

The Department will only make loans through the program to Colonia SHCs that are also community housing development organizations (CHDOs) certified by the Department. The loans made under this initiative may be used only for the payment of

- costs associated with the purchase of real property;
- costs of surveying, platting, and subdividing or re-subdividing real property;
- fees, insurance costs, or recording costs associated with the development of the subdivision;
- costs of providing proper infrastructure necessary to support residential uses;
- real estate commissions and marketing fees;
- any other cost that the Department, by rule, determines to be reasonable and prudent to advance the purposes of this subchapter.

The residential lots developed under this program can be sold to an individual borrower, nonprofit housing developer, or for-profit housing developer for the purposes of constructing single family residential dwelling units affordable to individuals and families of extremely low income or individuals and families of very low income.

For the 2004-2005 biennium, $2 million from the HOME Program Community Housing Development Organization (CHDO) set-aside will be used to implement this initiative.

Border Field Offices

The Department operates three Border Field Offices (BFOs) located in El Paso, Laredo, and Edinburg. These offices are partially funded through various sources including general revenue funds, the HOME Program, bond proceeds, and the Community Development Block Grant Program.

Currently, BFOs provide technical assistance to units of local government, nonprofits and for-profits, colonia residents, and the general public on TDHCA's programs and services. In addition, BFOs conduct onsite loan packaging and processing, homebuyer counseling, inspections, and administration of the Colonia SHCs.

Over the next biennium, the BFOs' goal is to establish a network of communication with units of general local government, nonprofits, and community-based organizations within 150 miles of the Texas-Mexico border. To increase the availability of services to border communities, BFOs will conduct onsite visits to communities requesting technical assistance on accessing Department programs. A database of contacts by county will advise communities of current and future funding opportunities available through the Department. BFOs will coordinate a minimum of four colonia public forums per year, which will provide information on various funding sources.

Additionally, BFOs will educate units of local government, nonprofits, and community-based organizations on the process of applying for funding and help identify opportunities for accessing various funding sources. They will coordinate capacity building seminars for units of general local government, nonprofits, and community-based organizations, and will assist with grant writing seminars to be conducted along the Texas-Mexico border. BFOs will also help units of general local government develop nonprofit organizations that can, in turn, provide services to colonia residents. A minimum of three workshops on the development of nonprofits will be coordinated by each BFO within their respective service region, and each BFO will coordinate a minimum of three tours of successful programs currently being administered along the border region.

Contract for Deed Consumer Education Program

OCI continues the consumer education program and has expanded its educational goals, although OCI is no longer required by legislation to provide education for contract for deed participants. With the statewide expansion of the Contract for Deed Conversion initiative, OCI recognized the need for additional education topics, including homebuyer education and instruction in other aspects of homeownership. Education services are available through the Colonia Self-Help Centers and OCI Border Field Offices.

Consumer Information Resources

OCI operates a toll-free hotline (1-800-462-4251), which enables colonia residents to voice their concerns and/or request information. In addition, this hotline is available to colonia residents who may be having trouble making their monthly mortgage payment.

Consumer Information Resources has been developed to promote the availability of housing and community development along the Texas-Mexico border through marketing and forums meant to increase public awareness. It is important to encourage the attendance of border residents at public hearings, conferences, and forums. Funding for this activity is part of the OCI administration budget.

COMMENT ON THE COLONIA ACTION PLAN

The following comment was received on this version of the Colonia Action Plan.

Comment

Mr. Jose Luis Almazan, Colonia Resident Advisory Committee Member, made the following comments.

There is a need to emphasize that the advisory committee members be afforded the opportunity to work more closely with onsite monitoring of projects by the Self-Help Center Colonia operator. This system of participation, suggested here, will facilitate processing of resident comments to all parties involved to improve in the overall delivery of services.

- **Department Response**
  Colonia Resident Advisory Committee (C-RAC) members are recommended to the Department by the county to act as representative of their respective county regarding the self-help center program. The opportunity exists for the CRAC members to become more involved in the self-help centers. The OCI is available to facilitate this opportunity with individual CRAC members upon request.

Involve youth in state- and federal-sponsored projects. This youth involvement will instill not only vocational skills, but also leadership skills that will help their families get out of poverty. Somehow integrate employment and training activities for unemployed/underemployed adult and youth colonia residents. Colonia residents are in a more disadvantaged situation than those who live in the cities where the job opportunities are concentrated.

- **Department Response**
  The focus of TDHCA is the provision of safe, decent, and affordable housing. While the Department does not have any statutory authority to focus on youth or employment related programs, OCI will attempt to disseminate information related to these topics.

Comment

Ms. Maria Luz Liserio, Colonia Resident Advisory Committee Member, made the following comment:

Colonia Self-Help Centers should obtain used computers and offer computer literacy classes to colonia residents.

- **Department Response**
  Some of the colonia self-help centers have acquired computers through state agencies. If the Department becomes aware of any surplus equipment, we will inform the self-help centers.

TEXAS STATE AFFORDABLE HOUSING COPRPORATION PLAN

COORDINATION WITH THE *STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT* (SLIHP)

Sec. 2306.566 of the Texas Government Code reads:

COORDINATION REGARDING STATE LOW INCOME HOUSING PLAN.

(a) The corporation shall review the needs assessment information provided to the corporation by the department under Section 2306.0722(b).

(b) The corporation shall develop a plan to meet the state's most pressing housing needs identified in the needs assessment information and provide the plan to the department for incorporation into the state low income housing plan.

(c) The corporation's plan must include specific proposals to help serve rural and other underserved areas of the state.

REPORT OVERVIEW

This report is prepared in accordance with SB 284, 78th Session, which requires Texas Department of Housing and Community Affairs ("TDHCA") and the Texas State Affordable Housing Corporation ("Corporation") to coordinate regarding the State Low Income Housing Plan. The bill amends Section 2306.0722(b) to require TDHCA to provide the needs assessment information compiled for the report and plan to the Corporation. Section 2306.566 is added to require the Corporation to then review the information and develop a plan to meet "the state's most pressing housing needs identified in the need assessment information" and provide the plan to TDHCA for incorporation into the resource allocation plan in the SLIHP. The Corporation's plan must include specific proposals to help serve rural and other underserved areas of the state and provide affordable housing through methods that do not duplicate those of TDHCA or local housing organizations. The bill also adds Section 2306.0721(h) to require TDHCA to incorporate the specific results of the Corporation's programs in TDHCA's estimate and analysis of housing supply in each uniform state service region under Section 2306.0721(c)(9).

HISTORY OF THE CORPORATION

The Texas State Legislature created the Corporation as a self-sustaining non-profit entity to facilitate the provision of affordable housing for low income Texans who do not have comparable housing options through conventional financial channels. Enabling legislation, as amended, may be found in the Texas Government Code, Chapter 2306, Subchapter Y, Sections 2306.551 et seq. All operations of the Corporation are conducted within the state of Texas. Corporate offices are located in Austin, Texas. A five-member board of directors appointed by the Governor with the advice and consent of the Senate oversees the business of the Corporation.

The Corporation issues mortgage revenue bonds and private activity bonds to finance the creation of affordable multifamily housing units, and to finance the purchase of single-family homes under two separate programs: (1) the Professional Educators Home Loan Program, and (2) the Fire Fighters and Police Officers Home Loan Program. Since April 2001, the corporation has issued over $550 million in single-family and multifamily mortgage revenue bonds. To date, the Corporation has provided over 7,700 units of affordable multifamily housing to low income Texans. The Corporation has also served 362 income eligible individuals and/or families through its first-time homebuyer single-family programs. This affordable housing has been provided at no cost to the state and its taxpayers. The Corporation does not receive any state funding, and is not subject to the legislative appropriations process.

The Corporation is organized, operated, and administered in accordance with its enabling legislation as a 501(c)(3) nonprofit corporation in order to access additional sources of funding to accomplish its mission. The Corporation is an approved originating seller/servicer for single family loans with Fannie Mae, Freddie Mac, Ginnie Mae, U.S. Rural Development, FHA, VA, and the Community Development Trust, Inc. The Corporation has conduit sales agreements with Countrywide Home Loans, Inc., and Wells Fargo Funding, and with the Community Development Trust, Inc., for multifamily mortgage loans. The Corporation is also a non-member borrower of the Federal Home Loan Bank of Dallas.

NEEDS ASSESSMENT REVIEW

According to an analysis of the Texas Department of Housing and Community Affairs' (TDHCA) Needs Assessment and other published studies on the subject, the following represent the most pressing housing needs in the state:

GENERAL HOUSING NEEDS

- By 2000, Texas had the second largest total population, 20.9 million, among the states in the United States. By 2010, the population is projected to be between 24.2 million and 25.9 million and by 2040 between 35.0 million and 50.6 million.[113]
- As a result of the growing population, housing demands will change substantially in the coming years with both owner and renter housing growing at nearly equal rates. [114]
- Affordable housing is in short supply for the extremely low, very low, low, and moderate income brackets, which was caused primarily by the private sector's concentration of development, both single family and multifamily development, in larger metropolitan areas and targeting higher income individuals and families.[115]
- Many HUD-financed or HUD-subsidized properties, which represent a significant portion of the state's affordable housing portfolio, are at risk of becoming market rate properties.[116]

SINGLE FAMILY HOUSING NEEDS

- Texas may add nearly 3.8 million more students over the next 40 years placing a high demand for educators.[117]
- Population growth will mean increased public service demands and expanding markets for Texas.[118]
- Lack of funds for down payment and closing costs has created one of the greatest obstacles that prevent first-time homebuyers of low-to-moderate-income families, such as the teachers, police officers, and firefighters, from achieving the American dream of owning a home. [119]
- The Texas Education Code establishes a state minimum salary schedule that must be accommodated by all Texas schools for specific public education professionals. The state minimum salary for 2004-2005 ranges from $24,240 per year for 0 years experience to $40,800 per year for 20 or more years experience. [120]
- A base salary chart for Texas police officers ranges from $32,944 per year to $46,644.[121]
- A base salary chart for Texas Firefighters ranges from $24,944 per year to $41,573. [122]

- An estimated $200 million was anticipated by 43 Texas mortgage institutions when the Corporation asked to anticipate the demand for originating loans in a first-time homebuyer program that offered down payment assistance for professional educators, police officers, and firefighters.

MULTIFAMILY HOUSING NEEDS

- Renter households are, on average, a lower income group than owner households. More than 37 percent of renter households earn less than 50 percent Area Median Family Income, compared to only 16.3 percent of owner households. As a result, renter households are more likely to be in need of housing assistance.[123]
- According to the results of the 2003 Community Needs Survey distributed by TDHCA to cities, counties, local housing departments, public housing authorities, and the US Department of Agriculture Rural Development field offices, approximately 78 percent of respondents feel that there is a severe or significant affordable housing problem in their area and that new rental housing development and the renovation of existing multifamily housing are more important than rental payment assistance.[124]
- The lack of affordable housing opportunities leads to severe and extreme housing cost burdens for lower-income groups; in particular, extremely low-income renter households.[125]
- Overcrowding may indicate a general lack of affordable housing in a community, and lower income renter households experience overcrowded conditions more frequently than higher income households.[126]

The Corporation will address these pressing housing needs through the following single family, multifamily, and grant programs for 2005. The following summary of Corporation programs gives the history and accomplishments of our programs in the last year and a plan for achieving greater success with those programs in 2005. A few of the programs mentioned are mandated by the state legislature, as noted, and a few have been undertaken upon our own initiative to fulfill housing needs for identified underserved areas of the state.

TSAHC PROGRAM DESCRIPTIONS

TEXAS PROFESSIONAL EDUCATORS HOME LOAN PROGRAM AND TEXAS FIRE FIGHTERS & POLICE OFFICERS HOME LOAN PROGRAM

These Programs are the Corporation's Single Family Mortgage Revenue Private Activity Bond Programs. The Programs were established under Senate Bill 284 and House Bill 1247 in 2003, respectively, and allocate $50 million of the State's Ceiling for Private Activity Bond Cap for the exclusive purpose of making single-family mortgage loans to Texas Professional Educators, Firefighters and Police Officers (individuals/families) that are first-time home buyers.

The 2004 Programs were released statewide on March 24, 2004, on a first come, first-served basis, to first-time homebuyers who wished to purchase a newly constructed or existing home. Through the Programs, eligible borrowers are able to apply for a 30 year fixed rate mortgage loan and receive 5 percent down payment assistance of the mortgage loan amount in the form of a grant. The programs are accessible to eligible borrowers by directly contacting a trained, participating mortgage lender.

In October 2004, the 2004 Professional Educators Home Loan Program fully originated the $20,000,000 in funds available in the non-targeted areas, which financed a total of 182 homes. The Firefighters and Police Officers Program originated $7,000,000 in funds available in the non-targeted areas, which financed a total of 65 homes, and had $12,000,000 remaining for new loans as of October 31, 2004. The $5,000,000 in each Program set aside for targeted areas will be available for non-targeted area loans in March 2005.

2005 Implementation Plan

The Corporation's primary goal for 2005 will be to continue to develop a financing structure that minimizes the Programs' mortgage interest rate and offers the best possible down payment assistance grant to the borrowers. Down payment assistance is especially critical when the spread between conventional mortgage rates and tax-exempt mortgage rates have reached historical lows. The Corporation will also continue to advertise the Programs by attending teacher, police officer, firefighter, home builder, real estate agent, and lender association conventions and trade shows in 2005. In addition, the Corporation will continue to train and develop relationships with mortgage lenders who represent the Programs to the borrowers.

The Corporation believes that one of the best ways to develop the Programs to successfully reach their full capacity is to have regular meetings with statewide and local Texas firefighter, police officer, and teacher associations. The Corporation will continue to hold meetings with the leaders of these associations to assess input received from their members on how to create a more effective, inclusive program. For example, many firefighter and police officer associations have expressed the need to include EMS personnel, county sheriffs, constables, and DPS peace officers. The Corporation has also received public comment suggesting the inclusion of volunteer firefighters, which would help smaller communities keep their volunteer firefighters and would encourage other volunteers to serve their communities. For these changes and any others that would require legislative action, the Corporation will bring these suggestions to legislators for consideration.

AFFORDABLE HOMEOWNERSHIP PROGRAM FOR TEXAS

One of the Corporation's main initiatives is to provide housing opportunities to Texans that do not have comparable housing options through conventional financial channels. Many families throughout Texas seeking to purchase a home are not able to meet the traditional lending requirements and, up to now, have had no other option than to rent. In order to meet this need and provide deserving families with a financing alternative for achieving the American dream of homeownership, the Corporation developed the Affordable Homeownership Program for Texas ("Program").

The Program, developed through a partnership between Ameriquest Mortgage Company ("Ameriquest") and the Corporation, provides borrowers with an affordable mortgage financing option that will allow them the opportunity to achieve homeownership. As a result of this partnership, Ameriquest has committed up to $100 million dollars for mortgage loans and the Corporation has committed $1 million dollars for down payment assistance to the Program.

The Program was established to serve those individuals and/or families in Texas that are at or below 80% of the AMFI by providing them access to an affordable mortgage loan product and down payment assistance equal to five percent (5%) of the mortgage loan amount.

In addition, the Program rewards borrowers with lower interest rates and lower mortgage payments, for making timely mortgage payments. Borrowers can reduce their mortgage interest rate by up to two percent (2%) during the first 48 months of their mortgage loan. Borrowers will receive 50 basis points (.5%) reduction in their mortgage interest rate for every 12 months of on-time payments.

The Corporation and Ameriquest believe home buyer education is an essential component to the success of home ownership. Under the Program, borrowers will be provided pre and post-closing Home Buyer Education Training by ACORN Housing. ACORN Housing is a national housing counseling organization, helping low and moderate income homebuyers and homeowners since 1986. Additionally, borrowers will have intervention assistance available to them during the life of the mortgage loan. We believe this training and assistance is crucial to the success of this Program.

2005 Implementation Plan

The initial release of the Program was limited to a Pilot Initiative in south Texas through a local affordable housing provider (CDC Brownsville). By releasing the Program under a pilot initiative, the Corporation and Ameriquest are able to amend the program guidelines to ensure it meets the needs of eligible individuals/families, as well as to ensure the Program can ultimately be released statewide.

With mortgage loans closed under the pilot initiative in south Texas, the Corporation and Ameriquest will work with local organizations throughout Texas in an effort to expand the availability of the program to Texans statewide. Initial efforts are already underway to market the Program to local community development corporations, non-profits and other entities involved in affordable housing. The Corporation made a presentation on the Program at the annual conference for the Texas Association of Local Housing Finance Agencies ("TALHFA") in October 2004. In addition, the Corporation and Ameriquest have met with several local organizations interested in participating in the Program. Marketing efforts will continue as the Program is released on a statewide basis during 2005.

MULTIFAMILY PRIVATE ACTIVITY BOND PROGRAM

The Texas Legislature in 2003 allocated 10 percent of the multifamily private activity bond cap to the Corporation so that local governments could be more involved in assessing and addressing their own local multifamily housing needs and at the same time could use the expertise of the state to issue the bonds. The available amount for funding in 2004 was approximately $39 million, and a similar amount will be available for 2005. Nonprofit and for profit developers can use the funds to finance acquisition and rehabilitation or new construction. Developers are required to leverage the private activity bond funds by using Low Income Housing Tax Credits (LIHTC) available through the TDHCA.

The Corporation's Private Activity Bond program statute requires the Corporation to target areas (e.g., cities, metropolitan statistical areas, counties, etc.) with the greatest need that have expressed local support for affordable multifamily housing. The statute also requires the Corporation to issue requests for proposals to developers to provide the specific housing development requested by the local target area, whether for senior, rehabilitation, mixed income, mixed use, or other housing needs. Tax-exempt private activity bond financing will be provided to the highest-scoring developer whose proposal meets the housing needs of the target area, subject to available allocation.

The Corporation issued requests for proposals in 2004 for Corpus Christi, McAllen, El Paso, and San Antonio. The Corporation received applications for developments in San Antonio. The development known as Providence at Marshall Meadows in San Antonio was induced by the Board and is scheduled for final approval for $15,000,000 in bond financing in December of 2004. Marshall Meadows will be a 250 unit multifamily apartment complex. Sixty percent of the units will be set aside for low income residents.

2005 Implementation Plan

For the 2005 program, the Corporation solicited participation from cities that were targeted for the 2004 program year but that did not receive funding through the program. The Corporation also sent letters to mayors of all cities with a population over 10,000 people and all county judges to solicit their participation in the 2005 private activity bond program. Discussing the various needs with each interested city and county has shown the diversity of needs for different areas of Texas. The larger metropolitan areas believe they are saturated with multifamily housing, but would like to rehabilitate or redevelop existing multifamily housing that has fallen into disrepair. Cities with a lower population, generally not in urban areas, have expressed interest in developing senior housing, multifamily housing, and other new construction to fill their affordable housing needs. Many cities, counties, and experienced developers agree that the 4 percent tax credits and tax-exempt bonds are not sufficient to cash flow developments in areas where the area median income is lower than the state average. Funding sources from outside these traditional financing methods must be obtained.

The Corporation will target areas in November and December of 2004 and will issue requests for proposals to developers for housing developments in those target areas in December of 2004 and possibly January of 2005. The time to turn in a proposal will be extended from the last program year to allow developers the chance to obtain other funding for the development to fill the gap in financing. We anticipate a return deadline for proposals of early March 2005.

Multifamily 501(c)(3) Bond Program

The Corporation's 501(c)(3) Multifamily Bond Program was created to finance the acquisition and rehabilitation, or new construction, of affordable multifamily housing units throughout the state of Texas. Unlike the Corporation's PAB program, 501(c)(3) financing does not use volume cap allocation and applications can be considered year-round. Also different from the PAB program is that 501(c)(3) financing may not be used in conjunction with low income housing tax credits. Only qualified nonprofit developers, designated under the internal revenue code as 501(c)(3) organizations, are eligible to apply for 501(c)(3) financing.

In addition to providing safe, decent, and affordable rental housing to residents of the state of Texas, recipients of 501(c)(3) financing must adopt a dollar-for-dollar public benefit program, investing at least one dollar in rent reduction, capital improvement projects, or social, educational, or economic development services for every dollar of abated property tax revenue they receive.

In 2001 and 2002 the Corporation provided $487 million in financing for the preservation or creation of 7,700 units of affordable housing in the state of Texas. Since 2002 the Corporation has not considered applications or issued bonds under the 501(c)(3) program as a result of market changes and legislatively mandated changes requiring that any benefit of abated property tax must be transferred dollar-for-dollar into a public benefit program. Because the market has softened for affordable housing in metropolitan areas, and because the program prevents the use of 4 percent tax credits, and also because the abated property taxes cannot be used to help pay off debt service, this program has become inactive.

2005 Implementation Plan

The Corporation will monitor market conditions and will reactivate the program if demand shows the need for this type of financing to create needed multifamily affordable housing.

Multifamily Direct Lending Program

The Corporation's Multifamily Direct Lending Program provides permanent financing for the purpose of increasing and preserving the stock of affordable multifamily housing units throughout the state of Texas. The major focus of this program is to provide financing for smaller developments in rural and underserved areas of the state where a bond financing is not practical. The Corporation's ability to offer permanent financing is facilitated through existing relationships with real estate investment companies that invest in affordable multifamily housing. The Community Development Trust in New York and the Federal Home Loan Bank of Dallas are the Corporation's principal partners for this program.

The Corporation provided permanent financing for developments in Wichita Falls, Big Spring, Brady, and Stephenville in 2003 and 2004.

2005 Implementation Plan

The Corporation is committed to training staff in 2005 to undertake the responsibilities of administering and marketing our capabilities under this program. The Corporation will pursue the program primarily through the Community Development Trust because it assumes 100 percent of the risk on the loan to the borrower so that our funds can be used for other Corporation programs. The Federal Home Loan Bank requires that we assume 25 percent of the risk on the loans.

ASSET OVERSIGHT AND COMPLIANCE

Asset Oversight of properties is required by many issuers of bonds, including the Corporation and TDHCA, to monitor the financial and physical health of a property to ensure that the bonds can be repaid and that the property provides the safe and decent housing that the borrowers promised to provide when they received the tax-exempt bond financing. Compliance monitoring ensures that the borrowers are providing the number of affordable units and the quality of resident services that they promised to provide and, in the case of affordable units, that the IRS requires to be provided to receive the tax-exempt bond financing.

The Corporation is currently providing asset oversight for 86 properties and compliance oversight for 38 properties. The Corporation staff performs yearly on-site compliance reviews and at least yearly on-site asset oversight reviews for these properties.

2005 Implementation Plan

The Corporation will continue to provide asset oversight and compliance monitoring for our current portfolio. In addition, the Corporation will implement its online compliance monitoring system in early 2005 to better track compliance for the Corporation and to make the compliance monitoring process easier for the property managers and owners. The Corporation will also work to contract with other entities to expand our asset oversight and compliance monitoring business. Compliance monitoring and asset oversight revenues are used to fund current single family and multifamily programs, and with more revenue more funding could go toward those housing programs.

GRANT PROGRAM

The Corporation provided the Single Family Professional Educator, Fire Fighter, and Police Officer program with $400,000 from its cash reserves for down payment assistance in 2002, and in 2004 provided over $200,000 in funding from its cash reserves for down payment assistance. For the 2004 Private Activity Bond Program the Corporation has committed to funding up to $500,000 as a soft second loan for the Providence at Marshall Meadows development in San Antonio. The Corporation does not receive state appropriations and cannot sustain this level of subsidy for its programs and continue to stay in business. Both of these experiences, as well as reviewing other critical unmet housing needs identified by TDHCA and the Corporation, have prompted us to pursue the creation of a Grant Program to fund the following programs: Single Family Down Payment Assistance, Multifamily Gap Financing Assistance, Homebuyer Education, and an Interim Construction Guarantee Program.

2005 Implementation Plan

We will pursue the creation of a Corporate Partners Program and Tax Deductible Gifts Program. The Corporate Partners Program would give our Partners certain advertising rights for certain programs. For instance, the Corporation could solicit corporate partners in the home improvement and home appliance businesses for down payment assistance for our Family Professional Educator, Fire Fighter, and Police Officer programs. We would ask for a grant for down payment assistance and coupons for participating borrowers, such as $50 off a refrigerator, or a $100 coupon to the home improvement store. The Corporate Partner would benefit from the program by receiving certain advertising rights for the single family programs. The Tax Deductible Gifts Program would allow individuals and foundations with a housing mission to make tax deductible gifts to the corporation for all of our housing programs.

APPENDIX A

LEGISLATIVE REQUIREMENTS FOR THE *STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT*

SEC. 2306.072. ANNUAL LOW INCOME HOUSING REPORT

(a) Not later than December 18 of each year, the director shall prepare and submit to the board an annual report of the department's housing activities for the preceding year.

(b) Not later than the 30th day after the date the board receives the report, the board shall submit the report to the governor, lieutenant governor, speaker of the house of representatives, and members of any legislative oversight committee.

(c) The report must include

- (1) a complete operating and financial statement of the department;
- (2) a comprehensive statement of the activities of the department during the preceding year to address the needs identified in the state low income housing plan prepared as required by Section 2306.0721, including:
  - (A) a statistical and narrative analysis of the department's performance in addressing the housing needs of individuals and families of low and very low income;
  - (B) the ethnic and racial composition of families and individuals applying for and receiving assistance from each housing-related program operated by the department; and
  - (C) the department's progress in meeting the goals established in the previous housing plan;
- (3) an explanation of the efforts made by the Department to ensure the participation of persons of low income and their community-based institutions in department programs that affect them;
- (4) a statement of the evidence that the Department has made an affirmative effort to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process;
- (5) a statistical analysis, delineated according to each ethnic and racial group served by the department, that indicates the progress made by the department in implementing the state low income housing plan in each of the uniform state service regions; and
- (6) an analysis, based on information provided by the fair housing sponsor reports required under Section 2306.0724 and other available data, of fair housing opportunities in each housing development that receives financial assistance from the department that includes the following information for each housing development that contains twenty or more living units:
  - (A) the street address and municipality or county where the property is located;
  - (B) the telephone number of the property management of leasing agent;
  - (C) the total number of units reported by bedroom size;
  - (D) the total number of units, reported by bedroom size, designed for individuals who are physically challenged or who have special needs and the number of these individuals served annually as reported by each housing sponsor;
  - (E) the rent for each type of rental unit, reported by bedroom size;
  - (F) the race or ethnic makeup of each project;
  - (G) the number of units occupied by individuals receiving government-supported housing assistance and the type of assistance received;

(H) the number of units occupied by individuals and families of extremely low income, very low income, low income, moderate income, and other levels of income;

(I) a statement as to whether the department has been notified of a violation of the fair housing law that has been filed with the United States Department of Housing and Urban Development, the Commission on Human Rights, or the United State Department of Justice; and

(J) a statement as to whether the development has any instances of material noncompliance with bond indentures or deed restrictions discovered though the normal monitoring activities and procedures that include meeting occupancy requirements or rent restrictions imposed by deed restrictions or financing agreements.

(7) a report on the geographic distribution of low income housing tax credits, the amount of unused low income housing tax credits, and the amount of low income housing tax credits received from the federal pool of unused funds from other states.

(8) A statistical analysis, based on information provided by the fair housing sponsor reports required by Section 2306.0724 and other available data, of average rents reported by county.

(d) Repealed by Acts 2003, 78th Leg., ch. 330, §31(1).

SEC. 2306.0721. LOW INCOME HOUSING PLAN

(a) Not later than December 18 of each year, the director shall prepare and submit to the board an integrated state low income housing plan for the next year.

(b) Not later than the 30th day after the date the board receives the plan, the board shall submit the plan to the governor, lieutenant governor, and the speaker of the house of representatives.

(c) The plan must include:

(1) an estimate and analysis of the housing needs of the following populations in each uniform state service region:

(A) individuals and families of moderate, low, very low income, and extremely low income;

(B) individuals with special needs; and

(C) homeless individuals;

(2) a proposal to use all available housing resources to address the housing needs of the populations described by Subdivision (1) by establishing funding levels for all housing-related programs;

(3) an estimate of the number of federally assisted housing units available for individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(4) a description of state programs that govern the use of all available housing resources;

(5) a resource allocation plan that targets all available housing resources to individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(6) a description of the department’s efforts to monitor and analyze the unused or underused federal resources of other state agencies for housing-related services and services for homeless individuals and the department’s recommendations to endorse the full use by the state of all available federal resources for those services in each uniform state service region;

(7) strategies to provide housing for individuals and families with special needs each uniform state service region;

(8) a description of the department's efforts in each uniform state service region to encourage the construction of housing units that incorporate energy efficient construction and appliances;
(9) an estimate and analysis of the housing supply in each uniform state service region;
(10) an inventory of all publicly and, where possible, privately funded housing resources, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies;
(11) strategies for meeting rural housing needs;
(12) a biennial action plan
  (A) addresses current policy goals for colonia programs, strategies to meet the policy goals, and the projected outcomes with respect to policy goals; and
  (B) includes information on the demand for contract-for-deed conversions, services from self-help centers, consumer education, and other colonia resident services in counties some part of which is within 150 miles of the international border of this state;
(13) a summary of public comments received at a hearing under this chapter or from another source that concern the demand for colonia resident services described by Subdivision (12); and
(14)any other housing-related information that the state is required to include in the one-year action plan of the consolidated plan submitted annually to the United States Department of Housing and Urban Development.

(d) The priorities and policies in another plan adopted by the department must be consistent to the extent practical with the priorities and policies established in the state low income housing plan.
(e) To the extent consistent with federal law, the preparation and publication of the state low income housing plan shall be consistent with the filing and publication deadlines required of the department for the consolidated plan; and
(f) The director may subdivide the uniform state service regions as necessary for the purposes of the state low income housing plan.
(g) The department shall include the plan developed by the Texas State Affordable Housing Corporation under Section 2306.566 in the department's resource allocation plan under Subsection (c)(5).
(h) The department shall consider and incorporate the specific results of the programs of the Texas State Affordable Housing Corporation in the department's estimate and analysis of the housing supply in each uniform state service region under Subsection (c)(9).

SEC. 2306.0722. PREPARATION OF PLAN AND REPORT

(a) Before preparing the annual low income housing report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the department shall meet with regional planning commissions created under Chapter 391, Local Government Code, representatives of groups with an interest in low income housing, nonprofit housing organizations, managers, owners, and developers of affordable housing, local government officials, and residents of low income housing. The department shall obtain the comments and suggestions of the representatives, officials, and residents about the prioritization and allocation of the department's resources in regard to housing.
(b) In preparing the annual report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the director shall:
  (1) coordinate local, state, and federal housing resources, including tax exempt housing bond financing and low income housing tax credits;
  (2) set priorities for the available housing resources to help the neediest individuals;
  (3) evaluate the success of publicly supported housing programs;

(4) survey and identify the unmet housing needs of persons the department is required to assist;
(5) ensure that housing programs benefit a person regardless of the persons' race, ethnicity, sex, or national origin;
(6) develop housing opportunities for individuals and families of low and very low income and individuals with special housing needs;
(7) develop housing programs through an open, fair, and public process;
(8) set priorities for assistance in a manner that is appropriate and consistent with the housing needs of the populations described by Section 2306.0721(c)(1);
(9) incorporate recommendations that are consistent with the consolidated plan submitted annually by the state to the United States Department of Housing and Urban Development;
(10) identify the organizations and individuals consulted by the department in preparing the annual report and state low income housing plan and summarize and incorporate comments and suggestions provided under Subsection (a) as the board determines to be appropriate;
(11) develop a plan to respond to changes in federal funding and programs for the provision of affordable housing;
(12) use the following standardized categories to describe the income of program applicants and beneficiaries:
   (A) to 30 percent of area median income adjusted for family size;
   (B) more than 30 to 60 percent of area median income adjusted for family size;
   (C) more than 60 to 80 percent of area median income adjusted for family size;
   (D) more than 80 to 115 percent of area median income adjusted for family size; or
   (E) more than 115 percent of area median income adjusted for family size; and

(13) use the most recent census data combined with existing data from local housing and community service providers in the state, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies.
(14) provide the needs assessment information compiled for the report and plan to the Texas State Affordable Housing Corporation.

SEC. 2306.0723. PUBLIC PARTICIPATION REQUIREMENTS

(a) The department shall hold public hearings on the annual state low income housing plan and report before the director submits the report and the plan to the board. The department shall provide notice of the public hearings as required by Section 2306.0661. The department shall accept comments on the report and plan at the public hearings and for at least 30 days after the date of the publication of the notice of the hearings.
(b) In addition to any other necessary topics relating to the report and the plan, each public hearing required by Subsection (a) must address:
   (1) infrastructure needs;
   (2) home ownership programs;
   (3) rental housing programs;
   (4) housing repair programs; and
   (5) the concerns of individuals with special needs, as defined by Section 2306.511.
(c) The board shall hold a public hearing on the state low income housing report and plan before the board submits the report and the plan to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature.

(d) The board shall include with the report and the plan the board submits to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature, and members of the advisory board formed by the department to advise on the consolidated plan a written summary of public comments on the report and the plan.

APPENDIX B

TDHCA PROGRAM DESCRIPTIONS

The following program descriptions provide information on the various TDHCA programs including funding source, type of assistance, recipients, targeted beneficiaries, program activities, set-asides, and special initiatives.

It is the policy of TDHCA to not require its nonprofit recipients of funds to verify, as a condition of receiving federal funds, the citizenship or immigration status of applicants for funds. This policy is subject to change if the US Department of Housing and Urban Development revises its policy. This policy does not apply to the Section 8 Housing Choice Voucher Program.

HOME INVESTMENT PARTNERSHIPS PROGRAM

The HOME Investment Partnerships (HOME) Program receives funding from the US Department of Housing and Urban Development (HUD) and provides loans and grants to units of local government, public housing authorities (PHAs), community housing development organizations (CHDOs), nonprofit organizations, and for-profit entities, with targeted beneficiaries being low, very low, and extremely low income households. The purpose of the HOME Program is to expand the supply of decent, safe, and affordable housing for extremely low, very low, and low income households, and to alleviate the problems of excessive rent burdens, homelessness, and deteriorating housing stock. HOME strives to meet both the short-term goal of increasing the supply and the availability of affordable housing and the long-term goal of building partnerships between state and local governments and private and nonprofit organizations in order to strengthen their capacity to meet the housing needs of lower income Texans.

The State of Texas receives an annual allocation of HOME funds from HUD. TDHCA provides technical assistance to all recipients of the HOME Program to ensure that all participants meet and follow state implementation guidelines and federal regulations. In 2003, the Texas Legislature passed Senate Bill 264 (amending Sec. 2306.111 of the Government Code), which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the HOME, Housing Trust Fund, and Housing Tax Credit programs to each Uniform State Service Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance. Please see the Regional Allocation Formula section of this document, beginning on page 67, for further explanation.

Note: It is anticipated that the CHDO, Contract for Deed Conversion, Rental Housing Preservation, and Rental Housing Development activities will be awarded through an open funding cycle.

Eligible Service Areas

Per Section 2306.111(c) the Department shall expend at least 95 percent of HOME funds for the benefit of non–participating jurisdictions (non-PJ) areas of the state. The remaining 5 percent of HOME funds may be expended in a participating jurisdiction (PJ), but only if it funds a multifamily activity that serves persons with disabilities.

Single Family

In prior years, due to concerns about the lack of organizational capacity to serve persons with disabilities in rural areas, TDHCA allowed 5 percent of its HOME allocation to go to applicants in PJs. Based on the increase in capacity of organizations in non-PJ areas as evidenced by an over-subscription rate in the 2004 application cycle for single family activities, the Department will no longer fund single family activity applications in PJ areas.

Multifamily

Due to continued limited capacity with regard to the development and/or preservation of integrated multifamily properties, the Department will accept applications from PJ areas, so long as they do not exceed 5 percent of the total HOME allocation, serve persons with disabilities, and are in compliance with the Department's Integrated Housing Rule.

Owner-Occupied Housing Assistance

Rehabilitation or reconstruction cost assistance in the form of grants or loans is provided to homeowners for the repair or reconstruction of their existing homes. The homes must be the principal residence of the homeowner. This activity will comprise approximately 80 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $20,718,000.

Tenant-Based Rental Assistance

Rental subsidy and security and utility deposit assistance is provided to tenants, in accordance with written tenant selection policies, for a period not to exceed two years. Tenant-based Rental Assistance (TBRA) allows the assisted tenant to live in and move to any dwelling unit with a right to continued assistance. The Department will give scoring preference to applications choosing to assist people with disabilities; this includes those affected by the *Olmstead* Supreme Court decision. TBRA will comprise approximately 20 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $5,179,500.

Homebuyer Assistance

Down payment and closing cost assistance is provided to homebuyers for the acquisition of affordable single family housing. This activity may also be used for construction costs associated with architectural barrier removal in a home purchased with HOME assistance to meet the accessibility needs of homebuyers with disabilities; acquisition and rehabilitation costs associated with contract for deed conversions to serve colonia residents; and construction costs associated with the rehabilitation of a home purchased with HOME assistance. Homebuyer Assistance may be awarded through the CHDO Set-Aside, Contract for Deed Set-Aside, and American Dream Downpayment Initiative.

Rental Housing Development

Awards for eligible applicants are to be used for the development of affordable multifamily rental housing. Owners are required to make the units available to extremely low, very low, and low income families, and must meet long-term rent restrictions. Approximately $3,000,000 in FY 2005 appropriations will be allocated toward this activity. These funds will not be subject to the Regional Allocation Formula.

Rental Housing Preservation

Awards for eligible applicants are to be used for the acquisition and/or rehabilitation for the preservation of existing affordable or subsidized rental housing. Owners are required to make the units available to extremely low, very low, and low income families and must meet long-term rent restrictions. Approximately $2,000,000 in FY 2005 appropriations will be allocated toward this activity. These funds will not be subject to the Regional Allocation Formula.

Set-Asides & Initiatives

CHDO Set-Aside

A minimum of 15 percent, approximately $7,050,000 (plus $352,500 in operating expenses) of the annual HOME allocation is reserved for community housing development organizations (CHDOs). CHDO Set-Aside projects are owned, developed, or sponsored by the CHDO, and result in the development of rental units or homeownership. Development includes projects that have a construction component, either in the form of new construction or the rehabilitation of existing units. TDHCA may set aside up to 10 percent of the annual 15 percent CHDO Set-Aside for predevelopment loans in accordance with 24 CFR 92.300(c). Predevelopment loan funds may only be used for activities such as project-specific technical assistance, site control loans, and project-specific seed money. In accordance with 24 CFR 92.208, up to 5 percent of the Department's HOME allocation may be used for the operating expenses of CHDOs. The Department may award CHDO Operating Expenses in conjunction with the award of CHDO Development Funds, or through a separate application cycle not tied to a specific activity.

Set-Aside for Contract for Deed Conversions

The intent of this program is to help colonia residents become property owners by converting their contracts for deed into traditional mortgages. To assist the Department in meeting this mandate, $2,000,000 in HOME Program funds will be targeted to assist households described under this initiative. These funds will not be subject to the Regional Allocation Formula.

Set-Aside for Colonia Model Subdivision Loan Program

Per Subchapter GG of Chapter 2306, Texas Government Code, the intent of this program is to provide low-interest-rate or possible interest-free loans to promote the development of new, high-quality residential subdivisions that provide alternatives to substandard colonias, and housing options affordable to individuals and families of extremely low and very low income who would otherwise move into substandard colonias. The Department will only make loans to CHDOs certified by the Department and for the types of activities and costs described under the previous section regarding CHDO Set-Aside. One million dollars will be targeted to assist households described under this initiative. These funds will not be subject to the Regional Allocation Formula.

American Dream Downpayment Initiative

ADDI was signed into law on December 16, 2003, and was created to help homebuyers with down payment and closing cost assistance. ADDI aims to increase the homeownership rate, especially among lower income and minority households, and revitalize and stabilize communities.

Under ADDI, a first time homebuyer is an individual and his or her spouse who have not owned a home during the three year period prior to the purchase of a home with assistance under ADDI. The term also includes displaced homemakers and single parents. The amount of assistance available is $10,000 or 6 percent of the purchase price, whichever is greater. This assistance is in the form of a second- or third-lien loan.

For PY 2005, approximately $2,000,000 is reserved for down payment assistance and may, at the discretion of the Department, include funds for rehabilitation for first time homebuyers in conjunction with home purchases assisted with ADDI funds. The rehabilitation may not exceed 20 percent of the annual ADDI allocation. These funds will not be subject to the Regional Allocation Formula.

Persons with Disabilities

Subject to the availability of qualified applications, a minimum of 5 percent, approximately $2,350,000, of the annual HOME allocation will be allocated for applicants serving persons with disabilities. Eligible applicants include nonprofits, units of general local government, and public housing authorities with a documented history of working with special needs populations.

Additionally, TDHCA will ensure that all housing developments are built and managed in accordance with its Integrated Housing Rule. Multifamily developments will be limited to reserving no more than 18 percent of the units in developments with 50 or more units, and no more than 36 percent of the units in developments with less than 50 units, for persons with disabilities.

The Department will allocate $500,000 to the Home of Your Own (HOYO) Program for activities related to homeownership for persons with disabilities. The HOYO Program coordinates existing homeownership services, which streamlines the process homebuyers must follow, including homebuyer counseling, down payment assistance, and architectural barrier removal.

Special Needs Populations

Subject to the availability of qualified applications, TDHCA has a goal of allocating 20 percent of the annual HOME allocation to applicants serving persons with special needs. All HOME program activities will be included in attaining this goal. Additional scoring criteria may be established under each of the eligible activities to target such activities and assist the Department in reaching its goal.

Projected HOME Program funding for FY 2005: $47,000,000.

For more information regarding single family activities, contact Paige McGilloway, Single Family Finance Production Division, at (512) 475-4604. For multifamily activity information, contact David Danenfelzer, Multifamily Finance Production Division, at (512) 475-3865.

HOUSING TRUST FUND

The Housing Trust Fund (HTF) receives funding from the State of Texas, multifamily bond issuance fees, and loan repayments, and is the only State-authorized program for affordable housing, as created by the 72nd Legislature in Senate Bill 546. HTF offers loans and grants to nonprofits; units of local government; PHAs; CHDOs; for-profit entities; and, as an eligible activity, income-eligible individuals and families. The targeted beneficiaries of the program are low, very low, and extremely low income households. HTF funds may be used for the acquisition, rehabilitation, and new development of affordable housing, and may provide pre-development loans and capacity building grants to nonprofits and CHDOs engaged in the development of affordable housing. HTF strives for a broad geographic distribution of projects.

Rental Housing Development

Rental Housing Development funds are primarily used to fund the acquisition, construction, and rehabilitation of affordable housing. Housing Trust Funds are typically used as gap financing in developments and combined with other Department programs, like the HOME Program and Housing Tax Credit Program.

Housing units assisted with HTF funds must remain affordable for a period of at least 30 years.[127] Funds are not available to projects that will permanently and involuntarily displace persons of low income. Housing developments are funded based on threshold and scoring criteria established by the Department's statutory and programmatic rules, and as may be further elaborated in the Notice of Funding Availability (NOFA). Funds may be awarded through a competitive or open NOFA cycle.

Ten percent of the total number of project units assisted with HTF funds must be set aside for special needs populations. Five percent must be fully wheelchair accessible and 2 percent must be for sight- or hearing-impaired individuals. HTF provides scoring incentives for developments that choose to set aside additional units for special needs populations.

Capacity Building and Technical Assistance

Up to 10 percent of Housing Trust Fund money may be set aside for capacity building activities. In 2004, the Housing Trust Fund provided approximately $400,000 in grant funding to 14 nonprofits to hire staff or contract with technical assistance providers in an effort to increase the organizational capacity and the production of affordable housing.

Predevelopment Loan Fund Demonstration Program

The Housing Trust Fund has also reserved funding for predevelopment activities in past years, which will continue to be available to applicants in fiscal year 2005. The purpose of the Predevelopment Loan Fund Program is to provide opportunities for nonprofits and CHDOs to develop affordable housing by helping eliminate the barriers predevelopment expenses may pose. In FY 2003, administration of this program was awarded to Texas Community Capital. Approximately $ 500,000 in funding will be available to eligible entities for predevelopment activities.

Special Initiatives and Partnerships

Special Needs Populations

Ten percent of the total number of project units assisted with HTF funds must be set aside for special needs populations. Five percent must be fully wheelchair accessible and 2 percent must be for sight- or hearing-impaired individuals. HTF provides scoring incentives for developments that choose to set aside additional units for special needs populations.

[127] See §2306.185

Texas Bootstrap Loan Program

The Texas Bootstrap Loan Program, as administered by the TDHCA Office of Colonia Initiatives, receives substantial funding from the Housing Trust Fund.

Projected Housing Trust Fund Funding for FY 2005: Approximately $2,800,000.

For more information, contact David Danenfelzer, Multifamily Finance Production Division, at (512) 475-3865.

HOUSING TAX CREDIT PROGRAM

The Housing Tax Credit (HTC) Program receives authority from the US Treasury Department to provide tax credits to nonprofits, for-profit developers, and syndicators or investors. The targeted beneficiaries of the program are very low and extremely low income families at or below 60 percent AMFI. The program's purpose is to encourage the development and preservation of rental housing for low income families, provide for the participation of for-profit and nonprofit organizations in the program, maximize the number of units added to the state's housing supply, and prevent losses in the state's supply of affordable housing.

The HTC Program was created by the Tax Reform Act of 1986 and is governed by the Internal Revenue Code of 1986 (the Code), as amended, 26 USC Section 42. It authorizes tax credits in the amount of $1.80 per capita of the state population. Tax credits are also awarded to developments with tax-exempt bond financing and are made independent of the $1.80 state volume cap. TDHCA is the only entity in the state with the authority to allocate tax credits under this program. The state's distribution of the credits is administered by the Department's *Qualified Allocation Plan and Rules* (QAP) as required by the Code. In 2003, the Texas Legislature passed Senate Bill 264, which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the Housing Tax Credit Program to each Uniform State Planning Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance.

To qualify for tax credits, the proposed development must involve new construction or undergo substantial rehabilitation of residential units, which is defined as at least $6,000 per rental unit of construction hard costs. The credit amount for which a development may be eligible depends on the total amount of depreciable capital improvements, the percentage of units set aside for qualified tenants, and the funding sources available to finance the total development cost. Pursuant to the Code, a low income housing development qualifies for residential rental occupancy if it meets one of the following two criteria: (1) 20 percent or more of the residential units in the project are both rent-restricted and occupied by individuals whose income is 50 percent or less of AMFI; or (2) 40 percent or more of the residential units in the project are both rent-restricted and occupied by individuals whose income is 60 percent or less of AMFI. Typically, 60 to 100 percent of a development's units will be set aside for qualified tenants in order to maximize the amount of tax credits the development may claim.

Credits from the state volume cap are awarded through a competitive application process. Each application must satisfy a set of threshold criteria and is scored based on selection criteria. The board considers the recommendations of the Department and determines a final award list. Credits to developments with tax-exempt bond financing are awarded through a similar application review process, but because these credits are not awarded from a limited credit pool, the process is noncompetitive and the selection criteria are not part of the application.

The selection criteria encourages the provision of units for persons with special needs by awarding points for projects that include units designed for large families; that set aside units for families with income at or below 50 percent, 40 percent, and/or 30 percent of the area median income; that serve low income tenants for the longest period of time; that provide design amenities and include supportive services for tenants; that set aside units designed and built to Section 504 standards and equipped for persons with physical or mental disabilities; and that provide transitional housing units for the homeless.

The Department requires recipients of tax credits to document the participation of historically underutilized businesses (HUBs) in the development, construction, and management of tax credit projects, and has established a minimum goal of 30 percent participation of HUBs. The selection criteria for 2004 awards extra points to projects owned by HUBs and also areas located in colonias. Efforts are made in the planning process and allocation of funds to ensure the involvement of housing advocates, community-based institutions, developers, and local municipalities. The Department also encourages the participation of community development corporations and other neighborhood-based groups.

Projected Housing Tax Credit Program Funding for FY 2005: $40,000,000.

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

MULTIFAMILY BOND PROGRAM

The Multifamily Bond Program issues taxable and tax-exempt mortgage revenue bonds (MRBs) to fund loans to nonprofit and for-profit developers. The proceeds of the bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties with the targeted beneficiaries being very low, low, and moderate income households. Owners elect to set aside units in each project according to TAC 34 Part 9 Chapter 190.2(d). Persons with special needs must occupy 5 percent of the units. Property owners are also required to offer a variety of services to benefit the residents of the development. Specific tenant programs must be designed to meet the needs of the current tenant profile and must be approved annually by TDHCA.

TDHCA issues tax-exempt, multifamily MRBs through two different authorities defined by the Internal Revenue Code. Under one authority, tax-exempt bonds used to create housing projects are subject to the State's private activity volume cap. The State will allocate 22 percent of the annual private activity volume cap for multifamily projects. Approximately $389 million in issuance authority will be made available to various issuers to finance multifamily projects, of which 20 percent, or approximately $77.8 million, will be made available exclusively to TDHCA. Issuance authority per individual projects is allocated through a lottery administered by the Texas Bond Review Board. TDHCA, local housing authorities, and other eligible bond issuers enter the lottery with applications for specific projects on behalf of project owners. Applications submitted to TDHCA for the private activity bond 2005 program year will be scored and ranked. Lottery numbers will then be assigned from the lowest to highest ranked application. Projects that receive 50 percent or more of their funding from the proceeds of tax-exempt bonds under the private activity volume cap are also eligible to apply for housing tax credits.

Under the second authority, TDHCA may issue tax-exempt MRBs to finance properties that are owned entirely by nonprofit organizations. Bonds issued under this authority are exempt from the private activity volume cap. This is a noncompetitive application process and applications may be received at any time throughout the year. In addition to the set-asides above, 75 percent of project units financed under the 501(c)(3) authority must be occupied by households earning 80 percent or less of the area median income.

Projected Multifamily Bond Program Funding for FY 2005: $175,000,000.

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

First Time Homebuyer Program

The First Time Homebuyer Program receives funding from tax-exempt and taxable mortgage revenue bonds. The program offers 30-year fixed-rate mortgage financing at below-market rates for very low, low, and moderate income residents purchasing their first home or residents who have not owned a home within the preceding three years. Qualified applicants access First Time Homebuyer Program funds by contacting any participating lender, which is then responsible for the loan application process and subsequent loan approval. After closing, the lender transfers the mortgage loan to a Master Servicer designated by TDHCA.

The First Time Homebuyer Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI (area median family income) limitations, based on IRS adjusted income limits, and the purchase price of the home must not exceed stipulated maximum purchase price limits. Program funds are allocated on a regional basis based on population percentage per Uniform State Service Region. A minimum of 30 percent of program funds will be set aside to assist Texans earning 60 percent or less of program income limits.

TDHCA currently offers Assisted Mortgage Loans and Non-Assisted Mortgage Loans. The Assisted Mortgage Loans have a slightly higher interest rate than the Non-Assisted Loans and may include down payment and closing cost assistance in the form of a grant or second lien loan. The type of assistance and amount varies by bond issuance. Assisted Mortgage Loans are available exclusively to low income homebuyers earning 60 percent or less or 80 percent or less of program income limits, depending on the program. Non-Assisted Mortgage Loans have a slightly lower interest rate than the Assisted Loans and do not offer down payment or closing cost assistance.

In an effort to assist borrowers with impaired credit histories, the First Time Homebuyer Program may be used in conjunction with Fannie Mae's My Community Mortgage. My Community Mortgage offers flexible terms, including flexibility on credit histories and the acceptance of nontraditional credit histories. These loans may be used with all TDHCA mortgage revenue bond programs, thus giving households with slight credit blemishes the opportunity to qualify for a homebuyer loan with interest rates lower than that of alternative financing arrangements

Income limits for the program are set by the IRS Tax Code (1986) based on income figures determined by the US Department of Housing and Urban Development. The first time homebuyer restriction is established by federal Internal Revenue Service regulations, which also require that program recipients may be subject to a recapture tax on any capital gain realized from a sale of the home during the first nine years of ownership. Certain exceptions to the first time homebuyer restriction, income ceiling, and maximum purchase price limitation apply in targeted areas. Such targeted areas are qualified census tracts in which 70 percent or more of the families have an income of 80 percent or less of the statewide median income and/or are areas of chronic economic distress as designated by the state and approved by the Secretaries of Treasury and Housing and Urban Development, respectively.

Projected Single Family Bond Program funding for FY 2005: $ 325,000,000.

For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

GRANT ASSISTANCE PROGRAM

The Texas Department of Housing and Community Affairs offers grant funds for down payment and closing cost assistance on a first-come, first-served basis for mortgage loans originated through the First Time Homebuyer Program. The Grant Assistance Program (GAP) currently provides up to 4 percent of the amount of the mortgage loan, but the amount of assistance may vary by program. Assistance is available to eligible borrowers whose incomes do not exceed 60 percent AMFI or 80 percent AMFI, depending on the program.

Projected Grant Assistance Program funding for FY 2005: Varies by bond issuance.

For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

MORTGAGE CREDIT CERTIFICATE PROGRAM

A mortgage credit certificate (MCC) provides a tax credit that will reduce the federal income taxes, dollar-for-dollar, of qualified buyers purchasing a qualified residence. As a result, the MCC effectively reduces the monthly mortgage payment and increases the buyer's disposable income by reducing his or her federal income tax obligation. This tax savings provides a family with more available income to qualify for a loan and meet mortgage payment requirements.

The amount of the annual tax credit will equal 40 percent of the annual interest paid on a mortgage loan; however, the maximum amount of the credit cannot exceed $2,000 per year. The credit cannot be greater than the annual federal income tax liability, after all other credits and deductions have been taken into account. MCC tax credits in excess of a borrower's current year tax liability may, however, be carried forward for use during the subsequent three years.

The MCC Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI limitations, based on IRS adjusted income limits. In order to participate in the MCC Program, homebuyers must meet certain eligibility requirements and obtain a mortgage loan through a participating lender. The mortgage loan must be financed from sources other than tax-exempt revenue bonds. The mortgage may be a conventional, FHA, VA, or RHS loan at prevailing market rates, but may not be used in connection with the refinancing of an existing loan.

Projected Mortgage Credit Certificate Program funding for FY 2005: Unknown at this time.

For more information, contact Sue Cavazos, Single Family Finance Production Division, at (512) 475-3962.

TEXAS STATEWIDE HOMEBUYER EDUCATION PROGRAM

The Texas Statewide Homebuyer Education Program (TSHEP) offers provider certification training to nonprofit organizations including Texas Agriculture Extension Agents, units of local government, faith-based organizations, CHDOs, community development corporations (CDCs), community-based organizations (CBOs), and other organizations with a proven interest in community building. In addition, a referral service for individuals interested in taking a homebuyer education class is available through a toll-free hotline at TDHCA. The targeted beneficiaries of the program include extremely low, very low, low, and moderate income individuals; minority populations; and persons with disabilities.

To ensure uniform quality of the homebuyer education provided throughout the state, TDHCA contracts with training professionals to teach local nonprofit organizations the principles and applications of comprehensive pre- and post-purchase homebuyer education. The training professionals and TDHCA also certify the participants as homebuyer education providers.

Projected Texas Statewide Homebuyer Education Program funding for FY 2005: $70,000.

For more information, contact Alyssa Carpenter, Division of Policy and Public Affairs, at (512) 475-3975. To obtain a list of TSHEP-certified providers or for more information regarding TSHEP, call 1-877-895-1093.

OFFICE OF COLONIA INITIATIVES

In 1995, in an effort to place more emphasis on addressing the needs of colonias, the Office of Colonia Initiatives (OCI) was created and charged with the responsibility of coordinating all Department and legislative initiatives involving border issues and managing a portion of the Department's existing programs targeted at colonias. The fundamental goal of the OCI is to improve the living conditions and lives of border residents, and to educate the public regarding the services that the Department has to offer.

A "colonia," Spanish for "neighborhood" or "community," is a geographic area located within 150 miles of the Texas-Mexico border that has a majority population comprised of individuals and families of low and very low income who lack safe, sanitary, and sound housing.

Border Field Offices

OCI oversees three Border Field Offices (BFOs) located in Edinburg, El Paso, and Laredo that serve a 75-county area with a primary purpose to provide technical assistance to colonia residents and communities along the Texas-Mexico border region. Each BFO is responsible for marketing Department programs and services to colonia and border residents and networking with local governments, state and federal agencies, nonprofits, and private organizations. This collaboration of efforts serves as a mechanism for community improvements that is responsive to the needs of colonia residents.

Colonia Self-Help Centers

Legislative action in 1995 directed the establishment of Colonia Self-Help Centers (SHCs) in Cameron/Willacy, El Paso, Hidalgo, Starr, and Webb counties, and any other county if designated as an economically distressed area. Additional Colonia SHCs have been established in Maverick and Val Verde counties. Operation of Colonia SHCs is carried out through a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the ability to perform the functions of a Colonia SHC. Colonia SHCs provide concentrated onsite technical assistance to low and very low income individuals and families regarding housing and community development activities, infrastructure improvements, and outreach and education. The program serves 28 designated colonias in the six counties and benefits approximately 10,000 colonia residents. Beneficiaries of services must be at or below 80 percent of the area median family income.

Colonia Resident Advisory Committee

The Colonia Resident Advisory Committee (C-RAC) advises the Department on the needs of colonia residents and potential activities and programs. The Department's Board of Directors is required by the Texas Government Code to appoint two colonia resident representatives from each county to the C-RAC. C-RAC members meet 30 days prior to making an award to a Colonia Self-Help Center. The C-RAC has been instrumental in voicing the concerns of the targeted populations and assisting in the development of useful tools and programs to address the needs of colonia residents.

Contract for Deed Conversion Initiative

The intent of this program is to facilitate colonia-resident property ownership by converting contracts for deed into traditional mortgages. The Department is required through legislative directive to spend no less than $4 million on contract for deed conversions for colonia families earning less than 60 percent of AMFI. The Department must convert at least 400 of these contracts for deed into traditional notes and deeds of trust by August 31, 2005. Participants of this program must live in a colonia and the property must be their principal residence. Pre- and post-conversion counseling is available, as well as funding for housing construction and rehabilitation.

Contract for Deed Consumer Education Program

OCI continues the consumer education program and has expanded its educational goals, although OCI is no longer required by legislation to provide education for contract for deed participants. With the statewide expansion of this program, OCI recognized the need for additional education topics, including homebuyer education and instruction in other aspects of homeownership. Education services are available through the Colonia Self-Help Centers and OCI Border Field Offices.

Texas Bootstrap Loan Program

The Texas Bootstrap Loan Program is required under Subchapter FF, Chapter 2306, Texas Government Code, to make available $3 million for mortgage loans to very low income families (those earning 60 percent or less of the area median family income), not to exceed $30,000 per unit. This program is a self-help construction program, which is designed to provide very low income families an opportunity to help themselves through the form of sweat equity. All participants under this program are required to provide at least 60 percent of labor that is necessary to construct or rehabilitate the home, and all applicable building codes must be adhered to under this program. In addition, nonprofit organizations can combine these funds with other sources, such as those from private lending institutions, local governments, or any other sources; however, all combined loans can not exceed $60,000 per unit.

The Department is required to set aside at least two-thirds, or $2,000,000, of the available funds for owner-builders whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code. The majority of these counties are located along the Texas-Mexico border region. The remainder of the funding, one-third, or $1,000,000, will be available to Department-certified nonprofit owner-builder programs statewide.

Colonia Model Subdivision Loan Program

The intent of this program, created in 2001 by the 77th Legislature, is to provide low-interest or interest-free loans to Colonia Self-Help Centers or certified CHDOs through a competitive scoring process. These loans are intended for the development of new, high-quality residential subdivisions that provide alternatives to substandard colonias. The Department has allocated $1 million from the HOME Program to implement this initiative in FY 2005.

Builder Incentive Partnership Program

The purpose of this program is to assist working families purchase a new home. This initiative was created to entice builders to build homes at or below $70,000 with the guarantee that the home will be purchased if it is not sold to a conventional buyer within 30 days of completion. The Department, Fannie Mae, and other local for-profit and nonprofit entities have partnered to implement this one-time pilot initiative.

Border Affairs

The Office of the Texas Secretary of State is taking the lead on the State Agency Advisory Roundtable on the Texas Border and Mexican Affairs (Advisory Roundtable), which meets on a quarterly basis with the purpose of identifying common interagency border concerns. This forum is expected to facilitate in the creation of a common agenda that will best advance the quality of life and standard of living in our border communities.

Consumer Information Resources

OCI manages a toll-free hotline, 1-800-462-4251, in both English and Spanish that allows colonia residents to voice concerns and/or request information.

Projected Office of Colonia Initiatives funding for FY 2005: OCI will receive 2.5 percent (approximately $2.1 million) from the State Community Development Block Grant Program (CDBG) annual allocation to fund the operations of the Colonia Self-Help Centers; approximately $3 million from the Housing Trust Fund for the implementation of the FY 2005 Texas Bootstrap Loan Program; $2 million from the HOME Investment Partnerships Program for the implementation of the Contract For Deed Conversion Program;

and $1 million from the HOME Program for the implementation of the Colonia Model Subdivision Loan Program.

For additional information, contact Homero V. Cabello or Susana J. Garza, Office of Colonia Initiatives, at 1-800-462-4251.

COMPREHENSIVE ENERGY ASSISTANCE PROGRAM

The Comprehensive Energy Assistance Program (CEAP) receives funding from the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) and offers grants to community action agencies, nonprofits, and local units of government. The targeted beneficiaries of the program in Texas are households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly, disabled, families with young children; households with the highest energy costs or needs in relation to income (highest home energy burden); and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

CEAP combines case management, education, and financial assistance to help very low and extremely low income consumers reduce utility bills to an affordable level. By statute, 10 percent of total funding is allocated for administration and 5 percent is allocated to case-management activities. The remaining 85 percent of the funding is used for direct client services, which includes 5 percent for outreach.

There are four basic components to meet consumers' needs:

- The co-payment component assists households achieve energy self-sufficiency by helping households set goals for reducing utility bills, giving advice on improving household budgets, and assisting with utility bills for six to twelve months.
- The heating and cooling systems component repairs or replaces heating and cooling appliances to increase energy efficiency.
- The energy crisis component provides assistance during an energy crisis caused by extreme weather conditions or an energy supply shortage.
- The elderly and persons with disabilities component protects vulnerable households from fluctuations in energy costs by paying up to four of the highest bills during the year.

CEAP providers are expected to create partnerships with programs within and outside their agencies and with private entities. The program also requires that providers refer CEAP clients to the Department's Weatherization Assistance Program. Because CEAP is designed to help clients achieve energy self-sufficiency, it encourages the consumer to control future energy costs without having to rely on other government programs for energy assistance.

Projected Comprehensive Energy Assistance Program funding for FY 2005: $31,505,813.

For more information, contact Peggy Colvin, Energy Assistance Section, at (512) 475-3864. To apply for CEAP, call 1-877-399-8939, toll free, using a land phone.

WEATHERIZATION ASSISTANCE PROGRAM

The Weatherization Assistance Program (WAP) is funded through the US Department of Energy Weatherization Assistance Program for Low Income Persons grant and the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) grant. WAP offers grants to community action agencies, nonprofits, and local units of government with targeted beneficiaries being households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly, disabled, families with young children; households with the highest energy costs or needs in relation to income (highest home energy burden), and households with high energy consumption. Local providers must implement special outreach efforts to reach these priority populations. Applicants who have special needs receive additional points in the application process. To help consumers control energy costs, WAP funds the installation of weatherization measures and provides energy conservation education. In addition to meeting the income-eligibility criteria, the weatherization measures to be installed must meet specific energy-savings goals.

The Department of Energy allows up to 15 percent of the funds for administration. The Department of Health and Human Services LIHEAP grant allows 10 percent for administration. The remaining funds are used for direct client services.

Partnerships between the Weatherization Assistance Program and the Southwestern Electric Power Company, the Southwestern Public Service Company, Entergy, and El Paso Electric provide energy conservation measures to very low and extremely low income utility customers. These partnerships increase the total number of low income households receiving weatherization services and provide consumers the opportunity to receive more comprehensive energy-efficiency measures.

Projected Weatherization Assistance Program funding for FY 2005: $11,876,693.

For more information, contact Peggy Colvin, Energy Assistance Section, at (512) 475-3864. To apply for weatherization, call 1-888-606-8889, toll free, using a land phone.

EMERGENCY SHELTER GRANTS PROGRAM

The Emergency Shelter Grants Program (ESGP) receives funding from the US Department of Housing and Urban Development and awards grants to units of local government and private nonprofit entities that provide shelter and related services to homeless persons and/or intervention services to persons threatened with homelessness. Activities eligible for ESGP funding include the rehabilitation or conversion of buildings for use as emergency shelters for the homeless; the provision of essential services to the homeless; costs related to the development and implementation of homeless prevention activities; costs related to operation administration; and costs related to maintenance, operation, rent, repairs, security, fuel, equipment, insurance, utilities, food and furnishings.

TDHCA also participates in the Texas Interagency Council for the Homeless (TICH). TICH is charged with surveying and evaluating services for the homeless in Texas; assisting in the coordination and provision of services for homeless persons throughout the state; increasing the flow of information among separate service providers and appropriate authorities; developing guidelines to monitor services for the homeless; providing technical assistance to the housing finance divisions of TDHCA in order to assess housing needs for persons with special needs; establishing a central resource and information center for the state's homeless; and developing, in cooperation with the Department and the Health and Human Services Commission, a strategic plan to address the needs of the homeless.

The Department provided funds to the Texas Homeless Network (THN) to provide in-depth technical assistance on refining a collaborative network of local service providers, assessing the needs of the homeless population, and developing priorities for addressing those needs.

Projected Emergency Shelter Grants Program funding for FY 2005: $4,977,909.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905.

COMMUNITY SERVICES BLOCK GRANT PROGRAM

The Community Services Block Grant Program (CSBG) receives funding from the US Department of Health and Human Services (USHHS), and funds are utilized to fund CSBG-eligible entities and to fund activities that support the intent of the CSBG Act. The targeted beneficiaries of the program are low income families and individuals, homeless families and individuals, migrant and seasonal farmworkers, and elderly low income individuals and families whose income does not exceed 125 percent of the current federal income poverty guidelines issued by USHHS.

CSBG provides administrative support to 48 CSBG-eligible entities that provide services to very low income persons. The funding assists with in providing essential services, including access to child care, health and human services, nutrition, transportation, job training and employment services, education services, activities designed to make better use of available income, housing services, emergency assistance, activities to achieve greater participation in the affairs of the community, youth development programs, information and referral services, activities to promote self-sufficiency; and other related services.

Five percent of the State's CSBG allocation may be used to fund activities that support the intent of the Community Services Block Grant Act, which may include providing training or technical assistance to eligible entities or short-term financial support for innovative projects that address the causes of poverty, promote client self-sufficiency, or promote community revitalization. These funds may also be used to support nonprofit organizations that assist low income Native Americans and migrant or seasonal farm workers. In addition, local contractors may use CSBG funds to assist homeless persons and other special needs populations.

Community Services Block Grant Program funding for FY 2005: $30,763,975.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905.

COMMUNITY FOOD AND NUTRITION PROGRAM

The Community Food and Nutrition Program (CFNP) receives funding from the US Department of Health and Human Services, and the grant supports efforts to address hunger issues in low income neighborhoods on a statewide basis.

CFNP coordinates statewide efforts to address hunger and related issues by distributing surplus commodities and game donated by hunters. CFNP funds are also used to support the expansion of child-feeding programs and the creation of farmers markets designed to serve low income neighborhoods.

In FY 2003, a total of 1.9 million pounds of food were donated through Share Our Surplus Service (SOS) and Hunters for the Hungry Program (HFHP). SOS is a food recovery program where donations of surplus and unsellable food donations are distributed to needy Texans. HFHP is a collaborative effort among hunters, meat processors, and nonprofit organizations to distribute meat to local food banks, food pantries, and other organizations feeding the needy.

Community Food and Nutrition Program funding for FY 2005: $380,170.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905.

SECTION 8 PROGRAM

The Section 8 Program receives funding from HUD and offers rental assistance subsidies to families and individuals, including the elderly and persons with disabilities, earning 50 percent or less of area median income. No less than 75 percent of new admissions to the tenant-based voucher assistance program must have incomes at or below 30 percent of the area median income. Qualified households are afforded the opportunity to select the best available housing through direct negotiations with landlords to ensure accommodations that meet their needs. The statewide program is designed specifically for needy families in small cities and rural communities not served by similar local or regional programs.

TDHCA contracts with community action agencies, public housing authorities, and local governments to administer the program in their jurisdictions. This partnership has increased program efficiency.

Projected Section 8 Program funding for FY 2005: $10,049,239.

For more information, contact the Section 8 Program at (512) 475-2634.

APPENDIX C

GLOSSARY OF SELECTED TERMS

Accessible: A definition used by HUD in Section 504 with respect to the design, construction, or alteration of an individual dwelling unit. It means that the unit is located on an accessible route and when designed, constructed, altered, or adapted, it can be approached, entered, and used by individuals with physical disabilities. A unit that is on an accessible route and is adaptable and otherwise in compliance with the standards set forth in the Uniform Federal Accessibility Standards (UFAS, 23 CFR Subpart 40 for residential structures) is considered accessible. When a unit in an existing facility that is being made accessible as a result of alterations intended for use by a specific qualified person with a disability, the unit will be deemed accessible if it meets the requirements of applicable standards that address the particular disability or impairment of such person.

Accessible Route: Unobstructed path that connects accessible elements and spaces in a building or facility and complies with the space and reach requirements prescribed by the Uniform Federal Accessibility Standards (UFAS). An accessible route that serves only accessible units occupied by persons with hearing or vision impairments need not comply with those requirements intended to affect accessibility for persons with mobility requirements.

Acquisition: Acquisition of standard housing (at a minimum, meeting HUD Section 8 Housing Quality Standards) only with no expectation of other activities being carried out in conjunction with the acquisition.

Adaptability: A definition used by HUD in Section 504 meaning the ability of certain elements of a dwelling unit (such as kitchen counters, sinks, and grab bars) to be added to, raised, lowered, or otherwise altered, to accommodate the needs of persons with or without disability or to accommodate the needs of persons with different degrees of disability.

Administrative Costs Reasonable and necessary costs, as described in OMB Circular A-87, incurred by the participating jurisdiction in carrying out its eligible program activities in accordance with prescribed regulations. Administrative costs include any project delivery costs, such as new construction and rehabilitation counseling, preparing work specifications, loan processing, inspections, and other entities applying for or receiving HOME funds. Administrative costs do not include eligible project-related costs that are incurred by and charged to project owners.

Affordable Housing: Housing where the occupant is paying no more than 30 percent of his/her gross monthly income for gross housing costs, including utility costs. Housing that is for purchase (with or without rehabilitation) qualifies as affordable housing if it (1) is purchased by a low income, first-time home buyer who will make the housing his or her principal residence; and (2) has a sale price that does not exceed the mortgage limit for type of single family housing for the area under HUD's single family insuring authority under the National Housing Act.

Area Median Family Income (AMFI): Income limits for MSAs and counties that are based on HUD's estimates of the area's median income adjusted for family size. Calculated yearly by HUD and used to determine an applicant's eligibility with regard to HUD programs.

Assisted Household or Person:	For the purpose of identification of goals, an assisted household or person is one in which, during the periods covered by the annual plan, will receive benefits through the investment of federal funds, either alone or in conjunction with the investment of other public or private funds. A renter is benefited if the household or person takes occupancy of affordable housing that is newly acquired (standard housing) or new rehabilitation is completed. A first-time home buyer is benefited if a home is purchased during the year. A homeless person is benefited if the person becomes an occupant of transitional or permanent housing. A non-homeless person with special needs is considered as being benefited if the provision of supportive services is linked to the acquisition, rehabilitation, or new construction of a housing unit and/or the provision of rental assistance during the year.
Capacity Building:	Educational and organizational support assistance to promote the ability of an organizations to maintain, rehabilitate, and construct housing for low and very low income persons and families. This activity may include, but is not limited to: 1) Organizational support to cover expenses for training, technical, and other assistance to the board of directors, staff, and members of the organization, 2) Program support including technical assistance and training related to housing development, housing management, or other subjects related to the provision of housing or housing services, and 3) Studies and analyses of housing needs.
Community Housing Development Organization (CHDO):	A nonprofit organization, certified by a city or the state, that provides decent, affordable housing to low income individuals within a designated geographic area.
Colonia:	An identifiable unincorporated area located within 150 miles of the Texas-Mexico border that lacks infrastructure and decent housing.
Consolidated Plan:	A document submitted to the US Department of Housing and Urban Development (HUD) containing housing needs assessments and strategic plans for the state. It is required of the State of Texas by HUD in order to receive federal CDBG, HOME, ESGP, and HOPWA program funds.
Contract for Deed:	A financing arrangement for the sale of property whereby land ownership remains with the seller until the total purchase price is paid.
Disability:	According to the US Department of Housing and Urban Development, a person shall be considered to have a disability if the person is determined to have a physical, mental, or emotional impairment that: (1) is expected to be of long-continued and indefinite duration, (2) substantially impeded his or her ability to live independently, and (3) is of such a nature that the ability could be improved by more suitable housing conditions. A person shall also be considered to have a disability or he or she has a developmental disability as defined in the Developmental Disabilities Assistance and Bill of Rights Act (42 USC. 6001-6006). The term also includes the surviving member(s) or any household described in the first sentence of this paragraph who is (were) living in an assisted unit with the disabled member of the household at the time of his or her death. Disabilities reflect the consequences of a bodily impairment in terms of functional performance. Also see "Person with Disability."
Disabled Household:	A household composed of one or more persons at least one of whom is an adult (a person of at least 18 years of age) who has a disability.

Economic Independence and Self-Sufficiency Programs: Programs undertaken by public housing agencies (PHAs) to promote economic independence and self-sufficiency for participating families. Such programs may include Project Self-sufficiency and Operation Bootstrap programs that originated under earlier Section 8 initiatives, as well as the Family Self-Sufficiency program. In addition, PHAs may operate locally developed programs or special projects designed to promote economic independence and self-sufficiency.

Elderly Household: According to HUD, a family in which the head of the household or a spouse is at least 62 years of age, by HUD's definition. This definition may change according to specific program.

Extremely Low Income: Individual of family with a household income less than or equal to 30 percent of the area median family income (AMFI)

Fair Housing Act Prohibits discrimination in housing because of race, national origin, religion, sex, familial status, or disability.

Federal Preference for Admission: The preference given to otherwise eligible applicants under HUD's rental assistance programs who, at the time they seek housing assistance, are involuntarily displaced, living in substandard housing, or paying more than 50 percent of family income for rent.

First Time Home Buyer: An individual or family who has not owned a home during the three-year period preceding the HUD-assisted purchase of a home that must be used as the principal residence of the homebuyer.

Frail Elderly Persons: Includes elderly persons who are unable to perform one or more Activities of Daily Living (ADL) without help.

Household: One or more persons occupying a housing unit (US Census definition).

Housing Development Costs: The total of all costs incurred in financing, creating, or purchasing any housing development, which are approved by the department as reasonable and necessary. The costs may include, but are not limited to, the value of land and any buildings on the land, cost of land acquisition, options, deposits, or contracts to purchase; cost of site preparation demolition and development; fee paid or payable in connection with the planning, execution, and financing of the development, such as those to architects, engineers, attorneys, accountants; cost of necessary studies, surveys, plans, permits, insurance, interest, financing, tax and assessment costs, and other operating and carrying costs during construction; cost of construction, rehabilitation, reconstruction, fixtures, furnishings, equipment, machines, and apparatus related to the real property; cost of land improvements, including without limitation, landscaping and off-site improvements; necessary expenses in connection with initial occupancy of the housing development; an allowance established by the Department for contingency reserves; and the cost of the other items, including tenant relocation, if tenant relocation costs are not otherwise being provided for, as determined by the department to be reasonable and necessary for the development of the housing development, less any and all net rents and other net revenues received from the operation of the real and personal property on the development site during construction.

Housing Development or Housing Project:	Any real or personal property, project, building structure, or facilities work or undertaking, whether existing, new construction, remodeling, improvement, or rehabilitation, that meets or is designed to meet minimum property standards consistent with those prescribed in the federal HOME Program for the primary purpose of providing sanitary, decent, and safe dwelling accommodations for rent, lease, use, or purchase by persons and families of low and very low income and persons with special needs. This term may include buildings, structure, land, equipment, facilities, or other real or personal properties that are necessary, convenient, or desirable appurtenances, such as but not limited to streets, water, sewers, utilities, parks, site preparation, landscaping, stores, offices, and other non-housing facilities, such as administrative, community, and recreational facilities the Department determines to be necessary, convenient, or desirable appurtenances.
Housing Problems:	Households with housing problems include those that: (1) occupy units with physical defects; (2) meet the definition of overcrowded; or (3) meet the definition of cost burdened (>30 percent of income spent on housing).
Jurisdiction:	A unit of state or local government
Local Government:	A county; an incorporated municipality; a special district; any other legally constituted political subdivision of the State; a public, nonprofit housing finance corporation created under Chapter 394, Local Government code Texas revised Civil Statues; or a combination of any of the entities described here.
Low Income Neighborhood:	A neighborhood that has at least 51 percent of its households at or below 80 percent of AMFI.
Low Income:	Household with an annual income that does not exceed 80 percent of the area median family income for the area. HUD may establish income ceilings higher or lower than the 80 percent figure on the basis of HUD's findings that such variations are necessary because of prevailing levels of construction costs or fair market rents or unusually high or low family incomes.
Metropolitan Statistical Area (MSA):	US Census term used to identify a metropolitan area, which is a large population nucleus, together with adjacent communities having a high degree of social and economic integration with that core. Also described as an "urbanized area" of at least 50,000 inhabitants and/or a total metropolitan population of 100,000.
Migrant Farmworkers:	Persons who travel from place to place in order to take advantage of work opportunities provided by various agricultural seasons across the country.
Moderate Income:	Households whose incomes are between 81 percent and 115 percent of the median income for the area, as determined by HUD, with adjustments for smaller or larger families, except that HUD may establish income ceilings higher or lower than 95 percent of the prevailing levels of construction costs or fair market rents, or unusually high of low family incomes. May differ by program.
Neighborhood:	A geographic location designated in comprehensive plans, ordinances, or other local documents as a neighborhood, village, or similar geographical designation that is within the boundary but does not encompass the entire area of a unit of general local government. If the general local government has a population under 25,000, the neighborhood may, but need not, encompass the entire area of a unit of general local government.

Nonprofit Organization:	A nonprofit corporation is created by filing articles of incorporation with the Secretary of State in accordance with the Texas Non-Profit Corporation Act. "Non-profit corporation" means a corporation in which no part of the earned income is distributable to members, directors, or officers. A nonprofit corporation may be created for any lawful purposes and are entitled to exemption from state or federal taxes.
***Olmstead*:**	The US Supreme Court in *Olmstead v. L. C.* held that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the ADA.
Overcrowded:	A housing unit containing more than one person per room. (US Census definition)
Participating Jurisdiction (PJ):	Term for any state or local government that has been designated by HUD to receive HOME Program funds.
Person with Disability:	(1) A person is considered to have a disability if the person has a physical, mental, or emotional impairment that (i) is expected to be of long-continued and indefinite duration; (ii) substantially impedes his or her ability to live independently; and (iii) is of such a nature that such ability could be improved by more suitable housing conditions. (2) A person will also be considered to have a disability if he or she has a developmental disability, which is a severe, chronic disability that (i) is attributable to a mental or physical impairment or combination of mental and physical impairments; (ii) is manifested before the person attains age twenty-two; (iii) is likely to continue indefinitely; (iv) results in substantial functional limitations in three or more of the following areas of major life activity; self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, and economic self-sufficiency, and (v) reflects the person's need for a combination and sequence of special interdisciplinary, or generic care, treatment, or other services that are lifelong or extended duration and are individually planned and coordinated.
Physical Defects:	A housing unit lacking complete kitchen or bathroom facilities (US Census definition).
Poverty:	Term to describe the poor. The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor or in poverty. Varies by year.
Predevelopment Costs:	Costs related to a specific eligible housing project including: a) expenses necessary to determine project feasibility (including costs of an initial feasibility study), consulting fees, costs of preliminary financial applications, legal fees, architectural fees, engineering fees, engagement of a development team, site control, and title clearance; and b) reconstruction housing project costs that the board determines to be customary and reasonable, including but not limited to the costs of obtaining firm construction loan commitments, architectural plans and specifications, zoning approvals, engineering studies, and legal fees. Predevelopment costs <u>does not</u> include general operational or administrative costs.
Primary Housing Activity:	A means of providing or producing affordable housing - such as rental assistance, production, rehabilitation, or acquisition - that will be allocated significant resources and/or pursued intensively for addressing a particular housing need. (See also, "Secondary Housing Activity.")

Project: A site or an entire building, including a manufactured housing unit or two or more buildings together with the site or sites on which the building or buildings is located, that are under common ownership, management, and financing (i.e., a project assisted with HOME funds, under a commitment by the owner, as a single undertaking). Project includes all the activities associated with the site and building. If there is more than one site associated with a project, the sites must be within a four-block area.

Project Completion: All necessary title transfer requirements and construction work have been performed and the project, in HUD's judgment, complies with specified requirements (including the property standards adopted under HOME 92.251); the final drawdown has been disbursed for the project; and a project completion report has been submitted and processed in the Cash and Management Information System (92.501) as prescribed by HUD. For tenant-based rental assistance, the final drawdown has been disbursed for the project and the final payment certification has been submitted and processed in the Cash and Management Information System (92.502) as prescribed by HUD.

Project-Based Rental Assistance: Rental Assistance provided for a project, not for a specific tenant. Tenants receiving project-based rental assistance give up the right to that assistance upon moving from the project.

Public Housing: Any state, county, municipality, or other government entity or public body (or its agency or instrumentality) that is authorized to engage in or assist in the development or operation of low income housing. The term includes any Indian Housing Authority.

Qualified Allocation Plan: The Qualified Allocation Plan is utilized by the Low Income Housing Tax Credit Program in setting threshold and selection criteria points for the allocation of tax credits.

Real Property: All land, including improvements and fixtures and property of any nature appurtenant, or used in connection therewith, and every estate, interest, and right legal or equitable therein, including leasehold interests, terms for years, and liens by way of judgment, mortgage or otherwise.

Reconstruction: HUD guidelines regarding reconstruction are as follows: *The regulation defines reconstruction as the rebuilding of housing on the same foundation. Therefore, the foundation must be used, if possible. If the building has no foundation or if it is not possible to rebuild on the foundation, then the "foundation" will be the same location as the building that is being reconstructed. Construction of housing on a different portion of the land parcel would be new construction. The reconstructed housing must be substantially similar to the structure that is being replaced, regardless of whether an existing foundation is used (i.e. a single family house must be replaced with a structure containing the same number of units). Rooms may be added to a building outside of the foundation or footprint of the original housing if needed to meet local codes. However, additional units cannot be constructed as part of a reconstruction project. A structure must be present prior to reconstruction. This structure should be documented by pictures and an explanation of why rehabilitation of the existing structure is not feasible.*

Rental Assistance: Rental assistance payments provided as either project-based rental assistance or tenant-based rental assistance.

Rental Housing (Affordable): A rental housing unit is considered to be an affordable housing unit if it is occupied by a low income family or individual and bears a rent that is the lesser of (1) the Existing Section 8 Fair Market Rent (FMR) for comparable units in the area; or (2) 30 percent of the adjusted income of a family whose income equals 65 percent of the median income for the area, except that HUD may establish income ceilings higher or lower than 65 percent of the median because of prevailing levels of construction costs or fair market rents, or usually high or low family incomes.

Rural Area: Rural areas are considered areas outside of Metropolitan Statistical Areas. Definition may differ according to program.

Service Needs: The particular services identified for special needs populations, which may include transportation, personal care, housekeeping, counseling, meals, case management, personal emergency response, and other services to prevent premature institutionalization and assist individuals to continue living independently.

Severe Cost Burden: Refers to households and individuals who spend more than 50 percent of their gross income on housing costs.

Sheltered: Families and persons whose primary nighttime residence is a supervised, publicly or privately operated shelter, including emergency shelters, transitional housing for the homeless, domestic violence shelters, residential shelters for runaway and homeless youth, and any hotel/motel/apartment voucher arrangement paid because the person is homeless. This term does not include persons living in overcrowded or substandard conventional housing. Any facility offering permanent housing is not a shelter, nor are its residents homeless.

Special Needs Populations: Populations with special needs, as defined by HUD, include persons with alcohol and/ or drug addictions, colonia residents, persons with disabilities, victims of domestic violence, elderly persons, persons with HIV/AIDS, homeless populations, and migrant farmworkers.

State Recipient: A unit of local government designated by a state to receive HOME funds from the state in which to carry out HOME Program activities.

Subrecipient: A public agency or nonprofit organization selected by the participating jurisdiction's HOME program. A public agency or nonprofit organization that receives HOME funds solely as a developer or owner of housing is not a sub-recipient. The participating jurisdiction's selection of a sub-recipient is not subject to the procurement procedures and requirements.

Substandard Condition but Suitable for Rehabilitation: By local definition, dwelling units that do not meet standard conditions but are both financially and structurally feasible for rehabilitation. This does not include units that require only cosmetic work, correction or minor livability problems, or maintenance work. The jurisdiction must define this term (i.e., standard condition, financially and structurally feasible for rehab) and include this definition in the Appendix (Glossary of Terms) portion of its CHAS submission.

Substantial Rehabilitation: Rehabilitation of residential property at an average cost for the project in excess of $25,000 per dwelling unit.

Supportive Housing: Housing, including housing units and group quarters, that has a supportive environment and includes a planned service component.

Supportive Services: Services provided to residents of supportive housing for the purpose of facilitating the independence of residents. Some examples are case management, medical or psychological counseling and supervision, child care, transportation, and job training.

Tenant-Based Rental Assistance: A form of rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. The assistance is provided for the tenant, not for the project.

Threshold Criteria: To be considered for funding, a housing project must first demonstrate that it meets all the threshold criteria set forth as follows: a) the project is consistent with the requirements established in this rule; b) the applicant provides evidence of their ability to carry out the project in the areas of financing, acquiring, rehabilitating, developing, or managing affordable housing developments; and c) the project addresses an identified housing need. This assessment will be based on statistical data, surveys, or other indicators of needs as appropriate.

Total Bonded Indebtedness: All single family mortgage revenue bonds (including collateralized mortgage obligations), multifamily mortgage revenue bonds, and other debt obligations issued or assumed by the Department and outstanding as of August thirty-one of the year of calculation, excluding; all such bonds rated AAA by Moody's Investors Service or AAA by Standard & Poors Corporation for which the Department has no direct or indirect financial liability form the Department's unencumbered fund balances, and all other such bonds, whether rated or unrated, for which the Department has no direct or indirect financial liability from the Departments unencumbered fund balances, unless Moody's' or Standard & Poors has advised the Department in writing that all or portion of the bonds excluded by this clause should be included in a determination of total bonded indebtedness.

Unencumbered Fund Balances: A) The sum of the balances resulting at the end of each Department fiscal year form deducting the sum of bond indenture and credit rating restrictions and liabilities for the sum of amounts on deposit in indenture funds and other tangible and intangible assets of each department housing bond program, and b) uncommitted amounts of deposit in each independent or separate unrestricted fund established by the housing finance division or its administrative component units.

Very Low Income: Households whose incomes do not exceed 50 percent of the median area income for the area, as determined by HUD, with adjustments for smaller and larger families and for areas with unusually high or low incomes or where needed because of prevailing levels of construction costs or fair market rents. Definition may differ according to program; the State of Texas designates very-low income as 60 percent or less AMFI.

Work Disability: A condition that prevents a person from working or limits a person's ability to work.

APPENDIX D

SUMMARY OF PUBLIC COMMENT

Comment: Regional Advisory Committee Meeting

Comment states that the *State Low Income Housing Plan and Annual Report* says, “the regional advisory committee meeting attendees (in Region 5) agreed that there has been no progress made in addressing the housing crisis since the RAC last year. If anything, the regions' needs are greater, and the resources are more limited. A local organization reported that a recent homeless count in the region indicates that homelessness has risen significantly since last year. It was observed that until mayors, county judges, commissioners, and council members attend the RAC, very little will be accomplished. The group felt that there is not the social awareness nor the political will to address the housing issues.” Comment indicates that the summary does not accurately represent the feeling of the region.

- Department Response
  The Regional Advisory Committee meetings reflect the opinions of the persons present and may not be a reflection of the region as a whole. The comments are taken from the written committee report provided by the Regional Development Coordinator who facilitated the meeting. The intention of the Regional Advisory Committee is to provide a forum for discussion of the local affordable housing and community service needs and available resources. The Department encourages the continued participation of the public at the Regional Advisory Committee meetings in 2005.

Comment: State Service Regions

Comment suggests that adjacent counties in regions 3, 4, 5, and 8 should have their own region to ensure better representation of their unique rural needs.

- Department Response
  The Department utilizes the Uniform State Service Regions as established by the Texas Comptroller of Public Accounts and required by 2306.111. The Department is dedicated to serving populations with the highest need for assistance yet remain underserved, including rural areas. The rural focus of the Department is considered in the development of all programs and the distribution of associated funds, i.e., the rural allocation in the Regional Allocation Formula used for distributing Housing Trust Fund, HOME, and Housing Tax Credit funds. The Department utilizes scoring criteria or set-asides in applications and program rules to encourage participation in rural areas.

Comment: Texas Basic Accessibility Rules

Comment strongly encourages TDHCA to use the Texas Basic Accessibility Rules that allow the house to be easily adapted as occupants age and need help in coping with disabilities. The double studding around the shower, the lowering of a light switch, the raising of a receptacle, or ensuring that one of the doors be a three-foot door with a zero grade, as no cost to the developer. It's a big savings to a consumer that has disabilities. These rules have been in place for more than five years. Comment strongly encourages TDHCA to continue to use dollars for development of affordable housing that the Basic Accessibility Act rules remain in place.

- **Department Response**
  The Department concurs that basic accessibility is an important feature with regard to housing. TDHCA is currently required to include basic accessibility features with all new single family construction per Section 2306.514. The Department will research the differences between the accessibility features it currently uses and those identified by the comment to determine if changes need to be made.

Comment: Public Participation

Comment encourages relationship building between the Department and the public, encouraging more public participation in the process. Comment states that there is a disconnect between regional organizations and the Department.

- **Department Response**
  The Department has an extensive public comment process and values public comment to help direct resources to meet its goals and objectives. The citizen participation process is constantly undergoing expansion and modification. As this was a frequently expressed comment in the annual Regional Advisory Committees as well, the Department will continue to explore ways to improve how it works with, and includes local organizations in the development of programs and policies.

  Note: All Department programs follow the citizen participation and public hearing process outlined by the Texas Government Code. Hearing locations are accessible to all who choose to attend and are held at times convenient to both working and non-working persons. The Department notifies all citizen and nonprofit organizations, local governments, state legislators, public housing authorities, and local public libraries when a public hearing or public comment period is schedules. Additional, pertinent information is posted in the *Texas Register*, in *Breaking Ground* (the Department's newsletter), and on the Department's website.

Comment: Fair Housing

Comment states that the Department's current *Analysis of Impediments to Fair Housing* does not use the most recent data available at the time and "fails to do any significant analysis of housing problems by race/ethnicity, either in terms of demographic analysis of housing need or effect of actions taken." Comment urges "the Department to acknowledge both its recognition of these shortcomings, and its commitment to undertake a more thorough and useful fair housing planning process in the upcoming year." Related comment states that the Department has not adequately acted to affirmatively further Fair Housing in the Department's programs.

- **Department Response**
  The *Analysis of Impediments to Fair Housing* was last updated in January 2003 utilizing the most recent Census data available at the time: 1990 data. The 2000 Comprehensive Housing Affordability Strategy (CHAS) database of Census housing data delineated by income groups became available on HUD's website in September 2003 (http://www.huduser.org/datasets/cp.html). The Department is committed to updating the *Analysis of Impediments* beginning early 2005 with a planning process involving a workgroup of interested members of the public. The Department will utilize 2000 Census data and include analysis on race/ethnicity in the updated *Analysis of Impediments to Fair Housing*. The

Department is proposing several fair housing point factors in the *2005 Qualified Allocation Plan* (QAP) for the Housing Tax Credit Program.

Note: The current *Analysis of Impediments to Fair Housing* meets the requirements established by the US Department of Housing and Urban Development (HUD) for the *2005-2009 State of Texas Consolidated Plan*.

Comment: Geographic Distribution of Funding

Comment requests more funding in Bell and Coryell counties. Comment says that the State should allocate funding to subrecipients that distribute funding to those most in need.

- Department Response

  A majority of the funding available through the Department is distributed geographically by allocation formulas. These allocation formulas are based on need data provided by the US Bureau of the Census; for instance the number of individuals in poverty, and the number of households with housing cost burden, overcrowding, or living in substandard housing conditions. The housing and community service funding available through the Department is limited to eligible households and individuals. Program rules, the application process, and the subsequent monitoring of entities receiving the funding awards ensure that the assistance is available to those most in need.

Comment: Special Needs Categories

Comment suggests the addition of three categories of persons with special needs: street youth, young adults recently aged out of foster care; and homeless young mothers (may or may not include aged-out foster youth or victims of domestic violence).

- Department Response

  The Department concurs and will add various identified homeless subpopulations to the *2005 State of Texas Low Income Housing Plan and Annual Report*.

Comment: Release of NOFAs for Public Comment

Public comments were submitted noting an interest in releasing NOFAs for public comment prior to official release. It was noted that past NOFAs, including the 2004 HTF Rental Development NOFA, included limitations on applicants that reduced the effectiveness of the funding cycles.

- Department Response

  Department staff understands that limitations placed in a NOFA may have a negative impact on certain applicants. The Department will make an effort to gather more input in the NOFA development process.

Comment: Persons with Disabilities Staff Member

Comment suggests the Department formalize its commitment to persons with disabilities and fund a staff person to provide internal and external leadership on issues related to persons with disabilities.

- Department Response

  The Department is committed to serving people with disabilities and will maintain an active role concerning housing and community services issues and the disability community in Texas.

Comment: State Public Housing Authority

Comment encourages the Department to continue its role as a public housing authority and continue with initiatives such as the Project Access vouchers for people wishing to transition out of institutions.

- Department Response

  The Department appreciates the comment. At this point in time, the Department will continue in its role as public housing authority and will continue to administer the Project Access vouchers in the current capacity.

COMMENTS REGARDING THE EMERGENCY SHELTER GRANTS PROGRAM

Comment

Comment commends Project BRAVO for the services that have been provided including utility assistance, food, medical, and appliances.

- Department Response

  The Department appreciates the comments regarding the assistance received from El Paso Community Action Program, Project BRAVO.

Comment

Comment originates from an organization that feeds the hungry and trains and places in jobs people in need, primarily homeless, indigent, and of late those who have been displaced by the offshore plight of industries in the area. Comment commends the Department for the assistance provided through the ESG Program for the past four or five years and points out the importance of the program, especially for small cities. Comment requests that the Department reconsider funding the organization.

- Department Response

  The Department appreciates the work done by Loaves and Fishes to assist low income citizens become self-sufficient and recognizes the great need in their community. At this time though, the Department has awarded all fiscal year 2004 ESGP funds. However, the Department reviewed a recent request for CSBG funds and awarded Loaves and Fishes a $30,000 CSBG Special Project Demonstration Fund grant to assist with efforts to transition persons out of poverty in the Harlingen area. The Department will continue to notify Loaves and Fishes of future ESGP funding opportunities.

Comment

Comment requests that the *State of Texas Low Income Housing Plan and Annual Report* place emphasis on the provision of essential services for homeless youth and young adults including education, job training, and employment.

- Department Response

  The Department will add language in the *2005 State of Texas Low Income Housing Plan and Annual Report* that discusses the importance of essential services for homeless youth and young adults.

Comment

Comment requests funding for homeless programs and requests more flexibility in the use of ESGP funds.

- **Department Response**
  The federal regulations governing the ESGP grant, 42 USC Sec. 11374 (a) provides limitations on the use of ESGP funds. The Department does not focus on funding expenditures related to the physical facilities. In making funding distribution decisions, the Department must comply with limitations set forth by the ESGP federal regulations. Expenditures of ESGP grant funds for essential services and for homelessness prevention are limited to no more than 30 percent of the aggregate amount of the State's allocation for each activity.

Comment

Comment points out the need for transitional housing. Other comment states that the responses to the Community Needs Survey in their area only represents the need in the cities, not a need for transitional housing that exists in the other counties.

- **Department Response**
  The Department appreciates the information provided regarding the needs in the community. Unfortunately, the ESGP funds administered by the Department are very limited. In fiscal year 2004, the Department received $4.9 million dollars and Region 4 was allocated $228,082, based on the poverty population of the region. ESGP funds support organizations that provide emergency services, shelter, and transitional housing. The Department will notify your organization of availability of fiscal year 2005 ESGP funds. Of the housing programs, the Housing Tax Credit Program can be used for transitional housing.

  The 2003 Community Needs Survey was sent to all local jurisdictions, including county judges and city mayors. The report accurately reflects the surveys returned to the Department, and may not reflect the opinions of the area as a whole.

Comment

Comment supports long-term solutions that enable the participants to obtain the education, job skills, and life skills needed to pull themselves out of poverty. These programs typically take one to two years.

- **Department Response**
  The Department provides Community Services Block Grant (CSBG) funds to 48 CSBG-eligible entities. These entities must offer case management programs to assist low income persons to transition out of poverty. The Department sets no limitation on the length of time that a client can be enrolled in a case management program; each CSBG eligible entity sets the guidelines for enrollment and maintenance in a case management program. In the Houston area, the CSBG eligible entity is Gulf Coast Community Services Association.

Comments Regarding Weatherization Activities

Comment

Comment points out that System Benefit Fund (SBF) monies working with weatherization funds enabled them to have the additional dollars needed to help the very poor clients make their homes energy efficient. These are the clients that now must be denied because the federal weatherization program limits weatherization funds that can be spent on any one home. Comment also points out that only electric customers in deregulated areas have to pay into the SBF account and yet are denied the energy efficient work afforded to electric customers living in regulated areas.

- **Department Response**

  The Department concurs with the need for the SBF program and has requested funding in its Legislative Appropriations Request.

Comment

Comment states that only one utility assistance program is listed for Bell County and that in order to qualify for assistance, the client must be a single mother.

- **Department Response**

  The Department administers the Comprehensive Energy Assistance Program funded through the LIHEAP grant from the US Department of Heath and Human Services. In Bell and Coryell counties, this program is operated through the Hill Country Community Action Association. This is not an entitlement program. In order to be eligible, the household must have an income level is at or below 125 percent of poverty and possess a documented need. Priority is given to households with elderly persons, households with one or more disabled persons, households with one or more children under 6 years of age, households with high energy burdens, and households that consume a lot of energy. The Department encourages the application for funding. The toll free number is 1-877-399-8939.

COMMENTS REGARDING THE HOME PROGRAM

Comment: Length of Program Supports

Comments were collected regarding the length of program supports, specifically in tenant-based rental programs. It was noted that these types of support should be provided on a "longer-term" basis to enable participants the ability to secure jobs, education, and life skills that will allow them to reach self-sufficiency. A term limit on TBRA of two years was specifically mentioned as being too short to properly assist special needs and other populations.

- **Department Response**

  The term of 2 years of Tenant-Based Rental Assistance is a federally mandated timeline. No changes recommended.

Comment: Olmstead Set-Aside

Several comments were collected on the Department's use of Tenant-Based Rental Assistance funding through the Olmstead Set-Aside. It was noted that while applications to the program had lagged since its inception, that the program was critical and that demand remained significant. Public input highlighted that the program was still "young" and that organizational capacity by social service agencies and nonprofits was building and would soon be able to fulfill the demands of the target population.

- **Department Response**

  A total of $4 million dollars was set aside for those persons affected by the *Olmstead* Decision for Tenant-Based Rental Assistance. Two separate NOFAs were released for these particular funds, one for $2 million dollars in 2003 and another in 2004. Only five applications have been submitted, with all five receiving funding awards. To date, only $545,875 out of the $4 million has been awarded. If an applicant wishes to assist persons that qualify under the *Olmstead* population definition, they may do so by applying for Tenant-Based Rental Assistance funds under the Department's general funding cycle. In an effort to continue serving this population, extra points will be awarded to those applicants choosing to assist persons with disabilities, including persons affected by the *Olmstead* Decision, in the application scoring process.

Comment: Disability Advisory Committee

Comments were collected recommending that the Department expand the membership of the Disability Advisory Committee (DAC), that a regular meeting schedule be established, and that the committee become proactive in addressing the housing needs of people with disabilities. It was noted that the DAC had great potential in evolving toward providing a clear voice to the Department's Board on disability issues.

- Department Response

  TDHCA continues to have a strong interest in meeting the housing and community service needs of persons with disabilities. The Department will review the membership of the DAC and work with committee members to ensure a more regular meeting schedule.

Comment: Threshold Criteria

A question was asked through public comment regarding the application of *Qualified Allocation Plan* (QAP) requirements for both experience certifications, and units and site amenities required of multifamily developments. It was noted that these threshold criteria were onerous to small developments through the HOME and HTF programs.

- Department Response

  The Department has worked to reduce the impact on small developments that were due to the universal application of QAP requirements on all rental developments. Staff believes that many of these issues have been dealt with through revisions to program rules.

Comment: Responses to Applicant Inquiries

A comment was submitted regarding an applicant's attempts to communicate with Department staff regarding contract issues. The comment noted that it was difficult to contact Department staff until the division director was contacted.

- Department Response

  Since its reorganization, the Department has instituted standard operating procedures to clarify the roles and responsibilities of staff and worked towards having single points of contact for each program area. It is believed that these changes will improve communication between applicants and TDHCA.

Comment: Contract Effective Dates

It has been noted that contract effective dates are often set for dates prior to the actual signing of the agreements. It was noted that applicants had concerns about monitoring and fulfillment of contract performance measures under these circumstances.

- Department Response

  It should be noted that contract effective dates are often set by program funding requirements. Department staff strives to keep the difference between the signing date and effective date of agreements as minimal as possible. Applicants are also asked to contact their primary program contact to assure that agreements are amended to reflect any delays on behalf of the Department.

Comment: Training Requirements

Comments were submitted regarding the training requirements placed on administrators prior to being able to draw funds and begin programs. It was noted that the administrators are often delayed due to unavoidable circumstances and do not have sufficient staff resources to attend trainings while providing critical services to clients.

- Department Response

  The Department provides compliance and financial management training upon receiving an award, or when so requested. The Department strives to make its training programs available in a flexible manner and will continue to institute new avenues for administrators to fulfill training requirements, including online training resources and manuals.

Comment: Match Requirements

Public comments were provided on the use of matching funds as a scoring criteria in the HOME application process. Match as a scoring criteria is often inequitable and most effects small versus larger municipalities across the state. It was noted that larger municipalities are better able to provide matching funds than smaller municipalities. It was also recommended that the Department consider using a per capita scale if match is to continue as a scoring criteria.

- Department Response

  The Department is required to report 12.5 percent of the annual allocation in matching funds to HUD. The Department realizes the difficulty for any applicant to provide matching funds, much less the smaller, less prosperous municipalities. The Department has struggled in years past in remedying the possible inequities and is currently in the process of reviewing this scoring criteria.

Comment: Contractor Qualifications

Comments regarding the qualification requirements for building contractors often exclude local builders from being included in HOME contracts. In these cases, administrators are often forced to find contractors from outside communities, which can be costly and cause delays. However, it was noted that outside contractors also often hire local subcontractors and buy supplies locally, but that these impacts are not included in program reporting. It was requested that the Department reconsider its stance on the use of local contractors.

- Department Response

  The Department encourages HOME administrators to use local contractors when possible, and feels it important for the local economy to benefit from receiving funds. Points are given to those applicants that use local contractors interested in participating in a HOME contract. The Department realizes that finding local contractors in the rural areas of the state can be difficult, and at times not cost effective. This scoring criteria regarding local contractors is important to the application process and the manner in which it is scored and reviewed. In years past, applicants received points for finding contractors within 150 miles of the proposed activity. In the most current funding cycle, the Department broadened the scope to contractors within the region, in hopes that many applicants could find more interested parties. The Department will be holding a single family roundtable in the near future to evaluate applications and scoring criteria.

Note: Under Section 3 of the HUD Act of 1968, wherever HUD financial assistance is expended for housing or community development, to the greatest extent feasible, economic opportunities will be given to Section 3 residents and businesses in that area.

Comment: Administrator Funds

Public comment recommended that the 4 percent cap on administrative funds be raised to levels similar to those used by ORCA and the CDBG program.

- Department Response

  The Department feels that 4 percent in administrative dollars of the project funds awarded is sufficient to execute a HOME single family contract. The Department works to provide other forms of assistance to nonprofit administrators including Capacity Building and CHDO Operating Support funding.

Comment: Grant vs. Loan in the Owner-Occupied Assistance Program

Public comments were submitted in regards to the Owner-Occupied Assistance Program requesting that the Department consider making only grants to participants that earn 50 percent or less than the area medium family income.

- Department Response

  Program staff continues to work closely with the Board in developing a policy regarding HOME Owner-Occupied Housing Assistance funds as grants and/or loans to qualifying households. The Department appreciates the suggestion that individuals earning 50 percent or less AMFI and receiving assistance should be granted funds. This topic will be explored in the upcoming single family application roundtable.

Comment: AMFI Levels Served

Comment received proposed awarding applicants the same number of points for serving households at 50 percent or below.

- Department Response

  Currently, in an effort to meet Rider 3 (as required by the Texas Legislature) the Department awards more points to applicants proposing to serve populations at lower AMFI levels, with the most points received for serving those at 30 percent AMFI. The Department does not prohibit an applicant from serving households above this level; however, they do not receive as many points as an applicant proposing to serve those individuals at lower AMFI levels. The Department proposes no change.

Comment: Activity Award Allocations and Subscription Rates

Comment received requested more funds be allocated for activities that get the most subscription.

- Department Response

  The Department has evaluated subscription rates of the various HOME activities and believe that the activities put forth in the 2005 Action Plan are reflective of the subscription rates (based on the most current funding cycle).

  NOTE: A total of $6 million for Homebuyer Assistance will be available through the American Dream Downpayment Initiative (ADDI) for 2005. Of the remaining funds allocated for single family activities, 80 percent of funds will be for Owner-Occupied Housing Assistance, the Department's most oversubscribed activity, and 20 percent will be for Tenant-Based Rental Assistance.

Comment: Barrier Removal

Comment says the Department needs to publicize the ability to use HOME funds for barrier removal. The activity should allow clients' input on the type of barrier removal and not rely on the physician's recommendations. The extensive paperwork requirements lead to burdensome delays for the recipients of program funds.

- Department Response

  The Department is aware that oftentimes the application and administration of federal programs seems onerous, and is continually working to improve the application and funding process. The Department also agrees that consumer-driven changes with regard to barrier removal is an integral part of a successful barrier removal program, and will explore avenues to encourage providers to include clients in the development of their work plans.

Comment: Persons with Disabilities Set-Aside

The Department received numerous comments regarding the amount of assistance going to persons with disabilities should be increased, and the use of such funds being awarded in participating jurisdictions.

- Department Response

  The Department is committed to assisting persons with disabilities. In an effort to assist more individuals with a disability, additional points will be awarded to applicants choosing to serve 100 percent persons with disabilities during the application scoring phase.

  According to §2306.111(c) of the Texas Government Code, the Department shall expend at least 95 percent of HOME funds for the benefit of non–participating jurisdictions. The remaining 5 percent may be expended in a participating jurisdiction for multifamily activities, but only if such funds assist persons with disabilities and are in compliance with the Department's Integrated Housing Rule.

Comment: Home of Your Own (HOYO) Award

The Department received overwhelming support for the reinstatement of the Department's commitment to the Home of Your Own (HOYO) program.

- Department Response

  The Department concurs with public comment, and agrees that providing homebuyer assistance to persons with disabilities is essential. Given HOYO's past performance and current capacity to serve this need, the $500,000 commitment for homebuyer assistance to the disability community will be reinstated for the 2005 HOME Program year. To ensure good governance, however, it is the Department's intention to reevaluate this award for future funding cycles. The Department desires to make funding for this specific activity serving the disability community open to all interested entities on a competitive basis.

2006 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

TABLE OF CONTENTS

SECTION 1: INTRODUCTION

TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS

The Texas Department of Housing and Community Affairs (TDHCA, Department, Agency) is the State's lead agency responsible for affordable housing. TDHCA is also responsible for administering a wide variety of community affairs, energy assistance, and colonia programs and activities.

INSTITUTIONAL STRUCTURE

In 1991, the 72nd Texas Legislature created the Texas Department of Housing and Community Affairs. The Department's enabling legislation combined programs from the Texas Housing Agency, the Texas Department of Community Affairs, and the Community Development Block Grant Program from the Texas Department of Commerce.

On September 1, 1992, two programs were transferred to TDHCA from the Texas Department of Human Services: the Low Income Home Energy Assistance Program (LIHEAP) and the Emergency Nutrition and Temporary Emergency Relief Program (ENTERP). Effective September 1, 1995, in accordance with House Bill 785, regulation of manufactured housing was transferred to the Department. In accordance with House Bill 7, effective September 1, 2002, the Community Development Block Grant (CDBG) and Local Government Services programs were transferred to the newly created Office of Rural Community Affairs (ORCA). However, TDHCA, through an interagency contract with ORCA, administers 2.5 percent of the CDBG funds used for the Self-Help Centers along the Texas-Mexico border. Effective September 1, 2002, in accordance with Senate Bill 322, the Manufactured Housing Division became an independent entity administratively attached to TDHCA.

AGENCY MISSION AND CHARGE

TDHCA's mission is as follows: To help Texans achieve an improved quality of life through the development of better communities.

TDHCA accomplishes this mission by administering a variety of housing and community affairs programs. A primary function of TDHCA is to act as a conduit for federal grant funds for housing and community services. However, because several major housing programs require the participation of private investors and private lenders, TDHCA also operates as a housing finance agency.

More specific policy guidelines are provided in §2306.002 of TDHCA's enabling legislation.

(a) The legislature finds that:

(1) every resident of this state should have a decent, safe, and affordable living environment;

(2) government at all levels should be involved in assisting individuals and families of low income in obtaining a decent, safe, and affordable living environment; and

(3) the development and diversification of the economy, the elimination of unemployment or underemployment, and the development or expansion of commerce in this state should be encouraged.

> (b) The highest priority of the department is to provide assistance to individuals and families of low and very low income who are not assisted by private enterprise or other governmental programs so that they may obtain affordable housing or other services and programs offered by the department.

TDHCA's services address a broad spectrum of housing and community affairs issues that include homebuyer assistance, the rehabilitation of single family and multifamily units, rental assistance, the new construction of single family and multifamily housing, special needs housing, transitional housing, and emergency shelters. Community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance.

TDHCA is primarily a pass-through funding agency and most programs, excluding many Community Affairs programs, award funds through a formal competitive process. As such, it distributes funds to entities that in turn provide assistance to households in need at the local level. This distribution is done using a number of techniques.

- Almost all housing development, rehabilitation, and rental assistance related funding is awarded through formal competitive Request for Proposals (RFP) and Notice of Funding Availability (NOFA) processes.
- First time homebuyer and down payment assistance is allocated through a network of participating lenders.
- Community Affairs' funds are predominantly allocated through a network of community based organizations who receive their funding on an annual, ongoing basis.

Funding sources for the services listed above include the US Department of Housing and Urban Development (HUD), US Treasury Department, US Department of Health and Human Services, and US Department of Energy, and State of Texas general revenue funds. With this funding, TDHCA strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process.

TDHCA is only one organization in a network of housing and community services providers located throughout the state. This document focuses on programs within TDHCA's jurisdiction, which are intended to either work in cooperation with or as complements to the services provided by other organizations.

Administrative Structure

Agency programs are grouped into three categories: Single Family Finance Production, Multifamily Finance Production, and Community Affairs. In addition, TDHCA includes the following divisions: Administrative Support; Bond Finance; Financial Administration; Information Systems; Internal Audit; Legal Services; Portfolio Management and Compliance; Real Estate Analysis; the Division of Policy and Public Affairs; and the Office of Colonia Initiatives. The Manufactured Housing Division is administratively attached to TDHCA, though it is an independent entity with its own governing board.

The following table outlines TDHCA's programs. For more detailed program information, please see "TDHCA Program Plans" in the Action Plan section of this document.

Activity	Program	Program Description	Eligible Households
Multifamily Development	HOME Rental Housing Set-Asides (HOME)	Loans and grants to develop or preserve affordable rental housing	<80% AMFI
	Housing Trust Fund (HTF)	Loans and grants for rental housing development, predevelopment, and capacity building	<80% AMFI
	Housing Tax Credit (HTC)	Tax credits to develop or preserve affordable rental housing	<60% AMFI
	Multifamily Bond (MFB)	Loans to finance the development of affordable rental housing	<60% AMFI
Rental Assistance	HOME Tenant-Based Rental Assistance	Loans and grants for entities to provide tenant-based rental assistance for two years	<80% AMFI
	Section 8 Housing Choice Vouchers	Acts as a public housing authority to offer tenant-based rental assistance vouchers in certain areas	<50% AMFI
Single Family Development	HOME CHDO Set-Aside	Loans and grants for CHDOs to construct single family housing and offer down payment assistance	<80% AMFI
	Colonia Model Subdivision	Loans for CHDOs to develop residential subdivisions as an alternative to colonias	<60% AMFI
Home Purchase Assistance and Home Repair Assistance	HOME Homebuyer Assistance	Loan and grants for entities to offer down payment and closing cost assistance	<80% AMFI
	Texas First Time Homebuyer	Low-interest loans for first time homebuyers to purchase a home	<115% AMFI
	Grant Assistance	Grants in conjunction with the First Time Homebuyer Program for down payment and closing costs	<60% AMFI
	Mortgage Credit Certificate	Annual tax credit based on the interest paid on the homebuyer's mortgage loan	<115% AMFI
	Lone Star Loan	Market-rate loans with second liens for down payment assistance	<115% AMFI
	Texas Bootstrap Loan	Funds entities to offer owner-builder loans programs	<60% AMFI
	Contract for Deed Conversion Initiative	Facilitates colonia-resident ownership by converting contracts for deed into traditional mortgages	<60% AMFI
	HOME Owner-Occupied Housing Assistance	Loans and grants for entities to provide home repair assistance	<80% AMFI
Homebuyer Education	Colonia Consumer Education Services	Homebuyer education offered through Colonia Self-Help Centers and OCI field offices	<115% AMFI (All)
	Texas Statewide Homebuyer Education	Training for nonprofits to provide homebuyer education	<115% AMFI (All)
Community Affairs Activities	Community Services Block Grant (CSBG)	Funds local agencies to provide essential services and poverty programs	<50% AMFI
	Emergency Shelter Grants (ESGP)	Funds entities to provide shelter and related services to the homeless	<30% AMFI (Homeless)
	Community Food and Nutrition (CFNP)	Distributes surplus food commodities and supports feedings	<80% AMFI
	Comprehensive Energy Assistance (CEAP)	Funds local agencies to offer energy education, financial assistance, and HVAC replacement	<50% AMFI
	Weatherization Assistance (WAP)	Funds local agencies to provide minor home repairs to increase energy efficiency	<50% AMFI
Manuf. Housing	Manufactured Housing Division	Regulates the manufactured housing industry. Licenses manufactured housing professionals, titles homes, inspects homes, and investigates manufactured housing complaints.	All

2006 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

The *2006 State of Texas Low Income Housing Plan and Annual Report* (SLIHP, Plan) is prepared annually in accordance with §2306.072–2306.0724 of the Texas Government Code (TGC). This statute requires that TDHCA provide a comprehensive statement of activities in the preceding year, an overview of statewide housing needs, and a resource allocation plan to meet the state's housing needs. It offers policy makers, affordable housing providers, and local communities a comprehensive reference on statewide housing need, housing resources, and performance-based funding allocations. The format is intended to help these entities measure housing needs, understand general housing issues, formulate policies, and identify available resources. As such, the Plan is a working document whose annual changes reflect input received throughout the year.

The Plan is organized into eight sections:

- *Introduction:* An overview of TDHCA and the Plan
- *Annual Report:* A comprehensive statement of activities for 2005, including performance measures, actual numbers served, and a discussion of TDHCA's Strategic Plan goals
- *Housing Analysis:* An analysis of statewide and regional demographic information, housing characteristics, and housing needs
- *TDHCA Action Plan:* A description of TDHCA's initiatives, resource allocation plans, program descriptions, and goals
- *Public Participation:* Information on the Plan preparation and a summary of public comment
- *Colonia Action Plan:* A biennial plan for 2006–2007 which discusses housing and community development needs in the colonias, describes TDHCA's policy goals, summarizes the strategies and programs designed to meet these goals, and describes projected outcomes to support the improvement of living conditions of colonia residents
- *Texas State Affordable Housing Corporation (TSAHC) Plan:* This section outlines TSAHC's plans and programs for 2006, and is included in accordance with legislation
- *Appendix:* Includes TDHCA's enabling legislation and a glossary of selected terms

Because the information required to comply with the Plan's legislative requirements is rather extensive, the report is presented as a collection of separate publications. This allows the consumer to receive specific information in a format that is cost-effective for both TDHCA and its consumers through lower printing and distribution costs. TDHCA produces the following publications in compliance with §2306.072–2306.0724 TGC:

- *State of Texas Low Income Housing Plan and Annual Report*
- *Basic Financial Statements* and *Operating Budget:* Produced by TDHCA's Financial Administration Division and fulfill §2306.072(c)(2)
- *TDHCA Program Guide:* A description of TDHCA's housing programs and other state and federal housing and housing-related programs, which fulfills §2306.0721(c)(4) and §2306.0721(c)(10)
- *TDHCA Housing Sponsor Report:* A report that provides property and occupant profiles of developments that have received assistance from TDHCA, which fulfills §2306.072(c)(6), §2306.072(c)(8), and §2306.0724

SECTION 2: ANNUAL REPORT

The Annual Report required by §2306.072 of the Texas Government Code includes the following sections:

- TDHCA's Operating and Financial Statements
- *Statement of Activities*: Describes TDHCA activities during the preceding year that worked to address housing and community service needs
- *Statement of Activities by Region*: Describes TDHCA activities by region
- *Participation in TDHCA Programs*: Discusses efforts to ensure that individuals of low income and their community-based institutions participate in TDHCA programs
- *Citizen Participation in Program Planning*: Discusses affirmative efforts to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process
- *Fair Housing Sponsor Report*: Describes fair housing opportunities offered by TDHCA's multifamily development inventory
- *Analysis of the Distribution of Tax Credits*: Provides an analysis of the sources, uses, and geographic distribution of housing tax credits
- *Average Rents Reported by County*: Provides a summary of the average rents reported by the TDHCA multifamily inventory

OPERATING AND FINANCIAL STATEMENTS

TDHCA's *Operating Budgets* and *Basic Financial Statements* are prepared and maintained by the Financial Administration Division. For copies of these reports, contact Bill Dally, Chief of Agency Administration, at (512) 475-3801, or visit http://www.tdhca.state.tx.us/finan.htm.

STATEMENT OF ACTIVITIES

This section of the Plan summarizes TDHCA's activities and achievements during the preceding FY year through a detailed analysis of the following:

- TDHCA's performance in addressing the housing needs of low, very low, and extremely low income households
- The ethnic and racial composition of individuals and families who received TDHCA assistance
- TDHCA's progress in meeting its housing and community services goals

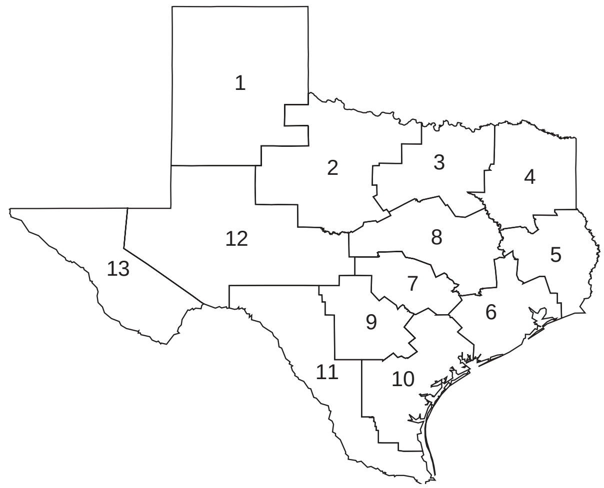

Figure 2.1 State Service Regions

This analysis is provided at the State level and within each of the 13 service regions TDHCA uses for planning purposes (see Figure 2.1). For general information about each region, including housing needs and housing supply, please see the Housing Analysis section of this document.

FUNDING COMMITMENTS AND HOUSEHOLDS SERVED BY ACTIVITY AND PROGRAM

For the state and each region, a description of funding allocations, amounts committed, target numbers, and actual number of persons or households served for each program is provided. Along with the summary performance information, data on the following activity subcategories is provided.

- Renter
  - o New Construction activities support multifamily development, such as the funding of developments, capacity building, and predevelopment funding.
  - o Rehabilitation Construction activities support the acquisition, rehabilitation, and preservation of multifamily units.
  - o Tenant Based Assistance is direct rental payment assistance.
- Owner
  - o Single family development includes funding for housing developers, nonprofits, or other housing organizations to support the development of single family housing.
  - o Single family financing and homebuyer assistance helps households purchase a home, through such activities as mortgage financing, and down payment assistance.
  - o Single family owner-occupied assistance helps existing homeowners who need home rehabilitation and reconstruction assistance.
- Community services includes supportive services, energy assistance, and homeless assistance activities.

In FY 2005, TDHCA received $586,266,263 in total funds. Almost all of this funding was from federal sources, 99 percent of the total. TDHCA committed $625,801,577 in funding for activities that predominantly benefited extremely low, very low, and low income families and individuals. Figure 2.2 shows the distribution of this funding by program activity.

Figure 2.2 FY 2005 Total Funding by Program

Total Funds Committed: $625,801,577

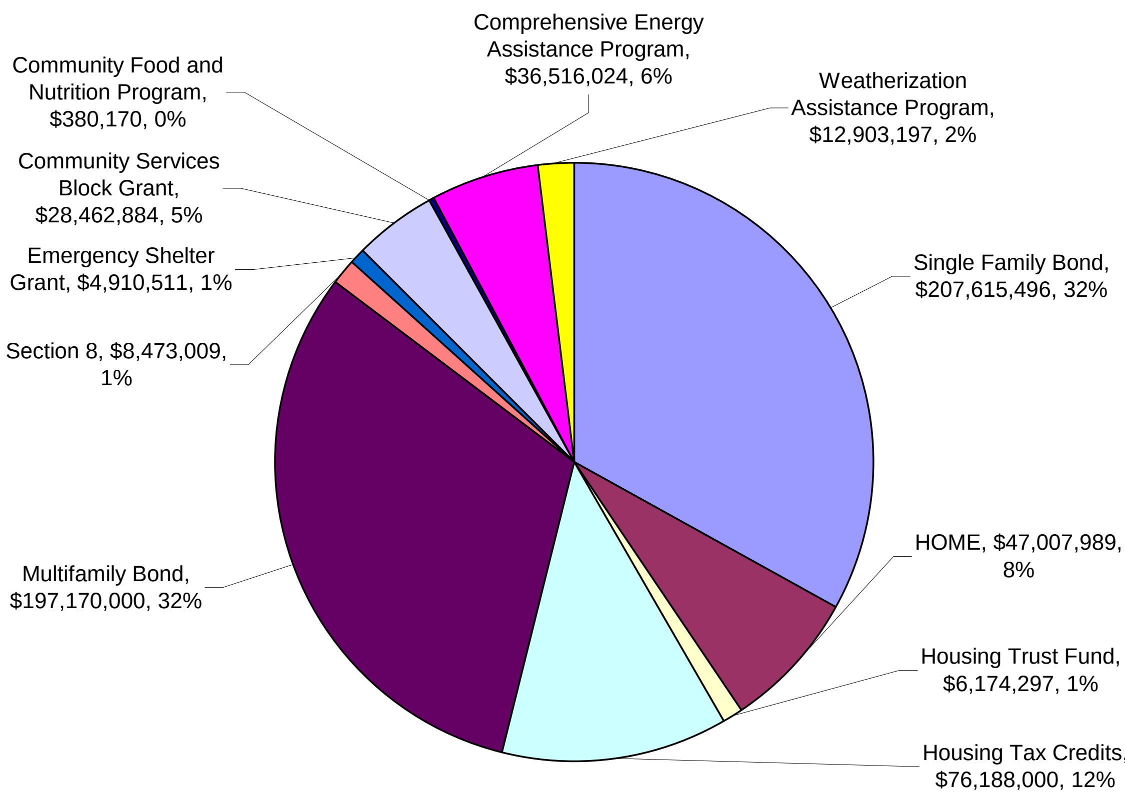

Figure 2.3 TDHCA Funding and Households/Persons Served by Activity FY 2005, All Activities

Household Type	Activity	Committed Funds	# of Households/ Individuals Served*	% of Committed Funds	% of Committed Funds
Renter	New Construction	$254,020,221	18,806	41%	4%
	Rehab. Construction	$34,243,285	4,798	5%	1%
	Tenant Based Assistance	$10,738,854	1,955	2%	0%
Owner	Financing & Down Payment	$218,932,374	2,639	35%	1%
	Rehabilitation Assistance	$24,694,057	488	4%	0%
	Supportive Services	$28,843,054	311,405	5%	60%
	Energy Related	$49,419,221	89,434	8%	17%
	Homeless Services	$4,910,511	93,396	1%	18%
Total for All Activities		$625,801,577	522,921		
Targeted Number to be Served:			534,188		
Percent of Target:			98%		
Total Funding Received FY 2005:		$586,266,263			

*Includes ESG and CSBG which are allocated to individuals.

*Includes ESGP and CSBG, which serve individuals

FUNDING COMMITMENTS AND HOUSEHOLDS SERVED BY INCOME GROUP

The SLIHP uses the following subcategories to refer to the needs of households or persons within specific income groups.

- Extremely Low Income (ELI): 0% to 30% area median family income (AMFI)
- Very Low Income (VLI): 31% to 60% (AMFI)
- Low Income (LI): 61% to 80% (AMFI)
- Moderate Income and Up (MI): >80% (AMFI)

The vast majority of households and individuals served through CEAP, WAP, ESGP, and CFNP earn less than 30 percent area median family income. However, federal tracking of assistance from these programs is based on poverty guidelines, which do not translate easily to an AMFI equivalent. For conservative reporting purposes, assistance in these programs is reported in the VLI category.

The distribution of the Department's housing resources in fiscal year 2005 showed a clear prioritization of assistance to individuals and households with the lowest incomes; see Figure 2.5. The vast majority of households served by the Department were classified as extremely low, very low, and low income.

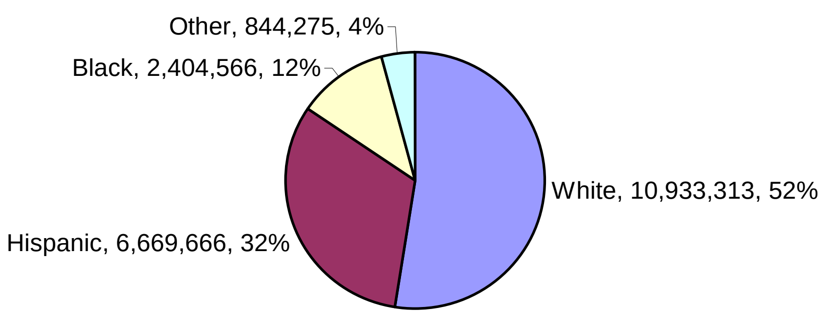
RACIAL COMPOSITION OF HOUSEHOLDS RECEIVING ASSISTANCE

As required by legislation, TDHCA reports on the racial composition of individuals and families receiving assistance. Using 2000 US Census data, TDHCA has delineated the racial composition of the population into four categories: White, Hispanic, Black, and Other. "Hispanic" includes all races that specified "Hispanic" as a category. "Other" includes races other than "White" and "Black" as well as individuals with two or more races. Households assisted through each TDHCA program or activity have been delineated according to these categories. Regional analyses of this racial data are included in the Statement of Activities by Uniform State Service Region section that follows. Please note that the population racial composition charts examine individuals, while the many program racial composition charts examine households.

Information is included for Multifamily Programs, HOME Program single family activities, Single Family Bond, Housing Trust Fund single family activities, and Section 8. The Weatherization Assistance Program, Comprehensive Energy Assistance Program, Community Services Block Grant program, and Emergency Shelter Grants Program allocate funding to several entities with service areas that span across two or more regions, so, racial data for these programs is reported by entity. Office of Colonia Initiatives programs are reported under the funding source: HOME Program for Contract for Deed loans, Single Family Bond for some Contract for Deed and Texas Bootstrap Loan Program loans, and the Housing Trust Fund for Texas Bootstrap loans. No racial data is reported for the Community Food and Nutrition Program.

Figure 2.8: Racial Composition of the State of Texas
20,851,820 Total Individuals



Source: 2000 US Census

Multifamily Programs

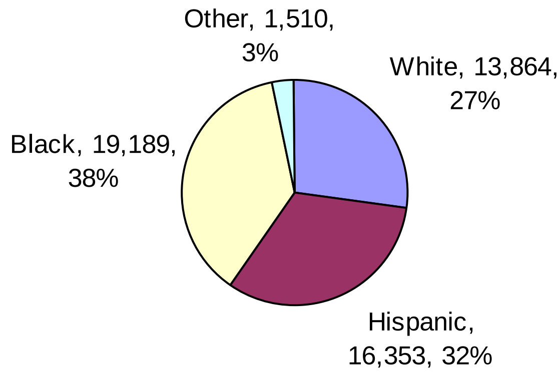
Multifamily data is collected from the 2005 Fair Housing Sponsor Report, which TDHCA-funded housing developments submit to TDHCA every year. The report includes information about the property, including the racial composition of tenants residing at the property, as of a specific date, December 31, of each year. The 2005 report is a snapshot of property characteristics as of December 31, 2004. Multifamily properties receive funding through one or a combination of the following TDHCA programs: Housing Tax Credit Program, Housing Trust Fund, HOME Investment Partnerships Program, and Multifamily Bond Program.

It should be noted that the Housing Sponsor Report does not report on or represent all units financed by TDHCA. Some reports submitted describe properties under construction, which do not have occupied units, some properties did not submit a report, or some properties did not accurately fill out the report.

Statewide, of reports received, only 24 percent of the unit data reported by TDHCA-monitored properties could be used in this analysis. Because of the relatively low percentage of usable data, this chart may not accurately represent the racial distribution of the units. TDHCA is working to increase the quantity and quality of data reported.

Figure 2.9: State Racial Composition of Households Residing In TDHCA-Funded Multifamily Developments, December 2004

50,916 Total Households



HOME Program Single Family Activities

The HOME Investment Partnerships Program funds four basic activities: Rental Development, Homebuyer Assistance, Owner-Occupied Housing Assistance, and Tenant-Based Rental Assistance. Rental Development units are included with the multifamily activities described above.

The following charts depict the racial composition of households receiving assistance through Homebuyer Assistance, which includes HOME-funded Contract for Deed loans and homebuyer assistance combined with rehabilitation; Owner-Occupied Home Repair; and Tenant-Based Rental Assistance from September 1, 2004, through August 31, 2005 (FY 2005). Because of this reporting period, data will include households served under contracts originally awarded in previous years.

Figure 2.10: State Racial Composition of Households Receiving HOME Homebuyer Assistance, FY 2005

354 Total Households

Includes contracts originally awarded from 2000-2004.

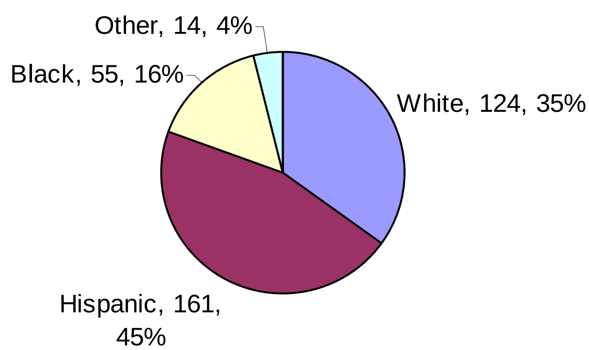


Figure 2.11: State Racial Composition of Households Receiving HOME Owner-Occupied Home Repair, FY 2005

674 Total Households

Includes contracts originally awarded from 2001-2003.

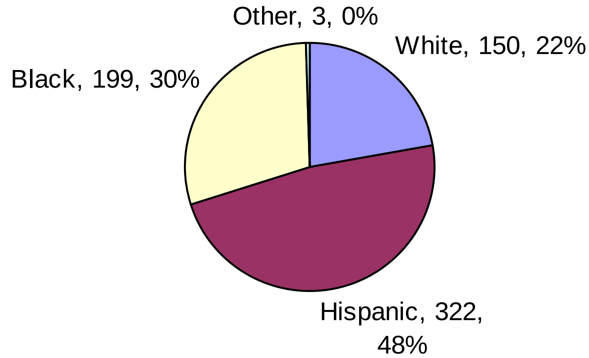

Figure 2.12: State Racial Composition of Households Receiving HOME Tenant-Based Rental Assistance, FY 2005

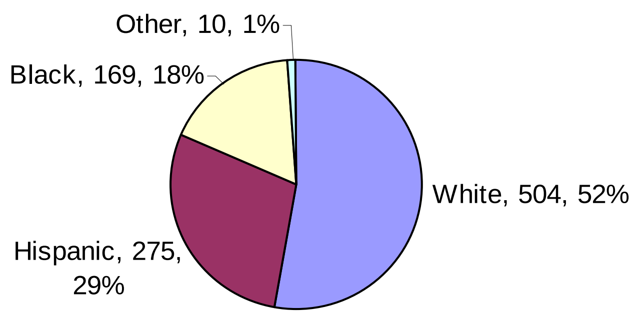
958 Total Households

Includes contracts originally awarded from 2003-2004 (omitting 2001 because of data problems).

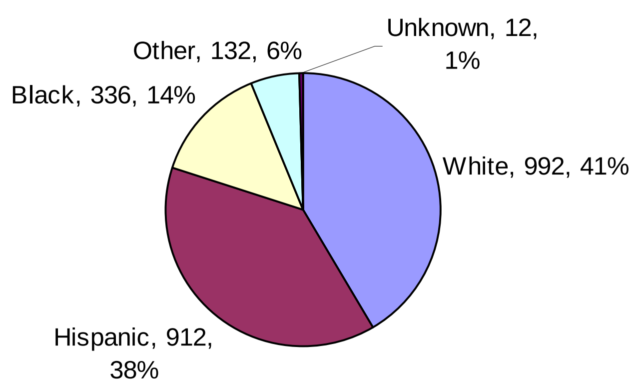


Single Family Bond

Single Family Bond includes households served through the First Time Homebuyer Program (including those that received assistance through the Grant Assistance Program), the Mortgage Credit Certificate Program, and Contract for Deed of Texas Bootstrap loans that were made with bond funds in FY 2005.

Figure 2.13: State Racial Composition of Households Receiving Single Family Bond Assistance, FY 2005

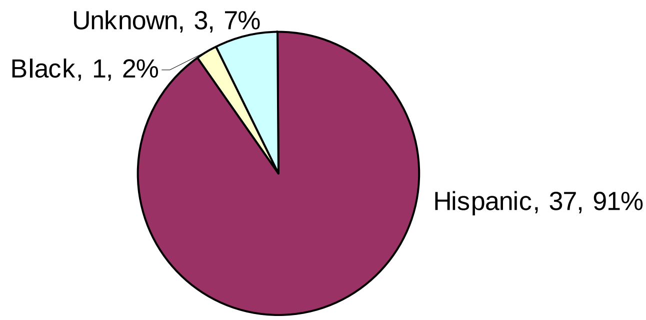
2,384 Total Households



Housing Trust Fund Single Family Activities

In addition to multifamily activities, the Housing Trust Fund also provides funding for the Texas Bootstrap Loan Program, which is administered through the TDHCA Office of Colonia Initiatives. The following chart depicts those Bootstrap loans that were funded in FY 2005. All loans were made in Regions 3, 11, and 13.

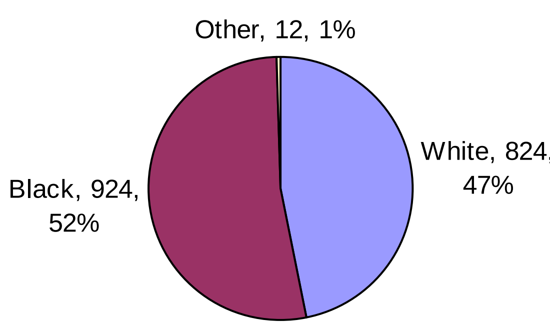
Figure 2.14: State Racial Composition of Households Receiving Housing Trust Fund (Bootstrap) Assistance, FY 2005
40 Total Households



Section 8

The Section 8 Housing Choice Voucher Program funds tenant-based rental assistance directly to households. The following chart shows the racial composition of households that received Section 8 rental payment assistance from September 1, 2004, through August 31, 2005. Because of reporting differences, this chart only shows White, Black, and Other because Hispanic households were not differentiated.

Figure 2.15: State Racial Composition of Households Receiving Section 8 Assistance, FY 2005
1760 Total Households



Weatherization Assistance Program

The Weatherization Assistance Program (WAP) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. Because of this, WAP racial composition data for FY 2005 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

Figure 2.16: State Racial Composition of Households Receiving WAP Assistance, FY 2005

5,416 Total Households

Comprehensive Energy Assistance Program

The Comprehensive Energy Assistance Program (CEAP) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. Because of this, CEAP racial composition data for FY 2005 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

Community Services Block Grant Program

The Community Services Block Grant Program (CSBG) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. In addition, some CSBG subcontractors have been awarded funding for special projects that overlap existing service areas. Because of this, CSBG racial composition data for FY 2005 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

Emergency Shelter Grants Program

The Emergency Shelter Grants Program (ESGG) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions, or multiple subcontractors serve the same area. Because of this, ESGP racial composition data for FY 2005 is listed according to subcontractor. Racial composition for the state is available, but is unavailable at the regional level.

PROGRESS IN MEETING TDHCA HOUSING AND COMMUNITY SERVICES GOALS

The goals, strategies, and objectives established in the Legislative Appropriations Act, the TDHCA *Strategic Plan*, and the *State of Texas Consolidated Plan*, guide TDHCA's annual activities through the establishment of objective performance measures. TDHCA's resulting goals are as follows:

1: INCREASE AND PRESERVE THE AVAILABILITY OF SAFE, DECENT, AND AFFORDABLE HOUSING FOR VERY LOW, LOW, AND MODERATE INCOME PERSONS AND FAMILIES

2: PROMOTE IMPROVED HOUSING CONDITIONS FOR EXTREMELY LOW, VERY LOW, AND LOW INCOME HOUSEHOLDS BY PROVIDING INFORMATION AND TECHNICAL ASSISTANCE.

3: IMPROVE LIVING CONDITIONS FOR THE POOR AND HOMELESS AND REDUCE THE COST OF HOME ENERGY FOR VERY LOW INCOME TEXANS.

4: ENSURE COMPLIANCE WITH THE TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS' FEDERAL AND STATE PROGRAM MANDATES.

5: PROTECT THE PUBLIC BY REGULATING THE MANUFACTURED HOUSING INDUSTRY IN ACCORDANCE WITH STATE AND FEDERAL LAWS.

6: TARGET ITS HOUSING FINANCE PROGRAMS RESOURCES FOR ASSISTANCE TO EXTREMELY LOW INCOME HOUSEHOLDS.

7: TARGET ITS HOUSING FINANCE RESOURCES FOR ASSISTANCE TO VERY LOW INCOME HOUSEHOLDS.

8: PROVIDE CONTRACT FOR DEED CONVERSIONS FOR FAMILIES WHO RESIDE IN A COLONIA AND EARN 60 PERCENT OR LESS OF THE APPLICABLE AREA MEDIAN FAMILY INCOME

9: WORK TO ADDRESS THE HOUSING NEEDS AND INCREASE THE AVAILABILITY OF AFFORDABLE AND ACCESSIBLE HOUSING FOR PERSONS WITH SPECIAL NEEDS THROUGH FUNDING, RESEARCH, AND POLICY DEVELOPMENT EFFORTS.

To avoid duplication of information, progress made towards meeting those goals, the upcoming year's goals, and information on TDHCA's actual performance in satisfying in FY 2005 goals and strategies is provided in Section IV: Action Plan.

STATEMENT OF ACTIVITIES BY UNIFORM STATE SERVICE REGION

This section describes TDHCA's FY 2005 activities by Uniform State Service Region. The regional tables do not include information for WAP, CEAP, ESGP, CSBG, and CFNP because figures are not available at the regional level. Additionally, Office of Colonia Initiatives program figures are reported with the funding source, e.g., most contract for deed conversions are reported under HOME Program homebuyer assistance.

As required by legislation, TDHCA reports on the racial composition of individuals and families receiving assistance. Regional Information is included for Multifamily Programs, HOME Program single family activities, Single Family Bond, and Section 8.Housing Trust Fund single family activities (Bootstrap Loan Program loans) served only three regions in FY 2005, regions 3, 11, and 13, so regional tables are not included. Additionally, Weatherization Assistance Program, Comprehensive Energy Assistance Program, Community Services Block Grant program, and Emergency Shelter Grants Program figures are not reported by region, so regional tables are not included. For more information on racial reporting and these program categories, please see "Racial Composition of Households Receiving Assistance" under Statement of Activities.

REGION 1

TDHCA allocated $3,826,608 in the region in FY 2005. Multifamily development accounted for the largest amount of this total: 62 percent. Low income households received the highest percentage of funding: 55 percent.

Racial Composition of Households Receiving Assistance in Region 12

Based on 2000 US Census data, Region 12 has the following racial breakdown. "Hispanic" includes all races that specified "Hispanic" as a category. "Other" includes races other than "White" and "Black" as well as individuals with two or more races.

Figure 2.154: Racial Composition of Region 12

524,884 Total Individuals

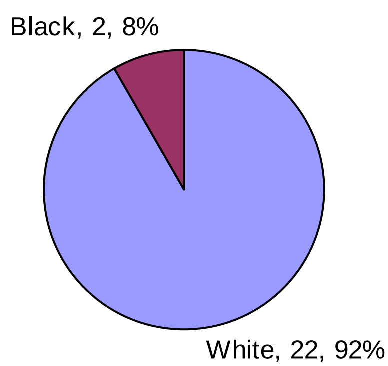
No Single Family Bond loans were made during FY 2005 in Region 12

Section 8

The Section 8 Housing Choice Voucher Program funds tenant-based rental assistance directly to households. The following chart shows the racial composition of households that received Section 8 rental payment assistance from September 1, 2004, through August 31, 2005. Because of reporting differences, this chart only includes White, Black, and Other.

Figure 2.160: Region 12 Racial Composition of Households Receiving Section 8 Assistance, FY 2005

24 Total Households



REGION 13

TDHCA allocated $18,432,510 in the region in FY 2005. Financing and down payment assistance accounted for the largest amount of this total: 81 percent. Low income households received the highest percentage of funding: 58 percent.

PARTICIPATION IN TDHCA PROGRAMS

TDHCA continually works to increase statewide participation in its programs. Because TDHCA is primarily a pass-through funding agency, most funding, except that awarded through many Community Affairs programs, is typically distributed through a formal competitive process. Therefore, it is incumbent upon TDHCA to increase the public's awareness of available funding opportunities so that its funds will reach those in need at the local level. Below are the approaches taken by TDHCA to achieve this end:

- Throughout the year, TDHCA staff participate in informational workshops and conferences across the state to share information with organizations that are unfamiliar with TDHCA programs. Organizations interested in becoming affordable housing providers are actively encouraged to contact the TDHCA for further technical assistance in accessing TDHCA programs.
- The TDHCA *Program Guide* provides a comprehensive, statewide housing resource guide for both individuals and organizations across the state. The *Program Guide* provides a list of housing and housing-related programs operated by TDHCA, HUD, and other federal and state agencies.
- The TDHCA website, through its provision of timely information to consumers, has become one of TDHCA's most successful marketing tools.
- A comprehensive database, including public housing authorities (PHAs), community development housing organizations (CHDOs), community development corporations (CDCs), area agencies on aging (AAAs), homebuyer education providers, local governments, and other community-based organizations, is used to streamline TDHCA efforts to inform interested parties of available funding, public hearings, and other activities.
- TDHCA establishes or serves on a wide variety of committees and workgroups, which serve as valuable resources to gather input from people working at the local level. These groups share information on affordable housing needs and available resources and help TDHCA to prioritize these needs.

CITIZEN PARTICIPATION IN PROGRAM PLANNING

TDHCA values and relies on community input to direct resources to meet its goals and objectives. In an effort to provide the public with an opportunity to more effectively give input on TDHCA's policies, rules, planning documents, and programs, TDHCA has consolidated its public hearings. Each year there will be one hearing per Uniform State Service Region that will cover all TDHCA programs. An additional Board hearing is held annually so that citizens may provide comment directly to the Board members. Staff is available at each hearing to answer questions and lend technical assistance to attendees. In addition to these 13 hearings, individual program sections hold various hearings and program workshops throughout the year.

TDHCA ensures that all programs follow the citizen participation and public hearing requirements as outlined in the Texas Government Code. Hearing locations are accessible to all who choose to attend and are held at times accessible to both working and non-working persons. A database has been developed that includes citizen and nonprofit organizations, local governments, state legislators, public housing authorities, and local public libraries so that, when a public hearing or public comment period is scheduled, all interested parties are notified. Additionally, pertinent information is posted in the *Texas Register*, in *Breaking Ground* (the TDHCA newsletter), on TDHCA's website, in several association newsletters, and in the newspapers that are local to the hearing location. Participation and comments are encouraged and can be submitted either at a public hearing or in writing via mail, fax, email, and, in some cases, directly at the TDHCA website.

For information on the citizen participation process for the *2006 State of Texas Low Income Housing Plan and Annual Report*, please see Section 5: Public Participation.

HOUSING SPONSOR REPORT ANALYSIS

TDHCA requires that housing developments of 20 units or more that receive financial assistance from TDHCA submit an annual housing sponsor report. This report includes the contact information for each property, the total number of units, the number of accessible units, the rents for units by type, the racial composition information for the property, the number of units occupied by individuals receiving supported housing assistance, the number of units occupied delineated by income group, and a statement as to whether there have been fair housing violations at the property. This information depicts the property information as of a specific date, December 31, of each year.

Because of the extensive nature of the information, TDHCA has elected to provide this report under a separate cover: the TDHCA *Housing Sponsor Report* (HSR). The HSR includes an analysis of the collected information, as well as the information submitted by each property. In addition, in fulfillment of §2306.072(c)(8), the HSR contains a list of average rents by Texas county, based on housing sponsor report responses from TDHCA-funded properties.

For more information and a copy of this report, please contact the TDHCA Division of Policy and Public Affairs at (512) 475-3976 or visit http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm.

GEOGRAPHIC DISTRIBUTION OF HOUSING TAX CREDITS

The Housing Tax Credit (HTC) Program receives authority from the US Treasury Department to provide tax credits to encourage the development and preservation of affordable rental housing. The Internal Revenue Code authorizes a state HTC volume cap based on a per capita amount of the state population. Tax credits are also awarded independently of the volume cap to developments with tax-exempt bond financing. These two credit types are typically referred to as the 9% and 4% HTCs respectively. Section 2306.111(d) of the Government Code requires that TDHCA use a Regional Allocation Formula (RAF) to allocate its 9 % HTCs to the 13 Uniform State Service Regions it uses for planning purposes. Because the HTCs represent the State's most significant source of financing for multifamily development and to help review the allocation of HTCs under the RAF, this section of the Plan discusses the geographical distribution of HTCs.

For FY 2005, TDHCA had $42,575,583 credits to allocate through the 9% application process. This amount was comprised of the annual volume cap, recaptured credits, and $531,375 from the national pool of unused credits from other states. Over the course of the year, the total amount of credits approved by the Board, including forward commitments was $45,218,474. At the July 27, 2005, TDHCA Board meeting, 81 applications were approved for 9% HTCs totaling $42,175,273. Any remaining 2005 credit authority will be allocated to applicants on the 2005 waiting list. Alternately, if the credit balance meets the IRS de minimus requirements, it may be rolled into the 2006 credit ceiling. Under either scenario, TDHCA will be eligible to receive credits from the national pool of unused credits. The 4% awards, which are approved by the Board throughout the year, totaled $30,969,526 for FY 2005. Information on these awards, as well as the entire HTC inventory, can be found on the HTC Program's web page at www.tdhca.state.tx.us. Figures 2.172 and 2.173 are maps of the FY 2005 9% and 4% awards.

As can be seen by the differences in the distribution patterns in figures 2.9 and 2.10, the 4% credits work more effectively in larger metropolitan areas of the state. Besides one development in Georgetown (Region 7) and Corpus Christi (Region 11), the remaining 4% developments were concentrated in three regions of the state.

Figure 2.172 FY 2005 9% HTC Awards by Place

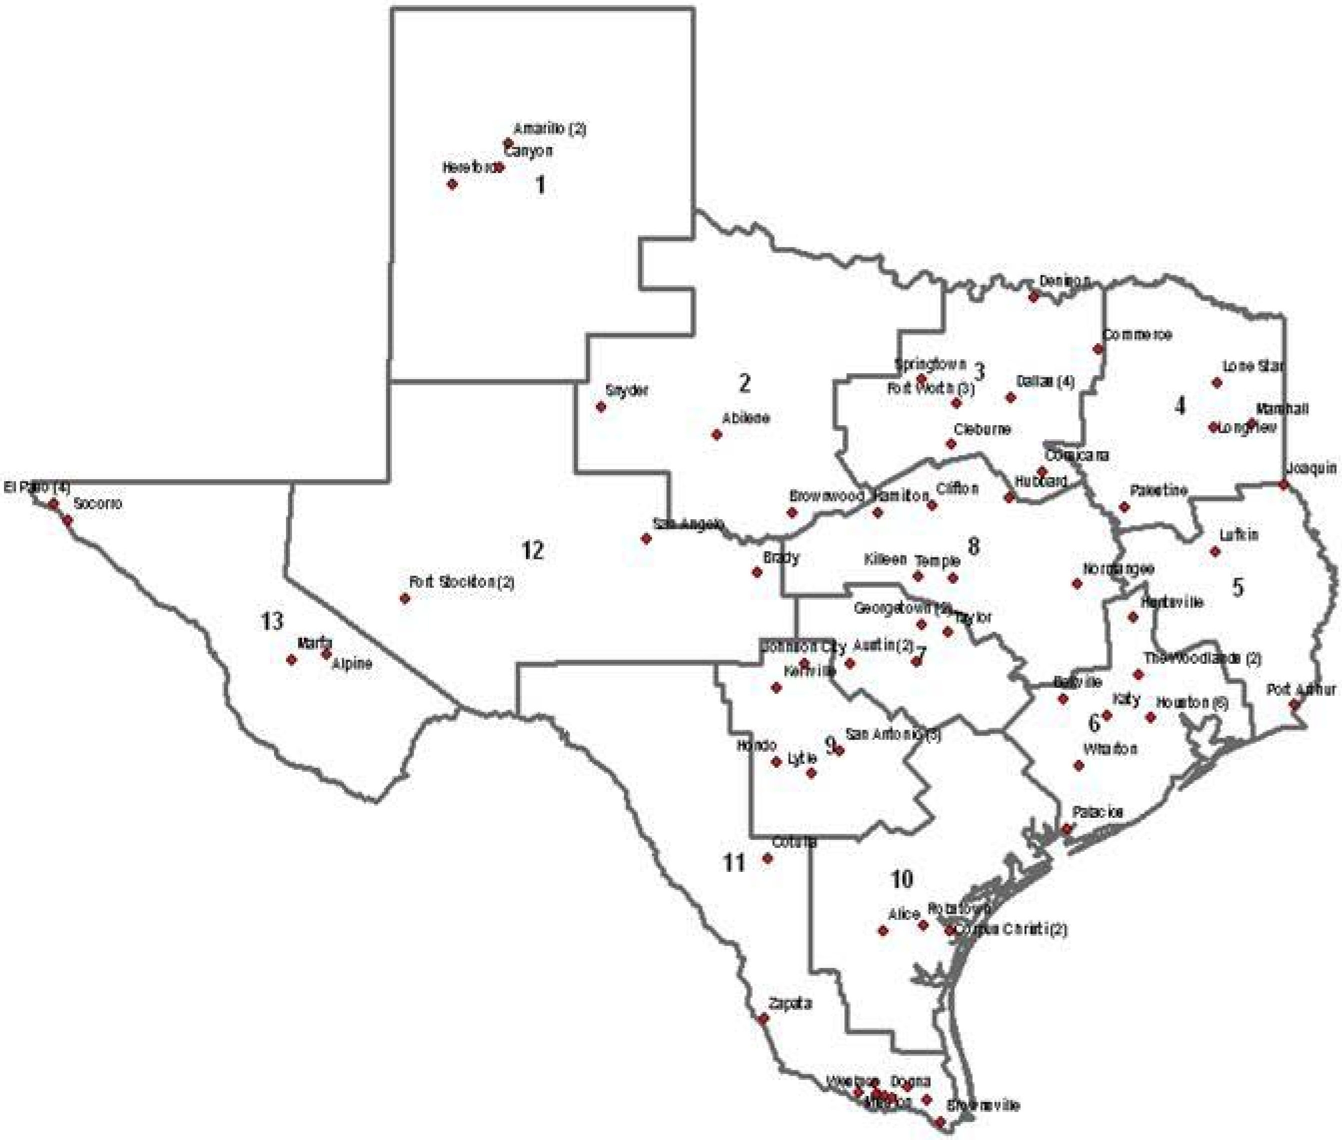

Figure 2.173 FY 2005 4% HTC Awards by Place

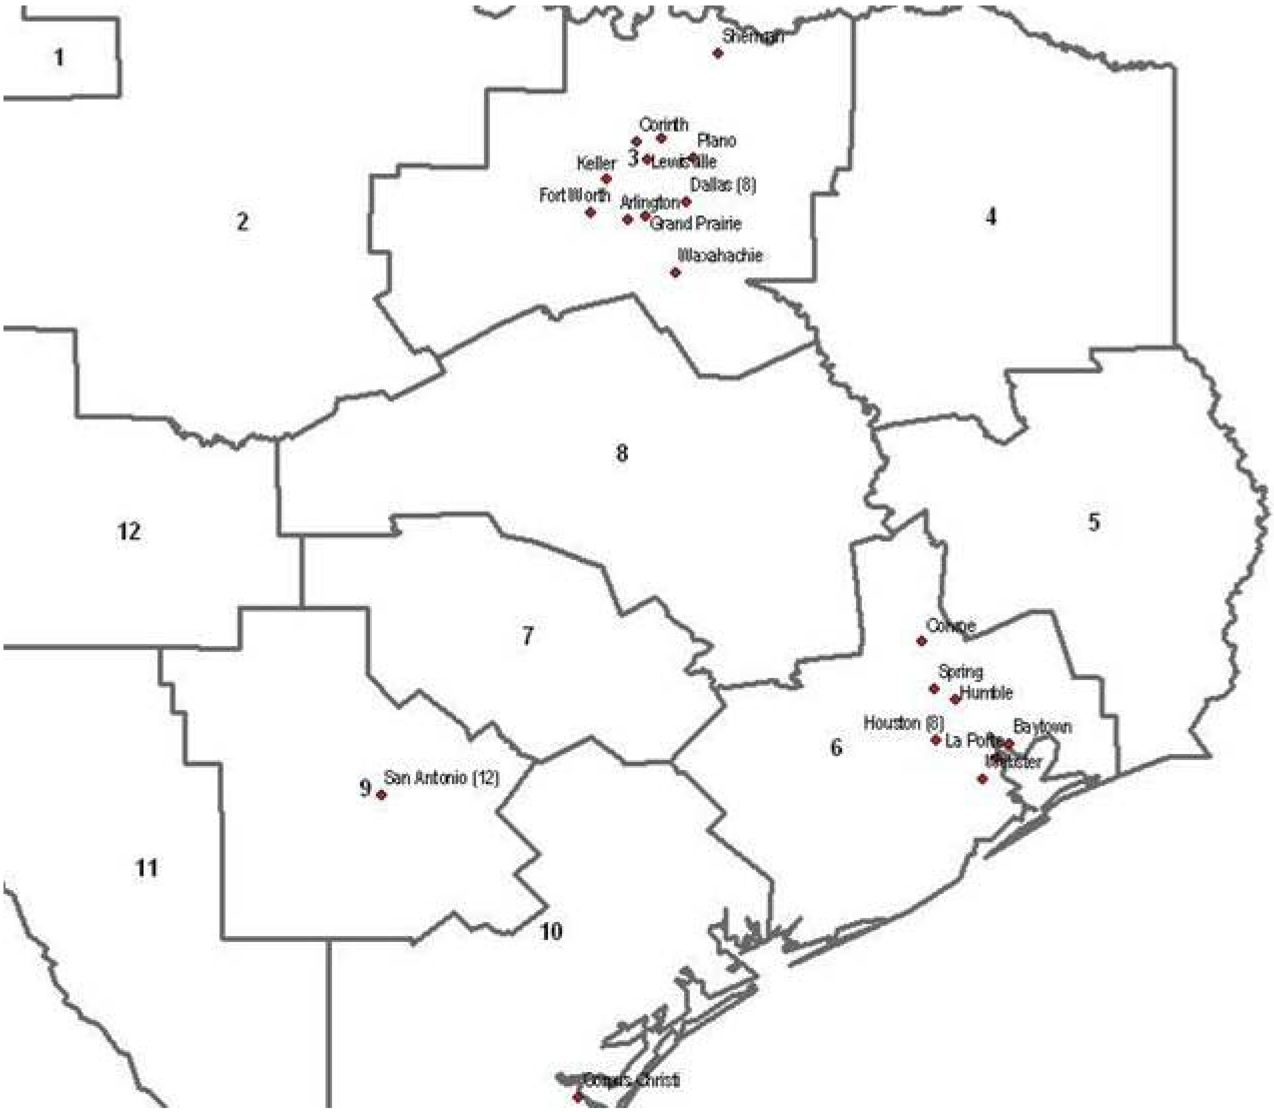

DISTRIBUTION OF TDHCA HOUSING TAX CREDIT AWARDS (HTC) 2005

The following charts show the distribution of TDHCA's 4% and 9% HTC awards for 2005. The racial composition of each census tract containing 2005 HTC award units was compared with the racial composition of the county in which the tract is located. In addition, the income level of each census tract receiving an award was compared with the income level of the county in which the tract is located.

Awards were made within the following counties: Anderson, Angelina, Atascosa, Austin, Bell, Bexar, Blanco, Bosque, Brewster, Brown, Cameron, Collin, Dallas, Deaf Smith, Denton, El Paso, Grayson, Gregg, Hamilton, Harris, Harrison, Hays, Hidalgo, Hill, Jefferson, Jim Wells, Johnson, Kerr, LaSalle, Leon, McCulloch, Matagorda, Medina, Montgomery, Morris, Navarro, Nueces, Parker, Pecos, Potter, Presidio, Randall, Scurry, Shelby, Tarrant, Taylor, Tom Green, Travis, Walker, Wharton, Williamson, and Zapata.

Methodology

Racial Characteristics

The percentage racial composition was delineated as follows: "White," "Hispanic," "Black," and "Other Race." Starting with Census 2000, the question on race asks respondents to report the race or races they consider themselves to be. For the purpose of this study:

- "White" represents persons who indicated that they were non-Hispanic and "White" only.
- "Black" represents person who indicated that they were non-Hispanic and "Black" only.
- "Other Race" population information was calculated by subtracting persons who indicated that they were "White Only" or "Black Only" from the reported non-Hispanic population total.
- The Census treats "Hispanic origin" and race as separate and distinct concepts with separate questions being asked on race and Hispanic origin. The question on Hispanic origin asks respondents if they are Spanish, Hispanic, or Latino. Thus, Hispanics may actually be of any race. However, due to significant observed differences in poverty and income levels between Hispanic and non-Hispanic populations, "Hispanic" was treated as a distinct "race" for this study.

After determining which race comprised the largest percentage of the county's population, each census tract was categorized as a "Majority" or "Minority" tract. Majority tracts are those in which the race that comprised the highest percentage of the county population had an equal or greater percentage at the tract level. The "Majority" and "Minority" units in each county were then totaled to determine the percentage distribution. It should be noted that "White" was not always the majority county population. For example, in the San Antonio and El Paso areas, the Hispanic population comprised the majority county population.

Income Characteristics

The median family income (MFI) of each tract awarded units was compared with the low income threshold of the county containing those tracts. A county's low income threshold was calculated as 60 percent of the MFI for the county. That is, tracts with an MFI that is less than 60 percent of the county's MFI are considered low income tracts. Tracts with an MFI that is greater than or equal to 60 percent of the county's MFI are considered non-low income tracts.

8,218 Total Units

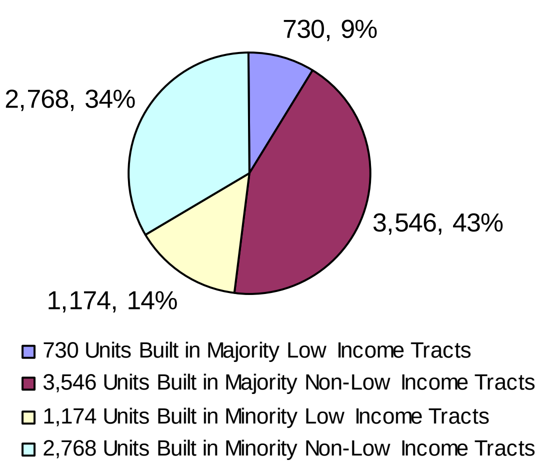

Figure 2.177 Total 2005 HTC 9% Unit Distribution by Census Tract Racial Characteristics*

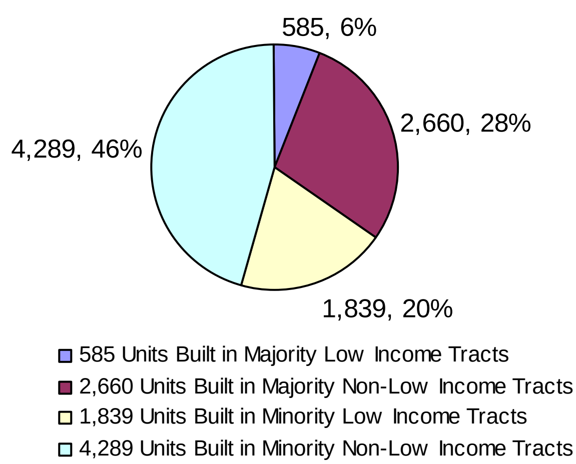
9,373 Total Units



*Units built in majority tracts are those located in tracts in which the race that comprises the highest percentage of the county's population has a percentage that is equal to or greater than that of the county.

EFFECT OF THE TWO TIMES PER CAPITA RULE

There are a number of conditions that affect an application site's eligibility for Housing Tax Credits. One of these conditions relates to the previous development of housing tax credits within a place or county. The specific requirement as stated in §2306.6703. Ineligibility for consideration is that an application will be ineligible if:

> *"(4) the development is located in a municipality or, if located outside a municipality, a county that has more than twice the state average of units per capita supported by housing tax credits or private activity bonds, unless the applicant:*
> *(A) has obtained prior approval of the development from the governing body of the appropriate municipality or county containing the development; and*
> *(B) has included in the application a written statement of support from that governing body referencing this section and authorizing an allocation of housing tax credits for the development."*

As of the close of the State fiscal year on August 31, 2005, the following municipalities had more than twice the state average of units per capita supported by housing tax credits or private activity bonds. It should be noted that this list is subject to periodic revisions with changes in the HTC property inventory and in the population estimates used for the per capita calculation.

Of the 1,510 municipalities in Texas, 159 (10.5 percent) had more than twice the per capita number of units. Of the 159 municipalities listed, 128 are rural (11 percent of rural municipalities) and 31 are urban/exurban (9 percent of urban/exurban municipalities).

The following counties had more than twice the state average of units per capita supported by housing tax credits or private activity bonds: Armstrong, Crockett, Deaf Smith, La Salle, Sutton, and Waller.

Figure 2.178 provides the funding distribution of FY 2005 awards by region. The table shows that there were only minor differences in the targeted 9% HTC distribution under the RAF and the actual HTC distribution. Again, as was the case with the maps, it is clear that the 4% HTCs have a limited geographic distribution.

Figure 2.178 FY 2005 HTC Awards by Region

Region	All HTCs	% of All HTCs	4% HTCs	% of 4% HTCs	9% HTCs	% of 9% HTCs	Targeted 9% Distribution Under RAF	Difference b/w Actual and Targeted

SECTION 3: HOUSING ANALYSIS

This section of the Plan contains an overview of the affordable housing needs in the state and an estimate and analysis of the housing needs in each region.

DATA SOURCES AND LIMITATIONS

The information provided in this section should be considered within the context of its limitations. The Department recognizes that an undistorted assessment of housing need can be found only at the local level based on the direct experience of local households. The following issues should be considered when reviewing the information contained in this report:

- Nuances of housing need are lost when data is aggregated into regional, county, and statewide totals. For example, housing needs in rural communities are often distorted when reported at the county level because housing needs are often very different in rural and urban areas. The large population of urban metropolitan areas can skew the data and mask the needs of the rural areas.
- Data available on the condition of the housing stock, the homeless population, and the housing needs of special needs populations is very limited.

2000 Census and 2000 CHAS data is primarily used in this report. The content and format of the Census-based tables, graphs, and maps provided in this section were derived, in part, from a methodology for housing needs assessment in the *National Analysis of Housing Affordability, Adequacy, and Availability: A Framework for Local Housing Strategies*. The Urban Institute prepared this document for the US Department of Housing and Urban Development (HUD). It provides a methodology with which to describe and analyze local housing markets in order to develop strategies for addressing housing problems and needs. The document served as a guide for the preparation of Comprehensive Housing Affordability Strategy (CHAS) reports. As such, it provides a systematic framework for housing market analysis. HUD collaborated with the US Census Bureau to develop special tabulations of the 2000 Census data.

The CHAS database classifies households into five relative income categories based on reported household income, the number of people in the household, and geographic location. These income categories are used to reflect income limits that define eligibility for HUD's major assistance programs, as well as for other housing programs, such as the Housing Tax Credit Program. Households are classified into income groups by comparing reported household income to HUD-Adjusted Median Family Income (HAMFI). The income limits are calculated by household size for each metropolitan area and non-metropolitan county in the United States and its territories. They are based on HUD estimates of median family income with several adjustments as required by statute. The income classifications are extremely low income, very low income, low income, moderate income, and above 95 percent of HAMFI.[1]

The income limits for metropolitan areas may not be less than limits based on the state non-metropolitan median family income level and must be adjusted accordingly. Income limits must be also adjusted for family size and may be adjusted for areas with unusually high or low family income or housing-cost-to-income relationships.

[1] The CHAS figures for moderate and higher income households in Region 11 indicate that there are only 199 persons with incomes between 80-95 percent of the AMFI. TDHCA has been unable to get more accurate information for this segment of the population. However, the planning impact for the SLIHP is relatively low because, except for the first time homebuyer program which is done through a network of participating lenders, TDHCA programs serve persons below 80 percent AMFI.

Unit affordability compares housing cost to local area HAMFI. Affordable units are defined as units for which a household would pay no more than 30 percent of its income for rent and no more than two and one-half times its annual income to purchase. Since HUD's adjusted median family incomes are estimated for a family of four, affordability levels are also adjusted to control for various-sized units based on the number of people that could occupy a unit without overcrowding. This adjustment is made by multiplying the threshold described above by 75 percent for a 0–1 bedroom unit, 90 percent for a two bedroom unit, and 104 percent for a 3+ bedroom unit.

Homeless figures are taken from 2000 Census group quarters population and type tables, contained in Census 2000 Summary File 1. Group quarters type designations include institutional quarters, which include correctional facilities, hospitals, and juvenile institutions, as well as noninstitutional quarters, which include military quarters, group homes, dormitories, and other situations. Based on the Definitions of Subject Characteristics contained in the Technical Documentation for *Summary File 1: 2000 Census of Population and Housing* published by the US Census Bureau, TDHCA has elected to use "other noninstitutional group quarters" and "other nonhousehold living situations" census figures to represent the homeless population in each region. "Other noninstitutional group quarters" counts individuals in shelters for abused women, soup kitchens, mobile food vans, and other targeted nonsheltered outdoor locations where there is evidence of human occupation. "Other nonhousehold living situations" counts individuals with no usual home residing in hostels and YMCAs who were not counted in other tabulations.

The US Census also completed a special tabulation, Emergency and Transitional Shelter Population: 2000, based on metropolitan areas with 100 or more people in emergency and transitional shelters. It must be noted that this data only refers to metropolitan areas with 100 or more people in shelters, so is not a comprehensive picture of the total population living in shelters. In the region sections of this document, if the Census counted individuals living in emergency shelters in a metropolitan area that is located in the region, those figures are provided.

It must be emphasized that the regional estimates of the homeless populations are not comprehensive. The various definitions of homeless and methods in counting the homelessness make definitive tabulations difficult. The Texas Interagency Council for the Homeless estimates that about 200,000 people, or 1 percent of the state's population, are homeless.[2] The Census figures for individuals living in "other noninstitutional group quarters" and "other nonhousehold living situations" count only 28,377 individuals statewide.

The needs assessment data is augmented with additional information from the perspective of local officials, where available. In 2004, there was a series of Regional Advisory Committee (RAC) meetings held across the state to address regional planning issues. In March 2003, TDHCA conducted the 2003 State of Texas Community Needs Survey. This survey was designed to provide a better understanding of housing and community development needs, issues, and problems at the state, regional, and local levels. The survey gave local officials, who are most familiar with the unique characteristics of their communities, a voice in determining how Texas's affordable housing, supportive service, and community development needs can be most effectively addressed. TDHCA plans to conduct a new survey in 2006.

STATE OF TEXAS

The state level housing analysis includes information on demographics, special needs populations, and affordable housing need indicators. Department plans reflect this statewide information as well as the consideration of affordable housing assistance from various sources.

DEMOGRAPHIC CHARACTERISTICS

Texas is one of the fastest growing states in the nation. According to recent Census data, Texas population expanded by nearly a quarter (22.8 percent) between 1990 and 2000, far exceeding the national growth average of 13.2 percent for the same decade. The increase in state population by 3,865,310 persons was the largest of any decade in Texas history. More than one of every nine persons added to the population of the United States in the 1990s was added in Texas.[3]

Projected Population Change and Implications for Housing Need

Looking at long-term demographic projections, it is clear that the demand for affordable and subsidized housing will increase in the coming years.

- The present state population of 20.9 million is expected to surge to 50.4 million by 2040.
- The Anglo population will account for only 3.9 percent of net population growth from 2000 to 2040, meaning that more than 96 percent of the total net increase in Texas population between 2000 and 2040 will be due to the non-Anglo population.
- Anglo population is expected to grow by 10.4 percent between 2000 and 2040, while blacks are expected to increase by 65.0 percent and Hispanics by 348.7 percent.
- The population is becoming older: the median age will increase from 32.3 in 2000 to 38.3 in 2040. The percentage of the population that was 65 or older was 9.9 percent in 2000 but will increase to 20 percent by 2040.
- Growth in the number of households, projected at 162.1 percent over the period 2000-2040, will outstrip population growth: 142.6 percent during the same period.

Expected housing demand is directly linked to projected changes in population characteristics. The current ethnic shift is significant because of the substantial differences between the races in terms of income level. The absolute difference in median household income between Anglos and Blacks was $13,602 in 1989, but $17,857 in 1999; and the Anglo-Hispanic difference was $12,242 in 1989, but $17,289 in 1999. Similarly, the poverty rates of 23.4 percent for Blacks and 25.4 percent for Hispanics were still roughly three times as high as the 7.8 percent of persons in poverty among Anglos. Because of these disparities, households in Texas will become poorer over the coming decades unless the relationship between ethnicity and income somehow changes.[4]

A correlation also exists between income and age. According to the 2000 Census, 13.1 percent of Texans age 65 and older live below the poverty level. Lower incomes combined with rising healthcare costs contribute to the burden of paying for housing. Approximately 30 percent of all elderly households spend more than 30 percent of their income on housing, while 14 percent spend more than 50 percent of their

---

[3] Information for the Housing Analysis comes from the 2000 US Census except where noted otherwise.
[4] Texas A&M University, *A Summary of the Texas Challenge in the Twenty-First Century: Implications of the Population Change for the Future of Texas,* by Steve H. Murdock, Steve White, Md. Nazrul Hoque, Beverly Pecotte, Xiuhong You, and Jennifer Balkan (College Station, TX: Department of Rural Sociology, December 2002).

income on housing. These statistics take on new urgency when considered alongside the anticipated upsurge in the state's elderly population.

Not only will the demographics of the population be changing, but so will its needs. The faster growth in number of households than in total population is a reflection of the large number of non-Anglos who will enter household-formation ages during this time period. More young families mean an increased demand for housing.[5]

Poverty and Income

According to the 2000 Census, Texas has the eighth highest overall poverty rate in the nation, with a rate of 15.4 percent compared to the national rate of 12.4 percent. Poverty conditions along the Texas-Mexico border warrant special attention. Parts of the region, like McAllen-Edinburg-Mission, suffer from an unemployment rate double that of the state's (12 percent vs. 6.1 percent) and less than half of state's per capita income average. Fifteen counties along the border have a poverty rate of at least 25 percent, almost double the national average. Conditions are particularly acute in the colonias, unincorporated areas along the Texas-Mexico border lacking infrastructure and decent housing. It is estimated that 43 percent of colonia residents live below the poverty level.

The poverty rate for all family households in Texas, different from the overall poverty rate, is expected to increase from the 2000 figure of 11.4 percent to 15.4 percent by 2040.[6] The primary reasons for this are the rapid growth of present minority populations and the dominance in the economy of low-paying, particularly service-industry, jobs.[7] While manufacturing and mining continue to decline, Texas ranked third in the nation in 2003 for service industry job creation. In 2002 the top two most common jobs in Texas were retail salesperson and cashier. Of course, these occupations are not high-paying. According to US Bureau of Labor Statistics data, eight of the top ten most common jobs in Texas earn incomes that fall at least $10,000 below the state median income of $33,770. Considering this fact, the existing income imbalance is clear.

Many families who rely on these low-wage occupations for a living find it difficult to cover all essential expenses. According to a study by the Center for Public Policy Priorities, "a significant proportion of families throughout the state struggle paycheck-to-paycheck to make ends meet." The study examined a typical family's fundamental expenses, such as housing, food, child care, medical costs, transportation, taxes, etc., and compared the total bill to typical wages earned in the 27 Texas Metropolitan Statistical Areas. The study asserts that a family of four in Texas requires a household hourly income of $18 to $22 per hour (depending on the metro area in which the family lives) to simply meet its most basic needs. In a majority of Texas metro areas, however, half of the total employment is in occupations with a median wage under $10 per hour.[8]

Furthermore, expected economic growth will not necessarily lift the lowest income groups. The Texas Comptroller's Economic Update predicts that the fastest growing sector of the state economy over the

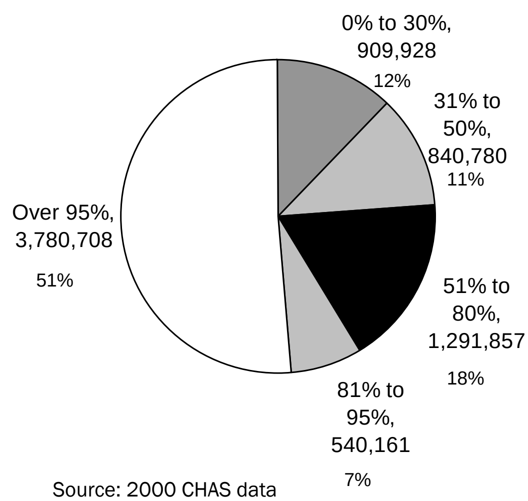
[8] Ibid.

next decade will be largely in industries requiring specialized education and skills. These industries include high tech communications, engineering, and research. While this progress may buoy state growth figures, it is unlikely to raise many low income families, who may not have the necessary education or training, from their current positions.

To provide a more detailed breakdown of the population by income level, this report will use the five income groups designated by HUD. Households are classified into these groups by comparing reported household incomes to HUD-adjusted median family incomes (HAMFI). The income level definitions are as follows:

- Extremely Low Income: At or below 30 percent of HAMFI
- Very Low Income: Between 31 percent and 50 percent of HAMFI
- Low Income: Between 51 percent and 80 percent of HAMFI
- Moderate Income: Between 81 percent and 95 percent of HAMFI
- Above 95 percent of HAMFI

Figure 3.1: Households by Income Group in Texas, 2000



Source: 2000 CHAS data

Figure 3.1 indicates the 2000 distribution of households by income group across Texas by number and percentage. A total of 41 percent of all households are in the low income range (0 to 80 percent of HAMFI). Meeting the needs of this large portion of the state's households is TDHCA's primary focus.

AFFORDABLE HOUSING NEED

When analyzing local housing markets and developing strategies for meeting housing problems, HUD suggests the consideration of several factors. These factors include how much a household spends on housing costs, the physical condition of the housing, and whether or not the household is overcrowded. The following table reveals the number and percentage of households with at least one housing need by income category and household type.

Figure 3.2: Households with Housing Need by Income Group

		Renter Households: At Least One Problem	Renter Households: Total Households	Renter Households: Percent with At Least One Problem	Owner Households: At Least One Problem	Owner Households: Total Households	Owner Households: Percent with At Least One Problem

Source: 2000 CHAS data

Physical Inadequacy (Lack of Kitchen and Plumbing Facilities)

The measure of physical inadequacy available from the CHAS database tabulation of the 2000 Census is the number of units lacking complete kitchen and/or plumbing facilities. While this is not a complete measure of physical inadequacy, the lack of plumbing and/or kitchen facilities can serve as a strong indication of one type of housing inadequacy. Figure 3.3 demonstrates that among the physically inadequate housing units for households under 80 percent of HAMFI, 44 percent are affordable to extremely low income households.

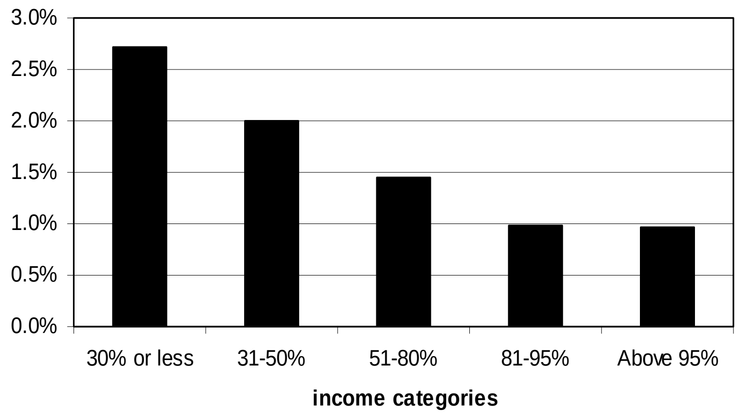
Figure 3.3: Units Lacking Kitchen and/or Plumbing Facilities by Affordability Category, 2000

	Number	Percent
0% to 30%	25,817	44%
31% to 50%	15,907	27%
51% to 80%	16,341	28%
Total	58,065	100%

Source: 2000 CHAS data

Slightly more than 1 percent of all renter households in Texas lack complete kitchen or plumbing facilities. The following table shows the distribution of this problem by income group. Households in the lowest income group, less than 30 percent HAMFI, have the highest incidence of physically inadequate housing.

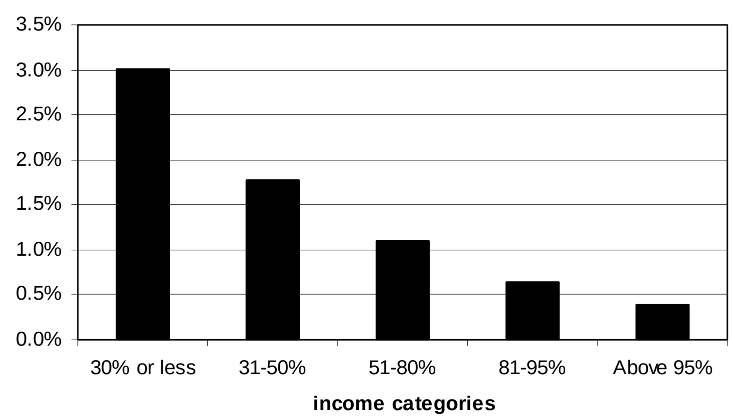
Figure 3.4: Renter-Occupied Units Lacking Complete Kitchen/Plumbing by Percent



Source: 2000 CHAS data

As is the case with renter households, inadequate kitchen and plumbing is a greater problem for the lowest income categories of owner households. A full 3 percent of owner households earning below 30 percent HAMFI lack full kitchen or plumbing facilities.

Figure 3.5: Owner-Occupied Units Lacking Complete Plumbing/Kitchen by Percent

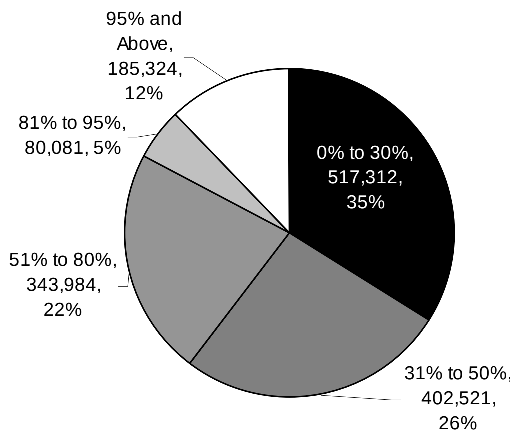


Source: 2000 CHAS data

Excess Housing Cost Burden

An excess cost burden is identified when a household pays more than 30 percent of its gross income for housing costs. When so much is spent on housing, other basic household needs may suffer. Figure 3.6 shows the number and percentage of households with excess housing cost burden by income group.

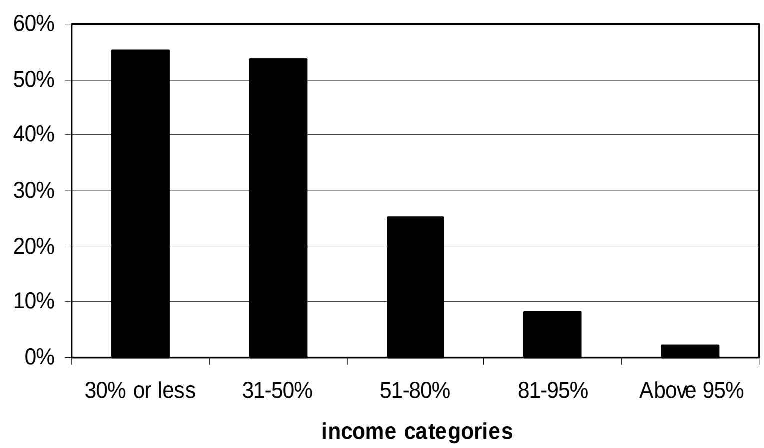
Figure 3.6: Excess Housing Cost Burden by Income Group, 2000



Source: 2000 CHAS Data

As the following graph shows, a majority of renter households in the lowest two income categories, totaling more than 540,000 households, is burdened by paying an excess portion of income toward housing. This is much greater than in the highest income category, above 95 percent HAMFI, where only 2.2 percent of households experience the problem.

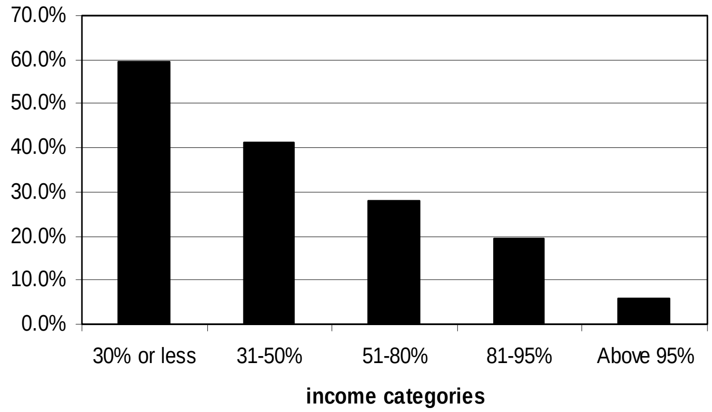
Figure 3.7: Renter Households with Excess Housing Cost Burden (>30% of Income) by percent



Source: 2000 CHAS data

As shown in the following graph, excess housing cost burden affects 59.3 percent of owner households in the lowest income category. This figure, representing a majority, is much higher than the 5.7 percent of households affected in the highest income category. The graph illustrates the direct correlation between owner income category and a owner household's likelihood of experiencing this problem.

Figure 3.8: Owner Households with Excess Housing Cost Burden (>30% of Income) by percent

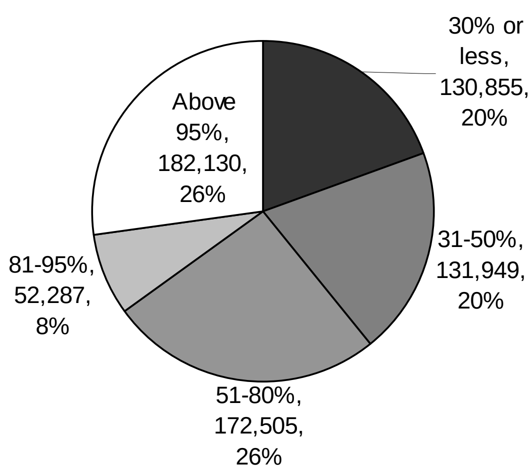


Source: 2000 CHAS data

Overcrowding

Overcrowded housing conditions occur when a residence accommodates more than one person per room. Overcrowding may indicate a general lack of affordable housing in a community where households have been forced to share space, either because other housing units are not available or because the units available are too expensive. Figure 3.9 shows the incidence of overcrowded households by income group.

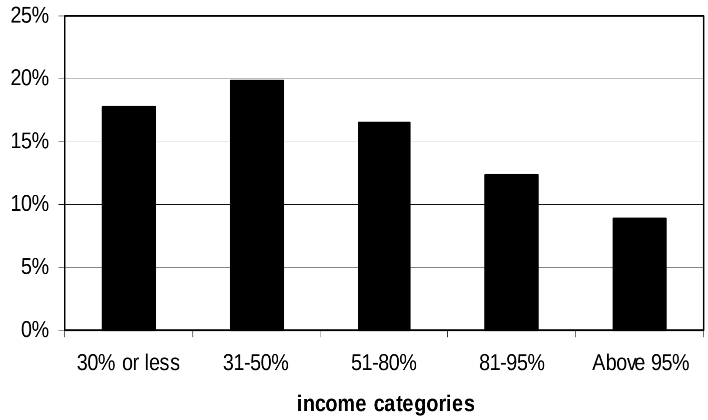
Figure 3.9: Overcrowded Households by Income Group, 2000



Source: 2000 CHAS Database

Lower income renter households experience overcrowded conditions more frequently than higher income households. Almost 18 percent of renter households in the extremely low income category and 19.9 percent of renter households in the low income category are afflicted by overcrowding.

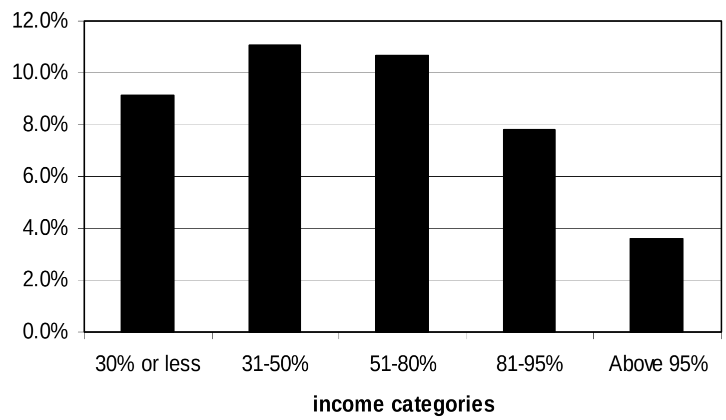
Figure 3.10: Renter Households with Incidence of Overcrowding by percent



Source: 2000 CHAS data

Lower income owner households also experience overcrowded conditions more frequently than higher income owner households. More than 21 percent of owner households earning less than 50 percent HAMFI live in overcrowded conditions compared to 11.4 percent of owner households over 80 percent HAMFI.

Figure 3.11: Owner Households with Incidence of Overcrowding by percent



Source: 2000 CHAS data

Housing Availability and Affordability

The following figures compare demand and supply of affordable housing by looking at the number of households and housing units in different affordability categories. Because higher income households often reside in units that could be affordable to the lowest income households, there are fewer units available at a cost that is affordable to lower income households. For example, as shown in Figure 3.12, 1.4 million households that have incomes greater than 80 percent AMFI occupy units that would be affordable to households at 0-50 percent AMFI. Households in this category can afford units in any of the defined affordability categories. Therefore, non-low income households often limit the supply of affordable housing units available to low income households.

Figure 3.12 describes the housing market interaction of various income groups and housing costs. The table shows the income classifications of the occupants of housing units. The table also illustrates the housing market mismatch between housing units and income groups. For example, very low income households (0-50 percent of HAMFI) account for only about one-third of all the occupants of housing that is affordable to them. All low income households (0-80 percent of HAMFI) make up only 48 percent of all households occupying housing affordable to them. This table illustrates housing market mismatches as well as an implicit excessive cost burden for those households that are residing in units beyond their affordability category.

Figure 3.12

Local Perception

TDHCA acknowledges that the greatest understanding of housing needs is found at the local level. TDHCA continuously strives to improve the methods used to identify regional affordable housing needs.

Regional Advisory Committees

In 2004 there was a series of Regional Advisory Committee (RAC) meetings held across the state to address regional planning issues. Each RAC meeting was advertised, coordinated, and facilitated by a Regional Development Coordinator (RDC). The statewide network of RDCs is part of a joint planning effort between 11 councils of governments and TDHCA. TDHCA works with an RDC in each service region to facilitate the RAC meetings, provide technical assistance, gather data on regional housing needs and resources, and help build the region's network of housing organizations.

Rather than trying to identify and address all regional housing issues, this year's RAC meetings focused on gathering additional information on the most prevalent issues identified last year. Additionally, slightly more emphasis was placed on discussing issues over which TDHCA and the COGs have some control. The following four topics were recommended by TDHCA for discussion at the meetings: communication, populations with special needs, funding distribution, and education. The regional plans discuss the RAC meetings in greater detail.

State of Texas Community Needs Survey

In March 2003, TDHCA distributed over 2,000 copies of the Community Needs Survey (CNS) to cities, counties, local housing departments, public housing authorities, and US Department of Agriculture Rural Development field offices. Local community action agencies were also contacted for their expertise on homeless issues and other community development topics. For TDHCA, the survey represents the opportunity to gather local input on housing needs, preferences, and regional characteristics. Information from the survey is also used as a primary component of the Affordable Housing Needs Score (AHNS), the location score in several housing program funding applications.

Approximately 78 percent of Community Needs Survey respondents feel that there is a severe or significant affordable housing problem in their area.[9] There is a slight preference statewide for owner-occupied housing assistance over rental assistance. Among the owner-occupied assistance activities, renovation is ranked highest in importance, followed by purchase assistance and new housing development. New rental housing development and the renovation of existing multifamily housing are more important than rental payment assistance. The regional results from the CNS are incorporated into the regional plans. A final report on the survey, *Report on the 2003 State of Texas Community Needs Survey*, is available from the Division of Policy and Public Affairs.

STATE HOUSING SUPPLY

The 2000 US Census reported 8.2 million housing units in Texas, of which 90.6 percent are occupied. The number of housing units increased 16 percent from 7.0 million units that were on the ground in 1990. The breakdown of occupied units by type is 4.7 million owner occupied (a 28 percent increase over 1990) and 2.8 million renter occupied (a 13 percent increase over 1990). The average household size for

[9] The response rate for the 2003 CNS was 37 percent.

owner-occupied units increased to 2.87 persons per unit in 2000 as compared to 2.85 units in 1990. The average household size for renter units decreased slightly to 2.53 persons per unit in 2000 as compared to 2.55 units in 1990.

There is a shortage of affordable housing in the extremely low, very low, low, and moderate income brackets. This is primarily caused by the private sector's concentration of development, both single family and multifamily development, in larger metropolitan areas and targeting higher income individuals and families. The explosive growth of the metropolitan areas as well as the lack of new construction during the late 1980s and early 1990s created a huge demand for housing at all income levels. Due to higher margins associated with housing product targeted for the higher income population, developers focused production to fill the demand at the upper-end of the income spectrum.

A significant portion of Texas's affordable housing portfolio consists of HUD-financed or HUD-subsidized properties—many of which are at risk of becoming market rate properties. The most serious of the "at-risk" portfolios is the project-based Section 8 portfolio. The critical nature of this portfolio stems from the number of units in the portfolio and the income segment served. This portfolio contains approximately 49,000 units of deeply subsidized units. Roughly 21,000 of these units (44 percent of the portfolio) are classified as "opt-out" eligible. Another 10,000 units are "marginal" opt-out candidates based on rents fairly close to market rents. The remaining units are classified as restructuring candidates that may or may not enter HUD's Mark-to-Market Program.

Almost 67 percent of the housing units in Texas are single family units, 14 percent are multifamily up to 19 units, and 10 percent are within multifamily structures with 20 units or more. An additional 9.4 percent are mobile homes, RVs, or boats.

Figure 3.13: Housing Type, 2000

	Total	Percent
Housing Units	8,157,575	
One Unit	5,420,910	66.50%
2 to 19 Units	1,151,599	14.10%
Over 20 Units	819,101	10.00%
Mobile Homes	731,652	9.00%
Boats, RVs	34,313	0.40%

Source: 2000 US Census

Assisted Housing Inventory

The following table shows the number of multifamily units in the state financed through state and federal sources, including TDHCA; the US Department of Housing and Urban Development (HUD); public housing authorities (PHAs); Section 8 Housing Choice Vouchers; the United States Department of Agriculture (USDA); and local housing finance corporations (HFCs), which includes the Texas State Affordable Housing Corporation. Please note that because some developments layer funding from multiple sources, there may be double counting.

TDHCA data includes multifamily developments awarded up until the end of FY 2005, so all units included in the total have not yet been built. Additionally, the TDHCA unit total only includes those units that have income restrictions, and does not include market-rate units that are available in some developments.

HUD unit data was obtained from HUD's March 2003 report, "Multifamily Inventory of Units for the Elderly and Persons and Disabilities," available at http://www.hud.gov/offices/hsg/mfh/hto/state/tx.pdf. Though this report specifically references units available to the elderly and persons with disabilities, the report also appears to contain information on family properties. Please note, however, that this may not be a current inventory of all HUD units, and that there may be double counting with units financed through other programs, including public housing. The total assisted units in each property are included.

Information on PHA units and Section 8 Housing Choice Vouchers were obtained directly from HUD staff by TDHCA in October 2005, and is assumed to be current up to that date. TDHCA Section 8 vouchers are also included in this figure. USDA unit data was also obtained directly from USDA staff in October 2005, and is assumed to be current up to that date. All PHA units, Section 8 units, and USDA units are included in the total.

HFC data, including Texas State Affordable Housing Corporation data, was obtained from the Housing Finance Corporation Annual Report that HFCs are required to submit to TDHCA annually. The figure describes the total units financed by the HFCs through June 2005, and does not specify assisted units, so these unit totals will also include market-rate units in the area. Because the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final state total.

Figure 3.14: State Assisted Multifamily Units

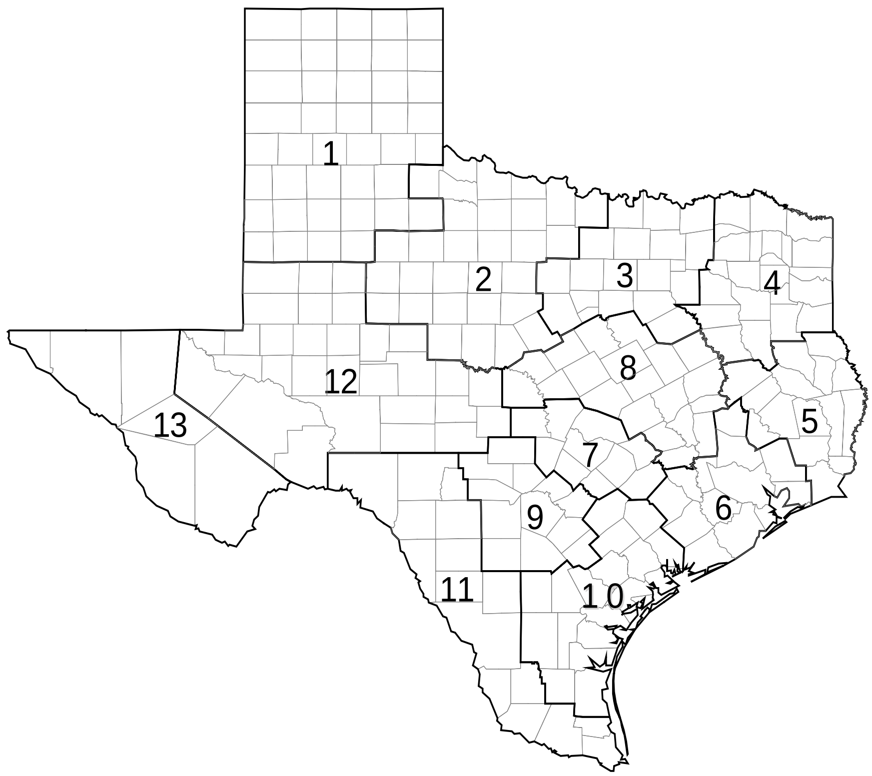
	State Total	Percent of State Inventory
TDHCA Units	170,766	38.1 %
HUD Units	57,372	12.8%
PHA Units	59,431	13.3%
Section 8 Vouchers	133,944	29.9%
USDA Units	26,183	5.8%
HFC Units*	93,176	N/A
Total	447,696	100%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

UNIFORM STATE SERVICE REGIONS

The Department uses 13 Uniform State Service Regions for research and planning purposes. These regions follow the Texas Comptroller of Public Accounts' grouping that creates 13 regions to better identify the unique characteristics of the border counties and to treat larger metropolitan areas as distinct regions. The Uniform State Service Regions are shown below.

Figure 3.15: Map of the Uniform State Service Regions



The size and diversity of the state of Texas necessitates tailored regional sections. Each of the following Uniform State Service Region plans includes a general demographic description, which uses US Census housing data; a needs assessment, which examines housing problems in the area; an estimate of the existing housing supply; local input into the housing needs of the region; an estimate of the number of assisted multifamily units available, and the Department's resource allocation plans for the year.

REGION 1

This 41-county region in the northwest corner of Texas encompasses over 39,500 square miles of the Panhandle. According to the 2000 Census, the total population in Region 1 is 780,733, which represents 3.7 percent of the state's total population.

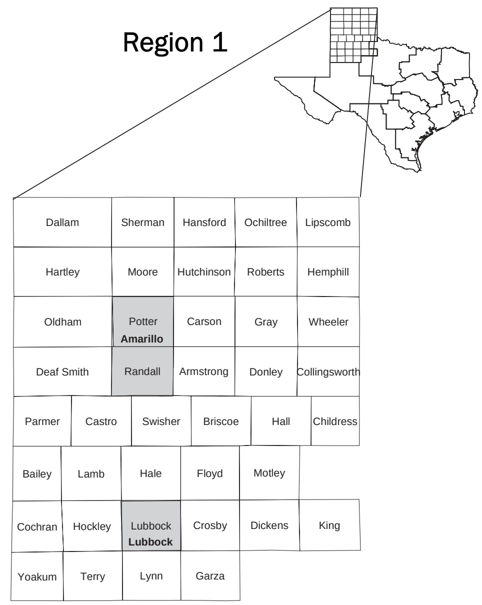


Figure 3.16: Region 1 Population Figures

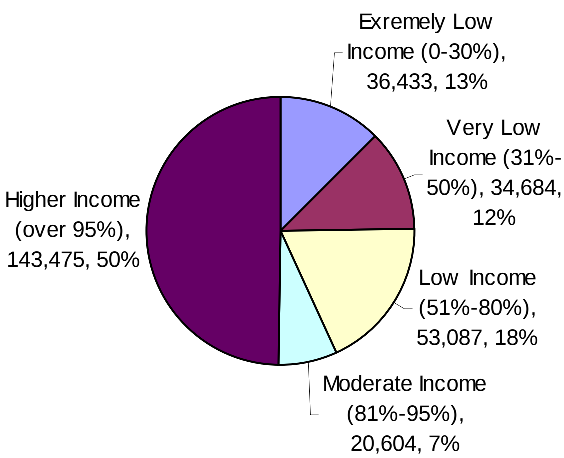
	Region Total	Percent in Region	Percent of State Total
Total Population	780,733		3.7%
Persons with Disabilities	138,520	17.7%	3.8%
Elderly Persons (without disabilities)	50,862	6.5%	4.7%
Individuals in Poverty	122,991	15.8%	3.9%

Source: 2000 Census

Approximately 57 percent of the population lives in the urban areas, including Amarillo and Lubbock, and the rest live in rural areas of the region.

Figure 3.17: Region 1 Household Incomes



The pie chart to the left depicts the income breakdown of the 288,273 households in the region. Approximately 43 percent of households are low income. There are 122,991, or 15.8 percent, individuals living in poverty in the region.

2005 Multiple Listing Service data records the median home prices for Amarillo and Lubbock as $105,700 and $98,200, respectively.[10] Fourth quarter 2004 data shows that 57 percent of the households have sufficient income to afford the median-priced home in Amarillo, and 52 percent can afford the median-priced home in Lubbock.[11]

Special Needs Populations

According to 2000 Census data, there are 128,520 persons with disabilities residing in the region, which is 16.5 percent of the total region population. In addition, there are 50,862 elderly individuals without disabilities in the region, which is 6.5 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are

[10] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[11] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

200,000 homeless individuals in Texas,[12] but figures vary. According to the 2000 Census, there are 1,068 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 167 homeless persons in Amarillo.

Housing Supply

According to 2000 Census data, of the 322,045 housing units in the region, 288,175 are occupied, which is an 89.5 percent occupancy rate. Of the total housing stock, almost 75 percent are one unit; 15.9 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 66.3 percent are owner occupied and 33.7 percent are occupied by renters.

Figure 3.18: Region 1 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	322,045		3.9%
Total Occupied Housing Units	288,175	89.5%	3.9%
Owner-Occupied Units	191,161	66.3%	4.1%
Renter-Occupied Units	97,014	33.7%	3.6%

Source: 2000 Census

Data for the region shows that building permits for 2,251 single family units and 2,657 multifamily units were issued in 2004.[13]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 288,273 households in the region, 79,798 owners and renters have housing problems; this represents 27.7 percent of all households.

Figure 3.19: Region 1 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	29,555	14,026	9,256	5,092	1,181
Lacking Kitchen and/or Plumbing	1,638	553	322	301	88
Overcrowding	9,294	2,037	2,029	2,602	2,626
Owner Households					
Extreme Cost Burden	28,912	8,542	7,021	6,944	6,405
Lacking Kitchen and/or Plumbing	1,154	228	163	224	85
Overcrowding	9,245	897	1,223	2,399	4,726
Total	79,798	26,283	20,014	17,562	15,111

Source: 2000 CHAS

[12] Texas Interagency Council for the Homeless, "Key Facts."
[13] Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Regional Input on Housing Needs

Almost three-quarters of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. Most prefer rental housing assistance to owner-occupied housing assistance. For the respondents the renovation of existing rental housing and new housing development rank only slightly higher than rental payment assistance.

According to the Community Needs Survey respondents from Region 1, home purchase assistance is more important than the renovation of existing owner-occupied housing and the development of new owner-occupied housing. Fourteen percent of the Community Needs Survey respondents report a severe or significant homeless problem in their area. There is a strong preference for specific TDHCA weatherization and energy activities. Utility payment assistance is more important than measures to increase energy efficiency and activities that repair and replace existing HVAC equipment and energy education.

2004 Regional Advisory Committee meeting reports in Region 1 identified several areas of concern. Focus groups prioritized funding for emergency homeless shelters and energy assistance and weatherization activities. The lack of homebuyer education was also mentioned. The scarcity of affordable rental housing and the need to address the substandard housing problems in the area ranked as high concerns for the region. Finally, the lack of effective communication—including program marketing and public education on affordable housing—was identified as an issue.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.20: Region 1 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	4,218	31.3%	2.5%
HUD Units	2,076	15.4%	3.6%
PHA Units	1,562	11.6%	2.6$
Section 8 Vouchers	3,987	29.6%	3.0%
USDA Units	1,612	12.0%	6.2%
HFC Units*	1,577		
Total	13,455	100%	3.0%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.21: Region 1 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,798,446	6.9%
Housing Tax Credit	$2,026,482	4.7%
Community Services Block Grant	$1,331,785	5.0%
Emergency Shelter Grants	$191,053	4.0%
Comprehensive Energy Assistance	$2,177,106	6.6%
Weatherization Assistance	$822,537	7.2%
Total	$8,347,409	5.7%

REGION 2

Region 2 surrounds the metropolitan areas of Wichita Falls and Abilene, shaded in the figure to the right. According to the 2000 Census, the total population in Region 2 is 549,267, which represents 2.6 percent of the state's total population.

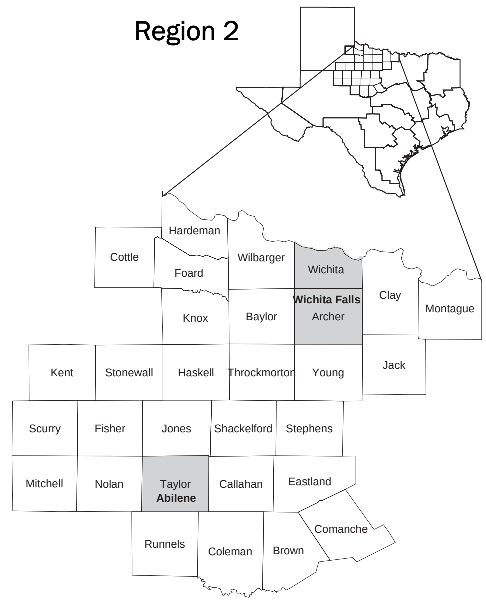


Figure 3.22: Region 2 Population Figures

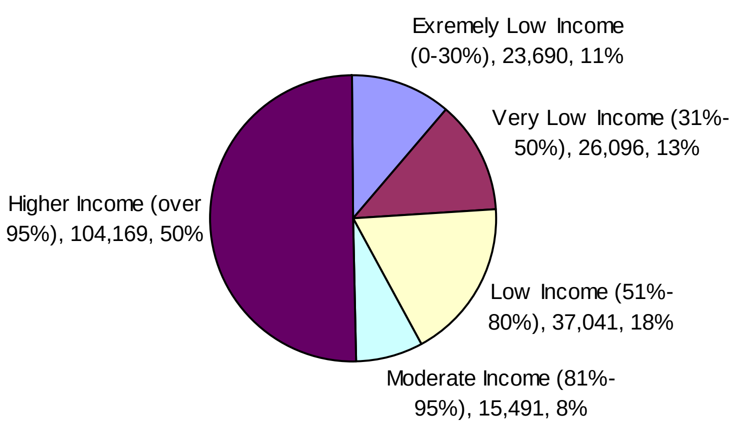
	Region Total	Percent in Region	Region Percent of State
Total Population	549,267		2.6%
Persons with Disabilities	105,325	19.2%	2.9%
Elderly Persons (without disabilities)	42,485	7.7%	3.9%
Individuals in Poverty	77,647	14.1%	2.5%

Source: 2000 Census

Approximately 52 percent of the population lives in urban areas of the region.

Figure 3.23: Region 2 Household Incomes



The pie chart to the left depicts the income breakdown of the 206,459 households in the region. Approximately 42 percent of households are low income. There are 77,647, or 14.1 percent, individuals living in poverty in the region.

2005 Multiple Listing Service data records the median home prices for Wichita Falls and Abilene as $92,200 and $80,900, respectively.[14] Fourth quarter 2004 data shows that 64 percent of the households have sufficient income to afford the median-priced home in Wichita Falls, and 69 percent can afford the median-priced home in Abilene.[15]

Special Needs Populations

According to 2000 Census data, there are 105,325 persons with disabilities residing in the region, which is 19.2 percent of the total region population. In addition, there are 42,485 elderly individuals without disabilities in the region, which is 7.7 percent of the region.

[14] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[15] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[16] but figures vary. According to the 2000 Census, there are 609 people in noninstitutional group homes, which include shelters, in the region. In a special tabulation on emergency and transitional shelters, the Census did not count any homeless persons in metro areas.

Housing Supply

According to 2000 Census data, of the 243,506 housing units in the region, 206,388 are occupied, which is an 84.8 percent occupancy rate. Of the total housing stock, almost 77 percent are one unit; 12 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 69.1 percent are owner occupied and 30.9 percent are occupied by renters.

Figure 3.24: Region 2 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	243,506		3.0%
Total Occupied Housing Units	206,388	84.8%	2.8%
Owner-Occupied Units	142,603	69.1%	3.0%
Renter-Occupied Units	63,785	30.9%	2.4%

Source: 2000 Census

Data for the region shows that building permits for 717 single family units and 16 multifamily units were issued in 2004.[17]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 206,459 households in the region, 49,146 owners and renters have housing problems; this represents 23.8 percent of all households.

Figure 3.25: Region 2 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	16,557	7,546	5,733	2,699	559
Lacking Kitchen and/or Plumbing	968	330	161	237	71
Overcrowding	3,906	867	694	1,181	1,164
Owner Households					
Extreme Cost Burden	22,471	6,744	5,894	4,902	4,931
Lacking Kitchen and/or Plumbing	919	253	158	170	60
Overcrowding	4,325	411	558	1,159	2,197
Total	49,146	16,151	13,198	10,348	8,982

Source: 2000 CHAS

16 Texas Interagency Council for the Homeless, "Key Facts."
17 Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Regional Input on Housing Needs

Almost three-quarters of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. Most prefer rental housing assistance to owner-occupied housing assistance. Results show a preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

According to the Community Needs Survey respondents from Region 2, the renovation of existing owner-occupied housing is much more important than home purchase assistance and the development of new owner-occupied housing. Twelve percent of the respondents report a severe or significant homeless problem in their region; this is lower than the state average of 23 percent. Among the different types of homeless assistance, short-term homeless shelters rank higher in importance than transitional housing facilities. In terms of TDHCA energy-related activities, Region 2 has a strong preference for utility payment assistance, while measures to increase energy efficiency and assistance with HVAC systems rank next in importance. Energy-related educational activities are the least preferred of the energy-related activities.

2004 Regional Advisory Committee meeting attendees from Region 2 suggest that the department direct the limited housing assistance funding in the area towards existing housing stock rather than new construction. Also, duplicating housing assistance across state and federal funding types is inefficient and should be minimized. The focus group specified some areas in the TDHCA application process that could be improved. One suggestion was a renewal form for previous successful applicants rather than a full application. Another suggested that the application process for state funding is too complex and involves a lot of paperwork, and more training is required.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.26: Region 2 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	2,753	26.9%	1.6%
HUD Units	1,655	16.2%	2.9%
PHA Units	3,905	38.1%	6.6%
Section 8 Vouchers	2,921	28.5%	2.2%
USDA Units	1,925	18.8%	7.4%
HFC Units*	280		
Total	10,241	100.0%	2.9%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.27: Region 2 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,228,643	4.7%
Housing Tax Credit	$1,143,231	2.7%
Community Services Block Grant	$953,238	3.0%
Emergency Shelter Grants	$120,436	2.5%
Comprehensive Energy Assistance	$1,535,305	4.6%
Weatherization Assistance	$535,256	4.7%
Total	$5,516,109	3.8%

REGION 3

Region 3, including the metropolitan areas of Dallas, Fort Worth, Arlington, Sherman, and Denison, is the state's most populous region. According to the 2000 Census, the total population in Region 3 is 5,487,477, which represents 26.3 percent of the state's total population.

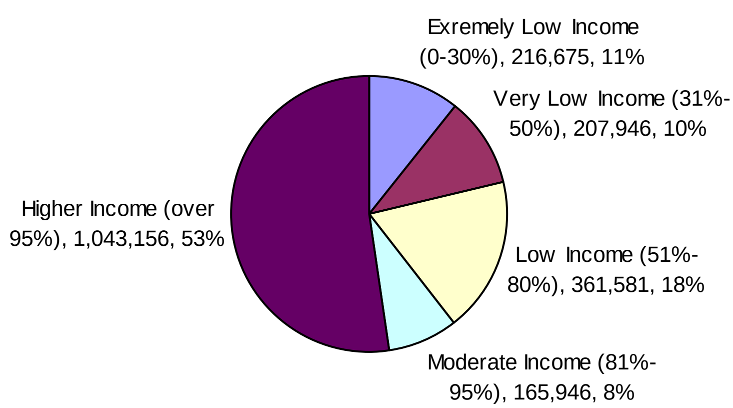
Figure 3.28: Region 3 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	5,487,477		26.3%
Persons with Disabilities	888,217	16.2%	24.6%
Elderly Persons (without disabilities)	245,186	4.5%	22.6%
Individuals in Poverty	588,688	10.7%	18.9%

Source: 2000 Census

Approximately 93 percent of the population resides in urban areas.

Figure 3.29: Region 3 Household Incomes



The pie chart to the left depicts the income breakdown of the 1,988,135 households in the region. Approximately 39 percent of households are low income. There are 588,688, or 10.7 percent, individuals living in poverty in the region.

According to 2005 Multiple Listing Service data, the highest median home price is in Collin County at $180,500, while the lowest is in Sherman-Denison at $92,700.[18] Fourth quarter 2004 data shows that at least 60 percent of households in Sherman-Denison, NE Tarrant County, Garland, Denton County, and Collin County have sufficient income to afford the median-priced home, while Dallas, Irving, and Fort Worth and percentages below 60 percent.[19]

[18] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[19] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Special Needs Populations

According to 2000 Census data, there are 888,217 persons with disabilities residing in the region, which is 16.2 percent of the total region population. In addition, there are 245,186 elderly individuals without disabilities in the region, which is 4.5 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[20] but figures vary. According to the 2000 Census, there are 6,548 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 1,923 homeless persons in Tarrant and Dallas counties.

Housing Supply

According to 2000 Census data, of the 2,140,641 housing units in the region, 2,004,826 are occupied, which is a 93.7 percent occupancy rate. Of the total housing stock, almost 64 percent are one unit; 30 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 60.9 percent are owner occupied and 39.1 percent are occupied by renters.

Figure 3.30: Region 3 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	2,140,641		26.2%
Total Occupied Housing Units	2,004,826	93.7%	27.1%
Owner-Occupied Units	1,220,939	60.9%	25.9%
Renter-Occupied Units	783,887	39.1%	29.3%

Source: 2000 Census

Data for the region shows that building permits for 48,892 single family units and 8,608 multifamily units were issued in 2004.[21]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 1,988,135 households in the region, 610,655 owners and renters have housing problems; this represents 30.7 percent of all households.

[20] Texas Interagency Council for the Homeless, "Key Facts."

Regional Input on Housing Needs

Almost three-quarters of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. Results show a preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

According to the Community Needs Survey respondents from Region 3, the renovation of existing owner-occupied housing is slightly more important than the development of new owner-occupied housing and home purchase assistance. Twenty-three percent of respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. In terms of TDHCA energy-related activities, Region 3 has a strong preference for utility payment assistance, reflecting the state trend. The repair and replacement of HVAC equipment ranks next in importance, followed by weatherization measures to increase energy efficiency.

2004 Regional Advisory Committee meeting attendees from Region 3 identified problems, successes, and recommendations related to the suggested topics: communication, special needs, funding distribution, and education. Communication and education issues are minor in Region 3. Overall, TDHCA has done a very good job of notifying potential applicants of funding and training opportunities and has disseminated appropriate information in a timely manner. A separation of rural and urban programs is strongly recommended. Special needs populations appear to be adequately served under the various programs and funding streams currently available. Some program regulations should be reviewed to better serve this population. Funding distribution issues can be summarized by the fact that there is simply never enough money to adequately address all the needs in a state this large.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.32: Region 3 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	55,393	46.9%	32.4%
HUD Units	10,834	9.2%	18.9%
PHA Units	8,725	7.4%	14.7%
Section 8 Vouchers	39,149	33.1%	29.2%
USDA Units	4,076	3.4%	15.6%
HFC Units*	19,944		
Total	118,177	100.0%	26.4%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.33: Region 3 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$2,904,962	11.2%
Housing Tax Credit	$7,064,721	16.4%
Community Services Block Grant	$4,614,797	17.0%
Emergency Shelter Grants	$913,183	18.9%
Comprehensive Energy Assistance	$5,443,366	16.4%
Weatherization Assistance	$1,918,077	16.7%
Total	$22,859,106	15.7%

REGION 4

Region 4, located in the northeast corner of the state, surrounds the urban areas of Texarkana, Longview-Marshall, and Tyler. According to the 2000 Census, the total population in Region 4 is 1,015,648, which represents 4.9 percent of the state's total population.

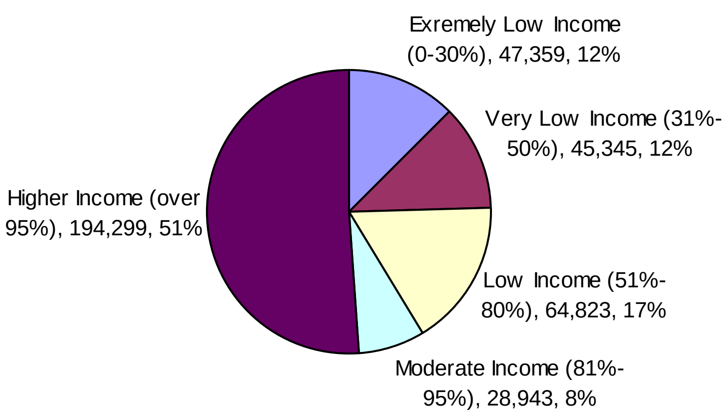
Figure 3.34: Region 4 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,015,648		4.9%
Persons with Disabilities	213,753	21.0%	5.9%
Elderly Persons (without disabilities)	77,528	7.6%	7.1%
Individuals in Poverty	152,036	15.0%	4.9%

Source: 2000 Census

Region 4 has the highest percentage of rural population in the state at 61 percent.

Figure 3.35: Region 4 Household Incomes



The pie chart to the left depicts the income breakdown of the 380,765 households in the region. Approximately 41 percent of households are low income. There are 152,036, or 15.0 percent, individuals living in poverty in the region.

2005 Multiple Listing Service data records the median home prices for Tyler and Longview-Marshall as $125,700 and $94,000, respectively.[22] Fourth quarter 2004 data shows that 53 percent of the households have sufficient income to afford the median-priced home in Tyler, and 63 percent can afford the median-priced home in Longview-Marshall.[23]

[22] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[23] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Special Needs Populations

According to 2000 Census data, there are 213,753 persons with disabilities residing in the region, which is 21.0 percent of the total region population. In addition, there are 77,528 elderly individuals without disabilities in the region, which is 7.6 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[24] but figures vary. According to the 2000 Census, there are 1,309 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 110 homeless persons in Tyler.

Housing Supply

According to 2000 Census data, of the 434,792 housing units in the region, 380,468 are occupied, which is an 87.5 percent occupancy rate. Of the total housing stock, almost 71 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 73.8 percent are owner occupied and 26.2 percent are occupied by renters.

Figure 3.36: Region 4 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	434,792		5.3%
Total Occupied Housing Units	380,468	87.5%	5.1%
Owner-Occupied Units	280,896	73.8%	6.0%
Renter-Occupied Units	99,572	26.2%	3.7%

Source: 2000 Census

Data for the region shows that building permits for 1,668 single family units and 448 multifamily units were issued in 2004.[25]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 380,765 households in the region, 100,479 owners and renters have housing problems; this represents 26.4 percent of all households.

[24] Texas Interagency Council for the Homeless, "Key Facts."
[25] Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Figure 3.37: Region 4 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	27,100	12,500	9,142	4,443	1,015
Lacking Kitchen and/or Plumbing	2,108	724	425	363	135
Overcrowding	8,851	1,951	1,688	2,215	2,997
Owner Households					
Extreme Cost Burden	49,419	15,258	11,379	11,530	11,152
Lacking Kitchen and/or Plumbing	2,742	775	429	508	187
Overcrowding	10,259	1,233	1,477	2,496	5,053
Total	100,479	32,441	24,540	21,555	20,539

Source: 2000 CHAS

Regional Input on Housing Needs

Approximately 73 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. Results show a slight preference for the renovation of existing housing over other rental housing activities. New housing development is more important than rental payment assistance in the region.

The Community Needs Survey respondents from Region 4 do not express any preference for the different types of owner-occupied housing assistance: the renovation of existing housing, purchase assistance, and new housing development all rank about the same in importance. Twenty percent of the Community Needs Survey respondents report a severe or significant homeless problem in their area. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. Permanent housing for the homeless ranks last in importance. In terms of TDHCA energy-related activities, Region 4 has a strong preference for utility payment assistance. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

2004 Regional Advisory Committee attendees from Region 4 represented several sectors of the housing industry including private developers, nonprofits, housing authorities, and grant consultants. Some of the identified housing problems include the poor quality of affordable housing and existing obstacles to development such as prohibitive land costs, onerous lead-based paint restrictions, and building codes. Other identified housing problems include a lack of mortgage products for buyers of affordable housing and a scarcity of housing development in downtown areas. Homebuyer and consumer education were mentioned as priorities for the region.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.38: Region 4 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	5,182	23.6%	3.0
HUD Units	3,381	15.4%	5.9%
PHA Units	3,422	15.6%	5.8%
Section 8 Vouchers	6,090	27.7%	4.5%
USDA Units	3,872	17.6%	14.8%
HFC Units*	1,160		
Total	21,947	100.0%	4.9%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.39: Region 4 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$3,555,755	13.7%
Housing Tax Credit	$2,139,933	5.0%
Community Services Block Grant	$1,435,311	5.0%
Emergency Shelter Grants	$236,035	4.9%
Comprehensive Energy Assistance	$2,137,870	6.4%
Weatherization Assistance	$747,924	6.5%
Total	$10,252,828	7.0%

REGION 5

Region 5 encompasses a 15-county area in east Texas including the urban areas of Beaumont and Port Arthur. According to the 2000 Census, the total population in Region 5 is 740,952, which represents 3.6 percent of the state's total population.

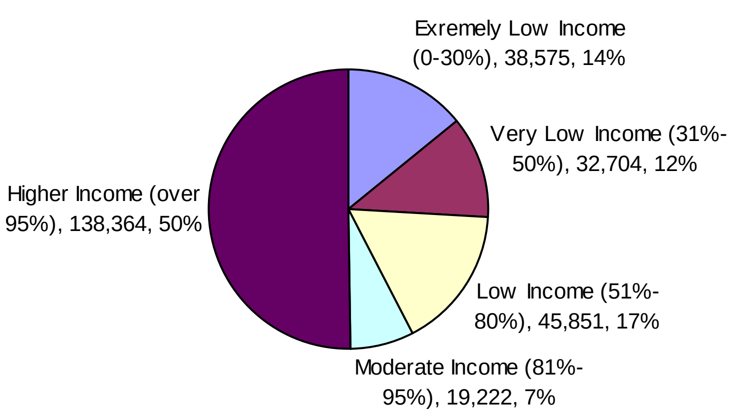
Figure 3.40: Region 5 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	740,952		3.6%
Persons with Disabilities	150,529	20.3%	4.2%
Elderly Persons (without disabilities)	53,148	7.2%	4.9%
Individuals in Poverty	120,585	16.3%	3.9%

Source: 2000 Census

The population in Region 5 is split, with 50 percent living in urban and 50 percent living in rural areas.

Figure 3.41: Region 5 Household Incomes



The pie chart to the left depicts the income breakdown of the 274,543 households in the region. Approximately 43 percent of households are low income. There are 120,585, or 16.3 percent, individuals living in poverty in the region.

2005 Multiple Listing Service data records the median home prices for Beaumont and Port Arthur as $100,400 and $79,900, respectively.[26] Fourth quarter 2004 data shows that 55 percent of the households have sufficient income to afford the median-priced home in Beaumont, and 64 percent can afford the median-priced home in Port Arthur.[27]

[26] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[27] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Special Needs Populations

According to 2000 Census data, there are 150,529 persons with disabilities residing in the region, which is 20.3 percent of the total region population. In addition, there are 53,148 elderly individuals without disabilities in the region, which is 7.2 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[28] but figures vary. According to the 2000 Census, there are 672 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census did not count any homeless persons in metropolitan areas.

Housing Supply

According to 2000 Census data, of the 325,047 housing units in the region, 275,233 are occupied, which is an 84.7 percent occupancy rate. Of the total housing stock, 69.3 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 73.4 percent are owner occupied and 26.6 percent are occupied by renters.

Figure 3.42: Region 5 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	325,047		4.0%
Total Occupied Housing Units	275,233	84.7%	3.7%
Owner-Occupied Units	201,971	73.4%	4.3%
Renter-Occupied Units	73,262	26.6%	2.7%

Source: 2000 Census

Data for the region shows that building permits for 1,490 single family units and 112 multifamily units were issued in 2004.[29]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 274,543 households in the region, 72,650 owners and renters have housing problems; this represents 26.5 percent of all households.

[28] Texas Interagency Council for the Homeless, "Key Facts."

[29] Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Figure 3.43: Region 5 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	21,116	10,733	6,894	2,890	599
Lacking Kitchen and/or Plumbing	1,450	549	300	270	76

Owner Households					
Extreme Cost Burden	32,849	11,845	7,609	7,044	6,351
Lacking Kitchen and/or Plumbing	1,876	555	250	367	90
Overcrowding	8,491	925	970	1,991	4,605
Total	72,650	26,595	17,269	14,039	13,878

Source: 2000 CHAS

Regional Input on Housing Needs

Approximately 80 percent of the respondents to the 2003 Community Needs Survey report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. Results show a preference for new housing development over other rental housing activities. The renovation of existing housing is more important than rental payment assistance in the region.

The Community Needs Survey respondents from Region 5 express a slight preference for new housing development; the renovation of existing housing and purchase assistance ranked next in importance. Twenty-one percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. In terms of TDHCA energy-related activities, Region 5 has a strong preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

2004 Regional Advisory Committee attendees agreed that there has been no progress made in addressing the housing crisis since the committee meetings in the previous year. If anything, the region's needs are greater and the resources are more limited. A local organization reported that a recent homeless count in the region indicates that homelessness has risen significantly since last year. It was observed that until mayors, county judges, commissioners, and council members attend the meetings, very little will be accomplished. The group felt that there is not the social awareness, nor the political will, to address the housing issue.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.44: Region 5 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	4,556	21.2%	2.7%
HUD Units	4,296	20.0%	7.5%
PHA Units	3,241	15.1%	5.5%
Section 8 Vouchers	7,992	37.2%	6.0%
USDA Units	1,371	6.4%	5.2%
HFC Units*	1,160		
Total	21,456	100.0%	4.8%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

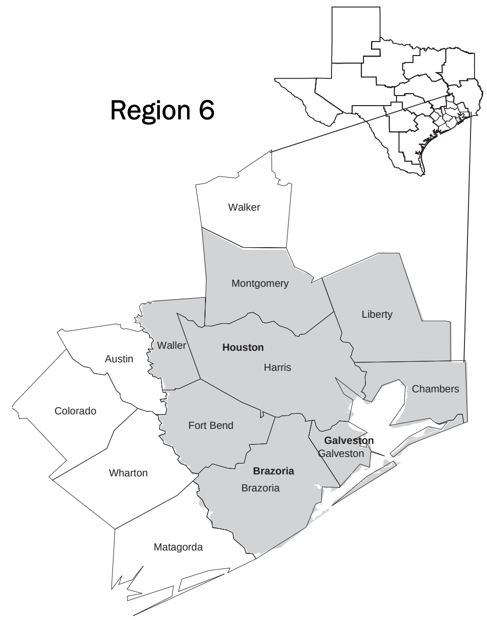
TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.45: Region 5 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,651,052	6.4%
Housing Tax Credit	$1,521,318	3.5%
Community Services Block Grant	$1,133,369	4.0%
Emergency Shelter Grants	$187,183	3.9%
Comprehensive Energy Assistance	$1,615,919	4.9%
Weatherization Assistance	$568,942	5.0%
Total	$6,677,783	4.6%

REGION 6



Region 6 includes the urban areas of Houston, Brazoria, and Galveston. According to the 2000 Census, the total population in Region 6 is 4,854,454, which represents 23.3 percent of the state's total population.

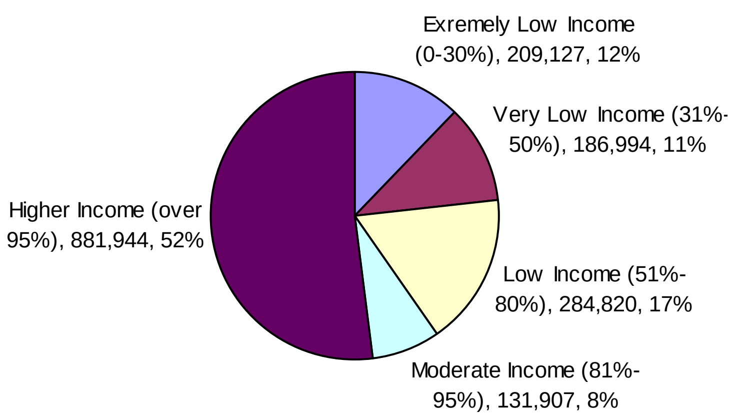
Figure 3.46: Region 6 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	4,854,454		23.3%
Persons with Disabilities	801,436	16.5%	22.2%
Elderly Persons (without disabilities)	206,438	4.3%	19.0%
Individuals in Poverty	656,239	13.5%	21.0%

Source: 2000 Census

Approximately 92 percent of the populations lives in the urban areas of Region 6.

Figure 3.47: Region 6 Household Incomes



The pie chart to the left depicts the income breakdown of the 1,691,811 households in the region. Approximately 40 percent of households are low income. There are 656,239, or 13.5 percent, individuals living in poverty in the region.

2005 Multiple Listing Service data records the median home prices for Houston , and Galveston as $138,400 and $155,300, respectively.[30] Fourth quarter 2004 data shows that 54 percent of the households have sufficient income to afford the median-priced home in Houston, 51 percent can afford the median-priced home in Galveston.[31]

Special Needs Populations

According to 2000 Census data, there are 801,436 persons with disabilities residing in the region, which is 16.3 percent of the total region population. In addition, there are 206,438 elderly individuals without disabilities in the region, which is 4.3 percent of the region.

[30] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[31] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[32] but figures vary. According to the 2000 Census, there are 7,792 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 1,756 homeless persons in the Houston area.

Housing Supply

According to 2000 Census data, of the 1,853,854 housing units in the region, 1,702,792 are occupied, which is a 91.9 percent occupancy rate. Of the total housing stock, 71 percent are one unit; 18 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 60.9 percent are owner occupied and 39.1 percent are occupied by renters.

Figure 3.48: Region 6 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	1,853,854		22.7%
Total Occupied Housing Units	1,702,792	91.9%	23.0%
Owner-Occupied Units	1,037,371	60.9%	22.0%
Renter-Occupied Units	665,421	39.1%	24.9%

Source: 2000 Census

Data for the region shows that building permits for 45,536 single family units and 11,214 multifamily units were issued in 2004.[33]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 1,691,811 households in the region, 541,869 owners and renters have housing problems; this represents 32.0 percent of all households.

[32] Texas Interagency Council for the Homeless, "Key Facts."
[33] Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Figure 3.49: Region 6 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	168,355	71,699	55,967	31,103	9,586
Lacking Kitchen and/or Plumbing	9,614	3,228	1,892	2,034	492
Overcrowding	117,586	29,482	27,886	30,141	30,077

Total	541,869	158,090	131,967	124,868	115,338

Source: 2000 CHAS

Regional Input on Housing Needs

Approximately 77 percent of the respondents to the 2003 Community Needs Survey report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. Results show a preference for new housing development over other rental housing activities. The renovation of existing housing is more important than rental payment assistance in the region.

The Community Needs Survey respondents from Region 6 express a slight preference for new housing development; the renovation of existing housing and purchase assistance rank next in importance. Thirty-two percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. In terms of TDHCA energy-related activities, Region 6 has a strong preference for utility payment assistance. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

2004 Regional Advisory Committee attendees from Region 6 identified problems, successes, and recommendations related to the suggested topics: communication, special needs, funding distribution, and education. Some of the successes of communication include a local clearinghouse of housing related information and the TDHCA website. The meeting attendees agreed that TDHCA could improve the use of local media outlets. “Special needs” as a category is not adequately nor consistently defined. TDHCA has improved its funding distribution to rural areas, although there is room for improvement. It was noted that there are not funds for educational programs.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.50: Region 6 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	46,254	52.4%	27.1%
HUD Units	13,076	14.8%	22.8%
PHA Units	5,795	6.6%	9.8%
Section 8 Vouchers	19,713	22.3%	14.7%
USDA Units	3,484	3.9%	13.3%
HFC Units*	37,116		
Total	88,322	100.0%	19.7%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.51: Region 6 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,823,443	7.0%
Housing Tax Credit	$10,403,698	24.2%
Community Services Block Grant	$5,286,198	19.0%
Emergency Shelter Grants	$1,017,657	21.0%
Comprehensive Energy Assistance	$5,673,525	17.1%
Weatherization Assistance	$1,711,418	14.9%
Total	$25,915,939	17.8%

REGION 7

The urban area of Austin-San Marcos is at the center of Region 7. According to the 2000 Census, the total population in Region 7 is 1,346,833, which represents 6.5 percent of the state's total population.

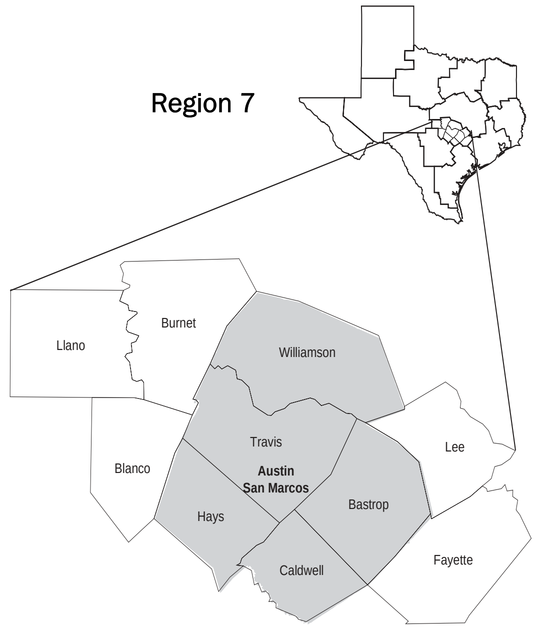

Figure 3.52: Region 7 Population Figures

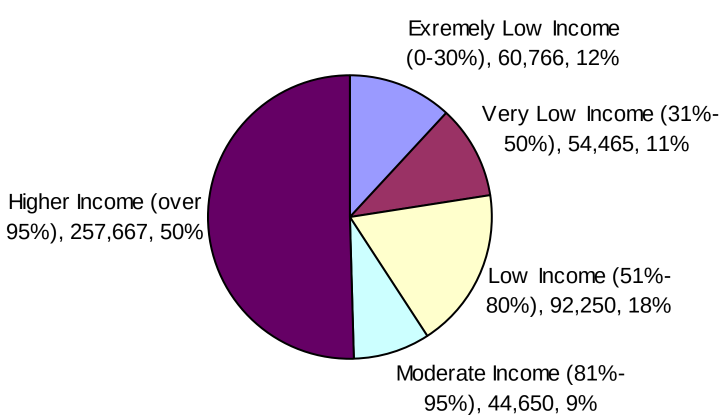
	Region Total	Percent in Region	Region Percent of State
Total Population	1,346,833		6.5%
Persons with Disabilities	190,226	14.1%	5.3%
Elderly Persons (without disabilities)	61,229	4.5%	5.6%
Individuals in Poverty	145,060	10.8%	4.7%

Source: 2000 Census

Approximately 86 percent of the population lives in urban areas.

Figure 3.53: Region 7 Household Income



The pie chart to the left depicts the income breakdown of the 509,798 households in the region. Approximately 41 percent of households are low income. There are 145,060, or 10.8 percent, individuals living in poverty in the region.

The 2005 Multiple Listing Service median home price for Austin is $159,600.[34] Fourth quarter 2004 data shows that 61 percent of the households have sufficient income to afford the median-priced home.[35]

Special Needs Populations

According to 2000 Census data, there are 190,226 persons with disabilities residing in the region, which is 14.1 percent of the total region population. In addition, there are 61,229 elderly individuals without disabilities in the region, which is 4.5 percent of the region.

[34] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[35] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[36] but figures vary. According to the 2000 Census, there are 2,354 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 481 homeless persons in Austin.

Housing Supply

According to 2000 Census data, of the 545,761 housing units in the region, 510,555 are occupied, which is a 93.5 percent occupancy rate. Of the total housing stock, 62 percent are one unit; 30 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 59.8 percent are owner occupied and 40.2 percent are occupied by renters.

Figure 3.54: Region 7 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	545,761		6.7%
Total Occupied Housing Units	510,555	93.5%	6.9%
Owner-Occupied Units	305,294	59.8%	6.5%
Renter-Occupied Units	205,261	40.2%	7.7%

Source: 2000 Census

Data for the region shows that building permits for 15,031 single family units and 4,000 multifamily units were issued in 2004.[37]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 509,798 households in the region, 164,537 owners and renters have housing problems; this represents 32.3 percent of all households.

Figure 3.55: Region 7 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	68,118	27,648	21,497	15,700	3,273
Lacking Kitchen and/or Plumbing	2,869	1,170	562	565	185
Overcrowding	22,581	5,433	5,070	5,645	6,433
Owner Households					
Extreme Cost Burden	56,638	11,452	10,018	16,282	18,884
Lacking Kitchen and/or Plumbing	2,013	519	291	423	110
Overcrowding	12,318	1,023	2,055	3,503	5,719
Total	164,537	47,245	39,493	42,118	34,604

37 Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Regional Input on Housing Needs

Approximately 91 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem; this is the highest percentage in the state. There is a preference for rental housing assistance over owner-occupied housing assistance. Results show a slight preference for renovation of existing housing over other rental housing activities. Rental payment assistance is more important in the region than new housing development.

The Community Needs Survey respondents from Region 7 express a slight preference for the renovation of existing housing; purchase assistance and new housing development rank next in importance. Twenty-nine percent of respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. In terms of TDHCA energy-related activities, Region 7 has a preference for utility assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

2004 Regional Advisory Committee meeting attendees from Region 7 discussed three issues: the definition of affordable housing; the trends and issues for the region; and which programs are working towards the goal of increasing the supply of affordable housing. Meeting attendees identified two segments of population in need of affordable housing: the working poor and very low income households. Affordable housing is a regional problem that lacks regional attention. As the region's population continues to increase and wages remain stable, there will be a lack of affordable homes for workers near their jobs. The group identified specific programs that work well, including the City of Austin's Neighborhood Planning Program, Section 8 housing voucher program, and the Texas Jump Start financial literacy program.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.56: Region 7 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	15,315	49.0%	9.0%
HUD Units	2,889	9.2%	5.0%
PHA Units	3,522	11.3%	5.9%
Section 8 Vouchers	8,053	25.8%	6.0%
USDA Units	1,461	4.7%	5.6%
HFC Units*	8,076		
Total	31,240	100.0%	7.0%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.57: Region 7 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,090,977	4.2%
Housing Tax Credit	$3,285,943	7.6%
Community Services Block Grant	$1,330,777	5.0%
Emergency Shelter Grants	$224,910	4.7%
Comprehensive Energy Assistance	$1,356,561	4.1%
Weatherization Assistance	$506,715	4.4%
Total	$7,795,883	5.3%

REGION 8

Region 8, located in the center of the state, surrounds the urban areas of Waco, Bryan, College Station, Killeen, and Temple. According to the 2000 Census, the total population in Region 8 is 963,139 which represents 4.6 percent of the state's total population.

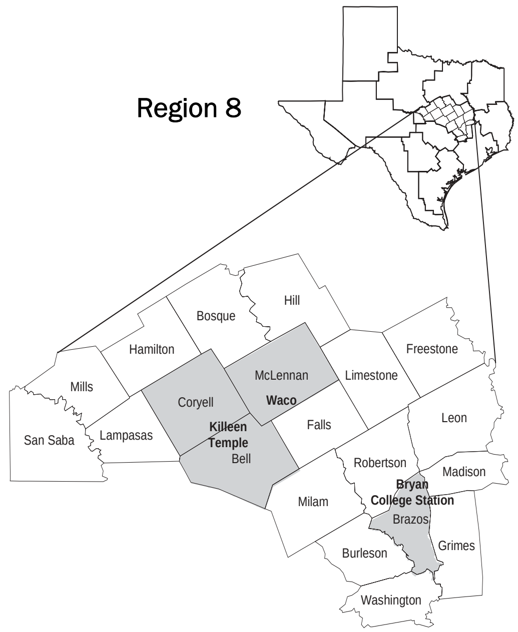

Figure 3.58: Region 8 Population Figures

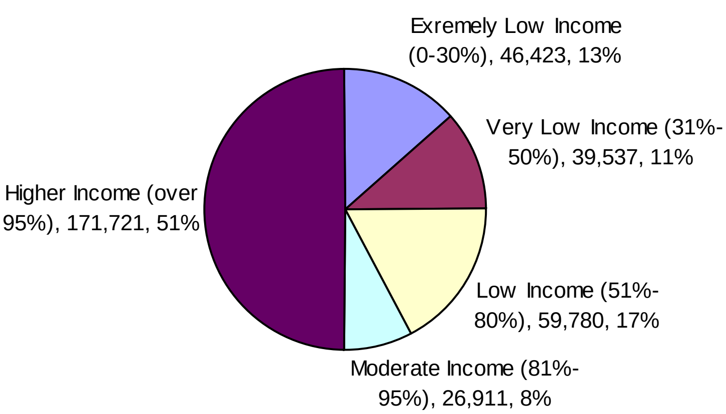
	Region Total	Percent in Region	Region Percent of State
Total Population	963,139		4.6%
Persons with Disabilities	160,743	16.7%	4.5%
Elderly Persons (without disabilities)	55,854	5.8%	5.1%
Individuals in Poverty	149,480	15.5%	4.8%

Source: 2000 Census

Approximately 75 percent of the population lives in the urban areas of Region 8.

Figure 3.59: Region 8 Household Income



The pie chart to the left depicts the income breakdown of the 343,856 households in the region. Approximately 41 percent of households are low income. There are 149,480, or 15.5 percent, individuals living in poverty in the region.

2005 Multiple Listing Service data records the median home prices for Bryan-College Station and Killen-Fort Hood as $126,600 and $101,200, respectively.[38] Fourth quarter 2004 data shows that 40 percent of the households have sufficient income to afford the median-priced home in Bryan-College Station, and 73 percent can afford the median-priced home in Killeen-Fort Hood.[39]

[38] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[39] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Special Needs Populations

According to 2000 Census data, there are 160,743 persons with disabilities residing in the region, which is 16.7 percent of the total region population. In addition, there are 55,854 elderly individuals without disabilities in the region, which is 5.8 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[40] but figures vary. According to the 2000 Census, there are 1,003 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 129 homeless persons in the Killeen area.

Housing Supply

According to 2000 Census data, of the 387,627 housing units in the region, 344,575 are occupied, which is an 88.9 percent occupancy rate. Of the total housing stock, 67 percent are one unit; 20 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 61.2 percent are owner occupied and 38.8 percent are occupied by renters.

Figure 3.60: Region 8 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	387,627		4.8%
Total Occupied Housing Units	344,575	88.9%	4.7%
Owner-Occupied Units	210,882	61.2%	4.5%
Renter-Occupied Units	133,693	38.8%	5.0%

Source: 2000 Census

Data for the region shows that building permits for 4,376 single family units and 2,201 multifamily units were issued in 2004.[41]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 343,856 households in the region, 103,864 owners and renters have housing problems; this represents 30.2 percent of all households.

40 Texas Interagency Council for the Homeless, "Key Facts."
41 Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Figure 3.61: Region 8 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	42,797	20,028	12,657	8,285	1,826
Lacking Kitchen and/or Plumbing	1,831	601	354	355	92
Overcrowding	12,409	2,903	2,232	3,502	3,772

Total	103,864	34,504	24,407	23,835	20,156

Source: 2000 CHAS

Regional Input on Housing Needs

Approximately 76 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. Results show a slight preference for renovation of existing rental housing over other rental housing activities. Rental payment assistance is more important than in the region new housing development.

The Community Needs Survey respondents from Region 8 express a slight preference for the renovation of existing housing; purchase assistance and new housing development rank next in importance. Twenty-seven percent of the respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. In terms of TDHCA energy-related activities, Region 8 has a preference for utility payment assistance. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

2004 Regional Advisory Committee attendees from Region 8 discussed the discussed the definition of affordable housing versus subsidized housing and the need for elected officials to possess a complete understanding of the affordable housing programs available. The meeting attendees identified a need for homeless shelters to address the problem of persons living in abandoned or condemned housing in the region. There is a need for solid demographic information on the special needs populations in the area. With regard to the current funding distribution, the group identified a need for rental and owner housing in rural areas. The application process for housing funds is complex and daunting. There is a problem with overcrowded housing and a need for housing infill programs. The group identified a desire for additional homebuyer education counseling and improved communication regarding funding opportunities.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.62: Region 8 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	5,356	24.2%	3.1%
HUD Units	2,683	12.1%	4.7%
PHA Units	3,273	14.8%	5.5%
Section 8 Vouchers	8,053	36.3%	4.0%
USDA Units	2,804	12.6%	10.7%
HFC Units*	304		
Total	22,169	100.0%	4.4%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.63: Region 8 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,343,077	5.2%
Housing Tax Credit	$2,610,906	6.1%
Community Services Block Grant	$1,323,391	5.0%
Emergency Shelter Grants	$231,681	4.8%
Comprehensive Energy Assistance	$1,844,233	5.6%
Weatherization Assistance	$637,907	5.6%
Total	$7,991,195	5.5%

REGION 9

San Antonio is the main metropolitan area in Region 9. According to the 2000 Census, the total population in Region 9 is 1,807,868, which represents 8.7 percent of the state's total population.

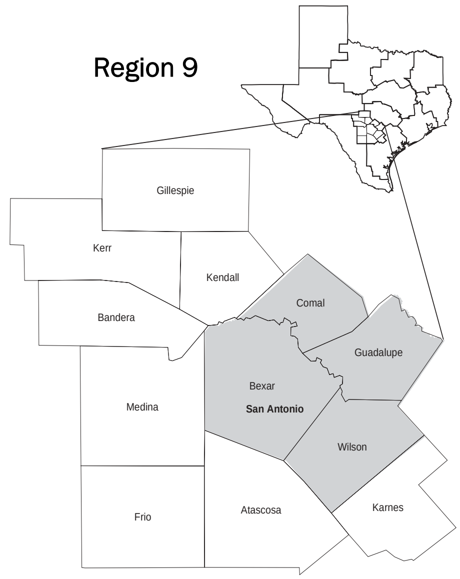

Figure 3.64: Region 9 Population Figures

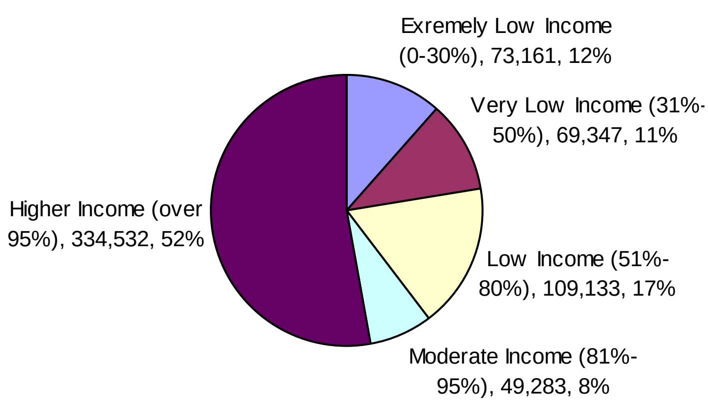
	Region Total	Percent in Region	Region Percent of State
Total Population	1,807,868		8.7%
Persons with Disabilities	337,541	18.7%	9.4%
Elderly Persons (without disabilities)	107,974	6.0%	9.9%
Individuals in Poverty	267,118	14.8%	8.6%

Source: 2000 Census

Approximately 89 percent of the population lives in urban areas.

Figure 3.65: Region 9 Household Income



The pie chart to the left depicts the income breakdown of the 635,280 households in the region. Approximately 40 percent of households are low income. There are 267,118, or 14.8 percent, individuals living in poverty in the region.

The 2005 Multiple Listing Service records the median home price for San Antonio as $126,700.[42] 2004 data shows that 56 percent of the households have sufficient income to afford the median-priced home.[43]

Special Needs Populations

According to 2000 Census data, there are 337,541 persons with disabilities residing in the region, which is 18.7 percent of the total region population. In addition, there are 107,974 elderly individuals without disabilities in the region, which is 6.0 percent of the region.

[42] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[43] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[44] but figures vary. According to the 2000 Census, there are 2,919 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 850 homeless persons in San Antonio.

Housing Supply

According to 2000 Census data, of the 689,862 housing units in the region, 636,796 are occupied, which is a 92.3 percent occupancy rate. Of the total housing stock, 69 percent are one unit; 22 percent are over two units; 8 percent are mobile homes; and the rest are boats and RVs. Approximately 65.0 percent are owner occupied and 35.0 percent are occupied by renters.

Figure 3.66: Region 9 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	689,862		8.5%
Total Occupied Housing Units	636,796	92.3%	8.6%
Owner-Occupied Units	414,009	65.0%	8.8%
Renter-Occupied Units	222,787	35.0%	8.3%

Source: 2000 Census

Data for the region shows that building permits for 12,924 single family units and 4,905 multifamily units were issued in 2004.[45]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 635,280 households in the region, 194,512 owners and renters have housing problems; this represents 30.6 percent of all households.

Figure 3.67: Region 9 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	62,012	24,095	19,495	14,458	3,964
Lacking Kitchen and/or Plumbing	3,284	1,137	484	751	241
Overcrowding	28,877	7,296	6,160	7,359	8,062
Owner Households					
Extreme Cost Burden	71,630	17,316	14,240	17,201	22,873
Lacking Kitchen and/or Plumbing	3,270	713	667	624	297
Overcrowding	25,439	2,644	4,107	6,555	12,133
Total	194,512	53,201	45,153	46,948	47,570

Source: 2000 CHAS

44 Texas Interagency Council for the Homeless, "Key Facts."
45 Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Regional Input on Housing Needs

Approximately 79 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is no clear preference for owner-occupied housing assistance or rental housing assistance. Results show a slight preference for new rental housing development over other rental housing activities. Rental payment assistance is more important in the region than the renovation of existing housing.

The Community Needs Survey respondents from Region 9 do not express a preference for the renovation of existing housing, purchase assistance, or new housing development. Twenty percent of the respondents report a severe or significant homeless problem in the region. Among the different types of homeless assistance, transitional housing facilities rank slightly higher in importance than short-term homeless shelters. In terms of TDHCA energy-related activities, Region 9 has a preference for utility payment assistance, reflecting the state trend. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment. Energy-related educational activities are the least preferred of the energy related activities.

2004 Regional Advisory Committee attendees from Region 9 concluded that although more funding would close the gap between the need for affordable housing and the supply, funding alone is not the answer. The process needs to be improved for both private and public entities. The group expressed a desire to receive feedback from TDHCA on the points and issues raised in the RAC meetings.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.68: Region 9 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	13,847	32.7%	8.1%
HUD Units	5,321	12.6%	9.3%
PHA Units	7,321	17.3%	12.3%
Section 8 Vouchers	14,859	35.1%	11.1%
USDA Units	971	2.3%	3.7%
HFC Units*	21,974		
Total	42,319	100.0%	9.5%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.69: Region 9 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,547,843	6.0%
Housing Tax Credit	$2502,878	5.8%
Community Services Block Grant	$2,366,652	9.0%
Emergency Shelter Grants	$414,511	8.6%
Comprehensive Energy Assistance	$2,656,465	8.0%
Weatherization Assistance	$862,783	7.5%
Total	$10,351,132	7.1%

REGION 10

Region 10, including the urban areas of Corpus Christi and Victoria, is located in the south eastern part of the state on the Gulf of Mexico. According to the 2000 Census, the total population in Region 10 is 732,917, which represents 3.5 percent of the state's total population.

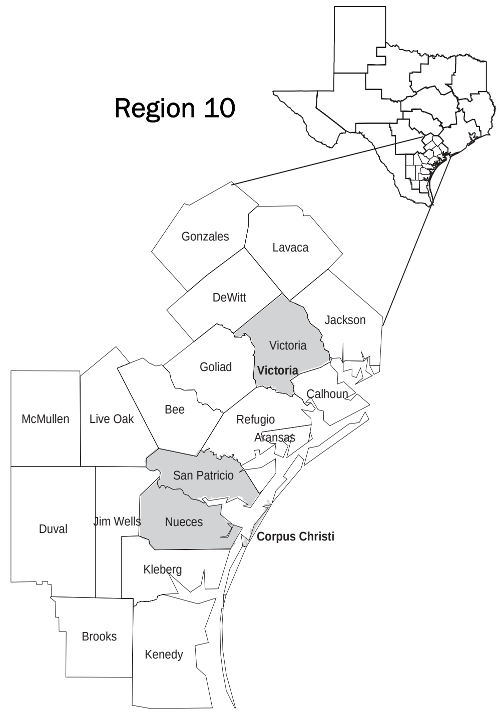


Figure 3.70: Region 10 Population Figures

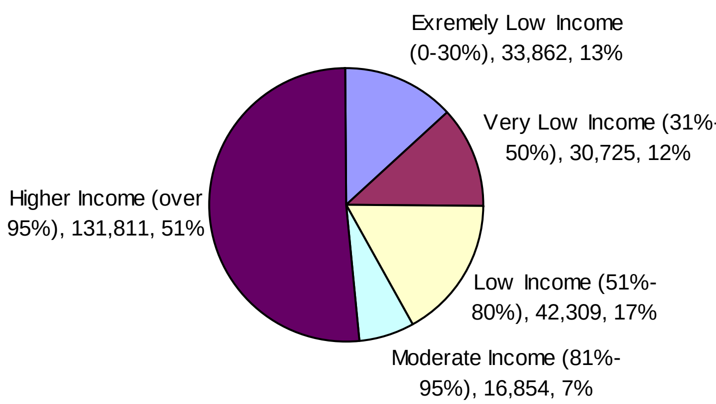
	Region Total	Percent in Region	Region Percent of State
Total Population	732,917		3.5%
Persons with Disabilities	141,592	19.3%	3.9%
Elderly Persons (without disabilities)	46,900	6.4%	4.3%
Individuals in Poverty	132,214	18.0%	4.2%

Source: 2000 Census

In Region 10, 62 percent live in urban areas.

Figure 3.71: Region 10 Household Income



The pie chart to the left depicts the income breakdown of the 255,493 households in the region. Approximately 42 percent of households are low income. There are 132,214, or 18.0 percent, individuals living in poverty in the region.

The 2005 Multiple Listing Service records the median home price for Corpus Christi as $117,900.[46] Fourth quarter 2004 data shows that 4 percent of the households have sufficient income to afford the median-priced home.[47]

Special Needs Populations

According to 2000 Census data, there are 141,592 persons with disabilities residing in the region, which is 19.3 percent of the total region population. In addition, there are 46,900 elderly individuals without disabilities in the region, which is 6.4 percent of the region.

46 Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).

47 Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[48] but figures vary. According to the 2000 Census, there are 1,456 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 272 homeless persons in Corpus Christi.

Housing Supply

According to 2000 Census data, of the 298,494 housing units in the region, 256,428 are occupied, which is an 85.9 percent occupancy rate. Of the total housing stock, 71 percent are one unit; 18 percent are over two units; 10 percent are mobile homes; and the rest are boats and RVs. Approximately 66.8 percent are owner occupied and 33.2 percent are occupied by renters.

Figure 3.72: Region 10 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	298,494		3.7%
Total Occupied Housing Units	256,428	85.9%	3.5%
Owner-Occupied Units	171,319	66.8%	3.6%
Renter-Occupied Units	85,109	33.2%	3.2%

Source: 2000 Census

Data for the region shows that building permits for 2,363 single family units and 1,376 multifamily units were issued in 2004.[49]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 255,493 households in the region, 76,196 owners and renters have housing problems; this represents 29.8 percent of all households.

[48] Texas Interagency Council for the Homeless, "Key Facts."

Total	76,196	23,382	18,136	16,465	17,481

Source: 2000 CHAS

Regional Input on Housing Needs

Approximately 87 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in their area. There is a preference for owner-occupied housing assistance over rental housing assistance. Results show no significant preference between new rental housing development and the renovation of existing housing. Rental payment assistance is the least important of the three rental housing assistance activities.

Respondents from Region 10 prefer home purchase assistance over the renovation of existing housing. New housing development is the least important owner-occupied housing assistance. Twenty-seven percent of the Community Needs Survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. In terms of TDHCA energy-related activities, Region 10 has a preference for utility payment assistance. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

Regional Advisory Committee meeting attendees from Region 10 recommended improved communication in the form of an email distribution list and a consumer website with housing resources. Communicating with unincorporated communities and colonias require additional effort. Persons with disabilities face difficulties in locating affordable housing; the group suggested funding set-asides for specific programs. Attendees noted that the region is unique in its high poverty rate, number of non-English speakers, and high unemployment rate and therefore there is a greater need for rental housing rather than homeownership opportunities. There is a need for a common definition of affordable housing.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.74: Region 10 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	3,968	23.1%	2.3%
HUD Units	3,811	22.2%	6.6%
PHA Units	3,976	23.1%	6.7%
Section 8 Vouchers	3,804	22.1%	2.8%
USDA Units	1,619	9.4%	6.2%
HFC Units*	968		
Total	17,178	100.0%	3.8%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.75: Region 10 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$2,085,896	8.0%
Housing Tax Credit	$1,771,585	4.1%
Community Services Block Grant	$1,339,992	5.0%
Emergency Shelter Grants	$205,079	4.2%
Comprehensive Energy Assistance	$1,828,528	5.5%
Weatherization Assistance	$663,080	5.8%
Total	$7,894,160	5.4%

REGION 11

Region 11 is a 16-county area along the border of Mexico. The main urban areas in the region are Brownsville-Harlingen, McAllen-Edinburg, Del Rio, and Laredo. According to the 2000 Census, the total population in Region 11 is 1,343,330, which represents 6.4 percent of the state's total population.

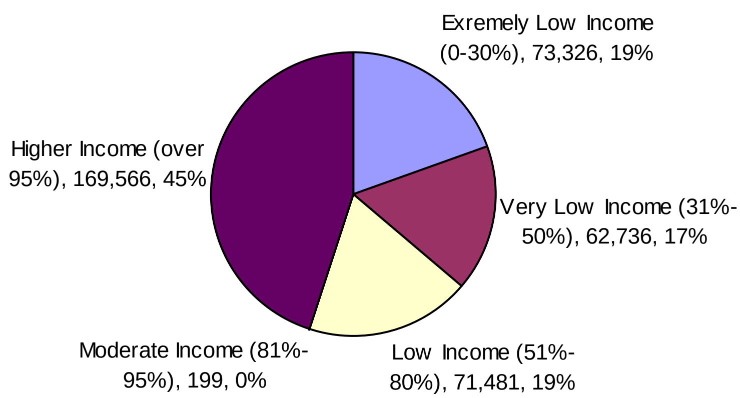
Figure 3.76: Region 11 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,343,330		6.4%
Persons with Disabilities	257,838	19.2%	7.2%
Elderly Persons (without disabilities)	67,505	5.0%	6.2%
Individuals in Poverty	455,366	33.9%	14.6%

Source: 2000 Census

About 68 percent of the population lives in urban areas.

Figure 3.77: Region 11 Household Income



The pie chart to the left depicts the income breakdown of the 377,276 households in the region. Approximately 55 percent of households are low income.[50] There are 455,366, or 33.9 percent, individuals living in poverty in the region.

2005 Multiple Listing Service data records the median home prices for Harlingen and Brownsville as $79,500 and $90,000, respectively.[51] Fourth quarter 2004 data shows that 52 percent of the households have sufficient income to afford the median-priced home in Harlingen, and 53 percent can afford the median-priced home in Brownsville.[52]

[50] The CHAS figures for moderate and higher income households in Region 11 indicate that there are only 199 persons with incomes between 80-95 percent of the AMFI. TDHCA has been unable to get more accurate information for this segment of the population. However, the planning impact for the SLIHP is relatively low because, except for the first time homebuyer program which is done through a network of participating lenders, TDHCA programs serve persons below 80 percent AMFI.

[52] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Special Needs Populations

According to 2000 Census data, there are 257,838 persons with disabilities residing in the region, which is 19.2 percent of the total region population. In addition, there are 67,505 elderly individuals without disabilities in the region, which is 5.0 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[53] but figures vary. According to the 2000 Census, there are 1,211 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 193 homeless persons in Laredo.

Housing Supply

According to 2000 Census data, of the 457,406 housing units in the region, 378,275 are occupied, which is an 82.7 percent occupancy rate. Of the total housing stock, 66 percent are one unit; 14 percent are over two units; 18 percent are mobile homes; and the rest are boats and RVs. Approximately 70.8 percent are owner occupied and 29.2 percent are occupied by renters.

Figure 3.78: Region 11 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	457,406		5.6%
Total Occupied Housing Units	378,275	82.7%	5.1%
Owner-Occupied Units	267,716	70.8%	5.7%
Renter-Occupied Units	110,559	29.2%	4.1%

Source: 2000 Census

Data for the region shows that building permits for 11,844 single family units and 3,700 multifamily units were issued in 2004.[54]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 377,276 households in the region, 161,609 owners and renters have housing problems; this represents 42.8 percent of all households.

[53] Texas Interagency Council for the Homeless, "Key Facts."
[54] Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Figure 3.79: Region 11 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	25,023	13,381	7,343	3,335	964
Lacking Kitchen and/or Plumbing	4,751	2,474	1,099	636	0
Overcrowding	31,457	11,542	7,321	6,233	6,361

Total	161,609	54,373	38,227	33,049	34,048

Source: 2000 CHAS

Regional Input on Housing Needs

Approximately 90 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area, the second highest percentage among the regions. There is a strong preference for owner-occupied housing assistance over rental housing assistance. Results show a preference for new rental housing development over the renovation of existing housing and rental payment assistance.

The Community Needs Survey respondents from Region 11 prefer home purchase assistance over new housing development. The renovation of existing housing is the least important owner-occupied housing assistance. Forty-three percent of respondents report a severe or significant homeless problem in their region; this is the highest percentage in the state. Among the different types of homeless assistance, short-term homeless shelters rank slightly higher in importance than transitional housing facilities. In terms of TDHCA energy-related activities, Region 11 has a preference for utility payment assistance. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

Regional Advisory Committee meeting attendees from Region 11 suggested that more meetings and public hearings would improve communication in the region. The existing special needs programs could be enhanced by more coordination among the service providers. Meeting attendees agreed with the process of evaluating a region's need when distributing funds. Homebuyer education should be mandatory prior to the purchase of a home.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.80: Region 11 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	7,400	22.2%	4.3%
HUD Units	3,695	11.1%	6.4%
PHA Units	7,223	21.6%	12.2%
Section 8 Vouchers	13,071	39.1%	9.8%
USDA Units	2,003	6.0%	7.7%
HFC Units*	204		
Total	33,392	100.0%	7.5%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.81: Region 11 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$4,713,360	18.2%
Housing Tax Credit	$5,209,862	12.1%
Community Services Block Grant	$3,710,876	14.0%
Emergency Shelter Grants	$706,653	14.6%
Comprehensive Energy Assistance	$3,735,670	11.3%
Weatherization Assistance	$1,371,503	12.0%
Total	$19,447,924	13.3%

REGION 12

Region 12 in west Texas surrounds the urban areas of Odessa-Midland and San Angelo. According to the 2000 Census, the total population in Region 12 is 524,884, which represents 2.5 percent of the state's total population.

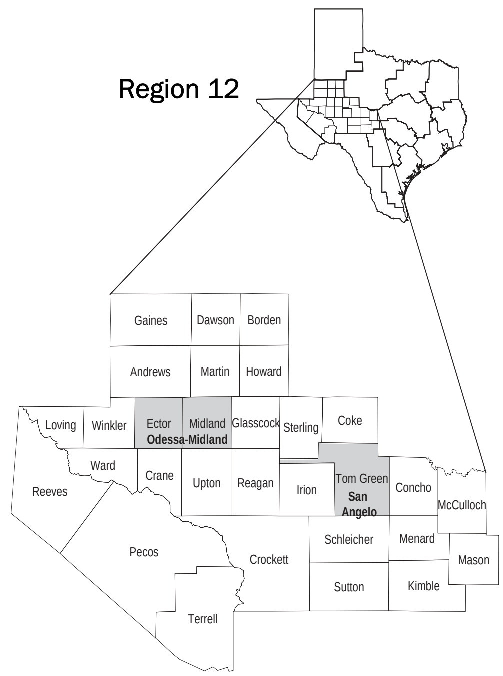

Figure 3.82: Region 12 Population Figures

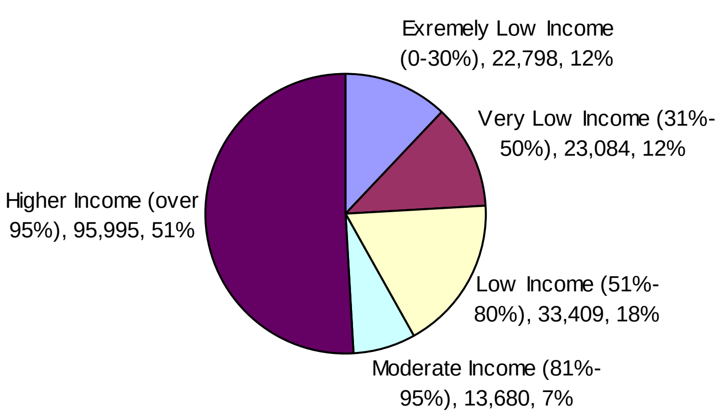
	Region Total	Percent in Region	Region Percent of State
Total Population	524,884		2.5%
Persons with Disabilities	91,822	17.5%	2.5%
Elderly Persons (without disabilities)	35,764	6.8%	3.3%
Individuals in Poverty	85,063	16.2%	2.7%

Source: 2000 Census

Approximately 68 percent of the population lives in urban areas.

Figure 3.83: Region 12 Household Income



The pie chart to the left depicts the income breakdown of the 188,921 households in the region. Approximately 42 percent of households are low income. There are 85,063, or 16.2 percent, individuals living in poverty in the region.

Multiple Listing Service data records the median home prices for San Angelo and Odessa-Midland as $85,800 and $87,600, respectively.[55] Fourth quarter 2004 data shows that 65 percent of the households have sufficient income to afford the median-priced home in San Angelo, and 69 percent can afford the median-priced home in Odessa-Midland.[56]

Special Needs Populations

According to 2000 Census data, there are 91,822 persons with disabilities residing in the region, which is 17.5 percent of the total region population. In addition, there are 35,764 elderly individuals without disabilities in the region, which is 6.8 percent of the region.

[55] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[56] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[57] but figures vary. According to the 2000 Census, there are 414 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census did not count any homeless people in metropolitan areas.

Housing Supply

According to 2000 Census data, of the 221,968 housing units in the region, 189,582 are occupied, which is an 85.4 percent occupancy rate. Of the total housing stock, 72 percent are one unit; 16 percent are over two units; 12 percent are mobile homes; and the rest are boats and RVs. Approximately 70.1 percent are owner occupied and 29.9 percent are occupied by renters.

Figure 3.84: Region 12 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	221,968		2.7%
Total Occupied Housing Units	189,582	85.4%	2.6%
Owner-Occupied Units	132,956	70.1%	2.8%
Renter-Occupied Units	56,626	29.9%	2.1%

Source: 2000 Census

Data for the region shows that building permits for 782 single family units and 21 multifamily units were issued in 2004.[58]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 188,921 households in the region, 49,895 owners and renters have housing problems; this represents 26.4 percent of all households.

[57] Texas Interagency Council for the Homeless, "Key Facts."
[58] Real Estate Center at Texas A&M University, "Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 18, 2005).

Figure 3.85: Region 12 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	14,243	6,874	4,782	2,151	436
Lacking Kitchen and/or Plumbing	1,103	355	253	204	24

Owner Households					
Extreme Cost Burden	20,719	6,228	5,142	4,727	4,622
Lacking Kitchen and/or Plumbing	1,138	265	223	264	64
Overcrowding	7,320	752	1,186	2,243	3,139
Total	49,895	15,866	12,569	10,953	9,918

Source: 2000 CHAS

Regional Input on Housing Needs

Approximately 81 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area. There is a slight preference for owner-occupied housing assistance over rental housing assistance. Results show a preference for new rental housing development over the renovation of existing housing and rental payment assistance.

Community Needs Survey respondents from Region 12 prefer the renovation of existing housing over new housing development. Home purchase assistance is the least important owner-occupied housing assistance. Eighteen percent of the survey respondents report a severe or significant homeless problem in their region. Among the different types of homeless assistance, short-term homeless shelters rank about equal in importance with transitional housing facilities. In terms of TDHCA energy-related activities, Region 12 has a preference for utility payment assistance. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

2004 Regional Advisory Committee meeting attendees from Region 12 identified problems, successes, and recommendations related to the suggested affordable housing topics: communication, special needs, funding distribution, and education. There is a need for improved communication between federal, state, and local agencies. Meeting attendees identified a need for programs directed towards people with disabilities and the elderly population in the region. Additional credit counseling and homebuyer education programs are needed.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.86: Region 12 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	2,926	30.4%	1.7%
HUD Units	1,792	18.6%	3.1%
PHA Units	1,183	12.3%	2.0%
Section 8 Vouchers	3,039	31.6%	2.3%
USDA Units	687	7.1%	2.6%
HFC Units*	24		
Total	9,627	100.0%	2.2%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.87: Region 12 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$1,567,553	6.0%
Housing Tax Credit	$1,238,592	2.9%
Community Services Block Grant	$1,199,511	4.0%
Emergency Shelter Grants	$132,044	2.7%
Comprehensive Energy Assistance	$1,576,586	4.8%
Weatherization Assistance	$529,734	4.6%
Total	$6,244,020	4.3%

REGION 13

El Paso is the main urban area in Region 13. The region spreads along the Texas-Mexico border in the southwestern tip of the state. According to the 2000 Census, the total population in Region 13 is 524,884, which represents 2.5 percent of the state's total population.

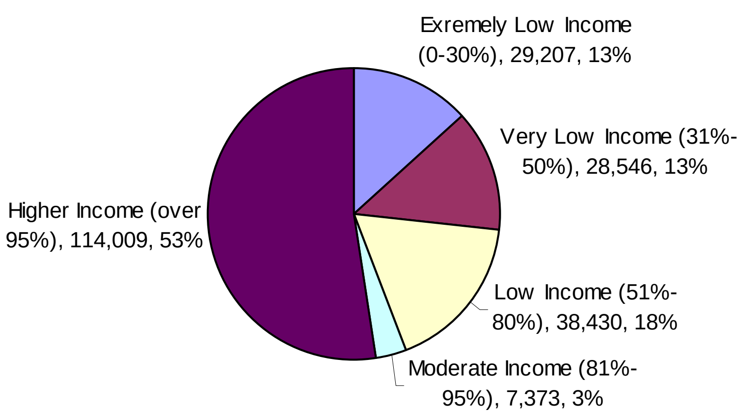
Figure 3.88: Region 13 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	704,318		3.4%
Persons with Disabilities	128,000	18.2%	3.6%
Elderly Persons (without disabilities)	35,421	5.0%	3.3%
Individuals in Poverty	165,122	23.4%	5.3%

Source: 2000 Census

Approximately 92 percent of the region population lives in the urban area of El Paso.

Figure 3.89: Region 13 Household Income



The pie chart to the left depicts the income breakdown of the 216,861 households in the region. Approximately 44 percent of households are low income. There are 165,122, or 23.4 percent, individuals living in poverty in the region.

The 2005 Multiple Listing Service data records the median home price for El Paso as $107,400.[59] Fourth quarter 2004 data shows that 59 percent of the households have sufficient income to afford the median-priced home.[60]

Special Needs Populations

According to 2000 Census data, there are 128,000 persons with disabilities residing in the region, which is 18.2 percent of the total region population. In addition, there are 35,421 elderly individuals without disabilities in the region, which is 5.0 percent of the region.

[59] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed August 22, 2005).
[60] Real Estate Center at Texas A&M University, "Texas Housing Affordability Index," http://recenter.tamu.edu/data/misc/afford2.html (accessed August 22, 2005).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[61] but figures vary. According to the 2000 Census, there are 1,022 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 356 homeless people in El Paso.

Housing Supply

According to 2000 Census data, of the 236,572 housing units in the region, 219,261 are occupied, which is a 92.7percent occupancy rate. Of the total housing stock, 68 percent are one unit; 23 percent are over two units; 8 percent are mobile homes; and the rest are boats and RVs. Approximately 63.8 percent are owner occupied and 36.2 percent are occupied by renters.

Figure 3.90: Region 13 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	236,572		2.9%
Total Occupied Housing Units	219,261	92.7%	3.0%
Owner-Occupied Units	139,842	63.8%	3.0%
Renter-Occupied Units	79,419	36.2%	3.0%

Source: 2000 Census

Data for the region shows that building permits for 3,512 single family units and 535 multifamily units were issued in 2004.[62]

Housing Need

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 216,861 households in the region, 81,248 owners and renters have housing problems; this represents 37.5 percent of all households.

Figure 3.91: Region 13 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	22,151	8,941	7,159	4,652	1,399
Lacking Kitchen and/or Plumbing	1,679	470	539	297	24

Regional Input on Housing Needs

Approximately 78 percent of the respondents to the 2003 Community Needs Survey in the region report a severe or significant affordable housing problem in there area. There is a preference for owner-occupied housing assistance over rental housing assistance. Results show a preference for new rental housing development over the renovation of existing housing and rental payment assistance.

In terms of owner-occupied housing assistance, survey respondents from Region 13 prefer new housing development over the renovation of existing housing. Home purchase assistance is the least important owner-occupied housing assistance. Forty-one percent of respondents report a severe or significant homeless problem in their region; this is the second highest rate in the state. Among the different types of homeless assistance, short-term homeless shelters rank higher in importance with transitional housing facilities. In terms of TDHCA energy-related activities, Region 13 has a preference for utility payment assistance. Weatherization measures to increase energy efficiency ranks next in importance followed by the repair and replacement of HVAC equipment.

2004 Regional Advisory Committee attendees from Region 13 expressed frustration with revised procedures related to the funding application process. There is a need for new programs that address the fact that many people in the region do not qualify for conventional home loans. The meeting attendees request that additional weight be given to the poverty rate when determining the allocation of funding. Predatory lending education is needed.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Figure 3.92: Region 13 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	3,598	20.1%	2.1%
HUD Units	1,863	10.4%	3.2%
PHA Units	6,284	35.1%	10.6%
Section 8 Vouchers	5,842	32.7%	4.4%
USDA Units	298	1.7%	1.1%
HFC Units*	378		
Total	17,885	100.0%	4.0%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2006

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2006 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally.

Figure 3.93: Region 13 Projected 2006 TDHCA Funding by Program

Program	2006 Funding	Percent of State
HOME	$616,491	2.4%
Housing Tax Credit	$2,080,851	4.8%
Community Services Block Grant	$1,436,984	5.0%
Emergency Shelter Grants	$256,349	5.3%
Comprehensive Energy Assistance	$1,592,680	4.8%
Weatherization Assistance	$600,603	5.2%
Total	$6,583,958	4.5%

REGIONAL PLANS SUMMARY

The housing and community service needs of the different regions of Texas are as varied as the regions themselves. This section summarizes the information from the regional plans in the previous section.

POPULATION CHARACTERISTICS

The most populous regions of the state according to the 2000 Census are Regions 3 and 6, together representing almost 50 percent of the state. Regions 3, 7, and 11 are the fastest growing areas as indicated by population estimates.

Figure 3.94: Population by Region

Service Region	Population 2000 Census	Percent of State's Population	Population Estimate Jan 1, 2003	Percent Change 2000 to 2003

Information on the number of housing permits provides information on the regional housing industry. The regions with the highest share of the state's housing permits are also the most populous regions: 3 and 6. Across the state, there were nearly four times as many single family permits as multifamily permits.

Figure 3.99: Housing Permits, 2004

Service Region	Multifamily Housing Permits	Percent of State	Single Family Housing Permits	Percent of State	Total Housing Permits	Percent of State

NEED INDICATORS

Figure 3.86 shows the number of renter households with cost burden greater than 30 percent by income group. The highest numbers of very low income households with extreme cost burden are found in Region 3 with a total of 206,011 households and Region 6 with 168,355 households.

Figure 3.100: Number of Renter Households with Extreme Cost Burden by Income Group, 2000

The number of rental units lacking complete plumbing and/or kitchen facilities is one of the indicators of housing need that does not follow the pattern of population. Regions 3 and 6 have the highest number of units lacking facilities and are also the regions with the highest number of renter households. Region 11, however, is ranked sixth in terms of renter population and third in number of renter units lacking kitchen and/or plumbing facilities.

Figure 3.104 shows the number of owner units that are lacking kitchen and/or plumbing facilities. Region 11, with the sixth highest number of owner households, has the highest number of physically inadequate owner housing units. Region 6, the second most populous region, has the second highest number of units lacking kitchen and/or plumbing facilities.

The total number of households in poverty, elderly and non-elderly, is one of the need indicators for some of the Department's community service activities. Regions 3, 6, and 11 have the highest numbers of poverty households.

ASSISTED HOUSING INVENTORY

The following table shows the number of multifamily units in the state financed through state and federal sources according to region. HFC units are not included in the total assisted units because this figure includes a considerable number of marker-rate units, and many HFC units are financed through TDHCA and already counted in the TDHCA units total. Please see the “Assisted Housing Inventory” under “State of Texas” for data explanations.

Figure 3.107: Assisted Multifamily Units

Region	TDHCA Units	HUD Units	PHA Units	Section 8 Vouchers	USDA Units	HFC units*	Total Assisted Units
1	4,218	2,076	1,562	3,987	1,612	1,577	13,455
2	2,753	1,655	3,904	2,921	1,925	280	13,158
3	55,393	10,834	8,725	39,149	4,076	19,944	118,177
4	5,182	3,381	3,422	6,090	3,872	1,160	21,947
5	4,556	4,296	3,241	7,992	1,371	1,171	21,456
6	46,254	13,076	5,795	19,713	3,484	37,116	88,322
7	15,315	2,889	3,522	8,053	1,461	8,076	31,240
8	5,356	2,683	3,273	5,424	2,804	304	19,540
9	13,847	5,321	7,321	14,859	971	21,974	42,319
10	3,968	3,811	3,976	3,804	1,619	968	17,178
11	7,400	3,695	7,223	13,071	2,003	204	33,392
12	2,926	1,792	1,183	3,039	687	24	9,627
13	3,598	1,863	6,284	5,842	298	378	17,885
State	170,766	57,372	59,431	133,944	26,183	93,176	447,696

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA ASSISTANCE FOR 2006

Based on allocation formulas, TDHCA can estimate the amount of 2006 funding that will be allocated to a region for certain programs. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally and thus are not included in these tables, though this funding may be expended in the region.

Regional figures are total dollars to be allocated, less administrative fees and program set-asides or initiatives that are not subject to the allocation formula. State totals may not be exact due to rounding.

For CSBG, the allocation formula does not allocate funding to the 13 Uniform State Service Regions specifically. Rather, the formula allocates funding to a statewide network of contractors with multicounty service areas, which may cross regional boundaries. The regional distribution estimate is based on a theoretical allocation of contractor funding based on each county's level of need relative to all the need in the contractor service area.

Projected FY 2006 CEAP and WAP figures are based on 2005 level funding by provider and then county.

Figure 3.108: Projected 2006 TDHCA Funding by Program by Region

Region	HOME	HTC	CSBG	ESGP	CEAP	WAP	Total Region Funding
1	$1,798,446	$2,026,482	$1,331,785	$191,053	$2,177,106	$822,537	$8,347,409

SECTION 4: ACTION PLAN

In response to the housing needs identified in the previous section, this plan outlines TDHCA's course of action designed to meet those underserved housing needs. This section discusses the following:

- TDHCA Purpose
- Obstacles to Meeting Housing Needs
- General Strategies to Overcome Obstacles
- Policy Focuses
- Program Plans
- TDHCA Allocation Plans
- TDHCA Goals and Objectives

TDHCA PURPOSE

Section 2306.001 of TDHCA's enabling legislation states that the purpose of the Department is to

(1) assist local governments in:

(A) providing essential public services for their residents; and

(B) overcoming financial, social, and environmental problems;

(2) provide for the housing needs of individuals and families of low, very low, and extremely low income and families of moderate income;

(3) contribute to the preservation, development, and redevelopment of neighborhoods and communities, including cooperation in the preservation of government-assisted housing occupied by individuals and families of very low and extremely low income;

(4) assist the governor and the legislature in coordinating federal and state programs affecting local government;

(5) inform state officials and the public of the needs of local government;

(6) serve as the lead agency for:

(A) addressing at the state level the problem of homelessness in this state;

(B) coordinating interagency efforts to address homelessness; and

(C) addressing at the state level and coordinating interagency efforts to address any problem associated with homelessness, including hunger, and

(7) serve as a source of information to the public regarding all affordable housing resources and community support services in the state.

OBSTACLES TO MEETING HOUSING NEEDS

LACK OF AFFORDABLE HOUSING

The most apparent obstacle to meeting underserved housing needs in Texas is a severe shortage of affordable housing stock. There is a corresponding shortage of funding sources to maintain and increase this housing stock. With few exceptions, every housing program administered by TDHCA receives far more applications than could be funded from available resources. This is evidence that there is significant interest on the part of both the nonprofit and for-profit sectors to produce the housing that is needed. To address this obstacle, TDHCA must develop strategies to foster and maintain affordable housing.

LACK OF ORGANIZATIONAL CAPACITY

While the evidence of interest in producing affordable housing is easily documented, the actual capacity of organizations to produce such housing is not as clear. A lack of organizational capacity, especially in the harder to reach areas of the state, might explain the hesitancy of smaller communities to attempt to address affordable housing issues. As the HOME Program focus is on non–participating jurisdictions/smaller rural areas, this is of particular concern to TDHCA.

LACK OF ORGANIZATIONAL OUTREACH

Another factor that goes hand in hand with lack of experience in developing affordable housing is the lack of knowledge of available resources to address a community's needs. There are both public and private resources available throughout the State that can be layered and leveraged to help stretch local funding. Unfortunately, many communities are not aware of these options or do not know how to successfully obtain them. This lack of knowledge, and in some cases communication, proves to be a barrier to the potential development of affordable housing.

LOCAL OPPOSITION TO AFFORDABLE HOUSING

It is a common perception that affordable housing helps contribute to overcrowded schools, increased crime rates, traffic congestion, and general neighborhood deterioration that will lower the surrounding property values. As a result, developments requesting funding from TDHCA can experience significant opposition. TDHCA continues to work to educate the general public on affordable housing issues and encourages developers to interact directly with neighborhood organizations throughout the application process. This educational process is done with such tools as the public hearing process, TDHCA's website and publications, and the application scoring criteria for rental development funding.

REGULATORY BARRIERS TO AFFORDABLE HOUSING

The following issues can be barriers to the provision of affordable housing.

- *Zoning provisions*: Because municipalities have zoning authority, they are in the position to shape the type and direction of growth within their boundaries. Ordinances may be passed to encourage affordable housing through measures such as lowering minimum lot sizes, decreasing building set-back requirements, and lowering minimum square footages of homes. However, they can also pass ordinances that drive land and construction costs up to the point that affordable housing cannot be built. Unfortunately, the attitudes of municipalities can be influenced by attitudes of fear and distrust with regard to affordable housing. Neighborhood groups often oppose affordable housing developments because of concerns that they will drive down property values, increase crime, and put a strain on local resources including schools and roads.

- *Deed restrictions*: Property owners may place a variety of deed restrictions on the development of property. Common deed restrictions include minimum square footage requirements, the type of construction and materials that must be used, and requirements for other amenities such as stone fences, landscaping, etc. They are primarily used to protect property values in a neighborhood by ensuring that certain minimum standards are met. Deed restrictions may be placed on properties through various means including neighborhood associations or property owners before the sale, subdivision, or development of an individual's own property.
- *Impact fees and development fees*: In the mid 1980s, many Texas cities experienced rapid growth. As a consequence, cities encountered difficulties in meeting the demand for city services and infrastructure. To address this problem, legislation authorizing impact fees was passed during the 1987 legislative session. As a condition of permit approval, the legislation authorized the assessment of fees to pay for infrastructure costs. The impact fee bill validated municipal impact fees, specified the type of projects for which the fees could be charged, required municipalities to account for impact fees that were collected, and allowed for public input into the process.
- *Restrictions on affordable housing options*: Construction options have increased over the last 10 years with the advent of new materials and housing options such as manufactured housing. Many of these alternatives could have a positive impact on the availability of affordable housing. Currently many of these options are viewed with distrust or are not well known by the general public. With regard to alternative building materials, the effectiveness of these new materials may be able to lower the cost of construction without sacrificing quality, but some municipalities may view them with suspicion. Ultimately, municipalities will have to review the appropriateness of allowing these less-expensive materials to be used in affordable housing. While these homes are finding their way into the main stream of the housing market, many new owners find that they face code concerns and the fear of declining property values from their local governments.
- *Overlapping government authority over housing construction*: In some cases, more than one government entity has authority over a specific part of the building and development process. There are times when this overlapping causes delays and adds to the costs of construction.
- *Environmental regulations*: There are several state and federal regulations that have been passed to protect the environment. At the federal level, regulations include the Endangered Species Act, National Pollutant Discharge Elimination System, and Wetlands regulations. In Texas, rules to protect the environment are developed by the Texas Commission on Environmental Quality. These include rules for the installation of septic systems and for development over the Edwards Aquifer. The restrictions associated with the regulations can add to the cost of development.

AREA INCOME CHARACTERISTICS

Area incomes also affect the ability to meet local housing needs. Median incomes in rural areas fall far below those in urban. Currently the median income for all metropolitan statistical areas is $55,500 compared to $42,400 for non-metro households. Specifically, problems occur because program eligibility, rents, and home purchase prices are tied to the median income for these areas. Often times a developer will choose to locate new developments in larger metro areas where it is easier and more profitable to build—allowing them to charge more for either the sale of a single family home or rents on multifamily properties.

GENERAL STRATEGIES TO OVERCOME OBSTACLES

TDHCA is committed to exploring a variety of avenues to provide affordable housing and community services to assist those at the local level. TDHCA will continue to use the following general approaches to overcome obstacles to addressing housing need.

EFFECTIVE USE OF EXISTING RESOURCES

Programs administered by TDHCA provide housing and housing-related services, including community services. Housing activities consist of homebuyer assistance which includes down payment and closing costs, the rehabilitation of single family and multifamily units, rental assistance, the new construction of single family and multifamily housing, special needs housing, transitional housing, and emergency shelters. Housing-related and community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance. Through these activities, the Department strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process.

PROVIDE INFORMATIONAL RESOURCES

It should be noted that TDHCA does not have regulatory authority over the housing/building industry, save projects funded with TDHCA funds and certain aspects of the manufactured housing industry. Additionally, as a governmental entity, the Department cannot lobby or attempt to influence the policies related to the governing of the State. However, TDHCA can act as an information resource to help identify or facilitate actions such as the following:

- Encourage localities to identify and address those regulations that lead to increased housing costs. For example, work through outreach efforts supported by convincing research to help local governments see the value in
  - setting aside undeveloped or underdeveloped land for affordable housing developments,
  - adopting zoning ordinances that do not discriminate against affordable housing,
  - reviewing local amendments to building codes and modify those that restrict the use of new advances in construction materials and techniques.
- Maintain a disability taskforce to work with TDHCA in developing policy with regards to issues related to persons with disabilities.
- Continue education programs such as the Texas Statewide Homebuyer Education Program, which provides lenders, homebuyer educators, and consumers information on serving traditionally underserved populations (e.g., persons with disabilities, lower income populations).
- Continue research on defining and eliminating or reducing both state and local policy barriers.
- Continue research on a variety of lending issues that affect the ability of households to purchase, maintain, and remain in their homes. A significant portion of this effort will be relate to a study required by HB 1582 of the 79th Legislature. This bill requires TDHCA to study mortgage foreclosure rates in Bexar, Cameron, Dallas, El Paso, Harris, and Travis Counties and to establish an advisory committee to direct the focus of the study. The advisory committee will address the extent to which the terms of mortgages are related to the foreclosure rate and whether terms could be offered to reduce the likelihood of foreclosure; the socioeconomic and geographic

elements characterizing foreclosures; the securitization of mortgages in the secondary market and its effect on foreclosures; consumer education efforts to prevent foreclosures; and recommendations to reduce foreclosures.

- Provide education and outreach to mitigate public opposition to affordable housing. TDHCA has developed a page on its website to provide interested persons with existing research on affordable housing issues that may be of concern.

COORDINATE RESOURCES

Understanding that no single entity can address the enormous needs of the state of Texas, TDHCA supports the formation of partnerships in the provision of housing and housing-related endeavors. The Department works with many housing partners including consumer groups, community-based organizations, neighborhood associations, community development corporations, community housing development organizations, community action agencies, real estate developers, social service providers, local lenders, investor-owned electric utilities, local government, nonprofits, faith-based organizations, property managers, state and local elected officials, and other state and federal agencies.

There are many benefits to these partnerships: risk and commitment are shared; the principle of reciprocity requires that local communities demonstrate an awareness of their needs and a willingness to participate actively in solving problems, therefore local communities play an active role in tailoring the project to their needs; partners are able to concentrate specifically on their area of expertise; and a greater variety of resources insure a well targeted more affordable product.

Coordination with Federal Agencies

Because the State receives the majority of its funding from federal sources, many TDHCA programs require coordination with federal agencies. Below is a listing of those federal agencies and an overview of the activities associated with these partnerships:

- *US Department of Housing and Urban Development*: TDHCA administers the HOME, ESGP, and Section 8 programs, as well as regulates the manufactured housing industry, for HUD. The state agencies have established cooperative efforts with HUD's personnel in their field offices and with the Secretary's representative. This cooperation has led to the joint marketing of housing programs through conferences and workshops throughout the state, a mutual referral system, as well as technical assistance service by which each agency assists the other with workshops and other training efforts. Currently, HUD staff uses several TDHCA documents as their text on available housing resources and distribute these materials to the local governments and organizations they are serving.
- *US Treasury Department*: TDHCA administers the HTC Program, which was created by the Tax Reform act of 1986 (Section 42 of the Internal Revenue Code of 1986, as amended, is the federal law that governs the HTC Program). The HTC Program produces over 12,000 units of affordable housing each year. Additionally, TDHCA acts as an issuer of tax-exempt and taxable mortgage revenue bonds. The authority for these bonds comes again from the above cited act. Annually, single family bonds are used to provide below-market interest rate loans and multifamily bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties.

- *US Department of Health and Human Services*: The Department administers several programs funded by HHS that are aimed at serving extremely low income persons; specifically, the Community Services Block Grant Program, the Community Food and Nutrition Program, Comprehensive Energy Assistance Program, and the Weatherization Assistance Program.
- *US Department of Energy*: TDHCA administers the US Department of Energy's Weatherization Assistance Program for Low Income Persons. This program helps consumers control energy costs through the installation of weatherization measures and provides energy conservation education.
- *USDA Rural Development*: As a provider of services to rural Texas communities, TDHCA has an ongoing relationship with USDA Rural Development. Collaborations have been achieved through several TDHCA programs (HTC, HTF, HOME) in the form of multifamily developments and single family homeownership initiatives.

Coordination with State Agencies, Local Governments, and Other Parties

TDHCA's chief function is to distribute program funds to local conduit providers that include units of local government, nonprofit and for profit organizations, community-based organizations, private sector organizations, real estate developers, and local lenders. Because the agencies do not fund individuals directly, coordination with outside entities is key to the success of its programs. Below are some examples of organizational cooperation outside of the funding of these entities.

- *Office of Rural Community Affairs (ORCA)*: TDHCA and ORCA have entered into an interagency contract to jointly administer the rural regional allocation of the HTC Program. TDHCA and ORCA jointly provide outreach and training to promote rural area capacity building, develop threshold requirements and scoring criteria for the rural applications, and score the applications. ORCA also participates in the site inspection of rural developments proposed under the rural allocation. TDHCA and ORCA coordinate services with each of the seven Colonia Self-Help Centers (in Cameron/Willacy, El Paso, Hidalgo, Maverick, Starr, Val Verde, and Webb counties) to provide housing and technical assistance to improve the quality of life for colonia residents beyond the provision of basic infrastructure. The contracts are executed directly with the county where the center is located.
- *Texas Homeless Network*: TDHCA collaborates with the Texas Homeless Network (THN) to build the capacity of homeless coalitions across the State of Texas, enabling them to become more effective in the communities they serve. The Department also provided funds through THN to support technical assistance workshops for the HUD Continuum of Care homeless application. The purpose of the workshops was to assist communities in creating a network of services to the homeless population.
- *Texas Interagency Council for the Homeless*: TDHCA serves as a member of, and provides administrative support to, the Texas Interagency Council for the Homeless—a council comprised of six member state agencies.
- *Texas Association of Realtors:* In December 2004, the Department entered into a partnership with the Texas Association of Realtors and Fannie Mae to develop an educational outreach campaign to help first time homebuyers access low-cost mortgage financing.
- *Texas Home of Your Own Coalition:* TDHCA has partnered with the Texas Home of Your Own Coalition, which is a nonprofit organization that assists persons with disabilities purchase homes, to set aside HOME Homebuyer Assistance Program funds to support homeownership for persons with disabilities.

- *Texas Department of Aging and Disability Services:* TDHCA, in cooperation with the Texas Department of Aging and Disability Services, the Texas Health and Human Services Commission, and local public housing authorities, administers a housing voucher pilot program developed by the US Department of Housing and Urban Development (HUD), the US Department of Health and Human Services, and the Institute on Disability at the University of New Hampshire. "Project Access" helps low income persons with disabilities transition from nursing facilities into the community by providing access to affordable housing.
- *Promoting Independence Advisory Board*. The Department has been working with the Promoting Independence Advisory Board to address issues related to *Olmstead v. L. C.* The group is working on initiatives that will serve the needs of persons with disabilities who want housing options outside of institutional settings. TDHCA has been working with the following agencies: Texas Health and Human Services Commission, Texas Department of Aging and Disability Services, Texas Council for Developmental Disabilities, Texas Department of State Health Services, Texas Education Agency, and Texas Department of Protective and Regulatory Services.
- *NeighborWorks America*. TDHCA continues to contract with NeighborWorks America to facilitate the Texas Statewide Homebuyer Education Program (TSHEP) training. TSHEP also collaborates with several other partners including Texas State Affordable Housing Corporation, JP Morgan Chase, Fannie Mae, the Texas Home of Your Own Coalition, and Texas C-BAR to implement the trainings.
- *Texas State Affordable Housing Corporation (TSHAC):* TDHCA has entered into a memorandum of understanding with TSAHC to share data and information in the development of the State of Texas Low Income Housing Plan and Annual Report. TSAHC also manages the bank account for TSHEP.
- *Local Utility Companies*: Partnerships with financial commitments between the Weatherization Assistance Program and Southwestern Electric Power Company, Southwestern Public Service Company, Entergy, and El Paso Electric, provide energy conservation measures to very low and extremely low income utility customers.
- *Coalition of Texans with Disabilities*: TDHCA serves on the Texas PHA Project Advisory Committee with the Coalition of Texans with Disabilities, Texas Council for Developmental Disabilities, Advocacy Inc., and United Cerebral Palsy to oversee the three-year grant to provide training and technical assistance to public housing authorities. Activities of the grant are intended to result in a measurable increase in the number of integrated housing units available to persons with disabilities.
- *Texas Council for Developmental Disabilities*: TDHCA is a voting member of the Council, and serves on the Council's policy committee.
- *CHDO Capacity Building Project*: TDHCA has committed to understanding the needs of CHDOs to ensure the success of single family and multifamily developments funded by TDHCA. To that end, TDHCA partnered with Training and Development Associates' (TDA's) Community Building Investment (CBI) II Program. The CBI II Program, implemented by TDA, provides direct technical assistance, training, and/or operating grants (pass-through funds) to existing and potential CHDOs that were awarded funding under the program.

  TDHCA also commissioned a comprehensive plan to address technical assistance and capacity building needs of Texas CHDOs. Implementation of the plan will improve TDHCA's overall management and understanding of CHDOs, improve the capacity and performance of CHDOs, and establish effective systems to ensure long term quality housing production. The plan is primarily composed of two parts: (1) the provision of ongoing training and technical assistance to CHDOs and prospective CHDOs and (2) the recommended procedures needed to ensure the future capacity and success of Texas CHDOs.

FAIR HOUSING

The Texas Fair Housing Act of 1989 enables the State to remedy discriminatory public policies affecting housing affordability and access. The Act prohibits discrimination against individuals in their pursuit of homeownership or rental housing opportunities based on race, color, national origin, sex, religion, familial status, and physical or mental handicaps. Recent state activities or current objectives relating to fair housing are discussed below:

- Comply with the Texas Fair Housing Act in TDHCA administered programs.
- Coordinate fair housing efforts with the Texas Workforce Commission, Human Rights Division, which was created under the Texas Fair Housing Act to directly address public grievances related to fair housing.
- Section 8 Admittance Policy: In June 2000, TDHCA appointed a Section 8 Task Force and charged it to develop a policy for expanding housing opportunities for Section 8 voucher and certificate holders in TDHCA assisted properties. The policy adopted by the TDHCA Board is a follows:
    - Managers and owners of HTC properties are prohibited from having policies, practices, procedures and/or screening criteria which have the effect of excluding applicants because they have a Section 8 voucher or certificate.
    - The verification of such an exclusionary practice on the part of the owner or the manager by TDHCA will be considered a violation and will result in the issuance of a Notice of Violation and, if appropriate, issuance of a Form 8823 to the Internal Revenue Service.
    - Any violation of program requirements relative to this policy will also impact the Owner's ability to participate in future TDHCA programs.

POLICY PRIORITIES

This section describes policies TDHCA will use to address specific types of housing need in each uniform state service region, including meeting the underserved needs of extremely low income households, the homeless, persons with disabilities, and other special needs populations. This section also discusses rural needs, energy efficiency, and lead-based paint. Because of the unique challenges associated with the housing needs of these varying populations, a considerable level of planning and consumer-need-based focus is required.

EXTREMELY LOW INCOME INDIVIDUALS AND HOUSEHOLDS

While one of the Department's charges is to serve the State's populations from extremely low income to moderate income, funding priority is given to those populations that are most in need of services: low, very low, and extremely low income individuals and households. Additionally, the Texas Legislature, through Rider 4, specifically calls upon TDHCA to focus funding toward individuals and families that are earning less than 60 percent of the area median family income. Rider 4 directs TDHCA to apply $30,000,000 annually towards assisting extremely low income households; and no less than 20 percent of the Department's total housing funds towards assisting very low income households. TDHCA works to meet these goals, by providing HOME and HTC scoring incentives for applicants to set aside units for very low and extremely low income households.

The data presented in the Housing Analysis section of this report shows that households with lower incomes have higher incidences of housing problems. There are minimal differences between the incidences of housing problems between the two lowest income groups (0-30 percent and 31-50 percent of median income). While incidences of housing problems for these two groups are significantly higher than those of the other low income group, households with incomes at 51-80 percent of median income have significant needs as well. Therefore, households at 0-80 percent of median income have been given higher priority than households above 80 percent of median income. This prioritization will allow the State to target resources to those households most in need, regardless of household type.

Poverty

According to the 2000 US Census, Texas has the ninth highest poverty rate among the states: 15.4 percent compared to the national rate of 12.4 percent. The US Census defines the 2004 poverty threshold as $19,157 in income for a family of four with two members under 18 years of age, and many poor families make substantially less than this. Poverty can be self-perpetuating, creating barriers to education, health, and the financial stability provided by homeownership.

Those groups showing the largest growth in proportion of population, the young and minority populations, continue to be overrepresented in the Texas poverty population. According to the 2000 US Census, 38 percent of the poverty population is between the ages of 0-17. Hispanics make up 41 percent of Texas children under the age of 18, but 62 percent of all poor children. African American children account for 12.5 percent of Texas children, but 18 percent of all poor children.

TDHCA recognizes that unemployment, the high cost of home energy, and lack of education are significant factors in the high rate of poverty.

TDHCA has an important role in addressing Texas poverty. The Department seeks to reduce the number of Texans living in poverty, thereby providing a better future for all Texans. This means (1) trying to provide long-term solutions to the problems facing people in poverty and (2) targeting resources to those with the greatest need. The Department provides low income persons with energy, emergency, and housing assistance to meet the basic necessities.

Public assistance and social service programs have shifted their focus over the last 20 years. The emphasis centers on reducing dependency and increasing self-sufficiency. Assisted housing can no longer have a pure income maintenance orientation. In light of this new emphasis, housing resources that address poverty need to emphasize self-sufficiency. The self-sufficiency approach provides incentives for assisted housing residents that are willing to undertake a set of activities intended to lessen dependency. These activities should be tailored to meet the needs and capabilities of each individual household and can be provided through the housing deliverer or through human service providers.

Experience has shown that segregating low income persons in an insulated community perpetuates the cycle of poverty and often creates slums. A second anti-poverty theme centers on mobility--insuring that residents of assisted housing have access to jobs, schooling, public safety, and role models. Rental assistance combined with counseling and support services can be used to increase mobility. Scattered site production can also be used to encourage mixed income housing. TDHCA provides tenant-based rental assistance options through two of its programs, namely, HOME and Section 8.

An asset development approach to addressing poverty emphasizes the use of public assistance to facilitate long-term investments rather than incremental increases in income. In housing, this can mean gaining equity through homeownership. Several of TDHCA programs introduce the option of homeownership to lower income populations: the HOME Program offers down payment assistance and closing cost assistance, and the Single Family Bond Program offers below-market-rate loans.

Programs administered through TDHCA's Office of Colonia Initiatives (OCI) can be instrumental in creating self sufficiency in the colonias. OCI coordinates programs that improve the living conditions of the state's colonias. The Texas Bootstrap Loan program provides loans for self-help housing initiatives; The Contract for Deed Conversion Initiative facilitates homeownership by converting contracts for deed into traditional mortgages; and the Colonia Self-Help Centers provide outreach, education, and technical assistance to colonia residents.

Homeless Populations

The Stewart B. McKinney Homeless Assistance Act of 1987, the legislation that created a series of homeless assistance programs, defined the term "homeless." The following definition is used by the US Department of Housing and Urban Development (HUD) and all other federal agencies responsible for administering McKinney programs:

The term "homeless" or "homeless individual" includes

- an individual who lacks a fixed, regular, and adequate night time residence; or
- an individual who has a primary nighttime residency that is
  - a supervised publicly or privately-operated shelter designed to provide temporary living accommodations;
  - an institution that provides a temporary residence for individuals intended to be institutionalized; or
  - a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

The Texas Interagency Council for the Homeless estimates that approximately 200,000 people in Texas, or about 1 percent of the population, are homeless.[63] Based on this estimate, TDHCA estimates that, of 3,159,940 total people living in rural areas, 1 percent of the rural population, approximately 32,000, are homeless. The 2000 Census counted 28,377 individuals residing in noninstitutional group homes in Texas, which include shelters. In its special tabulation on emergency and transitional shelters in metropolitan areas, the Census counted 6,237 people.

As evidenced above, estimates of homeless populations vary widely. The migratory nature of the homeless population, the stigma associated with homelessness, and the fact that many homeless individuals lack basic documentation all contribute to the difficulty of making an accurate count. Most homeless counts are "point in time" estimates, which do not capture the revolving-door phenomenon of persons moving in and out of shelters over time. Furthermore, the homeless population can be classified into three categories: literally homeless, which describes those who have no permanent residence and stay in shelters or public places; marginally homeless, which includes those who live temporarily with other people and have no prospects for housing; and people at risk of homelessness. People at risk of homelessness generally have incomes below the poverty level, rely on utility and rental assistance, and may be unable to absorb unexpected events such as the loss of a job or serious illness.

Homeless Subpopulations

The following homeless subpopulations have special characteristics. Though these subpopulations may have different characteristics, the two main trends significant in the rise of homelessness can be connected to the increase in poverty (characterized by the decline in employment opportunities and public assistance programs) and a shortage of affordable housing.[64]

Homeless Families with Children

The number of homeless families with children has increased significantly over the past decade. A 2003 US Conference of Mayors survey of 25 American cities found that homeless families comprised 40 percent of the homeless population.[65] Approximately 90 percent of homeless families are homeless due

to a crisis.[66] Many parents with young children cannot work because of a lack of affordable childcare, which hinders their ability to earn an income to pay for suitable housing.

Homeless Youth

An estimated 12 percent of the homeless population is aged 13 to 24.[67] Of this age group, approximately 40 percent has a history of sexual abuse, 46 percent report mental illness, 25 percent have problems with alcohol abuse, and 33 percent spent time in juvenile detention. Furthermore, 28 percent have been in foster care at least once. Due to the specific challenges faced by homeless youth, they may particularly benefit from the provision of essential services, including job training, education, and employment services.

Homeless Minorities

A 2003 US Conference of Mayors survey of 25 American cities found that 49 percent of the homeless population was African American, 35 percent was white, 13 percent was Hispanic, 2 percent was Native American, and 1 percent was Asian.[68] However, the ethnic makeup of the homeless population will vary by geographic area.

Homeless in Rural Areas

TDHCA estimates that 1 percent of the rural population is homeless, or 32,000. Rural areas typically have fewer jobs and shelters than urban areas, which makes it especially difficult for homeless persons. The National Council for the Homeless reports that homeless persons in rural areas are more likely to be white, and homeless farmworkers and Native Americans are also generally found in rural areas.[69] Migrant farmworkers, because of their mobile lifestyle, extremely low incomes, and lack of affordable housing, are at a high risk for homelessness.

Homeless Victims of Domestic Violence

Battered women who live in poverty are often forced to choose between staying in abusive relationships or homelessness. According to the NCH, half of women with children experiencing homelessness left their last place of residence because of domestic violence.[70]

In 2003, there were 185,299 reported family violence incidents in Texas.[71] Furthermore, according to a TCFV statewide poll, 47 percent of all Texans report having experienced some form of domestic violence. In fiscal year 2003, the Family Violence Program provided emergency shelter to 29,733 adults and children and nonresidential services to 49,153 adults and children.[72]

Homeless Persons with Mental Illnesses and Disabilities

According to the Texas Interagency Council for the Homeless, approximately 25 percent of homeless individuals suffer from a serious mental illness, and more than 65,000 persons with disabilities did not have a predictable means of shelter in 1999.[73] The general lack of affordable housing and the poverty of this population make it difficult for homeless persons with mental illness to access social service programs and leaves them highly susceptible to homelessness.

Homeless Elderly Persons

According to 2000 Census data, of those below the poverty level in Texas, an estimated 13.1 percent are age 65 and over. As a group, this makes the elderly the poorest of all Texans. Approximately 6 percent of persons aged 55 to 64 were homeless in 2004.[74]

Homeless Veterans

According to the Department of Veteran's Affairs[75] approximately, on any given day, as many as 250,000 veterans are living in shelters or on the street. Of the veterans who are homeless, approximately 56 percent are African American or Hispanic, 45 percent suffer from mental illness, and 70 percent suffer from alcohol or drug abuse problems.

Chronically Homeless Persons

According to the Texas Homeless Network, 27 percent of single homeless adults are chronically homeless, meaning that these persons have been homeless for an average of four years.[76] Furthermore, these persons have high rates of alcohol or drug abuse and mental illness.

Homeless Persons with HIV/AIDS

The NCH estimates that 3 to 20 percent homeless people are HIV positive.[77] People with HIV/AIDS may lose their jobs because of discrimination or have high health care costs, leading to homelessness. This population may require supportive health services or community care programs in addition to housing assistance.

Homeless Persons with Chronic Substance Abuse

The US Conference of Mayors survey reports that 30 percent of homeless persons has an addiction disorder.[78] The Texas Commission on Alcohol and Drug Abuse (TCADA), now part of the Texas Department of State Health Services, reports that, of adult clients admitted to TCADA-funded programs in 2004, 11 percent were homeless.[79] Homeless persons with substance abuse problems may require supportive services.

Homeless Needs

The "continuum of care" approach to fighting homelessness is based on the understanding that homelessness is not caused merely by a lack of shelter, but involves a variety of underlying unmet physical, economic, and social needs. A comprehensive system of services as well as permanent housing is needed to help homeless individuals and families reach independence using a combination of emergency shelters, transitional housing, social services, and permanent housing. The continuum of care system begins with outreach, intake, and assessment. It is followed by safe emergency shelter and/or transitional housing that provides a variety of services including job training, educational services, substance abuse services, mental health services, and family support. Ultimately, the goal is to assist the family or individual achieve permanent housing.

Homeless Goals

The following Strategic Plan goals and associated proposed accomplishments are aimed at reaching the homeless populations. Refer to the Annual Report section of this document for 2005 performance on reaching these objectives, and the "Strategic Plan Goals" in this section for more information on 2006 goals. Refer to the "Program Statements" in this section for more information on the Emergency Shelter Grants Program, which is TDHCA's main homelessness assistance program, and other related programs.

GOAL 3: TDHCA WILL IMPROVE LIVING CONDITIONS FOR THE POOR AND HOMELESS AND REDUCE THE COST OF HOME ENERGY FOR VERY LOW INCOME TEXANS.

3.1 Strategy: Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.

3.2 Strategy: Administer the state energy assistance programs by providing grants to local organizations for energy related improvements to dwellings occupied by very low income persons and for assistance to very low income households for heating and cooling expenses and energy related emergencies.

TDHCA Program Strategies for Meeting Homeless Needs

In order to meet the needs of homeless populations and meet the goals outlined above, TDHCA has developed the following strategies.

Texas Interagency Council for the Homeless

The Texas Interagency Council for the Homeless (TICH) was created in 1989 to coordinate the State's homeless resources and services. TICH consists of representatives from all state agencies that serve the homeless. The council receives no funding and has no full-time staff, but receives clerical and advisory support from TDHCA. The council holds public hearings in various parts of the state to gather information useful to its members in administering programs. In addition, the Texas Homeless Network, a nonprofit organization, fulfills many of the council's statutory duties through a contract with TDHCA.

The Council's major functions include

- evaluating and helping coordinate the delivery of services for the homeless in Texas;
- increasing the flow of information among separate providers and appropriate authorities;
- providing technical assistance to TDHCA in assessing the need for housing for people with special needs;
- developing, in coordination with TDHCA and the Health and Human Services Commission, a strategic plan to address the needs of the homeless;
- maintaining a central resource and information center for the homeless.

TICH has developed a 10-year state action plan to end chronic homelessness in Texas. A team of 10 TICH members attended the Federal Policy Academy on Improving Access to Mainstream Services for People Experiencing Chronic Homelessness in Chicago, Illinois, in May 2003. A result of their participation was that TICH developed a 10-year plan to end chronic homelessness and then conducted six public hearings in March 2004 to receive testimony on the plan. The public hearings were held at the request of the Office of the Governor and were intended to further the implementation of the state action plan on homelessness. The plan was developed as part of Texas's participation in the federal policy academy to improve access to mainstream services for people who are homeless, including people with serious mental health or substance abuse problems. The federal policy academies are led by the US Department of Health and Human Services, the US Department of Urban Development, and the US Department of Veterans Affairs.

The Three Priorities and the Strategies of the State Action Plan to End Chronic Homelessness are as follows:

Priority One: Increasing the Public and Political Investment

Strategy 1.1	Improve data
Strategy 1.2	Increase capacity of local homeless coalitions
Strategy 1.3	Host public forums for state plan to end chronic homelessness

Priority Two: Prevent Chronic Homelessness

Strategy 2.1	Identify common risk factors and definitions regarding persons at risk of chronic homelessness
Strategy 2.2	Develop model discharge coordination plan for persons at-risk of chronic homelessness
Strategy 2.3	Coordinate discharge-planning efforts
Strategy 2.4	Develop a prevention strategy aimed at persons at risk of homelessness, currently homeless persons, and their providers that focus on education, awareness, and anti-stigma strategy

Priority Three: Develop, Expand, and Support Evidence-Based Service Interventions

Strategy 3.1	"Set-aside" resources for ending chronic homelessness
Strategy 3.2	Increase prioritization and targeting of persons experiencing chronic homelessness within mainstream services
Strategy 3.3	Advocate for a uniform eligibility process
Strategy 3.4	Increase and improve linkages between housing and services

Information on TICH and the 10-Year Plan to End Chronic Homelessness can be found at http://www.tich.state.tx.us.

Emergency Shelter Grants Program

Through the Emergency Shelter Grants Program (ESGP), TDHCA funds organizations that provide shelter and related services for homeless persons, as well as intervention services to persons threatened with homelessness. Activities include renovating buildings for use as shelters; medical and psychological counseling; assistance in obtaining permanent housing; and homeless prevention services, such as rent and utility assistance. For 2006, TDHCA anticipates that it will receive $5,154,498.in funding to address homelessness, and disperses those funds according to a regional allocation formula based on the poverty percentage of each uniform state service region. Demonstrating the need for homeless shelter and services, for the 2005 ESGP application cycle, the Department received 138 applications and was able to fund only 76.

Community Services Block Grant Program

TDHCA provides administrative support funds to community action agencies (CAAs) that offer emergency and poverty-related programs to lower income persons. CAA services include child care, health and human services, job training, migrant farmworker assistance, nutrition services, and emergency assistance. These services can be instrumental in preventing homelessness in the lowest income populations.

HTC Program

The HTC Program (HTC) is a multifamily program that encourages the development of affordable multifamily housing. In addition to the construction, acquisition, and/or rehabilitation of new, existing, at-risk, and rural housing, this program can also be used to develop transition housing. TDHCA gives scoring preferences for this purpose.

Persons with Disabilities

According to the US Department of Housing and Urban Development, 24 CFR 582.5:

> A person shall be considered to have a disability if such a person has a physical, mental, or emotional impairment that
>
> - is expected to be of long-continued and indefinite duration,
> - substantially impedes his or her ability to live independently,
> - is of such a nature that the ability could be improved by more suitable housing conditions.

According to the 2000 US Census, there are approximately 3,605,542 disabled, civilian, non-institutionalized persons over the age of five (or approximately 19 percent of total population) in Texas. Of this figure, 663,300 have a sensory disability (severe vision or hearing impairment), 1,428,580 have a physical disability (condition that substantially limits a physical activity such as walking or carrying), 816,185 have a mental disability (learning or remembering impairment), 487,120 have a self-care disability (dressing, bathing, or getting around inside the home), 1,359,848 have a “going outside the home disability,” and 1,651,821 have an employment disability.

Needs of Persons with Disabilities

Housing opportunities for people with disabilities may be complicated by low incomes. The 2000 census estimates that 553,934 disabled individuals over age five live below the poverty level in Texas. Many people with disabilities may be unable to work, and receive Supplemental Security Income (SSI) or Social Security Disability Insurance (SSDI) benefits as their principal source of income. According to *Priced Out in 2002*, an SSI recipient would have to pay an average of 98.3 percent (or $536) of his or her $545 monthly payment to rent a one-bedroom apartment in Texas.[80] According to the HUD definition of affordability that estimates that a household should pay no more than 30 percent of its income on housing expenses, an SSI recipient can afford a monthly rent of no more than $164.

The *Olmstead* Supreme Court decision maintained that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the Americans with Disabilities Act (ADA). Furthermore, the Fair Housing Act, Section 504 of the Rehabilitation Act, ADA, and Section 2306.514 of the Texas Government Code all provide mandates for accessible residential housing for persons with disabilities. A cost-effective and integrative approach is to promote “adaptive design” or “universal access” housing, which promotes basic, uniform standards in the design, construction, and alteration of structures that include accessibility or simple modification for disabled individuals. While an “adaptable” unit may not be fully accessible at time of occupancy, it can easily and inexpensively be modified to meet the needs of any resident. Another option is to equip homes with special features designed for persons with disabilities, including ramps, extra-wide doors and hallways, hand rails and grab bars, raised toilets, and special door levers.

There is a significant shortage of housing that is physically accessible to persons with disabilities and an even greater shortage of accessible housing that has multiple bedrooms. Many persons with disabilities require larger housing units because they live with family, roommates, or attendants. The lack of multi-bedroom housing furthers their segregation. Moreover, accessible housing is an urgent and present need for not only citizens who currently have disabilities, but for the aging population in the US, which will likely develop disabilities in the future. Accessible housing will become increasingly more important as the ability for self-care and mobility decreases with age.

Advocates for the elderly and persons with disabilities continue to stress that the primary goal of these populations is to live independently and remain in their own homes. Access to rehabilitation funds for single family housing—to perform minor physical modifications such as extra handrails, grab bars, wheelchair-accessible bathrooms, and ramps, thus making existing units livable and providing a cost-effective and consumer-driven alternative to institutionalization—was considered as a priority. Likewise, the availability of rental vouchers that provide options beyond institutional settings was found to be a high priority.

[80] Technical Assistance Collaborative Inc. and Consortium for Citizens with Disabilities Housing Task Force, *Priced Out in 2002*, by Ann O’Hara and Emily Cooper (Boston, MA: Technical Assistance Collaborative Inc., May 2003), 37, http://www.c-c-d.org/PO2002.pdf (accessed August 30, 2005).

Persons with Disabilities Goals

The following goals and associated proposed accomplishments are aimed at reaching persons with special needs, including persons with disabilities. Refer to the Annual Report section of this document for 2005 performance on reaching these objectives, and the "Strategic Plan Goals" in this section for more information on 2006 goals.

GOAL 9: TDHCA WILL WORK TO ADDRESS THE HOUSING NEEDS AND INCREASE THE AVAILABILITY OF AFFORDABLE AND ACCESSIBLE HOUSING FOR PERSONS WITH SPECIAL NEEDS THROUGH FUNDING, RESEARCH, AND POLICY DEVELOPMENT EFFORTS.

8.1 Strategy: Dedicate no less than 20 percent of the HOME project allocation for applicants that target persons with special needs.

8.2 Strategy: Dedicate no less than 5 percent of the Multifamily Bond Program units for persons with special needs.

8.3 Strategy: Compile information and accurately assess the housing needs of and the housing resources available to persons with special needs.

8.4 Strategy: Increase collaboration between organizations that provide services to special needs populations and organizations that provide housing.

8.5 Strategy: Discourage the segregation of persons with special needs from the general public.

TDHCA Program Strategies for Meeting the Needs of Persons with Disabilities

In order to meet the needs of persons with disabilities and meet the goals outlined above, TDHCA has developed the following strategies.

Promoting Independence Advisory Board

With the advent of the *Olmstead* decision, the Health and Human Services Commission (HHSC) initiated the Promoting Independence Initiative and appointed the Promoting Independence Advisory Board, as directed by then-Governor George Bush's Executive Order GWB 99-2. The Promoting Independence Advisory Board (PIAB) assists the HHSC in creating the State's response to the *Olmstead* decision through the biannual Promoting Independence Plan. This plan highlights the State's efforts to assist those individuals desirous of community placement, appropriate for community placement as determined by the state's treatment professionals, and who do not constitute a fundamental alteration in the state's services, to live in the community. A representative from TDHCA has been a voting member of the PIAB since its inception.

Project Access

TDHCA has taken a leadership role in the provision of funding for rental assistance to address the housing needs of persons looking for community-based alternatives to institutionalization. In FY 2002, TDHCA received 35 rental vouchers to administer to the *Olmstead* population as part of a national pilot called "Project Access." As of December 2005, all vouchers have been issued, and 56 recipients through voucher recycling have made the transition from a nursing facility into their own homes.

Integrated Housing Rule

An issue of particular concern for advocates for persons with disabilities involved the Department's policies related to integrated housing. Integrated housing, as defined by SB 367 and passed by the 77th Texas Legislature, is "housing in which a person with a disability resides or may reside that is found in the community but that is not exclusively occupied by persons with disabilities and their care providers." The Department, with the assistance of the TDHCA Disability Advisory Committee, developed an integrated housing rule to address this concern. In November 2003, the TDHCA Board approved an Integrated Housing Rule for use by all Department housing programs, 10 TAC 1.15. Below is a synopsis of the rule:

- A housing development may not restrict occupancy solely to people with disabilities or people with disabilities in combination with other special needs populations.
    - Large housing developments (50 units or more) shall provide no more than 18 percent of the units of the development set aside exclusively for people with disabilities. The units must be dispersed throughout the development.
    - Small housing developments (less than 50 units) shall provide no more than 36 percent of the units of the development set aside exclusively for people with disabilities. These units must be dispersed throughout the development.
- Set-aside percentages outlined above refer only to the units that are to be solely restricted for persons with disabilities. This section does not prohibit a property from having a higher percentage of occupants that are disabled.
- Property owners may not market a housing development entirely, nor limit occupancy to, persons with disabilities.

Exceptions to the above rule include (1) scattered site development and tenant-based rental assistance is exempt from the requirements of this section; (2) transitional housing that is time-limited with a clear and convincing plan for permanent integrated housing upon exit from the transitional situation; (3) housing developments designed exclusively for the elderly: (4) housing developments designed for other special needs populations; and (5) Board waivers of this rule to further the purposes or policies of Chapter 2306, Texas Government Code, or for other good cause.

HOME Program

Subject to qualified applications, a minimum of 5 percent of the annual HOME Program allocation will be allocated for applicants serving persons with disabilities. Additionally, the HOME Program has a goal of allocating 20 percent of funds to applications serving persons with special needs.

Since 2000, TDHCA has allocated HOME Program funds for the Texas Home of Your Own Program (HOYO), which provides assistance to help persons with disabilities purchase a home. HOYO provides homebuyer education, down payment and closing cost assistance, and architectural barrier removal. In program year 2006, TDHCA will allocate $500,000 to HOYO. These funds may be used statewide, including in participating jurisdictions.

HTC Program

HTC developments that are new construction must conform to Section 504 standards, which require that at least 5 percent of the development's units be accessible for persons with physical disabilities and at least 2 percent of the units be accessible for persons with hearing and visual impairments.

HTF Program

Rental developments funded with HTF resources must have a minimum of 5 percent of the units accessible for individuals with mobility impairments and an additional 2 percent of the units shall be accessible for individuals with hearing or vision impairments.

Multifamily Bond Program

The Multifamily Bond Program requires that owners make available for occupancy at least 5 percent of units for persons with special needs.

Comprehensive Energy Assistance Program

Priority for utility assistance through the Comprehensive Energy Assistance Program is given to the elderly, persons with disabilities, and families with young children; households with the highest energy costs in relation to income; and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

Weatherization Assistance Program

Like CEAP, priority for utility assistance through the Weatherization Assistance Program is given to the elderly, persons with disabilities, and families with young children; households with the highest energy costs in relation to income; and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

OTHER SPECIAL NEEDS POPULATIONS

In addition to the homeless, according to HUD, special needs populations include persons with disabilities, the elderly, persons with alcohol and/or drug addictions, persons with HIV/AIDS, and public housing residents. TDHCA also considers colonia residents and migrant farmworkers as special needs populations.

Elderly Populations

According to the 2000 US Census, 9.9 percent (approximately 2 million) of people in Texas are 65 years of age or older. The Texas Department on Aging (TDoA), now part of the Texas Department of Aging and Disability Services, estimates that by the year 2040, individuals age 60 and over will comprise 23 percent of the population in Texas.[81] TDoA reports that females significantly outnumber males age 60 and over and, though the majority of elderly Texans live in urban areas, rural areas have a higher percentage of elderly relative to the local population.[82]

---

[81] Texas Department on Aging, Office of Aging Policy and Information, *Texas Demographics: Older Adults in Texas* (Austin, TX: Texas Department on Aging, April 2003), x, http://www.dads.state.tx.us/news_info/publications/studies/NewDemoProfileHi-Rez-4-03.pdf (accessed August 30, 2005).

[82] Texas Department on Aging, *Texas Demographics: Older Adults in Texas*, ix-x.

Nationwide, in 2002, the median income for individual elderly males was $19,436, elderly females was $11,406, and families headed by individuals 65 and over was $33,802.[83] According to the 2000 Census, 13.1 percent of seniors age 65 and over in Texas live below the poverty level. Low incomes in addition to rising healthcare costs may make housing unaffordable. Approximately 30 percent of all elderly households pay more than 30 percent of their income on housing, while 14 percent pay more than 50 percent of their income on housing.[84]

A 2000 American Association of Retired Persons study found that 90 percent of elderly persons expressed a desire to stay in their own homes as long as possible.[85] Of all elderly households, 80 percent own their own homes.[86] However, elderly homeowners generally live in older homes than the majority of the population; in 2001, the median year of construction for homes owned by elderly households was 1963.[87] Due to their age, homes owned by the elderly are often in need of repair, weatherization, and energy assistance.

Some elderly households may require in-house services such as medical treatment, meal preparation, or house cleaning. Community Care Services, administered by the Texas Department of Aging and Disability Services, provides services to meet the needs of elderly and disabled Texans avoiding premature nursing home placement, and proves to be more cost-effective than nursing home care. Statistics show that in fiscal year 2003, 65,202 nursing facility clients were assisted at an annual cost of $1,814,420,111, and 150,696 Community Care Services clients were at an annual cost of $1,332,477,707.[88] Though Medicaid covers nursing home care as well as assisted-living services, such assisted-living services are limited and waiting lists can be lengthy, which can prematurely place low income seniors in nursing home facilities.

Frail Elderly Persons

Frail elderly persons are defined as elderly persons who are unable to perform at least three activities of daily living. Activities of daily living include eating, dressing, bathing. According to the 2000 Census, 400,099 persons aged 65 to 74 (out of 1,131,163) have a disability as defined by the US Census, and 479,879 persons over the age of 75 (out of 835,109 total) have a disability as defined by the US Census. This population will require medical and social services; varying degrees of assistance are needed to maintain self-sufficiency and delay the need for nursing home care.

Alcohol and Drug Addiction

In 2001, the Texas Commission on Alcohol and Drug Abuse (TCADA), now part of the Texas Department of State Health Services, estimated that approximately 1.8 million, or 12 percent, of adults in Texas have an alcohol-related problem, another 227,000 have drug-related problems, and an additional 495,000 have

[83] US Department of Health and Human Services, Administration on Aging, *A Profile of Older Americans: 2003* (US Department of Health and Human Services), 10, http://www.aoa.dhhs.gov/prof/Statistics/profile/2003/2003profile.pdf (accessed August 30, 2005).

[88] Texas Department of Human Services, *2003 Annual Report*, 103.

both alcohol and drug-related problems.[89] Of the 46,474 total admissions to TCADA-funded treatment programs during 2004, admitted individuals were most likely to be single males with an average age of 35, an average 12th grade education, and an average annual income of $5,715.[90] The population of persons with alcohol or other drug addiction is diverse and often overlaps with the mentally disabled or homeless populations.

Supportive housing programs needed for persons with alcohol and/or other drug addiction problems range from short-term, in-patient services to long-term, drug-free residential housing environments for recovering addicts. Better recovery results may be obtained by placing individuals in stable living environments.

Persons with HIV/AIDS

Human Immunodeficiency Virus, or HIV, is the virus that causes AIDS (Acquired Immunodeficiency Syndrome). HIV infects cells and attacks the immune system, which weakens the body and makes it especially susceptible to other infections and diseases. According to the Texas Department of Health, now the Texas Department of State Health Services (DSHS), as of December 2003, there were 48,368 reported persons living with HIV/AIDS in Texas.[91] The majority of these cases were located in Bexar, Dallas, Harris, Tarrant, and Travis Counties. Because of increased medical costs or the loss of the ability to work, people with HIV/AIDS may be at risk of losing their housing arrangements.

DSHS addresses the housing needs of AIDS patients through the Housing Opportunities for Persons with AIDS Program (HOPWA), which is a federal program funded by HUD. In Texas, HOPWA funds provide emergency housing assistance, which funds short-term rent, mortgage, and utility payments to prevent homelessness; and tenant-based rental assistance, which enables low income individuals to pay rent and utilities until there is no longer a need or until they are able to secure other housing. In addition to the TDH statewide program, the cities of Austin, Dallas, Fort Worth, Houston, and San Antonio receive HOPWA funds directly from HUD.

Public Housing Residents

According to HUD, there are 61,127 units of public housing and 141,982 Section 8 Housing Choice Vouchers in Texas.[92]

TDHCA believes that the future success of public housing authorities (PHAs) will center on ingenuity in program design, emphasis on resident participation towards economic self-sufficiency, and partnerships with other organizations to address the needs of this population. While TDHCA does not have any direct or indirect jurisdiction over the management or operations of public housing authorities, it is important to maintain a relationship with these service providers.

[92] HUD, "Public Housing Agency (HA) Profiles" http://www.hud.gov/offices/pih/systems/pic/haprofiles/index.cfm (accessed October 30, 2004).

Over the past few years TDHCA has developed a strong relationship with the Texas Housing Association and the Texas chapter of the National Association of Housing and Redevelopment Officials, which represent the public housing authorities of Texas. TDHCA has worked to promote programs that will repair substandard housing and develop additional affordable housing units. Specifically, the HTC Program gives scoring points to applications that are proposing rehabilitation and for which some of the financing of the development includes HOPE VI or HUD capital grant funds.

In 1999, TDHCA, as required by 24 CFR §903.15, started a certification process to ensure that the annual plans submitted by public housing authorities in an area without a consolidated plan are consistent with the State's *Consolidated Plan*.

In an effort to keep public housing residents aware of State programs that might affect them, TDHCA sends notice of public comment periods and hearings regarding the *State of Texas Low Income Housing Plan and Annual Report* and the *State of Texas Consolidated Plan* to all Texas PHAs. PHA staff are targeted by the Texas Statewide Homebuyer Education Program (TSHEP) for training to provide self-sufficiency tools for tenants.

TDHCA serves on the Project Advisory Committee with the Coalition of Texans with Disabilities, Texas Council for Developmental Disabilities, Advocacy Inc., and United Cerebral Palsy to oversee the three-year grant to provide training and technical assistance to PHAs. Activities of the grant are intended to result in a measurable increase in the number of integrated housing units available to persons with disabilities.

Colonia Residents

According to Section 2306.581 of the Texas Government Code:

> "Colonia" means a geographic area located in a county some part of which is within 150 miles of the international border of this state and that
>
> - has a majority population composed of individuals and families of low income and very low income, based on the federal Office of Management and Budget poverty index, and meets the qualifications of an economically distressed area under Section 17.921, Water Code; or
> - has the physical and economic characteristics of a colonia, as determined by the department.

Texas A&M University estimates that the average median household income is between $7,000 and $11,000 for the 1,450 colonias that accommodate over 350,000 residents.[93] Colonia residents are generally unskilled, lack a formal education, and do not have stable employment. It is assumed that many residents work as day-to-day or farm laborers and the unemployment rate ranges from 20 to 60 percent.[94]

[93] Texas A&M University, Center for Housing and Urban Development, "Colonias in Texas," http://chud.tamu.edu (accessed August 3, 2004).
[94] Ninfa Moncada, "A Colonias Primer" (A briefing presented to the US Department of Housing and Urban Development, 2001), http://www.nationalmortgagenews.com/nmn/plus93.htm (accessed August 30, 2005).

According to 2000 US Census data, colonias have a 75 percent homeownership rate. Despite this rate, however, colonia homes are inadequate; 4.9 percent of colonia dwellings lack kitchen facilities and 5.3 percent lack plumbing facilities. It is estimated that 50 percent of colonia residents lack basic water and sewage systems: 51 percent use septic tanks, 36 percent use cesspools, 7 percent use outhouses, and 6 percent use other wastewater systems.[95] Some of these properties may have been purchased with contracts for deed, which are seller-financed transactions that do not transfer the title and ownership of the property to the buyer until the purchase price is paid in full.

Colonia residents have several needs that include increased affordable housing opportunities, such as down payment assistance and low-interest-rate loans, homeowner education, construction education and assistance, owner-occupied home repair, access to adequate infrastructure, and the conversion of remaining contracts for deed to conventional mortgages.

Migrant Farmworkers

According to the US Department of Health and Human Services *Migrant and Seasonal Farmworker Enumeration Profiles Study*, a seasonal farmworker describes an individual whose principal employment (at least 51 percent of time) is in agriculture on a seasonal basis and who has been so employed within the preceding twenty-four months; a migrant farmworker meets the same definition, but establishes temporary housing for purposes of employment.[96] The US Department of Health and Human Services estimates that there are 362,724 migrant and seasonal farm workers and families residing in Texas.[97] Of this population, 26 percent reside in Cameron, Hidalgo, and Starr Counties.

The National Agricultural Workers Survey, a national survey of 4,199 farmworkers conducted between 1997 and 1998, found that 61 percent lived below the poverty level.[98] The median annual income for individual workers was less than $7,500 and migrant families earned less than $10,000. Sixty percent of workers held only one farm job, which lasted only 24 weeks out of the year. Despite the short employment duration and low incomes, only 20 percent of workers received unemployment benefits and 10 percent received Medicaid or food stamps.

Farmworkers have a particularly difficult time finding available, affordable housing because of extremely low and sporadic incomes and mobility. Many of the small, rural communities where migrant workers may seek employment do not have the rental units available for the seasonal influx. Overcrowding and substandard housing are significant housing problems for farmworkers.[99] In addition, migrant workers may not be able to afford security deposits, pass credit checks, or commit to long-term leases.

In HB 1099, the 79th Texas Legislative Session transferred the license and inspection of migrant farmworker housing facilities from the Texas Health and Human Services Commission to TDHCA. Additionally, the bill directs TDHCA to complete a study on quantity, availability, need, and quality of migrant farm labor housing facilities in Texas. This study is due to the Legislature by September 2006.

RURAL NEEDS

As the migration of populations and industries continues to urban and suburban areas, the less-populous areas of the state are left with a dilapidated housing stock and households with lower incomes than their urban or suburban counterparts. According to HUD, the median income for Texas metropolitan areas is $55,500 compared to $42,400 for non-metropolitan areas.[100]

Due to the lower incomes and lack of access to resources (e.g., bonds, large tax base, and investment capital) in less-populous areas, TDHCA gives special consideration to lower income individuals and households residing in rural areas. This focus is considered in the development of Department programs and in the distribution of associated funds. In the event that funding cannot be limited to rural areas because of rule or financial feasibility reasons, scoring criteria or set-asides are added to the applications or program rules to encourage the participation of these areas.

The Department works closely with several rural-based affordable housing organizations, private lenders, nonprofits, and units of local government in order to give funding priority to non-PJ and rural areas. It requires more effort to spark affordable housing activity in rural areas as the number of organizations available to assist with these activities is significantly fewer. With this in mind, the Department has developed specific strategies to address the needs of the rural populations of the state, which include rural set-asides or special scoring criteria for housing program funds, prioritization of activities that are most needed in rural areas, increasing awareness of TDHCA programs in rural areas, and building the capacity of rural service providers.

The TDHCA HOME Program requires that 95 percent of funding be allocated to non-participating jurisdiction areas. Participating jurisdictions (PJs) are typically larger metropolitan cities and more populous counties designated by HUD to receive HOME Program funds directly from the federal government. Because these PJs receive HOME funding directly, TDHCA directs its HOME Program allocation to non-PJ areas of the state, which are more rural areas. The remaining 5 percent of HOME funds may be expended in a participating jurisdiction (PJ), but only if it funds a multifamily activity that serves persons with disabilities, unless otherwise approved by the Board.

Section 2306.111(d) of the Texas Government Code requires that the TDHCA Regional Allocation Formula consider rural and urban/exurban areas in its distribution of program funding. Because of this, allocations for the HTC and HOME programs in allocated by rural and urban/exurban areas within each region. For more information, see "TDHCA Allocation Formulas" in this section.

TDHCA and the Office of Rural Community Affairs (ORCA) jointly administer the HTC Program rural regional allocation. ORCA assists in developing all thresholds, scoring, and underwriting criteria for rural regional

[100] HUD, *FY 2005 HUD Income Limits Briefing Materials*, 26, http://www.huduser.org/datasets/il/il05/BRIEFING-MATERIALs.pdf (accessed August 30, 2005).

allocation, and must approve the criteria. It is anticipated that joint-implementation outreach, training, and rural area capacity building efforts will increase participation in the rural set-aside.

The TDHCA Section 8 Housing Choice Voucher Program specifically serves households in small cities and rural communities that are not served by similar local or regional housing voucher programs.

ENERGY EFFICIENCY

Energy and water costs are often the largest single housing expense after food and shelter for lower income families. Utility costs typically represent 13 to 44 percent of lower income annual gross incomes and can account for nearly one-fourth of total housing costs. Proper use of existing technologies and management practices can reduce these utility costs significantly at a relatively low initial cost, thereby greatly increasing housing affordability for low and moderate income families.

The Department encourages, in each uniform state service region, energy efficiency in the construction of affordable housing by offering training, workshops, conferences, and other opportunities to learn about energy efficiency construction, and by encouraging applicants for Department programs to consider energy efficiency in their developments.

HOME Program applicants are required to certify that the development will be equipped with energy-saving devices that meet the 2000 IECC, which is the standard statewide energy code adopted by the state energy conservation office, unless historic preservation codes permit otherwise for a development involving historic preservation. In addition, applicants may qualify for points for the use of energy efficient alternative construction materials, 14 SEER HVAC or evaporative coolers in dry climates for new construction or radiant barrier in the attic for rehabilitation, and Energy Star or equivalently rated kitchen appliances.

The HTC Program gives scoring points to applicants that incorporate energy efficient materials in the construction of affordable multifamily housing, including Energy Star kitchen appliances, R-15 wall and R-30 ceiling insulation, ceiling fixtures in all rooms, structurally insulated panels, and 14 SEER (seasonal energy efficiency ratio) cooling units.

The Weatherization Assistance Program allocates funding regionally, to help households in each region control energy costs through the installation on weatherization measures and energy conservation education. Weatherization services include the installation of storm windows, attic and wall insulation, and weather-stripping and sealing.

LEAD-BASED PAINT

The Consumer Product Safety Commission banned the use of lead-based paint in housing in 1978. According to the 2000 Census, there are 3,344,406 housing units in Texas that were built before 1979, many of which potentially contain lead-based paint. Of these homes, 2,764,745 are occupied by low income households and 579,661 are occupied by moderate income households. According to the National Safety Council, approximately 38 million US homes contain lead paint.[101]

The 1992 Community and Housing Development Act included Title X, a statute that represents a major change to existing lead-based paint regulations. HUD's final regulations for Title X (24. CFR.105) were published on September 15, 1999, and became effective September 15, 2000. Title X calls for a three pronged approach to target conditions that pose a hazard to households: (1) notification of occupants about the existence of hazards so they can take proper precautions, (2) identifications of lead-based paint hazards before a child can be poisoned and, (3) control of these lead-based paint hazards in order to limit exposure to residents. Title X mandated that HUD issue "The Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing" to outline risk assessments, interim controls, and abatement of lead-based paint hazards in housing. Section 1018 required EPA and HUD to promulgate rules for disclosure of any known lead-based paint or hazards in target housing offered for sale or lease. These rules came into effect on March 6, 1996 in 40 CFR Part 745/24 CFR Part 35.

Pursuant to Section 1012 and 1013, HUD promulgated new regulations, "Requirements for Notification, Evaluation, and Reduction of Lead-Based Paint Hazards in Federally Owned Residential Property and Housing Receiving Federal Assistance," on September 15, 1999. The new regulation puts all of HUD's lead-based paint regulations in one part of the Code of Federal Regulations. The new requirements took effect on September 15, 2000.

The HOME Program, administered by TDHCA, requires lead screening in housing built before 1978. Requirements for acquisition and tenant-based rental assistance activities are distribution of the pamphlet "Protect Your Family from Lead in Your Home" prior to receipt of assistance; notification to property owners within 15 days if a visual assessment observes chipping, peeling or flaking paint; and, if detected, the paint must be stabilized using safe work practices and clearance must be provided.

Requirements for rehabilitation activities fall into three categories:
1) Federal assistance up to and including $5,000 per unit: Distribution of the pamphlet "Protect Your Family from Lead in Your Home" is required prior to renovation activities; notification within 15 days of lead hazard evaluation, reduction, and clearance must be provided; receipts for notification must be maintained in the administrator file; paint testing must be conducted to identify lead-based paint on painted surfaces that will be disturbed or replaced or administrators may assume that lead-based paint exist; administrators must repair all painted surfaces that will be disturbed during rehabilitation; if lead-based paint is assumed or detected, safe work practices must be followed; and clearance is required only for the work area.

2) Federal assistance from $5,000 per unit up to and including $25,000 per unit: This category includes all the requirements for federal assistance up to and including $5,000 per unit with the addition of a risk assessment must be conducted prior to rehabilitation to identify hazards in assisted units, in common areas that serve those units, and exterior surfaces, or administrators can assume lead-based paint exists.

[101] National Safety Council, "Lead Poisoning," (December 2004) < http://www.nsc.org/library/facts/lead.htm> (accessed August 30, 2005).

Clearance is required for the completed unit, common areas which serve the units, and exterior surfaces where the hazard reduction took place.

3) Federal assistance over $25,000 per unit: This category includes all the requirements for federal assistance from $5,000 per unit up to and including $25,000 per unit and, if during the required evaluations lead-based paint hazards are detected on interior surfaces of assisted units, on the common areas that serve those units, or on exterior surfaces including soils, then abatement must be completed to permanently remove those hazards. If lead-based paint is detected during the risk assessment on exterior surfaces that are not disturbed by rehabilitation, then interim controls may be completed instead of abatement.

TDHCA PROGRAM PLANS

With the exception of the Housing Trust Fund, TDHCA receives the majority of its funding from federal sources. As such, the amount of funding that TDHCA receives is predetermined by the federal funding source. TDHCA has a commitment to expend all available housing resources to address the housing needs of the state. However, as evidenced by the oversubscription rate for many TDHCA programs, even when expending all available funding, there is still an unmet need.

Because of the limited amount of TDHCA funding and the possibility that funding levels may change, TDHCA encourages, and in some cases requires, that entities receiving TDHCA funds leverage or match those awards with additional funds from other sources. For example, the HOME Program and ESGP have match requirements for entities receiving awards through those programs.

Through program requirements and compliance monitoring, TDHCA works to ensure that housing programs benefit individuals without regard to race, ethnicity, sex, or national origin, as outlined in 10 TAC 1.13. Complaints involving all forms of housing discrimination are also referred to the Texas Workforce Commission Human Rights Division, which oversees the Texas Fair Housing Act. Additionally, it is the policy of TDHCA to not require its nonprofit recipients of funds to verify, as a condition of receiving federal funds, the citizenship or immigration status of applicants for funds. This policy is subject to change if the US Department of Housing and Urban Development revises its policy. This policy does not apply to the Section 8 Housing Choice Voucher Program.

The following TDHCA programs govern the use of available housing resources in meeting the housing needs of low income Texans. Program descriptions include information on the funding source, type of assistance, recipients, targeted beneficiaries, program activities, set-asides, and special initiatives.

HOME INVESTMENT PARTNERSHIPS PROGRAM

The HOME Investment Partnerships (HOME) Program receives funding from the US Department of Housing and Urban Development (HUD) and provides loans and grants to units of local government, public housing authorities (PHAs), community housing development organizations (CHDOs), nonprofit organizations, and for-profit entities, with targeted beneficiaries being low, very low, and extremely low income households. The purpose of the HOME Program is to expand the supply of decent, safe, and affordable housing for extremely low, very low, and low income households, and to alleviate the problems of excessive rent burdens, homelessness, and deteriorating housing stock. HOME strives to meet both the short-term goal of increasing the supply and the availability of affordable housing and the long-term goal of building partnerships between state and local governments and private and nonprofit organizations in order to strengthen their capacity to meet the housing needs of lower income Texans.

The State of Texas receives an annual allocation of HOME funds from HUD. TDHCA provides technical assistance to all recipients of the HOME Program to ensure that all participants meet and follow state implementation guidelines and federal regulations. In 2003, the Texas Legislature passed Senate Bill 264 (amending Sec. 2306.111 of the Government Code), which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the HOME, Housing Trust Fund, and HTC programs to each Uniform State Service Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance. Please see “2006 Regional Allocation Formula” in this section for further explanation.

The Department anticipates using open funding cycles for programs which have traditionally been undersubscribed. These may include but are not limited to the CHDO Set-Aside, Contract for Deed Conversion, Rental Housing Preservation, and Rental Housing Development activities.

Eligible Service Areas

Per Section 2306.111(c) the Department shall expend at least 95 percent of HOME funds for the benefit of non–participating jurisdictions (non-PJ) areas of the state. The remaining 5 percent of HOME funds may be expended in a participating jurisdiction (PJ), but only if it funds a multifamily activity that serves persons with disabilities, unless otherwise approved by the Board.

Activity associated with disaster relief efforts for victims of Hurricane Rita is an exception to the Section 2306.111(c) funding distribution requirement. On September 20, 2005, Governor Perry issued a proclamation as provided for under Texas Government Code §418.014. This proclamation declared areas impacted by Hurricane Rita to be a disaster area. As part of this declaration, the Governor also invoked the procedures under Texas Government Code §418.016 suspending all rules and regulations that may inhibit prompt response to this threat during the duration of the incident. TDHCA determined and communicated with the Governor's office that for purposes of specialized Hurricane support, suspension of Texas Government Code §2306.111 (distribution limitations) is necessary to have a prompt response in aiding the Hurricane Rita impacted persons. This suspension of the distribution limitation is expected to continue during any period where the Governor invokes §418.016 in continuing disaster declarations for Rita impacted areas.

Rental Development

Due to continued limited capacity with regard to the development and/or preservation of integrated multifamily properties, the Department may accept rental development applications from PJ areas, so long as they do not exceed 5 percent of the total HOME allocation, serve persons with disabilities, and are in compliance with the Department’s Integrated Housing Rule.

Non-Rental Development

In prior years, due to concerns about the lack of organizational capacity to serve persons with disabilities in rural areas, TDHCA allowed 5 percent of its HOME allocation to go to applicants in PJs for non-rental development activities. Based on the increase in capacity of organizations in non-PJ areas as evidenced by an over-subscription rate in the 2004 and 2005 application cycles for non-rental development activities, the Department will no longer fund these types of applications in PJ areas.

Owner-Occupied Housing Assistance

Rehabilitation or reconstruction cost assistance is provided to homeowners for the repair or reconstruction of their existing homes. The homes must be the principal residence of the homeowner. This activity will comprise approximately 65 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $16,852,875.

Tenant-Based Rental Assistance

Rental subsidy and security and utility deposit assistance is provided to tenants, in accordance with written tenant selection policies, for a period not to exceed two years. Tenant-based Rental Assistance (TBRA) allows the assisted tenant to live in and move to any dwelling unit with a right to continued assistance. TBRA will comprise approximately 15 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $3,889,125.

Homebuyer Assistance

Down payment and closing cost assistance is provided to homebuyers for the acquisition of affordable single family housing. This activity may also be used for construction costs associated with architectural barrier removal in a home purchased with HOME assistance to meet the accessibility needs of homebuyers with disabilities; acquisition and rehabilitation costs associated with contract for deed conversions to serve colonia residents; and construction costs associated with the rehabilitation of a home purchased with HOME assistance. Excluding set-aside funds listed below, this activity will comprise approximately 20 percent of the HOME allocation that will be available through the Regional Allocation Formula process, approximately $5,185,500.

Homebuyer Assistance may be awarded through the CHDO Set-Aside, Contract for Deed Set-Aside, and American Dream Downpayment Initiative.

Rental Housing Development

Awards for eligible applicants are to be used for the development of affordable rental housing. Owners are required to make the units available to extremely low, very low, and low income families, and must meet long-term rent restrictions. Approximately $3,000,000 in FY 2006 appropriations will be allocated toward this activity. These funds will not be subject to the Regional Allocation Formula.

Rental Housing Preservation

Awards for eligible applicants are to be used for the acquisition and/or rehabilitation for the preservation of existing affordable or subsidized rental housing. Owners are required to make the units available to extremely low, very low, and low income families and must meet long-term rent restrictions. Approximately $2,000,000 in FY 2006 appropriations will be allocated toward this activity. These funds will not be subject to the Regional Allocation Formula.

Set-Asides & Initiatives

American Dream Downpayment Initiative

ADDI was signed into law on December 16, 2003, and was created to help homebuyers with down payment and closing cost assistance. ADDI aims to increase the homeownership rate, especially among lower income and minority households, and revitalize and stabilize communities.

Under ADDI, a first time homebuyer is an individual and his or her spouse who have not owned a home during the three year period prior to the purchase of a home with assistance under ADDI. The term also includes displaced homemakers and single parents. The minimum amount of ADDI funds in combination with HOME funds that must be invested in a project is $1,000. The amount of ADDI assistance provided to any family may not exceed the greater of six percent of the purchase price of a single family housing unit or $10,000. This assistance is in the form of a second- or third-lien loan.

For PY 2006, approximately $1,500,000 is reserved for down payment assistance and may, at the discretion of the Department, include funds for rehabilitation for first time homebuyers in conjunction with home purchases assisted with ADDI funds. The rehabilitation may not exceed 20 percent of the annual ADDI allocation. These funds are included in the 20 percent allocated for Homebuyer Assistance.

CHDO Set-Aside

In response to Hurricane Rita, on October 4, 2005, HUD waived the 15 percent HOME CHDO set-aside requirement for Federal PY 2005 and PY 2006 HOME allocations. TDHCA has elected to utilize a portion of this CHDO set-aside to assist disaster victims in the 28-county area impacted by the hurricane. The remaining funds from the PY 2006 CHDO set-aside and funds not awarded from prior year CHDO set-asides including PY 2005 funds and CHDO de-obligated funds will be made available in December 2005 for CHDO multifamily development. This amounts to approximately $10 million that will be made available to CHDOs on a first-come, first-served basis through a notice of funding availability. CHDO Set-Aside developments are owned, developed, or sponsored by the CHDO, and result in the development of affordable rental and homeownership units. Development includes developments that have a construction component, either in the form of new construction or rehabilitation of existing units.

In accordance with 24 CFR 92.208, up to 5 percent of the Department's HOME allocation will be used for the operating expenses of CHDOs. The Department may award CHDO Operating Expenses in conjunction with the award of CHDO Development Funds, or through a separate application cycle not tied to a specific activity. In addition, TDHCA may elect to set aside up to 10 percent of funding for predevelopment loans funds, which may only be used for activities such as project-specific technical assistance, site control loans, and project-specific seed money.

Disaster Relief

The HUD requirement that a PJ must use 15 percent of its allocation for housing owned, developed, or sponsored by CHDOs [24 CFR 92.301(a)(1)] is suspended by HUD for the PY 2005 and PY 2006 allocations by an October 4, 2005, waiver. Therefore, TDHCA has elected to utilize a portion of these funds to assist disaster victims in the 28-county area impacted by Hurricane Rita. Approximately $8 million of PY 2005 and PY 2006 funds will be made available through a notice of funding availability to assist homeowners rehabilitate their residences.

Contract for Deed Conversions Set-Aside

The intent of this program is to help Colonia residents become property owners by converting their contracts for deed into traditional mortgages. To assist the Department in meeting this mandate, $2,000,000 in HOME Program funds will be targeted to assist households described under this initiative. These funds will not be subject to the Regional Allocation Formula.

Colonia Model Subdivision Loan Program Set-Aside

Per Subchapter GG of Chapter 2306, Texas Government Code, the intent of this program is to provide low-interest-rate or possible interest-free loans to promote the development of new, high-quality residential subdivisions or infill housing that provide alternatives to substandard colonias, and housing options affordable to individuals and families of extremely low and very low income who would otherwise move into substandard colonias. The Department will only make loans to CHDOs certified by the Department and for the types of activities and costs described under the previous section regarding CHDO Set-Aside. One million dollars will be targeted to assist households described under this initiative. These funds will not be subject to the Regional Allocation Formula.

Persons with Disabilities

Subject to the availability of qualified applications, a minimum of 5 percent, approximately $2,225,000, of the annual HOME allocation will be allocated for applicants serving persons with disabilities. Eligible applicants include nonprofits, for-profits, units of general local government, and public housing authorities with a documented history of working with special needs populations, or working in partnership with organizations with a documented history of working with special needs populations.

TDHCA will ensure that all housing developments are built and managed in accordance with its Integrated Housing Rule. Multifamily developments will be limited to reserving no more than 18 percent of the units in developments with 50 or more units, and no more than 36 percent of the units in developments with less than 50 units, for persons with disabilities.

Additionally, for program year 2006, the Department will allocate $500,000 to the Home of Your Own (HOYO) Program for activities related to homeownership for persons with disabilities. The HOYO Program coordinates existing homeownership services, which streamlines the process homebuyers must follow, including homebuyer counseling, down payment assistance, and architectural barrier removal. These funds may be used statewide, including in participating jurisdictions.

Special Needs Populations

Subject to the availability of qualified applications, TDHCA has a goal of allocating 20 percent of the annual HOME allocation to applicants serving persons with special needs. All HOME program activities will be included in attaining this goal. Additional scoring criteria may be established under each of the eligible activities to target such activities and assist the Department in reaching its goal.

HOME Program funding for FY 2006

The amount projected to be available from HUD in FY 2006 is $44,500,000. This is comprised of $43,000,000 of HOME funds plus $1,500,000 of ADDI funds.

Figure 4.1: 2006 HOME Program Funding

	Estimated Available Funding	% of Total HOME Allocation
PY 2006 HOME Allocation	$43,000,000	100%
less Administration Funds (10% of PY 2006)	$4,300,000	10%
less CHDO Project Funds Set Aside (15% of PY 2006)[1]	$6,450,000	15%
less CHDO Operating Expenses Set Aside (5% of CHDO Set Aside)	$322,500	1%
less Direct Award for the Texas Home of Your Own Program	$500,000	1%
less Set Aside for Contract for Deed Conversions	$2,000,000	5%
less Set Aside for Rental Housing Preservation Program	$2,000,000	5%
less Set Aside for Rental Housing Development Program	$3,000,000	7%
= Remaining HOME Funds Subject to the Regional Allocation Formula (RAF)	$24,427,500	57%
Plus PY 2006 American Dream Downpayment Initiative Funds	$1,500,000	
= Total Funds Subject to RAF	$ 25,927,500	

[1]In addition to the funding set aside from the CHDO set-aside for disaster relief efforts, $1,000,000 will be reserved from this set-aside for the Colonia Model Subdivision Program. If sufficient applications are not received for this activity, the remaining funds will be used for other CHDO-eligible activities. The Department may set aside ten percent of the annual CHDO set-aside for Predevelopment Loans.

Total funds subject to the RAF by funding activity:

Activity	Estimated Available Funding	% of Total Funds Subject to RAF
Homebuyer Assistance	$5,185,500	20%
Owner-Occupied Housing Assistance	$16,852,875	65%
Tenant Based Rental Assistance	$3,889,125	15%
Total Funds Subject to the RAF	$25,927,500	100%

For more information regarding single family activities, contact Paige McGilloway, Single Family Finance Production Division, at (512) 475-4604 or paige.mcgilloway@tdhca.state.tx.us. For multifamily activity information, contact David Danenfelzer, Multifamily Finance Production Division, at (512) 475-3865 or david.danenfelzer@tdhca.state.tx.us.

HOUSING TRUST FUND

The Housing Trust Fund (HTF) receives funding from the State of Texas, multifamily bond issuance fees, loan repayments and other funds that are received and appropriated by the Department, and is the only State-authorized program for affordable housing, as created by the 72nd Legislature. HTF offers loans and grants to nonprofits; units of local government; public housing agencies; CHDOs; and for-profit entities. The targeted beneficiaries of the program are low, very low, and extremely low income households. Eligible program activities for the Housing Trust Fund include, but are not limited to, housing development activities; predevelopment costs associated with housing development; down-payment assistance; rental assistance; credit enhancements; security for repayment of revenue bonds issued to finance affordable housing; and technical assistance or other forms of capacity building to nonprofit housing developers. While all of these are eligible activities under the program's rule, not all of these activities will occur each year and Notices of Funding Availability (NOFAs) will be released identifying the activities for which funds can actually be applied.

Pursuant to §2306.111(d-1) of the Texas Government Code, HTF programs will be regionally allocated unless the funding allocation for that program is mandated by state statute, or the program's allocation represents less than 10 percent of the annual allocation for HTF.

Rental Housing Development

Rental Housing Development funds are primarily used to fund the acquisition, construction, and rehabilitation of affordable housing. Housing Trust Funds are typically used as gap financing in developments and combined with other Department programs, like the HOME Program and HTC Program.

Housing units assisted with HTF funds must remain affordable for a period of at least 30 years, pursuant to Texas Government Code §2306.185(c). Applications are reviewed in accordance with the Department's applicable rules for either open or competitive application cycles. Rental developments funded with HTF resources must have a minimum of 5 percent of the units accessible for individuals with mobility impairments and an additional 2 percent of the units shall be accessible for individuals with hearing or vision impairments.

If this activity represents more than 10 percent of the annual Housing Trust Fund allocation, the HTF Rental Development program is subject to the Department's Regional Allocation Formula, pursuant to Texas Government Code §2306.111(d-1).

Capacity Building and Technical Assistance

In 2005, the Housing Trust Fund provided approximately $400,000 in grant funding to 12 nonprofits to hire staff or contract with technical assistance providers in an effort to increase the organizational capacity and the production of affordable housing. The Capacity Building program is not subject to the regional allocation plan since it represents less than 10% of the annual Housing Trust Fund allocation. Approval for the fiscal year 2006 Capacity Building program is pending final review from the Department's Board in January, 2006.

Predevelopment Loan Program

The purpose of the Housing Trust Fund Predevelopment Loan Program is to provide opportunities for nonprofits organizations to develop affordable housing by helping to eliminate the barriers predevelopment expenses may pose. To date, the Department has awarded in excess of $1.5 million to qualified nonprofits through the program since 2001. Awards for predevelopment activities will be capped at $50,000.

The Predevelopment Loan program is not subject to the Regional Allocation Plan because it is less than 10 percent of the HTF annual allocation, pursuant to Texas Government Code §2306.111(d-1). The Department plans to release a new NOFA for the program in fiscal year 2006. Approval for the fiscal year 2006 Predevelopment Loan Program is pending final review from the Department's Board in January, 2006.

Texas Bootstrap Loan Program

The Texas Bootstrap Loan Program, as administered by the TDHCA Office of Colonia Initiatives, receives substantial funding from the Housing Trust Fund.

Disaster Relief

The Department has reserved approximately $1.8 million in HTF funding for the purpose of supporting disaster relief efforts in fiscal year 2006. The Department's Board approved the use of HTF funds for this purpose in September 2005. Further details about the disaster relief program will be forth coming in January 2006. Additional funding may be approved for this activity.

Projected Housing Trust Fund Funding for FY 2006: Approximately $6.3 million.

For more information, contact David Danenfelzer, Multifamily Finance Production Division, at (512) 475-3865 or david.danenfelzer@tdhca.state.tx.us.

Housing Tax Credit Program

The Housing Tax Credit (HTC) Program receives authority from the US Treasury Department to provide tax credits to nonprofits, for-profit developers, and syndicators or investors. The targeted beneficiaries of the program are very low and extremely low income families at or below 60 percent AMFI. The program's purpose is to encourage the development and preservation of rental housing for low income families, provide for the participation of for-profit and nonprofit organizations in the program, maximize the number of units added to the state's housing supply, and prevent losses in the state's supply of affordable housing.

The HTC Program was created by the Tax Reform Act of 1986 and is governed by the Internal Revenue Code of 1986 (the "Code"), as amended, 26 USC Section 42. It authorizes tax credits in the amount of $1.85 per capita of the state population. Tax credits are also awarded to developments with tax-exempt bond financing and are made independent of the $1.85 state volume cap. TDHCA is the only entity in the state with the authority to allocate tax credits under this program. The State's distribution of the credits is administered by the TDHCA's *Qualified Allocation Plan and Rules* (QAP), as required by the Code. Per Section 2306.67022, the Governor shall approve, reject, or modify and approve the Board-approved QAP not later than December 1 of each year.

In 2003, the Texas Legislature passed Senate Bill 264, which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the HTC Program to each Uniform State Planning Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance.

To qualify for tax credits, the proposed development must involve new construction or undergo substantial rehabilitation of residential units, which is defined as at least $12,000 per rental unit of construction hard costs, unless financed with TX-USDA-RHS, in which case the minimum is $6,000. The credit amount for which a development may be eligible depends on the total amount of depreciable capital improvements, the percentage of units set aside for qualified tenants, and the funding sources available to finance the total development cost. Pursuant to the Code, a low income housing development qualifies for residential rental occupancy if it meets one of the following two criteria: (1) 20 percent or more of the residential units in the development are both rent-restricted and occupied by individuals whose income is 50 percent or less of AMFI; or (2) 40 percent or more of the residential units in the development are both rent-restricted and occupied by individuals whose income is 60 percent or less of AMFI. Typically, 60 to 100 percent of a development's units will be set aside for qualified tenants in order to maximize the amount of tax credits the development may claim.

Credits from the state volume cap are awarded through a competitive application process. Each application must satisfy a set of threshold criteria and is scored based on selection criteria. The selection criteria referenced in the QAP is approved by the TDHCA Board each year. The board considers the recommendations of the TDHCA staff and determines a final award list. Credits to developments with tax-exempt bond financing are awarded through a similar application review process, but because these credits are not awarded from a limited credit pool, the process is noncompetitive and the selection criteria are not part of the application.

The Department requires recipients of tax credits to document the participation of minority-owned businesses in the development and management of tax credit developments, and has established a minimum goal of 30 percent participation. The selection criteria for 2006 awards extra points to developments owned by historically underutilized businesses (HUBs) or that have a plan in place for utilizing HUBs, and also development location criteria including areas located in colonias. Efforts are made in the planning process and allocation of funds to ensure the involvement of housing advocates, community-based institutions, developers, and local municipalities. The Department also encourages the participation of community development corporations and other neighborhood-based groups.

Projected HTC Program Funding for FY 2006: $43,000,000

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

MULTIFAMILY BOND PROGRAM

The Multifamily Bond Program issues tax-exempt and taxable mortgage revenue bonds (MRBs) to fund loans to nonprofit and for-profit developers. The proceeds of the bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties with the targeted beneficiaries being very low, low, and moderate income households. Owners elect to set aside units in each development according to §1372, Texas Government Code. Persons with special needs must occupy 7 percent of the units. Property owners are also required to offer a variety of services to benefit the residents of the development. Specific tenant programs must be designed to meet the needs of the current tenant profile and must be approved annually by TDHCA.

TDHCA issues tax-exempt, multifamily MRBs through two different authorities defined by the Internal Revenue Code. Under one authority, tax-exempt bonds used to create housing developments are subject to the State's private activity volume cap. The State will allocate 22 percent of the annual private activity volume cap for multifamily developments. Approximately $396 million in issuance authority will be made available to various issuers to finance multifamily developments, of which 20 percent, or approximately $79.2 million, will be made available exclusively to TDHCA. Issuance authority per individual developments is allocated and administered by the Texas Bond Review Board (BRB). Initially, applications submitted to the BRB are allocated by a lottery. TDHCA, local issuers, local housing authorities, and other eligible bond issuers submit applications for specific developments on behalf of development owners. Applications submitted to TDHCA for the private activity bond 2006 program year will be scored and ranked by priority and highest score. TDHCA will be accepting applications throughout the 2006 program year. Developments that receive 50 percent or more of their funding from the proceeds of tax-exempt bonds under the private activity volume cap are also eligible to apply for HTCs.

Under the second authority, TDHCA may issue tax-exempt MRBs to finance properties that are owned entirely by nonprofit organizations. Bonds issued under this authority are exempt from the private activity volume cap. This is a noncompetitive application process and applications may be received at any time throughout the year. In addition to the set-asides above, 75 percent of development units financed under the 501(c)(3) authority must be occupied by households earning 80 percent or less of the area median income.

Projected Multifamily Bond Program Funding for FY 2006: $175,000,000

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

First Time Homebuyer Program

The First Time Homebuyer Program receives funding from tax-exempt and taxable mortgage revenue bonds. The program offers 30-year fixed-rate mortgage financing at below-market rates for very low, low, and moderate income residents purchasing their first home or residents who have not owned a home within the preceding three years. Qualified applicants access First Time Homebuyer Program funds by contacting any participating lender, which is then responsible for the loan application process and subsequent loan approval. After closing, the lender transfers the mortgage loan to a Master Servicer designated by TDHCA.

The First Time Homebuyer Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI (area median family income) limitations, based on IRS adjusted income limits, and the purchase price of the home must not exceed stipulated maximum purchase price limits. Program funds may be allocated on a regional basis based on population percentage per Uniform State Service Region. A minimum of 30 percent of program funds will be set aside to assist Texans earning 60 percent or less of program income limits.

TDHCA currently offers Assisted Mortgage Loans and Non-Assisted Mortgage Loans. The Assisted Mortgage Loans have a slightly higher interest rate than the Non-Assisted Loans and may include down payment and closing cost assistance in the form of a grant or second lien loan. The type of assistance and amount varies by bond issuance. Assisted Mortgage Loans are available exclusively to low income homebuyers earning 60 percent or less or 115 percent or less of program income limits, depending on the program. Non-Assisted Mortgage Loans have a slightly lower interest rate than the Assisted Loans and do not offer down payment or closing cost assistance.

In an effort to assist borrowers with impaired credit histories, the First Time Homebuyer Program may be used in conjunction with Fannie Mae's My Community Mortgage. My Community Mortgage offers flexible terms, including flexibility on credit histories and the acceptance of nontraditional credit histories. These loans may be used with all TDHCA mortgage revenue bond programs, thus giving households with slight credit blemishes the opportunity to qualify for a homebuyer loan with interest rates lower than that of alternative financing arrangements

Income limits for the program are set by the IRS Tax Code (1986) based on income figures determined by the US Department of Housing and Urban Development. The first time homebuyer restriction is established by federal Internal Revenue Service regulations, which also require that program recipients may be subject to a recapture tax on any capital gain realized from a sale of the home during the first nine years of ownership. Certain exceptions to the first time homebuyer restriction, income ceiling, and maximum purchase price limitation apply in targeted areas. Such targeted areas are qualified census tracts in which 70 percent or more of the families have an income of 80 percent or less of the statewide median income and/or are areas of chronic economic distress as designated by the state and approved by the Secretaries of Treasury and Housing and Urban Development, respectively.

Projected Texas First Time Homebuyer Program funding for FY 2006: $170,000,000

For more information, contact Eric Pike, Single Family Finance Production Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

Grant Assistance Program

The Texas Department of Housing and Community Affairs offers grant funds for down payment and closing cost assistance on a first-come, first-served basis for mortgage loans originated through the First Time Homebuyer Program. The Grant Assistance Program (GAP) currently provides up to 4 percent of the amount of the mortgage loan, but may vary depending on the program. Assistance is available to eligible borrowers whose incomes do not exceed 60 percent, 80 percent, or 115 percent AMFI, depending on the program.

Projected Grant Assistance Program funding for FY 2006: Varies by bond issuance.

For more information, contact Eric Pike, Single Family Finance Production Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

Mortgage Credit Certificate Program

A mortgage credit certificate (MCC) provides a tax credit that will reduce the federal income taxes, dollar-for-dollar, of qualified buyers purchasing a qualified residence. As a result, the MCC effectively reduces the monthly mortgage payment and increases the buyer's disposable income by reducing his or her federal income tax obligation. This tax savings provides a family with more available income to qualify for a loan and meet mortgage payment requirements.

The amount of the annual tax credit will equal 35 percent of the annual interest paid on a mortgage loan; however, the maximum amount of the credit cannot exceed $2,000 per year. The credit cannot be greater than the annual federal income tax liability, after all other credits and deductions have been taken into account. MCC tax credits in excess of a borrower's current year tax liability may, however, be carried forward for use during the subsequent three years.

The MCC Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI limitations, based on IRS adjusted income limits. In order to participate in the MCC Program, homebuyers must meet certain eligibility requirements and obtain a mortgage loan through a participating lender. The mortgage loan must be financed from sources other than tax-exempt revenue bonds. The mortgage may be a conventional, FHA, VA, or RHS loan at prevailing market rates, but may not be used in connection with the refinancing of an existing loan.

Projected Mortgage Credit Certificate Program funding for FY 2006: $60,000,000

For more information, contact Eric Pike, Single Family Finance Production Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us.

Lone Star Loan Program

The Loan Star Mortgage Program will offer conventional, conforming first lien purchase mortgage loans, at market level interest rates, with second lien amortizing loans providing 8 percent down payment assistance. Target populations include low and moderate income households who may or may not have previously owned a home and require down payment assistance and seek minimal paperwork. Participating lenders statewide will originate the mortgage loans.

The program is offered in conjunction with CitiMortgage Inc. using external market sources, and is intended to serve segments of the Texas homebuyer market not currently served by TDHCA's present tax-exempt bond program. An essential component of the Loan Star Mortgage Program (also known as the Market Rate Program) is the down payment assistance achieved through a Fannie Mae MyCommunity second lien mortgage.

TDHCA currently does not offer any mortgage refinancing options, and anticipates that this program will provide a platform for refinancing higher interest rate loans. Another component of the Loan Star Mortgage Program to be released at a future date includes a Predatory Loan Remediation product. Second lien mortgage proceeds under these additional program features will be used to mitigate prepayment penalties typically associated with high interest rate loans.

Projected Lone Star Lone Program funding for FY 2006: $22,500,000

For more information, contact Martha Sudderth, Single Family Finance Production Division, at (512) 475-3444 or martha.sudderth@tdhca.state.tx.us.

TEXAS STATEWIDE HOMEBUYER EDUCATION PROGRAM

The Texas Statewide Homebuyer Education Program (TSHEP) offers provider certification training to nonprofit organizations including Texas Agriculture Extension Agents, units of local government, faith-based organizations, CHDOs, community development corporations, community-based organizations, and other organizations with a proven interest in community building. In addition, a referral service for individuals interested in taking a homebuyer education class is available through TDHCA. The targeted beneficiaries of the program include extremely low, very low, low, and moderate income individuals; minority populations; and persons with disabilities.

To ensure uniform quality of the homebuyer education provided throughout the state, TDHCA contracts with training professionals to teach local nonprofit organizations the principles and applications of comprehensive pre- and post-purchase homebuyer education. The training professionals and TDHCA also certify the participants as homebuyer education providers.

Projected Texas Statewide Homebuyer Education Program funding for FY 2006: $70,000.

For more information, contact Alyssa Carpenter, Division of Policy and Public Affairs, at (512) 475-3975 or alyssa.carpenter@tdhca.state.tx.us.

OFFICE OF COLONIA INITIATIVES

In 1996, in an effort to place more emphasis on addressing the needs of colonias, the Office of Colonia Initiatives (OCI) was created and charged with the responsibility of coordinating all Department and legislative initiatives involving border and colonia issues and managing a portion of the Department's existing programs targeted at colonias. The fundamental goal of the OCI is to improve the living conditions and lives of border and colonia residents, and to educate the public regarding the services that the Department has to offer.

A "colonia," Spanish for "neighborhood" or "community," is a geographic area located within 150 miles of the Texas-Mexico border that has a majority population comprised of individuals and families of low and very low income who lack safe, sanitary, and sound housing.

Border Field Offices

OCI oversees three Border Field Offices (BFOs) located in Edinburg, El Paso, and Laredo that serve a 75-county area with a primary purpose to provide technical assistance to units of local governments, nonprofits, for-profits, colonia residents, and the general public on Department's programs and services through on-site visits and other outreach activities along the Texas-Mexico border region. Each BFO is responsible for marketing Department programs and services to colonia and border residents. In addition, BFOs conduct on-site loan packaging and processing, homebuyer counseling, inspections, and administration of the various contracts regarding the Department's border and colonia initiatives such as the Colonia Self-Help Centers, Contract for Deed Conversion Program, and the Texas Bootstrap Loan Program. This collaboration of efforts serves as a mechanism for community improvements that is responsive to the needs of colonia residents.

Colonia Self-Help Centers

Legislative action in 1995 directed the establishment of Colonia Self-Help Centers (SHCs) in Cameron/Willacy, El Paso, Hidalgo, Starr, and Webb counties, and any other county if designated as an economically distressed area. Additional Colonia SHCs have been established in Maverick and Val Verde counties. Operation of Colonia SHCs is carried out through a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the ability to perform the functions of a Colonia SHC. Colonia SHCs provide concentrated on-site technical assistance to low and very low income individuals and families regarding housing and community development activities, infrastructure improvements, and outreach and education. The program serves 31 designated colonias in the seven counties and benefits approximately 20,000 colonia residents. Beneficiaries of services must be at or below 80 percent of the area median family income.

Operation of the Colonia SHCs is funded by the Office of Rural Community Affairs with US Department of Housing and Urban Development's Texas Community Development Block Program (CDBG) 2.5 percent colonia set-aside. CDBG funds can only be provided to eligible units of general local governments; therefore, the Department must enter into a contract with each affected county government. The Department maintains a relationship with the unit of government and Colonia SHC operators to ensure the housing and community development activites within each respective contract are achieved.

Colonia Resident Advisory Committee

The Colonia Resident Advisory Committee (C-RAC) advises the Department on the needs of colonia residents, activities to be provided, and programs to be undertaken in the selected colonias of the Colonia SHCs. The Department's Board of Directors is required by the Texas Government Code to appoint two colonia resident representatives from each county to the C-RAC. C-RAC members meet 30 days prior to making an award to a Colonia Self-Help Center. The C-RAC has been instrumental in voicing the concerns of the targeted populations and assisting in the development of useful tools and programs to address the needs of colonia residents.

Contract for Deed Conversion Initiative

The intent of this program is to facilitate colonia-resident property ownership by converting contracts for deed into traditional mortgages. The Department is required through legislative directive to spend no less than $4 million on contract for deed conversions for colonia families. The Department must convert at least 400 of these contracts for deed into traditional notes and deeds of trust by August 31, 2007. Participants of this program must earn 60 percent or less of the applicable area median family income, live in a colonia and the property must be their principal residence. Pre- and post-conversion counseling is available, as well as funding for housing reconstruction and rehabilitation.

Colonia Consumer Education Services

OCI continues the consumer education program and has expanded its educational goals, although OCI is no longer required by legislation to provide education for contract for deed participants. With the statewide expansion of this program, OCI recognized the need for additional education topics, such as filing homestead exemptions and instruction in other aspects of homeownership. Education services are available through the Colonia Self-Help Centers and OCI Border Field Offices.

Texas Bootstrap Loan Program

The Texas Bootstrap Loan Program is required under Subchapter FF, Chapter 2306, Texas Government Code, to make available $3 million for mortgage loans to very low income families (those earning 60 percent or less of the area median family income), not to exceed $30,000 per unit. This program is a self-help construction program, which is designed to provide very low income families an opportunity to help themselves through the form of sweat equity. All participants under this program are required to provide at least 60 percent of labor that is necessary to construct or rehabilitate the home, and all applicable building codes must be adhered to under this program. In addition, nonprofit organizations can combine these funds with other sources, such as those from private lending institutions, local governments, or any other sources; however, all combined loans can not exceed $60,000 per unit.

The Department is required to set aside at least two-thirds, or $2,000,000, of the available funds for owner-builders whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code. The remainder of the funding, one-third, or $1,000,000, will be available to Department-certified nonprofit owner-builder programs statewide.

Colonia Model Subdivision Program

The intent of this program, created in 2001 by the 77th Legislature, is to provide low-interest or interest-free loans to promote the development of new, high-quality subdivisions that provide alternatives to substandard colonias. The Department has allocated $2 million from the HOME Program to implement this initiative for the 2005-2006 biennium.

Consumer Information Resources

OCI operates a toll-free hotline, 1-800-462-4251, in both English and Spanish that enables colonia residents to voice their concerns and/or request information. In addition, this hotline is available to colonia residents who may be having trouble making their monthly mortgage programs under the Contract for Deed Conversion Initiative and Texas Bootstrap Loan Program.

Projected Office of Colonia Initiatives funding for FY 2006: $8,100,100

For additional information, contact Homero V. Cabello, Office of Colonia Initiatives, at 1-800-462-4251 or homero.cabello@tdhca.state.tx.us.

Comprehensive Energy Assistance Program

The Comprehensive Energy Assistance Program (CEAP) receives funding from the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) and offers grants to community action agencies, nonprofits, and local units of government. The targeted beneficiaries of the program in Texas are households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly, disabled, families with young children; households with the highest energy costs or needs in relation to income (highest home energy burden); and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

CEAP combines case management, energy education, and financial assistance to help very low and extremely low income consumers reduce utility bills to an affordable level. By statute, 10 percent of total funding is allocated for administration and 5 percent is allocated to case-management activities. The remaining 85 percent of the funding is used for direct client services, which includes 5 percent for outreach.

There are four basic components to meet consumers' needs:

- The co-payment component assists households achieve energy self-sufficiency by helping households set goals for reducing utility bills, giving advice on improving household budgets, and assisting with utility bills for six to twelve months.
- The heating and cooling systems component repairs or replaces heating and cooling appliances to increase energy efficiency.
- The energy crisis component provides assistance during an energy crisis caused by extreme weather conditions or an energy supply shortage.
- The elderly and persons with disabilities component assists vulnerable households during fluctuations in energy costs by paying up to four of the highest bills during the year.

CEAP providers are expected to create partnerships with programs within and outside their agencies and with private entities. The program also requires that providers refer CEAP clients to the Department's Weatherization Assistance Program. Because CEAP is designed to help clients achieve energy self-sufficiency, it encourages the consumer to control future energy costs without having to rely on other government programs for energy assistance.

Projected Comprehensive Energy Assistance Program funding for FY 2006: $33,214,784.

For more information, contact Michael DeYoung, Energy Assistance Section, at (512) 475-2125 or michael.deyoung@tdhca.state.tx.us. To apply for CEAP, call 1-877-399-8939, toll free, using a land phone.

Weatherization Assistance Program

The Weatherization Assistance Program (WAP) is funded through the US Department of Energy Weatherization Assistance Program for Low Income Persons grant and the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) grant. WAP offers grants to community action agencies, nonprofits, and local units of government with targeted beneficiaries being households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly, disabled, families with young children; households with the highest energy costs or needs in relation to income (highest home energy burden), and households with high energy consumption. Local providers must implement special outreach efforts to reach these priority populations. Applicants who have special needs receive additional points in the application process. To help consumers control energy costs, WAP funds the installation of weatherization measures and provides energy conservation education. In addition to meeting the income-eligibility criteria, the weatherization measures to be installed must meet specific energy-savings goals.

The Department of Energy allows up to 15 percent of the funds for administration. The Department of Health and Human Services LIHEAP grant allows 10 percent for administration. The remaining funds are used for direct client services.

Partnerships between the Weatherization Assistance Program and the Southwestern Electric Power Company, the Southwestern Public Service Company, Entergy, and El Paso Electric provide energy conservation measures to very low and extremely low income utility customers. These partnerships increase the total number of low income households receiving weatherization services and provide consumers the opportunity to receive more comprehensive energy-efficiency measures.

Projected Weatherization Assistance Program funding for FY 2006: $12,242,949.

For more information, contact Marco Cruz, Energy Assistance Section, at (512) 475-3860 or marco.cruz@tdhca.state.tx.us. To apply for weatherization, call 1-888-606-8889, toll free, using a land phone.

EMERGENCY SHELTER GRANTS PROGRAM

The Emergency Shelter Grants Program (ESGP) receives funding from the US Department of Housing and Urban Development and awards grants to units of local government and private nonprofit entities that provide shelter and related services to homeless persons and/or intervention services to persons at risk of homelessness. Activities eligible for ESGP funding include the rehabilitation or conversion of buildings for use as emergency shelters for the homeless; the provision of essential services to the homeless; costs related to the development and implementation of homeless prevention activities; costs related to operation administration; and costs related to maintenance, operation, rent, repairs, security, fuel, equipment, insurance, utilities, food and furnishings.

TDHCA also participates in the Texas Interagency Council for the Homeless (TICH). TICH is charged with surveying and evaluating services for the homeless in Texas; assisting in the coordination and provision of services for homeless persons throughout the state; increasing the flow of information among separate service providers and appropriate authorities; developing guidelines to monitor services for the homeless; providing technical assistance to the housing finance divisions of TDHCA in order to assess housing needs for persons with special needs; establishing a central resource and information center for the state's homeless; and developing, in cooperation with the Department and the Health and Human Services Commission, a strategic plan to address the needs of the homeless.

The Department provided funds to the Texas Homeless Network (THN) to provide in-depth technical assistance on refining a collaborative network of local service providers, assessing the needs of the homeless population, and developing priorities for addressing those needs.

Projected Emergency Shelter Grants Program funding for FY 2006: $5,154,498.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905 or rita.garza@tdhca.state.tx.us.

COMMUNITY SERVICES BLOCK GRANT PROGRAM

The Community Services Block Grant Program (CSBG) receives funding from the US Department of Health and Human Services (USHHS), and funds are utilized to fund CSBG-eligible entities and to fund activities that support the intent of the CSBG Act. The targeted beneficiaries of the program are low income families and individuals, homeless families and individuals, migrant and seasonal farmworkers, and elderly low income individuals and families whose income does not exceed 125 percent of the current federal income poverty guidelines issued by USHHS.

CSBG provides administrative support to 47 CSBG-eligible entities that provide services to very low income persons. The funding assists with in providing essential services, including access to child care, health and human services, nutrition, transportation, job training and employment services, education services, activities designed to make better use of available income, housing services, emergency assistance, activities to achieve greater participation in the affairs of the community, youth development programs, information and referral services, activities to promote self-sufficiency; and other related services.

Five percent of the State's CSBG allocation may be used to fund activities that support the intent of the Community Services Block Grant Act, which may include providing training or technical assistance to eligible entities or short-term financial support for innovative projects that address the causes of poverty, promote client self-sufficiency, or promote community revitalization. These funds may also be used to support nonprofit organizations that assist low income Native Americans and migrant or seasonal farm workers. In addition, local contractors may use CSBG funds to assist homeless persons and other special needs populations.

Community Services Block Grant Program funding for FY 2006: $30,514,311.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905 or rita.garza@tdhca.state.tx.us.

COMMUNITY FOOD AND NUTRITION PROGRAM

The Community Food and Nutrition Program (CFNP) receives funding from the US Department of Health and Human Services, and the grant supports efforts to address hunger issues in low income neighborhoods on a statewide basis.

CFNP coordinates statewide efforts to address hunger and related issues by distributing surplus commodities through the Share Our Surplus Service (SOS) and game donated by hunters through Hunters for the Hungry Program (HFHP). CFNP funds are also used to support the expansion of child-feeding programs and the creation of farmers markets designed to serve low income neighborhoods.

The SOS program is a food recovery program where donations of surplus and unsaleable food donations are distributed to needy Texas. HFHP is a collaborative effort among hunters, meat processors, and nonprofit organizations to distribute meat to local food banks, food pantries and other organizations feeding the needy.

Community Food and Nutrition Program funding for FY 2006: $362,178.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905 or rita.garza@tdhca.state.tx.us.

SECTION 8 HOUSING CHOICE VOUCHER PROGRAM

The Section 8 Housing Choice Voucher Program (HCVP) receives funding from HUD and offers rental assistance subsidies to families and individuals, including the elderly and persons with disabilities, earning 50 percent or less of area median income. At least 75 percent of HCVP tenants must have incomes at or below 30 percent of the area median income. Qualified households are afforded the opportunity to select the best available housing through direct negotiations with landlords to ensure accommodations that meet their needs. The statewide HCVP is designed specifically for needy families in small cities and rural communities not served by similar local or regional programs.

TDHCA contracts with community action agencies, public housing authorities, and local governments to assist the Department with the administration of the Housing Choice Voucher Program in their area.

Projected Section 8 Program funding for FY 2006: $8,000,000

For more information, contact the Section 8 Program at (512) 475-2634.

MANUFACTURED HOUSING DIVISION

The Manufactured Housing Division regulates the manufactured housing industry in Texas by ensuring that manufactured homes are well constructed, safe, and correctly installed; consumers are provided fair and effective remedies; and the manufactured housing industry is economically stable. The division also licenses manufactured housing professionals and processes titling paperwork, and is now required to record tax liens on manufactured homes. Because of its regulatory nature, the division has its own governing board and executive director.

Relying on a team of trained inspectors in eight field offices around the state, the Division inspects manufactured homes throughout the state. Those inspectors also assist TDHCA by inspecting properties for the Portfolio Management and Compliance Division and now assist with the inspection and licensing of migrant farmworker housing facilities. The Division also handles nearly 2,000 consumer complaints a year, many of those requiring investigation and enforcement action.

For more information, contact the Manufactured Housing Division at 1-800-500-7074.

TDHCA ALLOCATION PLANS

The Department has developed allocation formulas for many TDHCA programs in order to target available housing resources to the neediest households in each uniform state service region. These formulas are based on objective measures of need in order to ensure an equitable distribution of funding.

2006 Regional Allocation Formula

Background

Section 2306.111(d) of the Government Code requires that TDHCA use a Regional Allocation Formula (RAF) to allocate its HOME, Housing Trust Fund (HTF), and Housing Tax Credit (HTC) funding. This RAF objectively measures the affordable housing need and available resources in 13 State Service Regions used for planning purposes. The RAF also allocates funding to rural and urban/exurban areas within each region. Because no RAF-related activities were approved for this year's HTF allocation plan, a 2006 HTF RAF was not calculated.

As a dynamic measure of need, the RAF is revised annually to reflect updated demographic and resource data; respond to public comment; and better assess regional housing needs and available resources. The RAF is submitted annually for public comment.

Two slightly modified formulas are used for the HOME and HTC programs because the programs have different eligible activities, households, and geographical service areas. Section 2306.111(c) of the Government Code requires that at least 95 percent of HOME funding be set aside for non-participating jurisdictions (non-PJs). Therefore, the HOME RAF only uses need and available resource data for non-PJ areas.

Figure 4.2: Housing Tax Credit RAF

Region	Large MSA within Region for Geographical Reference	Regional Funding Amount	Regional Funding %	Rural Funding Amount	Rural Funding %	Urban/ Exurban Funding Amount	Urban/ Exurban Funding %
1	Lubbock	$2,026,482	4.7%	$913,835	45.1%	$1,112,647	54.9%
2	Abilene	$1,143,231	2.7%	$529,047	46.3%	$614,184	53.7%

10	Corpus Christi	$2,085,896	8.0%	$1,411,114	67.7%	$674,782	32.3%
11	Brownsville/Harlingen	$4,713,360	18.2%	$3,179,318	67.5%	$1,534,042	32.5%
12	San Angelo	$1,567,553	6.0%	$599,679	38.3%	$967,874	61.7%
13	El Paso	$616,491	2.4%	$390,734	63.4%	$225,757	36.6%
	Total	$25,927,500	100.0%	$16,924,460	65.3%	$9,003,040	34.7%

Methodology

Consideration of Affordable Housing Need

The first part of the RAF determines the funding allocation based solely on objective measures of each region's share of the State's affordable housing need. The RAF uses the following 2000 US Census data to calculate this regional need distribution.

- Poverty: Number of persons in the region who live in poverty.
- Cost Burden: Number of households with a monthly gross rent or mortgage payment to monthly household income ratio that exceeds 30 percent.
- Overcrowded Units: Number of occupied units with more than one person per room.
- Units with Incomplete Kitchen or Plumbing: Number of occupied units that do not have all of the following: sink with piped water; range or cook top and oven; refrigerator, hot and cold piped water, flush toilet, and bathtub or shower.

Non-poverty data is for households at or below 80 percent of the Area Median Family Income (AMFI).

- Because the HTC program supports rental development activities, renter household data is used for the HTC RAF.
- Because the HOME program supports renter and owner activities, both renter and owner data is used in the HOME RAF.

The following steps are used to measure regional need.

1. Each need measure (poverty, cost burden, overcrowding, and incomplete units) is weighted to reflect its perceived relevance in assessing affordable housing need. Half the measure weight is associated with poverty because of the significant number of persons in poverty and the use of this factor in the HUD Community Planning and Development Program Formula Allocations. The remaining measure weight is proportionately allocated based on the relative size of the other three measure populations. The resulting need measure weights are: poverty = 50 percent, cost burden = 36 percent, overcrowding = 12 percent, and substandard housing = 2 percent.

2. The following steps calculate the funding distribution based on the need measures.
   a. The total RAF funding amount is multiplied by each need measure weight to determine the amount of funding distributed by that measure.
   b. Each measure's amount of funding is regionally distributed based on the distribution of persons or households in need.
3. The resulting four regional measure distributions are then combined to calculate each region's need-based funding amount.
4. Each region's need based funding amount is divided by the total RAF funding amount. This quotient is the region's need percentage.

Consideration of Available Housing Resources

In addition to TDHCA, there are many other sources of funding that address affordable housing needs. To mitigate any inherent inequities in the way these resources are regionally allocated, the RAF compares each region's level of need to its level of resources.

Because the resources used in the RAF reflect the three programs' eligible households and activities, the following data is used:

- The HTC RAF uses rental funding sources.
- The HOME RAF uses sources of rental and owner funding in non-PJs.

The following resources are used in both the HOME and HTC RAFs:

- Housing Tax Credits (4% and 9%)[102]
- Housing Trust Fund Rental Development Funding
- HUD HOME Funds (TDHCA and Participating Jurisdictions)
- HUD Housing for Persons with AIDS Funding
- HUD Public Housing Authority (PHA) Capital Funding
- HUD Section 8 Tenant-Based Rental Assistance (TDHCA and PHA)
- Multifamily Texas Housing Trust Fund
- Multifamily Tax-Exempt Bond Financing[103]
- United States Department of Agriculture (USDA) Multifamily Development Funding
- USDA Rental Assistance

The HOME RAF also includes the following sources of owner funding:

- USDA 502 and 504 Loans and Grants
- Single Family Bond Financing (TDHCA and Housing Finance Corporations)

These steps calculate the regional distribution of available housing resources:

1. The available resources are summed by region and for the state. The resulting sums are the regional and state resource totals.

[102] Estimated capital raised through the syndication of the HTCs.
[103] The value of the bonds is 52 percent of the total bond amount. This is an estimate of the capital required to fill a affordability gap that remains after the capital raised through the syndication of the 4% HTCs is deducted from the total development cost.

2. The regional resource total is divided by the state resource total. This quotient is the region's resource percentage.

Comparison of Regional Need and Available Resource Distributions

In theory, if the measurement of regional need is accurate, then the region's need percentage should reflect its resource percentage. A region with a negative resource and need difference is considered to be "under allocated." This region should have received a larger portion of the available resources to address their need. Similarly, a region with a positive difference is considered "over allocated." Conversely, it should have received a smaller portion of the available resources.

To address differences between the regional need and resource distributions, the RAF uses a resource funding adjustment to shift a portion of the need based funding distribution from over allocated to under allocated regions.

A resource funding adjustment limit is used to ensure that a particular region or geographical area is not overly penalized by the resource funding adjustments. The region's need based funding amount cannot be reduced by more than the percentage of the state's available resources that are not already regionally distributed. This percentage is calculated by finding the average difference between each funding source's regional distribution and the regional need percentages. Sources whose average of the regional differences exceeds five percent are included in the resource funding adjustment limit.

The following steps calculate the resource funding adjustments:

1. The regional resource percentage and regional need percentage differences are calculated.
2. The resulting over allocated (positive) resource differences are summed to calculate the state resource difference.
3. The state resource difference is multiplied by the total RAF funding. This product is the state over allocated resource amount.
4. Each over allocated resource difference is divided by the state resource difference. This quotient is the over allocation percentage.
5. Each over allocation percentage is multiplied by the state over allocated resource amount to determine the base resource funding adjustment.
6. The region's need based funding amount is multiplied by the resource funding adjustment limit. This product is the maximum resource funding adjustment.
7. The lesser of the base resource funding adjustment and the maximum resource funding adjustment is the over allocated region's resource funding adjustment.
8. The over allocated regions' resource funding adjustments are summed. This total is the state under allocated resource amount.
9. Each under allocated (negative) resource difference is divided by the state resource difference to determine the under allocation percentage.
10. Each under allocation percentage is multiplied by the state under allocated resource amount. This product is the under allocated region's resource funding adjustment.

Consideration of Rural and Exurban/Urban Need[104]

There are a number of factors that affect the distribution of resources to rural and urban/exurban areas. These include rural area feasible development sizes, allowable rent and income levels, and proximity to developers, contractors, and materials. Access to resources is also an issue because some funding, such as multifamily tax-exempt bond financing, does not work very well in rural areas. To ensure an equitable distribution of funding to both rural and urban/exurban areas, the RAF analyzes the distribution of rural and urban/exurban need and resources at the regional level.

The RAF uses the following rural and urban/exurban definitions:

1. Rural - A place that is:
    a. outside the boundaries of a metropolitan statistical area (MSA); or
    b. within the boundaries of a MSA, if the place has a population of 20,000[105] or less and does not share a boundary with a place that has a population greater than 20,000.[106]
2. Urban/Exurban
    a. Any place that does not satisfy the Rural place definition; or
    b. an area located outside the boundaries of a place and in a census tract that has a population density greater than 1,200 people per square mile. [This subcategory is not used in the HOME formula.]

Measuring Rural and Urban/exurban Affordable Housing Need

The following steps calculate the level of need in rural and urban/exurban areas:

1. The same need measure weights used to determine the regional need distribution are multiplied by the region's funding amount. This product is the measure funding amount.
2. Place level measure data is identified as being rural or urban/exurban based on the RAF area definitions.
3. Using the coded place data, each measure's affected number of rural and urban/exurban persons or households in the region is calculated.
4. The corresponding measure rural and urban/exurban percentages are calculated.
5. For each measure, the regional funding amount is multiplied by the measure rural and urban/exurban percentages to calculate the rural and urban/exurban measure funding amounts.
6. The rural and urban/exurban measure funding amounts are summed for the four measures. These totals are the region's rural and urban/exurban need based funding amounts.
7. The region's rural and urban/exurban need based funding amounts are divided by the region's total funding amount. These quotients provide the region's rural and urban/exurban need percentages.

---

[104] §2306.111(d) requires the RAF to consider "rural and urban/exurban areas" in its distribution of program funding. Until further guidance is provided by the Legislature, TDHCA's Legal Division has interpreted "Urban/Exurban" to be a single category.

[105] The definition of "population" in state law (Sec. 311.005(3), Government Code) is "the population shown by the most recent federal decennial census." Because of this requirement, the decennial census place population must be used to make the area type determination.

[106] Applicants may petition TDHCA to update the "Rural" designation of a place within a metropolitan statistical area by providing a letter from a local official. Such letter must clearly indicate that the place has an incorporated area boundary that touches the boundary of another place with a population of over 20,000. To treat all applicants equitably, such letter must be provided to TDHCA prior to the commencement of the

- pre-application submission period for HTC applications, or
- application submission period for HOME applications.

Measuring Rural and Urban/Exurban Available Resources

The following steps calculate the Rural and Urban/Exurban distribution of available housing resources.

1. The geographically coded place data is summed to calculate regional rural and urban/exurban resource totals. Funding allocated at the county level is proportionately distributed based on the percentage split between rural and urban/exurban places within the county. The resulting totals are the rural and urban/exurban resource totals.
2. The corresponding regional rural and urban/exurban resource percentages are calculated.

Rural and Urban/Exurban Available Resources Funding Adjustment

The following steps calculate the rural and urban/exurban area resource funding adjustments.

1. The differences between the rural and urban/exurban resource percentages and rural and urban/exurban need percentages are calculated. The resulting differences show which of the two areas (rural or urban/exurban) were over or under allocated.
2. Each over allocated (positive) area resource difference is multiplied by the region's funding amount. For example, if the urban/exurban area is over allocated, then the difference is multiplied by the Regional Funding Amount. The resulting product is the area's base resource funding adjustment.
3. The over allocated area's need based funding amount is multiplied by the resource funding adjustment limit. This product is the area's maximum resource funding adjustment.
4. The lesser of the area's base resource funding adjustment or the maximum resource funding adjustment is the area's resource funding adjustment.

Rural and Urban/Exurban Regional Funding Amounts

The area's over allocated resource funding adjustment is subtracted from the over allocated area's need based funding amount and is added to the under allocated area's need based funding amount.

2006 Affordable Housing Needs Score

Background

The AHNS scoring criterion is used to evaluate HOME, Housing Tax Credit (HTC), and Housing Trust Fund (HTF) applications. The formula is submitted annually for public comment. The final version is published in the SLIHP.

While not specifically legislated by the state, the AHNS helps address other need based funding allocation requirements by responding to

- an IRS Section 42 requirement that the selection criteria used to award the HTC funding must include "housing needs characteristics."
- State Auditor's Office (SAO) and Sunset findings that called for the use of objective, need based criteria to award TDHCA's funding.

The AHNS is an extension of the TDHCA Regional Allocation Formula (RAF) in its comparative assessment of each place's level of need relative to the other places within its State Service Region. Through the AHNS, applicants are encouraged to request funding to serve communities that have a high level of need.

The HOME and HTF/HTC programs use slightly modified versions of the AHNS because the programs have different eligible activities, households, and geographical areas. Under §2306.111(c) of the Government Code, at least 95 percent of HOME funding is set aside for non-participating jurisdictions. Therefore, the HOME AHNS only uses need data for non-participating jurisdictions.

Methodology

The following steps measure each place's level of affordable housing need.

1) The Census number of households at or below 80 percent AMFI with cost burden establishes baseline for each place's number of households in need of housing assistance. The type of household considered for this baseline varies by activity.
   a) Renter data is used for the rental development (RD), tenant based rental assistance (TBRA), and down payment assistance (DPA) scores.
   b) Owner data is used for the owner occupied rehabilitation (OCC) score.

2) For each activity, an adjusted number of households with cost burden is calculated based on the difference between the place's population in the 2000 Census and the 2004 State Data Center population estimate.

3) The number of households assisted using TDHCA funding since the Census was taken (April 1, 2000) is subtracted from the adjusted number of households with cost burden. The resulting number shows the place's estimated remaining need.
   a) For HTC and HTF scores, RD activity is used;
   b) For HOME TBRA and RD scores, TBRA[107] and RD activity is used;
   c) For HOME DPA scores, First Time Homebuyer and HOME DPA activity is used; and
   d) For HOME OCC scores, HOME OCC activity is used.

4) The estimated remaining need measure quantifies place level of need in two ways.
   a) The ratio of the county's level of need to the region's level of need is calculated for each scoring activity. This ratio shows the distribution of need across the region.
   b) The ratio of the place's households in need to the place's total households is calculated for each scoring activity. This ratio shows the concentration of need within a place.

5) Points are assigned to each place based on the distribution of need (maximum of 3.5 points) and concentration of need (maximum of 3.5 points) ratios using a sliding scale that compares each place's level of need to the region's other places. The combined points provide the area's AHNS.

Rural and Exurban/Urban Need

Section 2306.111(d) of the Government Code requires the RAF to consider rural and urban/exurban areas in its distribution of funds. To assist with this distribution, each area is classified using the RAF's geographic area definitions.
Rental development activities that occur outside an incorporated place or Census Designated Place as defined by the U.S. Census Bureau shall use the area definition of the closest place.

For the HOME program, a county score is used for activities that will serve more than one place within a county. If multiple counties or places in multiple counties will be served by an application, then the county scores will be averaged. Participating Jurisdictions (PJ) receive a score of zero. Places located in a PJ

[107] Because of the limited duration of TBRA, a conversion factor was used to equate the value of a voucher to an affordable housing unit. This factor equaled the voucher duration divided by the number of years since the Census. For 2006, this was 2 years/6 years or a reduction in the number of households in need by 1/3 of a household.

County must provide evidence from a local official attesting to the fact that the place is not participating with the county with regard to the HOME program.

2006 Emergency Shelter Grants Program Allocation Formula

ESGP funds are reserved according to the percentage of poverty population identified in each of the 13 state service regions (i.e., 3.95 percent of the available ESGP funds were reserved for Region 1 with 3.95 percent of the state's poverty population). The top scoring applications in each region are recommended for funding, based on the amount of funds available for that region. Any application that receives a score below 70 percent of the highest raw score from the region is not considered for funding.

2006 Community Services Block Grant Allocation Formula

Allocations to the 47 CSBG–eligible entities are based primarily on two factors: (1) the number of persons living in poverty within the designated service delivery area for each organization and (2) a calculation of population density. Poverty population is given 98 percent weight, and the ratio of inverse population density is given 2 percent weight. The formula also includes a base award for each organization before the factors are applied, as well as a floor, or minimum award. In FY 2006, the Department will incorporate the 2000 Census population figures at 125 percent of poverty, a base of $50,000, and a floor at $150,000.

2006 Comprehensive Energy Assistance Program and Weatherization Assistance Program Allocation Formula

The allocation formula for the Comprehensive Energy Assistance and Weatherization Assistance programs uses the following five factors and corresponding weights to distribute its funds by county: county non-elderly poverty household factor (40 percent); county elderly poverty household factor (40 percent); county inverse poverty household density factor (5 percent); county median income variance factor (5 percent); and county weather factor (10 percent).

TDHCA GOALS AND OBJECTIVES

The Strategic Plan goals reflect program performance based upon measures developed with the State's Legislative Budget Board and Governor's Office of Budget and Planning. The goals are also based upon Riders attached to the Department's Appropriations. The Department believes that the goals and objectives for the various TDHCA programs should be consistent with its mandated performance requirements.

The State's Strategic Planning and Performance Budgeting System (SPPB) is a mission- and goal-driven results-oriented system combining strategic planning and performance budgeting. The system has three major components including strategic planning, performance budgeting, and performance monitoring. As an essential part of the system, performance measures are part of TDHCA's strategic plan; they are used by decision makers in allocating resources; they are intended to focus the Department's efforts on achieving goals and objectives; and they are used as monitoring tools providing information on accountability. Performance measures are reported quarterly to the Legislative Budget Board.

The State's Strategic Planning and Performance Budgeting System is based on a two-year cycle; goals and targets are revisited each biennium. The targets reflected in this document are based on the Department's requests for 2006–2007.

All applicants for funding are eligible and are encouraged to apply for and leverage funds from multiple agency programs. There will be a considerable amount of leveraging of HUD funds with those from other federal and State sources. The following affordable housing goals and objectives present TDHCA's approach to addressing the state's affordable housing needs. While the HOME Program funds may be used in conjunction with other TDHCA programs, there is no way to determine the extent of the overlap. Because of this, each program reports their performance separately, with its particular intention/use listed separately.

Affordable Housing Goals and Objectives

The following goals address performance measures established by the 79th Legislature. Refer to program-specific statements outlined in the Action Plan portion of this document for strategies that will be used to accomplish the goals and objectives listed below. Included are the 2005 goal and actual performance and the 2006 goal. Actual 2005 numbers were not available at the printing of this draft document, but will be included in the final document.

Goals one through five are established through interactions between TDHCA, the Legislative Budget Board, and the Legislature. They are referenced in the General Appropriations Act enacted during the most recent legislative session.

Note: 2005 Measures marked with an "*" were added to the 2006 Performance Measures by the 79th Legislature.

GOAL 1: TDHCA WILL INCREASE AND PRESERVE THE AVAILABILITY OF SAFE, DECENT, AND AFFORDABLE HOUSING FOR VERY LOW, LOW, AND MODERATE INCOME PERSONS AND FAMILIES

1.1 **Strategy:** Provide mortgage financing and homebuyer assistance through the Single Family Mortgage Revenue Bond Program.
Strategy Measure: *Number of single family households assisted through the First Time Homebuyer Program.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
1,770	1,898	107.23%	1,727

*1.2 **Strategy:** Provide funding through the HOME Program for affordable single family housing.
Strategy Measure: *Number of single family households assisted with HOME funds.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	1,308	N/A	1,834

*1.3 **Strategy:** Provide funding through the HTF program for affordable single family housing.
Strategy Measure: *Number of single family households assisted through the Housing Trust Fund.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	128	N/A	100

1.4 **Strategy:** Provide tenant-based rental assistance through Section 8 certificates.
Strategy Measure: *Number of multifamily households assisted with tenant-based rental assistance.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
2,200	1,750	79.55%	2,100

Explanation of Variance: Due to the transfer of vouchers to Brazoria County, the targeted performance was not met.

1.5 **Strategy:** Provide federal tax credits to develop rental housing.
Strategy Measure: *Number of multifamily households assisted with HTCs.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
10,763	18,350	170.49%	18,832

*1.6 **Strategy:** Provide funding through the HOME Program for affordable multifamily housing.
Strategy Measure: *Number of multifamily households assisted with HOME funds.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	945	N/A	741

*1.7 **Strategy:** Provide funding through the Housing Trust Fund for affordable multifamily housing.
Strategy Measure: *Number of multifamily households assisted through the Housing Trust Fund.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	1,021	N/A	255

1.8 **Strategy:** Provide funding through the Multifamily Mortgage Revenue Bond program for affordable multifamily housing.

Strategy Measure: *Number of households assisted through the Mortgage Revenue Bond program.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
1,999	3,288	164.48%	3,500

GOAL 2: TDHCA WILL PROMOTE IMPROVED HOUSING CONDITIONS FOR EXTREMELY LOW, VERY LOW, AND LOW INCOME HOUSEHOLDS BY PROVIDING INFORMATION AND TECHNICAL ASSISTANCE.

*2.1 **Strategy:** Provide information and technical assistance to the public through the Division of Policy and Public Affairs.

Strategy Measure: *Number of information and technical assistance requests completed.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	3,082	N/A	5,400

2.2 **Strategy:** To provide technical assistance to colonias through field offices.

(A) Strategy Measure*: Number of on-site technical assistance visits conducted annually from the field offices.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
747	1,038	138.96%	600

****(B) Strategy Measure:*** *Number of colonia residents receiving assistance.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	550	N/A	1,700

****(C) Strategy Measure:*** *Number of entities and/or individuals receiving informational resources.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	2,304	N/A	1,200

GOAL 3: TDHCA WILL IMPROVE LIVING CONDITIONS FOR THE POOR AND HOMELESS AND REDUCE THE COST OF HOME ENERGY FOR VERY LOW INCOME TEXANS.

3.1 **Strategy:** Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.

(A) Strategy Measure*: Number of persons assisted through homeless and poverty related funds.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
440,000	404,801	92.00%	400,000

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). The FY'04 ESGP program, which began in September 2004, has five fewer subrecipients as compared to the '03 program. The absence in 2004 of these five subrecipients, along with the organizations they subcontracted with, accounted for approximately 40,000 fewer persons being served annually.

*(B) **Strategy Measure**: Number of persons assisted that achieve incomes above poverty level.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
1,314	1,929	146.80%	2,000

*(C) **Strategy Measure:** Number of shelters assisted through the Emergency Shelter Grant Program.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
70	72	102.86%	70

3.2 **Strategy:** Administer the state energy assistance programs by providing grants to local organizations for energy related improvements to dwellings occupied by very low income persons and for assistance to very low income households for heating and cooling expenses and energy related emergencies.

*(A) **Strategy Measure:** Number of households assisted through the Comprehensive Energy Assistance Program.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
69,736	84,018	120.48%	63,200

*(B) **Strategy Measure:** Number of dwelling units weatherized through the Weatherization Assistance Program.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
3,734	5,416	145.05%	4,800

GOAL 4: TDHCA WILL ENSURE COMPLIANCE WITH THE TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS' FEDERAL AND STATE PROGRAM MANDATES.

4.1 **Strategy:** The Portfolio Management and Compliance Division will monitor and inspect for Federal and State housing program requirements.

(A) **Strategy Measure: Total number of monitoring reviews conducted.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	4,318	N/A	4,700

*(B) **Strategy Measure:** Total number of units administered.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
188,956	201,114	106.43%	227,195

4.2 **Strategy:** The Portfolio Management and Compliance Division will administer and monitor federal and state subrecipient contracts for programmatic and fiscal requirements.

(A) **Strategy Measure: Total number of monitoring reviews conducted.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	12,113	N/A	10,725

*(B) **Strategy Measure:** Number of contracts administered.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
624	751	120.35%	400

GOAL 5: TO PROTECT THE PUBLIC BY REGULATING THE MANUFACTURED HOUSING INDUSTRY IN ACCORDANCE WITH STATE AND FEDERAL LAWS.

5.1 **Strategy:** Provide titling and licensing services in a timely and efficient manner.
(A) Strategy Measure: *Number of manufactured housing statements of ownership and location issued.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
115,000	93,499	81.30%	89,000

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications resulting from a continued slowdown of activity in the manufactured housing industry.

(B) Strategy Measure: *Number of licenses issued.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
5,700	4,118	72.25%	4,435

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications resulting from a continued slowdown of activity in the industry.

5.2 **Strategy:** Conduct inspections of manufactured homes in a timely manner.
(A) Strategy Measure: *Number of routine installation inspections conducted.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
13,500	5,488	40.65%	8,000

Explanation of Variance: Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25 percent of installation reports received. The actual YTD inspection rate is 37.78 percent. In FY 2005, the overall workload of the inspection staff was increased by additional inspection duties associated with providing assistance to the Department's Portfolio Management and Compliance Division.

****(B) Strategy Measure**: Number of non-routine installation inspections conducted.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
N/A	2,405	N/A	2,500

5.3 **Strategy:** To process consumer complaints, conduct investigations, and take administrative actions to protect the general public and consumers.
Strategy Measure: *Number of complaints resolved.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
1,620	1,502	92.72%	1,700

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped reduce the number of complaints officially received, which reduces the number of complaints resolved.

Goals Six through Eight are established in legislation as riders to TDHCA's appropriations, as found in the General Appropriations Act.

GOAL 6: TDHCA WILL TARGET ITS HOUSING FINANCE PROGRAMS RESOURCES FOR ASSISTANCE TO EXTREMELY LOW INCOME HOUSEHOLDS.

6.1 **Strategy:** The housing finance divisions shall adopt an annual goal to apply $30,000,000 of the division's total housing funds toward housing assistance for individuals and families earning less than 30 percent of median family income.
Strategy Measure: *Amount of housing finance division funds applied towards housing assistance for individuals and families earning less than 30 percent of median family income.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
$30,000,000	$27,075,921	90.25%	$30,000,000

Explanation of Variance: Fewer ELI households were served by single family bond transactions, Section 8 vouchers, and HOME awards in FY 2005 as compared to FY 2004. The primary cause appears to be a decrease in the projected amount of HOME funding that will serve ELI households as the amount awarded for this income group dropped from $36 million in FY 2004 to $12 million in FY 2005. This decrease is related to the release of two program years' worth of HOME funds in FY 2004.

(See Rider 4 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.)

GOAL 7: TDHCA WILL TARGET ITS HOUSING FINANCE RESOURCES FOR ASSISTANCE TO VERY LOW INCOME HOUSEHOLDS.

7.1 **Strategy:** The housing finance divisions shall adopt an annual goal to apply no less than 20 percent of the division's total housing funds toward housing assistance for individuals and families earning between 31 percent and 60 percent of median family income.
Strategy Measure: *Percent of housing finance division funds applied towards housing assistance for individuals and families earning between 31 percent and 60 percent of median family income.*

2005 Measure	2005 Actual	% of Goal	2006 Measure
20%	3,824,899,423	352.44%	20%

(See Rider 4 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.)

GOAL 8: TDHCA WILL PROVIDE CONTRACT FOR DEED CONVERSIONS FOR FAMILIES WHO RESIDE IN A COLONIA AND EARN 60 PERCENT OR LESS OF THE APPLICABLE AREA MEDIAN FAMILY INCOME

8.1 **Strategy:** Help colonia residents become property owners by converting their contracts for deed into traditional mortgages.
Strategy Measure: *Amount of TDHCA funds applied towards contract for deed conversions for colonia families earning less than 60 percent of median family income.*

FY 2004-2005 Measure	FY 2004-2005 Actual	% of Goal	FY 2006-2007 Measure
$4,000,000	$3,889,600	97.24%	$4,000,000

The FY 2004-2005 Actual is comprised of $1,300,000 in FY 2004 and $2,589,600 in FY 2005. Note: An additional $1,033,900 was approved at the September 2005 Board meeting. This funding award was postponed from the August 2005 Board meeting. It would have brought the FY 2004-2005 total to $4,923,500.

(See Rider 11 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.)

The following TDHCA-designated goal addresses the housing needs of persons with special needs.

GOAL 9: TDHCA WILL WORK TO ADDRESS THE HOUSING NEEDS AND INCREASE THE AVAILABILITY OF AFFORDABLE AND ACCESSIBLE HOUSING FOR PERSONS WITH SPECIAL NEEDS THROUGH FUNDING, RESEARCH, AND POLICY DEVELOPMENT EFFORTS.

9.1 Strategy: Dedicate no less than 20 percent of the HOME project allocation for applicants that target persons with special needs.
Strategy Measure: Percent of the HOME project allocation awarded to applicants that target persons with special needs.

2005 Measure	2005 Actual	% of Goal	2006 Measure
≥20%	24.7%	123.6%	≥20%

9.2 Strategy: Dedicate no less than 5 percent of the Multifamily Bond Program units for persons with special needs.
Strategy Measure: Percent of the Multifamily Bond Program units dedicated to persons with special needs.

2005 Measure	2005 Actual	% of Goal	2006 Measure
≥5%	22.53%	450.73%	≥5%

9.3 Strategy: Compile information and accurately assess the housing needs of and the housing resources available to persons with special needs.
Strategy Activities:
A. Assist counties and local governments in assessing local needs for persons with special needs
B. Work with State and local providers to compile a statewide database of available affordable and accessible housing.
C. Set up a referral service to provide this information at no cost to the consumer.
D. Promote awareness of the database to providers and potential clients throughout the State through public hearings, the TDHCA web site as well as other provider web sites, TDHCA newsletter, and local informational workshops.

9.4 Strategy: Increase collaboration between organizations that provide services to special needs populations and organizations that provide housing.
Strategy Activities:
A. Promote the coordination of housing resources available among State and federal agencies and consumer groups that serve the needs of special needs populations.
B. Continue working with agencies, advocates, and other interested parties in the development of programs that will address the needs of persons with special needs.
C. Increase the awareness of potential funding sources for organizations to access, to serve special needs populations, through the use of TDHCA planning documents, web site, and newsletter.

9.5 Strategy: Discourage the segregation of persons with special needs from the general public.

Strategy Activities:

A. Increase the awareness of the availability of conventional housing programs for persons with special needs.

B. Support the development of housing options and programs, which enable persons with special needs to reside in noninstitutional settings.

SECTION 5: PUBLIC PARTICIPATION

TDHCA strives to include the public in policy, program, and resource allocation decisions that concern the Department. This section outlines how the public is involved with the preparation of the plan and a summary of public comment.

PREPARATION OF THE PLAN

Section 2306.0722 of the Texas Government Code mandates that the Department meet with various organizations concerning the prioritization and allocation of the Department's housing resources prior to preparation of the Plan. As this is a working document, there is no time at which the Plan is static. Throughout the year, research was performed to analyze housing needs across the state, focus meetings were held to discuss ways to prioritize funds to meet specific needs, and public comment was received at program-level public hearings as well as at every Governing Board meeting.

The Department met with various organizations concerning the prioritization and allocation of the Department's resources, and all forms of public input were taken into account in its preparation. Several program areas conducted workgroups and public hearings in order to receive input that impacted policy and shaped the direction of TDHCA programs. For example, in July 2005, the Housing Trust Fund and HOME Program, hosted round table discussions for the purpose of gathering input on the programs. Additionally, the Housing Tax Credit Program arranged several QAP Round Tables composed of TDHCA staff, developers, lenders, consultants, legislative staff, and neighborhood advocates with the purpose of recommending changes to the rule that governs the program.

Communication between TDHCA and numerous organizations results in a participatory approach towards defining strategies to meet the diverse affordable housing needs of Texans. TDHCA appreciates the assistance provided by the organizations listed below to assist the Department in working towards reaching its mission, goals, and objectives, which relate directly to the formation of the *State of Texas Low Income Housing Plan and Annual Report*.

- Coalition of Texans with Disabilities
- Fannie Mae
- Freddie Mac
- Community action agencies
- Councils of governments
- Housing finance corporations
- National Council of State Housing Agencies
- National Low Income Housing Coalition
- NeighborWorks America
- Office of Rural Community Affairs
- Texas A&M Real Estate Center
- Texas Affiliation of Affordable Housing Providers
- Texas Association of Community Development Corporations
- Texas Association of Local Housing Finance Agencies
- Texas Association of Regional Councils
- Texas Bond Review Board

- Texas Council for Developmental Disabilities
- Texas Department of State Health Services
- Texas Department of Aging and Disability Services
- Texas Health and Human Services Commission
- Texas Home of Your Own Coalition
- Texas Homeless Network
- Texas Housing Association
- Texas Interagency Council for the Homeless
- Texas Low Income Information Service
- Texas Office of the Credit Commissioner
- Texas Office of the Governor
- Texas Public Housing Authorities
- Texas residents who took the time to testify at public hearings and submit written comment
- Texas State Affordable Housing Corporation
- Texas State Data Center
- Texas Workforce Commission, Civil Rights Division
- United Cerebral Palsy of Texas
- US Department of Agriculture
- US Department of Energy
- US Department of Housing and Urban Development

PUBLIC HEARINGS

From July to August 2005, TDHCA worked on the draft version of the *2006 State of Texas Low Income Housing Plan and Annual Report.* Once completed, the draft was submitted to the TDHCA Board of Directors at the September 16, 2005, board meeting for approval, and then released for public comment in accordance with §2306.0732 and §2306.0661. The hearing notice was published in the September 2 and September 9, 2005, editions of the *Texas Register*.

The formal citizen participation process for the *2006 State of Texas Low Income Housing Plan and Annual Report* began on September 19, 2005, and ended October 18, 2005. Constituents were encouraged to give input regarding the Plan and all Department programs in writing or at one of the 13 public hearings to be held across the state, one in each of the 13 Uniform State Service Regions. Approximately 97 individuals attended the public hearings held in the following cities: Lubbock, Abilene, Arlington, Mt. Pleasant, Crockett, Houston, Austin, Temple, San Antonio, Corpus Christi, McAllen, Midland, and El Paso. An additional hearing to gather public comment was held on November 10, 2005, at the TDHCA Board meeting in Austin.

Each public hearing addressed the Plan, in addition to the following programs and rules: the Housing Tax Credit (HTC) *Qualified Allocation Plan and Rules*; *Housing Trust Fund (HTF) Program Rules; HOME Investment Partnerships Program Rules;* HOME, HTC, and HTF Regional Allocation Formula; HOME, HTC, and HTF Affordable Housing Needs Score; Community Service Block Grant Allocation Formula; *2006 State of Texas Consolidated Plan One Year Action Plan;* Texas State Affordable Housing Corporation *Annual Action Plan;* and *Colonia Action Plan for 2006–2007.*

Public comment received pertaining to the *2006 State of Texas Low Income Housing Plan and Annual Report*, Regional Allocation Formula, and Affordable Housing Needs Score are included in this section of the Plan. Comment on the Colonia Action Plan is included in Section 6: Colonia Action Plan. Public comment received relating to specific programmatic documents, such as the Housing Tax Credit *Qualified Allocation Plan and Rules,* are addressed directly by the program area and not contained in this document. Please contact the program areas directly, or the Division of Policy and Public Affairs at (512) 475-3976 for information on program-specific public comment.

PUBLIC COMMENT

COMMENT REGARDING THE 2006 PLAN

Comment: Use of HOME Funding for Persons in Participating Jurisdictions

A few comments were made as to the need to use HOME funding in Participating Jurisdictions for tenant-based rental assistance for persons with disabilities. The following comment is typical of this suggestion.

"We…provide relocation assistance for persons with disabilities in nursing facilities, coming out into the community…One of the major barriers is the availability of affordable and accessible housing. What has been extremely helpful in helping these people locate and find decent, adequate, affordable, accessible housing is the use of TBRA vouchers. TDHCA did allocate close to $4 million, I believe, 2003 allocation that was specific to this purpose. It was not utilized as quickly as hoped. A lot of that had to do with the population and the folks that are providing the services not having housing experience…With this program, (there was no) restriction on utilizing the TBRA vouchers or HOME funds within a participating jurisdiction. That was absolutely essential. Most of the folks that we are relocating are in urban areas. They continue to want to live in urban areas. I think you're also aware that that's where most of the Katrina evacuees are as well. What that does is puts extreme burden onto the housing stock in urban areas…

These contracts relocating people are not going away. The Texas legislature has authorized over the next four years to continue this activity. Right now in our area, we have 41 people in various stages. They're actually pending relocation in the Coastal Bend area. At least 50 percent of them are waiting on housing that they can be able to access. We're fortunate that we do have some TBRA vouchers right now. We have 22, I believe, left in this area. Those will be running out. At that point, we don't know what we're going to have for housing….(It is requested that the limitation of providing) HOME funds only in rural areas outside the participating jurisdiction be lifted."

- Department Response
  TDHCA is responsible for distributing HOME funding for the balance of state that does not receive this type of funding directly from HUD as a Participating Jurisdiction. In prior years, due to concerns about the lack of organizational capacity to serve persons with disabilities in rural areas, TDHCA allowed 5 percent of its HOME allocation to be awarded to applicants in PJs. Based on the increased capacity of organizations in non-PJ areas as evidenced by an over subscription rate in the 2004 and 2005 application cycles for non rental development activities there appears to be a substantial need for this kind of activity in rural areas. Given the limited amount of available funding, TDHCA will no longer fund non-rental development activity applications in PJ areas. No changes to the SLIHP are suggested.

Comment: Disaster Relief Policy Development

A few comments were provided on issues to consider in developing disaster relief programs. These included both using rental assistance for short-term help and rental development funding to increase the available housing supply.

"…I would strongly encourage…lifting that requirement of home funds not being used in the participating jurisdictions. You've got to lift that, because that's where all the Katrina evacuees are. There's very few in the rural areas. They are inner-city folks who have relocated. They'd like to continue to be close to inner-city folks, and we have a lot of that in this area, and every city does. Unfortunately what's going to end up happening is a higher level of blighted living conditions unless money is infused. You could use TBRA vouchers, the HOME Program TBRA vouchers, on a temporary basis. Many of these folks are going to return home. Many may go someplace else, so the TBRA voucher, I would think, would be a good, short-term utilization for housing.

Secondly, if you've got some other funding source available such as through the Housing Trust Fund, perhaps that could go into your bricks and sticks, your actual building of additional housing stock, because we are going to see in Corpus Christi -- I guarantee you we're going to run up against, There ain't no more housing, or there is no more housing in Corpus Christi that not only the Katrina evacuees but our local folks who have been on waiting lists for so, so long with the public housing, with Section 8 housing."

"The City of Corpus Christi is an entitlement -- has entitlement HOME allocation, CDBG and ESG. Many times those dollars had to be spread out amongst -- what? -- 30, 40 agencies. They may have good programs, but there's not enough money…I believe that the State of Texas should (consider sharing resources for entitlement areas for) disaster-related activit(ies). We're talking about a housing stock that needs to be brought up to standards. We're talking about a nonexistent housing stock for emergency shelter type of activity for those evacuees. Lets us(e) some of these dollars to build …apartments… We're talking about an 18-month period here, so if the State could redirect some of those dollars to this effort that we're having locally here… We could probably do a lot of good stuff, good things. So I'm suggesting,…like a million dollars, you know, for example. Right. Sure. It's a lot of money. But still there's a need out there. We talk about 130 families still without shelter, without homes, and we don't want to (re)place it with the homeless situation."

- Department Response
  TDHCA has reserved $1.8 million of the Housing Trust Fund for this purpose and is considering the use of other resources to address disaster relief needs in the future. No changes to the SLIHP are suggested.

Comment: Transportation Issues

A few comments were provided on the need to provide incentives to ensure that rental developments are built in areas that have good access to public transportation.

"While you're not directly involved…with the ability to extend the transit system, I think that that is something that is -- that just further defines where people will have to find homes or residences."

"It's true all around Corpus Christi, that transportation is very, very critical for a lot of folks that are transit-dependent; they don't have cars. When you give credit for transportation on your applications, one of the things I've noticed is people have a choice of taking that 5 points there or 5 points over here. Very often when they're looking at people with disabilities, what they think most likely many of them, the developers think, Well, let's see; these people use special transit services, so therefore, having a bus stop may not be that important. I can get another 5 points over here. So the incentive may not truly be incentivizing the developers to put developments near transportation outlets. People with disabilities can use regular transportation if it's accessible. They don't need to have special transit services. The primary reason they have that is because there is no public transportation that is accessible or the sidewalks aren't accessible or whatever, whatever, on and on. But I think as you look at incentives, realize that it may not fully cover what the reality is that's going on."

- Department Response
  Given the competitive nature of the programs it is thought that the selection criteria points provide an incentive for applicants to consider transportation and a variety of other area amenities when choosing sites. No changes to the SLIHP are suggested.

Comment: Public Comment Administration

A couple of general comments were made on the process and scheduling of the public comment period and Departmental responses.

"I think that having a face-to-face contact with the people who not only run the programs but also write them, the procedures and the policies, is great. It's really very good. It's very reassuring. I think that we need to follow on the next phase. How can we get some feedback as to whether some of these comments get anyplace? What's the chances of getting some of these policies and procedures changed, and what do we need to do, particularly for organizations like ours that -- we're an advocate organization, and we are committed to see that these programs reach the populations that we serve. So it's very important for us to know what feedback we can get, and hopefully that these will be not only the first contact, but maybe some community roundtables, some further discussion, so that together we can find some solutions to these very, very severe crises that we're facing and the people we serve face."

"…Many of the programs…directly affect the county. Not necessarily the city of El Paso, because the city of El Paso is an entitlement area, and they receive their funds directly. And maybe for the next time we have these hearings, we should do these hearings out there in the county. Maybe the city of Socorro or other areas that are directly affected by your funding in the programs…I speak for many nonprofits that are out there, and that sometimes transportation is an issue, and I know for many residents that should be benefiting from these programs, transportation is a big issue."

- Department Response
  TDHCA continues to refine the public comment process. As was done last year, the public hearing transcripts were posted to a "TDHCA Consolidated Public Hearings" page on the TDHCA website. Additionally, all written comment was scanned and posted to the site as well. This year, a comment tracking table was added so commenters could more easily verify that their comments had been received. The table contained the source of each comment, the comment topic, and the number of the document on the website that contained the comment. For all of the items taken for public comment, TDHCA provides reasoned responses to each comment.

  In 2006, TDHCA will research the possible use of telephone and video conference technology to help provide effective and ongoing interaction across the state. This will be of increasing importance given the increasing costs of transportation. No changes to the SLIHP are suggested.

Comment: Fair Housing

A comment was made as to the need to increase affirmatively furthering fair housing efforts.

"We're a civil rights, nonprofit organization that's funded by HUD to affirmatively further fair housing. We work along the U.S.-Mexico border; we cover the four border states. In El Paso we have our main office, and we'll be opening an office in McAllen next year, and one in New Mexico the end of this year. Our main focus is to -- and mission is to promote fair housing, to enforce our fair housing laws. And the border faces a lot of discrimination. Believe it or not, the last 14 months we've investigated close to 38 fair housing complaints. Just yesterday we got a charge on an individual that was discriminating using CDBG funds. He used close to $430,000 to rehab a property, and he was discriminating against families with children. That's happening every day along the U.S.-Mexico border. Under federal law, every agency that receives federal funds, like the HOME Program and CDBG they're required to affirmatively further fair housing. And to comply with this requirement, an agency may go from doing a poster contest to actual funding programs of enforcement or education and outreach. Before coming here, I contacted the TDHCA and ORCA to see exactly what they're doing to -- for the fair housing. And they've been participating in community affairs, they've been distributing information, which is good. But it's more than that, it's more than educating the public. People know their rights, but what's going to happen next, who's going to enforce the law? We're the only enforcement agency, between Arizona and Brownsville, within 150 miles from the border. So our resources are limited. In the State of Texas, ORCA and TDHCA need to allocate funding to enforce these laws. It's very unfortunate that people that are receiving federal funds to open up opportunities for affordable housing are doing the opposite."

- Department Response
  TDHCA will be working to update its affirmative housing plan in 2006. This process will involve a committee of interested parties to help provide guidance. At the time this process begins, an invitation to participate on this committee will be offered to a wide variety of organizations such as the commentator. No changes to the SLIHP are suggested.

Comment: Policies to Assist Persons with Disabilities

One commenter provided a number of suggestions on policies to improve the provision of assistance to persons with disabilities.

"…The lack of accessible affordable housing for people with disabilities has always been a major barrier to independence…We have four major recommendations (to assist with this issue).

First of them is for creation of a program to provide housing and utility deposit assistance for people with disabilities on a cross-disability basis. Currently, that is available only through HOPWA.…All persons with disabilities can benefit from programs that will permit them to obtain or retain permanent housing. Having programs in place with deposits will give more people the opportunity to live independently in the community.

We would direct all TDHCA funds to banks and other financial institutions that have proven active in community reinvestment and development efforts, not just based on size. TDHCA can take a more proactive role in community development and rehabilitation if they reward both big and small banks that work to support their communities rather than just to enrich themselves.

We support the development of pilots throughout the state for land reassembly and redevelopment, similar to Houston, and an urban homesteading pilot program…Programs that permit tax delinquent properties and land to be occupied serve the public interest more effectively than leaving the properties as uncared for vacant eyesores. Using land banking and allowing people to obtain permanent housing through homesteading will create more stable, vibrant neighborhoods to benefit all Texans.

We ask for use of community block development grants and other HUD monies to assure wheelchair accessibility to emergency shelters and facilities. There are no shelters in this area that identify themselves as wheelchair accessible. While many organizations would like to have access, they have limited funds for anything not related to daily operation. After Hurricane Katrina and then, with Hurricane Rita, people with disabilities were shoveled into nursing homes and assisted living facilities. If the temporary shelters were available, it would be easier for evacuees to move into the community. Now that these individuals are in institutions, they will have to prove that they do not belong in such restrictive environments."

- Department Response
  Currently, TDHCA does not have funding available for pilot programs for special purposes like land banking, community development activities, and renter assistance deposits. Funding from the Emergency Shelter Grants Program could be used to help address facility accessibility issues. No changes to the SLIHP are suggested.

Comment: §53.55. HOME Program TBRA

A request was made asking that the rules governing Tenant Based Rental Assistance (TBRA) be changed to provide for "transfer of vouchers" in times of crisis like the recent hurricanes.

- Department Response
  HOME TBRA assistance is portable; the assistance moves with the household. If the household no longer wishes to rent a particular unit, the household may take its assistance and move to another approved rental unit within the Administrator's service area. In times of natural disasters, the Department may have the ability to consider policy changes to utilize funds in impacted areas. The Department is in the process of seeking waivers from the US Department of Housing and Urban Development and is exploring all funding options to better assist displaced households. No change is recommended.

Comment: HOME Program HOYO Funding

A comment was made on the Home of Your Own Program

"I am here in support of the continuation of the Department's commitment to Texas Home of Your Own Program (HOYO). The HOYO program continues to expand opportunities for home ownership among a greatly underserved population. Low income persons with disabilities, TDHCA has been a partner since 1996. It has been a great partnership. We have served over 250 homeowners. We want and need this partnership to continue, because it really does benefit all of us, and we appreciate that it continues to be in the plan."

"We also want to express our support for the Housing Trust Fund capacity building program as well as the predevelopment program. These programs have supported UCP Texas in our recent efforts to provide affordable, accessible and integrated rental housing."
"Opportunities for people with disabilities, our first project which is a partnership with Tekoa Partners…This project could not have happened without you all's support and the ability to help us learn how to do HUD 8-11 project…"

"We want to express our appreciation for your demonstrated commitment to providing housing for people with disabilities, and in an integrated setting. And that is what we are talking about when you are talking about rental. And we want to thank the Department staff that continue to work to see that people with disabilities have equal access to housing opportunities. And we look forward to a continued partnership…"

- Department Response

  The Department appreciates the comment, and has continued funding for HOYO for 2006. No changes recommended.

COMMENTS REGARDING THE AFFORDABLE HOUSING NEEDS SCORE

Comment: Consideration of the Need Characteristics of Specific Regions and Census Tracts

"Looking at the Affordable Needs Score, it, as traditionally, is very low for Region 12, and my question is that, for instance, Big Spring, Howard County, is number one and number two in the state for lead-based paint. When you look at the Affordable Needs Score, is some of that type of data put in there, because if it is, then it looks like it should be higher, just the fact that you have number one and number two in Region 12. And I think that when you look at -- you know, if you do it on population, we're going to be way down there, but if you look at actual needs, there are –

…(A)nother problem with the Affordable Needs Score and where it gets skewed sometimes is there are pockets of poverty that are surrounded with clusters of wealth, and you can't reach those pockets of poverty, because when you look at it by census tract, it skews the census tract methodology. And so somehow there has to be a method created or looked at where we can reach those pockets of poverty. I can take you within just a few blocks of my office, and I can show you a home that still has outdoor facilities. I can show you a house that's been lived in for a number of years that's never had electricity, still uses coal oil lamps, and yet we can't reach those because of the way the Affordable Needs Score is skewed…"

- Department Response

  The AHNS serves as a measure of the general level of affordable housing need in an area. As such, it does not provide a scoring preference based on location specific housing problems. The number of substandard dwellings in the community provides some measure of housing quality standards which would include such issues as lead based paint.

  While addressing lead based paint issues are certainly important, it would probably be more appropriate to add a scoring preference in the application selection criteria. That way preference could be given to applications that work to eliminate specific types of housing need that align with overarching Departmental goals.

With regard to the suggestion that specific Census tracts need to be served due to their need characteristics, the AHNS does not use tract level data to avoid unit concentration of affordable housing within specific small geographic areas and associated fair housing issues. Rather, it evaluates the housing need of the entire community and compares that level of need to other places in the region.

With regard to the specific example of Big Spring as raised by the commenter, the AHNS actually seems to be functioning rather well. Of the rural communities Big Spring would compete against for HTCs in Region 12, only one other place has a higher score. This place, Christoval, has never received an award of HTCs. Christoval's population is only 422. Under the 2006 AHNS methodology, it is likely that Christoval's future score would decrease if it actually received a credit award. That is because the methodology now considers previous TDHCA funding activity in generating a place's AHNS. For HOME, Big Spring has the highest score possible in all activities except for owner occupied rehab. The owner occupied rehab score is only one point below the maximum score.

Comment: Using the AHNS to Discourage the Over concentration of Affordable Housing in Primarily High Minority, Low Income Areas

"... (O)ne of the things we really need to focus on is for the state to gather information, ... which show that -- and I just ran it in Dallas, Fort Worth, Austin, and Houston -- that approximately 75 percent of the tax credit units that have been funded since 2000 in the state of Texas have gone to primarily low-income, primarily minority-concentrated areas. And as we all know, we're under a federal mandate, because of the Fair Housing Act of 1968, to disseminate particularly federally funded housing out into non-impacted areas. The whole concept is -- to summarize it really is not to continue to create ghettos like we did with the old HUD programs.

...(T)he City of Dallas has been under, for a long time, a federal mandate...that says we have to get housing out of the impacted areas. My fear is, if you look at what we've done since 2000, what we're continuing to do is concentrate low-income people in particular areas of the cities...

...In terms of the Affordable Housing Needs Score, ...we might want to... hav(e) some scoring, which I guess really isn't state-mandated, but -- or legislatively mandated, but have some scoring that really focuses on doing deals outside of impacted areas. If to the extent that you're doing a deal that's in a high income suburb that doesn't have a lot of minority population, maybe you score some additional points for doing that. It might also help offset some of the issues ... that have to do with "not in my backyard," because right now there's an awful lot of points in the QAP that you get for getting things like state senator, state rep report, which you can't really get without getting city council support, which you can't really get without getting home owner support...

And also there's points for things like neighborhood associations, and to the extent you try and -- because I've tried the last two years -- to do deals outside of minority areas, out in the suburbs, in one instance I had to actually sue a city who tried everything possible to stop us, because they just didn't want affordable housing in that area. And in another case I had a county commissioners' court decide to vote unanimously not to approve our bonds when the only objection was that the home owners didn't want it there, in their nice, high income neighborhood. So if we're going to make any progress on attempting to address the needs for affordable housing outside of impacted areas, we're going to have to come up with some way of counterbalancing the "not in my backyard" points that are in the QAP."

- Department Response
  The over concentration of affordable housing in primarily high minority, low income areas is an issue that was given a great deal of consideration when developing the Qualified Allocation Plan, of which the AHNS is a scoring component.

  As was previously discussed, the AHNS serves as a measure of the general level of affordable housing need in an area. This helps to distribute funds to places within the region based on the level of need present within the entire community. As such it does not give scoring preferences to specific areas within a particular place. For example, if a preference was included in the AHNS for a "high income suburb that doesn't have a lot of minority population," there would be nothing to preclude the site from being located within a high minority tract within that place.

  As previously discussed, the AHNS also does not use tract level data to avoid unit concentration of affordable housing within specific small geographic areas and associated fair housing issues. Within each community, there is a wide ranging set of community housing and development goals and market conditions. The AHNS should not complicate how these neighborhood level issues are addressed by trying to combine scoring factors in an attempt to meet a variety of housing goals through the use of a single score.

As the commenter seems to be pointing out, this issue would be better addressed at the program application selection criteria level. The draft *Qualified Allocation Plan* included a number of items that may help alleviate the concentration issues discussed by the commenter. TDHCA will continue to work to address distribution and concentration issues associated with its funding awards.

Comments Regarding the Regional Allocation Formula

Comment: Weighting Multifamily Bond Financing in RAF's Consideration of Available Funding

"We are in support of the proposed Regional Allocation Formula for 2006 Housing Tax Credits. The methodology you have used in accounting for 4% tax credits and bonds is an improvement over last year, and we feel is much more in line with the intent of the original legislation which created the Regional Allocation Formula (SB 1112 by Shapleigh, 76th Legislative Session). The new methodology better acknowledges that the largest metropolitan areas of the state, which are also the ones with the highest median family incomes (Dallas-Ft. Worth, Houston, Austin and San Antonio), are the only areas of the state that have access to 4% tax credits and bond deals, and allows the poorest regions of the state (such as El Paso and the other border areas) to access its fair share of the programs designed to help the poorest families in the state."

- Department Response
  This comment supports the 2006 proposed change in the way the RAF considers multifamily bond funding. As no additional comment was received on this issue, no changes to the RAF methodology are recommended.

Comment: RAF's Consideration of the Use of HTC Funding for Disaster Relief

"…(G)iven the recent hurricanes in I guess what would be Region 5, in Beaumont, Port Arthur area, it might make sense for us to consider at least the flexibility in the various programs to reallocate some resources to the extent that the federal government doesn't step to the plate and do it, to reallocate some of the housing resources to that particular region. And what I proposed … was something like 5 percent or 7 percent or whatever of, for instance, the tax credits. Give the Board the discretion between now and the time that we ultimately have to take applications to re-allocate the credits over to Region 5, and you just take 7 percent from all the other regions, and just allocate it over there. If you look at the impact on each particular region, it's really pretty minor, but it would make a huge impact in terms of addressing the needs of the hurricane victims in that particular region.

…(I)f we wait for the federal government it's going to be too late…, if we've already finalized all of our plans for next year, for the state to address that issue. And we can do it without federal dollars if we just do kind of a re-allocation within the state, or at least have the flexibility to do that, if the federal government doesn't do it."

- Department Response

  Section 2306.111(d) of the Government Code requires objective measures of affordable housing need to be part of the RAF. Currently, quantitative data is not available on the type and level of need in each region that has changed since the 2000 Census because of the recent disasters. Even if such data was available, it could then be argued by other regions that their need should be updated to reflect increased need related to the hurricanes (or other disasters) or ongoing immigration since the Census was conducted. While the decennial occurrence of the Census obviously limits the RAF's ability to respond to ongoing change, it provides a detailed statewide assessment of each region's general level of need.

  This comment, however, does raise the idea that providing a means of updating the 2000 Census need data could be a valuable addition to the RAF methodology. However, given the significance of this change, it is thought that the related changes to the RAF would require going out for additional public comment. Given current data limitations and program application cycle timing requirements, TDHCA will study this issue over the next year and provide options on how this might be accomplished for the proposed 2007 RAF.

  No changes to the RAF methodology are recommended for the 2006 RAF.

Comment: Updating Place Geography Type Designations to Reflect Population and Boundary Changes Since the 2000 Census

"…(A)fter reviewing the Dallas 2004 MAPSCO Directory, pages 10A and 10B, you will note that Wylie touches Garland strip annexation twice. The strip divides Wylie and Rowlett and then goes up along Lake Ray Hubber and then touches Wylie again. Garland is over 215,000 plus in population. So this would qualify Wylie as urban/exurban based on Wylie touching Garland."

- Department Response

  The mapping software TDHCA uses to categorize places based on their boundary proximity uses 2000 Census data and boundaries. Since places may have annexed more territory since 2000, the RAF methodology will be clarified to note that place designations may be updated from

“Rural” to “Urban/Exurban” if the applicant can provide a letter from the jurisdiction indicating that their place’s city limits touch the city limits of another place that has a population greater than 20,000. It should be noted that because state law ties the word "population" to the decennial census, proximity to another urban area is the only thing that can change a place’s rural designation until the next census is conducted.

The inclusion of the following notes in the RAF methodology is suggested:

“Applicants may petition TDHCA to update the “Rural” designation of a place within a metropolitan statistical area by providing a letter from a local official. Such letter must clearly indicate that the place has an incorporated area boundary that touches the boundary of another place with a population of over 20,000. To treat all applicants equitably, such letter must be provided to TDHCA prior to the commencement of the:

- pre-application submission period for HTC applications, or
- application submission period for HOME applications.”

“The definition of “population” in state law (Sec. 311.005(3), Government Code) is “the population shown by the most recent federal decennial census.” Because of this requirement, the decennial census place population must be used to make the area type determination.”

SECTION 6: COLONIA ACTION PLAN

OVERVIEW

The Texas Department of Housing and Community Affairs Colonia Action Plan for 2006–2007 discusses housing and community development needs in the colonias, describes the Department's policy goals, summarizes the strategies and programs designed to meet these goals, and describes some of the projected outcomes to support the improvement of living conditions of colonia and border residents along the Texas-Mexico border region. This plan focuses on colonias as defined by state statute.

The overall goal of the Department with respect to colonias is to improve the living conditions and lives of border residents along the Texas-Mexico border region. As a result, TDHCA provides planning, housing, and housing-related assistance.

Performance measures for colonia activities, as reported to the Legislative Budget Board, focus on outreach and technical assistance efforts of the Department—specifically the number of on-site technical assistance visits conducted annually from the Border Field Offices. The targeted performance number for the 2006–2007 biennium is 747 technical assistance visits a year.

It should be noted that there is no single or dedicated source of funds for colonia-focused programs and services administered by the Department, except the Colonia Self-Help Centers, which are funded with Community Development Block Grant funds. In the past, funding has been provided from the Housing Trust Fund, the HOME Program, Single Family Bond proceeds, and the Community Development Block Grant (CDBG) Program.

COLONIA NEEDS

In today's world, Texas colonias are considered an observable fact. Their beginnings date back to the 1950s. As a response to the reconstruction era, Texans adopted a state constitution to minimize the powers of government. By making counties subdivisions of the state with no home rule powers, Texans guaranteed that no county could take an action or adopt a rule until it is first voted on by the state. As a result all regulatory powers originate with cities and the state. Areas outside city limits are "regulation free zones" until problems become so serious that the entire state is ready to empower a county to address them.[108]

These regulatory free zones enabled colonia developers to purchase tracts of land with a marginal agricultural value. Some of these tracts were flood prone and drained poorly; some were too hilly to irrigate; some were land with a declining value due to changes in agricultural economics. These developers platted their tracts, bulldozed roads, and sold the undeveloped lots on 10- to 20-year contracts for deed starting anywhere from $8,000 to $20,000 at an interest rate of 10 percent to 17 percent annually.[109] A contract for deed is an instrument used to sell land. Title to the property is not transferred until the balance is paid in full.

WHAT IS A COLONIA?

A "colonia," Spanish for "neighborhood" or "community," is a geographic area located within 150 miles of the Texas-Mexico border that has a majority population comprised of individuals and families of low and very low income who lack safe, sanitary, and sound housing. This includes a lack of basic services such as potable water, adequate sewage systems, drainage, streets, utilities, paved roads, and plumbing. With living conditions often compared to Third World countries, the colonias present one of the most critical housing needs in the state. Housing in the colonias is primarily constructed with scarce materials, and professional builders are rarely used. Residents frequently start with makeshift structures of wood, cardboard, or other materials, and as finances allow, continue to improve their homes.

Colonia residents tend to be young, predominately Hispanic, low to very low income, and employed in low-paying employment sectors. According to the most recent data available, 36.6 percent of colonia residents are children (compared to 29 percent statewide). Nearly all are Hispanic and 27.4 percent speak Spanish as their primary language. However, contrary to common perception, according to the Texas Attorney General, between 65 to 80 percent of adult colonia residents are US citizens, with an even higher citizenship rate for children.

The workforce tends to be young and unskilled; consequently, wages are low. Primary occupations are seasonal in nature; agriculture service providers and construction-related jobs account for more than 50 percent of the workforce.[110] A study by the Texas A&M University Center for Housing and Urban Development indicated that unemployment levels in five Rio Grande Valley colonias ranged from 20 percent to as high as 70 percent, compared with the overall state unemployment rate of only 7 percent.

According to a survey by the Texas Department of Health of residents in 96 colonias in 6 border counties, almost half of the colonia households make less than $834 a month. Nearly 70 percent of the residents never graduated from high school.[111]

As indicated in a Status Report by the Center for Housing and Urban Development at Texas A&M University, there are approximately 1,450 colonias in the Texas, which are home to over 350,000 Texans. Future projections indicate the population may reach as high as 700,000 residents by the year 2010.[112]

LIVING CONDITIONS

As previously noted, the lack of even the most basic infrastructure including potable water and adequate sewage systems has contributed to the proliferation of disease. Compounded with a lack of adequate medical insurance and a shortage of healthcare facilities, reported cases of viral disease in the colonias far exceed statewide levels.

[110] G. Rogers, J. Glaser, P. Johnston, T. Black, A. Kamath, and R. Gonzalez, *Cinco Colonia Areas: Baseline Conditions in the Lower Rio Grande Valley* (College Station, TX: Center for Housing and Urban Development, College of Architecture, Texas A&M University, 1993).

[112] LBJ School of Public Affairs, University of Texas at Austin, January 1996; and Texas Department of Housing and Community Affairs.

According to a study by the University of Texas System Texas-Mexico Border Health Coordination Office, diseases such as Hepatitis A, Salmonellosis, Shigellosis, and Tuberculosis occurred at a much higher rate in the colonias than the rest of the state.[113] The rate of reported Hepatitis A, for example, was more than double the statewide rate. Other health problems included high rates of gastroenteritis and other water-quality-related problems.[114] Medical services are rarely available and this compounds health problems in the colonias. Due to these stumbling blocks, children in the colonias experience slower growth and lower educational development rates.

The scarcity of potable water is another daily hardship for colonia residents. According to data from the Texas Department of Human Services, the use of untreated water for drinking, washing, bathing, and cooking ranged from 4 percent to 13 percent in colonia households.[115] Many residents rely on large plastic drums for the storage of water. More often, water is transferred to the house by bucket or plastic containers. Reports of water used for bathing, washing, and even cooking drawn from ditches where sewage and agricultural chemicals gather are not uncommon.

In addition to a lack of adequate wastewater infrastructure, most roadways located in colonias are unpaved or continue to be of very poor quality. A survey of residents of the El Cenizo colonia conducted by TDHCA indicated that 50 percent of the roads within the colonia were classified as “deteriorated” or “poor.”[116] Water from heavy rains tends to collect, and when combined with inadequate waste removal systems, forms into pools of raw sewage, which again causes health problems for colonia residents.

Plumbing facilities are also a problem in the colonias. Approximately 50 percent of houses in rural colonias and 20 percent in urban colonias have incomplete plumbing facilities. Additionally, 40 percent in rural colonias and 15 percent in urban colonias lack a complete kitchen. For more information on the housing needs of border counties, see the Housing Analysis and Action Plan section of this report, Regions 11 and 13.

While each colonia is different and may have needs unique to that area, most share the same general characteristics. Unfortunately, these and other concerns are all part of the day-to-day life for most colonia residents 365 days a year. A bad situation is made even worse due to a profound lack of the most basic of necessities: safe, sanitary, and decent housing.

HOUSING AND HOUSING-RELATED NEEDS[117]

An increasing amount of attention has been placed on colonias over the past several years. This attention has been focused on eliminating their presence rather than addressing the reason for their existence. One key to improving the conditions of colonias is the availability of affordable housing programs. While it

[117] A portion of the information in this Action Plan is derived from the six Colonia Self-Help Centers’ Needs Assessments.

is important to eradicate the conditions that exist in colonias; it is equally important to address the circumstances that enable such an environment to develop.

While colonia residents have been resourceful and creative in providing for themselves, they continue to have several needs, including the following:

- Increased affordable housing opportunities such as down payment assistance, low interest loans, and flexible underwriting guidelines
- Conversion of contracts for deed to conventional mortgages, with transfer of title and homeowner education
- Construction and rehabilitation education and assistance
- Access to information regarding available resources
- Access to adequate infrastructure

Typically colonia residents do not have access to traditional financing or professional assistance when they purchase a home. They have limited credit or even nonexistent credit histories, and, for some, it is difficult to save for the down payment and closing costs required to qualify for a conventional mortgage. Credit and debt counseling, including money management and financial literacy training, is lacking in colonia areas. There is also a need for flexible housing assistance such as low-interest-rate loans with underwriting guidelines appropriate for nontraditional borrowers.

The contract for deed has been the most common method of financing the purchase of colonia properties, due to the lack of underwriting guidelines by developers. Often, developers charge outrageous interest rates—as high as 14 to 18 percent—including higher late fees. Traditionally, developers would not record the contract for deed, making it easy to reclaim the property without legal process, while retaining any physical improvements made on the property.

Home construction, improvement, and maintenance require access to resources and skills. Many colonia residents do not have the resources to contract for home improvement, and choose to undertake the work on their own. Within the colonias, there is a need for education on several topics related to construction and rehabilitation such as surveying, platting, and general construction skills. There is also a scarcity of construction tools available for use by colonia residents.

Occasionally there is funding available to communities and organizations in the colonias to support local programs. Training is needed on how to locate funding and, once the funding is identified, how to write a successful grant proposal. However, the most important aspect in seeking funding is the ability of the communities or organizations to manage the funding within rules and guidelines. Many communities and organizations struggle to deliver services to its colonia residents due to capacity and financial issues.

Interagency coordination and financial backing at the state and federal level needs to continue to address colonia issues. While many housing professionals recognize that the level of coordination and dialogue has increased in recent years, and that many communities in the border region acknowledge an increase in funding for infrastructure development, much work remains. In the context of affordable housing (construction and financing mechanisms) and infrastructure development (potable water, wastewater treatment, paved streets, etc.). TDHCA is committed to interagency cooperation.

POLICY GOALS

In 1996, in an effort to place more emphasis on addressing the needs of colonias, the Office of Colonia Initiatives (OCI) was established to administer and coordinate efforts to enhance living conditions in colonias along the Texas-Mexico border region. OCI's fundamental goal is to improve the living conditions and lives of colonia residents, and to educate the public regarding the services that TDHCA has to offer.

The OCI Division was created to

- expand housing opportunities to colonia and border residents living along the Texas-Mexico border;
- increase knowledge and awareness of programs and services available through the Department;
- implement initiatives that promote improving the quality of life of colonia residents and border communities;
- empower and enhance organizations building capacity to better serve the targeted colonia population;
- provide comprehensive education to colonia and border residents;
- develop cooperative working relationships between other state, federal, and local organizations to leverage resources and exchange information;
- promote comprehensive planning of communities along the Texas-Mexico border to better understand community and resident needs;
- serve as a catalyst for colonia residents by allowing input into major funding decisions that will affect border communities.

The OCI Division assists the Department's program divisions by coordinating activities in the colonias and border communities. Currently, the OCI Division headquarters and Border Field Offices (in Edinburg, Laredo, and El Paso) employ eight employees that provide consumer education, housing and financial assistance, and community services along the Texas-Mexico border region to colonia and border residents and state, federal, and local organizations.

ACTION PLAN

The Colonia Action Plan includes a strategic vision for housing, community development, and community services. This two-year Action Plan outlines how various initiatives will be implemented in 2006–2007.

The initiatives described within the Action Plan have been divided into two categories: (1) Increase Affordable Housing Opportunities and (2) Housing Construction and Rehabilitation, Access to Infrastructure, and Information Regarding Resources. Each category contains the following information:

- Legislative mandate: directive by the legislature
- Purpose: intent of the program
- Funding: financial support
- Activities to date: actions and successes
- Strategic approach: plan to further ongoing activities
- Provide capacity building training and technical assistance to organizations in areas not currently served by the programs noted below

Figure 6.1: FY 2006 and 2007 Office of Colonia Initiatives Funding

	Estimated Available Funding for FY 2006	Estimated Available Funding for FY 2007
Texas Bootstrap Loan Program	$3,000,000	$3,000,000
Colonia Self-Help Centers	$2,100,000	$2,100,000
HOME Set Aside for Contract for Deed Conversions	$2,000,000	$2,000,000
Colonia Model Subdivision Program[1]	$1,000,000	$1,000,000
Total Funds	$8,100,000	$8,100,000

[1]$1,000,000 will be set-aside from the HOME Investment Partnership Program for the Colonia Model Subdivision Program from the annual HOME CHDO Set-aside. If sufficient applications are not received for this activity, the remaining funds will be used for other CHDO-eligible activities within the HOME Program.

INCREASE AFFORDABLE HOUSING OPPORTUNITIES

The following Department initiatives focus on increasing affordable housing opportunities in the colonias.

Texas Bootstrap Loan Program

The Texas Bootstrap Loan (Bootstrap) Program is required under Subchapter FF, Chapter 2306, Texas Government Code, to make available $3 million for mortgage loans to very low income families (at or below 60 percent of the area median family income), not to exceed $30,000 per unit. This program is a self-help construction program, which is designed to provide very low income families an opportunity to help themselves through the form of sweat equity. All participants under this program are required to provide at least 60 percent of the labor necessary to construct or rehabilitate the home, and all applicable building codes will be adhered to under this program. In addition, nonprofit organizations can combine these funds with other sources, such as those from private lending institutions, local governments, or any other sources; however, all combined loans cannot exceed $60,000 per unit.

The Department is required to set aside at least two-thirds, or $2,000,000, of the available funds for owner-builders whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code. The majority of the counties are located along the Texas-Mexico border region. The remainder of the funding, one-third, or $1,000,000, will be available to Department-certified nonprofit owner-builder programs statewide.

For the 2005 fiscal year, the Bootstrap Program set-aside $3 million from the Housing Trust Fund and Residual Bond funds. The total dollars awarded through the program was $3,432,000. There were 18 total applications; 10 applications were recommended and approved for funding by the Department's Board, and are estimated to benefit 120 families.

The most important component of the program is the increase of homeownership for very low income Texans by providing loan funds to purchase or refinance real property on which to build new residential housing or improve existing residential housing. The Department has successfully replicated this initiative on a statewide basis. This initiative can remedy some of the living standards and provide the "American Dream" to many low income families. The objective is to continue expanding affordable housing through self-help construction. OCI will market the program to certified nonprofit organizations and Colonia Self-Help Centers. The measurable output will be the number of certified nonprofit organizations applying for this program. This will enhance the development of affordable housing through self-help construction statewide. The Department will release a two year Notice of Funds Available in order to assist organizations with the flexibility in structuring their awards that will maximize the use of Department funds.

Contract for Deed Conversion Initiative

The 79th Legislature passed an Appropriations Rider, a legislative directive requiring the Department to spend no less than $4 million on contract for deed conversions for families that reside in a colonia and earn 60 percent or less of the applicable area median family income (AMFI), and convert no less than 400 contracts for deeds into traditional notes and deeds of trust by August 31, 2007.

The intent of the program is to help colonia residents become property owners by converting their contracts for deeds into traditional mortgages. Participants in this program must not earn more than 60 percent of AMFI and the property must be their primary residence. The properties proposed for this initiative must be located in a colonia as identified by the Texas Water Development Board colonia list or meet the Department's definition of a colonia.

After residents convert their contracts for deeds to traditional loans, the program provides colonia residents with the opportunity to seek funding for construction, rehabilitation, and other benefits that come with owning property.

For 2006 and 2007, TDHCA will set aside $4 million through the HOME Investment Partnerships Program. As stipulated in the legislation, the Department must do no less than 400 contract for deed conversions and spend no less then $4 million for the biennium. In reality, each conversion costs approximately $20,000, with an additional $35,000 in owner-occupied housing rehabilitation to meet, at a minimum, colonia housing standards, but preferably housing quality standards. This only allows for 75 conversions with the allotted $4 million, not allowing the Department to meet its goal of 400. While the Department may not meet the goal of 400 conversion with the $4 million the Department is not only assisting the colonia resident with the contract for deed conversion it is also providing funds to rehabilitate of their homes to meet housing standards.

For fiscal years 2006 and 2007, the Department will use funding through the HOME Program to implement this initiative

HOUSING CONSTRUCTION AND REHABILITATION, ACCESS TO ADEQUATE INFRASTRUCTURE, AND INFORMATION REGARDING RESOURCES

The following Department initiatives focus on constructing and rehabilitating housing and infrastructure in the colonias, and providing information to colonia organizations and residents.

Colonia Self-Help Centers Program

Chapter 2306, Subchapter Z, of the Texas Government Code established the Colonia Self-Help Centers (SHCs) in Cameron/Willacy, El Paso, Hidalgo, Starr, and Webb counties. The legislative directive also allows the TDHCA to establish a Colonia SHC in any other county if the county is designated as an economically distressed area. The Department opened two additional Colonia SHCs in Maverick and Val Verde County.

Five colonias in each county are identified to receive concentrated attention from the appropriate Colonia SHC. Operation of Colonia SHCs is carried out through a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the ability to perform the functions of a Colonia SHC. The law also requires the establishment of a Colonia Resident Advisory Committee (C-RAC) to advise the Department on the needs of colonia residents, activities to be provided, and programs to be undertaken in the selected colonias. Each county selects two residents to serve on this committee; one of the two residents must reside in a colonia serviced by the Colonia SHC. In addition, the law requires the Department's Board to appoint members to the C-RAC, made up of a primary and secondary representative from each county. The C-RAC members meet 30 days prior to making an award to a Colonia SHC. The C-RAC has been instrumental in voicing the concerns of the targeted colonia populations, and has helped both the Department and the Colonia SHCs develop useful tools and programs to address the needs of colonia residents.

Colonia SHCs provide concentrated on-site technical assistance to low and very low income individuals and families, including housing and community development activities, infrastructure improvements, and outreach and education. Some of the activities that are offered to the colonia residents are rehabilitation, new construction, surveying and platting, construction skills training, tool library access for self-help construction, housing finance, credit and debt counseling, grant writing, infrastructure constructions and access, contract for deed conversions, and capital access for mortgages, to improve the quality of life for colonia residents in ways that go beyond the provision of basic infrastructure.

The program serves 31 designated colonias in the seven counties with approximately 20,000 colonia residents as beneficiaries of these services. Beneficiaries must be at or below 80 percent of the area median family income. County governments subcontract with Colonia SHCs in their respective county for the provision of housing and infrastructure services, and provide technical assistance to oversee their implementation of contractual responsibilities.

Operation of Colonia SHCs is funded from the Office of Rural Communities Affairs with US Department of Housing and Urban Development's Texas Community Development Block Program (CDBG) 2.5 percent colonia set-aside. CDBG funds can only be provided to eligible units of general local governments; therefore, the Department must enter into a contract with each affected county government. TDHCA provides administrative and general oversight to ensure programmatic and contract compliance to meet legislative intent. The Department maintains a relationship with the unit of general local government and Colonia SHC operator(s) to ensure that the housing and community development activities within each respective contract are achieved. In addition, Colonia SHCs are encouraged to seek funding from other sources to help them achieve their goals and performance measures.

Colonia SHC funds are awarded every two years. In FY 2004, the total dollars allocated through the program was $2,168,400. In FY 2005, the total dollars available to allocate through the program will be $2,057,638. Approximately $4,100,000 will be available in FY 2006 and 2007 for this program.

One goal for the Colonia SHCs over the next biennium is to increase the level of funding available. The Department will strive to expand the number of beneficiaries receiving assistance through the Colonia SHCs. By limiting salary and operating expenses to 15 to 20 percent of the total award, at least 80 to 85 percent of the allocated funds can be utilized to assist additional beneficiaries. Another way to expand the number of beneficiaries is to identify funding from other Department and external (i.e., USDA Rural Development, HUD, the Housing Assistance Council, Fannie Mae, etc.) sources that can be added to the annual allocation for the Colonia SHCs. The Department has been providing technical assistance to the Colonia SHCs to enable them to apply for affordable housing programs such as the HOME Investment Partnerships Program.

Another goal of the Colonia SHCs is to expand the program to other communities along the Texas-Mexico border. The Department will target potential counties such as the Big Bend Region and colonias that can benefit from Colonia SHC activities, and work with units of local government to identify and determine potential sites for other Colonia SHCs.

Colonia Model Subdivision Program

The 77th Legislature adopted Subchapter GG, Chapter 2306 of the Texas Government Code, to create the Colonia Model Subdivision Loan Program. The intent of this program is to provide low-interest or interest-free loans to promote the development of new, high-quality residential subdivisions that provide alternatives to substandard colonias, and housing options affordable to individuals and families of extremely low and very low income that would otherwise move into substandard colonias.

Any housing created under this program must fully comply with all state and local laws, including any process established by state or locality for subdividing real property.

The Department will only make loans through the program to Colonia SHCs that are also community housing development organizations (CHDOs) certified by the Department as well as other interested

CHDOs who have a history of serving the Colonias. The loans made under this initiative may be used only for the payment of

- costs associated with the purchase of real property;
- costs of surveying, platting, and subdividing or re-subdividing real property;
- fees, insurance costs, appraisals, or recording costs associated with the development of the subdivision;
- costs of providing proper infrastructure necessary to support residential uses;
- real estate commissions and marketing fees;
- any other cost that the Department, by rule, determines to be reasonable and prudent to advance the purposes of this subchapter.

The residential lots and housing developed under this program must be sold to an individual borrower, of extremely low income or individuals and families of very low income.

For the 2005-2006 biennium, $2 million from the HOME Program Community Housing Development Organization (CHDO) set-aside will be used to implement this initiative.

Border Field Offices

The Department operates three Border Field Offices (BFOs) located in El Paso, Laredo, and Edinburg. These offices are partially funded through various sources including general revenue funds, the HOME Program, bond proceeds, and the Community Development Block Grant Program.

Currently, BFOs provide technical assistance to units of local government, nonprofits and for-profits, colonia residents, and the general public on TDHCA's programs and services through on-site visits and other outreach activities. In addition, BFOs conduct onsite loan packaging and processing, homebuyer counseling, inspections, and administration of the various contracts regarding the Department's border and colonia initiatives such as the Colonia SHCs, Contract for Deed Conversion Initiative and Texas Bootstrap Loan Program.

Over the next biennium, the BFOs' goal is to establish a network of communication with units of general local government, nonprofits, and community-based organizations within 150 miles of the Texas-Mexico border. To increase the availability of services to border communities, BFOs will conduct onsite visits to communities requesting technical assistance on accessing Department programs. A database of contacts by county will advise communities of current and future funding opportunities available through the Department.

Additionally, BFOs will educate units of local government, nonprofits, and community-based organizations on the process of applying for funding and help identify opportunities for accessing various funding sources. They will coordinate capacity building seminars for units of general local government, nonprofits, and community-based organizations, and will assist with grant writing seminars to be conducted along the Texas-Mexico border.

Colonia Consumer Education Services

OCI continues the consumer education program and has expanded its educational goals, although OCI is no longer required by legislation to provide education for contract for deed participants. With the statewide expansion of the Contract for Deed Conversion initiative, OCI recognized the need for additional education topics, such as filing homestead exemption on their property. The Department will provide homebuyers under its Contract for Deed Conversion and Texas Bootstrap Loan Programs a form to file their homestead exemption at the time of closing on their homes. The Department will create an educational campaign regarding HB 1823 which was passed during the 79th Regular Legislative Session (2005) that allows residential contract for deed buyers to have their contracts converted into a deed with a deed of trust. The educational campaign will be directed to colonia residents along the Texas-Mexico Border Region. Education services are available through the Colonia Self-Help Centers and OCI Border Field Offices.

Consumer Information Resources

OCI operates a toll-free hotline (1-800-462-4251), which enables colonia residents to voice their concerns and/or request information. In addition, this hotline is available to colonia residents who may be having trouble making their monthly mortgage payment.

PUBLIC COMMENT ON THE COLONIA ACTION PLAN

Comment: Colonia workforce tends to be young and unskilled

"Pilot a Cameron County project where colonia youth (17-years of age) are trained in basic construction maintenance: plumbing, roofing, window repairs, etc."

- Department Response
  TDHCA—OCI administers the Texas Bootstrap Loan Program. Under the Bootstrap Program volunteers are always needed throughout the state to assist in the construction/rehabilitation of homes for very low income families participating in this program. By partnering with local Colonia Self-Help Centers (SHC) and non-profit organizations that participate in the Texas Bootstrap Loan Program, the volunteers learn a construction trade. In addition, the Colonia Self-Help Centers (SHC) offer tool lending/safety classes in which anyone can receive construction/rehabilitation training within the colonias served by the Colonia SHC.

Comment: Colonias in flood prone areas

Pilot a project in Cameron County that will buy out property owners in the flood zones by offering them affordable housing assistance.

- Department Response
  TDHCA—OCI does not have funds available to accomplish the buyouts. Approximately 1/3 of the county is located in a flood zone.

Comment: Credit and debt counseling

"Pilot a project in Cameron County where promotoras are trained in credit and debt counseling. The "promotoras" concept has proven to be effective when education colonia residents in health issues, etc."

- Department Response
  TDHCA is a big proponent of not only credit and debt counseling but of homebuyer education. For most of the programs offered by TDHCA, homebuyer education is required.

  Through the Texas Statewide Homebuyer Education Program, TDHCA offers training and certification for representatives of nonprofit organizations interested in providing homebuyer education. Additionally, Colonia SHC centers offer free credit and debt counseling to the colonia residents.

Comment: Contract for Deed

"Set up a hotline where families can call to report the existence of contract for deed arrangements. Make this information available to non-profit entities so they may follow-up with conversion program information."

- Department Response
  In 1996, OCI set up a toll-free hotline 1-800-462-4251 for colonia and border residents to call for assistance. In addition, Border Field Offices were created to allow constituents to call or go in person to receive assistance or to report improper activity. TDHCA has just announced its agency-wide toll-free number 1-800-525-0657. The Secretary of State has an Ombudsman's Program that colonia residents may also contact directly with any issues.

Comment: Multiple dwellings on properties

"Being able to assist colonia residents is that there is a lot of multiple dwellings on the properties, and that seems to be a big issue in the colonias. Being able to obtain a waiver or change something where these people live; at least start with the primary resident."

- Department Response
  Federal and state funding requirements prohibit the use of funds where multiple dwellings exist on the same property unless the additional improvements are removed. In most cases, in order to rehab or construct a home a lien must be filed on the property. In cases where multiple dwellings exist, it is almost impossible to perfect a lien on the property.

Comment: Administrative fee

"The other issue, coming as a program administrator, the funds that are usually for us to administer the program is 4 percent. It sometimes binds you from getting the right people."

- Department Response
  The administrative fee under the Texas Bootstrap Loan Program is currently set at 4 percent. Under the HOME Program, the US Department of Housing and Urban Development allocates a total of 10 percent to TDHCA to administer the HOME Program. TDHCA receives 6 percent to operate the program statewide and the remaining 4 percent is awarded to the applicants, not to exceed 4 percent of their award amount for administrative costs.

Comment: Self-Help Contract

"We've been asking for some sort of technical assistance as to what rules, regulations, procedures apply under self-help. So I'm just asking for some sort of assistance when it comes to self-help specific activities."

- Department Response
  TDHCA holds implementation workshops in conjunction with the Office of Rural Community Affairs in which the Colonia SHC and Counties are required to attend and participate. A program manual is provided and available to all Colonia SHCs and Counties awarded a contract. In addition, TDHCA has available border field representatives assigned to each Colonia SHC and County, which provide onsite visits and technical assistance in the areas of community development, economic development, and housing. Several of the nonprofits have been working under the Colonia SHC Program and have in-depth knowledge of the program and have more capacity and experience managing the contracts.

Comment: Administrative Fee

"I wish we had more administrative money for the county to run this program (Self-Help Center program) we're doing good and wish to continue it. It's a great program and request that your agency continue offer it."

- Department Response
  Funding for the self-help center program is acquired through the Texas Community Development Block Program 2.5 percent colonia set aside. In addition, self-help centers are encouraged to

apply and leverage with other financial sources to help them achieve their goals and performance measures.

Comment: Waste-water program in Casita Garciasville Subdivision

"There's a sewer program going on in Casita Garciasville Subdivision and most of it has been completed or will be in the next 30 to 60 days, but we have about 15 or 20 homes that were not served, for whatever reason, I have no idea why. We need to serve them, they currently have water and electricity."

- Department Response
  The Office of Rural Community Affairs (ORCA) awards funds to address public facility needs such as sewer, water system, road, and drainage improvements through the community development fund program.

Comment: Flood Control Projects in Casita Garciasville Subdivision

"In this subdivision there's two spots that are real low, and every time it rains it floods."

- Department Response
  The Office of Rural Community Affairs (ORCA) awards funds to address public facility needs such as sewer, water system, road, and drainage improvements through the community development fund program.

Comment: Administrative Fee & Program documents

"It's been heavy on my heart about the administration fee, if you could get 10 percent that would be great. Also, I think it would be helpful if every program could use the same documents for processing."

- Department Response
  The administrative fee under the Texas Bootstrap Loan Program is currently set at 4 percent. Under the HOME Program, HUD allocates the funds to the HOME program. To TDHCA for HOME, it comes with a 10 percent administrative cost. The Department keeps 6 percent to operate the program statewide and the 4 percent is passed down to the administrators. Unfortunately due to regulations and rules of the various funding sources not all documents are the same for each program. Though they may be similar and request some of the same information, each program requires its own documents.

Comment: Funding for parks

"If we could get some money for parks."

- Department Response
  The Secretary of State has an Ombudsman Program where colonia residents can share their ideas and/or concerns with them.

Comment: Administrative fee

"The main concern I have is amount of administration money, which Pete and Paul of course already talked about and of course the lady that just came in."

- Department Response
  The administrative fee under the Texas Bootstrap Loan Program is currently set at 4 percent. Under the HOME Program, HUD allocates the funds to the HOME program. To TDHCA for HOME, it

comes with a 10 percent administrative cost. The Department keeps 6 percent to operate the program statewide and the 4 percent is passed down to the administrators.

Comment: Texas Bootstrap Loan Amount

“We are also getting involved with the Bootstrap Program and I do feel that the limits due to the as far as the labor and materials have basically all gone up. I think of course there is a $30,000 limit for building bootstrap. We hope that you would consider raising the limits as far as on the construction for that particular program.”

- Department Response
  We agree the cost of building materials have increased. Program Legislation (Subchapter FF Section 2306.754) restricts the maximum loan amount made by the department and other entities to an owner-builder to $60,000.

  Other non-profit organizations have expressed their concern regarding the maximum loan amount of $60,000; however, until legislation is changed to increase that amount, TDHCA must continue to comply with this requirement. The maximum loan amount requirement only applies to amortizing repayable loans.

Comment: Texas Bootstrap Loan Amount

“I’m an outreach worker for elderly. A lot of them need house assistance, fixing repairs, everything, but in La Sara before they tried to do that, however, they had to rebuild a new house, and a lot of these elderly people don’t have the money to pay a loan, house payment or anything. What about them? What is being done for them? What type of programs are for them, you know, for funding for them to fix their house.”

- Department Response
  The HOME Program’s Owner Occupied Program provides grant funds for the rehabilitation of single family homes. This program includes, roof repair or replacement, electrical system and plumbing repairs. Additionally in order to qualify for this program, an individual must own and reside in their home. Rent houses are not eligible. If the applicant is purposing to assist those with special needs and/or persons with disabilities, additional points are awarded to the applicants. The owner occupied program is a grant and not a loan. Sometimes, a home may not be repairable. In those instances, a home may be demolished and replaced by a "stick-built" or a manufactured home.

SECTION 7: TEXAS STATE AFFORDABLE HOUSING CORPORATION ANNUAL ACTION PLAN

In accordance with Section 2306.0721(h), the Texas State Affordable Housing Corporation (TSAHC) Annual Action Plan is included in the 2006 SLIHP.

Sec. 2306.566 of the Texas Government Code reads:

COORDINATION REGARDING STATE LOW INCOME HOUSING PLAN.

(a) The corporation shall review the needs assessment information provided to the corporation by the department under Section 2306.0722(b).

(b) The corporation shall develop a plan to meet the state's most pressing housing needs identified in the needs assessment information and provide the plan to the department for incorporation into the state low income housing plan.

(c) The corporation's plan must include specific proposals to help serve rural and other underserved areas of the state.

TABLE OF CONTENTS

OVERVIEW

This report is prepared in accordance with SB 284, 78th Session, which requires the Texas Department of Housing and Community Affairs ("TDHCA") and the Texas State Affordable Housing Corporation ("Corporation") to coordinate regarding the State Low Income Housing Plan ("SLIHP"). The bill amends Section 2306.0722(b) to require TDHCA to provide the needs assessment information compiled for the report and plan to the Corporation. Section 2306.566 is added to require the Corporation to then review the information and develop a plan to meet "the state's most pressing housing needs identified in the need assessment information" and provide the plan to TDHCA for incorporation into the resource allocation plan in the SLIHP. The Corporation's plan must include specific proposals to help serve rural and other underserved areas of the state and provide affordable housing through methods that do not duplicate those of TDHCA or local housing organizations. The bill also adds Section 2306.0721(h) to require TDHCA to incorporate the specific results of the Corporation's programs in TDHCA's estimate and analysis of housing supply in each uniform state service region under Section 2306.0721(c)(9).

HISTORY OF THE CORPORATION

The Texas State Legislature created the Corporation as a self-sustaining non-profit entity to facilitate the provision of affordable housing for low income Texans who do not have comparable housing options through conventional financial channels. Enabling legislation, as amended, may be found in the Texas Government Code, Chapter 2306, Subchapter Y, Sections 2306.551 et seq. All operations of the Corporation are conducted within the state of Texas. Corporate offices are located in Austin, Texas. A five-member board of directors appointed by the Governor with the advice and consent of the Senate oversees the business of the Corporation.

The Corporation issues mortgage revenue bonds and private activity bonds to finance the creation of affordable multifamily housing units, and to finance the purchase of single-family homes under three separate programs: (1) the Professional Educators Home Loan Program, (2) the Fire Fighter and Law Enforcement or Security Officer Home Loan Program, and the newest program, (3) the Nursing Faculty Home Loan Program. Since April 2001, the corporation has issued over $600 million in single-family and multifamily mortgage revenue bonds. To date, the Corporation has provided over 8,362 units of affordable multifamily housing to low income Texans. The Corporation has also served 570 income eligible individuals and/or families through its first-time homebuyer single-family programs. This affordable housing has been provided at no cost to the state and its taxpayers. The Corporation does not receive any state funding, and is not subject to the legislative appropriations process.

The Corporation is organized, operated, and administered in accordance with its enabling legislation as a 501(c)(3) nonprofit corporation in order to access additional sources of funding to accomplish its mission. The Corporation is an approved originating seller/servicer for single family loans with Fannie Mae, Freddie Mac, Ginnie Mae, U.S. Rural Development, FHA, and VA. The Corporation has conduit sales agreements with Countrywide Home Loans, Inc., and Wells Fargo Funding, and with the Community Development Trust, Inc., for multifamily mortgage loans. The Corporation is also a non-member borrower of the Federal Home Loan Bank of Dallas.

NEEDS ASSESSMENT REVIEW

According to an analysis of the Texas Department of Housing and Community Affairs' (TDHCA) Needs Assessment and other published studies on the subject, the following represent the most pressing housing needs in the state.

GENERAL HOUSING NEEDS

- By 2000, Texas had the second largest total population, 20.9 million, among the states in the United States. By 2010, the population is projected to be between 24.2 million and 25.9 million and by 2040 between 35.0 million and 50.6 million.[118]
- As a result of the growing population, housing demands will change substantially in the coming years with both owner and renter housing growing at nearly equal rates.[119]
- Affordable housing is in short supply for the extremely low, very low, low, and moderate income brackets, which was caused primarily by the private sector's concentration of development, both single family and multifamily development, in larger metropolitan areas and targeting higher income individuals and families.[120]
- Many HUD-financed or HUD-subsidized properties, which represent a significant portion of the state's affordable housing portfolio, are at risk of becoming market rate properties.[121]

SINGLE FAMILY HOUSING NEEDS

- Texas may add nearly 3.8 million more students over the next 40 years placing a high demand for educators.[122]
- Population growth will mean increased public service demands and expanding markets for Texas.[123]
- Lack of funds for down payment and closing costs has created one of the greatest obstacles that prevent first-time homebuyers of low-to-moderate-income families, such as the teachers, police officers, and firefighters, from achieving the American dream of owning a home.[124]
- The Texas Education Code establishes a state minimum salary schedule that must be accommodated by all Texas schools for specific public education professionals. The state minimum salary for 2004-2005 ranges from $24,240 per year for 0 years experience to $40,800 per year for 20 or more years of experience.[125]

- A base salary chart for Texas police officers ranges from $32,944 per year to $46,644.[126]
- A base salary chart for Texas firefighters ranges from $24,944 per year to $41,573. [127]
- The Texas nursing education system is operating close to capacity and faces several impediments to producing more graduates—faculty shortages due to retirement, inadequate salaries, and fewer faculty applicants.[128]

MULTIFAMILY HOUSING NEEDS

- Renter households are, on average, a lower income group than owner households. More than 37 percent of renter households earn less than 50 percent of the Area Median Family Income, compared to only 16.3 percent of owner households. As a result, renter households are more likely to be in need of housing assistance.[129]
- According to the results of the 2003 Community Needs Survey distributed by TDHCA to cities, counties, local housing departments, public housing authorities, and the US Department of Agriculture/Rural Development field offices, approximately 78 percent of respondents felt that there was a severe or significant affordable housing problem in their area and that new rental housing development and the renovation of existing multifamily housing are more important than rental payment assistance.[130]
- The lack of affordable housing opportunities leads to severe and extreme housing cost burdens for lower-income groups; in particular, extremely low-income renter households.[131]
- Overcrowding may indicate a general lack of affordable housing in a community and lower income renter households experience overcrowded conditions more frequently than higher income households.[132]
- In the 2005-2009 State of Texas Consolidated Plan, it is estimated that 2 million people or 9.9% of the total population are 65 years of age and older. The Texas Department of Aging and Disability Services estimates that by year 2040, individuals age 60 and over will comprise 23 percent of the population in Texas. Though the majority of the elderly Texans live in urban areas, rural areas have a higher percentage of elderly relative to the local population. According to the 2000 Census, 13.1 percent of seniors age 65 and over in Texas live below the poverty level. Approximately 30% of all elderly households pay more than 30% of their income on housing with 14% paying more than 50% of their income on housing. Lower incomes combined with rising healthcare costs contribute to the burden of paying for housing.[133]
- There is a shortage of affordable housing in the extremely low, very low, low and moderate income brackets. This is primarily caused by the private sector's concentration of development in

larger metropolitan areas and targeting higher income individuals and families.[134] Cities with populations between 20,000 and 50,000 have a particularly hard time accessing funds. They cannot access USDA funding and are too small to effectively compete for other funding opportunities.[135]

- According to the US Census Related Comprehensive Housing Affordability Strategy (CHAS) Data, there are approximately 2,903,671 people living in rural areas of Texas. Of these, 574,843 people or 20% are living below the poverty level; 83,454 low income households live with the cost burden of paying more than 30% of their income on housing expenses; 26,999 occupied units are "overcrowded"; and 5,211 units were found to have substandard conditions such as lack of piped water, utilities, and waste facilities.[136]
- Preservation of existing affordable and subsidized housing stock is an important element of providing safe, decent and affordable housing. The explosive population growth in the metropolitan areas as well as the lack of new construction during the late 80's and early 90's created a huge demand for housing at all income levels. Adding to this problem is the loss of units in the federally subsidized Section 8 portfolio, the USDA/Rural Development portfolio and the pools of tax credit units that have reached their 15 year affordability periods. The USDA/Rural Development portfolio contains smaller rural rental properties which, in many cases, represent the sole affordable housing stock in Texas' smallest towns.[137]
- As of the most recent statistical information available, there were 2,676,060 renter occupied housing units in Texas. Eighty-four percent of these were constructed before 1990 with the highest production of rental housing (50.8%) built between 1970 and 1989. Therefore, the majority of rental housing stock in Texas is between 15-35 years old and may be in need of some type of moderate to substantial rehabilitation in order to preserve its functionality.[138]

The Corporation will address these pressing housing needs through the following single family, multifamily, and grant programs for 2006. The following summary of Corporation programs gives the history and accomplishments of our programs to date and a plan for achieving greater success with these programs in 2006. A few of the programs mentioned are mandated by the state legislature, as noted, and a few have been undertaken upon our own initiative to fulfill housing needs for identified underserved areas of the state.

TSAHC PROGRAM DESCRIPTIONS

TEXAS PROFESSIONAL EDUCATORS HOME LOAN PROGRAM
TEXAS FIRE FIGHTER AND LAW ENFORCEMENT OR SECURITY OFFICE HOME LOAN PROGRAM
NURSING FACULTY HOME LOAN PROGRAM

These Programs represent the Corporation's Single Family Mortgage Revenue Private Activity Bond Programs. The Programs were established by the Legislature in 2001, 2003, and 2005, respectively, and allocate a total of $55 million of the State's Ceiling for Private Activity Bond Cap for the exclusive purpose of making single-family mortgage loans to Texas Professional Educators ($25 million), Fire Fighters, Law Enforcement Officers, and Corrections Officers ($25 million), and Nursing Faculty ($5 million) who are first-time home buyers.

The Programs are available statewide on a first come, first-served basis, to first-time homebuyers who wish to purchase a newly constructed or existing home. Through each Program, eligible borrowers are able to apply for a 30 year fixed rate mortgage loan and receive 5 percent down payment assistance of the mortgage loan amount in the form of a grant. The programs are accessible to eligible borrowers by directly contacting a trained, participating mortgage lender.

The 2004 Professional Educator Home Loan Program fully originated the $25,000,000 bond fund allocation. In July 2005, the Corporation issued $25,000,000 in mortgage revenue private activity bonds for additional loans to professional educators, of which, $8,956,000 is already committed for new loans. Since its inception in 2001, the program has financed 418 homes for professional educators.

As of September 2005, the Fire Fighters and Law Enforcement or Security Officers Home Loan Program had issued $15,500,000 in loan commitments, which has or will finance 152 homes. The Nursing Faculty Home Loan Program was established by the Legislature in 2005. The Corporation plans to issue bonds to fund the program this year.

2006 Implementation Plan

The Corporation's primary goal for 2006 will be to continue to develop a financing structure that minimizes the Programs' mortgage interest rate and offers the best possible down payment assistance grant to the borrowers. Down payment assistance is especially critical when the spread between conventional mortgage rates and tax-exempt mortgage rates have reached historical lows. The Corporation will also continue to advertise and to receive input about the Programs by attending teacher, police officer, firefighter, home builder, real estate agent, and lender association conventions and trade shows in 2005 and 2006.

The eligibility for the Fire Fighter and Law Enforcement or Security Officer Home Loan Program was expanded by the Legislature in 2005 to include county law enforcement officers and to include corrections officers. As a result, the Corporation has and will continue to reach out to these newly eligible homebuyers through meetings with the Texas Department of Criminal Justice and county law enforcement organizations. The Corporation will also provide information to the nursing faculty centers across the state to let their educators know that they are now eligible for a home loan through the

Nursing Faculty Home Loan Program. In addition, the Corporation will continue to train and develop relationships with mortgage lenders who represent the Programs to the borrowers.

AFFORDABLE HOMEOWNERSHIP PROGRAM FOR TEXAS

One of the Corporation's main initiatives is to provide housing opportunities to Texans that do not have comparable housing options through conventional financial channels. Many families throughout Texas seeking to purchase a home are not able to meet the traditional lending requirements and, up to now, have had no other option than to rent. In order to meet this need and provide deserving families with a financing alternative for achieving the American dream of homeownership, the Corporation developed the Affordable Homeownership Program for Texas ("Program").

The Program, developed through a partnership between Ameriquest Mortgage Company ("Ameriquest") and the Corporation, provides borrowers with an affordable mortgage financing option that will allow them the opportunity to achieve homeownership. As a result of this partnership, Ameriquest has committed up to $100 million dollars for mortgage loans and the Corporation has committed $1 million dollars for down payment assistance to the Program.

The Program was established to serve those individuals and/or families in Texas that have FICO scores between 525 and 610 and that are at or below 80% of the AMFI by providing them access to an affordable mortgage loan product and down payment assistance in an amount up to seven percent (7%) of the mortgage loan amount. In addition, the Program rewards borrowers who make timely mortgage payments with lower interest rates and lower mortgage payments. Borrowers will receive a 50 basis point (.5%) reduction in their mortgage interest rate for every 12 months of on-time payments. As a result, Borrowers can reduce their mortgage interest rate by up to two percent (2%) during the first 48 months of their mortgage loan.

The Corporation and Ameriquest believe home buyer education is an essential component to the success of home ownership. Under the Program, borrowers will be provided pre and post-closing Home Buyer Education Training by ACORN Housing. ACORN Housing is a national housing counseling organization, helping low and moderate income homebuyers and homeowners since 1986. Additionally, borrowers will have intervention assistance available to them during the life of the mortgage loan. We believe this training and assistance is crucial to the success of this Program.

Since 2004, the Program has provided 36 loans to individuals and families who otherwise might not have achieved the dream of home ownership.

2006 Implementation Plan

The initial release of the Program in 2004 was limited to south Texas through a local affordable housing provider (CDC Brownsville). In 2005, the Corporation released the Program statewide and continues to market the program to local community development corporations, non-profits and other entities involved in affordable housing. The Corporation will also begin an aggressive marketing campaign in 2006, by starting a 1-800 phone number in conjunction with an on-line application system and through the issuance of press releases and other marketing materials.

MULTIFAMILY PRIVATE ACTIVITY BOND PROGRAM

The Texas Legislature in 2003 allocated 10 percent of the multifamily private activity bond cap to the Corporation so that local governments could be more involved in assessing and addressing their own local multifamily housing needs and at the same time could use the expertise of the state to issue the bonds. The available amount for funding in 2005 was approximately $40 million, and a similar amount will be available for 2006. Nonprofit and for profit developers can use the funds to finance acquisition and rehabilitation or new construction of multifamily residential rental units across the state. Developers are encouraged to leverage the private activity bond funds by using Low Income Housing Tax Credits (LIHTC) available through TDHCA.

The Corporation's Private Activity Bond program statute requires the Corporation to target areas with the greatest housing need that have expressed local community support for affordable multifamily housing. The statute also requires the Corporation to solicit proposals from developers to provide the specific housing development addressing the targeted housing need outlined in the request, whether for senior, rehabilitation, rural, migrant farm worker, or other specific housing need. Applications received in response to the request for proposal issued by the Corporation will be scored and ranked using criteria which analyzes financial feasibility and overall quality of the proposed Development. Tax-exempt private activity bond financing will be allocated to the highest-scoring proposal that meets the identified housing needs of the RFP, subject to available allocation.

The Corporation issued requests for proposals in 2005 for Arlington, Corpus Christi, and El Paso. The Corporation received an application for development under the Corpus Christi RFP. The development known as the North Side Manor Apartments was not induced due to federal subsidy factors that made the transaction financially infeasible.

2006 Implementation Plan

In previous years, the Corporation targeted multifamily housing by specific geographic areas based on local need and community support from local government. However, targeting specific geographic areas has limited the Corporation's ability to meet the housing needs of the state and discouraged many developer organizations from applying. For the 2006 program, the Corporation is targeting specific areas of housing need for which current funding sources are insufficient or not readily available. The targeted areas of housing need might include targets such as rehabilitation, senior housing, rural housing pools, or migrant farm worker housing that would be solicited through a statewide request for proposal.

This new program focus is based on current research and information received during the two previous year's solicitations. In 2004 and 2005 the Corporation solicited participation in the private activity bond program by sending letters to mayors of all cities with a population over 10,000 people and all county judges. Discussing the various needs with each interested city and county highlighted the diversity of needs for different areas of Texas. The larger metropolitan areas believed they were saturated with multifamily housing, but were interested in rehabilitation or redevelopment of existing multifamily housing that had fallen into disrepair. Cities with a lower population, generally not in urban areas, expressed interest in developing new multifamily housing to fill their affordable housing needs. However, addressing these needs on a geographic, city by city, basis was not practical. For instance, the development of

affordable housing units in rural areas was requested, but a single rural development of approximately 40 units could not realistically be financed with bonds.
However, by pooling together several rural developments and using these economies of scale, a rural pool bond transaction could meet the financial feasibility test and would meet the needs of several rural communities. This need could be met in a specific “rural pool” request for proposal. Similarly, Corporation staff has identified senior housing and migrant farmworker housing as potential target areas for which specific requests for proposals could be issued.

For some of the targeted areas of housing need mentioned above, 4 percent tax credits and tax-exempt bonds together are not sufficient to provide a positive cash flow to developments in areas where the area median income is lower than the state average. Funding sources from outside these traditional financing methods must be obtained. Possible sources of funds may include monies from the HOME and Housing Trust Fund programs, USDA/Rural Housing Service, and grants from other interested groups specific to the housing need.

The Corporation will target areas of housing need in October and November of 2005 and will issue requests for proposals to meet those housing needs by January 2006. The deadline to turn in a proposal will be outlined in the specific request. We anticipate a submission deadline for all proposals between December of 2005 and March of 2006.

MULTIFAMILY 501(C)(3) BOND PROGRAM

The Corporation's 501(c)(3) Multifamily Bond Program was created to finance the acquisition and rehabilitation, or new construction, of affordable multifamily housing units throughout the state of Texas. Unlike the Corporation’s PAB program, 501(c)(3) financing does not use volume cap allocation and applications can be considered year-round. Also different from the PAB program is that 501(c)(3) financing may not be used in conjunction with low income housing tax credits. Only qualified nonprofit developers, designated under the internal revenue code as 501(c)(3) organizations, are eligible to apply for 501(c)(3) financing.

In addition to providing safe, decent, and affordable rental housing to residents of the state of Texas, recipients of 501(c)(3) financing must adopt a dollar-for-dollar public benefit program, investing at least one dollar in rent reduction, capital improvement projects, or social, educational, or economic development services for every dollar of abated property tax revenue they receive.

In 2001 and 2002 the Corporation provided $487 million in financing for the preservation or creation of 7,700 units of affordable housing in the state of Texas. Since 2002 the Corporation has not considered applications or issued bonds under the 501(c)(3) program as a result of market changes and legislatively mandated changes requiring that any benefit of abated property tax must be transferred dollar-for-dollar into a public benefit program. In sum, the 501(c)(3) bond program has become inactive for many reasons, including the softening of the market for affordable housing in metropolitan areas, the fact that 4 percent tax credits cannot be used, and that abated property taxes cannot be used to pay off debt service.

2006 Implementation Plan

The Corporation will monitor market conditions and will reactivate the program if demand shows the need for this type of financing to create needed multifamily affordable housing. Non-profit developers may choose to apply under the Corporation's Multifamily Private Activity Bond Program to be eligible for bond financing in addition to 4 percent tax credit equity.

MULTIFAMILY DIRECT LENDING PROGRAM

The Corporation's Multifamily Direct Lending Program provides permanent financing for the purpose of increasing and preserving the stock of affordable multifamily housing units throughout the state of Texas. The major focus of this program is to provide financing for smaller developments in rural and underserved areas of the state where bond financing is not practical. The Corporation's ability to offer permanent financing is facilitated through existing relationships with real estate investment companies that invest in affordable multifamily housing. The Community Development Trust, Inc. and the Federal Home Loan Bank of Dallas have been the Corporation's principal partners for this program.

In 2003 and 2004, the Corporation provided permanent financing in the aggregate amount of $5,628,000 for five (5) separate developments in Odessa, Wichita Falls, Big Spring, Brady, and Stephenville. These developments have provided 412 units of affordable housing to low income Texans.

2006 Implementation Plan

The Corporation is committed to administering and marketing our capabilities under this program in 2006. To this effort, the Corporation will market the program on its website and at public hearings across the state and will provide information to current and previous clients of the Corporation. In addition, our principal partners in this program will refer Texas based clients to the Corporation to meet their financing needs on the local level. Since the Federal Home Loan Bank requires a 25 percent risk sharing component on each loan, the Corporation will pursue this program primarily through the Community Development Trust, Inc. so as not to restrict the Corporations ability to use available financial resources for other programs.

ASSET OVERSIGHT AND COMPLIANCE

Asset Oversight of properties is required by many issuers of bonds, including the Corporation and TDHCA, to monitor the financial and physical health of a property and ensure that the bonds can be repaid at the rate required in the bond documents. Compliance monitoring ensures that the borrowers are providing the required number of affordable units to income eligible households and that quality resident services are provided to all residents of the property. Periodic on-site inspections and resident file review of affordable units ensure that all federal requirements relating to the tax-exempt status of the bonds are strictly adhered to.

The Corporation is currently providing asset oversight for 86 properties and compliance oversight for 38 properties. The Corporation staff performs yearly on-site compliance reviews and at least yearly on-site asset oversight reviews for these properties.

2006 Implementation Plan

The Corporation will continue to provide asset oversight and compliance monitoring for our current portfolio. The Corporation will also work to contract with other entities to expand our asset oversight and compliance monitoring portfolio of business. Compliance monitoring and asset oversight revenues would continue to be used to fund current single family and multifamily programs.

GRANT PROGRAM

Although the Corporation has been a 501(c)(3) nonprofit entity since 2001, the Corporation has not actively pursued fundraising and grant opportunities. However, the Corporation provided the Single Family Professional Educator, Fire Fighter, Police Officer and Security Officer Programs $400,000 from its cash reserves for down payment assistance in 2002, $200,000 in 2004, and over $400,000 in 2005. For the 2004 Private Activity Bond Program the Corporation provided from cash reserves a $500,000 soft second loan for the Providence at Marshall Meadows development in San Antonio. The Corporation does not receive state appropriations and cannot sustain this level of subsidy for its programs and continue to stay in business. Both of these experiences, as well as reviewing other critical unmet housing needs identified by TDHCA and the Corporation, have prompted us to pursue the creation of a Grant Program to fund the following programs: Single Family Down Payment Assistance, Multifamily Gap Financing Assistance, Homebuyer Education, and an Interim Construction and Land Acquisition Program.

2006 Implementation Plan

The Corporation's mission of affordable housing matches many foundation and grant objectives, and provides multiple opportunities for corporate sponsorship and cross-promoting. In 2006 the Corporation will create a Fundraising and Grant Program Action Plan that includes specific multifamily and single family needs, matches them with appropriate corporate, foundation, or grant resources, and establishes activities and a timeline within which to pursue those resources.

For instance, the Corporation will solicit corporate partners in the home improvement, home appliance, and large retail business sectors for down payment assistance for our Professional Educator, Fire Fighter, Police Officer, Security Officer, and Nursing Faculty bond programs. We will request a grant for down payment assistance and coupons for participating borrowers, such as $50 off a refrigerator, or a $100 coupon to the home improvement store. The Corporation will also work with national computer manufacturers to contribute a computer to every teacher, firefighter, police officer, corrections officer, or nurse educator that closes a loan through our program, and negotiate with telecommunications companies to contribute phone/internet service packages. These are just a few of the fundraising activities and initiatives that the Corporation will undertake in 2006.

In addition, the Corporation will apply for HUD grants and other government grants that target rural housing, or other housing need that the Corporation targets for its Private Activity Bond Program.

APPENDIX A

LEGISLATIVE REQUIREMENTS FOR THE *STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT*

SEC. 2306.072. ANNUAL LOW INCOME HOUSING REPORT

(a) Not later than December 18 of each year, the director shall prepare and submit to the board an annual report of the department's housing activities for the preceding year.

(b) Not later than the 30th day after the date the board receives the report, the board shall submit the report to the governor, lieutenant governor, speaker of the house of representatives, and members of any legislative oversight committee.

(c) The report must include

- (1) a complete operating and financial statement of the department;
- (2) a comprehensive statement of the activities of the department during the preceding year to address the needs identified in the state low income housing plan prepared as required by Section 2306.0721, including:
  - (A) a statistical and narrative analysis of the department's performance in addressing the housing needs of individuals and families of low and very low income;
  - (B) the ethnic and racial composition of families and individuals applying for and receiving assistance from each housing-related program operated by the department; and
  - (C) the department's progress in meeting the goals established in the previous housing plan;
- (3) an explanation of the efforts made by the Department to ensure the participation of persons of low income and their community-based institutions in department programs that affect them;
- (4) a statement of the evidence that the Department has made an affirmative effort to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process;
- (5) a statistical analysis, delineated according to each ethnic and racial group served by the department, that indicates the progress made by the department in implementing the state low income housing plan in each of the uniform state service regions; and
- (6) an analysis, based on information provided by the fair housing sponsor reports required under Section 2306.0724 and other available data, of fair housing opportunities in each housing development that receives financial assistance from the department that includes the following information for each housing development that contains twenty or more living units:
  - (A) the street address and municipality or county where the property is located;
  - (B) the telephone number of the property management of leasing agent;
  - (C) the total number of units reported by bedroom size;
  - (D) the total number of units, reported by bedroom size, designed for individuals who are physically challenged or who have special needs and the number of these individuals served annually as reported by each housing sponsor;
  - (E) the rent for each type of rental unit, reported by bedroom size;
  - (F) the race or ethnic makeup of each project;
  - (G) the number of units occupied by individuals receiving government-supported housing assistance and the type of assistance received;

- (H) the number of units occupied by individuals and families of extremely low income, very low income, low income, moderate income, and other levels of income;
- (I) a statement as to whether the department has been notified of a violation of the fair housing law that has been filed with the United States Department of Housing and Urban Development, the Commission on Human Rights, or the United State Department of Justice; and
- (J) a statement as to whether the development has any instances of material noncompliance with bond indentures or deed restrictions discovered though the normal monitoring activities and procedures that include meeting occupancy requirements or rent restrictions imposed by deed restrictions or financing agreements.

(7) a report on the geographic distribution of low income housing tax credits, the amount of unused low income housing tax credits, and the amount of low income housing tax credits received from the federal pool of unused funds from other states.

(8) A statistical analysis, based on information provided by the fair housing sponsor reports required by Section 2306.0724 and other available data, of average rents reported by county.

(d) Repealed by Acts 2003, 78th Leg., ch. 330, §31(1).

SEC. 2306.0721. LOW INCOME HOUSING PLAN

(a) Not later than December 18 of each year, the director shall prepare and submit to the board an integrated state low income housing plan for the next year.

(b) Not later than the 30th day after the date the board receives the plan, the board shall submit the plan to the governor, lieutenant governor, and the speaker of the house of representatives.

(c) The plan must include:

(1) an estimate and analysis of the housing needs of the following populations in each uniform state service region:
- (A) individuals and families of moderate, low, very low income, and extremely low income;
- (B) individuals with special needs; and
- (C) homeless individuals;

(2) a proposal to use all available housing resources to address the housing needs of the populations described by Subdivision (1) by establishing funding levels for all housing-related programs;

(3) an estimate of the number of federally assisted housing units available for individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(4) a description of state programs that govern the use of all available housing resources;

(5) a resource allocation plan that targets all available housing resources to individuals and families of low and very low income and individuals with special needs in each uniform state service region;

(6) a description of the department's efforts to monitor and analyze the unused or underused federal resources of other state agencies for housing-related services and services for homeless individuals and the department's recommendations to endorse the full use by the state of all available federal resources for those services in each uniform state service region;

(7) strategies to provide housing for individuals and families with special needs each uniform state service region;

(8) a description of the department's efforts in each uniform state service region to encourage the construction of housing units that incorporate energy efficient construction and appliances;
(9) an estimate and analysis of the housing supply in each uniform state service region;
(10) an inventory of all publicly and, where possible, privately funded housing resources, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies;
(11) strategies for meeting rural housing needs;
(12) a biennial action plan
(A) addresses current policy goals for colonia programs, strategies to meet the policy goals, and the projected outcomes with respect to policy goals; and
(B) includes information on the demand for contract-for-deed conversions, services from self-help centers, consumer education, and other colonia resident services in counties some part of which is within 150 miles of the international border of this state;
(13) a summary of public comments received at a hearing under this chapter or from another source that concern the demand for colonia resident services described by Subdivision (12); and
(14) any other housing-related information that the state is required to include in the one-year action plan of the consolidated plan submitted annually to the United States Department of Housing and Urban Development.

(d) The priorities and policies in another plan adopted by the department must be consistent to the extent practical with the priorities and policies established in the state low income housing plan.
(e) To the extent consistent with federal law, the preparation and publication of the state low income housing plan shall be consistent with the filing and publication deadlines required of the department for the consolidated plan; and
(f) The director may subdivide the uniform state service regions as necessary for the purposes of the state low income housing plan.
(g) The department shall include the plan developed by the Texas State Affordable Housing Corporation under Section 2306.566 in the department's resource allocation plan under Subsection (c)(5).
(h) The department shall consider and incorporate the specific results of the programs of the Texas State Affordable Housing Corporation in the department's estimate and analysis of the housing supply in each uniform state service region under Subsection (c)(9).

SEC. 2306.0722. PREPARATION OF PLAN AND REPORT

(a) Before preparing the annual low income housing report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the department shall meet with regional planning commissions created under Chapter 391, Local Government Code, representatives of groups with an interest in low income housing, nonprofit housing organizations, managers, owners, and developers of affordable housing, local government officials, and residents of low income housing. The department shall obtain the comments and suggestions of the representatives, officials, and residents about the prioritization and allocation of the department's resources in regard to housing.
(b) In preparing the annual report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the director shall:
(1) coordinate local, state, and federal housing resources, including tax exempt housing bond financing and low income housing tax credits;
(2) set priorities for the available housing resources to help the neediest individuals;

(3) evaluate the success of publicly supported housing programs;
(4) survey and identify the unmet housing needs of persons the department is required to assist;
(5) ensure that housing programs benefit a person regardless of the persons' race, ethnicity, sex, or national origin;
(6) develop housing opportunities for individuals and families of low and very low income and individuals with special housing needs;
(7) develop housing programs through an open, fair, and public process;
(8) set priorities for assistance in a manner that is appropriate and consistent with the housing needs of the populations described by Section 2306.0721(c)(1);
(9) incorporate recommendations that are consistent with the consolidated plan submitted annually by the state to the United States Department of Housing and Urban Development;
(10) identify the organizations and individuals consulted by the department in preparing the annual report and state low income housing plan and summarize and incorporate comments and suggestions provided under Subsection (a) as the board determines to be appropriate;
(11) develop a plan to respond to changes in federal funding and programs for the provision of affordable housing;
(12) use the following standardized categories to describe the income of program applicants and beneficiaries:
   (A) to 30 percent of area median income adjusted for family size;
   (B) more than 30 to 60 percent of area median income adjusted for family size;
   (C) more than 60 to 80 percent of area median income adjusted for family size;
   (D) more than 80 to 115 percent of area median income adjusted for family size; or
   (E) more than 115 percent of area median income adjusted for family size; and

(13) use the most recent census data combined with existing data from local housing and community service providers in the state, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies.
(14) provide the needs assessment information compiled for the report and plan to the Texas State Affordable Housing Corporation.

SEC. 2306.0723. PUBLIC PARTICIPATION REQUIREMENTS

(a) The department shall hold public hearings on the annual state low income housing plan and report before the director submits the report and the plan to the board. The department shall provide notice of the public hearings as required by Section 2306.0661. The department shall accept comments on the report and plan at the public hearings and for at least 30 days after the date of the publication of the notice of the hearings.
(b) In addition to any other necessary topics relating to the report and the plan, each public hearing required by Subsection (a) must address:
   (1) infrastructure needs;
   (2) home ownership programs;
   (3) rental housing programs;
   (4) housing repair programs; and
   (5) the concerns of individuals with special needs, as defined by Section 2306.511.

(c) The board shall hold a public hearing on the state low income housing report and plan before the board submits the report and the plan to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature.

(d) The board shall include with the report and the plan the board submits to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature, and members of the advisory board formed by the department to advise on the consolidated plan a written summary of public comments on the report and the plan.

SEC. 2306.0724. FAIR HOUSING SPONSOR REPORT

a) The department shall require the owner of each housing development that receives financial assistance from the department and that contains 20 or more living units to submit an annual fair housing sponsor report. The report must include the relevant information necessary for the analysis required by Section 2306.072(c)(6). In compiling the information for the report, the owner of each housing development shall use data current as of January 1 of the reporting year.

(b) The department shall adopt rules regarding the procedure for filing the report.

(c) The department shall maintain the reports in electronic and hard-copy formats readily available to the public at no cost.

(d) A housing sponsor who fails to file a report in a timely manner is subject to the following sanctions, as determined by the department:

(1) denial of a request for additional funding; or

(2) an administrative penalty in an amount not to exceed $1,000, assessed in the manner provided for an administrative penalty under Section 2306.6023.

APPENDIX B

GLOSSARY OF SELECTED TERMS

Accessible: A definition used by HUD in Section 504 with respect to the design, construction, or alteration of an individual dwelling unit. It means that the unit is located on an accessible route and when designed, constructed, altered, or adapted, it can be approached, entered, and used by individuals with physical disabilities. A unit that is on an accessible route and is adaptable and otherwise in compliance with the standards set forth in the Uniform Federal Accessibility Standards (UFAS, 23 CFR Subpart 40 for residential structures) is considered accessible. When a unit in an existing facility that is being made accessible as a result of alterations intended for use by a specific qualified person with a disability, the unit will be deemed accessible if it meets the requirements of applicable standards that address the particular disability or impairment of such person.

Accessible Route: Unobstructed path that connects accessible elements and spaces in a building or facility and complies with the space and reach requirements prescribed by the Uniform Federal Accessibility Standards (UFAS). An accessible route that serves only accessible units occupied by persons with hearing or vision impairments need not comply with those requirements intended to affect accessibility for persons with mobility requirements.

Acquisition: Acquisition of standard housing (at a minimum, meeting HUD Section 8 Housing Quality Standards) only with no expectation of other activities being carried out in conjunction with the acquisition.

Adaptability: A definition used by HUD in Section 504 meaning the ability of certain elements of a dwelling unit (such as kitchen counters, sinks, and grab bars) to be added to, raised, lowered, or otherwise altered, to accommodate the needs of persons with or without disability or to accommodate the needs of persons with different degrees of disability.

Administrative Costs Reasonable and necessary costs, as described in OMB Circular A-87, incurred by the participating jurisdiction in carrying out its eligible program activities in accordance with prescribed regulations. Administrative costs include any project delivery costs, such as new construction and rehabilitation counseling, preparing work specifications, loan processing, inspections, and other entities applying for or receiving HOME funds. Administrative costs do not include eligible project-related costs that are incurred by and charged to project owners.

Affordable Housing: Housing where the occupant is paying no more than 30 percent of his/her gross monthly income for gross housing costs, including utility costs. Housing that is for purchase (with or without rehabilitation) qualifies as affordable housing if it (1) is purchased by a low income, first-time home buyer who will make the housing his or her principal residence; and (2) has a sale price that does not exceed the mortgage limit for type of single family housing for the area under HUD's single family insuring authority under the National Housing Act.

Area Median Family Income (AMFI): Income limits for MSAs and counties that are based on HUD's estimates of the area's median income adjusted for family size. Calculated yearly by HUD and used to determine an applicant's eligibility with regard to HUD programs.

Assisted Household or Person:	For the purpose of identification of goals, an assisted household or person is one in which, during the periods covered by the annual plan, will receive benefits through the investment of federal funds, either alone or in conjunction with the investment of other public or private funds. A renter is benefited if the household or person takes occupancy of affordable housing that is newly acquired (standard housing) or new rehabilitation is completed. A first-time home buyer is benefited if a home is purchased during the year. A homeless person is benefited if the person becomes an occupant of transitional or permanent housing. A non-homeless person with special needs is considered as being benefited if the provision of supportive services is linked to the acquisition, rehabilitation, or new construction of a housing unit and/or the provision of rental assistance during the year.
Capacity Building:	Educational and organizational support assistance to promote the ability of an organizations to maintain, rehabilitate, and construct housing for low and very low income persons and families. This activity may include, but is not limited to: 1) Organizational support to cover expenses for training, technical, and other assistance to the board of directors, staff, and members of the organization, 2) Program support including technical assistance and training related to housing development, housing management, or other subjects related to the provision of housing or housing services, and 3) Studies and analyses of housing needs.
Community Housing Development Organization (CHDO):	A nonprofit organization, certified by a city or the state, that provides decent, affordable housing to low income individuals within a designated geographic area.
Colonia:	An identifiable unincorporated area located within 150 miles of the Texas-Mexico border that lacks infrastructure and decent housing.
Consolidated Plan:	A document submitted to the US Department of Housing and Urban Development (HUD) containing housing needs assessments and strategic plans for the state. It is required of the State of Texas by HUD in order to receive federal CDBG, HOME, ESGP, and HOPWA program funds.
Contract for Deed:	A financing arrangement for the sale of property whereby land ownership remains with the seller until the total purchase price is paid.
Disability:	According to the US Department of Housing and Urban Development, a person shall be considered to have a disability if the person is determined to have a physical, mental, or emotional impairment that: (1) is expected to be of long-continued and indefinite duration, (2) substantially impeded his or her ability to live independently, and (3) is of such a nature that the ability could be improved by more suitable housing conditions. A person shall also be considered to have a disability or he or she has a developmental disability as defined in the Developmental Disabilities Assistance and Bill of Rights Act (42 USC. 6001-6006). The term also includes the surviving member(s) or any household described in the first sentence of this paragraph who is (were) living in an assisted unit with the disabled member of the household at the time of his or her death. Disabilities reflect the consequences of a bodily impairment in terms of functional performance. Also see "Person with Disability."
Disabled Household:	A household composed of one or more persons at least one of whom is an adult (a person of at least 18 years of age) who has a disability.

Economic Independence and Self-Sufficiency Programs:	Programs undertaken by public housing agencies (PHAs) to promote economic independence and self-sufficiency for participating families. Such programs may include Project Self-sufficiency and Operation Bootstrap programs that originated under earlier Section 8 initiatives, as well as the Family Self-Sufficiency program. In addition, PHAs may operate locally developed programs or special projects designed to promote economic independence and self-sufficiency.
Elderly Household:	According to HUD, a family in which the head of the household or a spouse is at least 62 years of age, by HUD's definition. This definition may change according to specific program.
Extremely Low Income:	Individual of family with a household income less than or equal to 30 percent of the area median family income (AMFI)
Fair Housing Act	Prohibits discrimination in housing because of race, national origin, religion, sex, familial status, or disability.
Federal Preference for Admission:	The preference given to otherwise eligible applicants under HUD's rental assistance programs who, at the time they seek housing assistance, are involuntarily displaced, living in substandard housing, or paying more than 50 percent of family income for rent.
First Time Home Buyer:	An individual or family who has not owned a home during the three-year period preceding the HUD-assisted purchase of a home that must be used as the principal residence of the homebuyer.
Frail Elderly Persons:	Includes elderly persons who are unable to perform one or more Activities of Daily Living (ADL) without help.
Household:	One or more persons occupying a housing unit (US Census definition).
Housing Development Costs:	The total of all costs incurred in financing, creating, or purchasing any housing development, which are approved by the department as reasonable and necessary. The costs may include, but are not limited to, the value of land and any buildings on the land, cost of land acquisition, options, deposits, or contracts to purchase; cost of site preparation demolition and development; fee paid or payable in connection with the planning, execution, and financing of the development, such as those to architects, engineers, attorneys, accountants; cost of necessary studies, surveys, plans, permits, insurance, interest, financing, tax and assessment costs, and other operating and carrying costs during construction; cost of construction, rehabilitation, reconstruction, fixtures, furnishings, equipment, machines, and apparatus related to the real property; cost of land improvements, including without limitation, landscaping and off-site improvements; necessary expenses in connection with initial occupancy of the housing development; an allowance established by the Department for contingency reserves; and the cost of the other items, including tenant relocation, if tenant relocation costs are not otherwise being provided for, as determined by the department to be reasonable and necessary for the development of the housing development, less any and all net rents and other net revenues received from the operation of the real and personal property on the development site during construction.

Housing Development or Housing Project:	Any real or personal property, project, building structure, or facilities work or undertaking, whether existing, new construction, remodeling, improvement, or rehabilitation, that meets or is designed to meet minimum property standards consistent with those prescribed in the federal HOME Program for the primary purpose of providing sanitary, decent, and safe dwelling accommodations for rent, lease, use, or purchase by persons and families of low and very low income and persons with special needs. This term may include buildings, structure, land, equipment, facilities, or other real or personal properties that are necessary, convenient, or desirable appurtenances, such as but not limited to streets, water, sewers, utilities, parks, site preparation, landscaping, stores, offices, and other non-housing facilities, such as administrative, community, and recreational facilities the Department determines to be necessary, convenient, or desirable appurtenances.
Housing Problems:	Households with housing problems include those that: (1) occupy units with physical defects; (2) meet the definition of overcrowded; or (3) meet the definition of cost burdened (>30 percent of income spent on housing).
Jurisdiction:	A unit of state or local government
Local Government:	A county; an incorporated municipality; a special district; any other legally constituted political subdivision of the State; a public, nonprofit housing finance corporation created under Chapter 394, Local Government code Texas revised Civil Statues; or a combination of any of the entities described here.
Low Income Neighborhood:	A neighborhood that has at least 51 percent of its households at or below 80 percent of AMFI.
Low Income:	Household with an annual income that does not exceed 80 percent of the area median family income for the area. HUD may establish income ceilings higher or lower than the 80 percent figure on the basis of HUD's findings that such variations are necessary because of prevailing levels of construction costs or fair market rents or unusually high or low family incomes.
Metropolitan Statistical Area (MSA):	US Census term used to identify a metropolitan area, which is a large population nucleus, together with adjacent communities having a high degree of social and economic integration with that core. Also described as an "urbanized area" of at least 50,000 inhabitants and/or a total metropolitan population of 100,000.
Migrant Farmworkers:	Persons who travel from place to place in order to take advantage of work opportunities provided by various agricultural seasons across the country.
Moderate Income:	Households whose incomes are between 81 percent and 115 percent of the median income for the area, as determined by HUD, with adjustments for smaller or larger families, except that HUD may establish income ceilings higher or lower than 95 percent of the prevailing levels of construction costs or fair market rents, or unusually high of low family incomes. May differ by program.
Neighborhood:	A geographic location designated in comprehensive plans, ordinances, or other local documents as a neighborhood, village, or similar geographical designation that is within the boundary but does not encompass the entire area of a unit of general local government. If the general local government has a population under 25,000, the neighborhood may, but need not, encompass the entire area of a unit of general local government.

Nonprofit Organization: A nonprofit corporation is created by filing articles of incorporation with the Secretary of State in accordance with the Texas Non-Profit Corporation Act. "Non-profit corporation" means a corporation in which no part of the earned income is distributable to members, directors, or officers. A nonprofit corporation may be created for any lawful purposes and are entitled to exemption from state or federal taxes.

***Olmstead*:** The US Supreme Court in *Olmstead v. L. C.* held that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the ADA.

Overcrowded: A housing unit containing more than one person per room. (US Census definition)

Participating Jurisdiction (PJ): Term for any state or local government that has been designated by HUD to receive HOME Program funds.

Person with Disability: (1) A person is considered to have a disability if the person has a physical, mental, or emotional impairment that (i) is expected to be of long-continued and indefinite duration; (ii) substantially impedes his or her ability to live independently; and (iii) is of such a nature that such ability could be improved by more suitable housing conditions. (2) A person will also be considered to have a disability if he or she has a developmental disability, which is a severe, chronic disability that (i) is attributable to a mental or physical impairment or combination of mental and physical impairments; (ii) is manifested before the person attains age twenty-two; (iii) is likely to continue indefinitely; (iv) results in substantial functional limitations in three or more of the following areas of major life activity; self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, and economic self-sufficiency, and (v) reflects the person's need for a combination and sequence of special interdisciplinary, or generic care, treatment, or other services that are lifelong or extended duration and are individually planned and coordinated.

Physical Defects: A housing unit lacking complete kitchen or bathroom facilities (US Census definition).

Poverty: Term to describe the poor. The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor or in poverty. Varies by year.

Predevelopment Costs: Costs related to a specific eligible housing project including: a) expenses necessary to determine project feasibility (including costs of an initial feasibility study), consulting fees, costs of preliminary financial applications, legal fees, architectural fees, engineering fees, engagement of a development team, site control, and title clearance; and b) reconstruction housing project costs that the board determines to be customary and reasonable, including but not limited to the costs of obtaining firm construction loan commitments, architectural plans and specifications, zoning approvals, engineering studies, and legal fees. Predevelopment costs <u>does not</u> include general operational or administrative costs.

Primary Housing Activity:	A means of providing or producing affordable housing - such as rental assistance, production, rehabilitation, or acquisition - that will be allocated significant resources and/or pursued intensively for addressing a particular housing need. (See also, "Secondary Housing Activity.")
Project:	A site or an entire building, including a manufactured housing unit or two or more buildings together with the site or sites on which the building or buildings is located, that are under common ownership, management, and financing (i.e., a project assisted with HOME funds, under a commitment by the owner, as a single undertaking). Project includes all the activities associated with the site and building. If there is more than one site associated with a project, the sites must be within a four-block area.
Project Completion:	All necessary title transfer requirements and construction work have been performed and the project, in HUD's judgment, complies with specified requirements (including the property standards adopted under HOME 92.251); the final drawdown has been disbursed for the project; and a project completion report has been submitted and processed in the Cash and Management Information System (92.501) as prescribed by HUD. For tenant-based rental assistance, the final drawdown has been disbursed for the project and the final payment certification has been submitted and processed in the Cash and Management Information System (92.502) as prescribed by HUD.
Project-Based Rental Assistance:	Rental Assistance provided for a project, not for a specific tenant. Tenants receiving project-based rental assistance give up the right to that assistance upon moving from the project.
Public Housing:	Any state, county, municipality, or other government entity or public body (or its agency or instrumentality) that is authorized to engage in or assist in the development or operation of low income housing. The term includes any Indian Housing Authority.
Qualified Allocation Plan:	The Qualified Allocation Plan is utilized by the Low Income Housing Tax Credit Program in setting threshold and selection criteria points for the allocation of tax credits.
Real Property:	All land, including improvements and fixtures and property of any nature appurtenant, or used in connection therewith, and every estate, interest, and right legal or equitable therein, including leasehold interests, terms for years, and liens by way of judgment, mortgage or otherwise.

Reconstruction: HUD guidelines regarding reconstruction are as follows: *The regulation defines reconstruction as the rebuilding of housing on the same foundation. Therefore, the foundation must be used, if possible. If the building has no foundation or if it is not possible to rebuild on the foundation, then the "foundation" will be the same location as the building that is being reconstructed. Construction of housing on a different portion of the land parcel would be new construction. The reconstructed housing must be substantially similar to the structure that is being replaced, regardless of whether an existing foundation is used (i.e. a single family house must be replaced with a structure containing the same number of units). Rooms may be added to a building outside of the foundation or footprint of the original housing if needed to meet local codes. However, additional units cannot be constructed as part of a reconstruction project. A structure must be present prior to reconstruction. This structure should be documented by pictures and an explanation of why rehabilitation of the existing structure is not feasible.*

Rental Assistance: Rental assistance payments provided as either project-based rental assistance or tenant-based rental assistance.

Rental Housing (Affordable): A rental housing unit is considered to be an affordable housing unit if it is occupied by a low income family or individual and bears a rent that is the lesser of (1) the Existing Section 8 Fair Market Rent (FMR) for comparable units in the area; or (2) 30 percent of the adjusted income of a family whose income equals 65 percent of the median income for the area, except that HUD may establish income ceilings higher or lower than 65 percent of the median because of prevailing levels of construction costs or fair market rents, or usually high or low family incomes.

Rural Area: Rural areas are considered areas outside of Metropolitan Statistical Areas. Definition may differ according to program.

Service Needs: The particular services identified for special needs populations, which may include transportation, personal care, housekeeping, counseling, meals, case management, personal emergency response, and other services to prevent premature institutionalization and assist individuals to continue living independently.

Severe Cost Burden: Refers to households and individuals who spend more than 50 percent of their gross income on housing costs.

Sheltered: Families and persons whose primary nighttime residence is a supervised, publicly or privately operated shelter, including emergency shelters, transitional housing for the homeless, domestic violence shelters, residential shelters for runaway and homeless youth, and any hotel/motel/apartment voucher arrangement paid because the person is homeless. This term does not include persons living in overcrowded or substandard conventional housing. Any facility offering permanent housing is not a shelter, nor are its residents homeless.

Special Needs Populations: In addition to the homeless, according to HUD, special needs populations include persons with disabilities, the elderly, persons with alcohol and/or drug addictions, persons with HIV/AIDS, and public housing residents. TDHCA also considers colonia residents and migrant farmworkers as special needs populations.

State Recipient:	A unit of local government designated by a state to receive HOME funds from the state in which to carry out HOME Program activities.
Subrecipient:	A public agency or nonprofit organization selected by the participating jurisdiction's HOME program. A public agency or nonprofit organization that receives HOME funds solely as a developer or owner of housing is not a sub-recipient. The participating jurisdiction's selection of a sub-recipient is not subject to the procurement procedures and requirements.
Substandard Condition but Suitable for Rehabilitation:	By local definition, dwelling units that do not meet standard conditions but are both financially and structurally feasible for rehabilitation. This does not include units that require only cosmetic work, correction or minor livability problems, or maintenance work. The jurisdiction must define this term (i.e., standard condition, financially and structurally feasible for rehab) and include this definition in the Appendix (Glossary of Terms) portion of its CHAS submission.
Substantial Rehabilitation:	Rehabilitation of residential property at an average cost for the project in excess of $25,000 per dwelling unit.
Supportive Housing:	Housing, including housing units and group quarters, that has a supportive environment and includes a planned service component.
Supportive Services:	Services provided to residents of supportive housing for the purpose of facilitating the independence of residents. Some examples are case management, medical or psychological counseling and supervision, child care, transportation, and job training.
Tenant-Based Rental Assistance:	A form of rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. The assistance is provided for the tenant, not for the project.
Threshold Criteria:	To be considered for funding, a housing project must first demonstrate that it meets all the threshold criteria set forth as follows: a) the project is consistent with the requirements established in this rule; b) the applicant provides evidence of their ability to carry out the project in the areas of financing, acquiring, rehabilitating, developing, or managing affordable housing developments; and c) the project addresses an identified housing need. This assessment will be based on statistical data, surveys, or other indicators of needs as appropriate.
Total Bonded Indebtedness:	All single family mortgage revenue bonds (including collateralized mortgage obligations), multifamily mortgage revenue bonds, and other debt obligations issued or assumed by the Department and outstanding as of August thirty-one of the year of calculation, excluding; all such bonds rated AAA by Moody's Investors Service or AAA by Standard & Poors Corporation for which the Department has no direct or indirect financial liability form the Department's unencumbered fund balances, and all other such bonds, whether rated or unrated, for which the Department has no direct or indirect financial liability from the Departments unencumbered fund balances, unless Moody's' or Standard & Poors has advised the Department in writing that all or portion of the bonds excluded by this clause should be included in a determination of total bonded indebtedness.

Unencumbered Fund Balances: A) The sum of the balances resulting at the end of each Department fiscal year form deducting the sum of bond indenture and credit rating restrictions and liabilities for the sum of amounts on deposit in indenture funds and other tangible and intangible assets of each department housing bond program, and b) uncommitted amounts of deposit in each independent or separate unrestricted fund established by the housing finance division or its administrative component units.

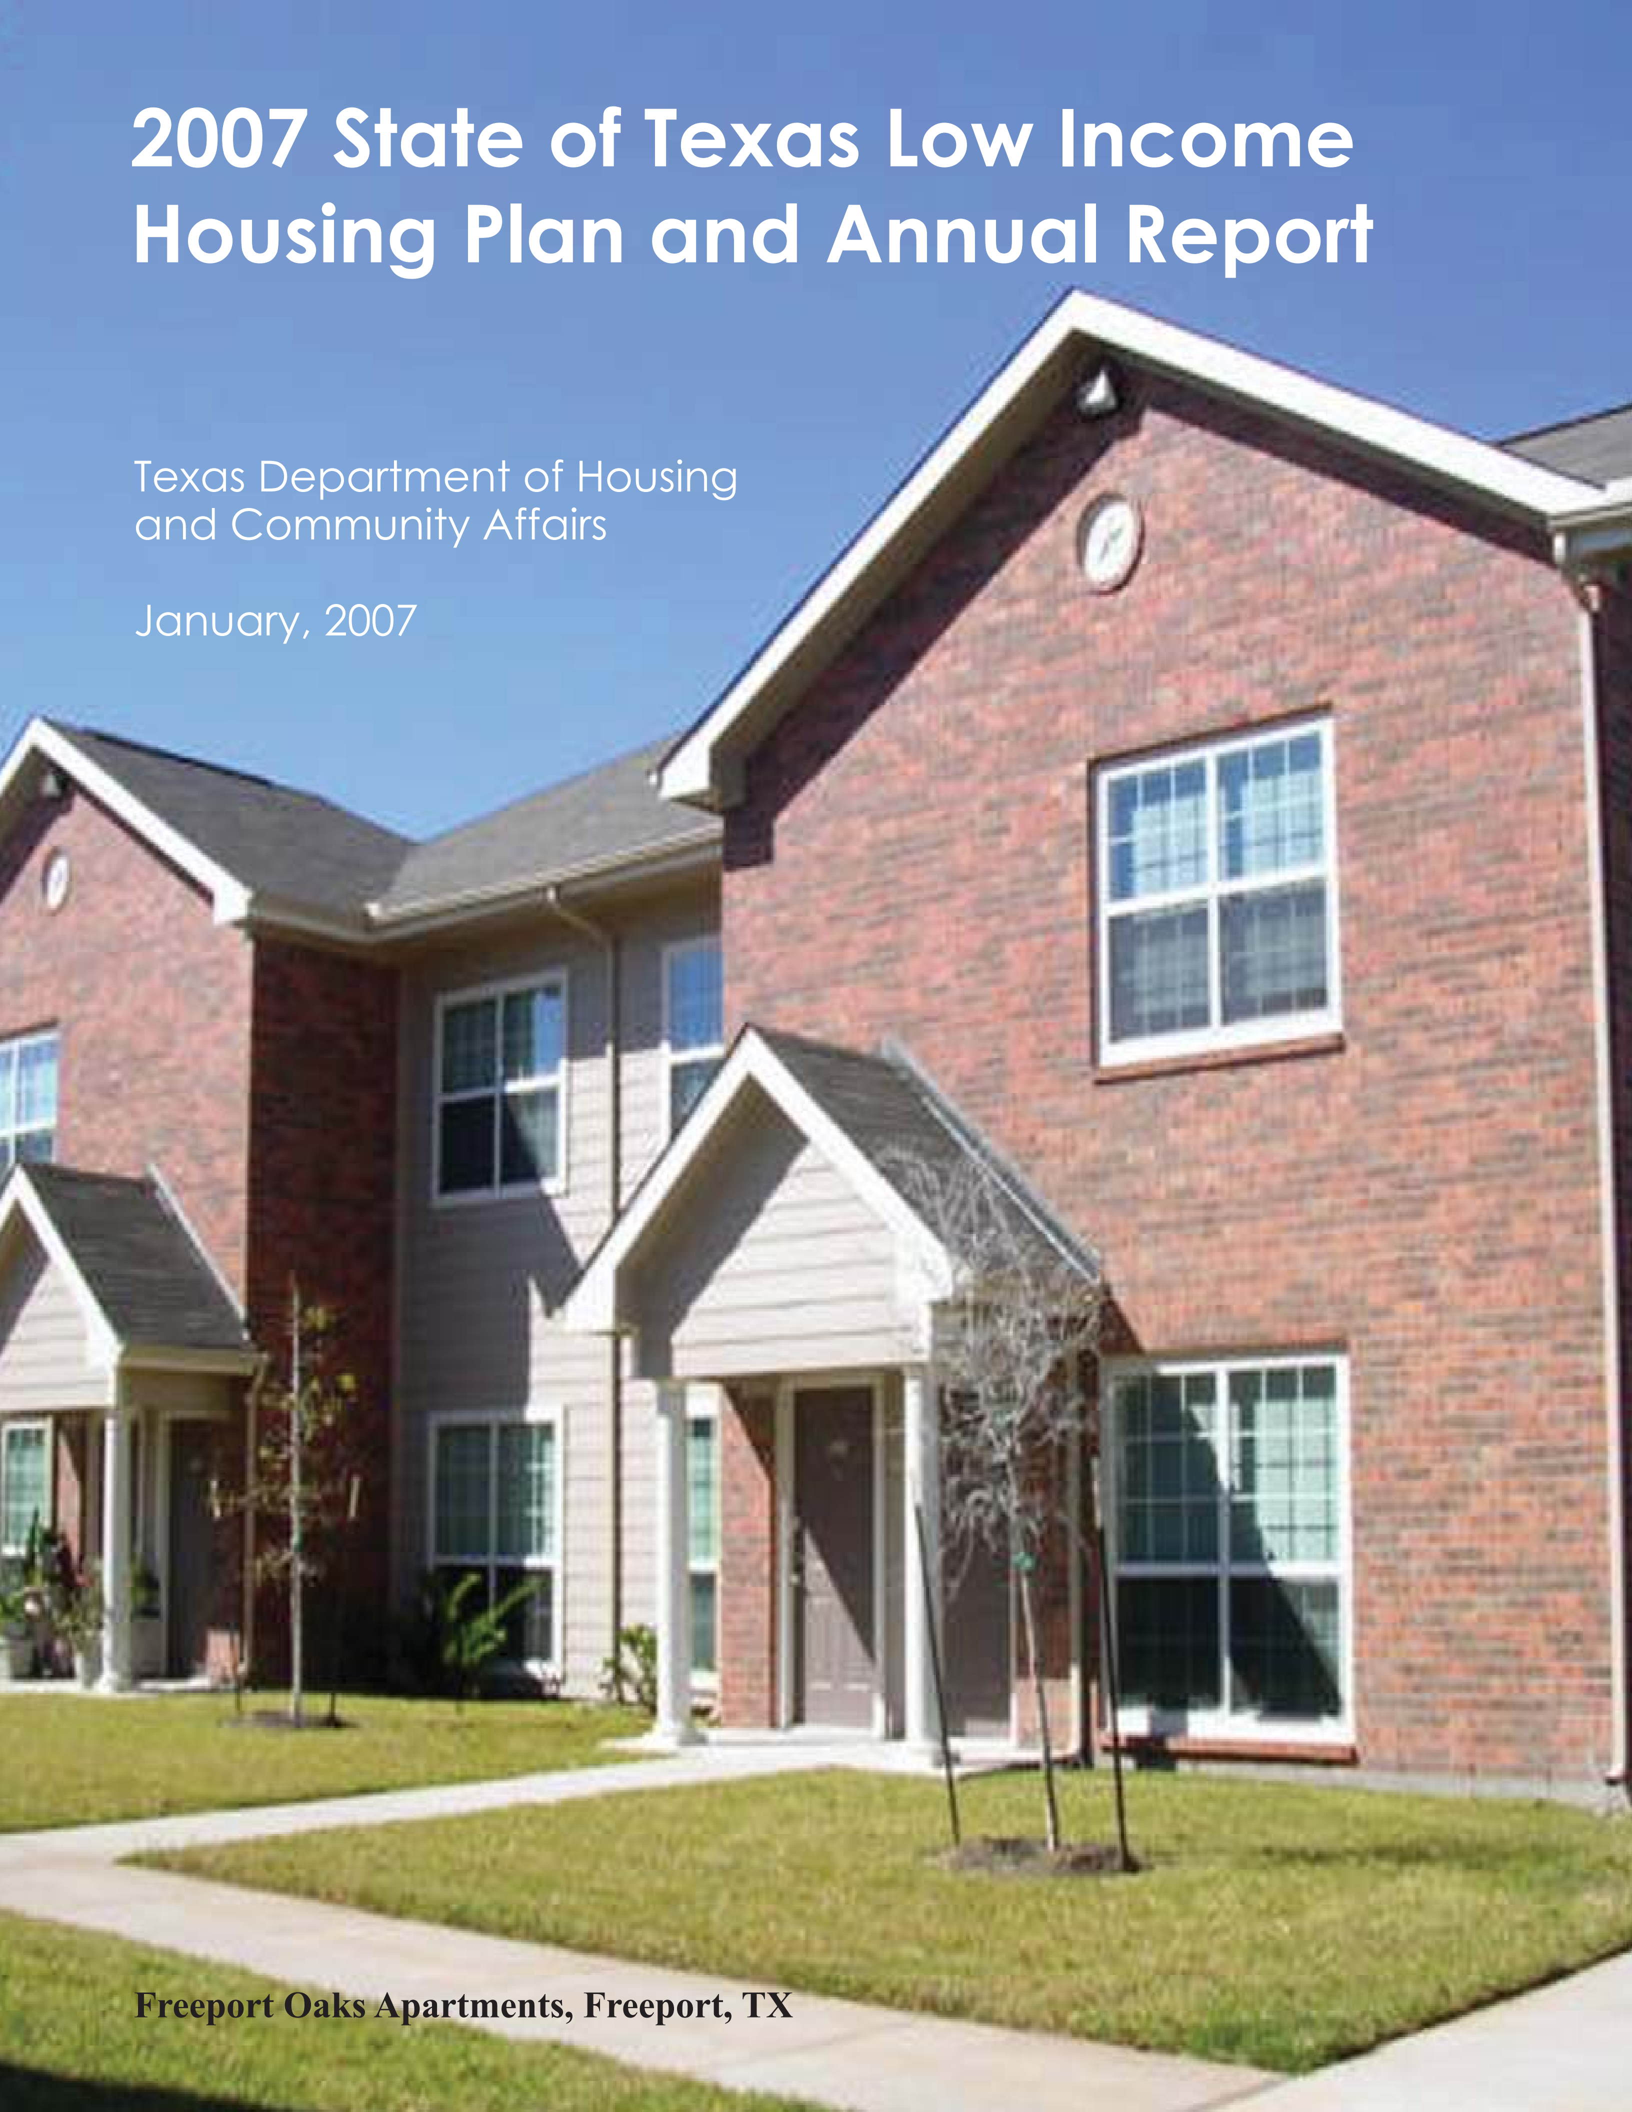
Very Low Income: Households whose incomes do not exceed 50 percent of the median area income for the area, as determined by HUD, with adjustments for smaller and larger families and for areas with unusually high or low incomes or where needed because of prevailing levels of construction costs or fair market rents. Definition may differ according to program; the State of Texas designates very-low income as 60 percent or less AMFI.

Work Disability: A condition that prevents a person from working or limits a person's ability to work.

2007 State of Texas Low Income Housing Plan and Annual Report

Texas Department of Housing and Community Affairs

January, 2007



Freeport Oaks Apartments, Freeport, TX

2007 State of Texas Low Income Housing Plan and Annual Report

TABLE OF CONTENTS

SECTION 1: INTRODUCTION

The Texas Department of Housing and Community Affairs (TDHCA, Department, Agency) is the State's lead agency responsible for affordable housing. TDHCA is also responsible for administering a wide variety of community affairs, energy assistance, and colonia programs and activities.

INSTITUTIONAL STRUCTURE

In 1991, the 72nd Texas Legislature created the Texas Department of Housing and Community Affairs. The Department's enabling legislation combined programs from the Texas Housing Agency, the Texas Department of Community Affairs, and the Community Development Block Grant Program from the Texas Department of Commerce.

On September 1, 1992, two programs were transferred to TDHCA from the Texas Department of Human Services: the Low Income Home Energy Assistance Program (LIHEAP) and the Emergency Nutrition and Temporary Emergency Relief Program (ENTERP). Effective September 1, 1995, in accordance with House Bill 785, regulation of manufactured housing was transferred to the Department. In accordance with House Bill 7, effective September 1, 2002, the Community Development Block Grant (CDBG) and Local Government Services programs were transferred to the newly created Office of Rural Community Affairs (ORCA). However, TDHCA, through an interagency contract with ORCA, administers 2.5 percent of the CDBG funds used for the Self-Help Centers along the Texas-Mexico border. Effective September 1, 2002, in accordance with Senate Bill 322, the Manufactured Housing Division became an independent entity administratively attached to TDHCA.

AGENCY MISSION AND CHARGE

TDHCA's mission is as follows: To help Texans achieve an improved quality of life through the development of better communities.

TDHCA accomplishes this mission by administering a variety of housing and community affairs programs. A primary function of TDHCA is to act as a conduit for federal grant funds for housing and community services. However, because several major housing programs require the participation of private investors and private lenders, TDHCA also operates as a housing finance agency.

More specific policy guidelines are provided in §2306.002 of TDHCA's enabling legislation.

> *(a) The legislature finds that:*
>
> > *(1) every resident of this state should have a decent, safe, and affordable living environment;*
> >
> > *(2) government at all levels should be involved in assisting individuals and families of low income in obtaining a decent, safe, and affordable living environment; and*

> *(3) the development and diversification of the economy, the elimination of unemployment or underemployment, and the development or expansion of commerce in this state should be encouraged.*

(b) The highest priority of the department is to provide assistance to individuals and families of low and very low income who are not assisted by private enterprise or other governmental programs so that they may obtain affordable housing or other services and programs offered by the department.

The TDHCA Governing Board and staff are committed to meeting the challenges presented by examining the housing needs and presenting a broad spectrum of housing and community affairs programs based on the input of thousands of Texans. TDHCA's services address a broad spectrum of housing and community affairs issues that include homebuyer assistance, the rehabilitation of single family and multifamily units, rental assistance, the new construction of single family and multifamily housing, special needs housing, transitional housing, and emergency shelters. Community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance.

The Department is primarily a pass-through funding agency that collects funds from federal and state programs to use the combination of resources efficiently. To further the goal of providing a decent, safe, and affordable living environment for families who need assistance, the Department uses a series of competitive programs that focus on obtaining the public policy goals. This distribution is done using a number of techniques.

- Almost all housing development, rehabilitation, and rental assistance related funding is awarded through formal competitive Request for Proposals (RFP) and Notice of Funding Availability (NOFA) processes.
- First time homebuyer and down payment assistance is allocated through a network of participating lenders.
- Community Affairs' funds are predominantly allocated through a network of community based organizations who receive their funding on an annual, ongoing basis.

Funding sources for the services listed above include the US Department of Housing and Urban Development (HUD), US Treasury Department, US Department of Health and Human Services, and US Department of Energy, and State of Texas general revenue funds. With this funding, TDHCA strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process. Recognizing that all the need may not ever be met, the Department looks at where the federal programs and state resources at its disposal could provide the most benefit by managing these limited resources to have the greatest impact.

TDHCA is only one organization in a network of housing and community services providers located throughout the state. This document focuses on programs within TDHCA's jurisdiction, which are intended to either work in cooperation with or as complements to the services provided by other organizations.

ADMINISTRATIVE STRUCTURE

Agency programs are grouped into three categories: Single Family Finance Production, Multifamily Finance Production, and Community Affairs. In addition, TDHCA includes the following divisions: Administrative Support; Bond Finance; Financial Administration; Information Systems; Internal Audit; Legal Services; Portfolio Management and Compliance; Real Estate Analysis; the Division of Policy and Public Affairs; and the Office of Colonia Initiatives. The Manufactured Housing Division is administratively attached to TDHCA, though it is an independent entity with its own governing board.

The following table outlines TDHCA's programs. For more detailed program information, please see "TDHCA Program Plans" in the Action Plan section of this document.

Activity	Program	Program Description	Eligible Households
Multifamily Development	HOME Investment Partnerships Program (HOME)	Loans or grants to develop or preserve affordable rental housing	<80% AMFI
	Housing Trust Fund (HTF)	Loans or grants for rental housing development, predevelopment, and other industry innovations	<80% AMFI
	Housing Tax Credit (HTC)	Tax credits to develop or preserve affordable rental housing	<60% AMFI
	Multifamily Bond (MFB)	Loans to develop or preserve affordable rental housing	<60% AMFI
Rental Assistance	HOME Program	Loans or grants for entities to provide tenant-based rental assistance for two years	<80% AMFI
	Section 8 Housing Choice Vouchers	Acts as a public housing authority to offer tenant-based rental assistance vouchers in certain areas	<50% AMFI
Single Family Development	HOME Program	Loans or grants for entities to construct single family housing and offer down payment assistance	<80% AMFI
	Colonia Model Subdivision	Loans for Community Housing Development Organizations (CHDOs) to develop residential subdivisions as an alternative to colonias	<60% AMFI
Home Purchase Assistance and Home Repair Assistance	Contract for Deed Conversion Initiative	Facilitates colonia-resident ownership by converting contracts for deed into traditional mortgages	<60% AMFI
	Grant Assistance	Grants in conjunction with the First Time Homebuyer Program for down payment and closing costs	<60% AMFI
	HOME Program	Loan and grants for entities to offer down payment and closing cost assistance	<80% AMFI
	HOME Program	Loans and grants for entities to provide home repair assistance	<80% AMFI
	Lone Star Loan	Market-rate loans with second liens for down payment assistance	<115% AMFI
	Mortgage Credit Certificate	Annual tax credit based on the interest paid on the homebuyer's mortgage loan	<115% AMFI
	Texas Bootstrap Loan	Funds entities to offer owner-builder loans programs	<60% AMFI
	Texas First Time Homebuyer	Low-interest loans for first time homebuyers	<115% AMFI
Homebuyer Education	Colonia Consumer Education Services	Homebuyer education offered through Colonia Self-Help Centers and Office of Colonia Initiatives (OCI) field offices	<115% AMFI (All)
	Texas Statewide Homebuyer Education	Training for nonprofits to provide homebuyer education	<115% AMFI (All)
Community Affairs Activities	Community Services Block Grant (CSBG)	Funds local agencies to provide essential services and poverty programs	<50% AMFI
	Emergency Shelter Grants (ESGP)	Funds entities to provide shelter and related services to the homeless	<30% AMFI (Homeless)
	Community Food and Nutrition (CFNP)	Distributes surplus food commodities and supports feedings	<80% AMFI
	Comprehensive Energy Assistance (CEAP)	Funds local agencies to offer energy education, financial assistance, and HVAC replacement	<50% AMFI
	Weatherization Assistance (WAP)	Funds local agencies to provide minor home repairs to increase energy efficiency	<50% AMFI
Manufactured Housing	Manufactured Housing Division	Regulates the manufactured housing industry. Licenses manufactured housing professionals, titles homes, inspects homes, and investigates manufactured housing complaints.	All

2007 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

The *2007 State of Texas Low Income Housing Plan and Annual Report* (SLIHP, Plan) is prepared annually in accordance with §2306.072–2306.0724 of the Texas Government Code (TGC). This statute requires that TDHCA provide a comprehensive statement of activities in the preceding year, an overview of statewide housing needs, and a resource allocation plan to meet the state's housing needs. It offers policy makers, affordable housing providers, and local communities a comprehensive reference on statewide housing need, housing resources, and performance-based funding allocations. The format is intended to help these entities measure housing needs, understand general housing issues, formulate policies, and identify available resources. As such, the Plan is a working document whose annual changes reflect input received throughout the year.

The Plan is organized into eight sections:

- *Introduction:* An overview of TDHCA and the Plan
- *Annual Report:* A comprehensive statement of activities for 2006, including performance measures, actual numbers served, and a discussion of TDHCA's Strategic Plan goals
- *Housing Analysis:* An analysis of statewide and regional demographic information, housing characteristics, and housing needs
- *TDHCA Action Plan:* A description of TDHCA's initiatives, resource allocation plans, program descriptions, and goals
- *Public Participation:* Information on the Plan preparation and a summary of public comment
- *Colonia Action Plan:* A revised biennial plan for 2006–2007, which discusses housing and community development needs in the colonias, describes TDHCA's policy goals, summarizes the strategies and programs designed to meet these goals, and describes projected outcomes to support the improvement of living conditions of colonia residents
- *Texas State Affordable Housing Corporation (TSAHC) Plan:* This section outlines TSAHC's plans and programs for 2006, and is included in accordance with legislation
- *Appendix:* Includes TDHCA's enabling legislation and a glossary of selected terms

Because the Plan's legislative requirements are rather extensive, TDHCA has prepared a collection of separate publications in order to fulfill requirements. This allows the requester to receive specific information in a format that is easier to use and cost-effective for both TDHCA and interested parties through lower printing and distribution costs. TDHCA produces the following publications in compliance with §2306.072–2306.0724 of the Texas Government Code:

- State of Texas Low Income Housing Plan and Annual Report
- Basic Financial Statements and Operating Budget: Produced by TDHCA's Financial Administration Division and fulfill §2306.072(c)(2)

- TDHCA Program Guide: A description of TDHCA's housing programs and other state and federal housing and housing-related programs, which fulfills §2306.0721(c)(4) and §2306.0721(c)(10)
- TDHCA Housing Sponsor Report: A report that provides property and occupant profiles of developments that have received assistance from TDHCA, which fulfills §2306.072(c)(6), §2306.072(c)(8), and §2306.0724

SECTION 2: ANNUAL REPORT

The Annual Report required by §2306.072 of the Texas Government Code includes the following sections:

- TDHCA's Operating and Financial Statements
- *Statement of Activities*: Describes TDHCA activities during the preceding year that worked to address housing and community service needs
- *Statement of Activities by Region*: Describes TDHCA activities by region
- *Participation in TDHCA Programs*: Discusses efforts to ensure that individuals of low income and their community-based institutions participate in TDHCA programs
- *Citizen Participation in Program Planning*: Discusses affirmative efforts to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process
- *Housing Sponsor Report*: Describes fair housing opportunities offered by TDHCA's multifamily development inventory
- *Analysis of the Distribution of Tax Credits*: Provides an analysis of the sources, uses, and geographic distribution of housing tax credits
- *Average Rents Reported by County*: Provides a summary of the average rents reported by the TDHCA multifamily inventory

OPERATING AND FINANCIAL STATEMENTS

TDHCA's Operating Budgets and Basic Financial Statements are prepared and maintained by the Financial Administration Division. For copies of these reports, visit http://www.tdhca.state.tx.us/finan.htm.

STATEMENT OF ACTIVITIES

The Department has many programs that provide an array of services. This section of the Plan highlights TDHCA's activities and achievements during the preceding fiscal year through a detailed analysis of the following:

- TDHCA's performance in addressing the housing needs of low, very low, and extremely low income households
- The diversity of serviced delivered to households
- TDHCA's progress in meeting its housing and community services goals

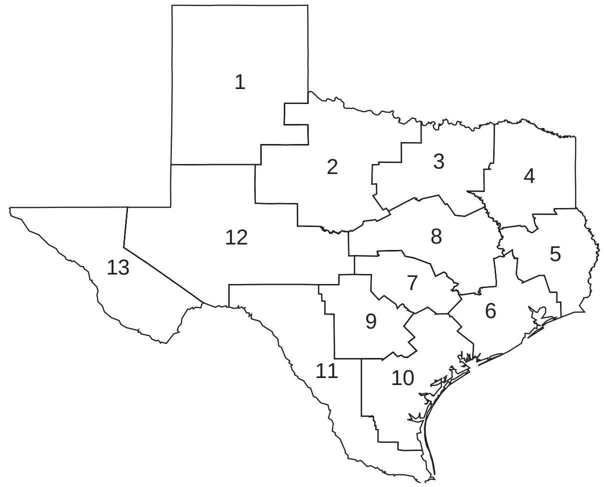


Figure 2.1 State Service Regions

This analysis is provided at the State level and within each of the 13 service regions TDHCA uses for planning purposes (see Figure 2.1). For general information about each region, including housing needs and housing supply, please see the Housing Analysis section of this document.

FUNDING COMMITMENTS AND HOUSEHOLDS SERVED BY ACTIVITY AND PROGRAM

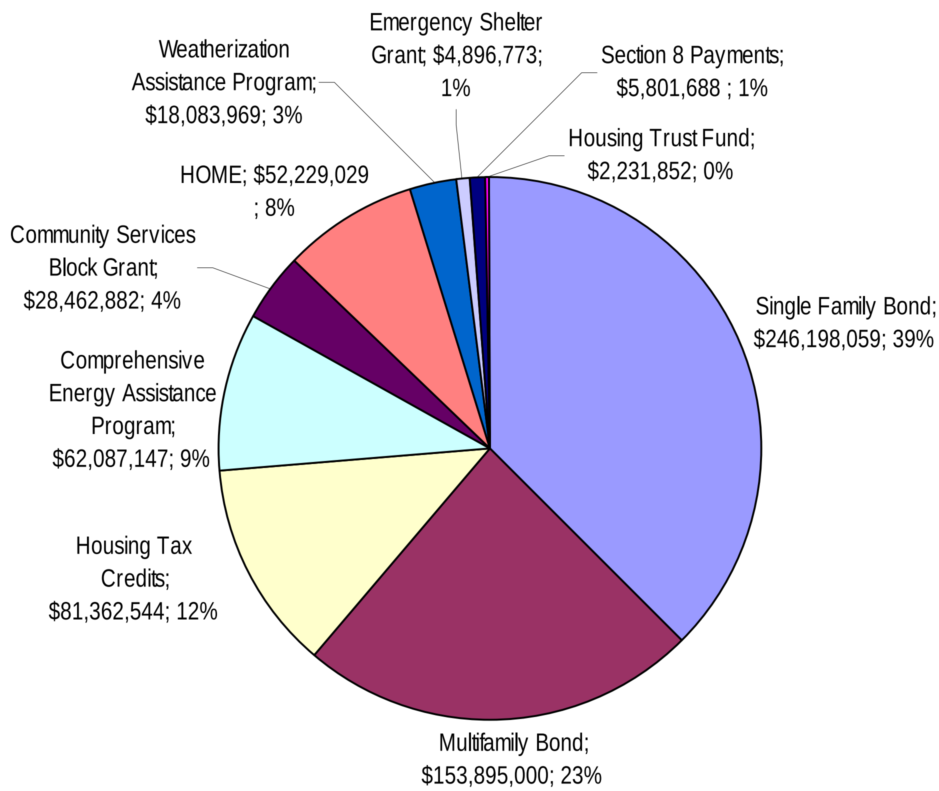
For the state and each region, a description of funding allocations, amounts committed, target numbers, and actual number of persons or households served for each program is provided. Along with the summary performance information, data on the following activity subcategories is provided.

- Renter
  - o New Construction activities support multifamily development, such as the funding of developments, capacity building, and predevelopment funding.
  - o Rehabilitation Construction activities support the acquisition, rehabilitation, and preservation of multifamily units.
  - o Tenant Based Assistance is direct rental payment assistance.
- Owner
  - o Single family development includes funding for housing developers, nonprofits, or other housing organizations to support the development of single family housing.
  - o Single family financing and homebuyer assistance helps households purchase a home, through such activities as mortgage financing, and down payment assistance.
  - o Single family owner-occupied assistance helps existing homeowners who need home rehabilitation and reconstruction assistance.
- Community services includes supportive services, energy assistance, and homeless assistance activities.

In FY 2006, TDHCA receive $655,248,943 in total funds. Almost all of this funding, 99 percent of the total, came from federal sources. TDHCA committed $682,702,107 in funding for activities that predominantly benefited extremely low, very low, and low income individuals. The chart below displays the distribution of this funding by program activity.

Total Funding By Program, FY 2006

Total Funds Committed: $655,248,943



Funding and Households/Persons Served by Activity, FY 2006, All Activities

*Note: For these programs, figures are by individuals served, not households

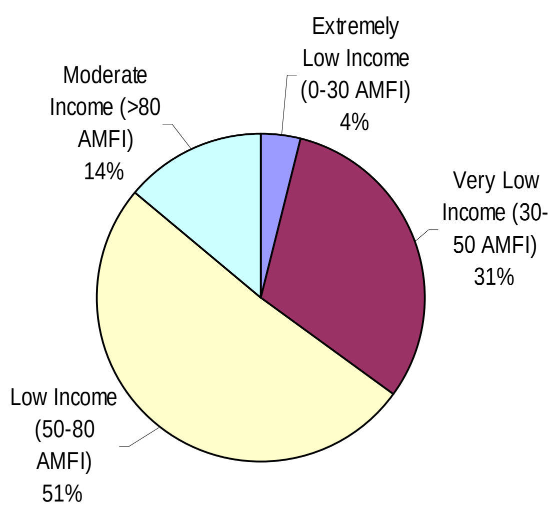
FUNDING COMMITMENTS AND HOUSEHOLDS SERVED BY INCOME GROUP

The SLIHP uses the following subcategories to refer to the needs of households or persons within specific income groups.

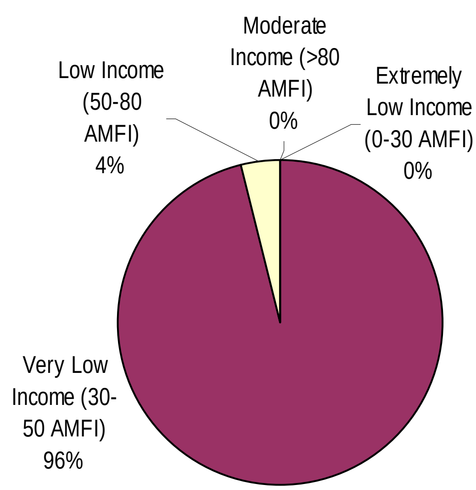
- Extremely Low Income (ELI): 0% to 30% area median family income (AMFI)
- Very Low Income (VLI): 31% to 50% (AMFI)
- Low Income (LI): 51% to 80% (AMFI)
- Moderate Income and Up (MI): >80% (AMFI)

The vast majority of households and individuals served through CEAP, WAP, and ESGP earn less than 30 percent area median family income. However, federal tracking of assistance from these programs is based on poverty guidelines, which do not translate easily to an AMFI equivalent. For conservative reporting purposes, assistance in these programs is reported in the VLI category.

Total Funding by Income Level, FY 2006



Total Households Served by Income Level, FY 2006



Funding and Households/Persons Served by Income Category, FY 2006

All Activities

Activity	Committed Funds	Number of Households/ Individuals Served	% of Total Committed Funds	% of Total Households/ Individuals Served
Extremely Low Income (0-30 AMFI)	$27,548,954	2,399	4%	<1%
Very Low Income (30-50 AMFI)	$200,076,608	491,076	31%	96%

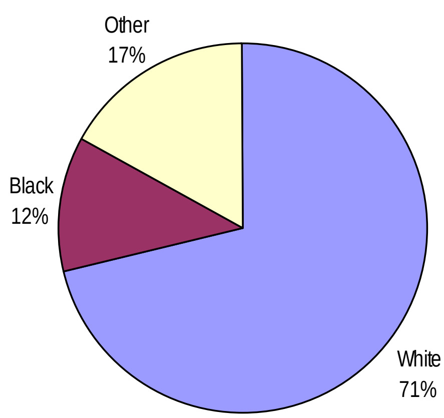
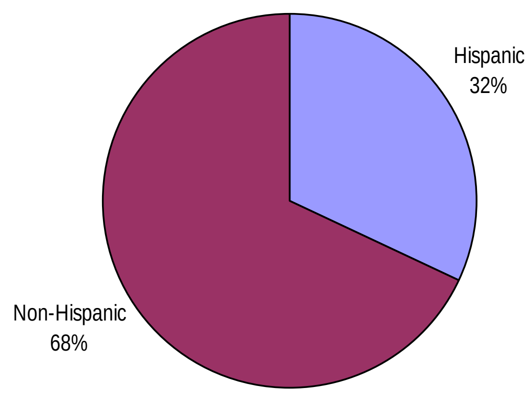
RACIAL AND ETHNIC COMPOSITION OF HOUSEHOLDS RECEIVING ASSISTANCE

As required by legislation, TDHCA reports on the racial and ethnic composition of individuals and families receiving assistance. These demographic categories are delineated according to the standards set by the U.S. Census. Accordingly, "race" is broken down into three subclassifications: White, Black, and Other. "Other" includes races other than White and Black, as well as individuals with two or more races. As ethnic origin is considered to be a separate concept from racial identity, the Hispanic population is represented in a separate chart. Persons of Hispanic origin may fall under any of the racial classifications. Households assisted through each TDHCA program or activity have been delineated according to these categories. Regional analyses of this racial data are included in the Statement of Activities by Uniform State Service Region section that follows. Note that the population racial composition charts examine individuals, while the many program racial composition charts examine households.

Racial Composition of the State of Texas | **Ethnic Composition of the State of Texas**

20,851,820 Total Individuals





Racial and ethnic data on housing programs is presented below under three general categories: Multifamily Rental Development Programs, Rental Assistance Programs, and Homeowner Programs. The Community Affairs programs, including the Weatherization Assistance Program, Comprehensive Energy Assistance Program, Community Services Block Grant program, and Emergency Shelter Grants Program allocate funding to several entities with service areas that span across two or more regions, so racial data for these programs is reported by entity. Office of Colonia Initiatives programs are reported under the following funding sources: HOME Program for Contract for Deed loans, Single Family Bond for some Contract for Deed loans and some Texas Bootstrap Program loans, and the Housing Trust Fund for some Texas Bootstrap loans.

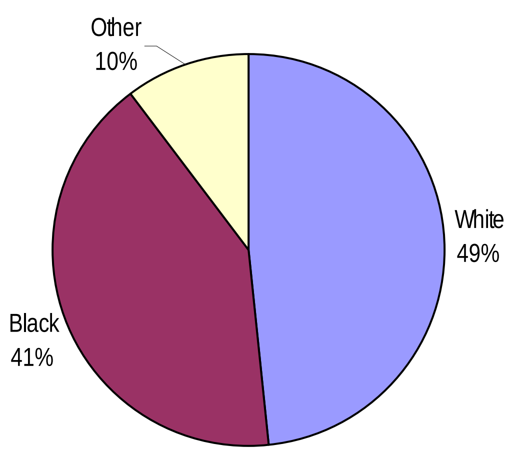
Housing Programs

Multifamily Rental Development

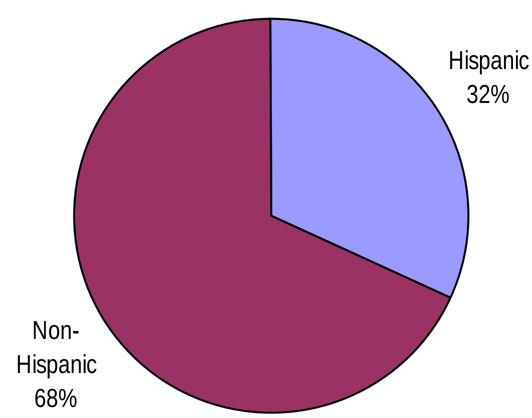
Multifamily properties receive funding through one or more of the following TDHCA programs: the Housing Tax Credit Program, Housing Trust Fund, HOME Investment Partnership Program, and Multifamily Bond Program. Data for these programs is collected from the 2005 Fair Housing Sponsor Report, which TDHCA-funded housing developments submit to the Agency every year. The report includes information about the property, including the racial composition of the tenants residing there as of December 31 of each year. Accordingly, the 2006 report is a snapshot of property characteristics as of December 31, 2005.

It should be noted that the Housing Sponsor Report does not report on or represent all units financed by TDHCA. Some submitted reports describe properties under construction, which do not yet have occupied units. Some properties did not submit a report, and still others did not fill out the report accurately. Therefore, TDHCA is left with usable data for only a portion of existing multifamily units. For racial analysis, only 82% of the unit data received from the monitored properties could be used, while only 49% of the data was usable for ethnicity analysis. As a result, the following charts present a picture of race and ethnicity based on samples, and may not represent actual percentages. TDHCA is implementing changes in the Housing Sponsor Report to ensure increased quality of future data collection.

Racial Composition of Households Residing in TDHCA-Funded Multifamily Developments



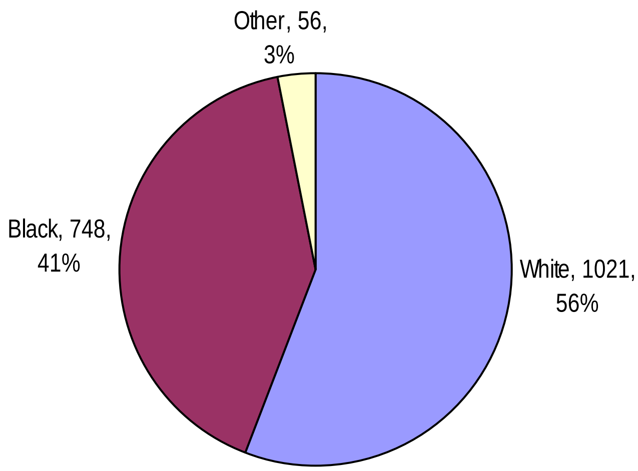
Ethnic Composition of Households Residing in TDHCA-Funded Multifamily Developments



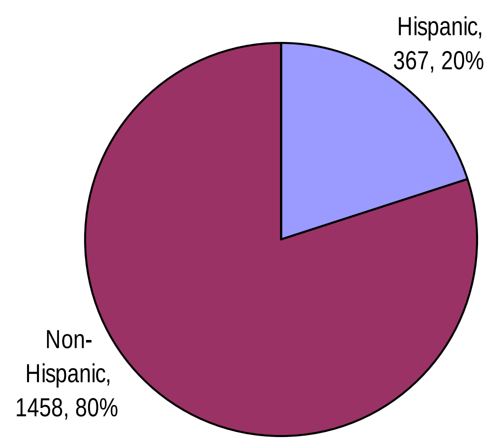
Rental Assistance

TDHCA's rental assistance comes from two sources: the Tenant Based Rental Assistance Program (TBRA) and the Section 8 Housing Choice Voucher Program. The following charts depict the racial and ethnic composition of households receiving assistance from these two rental assistance programs combined.

Racial Composition of Households Receiving Rental Assistance



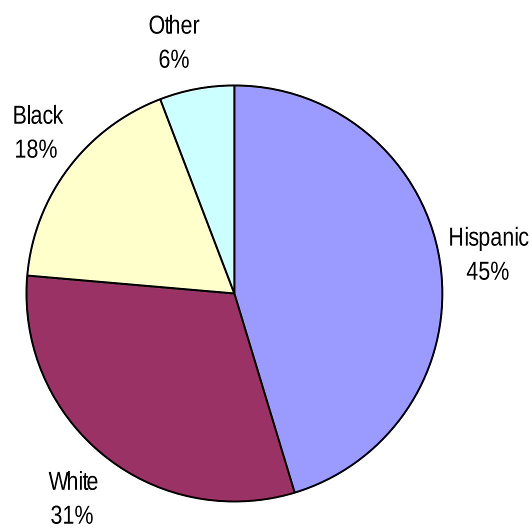
Ethnic Composition of Households Receiving Rental Assistance



Homeowner Programs

TDHCA homeowner assistance comes in the form of three programs: the Single Family Bond Program, HOME Owner-Occupied Home Repair Program, and HOME Homebuyer Assistance Program. The following chart depicts the racial and ethnic composition of households receiving assistance from these three programs combined. Due to the data reporting techniques of the Single Family Bond Program, race and ethnicity are combined into one category.

Racial & Ethnic Composition of Households Receiving Homeowner Assistance



Community Affairs Programs

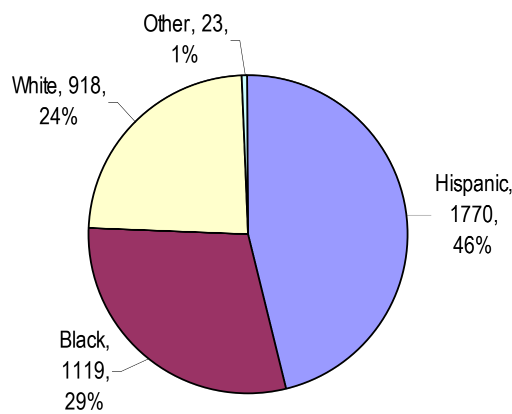
Due to the data reporting techniques of the Weatherization Assistance Program (WAP), Energy Assistance Program (CEAP), and Community Services Block Grant (CSBG) Program race and ethnicity are combined into one category. The Emergency Shelter Grant Program (ESGP) reports race and ethnicity as two separate categories

Weatherization Assistance Program

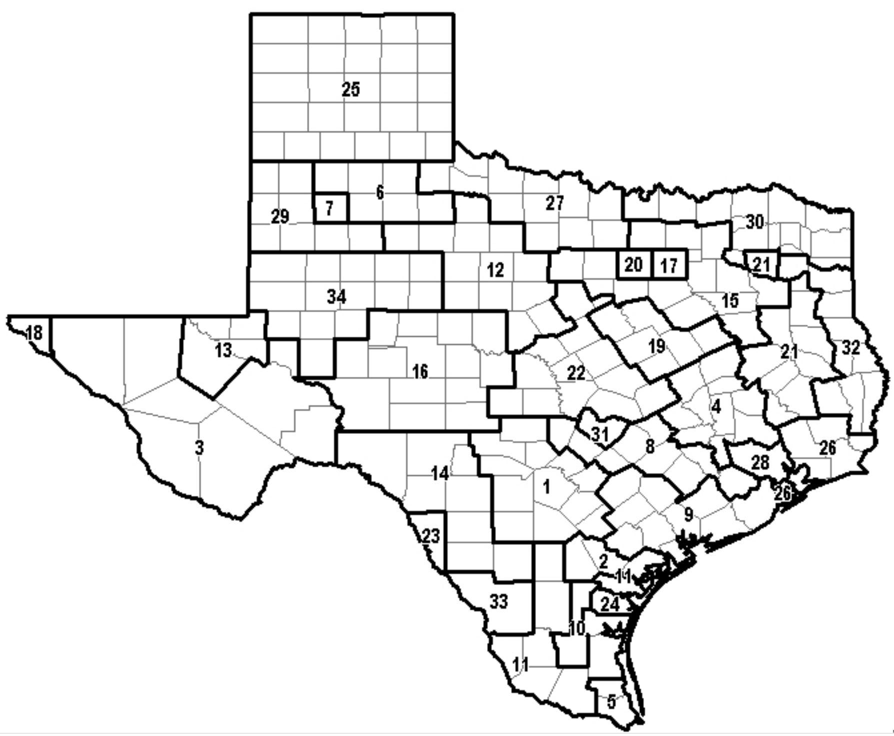
The Weatherization Assistance Program (WAP) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. Because of this, WAP racial composition data for FY 2006 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial and ethnic composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

Racial and Ethnic Composition of WAP Assisted Households, Statewide, FY 2006

3,830 Total Households



WAP Subcontractor Service Areas, FY 2006



Racial and Ethnic Composition of Households Receiving WAP Assistance by Subcontractor, Statewide, FY 2006

Comprehensive Energy Assistance Program

The Comprehensive Energy Assistance Program (CEAP) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. Because of this, CEAP racial composition data for FY 2006 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

Community Services Block Grant Program

The Community Services Block Grant Program (CSBG) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. In addition, some CSBG subcontractors have been awarded funding for special projects that overlap existing service areas. Because of this, CSBG racial composition data for FY 2006 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

PROGRESS IN MEETING TDHCA HOUSING AND COMMUNITY SERVICES GOALS

The goals, strategies, and objectives established in the Legislative Appropriations Act, the TDHCA *Strategic Plan*, and the *State of Texas Consolidated Plan*, guide TDHCA's annual activities through the establishment of objective performance measures. TDHCA's resulting goals are as follows:

1) Increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families
2) Promote improved housing conditions for extremely low, very low, and low income households by providing information and technical assistance.
3) Improve living conditions for the poor and homeless and reduce the cost of home energy for very low income Texans.
4) Ensure compliance with the TDHCA's federal and state program mandates.
5) Protect the public by regulating the manufactured housing industry in accordance with state and federal laws.
6) Target its housing finance programs resources for assistance to extremely low income households.
7) Target its housing finance resources for assistance to very low income households.
8) Provide contract for deed conversions for families who reside in a colonia and earn 60 percent or less of the applicable area median family income
9) Work to address the housing needs and increase the availability of affordable and accessible housing for persons with special needs through funding, research, and policy development efforts.

To avoid duplication of information, progress made towards meeting those goals, the upcoming year's goals, and information on TDHCA's actual performance in satisfying in FY 2006 goals and strategies is provided in Section 4: Action Plan.

STATEMENT OF ACTIVITIES BY UNIFORM STATE SERVICE REGION

This section describes TDHCA's FY 2006 activities by Uniform State Service Region. The regional tables do not include information for WAP, CEAP, ESGP, CSBG, and CFNP because figures are not available for these programs at the regional level. Additionally, for purposes of reporting, Office of Colonia Initiatives figures do not appear as an independent category, but rather the figures are grouped under their respective funding sources. For example, most Contracts for Deed Conversion are reported under HOME Program Homebuyer Assistance.

As required by legislation, TDHCA reports on the racial composition of individuals and families receiving assistance. Regional information has been organized into three general categories of housing activity type.

Multifamily Rental Development. Includes the Housing Tax Credit Program, the Multifamily Bond Program, Housing Trust Fund multifamily activities, and HOME multifamily activities

Rental Assistance. Includes the Section 8 Program and HOME Tenant Based Rental Assistance

Homeowner Programs. Includes the First Time Homebuyer Program, HOME Owner-Occupied Housing Assistance , HOME Homebuyer Assistance, and Housing Trust Fund single Family activities (Bootstrap Loan Program)

For more information on racial reporting and these categories, please see "Racial Composition of Households Receiving Assistance" under the Statement of Acitivites section.

REGION 1

TDHCA allocated $5,067,450 in the region in FY 2006. Multifamily development accounted for the largest segment of this total with 53%. "Very Low Income" households was the most served income group, receiving 36% of the funding in the region. Note: Because loan servicers do not record race and ethnicity data separately, data for homeowner programs are presented in one combined chart.

REGION 12

TDHCA allocated $3,170,939 in the region in FY 2006. Homeowner programs accounted for the largest segment of this total with 50%. "Very Low Income" households was the most served income group, receiving 58% of the funding in the region. Note: Because loan servicers do not record race and ethnicity data separately, data for homeowner programs are presented in one combined chart.

PARTICIPATION IN TDHCA PROGRAMS

Texas is an economically, regionally, and demographically diverse state. The Department recognizes this by establishing criteria to distribute funds based on the priorities established in TDHCA's governing statute. It is incumbent upon TDHCA to increase the public's awareness of available funding opportunities so that its funds will reach those in need across the state.

Below are the approaches taken by TDHCA to achieve this end:

- Throughout the year, TDHCA staff reach out to interested parties informational workshops and conferences across the state to share information about TDHCA programs. Organizations interested in becoming affordable housing providers are actively encouraged to contact the TDHCA for further technical assistance in accessing TDHCA programs.
- The Department's Division of Policy and Public Affairs is responsible for media releases, attends conferences and maintains conference information booths on behalf of TDHCA, as well as coordinates media interviews and speaking events.
- The TDHCA *Program Guide* provides a comprehensive, statewide housing resource guide for both individuals and organizations across the state. The *Program Guide* provides a list of housing and housing-related programs operated by TDHCA, HUD, and other federal and state agencies.
- The TDHCA website, through its provision of timely information to consumers, is one of TDHCA's most successful marketing tools and affordable housing resources.
- TDHCA also operates a listserv email service, where subscribed individuals and entities can receive email updated on TDHCA information, announcements, and trainings.
- A comprehensive database, including public housing authorities (PHAs), community development housing organizations (CHDOs), community development corporations (CDCs), area agencies on aging (AAAs), homebuyer education providers, local governments, and other community-based organizations, is used to streamline TDHCA efforts to inform interested parties of available funding, public hearings, and other activities.
- TDHCA establishes or serves on a wide variety of committees and workgroups, which serve as valuable resources to gather input from people working at the local level. These groups share information on affordable housing needs and available resources and help TDHCA to prioritize these needs.

CITIZEN PARTICIPATION IN PROGRAM PLANNING

TDHCA values and relies on community input to direct resources to meet its goals and objectives. In an effort to provide the public with an opportunity to more effectively give input on TDHCA's policies, rules, planning documents, and programs, TDHCA has consolidated its public hearings. Each year there will be at least one hearing per Uniform State Service Region that will cover all TDHCA programs, and an additional Board hearing is held with the consolidated hearings so that citizens may provide comment directly to the Board members. Staff is available at each regional hearing to answer questions and lend technical assistance to attendees. In addition to these 13 hearings, individual program sections hold various hearings and program workshops throughout the year. Furthermore, the TDHCA Board accepts extensive public comment on programmatic and related policy agenda items at monthly board meetings.

TDHCA ensures that all programs follow the citizen participation and public hearing requirements as outlined in the Texas Government Code. Hearing locations are accessible to all who choose to attend and are held at times accessible to both working and non-working persons. A database has been developed that includes citizen and nonprofit organizations, local governments, state legislators, public housing authorities, and local public libraries so that, when a public hearing or public comment period is scheduled, all interested parties are notified. Additionally, pertinent information is posted in the *Texas Register*, in *Breaking Ground* (the TDHCA newsletter), on TDHCA's website, in several association newsletters, and in the newspapers that are local to the hearing location. Participation and comments are encouraged and can be submitted either at a public hearing or in writing via mail, fax, email, and, in some cases, directly at the TDHCA website.

For information on the citizen participation process for the *2007 State of Texas Low Income Housing Plan and Annual Report*, please see Section 5: Public Participation.

FAIR HOUSING SPONSOR REPORT ANALYSIS

TDHCA requires that housing developments of 20 units or more that receive financial assistance from TDHCA submit an annual housing sponsor report. This report includes the contact information for each property, the total number of units, the number of accessible units, the rents for units by type, the racial composition information for the property, the number of units occupied by individuals receiving supported housing assistance, the number of units occupied delineated by income group, and a statement as to whether there have been fair housing violations at the property. This information depicts the property information as of a specific date, December 31, of each year.

Because of the extensive nature of the information, TDHCA has elected to provide this report under a separate cover: the TDHCA *Housing Sponsor Report* (HSR). The HSR includes an analysis of the collected information, as well as the information submitted by each property. In addition, in fulfillment of §2306.072(c)(8), the HSR contains a list of average rents by Texas county, based on housing sponsor report responses from TDHCA-funded properties.

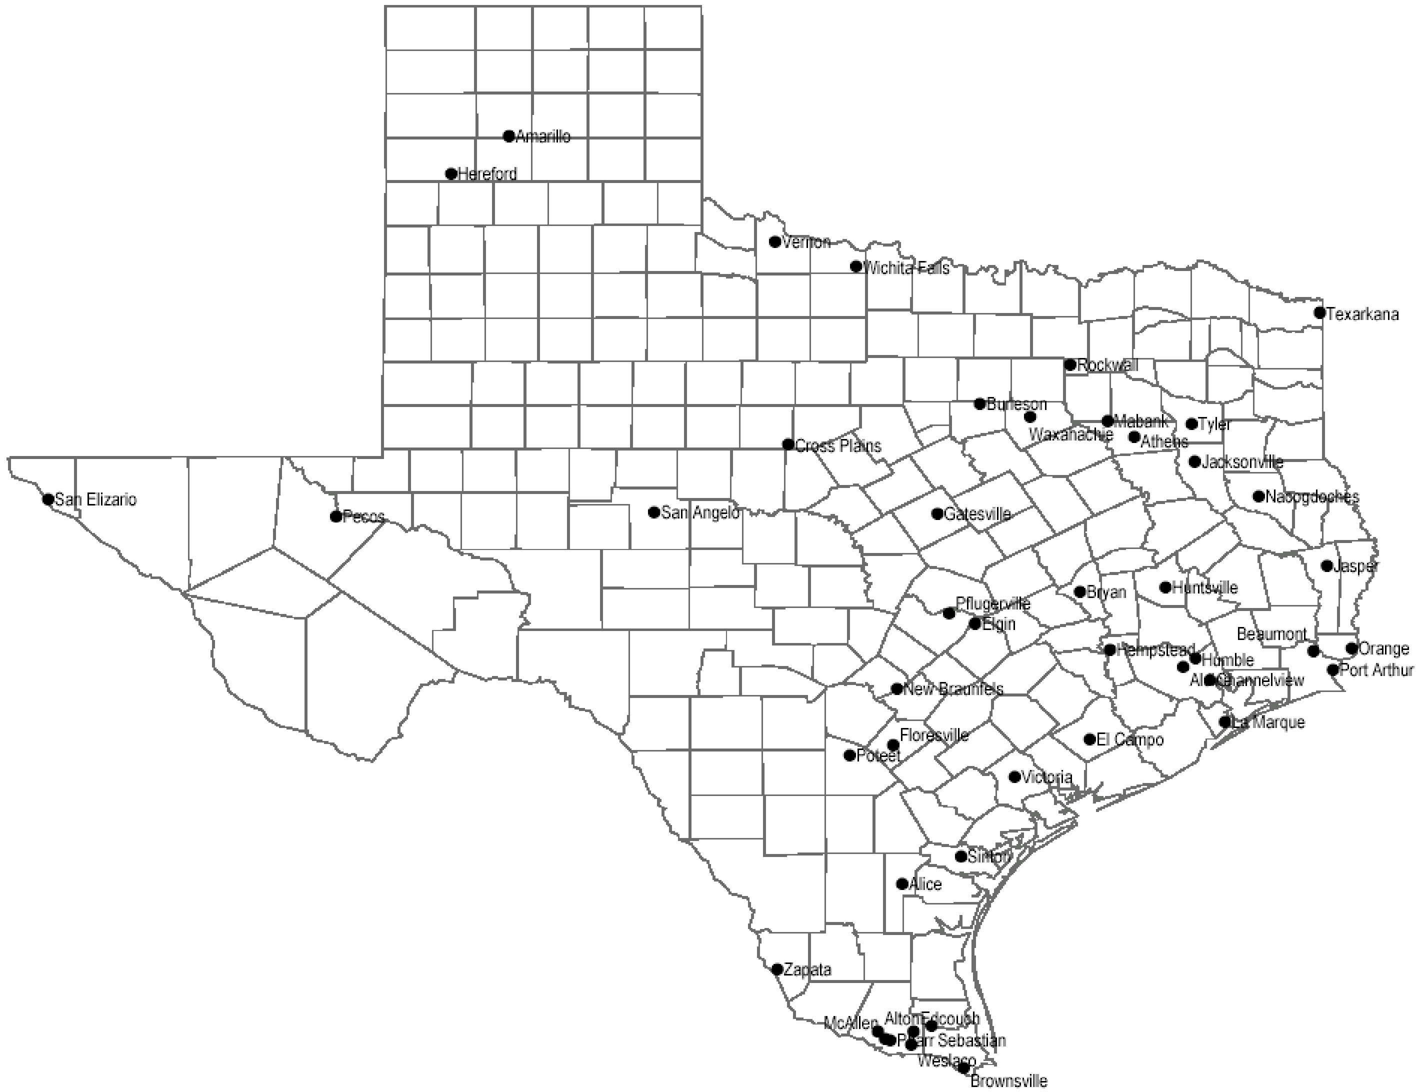
For more information and a copy of this report, please contact the TDHCA Division of Policy and Public Affairs at (512) 475-3976 or visit http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm.

GEOGRAPHIC DISTRIBUTION OF HOUSING TAX CREDITS

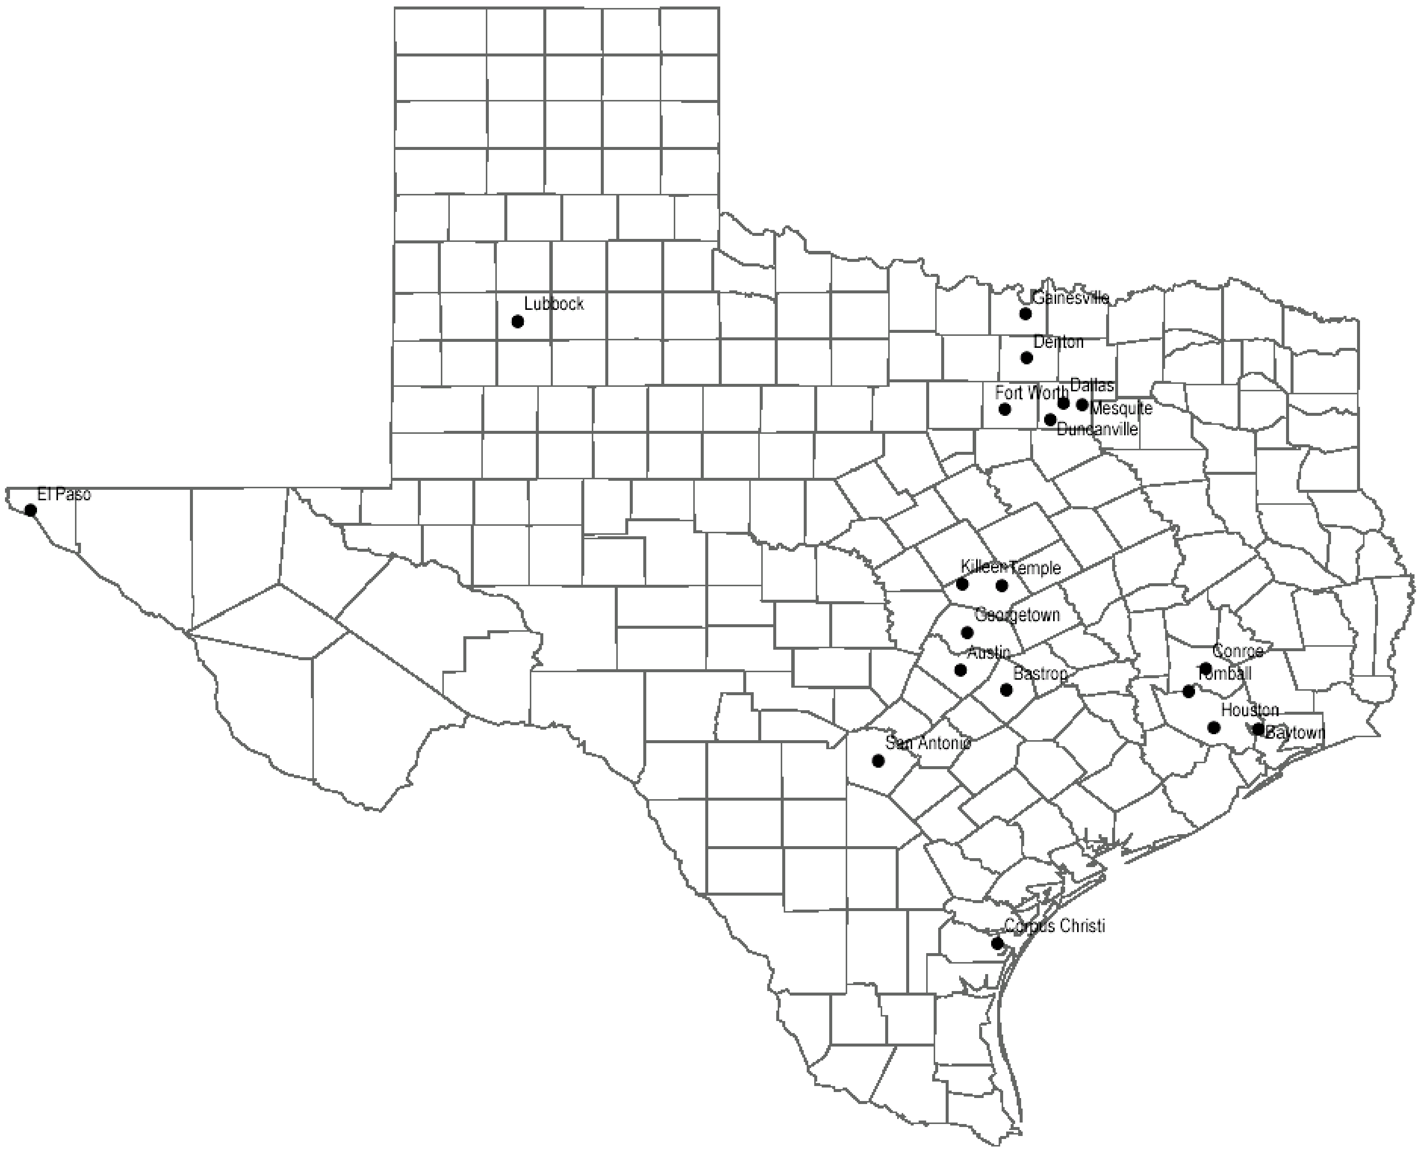
The Housing Tax Credit (HTC) Program receives authority from the US Treasury Department to provide tax credits to encourage the development and preservation of affordable rental housing. The Internal Revenue Code authorizes a state HTC volume cap based on a per capita amount of the state population. Tax credits are also awarded independently of the volume cap to developments with tax-exempt bond financing. These two credit types are typically referred to as the 9% and 4% HTCs, respectively. Section 2306.111(d) of the Government Code requires that TDHCA use a Regional Allocation Formula (RAF) to allocate its 9 % HTCs to the Uniform State Service Regions it uses for planning purposes. Because of the level of funding and the impact of this program in financing the multifamily development of affordable housing, this section of the Plan discusses the geographical distribution of HTCs.

For FY 2006, TDHCA had $48,273,334 credits to allocate through the 9% application process. This amount was comprised of the annual volume cap, recaptured credits, additional credits received pursuant to HR 4440 Gulf Opportunity Zone Act of 2005 and $600,447 from the national pool of unused credits from other states. Over the course of the year, the total amount of 9% and 4% credits approved by the Board, including foreward commitments, was: $$77,258,988.00 In July 2006, the TDHCA Board approved 84 applications for 9% HTCs, totaling $54,306,491. Any remaining 2006 credit authority will be allocated to applicants on the 2006 waiting list. Alternately, if the credit balance meets the IRS de minimus requirements, it may be rolled into the 2007 credit ceiling. Under either scenario, TDHCA will be eligible to receive credits from the national pool of unused credits. The 4% awards, which are approved by the Board throughout the year, totaled $22,952,497 for FY 2006. Information on these awards, as well as the entire HTC inventory, can be found on the HTC Program's web page at www.tdhca.state.tx.us. The following maps display the geographic distribution of the FY 2006 4% and 9% awards.

HTC 9% Distribution by Place, FY 2006



HTC 4% Distribution by Place, FY 2006



Distribution of TDHCA Housing Tax Credit (HTC) Awards, 2006

The following charts show the distribution of TDHCA's 4% and 9% HTC awards for 2005. The racial composition of each census tract containing 2005 HTC award units was compared with the racial composition of the county in which the tract is located. In addition, the income level of each census tract receiving an award was compared with the income level of the county in which the tract is located.

Awards were made within the following counties: Atascosa, Bastrop, Bell, Bexar, Bowie, Brazos, Callahan, Cameron, Cherokee, Comal, Cooke, Coryell, Dallas, Deaf Smith, Denton, El Paso, Ellis, Galveston, Harris, Henderson, Hidalgo, Jasper, Jefferson, Jim Wells, Johnson, Kaufman, Lubbock, Montgomery, Nacogdoches, Nueces, Orange, Potter, Reeves, Rockwall, San Patricio, Smith, Tarrant, Tom Green, Travis, Victoria, Walker, Waller, Wharton, Wichita, Wilbarger, Willacy, Williamson, Wilson, Zapata

Methodology

Racial Characteristics

The percentage racial composition was determined according to the standards set by the U.S. Census. Accordingly, "race" is broken down into three subclassifications: White, Black, and Other. "Other" includes races other than White and Black, as well as individuals with two or more races. As ethnic origin is considered to be a separate concept from racial identity, the Hispanic population is represented in a separate chart. Persons of Hispanic origin may fall under any of the racial classifications. Households assisted through the HTC program have been delineated according to these categories.

After determining which race comprised the largest percentage of the county's population, each census tract was categorized as a "Majority" or "Minority" tract. Majority tracts are those in which the race that comprised the highest percentage of the county population had an equal or greater percentage at the tract level. The "Majority" and "Minority" units in each county were then totaled to determine the percentage distribution. It should be noted that "White" was not always the majority county population. For example, in the San Antonio and El Paso areas, the Hispanic population comprised the majority county population.

Income Characteristics

The median family income (MFI) of each tract awarded units was compared with the low income threshold of the county containing those tracts. A county's low income threshold was calculated as 60 percent of the MFI for the county. That is, tracts with an MFI that is less than 60 percent of the county's MFI are considered low income tracts. Tracts with an MFI that is greater than or equal to 60 percent of the county's MFI are considered non-low income tracts.

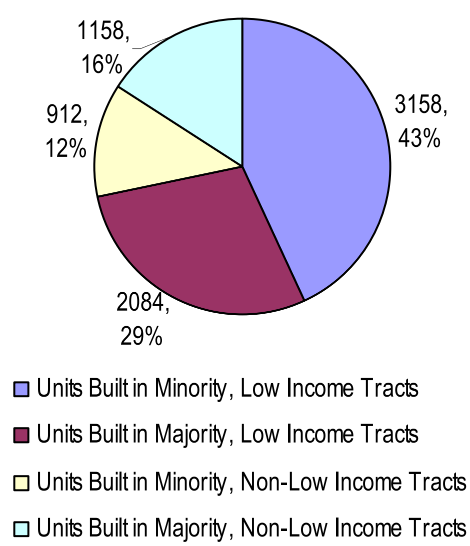
Total 2006 9% HTC Unit Distribution by Census Tract Racial Characteristics



EFFECT OF THE TWO TIMES PER CAPITA RULE

There are a number of conditions that affect a site's eligibility for HTCs. One of these conditions relates to the previous development of housing tax credits within a place or county as required by §2306.6703. Ineligibility for consideration is that an application will be ineligible if:

> *"(4) the development is located in a municipality or, if located outside a municipality, a county that has more than twice the state average of units per capita supported by housing tax credits or private activity bonds, unless the applicant:*
>
> > *(A) has obtained prior approval of the development from the governing body of the appropriate municipality or county containing the development; and*
> >
> > *(B) has included in the application a written statement of support from that governing body referencing this section and authorizing an allocation of housing tax credits for the development."*

As of the close of the state fiscal year on August 31, 2006, the following municipalities had more than twice the state average of units per capita supported by housing tax credits or private activity bonds. It should be noted that this list is subject to periodic revisions with changes in the HTC property inventory and in the population estimates used for the per capita calculation.

SECTION 3: HOUSING ANALYSIS

This section of the Plan contains an overview of the affordable housing needs in the state and an estimate and analysis of the housing needs in each region.

DATA SOURCES AND LIMITATIONS

The information provided in this section should be considered within the context of its limitations. The Department recognizes that an undistorted assessment of housing need can be found only at the local level based on the direct experience of local households. The following issues should be considered when reviewing the information contained in this report:

- Nuances of housing need are lost when data is aggregated into regional, county, and statewide totals. For example, housing needs in rural communities are often distorted when reported at the county level because housing needs are often very different in rural and urban areas. The large population of urban metropolitan areas can skew the data and mask the needs of the rural areas.
- Reliable data available on the condition of the housing stock, the homeless population, and the housing needs of special needs populations is very limited.

2000 Census and 2000 CHAS data is primarily used in this report. The content and format of the Census-based tables, graphs, and maps provided in this section were derived, in part, from a methodology for housing needs assessment in the National Analysis of Housing Affordability, Adequacy, and Availability: A Framework for Local Housing Strategies. The Urban Institute prepared this document for the US Department of Housing and Urban Development (HUD). It provides a methodology with which to describe and analyze local housing markets in order to develop strategies for addressing housing problems and needs. The document served as a guide for the preparation of Comprehensive Housing Affordability Strategy (CHAS) reports. As such, it provides a systematic framework for housing market analysis. HUD collaborated with the US Census Bureau to develop special tabulations of the 2000 Census data.

The CHAS database classifies households into five relative income categories based on reported household income, the number of people in the household, and geographic location. These income categories are used to reflect income limits that define eligibility for HUD's major assistance programs, as well as for other housing programs, such as the Housing Tax Credit Program. Households are classified into income groups by comparing reported household income to HUD-Adjusted Median Family Income (HAMFI). The income limits are calculated by household size for each metropolitan area and non-metropolitan county in the United States and its territories. They are based on HUD estimates of median family income with several adjustments as required by statute. The income classifications are extremely low income, very low income, low income, moderate income, and above 95 percent of HAMFI.[1]

The income limits for metropolitan areas may not be less than limits based on the state non-metropolitan median family income level and must be adjusted accordingly. Income limits must be also adjusted for family size and may be adjusted for areas with unusually high or low family income or housing-cost-to-income relationships.

Unit affordability compares housing cost to local area HAMFI. Affordable units are defined as units for which a household would pay no more than 30 percent of its income for rent and no more than two and one-half times its annual income to purchase. Since HUD's adjusted median family incomes are estimated for a family of four, affordability levels are also adjusted to control for various-sized units based on the number of people that could occupy a unit without overcrowding. This adjustment is made by multiplying the threshold described above by 75 percent for a 0–1 bedroom unit, 90 percent for a two bedroom unit, and 104 percent for a 3+ bedroom unit.

Homeless figures are taken from 2000 Census group quarters population and type tables, contained in Census 2000 Summary File 1. Group quarters type designations include institutional quarters, which include correctional facilities, hospitals, and juvenile institutions, as well as noninstitutional quarters, which include military quarters, group homes, dormitories, and other situations. Based on the Definitions of Subject Characteristics contained in the Technical Documentation for Summary File 1: 2000 Census of Population and Housing published by the US Census Bureau, this report uses "other noninstitutional group quarters" and "other nonhousehold living situations" census figures to represent the homeless population in each region. "Other noninstitutional group quarters" counts individuals in shelters for abused women, soup kitchens, mobile food vans, and other targeted nonsheltered outdoor locations where there is evidence of human occupation. "Other nonhousehold living situations" counts individuals with no usual home residing in hostels and YMCAs who were not counted in other tabulations.

The US Census also completed a special tabulation, Emergency and Transitional Shelter Population: 2000, based on metropolitan areas with 100 or more people in emergency and transitional shelters. It must be noted that this data only refers to metropolitan areas with 100 or more people in shelters, so is not a comprehensive picture of the total population living in shelters. In the region sections of this document, if the Census counted individuals living in emergency shelters in a metropolitan area that is located in the region, those figures are provided.

[1] The CHAS figures for moderate and higher income households in Region 11 indicate that there are only 199 persons with incomes between 80-95 percent of the AMFI. TDHCA has been unable to get more accurate information for this segment of the population. However, the planning impact for the SLIHP is relatively low because, except for the first time homebuyer program which is done through a network of participating lenders, TDHCA programs serve persons below 80 percent AMFI.

It must be emphasized that the regional estimates of the homeless populations are not comprehensive. The various definitions of homeless and methods in counting the homelessness make definitive tabulations difficult. The Texas Interagency Council for the Homeless estimates that about 200,000 people, or 1 percent of the state's population, are homeless.[2] The Census figures for individuals living in "other noninstitutional group quarters" and "other nonhousehold living situations" count only 28,377 individuals statewide.

The needs assessment data is augmented with additional information from the perspective of local officials, where available. In March 2006, TDHCA conducted the 2006 State of Texas Community Needs Survey. This survey was designed to obtain a better understanding of housing and community development needs, issues, and problems at the state, regional, and local levels. The survey gave local officials, who are most familiar with the unique characteristics of their communities, a voice in determining how Texas's affordable housing, supportive service, and community development needs can be most effectively addressed.

STATE OF TEXAS

The state level housing analysis includes information on demographics, special needs populations, and affordable housing need indicators. Department plans reflect this statewide information as well as the consideration of affordable housing assistance from various sources.

DEMOGRAPHIC CHARACTERISTICS

Texas is one of the fastest growing states in the nation. According to recent Census data, Texas population expanded by nearly a quarter (22.8 percent) between 1990 and 2000, far exceeding the national growth average of 13.2 percent for the same decade. The increase in state population by 3,865,310 persons was the largest of any decade in Texas history. More than one of every nine persons added to the population of the United States in the 1990s was added in Texas.[3]

Projected Population Change and Implications for Housing Need

- Looking at long-term demographic projections, it is clear that the demand for affordable and subsidized housing will increase in the coming years.
- The 2000 state population of 20.9 million is expected to surge to 50.4 million by 2040.
- The Anglo population will account for only 3.9 percent of net population growth from 2000 to 2040, meaning that more than 96 percent of the total net increase in Texas population between 2000 and 2040 will be due to the non-Anglo population.
- Anglo population is expected to grow by 10.4 percent between 2000 and 2040, while blacks are expected to increase by 65.0 percent and Hispanics by 348.7 percent.
- The population is becoming older: the median age will increase from 32.3 in 2000 to 38.3 in 2040. The percentage of the population that was 65 or older was 9.9 percent in 2000 but will increase to 20 percent by 2040.
- Growth in the number of households, projected at 162.1 percent over the period 2000-2040, will outstrip population growth: 142.6 percent during the same period.

Expected housing demand is directly linked to projected changes in population characteristics. The current ethnic shift is significant because of the substantial differences between the races in terms of income level. The absolute difference in median household income between Anglos and Blacks was $13,602 in 1989, but $17,857 in 1999; and the Anglo-Hispanic difference was $12,242 in 1989, but $17,289 in 1999. Similarly, the poverty rates of 23.4 percent for Blacks and 25.4 percent for Hispanics were still roughly three times as high as the 7.8 percent of persons in poverty among Anglos. Because of these disparities,

[3] Information for the Housing Analysis comes from the 2000 US Census except where noted otherwise.

households in Texas will become poorer over the coming decades unless the relationship between ethnicity and income somehow changes.[4]

A correlation also exists between income and age. According to the 2000 Census, 13.1 percent of Texans age 65 and older live below the poverty level. Lower incomes combined with rising healthcare costs contribute to the burden of paying for housing. Approximately 30 percent of all elderly households spend more than 30 percent of their income on housing, while 14 percent spend more than 50 percent of their income on housing. These statistics take on new urgency when considered alongside the anticipated upsurge in the state's elderly population.

Not only will the demographics of the population be changing, but so will its needs. The faster growth in number of households than in total population is a reflection of the large number of non-Anglos who will enter household-formation ages during this time period. More young families mean an increased demand for housing.[5]

Poverty and Income

According to the 2000 Census, Texas has the ninth highest overall poverty rate in the nation, with a rate of 15.4 percent compared to the national rate of 12.4 percent. Poverty conditions along the Texas-Mexico border warrant special attention. Parts of the region, like McAllen-Edinburg-Mission, suffer from an unemployment rate double that of the state's (12 percent vs. 6.1 percent) and less than half of state's per capita income average. Fifteen counties along the border have a poverty rate of at least 25 percent, almost double the national average. Conditions are particularly acute in the colonias, unincorporated areas along the Texas-Mexico border lacking infrastructure and decent housing. It is estimated that 43 percent of colonia residents live below the poverty level.

The poverty rate for all family households in Texas, different from the overall poverty rate, is expected to increase from the 2000 figure of 11.4 percent to 15.4 percent by 2040.6 The primary reasons for this are the rapid growth of present minority populations and the dominance in the economy of low-paying, particularly service-industry, jobs.7 While manufacturing and mining continue to decline, Texas ranked third in the nation in 2003 for service industry job creation. According to US Bureau of Labor Statistics data, eight of the top ten most common jobs in Texas earn incomes that fall at least $10,000 below the state median income of $33,770.

Many families who rely on these low-wage occupations for a living find it difficult to cover all essential expenses. According to a study by the Center for Public Policy Priorities, "a

[4] Center for Demographic and Socioeconomic Research and Education, *Texas Challenge in the Twenty-First Century: Implications of Population Change for the Future of Texas*, by Steve H. Murdock et. al. (Texas A&M University System, December 2002), http://txsdc.utsa.edu/download/pdf/TxChall2002.pdf (accessed May 17, 2006).

[5] Center for Demographic and Socioeconomic Research and Education, *Texas Challenge in the Twenty-First Century*.

[6] Center for Demographic and Socioeconomic Research and Education, *Texas Challenge in the Twenty-First Century*.

[7] Center for Public Policy Priorities, *Making It: What it Really Takes to Live in Texas* (Austin, TX: Center for Public Policy Priorities, September 2002).

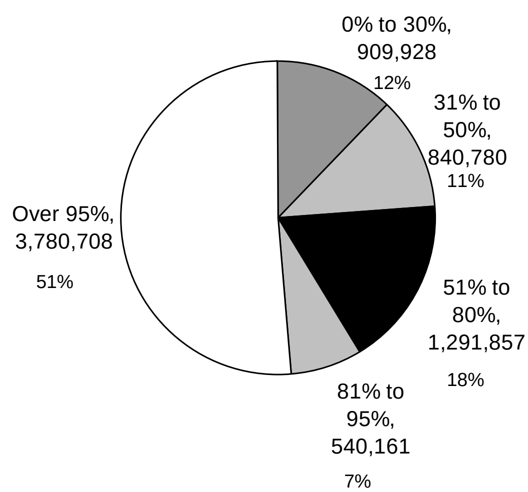
significant proportion of families throughout the state struggle paycheck-to-paycheck to make ends meet." The study examined a typical family's fundamental expenses, such as housing, food, child care, medical costs, transportation, taxes, etc., and compared the total bill to typical wages earned in the 27 Texas Metropolitan Statistical Areas. The study asserts that a family of four in Texas requires a household hourly income of $18 to $22 per hour (depending on the metro area in which the family lives) to simply meet its most basic needs. In a majority of Texas metro areas, however, half of the total employment is in occupations with a median wage under $10 per hour.8

The Texas Comptroller's Economic Update predicts that the fastest growing sector of the state economy over the next decade will be largely in industries requiring specialized education and skills. These industries include high tech communications, engineering, and research.

To provide a more detailed breakdown of the population by income level, this report will use the five income groups designated by HUD. Households are classified into these groups by comparing reported household incomes to HUD-adjusted median family incomes (HAMFI). The income level definitions are as follows:

- Extremely Low Income: At or below 30 percent of HAMFI
- Very Low Income: Between 31 percent and 50 percent of HAMFI
- Low Income: Between 51 percent and 80 percent of HAMFI
- Moderate Income: Between 81 percent and 95 percent of HAMFI
- Above 95 percent of HAMFI

Households by Income Group in Texas, 2000



Source: 2000 CHAS data

[8] Center for Public Policy Priorities, *Making It: What it Really Takes to Live in Texas.*

The chart above indicates the 2000 distribution of households by income group across Texas by number and percentage. A total of 41 percent of all households are in the low income range (0 to 80 percent of HAMFI). Meeting the needs of this large portion of the state's households is TDHCA's primary focus.

AFFORDABLE HOUSING NEED

When analyzing local housing markets and developing strategies for meeting housing problems, HUD suggests the consideration of several factors. These factors include how much a household spends on housing costs, the physical condition of the housing, and whether or not the household is overcrowded. The following table reveals the number and percentage of households with at least one housing need by income category and household type.

Households with Housing Need by Income Group

		Renter Households			Owner Households		
		At Least One Problem	Total Households	Percent with At Least One Problem	At Least One Problem	Total Households	Percent with At Least One Problem
0-30% AMFI	Elderly Households	59,065	95,130	62.1%	100,876	151,597	66.5%

Source: 2000 CHAS data

Physical Inadequacy (Lack of Kitchen and Plumbing Facilities)

The measure of physical inadequacy available from the CHAS database tabulation of the 2000 Census is the number of units lacking complete kitchen and/or plumbing facilities. While this is not a complete measure of physical inadequacy, the lack of plumbing and/or kitchen facilities can serve as a strong indication of one type of housing inadequacy. Figure

3.3 demonstrates that among the physically inadequate housing units for households under 80 percent of HAMFI, 44 percent are affordable to extremely low income households.

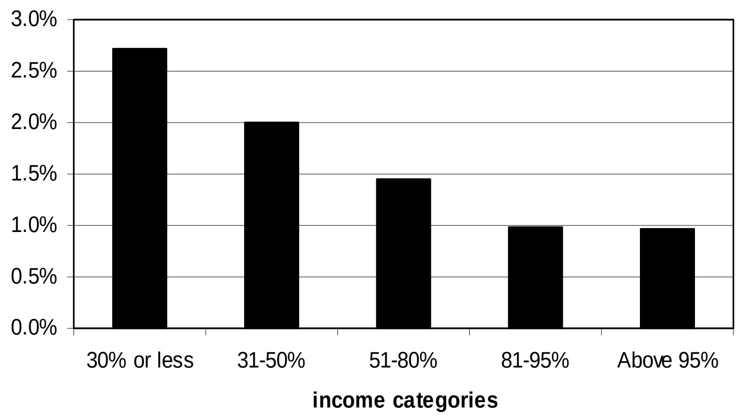
Units Lacking Kitchen and/or Plumbing Facilities by Affordability Category, 2000

	Number	Percent
0% to 30%	25,817	44%
31% to 50%	15,907	27%
51% to 80%	16,341	28%
Total	58,065	100%

Source: 2000 CHAS data

Slightly more than 1 percent of all renter households in Texas lack complete kitchen or plumbing facilities. The following table shows the distribution of this problem by income group. Households in the lowest income group, less than 30 percent HAMFI, have the highest incidence of physically inadequate housing.

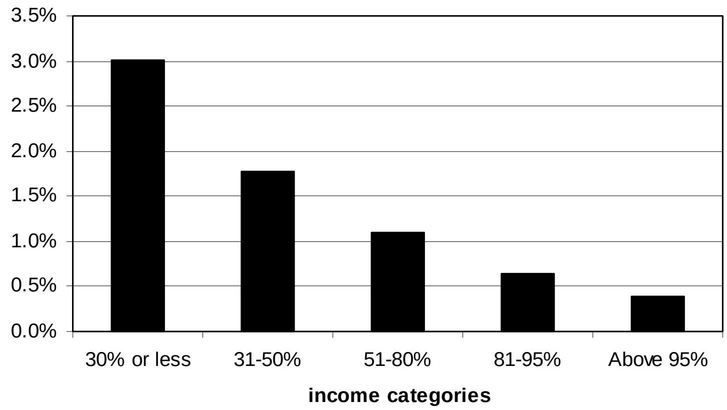
Renter-Occupied Units Lacking Complete Kitchen/Plumbing by Percent



Source: 2000 CHAS data

As is the case with renter households, inadequate kitchen and plumbing is a greater problem for the lowest income categories of owner households. A full 3 percent of owner households earning below 30 percent HAMFI lack full kitchen or plumbing facilities.

Owner-Occupied Units Lacking Complete Plumbing/Kitchen by Percent

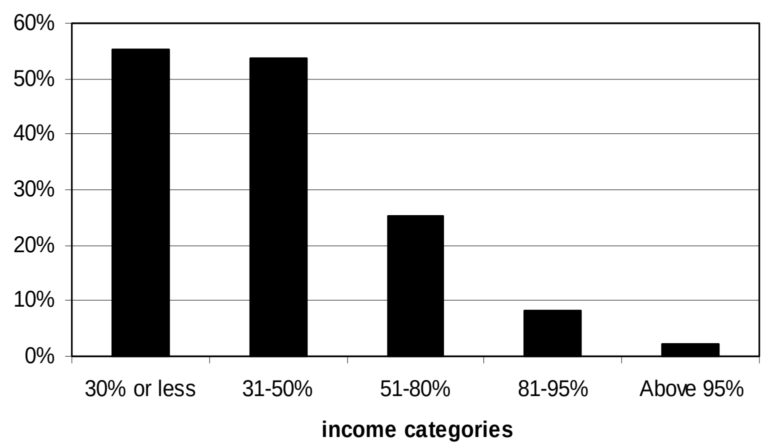


Source: 2000 CHAS data

Excess Housing Cost Burden

An excess cost burden is identified when a household pays more than 30 percent of its gross income for housing costs. When so much is spent on housing, other basic household needs may suffer. As the following graph shows, a majority of renter households in the lowest two income categories, totaling more than 540,000 households, is burdened by paying an excess portion of income toward housing. This is much greater than in the highest income category, above 95 percent HAMFI, where only 2.2 percent of households experience the problem.

Renter Households with Excess Housing Cost Burden (>30% of Income) by percent



Source: 2000 CHAS data

As shown in the following graph, excess housing cost burden affects 59.3 percent of owner households in the lowest income category. This figure, representing a majority, is much higher than the 5.7 percent of households affected in the highest income category. The graph illustrates the direct correlation between owner income category and an owner household's likelihood of experiencing this problem.

Owner Households with Excess Housing Cost Burden (>30% of Income) by percent

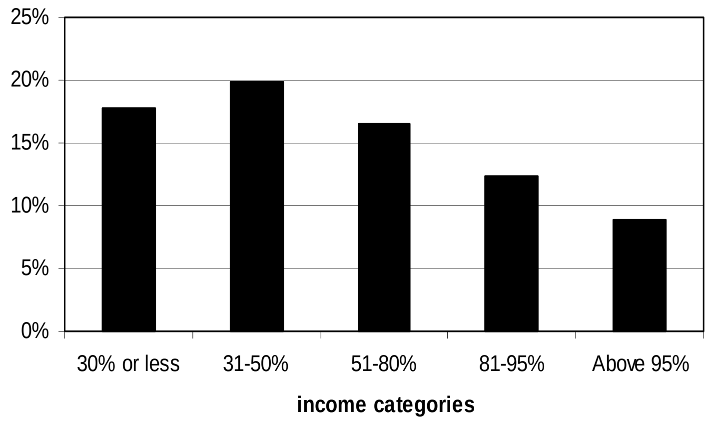
Overcrowding

Overcrowded housing conditions occur when a residence accommodates more than one person per each room in the dwelling. Overcrowding may indicate a general lack of affordable housing in a community where households have been forced to share space, either because other housing units are not available or because the units available are too expensive.

Lower income renter households experience overcrowded conditions more frequently than higher income households. Almost 18 percent of renter households in the extremely low income category and 19.9 percent of renter households in the low income category are afflicted by overcrowding.

Renter Households with Incidence of Overcrowding by percent



Source: 2000 CHAS data

Lower income owner households also experience overcrowded conditions more frequently than higher income owner households. More than 21 percent of owner households earning less than 50 percent HAMFI live in overcrowded conditions compared to 11.4 percent of owner households over 80 percent HAMFI.

Owner Households with Incidence of Overcrowding by percent

HOUSING AVAILABILITY AND AFFORDABILITY

The following figures compare demand and supply of affordable housing by looking at the number of households and housing units in different affordability categories. Because higher income households often reside in units that could be affordable to the lowest income households, there are fewer units available at a cost that is affordable to lower income households. For example, as shown in Figure 3.12, 1.4 million households that have incomes greater than 80 percent AMFI occupy units that would be affordable to households at 0-50 percent AMFI. Households in this category can afford units in any of the defined affordability categories. Therefore, non-low income households often limit the supply of affordable housing units available to low income households.

The table below describes the housing market interaction of various income groups and housing costs. The table shows the income classifications of the occupants of housing units. The table also illustrates the housing market mismatch between housing units and income groups. For example, very low income households (0-50 percent of HAMFI) account for only about one-third of all the occupants of housing that is affordable to them. All low income households (0-80 percent of HAMFI) make up only 48 percent of all households occupying housing affordable to them. This table illustrates housing market mismatches as well as an implicit excessive cost burden for those households that are residing in units beyond their affordability category.

Occupied Affordable Housing Units by Income Group of Occupant, 2000, by percentage of HAMFI

Number of Renter units	Total	50% or less	51-80%	Above 80%
Affordable to 0-50% HAMFI	1,112,083	588,198	246,476	277,409
Affordable to 51-80% HAMFI	1,245,842	346,703	301,491	597,648
Affordable to >80% HAMFI	305,135	52,391	41,485	211,259

Percent of Renter units	Total	50% or less	51-80%	Above 80%
Affordable to 0-50% HAMFI	100.0%	52.9%	22.2%	24.9%
Affordable to 51-80% HAMFI	100.0%	27.8%	24.2%	48.0%
Affordable to >80% HAMFI	100.0%	17.2%	13.6%	69.2%

LOCAL PERCEPTION

TDHCA acknowledges that the greatest understanding of housing needs is found at the local level. TDHCA continuously strives to improve the methods used to identify regional affordable housing needs.

State of Texas Community Needs Survey

Beginning in March 2006 and ending May 2006, the Department conducted an online 2006 CNS to examine housing and community service needs at the local level. The survey contained 18 questions regarding housing, community affairs, and community development needs and was distributed to state representatives, state senators, mayors , county judges , city managers, housing/planning departments, USDA local offices, public housing authorities, councils of governments, community action agencies, and Housing Opportunities for Persons with AIDS (HOPWA) agencies—a total of 2,529 individuals an entities. There was a 17.2 percent response rate for the survey.

Analysis of the 2006 CNS demonstrates a strong need for housing and energy assistance. Of those respondents ranking their community's need for general assistance, approximately 31 percent indicated that housing assistance (including down payment assistance, home repair, and rental payment assistance) was their first or second priority need. Approximately 28 percent of question respondents ranked energy assistance activities as their first or second priority need. Approximately 18 percent of respondents indicated that the development of apartments was the priority needs, 15 percent chose capacity building assistance, and 7 percent chose homeless assistance.

A significant 49 percent indicated that home repair assistance was the greatest need when compared to home purchase assistance and rental payment assistance. Only 8 percent stated that there was a minimal need for these housing activities in their communities. Regarding rental development activities, 35 percent indicated that their community's greatest need was the construction of new rental units, while approximately 33 percent indicated that both rental construction and rehabilitation activities were the same priority. Only 13 percent identified rehabilitation of existing units as their priority need, which is the same percentage of respondents who stated that there was a minimal need for rental development in their areas.

When considering energy assistance activities, 43 percent indicated that utility payment assistance was the greatest need followed by weatherization and minor home repairs. For homeless assistance activities, a majority 48 percent indicated that there was a minimal need for this type of assistance in their communities and 16 percent did not have an opinion on the subject. Of respondents indicated a needed activity, homeless prevention services received the highest response with 12 percent indicating that it was their priority need.

The regional results from the CNS are incorporated into the regional plans. A final report on the survey, Report on the 2006 State of Texas Community Needs Survey, will be available from the Division of Policy and Public Affairs towards the end of 2006.

STATE HOUSING SUPPLY

The 2000 US Census reported 8.2 million housing units in Texas, of which 90.6 percent are occupied. The number of housing units increased 16 percent from 7.0 million units that were on the ground in 1990. The breakdown of occupied units by type is 4.7 million owner occupied (a 28 percent increase over 1990) and 2.8 million renter occupied (a 13 percent increase over 1990). The average household size for owner-occupied units increased to 2.87 persons per unit in 2000 as compared to 2.85 units in 1990. The average household size for renter units decreased slightly to 2.53 persons per unit in 2000 as compared to 2.55 units in 1990.

Almost 67 percent of the housing units in Texas are single family units, 14 percent are multifamily up to 19 units, and 10 percent are within multifamily structures with 20 units or more. An additional 9.4 percent are mobile homes, RVs, or boats.

Housing Type, 2000

	Total	Percent
Housing Units	8,157,575	
One Unit	5,420,910	66.50%
2 to 19 Units	1,151,599	14.10%
Over 20 Units	819,101	10.00%
Mobile Homes	731,652	9.00%
Boats, RVs	34,313	0.40%

Source: 2000 US Census

ASSISTED HOUSING INVENTORY

The following table shows the number of multifamily units in the state financed through state and federal sources, including TDHCA; the US Department of Housing and Urban Development (HUD); public housing authorities (PHAs); Section 8 Housing Choice Vouchers; the United States Department of Agriculture (USDA); and local housing finance corporations (HFCs), which includes the Texas State Affordable Housing Corporation. Please note that because some developments layer funding from multiple sources, there may be double counting.

TDHCA data includes multifamily developments awarded up until the end of FY 2005, so all units included in the total have not yet been built. Additionally, the TDHCA unit total only includes those units that have income restrictions, and does not include market-rate units that are available in some developments. TDHCA unit information will be updated in the final version of this document to include FY 2006 awards.

HUD unit data was obtained from HUD's March 2003 report, "Multifamily Inventory of Units for the Elderly and Persons and Disabilities," available at http://www.hud.gov/offices/hsg/mfh/hto/state/tx.pdf. Though this report specifically references units available to the elderly and persons with disabilities, the report also appears to contain information on family properties. Please note, however, that this may not be a current inventory of all HUD units, and that there may be double counting with units financed through other programs, including public housing. The total assisted units in each property are included.

Information on PHA units and Section 8 Housing Choice Vouchers were obtained directly from HUD staff by TDHCA in October 2005. TDHCA Section 8 vouchers are also included in this figure. USDA unit data was also obtained directly from USDA staff in October 2005. These figures will be updated with the most recent information in the final version of this document.

HFC data, including Texas State Affordable Housing Corporation data, was obtained from the Housing Finance Corporation Annual Report that HFCs are required to submit to TDHCA annually. The figure describes the total units financed by the HFCs through June 2005, and does not specify assisted units, so these unit totals will also include market-rate units in the area. Because the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final state total. 2006 HFC unit information will be included in the final version of this document.

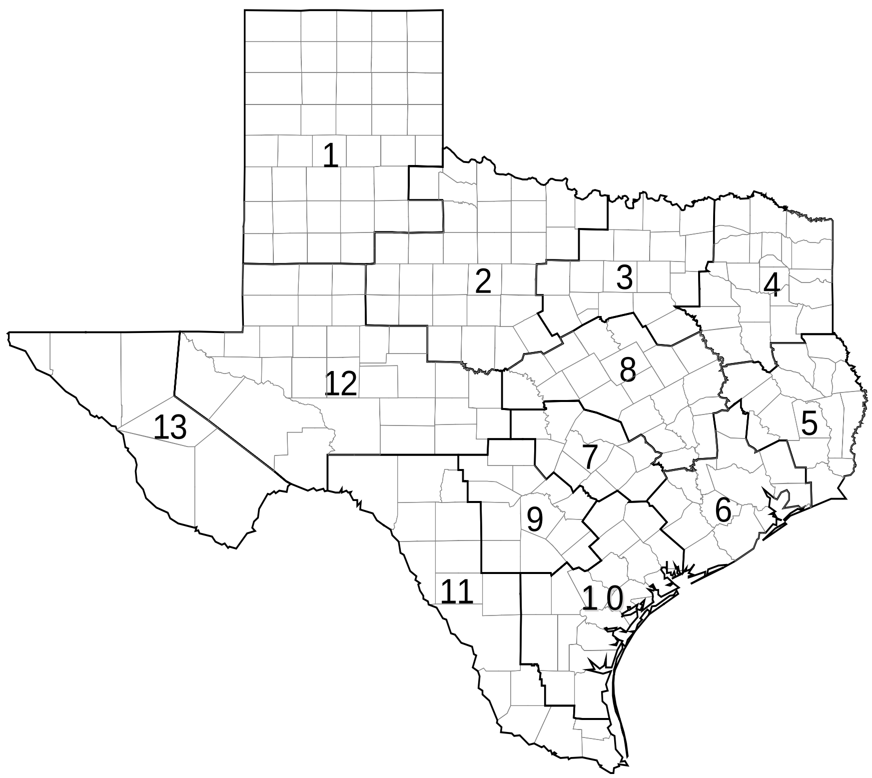
State Assisted Multifamily Units

	State Total	Percent of State Inventory
TDHCA Units	170,766	38.1 %
HUD Units	57,372	12.8%
PHA Units	59,431	13.3%
Section 8 Vouchers	133,944	29.9%
USDA Units	26,183	5.8%
HFC Units*	93,176	N/A
Total	447,696	100%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

UNIFORM STATE SERVICE REGIONS

The Department uses 13 Uniform State Service Regions for research and planning purposes. These regions follow the Texas Comptroller of Public Accounts' grouping that creates 13 regions to better identify the unique characteristics of the border counties and to treat larger metropolitan areas as distinct regions. The Uniform State Service Regions are shown below.

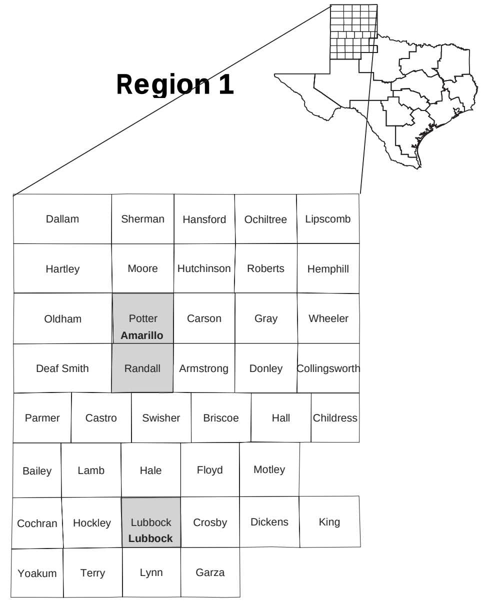


Map of the Uniform State Service Regions

The size and diversity of the state of Texas necessitates tailored regional sections. Each of the following Uniform State Service Region plans includes a general demographic description, which uses US Census housing data; a needs assessment, which examines housing problems in the area; an estimate of the existing housing supply; local input into the housing needs of the region; an estimate of the number of assisted multifamily units available, and the Department's resource allocation plans for the year.

REGION 1

This 41-county region in the northwest corner of Texas encompasses over 39,500 square miles of the Panhandle. According to the 2000 Census, the total population in Region 1 is 780,733, which represents 3.7 percent of the state's total population.



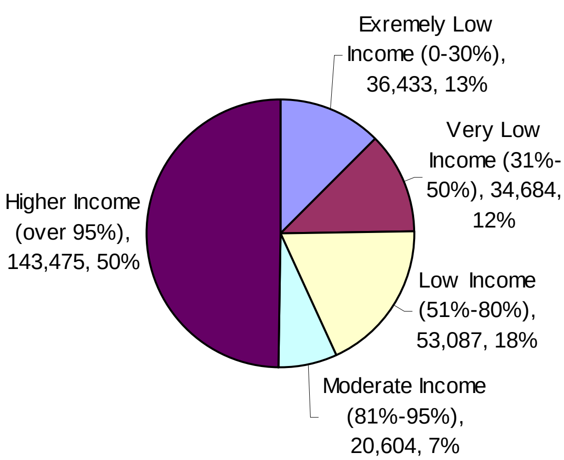
Region 1 Population Figures

	Region Total	Percent in Region	Percent of State Total
Total Population	780,733		3.7%
Persons with Disabilities	138,520	17.7%	3.8%
Elderly Persons (without disabilities)	50,862	6.5%	4.7%
Individuals in Poverty	122,991	15.8%	3.9%

Source: 2000 Census

Approximately 57 percent of the population lives in the urban areas, including Amarillo and Lubbock, and the rest live in rural areas of the region.

Region 1 Household Incomes



The pie chart to the left depicts the income breakdown of the 288,273 households in the region. Approximately 43 percent of households are low income. There are 122,991, or 15.8 percent, individuals living in poverty in the region.

2006 Multiple Listing Service data records the median home prices for Amarillo and Lubbock as $116,700 and $100,500, respectively.[9]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 128,520 persons with disabilities residing in the region, which is 16.5 percent of the total region population. In addition, there are 50,862 elderly individuals without disabilities in the region, which is 6.5 percent of the region.

[9] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[10] but figures vary. According to the 2000 Census, there are 1,068 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 167 homeless persons in Amarillo.

HOUSING SUPPLY

According to 2000 Census data, of the 322,045 housing units in the region, 288,175 are occupied, which is an 89.5 percent occupancy rate. Of the total housing stock, almost 75 percent are one unit; 15.9 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 66.3 percent are owner occupied and 33.7 percent are occupied by renters.

Region 1 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	322,045		3.9%
Total Occupied Housing Units	288,175	89.5%	3.9%
Owner-Occupied Units	191,161	66.3%	4.1%
Renter-Occupied Units	97,014	33.7%	3.6%

Source: 2000 Census

Data for the region shows that building permits for 2,375 single family units and 831 multifamily units were issued in 2005.[11]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 288,273 households in the region, 79,798 owners and renters have housing problems; this represents 27.7 percent of all households.

[10] Texas Interagency Council for the Homeless, "Key Facts."
[11] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 1 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	29,555	14,026	9,256	5,092	1,181
Lacking Kitchen and/or Plumbing	1,638	553	322	301	88
Overcrowding	9,294	2,037	2,029	2,602	2,626
Owner Households					
Extreme Cost Burden	28,912	8,542	7,021	6,944	6,405
Lacking Kitchen and/or Plumbing	1,154	228	163	224	85
Overcrowding	9,245	897	1,223	2,399	4,726
Total	79,798	26,283	20,014	17,562	15,111

Source: 2000 CHAS

Regional Input on Housing Needs

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 35 percent indicated that energy assistance was their first priority need, with 23 percent ranking housing assistance as their priority need. Approximately 21 percent of respondents indicated that the development of apartments was the first priority need, 15 percent indicated that capacity building assistance was their top need, and only 6 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 39 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 43 percent indicated that their community's greatest need was the construction of new rental units, while 5 percent indicated that there was a minimal need for rental development in their areas and 11 percent had no opinion on the subject. When considering energy assistance activities, 41 percent indicated that weatherization and minor home repairs was the greatest need followed by utility assistance with 39 percent.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 1 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	4,218	31.3%	2.5%
HUD Units	2,076	15.4%	3.6%
PHA Units	1,562	11.6%	2.6$
Section 8 Vouchers	3,987	29.6%	3.0%
USDA Units	1,612	12.0%	6.2%
HFC Units*	1,577		
Total	13,455	100%	3.0%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA ASSISTANCE FOR 2007

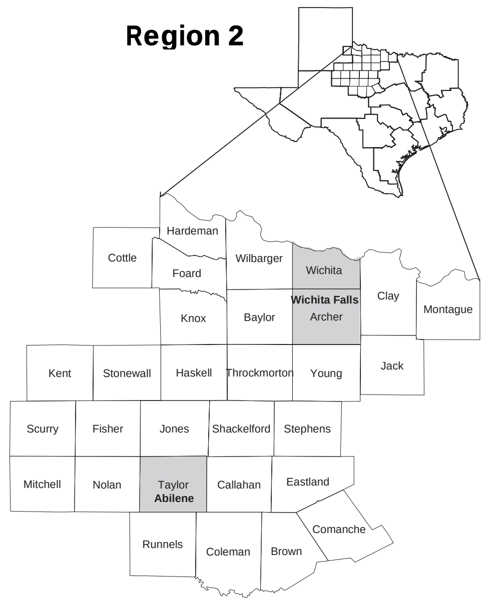
Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 9 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$2,096,376	6.1%
Housing Tax Credit	$2,096,099	4.9%
Housing Trust Fund	TBD	4.9%
Total	TBD	

REGION 2

Region 2 surrounds the metropolitan areas of Wichita Falls and Abilene, shaded in the figure to the right. According to the 2000 Census, the total population in Region 2 is 549,267, which represents 2.6 percent of the state's total population.



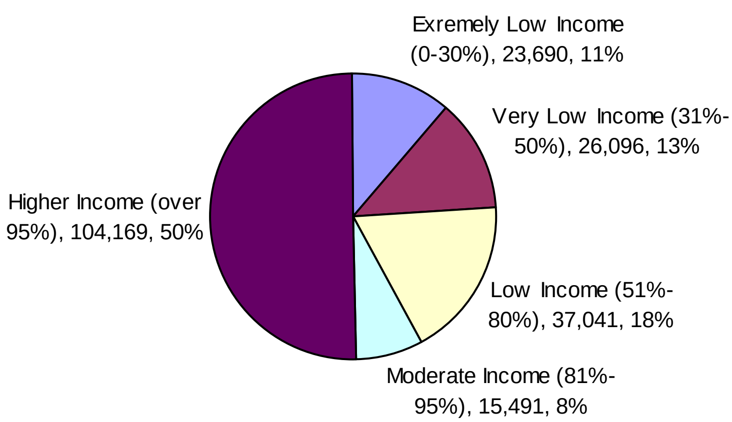
Region 2 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	549,267		2.6%
Persons with Disabilities	105,325	19.2%	2.9%
Elderly Persons (without disabilities)	42,485	7.7%	3.9%
Individuals in Poverty	77,647	14.1%	2.5%

Source: 2000 Census

Approximately 52 percent of the population lives in urban areas of the region.

Region 2 Household Incomes



The pie chart to the left depicts the income breakdown of the 206,459 households in the region. Approximately 42 percent of households are low income. There are 77,647, or 14.1 percent, individuals living in poverty in the region.

2006 Multiple Listing Service data records the median home prices for Wichita Falls and Abilene as $97,700 and $100,900, respectively.[12]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 105,325 persons with disabilities residing in the region, which is 19.2 percent of the total region population. In addition, there are 42,485 elderly individuals without disabilities in the region, which is 7.7 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless

[12] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

estimates that there are 200,000 homeless individuals in Texas,[13] but figures vary. According to the 2000 Census, there are 609 people in noninstitutional group homes, which include shelters, in the region. In a special tabulation on emergency and transitional shelters, the Census did not count any homeless persons in metro areas.

HOUSING SUPPLY

According to 2000 Census data, of the 243,506 housing units in the region, 206,388 are occupied, which is an 84.8 percent occupancy rate. Of the total housing stock, almost 77 percent are one unit; 12 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 69.1 percent are owner occupied and 30.9 percent are occupied by renters.

Region 2 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	243,506		3.0%
Total Occupied Housing Units	206,388	84.8%	2.8%
Owner-Occupied Units	142,603	69.1%	3.0%
Renter-Occupied Units	63,785	30.9%	2.4%

Source: 2000 Census

Data for the region shows that building permits for 659 single family units and 376 multifamily units were issued in 2005.[14]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 206,459 households in the region, 49,146 owners and renters have housing problems; this represents 23.8 percent of all households.

[13] Texas Interagency Council for the Homeless, "Key Facts."
[14] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 2 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 32 percent indicated that energy assistance was their first priority need, with 21 percent ranking housing assistance as their priority need. Approximately 18 percent of respondents indicated that the development of apartments was the first priority need, 18 percent indicated that capacity building assistance was their top need, and 12 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 54 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 40 percent indicated that their community's greatest need was the construction of new rental units, while 7 percent indicated that there was a minimal need for rental development in their areas and 9 percent had no opinion on the subject. When considering energy assistance activities, 47 percent indicated that weatherization and minor home repairs was the greatest need, as 47 percent indicated that utility assistance was the greatest need.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 2 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	2,753	26.9%	1.6%
HUD Units	1,655	16.2%	2.9%
PHA Units	3,905	38.1%	6.6%
Section 8 Vouchers	2,921	28.5%	2.2%
USDA Units	1,925	18.8%	7.4%
HFC Units*	280		
Total	10,241	100.0%	2.9%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2007

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 2 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$1,564,996	4.5%
Housing Tax Credit	$1,251,525	2.9%
Housing Trust Fund	TBD	2.9%
Total	TBD	

REGION 3

Region 3, including the metropolitan areas of Dallas, Fort Worth, Arlington, Sherman, and Denison, is the state's most populous region. According to the 2000 Census, the total population in Region 3 is 5,487,477, which represents 26.3 percent of the state's total population.

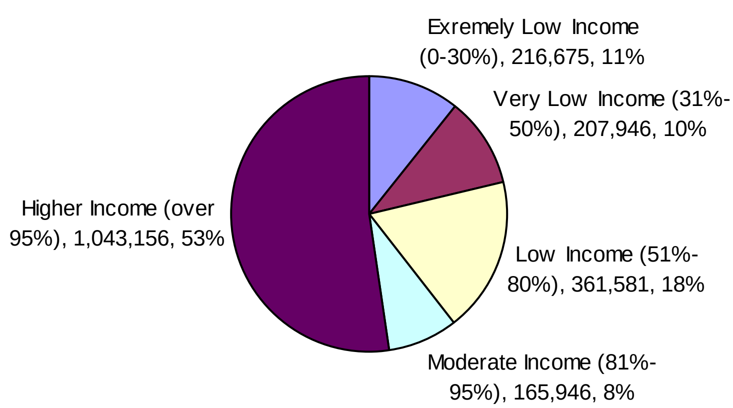
Region 3 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	5,487,477		26.3%
Persons with Disabilities	888,217	16.2%	24.6%
Elderly Persons (without disabilities)	245,186	4.5%	22.6%
Individuals in Poverty	588,688	10.7%	18.9%

Source: 2000 Census

Approximately 93 percent of the population resides in urban areas.

Region 3 Household Incomes



The pie chart to the left depicts the income breakdown of the 1,988,135 households in the region. Approximately 39 percent of households are low income. There are 588,688, or 10.7 percent, individuals living in poverty in the region.

According to 2006 Multiple Listing Service data, the highest median home price is in Collin County at $193,100, while the lowest is in Sherman-Denison at $99,100.[15]

SPECIAL NEEDS POPULATIONS

[15] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

According to 2000 Census data, there are 888,217 persons with disabilities residing in the region, which is 16.2 percent of the total region population. In addition, there are 245,186 elderly individuals without disabilities in the region, which is 4.5 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,16 but figures vary. According to the 2000 Census, there are 6,548 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 1,923 homeless persons in Tarrant and Dallas counties.

HOUSING SUPPLY

According to 2000 Census data, of the 2,140,641 housing units in the region, 2,004,826 are occupied, which is a 93.7 percent occupancy rate. Of the total housing stock, almost 64 percent are one unit; 30 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 60.9 percent are owner occupied and 39.1 percent are occupied by renters.

Region 3 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	2,140,641		26.2%
Total Occupied Housing Units	2,004,826	93.7%	27.1%
Owner-Occupied Units	1,220,939	60.9%	25.9%
Renter-Occupied Units	783,887	39.1%	29.3%

Source: 2000 Census

Data for the region shows that building permits for 50,307 single family units and 10,783 multifamily units were issued in 2005.17

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 1,988,135 households in the region, 610,655 owners and renters have housing problems; this represents 30.7 percent of all households.

[16] Texas Interagency Council for the Homeless, "Key Facts."

Total	610,655	165,254	146,264	154,447	140,403

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, 50 percent indicated that housing assistance was their first priority need, followed by energy assistance with 35 percent. Approximately 5 percent of respondents indicated that the development of apartments was the first priority need, 8 percent indicated that capacity building assistance was their top need, and only 3 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 52 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 26 percent indicated that the need for construction and rehabilitation was approximately the same, while 19 percent indicated that there was a minimal need for rental development in their areas and 9 percent had no opinion on the subject. When considering energy assistance activities, 39 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 37 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 3 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	55,393	46.9%	32.4%
HUD Units	10,834	9.2%	18.9%
PHA Units	8,725	7.4%	14.7%
Section 8 Vouchers	39,149	33.1%	29.2%
USDA Units	4,076	3.4%	15.6%
HFC Units*	19,944		
Total	118,177	100.0%	26.4%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA ASSISTANCE FOR 2007

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 3 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$6,158,445	17.8%
Housing Tax Credit	$8,598,298	20.0%
Housing Trust Fund	TBD	20.0%
Total	TBD	

REGION 4

Region 4, located in the northeast corner of the state, surrounds the urban areas of Texarkana, Longview-Marshall, and Tyler. According to the 2000 Census, the total population in Region 4 is 1,015,648, which represents 4.9 percent of the state's total population.

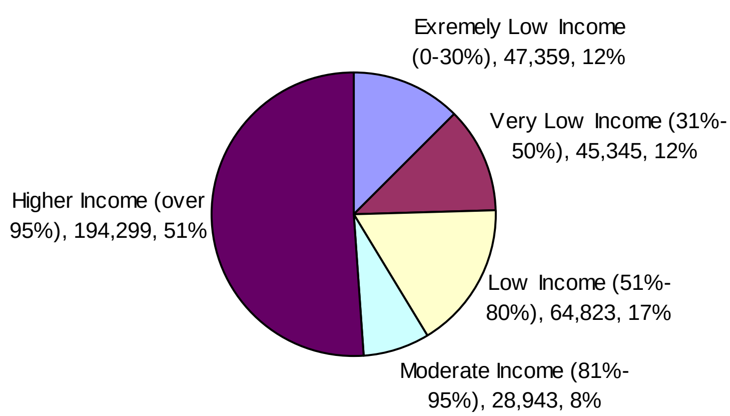
Region 4 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,015,648		4.9%
Persons with Disabilities	213,753	21.0%	5.9%
Elderly Persons (without disabilities)	77,528	7.6%	7.1%
Individuals in Poverty	152,036	15.0%	4.9%

Source: 2000 Census

Region 4 has the highest percentage of rural population in the state at 61 percent.

Region 4 Household Incomes



The pie chart to the left depicts the income breakdown of the 380,765 households in the region. Approximately 41 percent of households are low income. There are 152,036, or 15.0 percent, individuals living in poverty in the region.

2006 Multiple Listing Service data records the median home prices for Tyler and Longview-Marshall as $131,900 and $113,100, respectively.18

SPECIAL NEEDS POPULATIONS

[18] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

According to 2000 Census data, there are 213,753 persons with disabilities residing in the region, which is 21.0 percent of the total region population. In addition, there are 77,528 elderly individuals without disabilities in the region, which is 7.6 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[19] but figures vary. According to the 2000 Census, there are 1,309 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 110 homeless persons in Tyler. Region 4 also experienced damage from Hurricane Rita, which hit the southeast Texas area in September 2005. According to FEMA, $1,037,418.22 worth of damage was reported. Households affected by the hurricane have unexpected needs.

HOUSING SUPPLY

According to 2000 Census data, of the 434,792 housing units in the region, 380,468 are occupied, which is an 87.5 percent occupancy rate. Of the total housing stock, almost 71 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 73.8 percent are owner occupied and 26.2 percent are occupied by renters.

Region 4 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	434,792		5.3%
Total Occupied Housing Units	380,468	87.5%	5.1%
Owner-Occupied Units	280,896	73.8%	6.0%
Renter-Occupied Units	99,572	26.2%	3.7%

Source: 2000 Census

In the region, permits for 1,602 single family units and 231 multifamily units were issued in 2005.[20]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 380,765 households in the region, 100,479 owners and renters have housing problems; this represents 26.4 percent of all households.

[19] Texas Interagency Council for the Homeless, "Key Facts."
[20] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 4 Households with Housing Problems

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 43 percent indicated that housing assistance was their first priority need, with 29 percent ranking energy assistance as their priority need. Approximately 17 percent of respondents indicated that the development of apartments was the first priority need, 11 percent indicated that capacity building assistance was their top need, and 0 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 53 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 34 percent indicated that the need for construction and rehabilitation was the same, while 11 percent indicated that there was a minimal need for rental development in their areas and 11 percent had no opinion on the subject. When considering energy assistance activities, 41 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 40 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 4 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	5,182	23.6%	3.0
HUD Units	3,381	15.4%	5.9%
PHA Units	3,422	15.6%	5.8%
Section 8 Vouchers	6,090	27.7%	4.5%
USDA Units	3,872	17.6%	14.8%
HFC Units*	1,160		
Total	21,947	100.0%	4.9%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2007

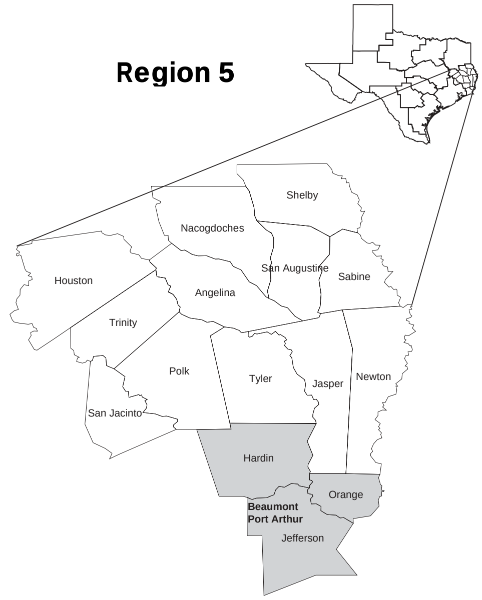
Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 4 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$4,209,442	12.1%
Housing Tax Credit	$2,286,522	5.3%
Housing Trust Fund	TBD	5.3%
Total	TBD	

REGION 5

Region 5 encompasses a 15-county area in east Texas including the urban areas of Beaumont and Port Arthur. According to the 2000 Census, the total population in Region 5 is 740,952, which represents 3.6 percent of the state's total population.



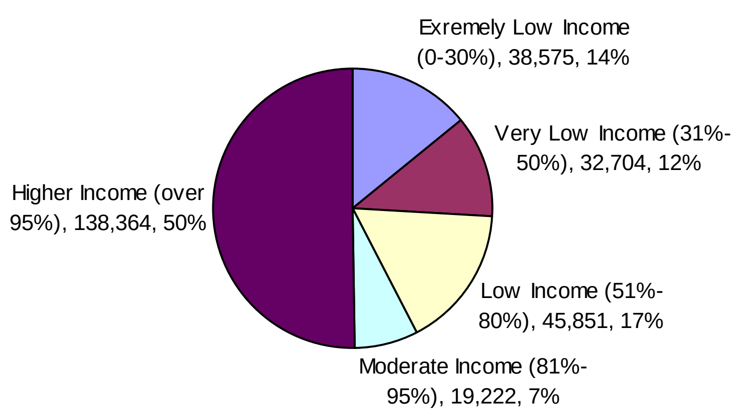
Region 5 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	740,952		3.6%
Persons with Disabilities	150,529	20.3%	4.2%
Elderly Persons (without disabilities)	53,148	7.2%	4.9%
Individuals in Poverty	120,585	16.3%	3.9%

Source: 2000 Census

The population in Region 5 is split, with 50 percent living in urban and 50 percent living in rural areas.

Region 5 Household Incomes



The pie chart to the left depicts the income breakdown of the 274,543 households in the region. Approximately 43 percent of households are low income. There are 120,585, or 16.3 percent, individuals living in poverty in the region.
2006 Multiple Listing Service data records the median home prices for Beaumont and Port Arthur as $113,200 and $89,500, respectively.[21]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 150,529 persons with disabilities residing in the region, which is 20.3 percent of the total region population. In addition, there are 53,148 elderly individuals without disabilities in the region, which is 7.2 percent of the region.

[21] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[22] but figures vary. According to the 2000 Census, there are 672 people in noninstitutional group homes, which include shelters, in the region. In its tabulation on emergency and transitional shelters, the Census did not count homeless persons in metropolitan areas. Region 5 also experienced significant damage from Hurricane Rita, which hit the southeast Texas area in September 2005. According to FEMA, $190,251,194.22 worth of damage was reported. Households affected by the hurricane have unexpected needs.

HOUSING SUPPLY

According to 2000 Census data, of the 325,047 housing units in the region, 275,233 are occupied, which is an 84.7 percent occupancy rate. Of the total housing stock, 69.3 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 73.4 percent are owner occupied and 26.6 percent are occupied by renters.

Region 5 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	325,047		4.0%
Total Occupied Housing Units	275,233	84.7%	3.7%
Owner-Occupied Units	201,971	73.4%	4.3%
Renter-Occupied Units	73,262	26.6%	2.7%

Source: 2000 Census

In the region, permits for 1,223 single family units and 398 multifamily units were issued in 2005.[23]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 274,543 households in the region, 72,650 owners and renters have housing problems; this represents 26.5 percent of all households.

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 59 percent indicated that housing assistance was their first priority need, and 10 percent ranking energy assistance as their priority need. Approximately 14 percent of respondents indicated that the development of apartments was the first priority need, 10 percent indicated that capacity building assistance was their top need, and 7 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 49 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 54 percent indicated that the need for construction and rehabilitation is the same, while 3 percent indicated that there was a minimal need for rental development in their areas. When considering energy assistance activities, 44 percent indicated that utility assistance was the greatest need followed

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 5 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	4,556	21.2%	2.7%
HUD Units	4,296	20.0%	7.5%
PHA Units	3,241	15.1%	5.5%
Section 8 Vouchers	7,992	37.2%	6.0%
USDA Units	1,371	6.4%	5.2%
HFC Units*	1,160		
Total	21,456	100.0%	4.8%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

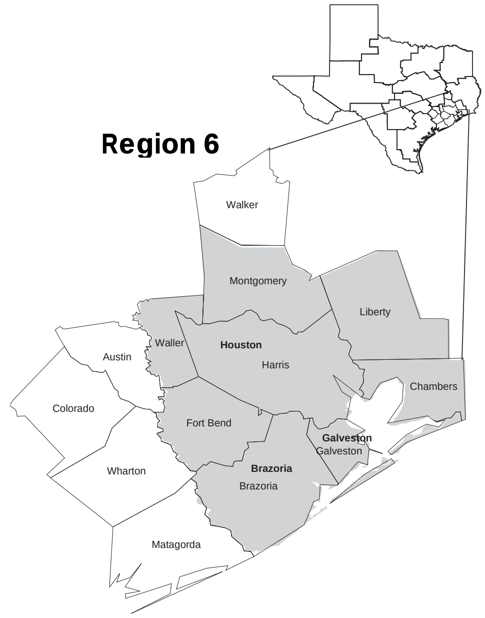
TDHCA ASSISTANCE FOR 2007

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 5 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$2,087,440	6.0%
Housing Tax Credit	$1,365,191	3.2%
Housing Trust Fund	TBD	3.2%
Total	TBD	

REGION 6



Region 6 includes the urban areas of Houston, Brazoria, and Galveston. According to the 2000 Census, the total population in Region 6 is 4,854,454, which represents 23.3 percent of the state's total population.

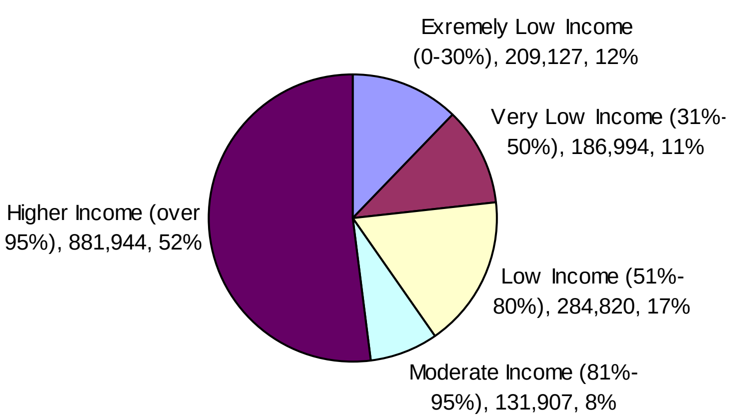
Region 6 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	4,854,454		23.3%
Persons with Disabilities	801,436	16.5%	22.2%
Elderly Persons (without disabilities)	206,438	4.3%	19.0%
Individuals in Poverty	656,239	13.5%	21.0%

Source: 2000 Census

Approximately 92 percent of the populations lives in the urban areas of Region 6.

Region 6 Household Income



The pie chart to the left depicts the income breakdown of the 1,691,811 households in the region. Approximately 40 percent of households are low income. There are 656,239, or 13.5 percent, individuals living in poverty in the region.
2006 Multiple Listing Service data records the median home prices for Houston and Galveston as $148,800 and $173,800, respectively.[24]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 801,436 persons with disabilities residing in the region, which is 16.3 percent of the total region population. In addition, there are 206,438 elderly individuals without disabilities in the region, which is 4.3 percent of the region.

[24] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[25] but figures vary. According to the 2000 Census, there are 7,792 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 1,756 homeless persons in the Houston area. Region 6 also experienced damage from Hurricane Rita, which hit the southeast Texas area in September 2005. According to FEMA, $28,325,647.98 worth of damage was reported. Households affected by the hurricane have unexpected needs.

HOUSING SUPPLY

According to 2000 Census data, of the 1,853,854 housing units in the region, 1,702,792 are occupied, which is a 91.9 percent occupancy rate. Of the total housing stock, 71 percent are one unit; 18 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 60.9 percent are owner occupied and 39.1 percent are occupied by renters.

Region 6 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	1,853,854		22.7%
Total Occupied Housing Units	1,702,792	91.9%	23.0%
Owner-Occupied Units	1,037,371	60.9%	22.0%
Renter-Occupied Units	665,421	39.1%	24.9%

Source: 2000 Census

In the region, permits for 51,525 single family units and 11,118 multifamily units were issued in 2005.[26]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 1,691,811 households in the region, 541,869 owners and renters have housing problems; this represents 32.0 percent of all households.

[25] Texas Interagency Council for the Homeless, "Key Facts."

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 70 percent indicated that housing assistance was their first priority need, with 9 percent ranking energy assistance as their priority need. Approximately 14 percent of respondents indicated that the development of apartments was the first priority need, 9 percent indicated that capacity building assistance was their top need, and 0 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 46 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 31 percent indicated that the need for construction and rehabilitation was the same, while 21 percent indicated that there was a minimal need for rental development in their areas and 12 percent had no opinion on the subject. When considering energy assistance activities, 49 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 36 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 6 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	46,254	52.4%	27.1%
HUD Units	13,076	14.8%	22.8%
PHA Units	5,795	6.6%	9.8%
Section 8 Vouchers	19,713	22.3%	14.7%
USDA Units	3,484	3.9%	13.3%
HFC Units*	37,116		
Total	88,322	100.0%	19.7%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA ASSISTANCE FOR 2007

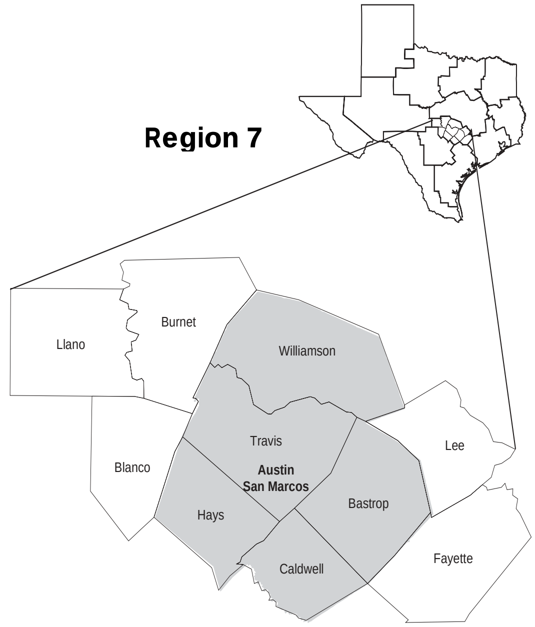
Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 6 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$2,390,795	6.9%
Housing Tax Credit	$10,182,859	23.7%
Housing Trust Fund	TBD	23.7%
Total	TBD	

REGION 7

The urban area of Austin-San Marcos is at the center of Region 7. According to the 2000 Census, the total population in Region 7 is 1,346,833, which represents 6.5 percent of the state's total population.



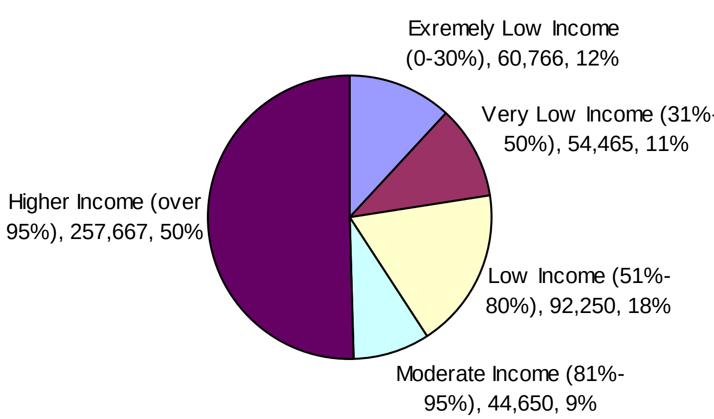
Region 7 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,346,833		6.5%
Persons with Disabilities	190,226	14.1%	5.3%
Elderly Persons (without disabilities)	61,229	4.5%	5.6%
Individuals in Poverty	145,060	10.8%	4.7%

Source: 2000 Census

Approximately 86 percent of the population lives in urban areas.

Region 7 Household Income



The pie chart to the left depicts the income breakdown of the 509,798 households in the region. Approximately 41 percent of households are low income. There are 145,060, or 10.8 percent, individuals living in poverty in the region.

The 2006 Multiple Listing Service median home price for Austin is $171,500.[27]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 190,226 persons with disabilities residing in the region, which is 14.1 percent of the total region population. In addition, there are 61,229 elderly individuals without disabilities in the region, which is 4.5 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless

[27] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

estimates that there are 200,000 homeless individuals in Texas,[28] but figures vary. According to the 2000 Census, there are 2,354 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 481 homeless persons in Austin.

HOUSING SUPPLY

According to 2000 Census data, of the 545,761 housing units in the region, 510,555 are occupied, which is a 93.5 percent occupancy rate. Of the total housing stock, 62 percent are one unit; 30 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 59.8 percent are owner occupied and 40.2 percent are occupied by renters.

Region 7 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	545,761		6.7%
Total Occupied Housing Units	510,555	93.5%	6.9%
Owner-Occupied Units	305,294	59.8%	6.5%
Renter-Occupied Units	205,261	40.2%	7.7%

Source: 2000 Census

Data for the region shows that building permits for 18,113 single family units and 6,091 multifamily units were issued in 2004.[29]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 509,798 households in the region, 164,537 owners and renters have housing problems; this represents 32.3 percent of all households.

[28] Texas Interagency Council for the Homeless, "Key Facts."

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 32 percent indicated that the development of apartments was their first priority need, with 27 percent ranking housing assistance as their priority need. Approximately 14 percent of respondents indicated that energy assistance was the first priority need, 27 percent indicated that capacity building assistance was their top need, and 0 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 34 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 45 percent indicated that their community's greatest need was the construction of new rental units, while 14 percent indicated that there was a minimal need for rental development in their areas. When considering energy assistance activities, 38 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 34 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 7 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	15,315	49.0%	9.0%
HUD Units	2,889	9.2%	5.0%
PHA Units	3,522	11.3%	5.9%
Section 8 Vouchers	8,053	25.8%	6.0%
USDA Units	1,461	4.7%	5.6%
HFC Units*	8,076		
Total	31,240	100.0%	7.0%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2007

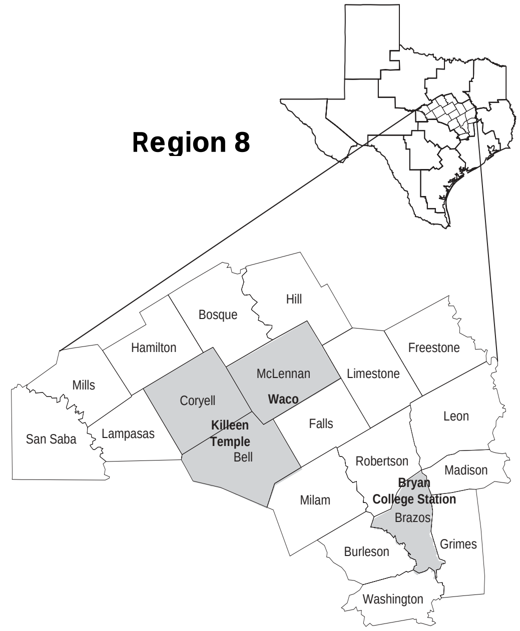
Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 7 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$1,432,347	4.1%
Housing Tax Credit	$1,919,458	4.5%
Housing Trust Fund	TBD	4.5%
Total	TBD	

REGION 8

Region 8, located in the center of the state, surrounds the urban areas of Waco, Bryan, College Station, Killeen, and Temple. According to the 2000 Census, the total population in Region 8 is 963,139 which represents 4.6 percent of the state's total population.



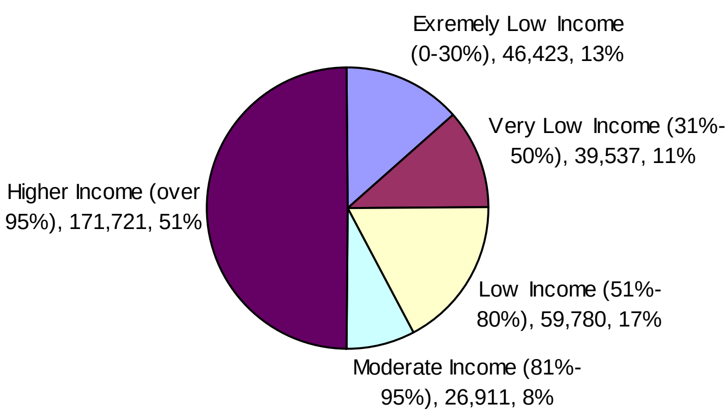
Region 8 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	963,139		4.6%
Persons with Disabilities	160,743	16.7%	4.5%
Elderly Persons (without disabilities)	55,854	5.8%	5.1%
Individuals in Poverty	149,480	15.5%	4.8%

Source: 2000 Census

Approximately 75 percent of the population lives in the urban areas of Region 8.

Region 8 Household Income



The pie chart to the left depicts the income breakdown of the 343,856 households in the region. Approximately 41 percent of households are low income. There are 149,480, or 15.5 percent, individuals living in poverty in the region.
2006 Multiple Listing Service data records the median home price for Bryan-College Station as $134,500.[30]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 160,743 persons with disabilities residing in the region, which is 16.7 percent of the total region population. In addition, there are 55,854 elderly individuals without disabilities in the region, which is 5.8 percent of the region.

[30] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[31] but figures vary. According to the 2000 Census, there are 1,003 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 129 homeless persons in the Killeen area.

HOUSING SUPPLY

According to 2000 Census data, of the 387,627 housing units in the region, 344,575 are occupied, which is an 88.9 percent occupancy rate. Of the total housing stock, 67 percent are one unit; 20 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 61.2 percent are owner occupied and 38.8 percent are occupied by renters.

Region 8 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	387,627		4.8%
Total Occupied Housing Units	344,575	88.9%	4.7%
Owner-Occupied Units	210,882	61.2%	4.5%
Renter-Occupied Units	133,693	38.8%	5.0%

Source: 2000 Census

Data for the region shows that building permits for 5,399 single family units and 2,054 multifamily units were issued in 2005.[32]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 343,856 households in the region, 103,864 owners and renters have housing problems; this represents 30.2 percent of all households.

[31] Texas Interagency Council for the Homeless, "Key Facts."
[32] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 8 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households

Regional Input on Housing Needs

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 26 percent indicated that housing assistance was their first priority need, with 22 percent ranking energy assistance as their priority need. Approximately 19 percent of respondents indicated that the development of apartments was the first priority need, 22 percent indicated that capacity building assistance was their top need, and 11 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 48 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 40 percent indicated that their community's greatest need was the construction of new rental units, while 20 percent indicated that there was a minimal need for rental development in their areas and 9 percent had no opinion on the subject. When considering energy assistance activities, 60 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 34 percent.

Assisted Housing Inventory

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 8 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	5,356	24.2%	3.1%
HUD Units	2,683	12.1%	4.7%
PHA Units	3,273	14.8%	5.5%
Section 8 Vouchers	8,053	36.3%	4.0%
USDA Units	2,804	12.6%	10.7%
HFC Units*	304		
Total	22,169	100.0%	4.4%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA ASSISTANCE FOR 2007

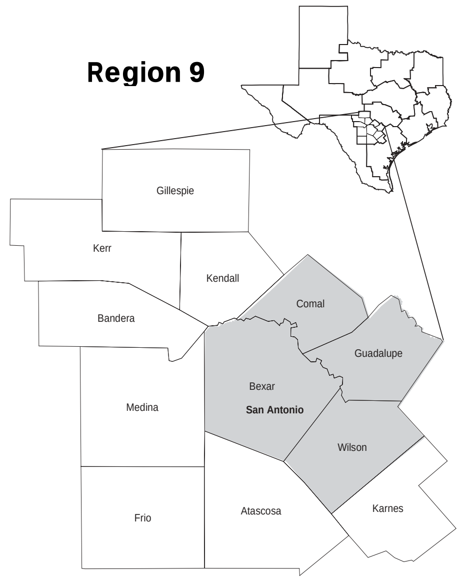
Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 8 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$1,163,474	3.4%
Housing Tax Credit	$2,358,376	5.5%
Housing Trust Fund	TBD	5.5%
Total	TBD	

REGION 9

San Antonio is the main metropolitan area in Region 9. According to the 2000 Census, the total population in Region 9 is 1,807,868, which represents 8.7 percent of the state's total population.



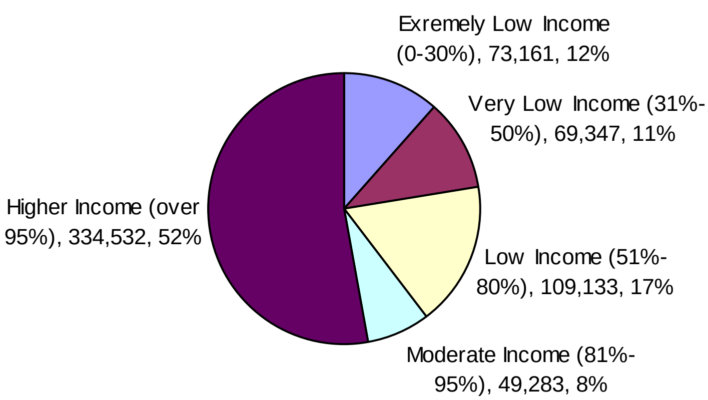
Region 9 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,807,868		8.7%
Persons with Disabilities	337,541	18.7%	9.4%
Elderly Persons (without disabilities)	107,974	6.0%	9.9%
Individuals in Poverty	267,118	14.8%	8.6%

Source: 2000 Census

Approximately 89 percent of the population lives in urban areas.

Region 9 Household Income



The pie chart to the left depicts the income breakdown of the 635,280 households in the region. Approximately 40 percent of households are low income. There are 267,118, or 14.8 percent, individuals living in poverty in the region.

The 2006 Multiple Listing Service records the median home price for San Antonio as $139,500.[33]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 337,541 persons with disabilities residing in the region, which is 18.7 percent of the total region population. In addition, there are 107,974 elderly individuals without disabilities in the region, which is 6.0 percent of the region.

[33] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[34] but figures vary. According to the 2000 Census, there are 2,919 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 850 homeless persons in San Antonio.

HOUSING SUPPLY

According to 2000 Census data, of the 689,862 housing units in the region, 636,796 are occupied, which is a 92.3 percent occupancy rate. Of the total housing stock, 69 percent are one unit; 22 percent are over two units; 8 percent are mobile homes; and the rest are boats and RVs. Approximately 65.0 percent are owner occupied and 35.0 percent are occupied by renters.

Region 9 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	689,862		8.5%
Total Occupied Housing Units	636,796	92.3%	8.6%
Owner-Occupied Units	414,009	65.0%	8.8%
Renter-Occupied Units	222,787	35.0%	8.3%

Source: 2000 Census

Data for the region shows that building permits for 14,901 single family units and 7,663 multifamily units were issued in 2005.[35]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 635,280 households in the region, 194,512 owners and renters have housing problems; this represents 30.6 percent of all households.

[34] Texas Interagency Council for the Homeless, "Key Facts."
[35] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 9 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	62,012	24,095	19,495	14,458	3,964

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 67 percent indicated that housing assistance was their first priority need, with 20 percent ranking energy assistance as their top need. Approximately 7 percent of respondents indicated that the development of apartments was the first priority need, 0 percent indicated that capacity building assistance was their top need, and 7 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 53 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 34 percent indicated that the need for construction and rehabilitation was the same, while 18 percent indicated that there was a minimal need for rental development in their areas and 18 percent had no opinion on the subject. When considering energy assistance activities, 41 percent indicated that weatherization and minor home repairs was the greatest need followed by utility assistance with 29 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 9 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	13,847	32.7%	8.1%
HUD Units	5,321	12.6%	9.3%
PHA Units	7,321	17.3%	12.3%
Section 8 Vouchers	14,859	35.1%	11.1%
USDA Units	971	2.3%	3.7%
HFC Units*	21,974		
Total	42,319	100.0%	9.5%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA ASSISTANCE FOR 2007

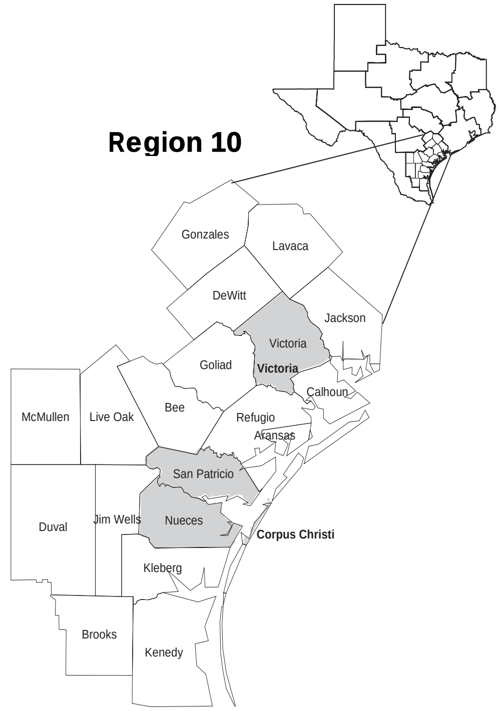
Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 9 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Total Program Funding
HOME	$1,941,552	5.6%
Housing Tax Credit	$2,448,901	5.7%
Housing Trust Fund	TBD	5.7%
Total	TBD	

REGION 10

Region 10, including the urban areas of Corpus Christi and Victoria, is located in the south eastern part of the state on the Gulf of Mexico. According to the 2000 Census, the total population in Region 10 is 732,917, which represents 3.5 percent of the state's total population.



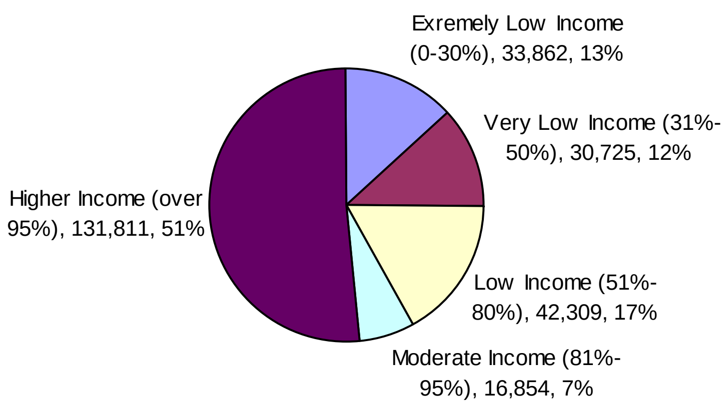
Region 10 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	732,917		3.5%
Persons with Disabilities	141,592	19.3%	3.9%
Elderly Persons (without disabilities)	46,900	6.4%	4.3%
Individuals in Poverty	132,214	18.0%	4.2%

Source: 2000 Census

In Region 10, 62 percent live in urban areas.

Region 10 Household Income



The pie chart to the left depicts the income breakdown of the 255,493 households in the region. Approximately 42 percent of households are low income. There are 132,214, or 18.0 percent, individuals living in poverty in the region.

The 2006 Multiple Listing Service records the median home price for Corpus Christi as $131,100.[36]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 141,592 persons with disabilities residing in the region, which is 19.3 percent of the total region population. In addition, there are 46,900 elderly individuals without disabilities in the region, which is 6.4 percent of the region.

[36] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,37 but figures vary. According to the 2000 Census, there are 1,456 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 272 homeless persons in Corpus Christi.

HOUSING SUPPLY

According to 2000 Census data, of the 298,494 housing units in the region, 256,428 are occupied, which is an 85.9 percent occupancy rate. Of the total housing stock, 71 percent are one unit; 18 percent are over two units; 10 percent are mobile homes; and the rest are boats and RVs. Approximately 66.8 percent are owner occupied and 33.2 percent are occupied by renters.

Region 10 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	298,494		3.7%
Total Occupied Housing Units	256,428	85.9%	3.5%
Owner-Occupied Units	171,319	66.8%	3.6%
Renter-Occupied Units	85,109	33.2%	3.2%

Source: 2000 Census

Data for the region shows that building permits for 2,547 single family units and 807 multifamily units were issued in 2005.[38]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 255,493 households in the region, 76,196 owners and renters have housing problems; this represents 29.8 percent of all households.

[37] Texas Interagency Council for the Homeless, "Key Facts."
[38] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 40 percent indicated that housing assistance was their first priority need, with 15 percent ranking energy assistance as their priority need. Approximately 15 percent of respondents indicated that the development of apartments was the first priority need, 30 percent indicated that capacity building assistance was their top need, and 0 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 81 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 41 percent indicated that their community's greatest need was the construction of new rental units, while 18 percent indicated that there was a minimal need for rental development in their areas. When considering energy assistance activities, 54 percent indicated that weatherization and minor home repairs was the greatest need followed by utility assistance with 36 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 10 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	3,968	23.1%	2.3%
HUD Units	3,811	22.2%	6.6%
PHA Units	3,976	23.1%	6.7%
Section 8 Vouchers	3,804	22.1%	2.8%
USDA Units	1,619	9.4%	6.2%
HFC Units*	968		
Total	17,178	100.0%	3.8%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2007

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 10 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$2,538,461	7.3%
Housing Tax Credit	$1,575,474	3.7%
Housing Trust Fund	TBD	3.7%
Total	TBD	

REGION 11

Region 11 is a 16-county area along the border of Mexico. The main urban areas in the region are Brownsville-Harlingen, McAllen-Edinburg, Del Rio, and Laredo. According to the 2000 Census, the total population in Region 11 is 1,343,330, which represents 6.4 percent of the state's total population.

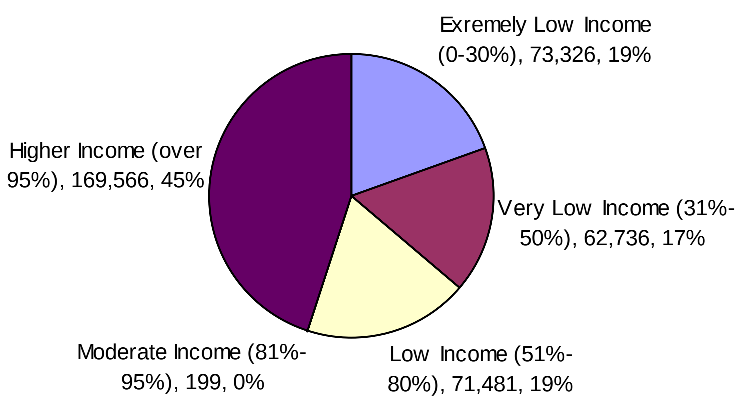
Region 11 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,343,330		6.4%
Persons with Disabilities	257,838	19.2%	7.2%
Elderly Persons (without disabilities)	67,505	5.0%	6.2%
Individuals in Poverty	455,366	33.9%	14.6%

Source: 2000 Census

About 68 percent of the population lives in urban areas.

Region 11 Household Income



The pie chart to the left depicts the income breakdown of the 377,276 households in the region. Approximately 55 percent of households are low income.[39] There are 455,366, or 33.9 percent, individuals living in poverty in the region.

2006 Multiple Listing Service data records the median home prices for Brownsville as $110,400 and McAllen as $109,700.[40]

[39] The CHAS figures for moderate and higher income households in Region 11 indicate that there are only 199 persons with incomes between 80-95 percent of the AMFI. TDHCA has been unable to get more accurate information for this segment of the population. However, the planning impact for the SLIHP is relatively low because, except for the first time homebuyer program which is done through a network of participating lenders, TDHCA programs serve persons below 80 percent AMFI.
[40] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 257,838 persons with disabilities residing in the region, which is 19.2 percent of the total region population. In addition, there are 67,505 elderly individuals without disabilities in the region, which is 5.0 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[41] but figures vary. According to the 2000 Census, there are 1,211 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 193 homeless persons in Laredo.

HOUSING SUPPLY

According to 2000 Census data, of the 457,406 housing units in the region, 378,275 are occupied, which is an 82.7 percent occupancy rate. Of the total housing stock, 66 percent are one unit; 14 percent are over two units; 18 percent are mobile homes; and the rest are boats and RVs. Approximately 70.8 percent are owner occupied and 29.2 percent are occupied by renters.

Region 11 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	457,406		5.6%
Total Occupied Housing Units	378,275	82.7%	5.1%
Owner-Occupied Units	267,716	70.8%	5.7%
Renter-Occupied Units	110,559	29.2%	4.1%

Source: 2000 Census

Data for the region shows that building permits for 12,171 single family units and 3,089 multifamily units were issued in 2005.[42]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 377,276 households in the region, 161,609 owners and renters have housing problems; this represents 42.8 percent of all households.

[41] Texas Interagency Council for the Homeless, "Key Facts."
[42] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 11 Households with Housing Problems

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 40 percent indicated that housing assistance was their first priority need, with 10 percent ranking energy assistance as their priority need. Approximately 20 percent of respondents indicated that the development of apartments was the first priority need, 20 percent indicated that capacity building assistance was their top need, and 10 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 46 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 50 percent indicated that the need for construction and rehabilitation was the same, while 0 percent indicated that there was a minimal need for rental development in their areas. When considering energy assistance activities, 59 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 29 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 11 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	7,400	22.2%	4.3%
HUD Units	3,695	11.1%	6.4%
PHA Units	7,223	21.6%	12.2%
Section 8 Vouchers	13,071	39.1%	9.8%
USDA Units	2,003	6.0%	7.7%
HFC Units*	204		
Total	33,392	100.0%	7.5%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2007

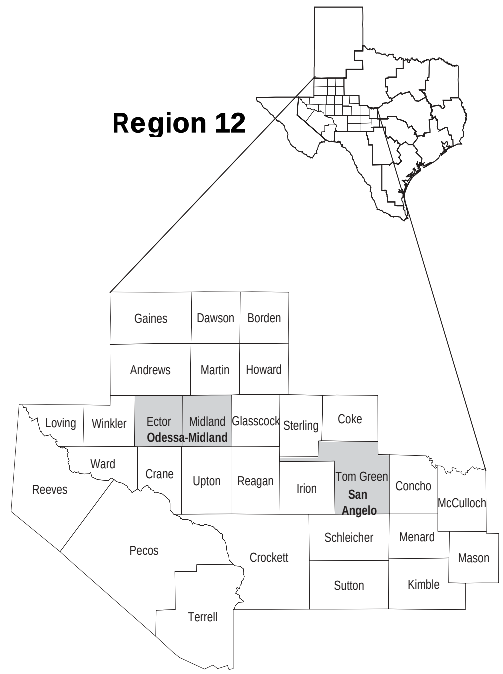
Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 11 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$6,245,987	18.0%
Housing Tax Credit	$5,600,674	13.0%
Housing Trust Fund	TBD	13.0%
Total	TBD	

REGION 12

Region 12 in west Texas surrounds the urban areas of Odessa-Midland and San Angelo. According to the 2000 Census, the total population in Region 12 is 524,884, which represents 2.5 percent of the state's total population.



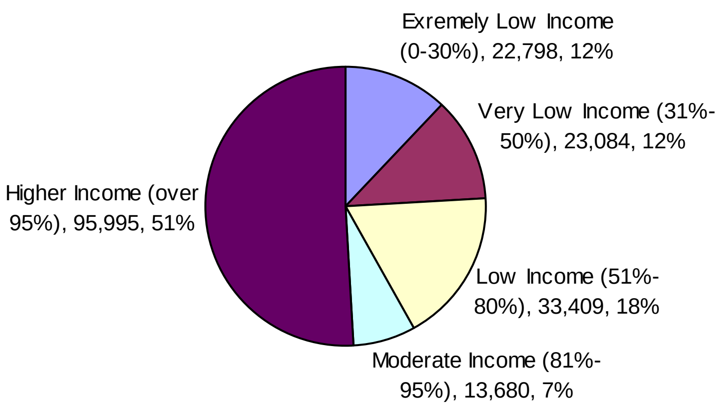
Region 12 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	524,884		2.5%
Persons with Disabilities	91,822	17.5%	2.5%
Elderly Persons (without disabilities)	35,764	6.8%	3.3%
Individuals in Poverty	85,063	16.2%	2.7%

Source: 2000 Census

Approximately 68 percent of the population lives in urban areas.

Region 12 Household Income



The pie chart to the left depicts the income breakdown of the 188,921 households in the region. Approximately 42 percent of households are low income. There are 85,063, or 16.2 percent, individuals living in poverty in the region.

Multiple Listing Service data records the median home prices for Odessa-Midland as $104,200.[43]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 91,822 persons with disabilities residing in the region, which is 17.5 percent of the total region population. In addition, there are 35,764 elderly individuals without disabilities in the region, which is 6.8 percent of the region.

[43] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,44 but figures vary. According to the 2000 Census, there are 414 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census did not count any homeless people in metropolitan areas.

HOUSING SUPPLY

According to 2000 Census data, of the 221,968 housing units in the region, 189,582 are occupied, which is an 85.4 percent occupancy rate. Of the total housing stock, 72 percent are one unit; 16 percent are over two units; 12 percent are mobile homes; and the rest are boats and RVs. Approximately 70.1 percent are owner occupied and 29.9 percent are occupied by renters.

Region 12 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	221,968		2.7%
Total Occupied Housing Units	189,582	85.4%	2.6%
Owner-Occupied Units	132,956	70.1%	2.8%
Renter-Occupied Units	56,626	29.9%	2.1%

Source: 2000 Census

Data for the region shows that building permits for 922 single family units and 179 multifamily units were issued in 2005.[45]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 188,921 households in the region, 49,895 owners and renters have housing problems; this represents 26.4 percent of all households.

[44] Texas Interagency Council for the Homeless, "Key Facts."
[45] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 12 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 45 percent indicated that housing assistance was their first priority need, with 9 percent ranking energy assistance as their priority need. Approximately 27 percent of respondents indicated that the development of apartments was the first priority need, 9 percent indicated that capacity building assistance was their top need, and 9 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 50 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 42 percent indicated that their community's greatest need was the construction of new rental units, while 17 percent indicated that there was a minimal need for rental development in their areas and 4 percent had no opinion on the subject. When considering energy assistance activities, 46 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 42 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 12 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	2,926	30.4%	1.7%
HUD Units	1,792	18.6%	3.1%
PHA Units	1,183	12.3%	2.0%
Section 8 Vouchers	3,039	31.6%	2.3%
USDA Units	687	7.1%	2.6%
HFC Units*	24		
Total	9,627	100.0%	2.2%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2007

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 12 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Program's Funding
HOME	$1,871,449	5.4%
Housing Tax Credit	$1,300,187	3.0%
Housing Trust Fund	TBD	3.0%
Total	TBD	

REGION 13

El Paso is the main urban area in Region 13. The region spreads along the Texas-Mexico border in the southwestern tip of the state. According to the 2000 Census, the total population in Region 13 is 524,884, which represents 2.5 percent of the state's total population.

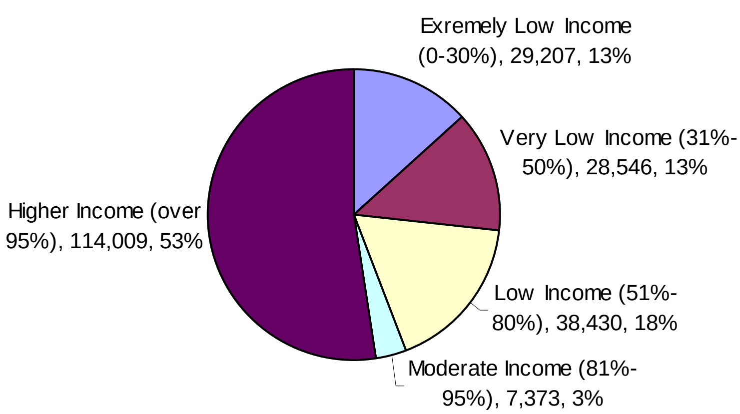
Region 13 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	704,318		3.4%
Persons with Disabilities	128,000	18.2%	3.6%
Elderly Persons (without disabilities)	35,421	5.0%	3.3%
Individuals in Poverty	165,122	23.4%	5.3%

Source: 2000 Census

Approximately 92 percent of the region population lives in the urban area of El Paso.

Region 13 Household Income



The pie chart to the left depicts the income breakdown of the 216,861 households in the region. Approximately 44 percent of households are low income. There are 165,122, or 23.4 percent, individuals living in poverty in the region.
The 2006 Multiple Listing Service data records the median home price for El Paso as $125,700.[46]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 128,000 persons with disabilities residing in the region, which is 18.2 percent of the total region population. In addition, there are 35,421 elderly individuals without disabilities in the region, which is 5.0 percent of the region.

[46] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 31, 2006).

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[47] but figures vary. According to the 2000 Census, there are 1,022 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 356 homeless people in El Paso.

HOUSING SUPPLY

According to 2000 Census data, of the 236,572 housing units in the region, 219,261 are occupied, which is a 92.7percent occupancy rate. Of the total housing stock, 68 percent are one unit; 23 percent are over two units; 8 percent are mobile homes; and the rest are boats and RVs. Approximately 63.8 percent are owner occupied and 36.2 percent are occupied by renters.

Region 13 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	236,572		2.9%
Total Occupied Housing Units	219,261	92.7%	3.0%
Owner-Occupied Units	139,842	63.8%	3.0%
Renter-Occupied Units	79,419	36.2%	3.0%

Source: 2000 Census

Data for the region shows that building permits for 4,459 single family units and 1,074 multifamily units were issued in 2005.[48]

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 216,861 households in the region, 81,248 owners and renters have housing problems; this represents 37.5 percent of all households.

[47] Texas Interagency Council for the Homeless, "Key Facts."
[48] Real Estate Center at Texas A&M University, "Texas County Building Permit Activity," http://recenter.tamu.edu/data/bpc/ (accessed August 7, 2006).

Region 13 Households with Housing Problems

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 47 percent indicated that housing assistance was their first priority need, with 0 percent ranking energy assistance as their priority need. Approximately 20 percent of respondents indicated that the development of apartments was the first priority need, 13 percent indicated that capacity building assistance was their top need, and 20 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 41 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 46 percent indicated that their community's greatest need was the construction of new rental units, while 12 percent indicated that there was a minimal need for rental development in their areas. When considering energy assistance activities, 52 percent indicated that weatherization and minor home repairs was the greatest need followed by utility assistance with 24 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 13 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	3,598	20.1%	2.1%
HUD Units	1,863	10.4%	3.2%
PHA Units	6,284	35.1%	10.6%
Section 8 Vouchers	5,842	32.7%	4.4%
USDA Units	298	1.7%	1.1%
HFC Units*	378		
Total	17,885	100.0%	4.0%

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA Assistance for 2007

Based on allocation formulas for the programs listed below, TDHCA can estimate the amount of 2007 funding that will be allocated to the region. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally. Additionally, because the region system that organizes community service contractors is different from the 13 regions used for other TDHCA planning purposes, community affairs programs are not included here. See the applicable section of the Annual Report for region information on the Community Services Block Grant, Emergency Shelter Grant, Comprehensive Energy Assistance, and Weatherization Assistance Programs.

Region 13 Projected 2007 TDHCA Funding by Housing Program

Program	2007 Funding	Percent of Total Program Funding
HOME	$949,236	2.7%
Housing Tax Credit	$2,016,435	4.7%
Housing Trust Fund	TBD	4.7%
Total	TBD	

REGIONAL PLANS SUMMARY

The housing and community service needs of the different regions of Texas are as varied as the regions themselves. This section summarizes the information from the regional plans in the previous section.

POPULATION CHARACTERISTICS

The most populous regions of the state according to the 2000 Census are Regions 3 and 6, together representing almost 50 percent of the state. Regions 3, 7, and 11 are the fastest growing areas as indicated by population estimates.

Population by Region

Service Region	Population 2000 Census	Percent of State's Population	Population Estimate Jan 1, 2003	Percent Change 2000 to 2003
1	780,733	3.7%	789,292	1.1%

Information on the number of housing permits provides information on the regional housing industry. The regions with the highest share of the state's housing permits are also the most populous regions: 3 and 6. Across the state, there were nearly four times as many single family permits as multifamily permits.

Housing Permits, 2005

Service Region	Multifamily Housing Permits	Percent of State	Single Family Housing Permits	Percent of State	Total Housing Permits	Percent of State

NEED INDICATORS

The chart below shows the number of renter households with cost burden greater than 30 percent by income group. The highest numbers of very low income households with extreme cost burden are found in Region 3 with a total of 206,011 households and Region 6 with 168,355 households.

Number of Renter Households with Extreme Cost Burden by Income Group, 2000

The number of rental units lacking complete plumbing and/or kitchen facilities is one of the indicators of housing need that does not follow the pattern of population. Regions 3 and 6 have the highest number of units lacking facilities and are also the regions with the highest number of renter households. Region 11, however, is ranked sixth in terms of renter population and third in number of renter units lacking kitchen and/or plumbing facilities.

Number of Renter Units Lacking Kitchen and/or Plumbing by Affordability Category, 2000

ASSISTED HOUSING INVENTORY

The following table shows the number of multifamily units in the state financed through state and federal sources according to region. HFC units are not included in the total assisted units because this figure includes a considerable number of marker-rate units, and many HFC units are financed through TDHCA and already counted in the TDHCA units total. Please see the "Assisted Housing Inventory" under "State of Texas" for data explanations.

Assisted Multifamily Units

Region	TDHCA Units	HUD Units	PHA Units	Section 8 Vouchers	USDA Units	HFC units*	Total Assisted Units
1	4,218	2,076	1,562	3,987	1,612	1,577	13,455
2	2,753	1,655	3,904	2,921	1,925	280	13,158
3	55,393	10,834	8,725	39,149	4,076	19,944	118,177
4	5,182	3,381	3,422	6,090	3,872	1,160	21,947
5	4,556	4,296	3,241	7,992	1,371	1,171	21,456
6	46,254	13,076	5,795	19,713	3,484	37,116	88,322
7	15,315	2,889	3,522	8,053	1,461	8,076	31,240
8	5,356	2,683	3,273	5,424	2,804	304	19,540
9	13,847	5,321	7,321	14,859	971	21,974	42,319
10	3,968	3,811	3,976	3,804	1,619	968	17,178
11	7,400	3,695	7,223	13,071	2,003	204	33,392
12	2,926	1,792	1,183	3,039	687	24	9,627
13	3,598	1,863	6,284	5,842	298	378	17,885
State	170,766	57,372	59,431	133,944	26,183	93,176	447,696

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

TDHCA ASSISTANCE FOR 2007

Based on allocation formulas, TDHCA can estimate the amount of 2007 funding that will be allocated to a region for certain programs. Please see "TDHCA Allocation Plans" in the Action Plan section for more information on the formulas. Not all TDHCA programs and funding are included; some TDHCA programs and certain program set-asides are not allocated regionally and thus are not included in this table. Community Affairs programs are also not included here because they are not allocated by the same 13 region system as other TDHCA programs. Projected dollar amounts for the Housing Trust Fund, while distributed according to a regional allocation formula like the HOME and HTC programs, were not available at the time of this document's publication.

Regional figures are total dollars to be allocated, less administrative fees and program set-asides or initiatives that are not subject to the allocation formula. State totals may not be exact due to rounding.

Projected 2007 Regional Funding by Housing Program

Region	HOME	HTC	Total HOME & HTC Funding Allocation
1	$2,096,376	$2,096,099	$4,192,475

13	$949,236	$2,016,435	$2,965,671
State	$2,096,376	$2,096,099	$4,192,475

SECTION 4: ACTION PLAN

In response to the housing needs identified in the previous section, this plan outlines TDHCA's course of action designed to meet those underserved housing needs. This section discusses the following:

- TDHCA Purpose
- Obstacles to Meeting Housing Needs
- General Strategies to Overcome Obstacles
- Policy Focuses
- Program Plans
- TDHCA Allocation Plans
- TDHCA Goals and Objectives

TDHCA PURPOSE

Section 2306.001 of TDHCA's enabling legislation states that the purpose of the Department is to

(1) assist local governments in:

(A) providing essential public services for their residents; and

(B) overcoming financial, social, and environmental problems;

(2) provide for the housing needs of individuals and families of low, very low, and extremely low income and families of moderate income;

(3) contribute to the preservation, development, and redevelopment of neighborhoods and communities, including cooperation in the preservation of government-assisted housing occupied by individuals and families of very low and extremely low income;

(4) assist the governor and the legislature in coordinating federal and state programs affecting local government;

(5) inform state officials and the public of the needs of local government;

(6) serve as the lead agency for:

(A) addressing at the state level the problem of homelessness in this state;

(B) coordinating interagency efforts to address homelessness; and

(C) addressing at the state level and coordinating interagency efforts to address any problem associated with homelessness, including hunger, and

(7) serve as a source of information to the public regarding all affordable housing resources and community support services in the state.

GENERAL STRATEGIES TO OVERCOME OBSTACLES

TDHCA is committed to exploring a variety of avenues to provide affordable housing and community services to assist those at the local level. TDHCA will continue to use the following general approaches to overcome obstacles to addressing housing need.

EFFECTIVE USE OF EXISTING RESOURCES

Programs administered by TDHCA provide housing and housing-related services, including community services. Housing activities consist of homebuyer assistance which includes down payment and closing costs, the rehabilitation of single family and multifamily units, rental assistance, the new construction of single family and multifamily housing, special needs housing, transitional housing, and emergency shelters. Housing-related and community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance. Through these activities, the Department strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process.

PROVIDE INFORMATIONAL RESOURCES

Though TDHCA does not have regulatory authority the housing/building industry, save projects funded with TDHCA funds and certain aspects of the manufactured housing industry, TDHCA can act as an information resource to help identify or facilitate actions such as the following:

- Encourage localities to identify and address those regulations that lead to increased housing costs. For example, work through outreach efforts supported by convincing research to help local governments see the value in
  - setting aside undeveloped or underdeveloped land for affordable housing developments,
  - adopting zoning ordinances that do not have the effect of impeding affordable housing,
  - reviewing local amendments to building codes and modify those that restrict the use of new advances in construction materials and techniques.
- Continue education programs such as the Texas Statewide Homebuyer Education Program, which provides lenders, homebuyer educators, and consumers information and education on homebuyer education.
- Continue research on defining and eliminating or reducing both state and local policy barriers.
- Continue research on a variety of lending issues that affect the ability of households to purchase, maintain, and remain in their homes. A significant portion of this effort relates to a study required by HB 1582 of the 79th Legislature. This bill requires TDHCA to study

mortgage foreclosure rates in Bexar, Cameron, Dallas, El Paso, Harris, and Travis Counties. The study addresses the extent to which the terms of mortgages are related to the foreclosure rate and whether terms could be offered to reduce the likelihood of foreclosure; the socioeconomic and geographic elements characterizing foreclosures; the securitization of mortgages in the secondary market and its effect on foreclosures; consumer education efforts to prevent foreclosures; and recommendations to reduce foreclosures. For more information on this study, please contact the Division of Policy and Public Affairs at (512) 475-3976 or visit http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm. .

- Provide education and outreach to mitigate public opposition to affordable housing. TDHCA has developed a page on its website to provide interested persons with existing research on affordable housing issues that may be of concern.

COORDINATE RESOURCES

Understanding that no single entity can address the enormous needs of the state of Texas, TDHCA supports the formation of partnerships in the provision of housing and housing-related endeavors. The Department works with many housing partners including consumer groups, community-based organizations, neighborhood associations, community development corporations, community housing development organizations, community action agencies, real estate developers, social service providers, local lenders, investor-owned electric utilities, local government, nonprofits, faith-based organizations, property managers, state and local elected officials, and other state and federal agencies.

There are many benefits to these partnerships: risk and commitment are shared; the principle of reciprocity requires that local communities demonstrate an awareness of their needs and a willingness to participate actively in solving problems, therefore local communities play an active role in tailoring the project to their needs; partners are able to concentrate specifically on their area of expertise; and a greater variety of resources insure a well targeted more affordable product.

Coordination with Federal Agencies

Because the State receives the majority of its funding from federal sources, many TDHCA programs require coordination with federal agencies. Below is a listing of those federal agencies and an overview of the activities associated with these partnerships:

- *US Department of Housing and Urban Development*: TDHCA administers the HOME, ESGP, and Section 8 programs in Texas using HUD dollars. TDHCA also regulates the manufactured housing industry using HUD laws. TDHCA has established cooperative efforts with HUD's personnel in their field offices and with the Secretary's representative. This cooperation has led to the joint marketing of housing programs through conferences and workshops throughout the state, a mutual referral system, as well as technical assistance service by which each agency assists the other with workshops and other training efforts. Currently, HUD staff uses several TDHCA documents as their text on available housing resources and distribute these materials to the local governments and organizations they are serving.

- *US Treasury Department*: TDHCA administers the HTC Program, which was created by the Tax Reform act of 1986 (Section 42 of the Internal Revenue Code of 1986, as amended, is the federal law that governs the HTC Program). The HTC Program produces over 12,000 units of affordable housing each year. Additionally, TDHCA acts as an issuer of tax-exempt and taxable mortgage revenue bonds. The authority for these bonds comes again from the above cited act. Annually, single family bonds are used to provide below-market interest rate loans and multifamily bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties.
- *US Department of Health and Human Services*: The Department administers several programs funded by HHS that are aimed at serving extremely low income persons; specifically, the Community Services Block Grant Program, Comprehensive Energy Assistance Program, and the Weatherization Assistance Program.
- *US Department of Energy*: TDHCA administers the US Department of Energy's Weatherization Assistance Program for Low Income Persons. This program helps consumers control energy costs through the installation of weatherization measures and provides energy conservation education.
- *USDA Rural Development*: As a provider of services to rural Texas communities, TDHCA has an ongoing relationship with USDA Rural Development. Collaborations have been achieved through several TDHCA programs (HTC, HTF, HOME) in the form of multifamily developments and single family homeownership initiatives.

Coordination with State Agencies, Local Governments, and Other Parties

With the exception of most of its community services programs, TDHCA's funding resources are awarded through formal, competitive processes. As such, funding is distributed to entities that, in turn, provide assistance to households in need. This distribution is done using a number of techniques.

- Almost all housing development, rehabilitation, and rental assistance related funding is awarded through formal competitive request for proposals and notices of funding availability.
- First time homebuyer mortgage and down payment assistance is allocated through a network of participating lenders.
- Community services funds are predominantly allocated through a network of community based organizations who receive their funding on an annual, ongoing basis.

Because TDHCA does not fund individuals directly, coordination with outside entities is key to the success of its programs. Below are some examples of organizational cooperation outside of the funding of these entities.

- *Office of Rural Community Affairs (ORCA):* TDHCA and ORCA have entered into an interagency contract to jointly administer the rural regional allocation of the HTC Program. ORCA also participates in the evaluation and site inspection of rural developments proposed under the rural allocation. TDHCA and ORCA coordinate services with each of the seven Colonia Self-Help Centers (in Cameron/Willacy, El Paso, Hidalgo, Maverick, Starr, Val Verde, and Webb counties) to provide housing and technical assistance to improve the quality of life for colonia residents beyond the provision of basic infrastructure. The contracts are executed directly with the county where the center is located. In addition, TDHCA and ORCA jointly administer the CDBG disaster recovery funding awarded to Texas under the Department of Defense Appropriations Act, 2006, to rebuild the southeast Texas region devastated by Hurricane Rita.

- *Texas Homeless Network*: TDHCA collaborates with the Texas Homeless Network (THN) to build the capacity of homeless coalitions across the State of Texas, enabling them to become more effective in the communities they serve. The Department also provided funds through THN to support technical assistance workshops for the HUD Continuum of Care homeless application. The purpose of the workshops was to assist communities in creating a network of services to the homeless population.
- *Texas Interagency Council for the Homeless*: TDHCA serves as a member of, and provides administrative support to, the Texas Interagency Council for the Homeless—a council comprised of six member state agencies.
- *Interagency Housing Partnership of the Texas Mental Health Transformation Workgroup*. The Department is working with the Texas Department of Aging and Disability Services, the Texas Department of Assisted Rehabilitative Services, the Health and Human Services Commission, the Texas Department of Criminal Justice, the Texas Department of Family Protective Services, and several veterans affairs agencies to conduct a comprehensive study of existing housing programs and their delivery mechanisms, while focusing on any regulatory facets of policy which create barriers and may even make certain populations ineligible to benefit from various housing opportunities.
- *Texas Association of Realtors:* In December 2004, the Department entered into a partnership with the Texas Association of Realtors and Fannie Mae to educate Texas real estate agents on programs and develop an outreach campaign to help first time homebuyers access low-cost mortgage financing. TDHCA also sponsored a specialty license plate to support the association's Housing Opportunity Foundation.
- *Texas Home of Your Own Coalition:* TDHCA has historically partnered with United Cerebral Palsy's Texas Home of Your Own Coalition, which is a nonprofit organization that assists persons with disabilities purchase homes, to set aside HOME Homebuyer Assistance Program funds to support homeownership for persons with disabilities.
- *Texas Department of Aging and Disability Services:* TDHCA, in cooperation with the Texas Department of Aging and Disability Services, the Texas Health and Human Services Commission, and local public housing authorities, administers a housing voucher pilot program developed by HUD, the US Department of Health and Human Services, and the Institute on Disability at the University of New Hampshire. "Project Access" helps low income persons with disabilities transition from nursing facilities into the community by

providing Section 8 Housing Choice Vouchers that enable them to access affordable housing in the community.

- *Promoting Independence Advisory Board*. The Department has been working with the Promoting Independence Advisory Board to address issues related to *Olmstead v. L. C.* The group is working on initiatives that will serve the needs of persons with disabilities who want housing options outside of institutional settings. TDHCA has been working with the following agencies: Texas Health and Human Services Commission, Texas Department of Aging and Disability Services, Texas Council for Developmental Disabilities, Texas Department of State Health Services, Texas Education Agency, and Texas Department of Protective and Regulatory Services.
- *NeighborWorks America*. TDHCA continues to contract with NeighborWorks America to facilitate the Texas Statewide Homebuyer Education Program (TSHEP) training. TSHEP also collaborates with several other partners including the Texas State Affordable Housing Corporation, JP Morgan Chase, Fannie Mae, CitiMortgage, the Texas Home of Your Own Coalition, and Texas C-BAR to implement the trainings.
- *Texas State Affordable Housing Corporation (TSAHC):* TDHCA has entered into a memorandum of understanding with TSAHC to share data and information in the development of the State of Texas Low Income Housing Plan and Annual Report. TSAHC has also partnered with TDHCA to manage the financial account for Texas Statewide Homebuyer Education Program and is contracted with the Department to provide some asset management services.
- *Local Utility Companies*: Partnerships with financial commitments between the Weatherization Assistance Program and Southwestern Electric Power Company, Southwestern Public Service Company, Entergy, and El Paso Electric, provide energy conservation measures to very low and extremely low income utility customers.
- *CHDO Capacity Building Project*: TDHCA has committed to understanding the needs of CHDOs to ensure the success of single family and multifamily developments funded by TDHCA. To that end, TDHCA partnered with Training and Development Associates' (TDA's) Community Building Investment (CBI) II Program. The CBI II Program, implemented by TDA, provides direct technical assistance, training, and/or operating grants (pass-through funds) to existing and potential CHDOs that were awarded funding under the program.

TDHCA also commissioned a comprehensive plan to address technical assistance and capacity building needs of Texas CHDOs. Implementation of the plan will improve TDHCA's overall management and understanding of CHDOs, improve the capacity and performance of CHDOs, and establish effective systems to ensure long term quality housing production. The plan is primarily composed of two parts: (1) the provision of ongoing training and technical assistance to CHDOs and prospective CHDOs and (2) the recommended procedures needed to ensure the future capacity and success of Texas CHDOs.

FAIR HOUSING

The Texas Fair Housing Act of 1989 enables the State to remedy discriminatory public policies affecting housing affordability and access. The Act prohibits discrimination against individuals in their pursuit of homeownership or rental housing opportunities based on race, color, national origin, sex, religion, familial status, and physical or mental handicaps. Recent state activities or current objectives relating to fair housing are discussed below:

- Comply with the Texas Fair Housing Act in TDHCA administered programs.
- Coordinate fair housing efforts with the Texas Workforce Commission, Human Rights Division, which was created under the Texas Fair Housing Act to directly address public grievances related to fair housing.
- Section 8 Admittance Policy: In June 2000, TDHCA appointed a Section 8 Task Force and charged it to develop a policy for expanding housing opportunities for Section 8 voucher and certificate holders in TDHCA assisted properties. The policy adopted by the TDHCA Board is a follows:
  - Managers and owners of HTC properties are prohibited from having policies, practices, procedures and/or screening criteria that have the effect of excluding applicants because they have a Section 8 voucher or certificate.
  - The verification of such an exclusionary practice on the part of the owner or the manager by TDHCA will be considered a violation and will result in the issuance of a Notice of Violation and, if appropriate, issuance of a Form 8823 to the Internal Revenue Service.
  - Any violation of program requirements relative to this policy will also impact the Owner's ability to participate in future TDHCA programs.

POLICY PRIORITIES

This section describes policies TDHCA will use to address specific types of housing need in each uniform state service region, including meeting the underserved needs of extremely low income households, the homeless, persons with disabilities, and other special needs populations. This section also discusses rural needs, energy efficiency, and lead-based paint. Because of the unique challenges associated with the housing needs of these varying populations, a considerable level of planning and consumer-need-based focus is required.

EXTREMELY LOW INCOME INDIVIDUALS AND HOUSEHOLDS

While one of the Department's charges is to serve the State's populations from extremely low income to moderate income, funding priority is given to those populations that are most in need of services: low, very low, and extremely low income individuals and households. Additionally, the Texas Legislature, through 2006/2007 Appropriations Act Rider 4, specifically calls upon TDHCA to focus funding toward individuals and families that are earning less than 60 percent of the area median family income. Rider 4 directs TDHCA to apply $30,000,000 annually towards assisting extremely low income households; and no less than 20 percent of the Department's total housing funds towards assisting very low income households. TDHCA works to meet these goals, by providing HOME and HTC scoring incentives for applicants to set aside units for very low and extremely low income households.

The data presented in the Housing Analysis section of this report shows that households with lower incomes have higher incidences of housing problems. There are minimal differences between the incidences of housing problems between the two lowest income groups (0-30 percent and 31-50 percent of median income). While incidences of housing problems for these two groups are significantly higher than those of the other low income group, households with incomes at 51-80 percent of median income have significant needs as well. Therefore, households at 0-80 percent of median income have been given higher priority than households above 80 percent of median income. This prioritization will allow the State to target resources to those households most in need, regardless of household type.

Poverty

According to the 2000 US Census, Texas has the ninth highest poverty rate among the states: 15.4 percent compared to the national rate of 12.4 percent. The US Department of Health and Human Services defines the 2005 poverty guideline as $19,350 in income for a family of four,[49] and many poor families make substantially less than this. Poverty can be

[49] US Department of Health and Human Services, "The 2005 HHS Poverty Guidelines," http://aspe.hhs.gov/poverty/05poverty.shtml (accessed July 28, 2006).

self-perpetuating, creating barriers to education, health, and the financial stability provided by homeownership.

Those groups showing the largest growth in proportion of population, the young and minority populations, continue to be overrepresented in the Texas poverty population. According to the 2000 US Census, 38 percent of the poverty population is between the ages of 0-17. Hispanics make up 41 percent of Texas children under the age of 18, but 62 percent of all poor children. African American children account for 12.5 percent of Texas children, but 18 percent of all poor children.

TDHCA recognizes that unemployment, the high cost of home energy, and lack of education are significant factors in the high rate of poverty.

TDHCA has an important role in addressing Texas poverty. The Department seeks to reduce the number of Texans living in poverty, thereby providing a better future for all Texans. This means (1) trying to provide long-term solutions to the problems facing people in poverty and (2) targeting resources to those with the greatest need. The Department provides low income persons with energy, emergency, and housing assistance to meet the basic necessities.

An asset development approach to addressing poverty emphasizes the use of public assistance to facilitate long-term investments rather than incremental increases in income. In housing, this can mean gaining equity through homeownership. Several of TDHCA programs introduce the option of homeownership to lower income populations: the HOME Program offers down payment assistance and closing cost assistance, and the Single Family Bond Program offers below-market-rate loans.

Programs administered through TDHCA's Office of Colonia Initiatives (OCI) can be instrumental in creating self sufficiency in the colonias. OCI coordinates programs that improve the living conditions of the state's colonias. The Texas Bootstrap Loan program provides loans for self-help housing initiatives; the Contract for Deed Conversion Initiative facilitates homeownership by converting contracts for deed into traditional mortgages; the Colonia Model Subdivision Program provides loans to develop residential subdivisions as alternatives to colonias; and the Colonia Self-Help Centers provide outreach, education, and technical assistance to colonia residents.

SPECIAL NEEDS POPULATIONS

According to HUD, in addition to the homeless, according to HUD, special needs populations include persons with disabilities, the elderly, persons with alcohol and/or drug addictions, persons with HIV/AIDS, and public housing residents. TDHCA also considers colonia residents and migrant farmworkers as special needs populations.

TDHCA Strategies for Meeting the Needs of Persons with Special Needs

As further described in the "TDHCA goals and objectives" section of this plan, the following general research and policy goals are designed to help address housing and service issues of persons with special needs.

> *Goal 9: TDHCA will work to address the housing needs and increase the availability of affordable and accessible housing for persons with special needs Through Funding, research, and policy development efforts.*
>
> > *9.1 Strategy: Dedicate no less than 20 percent of the HOME project allocation for applicants that target persons with special needs.*
> >
> > *9.2 Strategy: Compile information and accurately assess the housing needs of and the housing resources available to persons with special needs.*
> >
> > *9.3 Strategy: Increase collaboration between organizations that provide services to special needs populations and organizations that provide housing.*
> >
> > *9.4 Strategy: Discourage the segregation of persons with special needs from the general public."*

The following sections describe each type of special need and actions taken by TDHCA to try to address specific issues the different special needs groups.

HOMELESS POPULATIONS

The Stewart B. McKinney Homeless Assistance Act of 1987, the legislation that created a series of homeless assistance programs, defined the term "homeless." The following definition is used by the US Department of Housing and Urban Development (HUD) and all other federal agencies responsible for administering McKinney programs:

The term "homeless" or "homeless individual" includes

- an individual who lacks a fixed, regular, and adequate night time residence; or
- an individual who has a primary nighttime residency that is
  - a supervised publicly or privately-operated shelter designed to provide temporary living accommodations;
  - an institution that provides a temporary residence for individuals intended to be institutionalized; or
  - a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

The Texas Interagency Council for the Homeless estimates that approximately 200,000 people in Texas, or about 1 percent of the population, are homeless.[50] Based on this estimate, TDHCA estimates that, of 3,159,940 total people living in rural areas, 1 percent of the rural population, approximately 32,000, are homeless. The 2000 Census counted 28,377 individuals residing in noninstitutional group homes in Texas, which include shelters. In its

[50] Texas Interagency Council for the Homeless, "Key Facts," http://www.tich.state.tx.us/facts.htm (accessed July 28, 2006).

special tabulation on emergency and transitional shelters in metropolitan areas, the Census counted 6,237 people.

As evidenced above, estimates of homeless populations vary widely. The migratory nature of the homeless population, the stigma associated with homelessness, and the fact that many homeless individuals lack basic documentation all contribute to the difficulty of making an accurate count. Most homeless counts are "point in time" estimates, which do not capture the revolving-door phenomenon of persons moving in and out of shelters over time. Furthermore, the homeless population can be classified into three categories: literally homeless, which describes those who have no permanent residence and stay in shelters or public places; marginally homeless, which includes those who live temporarily with other people and have no prospects for housing; and people at risk of homelessness. People at risk of homelessness generally have incomes below the poverty level, rely on utility and rental assistance, and may be unable to absorb unexpected events such as the loss of a job or serious illness.

Homeless Subpopulations

The following homeless subpopulations have special characteristics. Though these subpopulations may have different characteristics, the two main trends significant in the rise of homelessness can be connected to the increase in poverty (characterized by the decline in employment opportunities and public assistance programs) and a shortage of affordable housing.[51]

Homeless Families with Children

The number of homeless families with children has increased significantly over the past decade. A 2005 US Conference of Mayors survey of 25 American cities found that homeless families comprised 33 percent of the homeless population.[52] Additionally, single mothers and children make up the largest group of people who are homeless in rural areas.[53] Approximately 90 percent of homeless families are homeless due to a crisis.[54] Many parents with young children cannot work because of a lack of affordable childcare, which hinders their ability to earn an income to pay for suitable housing.

[54] Texas Homeless Network, "Finding the Way Home: Preventing and Reducing Homelessness in Texas," http://www.utdanacenter.org/theo/downloads/factsheets/rp2_finding_way_home.pdf (accessed July 28, 2006).

Homeless Youth

An estimated 12 percent of the homeless population is aged 13 to 24.[55] Of this age group, approximately 40 percent has a history of sexual abuse, 46 percent report mental illness, 25 percent have problems with alcohol abuse, and 33 percent spent time in juvenile detention. Furthermore, 28 percent have been in foster care at least once. Due to the challenges faced by homeless youth, they may particularly benefit from the provision of essential services, including job training, education, and employment services.

Homeless Minorities

A 2004 US Conference of Mayors survey of 27 American cities found that 49 percent of the homeless population was African American, 35 percent was white, 13 percent was Hispanic, 2 percent was Native American, and 1 percent was Asian.[56] However, the ethnic makeup of the homeless population will vary by geographic area.

Homeless in Rural Areas

TDHCA estimates that 1 percent of the rural population is homeless, or 32,000. Rural areas typically have fewer jobs and shelters than urban areas, which makes it especially difficult for homeless persons. The National Coalition for the Homeless reports that homeless persons in rural areas are more likely to be white, and homeless farm workers and Native Americans are also generally found in rural areas.[57] Migrant farm workers, because of their mobile lifestyle, extremely low incomes, and lack of affordable housing, are at a high risk for homelessness.

Homeless Victims of Domestic Violence

Battered women who live in poverty are often forced to choose between staying in abusive relationships or homelessness. According to the NCH, half of women with children experiencing homelessness left their last place of residence because of domestic violence.[58]

In 2004, there were 182,087 reported family violence incidents in Texas.[59] According to a TCFV statewide poll, 47 percent of all Texans report having experienced some form of domestic violence. In 2004, the Family Violence Program though the Texas Health and Human Services Commission served 83,349 adults and children and provided 948,610 direct services.[60] Furthermore, 7,201 were denied shelter due to lack of space.

[60] Texas Health and Human Services Commission, "Fact Sheet: Intimate Partner Violence in Texas," http://www.hhsc.state.tx.us/programs/familyviolence/Facts/Texas_IPV_FactSheet.html (accessed August 9, 2006).

Homeless Persons with Mental Illnesses and Disabilities

According to the Texas Interagency Council for the Homeless, approximately 25 percent of homeless individuals suffer from a serious mental illness, and more than 65,000 persons with disabilities did not have a predictable means of shelter in 1999.[61] The general lack of affordable housing and the poverty of this population make it difficult for homeless persons with mental illness to access social service programs and leaves them highly susceptible to homelessness.

Homeless Elderly Persons

According to 2000 Census data, of those below the poverty level in Texas, an estimated 13.1 percent are age 65 and over. As a group, this makes the elderly the poorest of all Texans. Approximately 6 percent of persons aged 55 to 64 were homeless in 2004.[62]

Homeless Veterans

According to the Department of Veteran's Affairs[63] approximately, on any given day, as many as 250,000 veterans are living in shelters or on the street. Of the veterans who are homeless, approximately 56 percent are African American or Hispanic, 45 percent suffer from mental illness, and 70 percent suffer from alcohol or drug abuse problems.

Chronically Homeless Persons

According to the Texas Homeless Network, 27 percent of single homeless adults are chronically homeless, meaning that these persons have been homeless for an average of four years.[64] Furthermore, these persons have high rates of alcohol or drug abuse and mental illness.

Homeless Persons with HIV/AIDS

The National Coalition for the Homeless estimates that 3 to 20 percent homeless people are HIV positive.[65] People with HIV/AIDS may lose their jobs because of discrimination or have high health care costs, leading to homelessness. This population may require supportive health services or community care programs in addition to housing assistance.

Homeless Persons with Chronic Substance Abuse

The 2005 US Conference of Mayors survey reports that 30 percent of homeless persons has an addiction disorder.[66] The Texas Department of State Health Services (DSHS) reports that, of adult clients admitted to DSHS-funded programs in 2004, 11 percent were homeless and the average income at admission was $5,715.67 Homeless persons with substance abuse problems will require supportive services.

Homeless Needs

The "continuum of care" approach to fighting homelessness is based on the understanding that homelessness is not caused merely by a lack of shelter, but involves a variety of underlying unmet physical, economic, and social needs. A comprehensive system of services as well as permanent housing is needed to help homeless individuals and families reach independence using a combination of emergency shelters, transitional housing, social services, and permanent housing. The continuum of care system begins with outreach, intake, and assessment. It is followed by safe emergency shelter and/or transitional housing that provides a variety of services including job training, educational services, substance abuse services, mental health services, and family support. Ultimately, the goal is to assist the family or individual achieve permanent housing.

Specific Strategies for Meeting Homeless Needs

In order to meet the needs of homeless populations, TDHCA uses the following strategies.

Strategic Plan Goal

As further described in the "TDHCA Goals and Objectives" section of this plan, The following goal and associated strategy is aimed at reaching the homeless populations. Refer to the "Program Statements" in this section for more information on the Emergency Shelter Grants Program, which is TDHCA's main homelessness assistance program, and other related programs.

> ***GOAL 3:*** *TDHCA will improve living conditions for the poor and homeless and reduce the cost of home energy for very low income Texans.*
>
> > ***3.1 Strategy:*** *Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.*

Texas Interagency Council for the Homeless

The Texas Interagency Council for the Homeless (TICH) was created in 1989 to coordinate the State's homeless resources and services. TICH consists of representatives from all state agencies that serve the homeless. The council receives no funding and has no full-time staff,

---

[66] National Coalition for the Homeless, *Who is Homeless?*

[67] Texas Department of State Health Services, "Texas Statewide Totals," http://www.tcada.state.tx.us/research/statistics/statetotals.shtml (accessed July 28, 2006).

but receives clerical and advisory support from TDHCA. The council holds public hearings in various parts of the state to gather information useful to its members in administering programs. In addition, the Texas Homeless Network, a nonprofit organization, fulfills many of the council's statutory duties through a contract with TDHCA. The Council's major functions include:

- evaluating and helping coordinate the delivery of services for the homeless in Texas;
- increasing the flow of information among separate providers and appropriate authorities;
- providing technical assistance to TDHCA in assessing the need for housing for people with special needs;
- developing, in coordination with TDHCA and the Health and Human Services Commission, a strategic plan to address the needs of the homeless;
- maintaining a central resource and information center for the homeless.

TICH has developed a 10-year state action plan to end chronic homelessness in Texas. A team of 10 TICH members attended the Federal Policy Academy on Improving Access to Mainstream Services for People Experiencing Chronic Homelessness in Chicago, Illinois, in May 2003. A result of their participation was that TICH developed a 10-year plan to end chronic homelessness and then conducted six public hearings in March 2004 to receive testimony on the plan. The public hearings were held at the request of the Office of the Governor and were intended to further the implementation of the state action plan on homelessness. The plan was developed as part of Texas's participation in the federal policy academy to improve access to mainstream services for people who are homeless, including people with serious mental health or substance abuse problems. The federal policy academies are led by the US Department of Health and Human Services, the US Department of Urban Development, and the US Department of Veterans Affairs.

The Three Priorities and the Strategies of the State Action Plan to End Chronic Homelessness are as follows:

Priority One: Increasing the Public and Political Investment

- Strategy 1.1 Improve data
- Strategy 1.2 Increase capacity of local homeless coalitions
- Strategy 1.3 Host public forums for state plan to end chronic homelessness

Priority Two: Prevent Chronic Homelessness

- Strategy 2.1 Identify common risk factors and definitions regarding persons at risk of chronic homelessness
- Strategy 2.2 Develop model discharge coordination plan for persons at-risk of chronic homelessness
- Strategy 2.3 Coordinate discharge-planning efforts

- Strategy 2.4 Develop a prevention strategy aimed at persons at risk of homelessness, currently homeless persons, and their providers that focus on education, awareness, and anti-stigma strategy

Priority Three: Develop, Expand, and Support Evidence-Based Service Interventions

- Strategy 3.1 "Set-aside" resources for ending chronic homelessness
- Strategy 3.2 Increase prioritization and targeting of persons experiencing chronic homelessness within mainstream services
- Strategy 3.3 Advocate for a uniform eligibility process
- Strategy 3.4 Increase and improve linkages between housing and services

- Information on TICH and the 10-Year Plan to End Chronic Homelessness can be found at http://www.tich.state.tx.us.

Emergency Shelter Grants Program

Through the Emergency Shelter Grants Program (ESGP), TDHCA funds organizations that provide shelter and related services for homeless persons, as well as intervention services to persons threatened with homelessness. Activities include renovating buildings for use as shelters; medical and psychological counseling; assistance in obtaining permanent housing; and homeless prevention services, such as rent and utility assistance. For 2007, TDHCA anticipates that it will receive $5,076,683 in funding to address homelessness, and disperses those funds according to a regional allocation formula based on the poverty percentage of each uniform state service region. Demonstrating the need for homeless shelter and services, for the 2006 ESGP application cycle, the Department received 123 applications and was able to fund only 76.

Community Services Block Grant Program

TDHCA provides administrative support funds to community action agencies (CAAs) that offer emergency and poverty-related programs to lower income persons. CAA services include child care, health and human services, job training, migrant farmworker assistance, nutrition services, and emergency assistance. These services can be instrumental in preventing homelessness in the lowest income populations.

HTC Program

The HTC Program (HTC) is a multifamily program that encourages the development of affordable multifamily housing. In addition to the construction, acquisition, and/or rehabilitation of new, existing, at-risk, and rural housing, this program can also be used to develop transitional housing. TDHCA gives scoring preferences for special needs activities, including transitional housing.

PERSONS WITH DISABILITIES

According to the US Department of Housing and Urban Development, 24 CFR 582.5:

> *"A person shall be considered to have a disability if such a person has a physical, mental, or emotional impairment that*
>
> - *is expected to be of long-continued and indefinite duration,*
> - *substantially impedes his or her ability to live independently,*
> - *is of such a nature that the ability could be improved by more suitable housing conditions."*

According to the 2000 US Census, there are approximately 3,605,542 disabled, civilian, non-institutionalized persons over the age of five (or approximately 19 percent of total population) in Texas. Of this figure, 663,300 have a sensory disability (severe vision or hearing impairment), 1,428,580 have a physical disability (condition that substantially limits a physical activity such as walking or carrying), 816,185 have a mental disability (learning or remembering impairment), 487,120 have a self-care disability (dressing, bathing, or getting around inside the home), 1,359,848 have a "going outside the home disability," and 1,651,821 have an employment disability.

Needs of Persons with Disabilities

Housing opportunities for people with disabilities may be complicated by low incomes. The 2000 census estimates that 553,934 disabled individuals over age five live below the poverty level in Texas. Many people with disabilities may be unable to work, and receive Supplemental Security Income (SSI) or Social Security Disability Insurance (SSDI) benefits as their principal source of income. According to Priced Out in 2004, an SSI recipient would have to pay an average of 102.7percent (calculated as $569) of his or her $564 monthly payment to rent a one-bedroom apartment in Texas.[68] According to the HUD definition of affordability that estimates that a household should pay no more than 30 percent of its income on housing expenses, an SSI recipient can afford a monthly rent of no more than $169.

The Olmstead Supreme Court decision maintained that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the Americans with Disabilities Act (ADA). Furthermore, the Fair Housing Act, Section 504 of the Rehabilitation Act, ADA, and Section 2306.514 of the Texas Government Code all provide mandates for accessible residential housing for persons with disabilities. Housing developers may choose to provide "adaptive design" or "universal access" housing, which promotes basic, uniform standards in the design, construction, and alteration of structures that include

[68] Technical Assistance Collaborative Inc. and Consortium for Citizens with Disabilities Housing Task Force, *Priced Out in 2004*, by Ann O'Hara and Emily Cooper (Boston, MA: Technical Assistance Collaborative Inc., August 2005), 37, http://www.c-c-d.org/pricedout04.pdf (accessed July 28, 2006).

accessibility or simple modification for disabled individuals. While an "adaptable" unit may not be fully accessible at time of occupancy, it can easily and inexpensively be modified to meet the needs of any resident. Another option is to equip homes with special features designed for persons with disabilities, including ramps, extra-wide doors and hallways, hand rails and grab bars, raised toilets, and special door levers.

There is a significant shortage of housing that is physically accessible to persons with disabilities and an even greater shortage of accessible housing that has multiple bedrooms. Many persons with disabilities require larger housing units because they live with family, roommates, or attendants. The lack of multi-bedroom housing furthers their segregation. Moreover, accessible housing is an urgent and present need for not only citizens who currently have disabilities, but for the aging population in the US, which may develop disabilities in the future. Accessible housing will become increasingly more important as the ability for self-care and mobility decreases with age.

Advocates for the elderly and persons with disabilities continue to stress that the primary goal of these populations is to live independently and remain in their own homes. Access to rehabilitation funds for single family housing—to perform minor physical modifications such as extra handrails, grab bars, wheelchair-accessible bathrooms, and ramps, thus making existing units livable and providing a cost-effective and consumer-driven alternative to institutionalization—was considered as a priority. Likewise, the availability of rental vouchers that provide options beyond institutional settings was found to be a high priority.

Specific Strategies for Meeting the Needs of Persons with Disabilities

In order to meet the needs of persons with disabilities TDHCA uses the following strategies.

Disability Advisory Workgroup

TDHCA has found that directly involving program beneficiary representatives, community advocates, and potential applicants for funding in the process of crafting its policies and rules is extremely helpful. This process is often done through a "working group" format. The working groups provide an opportunity for staff to interact with various program stakeholders in a more informal environment than that provided by the formal public comment process. TDHCA will work to maintain a "Disability Advisory Workgroup" which will provide ongoing guidance to the Executive Director on how TDHCA's programs can most effectively serve persons with disabilities.

Promoting Independence Advisory Committee

With the advent of the *Olmstead* decision, the Health and Human Services Commission (HHSC) initiated the Promoting Independence Initiative and appointed the Promoting Independence Advisory Board, as directed by then-Governor George Bush's Executive Order GWB 99-2. The Promoting Independence Advisory Board (PIAB) assists the HHSC in creating the State's response to the *Olmstead* decision through the biannual Promoting Independence Plan. This plan highlights the State's efforts to assist those individuals desirous of community placement, appropriate for community placement as determined by the state's treatment professionals, and who do not constitute a fundamental alteration in the state's services, to live in the community. TDHCA attends and participates in PIAB meetings and is a member of the Housing subcommittee.

Project Access

TDHCA has taken a leadership role in the provision of funding for rental assistance to address the housing needs of persons seeking community-based alternatives to institutionalization. In FY 2002, TDHCA received 35 Section 8 Housing Choice rental vouchers to administer to the Olmstead population as part of a national pilot called "Project Access." As of July 2006, all vouchers have been issued, and 56 recipients through voucher recycling have made the transition from a nursing facility into their own home.

Integrated Housing Rule

An issue of particular concern for advocates for persons with disabilities involved the Department's policies related to integrated housing. Integrated housing, as defined by SB 367 and passed by the 77th Texas Legislature, is "housing in which a person with a disability resides or may reside that is found in the community but that is not exclusively occupied by persons with disabilities and their care providers." The Department, with the assistance of the TDHCA Disability Advisory Committee, developed an integrated housing rule to address this concern. In November 2003, the TDHCA Board approved an Integrated Housing Rule for use by all Department housing programs, 10 TAC 1.15. Below is a synopsis of the rule:

- A housing development may not restrict occupancy solely to people with disabilities or people with disabilities in combination with other special needs populations.
- Large housing developments (50 units or more) shall provide no more than 18 percent of the units of the development set aside exclusively for people with disabilities. The units must be dispersed throughout the development.
- Small housing developments (less than 50 units) shall provide no more than 36 percent of the units of the development set aside exclusively for people with disabilities. These units must be dispersed throughout the development.
- Set-aside percentages outlined above refer only to the units that are to be solely restricted for persons with disabilities. This section does not prohibit a property from having a higher percentage of occupants that are disabled.
- Property owners may not market a housing development entirely, nor limit occupancy to, persons with disabilities.

Exceptions to the above rule include (1) scattered site development and tenant-based rental assistance is exempt from the requirements of this section; (2) transitional housing that is time-limited with a clear and convincing plan for permanent integrated housing upon exit from the transitional situation; (3) housing developments designed exclusively for the elderly: (4) housing developments designed for other special needs populations; and (5) Board waivers of this rule to further the purposes or policies of Chapter 2306, Texas Government Code, or for other good cause.

HOME Program

As further described in the "TDHCA Goals and Objectives" section of this plan, the HOME program has two specific funding strategies that directly serve persons with disabilities.

> ***"Goal 9:*** *TDHCA will work to address the housing needs and increase the availability of affordable and accessible housing for persons with special needs through funding, research, and policy development efforts...*
>
> > ***9.5 Strategy:*** *Issue a Notice of Funding Availability (NOFA), separate from the regular HOME TBRA activity funding, which provides up to $2 million for tenant based rental assistance directed to assist persons with disabilities. This NOFA will indicate that the recipients must meet the Texas State definition used by the Promoting Independence Advisory Board. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement.*
> >
> > ***9.6 Strategy:*** *Issue a NOFA, separate from the regular HOME HBA and OCC activity funding, that provides up to $2 million for homebuyer assistance and owner occupied rehabilitation to assist persons with disabilities. Recognizing that there are additional costs associated with assisting persons with disabilities, this NOFA will include the potential to increase the maximum application amount above that of the general HBA and OCC activity funding. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement."*

As established in Section 2306.111(c) of the Texas Government Code shown below and subject to the submission of qualified applications, up to 5 percent of the annual HOME Program allocation shall be allocated for applications serving persons with disabilities in HUD Participating Jurisdictions.

> *"c) In administering federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.), the department shall expend at least 95 percent of these funds for the benefit of non-participating areas that do not qualify to receive funds under the Cranston-Gonzalez National Affordable Housing Act directly from the United States Department of Housing and Urban Development. All funds not set aside under this subsection shall be used for the benefit of persons with disabilities who live in areas other than non-participating areas."*

The "participating areas" described above are typically referred to as "Participating Jurisdictions (PJ)." PJs are large metropolitan counties and places that receive their HOME funds directly from HUD. Because much of the State's housing need for persons with disabilities is found in Participating Jurisdictions (PJs), to maximize the success of Strategies 9.5 and 9.6, the Department will limit all awards in PJs to those two activities. No other HOME activities will be eligible to apply in a PJ.

Additionally, in accordance with 10 TAC 53.61, applicants applying for HOME funds under the Owner-Occupied Housing Assistance and Tenant-Based Rental Assistance programs (in non-PJs) must propose targeting at least 5 percent of the number of units proposed in the application, to persons who meet the definition of persons with disabilities. A waiver of this requirement may be requested by the applicant to the Department, if applicant is unable to document persons with disabilities that meet the HOME eligible requirements.

HTC Program

HTC developments that are new construction must conform to Section 504 standards, which require that at least 5 percent of the development's units be accessible for persons with physical disabilities and at least 2 percent of the units be accessible for persons with hearing and visual impairments.

HTF Program

Rental developments funded with HTF resources must conform to Section 504 standards.

Multifamily Bond Program

Multifamily Bond Program developments must conform to Section 504 standards.

Comprehensive Energy Assistance Program

Priority for utility assistance through the Comprehensive Energy Assistance Program is given to the elderly, persons with disabilities, and families with young children; households with the highest energy costs in relation to income; and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

Weatherization Assistance Program

Like CEAP, priority for utility assistance through the Weatherization Assistance Program is given to the elderly, persons with disabilities, and families with young children; households with the highest energy costs in relation to income; and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

ELDERLY POPULATIONS

According to the 2000 US Census, 9.9 percent (approximately 2 million) of people in Texas are 65 years of age or older. The Texas Department on Aging (TDoA), now part of the Texas Department of Aging and Disability Services, estimates that by the year 2040, individuals age 60 and over will comprise 23 percent of the population in Texas.[69] TDoA reports that females significantly outnumber males age 60 and over and, though the majority of elderly Texans live in urban areas, rural areas have a higher percentage of elderly relative to the local population.[70]

---

[69] Texas Department on Aging, Office of Aging Policy and Information, *Texas Demographics: Older Adults in Texas* (Austin, TX: Texas Department on Aging, April 2003), x, http://www.dads.state.tx.us/news_info/publications/studies/NewDemoProfileHi-Rez-4-03.pdf (accessed July 28, 2006).

[70] Texas Department on Aging, *Texas Demographics: Older Adults in Texas*, ix-x.

Nationwide, in 2004, the median income for individual elderly males was $21,102, elderly females was $12,080, and families headed by individuals 65 and over was $35,825.[71] According to the 2000 Census, 13.1 percent of seniors age 65 and over in Texas live below the poverty level. Low incomes in addition to rising healthcare costs may make housing unaffordable. Approximately 30 percent of all elderly households pay more than 30 percent of their income on housing, while 14 percent pay more than 50 percent of their income on housing.[72]

The 2003 State of Texas Senior Housing Assessment found that 91 percent of survey respondents expressed a desire to stay in their own homes as long as possible, and two-thirds believed that they would always live in their homes.[73] In 2003, of all elderly households nationwide, 73 percent owned their own homes free and clear.[74] However, elderly homeowners generally live in older homes than the majority of the population; in 2003, the median year of construction for homes owned by elderly households was 1965 and 5.3 percent had physical problems.[75] Due to their age, homes owned by the elderly are often in need of repair and weatherization.

Some elderly households may require in-house services such as medical treatment, meal preparation, or house cleaning. Community Care Services, administered by the Texas Department of Aging and Disability Services, provides services to meet the needs of elderly and disabled Texans avoiding premature nursing home placement, and proves to be more cost-effective than nursing home care. Statistics show that in fiscal year 2003, 65,202 nursing facility clients were assisted at an annual cost of $1,814,420,111, and 150,696 Community Care Services clients were at an annual cost of $1,332,477,707.[76] Though Medicaid covers nursing home care as well as assisted-living services, such assisted-living services are limited and waiting lists can be lengthy, which can prematurely place low income seniors in nursing home facilities.

Frail Elderly Persons

Frail elderly persons are defined as elderly persons who are unable to perform at least three activities of daily living. Activities of daily living include eating, dressing, bathing. According to the 2000 Census, 400,099 persons aged 65 to 74 (out of 1,131,163) have a disability as defined by the US Census, and 479,879 persons over the age of 75 (out of 835,109 total)

have a disability as defined by the US Census. This population will require medical and social services; varying degrees of assistance are needed to maintain self-sufficiency and delay the need for nursing home care.

ALCOHOL AND DRUG ADDICTION

In 2001, the Texas Commission on Alcohol and Drug Abuse (TCADA), now part of the Texas Department of State Health Services (DSHS), estimated that approximately 1.8 million, or 12 percent, of adults in Texas have an alcohol-related problem, another 227,000 have drug-related problems, and an additional 495,000 have both alcohol and drug-related problems.[77] Of the 56,858 total admissions to DSHS-funded treatment programs during 2005, admitted individuals were 58.3 percent male with an average age of 31.6, an average 11th grade education, and an average annual income of $5,753.[78] Furthermore, 22.4 percent were employed, 9.7 percent were homeless, 52.4 had family or marital problems, and 45 percent reported psychological and emotional problems. The population of persons with alcohol or other drug addiction is diverse and often overlaps with the mentally disabled or homeless populations.

Supportive housing programs needed for persons with alcohol and/or other drug addiction problems range from short-term, in-patient services to long-term, drug-free residential housing environments for recovering addicts. Better recovery results may be obtained by placing individuals in stable living environments.

PERSONS WITH HIV/AIDS

Human Immunodeficiency Virus, or HIV, is the virus that causes AIDS (Acquired Immunodeficiency Syndrome). HIV infects cells and attacks the immune system, which weakens the body and makes it especially susceptible to other infections and diseases. According to DSHS, in 2005, there were 56,012 reported persons living with HIV/AIDS in Texas.[79] The majority of these cases were located in Bexar, Dallas, Harris, Tarrant, and Travis Counties. Because of increased medical costs or the loss of the ability to work, people with HIV/AIDS may be at risk of losing their housing arrangements.

DSHS addresses the housing needs of AIDS patients through the Housing Opportunities for Persons with AIDS Program (HOPWA), which is a federal program funded by HUD. In Texas, HOPWA funds provide emergency housing assistance, which funds short-term rent, mortgage, and utility payments to prevent homelessness; and tenant-based rental assistance, which enables low income individuals to pay rent and utilities until there is no longer a need or until they are able to secure other housing. In addition to the TDH

[77] Texas Commission on Alcohol and Drug Abuse, ***2000 Texas Survey of Substance Use Among Adults***, by Lynn Wallisch (Austin, TX: Texas Commission on Alcohol and Drug Abuse, July 2001), 29, http://www.tcada.state.tx.us/research/AdultHousehold.pdf (accessed July 28, 2006).

statewide program, the cities of Austin, Dallas, Fort Worth, Houston, and San Antonio receive HOPWA funds directly from HUD.

PUBLIC HOUSING RESIDENTS

According to 2004 HUD data, there are 61,127 units of public housing and 141,982 Section 8 Housing Choice Vouchers in Texas.[80]

TDHCA believes that the future success of public housing authorities (PHAs) will center on ingenuity in program design, emphasis on resident participation towards economic self-sufficiency, and partnerships with other organizations to address the needs of this population. While TDHCA does not have any direct or indirect jurisdiction over the management or operations of public housing authorities, it is important to maintain a relationship with these service providers.

TDHCA has developed a strong relationship with the Texas Housing Association and the Texas chapter of the National Association of Housing and Redevelopment Officials, which represent the public housing authorities of Texas. TDHCA has worked to promote programs that will repair substandard housing and develop additional affordable housing units.

In 1999, TDHCA, as required by 24 CFR §903.15, started a certification process to ensure that the annual plans submitted by public housing authorities in an area without a consolidated plan are consistent with the State's *Consolidated Plan*.

In an effort to keep public housing residents aware of State programs that might affect them, TDHCA sends notice of public comment periods and hearings regarding the *State of Texas Low Income Housing Plan and Annual Report* and the *State of Texas Consolidated Plan* to all Texas PHAs. PHA staff are targeted by the Texas Statewide Homebuyer Education Program (TSHEP) for training to provide self-sufficiency tools for tenants.

TDHCA served on the Project Advisory Committee with the Coalition of Texans with Disabilities, Texas Council for Developmental Disabilities, Advocacy Inc., and United Cerebral Palsy to oversee a three-year grant to provide training and technical assistance to PHAs. Activities of the grant were intended to result in a measurable increase in the number of integrated housing units available to persons with disabilities.

COLONIA RESIDENTS

According to Section 2306.581 of the Texas Government Code:

> "Colonia" means a geographic area located in a county some part of which is within 150 miles of the international border of this state and that
>
> - has a majority population composed of individuals and families of low income and very low income, based on the federal Office of

[80] HUD, "Public Housing Agency (HA) Profiles" http://www.hud.gov/offices/pih/systems/pic/haprofiles/index.cfm (accessed October 30, 2004).

Management and Budget poverty index, and meets the qualifications of an economically distressed area under Section 17.921, Water Code; or

- has the physical and economic characteristics of a colonia, as determined by the department.

The Texas Secretary of State reports that there are more than 2,294 Texas colonias with 400,000 residents.[81] The Texas Office of the Comptroller estimates that median annual incomes for colonia residents range from $7,000 to $11,000.[82] Colonia residents are generally unskilled, lack a formal education, and do not have stable employment. The majority of colonia residents do fieldwork, construction work, or factory work, and the unemployment rate ranges from 20 to 60 percent.[83]

According to 2000 US Census data, colonias have a 75 percent homeownership rate. Despite this rate, however, colonia homes are inadequate; 4.9 percent of colonia dwellings lack kitchen facilities and 5.3 percent lack plumbing facilities. Some of these properties may have been purchased with contracts for deed, which are seller-financed transactions that do not transfer the title and ownership of the property to the buyer until the purchase price is paid in full.

Colonia residents have several needs that include increased affordable housing opportunities, such as down payment assistance and low-interest-rate loans, homeowner education, construction education and assistance, owner-occupied home repair, access to adequate infrastructure, and the conversion of remaining contracts for deed to conventional mortgages.

MIGRANT FARMWORKERS

According to the US Department of Health and Human Services *Migrant and Seasonal Farmworker Enumeration Profiles Study*, a seasonal farmworker describes an individual whose principal employment (at least 51 percent of time) is in agriculture on a seasonal basis and who has been so employed within the preceding twenty-four months; a migrant farmworker meets the same definition, but establishes temporary housing for purposes of employment.[84] The US Department of Health and Human Services estimates that there are 362,724 migrant and seasonal farm workers and families residing in Texas.[85] Of this population, 26 percent reside in Cameron, Hidalgo, and Starr Counties.

[81] Texas Secretary of State, "Colonia FAQ's," http://www.sos.state.tx.us/border/colonias/faqs.shtml (accessed August 10, 2006).

[82] Texas Office of the Comptroller, "Colonias: A Symptom, Not the Problem, http://www.window.state.tx.us/border/ch07/colonias.html (accessed August 10, 2006).

[83] Texas Secretary of State, "Colonia FAQ's."

[84] US Department of Health and Human Services, Health Resources and Services Administration, Bureau of Primary Health Care, *Migrant and Seasonal Farmworker Enumeration Profiles Study: Texas*, by Alice Larson, Larson Assistance Services (Vashon Island, WA: Larson Assistance Services, September 2000), 2, http://bphc.hrsa.gov/migrant/Enumeration/final-tx.pdf (accessed August 09, 2006).

[85] US Department of Health and Human Services, *Migrant and Seasonal Farmworker Enumeration Profiles Study*, 13–18.

The National Agricultural Workers Survey, a national survey of 4,199 farmworkers conducted between 1997 and 1998, found that 61 percent lived below the poverty level.[86] The median annual income for individual workers was less than $7,500 and migrant families earned less than $10,000. Sixty percent of workers held only one farm job, which lasted only 24 weeks out of the year. Despite the short employment duration and low incomes, only 20 percent of workers received unemployment benefits and 10 percent received Medicaid or food stamps.

Farmworkers have a particularly difficult time finding available, affordable housing because of extremely low and sporadic incomes and mobility. Many of the small, rural communities where migrant workers may seek employment do not have the rental units available for the seasonal influx. Overcrowding and substandard housing are significant housing problems for farmworkers.[87] In addition, migrant workers may not be able to afford security deposits, pass credit checks, or commit to long-term leases.

In HB 1099, the 79th Texas Legislative Session transferred the license and inspection of migrant farmworker housing facilities from the Texas Health and Human Services Commission to TDHCA. Additionally, the bill directs TDHCA to complete a study on quantity, availability, need, and quality of migrant farm labor housing facilities in Texas. Contact the TDHCA Division of Policy and Public Affairs at (512) 475-3975 for a copy of this report.

RURAL NEEDS

As the migration of populations and industries continues to urban and suburban areas, the less-populous areas of the state are left with a dilapidated housing stock and households with lower incomes than their urban or suburban counterparts. According to HUD, for FY 2006, the median income for Texas metropolitan statistical areas is $56,600 compared to $43,100 for non-metro households.[88]

Due to the lower incomes and lack of access to resources (e.g., bonds, large tax base, and investment capital) in less-populous areas, TDHCA gives special consideration to lower income individuals and households residing in rural areas. This focus is considered in the development of Department programs and in the distribution of associated funds. In the event that funding cannot be limited to rural areas because of rule or financial feasibility reasons, scoring criteria or set-asides are added to the applications or program rules to encourage the participation of these areas.

The Department works closely with several rural-based affordable housing organizations, private lenders, nonprofits, and units of local government in order to give funding priority to non-PJ and rural areas. It requires more effort to spark affordable housing activity in rural areas as the number of organizations available to assist with these activities is significantly fewer. With this in mind, the Department has developed specific strategies to address the needs of the rural populations of the state, which include rural set-asides or special scoring criteria for housing program funds, prioritization of activities that are most needed in rural areas, increasing awareness of TDHCA programs in rural areas, and building the capacity of rural service providers.

With the exception of up to 5 percent of the annual HOME Program allocation which shall be allocated for applicants serving persons with disabilities in HUD Participating Jurisdictions (as required by Section 2306.111(c) of the Texas Government Code), the TDHCA HOME funds primarily serve persons in rural areas. Participating jurisdictions are those large metropolitan counties and places that receive their HOME funds directly from HUD. Because much of the State's housing need for persons with disabilities is found in Participating Jurisdictions (PJs), to maximize the success of Strategies 9.5 and 9.6, the Department will limit all awards in PJs to those two activities. No other HOME activities will be eligible to apply in a PJ.

Section 2306.111(d) of the Texas Government Code requires that the TDHCA Regional Allocation Formula consider rural and urban/exurban areas in its distribution of program funding. Because of this, allocations for the HTC and HOME programs in allocated by rural and urban/exurban areas within each region.

[88] HUD, "Estimated Median Family Incomes for FY 2006," http://www.huduser.org/datasets/il/il06/MedianNotice_2006.pdf (accessed July 28, 2006).

TDHCA and the Office of Rural Community Affairs (ORCA) jointly administer the HTC Program rural regional allocation. ORCA assists in developing all thresholds, scoring, and underwriting criteria for rural regional allocation, and must approve the criteria. ORCA also participates in the evaluation and site inspection of rural developments proposed under the rural allocation.

The TDHCA Section 8 Housing Choice Voucher Program specifically serves households in small cities and rural communities that are not served by similar local or regional housing voucher programs.

ENERGY EFFICIENCY

Energy and water costs are often the largest single housing expense after food and shelter for lower income families. Utility costs typically represent 13 to 44 percent of lower income annual gross incomes and can account for nearly one-fourth of total housing costs. Proper use of existing technologies and management practices can reduce these utility costs significantly at a relatively low initial cost, thereby greatly increasing housing affordability for low and moderate income families.

The Department encourages, in each uniform state service region, energy efficiency in the construction of affordable housing by offering training, workshops, conferences, and other opportunities to learn about energy efficiency construction, and by encouraging applicants for Department programs to consider energy efficiency in their developments.

HOME Program applicants are required to certify that the development will be equipped with energy-saving devices that meet the 2000 IECC, which is the standard statewide energy code adopted by the state energy conservation office, unless historic preservation codes permit otherwise for a development involving historic preservation. In addition, applicants may qualify for points for the use of energy efficient alternative construction materials, 14 SEER HVAC or evaporative coolers in dry climates for new construction or radiant barrier in the attic for rehabilitation, and Energy Star or equivalently rated kitchen appliances.

The HTC Program requires applicants to adhere to the statewide energy code and also gives points for the use of energy-efficient alternative construction materials including R-15 wall and R-30 ceiling insulation, structurally insulated panels, and 14 SEER (seasonal energy efficiency ratio) cooling units.

The Weatherization Assistance Program allocates funding regionally, to help households in each region control energy costs through the installation on weatherization measures and energy conservation education. Weatherization services include the installation of storm windows, attic and wall insulation, and weather-stripping and sealing.

LEAD-BASED PAINT

The Consumer Product Safety Commission banned the use of lead-based paint in housing in 1978. According to the 2000 Census, there are 3,344,406 housing units in Texas that were built before 1979, many of which potentially contain lead-based paint. Of these homes, 2,764,745 are occupied by low income households and 579,661 are occupied by moderate income households. According to the National Safety Council, approximately 38 million US homes contain lead paint.[89]

The 1992 Community and Housing Development Act included Title X, a statute that represents a major change to existing lead-based paint regulations. HUD's final regulations for Title X (24. CFR.105) were published on September 15, 1999, and became effective September 15, 2000. Title X calls for a three pronged approach to target conditions that pose a hazard to households: (1) notification of occupants about the existence of hazards so they can take proper precautions, (2) identifications of lead-based paint hazards before a child can be poisoned and, (3) control of these lead-based paint hazards in order to limit exposure to residents. Title X mandated that HUD issue "The Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing" to outline risk assessments, interim controls, and abatement of lead-based paint hazards in housing. Section 1018 required EPA and HUD to promulgate rules for disclosure of any known lead-based paint or hazards in target housing offered for sale or lease. These rules came into effect on March 6, 1996, in 40 CFR Part 745/24 CFR Part 35.

Pursuant to Section 1012 and 1013, HUD promulgated new regulations, "Requirements for Notification, Evaluation, and Reduction of Lead-Based Paint Hazards in Federally Owned Residential Property and Housing Receiving Federal Assistance," on September 15, 1999. The new regulation puts all of HUD's lead-based paint regulations in one part of the Code of Federal Regulations. The new requirements took effect on September 15, 2000.

The HOME Program, administered by TDHCA, requires lead screening in housing built before 1978. Requirements for acquisition and tenant-based rental assistance activities are distribution of the pamphlet "Protect Your Family from Lead in Your Home" prior to receipt of assistance; notification to property owners within 15 days if a visual assessment observes chipping, peeling or flaking paint; and, if detected, the paint must be stabilized using safe work practices and clearance must be provided.

Requirements for rehabilitation activities fall into three categories:

1) Federal assistance up to and including $5,000 per unit: Distribution of the pamphlet "Protect Your Family from Lead in Your Home" is required prior to renovation activities; notification within 15 days of lead hazard evaluation, reduction, and clearance must be provided; receipts for notification must be maintained in the administrator file; paint testing must be conducted to identify lead-based paint on painted surfaces that will be disturbed or replaced or administrators may assume that lead-based paint exist; administrators must

[89] National Safety Council, "Lead Poisoning," (December 2004) http://www.nsc.org/library/facts/lead.htm (accessed August 9, 2006).

repair all painted surfaces that will be disturbed during rehabilitation; if lead-based paint is assumed or detected, safe work practices must be followed; and clearance is required only for the work area.

2) Federal assistance from $5,000 per unit up to and including $25,000 per unit: This category includes all the requirements for federal assistance up to and including $5,000 per unit with the addition of a risk assessment must be conducted prior to rehabilitation to identify hazards in assisted units, in common areas that serve those units, and exterior surfaces, or administrators can assume lead-based paint exists. Clearance is required for the completed unit, common areas which serve the units, and exterior surfaces where the hazard reduction took place.

3) Federal assistance over $25,000 per unit: This category includes all the requirements for federal assistance from $5,000 per unit up to and including $25,000 per unit and, if during the required evaluations lead-based paint hazards are detected on interior surfaces of assisted units, on the common areas that serve those units, or on exterior surfaces including soils, then abatement must be completed to permanently remove those hazards. If lead-based paint is detected during the risk assessment on exterior surfaces that are not disturbed by rehabilitation, then interim controls may be completed instead of abatement.

DISASTER INITIATIVES

Texas saw a variety of major disasters in 2005 and 2006. In August 2005, Hurricane Katrina made landfall in Louisiana, and then in September 2005, Hurricane Rita made landfall near Sabine Pass on the southeast Texas Gulf coast. Texas experienced an influx of evacuees from Louisiana escaping Hurricane Katrina, and over 75,000 homes in southeast Texas were severely damaged or destroyed as a result of Rita. According to the Federal Emergency Management Agency (FEMA), 640,968 Katrina and Rita applicants for assistance were residing in Texas as of February 1, 2006. In addition to the hurricanes, Texas also experienced several wildfires and wildfire threats as the result of dry, hot weather conditions. In January 2006, FEMA made a disaster declaration identifying an Extreme Wildfire Threat for all 254 Texas counties, and individual assistance for those counties experiencing fires.

In the event of future disasters in FY 2007 and beyond, TDHCA is committed to quickly, efficiently, and responsibly locating funds and developing programs and initiatives to assist affected households and communities. TDHCA performed the following in 2005 and 2006 in response to the disasters described above.

Community Development Block Grant Disaster Recovery Funds

As the lead agency in partnership with ORCA, TDHCA administers the Community Development Block Grant (CDBG) disaster recovery funding awarded to Texas under the Department of Defense Appropriations Act, 2006. A total of $74.5 million was awarded to Texas to rebuild the southeast Texas region devastated by Hurricane Rita. In July 2006, the TDHCA Board approved awards to four councils of governments (COGs) in the region to rebuild damaged homes, and five COGs will receive funds for infrastructure repairs. Of all funds awarded, 56.8 percent will be dedicated to housing activities including home rehabilitation, reconstruction, and other eligible activities to help the residents of southeast Texas recover from this disaster. In August 2006, HUD announced that Texas would receive an additional $428 million in CDBG disaster funding to promote long-term recovery in the area.

HOME Program

In January 2006, TDHCA, released a NOFA for $8.3 million in federal HOME Investment Partnerships Program funds for the repair or reconstruction of homes damaged by Hurricane Rita. These funds were obtained through a HUD waiver that allows the use of program year PY 2005 and 2006 CHDO set-aside funds for disaster relief efforts. An additional NOFA announcing $4.2 million in Hurricane Rita Disaster Relief funds was released in August 2006.

Under the HOME Program, funds are available to assist with disaster recovery in accordance with the de-obligation policy as passed by the TDHCA Governing Board on Janurary 17, 2002. The policy was created to address the re-obligation or de-obligation of unexpended HOME funds and program income. Eligible activities are prioritized in the following order: successful appeals, disaster relief, special needs, colonias, and other projects/uses as determined by the Executive Director and/or Board. For disaster purposes, de-obligated HOME Program funds are used for all weather-related disasters including but not limited to disasters as a result of floods, fires, hurricanes, tornadoes, and excessive wind damage. Applications are funded on a first-come, first-serve basis with priority given to state-recognized disasters.

HTC Program

In January 2006, TDHCA issued a NOFA related to Housing Tax Credits authorized through HR 4440, also known as the Gulf Opportunity Zone Act of 2005. This act amended the Internal Revenue Code of 1986 to provide tax benefits for certain areas affected by Hurricane Rita. The Act provided for an increase of $3,500,000 in the 2006 Housing Tax Credit Ceiling for the State of Texas. TDHCA determined that it would allocate that $3,500,000 solely in 21 of the 22 impacted counties for rehabilitation, reconstruction, or replacement new construction of rental units.

HTF

In August 2006, TDHCA released $1 million in Housing Trust Funds through the HTF Hurricane Rental Relief Program to finance the rehabilitation of qualified affordable housing developments in the Department's existing rental portfolio that received damage from Hurricane Rita.

Single Family Bond

In February 2006, TDHCA announced the release of $16 million in home loans made available to qualified homebuyers wishing to purchase a home within targeted areas including the 22 East Texas counties designated under the Gulf Opportunity Zone Act of 2005. In June 2006, an additional $108 million in First Time Homebuyer Program funds were released for use in the targeted 22-county area known as the Rita Go Zone.

Office of Colonia Initiatives

In December 2005, TDHCA released a NOFA for approximately $1,800,000 of State of Texas Housing Trust Funds to organizations assisting individuals or families that were victims of Hurricane Rita to purchase or refinance real property on which to build new residential or improve existing residential housing through self-help construction for very low and extremely low income individuals and/or families (owner-builders), including persons with special needs.

Community Affairs Division

In immediate response to the hurricanes, the Community Affairs Division released an additional $680,000 in CSBG funding to help with emergency needs as a result of the disasters. By October 2005, over 80,000 individuals were assisted through local community action agencies with this additional disaster funding.

TDHCA Program Plans

With the exception of the Housing Trust Fund, TDHCA receives the majority of its funding from federal sources. As such, the amount of funding that TDHCA receives is predetermined by the federal funding source. TDHCA has a commitment to expend all available housing resources to address the housing needs of the state. However, as evidenced by the oversubscription rate for many TDHCA programs, even when expending all available funding, there is still an unmet need.

Because of the limited amount of TDHCA funding and the possibility that funding levels may change, TDHCA encourages, and in some cases requires, that entities receiving TDHCA funds leverage or match those awards with additional funds from other sources. For example, the HOME Program and ESGP have match requirements for entities receiving awards through those programs.

Through program requirements and compliance monitoring, TDHCA works to ensure that housing programs benefit individuals without regard to race, ethnicity, sex, or national origin, as outlined in 10 TAC 1.60. Complaints involving all forms of housing discrimination are also referred to the Texas Workforce Commission Human Rights Division, which oversees the Texas Fair Housing Act. Additionally, it is the policy of TDHCA to not require its nonprofit recipients of funds to verify, as a condition of receiving federal funds, the citizenship or immigration status of applicants for funds. This policy is subject to change if the US Department of Housing and Urban Development revises its policy. This policy does not apply to the Section 8 Housing Choice Voucher Program.

The following TDHCA programs govern the use of available housing resources in meeting the housing needs of low income Texans. Program descriptions include information on the funding source, type of assistance, recipients, targeted beneficiaries, program activities, set-asides, and special initiatives.

HOME Investment Partnerships Program

The HOME Investment Partnerships (HOME) Program receives funding from the US Department of Housing and Urban Development (HUD) and provides loans and grants to units of local government, public housing authorities (PHAs), community housing development organizations (CHDOs), nonprofit organizations, and for-profit entities, with targeted beneficiaries being low, very low, and extremely low income households. The purpose of the HOME Program is to expand the supply of decent, safe, and affordable housing for extremely low, very low, and low income households, and to alleviate the problems of excessive rent burdens, homelessness, and deteriorating housing stock. HOME strives to meet both the short-term goal of increasing the supply and the availability of affordable housing and the long-term goal of building partnerships between state and local governments and private and nonprofit organizations in order to strengthen their capacity to meet the housing needs of lower income Texans.

The State of Texas receives an annual allocation of HOME funds from HUD. TDHCA provides technical assistance to all recipients of the HOME Program to ensure that all participants meet and follow state implementation guidelines and federal regulations. In 2003, the Texas Legislature passed Senate Bill 264 (amending Sec. 2306.111 of the Government Code), which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the HOME, Housing Trust Fund, and HTC programs to each Uniform State Service Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance. Please see "2007 Regional Allocation Formula" in this section for further explanation.

The Department anticipates using open funding cycles for programs that have traditionally been undersubscribed. These may include but are not limited to the CHDO Set-Aside, Contract for Deed Conversion, Rental Housing Preservation, and Rental Housing Development activities.

Eligible Service Areas

Per Section 2306.111(c) the Department shall expend at least 95 percent of HOME funds for the benefit of non–PJ areas of the state. The remaining 5 percent of HOME funds may be expended in a PJ, but only if the funding serves persons with disabilities

HOME Program funding for FY 2007

The amount projected to be available from HUD in FY 2007 is $40,000,000. This is comprised of $39,350,000 of HOME funds plus $650,000 of ADDI funds. On February 15, 2006, the TDHCA Board approved the State HOME rules, 10 TAC 53. As part of this approval, applications submitted for Single Family non-development activities under a competitive application cycle may be accepted, reviewed, and recommended for an award, on an annual or biennial funding cycle. In FY 2006, HOME funds will be recommended for an award through a biennial funding cycle, and will include FY 2007 HOME funds.

2007 HOME Program Funding

TDHCA will use the following method for allocating funds.

Use of Funds	Estimated Available Funding	% of Total HOME Allocation
Administration Funds (10% of PY 2007)[1]	$4,000,000	10%
CHDO Project Funds Set Aside (15% of PY 2007) [1, 2]	$6,000,000	15%
CHDO Operating Expenses Set Aside (5% of CHDO Set Aside) [1]	$300,000	1%
State Mandated Funds for Contract for Deed Conversions[1]	$2,000,000	5%
Housing Program for Persons with Disabilities	$4,000,000	10%
Rental Housing Preservation Program	$2,000,000	5%
Rental Housing Development Program	$3,000,000	8%
General Funds for Single Family Activities	$18,700,000	47%
Total PY 2007 HOME Allocation	$40,000,000	100%
PY 2007 American Dream Downpayment Initiative (ADDI) Funds	$650,000	
Total Estimated Funding Available for Distribution	$40,650,000	

1 The funding for these activities is not subject to the Regional Allocation Formula.

2 $1,000,000 will be reserved from this set-aside for the Colonia Model Subdivision Program. If sufficient applications are not received for this activity, the remaining funds will be used for other CHDO-eligible activities. The Department may set aside 10% of the annual CHDO set-aside for Predevelopment Loans.

The following targets will be used to distribute General Funds for Single Family Activities and ADDI funds.

Activity	Funding Amount	% of Available Funding
Homebuyer Assistance	$2,902,500	15%
Owner Occupied Housing Assistance	$13,545,000	70%
Tenant Based Rental Assistance	$2,902,500	15%
Total Estimated Funding Available for Distribution	19,350,000	100%

Description of Activities

Owner-Occupied Housing Assistance (OCC)

Rehabilitation or reconstruction cost assistance is provided to homeowners for the repair or reconstruction of their existing homes. The homes must be the principal residence of the homeowner. At the completion of the assistance, all properties must meet the International Residential Code and local building codes. If a home is reconstructed, the applicant must also ensure compliance with the universal design features in new construction, established by §2306.514, Texas Government Code, required for any applicants utilizing federal or state funds administered by TDHCA in the construction of single family homes.

The available funding for this activity is approximately $13.5 million, which may only be used in Non-PJs. This amount does not include the Housing Program for Persons with Disabilities OCC funding issued under a separate NOFA.

Tenant-Based Rental Assistance (TBRA)

Rental subsidy and security and utility deposit assistance is provided to tenants, in accordance with written tenant selection policies, for a period not to exceed 24 months. TBRA allows the assisted tenant to live in and move to any dwelling unit with a right to continued assistance.

The available funding for this activity is approximately $2.9 million, which may only be used in Non-PJs. This amount does not include the TBRA Housing Program for Persons with Disabilities TBRA funding issued under a separate NOFA.

Homebuyer Assistance (HBA)

Down payment and closing cost assistance is provided to homebuyers for the acquisition of affordable single family housing. This activity may also be used for the following:

- Construction costs associated with architectural barrier removal in assisting homebuyers with disabilities by modifying a home purchased with HOME assistance to meet their accessibility needs.
- Acquisition and rehabilitation costs associated with contract for deed conversions to serve colonia residents.
- Construction costs associated with the rehabilitation of a home purchased with HOME assistance.
- Acquisition or new construction costs for the replacement of manufactured housing.

The available funding for this activity is approximately $2.9 million, which may only be used in Non-PJs. PY 2007 ADDI funds are included in this amount. This amount does not include the Housing Program for Persons with Disabilities HBA funding issued under a separate NOFA.

Homebuyer Assistance may be awarded through the CHDO Set-Aside, Contract for Deed Set-Aside, and American Dream Downpayment Initiative.

Rental Housing Development

Awards for eligible applicants are to be used for the development of affordable rental housing. Owners are required to make the units available to extremely low, very low, and low income families, and must meet long-term rent restrictions.

The available funding for this activity is approximately $3 million, which may only be used in Non-PJs.

Rental Housing Preservation

Awards for eligible applicants are to be used for the acquisition and/or rehabilitation for the preservation of existing affordable or subsidized rental housing. Owners are required to make the units available to extremely low, very low, and low income families and must meet long-term rent restrictions.

The available funding for this activity is approximately $2 million, which may only be used in Non-PJs.

Special Mandates, Programs, and Initiatives

TDHCA will direct its remaining HOME funding to address federal and state legislative requirements or departmental program objectives as follows.

American Dream Downpayment Initiative (ADDI)

ADDI is a federal requirement that was signed into law on December 16, 2003, and was created to help homebuyers with down payment and closing cost assistance. ADDI aims to increase the homeownership rate, especially among lower income and minority households, and revitalize and stabilize communities.

Under ADDI, a first time homebuyer is an individual and his or her spouse who have not owned a home during the three year period prior to the purchase of a home with assistance under ADDI. The term also includes displaced homemakers and single parents. The minimum amount of ADDI funds in combination with HOME funds that must be invested in a project is $1,000. The amount of ADDI assistance provided to any family may not exceed the greater of 6 percent of the purchase price of a single family housing unit or $10,000. This assistance is in the form of a second- or third-lien loan.

The ADDI funding, approximately $650,000, is reserved for down payment assistance in non-PJs. ADDI funding may, at the discretion of the Department, include funds for rehabilitation for first time homebuyers in conjunction with home purchases assisted with ADDI funds. The rehabilitation may not exceed 20 percent of the annual ADDI allocation.

CHDO Set-Aside

A minimum of 15 percent, approximately $6,000,000 (plus $300,000 in CHDO operating expenses) of the annual HOME allocation is reserved for Community Housing Development Organizations (CHDOs). CHDO set-aside projects are owned, developed, or sponsored by the CHDO, and result in the development of units or homeownership. Development includes projects that have a construction component, either in the form of new construction or the rehabilitation of existing units. These funds may only be used in non-PJs.

In accordance with 24 CFR 92.208, up to 5 percent of the Department's HOME allocation will be used for the operating expenses of CHDOs. The Department may award CHDO Operating Expenses in conjunction with the award of CHDO Development Funds, or through a separate application cycle not tied to a specific activity. In addition, TDHCA may elect to set aside up to 10 percent of funding for predevelopment loans funds, which may only be used for activities such as project-specific technical assistance, site control loans, and project-specific seed money.

Contract for Deed Conversions Set-Aside

The purpose of this program is to help Colonia residents become property owners by converting their contracts for deed into traditional mortgages. To help TDHCA meet this mandate, $2,000,000 of PY 2007 HOME Program funds will be targeted to assist households described under this initiative. These funds may only be used in non-PJs.

These funds are a State mandated set-aside and account for less than 10 percent of the funding available for allocation, therefore, they are not subject to the Regional Allocation Formula, pursuant to §2306.111(d-1)(2) of the Texas Government Code.

Colonia Model Subdivision Loan Program Set-Aside

Per Subchapter GG of Chapter 2306, Texas Government Code, the intent of this program is to provide low-interest-rate or possible interest-free loans to promote the development of new, high-quality residential subdivisions or infill housing that provide alternatives to substandard colonias, and housing options affordable to individuals and families of extremely low and very low income who would otherwise move into substandard colonias. The Department will only make loans to CHDOs certified by the Department and for the types of activities and costs described under the previous section regarding CHDO Set-Aside. $1,000,000 dollars will be targeted to assist households described under this initiative. These funds may only be used in non-PJs.

These funds are a State mandated set-aside and account for less than 10 percent of the funding available for allocation, therefore, they are not subject to the Regional Allocation Formula, pursuant to §2306.111(d-1)(2) of the Texas Government Code.

Persons with Disabilities

Up to $4 million of directed assistance for persons with disabilities will be issued under separate NOFAs. The funds will be awarded through competitive application processes. These NOFAs will include directed funds for TBRA, HBA and OCC activities as described in the following strategies.

> ***"9.5 Strategy:*** *Issue a Notice of Funding Availability (NOFA), separate from the regular HOME TBRA activity funding, which provides up to $2 million for tenant based rental assistance directed to assist persons with disabilities. This NOFA will indicate that the recipients must meet the Texas State definition used by the Promoting Independence Advisory Board. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement.*
>
> ***9.6 Strategy:*** *Issue a NOFA, separate from the regular HOME HBA and OCC activity funding, that provides up to $2 million for homebuyer assistance and owner occupied rehabilitation to assist persons with disabilities. Recognizing that there are additional costs associated with assisting persons with disabilities, this NOFA will include the potential to increase the maximum application amount above that of the general*

> *HBA and OCC activity funding. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement."*

Within the requirements of 2306.111(c) of the Texas Government Code as described below, applications may serve both PJ and non-PJ areas. The amount of funding that can be utilized for this purpose in PJ areas cannot exceed the associated 5 percent cap of approximately $2 million

In administering federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 USC Section 12701 et. seq.), the Department shall expend at least 95 percent of these funds for the benefit of non-participating areas that do not qualify to receive funds under the Cranston-Gonzalez National Affordable Housing Act directly from the United States Department of Housing and Urban Development. All funds not set aside under this subsection shall be used for the benefit of persons with disabilities, and may be used to serve persons with disabilities in both participating and non-participating jurisdiction areas. Eligible applicants include nonprofits, for-profits, units of general local government, and public housing authorities with a documented history of working with special needs populations, or working in partnership with organizations with a documented history of working with special needs populations.

TDHCA will ensure that all housing developments are built and managed in accordance with its Integrated Housing Rule. Multifamily developments will be limited to reserving no more than 18 percent of the units in developments with 50 or more units, and no more than 36 percent of the units in developments with less than 50 units, for persons with disabilities.

Additionally, in accordance with 10 TAC 53.61, applicants applying for HOME funds under the Owner-Occupied Housing Assistance and Tenant-Based Rental Assistance programs must propose targeting at least 5 percent of the number of units proposed in the application, to persons who meet the definition of persons with disabilities. A waiver of this requirement may be requested by the applicant to the Department, if applicant is unable to document persons with disabilities that meet the HOME eligible requirements.

Special Needs Populations

Subject to the availability of qualified applications, TDHCA has a goal of allocating 20 percent of the annual HOME allocation to applicants serving persons with special needs. All HOME program activities will be included in attaining this goal. Additional scoring criteria may be established under each of the eligible activities to target such activities and assist the Department in reaching its goal.

Regional Allocation Formula

All HOME funding awards under this plan are subject to Texas Government Code §2306.111 and as such will be distributed according the established Regional Allocation Formula. The 2007 RAF distributes funding for the following activities:

- Housing Program for Persons with Disabilities,
- Rental Housing Preservation Program,
- Rental Housing Development Program,
- Single Family Activity Program, and
- PY 2007 ADDI Funds.

The table below shows the combined regional funding distribution for all of the activities distributed under the RAF. Targeted funding amounts for each activity will also be established using the percentages generated by the RAF.

Targeted Distribution of Funds under the RAF

Region	Place for Geographical Reference	Regional Funding Amount	Regional Funding %	Rural Funding Amount	Rural Funding %	Urban/ Exurban Funding Amount	Urban/ Exurban Funding %
1	Lubbock	$2,096,376	6.1%	$2,096,004	100.0%	$372	0.0%
2	Abilene	$1,564,996	4.5%	$1,528,397	97.7%	$36,599	2.3%
3	Dallas/Fort Worth	$6,158,445	17.8%	$1,697,219	27.6%	$4,461,226	72.4%
4	Tyler	$4,209,442	12.1%	$3,709,160	88.1%	$500,282	11.9%
5	Beaumont	$2,087,440	6.0%	$1,771,480	84.9%	$315,960	15.1%
6	Houston	$2,390,795	6.9%	$1,076,716	45.0%	$1,314,079	55.0%
7	Austin/Round Rock	$1,432,347	4.1%	$781,108	54.5%	$651,239	45.5%
8	Waco	$1,163,474	3.4%	$717,572	61.7%	$445,901	38.3%
9	San Antonio	$1,941,552	5.6%	$1,507,178	77.6%	$434,374	22.4%
10	Corpus Christi	$2,538,461	7.3%	$2,071,417	81.6%	$467,044	18.4%
11	Brownsville/Harlingen	$6,245,987	18.0%	$4,111,167	65.8%	$2,134,820	34.2%
12	San Angelo	$1,871,449	5.4%	$705,175	37.7%	$1,166,274	62.3%
13	El Paso	$949,236	2.7%	$609,876	64.2%	$339,360	35.8%
	Total	$34,650,000	100.0%	$22,382,470	64.6%	$12,267,530	35.4%

For more information regarding single family activities, contact Sandy Garcia, Single Family Finance Production Division, at (512) 475-1391 or sandy.garcia@tdhca.state.tx.us. For multifamily activity information, contact David Danenfelzer, Multifamily Finance Production Division, at (512) 475-3865 or david.danenfelzer@tdhca.state.tx.us.

HOUSING TRUST FUND

The Housing Trust Fund (HTF) receives funding from the State of Texas, multifamily bond issuance fees, loan repayments and other funds that are received and appropriated by the Department, and is the only State-authorized program for affordable housing, as created by the 72nd Legislature. HTF offers loans and grants to nonprofits; units of local government; public housing agencies; CHDOs; and for-profit entities. The targeted beneficiaries of the program are low, very low, and extremely low income households. Eligible program activities for the Housing Trust Fund include, but are not limited to the following:

- the acquisition, rehabilitation, and new construction of affordable rental housing. Refinancing or rehabilitation of properties constructed within the past 5 years and previously funded by the Department are not eligible;
- the acquisition, rehabilitation, and new construction of affordable homeownership developments. Developments may be completed by a contracted developer or through Self-Help Construction.
- tenant-based rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. Tenant-based rental assistance also includes security and utility deposits for rental of dwelling units;
- predevelopment loans to nonprofit housing development organizations for eligible reimbursable costs associated with the planning and implementation of affordable housing activities;
- credit enhancements or security for repayment of revenue bonds issued to finance affordable housing, including payments or reservations of funds to securitize loan fund investments; and
- technical assistance or other forms of capacity building to nonprofit housing developers.

While all of these are eligible activities under the program's rule, not all of these activities will occur each year and Notices of Funding Availability (NOFAs) will be released identifying the activities for which funds can actually be applied.

Pursuant to §2306.111(d-1) of the Texas Government Code, HTF programs will be regionally allocated unless the funding allocation for that program is mandated by state statute and the program's allocation represents less than 10 percent of the annual allocation for HTF.

Rental Housing Development

Rental Housing Development funds are primarily used to fund the acquisition, construction, and rehabilitation of affordable housing. Housing Trust Funds are typically used as gap financing in developments and combined with other Department programs, like the HOME Program and HTC Program.

Housing units assisted with HTF funds may remain affordable for a period up to 30 years, pursuant to Texas Government Code §2306.185(c). Applications are reviewed in accordance with the Department's applicable rules for either open or competitive application cycles. Rental developments funded with HTF resources must have a minimum of 5 percent of the units accessible for individuals with mobility impairments and an additional 2 percent of the units shall be accessible for individuals with hearing or vision impairments.

Capacity Building and Technical Assistance

The Department provided no funding for Capacity Building or Technical Assistance in FY 2006 due to expanded hurricane relief support. The Department may release a new NOFA in FY 2007, based on the annual funding plan approved by the Department's Board.

Predevelopment Loan Program

The purpose of the Housing Trust Fund Predevelopment Loan Program is to provide opportunities for nonprofits organizations to develop affordable housing by helping to eliminate the barriers predevelopment expenses may pose. To date, the program has managed to create more than $34 million in affordable housing development for an investment of less than $3 million over the past 8 years. The Department anticipates releasing a new NOFA for the program in September 2006.

Texas Bootstrap Loan Program

The Texas Bootstrap Loan Program, as administered by the TDHCA Office of Colonia Initiatives, receives substantial funding from the Housing Trust Fund. This program is not subject to the Regional Allocation Formula, pursuant to §2306.111(d-1) of the Texas Government Code.

Disaster Relief

The Department reserved approximately $2.8 million in HTF funding for the purpose of supporting disaster relief efforts in fiscal year 2006. The Department's Board approved the use of HTF funds for both homeowner assistance and rental rehabilitation activities.

Regional Allocation Formula

In accordance with Senate Bill 264, TDHCA allocates HTF Program funds to each region using a need-based formula developed by the Department. Please see "2007 Regional Allocation Formula" in this section for further explanation.

HTF Program RAF

Region	Place for Geographical Reference	Regional Funding %	Rural Funding %	Urban/ Exurban Funding %
1	Lubbock	4.9%	50.6%	49.4%
2	Abilene	2.9%	43.7%	56.3%
3	Dallas/Fort Worth	20.0%	7.7%	92.3%
4	Tyler	5.3%	59.3%	40.7%
5	Beaumont	3.2%	52.2%	47.8%
6	Houston	23.7%	4.2%	95.8%
7	Austin/Round Rock	4.5%	6.5%	93.5%
8	Waco	5.5%	18.2%	81.8%
9	San Antonio	5.7%	15.6%	84.4%
10	Corpus Christi	3.7%	51.9%	48.1%
11	Brownsville/Harlingen	13.0%	36.4%	63.6%
12	San Angelo	3.0%	29.3%	70.7%
13	El Paso	4.7%	13.2%	86.8%
	Total	100.0%	21.4%	78.6%

Projected Housing Trust Fund Funding for FY 2007: TBD

For more information, contact the Multifamily Finance Production Division, at (512) 475-2596

HOUSING TAX CREDIT PROGRAM

The Housing Tax Credit (HTC) Program receives authority from the US Treasury Department to provide tax credits to nonprofits, for-profit developers, and syndicators or investors. The targeted beneficiaries of the program are very low and extremely low income families at or below 60 percent AMFI. The program's purpose is to encourage the development and preservation of rental housing for low income families, provide for the participation of for-profit and nonprofit organizations in the program, maximize the number of units added to the state's housing supply, and prevent losses in the state's supply of affordable housing.

The HTC Program was created by the Tax Reform Act of 1986 and is governed by the Internal Revenue Code of 1986 (the "Code"), as amended, 26 USC Section 42. It authorizes tax credits in the amount of $1.85 per capita of the state population. Tax credits are also awarded to developments with tax-exempt bond financing and are made independent of the $1.85 state volume cap. TDHCA is the only entity in the state with the authority to allocate tax credits under this program. The State's distribution of the credits is administered by the TDHCA's *Qualified Allocation Plan and Rules* (QAP), as required by the Code. Per Section 2306.67022, the Governor shall approve, reject, or modify and approve the Board-approved QAP not later than December 1 of each year.

In 2003, the Texas Legislature passed Senate Bill 264, which mandated that TDHCA allocate housing funds awarded after September 1, 2003, in the HTC Program to each Uniform State Planning Region using a formula for urban/exurban and rural, developed by the Department, based on need for housing assistance.

To qualify for tax credits, the proposed development must involve new construction or undergo substantial rehabilitation of residential units, which is defined as at least $12,000 per rental unit of construction hard costs, unless financed with TX-USDA-RHS, in which case the minimum is $6,000. The credit amount for which a development may be eligible depends on the total amount of depreciable capital improvements, the percentage of units set aside for qualified tenants, and the funding sources available to finance the total development cost. Pursuant to the Code, a low income housing development qualifies for residential rental occupancy if it meets one of the following two criteria: (1) 20 percent or more of the residential units in the development are both rent-restricted and occupied by individuals whose income is 50 percent or less of AMFI; or (2) 40 percent or more of the residential units in the development are both rent-restricted and occupied by individuals whose income is 60 percent or less of AMFI. Typically, 60 to 100 percent of a development's units will be set aside for qualified tenants in order to maximize the amount of tax credits the development may claim.

Credits from the state volume cap are awarded through a competitive application process. Each application must satisfy a set of threshold criteria and is scored based on selection criteria. The selection criteria referenced in the QAP is approved by the TDHCA Board each year. The board considers the recommendations of the TDHCA staff and determines a final award list. Credits to developments with tax-exempt bond financing are awarded through a similar application review process, but because these credits are not awarded from a limited credit pool, the process is noncompetitive and the selection criteria are not part of the application.

The Department requires recipients of tax credits to document the participation of minority-owned businesses in the development and management of tax credit developments, and has established a minimum goal of 30 percent participation. The selection criteria for 2006 awards extra points to developments owned by historically underutilized businesses (HUBs) or that have a plan in place for utilizing HUBs, and also development location criteria including areas located in colonias. Efforts are made in the planning process and allocation of funds to ensure the involvement of housing advocates, community-based institutions, developers, and local municipalities. The Department also encourages the participation of community development corporations and other neighborhood-based groups.

Regional Allocation Formula

In accordance with Senate Bill 264, TDHCA allocates HTC Program funds to each region using a need-based formula developed by the Department. Please see "2007 Regional Allocation Formula" in this section for further explanation. Using the 2007 Regional Allocation Formula, each region will receive the following amount of funding for use with activites subject to the formula. Funding figures will be included in the final document.

HTC Program RAF

Region	Place for Geographical Reference	Regional Funding Amount	Regional Funding %	Rural Funding Amount	Rural Funding %	Urban/ Exurban Funding Amount	Urban/ Exurban Funding %
1	Lubbock	$2,096,099	4.9%	$1,060,188	50.6%	$1,035,911	49.4%
2	Abilene	$1,251,525	2.9%	$546,878	43.7%	$704,647	56.3%
3	Dallas/Fort Worth	$8,598,298	20.0%	$659,991	7.7%	$7,938,307	92.3%
4	Tyler	$2,286,522	5.3%	$1,354,984	59.3%	$931,538	40.7%
5	Beaumont	$1,365,191	3.2%	$712,447	52.2%	$652,744	47.8%
6	Houston	$10,182,859	23.7%	$430,557	4.2%	$9,752,302	95.8%
7	Austin/Round Rock	$1,919,458	4.5%	$125,682	6.5%	$1,793,776	93.5%
8	Waco	$2,358,376	5.5%	$429,432	18.2%	$1,928,945	81.8%
9	San Antonio	$2,448,901	5.7%	$381,410	15.6%	$2,067,492	84.4%
10	Corpus Christi	$1,575,474	3.7%	$817,776	51.9%	$757,698	48.1%
11	Brownsville/Harlingen	$5,600,674	13.0%	$2,039,229	36.4%	$3,561,445	63.6%
12	San Angelo	$1,300,187	3.0%	$381,485	29.3%	$918,702	70.7%
13	El Paso	$2,016,435	4.7%	$267,150	13.2%	$1,749,284	86.8%
	Total	$43,000,000	100.0%	$9,207,210	21.4%	$33,792,790	78.6%

Projected HTC Program Funding for FY 2007: $43,000,000

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

MULTIFAMILY BOND PROGRAM

The Multifamily Bond Program issues tax-exempt and taxable housing mortgage revenue bonds (MRBs) under the Private Activity Bond Program (PAB) to fund loans to nonprofit and for-profit developers. The proceeds of the bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties with the targeted beneficiaries being very low, low, and moderate income households. Owners elect to set aside units in each development according to §1372, Texas Government Code. Rental developments must comply with Section 504 unit standards. Property owners are also required to offer a variety of services to benefit the residents of the development. Specific tenant programs must be designed to meet the needs of the current tenant profile and must be approved annually by TDHCA.

TDHCA issues tax-exempt, multifamily MRBs through two different authorities defined by the Internal Revenue Code. Under one authority, tax-exempt bonds used to create housing developments are subject to the State's private activity volume cap. The State will allocate 22 percent of the annual private activity volume cap for multifamily developments. Approximately $402 million in issuance authority will be made available to various issuers to finance multifamily developments, of which 20 percent, or approximately $80 million, will be made available exclusively to TDHCA. On August 15th of each year, any allocations in the subcategories of the bond program that have not been reserved pool into one allocation fund. This is an opportunity for TDHCA to apply for additional allocation and which allows TDHCA to issue more bonds than the set-aside of $80 million. PAB Issuance authority per individual development is allocated and administered by the Texas Bond Review Board (BRB). Initially, applications submitted to the BRB are allocated by a lottery. TDHCA, local issuers, local housing authorities, and other eligible bond issuers submit applications for specific developments on behalf of development owners. Applications submitted to TDHCA for the private activity bond 2006 program year will be scored and ranked by priority and highest score. TDHCA will be accepting applications throughout the 2007 program year. Developments that receive 50 percent or more of their funding from the proceeds of tax-exempt bonds under the private activity volume cap are also eligible to apply for Housing Tax Credits.

Under the second authority, TDHCA may issue tax-exempt MRBs to finance properties that are owned entirely by nonprofit organizations. Bonds issued under this authority are exempt from the private activity volume cap. This is a noncompetitive application process and applications may be received at any time throughout the year. In addition to the set-asides above, 75 percent of development units financed under the 501(c)(3) authority must be occupied by households earning 80 percent or less of the area median income.

Projected Multifamily Bond Program Funding for FY 2007: $150,000,000

For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

First Time Homebuyer Program

The First Time Homebuyer Program receives funding from tax-exempt and taxable mortgage revenue bonds. The program offers 30-year fixed-rate mortgage financing at below-market rates for very low, low, and moderate income residents purchasing their first home or residents who have not owned a home within the preceding three years. Qualified applicants access First Time Homebuyer Program funds by contacting any participating lender, which is then responsible for the loan application process and subsequent loan approval. After closing, the lender transfers the mortgage loan to a Master Servicer designated by TDHCA.

The First Time Homebuyer Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI (area median family income) limitations, based on IRS adjusted income limits, and the purchase price of the home must not exceed stipulated maximum purchase price limits. Program funds may be allocated on a regional basis based on population percentage per Uniform State Service Region. A minimum of 30 percent of program funds will be set aside to assist Texans earning 60 percent or less of program income limits.

TDHCA currently offers Assisted Mortgage Loans and Non-Assisted Mortgage Loans. The Assisted Mortgage Loans have a slightly higher interest rate than the Non-Assisted Loans and may include down payment and closing cost assistance in the form of a grant or second lien loan. The type of assistance and amount varies by bond issuance. Assisted Mortgage Loans are available exclusively to low income homebuyers earning 60 percent or less or 115 percent or less of program income limits, depending on the program. Non-Assisted Mortgage Loans have a slightly lower interest rate than the Assisted Loans and do not offer down payment or closing cost assistance.

In an effort to assist borrowers with impaired credit histories, the First Time Homebuyer Program may be used in conjunction with Fannie Mae's My Community Mortgage. My Community Mortgage offers flexible terms, including flexibility on credit histories and the acceptance of nontraditional credit histories. These loans may be used with all TDHCA mortgage revenue bond programs, thus giving households with slight credit blemishes the opportunity to qualify for a homebuyer loan with interest rates lower than that of alternative financing arrangements

Income limits for the program are set by the IRS Tax Code (1986) based on income figures determined by the US Department of Housing and Urban Development. The first time homebuyer restriction is established by federal Internal Revenue Service regulations, which also require that program recipients may be subject to a recapture tax on any capital gain realized from a sale of the home during the first nine years of ownership. Certain exceptions to the first time homebuyer restriction, income ceiling, and maximum purchase price limitation apply in targeted areas. Such targeted areas are qualified census tracts in which 70 percent or more of the families have an income of 80 percent or less of the statewide median income and/or are areas of chronic economic distress as designated by the state and approved by the Secretaries of Treasury and Housing and Urban Development, respectively.

Projected Texas First Time Homebuyer Program funding for FY 2007: $125,000,000

For more information, contact Eric Pike, Single Family Finance Production Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

GRANT ASSISTANCE PROGRAM

The Texas Department of Housing and Community Affairs offers grant funds for down payment and closing cost assistance on a first-come, first-served basis for mortgage loans originated through the First Time Homebuyer Program. The Grant Assistance Program (GAP) currently provides up to 5 percent of the amount of the mortgage loan, but may vary depending on the program. Assistance is available to eligible borrowers whose incomes do not exceed 60 percent or 115 percent AMFI, depending on the program.

Projected Grant Assistance Program funding for FY 2007: Varies by bond issuance.

For more information, contact Eric Pike, Single Family Finance Production Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

MORTGAGE CREDIT CERTIFICATE PROGRAM

A mortgage credit certificate (MCC) provides a tax credit that will reduce the federal income taxes, dollar-for-dollar, of qualified buyers purchasing a qualified residence. As a result, the MCC effectively reduces the monthly mortgage payment and increases the buyer's disposable income by reducing his or her federal income tax obligation. This tax savings provides a family with more available income to qualify for a loan and meet mortgage payment requirements.

The amount of the annual tax credit will equal 35 percent of the annual interest paid on a mortgage loan; however, the maximum amount of the credit cannot exceed $2,000 per year. The credit cannot be greater than the annual federal income tax liability, after all other credits and deductions have been taken into account. MCC tax credits in excess of a borrower's current year tax liability may, however, be carried forward for use during the subsequent three years.

The MCC Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI limitations, based on IRS adjusted income limits. In order to participate in the MCC Program, homebuyers must meet certain eligibility requirements and obtain a mortgage loan through a participating lender. The mortgage loan must be financed from sources other than tax-exempt revenue bonds. The mortgage may be a conventional, FHA, VA, or RHS loan at prevailing market rates, but may not be used in connection with the refinancing of an existing loan.

Projected Mortgage Credit Certificate Program funding for FY 2007: $60,000,000

For more information, contact Eric Pike, Single Family Finance Production Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us.

LOAN STAR LOAN PROGRAM

The Loan Star Mortgage Program offers conventional, conforming first lien purchase mortgage loans, at market level interest rates, with second lien amortizing loans providing 8 percent down payment assistance. Target populations include low and moderate income households who may or may not have previously owned a home and require down payment assistance and seek minimal paperwork. Participating lenders statewide originate the mortgage loans.

The program is offered in conjunction with CitiMortgage Inc. using external market sources, and is intended to serve segments of the Texas homebuyer market not currently served by TDHCA's present tax-exempt bond program. An essential component of the Loan Star Mortgage Program is the down payment assistance achieved through a Fannie Mae MyCommunity second lien mortgage.

Projected Loan Star Lone Program funding for FY 2007: $20,000,000

For more information, contact Martha Sudderth, Single Family Finance Production Division, at (512) 475-3444 or martha.sudderth@tdhca.state.tx.us.

TEXAS STATEWIDE HOMEBUYER EDUCATION PROGRAM

The Texas Statewide Homebuyer Education Program (TSHEP) offers provider certification training to nonprofit organizations including Texas Agriculture Extension Agents, units of local government, faith-based organizations, CHDOs, community development corporations, community-based organizations, and other organizations with a proven interest in community building. In addition, a referral service for individuals interested in taking a homebuyer education class is available through TDHCA. The targeted beneficiaries of the program include extremely low, very low, low, and moderate income individuals; minority populations; and persons with disabilities.

To ensure uniform quality of the homebuyer education provided throughout the state, TDHCA contracts with training professionals to teach local nonprofit organizations the principles and applications of comprehensive pre- and post-purchase homebuyer education. The training professionals and TDHCA also certify the participants as homebuyer education providers.

Projected Texas Statewide Homebuyer Education Program funding for FY 2007: $70,000.

For more information, contact the Division of Policy and Public Affairs at (512) 475-3976.

OFFICE OF COLONIA INITIATIVES

In 1996, in an effort to place more emphasis on addressing the needs of colonias, the Office of Colonia Initiatives (OCI) was created and charged with the responsibility of coordinating all Department and legislative initiatives involving border and colonia issues and managing a portion of the Department's existing programs targeted at colonias. The fundamental goal of the OCI is to improve the living conditions and lives of border and colonia residents, and to educate the public regarding the services that the Department has to offer.

"Colonia" is a term borrowed from Spanish that is commonly used in Mexico to describe a type of neighborhood. In the United States, it is a geographic area located within 150 miles of the US-Mexico border that has a majority population comprised of individuals and families of low and very low income who commonly lack one or more public infrastructure services and safe, sanitary, and sound housing.

Border Field Offices

OCI oversees three Border Field Offices (BFOs) located in Edinburg, El Paso, and Laredo that serve a 75-county area with a primary purpose to provide technical assistance to units of local governments, nonprofits, for-profits, colonia residents, and the general public on Department's programs and services through on-site visits and other outreach activities along the Texas-Mexico border region. Each BFO is responsible for marketing Department programs and services to colonia and border residents. In addition, BFOs conduct on-site loan packaging and processing, homebuyer counseling, inspections, and administration of the various contracts regarding the Department's border and colonia initiatives such as the Colonia Self-Help Centers, Contract for Deed Conversion Program, and the Texas Bootstrap Loan Program. This collaboration of efforts serves as a mechanism for community improvements that is responsive to the needs of colonia residents.

Colonia Self-Help Centers

The Colonia Self-Help Center (SHC) program was created in 1995 by the 74th Legislature Senate Bill 1509, Texas Government Code Subchapter Z §2306.581 – §2306.591. Operation of the colonia self-help centers are funded from nonentitlement Community Development Block Grant (CDBG) 2.5 percent colonia set-aside fund, which is approximately $2.2 million per year and are transferred to the Department from the Office of Rural Community Affairs (ORCA) through a Memorandum of Understanding. CDBG funds can only be provided to eligible units of general local governments. The Tex. Gov. Code Ann §2306.582 authorizes the Department to establish SHCs in Cameron/Willacy, Hidalgo, Starr, Webb, and El Paso counties. Additionally, the Department, if it determines it necessary and appropriate, may establish a self-help center in any other county if the county is designated as an economically distressed area by the Texas Department Water Board. Since creation of the program, two additional SHCs have since been established in Val Verde County and Maverick County. The SHC program serves 28 colonias in the five counties designated by statute and two additional counties; the counties have approximately 10,000 colonia residents whom qualify as beneficiaries of these services.

The goal of a SHC is to improve the living conditions of residents in the colonias through key services including concentrated technical assistance in the areas of housing rehabilitation; new construction; surveying and platting; construction skills training; tool library access for self-help construction; housing finance; credit and debt counseling; grant writing; infrastructure constructions and access; contract-for-deed conversions; and capital access for mortgages to improve the quality of life for colonia residents in ways that go beyond the provision of basic infrastructure. Participants in the program must not earn more than 80 percent of the area median family income. Additionally, the properties proposed for this initiative must be located in a colonia area as identified by the Texas Water Development Board colonia list or meet the Department's definition of a colonia.

Colonia Resident Advisory Committee

The SHC program is advised by the Colonia Resident Advisory Committee (C-RAC). Established by the Tex. Gov. Code Ann. §2306.584, the C-RAC is required to advise the Department of the needs of colonia residents, activities to be provided and programs to be administered in the selected colonias of the Colonia SHCs. Each county selects two colonia residents to serve on the committee. One of the two residents must reside in a colonia being serviced by the self-help center. C-RAC members meet 30 days prior to making an award to a Colonia SHC. The C-RAC has been instrumental in voicing the concerns of the targeted populations and assisting in the development of useful tools and programs to address the needs of colonia residents.

Contract for Deed Conversion Initiative

The intent of this program is to facilitate colonia-resident property ownership by converting contracts for deed into traditional mortgages. The Department is required through legislative directive to spend no less than $4 million on contract for deed conversions for colonia families. The same legislation indicated that the Department must convert at least 400 of these contracts for deed into traditional notes and deeds of trust by August 31, 2007; however, the directive is funded through the HOME program. HOME program rules require that any residence that participates in the program must be brought up to specific housing standards – for colonia areas, this standard is typically the Colonia Housing Standards. This requirement increases the total costs of the combined conversion and housing rehabilitation activities to approximately $55,000 per participating household. Therefore, the Department estimates that 73 homes will be served through the $4 million earmarked for this purpose. Participants of this program must earn 60 percent or less of the applicable area median family income, live in a colonia, and the property must be their principal residence. Pre- and post-conversion counseling is available, as well as funding for housing reconstruction and rehabilitation.

For FY 2007, the Department will set aside $2 million from the HOME Investment Partnership Program and anticipates releasing a NOFA in the fall of 2007. Units of general local government, public housing agencies, and nonprofit organizations are eligible entities to apply to provide deferred forgivable loans or grant funds to eligible colonia residents to achieve the goals of the CFD program.

Colonia Consumer Education Services

OCI continues the consumer education program and has expanded its educational goals, although OCI is no longer required by legislation to provide education for contract for deed participants. With the statewide expansion of this program, OCI recognized the need for additional education topics, such as filing homestead exemptions and instruction in other aspects of homeownership. Education services are available through the Colonia Self-Help Centers and OCI Border Field Offices.

Texas Bootstrap Loan Program

The Texas Bootstrap Loan Program is required under Subchapter FF, Chapter 2306, Texas Government Code, to make available $3 million for mortgage loans to very low income families (those earning 60 percent or less of the area median family income), not to exceed

$30,000 per unit. This program is a self-help construction program, which is designed to provide very low income families an opportunity to help themselves through the form of sweat equity. All participants under this program are required to provide at least 60 percent of labor that is necessary to construct or rehabilitate the home, and all applicable building codes must be adhered to under this program. In addition, participants may combine these funds with other sources, such as those from private lending institutions, local governments, or any other sources; however, all combined monthly amortized loans may not exceed $60,000 per unit.

The Department is required to set aside at least two-thirds, or $2,000,000, of the available funds for owner-builders whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, Water Code. The remainder of the funding, one-third, or $1,000,000, will be available to Department-certified nonprofit owner-builder programs statewide.

Colonia Model Subdivision Program

The intent of this program, created in 2001 by the 77th Legislature, is to provide low-interest or interest-free loans to promote the development of new, high-quality subdivisions that provide alternatives to substandard colonias. The Department has allocated $2 million from the HOME Program to implement this initiative for the 2005-2006 biennium.

Consumer Information Resources

OCI operates a toll-free hotline, 1-800-462-4251, in both English and Spanish that enables colonia residents to voice their concerns and/or request information. In addition, this hotline is available to colonia residents who may be having trouble making their monthly mortgage programs under the Contract for Deed Conversion Initiative and Texas Bootstrap Loan Program.

Projected Office of Colonia Initiatives funding for FY 2007: $7,200,000.

For additional information, contact Homero V. Cabello, Office of Colonia Initiatives, at 1-800-462-4251 or homero.cabello@tdhca.state.tx.us.

COMPREHENSIVE ENERGY ASSISTANCE PROGRAM

The Comprehensive Energy Assistance Program (CEAP) receives funding from the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) and offers grants to community action agencies, nonprofits, and local units of government. The targeted beneficiaries of the program in Texas are households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly; persons with disabilities; families with young children; households with the highest energy costs or needs in relation to income (highest home energy burden); and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

CEAP combines case management, energy education, and financial assistance to help very low and extremely low income consumers reduce utility bills to an affordable level. By statute, 10 percent of total funding is allocated for administration and 5 percent is allocated to case-management activities. The remaining 85 percent of the funding is used for direct client services, which includes 5 percent for outreach.

There are four basic components to meet consumers' needs:

- The co-payment component assists households achieve energy self-sufficiency by helping households set goals for reducing utility bills, giving advice on improving household budgets, and assisting with utility bills for six to twelve months.
- The heating and cooling systems component repairs or replaces heating and cooling appliances to increase energy efficiency.
- The energy crisis component provides assistance during an energy crisis caused by extreme weather conditions or an energy supply shortage.
- The elderly and persons with disabilities component assists vulnerable households during fluctuations in energy costs by paying up to four of the highest bills during the year.

CEAP providers are expected to create partnerships with programs within and outside their agencies and with private entities. The program also requires that providers refer CEAP clients to the Department's Weatherization Assistance Program. Because CEAP is designed to help clients achieve energy self-sufficiency, it encourages the consumer to control future energy costs without having to rely on other government programs for energy assistance.

Projected Comprehensive Energy Assistance Program funding for FY 2007: $38,700,738.

For more information, contact Amy Oehler, Energy Assistance Section, at (512) 475-3864 or amy.oehler@tdhca.state.tx.us. To apply for CEAP, call 1-877-399-8939, toll free, using a land phone.

WEATHERIZATION ASSISTANCE PROGRAM

The Weatherization Assistance Program (WAP) is funded through the US Department of Energy Weatherization Assistance Program for Low Income Persons grant and the US Department of Health and Human Services Low Income Home Energy Assistance Program (LIHEAP) grant. WAP offers grants to community action agencies, nonprofits, and local units of government with targeted beneficiaries being households with incomes at or below 125 percent of federal poverty guidelines, with priority given to the elderly; persons with disabilities; families with young children; households with the highest energy costs or needs in relation to income (highest home energy burden); and households with high energy consumption. Local providers must implement special outreach efforts to reach these priority populations. Applicants who have special needs receive additional points in the application process. To help consumers control energy costs, WAP funds the installation of weatherization measures and provides energy conservation education. In addition to meeting the income-eligibility criteria, the weatherization measures to be installed must meet specific energy-savings goals.

The Department of Energy allows up to 15 percent of the funds for administration. The Department of Health and Human Services LIHEAP grant allows 10 percent for administration. The remaining funds are used for direct client services.

Partnerships between the Weatherization Assistance Program and the Southwestern Electric Power Company, the Southwestern Public Service Company, Entergy, and El Paso Electric provide energy conservation measures to very low and extremely low income utility customers. These partnerships increase the total number of low income households receiving weatherization services and provide consumers the opportunity to receive more comprehensive energy-efficiency measures.

Projected Weatherization Assistance Program funding for FY 2007: $13,542,228.

For more information, contact Amy Oehler, Energy Assistance Section, at (512) 475-3864 or amy.oehler@tdhca.state.tx.us. To apply for weatherization, call 1-888-606-8889, toll free, using a land phone.

EMERGENCY SHELTER GRANTS PROGRAM

The Emergency Shelter Grants Program (ESGP) receives funding from the US Department of Housing and Urban Development and awards grants to units of local government and private nonprofit entities that provide shelter and related services to homeless persons and/or intervention services to persons at risk of homelessness. Activities eligible for ESGP funding include the rehabilitation or conversion of buildings for use as emergency shelters for the homeless; the provision of essential services to the homeless; costs related to the development and implementation of homeless prevention activities; costs related to operation administration; and costs related to maintenance, operation, rent, repairs, security, fuel, equipment, insurance, utilities, food and furnishings.

TDHCA also participates in the Texas Interagency Council for the Homeless (TICH). TICH is charged with surveying and evaluating services for the homeless in Texas; assisting in the coordination and provision of services for homeless persons throughout the state; increasing the flow of information among separate service providers and appropriate authorities; developing guidelines to monitor services for the homeless; providing technical assistance to the housing finance divisions of TDHCA in order to assess housing needs for persons with special needs; establishing a central resource and information center for the state's homeless; and developing, in cooperation with the Department and the Health and Human Services Commission, a strategic plan to address the needs of the homeless.

The Department provided funds to the Texas Homeless Network (THN) to provide in-depth technical assistance on refining a collaborative network of local service providers, assessing the needs of the homeless population, and developing priorities for addressing those needs.

Projected Emergency Shelter Grants Program funding for FY 2007: TBD.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905 or rita.garza@tdhca.state.tx.us.

COMMUNITY SERVICES BLOCK GRANT PROGRAM

The Community Services Block Grant Program (CSBG) receives funding from the US Department of Health and Human Services (USHHS), and funds are utilized to fund CSBG-eligible entities and to fund activities that support the intent of the CSBG Act. The targeted beneficiaries of the program are low income families and individuals, homeless families and individuals, migrant and seasonal farmworkers, and elderly low income individuals and families whose income does not exceed 125 percent of the current federal income poverty guidelines issued by USHHS.

CSBG provides administrative support to 47 CSBG-eligible entities that provide services to very low income persons. The funding assists with in providing essential services, including access to child care, health and human services, nutrition, transportation, job training and employment services, education services, activities designed to make better use of available income, housing services, emergency assistance, activities to achieve greater participation in the affairs of the community, youth development programs, information and referral services, activities to promote self-sufficiency; and other related services.

Five percent of the State's CSBG allocation may be used to fund activities that support the intent of the Community Services Block Grant Act, which may include providing training or technical assistance to eligible entities or short-term financial support for innovative projects that address the causes of poverty, promote client self-sufficiency, or promote community revitalization. These funds may also be used to support nonprofit organizations that assist low income Native Americans and migrant or seasonal farm workers. In addition, local contractors may use CSBG funds to assist homeless persons and other special needs populations.

Community Services Block Grant Program funding for FY 2007: TBD.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905 or rita.garza@tdhca.state.tx.us.

COMMUNITY FOOD AND NUTRITION PROGRAM

The Community Food and Nutrition Program (CFNP) receives funding from the US Department of Health and Human Services, and the grant supports efforts to address hunger issues in low income neighborhoods on a statewide basis.

CFNP coordinates statewide efforts to address hunger and related issues by distributing surplus commodities through the Share Our Surplus Service (SOS) and game donated by hunters through Hunters for the Hungry Program (HFHP). CFNP funds are also used to support the expansion of child-feeding programs and the creation of farmers markets designed to serve low income neighborhoods.

The SOS program is a food recovery program where donations of surplus and unsaleable food donations are distributed to needy Texas. HFHP is a collaborative effort among hunters, meat processors, and nonprofit organizations to distribute meat to local food banks, food pantries and other organizations feeding the needy.

As of printing of this draft Plan, no funds have been allocated from the Community Food and Nutrition Program. However, funding for this program may be restored later in the year, or for FY 2008.

Community Food and Nutrition Program funding for FY 2007: $0.

For more information, contact Rita D. Gonzales-Garza, Community Services Section, at (512) 475-3905 or rita.garza@tdhca.state.tx.us.

SECTION 8 HOUSING CHOICE VOUCHER PROGRAM

The Section 8 Housing Choice Voucher Program (HCVP) receives funding from HUD and offers rental assistance subsidies to families and individuals, including the elderly and persons with disabilities, earning 50 percent or less of area median income. At least 75 percent of HCVP tenants must have incomes at or below 30 percent of the area median income. Qualified households are afforded the opportunity to select the best available housing through direct negotiations with landlords to ensure accommodations that meet their needs. The statewide HCVP is designed specifically for needy families in small cities and rural communities not served by similar local or regional programs.

TDHCA administers vouchers in 37 counties. TDHCA contracts with community action agencies, public housing authorities, and units of local government to assist the Department with the administration of vouchers.

Projected Section 8 Program funding for FY 2007: $9,000,000

For more information, contact the Section 8 Program at (512) 475-2634.

MANUFACTURED HOUSING DIVISION

The Manufactured Housing Division regulates the manufactured housing industry in Texas by ensuring that manufactured homes are well constructed, safe, and correctly installed; by providing consumers with fair and effective remedies; and by providing economic stability to manufacturers, retailers, installers, and brokers. The Division licenses manufactured housing professionals and maintains records of the ownership, location, real or personal property status, and lien status (on personal property homes) on manufactured homes. It also records tax liens on manufactured homes. Because of its regulatory nature, the Division has its own governing board and executive director.

Relying on a team of trained inspectors operating from eight locations around the state, the Division inspects manufactured homes throughout the state. Those inspectors also assist TDHCA by inspecting properties for the Portfolio Management and Compliance Division and by inspecting and processing license applications for migrant farm worker housing facilities. The Division also handles approximately 2,000 consumer complaints a year, many of those requiring investigation and enforcement action.

For more information, contact the Manufactured Housing Division at 1-800-500-7074.

TDHCA ALLOCATION PLANS

The Department has developed allocation formulas for many TDHCA programs in order to target available housing resources to the neediest households in each uniform state service region. These formulas are based on objective measures of need in order to ensure an equitable distribution of funding.

2007 REGIONAL ALLOCATION FORMULA

Section 2306.111(d) of the Government Code requires that TDHCA use a Regional Allocation Formula (RAF) to allocate its HOME, HTC, and HTF funding. This RAF objectively measures the affordable housing need and available resources in 13 State Service Regions used for planning purposes. Within each region, the RAF further targets funding to rural and urban/exurban areas.

As a dynamic measure of need, the RAF is revised annually to reflect updated demographic and resource data; respond to public comment; and better assess regional housing needs and available resources. The RAF is submitted annually for public comment.

Slightly modified versions of the RAF are used for the HOME and HTF/HTC because the programs have different eligible activities, households, and geographical service areas. For example, because at least 95 percent of HOME funding must be set aside for non-PJs, the HOME RAF only uses need and available resource data for non-PJs.

For the 2007 fiscal year, the RAF uses the following 2000 US Census data to calculate this regional need distribution:

- Poverty: Number of persons in the region who live in poverty.
- Cost Burden: Number of households with a monthly gross rent or mortgage payment to monthly household income ratio that exceeds 30 percent.
- Overcrowded Units: Number of occupied units with more than one person per room.
- Units with Incomplete Kitchen or Plumbing: Number of occupied units that do not have all of the following: sink with piped water; range or cook top and oven; refrigerator, hot and cold piped water, flush toilet, and bathtub or shower.

There are a number of local, state, and federal funding sources that can be used to address affordable housing needs. To mitigate any inherent inequities in the regional allocation of these funds, the RAF compares each region's level of need to its level of resources. In the 2006 fiscal year, resources from the following sources were used in the RAF: HTC, HTF, HUD (HOME, Housing Opportunities for Persons with AIDS (HOPWA), public housing authority (PHA) capital funding, and Section 8 funding), Bond Financing, and United States Department of Agriculture (USDA) housing programs.

Please see the HOME, HTC, and HTF program sections for distribution figures. For more information on the RAF and further description of the formula, please contact the Division of Policy and Public Affairs, at (512) 475-3976.

2007 Emergency Shelter Grants Program Allocation Formula

ESGP funds are reserved according to the percentage of poverty population identified in each of the 13 state service regions (i.e., 3.95 percent of the available ESGP funds were reserved for Region 1 with 3.95 percent of the state's poverty population). The top scoring applications in each region are recommended for funding, based on the amount of funds available for that region. Any application that receives a score below 70 percent of the highest raw score from the region is not considered for funding.

2007 Community Services Block Grant Allocation Formula

Allocations to the 47 CSBG–eligible entities are based primarily on two factors: (1) the number of persons living in poverty within the designated service delivery area for each organization and (2) a calculation of population density. Poverty population is given 98 percent weight, and the ratio of inverse population density is given 2 percent weight. The formula also includes a base award for each organization before the factors are applied, as well as a floor, or minimum award. In FY 2007, the Department will utilize the 2000 Census population figures at 125 percent of poverty, a base of $50,000, and a floor at $150,000.

2007 Comprehensive Energy Assistance Program and Weatherization Assistance Program Allocation Formula

The allocation formula for the Comprehensive Energy Assistance and Weatherization Assistance programs uses the following five factors and corresponding weights to distribute its funds by county: county non-elderly poverty household factor (40 percent); county elderly poverty household factor (40 percent); county inverse poverty household density factor (5 percent); county median income variance factor (5 percent); and county weather factor (10 percent).

TDHCA Goals and Objectives

The Strategic Plan goals reflect program performance based upon measures developed with the State's Legislative Budget Board and Governor's Office of Budget and Planning. The goals are also based upon Riders attached to the Department's Appropriations. The Department believes that the goals and objectives for the various TDHCA programs should be consistent with its mandated performance requirements.

The State's Strategic Planning and Performance Budgeting System (SPPB) is a mission- and goal-driven results-oriented system combining strategic planning and performance budgeting. The system has three major components including strategic planning, performance budgeting, and performance monitoring. As an essential part of the system, performance measures are part of TDHCA's strategic plan; they are used by decision makers in allocating resources; they are intended to focus the Department's efforts on achieving goals and objectives; and they are used as monitoring tools providing information on accountability. Performance measures are reported quarterly to the Legislative Budget Board.

The State's Strategic Planning and Performance Budgeting System is based on a two-year cycle; goals and targets are revisited each biennium. The targets reflected in this document are based on the Department's requests for 2006–2007.

All applicants for funding are eligible and are encouraged to apply for and leverage funds from multiple agency programs. There will be a considerable amount of leveraging of HUD funds with those from other federal and State sources. The following affordable housing goals and objectives present TDHCA's approach to addressing the state's affordable housing needs. While the HOME Program funds may be used in conjunction with other TDHCA programs, there is no way to determine the extent of the overlap. Because of this, each program reports their performance separately, with its particular intention/use listed separately.

AFFORDABLE HOUSING GOALS AND OBJECTIVES

The following goals address performance measures established by the 79th Legislature. Refer to program-specific statements outlined in the Action Plan portion of this document for strategies that will be used to accomplish the goals and objectives listed below. Included are the 2006 goal and actual performance and the 2007 goal. Actual 2006 numbers were not available at the printing of this draft document, but will be included in the final document.

Goals one through five are established through interactions between TDHCA, the Legislative Budget Board, and the Legislature. They are referenced in the General Appropriations Act enacted during the most recent legislative session.

Note: 2005 Measures marked with an "*" were added to the 2006 Performance Measures by the 79th Legislature.

GOAL 1: TDHCA WILL INCREASE AND PRESERVE THE AVAILABILITY OF SAFE, DECENT, AND AFFORDABLE HOUSING FOR VERY LOW, LOW, AND MODERATE INCOME PERSONS AND FAMILIES

1.1 Strategy: Provide mortgage financing and homebuyer assistance through the Single Family Mortgage Revenue Bond Program.

Strategy Measure: *Number of single family households assisted through the First Time Homebuyer Program.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
1,727	2,255	131%	1,727

***1.2 Strategy:** Provide funding through the HOME Program for affordable single family housing.

Strategy Measure: *Number of single family households assisted with HOME funds.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
1,834	1,235	67%	1,834

***1.3 Strategy:** Provide funding through the HTF program for affordable single family housing.

Strategy Measure: *Number of single family households assisted through the Housing Trust Fund.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
100	66	66%	100

1.4 Strategy: Provide tenant-based rental assistance through Section 8 certificates.

Strategy Measure: *Number of multifamily households assisted with tenant-based rental assistance.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
2,100	1,025	49%	2,100

1.5 Strategy: Provide federal tax credits to develop rental housing.

Strategy Measure: *Number of multifamily households assisted with HTCs.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
18,832	17,250	92%	20,151

***1.6 Strategy:** Provide funding through the HOME Program for affordable multifamily housing.

Strategy Measure: *Number of multifamily households assisted with HOME funds.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
741	466	63%	647

***1.7 Strategy:** Provide funding through the Housing Trust Fund for affordable multifamily housing.

Strategy Measure: *Number of multifamily households assisted through the Housing Trust Fund.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
255	794	311%	262

1.8 Strategy: Provide funding through the Multifamily Mortgage Revenue Bond program for affordable multifamily housing.

Strategy Measure: *Number of households assisted through the Mortgage Revenue Bond program.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
3,500	3,127	89%	3,500

GOAL 2: TDHCA WILL PROMOTE IMPROVED HOUSING CONDITIONS FOR EXTREMELY LOW, VERY LOW, AND LOW INCOME HOUSEHOLDS BY PROVIDING INFORMATION AND TECHNICAL ASSISTANCE.

***2.1 Strategy:** Provide information and technical assistance to the public through the Division of Policy and Public Affairs.

Strategy Measure: *Number of information and technical assistance requests completed.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
5,400	5,005	93%	5,400

2.2 Strategy: To provide technical assistance to colonias through field offices.

***(A) Strategy Measure**: Number of on-site technical assistance visits conducted annually from the field offices.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
600	1,326	221%	600

****(B) Strategy Measure:*** *Number of colonia residents receiving assistance.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
1,700	918	54%	1,700

****(C) Strategy Measure:*** *Number of entities and/or individuals receiving informational resources.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
1,200	1,279	106.6%	1,200

GOAL 3: TDHCA WILL IMPROVE LIVING CONDITIONS FOR THE POOR AND HOMELESS AND REDUCE THE COST OF HOME ENERGY FOR VERY LOW INCOME TEXANS.

3.1 Strategy: Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.

(A) Strategy Measure*: Number of persons assisted through homeless and poverty related funds.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
440,000	549,162	125%	440,000

(B) Strategy Measure*: Number of persons assisted that achieve incomes above poverty level.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
2,000	1,658	83%	2,000

(C) Strategy Measure: *Number of shelters assisted through the Emergency Shelter Grant Program.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
70	76	109%	70

3.2 Strategy: Administer the state energy assistance programs by providing grants to local organizations for energy related improvements to dwellings occupied by very low income persons and for assistance to very low income households for heating and cooling expenses and energy related emergencies.

(A) Strategy Measure: *Number of households assisted through the Comprehensive Energy Assistance Program.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
63,200	86,988	138%	63,200

(B) Strategy Measure: *Number of dwelling units weatherized through the Weatherization Assistance Program.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
4,800	3,904	81%	4,800

GOAL 4: TDHCA WILL ENSURE COMPLIANCE WITH THE TEXAS DEPARTMENT OF HOUSING AND COMMUNITY AFFAIRS' FEDERAL AND STATE PROGRAM MANDATES.

4.1 Strategy: The Portfolio Management and Compliance Division will monitor and inspect for Federal and State housing program requirements.

***(A) Strategy Measure:** *Total number of monitoring reviews conducted.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
4,700	5,504	117.1%	4,554

(B) Strategy Measure: *Total number of units administered.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
227,195	232,067	102.1%	237,195

4.2 Strategy: The Portfolio Management and Compliance Division will administer and monitor federal and state subrecipient contracts for programmatic and fiscal requirements.

***(A) Strategy Measure:** *Total number of monitoring reviews conducted.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
10,725	13,409	125%	9,220

(B) Strategy Measure: *Number of contracts administered.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
400	443	110.8%	350

GOAL 5: to protect the public by regulating the manufactured housing industry in accordance with state and federal laws.

5.1 Strategy: Provide titling and licensing services in a timely and efficient manner.

(A) Strategy Measure: *Number of manufactured housing statements of ownership and location issued.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
89,000	106,138	119%	89,000

(B) Strategy Measure: *Number of licenses issued.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
4,435	4,075	92%	4,435

5.2 Strategy: Conduct inspections of manufactured homes in a timely manner.

(A) Strategy Measure: *Number of routine installation inspections conducted.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
8,000	5,103	64%	8,000

****(B) Strategy Measure:*** *Number of non-routine installation inspections conducted.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
2,500	1,894	75.76%	2,500

5.3 Strategy: To process consumer complaints, conduct investigations, and take administrative actions to protect the general public and consumers.

Strategy Measure: *Number of complaints resolved.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
1,700	1,002	59%	1,700

Goals Six through Eight are established in legislation as riders to TDHCA's appropriations, as found in the General Appropriations Act.

GOAL 6: TDHCA will target its housing finance programs resources for assistance to extremely low income households.

6.1 Strategy: The housing finance divisions shall adopt an annual goal to apply $30,000,000 of the division's total housing funds toward housing assistance for individuals and families earning less than 30 percent of median family income.

Strategy Measure: *Amount of housing finance division funds applied towards housing assistance for individuals and families earning less than 30 percent of median family income.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
$30,000,000	$28,660,669	95.54%	$30,000,000

(See Rider 4 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.)

GOAL 7: TDHCA will target its housing finance resources for assistance to very low income households.

7.1 Strategy: The housing finance divisions shall adopt an annual goal to apply no less than 20 percent of the division's total housing funds toward housing assistance for individuals and families earning between 31 percent and 60 percent of median family income.

Strategy Measure: *Percent of housing finance division funds applied towards housing assistance for individuals and families earning between 31 percent and 60 percent of median family income.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
20%	52.7%	263.38%	20%

(See Rider 4 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.)

GOAL 8: TDHCA will provide contract for deed conversions for families who reside in a colonia and earn 60 percent or less of the applicable area median family income

8.1 Strategy: Help colonia residents become property owners by converting their contracts for deed into traditional mortgages.

Strategy Measure: *Amount of TDHCA funds applied towards contract for deed conversions for colonia families earning less than 60 percent of median family income.*

FY 2006-2007 Measure	FY 2006 Actual	% of Goal	FY 2006-2007 Measure
$4,000,000	$4,684,300	117.1%	$4,000,000

(See Rider 11 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.)

The following TDHCA-designated goal addresses the housing needs of persons with special needs.

GOAL 9: TDHCA will work to address the housing needs and increase the availability of affordable and accessible housing for persons with special needs Through Funding, research, and policy development efforts.

9.1 Strategy: Dedicate no less than 20 percent of the HOME project allocation for applicants that target persons with special needs.

Strategy Measure: *Percent of the HOME project allocation awarded to applicants that target persons with special needs.*

2006 Measure	2006 Actual	% of Goal	2007 Measure
≥20%	24%	120%	≥20%

9.2 Strategy: Compile information and accurately assess the housing needs of and the housing resources available to persons with special needs.

Strategy Activities:

- Assist counties and local governments in assessing local needs for persons with special needs
- Work with State and local providers to compile a statewide database of available affordable and accessible housing.
- Set up a referral service to provide this information at no cost to the consumer.
- Promote awareness of the database to providers and potential clients throughout the State through public hearings, the TDHCA web site as well as other provider web sites, TDHCA newsletter, and local informational workshops.

9.3 Strategy: Increase collaboration between organizations that provide services to special needs populations and organizations that provide housing.

Strategy Activities:

- Promote the coordination of housing resources available among State and federal agencies and consumer groups that serve the needs of special needs populations.
- Continue working with agencies, advocates, and other interested parties in the development of programs that will address the needs of persons with special needs.
- Increase the awareness of potential funding sources for organizations to access, to serve special needs populations, through the use of TDHCA planning documents, web site, and newsletter.

9.4 Strategy: Discourage the segregation of persons with special needs from the general public.

Strategy Activities:

- Increase the awareness of the availability of conventional housing programs for persons with special needs.
- Support the development of housing options and programs, which enable persons with special needs to reside in noninstitutional settings.

9.5 Strategy: Issue a Notice of Funding Availability (NOFA), separate from the regular HOME TBRA activity funding, which provides up to $2 million for tenant based rental assistance directed to assist persons with disabilities. This NOFA will indicate that the recipients must meet the Texas State definition used by the Promoting Independence Advisory Board. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement.

Strategy Measure: Amount of HOME project allocation awarded through a NOFA to provide TBRA assistance to persons with disabilities.

2006 Measure	2006 Actual	% of Goal	2007 Measure
Not Applicable	Not Applicable	Not Applicable	$2 million

9.6 Strategy: Issue a NOFA, separate from the regular HOME HBA and OCC activity funding, that provides up to $2 million for homebuyer assistance and owner occupied rehabilitation to assist persons with disabilities. Recognizing that there are additional costs associated with assisting persons with disabilities, this NOFA will include the potential to increase the maximum application amount above that of the general HBA and OCC activity funding. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement.

Strategy Measure: Amount of HOME project allocation awarded through a NOFA to provide HBA and OCC assistance to persons with disabilities.

2006 Measure	2006 Actual	% of Goal	2007 Measure
Not Applicable	Not Applicable	Not Applicable	$2 million

SECTION 5: PUBLIC PARTICIPATION

TDHCA strives to include the public in policy, program, and resource allocation decisions that concern the Department. This section outlines how the public is involved with the preparation of the plan and a summary of public comment.

PREPARATION OF THE PLAN

Section 2306.0722 of the Texas Government Code mandates that the Department meet with various organizations concerning the prioritization and allocation of the Department's housing resources prior to preparation of the Plan. As this is a working document, there is no time at which the Plan is static. Throughout the year, research was performed to analyze housing needs across the state, focus meetings were held to discuss ways to prioritize funds to meet specific needs, and public comment was received at program-level public hearings as well as at every Governing Board meeting.

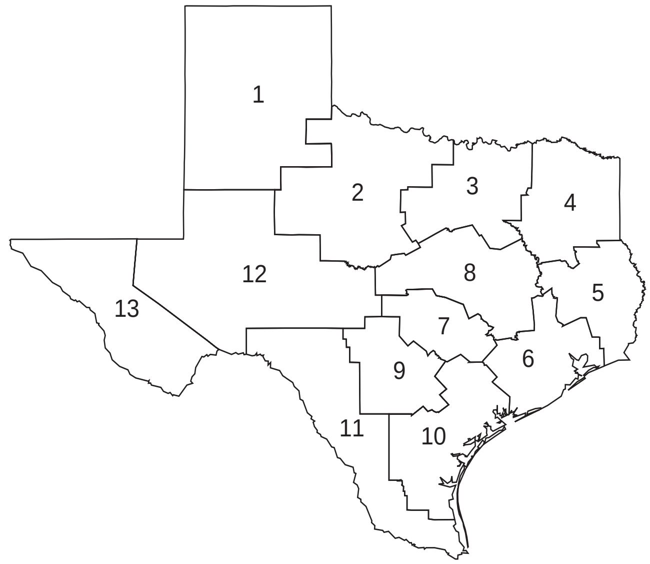
The Department met with various organizations concerning the prioritization and allocation of the Department's resources, and all forms of public input were taken into account in its preparation. Several program areas conducted workgroups and public hearings in order to receive input that impacted policy and shaped the direction of TDHCA programs.

Communication between TDHCA and numerous organizations results in a participatory approach towards defining strategies to meet the diverse affordable housing needs of Texans. In March 2006, TDHCA mailed out the 2006 Community Needs Survey to approximately 2,500 state representatives and senators, mayors, county judges, city managers, housing/planning departments, USDA local offices, public housing authorities, councils of governments, community action agencies, and Housing Opportunities for Persons with AIDS (HOPWA) agencies to gather preliminary input on local perceptions of housing, community affairs, and community development needs. TDHCA uses this input when preparing the Plan and in program planning and development.

PUBLIC HEARINGS

From July to September 2006, TDHCA worked on the draft version of the *2007 State of Texas Low Income Housing Plan and Annual Report.* Once completed, the draft was submitted to the TDHCA Board of Directors at the August 30, 2006, board meeting for approval, and then released for public comment in accordance with §2306.0732 and §2306.0661. The hearing notice was published in the September 1, 2006, edition of the *Texas Register*.

The formal citizen participation process for the *2007 State of Texas Low Income Housing Plan and Annual Report* will begin September 13, 2006, and end October 12, 2006. Constituents are encouraged to give input regarding the Plan and all Department programs in writing or at one of the 13 public hearings to be held across the state, one in each of the 13 Uniform State Service Regions.



Reg. 1: Panhandle Regional Planning Commission,
3rd Floor Conference Room
415 W. 8th St., Amarillo

Each public hearing will address the Plan, as well as the following topics:

- 2007 State of Texas Consolidated Plan: One-Year Action Plan
- TDHCA Compliance Monitoring Policies and Procedures
- Energy Assistance Rules
- Community Services Block Grant Rules
- Emergency Shelter Grants Program Rules
- Housing Tax Credit (HTC) Qualified Allocation Plan and Rules (QAP)
- Housing Trust Fund (HTF) Program Rules
- Multifamily Bond Program Rules
- HOME, HTC, and HTF Affordable Housing Needs Score
- HOME, HTC, and HTF Regional Allocation Formula
- TDHCA Underwriting, Market Analysis, Appraisal, Environmental Site Assessment, Property Condition Assessment, and Reserve for Replacement Rules and Guidelines
- Comments on the Plan and all TDHCA programs may also be submitted in writing:

PUBLIC COMMENT

The only comments on the SLIHP related to programming of TDHCA HOME funds. A summary of these comments and the Staff's reasoned responses are below provided. The names and organizations that provided comment are provided in Table A.1 Commenter Information at the end of this section.

1. HOME Program Funding Amount for Applicants Serving Persons with Disabilities Are Unacceptable

Numerous people provided comment that the programming of the 2007 HOME funds does not set aside a minimum of 5%, approximately $2,225,000, of TDHCA's annual allocation for applicants serving persons with disabilities. Also, there is a concern that the Department is not continuing to set aside $500,000 solely for Home of Your Own (HOYO) Program activities. Concern was also voiced over the removal of the HOME Olmstead Tenant Based Rental Assistance (TBRA) program from the SLIHP two years ago. Extensive and passionate comment was provided that all of these funds needed to be restored or increased and that the Department was not adequately serving the disability community's needs.

Staff Response: The following changes are being recommended.

1. Staff recommends increasing the amount of funds dedicated to applicants serving persons with disabilities from $750,000 as originally proposed to $4 million. Based on the Department's statute, these funds will be regionally allocated and available through competitive grant acquisition processes. This will be done through the following strategies.

> *"9.5 Strategy: Issue a Notice of Funding Availability (NOFA), separate from the regular HOME TBRA activity funding, which provides up to $2 million for tenant based rental assistance directed to assist persons with disabilities. This NOFA will indicate that the recipients must meet the Texas State definition used by the Promoting Independence Advisory Board. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement.*
>
> *9.6 Strategy: Issue a NOFA, separate from the regular HOME HBA and OCC activity funding, that provides up to $2 million for homebuyer assistance and owner occupied rehabilitation to assist persons with disabilities. Recognizing that there are additional costs associated with assisting persons with disabilities, this NOFA will include the potential to increase the maximum application amount above that of the general HBA and OCC activity funding. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement."*

These strategies will provide a variety of applicants, including HOYO, an opportunity to serve persons with disabilities across the state while fulfilling TDHCA's statutory responsibility to allocate HOME funding according to the regional allocation methodology required by Texas Government Code §2306.111.

The ability to use HOME funding in the larger metropolitan areas of the State is governed by Section 2306.111(c) of the Texas Government Code as shown below:

"c) In administering federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. Section 12701 et seq.), the department shall expend at least 95 percent of these funds for the benefit of non-participating areas that do not qualify to receive funds under the Cranston-Gonzalez National Affordable Housing Act directly from the United States Department of Housing and Urban Development. All funds not set aside under this subsection shall be used for the benefit of persons with disabilities who live in areas other than non-participating areas."

Because much of the State's housing need for persons with disabilities is found in Participating Jurisdictions (PJs), to maximize the success of the above described NOFAs, the Department will limit all awards in PJs to those two activities. No other HOME activities will be eligible to apply in a PJ. Additionally, the Department is committed to providing technical assistance to any applicant or awardee to enhance their program delivery and build capacity.

2. TDHCA Is Not Committed to Providing Assistance for the Olmstead Population

Numerous people commented that the Department is no longer committed to serving the Olmstead population because funds specifically targeted for this purpose were removed from the SLIHP two years ago. The Olmstead Supreme Court decision maintained that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the Americans with Disabilities Act (ADA). Further comment stated tenant based rental assistance is a critical component in helping transition persons from institutions into communities.

Staff Response: For Program Year 2004, TDHCA specifically dedicated $2,000,000 under the Set Aside for Olmstead Populations. The Department eliminated this set aside in 2005 due to low expenditure rates. However, staff acknowledges the importance of serving this need as well as the challenges inherent with administering this complex activity which may have affected the use of funds from the set aside. Therefore, as noted in item "1" above, the Department will publish a Notice of Funding Availability (NOFA), separate from the general HOME TBRA activity funding. This NOFA will provide up to $2 million for TBRA directed to assist persons with disabilities meeting the Texas State definition used by the Promoting Independence Advisory Board. To ensure that these funds are utilized, staff will seek recommendations from the Disability Advisory Workgroup as well as the disability stakeholder community at large in drafting the NOFA to improve program efficiency and expenditure rates. Funding awards associated with this activity will allow up to 6 percent administration costs with no match requirement.

3. Clarifying Sections of the SLIHP that Reflect Efforts to Assist Persons with Special Needs

From reviewing the public comment, it appears that sections of the SLIHP that relate to TDHCA's efforts to provide assistance to persons with special needs could be clarified. As the resulting changes involve multiple relatively minor revisions in narrative and do not relate to specific public comments, these changes are not shown below. However, they are shown as blackline changes in Attachment B - Summary of Substantive Changes from the Draft 2007 SLIHP.

4. Percentage Allocation of HOME Single Family Activities

Numerous people and organizations protested the reduction of the Home Buyer Assistance (HBA) activity from 20% of the available single family activity funds in PY 2006 to 10% in PY 2007. In summary, the following comments were provided. (125-157)

a) Reducing the amount of funding for HBA will result in fewer applicants because when the approximate $2.26 million is divided amongst the 13 state service regions the available amount yields an average of $174,000 or 17 homebuyer loans per Region.

b) Comment expressed a specific need for, and interest in applying for, HBA funds in the future. For example, letters were received from nine Habitat for Humanity organizations that explained that they need the funds to provide HBA in their community.

c) The changes in the percentage distribution are unnecessary as it only limits the ability of TDHCA to respond to programmatic demand and market forces in the future.

d) If the goal of the proposed change is to get more funding into OCC, this change is not necessary because if TBRA or HBA activity funding in a particular region is under subscribed, then the remaining funds will be used for OCC awards within that region.

e) With the recent and untried change from issuing OCC assistance as grant to a deferred forgivable or zero interest loan, moving more funding to OCC at this time seems premature.

f) The HBA activity is the only HOME single family program that leverages significant private sector investment and creates new properties to enhance the local and state tax base. For every HBA household served at $10,000, the program leverages private mortgages for the remaining cost of the home. On the other hand, the OCC program rehabilitates or rebuilds a home up to $55,000 with no additional private sector investment.

g) The HBA program can leverage homeownership for more families. For every OCC household served, approximately 5.5 families can be helped with HBA assistance.

Staff Response: After reviewing the public comment, staff is recommending that the HBA percentage should be increased from 10 percent to 15 percent, which is the same level as TBRA. It should be noted that HBA's percentage of the single family activity funds could eventually exceed 15 percent based on the amount of additional HBA activity associated with the proposed NOFA for HBA and OCC assistance for persons with disabilities.

SECTION 6: COLONIA ACTION PLAN

POLICY GOALS

In 1996, in an effort to place more emphasis on addressing the needs of colonias, the TDHCA Office of Colonia Initiatives (OCI) was established to administer and coordinate efforts to enhance living conditions in colonias along the Texas-Mexico border region. OCI's fundamental goal is to improve the living conditions and lives of colonia residents, and to educate the public regarding the services that TDHCA has to offer.

The OCI Division was created to do the following:

- Expand housing opportunities to colonia and border residents living along the Texas-Mexico border.
- Increase knowledge and awareness of programs and services available through the Department.
- Implement initiatives that promote improving the quality of life of colonia residents and border communities.
- Empower and enhance organizations in order to better serve the targeted colonia population.
- Provide consumer education to colonia and border residents.
- Develop cooperative working relationships between other state, federal, and local organizations to leverage resources and exchange information.
- Promote comprehensive planning of communities along the Texas-Mexico border to meet current and future community needs.
- Serve as a conduit for colonia residents by soliciting input into major funding decisions that will affect border communities.

OVERVIEW

The US-Mexico border region is dotted with hundreds of rural subdivisions characterized by high levels of poverty and substandard living conditions. These communities are commonly called "colonias." Some colonias are newly formed, but many have been in existence for over 40 years. A few colonia developments began as small communities of farm laborers employed by a single rancher or farmer while others originated as town sites established by land speculators as early as the 1900s. However, a majority of the colonias emerged in the 1950s as developers discovered a large market of aspiring homebuyers who could not afford homes in cities or access to conventional financing mechanisms.

Several different definitions of colonias are used by various funding sources and agencies due to differing mandates. Generally, these definitions include the concepts that colonias are rural, mostly unincorporated communities principally located along the US-Mexico border in the states of California, Arizona, New Mexico, and Texas (with the vast majority located in Texas). Colonias frequently exhibit high poverty rates and substandard living conditions relative to US standards; however, colonias are primarily defined primarily by what they lack, including services such as public water and wastewater systems, paved streets, drainage, and safe and sanitary housing.

POPULATION AND POVERTY

Data updated in 2006 by the Texas Office of the Attorney General recorded 2,060 colonias in 30 counties within 150 miles of the Texas-Mexico border; however, approximately 1,700 of those colonias are concentrated in just seven counties directly abutting the international boundary. It should be noted that these figures represent only the documented colonias; there may be many small, rural colonias that have, as of yet, gone unidentified. Currently, Hidalgo County has the largest group of colonias, at 847 known colonias for 2006. From US Census data, counties representing the largest colonia populations (El Paso, Starr, Hidalgo, and Cameron) also have Hispanic or Latino groups of over 88 percent; the state average is at 34.6 percent. The 13 counties running along the Texas-Mexico border have an average Hispanic or Latino population of 74.2 percent.

According to 2000 US Census records, the population of counties representing the largest amount of colonias had an estimated 1,890,505 persons. 2005 estimations show an increase of 237,869 for these counties elevating the population to 2,128,374. El Paso, Maverick, Webb, Zapata, Starr, Hidalgo, and Cameron counties have shown an increase in population of 12.3 percent, which surpasses the state average increase of 9.6 percent. A 5.4 percent average decrease in population has actually occurred in several counties that are adjacent to the border counties over the same time period. Counties experiencing large decreases include Hudspeth, Reeves, Pecos, Terrell, Edwards, Kinney, Duval, Jim Hogg, and Brooks.[90]

US Census data for the 2003 median household income for Texas was $39,967, while the median household income for the Texas-Mexico border averaged $26,606 based on county averages for Texas. Zavala County had the lowest median household income of $18,553 while Collin County (Northeast Texas) had the highest median household income of $74,136. Of the larger border cities such as El Paso, McAllen, Brownsville, Corpus Christi, and Laredo, the 2000 average median values of owner-occupied housing units was $69,640 with Laredo presenting the highest values at $77,900.[2]

Affordable housing has been hard to come by in the Border region mainly because the rapidly growing population still remains poor. Counties running along the Texas-Mexico border account for some of the highest poverty rates in the state and in some counties are double than the state average rate for 2003. According to US Census data, in 2003, the state average rate for persons below poverty was 16.2 percent, while the average poverty

[90] U.S. Census Bureau: State and County Quickfacts. http://quickfacts.census.gov/qfd/states/48000.html (Viewed July 27, 2006).
[2] U.S. Census Bureau: State and County Quickfacts. http://quickfacts.census.gov/qfd/states/48000.html. Viewed July 27, 2006.

level of counties running along the Texas-Mexico border was at 25.3 percent. Counties with the highest amount of colonias (El Paso, Starr, Hidalgo, and Cameron) however, show averaged poverty levels at 31.5 percent--a doubling of the state poverty rate. Counties like Dimmit and Starr, at 32.7 percent and 36.2 percent respectively, are even higher. While there are many pockets of poverty throughout Texas, no other counties in Texas show countywide poverty rates as high as those along the Texas-Mexico border.

HOUSING

According to a review completed by the Texas Comptroller's Office, most builders would have a difficult time building houses for a sale price of less than $60,000 to $70,000. Houses in this price range would typically be affordable to workers earning $12 to $14 an hour (assuming a housing debt to income ratio of 33 percent with no additional debts). Some homebuilders indicate that it is difficult to build lower-priced homes because many of the construction costs, including the cost of acquisition and site development, are fixed, regardless of the size of the home.[3] Land acquisition and development can add $10,000 to $20,000 to the cost of a house. For a new subdivision, the acquisition cost may be only a few thousand dollars per lot. But the 1998 cost of infrastructure—such as streets, power, and water—could be as much as $15,000 per lot or higher in some areas.[4]

Owner construction in colonias can face significant obstacles. First, federal rules, such as those that govern the HOME Program, prohibit the use of affordable housing funds to acquire land unless the affordable structure is to be built within a short, sometimes impractical time. Second, lenders are typically reluctant to lend funds for owner construction because there is no collateral. Third, owner builders may not be sufficiently skilled and may end up building substandard housing without appropriate supervision or guidance. Some governmental housing programs limit the private housing market from serving border residents because they offer no profit incentive for housing professionals, builders, lenders, and real estate agents to serve low-wage workers. Program administrators acknowledge profit as an ingredient in encouraging home construction.

ACTION PLAN

TDHCA, through its Office of Colonia Initiatives, administers various programs designed to improve the lives of colonia residents. This action plan outlines how carious initiatives and programs will be implemented for 2006-2007.

[4] Bordering the Future: House Prices Reflect Production Costs. Window on State Government. Texas Comptroller of Public Accounts. July 1998. Interview with Clark Wilson Homebuilders, Nov. 20, 1997.

TEXAS BOOTSTRAP LOAN PROGRAM

The Texas Bootstrap Loan Program is a statewide loan program that funds certified nonprofit organizations and enables owner-builders to purchase real estate, and construct or renovate a home. The 77th Legislature amended this program under Senate Bill 322 (2001) with a legislative directive requiring continuation of an Owner Builder Loan Program through 2010.

In accordance with Section 2306.753(d) of the Texas Government Code, Title 10, as amended, the Department shall set aside at least two-thirds of the available funds for owner-builders whose property is located in an Economically Distressed Area Program (EDAP) county, as defined under Subchapter K, Chapter 17, Water Code. The remainder of the funding will be available to the Department certified nonprofit Owner-Builder Housing Programs in the State of Texas. The maximum amount of funding per organization will be $600,000.

The program promotes and enhances homeownership for low income Texans by providing funds to purchase or refinance real property on which to build new residential housing, construct new residential housing or improve existing residential housing throughout Texas. Participating owner-builders must provide a minimum of 60 percent of the labor required to build or rehabilitate the home. Total loans from the Department and from other entities cannot exceed $60,000 per unit. The Department committed over $8.4 million over the biennium (FY 2006-2007) to implement this initiative from the Housing Trust Fund. TDHCA anticipates releasing another NOFA in the amount of $6,000,000 for FY 2008-2009 in August 2007.

CONTRACT FOR DEED CONVERSION PROGRAM

The Contract for Deed Conversion (CFD) Program is designed to help colonia residents become property owners by converting their contracts for deeds into warranty deeds. Participants in the program must not earn more than 60 percent of the area median family income, and the property must be their primary residence. The properties proposed for this initiative must be located in a colonia as identified by the Texas Water Development Board colonia list or meet the Texas Department of Housing and Community Affairs' definition of a colonia. By converting contracts for deed into traditional mortgages, this program enables colonia residents to build equity in their homes.

The 79th Legislature passed a Rider 11 to the Department's appropriation in the General Appropriations Act requiring the Department to spend no less than $4 million and convert no less than 400 contracts for deeds into warranty deeds for the biennium September 1, 2005 through August 31, 2007. The Department cannot meet the 400 required contracts for deed conversions due to the amount and source of funding dedicated to this program. The Department utilizes the HOME Investment Partnerships Program as the source of funds to finance the CFD program. HOME Program rules and regulations also require the home to meet a certain standard, which requires additional funds. The Department estimates approximately 73 conversions will be achieved with the $4 million due to the cumulative cost of each conversion approximating $20,000 with an additional $35,000 in owner-occupied housing rehabilitation to meet, at a minimum, Colonia Housing Standards. In order to meet this legislative mandate, the Department will need to set aside approximately $20,000,000 of HOME funds to meet this mandate, which represents approximately half of the total annual HOME allocation to the Department.

For FY 2007, the Department will set aside $2 million from the HOME Program and anticipates releasing a NOFA in fall 2007. Units of general local government, public housing authorities, and nonprofit organizations are eligible entities to apply to provide deferred forgivable loans or grant funds to eligible colonia residents to achieve the goals of the CFD program.

COLONIA SELF-HELP CENTERS

In 1995, the 74th Legislature passed Senate Bill 1509 (Texas Government Code Subchapter Z §2306.581 - §2306.591), a legislative directive to establish colonia self-help centers (SHCs) in Cameron/Willacy, Hidalgo, Starr, Webb, and El Paso counties. This program also allows the Department to establish a colonia SHC in any other county if the county is designated as an economically distressed area. Five colonias in each county are identified to receive concentrated attention from its respective SHC. Operation of the colonia SHCs is carried out through a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the ability to carry out the functions of a SHC.

These colonia SHCs provide concentrated on-site technical assistance to low and very low income individuals and families in a variety of ways including housing, community development activities, infrastructure improvements, outreach, and education. In addition, on-site technical assistance is provided to colonia residents. Key services to the designated colonias within each county receive technical assistance in the areas of housing rehabilitation; new construction; surveying and platting; construction skills training; tool library access for self-help construction; housing finance; credit and debt counseling; grant writing; infrastructure constructions and access; contract for deed conversions; and capital access for mortgages to improve the quality of life for colonia residents in ways that go beyond the provision of basic infrastructure. The three OCI border field offices provide technical assistance to the counties and SHC.

The SHC program serves 28 colonias in the five counties designated by statute and two additional counties of Maverick and Val Verde. Each county has approximately 10,000 colonia residents whom qualify as beneficiaries of these services. County officials conduct a needs assessment to prioritize needs within the colonias and publish a Request for Proposal (RFP) to provide services as identified by organizations in the county. Nonprofits in the county respond to the RFP, and in addition, the nonprofits and colonia residents also recommend to the county which colonias should receive services in each county. Each

SHC is allocated sufficient funds to provide services within the designated colonias, and if applicable can provide limited assistance outside the service area. The Department contracts with the counties that subcontract with nonprofit organizations to administer the SHC program. The county oversees their implementation of contractual responsibilities and insures accountability.

The operations of the colonia SHCs are funded by HUD through the Texas Community Development Block Grant Program 2.5 percent colonia set-aside, which is approximately $2.2 million per year. The CDBG funds are transferred to the Department through a memorandum of understanding with the Office of Rural Community Affairs. CDBG funds can only be provided to eligible units of general local governments; therefore, the Department must enter into a contract with each affected county government. The Department provides administrative and general oversight to ensure programmatic and contract compliance to meet legislative intent. The Department maintains a relationship with the unit of general local government and SHC operator(s) to ensure that the housing and community development activities within each respective contract are achieved. In addition, colonia SHCs are encouraged to seek funding from other sources to help them achieve their goals and performance measures.

This legislation also requires the establishment of a Colonia Resident Advisory Committee (C-RAC) to advise the Department on the needs of colonia residents, activities to be provided, and programs to be undertaken in the selected colonias. Each county selects two colonia residents to serve on the committee; one of the two residents must reside in a colonia being serviced by the SHC. The Department's board of directors appointed the current members to the C-RAC on September 19, 2001, and the committee includes a primary and secondary representative from each county. The C-RAC members meet 30 days prior to making an award to a colonia SHC. The Colonia Resident Advisory Committee (C-RAC) has been instrumental in voicing the concerns of the targeted populations and has helped both the Department and the colonia SHCs to develop useful tools and programs to address colonia resident needs. Most recently, the Department has assisted the Texas Secretary of State to coordinate meetings with the C-RAC to address concerns of the colonias as mandated by Senate Bill 1202. The Department is also updating the MITAS and Central Data Systems to track funding in the colonias as mandated by Senate Bill 827.

BORDER FIELD OFFICES

OCI manages three border field offices located in El Paso, Laredo, and Edinburg. These border field offices administer, at the local level, various OCI programs and services and provide technical assistance to nonprofits, for profits, units of general local government, other community organizations and colonia residents along the Texas-Mexico border region. Current funding for the border field offices is partially funded from General Revenue, Bond Funds, and the HOME and CDBG programs. OCI will continue to maintain these three border field offices and will continue to act as a liaison between nonprofit organizations and units of local government.

Occasionally, there is funding available to communities and organizations in the colonias to support local programs. Technical assistance will be produced to assist nonprofit organizations to locate funding and, once the funding is identified, assistance on how to write a successful grant proposal will also be provided. However, the most important aspect in seeking funding is the ability of the communities or organizations to manage the funding within its rules and program guidelines. Many communities and organizations struggle to deliver service to its colonia residents due to capacity and financial issues, therefore, the Border Field Offices anticipate approximately 700 technical assistance visits for FY 2007 to nonprofit organizations and units of local government.

The Department recognized the need for consumer education topics such as filing homestead exemptions, knowing their property rights under contract for deed, and homeownership counseling. The Department will provide homebuyers under its Contract for Deed Conversion and Texas Bootstrap Loan Programs a form to file their homestead exemption at the time of closing on their homes. The Department will create an educational campaign regarding House Bill 1823, which was passed during the 79th Regular Legislative Session (2005) and allows residential contract for deed buyers to have their contacts converted from a deed to a deed in trust. The educational campaign will be directed to colonia residents along the Texas-Mexico Border Region. Education services are available through the colonia SHCs and OCI Border Field Offices.

CONCLUSION

Border Texans choose life in colonias because they want what other Texans want—to live the "American Dream" and have a home they can call their own—and they will make tremendous sacrifices to accomplish this goal. In steadfast pursuit of their dreams, colonia residents sometimes have fallen victim to unscrupulous developers. Household by household, family by family, colonia residents demonstrate an admirable and extremely practical commitment to making a home.

According to Adam Carasso, "no asset is more important in achieving these objectives than owner-occupied housing. Home equity is the primary source of private saving for most-middle income households, exceeding both retirement plans and savings accounts." While 69 percent of all households are headed by homeowners, a record high reached in 2004, many low income populations are left out. Only half of the households in the lowest fifth of the income scale are homeowners, and the homeownership rates among both Blacks and Hispanics are slightly under 50 percent.[9]

[9] Carraso, Adam., Bell, Elizabeth., Olsen, Edgar O., Steuerle, Eugene C. Improving Homeownership among Poor and Moderate-Income Households. The Urban Institute. No.2. June 2005.

While the effort to increase affordable housing has been successful so far, the issues surrounding border colonias and their residents still persist. The Department continues to work with various organizations, units of local government, state and federal agencies to provide every possible mean available to assist residents in the colonias. TDHCA housing programs have helped fuel the Texas economy. According to the National Association of Home Builders, estimations from the building of 100 single-family homes generates 250 full-time jobs in construction and construction-related industries, $11.6 million in local income, and $1.4 million in taxes and other revenue for local government.[6]

SECTION 7: TEXAS STATE AFFORDABLE HOUSING CORPORATION ANNUAL ACTION PLAN

In accordance with Section 2306.0721(h), the Texas State Affordable Housing Corporation (TSAHC) Annual Action Plan is included in the 2006 SLIHP.

Sec. 2306.566 of the Texas Government Code reads:

COORDINATION REGARDING STATE LOW INCOME HOUSING PLAN.

a) *The corporation shall review the needs assessment information provided to the corporation by the department under Section 2306.0722(b).*
b) *The corporation shall develop a plan to meet the state's most pressing housing needs identified in the needs assessment information and provide the plan to the department for incorporation into the state low income housing plan.*
c) *The corporation's plan must include specific proposals to help serve rural and other underserved areas of the state.*

OVERVIEW

This report is prepared in accordance with SB 284, Legislative 78th Session, which requires the Texas Department of Housing and Community Affairs ("TDHCA") and the Texas State Affordable Housing Corporation ("Corporation") to coordinate regarding the State Low Income Housing Plan ("SLIHP"). The bill amends Section 2306.0722(b) to require TDHCA to provide the needs assessment information compiled for the report and plan to the Corporation. Section 2306.566 is added to require the Corporation to then review the information and develop a plan to meet "the state's most pressing housing needs identified in the needs assessment information" and provide the plan to TDHCA for incorporation into the resource allocation plan in the SLIHP. The Corporation's plan must include specific proposals to help serve rural and other underserved areas of the state. The bill also adds Section 2306.0721(h) to require TDHCA to incorporate the specific results of the Corporation's programs in TDHCA's estimate and analysis of housing supply in each uniform state service region under Section 2306.0721(c)(9).

HISTORY OF THE CORPORATION

The Texas State Legislature created the Corporation as a self-sustaining non-profit entity to facilitate the provision of affordable housing for low income Texans who do not have comparable housing options through conventional financial channels. Enabling legislation, as amended, may be found in the Texas Government Code, Chapter 2306, Subchapter Y, Sections 2306.551 et seq. All operations of the Corporation are conducted within the state of Texas. Corporate offices are located in Austin, Texas. A five-member board of directors appointed by the Governor with the advice and consent of the Senate oversees the business of the Corporation.

The Corporation issues mortgage revenue bonds and private activity bonds to finance the creation of affordable multifamily housing units, and to finance the purchase of single family homes under three separate programs: (1) the Professional Educators Home Loan Program, (2) the Fire Fighter and Law Enforcement or Security Officer Home Loan Program, and the newest program, (3) the Nursing Faculty Home Loan Program. Since April 2001, the corporation has issued over $125 million in single family and approximately $500 million multifamily mortgage revenue bonds. To date, the Corporation has provided over 8,362 units of affordable multifamily housing to low income Texans. The Corporation has also served 1190 income eligible individuals and/or families through its single family first-time homebuyer programs. This affordable housing has been provided at no cost to the state and its taxpayers. The Corporation does not receive any state funding, and is not subject to the legislative appropriations process.

The Corporation is organized, operated, and administered in accordance with its enabling legislation as a 501(c)(3) nonprofit corporation in order to access additional sources of funding to accomplish its mission. The Corporation is an approved originating seller/servicer for single family loans with Fannie Mae, Freddie Mac, Ginnie Mae, U.S. Rural Development, FHA, and VA. The Corporation has conduit sales agreements with Countrywide Home Loans, Inc., and Wells Fargo Funding, and with the Community Development Trust, Inc., for multifamily mortgage loans. The Corporation is also a non-member borrower of the Federal Home Loan Bank of Dallas.

NEEDS ASSESSMENT REVIEW

According to an analysis of the Texas Department of Housing and Community Affairs' (TDHCA) Needs Assessment and other published studies on the subject, the following represent the most pressing housing needs in the state.

GENERAL HOUSING NEEDS

By 2000, Texas had the second largest total population, 20.9 million, among the states in the United States. By 2010, the population is projected to be between 24.2 and 25.9 million and by 2040 between 35.0 and 50.6 million.[91]

As a result of the growing population, housing demands will change substantially in the coming years with both owner and renter housing growing at nearly equal rates.[92]

Affordable housing is in short supply for the extremely low, very low, low, and moderate income brackets, which was caused primarily by the private sector's concentration of

[91] Texas Department of Housing and Community Affairs, Center for Housing Research, Planning, and Communications, 2005 State of Texas Low Income Housing Plan and Annual Report (Austin, TX: Texas Department of Housing and Community Affairs, 2004).
[92] Texas A&M University, Center for Demographic and Socioeconomic Research and Education, *A Summary of the Texas Challenge in the Twenty-First Century: Implications of Population Change for the Future of Texas, 2002*.

development, both single family and multifamily development, in larger metropolitan areas and targeting higher income individuals and families.[93]

Many HUD-financed or HUD-subsidized properties, which represent a significant portion of the state's affordable housing portfolio, are at risk of becoming market rate properties.[94]

SINGLE FAMILY HOUSING NEEDS

Texas may add nearly 3.8 million more students over the next 40 years creating a high demand for educators.[95]

Population growth will mean increased public service demands and expanding markets for Texas.[96]

Lack of funds for down payment and closing costs has created one of the greatest obstacles that prevents first-time homebuyers of low-to-moderate-income families, such as the teachers, police officers, and firefighters, from achieving the American dream of owning a home.[97]

The Texas Education Code establishes a state minimum salary schedule that must be accommodated by all Texas schools for specific public education professionals. The state minimum salary for 2006-2007 ranges from $27,320 per year for 0 years experience to $44270 per year for 20 or more years of experience.[98]

A base salary for Texas police officers ranges from $35,544 per year to $53,569.[99]

A base salary for Texas firefighters ranges from $26,432 per year to $44,054. [100]

A base salary for Texas correctional officers ranges from $22,440 per year to $33,276.[101]

The Texas nursing education system is operating close to capacity and faces several impediments to producing more graduates—faculty shortages due to retirement, inadequate salaries, and fewer faculty applicants.[102]

MULTIFAMILY HOUSING NEEDS

Renter households are, on average, a lower income group than owner households. More than 37 percent of renter households earn less than 50 percent of the Area Median Family Income, compared to only 16.3 percent of owner households. As a result, renter households are more likely to be in need of housing assistance.[103]

According to the results of the 2003 Community Needs Survey distributed by TDHCA to cities, counties, local housing departments, public housing authorities, and the US Department of Agriculture/Rural Development field offices, approximately 78 percent of respondents felt that there was a severe or significant affordable housing problem in their area and that new rental housing development and the renovation of existing multifamily housing are more important than rental payment assistance.[104]

The lack of affordable housing opportunities leads to severe and extreme housing cost burdens for lower-income groups; in particular, extremely low-income renter households.[105]

Overcrowding may indicate a general lack of affordable housing in a community and lower income renter households experience overcrowded conditions more frequently than higher income households.[106]

In the 2005-2009 State of Texas Consolidated Plan, it is estimated that 2 million people or 9.9% of the total population are 65 years of age and older. The Texas Department of Aging and Disability Services estimates that by year 2040, individuals age 60 and over will comprise 23 percent of the population in Texas. Though the majority of the elderly Texans live in urban areas, rural areas have a higher percentage of elderly relative to the local population. According to the 2000 Census, 13.1 percent of seniors age 65 and over in Texas live below the poverty level. Approximately 30% of all elderly households pay more than 30% of their income on housing with 14% paying more than 50% of their income on housing. Lower incomes combined with rising healthcare costs contribute to the burden of paying for housing.[107]

There is a shortage of affordable housing in the extremely low, very low, low and moderate income brackets. This is primarily caused by the private sector's concentration of development in larger metropolitan areas and targeting higher income individuals and families.[108] Cities with populations between 20,000 and 50,000 have a particularly hard time

accessing funds. They cannot access USDA funding and are too small to effectively compete for other funding opportunities.[109]

According to the US Census Related Comprehensive Housing Affordability Strategy (CHAS) Data, there are approximately 2,903,671 people living in rural areas of Texas. Of these, 574,843 people or 20% are living below the poverty level; 83,454 low income households live with the cost burden of paying more than 30% of their income on housing expenses; 26,999 occupied units are "overcrowded"; and 5,211 units were found to have substandard conditions such as lack of piped water, utilities, and waste facilities.[110]

Preservation of existing affordable and subsidized housing stock is an important element of providing safe, decent and affordable housing. The explosive population growth in the metropolitan areas as well as the lack of new construction during the late 80's and early 90's created a huge demand for housing at all income levels. Adding to this problem is the loss of units in the federally subsidized Section 8 portfolio, the USDA/Rural Development portfolio and the pools of tax credit units that have reached their 15 year affordability periods. The USDA/Rural Development portfolio contains smaller rural rental properties which, in many cases, represent the sole affordable housing stock in Texas' smallest towns.[111]

As of the most recent statistical information available, there were 2,676,060 renter occupied housing units in Texas. Eighty-four percent of these were constructed before 1990 with the highest production of rental housing (50.8%) built between 1970 and 1989. Therefore, the majority of rental housing stock in Texas is between 15-35 years old and may be in need of some type of moderate to substantial rehabilitation in order to preserve its functionality.[112]

HURRICANE-AFFECTED AREA HOUSING NEEDS

Many Texas Gulf Coast residents were left with damaged or destroyed homes after Hurricane Rita came through the state. On Wednesday, December 21, 2005, the President signed into law, H.R. 4440, the "Gulf Opportunity Zone Act of 2005," to assist the Gulf Coast in its recovery from the past year's hurricane season. The Act defines three "GO Zones" for the areas hit by hurricanes Katrina, Rita, and Wilma.

According to the U.S. Census Bureau, the estimated population for the state of Texas in 2005 was 22,859,968. Of this figure, 5,416,433 live in the twenty-two designated targeted areas in the GO Zone. Areas designated as "targeted" include the following counties: Angelina, Brazoria, Chambers, Fort Bend, Galveston, Hardin, Harris, Jasper, Jefferson, Liberty,

Montgomery, Nacogdoches, Newton, Orange, Polk, Sabine, San Augustine, San Jacinto, Shelby, Trinity, Tyler, and Walker.

The Corporation will address these pressing housing needs through the following single family, multifamily, and grant programs for 2007. The following summary of Corporation programs gives the history and accomplishments of our programs to date and a plan for achieving greater success with these programs in 2007. A few of the programs mentioned are mandated by the state legislature, as noted, and a few have been undertaken upon the Corporation's own initiative to fulfill housing needs for identified underserved areas of the state.

TSAHC Program Descriptions

- **Texas Professional Educators Home Loan Program**
- **Texas Fire Fighter and Law Enforcement or Security Officer Home Loan Program**
- **Nursing Faculty Home Loan Program**
- **Home Sweet Texas Loan Program**

These Programs are the Corporation's Single Family Mortgage Revenue Private Activity Bond Programs. The first three Programs were established by the Legislature in 2001, 2003, and 2005, respectively, and allocate a total of $55 million of the State's Ceiling for Private Activity Bond Cap for the exclusive purpose of making single family mortgage loans to Texas Professional Educators ($25 million); Fire Fighters, Law Enforcement Officers, and Corrections Officers ($25 million); and Nursing Faculty ($5 million) who are first-time home buyers.

The Programs are available statewide on a first come, first-served basis, to first-time homebuyers who wish to purchase a newly constructed or existing home. Through each Program, eligible borrowers are able to apply for a 30 year fixed rate mortgage loan and receive 5 percent of the total loan amount as down payment assistance in the form of a grant. The programs are accessible to eligible borrowers by directly contacting a trained, participating mortgage lender.

The 2005 Professional Educator Home Loan Program fully originated the $25,000,000 bond fund allocation. The Corporation released the 2006 Professional Educator Home Loan Program allocation in February, totaling $25,000,000 in additional mortgage revenue private activity bonds. This program was extremely successful, fully originating in three months. Since its inception in 2001, the program has financed 746 homes for teachers, teacher's aides, school counselors, school nurses and school librarians.

Additionally, the 2005 Fire Fighter and Law Enforcement or Security Officer Home Loan Program fully originated $25,000,000 in loan commitments. The 2006 Fire Fighter and Law Enforcement or Security Officer Home Loan Program was released in June, and has committed $10.2 million to date. Since the inception of this program in 2003, the program has financed 443 homes for fire fighters, peace officers, correctional officers, county jailers, and public security officers.

The Nursing Faculty Home Loan Program was established by the Legislature in 2005. The Corporation released a pilot program of $3 million in the form of low interest rate loans in May 2006. These funds are made available to eligible faculty members of either an undergraduate or graduate nursing program in the state of Texas. No loans have been issued to date.

Since the inception of both the Professional Educator Home Loan Program in 2001 and the Fire Fighter and Law Enforcement or Security Officer Home Loan Program in 2003, the Corporation has only seen the demand for these programs increase.

Given the success of the Programs and the rate of loan origination, the Corporation submitted an application requesting an additional allocation of funds to the Texas Bond Review Board in August 2006. The Corporation was successful, and was awarded $25 million. This new allocation, called the Home Sweet Texas Loan Program, will assist individuals or households whose annual income does not exceed 80% Area Median Family Income (AFMI) purchase homes. Release date for this program is October 2006.

The Corporation is confident that this allocation will be fully utilized by borrowers at 80% AMFI or below. Over 60% of all loans originated through the 2005 and 2006 Programs served borrowers at 80% AMFI or below. In the 2005 Program Year, 259 loans totaling $26.8M went specifically to borrowers at this income level. With Program Year 2006 not yet over, the Corporation has to date assisted 188 borrowers at this income level, totaling $20.4M.

The Gulf Opportunity Zone Act of 2005 expanded the eligibility for our single family bond programs significantly. Some of the principal provisions included in the Gulf Opportunity Zone Act of 2005 relate to private activity bonds for financing residential property located in a GO Zone, specifically, but not limited to, those funds used for "targeted area" residences. "Targeted area" means that part of the Eligible Loan Area that has been or may be designated from time to time as a qualified census tract or an area of chronic economic distress in accordance with section 143(j) of the Internal Revenue Code.

Section 1400T of the Gulf Opportunity Zone Act provides that for purposes of section 143, each residence in a designated area is treated as a "targeted" area residence (for financing provided from 12/21/05 through 12/31/2010), thus eliminating the first-time homebuyer requirement, and applying the higher targeted area purchase price and income limitations (state income limitation of 140% AMFI).

As a result of the designation of "targeted areas", coupled with the elimination of the first-time homebuyer requirement and increased income and purchase price limitations, the funds set aside for "targeted areas" have been originating quickly. In 2006, the Corporation allocated over $9.6 million to targeted areas. To date, 73 loans totaling $8.6 million have been committed.

2007 Implementation Plan

The Corporation's primary goal for 2007 will be to continue to develop a financing structure that minimizes the Programs' mortgage interest rate and offers the best possible down payment assistance grant to the borrowers. Down payment assistance is especially critical when the spread between conventional mortgage rates and tax-exempt mortgage rates have reached historical lows. The Corporation will also continue to advertise and to receive input about the Programs by attending home builder, real estate agent, lender, and the various professional trade associations' conventions and trade shows in 2006 and 2007.

In addition, the Corporation will continue to train and develop relationships with mortgage lenders and realtors who represent the Programs to the borrowers.

Given the demand for first-time homebuyer programs, other financing options available to the Corporation through its enabling legislation will be explored. In fact, the Corporation has submitted an application, totaling $100 million, to the Texas Bond Review Board requesting additional volume cap to specifically serve qualifying borrowers under the Professional Educators Home Loan Program. The outcome of this application is still to be determined.

AFFORDABLE HOMEOWNERSHIP PROGRAM FOR TEXAS

One of the Corporation's main initiatives is to provide housing opportunities to Texans that do not have comparable housing options through conventional financial channels. Many families throughout Texas seeking to purchase a home are not able to meet the traditional lending requirements and, up to now, have had no other option but to rent. In order to meet this need and provide deserving families with a financing alternative for achieving the American dream of homeownership, the Corporation developed the Affordable Homeownership Program for Texas ("Program").

The Program, developed through a partnership between Ameriquest Mortgage Company ("Ameriquest") and the Corporation, provides borrowers with an affordable mortgage financing option that will allow them the opportunity to achieve homeownership. As a result of this partnership, Ameriquest has committed up to $100 million dollars for mortgage loans and the Corporation has committed $1 million dollars for down payment assistance.

The Program was established to serve those individuals and/or families in Texas that have FICO scores between 525 and 610 and who are at or below 80% of the AMFI by providing them access to an affordable mortgage loan product and down payment assistance in an amount up to seven percent (7%) of the mortgage loan amount. In addition, the Program rewards borrowers who make timely mortgage payments with lower interest rates and lower mortgage payments. Borrowers will receive a 50 basis point (.5%) reduction in their mortgage interest rate for every 12 months of on-time payments. As a result, Borrowers can reduce their mortgage interest rate by up to two percent (2%) during the first 48 months of their mortgage loan.

The Corporation and Ameriquest believe homebuyer education is an essential component to the success of home ownership. Under the Program, borrowers will be provided pre- and post-closing Homebuyer Education Training by ACORN Housing. ACORN Housing is a national housing counseling organization, helping low and moderate income homebuyers and homeowners since 1986. Additionally, borrowers will have intervention assistance available to them during the life of the mortgage loan. We believe this training and assistance is crucial to the success of this Program.

Since 2004, the Program has provided 52 loans to individuals and families who otherwise might not have achieved the dream of home ownership.

2007 Implementation Plan

The initial release of the Program in 2004 was limited to south Texas through a local affordable housing provider (CDC Brownsville). In 2005, the Corporation released the Program statewide and continues to market the program to local community development corporations, non-profits and other entities involved in affordable housing. The Corporation will also begin an aggressive marketing campaign in 2006 and 2007, by starting a 1-800 phone number in conjunction with an on-line application system and through the issuance of press releases and other marketing materials.

MULTIFAMILY PRIVATE ACTIVITY BOND PROGRAM

The Texas Legislature in 2003 allocated 10 percent of the multifamily private activity bond cap to the Corporation. The available amount for funding in 2006 was approximately $40 million, and a similar amount will be available for 2007. Nonprofit and for profit developers can use the funds to finance acquisition and rehabilitation or new construction of multifamily residential rental units across the state. Developers are encouraged to leverage the private activity bond funds by using Low Income Housing Tax Credits (LIHTC) available through TDHCA.

The Corporation's Private Activity Bond program statute requires the Corporation to target areas with the greatest housing need that have expressed local community support for affordable multifamily housing. The statute also requires the Corporation to solicit proposals from developers who would provide the specific housing development that would address the targeted housing need outlined in the request, whether for senior, rehabilitation, rural, supportive, migrant farm worker, or other specific housing need. Applications received in response to the request for proposals issued by the Corporation will be scored and ranked using criteria that analyzes the Developer's qualifications, experience and willingness to provide the types of multifamily housing targeted by the Corporation. Tax-exempt private activity bond financing will be allocated to the highest-scoring proposal that meets the identified housing needs of the Request for Proposals, subject to available allocation.

The Corporation issued requests for proposals in 2006 to Developers for the provision of rural, senior, rehabilitation, and hurricane-affected area multifamily housing. The Corporation did not receive proposals in response to these four statewide requests for proposals.

2007 Implementation Plan

In previous years, the Corporation targeted multifamily housing by specific geographic areas and by housing need and attempted to meet these targets by issuing requests for proposals per development. Attempting to meet targeted housing needs by issuing requests for proposals per development has not been as efficient or effective as the Corporation had hoped. As a result, for the 2007 program the Corporation will issue a single request for proposals to Developers who, if chosen, would agree to meet the Corporation's targeted housing needs by using the Corporation's entire bond cap allocation. Choosing one or more developers to receive the allocation will enable the Corporation to partner with the developers to meet the specific housing needs of the State.

The targeted areas of housing are anticipated to be rehabilitation, senior housing, supportive housing and rural housing. These targeted areas are based on current research and information received in previous years. In 2004 and 2005 the Corporation solicited participation in the private activity bond program by sending letters to mayors of all cities with a population over 10,000 people and all county judges. Discussing the various needs with each interested city and county highlighted the diversity of needs for different areas of Texas. The larger metropolitan areas believed they were saturated with multifamily housing, but were interested in rehabilitation or redevelopment of existing multifamily housing that had fallen into disrepair. Cities with a lower population, generally not in urban areas, expressed interest in developing new multifamily housing to fill their affordable housing needs. Similarly, Corporation staff has identified senior housing and migrant farmworker housing as potential target areas for which specific requests for proposals could be issued.

For some of the targeted areas of housing need mentioned above, 4 percent tax credits and tax-exempt bonds together are not sufficient to provide a positive cash flow to developments in areas where the area median income is lower than the state average. Funding sources from outside these traditional financing methods must be obtained. Possible sources of funds may include monies from the HOME and Housing Trust Fund programs, USDA/Rural Housing Service, and grants from other interested groups specific to the housing need.

The Corporation will issue the requests for proposals to Developers, which will include the targeted areas of housing need, in November of 2006.

MULTIFAMILY 501(C)(3) BOND PROGRAM

The Corporation's 501(c)(3) Multifamily Bond Program was created to finance the acquisition and rehabilitation, or new construction, of affordable multifamily housing units throughout the state of Texas. Unlike the Corporation's PAB program, 501(c)(3) financing does not use volume cap allocation and applications can be considered year-round. Also different from the PAB program is that 501(c)(3) financing may not be used in conjunction with low income housing tax credits. Only qualified nonprofit developers, designated under the internal revenue code as 501(c)(3) organizations, are eligible to apply for 501(c)(3) financing.

In addition to providing safe, decent, and affordable rental housing to residents of the state of Texas, recipients of 501(c)(3) financing must adopt a dollar-for-dollar public benefit program, investing at least one dollar in rent reduction, capital improvement projects, or social, educational, or economic development services for every dollar of abated property tax revenue they receive.

In 2001 and 2002 the Corporation provided $487 million in financing for the preservation or creation of 7,700 units of affordable housing in the state of Texas. Since 2002 the Corporation has not considered applications or issued bonds under the 501(c)(3) program as a result of market changes and legislatively mandated changes.

2007 Implementation Plan

The Corporation will monitor market conditions and will reactivate the program if demand shows the need for this type of financing to create needed multifamily affordable housing. Non-profit developers may choose to apply under the Corporation's Multifamily Private Activity Bond Program to be eligible for bond financing in addition to 4 percent tax credit equity.

MULTIFAMILY DIRECT LENDING PROGRAM

The Corporation's Multifamily Direct Lending Program provides permanent financing for the purpose of increasing and preserving the stock of affordable multifamily housing units throughout the state of Texas. The major focus of this program is to provide financing for smaller developments in rural and underserved areas of the state where bond financing is not practical. The Corporation's ability to offer permanent financing is facilitated through existing relationships with real estate investment companies that invest in affordable multifamily housing. The Community Development Trust, Inc. and the Federal Home Loan Bank of Dallas have been the Corporation's principal partners for this program.

In 2003 and 2004, the Corporation provided permanent financing in the aggregate amount of $5,628,000 for five (5) separate developments in Odessa, Wichita Falls, Big Spring, Brady, and Stephenville. These developments have provided 412 units of affordable housing to low income Texans.

2007 Implementation Plan

The Corporation is committed to administering and marketing our capabilities under this program in 2007. To this effort, the Corporation will market the program on its website and at public hearings across the state and will provide information to current and previous clients of the Corporation.

ASSET OVERSIGHT AND COMPLIANCE

Asset oversight of properties is required by many bond issuers, including the Corporation and TDHCA, to monitor the financial and physical health of a property and to provide suggestions for improvement. Compliance monitoring ensures that the borrowers are providing the required number of affordable units to income eligible households and that quality resident services are being provided to all residents of the property. Periodic on-site inspections and resident file reviews of affordable units ensure that federal requirements relating to the tax-exempt status of the bonds are followed.

The Corporation is currently providing asset oversight for 133 properties and compliance oversight for 35 properties. In May of 2006 TDHCA contracted with the Corporation to provide asset oversight services for multifamily properties financed through their bond program. As a result, the Corporation is performing asset oversight services for 54 more properties than last year and has added an additional staff person to help perform these added duties. The Corporation staff performs annual on-site compliance reviews and at least yearly on-site asset oversight reviews for these properties.

2007 Implementation Plan

The Corporation will continue to provide asset oversight and compliance monitoring for our current portfolio. The Corporation will also work to contract with other entities to expand our asset oversight and compliance monitoring portfolio of business.

GRANT PROGRAM

Although the Corporation has been a 501(c)(3) nonprofit entity since 2001, the Corporation had not actively pursued fundraising and grant opportunities until this year. A number of program shortfalls made it clear the contribution a grant program could make to the success of our affordable housing programs. First, the Corporation provided the Single Family Professional Educator, Fire Fighter, Police Officer and Security Officer Programs $400,000 from its cash reserves for down payment assistance in 2002, $200,000 in 2004, and over $400,000 in 2005. In addition, for the 2004 Private Activity Bond Program the Corporation provided from cash reserves a $500,000 soft second loan for the Providence at Marshall Meadows development in San Antonio. The Corporation does not receive state appropriations and cannot sustain this level of subsidy for its programs and continue to stay in business. Both of these experiences, as well as reviewing other critical unmet housing needs identified by TDHCA and the Corporation, prompted us to pursue the creation of a

Grant Program to fund the following programs: Single Family Down Payment Assistance, Multifamily Gap Financing Assistance, Homebuyer Education, and an Interim Construction and Land Acquisition Program.

In 2006 the Corporation made considerable strides in this area by developing a Fundraising and Grant Program Action Plan and by searching out available grant funding for affordable housing. In addition, the Corporation received a low-interest loan from Wells Fargo for three areas: the Interim Construction and Land Acquisition Loan Program, Single Family Down Payment Assistance, and Multifamily Gap Financing Assistance.

2007 Implementation Plan

The Corporation's mission of affordable housing matches many foundation and grant objectives, and provides multiple opportunities for corporate sponsorship and cross-promoting. In 2007 the Corporation, through its newly hired Manager of Marketing and Development, will execute its Fundraising and Grant Program Action Plan and will use the $1.05 million award from Wells Fargo to further affordable housing in the state. In addition, the Corporation will solicit corporate partners in the home improvement, home appliance, and large retail business sectors for down payment assistance for our Professional Educator, Fire Fighter, Police Officer, Security Officer, and Nursing Faculty bond programs. We will request a grant for down payment assistance and coupons for participating borrowers, such as $50 off a refrigerator, or a $100 coupon to the home improvement store. The Corporation will also work with national computer manufacturers to contribute a computer to every teacher, firefighter, police officer, corrections officer, or nurse educator that closes a loan through our program, and negotiate with telecommunications companies to contribute phone/internet service packages. These are just a few of the fundraising activities and initiatives that the Corporation will undertake in 2007.

APPENDIX A

LEGISLATIVE REQUIREMENTS FOR THE STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

SEC. 2306.072. ANNUAL LOW INCOME HOUSING REPORT

1) Not later than December 18 of each year, the director shall prepare and submit to the board an annual report of the department's housing activities for the preceding year.
2) Not later than the 30th day after the date the board receives the report, the board shall submit the report to the governor, lieutenant governor, speaker of the house of representatives, and members of any legislative oversight committee.
3) The report must include
   a) a complete operating and financial statement of the department;
   b) a comprehensive statement of the activities of the department during the preceding year to address the needs identified in the state low income housing plan prepared as required by Section 2306.0721, including:
      i) a statistical and narrative analysis of the department's performance in addressing the housing needs of individuals and families of low and very low income;
      ii) the ethnic and racial composition of families and individuals applying for and receiving assistance from each housing-related program operated by the department; and
      iii) the department's progress in meeting the goals established in the previous housing plan;
   c) an explanation of the efforts made by the Department to ensure the participation of persons of low income and their community-based institutions in department programs that affect them;
   d) a statement of the evidence that the Department has made an affirmative effort to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process;
   e) a statistical analysis, delineated according to each ethnic and racial group served by the department, that indicates the progress made by the department in implementing the state low income housing plan in each of the uniform state service regions; and
   f) an analysis, based on information provided by the fair housing sponsor reports required under Section 2306.0724 and other available data, of fair housing opportunities in each housing development that receives financial assistance from the department that includes the following information for each housing development that contains twenty or more living units:
      i) the street address and municipality or county where the property is located;
      ii) the telephone number of the property management of leasing agent;
      iii) the total number of units reported by bedroom size;

- iv) the total number of units, reported by bedroom size, designed for individuals who are physically challenged or who have special needs and the number of these individuals served annually as reported by each housing sponsor;
- v) the rent for each type of rental unit, reported by bedroom size;
- vi) the race or ethnic makeup of each project;
- vii) the number of units occupied by individuals receiving government-supported housing assistance and the type of assistance received;
- viii) the number of units occupied by individuals and families of extremely low income, very low income, low income, moderate income, and other levels of income;
- ix) a statement as to whether the department has been notified of a violation of the fair housing law that has been filed with the United States Department of Housing and Urban Development, the Commission on Human Rights, or the United State Department of Justice; and
- x) a statement as to whether the development has any instances of material noncompliance with bond indentures or deed restrictions discovered though the normal monitoring activities and procedures that include meeting occupancy requirements or rent restrictions imposed by deed restrictions or financing agreements.

g) a report on the geographic distribution of low income housing tax credits, the amount of unused low income housing tax credits, and the amount of low income housing tax credits received from the federal pool of unused funds from other states.

h) A statistical analysis, based on information provided by the fair housing sponsor reports required by Section 2306.0724 and other available data, of average rents reported by county.

4) Repealed by Acts 2003, 78th Leg., ch. 330, §31(1).

SEC. 2306.0721. LOW INCOME HOUSING PLAN

1) Not later than December 18 of each year, the director shall prepare and submit to the board an integrated state low income housing plan for the next year.
2) Not later than the 30th day after the date the board receives the plan, the board shall submit the plan to the governor, lieutenant governor, and the speaker of the house of representatives.
3) The plan must include:
   a) an estimate and analysis of the housing needs of the following populations in each uniform state service region:
      - i) individuals and families of moderate, low, very low income, and extremely low income;
      - ii) individuals with special needs; and
      - iii) homeless individuals;

b) a proposal to use all available housing resources to address the housing needs of the populations described by Subdivision (1) by establishing funding levels for all housing-related programs;
c) an estimate of the number of federally assisted housing units available for individuals and families of low and very low income and individuals with special needs in each uniform state service region;
d) a description of state programs that govern the use of all available housing resources;
e) a resource allocation plan that targets all available housing resources to individuals and families of low and very low income and individuals with special needs in each uniform state service region;
f) a description of the department's efforts to monitor and analyze the unused or underused federal resources of other state agencies for housing-related services and services for homeless individuals and the department's recommendations to endorse the full use by the state of all available federal resources for those services in each uniform state service region;
g) strategies to provide housing for individuals and families with special needs each uniform state service region;
h) a description of the department's efforts in each uniform state service region to encourage the construction of housing units that incorporate energy efficient construction and appliances;
i) an estimate and analysis of the housing supply in each uniform state service region;
j) an inventory of all publicly and, where possible, privately funded housing resources, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies;
k) strategies for meeting rural housing needs;
l) a biennial action plan
    i) addresses current policy goals for colonia programs, strategies to meet the policy goals, and the projected outcomes with respect to policy goals; and
    ii) includes information on the demand for contract-for-deed conversions, services from self-help centers, consumer education, and other colonia resident services in counties some part of which is within 150 miles of the international border of this state;
m) a summary of public comments received at a hearing under this chapter or from another source that concern the demand for colonia resident services described by Subdivision (12); and
n) any other housing-related information that the state is required to include in the one-year action plan of the consolidated plan submitted annually to the United States Department of Housing and Urban Development.

4) The priorities and policies in another plan adopted by the department must be consistent to the extent practical with the priorities and policies established in the state low income housing plan.
5) To the extent consistent with federal law, the preparation and publication of the state low income housing plan shall be consistent with the filing and publication deadlines required of the department for the consolidated plan; and
6) The director may subdivide the uniform state service regions as necessary for the purposes of the state low income housing plan.
7) The department shall include the plan developed by the Texas State Affordable Housing Corporation under Section 2306.566 in the department's resource allocation plan under Subsection (c)(5).
8) The department shall consider and incorporate the specific results of the programs of the Texas State Affordable Housing Corporation in the department's estimate and analysis of the housing supply in each uniform state service region under Subsection (c)(9).

SEC. 2306.0722. PREPARATION OF PLAN AND REPORT

1) Before preparing the annual low income housing report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the department shall meet with regional planning commissions created under Chapter 391, Local Government Code, representatives of groups with an interest in low income housing, nonprofit housing organizations, managers, owners, and developers of affordable housing, local government officials, and residents of low income housing. The department shall obtain the comments and suggestions of the representatives, officials, and residents about the prioritization and allocation of the department's resources in regard to housing.
2) In preparing the annual report under Section 2306.072 and the state low income housing plan under Section 2306.0721, the director shall:
   a) coordinate local, state, and federal housing resources, including tax exempt housing bond financing and low income housing tax credits;
   b) set priorities for the available housing resources to help the neediest individuals;
   c) evaluate the success of publicly supported housing programs;
   d) survey and identify the unmet housing needs of persons the department is required to assist;
   e) ensure that housing programs benefit a person regardless of the persons' race, ethnicity, sex, or national origin;
   f) develop housing opportunities for individuals and families of low and very low income and individuals with special housing needs;
   g) develop housing programs through an open, fair, and public process;
   h) set priorities for assistance in a manner that is appropriate and consistent with the housing needs of the populations described by Section 2306.0721(c)(1);

i) incorporate recommendations that are consistent with the consolidated plan submitted annually by the state to the United States Department of Housing and Urban Development;
j) identify the organizations and individuals consulted by the department in preparing the annual report and state low income housing plan and summarize and incorporate comments and suggestions provided under Subsection (a) as the board determines to be appropriate;
k) develop a plan to respond to changes in federal funding and programs for the provision of affordable housing;
l) use the following standardized categories to describe the income of program applicants and beneficiaries:
    i) to 30 percent of area median income adjusted for family size;
    ii) more than 30 to 60 percent of area median income adjusted for family size;
    iii) more than 60 to 80 percent of area median income adjusted for family size;
    iv) more than 80 to 115 percent of area median income adjusted for family size; or
    v) more than 115 percent of area median income adjusted for family size; and
m) use the most recent census data combined with existing data from local housing and community service providers in the state, including public housing authorities, housing finance corporations, community housing development organizations, and community action agencies.
n) provide the needs assessment information compiled for the report and plan to the Texas State Affordable Housing Corporation.

SEC. 2306.0723. PUBLIC PARTICIPATION REQUIREMENTS

1) The department shall hold public hearings on the annual state low income housing plan and report before the director submits the report and the plan to the board. The department shall provide notice of the public hearings as required by Section 2306.0661. The department shall accept comments on the report and plan at the public hearings and for at least 30 days after the date of the publication of the notice of the hearings.
2) In addition to any other necessary topics relating to the report and the plan, each public hearing required by Subsection (a) must address:
    a) infrastructure needs;
    b) home ownership programs;
    c) rental housing programs;
    d) housing repair programs; and
    e) the concerns of individuals with special needs, as defined by Section 2306.511.
3) The board shall hold a public hearing on the state low income housing report and plan before the board submits the report and the plan to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature.
4) The board shall include with the report and the plan the board submits to the governor, lieutenant governor, speaker of the house of representatives, members of the legislature,

and members of the advisory board formed by the department to advise on the consolidated plan a written summary of public comments on the report and the plan.

SEC. 2306.0724. FAIR HOUSING SPONSOR REPORT

1) The department shall require the owner of each housing development that receives financial assistance from the department and that contains 20 or more living units to submit an annual fair housing sponsor report. The report must include the relevant information necessary for the analysis required by Section 2306.072(c)(6). In compiling the information for the report, the owner of each housing development shall use data current as of January 1 of the reporting year.
2) The department shall adopt rules regarding the procedure for filing the report.
3) The department shall maintain the reports in electronic and hard-copy formats readily available to the public at no cost.
4) A housing sponsor who fails to file a report in a timely manner is subject to the following sanctions, as determined by the department:
   a) denial of a request for additional funding; or
   b) an administrative penalty in an amount not to exceed $1,000, assessed in the manner provided for an administrative penalty under Section 2306.6023.

APPENDIX B

GLOSSARY OF SELECTED TERMS

Accessible: A definition used by HUD in Section 504 with respect to the design, construction, or alteration of an individual dwelling unit. It means that the unit is located on an accessible route and when designed, constructed, altered, or adapted, it can be approached, entered, and used by individuals with physical disabilities. A unit that is on an accessible route and is adaptable and otherwise in compliance with the standards set forth in the Uniform Federal Accessibility Standards (UFAS, 23 CFR Subpart 40 for residential structures) is considered accessible. When a unit in an existing facility that is being made accessible as a result of alterations intended for use by a specific qualified person with a disability, the unit will be deemed accessible if it meets the requirements of applicable standards that address the particular disability or impairment of such person.

Accessible Route: Unobstructed path that connects accessible elements and spaces in a building or facility and complies with the space and reach requirements prescribed by the Uniform Federal Accessibility Standards (UFAS). An accessible route that serves only accessible units occupied by persons with hearing or vision impairments need not comply with those requirements intended to affect accessibility for persons with mobility requirements.

Acquisition: Acquisition of standard housing (at a minimum, meeting HUD Section 8 Housing Quality Standards) only with no expectation of other activities being carried out in conjunction with the acquisition.

Adaptability: A definition used by HUD in Section 504 meaning the ability of certain elements of a dwelling unit (such as kitchen counters, sinks, and grab bars) to be added to, raised, lowered, or otherwise altered, to accommodate the needs of persons with or without disability or to accommodate the needs of persons with different degrees of disability.

Administrative Costs Reasonable and necessary costs, as described in OMB Circular A-87, incurred by the participating jurisdiction in carrying out its eligible program activities in accordance with prescribed regulations. Administrative costs include any project delivery costs, such as new construction and rehabilitation counseling, preparing work specifications, loan processing, inspections, and other entities applying for or receiving HOME funds. Administrative costs do not include eligible project-related costs that are incurred by and charged to project owners.

Affordable Housing: Housing where the occupant is paying no more than 30 percent of his/her gross monthly income for gross housing costs, including utility costs. Housing that is for purchase (with or without rehabilitation) qualifies as affordable housing if it (1) is purchased by a low income, first-time home buyer who will make the housing his or her principal residence; and (2) has a sale price that does not exceed the mortgage limit for type of single family housing for the area under HUD's single family insuring authority under the National Housing Act.

Area Median Family Income (AMFI): Income limits for MSAs and counties that are based on HUD's estimates of the area's median income adjusted for family size. Calculated yearly by HUD and used to determine an applicant's eligibility with regard to HUD programs.

Assisted Household or Person: For the purpose of identification of goals, an assisted household or person is one in which, during the periods covered by the annual plan, will receive benefits through the investment of federal funds, either alone or in conjunction with the investment of other public or private funds. A renter is benefited if the household or person takes occupancy of affordable housing that is newly acquired (standard housing) or new rehabilitation is completed. A first-time home buyer is benefited if a home is purchased during the year. A homeless person is benefited if the person becomes an occupant of transitional or permanent housing. A non-homeless person with special needs is considered as being benefited if the provision of supportive services is linked to the acquisition, rehabilitation, or new construction of a housing unit and/or the provision of rental assistance during the year.

Capacity Building: Educational and organizational support assistance to promote the ability of an organization to maintain, rehabilitate, and construct housing for low and very low income persons and families. This activity may include, but is not limited to: 1) Organizational support to cover expenses for training, technical, and other assistance to the board of directors, staff, and members of the organization, 2) Program support including technical assistance and training related to housing development, housing management, or other subjects related to the provision of housing or housing services, and 3) Studies and analyses of housing needs.

Community Housing Development Organization (CHDO): A nonprofit organization, certified by a city or the state, that provides decent, affordable housing to low income individuals within a designated geographic area.

Colonia: An identifiable unincorporated area located within 150 miles of the Texas-Mexico border that lacks infrastructure and decent housing.

Consolidated Plan: A document submitted to the US Department of Housing and Urban Development (HUD) containing housing needs assessments and strategic plans for the state. It is required of the State of Texas by HUD in order to receive federal CDBG, HOME, ESGP, and HOPWA program funds.

Contract for Deed: A financing arrangement for the sale of property whereby land ownership remains with the seller until the total purchase price is paid.

Disability: According to the US Department of Housing and Urban

Development, a person shall be considered to have a disability if the person is determined to have a physical, mental, or emotional impairment that: (1) is expected to be of long-continued and indefinite duration, (2) substantially impeded his or her ability to live independently, and (3) is of such a nature that the ability could be improved by more suitable housing conditions. A person shall also be considered to have a disability or he or she has a developmental disability as defined in the Developmental Disabilities Assistance and Bill of Rights Act (42 USC. 6001-6006). The term also includes the surviving member(s) or any household described in the first sentence of this paragraph who is (were) living in an assisted unit with the disabled member of the household at the time of his or her death. Disabilities reflect the consequences of a bodily impairment in terms of functional performance. Also see "Person with Disability."

Disabled Household: A household composed of one or more persons at least one of whom is an adult (a person of at least 18 years of age) who has a disability.

Economic Independence and Self-Sufficiency Programs: Programs undertaken by public housing agencies (PHAs) to promote economic independence and self-sufficiency for participating families. Such programs may include Project Self-sufficiency and Operation Bootstrap programs that originated under earlier Section 8 initiatives, as well as the Family Self-Sufficiency program. In addition, PHAs may operate locally developed programs or special projects designed to promote economic independence and self-sufficiency.

Elderly Household: According to HUD, a family in which the head of the household or a spouse is at
least 62 years of age, by HUD's definition. This definition may change according to specific program.

Extremely Low Income: Individual of family with a household income less than or equal to 30 percent of the area median family income (AMFI)

Fair Housing Act Prohibits discrimination in housing because of race, national origin, religion, sex, familial status, or disability.

Federal Preference for Admission: The preference given to otherwise eligible applicants under HUD's rental assistance programs who, at the time they seek housing assistance, are involuntarily displaced, living in substandard housing, or paying more than 50 percent of family income for rent.

First Time Home Buyer: An individual or family who has not owned a home during the three-year period preceding the HUD-assisted purchase of a home that must be used as the principal residence of the homebuyer.

Frail Elderly Persons: Includes elderly persons who are unable to perform one or more Activities of Daily Living (ADL) without help.

Household: One or more persons occupying a housing unit (US Census definition).

Housing Development Costs: The total of all costs incurred in financing, creating, or purchasing any housing development, which are approved by the department as reasonable and necessary. The costs may include, but are not limited to, the value of land and any buildings on the land, cost of land acquisition, options, deposits, or contracts to purchase; cost of site preparation demolition and development; fee paid or payable in connection with the planning, execution, and financing of the development, such as those to architects, engineers, attorneys, accountants; cost of necessary studies, surveys, plans, permits, insurance, interest, financing, tax and assessment costs, and other operating and carrying costs during construction; cost of construction, rehabilitation, reconstruction, fixtures, furnishings, equipment, machines, and apparatus related to the real property; cost of land improvements, including without limitation, landscaping and off-site improvements; necessary expenses in connection with initial occupancy of the housing development; an allowance established by the Department for contingency reserves; and the cost of the other items, including tenant relocation, if tenant relocation costs are not otherwise being provided for, as determined by the department to be reasonable and necessary for the development of the housing development, less any and all net rents and other net revenues received from the operation of the real and personal property on the development site during construction.

Housing Development or Housing Project: Any real or personal property, project, building structure, or facilities work or undertaking, whether existing, new construction, remodeling, improvement, or rehabilitation, that meets or is designed to meet minimum property standards consistent with those prescribed in the federal HOME Program for the primary purpose of providing sanitary, decent, and safe dwelling accommodations for rent, lease, use, or purchase by persons and families of low and very low income and persons with special needs. This term may include buildings, structure, land, equipment, facilities, or other real or personal properties that are necessary, convenient, or desirable appurtenances, such as but not limited to streets, water, sewers, utilities, parks, site preparation, landscaping, stores, offices, and other non-housing facilities, such as administrative, community, and recreational facilities the Department determines to be necessary, convenient, or desirable appurtenances.

Housing Problems: Households with housing problems include those that: (1) occupy units with physical defects; (2) meet the definition of overcrowded; or (3) meet the definition of cost burdened (>30 percent of income spent on housing).

Jurisdiction: A unit of state or local government

Local Government: A county; an incorporated municipality; a special district; any other legally constituted political subdivision of the State; a public,

	nonprofit housing finance corporation created under Chapter 394, Local Government code Texas revised Civil Statues; or a combination of any of the entities described here.
Low Income Neighborhood:	A neighborhood that has at least 51 percent of its households at or below 80 percent of AMFI.
Low Income:	Household with an annual income that does not exceed 80 percent of the area median family income for the area. HUD may establish income ceilings higher or lower than the 80 percent figure on the basis of HUD's findings that such variations are necessary because of prevailing levels of construction costs or fair market rents or unusually high or low family incomes.
Metropolitan Statistical Area (MSA):	US Census term used to identify a metropolitan area, which is a large population nucleus, together with adjacent communities having a high degree of social and economic integration with that core. Also described as an "urbanized area" of at least 50,000 inhabitants and/or a total metropolitan population of 100,000.
Migrant Farmworkers:	Persons who travel from place to place in order to take advantage of work opportunities provided by various agricultural seasons across the country.
Moderate Income:	Households whose incomes are between 81 percent and 115 percent of the median income for the area, as determined by HUD, with adjustments for smaller or larger families, except that HUD may establish income ceilings higher or lower than 95 percent of the prevailing levels of construction costs or fair market rents, or unusually high of low family incomes. May differ by program.
Neighborhood:	A geographic location designated in comprehensive plans, ordinances, or other local documents as a neighborhood, village, or similar geographical designation that is within the boundary but does not encompass the entire area of a unit of general local government. If the general local government has a population under 25,000, the neighborhood may, but need not, encompass the entire area of a unit of general local government.
Nonprofit Organization:	A nonprofit corporation is created by filing articles of incorporation with the Secretary of State in accordance with the Texas Non-Profit Corporation Act. "Non-profit corporation" means a corporation in which no part of the earned income is distributable to members, directors, or officers. A nonprofit corporation may be created for any lawful purposes and are entitled to exemption from state or federal taxes.
***Olmstead*:**	The US Supreme Court in *Olmstead v. L. C.* held that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the ADA.
Overcrowded:	A housing unit containing more than one person per room. (US Census definition)

Participating Jurisdiction (PJ): Term for any state or local government that has been designated by HUD to receive HOME Program funds.

Person with Disability: (1) A person is considered to have a disability if the person has a physical, mental, or emotional impairment that (i) is expected to be of long-continued and indefinite duration; (ii) substantially impedes his or her ability to live independently; and (iii) is of such a nature that such ability could be improved by more suitable housing conditions. (2) A person will also be considered to have a disability if he or she has a developmental disability, which is a severe, chronic disability that (i) is attributable to a mental or physical impairment or combination of mental and physical impairments; (ii) is manifested before the person attains age twenty-two; (iii) is likely to continue indefinitely; (iv) results in substantial functional limitations in three or more of the following areas of major life activity; self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, and economic self-sufficiency, and (v) reflects the person's need for a combination and sequence of special interdisciplinary, or generic care, treatment, or other services that are lifelong or extended duration and are individually planned and coordinated.

Physical Defects: A housing unit lacking complete kitchen or bathroom facilities (US Census definition).

Poverty: Term to describe the poor. The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor or in poverty. Varies by year.

Predevelopment Costs: Costs related to a specific eligible housing project including: a) expenses necessary to determine project feasibility (including costs of an initial feasibility study), consulting fees, costs of preliminary financial applications, legal fees, architectural fees, engineering fees, engagement of a development team, site control, and title clearance; and b) reconstruction housing project costs that the board determines to be customary and reasonable, including but not limited to the costs of obtaining firm construction loan commitments, architectural plans and specifications, zoning approvals, engineering studies, and legal fees. Predevelopment costs does not include general operational or administrative costs.

Primary Housing Activity: A means of providing or producing affordable housing - such as rental assistance, production, rehabilitation, or acquisition - that will be allocated significant resources and/or pursued intensively for addressing a particular housing need. (See also, "Secondary Housing Activity.")

Project: A site or an entire building, including a manufactured housing unit or two or more buildings together with the site or sites on which the building or buildings is located, that are under common ownership, management, and financing (i.e., a project assisted with HOME funds, under a commitment by the owner, as a single undertaking). Project includes all the activities associated with the site and building. If there is more than one site associated with a project, the sites must be within a four-block area.

Project Completion: All necessary title transfer requirements and construction work have been performed and the project, in HUD's judgment, complies with specified requirements (including the property standards adopted under HOME 92.251); the final drawdown has been disbursed for the project; and a project completion report has been submitted and processed in the Cash and Management Information System (92.501) as prescribed by HUD. For tenant-based rental assistance, the final drawdown has been disbursed for the project and the final payment certification has been submitted and processed in the Cash and Management Information System (92.502) as prescribed by HUD.

Project-Based Rental Assistance: Rental Assistance provided for a project, not for a specific tenant. Tenants receiving project-based rental assistance give up the right to that assistance upon moving from the project.

Public Housing: Any state, county, municipality, or other government entity or public body (or its agency or instrumentality) that is authorized to engage in or assist in the development or operation of low income housing. The term includes any Indian Housing Authority.

Qualified Allocation Plan: The Qualified Allocation Plan is utilized by the Low Income Housing Tax Credit Program in setting threshold and selection criteria points for the allocation of tax credits.

Real Property: All land, including improvements and fixtures and property of any nature appurtenant, or used in connection therewith, and every estate, interest, and right legal or equitable therein, including leasehold interests, terms for years, and liens by way of judgment, mortgage or otherwise.

Reconstruction: HUD guidelines regarding reconstruction are as follows: *The regulation defines reconstruction as the rebuilding of housing on the same foundation. Therefore, the foundation must be used, if possible. If the building has no foundation or if it is not possible to rebuild on the foundation, then the "foundation" will be the same location as the building that is being reconstructed. Construction of housing on a different portion of the land parcel would be new construction. The reconstructed housing must be substantially similar to the structure that is being replaced, regardless of whether an existing foundation is used (i.e. a single family house must be replaced with a structure containing the same number of units). Rooms may be added to a building outside of the foundation or footprint of the original housing if needed to meet local codes. However, additional units cannot be constructed as part of a reconstruction project. A structure must be present prior to reconstruction. This structure should be documented by pictures and an explanation of why rehabilitation of the existing structure is not feasible.*

Rental Assistance: Rental assistance payments provided as either project-based rental assistance or tenant-based rental assistance.

Rental Housing (Affordable): A rental housing unit is considered to be an affordable housing unit if it is occupied by a low income family or individual and bears a rent that is the lesser of (1) the Existing Section 8 Fair Market Rent (FMR) for comparable units in the area; or (2) 30 percent of the adjusted income of a family whose income equals 65 percent of the median income for the area, except that HUD may establish income ceilings higher or lower than 65 percent of the median because of prevailing levels of construction costs or fair market rents, or usually high or low family incomes.

Rural Area: Rural areas are considered areas outside of Metropolitan Statistical Areas. Definition may differ according to program.

Service Needs: The particular services identified for special needs populations, which may include transportation, personal care, housekeeping, counseling, meals, case management, personal emergency response, and other services to prevent premature institutionalization and assist individuals to continue living independently.

Severe Cost Burden: Refers to households and individuals who spend more than 50 percent of their gross income on housing costs.

Sheltered: Families and persons whose primary nighttime residence is a supervised, publicly or privately operated shelter, including emergency shelters, transitional housing for the homeless, domestic violence shelters, residential shelters for runaway and homeless youth, and any hotel/motel/apartment voucher arrangement paid because the person is homeless. This term does not include persons living in overcrowded or substandard conventional housing. Any facility offering permanent housing is not a shelter, nor are its residents homeless.

Special Needs Populations: In addition to the homeless, according to HUD, special needs populations include persons with disabilities, the elderly, persons with alcohol and/or drug addictions, persons with HIV/AIDS, and public housing residents. TDHCA also considers colonia residents and migrant farmworkers as special needs populations.

State Recipient: A unit of local government designated by a state to receive HOME funds from the state in which to carry out HOME Program activities.

Subrecipient: A public agency or nonprofit organization selected by the participating jurisdiction's HOME program. A public agency or nonprofit organization that receives HOME funds solely as a developer or owner of housing is not a sub-recipient. The participating jurisdiction's selection of a sub-recipient is not subject to the procurement procedures and requirements.

Substandard Condition but Suitable for Rehabilitation: By local definition, dwelling units that do not meet standard conditions but are both financially and structurally feasible for rehabilitation. This does not include units that require only cosmetic work, correction or minor livability problems, or maintenance work. The jurisdiction must define this term (i.e., standard condition, financially and structurally feasible for rehab) and include this definition in the Appendix (Glossary of Terms) portion of its CHAS submission.

Substantial Rehabilitation: Rehabilitation of residential property at an average cost for the project in excess of $25,000 per dwelling unit.

Supportive Housing: Housing, including housing units and group quarters, that has a supportive environment and includes a planned service component.

Supportive Services: Services provided to residents of supportive housing for the purpose of facilitating the independence of residents. Some examples are case management, medical or psychological counseling and supervision, child care, transportation, and job training.

Tenant-Based Rental Assistance: A form of rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. The assistance is provided for the tenant, not for the project.

Threshold Criteria: To be considered for funding, a housing project must first demonstrate that it meets all the threshold criteria set forth as follows: a) the project is consistent with the requirements established in this rule; b) the applicant provides evidence of their ability to carry out the project in the areas of financing, acquiring, rehabilitating, developing, or managing affordable housing developments; and c) the project addresses an identified housing need. This assessment will be based on statistical data, surveys, or other indicators of needs as appropriate.

Total Bonded Indebtedness: All single family mortgage revenue bonds (including collateralized mortgage obligations), multifamily mortgage revenue bonds, and other debt obligations issued or assumed by the Department and outstanding as of August thirty-one of the year of calculation, excluding; all such bonds rated AAA by Moody's Investors Service or AAA by Standard & Poors Corporation for which the Department has no direct or indirect financial liability form the Department's unencumbered fund balances, and all other such bonds, whether rated or unrated, for which the Department has no direct or indirect financial liability from the Departments unencumbered fund balances, unless Moody's' or Standard & Poors has advised the Department in writing that all or portion of the bonds excluded by this clause should be included in a determination of total bonded indebtedness.

Unencumbered Fund Balances: A) The sum of the balances resulting at the end of each Department fiscal year form deducting the sum of bond indenture and credit rating restrictions and liabilities for the sum of amounts on deposit in indenture funds and other tangible and intangible assets of each department housing bond program, and b) uncommitted amounts of deposit in each independent or separate unrestricted fund established by the housing finance division or its administrative component units.

Very Low Income: Households whose incomes do not exceed 50 percent of the median area income for the area, as determined by HUD, with adjustments for smaller and larger families and for areas with unusually high or low incomes or where needed because of prevailing levels of construction costs or fair market rents. Definition may differ according to program; the State of Texas designates very-low income as 60 percent or less AMFI.

Work Disability: A condition that prevents a person from working or limits a person's ability to work.

2008 State of Texas
Low Income Housing Plan and Annual Report

Fairlake Cove Apts, Huffman, TX

Texas Department of Housing and Community Affairs
March 2008

2008 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

TABLE OF CONTENTS

SECTION 1: INTRODUCTION

The Texas Department of Housing and Community Affairs (TDHCA, Department, Agency) is the State's lead agency responsible for affordable housing. TDHCA is also responsible for administering a wide variety of community affairs, energy assistance, and colonia programs and activities.

INSTITUTIONAL STRUCTURE

In 1991, the 72nd Texas Legislature created the Texas Department of Housing and Community Affairs. The Department's enabling legislation combined programs from the Texas Housing Agency, the Texas Department of Community Affairs, and the Community Development Block Grant Program from the Texas Department of Commerce.

On September 1, 1992, two programs were transferred to TDHCA from the Texas Department of Human Services: the Low Income Home Energy Assistance Program (LIHEAP) and the Emergency Nutrition and Temporary Emergency Relief Program (ENTERP). Effective September 1, 1995, in accordance with House Bill 785, regulation of manufactured housing was transferred to the Department. In accordance with House Bill 7, effective September 1, 2002, the Community Development Block Grant (CDBG) and Local Government Services programs were transferred to the newly created Office of Rural Community Affairs (ORCA). However, TDHCA, through an interagency contract with ORCA, administers 2.5 percent of the CDBG funds used for the Self-Help Centers along the Texas-Mexico border. Effective September 1, 2002, in accordance with Senate Bill 322, the Manufactured Housing Division became an independent entity administratively attached to TDHCA.

AGENCY MISSION AND CHARGE

TDHCA's mission is as follows: To help Texans achieve an improved quality of life through the development of better communities.

TDHCA accomplishes this mission by administering a variety of housing and community affairs programs. A primary function of TDHCA is to act as a conduit for federal grant funds for housing and community services. However, because several major housing programs require the participation of private investors and private lenders, TDHCA also operates as a housing finance agency.

More specific policy guidelines are provided in §2306.002 of TDHCA's enabling legislation.

> *(a) The legislature finds that:*
>
> *(1) every resident of this state should have a decent, safe, and affordable living environment;*
>
> *(2) government at all levels should be involved in assisting individuals and families of low income in obtaining a decent, safe, and affordable living environment; and*
>
> *(3) the development and diversification of the economy, the elimination of unemployment or underemployment, and the development or expansion of commerce in this state should be encouraged.*
>
> *(b) The highest priority of the department is to provide assistance to individuals and families of low and very low income who are not assisted by private enterprise or other governmental programs so that they may obtain affordable housing or other services and programs offered by the department.*

TDHCA's services address a broad spectrum of housing and community affairs issues that include homebuyer assistance, the rehabilitation of single family and multifamily units, rental assistance, the new construction of single family and multifamily housing, special needs housing, transitional housing, and emergency shelters. Community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance.

Funding sources for the services listed above include the US Department of Housing and Urban Development (HUD), US Treasury Department, US Department of Health and Human Services, and US Department of Energy, and State of Texas general revenue funds. With this funding, TDHCA strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process. Recognizing that all the need may not ever be met, the Department looks at where the federal programs and state resources at its disposal could provide the most benefit by managing these limited resources to have the greatest impact.

TDHCA is only one organization in a network of housing and community services providers located throughout the state. This document focuses on programs within TDHCA's jurisdiction, which are intended to either work in cooperation with or as complements to the services provided by other organizations.

ADMINISTRATIVE STRUCTURE

Agency programs are grouped into the following divisions: Multifamily Finance Production, Texas Homeownership Program, HOME Program, Office of Colonia Initiatives, Disaster Recovery, and Community Affairs. In addition, TDHCA includes the following divisions: Administrative Support; Bond Finance; Financial Administration; Information Systems; Internal Audit; Legal Services; Portfolio Management and Compliance; Real Estate Analysis; the Division of Public Affairs; and the Housing Resource Center. The Manufactured Housing Division is administratively attached to TDHCA, though it is an independent entity with its own governing board.

The following table outlines TDHCA's programs. For more detailed program information, please see "TDHCA Program Plans" in the Action Plan section of this document.

Activity	Program	Program Description	Eligible Households
Multifamily Development	HOME Investment Partnerships Program (HOME)	Loans or grants to develop or preserve affordable rental housing	<80% AMFI
	Housing Trust Fund (HTF)	Loans or grants for rental housing development, predevelopment, and other industry innovations	<80% AMFI
	Housing Tax Credit (HTC)	Tax credits to develop or preserve affordable rental housing	<60% AMFI
	Multifamily Bond (MFB)	Loans to develop or preserve affordable rental housing	<60% AMFI
	Community Development Block Grant (CDBG)	Targeted disaster recovery assistance to preserve affordable rental housing	<80% AMFI
Rental Assistance	HOME Program	Loans or grants for entities to provide tenant-based rental assistance for two years	<80% AMFI
	Section 8 Housing Choice Vouchers	Acts as a public housing authority to offer tenant-based rental assistance vouchers in certain areas	<50% AMFI
Single Family Development	HOME Program	Loans or grants for entities to construct single family housing and offer down payment assistance	<80% AMFI
	Colonia Model Subdivision	Loans for Community Housing Development Organizations (CHDOs) to develop residential subdivisions as an alternative to colonias	<60% AMFI
Home Purchase Assistance and Home Repair Assistance	Contract for Deed Conversion Initiative	Facilitates colonia-resident ownership by converting contracts for deed into traditional mortgages	<60% AMFI
	Grant Assistance	Grants in conjunction with the First Time Homebuyer Program for down payment and closing costs	<80% AMFI
	HOME Program	Loan and grants for entities to offer down payment and closing cost assistance	<80% AMFI
	HOME Program	Loans and grants for entities to provide home repair assistance	<80% AMFI
	Lone Star Loan	Market-rate loans with second liens for down payment assistance	<115% AMFI
	Mortgage Credit Certificate	Annual tax credit based on the interest paid on the homebuyer’s mortgage loan	<115% AMFI
	Texas Bootstrap Loan	Funds entities to offer owner-builder loans programs	<60% AMFI
	Texas First Time Homebuyer	Low-interest loans for first time homebuyers	<115% AMFI
	Community Development Block Grant (CDBG)	Targeted disaster recovery funding to provide home repair assistance	<80% AMFI
Homebuyer Education	Colonia Consumer Education Services	Homebuyer education offered through Colonia Self-Help Centers and Office of Colonia Initiatives (OCI) field offices	<115% AMFI (All)
	Texas Statewide Homebuyer Education	Training for nonprofits to provide homebuyer education	<115% AMFI (All)
Community Affairs Activities	Community Services Block Grant (CSBG)	Funds local agencies to provide essential services and poverty programs	<50% AMFI
	Emergency Shelter Grants (ESGP)	Funds entities to provide shelter and related services to the homeless	<30% AMFI (Homeless)
	Comprehensive Energy Assistance (CEAP)	Funds local agencies to offer energy education, financial assistance, and HVAC replacement	<50% AMFI
	Weatherization Assistance (WAP)	Funds local agencies to provide minor home repairs to increase energy efficiency	<50% AMFI
Manufactured Housing	Manufactured Housing Division	Regulates the manufactured housing industry. Licenses manufactured housing professionals, titles homes, inspects homes, and investigates manufactured housing complaints.	All

2008 STATE OF TEXAS LOW INCOME HOUSING PLAN AND ANNUAL REPORT

The *2008 State of Texas Low Income Housing Plan and Annual Report* (SLIHP, Plan) is prepared annually in accordance with §2306.072–2306.0724 of the Texas Government Code (TGC). This statute requires that TDHCA provide a comprehensive statement of activities in the preceding year, an overview of statewide housing needs, and a resource allocation plan to meet the state's housing needs. It offers policy makers, affordable housing providers, and local communities a comprehensive reference on statewide housing need, housing resources, and performance-based funding allocations. The format is intended to help these entities measure housing needs, understand general housing issues, formulate policies, and identify available resources. As such, the Plan is a working document whose annual changes reflect input received throughout the year.

The Plan is organized into eight sections:

- *Introduction:* An overview of TDHCA and the Plan
- *Annual Report:* A comprehensive statement of activities for 2007, including performance measures, actual numbers served, and a discussion of TDHCA's Strategic Plan goals
- *Housing Analysis:* An analysis of statewide and regional demographic information, housing characteristics, and housing needs
- *TDHCA Action Plan:* A description of TDHCA's initiatives, resource allocation plans, program descriptions, and goals
- *Public Participation:* Information on the Plan preparation and a summary of public comment
- *Colonia Action Plan:* A revised biennial plan for 2008–2009, which discusses housing and community development needs in the colonias, describes TDHCA's policy goals, summarizes the strategies and programs designed to meet these goals, and describes projected outcomes to support the improvement of living conditions of colonia residents
- *Texas State Affordable Housing Corporation (TSAHC) Plan:* This section outlines TSAHC's plans and programs for 2008, and is included in accordance with legislation
- *Appendix:* Includes TDHCA's enabling legislation

Because the Plan's legislative requirements are rather extensive, TDHCA has prepared a collection of separate publications in order to fulfill requirements. TDHCA produces the following publications in compliance with §2306.072–2306.0724 of the Texas Government Code:

- State of Texas Low Income Housing Plan and Annual Report
- Basic Financial Statements and Operating Budget: Produced by TDHCA's Financial Administration Division and fulfill §2306.072(c)(1)
- TDHCA Program Guide: A description of TDHCA's housing programs and other state and federal housing and housing-related programs, which fulfills §2306.0721(c)(4) and §2306.0721(c)(10)
- TDHCA Housing Sponsor Report: A report that provides property and occupant profiles of developments that have received assistance from TDHCA, which fulfills §2306.072(c)(6), §2306.072(c)(8), and §2306.0724

SECTION 2: ANNUAL REPORT

The Annual Report required by §2306.072 of the Texas Government Code includes the following sections:

- TDHCA's Operating and Financial Statements
- *Statement of Activities*: Describes TDHCA activities during the preceding year that worked to address housing and community service needs
- *Statement of Activities by Region*: Describes TDHCA activities by region
- *Housing Sponsor Report*: Describes fair housing opportunities offered by TDHCA's multifamily development inventory
- *Analysis of the Distribution of Tax Credits*: Provides an analysis of the sources, uses, and geographic distribution of housing tax credits
- *Average Rents Reported by County*: Provides a summary of the average rents reported by the TDHCA multifamily inventory

OPERATING AND FINANCIAL STATEMENTS

TDHCA's Operating Budgets and Basic Financial Statements are prepared and maintained by the Financial Administration Division. For copies of these reports, visit http://www.tdhca.state.tx.us/finan.htm.

STATEMENT OF ACTIVITIES

The Department has many programs that provide an array of services. This section of the Plan highlights TDHCA's activities and achievements during the preceding fiscal year through a detailed analysis of the following:

- TDHCA's performance in addressing the housing needs of low, very low, and extremely low income households
- TDHCA's progress in meeting its housing and community services goals

This analysis is provided at the State level and within each of the 13 service regions TDHCA uses for planning purposes (see Figure 2.1). For general information about each region, including housing needs and housing supply, please see the Housing Analysis section of this document.

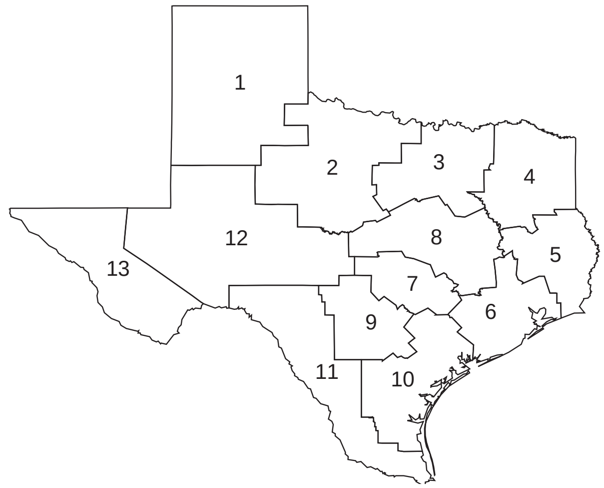

Figure 2.1 State Service Regions

FUNDING COMMITMENTS AND HOUSEHOLDS SERVED BY ACTIVITY AND PROGRAM

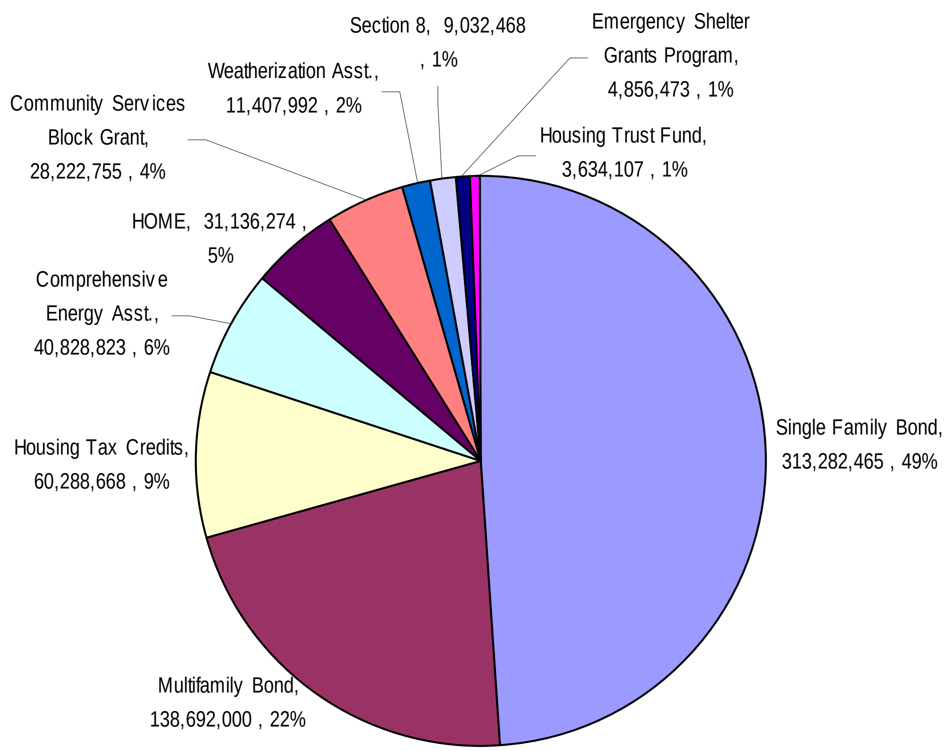
For the state and each region, a description of funding allocations, amounts committed, target numbers, and actual number of persons or households served for each program is provided. Along with the summary performance information, data on the following activity subcategories is provided.

- Renter
  - New Construction activities support multifamily development, such as the funding of developments and predevelopment funding.
  - Rehabilitation Construction activities support the acquisition, rehabilitation, and preservation of multifamily units.
  - Tenant Based Assistance is direct rental payment assistance.
- Owner
  - Single family development includes funding for housing developers, nonprofits, or other housing organizations to support the development of single family housing.
  - Single family financing and homebuyer assistance helps households purchase a home, through such activities as mortgage financing, and down payment assistance.
  - Single family owner-occupied assistance helps existing homeowners who need home rehabilitation and reconstruction assistance.
  - Community services includes supportive services, energy assistance, and homeless assistance activities.

In FY 2007, TDHCA committed $641,337,025 in total funds. Almost all of this funding, over 99 percent of the total, came from federal sources. TDHCA committed funding for activities that predominantly benefited extremely low, very low, and low income individuals. The chart below displays the distribution of this funding by program activity.

Total Funding By Program, FY 2007

Total Funds Committed: $641,337,025



Funding and Households/Persons Served by Activity, FY 2007, All Activities

Household Type	Activity	Committed Funds	Number of Households/ Individuals Served	% of Total Committed Funds	% of Total Households/ Individuals Served

**For these programs, funds and households served reflect different 12 month periods.*

^ ESGP and CSBG programs represent individuals served, not households

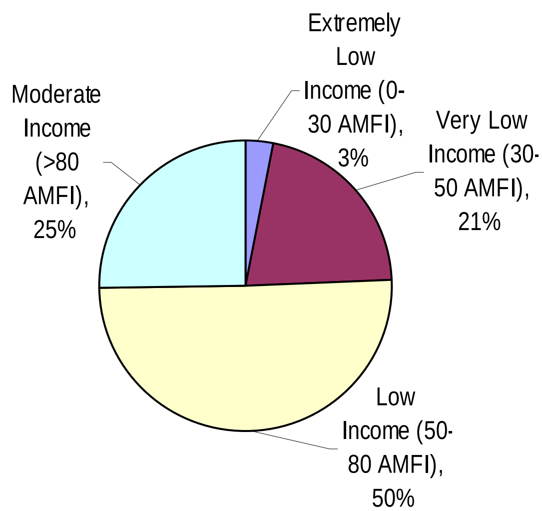
FUNDING COMMITMENTS AND HOUSEHOLDS SERVED BY INCOME GROUP

The SLIHP uses the following subcategories to refer to the needs of households or persons within specific income groups.

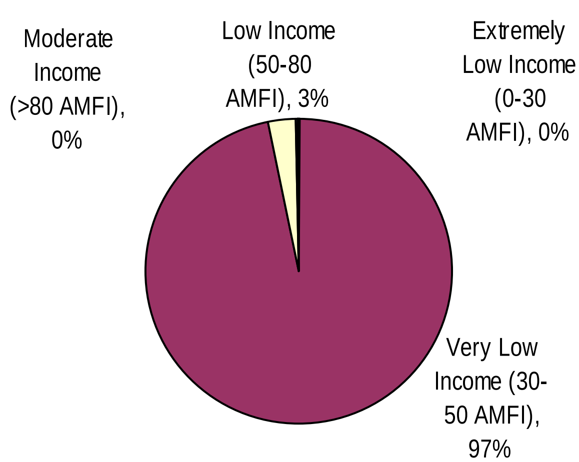
- Extremely Low Income (ELI): 0% to 30% area median family income (AMFI)
- Very Low Income (VLI): 31% to 50% (AMFI)
- Low Income (LI): 51% to 80% (AMFI)
- Moderate Income and Up (MI): >80% (AMFI)

The vast majority of households and individuals served through CEAP, WAP, and ESGP earn less than 30 percent area median family income. However, federal tracking of assistance from these programs is based on poverty guidelines, which do not translate easily to an AMFI equivalent. For conservative reporting purposes, assistance in these programs is reported in the VLI category.

Total Funding by Income Level, FY 2007



Total Households Served by Income Level, FY 2007



Funding and Households/Persons Served by Income Category, FY 2007

All Activities

Activity	Committed Funds*	Number of Households/ Individuals Served	% of Total Committed Funds	% of Total Households/ Individuals Served

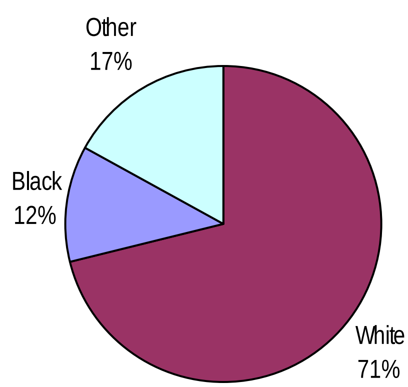
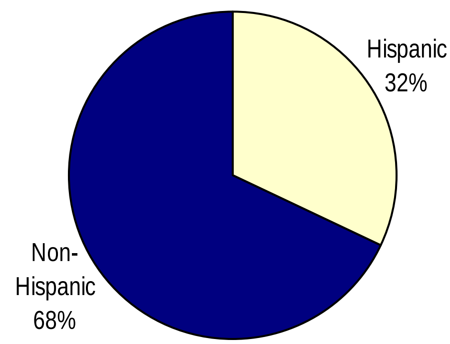
RACIAL AND ETHNIC COMPOSITION OF HOUSEHOLDS RECEIVING ASSISTANCE

As required by legislation, TDHCA reports on the racial and ethnic composition of individuals and families receiving assistance. These demographic categories are delineated according to the standards set by the U.S. Census. Accordingly, "race" is broken down into three subclassifications: White, Black, and Other. "Other" includes races other than White and Black, as well as individuals with two or more races. As ethnic origin is considered to be a separate concept from racial identity, the Hispanic population is represented in a separate chart. Persons of Hispanic origin may fall under any of the racial classifications. Households assisted through each TDHCA program or activity have been delineated according to these categories. Regional analyses of this racial data are included in the Statement of Activities by Uniform State Service Region section that follows. Note that the state population racial composition charts examine individuals, while the many program racial composition charts examine households.

Racial Composition of the State of Texas | **Ethnic Composition of the State of Texas**

20,851,820 Total Individuals





Housing Programs

Racial and ethnic data on housing programs is presented below using two general categories: Renter Programs and Homeowner Programs. Office of Colonia Initiatives programs are reported in the Homeowner Programs category under the following funding sources: HOME Program for Contract for Deed loans, Single Family Bond for some Contract for Deed loans and some Texas Bootstrap Program loans, and the Housing Trust Fund for some Texas Bootstrap loans.

Renter Programs

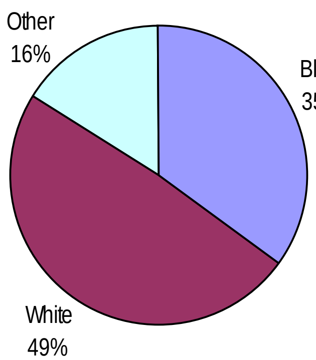
The following charts depict the racial and ethnic composition of households receiving assistance from all TDHCA renter programs. Included in this category are households participating in TDHCA's Tenant Based Rental Assistance Program (TBRA) and Section 8 Housing Choice Voucher Program, as well as households residing in TDHCA-funded multifamily properties.

Multifamily properties receive funding through one or more of the following TDHCA programs: the Housing Tax Credit Program, Housing Trust Fund, HOME Investment Partnership Program, and Multifamily Bond Program. Data for these programs is collected from the Fair Housing Sponsor Report, which is gathered each year from TDHCA-funded housing developments. The report includes information about each property, including the racial composition of the tenant population as of

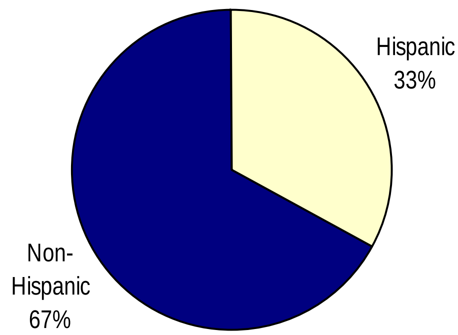
December 31 of the given year. Accordingly, the 2007 report is a snapshot of property characteristics on December 31, 2006.

It should be noted that the Housing Sponsor Report does not report on or represent all units financed by TDHCA. Some submitted reports describe properties under construction, which do not yet have occupied units. Some properties did not submit a report, and still others did not fill out the report accurately. Therefore, TDHCA is left with usable data for only a portion of existing multifamily units. For racial and ethnicity analysis, only 82% of the unit data received from the monitored properties could be used. As a result, the following charts present a picture of race and ethnicity based on samples, and may not represent actual percentages.

Racial Composition of TDHCA-Assisted Renter Households



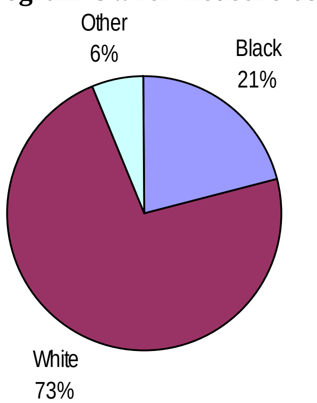
Ethnic Composition of TDHCA-Assisted Renter Households



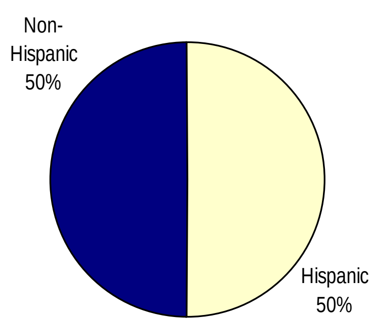
Homeowner Programs

The following charts depict the racial and ethnic composition of households receiving assistance from all TDHCA homeowner programs. TDHCA homeowner assistance comes in the form of three programs: the Single Family Bond Program, HOME Owner-Occupied Home Repair Program, and HOME Homebuyer Assistance Program. Due to the data reporting techniques of the Single Family Bond Program, race and ethnicity are combined into one category.

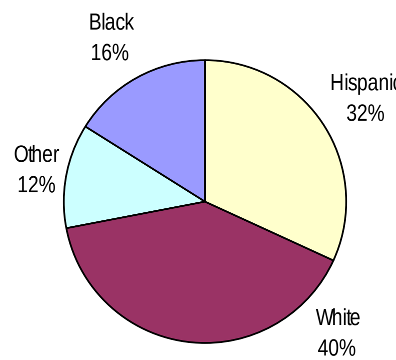
Racial Composition of HOME Program Owner Households



Ethnic Composition of HOME Program Owner Households



Ethnic Composition of SF Bond Program Owner Households



Community Affairs Programs

The Community Affairs programs allocate funding to entities with service areas that span across two or more uniform state service regions, so racial data for these programs is reported by entity rather than region. Due to the data reporting techniques of the Weatherization Assistance Program (WAP), Energy Assistance Program (CEAP), and Community Services Block Grant (CSBG) Program race and ethnicity are combined into one category. The Emergency Shelter Grant Program (ESGP) reports race and ethnicity as two separate categories

Weatherization Assistance Program

The Weatherization Assistance Program (WAP) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. Because of this, WAP racial composition data for FY 2007 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial and ethnic composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

Racial and Ethnic Composition of WAP Assisted Households, Statewide, 2007

Comprehensive Energy Assistance Program

The Comprehensive Energy Assistance Program (CEAP) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. Because of this, CEAP racial composition data for FY 2007 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

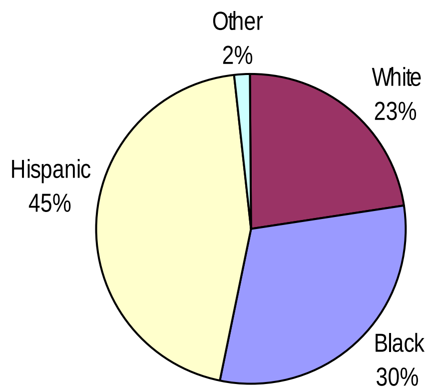
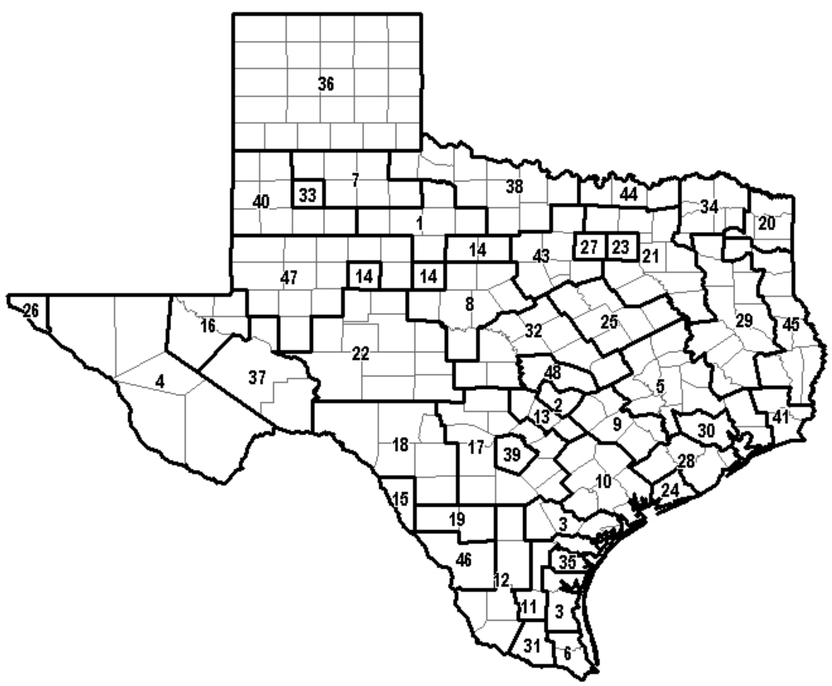
Community Services Block Grant Program

The Community Services Block Grant Program (CSBG) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions. In addition, some CSBG subcontractors have been awarded funding for special projects that overlap existing service areas. Because of this, CSBG racial composition data for FY 2007 is listed according to subcontractor. A map is provided in order to locate subcontractor service areas. Racial composition for the state is available, but because this data does not fit into regional boundaries, regional data is not available.

Racial and Ethnic Composition of Individuals Receiving CSBG Assistance, Statewide, FY 2007



CSBG Subcontractor Service Areas, FY 2007



Racial Composition of Individuals Receiving CSBG Assistance by Subcontractor, Statewide, FY 2007

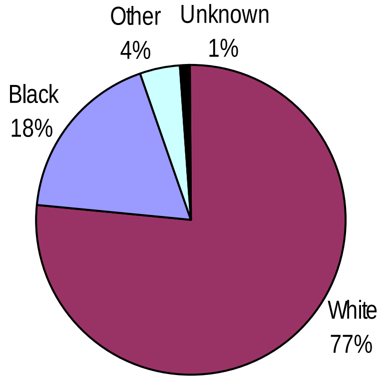
*These contractors receive some additional funding to fund specialized activities for a few counties that fall outside their service area.

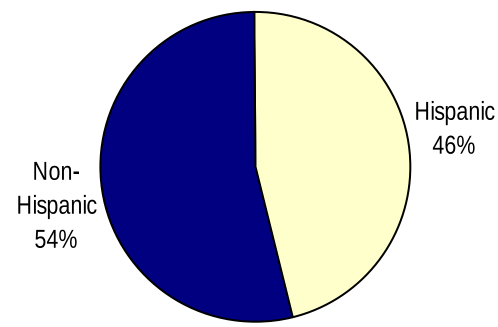
Emergency Shelter Grants Program

The Emergency Shelter Grants Program (ESGP) funds a network of subcontractor organizations, some of which have a service area that spans across two or more regions, or multiple subcontractors serve the same area. Because of this, ESGP racial composition data for FY 2007 is listed according to subcontractor. Racial composition for the state is available, but is unavailable at the regional level.

Racial Composition of Individuals Receiving ESGP Assistance, Statewide, FY 2007



Ethnic Composition of Individuals Receiving ESGP Assistance, Statewide, FY 2007



Racial and Ethnic Composition of Individuals Receiving ESGP Assistance by Subcontractor, Statewide, FY 2007

PROGRESS IN MEETING TDHCA HOUSING AND COMMUNITY SERVICES GOALS

The goals, strategies, and objectives established in the Legislative Appropriations Act, the TDHCA *Strategic Plan*, and the *State of Texas Consolidated Plan*, guide TDHCA's annual activities through the establishment of objective performance measures. TDHCA's resulting goals are as follows:

1) Increase and preserve the availability of safe, decent, and affordable housing for very low, low, and moderate income persons and families
2) Promote improved housing conditions for extremely low, very low, and low income households by providing information and technical assistance.
3) Improve living conditions for the poor and homeless and reduce the cost of home energy for very low income Texans.
4) Ensure compliance with the TDHCA's federal and state program mandates.
5) Protect the public by regulating the manufactured housing industry in accordance with state and federal laws.
6) Target its housing finance programs resources for assistance to extremely low income households.
7) Target its housing finance resources for assistance to very low income households.
8) Provide contract for deed conversions for families who reside in a colonia and earn 60 percent or less of the applicable area median family income
9) Work to address the housing needs and increase the availability of affordable and accessible housing for persons with special needs through funding, research, and policy development efforts.

To avoid duplication of information, progress made towards meeting those goals, the upcoming year's goals, and information on TDHCA's actual performance in satisfying in FY 2007 goals and strategies is provided in Section 4: Action Plan.

STATEMENT OF ACTIVITIES BY UNIFORM STATE SERVICE REGION

This section describes TDHCA's FY 2007 activities by Uniform State Service Region. The regional tables do not include information for WAP, CEAP, ESGP, CSBG, and CFNP because figures are not available for these programs at the regional level. Additionally, for purposes of reporting, Office of Colonia Initiatives figures do not appear as an independent category, but rather the figures are grouped under their respective funding sources. For example, most Contracts for Deed Conversion are reported under HOME Program Homebuyer Assistance.

As required by legislation, TDHCA reports on the racial composition of individuals and families receiving assistance. Regional information has been organized into two generalized categories of housing activity type.

Renter Programs

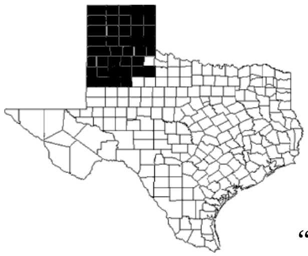
Includes the Housing Tax Credit Program, the Multifamily Bond Program, Housing Trust Fund multifamily activities, HOME multifamily activities, the Section 8 Program and HOME Tenant Based Rental Assistance program

Homeowner Programs

Includes the First Time Homebuyer Program, HOME Owner-Occupied Housing Assistance, HOME Homebuyer Assistance, and Housing Trust Fund single family activities (Bootstrap Loan Program)

For more information on racial reporting and these categories, please see "Racial Composition of Households Receiving Assistance" under the Statement of Activities section.

REGION 1



TDHCA allocated $9,546,973 in the region in FY 2007.

Homeowner programs accounted for the largest segment of this total, while “Low Income” households (50-80% AMFI) was the most served income group.

Note: Because loan servicers do not record race and ethnicity data separately, data for the Single Family Bond program is presented in one combined chart.

Fair Housing Sponsor Report Analysis

TDHCA requires that housing developments of 20 units or more that receive financial assistance from TDHCA submit an annual housing sponsor report. This report includes the contact information for each property, the total number of units, the number of accessible units, the rents for units by type, the racial composition information for the property, the number of units occupied by individuals receiving supported housing assistance, the number of units occupied delineated by income group, and a statement as to whether there have been fair housing violations at the property. This information depicts the property information as of a specific date, December 31, of each year.

Because of the extensive nature of the information, TDHCA has elected to provide this report under a separate cover: the TDHCA *Housing Sponsor Report* (HSR). The HSR includes an analysis of the collected information, as well as the information submitted by each property. In addition, in fulfillment of §2306.072(c)(8), the HSR contains a list of average rents by Texas county, based on housing sponsor report responses from TDHCA-funded properties.

For more information and a copy of this report, please contact the TDHCA Housing Resource Center at (512) 475-3976 or visit http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm.

GEOGRAPHIC DISTRIBUTION OF HOUSING TAX CREDITS

Section 2306.111(d) of the Government Code requires that TDHCA use a Regional Allocation Formula (RAF) to allocate its 9% HTCs to the Uniform State Service Regions it uses for planning purposes. Because of the level of funding and the impact of this program in financing the multifamily development of affordable housing, this section of the Plan discusses the geographical distribution of HTCs.

For FY 2007, the Department had $49,085,817 in housing tax credits to allocate through the Competitive Housing Tax Credit application process. This amount was comprised of the annual volume cap, recaptured and returned credits, and $548,821 from the national pool of unused tax credits from other states. Over the course of the year, the total amount of Competitive and 4% tax credits approved by the Board, including binding agreements to 2004 applications using 2007 tax credits and forward commitments, was: $80,786,887. In July 2007, the Department's Board approved 53 applications for Competitive HTCs, 8 forward commitments made out of the 2007 State Housing Credit Ceiling, and 52 binding agreements of housing tax credits to 2004 applications using the 2007 State Housing Credit Ceiling, totaling $47,695,110. Any remaining 2007 credit authority will be allocated to applicants on the 2007 waiting list. Alternately, if the credit balance meets the IRS de minimus requirements, it may be rolled into the 2008 State Housing Credit Ceiling. Under either scenario, the Department will be eligible to receive credits from the national pool of unused credits. The 4% awards, which are approved by the Board throughout the year, totaled $28,132,472 for FY 2007. Information on these awards, as well as the entire HTC inventory, can be found on the HTC Program's web page at http://www.tdhca.state.tx.us/multifamily/htc/index.htm. The map on the following page displays the geographic distribution of the FY 2007 9% and 4% awards

REGIONAL ALLOCATION FORMULA

The table below shows the funding distribution of FY 2007 awards by region and includes the variations between the actual distribution and the 9% HTC RAF targets. The Department plans the credit distributions to match the HTC RAF targets as closely as possible; the RAF targets apply to the 9% HTC program. To that end, as many whole awards as possible are made in each Uniform State Service Region's urban and rural subregions, based on the RAF target for each. The total remainder in each region is then collapsed into 13 regional pools. The subregion with the highest original target percentage is determined within each region and, if possible, additional awards are made in these subregions out of the region's pool. If a region does not have enough qualified applications to meet its regional credit distribution target, then those credits will be apportioned to the other regions from a statewide pool of remaining credits.

Region	All HTCs	% of All HTCs	4% HTCs	% of All 4% HTCs	9%HTCs	% of All 9% HTCs	Targeted 9% Dist. Under RAF	Difference between Actual and Targeted
1	$2,654,085	3.3%	$629,797	2.1%	$2,024,288	3.9%	4.7%	-0.8%

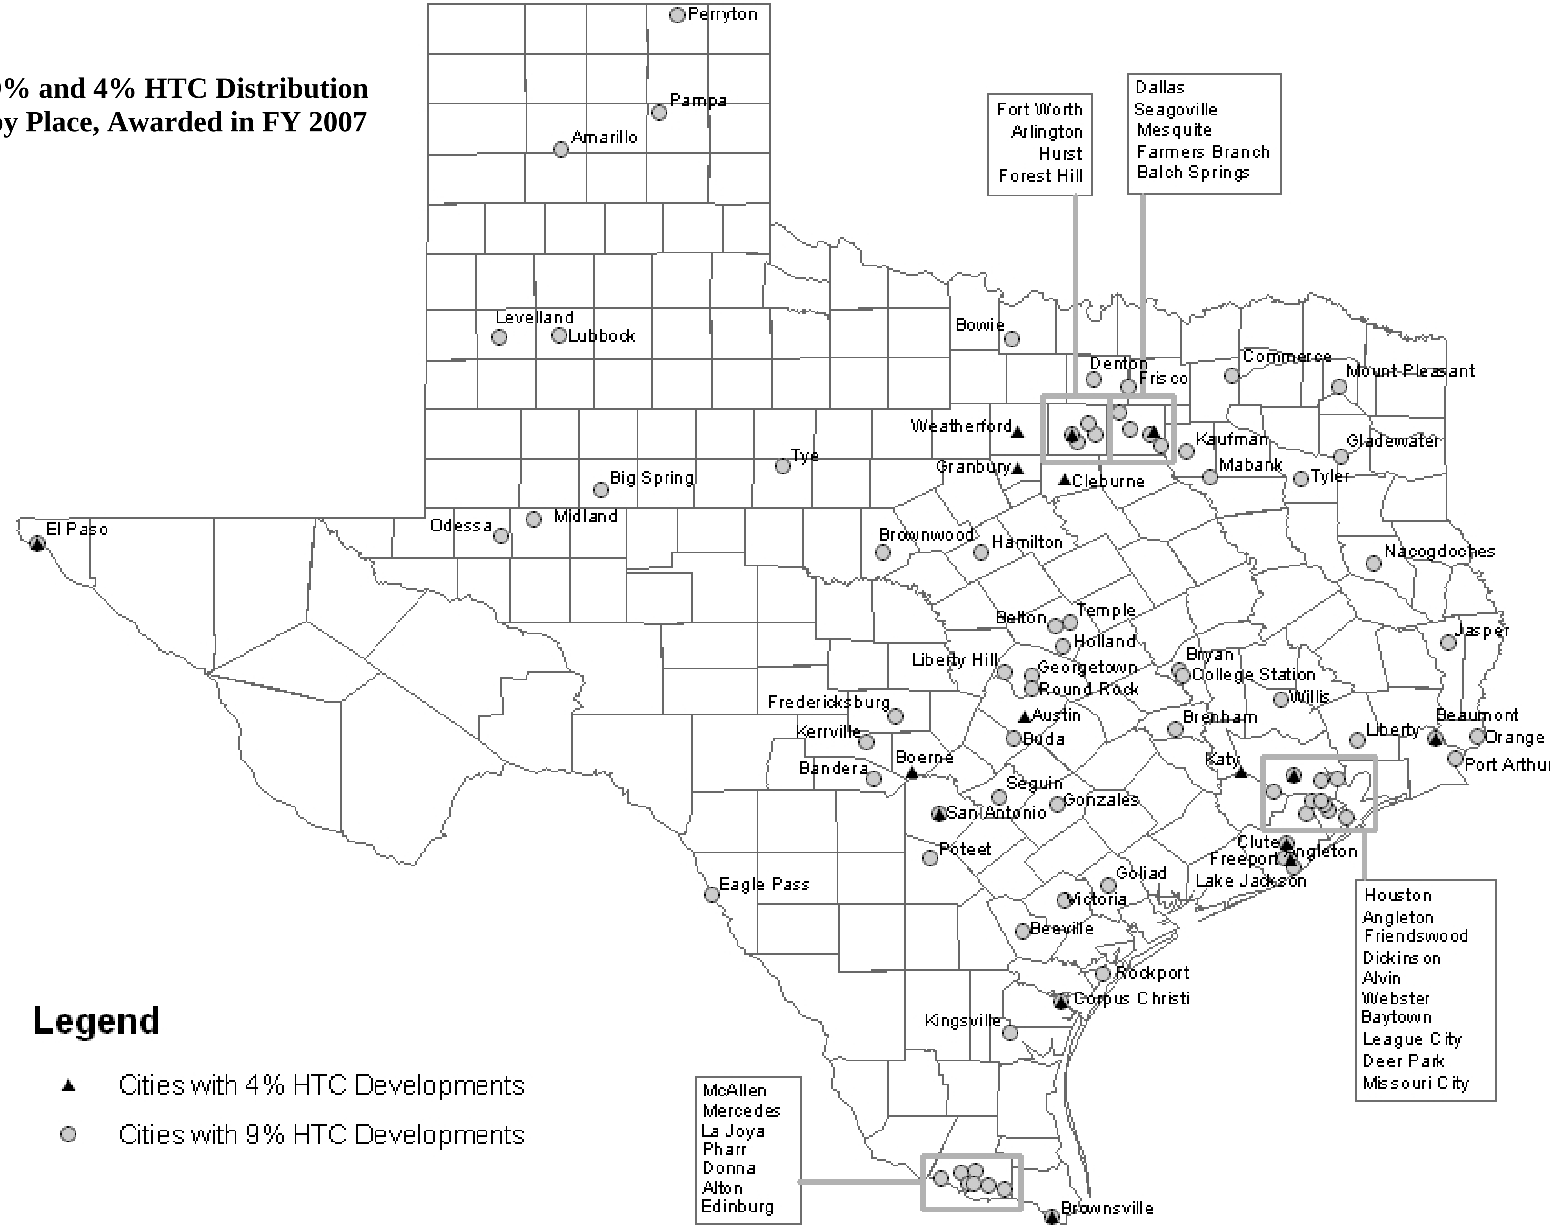
9% and 4% HTC Distribution by Place, Awarded in FY 2007



SECTION 3: HOUSING ANALYSIS

This section of the Plan contains an overview of the affordable housing needs in the state and an estimate and analysis of the housing needs in each region.

DATA SOURCES AND LIMITATIONS

The information provided in this section should be considered within the context of its limitations. The Department recognizes that an undistorted assessment of housing need can be found only at the local level based on the direct experience of local households. The following issues should be considered when reviewing the information contained in this report:

- Nuances of housing need are lost when data is aggregated into regional, county, and statewide totals. For example, housing needs in rural communities are often distorted when reported at the county level because housing needs are often very different in rural and urban areas. The large population of urban metropolitan areas can skew the data and mask the needs of the rural areas.
- Reliable data available on the condition of the housing stock, the homeless population, and the housing needs of special needs populations is very limited.

2000 Census and 2000 CHAS data is primarily used in this report. The content and format of the Census-based tables, graphs, and maps provided in this section were derived, in part, from a methodology for housing needs assessment in the National Analysis of Housing Affordability, Adequacy, and Availability: A Framework for Local Housing Strategies. The Urban Institute prepared this document for the US Department of Housing and Urban Development (HUD). It provides a methodology with which to describe and analyze local housing markets in order to develop strategies for addressing housing problems and needs. The document served as a guide for the preparation of Comprehensive Housing Affordability Strategy (CHAS) reports. As such, it provides a systematic framework for housing market analysis. HUD collaborated with the US Census Bureau to develop special tabulations of the 2000 Census data.

The CHAS database classifies households into five relative income categories based on reported household income, the number of people in the household, and geographic location. These income categories are used to reflect income limits that define eligibility for HUD's major assistance programs, as well as for other housing programs, such as the Housing Tax Credit Program. Households are classified into income groups by comparing reported household income to HUD-Adjusted Median Family Income (HAMFI). The income limits are calculated by household size for each metropolitan area and non-metropolitan county in the United States and its territories. They are based on HUD estimates of median family income with several adjustments as required by statute. The income classifications are extremely low income, very low income, low income, moderate income, and above 95 percent of HAMFI.[1]

The income limits for metropolitan areas may not be less than limits based on the state non-metropolitan median family income level and must be adjusted accordingly. Income limits must be also adjusted for family size and may be adjusted for areas with unusually high or low family income or housing-cost-to-income relationships.

Unit affordability compares housing cost to local area HAMFI. Affordable units are defined as units for which a household would pay no more than 30 percent of its income for rent and no more than two and one-half times its annual income to purchase. Since HUD's adjusted median family incomes are estimated

[1] The CHAS figures for moderate and higher income households in Region 11 indicate that there are only 199 persons with incomes between 80-95 percent of the AMFI. TDHCA has been unable to get more accurate information for this segment of the population. However, the planning impact for the SLIHP is relatively low because, except for the first time homebuyer program which is done through a network of participating lenders, TDHCA programs serve persons below 80 percent AMFI.

for a family of four, affordability levels are also adjusted to control for various-sized units based on the number of people that could occupy a unit without overcrowding. This adjustment is made by multiplying the threshold described above by 75 percent for a 0–1 bedroom unit, 90 percent for a two bedroom unit, and 104 percent for a 3+ bedroom unit.

Homeless figures are taken from 2000 Census group quarters population and type tables, contained in Census 2000 Summary File 1. Group quarters type designations include institutional quarters, which include correctional facilities, hospitals, and juvenile institutions, as well as noninstitutional quarters, which include military quarters, group homes, dormitories, and other situations. Based on the Definitions of Subject Characteristics contained in the Technical Documentation for Summary File 1: 2000 Census of Population and Housing published by the US Census Bureau, this report uses "other noninstitutional group quarters" and "other nonhousehold living situations" census figures to represent the homeless population in each region. "Other noninstitutional group quarters" counts individuals in shelters for abused women, soup kitchens, mobile food vans, and other targeted nonsheltered outdoor locations where there is evidence of human occupation. "Other nonhousehold living situations" counts individuals with no usual home residing in hostels and YMCAs who were not counted in other tabulations.

The US Census also completed a special tabulation, Emergency and Transitional Shelter Population: 2000, based on metropolitan areas with 100 or more people in emergency and transitional shelters. It must be noted that this data only refers to metropolitan areas with 100 or more people in shelters, so is not a comprehensive picture of the total population living in shelters. In the region sections of this document, if the Census counted individuals living in emergency shelters in a metropolitan area that is located in the region, those figures are provided.

It must be emphasized that the regional estimates of the homeless populations are not comprehensive. The various definitions of homeless and methods in counting the homelessness make definitive tabulations difficult. The Texas Interagency Council for the Homeless estimates that about 200,000 people, or 1 percent of the state's population, are homeless.[2] The Census figures for individuals living in "other noninstitutional group quarters" and "other nonhousehold living situations" count only 28,377 individuals statewide.

The needs assessment data is augmented with additional information from the perspective of local officials, where available. In March 2006, TDHCA conducted the 2006 State of Texas Community Needs Survey. This survey was designed to obtain a better understanding of housing and community development needs, issues, and problems at the state, regional, and local levels. The survey gave local officials, who are most familiar with the unique characteristics of their communities, a voice in determining how Texas's affordable housing, supportive service, and community development needs can be most effectively addressed.

STATE OF TEXAS

The state level housing analysis includes information on demographics, special needs populations, and affordable housing need indicators. Department plans reflect this statewide information as well as the consideration of affordable housing assistance from various sources.

DEMOGRAPHIC CHARACTERISTICS

Texas is one of the fastest growing states in the nation. According to recent Census data, Texas population expanded by nearly a quarter (22.8 percent) between 1990 and 2000, far exceeding the national growth average of 13.2 percent for the same decade. The increase in state population by 3,865,310 persons was the largest of any decade in Texas history. More than one of every nine persons added to the population of the United States in the 1990s was added in Texas.[3]

Projected Population Change and Implications for Housing Need

- Looking at long-term demographic projections, it is clear that the demand for affordable and subsidized housing will increase in the coming years.
- The 2000 state population of 20.9 million is expected to surge to 50.4 million by 2040.
- The Anglo population will account for only 3.9 percent of net population growth from 2000 to 2040, meaning that more than 96 percent of the total net increase in Texas population between 2000 and 2040 will be due to the non-Anglo population.
- Anglo population is expected to grow by 10.4 percent between 2000 and 2040, while blacks are expected to increase by 65.0 percent and Hispanics by 348.7 percent.
- The population is becoming older: the median age will increase from 32.3 in 2000 to 38.3 in 2040. The percentage of the population that was 65 or older was 9.9 percent in 2000 but will increase to 20 percent by 2040.
- Growth in the number of households, projected at 162.1 percent over the period 2000-2040, will outstrip population growth: 142.6 percent during the same period.

Expected housing demand is directly linked to projected changes in population characteristics. The current ethnic shift is significant because of the substantial differences between the races in terms of income level. The absolute difference in median household income between Anglos and Blacks was $13,602 in 1989, but $17,857 in 1999; and the Anglo-Hispanic difference was $12,242 in 1989, but $17,289 in 1999. Similarly, the poverty rates of 23.4 percent for Blacks and 25.4 percent for Hispanics were still roughly three times as high as the 7.8 percent of persons in poverty among Anglos. Because of these disparities, households in Texas will become poorer over the coming decades unless the relationship between ethnicity and income somehow changes.[4]

A correlation also exists between income and age. According to the 2000 Census, 13.1 percent of Texans age 65 and older live below the poverty level. Lower incomes combined with rising healthcare costs contribute to the burden of paying for housing. Approximately 30 percent of all elderly households spend more than 30 percent of their income on housing, while 14 percent spend more than 50 percent of their income on housing. These statistics take on new urgency when considered alongside the anticipated upsurge in the state's elderly population.

---

[3] Information for the Housing Analysis comes from the 2000 US Census except where noted otherwise.
[4] Center for Demographic and Socioeconomic Research and Education, *Texas Challenge in the Twenty-First Century: Implications of Population Change for the Future of Texas*, by Steve H. Murdock et. al. (Texas A&M University System, December 2002), http://txsdc.utsa.edu/download/pdf/TxChall2002.pdf (accessed May 17, 2006).

Not only will the demographics of the population be changing, but so will its needs. The faster growth in number of households than in total population is a reflection of the large number of non-Anglos who will enter household-formation ages during this time period. More young families mean an increased demand for housing.[5]

Poverty and Income

According to the 2000 Census, Texas has the ninth highest overall poverty rate in the nation, with a rate of 15.4 percent compared to the national rate of 12.4 percent. Poverty conditions along the Texas-Mexico border warrant special attention. Parts of the region, like McAllen-Edinburg-Mission, suffer from an unemployment rate double that of the state's (12 percent vs. 6.1 percent) and less than half of state's per capita income average. Fifteen counties along the border have a poverty rate of at least 25 percent, almost double the national average. Conditions are particularly acute in the colonias, unincorporated areas along the Texas-Mexico border lacking infrastructure and decent housing. It is estimated that 43 percent of colonia residents live below the poverty level.

The poverty rate for all family households in Texas, different from the overall poverty rate, is expected to increase from the 2000 figure of 11.4 percent to 15.4 percent by 2040.[6] The primary reasons for this are the rapid growth of present minority populations and the dominance in the economy of low-paying, particularly service-industry, jobs.[7] While manufacturing and mining continue to decline, Texas ranked third in the nation in 2003 for service industry job creation. According to US Bureau of Labor Statistics data, eight of the top ten most common jobs in Texas earn incomes that fall at least $10,000 below the state median income of $33,770.

Many families who rely on these low-wage occupations for a living find it difficult to cover all essential expenses. According to a study by the Center for Public Policy Priorities, "a significant proportion of families throughout the state struggle paycheck-to-paycheck to make ends meet." The study examined a typical family's fundamental expenses, such as housing, food, child care, medical costs, transportation, taxes, etc., and compared the total bill to typical wages earned in the 27 Texas Metropolitan Statistical Areas. The study asserts that a family of four in Texas requires a household hourly income of $18 to $22 per hour (depending on the metro area in which the family lives) to simply meet its most basic needs. In a majority of Texas metro areas, however, half of the total employment is in occupations with a median wage under $10 per hour.[8]

The Texas Comptroller's Economic Update predicts that the fastest growing sector of the state economy over the next decade will be largely in industries requiring specialized education and skills. These industries include high tech communications, engineering, and research.

To provide a more detailed breakdown of the population by income level, this report will use the five income groups designated by HUD. Households are classified into these groups by comparing reported household incomes to HUD-adjusted median family incomes (HAMFI). The income level definitions are as follows:

- Extremely Low Income: At or below 30 percent of HAMFI
- Very Low Income: Between 31 percent and 50 percent of HAMFI
- Low Income: Between 51 percent and 80 percent of HAMFI
- Moderate Income: Between 81 percent and 95 percent of HAMFI

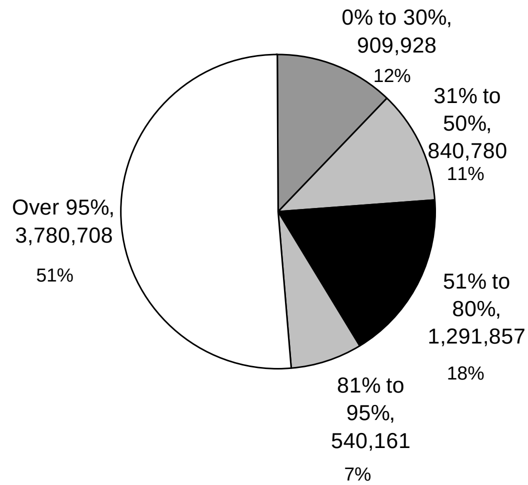
Households by Income Group in Texas, 2000



Source: 2000 CHAS data

The chart above indicates the 2000 distribution of households by income group across Texas by number and percentage. A total of 41 percent of all households are in the low income range (0 to 80 percent of HAMFI). Meeting the needs of this large portion of the state's households is TDHCA's primary focus.

AFFORDABLE HOUSING NEED

When analyzing local housing markets and developing strategies for meeting housing problems, HUD suggests the consideration of several factors. These factors include how much a household spends on housing costs, the physical condition of the housing, and whether or not the household is overcrowded. The following table reveals the number and percentage of households with at least one housing need by income category and household type.

Households with Housing Need by Income Group

		Renter Households			Owner Households		
		At Least One Problem	Total Households	Percent with At Least One Problem	At Least One Problem	Total Households	Percent with At Least One Problem
0-30% AMFI	Elderly Households	59,065	95,130	62.1%	100,876	151,597	66.5%

Physical Inadequacy (Lack of Kitchen and Plumbing Facilities)

The measure of physical inadequacy available from the CHAS database tabulation of the 2000 Census is the number of units lacking complete kitchen and/or plumbing facilities. While this is not a complete measure of physical inadequacy, the lack of plumbing and/or kitchen facilities can serve as a strong indication of one type of housing inadequacy. The following figure demonstrates that among the physically inadequate housing units for households under 80 percent of HAMFI, 44 percent are affordable to extremely low income households.

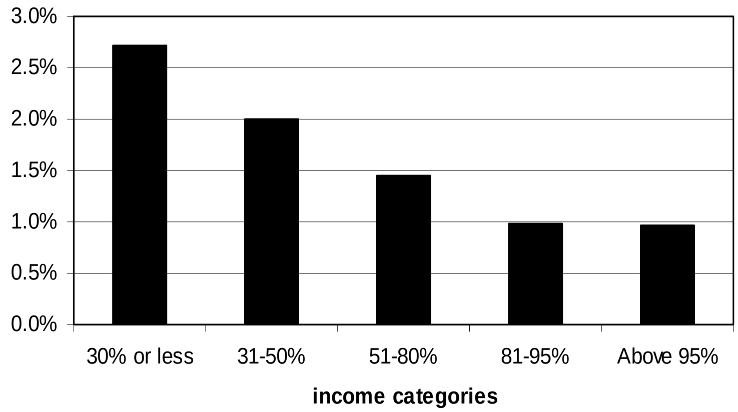
Units Lacking Kitchen and/or Plumbing Facilities by Affordability Category, 2000

	Number	Percent
0% to 30%	25,817	44%
31% to 50%	15,907	27%
51% to 80%	16,341	28%
Total	58,065	100%

Source: 2000 CHAS data

Slightly more than 1 percent of all renter households in Texas lack complete kitchen or plumbing facilities. The following table shows the distribution of this problem by income group. Households in the lowest income group, less than 30 percent HAMFI, have the highest incidence of physically inadequate housing.

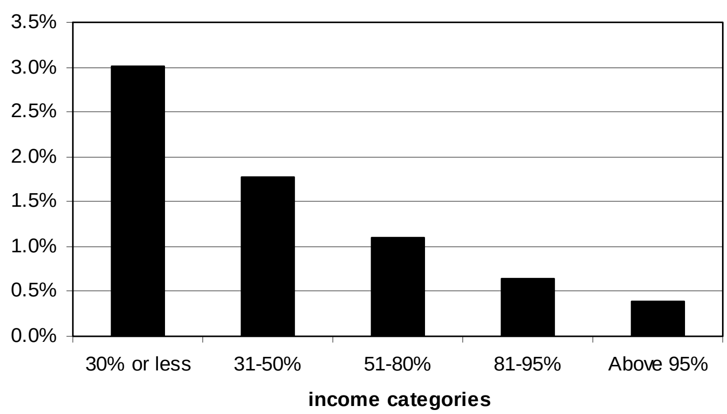
Renter-Occupied Units Lacking Complete Kitchen/Plumbing by Percent



Source: 2000 CHAS data

As is the case with renter households, inadequate kitchen and plumbing is a greater problem for the lowest income categories of owner households. A full 3 percent of owner households earning below 30 percent HAMFI lack full kitchen or plumbing facilities.

Owner-Occupied Units Lacking Complete Plumbing/Kitchen by Percent

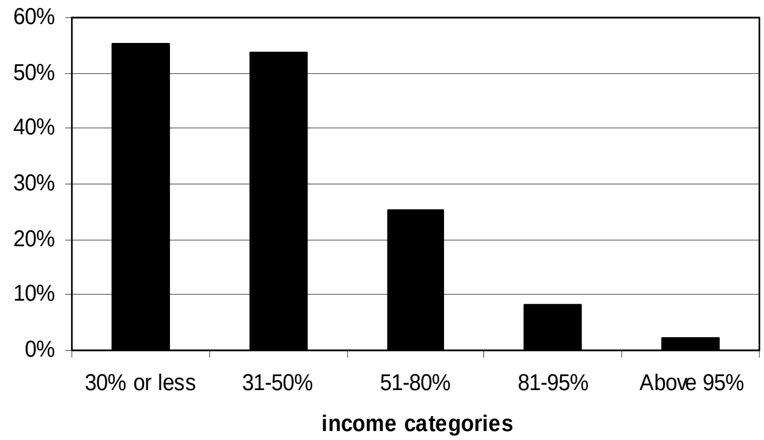


Source: 2000 CHAS data

Excess Housing Cost Burden

An excess cost burden is identified when a household pays more than 30 percent of its gross income for housing costs. When so much is spent on housing, other basic household needs may suffer. As the following graph shows, a majority of renter households in the lowest two income categories, totaling more than 540,000 households, is burdened by paying an excess portion of income toward housing. This is much greater than in the highest income category, above 95 percent HAMFI, where only 2.2 percent of households experience the problem.

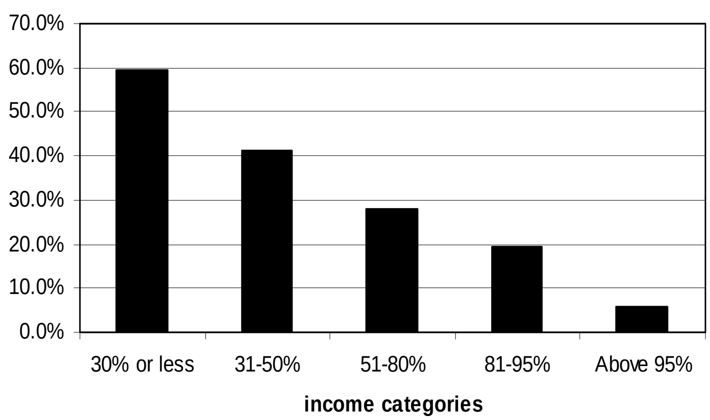
Renter Households with Excess Housing Cost Burden (>30% of Income) by percent



Source: 2000 CHAS data

As shown in the following graph, excess housing cost burden affects 59.3 percent of owner households in the lowest income category. This figure, representing a majority, is much higher than the 5.7 percent of households affected in the highest income category. The graph illustrates the direct correlation between owner income category and an owner household’s likelihood of experiencing this problem.

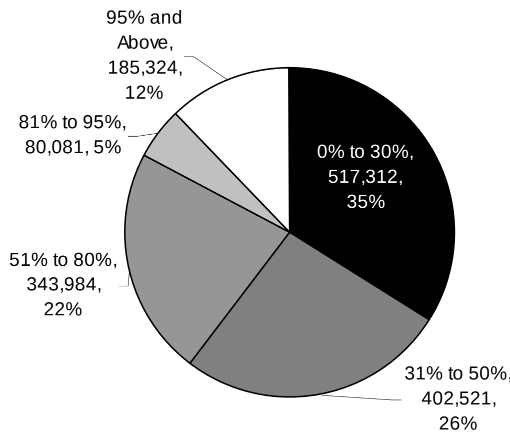
Owner Households with Excess Housing Cost Burden (>30% of Income) by percent



Source: 2000 CHAS data

The chart below shows the total number and percentage of households with excess housing cost burden by income group.

Excess Housing Cost Burden by Income Group, 2000



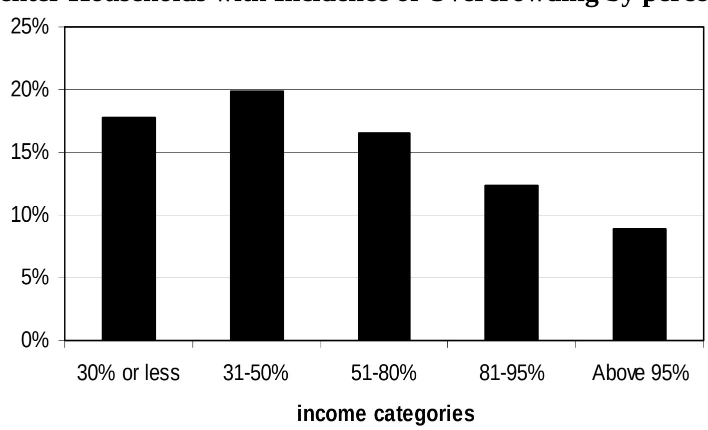
Source: 2000 CHAS Data

Overcrowding

Overcrowded housing conditions occur when a residence accommodates more than one person per each room in the dwelling. Overcrowding may indicate a general lack of affordable housing in a community where households have been forced to share space, either because other housing units are not available or because the units available are too expensive.

Lower income renter households experience overcrowded conditions more frequently than higher income households. Almost 18 percent of renter households in the extremely low income category and 19.9 percent of renter households in the low income category are afflicted by overcrowding.

Renter Households with Incidence of Overcrowding by percent



Source: 2000 CHAS data

Lower income owner households also experience overcrowded conditions more frequently than higher income owner households. More than 21 percent of owner households earning less than 50 percent HAMFI live in overcrowded conditions compared to 11.4 percent of owner households over 80 percent HAMFI.

Owner Households with Incidence of Overcrowding by percent

HOUSING AVAILABILITY AND AFFORDABILITY

The following figures compare demand and supply of affordable housing by looking at the number of households and housing units in different affordability categories. Because higher income households often reside in units that could be affordable to the lowest income households, there are fewer units available at a cost that is affordable to lower income households. For example, as shown in Figure 3.12, 1.4 million households that have incomes greater than 80 percent AMFI occupy units that would be affordable to households at 0-50 percent AMFI. Households in this category can afford units in any of the defined affordability categories. Therefore, non-low income households often limit the supply of affordable housing units available to low income households.

The table below describes the housing market interaction of various income groups and housing costs. The table shows the income classifications of the occupants of housing units. The table also illustrates the housing market mismatch between housing units and income groups. For example, very low income households (0-50 percent of HAMFI) account for only about one-third of all the occupants of housing that is affordable to them. All low income households (0-80 percent of HAMFI) make up only 48 percent of all households occupying housing affordable to them. This table illustrates housing market mismatches as well as an implicit excessive cost burden for those households that are residing in units beyond their affordability category.

Occupied Affordable Housing Units by Income Group of Occupant, 2000, by percentage of HAMFI

Number of Renter units	Total	50% or less	51-80%	Above 80%
Affordable to 0-50% HAMFI	1,112,083	588,198	246,476	277,409
Affordable to 51-80% HAMFI	1,245,842	346,703	301,491	597,648
Affordable to >80% HAMFI	305,135	52,391	41,485	211,259

Percent of Renter units	Total	50% or less	51-80%	Above 80%
Affordable to 0-50% HAMFI	100.0%	52.9%	22.2%	24.9%
Affordable to 51-80% HAMFI	100.0%	27.8%	24.2%	48.0%
Affordable to >80% HAMFI	100.0%	17.2%	13.6%	69.2%

Number of Owner units	Total	50% or less	51-80%	Above 80%
Affordable to 0-50% HAMFI	2,099,253	549,469	458,002	1,091,782

LOCAL PERCEPTION

TDHCA acknowledges that the greatest understanding of housing needs is found at the local level. TDHCA continuously strives to improve the methods used to identify regional affordable housing needs.

State of Texas Community Needs Survey

Beginning in March 2006 and ending May 2006, the Department conducted the 2006 Community Needs Survey (CNS) online to examine housing and community service needs at the local level. The survey contained 18 questions regarding housing, community affairs, and community development needs and was distributed to state representatives, state senators, mayors, county judges, city managers, housing/planning departments, USDA local offices, public housing authorities, councils of governments, community action agencies, and Housing Opportunities for Persons with AIDS (HOPWA) agencies—a total of 2,529 individuals and entities. There was a 17.2 percent response rate for the survey.

Analysis of the 2006 CNS demonstrates a strong need for housing and energy assistance. Of those respondents ranking their community's need for general assistance, approximately 31 percent indicated that housing assistance (including down payment assistance, home repair, and rental payment assistance) was their first or second priority need. Approximately 28 percent of question respondents ranked energy assistance activities as their first or second priority need. Approximately 18 percent of respondents indicated that the development of apartments was the priority need, 15 percent chose capacity building assistance, and 7 percent chose homeless assistance.

A significant 49 percent indicated that home repair assistance was the greatest need when compared to home purchase assistance and rental payment assistance. Only 8 percent stated that there was a minimal need for these housing activities in their communities. Regarding rental development activities, 35 percent indicated that their community's greatest need was the construction of new rental units, while approximately 33 percent indicated that both rental construction and rehabilitation activities were the same priority. Only 13 percent identified rehabilitation of existing units as their priority need, which is the same percentage of respondents who stated that there was a minimal need for rental development in their areas.

When considering energy assistance activities, 43 percent indicated that utility payment assistance was the greatest need followed by weatherization and minor home repairs. For homeless assistance activities, a majority 48 percent indicated that there was a minimal need for this type of assistance in their communities and 16 percent did not have an opinion on the subject. Of respondents indicated a needed activity, homeless prevention services received the highest response with 12 percent indicating that it was their priority need.

The regional results from the CNS are incorporated into the regional plans in the next section of this report. A final report on the survey, the “Report on the 2006 State of Texas Community Needs Survey,” is available online from the TDHCA Housing Resource Center at http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm#reports.

STATE HOUSING SUPPLY

The 2000 US Census reported 8.2 million housing units in Texas, of which 90.6 percent are occupied. The number of housing units increased 16 percent from 7.0 million units that were on the ground in 1990. The breakdown of occupied units by type is 4.7 million owner occupied (a 28 percent increase over 1990) and 2.8 million renter occupied (a 13 percent increase over 1990). The average household size for owner-occupied units increased to 2.87 persons per unit in 2000 as compared to 2.85 units in 1990. The average household size for renter units decreased slightly to 2.53 persons per unit in 2000 as compared to 2.55 units in 1990.

Almost 67 percent of the housing units in Texas are single family units, 14 percent are multifamily up to 19 units, and 10 percent are within multifamily structures with 20 units or more. An additional 9.4 percent are mobile homes, RVs, or boats.

Housing Type, 2000

	Total	Percent
Housing Units	8,157,575	
One Unit	5,420,910	66.50%
2 to 19 Units	1,151,599	14.10%
Over 20 Units	819,101	10.00%
Mobile Homes	731,652	9.00%
Boats, RVs	34,313	0.40%

Source: 2000 US Census

Assisted Housing Inventory

The following table shows the number of multifamily units in the state financed through state and federal sources, including TDHCA, the US Department of Housing and Urban Development (HUD), public housing authorities (PHAs), Section 8 Housing Choice Vouchers, and the United States Department of Agriculture (USDA). The table also includes local housing finance corporations (HFCs), a category which encompasses the Texas State Affordable Housing Corporation. Please note that because some developments layer funding from multiple sources, there may be double counting.

TDHCA data includes multifamily developments awarded up until the end of FY 2007, so not all units included in the total had been built at the time of this document's publication. Additionally, the TDHCA unit total only includes those units that have income restrictions, and does not include market-rate units that are available in some developments.

HUD unit data was obtained from HUD's April 2007 report, "Multifamily Housing Inventory Survey of Units for the Elderly and Disabled," available at http://www.hud.gov/offices/hsg/mfh/hto/state/tx.pdf. Though the report title specifically references units available to the elderly and persons with disabilities, the report also contains information on family properties, and therefore encompasses the full scope of HUD properties. Please note, however, that there may be double counting with units financed through other programs, including public housing.

Numbers for current PHA units and Section 8 Housing Choice Vouchers were obtained from HUD's "Housing Authority Profiles" data at https://pic.hud.gov/pic/haprofiles/haprofilelist.asp. TDHCA Section 8 vouchers are also included in this figure. USDA unit data was obtained directly from USDA staff in October 2007.

HFC data, including Texas State Affordable Housing Corporation data, was obtained from the Housing Finance Corporation Annual Report that HFCs are required to submit to TDHCA annually. The figure describes the total units financed by the HFCs through June 2007, and does not specify assisted units, so these unit totals will also include market-rate units in the area. Because the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final state total.

State Assisted Multifamily Units

	State Total	Percent of State Inventory
TDHCA Units	188,107	36.4%
HUD Units	102,349	19.8%
PHA Units	55,098	10.6%
Section 8 Vouchers	145,416	28.1%
USDA Units	26,435	5.1%
HFC Units*	96,001	N/A
Total	517,405	100%

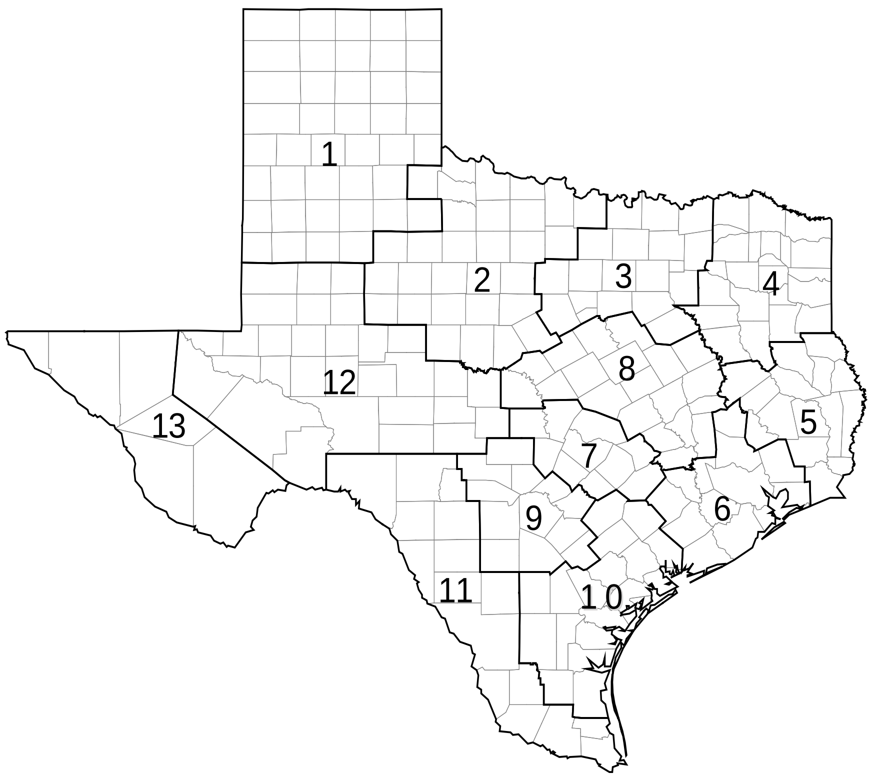
*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

UNIFORM STATE SERVICE REGIONS

The Department uses 13 Uniform State Service Regions for research and planning purposes. These regions follow the Texas Comptroller of Public Accounts' grouping that creates 13 regions to better identify the unique characteristics of the border counties and to treat larger metropolitan areas as distinct regions. The Uniform State Service Regions are shown below.

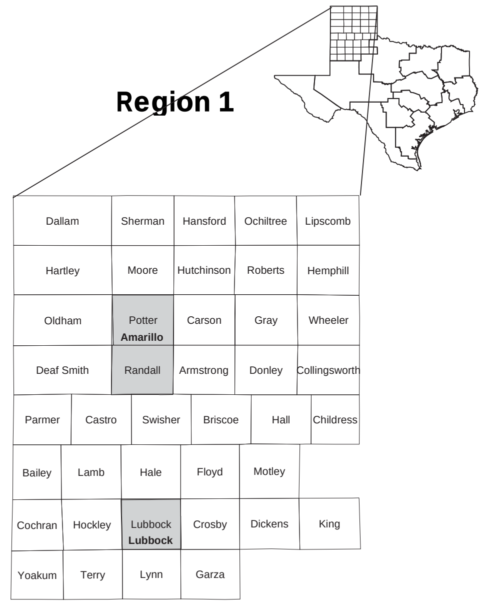
Map of the Uniform State Service Regions

The size and diversity of the state of Texas necessitates tailored regional sections. Each of the following



Uniform State Service Region plans includes a general demographic description, which uses US Census housing data; a needs assessment, which examines housing problems in the area; an estimate of the existing housing supply; local input into the housing needs of the region; an estimate of the number of assisted multifamily units available, and the Department's resource allocation plans for the year.

REGION 1



This 41-county region in the northwest corner of Texas encompasses over 39,500 square miles of the Panhandle. According to the 2000 Census, the total population in Region 1 is 780,733, which represents 3.7 percent of the state's total population.

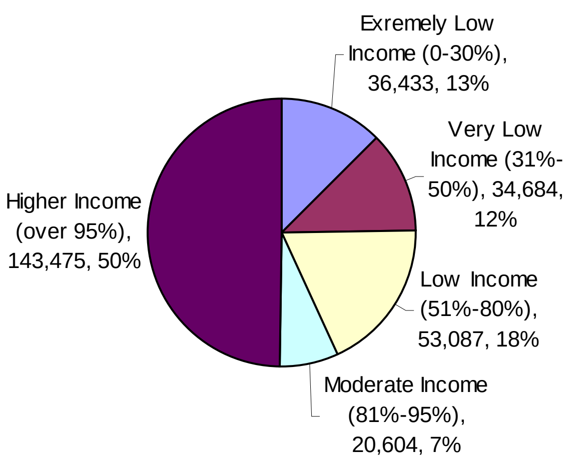
Region 1 Population Figures

	Region Total	Percent in Region	Percent of State Total
Total Population	780,733		3.7%
Persons with Disabilities	138,520	17.7%	3.8%
Elderly Persons (without disabilities)	50,862	6.5%	4.7%
Individuals in Poverty	122,991	15.8%	3.9%

Source: 2000 Census

Approximately 57 percent of the population lives in the urban areas, including Amarillo and Lubbock, and the rest live in rural areas of the region.

Region 1 Household Incomes



The pie chart to the left depicts the income breakdown of the 288,273 households in the region. Approximately 43 percent of households are low income. There are 122,991, or 15.8 percent, individuals living in poverty in the region. 2007 Multiple Listing Service data records the median home prices for Amarillo and Lubbock as $133,100 and $104,900, respectively.[9]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 128,520 persons with disabilities residing in the region, which is 16.5 percent of the total region population. In addition, there are 50,862 elderly individuals without disabilities in the region, which is 6.5 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[10] but figures vary. According to the 2000 Census, there are 1,068 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 167 homeless persons in Amarillo.

[10] Texas Interagency Council for the Homeless, "Key Facts."

HOUSING SUPPLY

According to 2000 Census data, of the 322,045 housing units in the region, 288,175 are occupied, which is an 89.5 percent occupancy rate. Of the total housing stock, almost 75 percent are one unit; 15.9 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 66.3 percent are owner occupied and 33.7 percent are occupied by renters.

Region 1 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	322,045		3.9%
Total Occupied Housing Units	288,175	89.5%	3.9%
Owner-Occupied Units	191,161	66.3%	4.1%
Renter-Occupied Units	97,014	33.7%	3.6%

Source: 2000 Census

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 288,273 households in the region, 79,798 owners and renters have housing problems; this represents 27.7 percent of all households.

Region 1 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	29,555	14,026	9,256	5,092	1,181
Lacking Kitchen and/or Plumbing	1,638	553	322	301	88
Overcrowding	9,294	2,037	2,029	2,602	2,626
Owner Households					
Extreme Cost Burden	28,912	8,542	7,021	6,944	6,405
Lacking Kitchen and/or Plumbing	1,154	228	163	224	85
Overcrowding	9,245	897	1,223	2,399	4,726
Total	79,798	26,283	20,014	17,562	15,111

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 35 percent indicated that energy assistance was their first priority need, with 23 percent ranking housing assistance as their priority need. Approximately 21 percent of respondents indicated that the development of apartments was the first priority need, 15 percent indicated that capacity building assistance was their top need, and only 6 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 39 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 43 percent indicated that their community's greatest need was the construction of new rental units, while 5 percent indicated that there was a minimal need for rental development in their areas and 11 percent had no opinion on the subject. When considering energy assistance activities, 41 percent indicated that weatherization and minor home repairs was the greatest need followed by utility assistance with 39 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

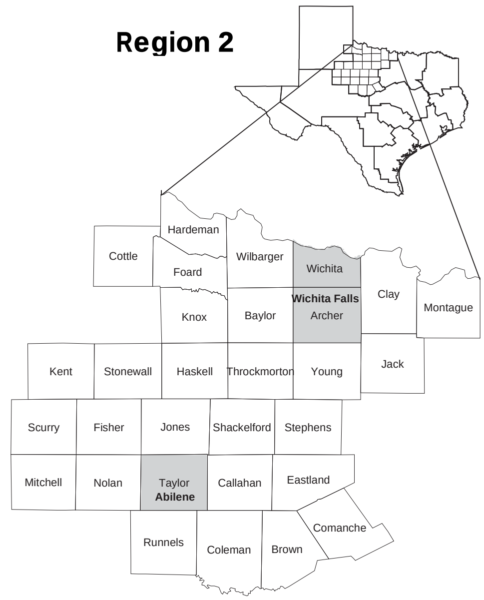
Region 1 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	4,834	28.5%	2.6%
HUD Units	3,451	20.4%	3.4%
PHA Units	1,304	7.7%	2.4%
Section 8 Vouchers	5,679	33.5%	3.9%
USDA Units	1,676	9.9%	6.3%
HFC Units*	1,577		
Total	16,944	100%	3.1%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 2

Region 2 surrounds the metropolitan areas of Wichita Falls and Abilene, shaded in the figure to the right. According to the 2000 Census, the total population in Region 2 is 549,267, which represents 2.6 percent of the state's total population.



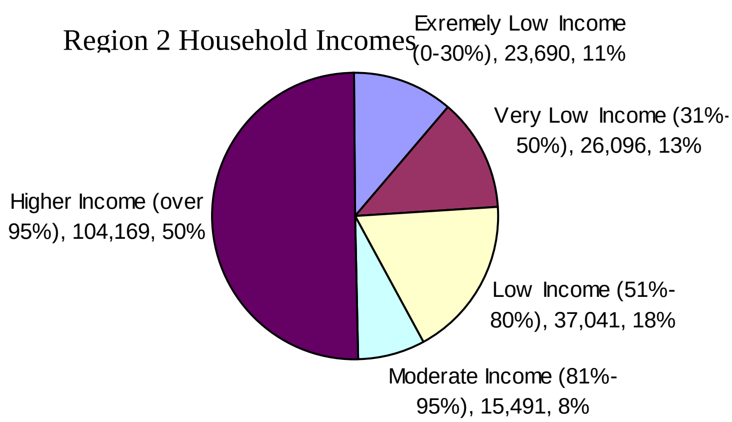
Region 2 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	549,267		2.6%
Persons with Disabilities	105,325	19.2%	2.9%
Elderly Persons (without disabilities)	42,485	7.7%	3.9%
Individuals in Poverty	77,647	14.1%	2.5%

Source: 2000 Census

Approximately 52 percent of the population lives in urban areas of the region.

Region 2 Household Incomes



The pie chart to the left depicts the income breakdown of the 206,459 households in the region. Approximately 42 percent of households are low income. There are 77,647, or 14.1 percent, individuals living in poverty in the region.

2007 Multiple Listing Service data records the median home prices for Wichita Falls and Abilene as $109,300 and $113,700, respectively.[12]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 105,325 persons with disabilities residing in the region, which is 19.2 percent of the total region population. In addition, there are 42,485 elderly individuals without disabilities in the region, which is 7.7 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[13] but figures vary. According to the 2000 Census, there are 609 people in noninstitutional group homes, which include shelters, in the region. In a special tabulation on emergency and transitional shelters, the Census did not count any homeless persons in metro areas.

[13] Texas Interagency Council for the Homeless, "Key Facts."

HOUSING SUPPLY

According to 2000 Census data, of the 243,506 housing units in the region, 206,388 are occupied, which is an 84.8 percent occupancy rate. Of the total housing stock, almost 77 percent are one unit; 12 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 69.1 percent are owner occupied and 30.9 percent are occupied by renters.

Region 2 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	243,506		3.0%
Total Occupied Housing Units	206,388	84.8%	2.8%
Owner-Occupied Units	142,603	69.1%	3.0%
Renter-Occupied Units	63,785	30.9%	2.4%

Source: 2000 Census

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 206,459 households in the region, 49,146 owners and renters have housing problems; this represents 23.8 percent of all households.

Region 2 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	16,557	7,546	5,733	2,699	559

Overcrowding	3,906	867	694	1,181	1,164
Owner Households					
Extreme Cost Burden	22,471	6,744	5,894	4,902	4,931
Lacking Kitchen and/or Plumbing	919	253	158	170	60
Overcrowding	4,325	411	558	1,159	2,197
Total	49,146	16,151	13,198	10,348	8,982

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 32 percent indicated that energy assistance was their first priority need, with 21 percent ranking housing assistance as their priority need. Approximately 18 percent of respondents indicated that the development of apartments was the first priority need, 18 percent indicated that capacity building assistance was their top need, and 12 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 54 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 40 percent indicated that their community's greatest need was the construction of new rental units, while 7 percent indicated that there was a minimal need for rental development in their areas and 9 percent had no opinion on the subject. When considering energy assistance activities, 47 percent indicated that weatherization and minor home repairs was the greatest need, as 47 percent indicated that utility assistance was the greatest need.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 2 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	3,039	23.4%	1.6%
HUD Units	1,979	15.2%	1.9%
PHA Units	3,026	23.3%	5.5%
Section 8 Vouchers	3,009	23.2%	2.1%
USDA Units	1,925	14.8%	7.3%
HFC Units*	280		
Total	12,978	100.0%	2.5%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 3

Region 3, including the metropolitan areas of Dallas, Fort Worth, Arlington, Sherman, and Denison, is the state's most populous region. According to the 2000 Census, the total population in Region 3 is 5,487,477, which represents 26.3 percent of the state's total population.

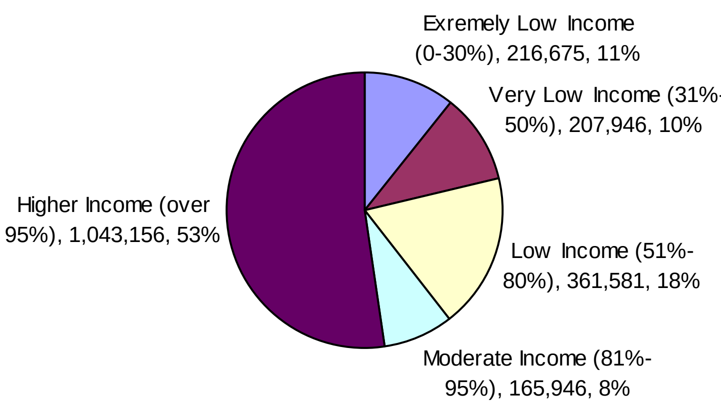
Region 3 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	5,487,477		26.3%
Persons with Disabilities	888,217	16.2%	24.6%
Elderly Persons (without disabilities)	245,186	4.5%	22.6%
Individuals in Poverty	588,688	10.7%	18.9%

Source: 2000 Census

Approximately 93 percent of the population resides in urban areas.

Region 3 Household Incomes



The pie chart to the left depicts the income breakdown of the 1,988,135 households in the region. Approximately 39 percent of households are low income. There are 588,688, or 10.7 percent, individuals living in poverty in the region.

According to 2007 Multiple Listing Service data, the highest median home price is in Collin County at $211,600, while the lowest is in Sherman-Denison at $112,200.[15]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 888,217 persons with disabilities residing in the region, which is 16.2 percent of the total region population. In addition, there are 245,186 elderly individuals without disabilities in the region, which is 4.5 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[16] but figures vary. According to the 2000 Census, there are 6,548 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on

[15] Real Estate Center at Texas A&M University, "Texas Residential MLS Activity," http://recenter.tamu.edu/data/hs/trends4.html (accessed October 16, 2007).
[16] Texas Interagency Council for the Homeless, "Key Facts."

emergency and transitional shelters, the Census counted 1,923 homeless persons in Tarrant and Dallas counties.

HOUSING SUPPLY

According to 2000 Census data, of the 2,140,641 housing units in the region, 2,004,826 are occupied, which is a 93.7 percent occupancy rate. Of the total housing stock, almost 64 percent are one unit; 30 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 60.9 percent are owner occupied and 39.1 percent are occupied by renters.

Region 3 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	2,140,641		26.2%
Total Occupied Housing Units	2,004,826	93.7%	27.1%
Owner-Occupied Units	1,220,939	60.9%	25.9%
Renter-Occupied Units	783,887	39.1%	29.3%

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, 50 percent indicated that housing assistance was their first priority need, followed by energy assistance with 35 percent. Approximately 5 percent of respondents indicated that the development of apartments was the first priority need, 8 percent indicated that capacity building assistance was their top need, and only 3 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 52 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 26 percent indicated that the need for construction and rehabilitation was approximately the same, while 19 percent indicated that there was a minimal need for rental development in their areas and 9 percent had no opinion on the subject. When considering energy assistance activities, 39 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 37 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 3 Multifamily Assisted Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	58,600	41.0%	31.2%
HUD Units	28,032	19.6%	27.4%
PHA Units	8,485	5.9%	15.4%
Section 8 Vouchers	43,833	30.6%	30.1%
USDA Units	4,076	2.8%	15.4%
HFC Units*	20,744		
Total	143,026		27.6%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 4

Region 4, located in the northeast corner of the state, surrounds the urban areas of Texarkana, Longview-Marshall, and Tyler. According to the 2000 Census, the total population in Region 4 is 1,015,648, which represents 4.9 percent of the state's total population.

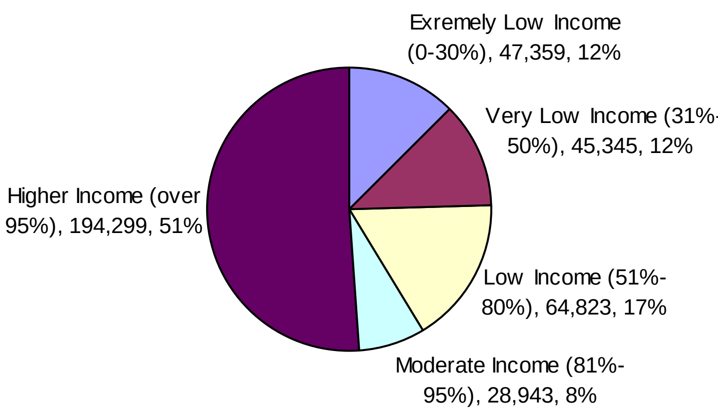
Region 4 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,015,648		4.9%
Persons with Disabilities	213,753	21.0%	5.9%
Elderly Persons (without disabilities)	77,528	7.6%	7.1%
Individuals in Poverty	152,036	15.0%	4.9%

Source: 2000 Census

Region 4 has the highest percentage of rural population in the state at 61 percent.

Region 4 Household Incomes



The pie chart to the left depicts the income breakdown of the 380,765 households in the region. Approximately 41 percent of households are low income. There are 152,036, or 15.0 percent, individuals living in poverty in the region.

2007 Multiple Listing Service data records the median home prices for Tyler and Longview-Marshall as $132,800 and $119,700, respectively.[18]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 213,753 persons with disabilities residing in the region, which is 21.0 percent of the total region population. In addition, there are 77,528 elderly individuals without disabilities in the region, which is 7.6 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[19] but figures vary. According to the 2000 Census, there are 1,309 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 110 homeless persons in Tyler. Region 4 also experienced damage from Hurricane Rita, which hit the southeast Texas area in September 2005.

[19] Texas Interagency Council for the Homeless, "Key Facts."

According to FEMA, $1,037,418.22 worth of damage was reported. Households affected by the hurricane have unexpected needs.

HOUSING SUPPLY

According to 2000 Census data, of the 434,792 housing units in the region, 380,468 are occupied, which is an 87.5 percent occupancy rate. Of the total housing stock, almost 71 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 73.8 percent are owner occupied and 26.2 percent are occupied by renters.

Region 4 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	434,792		5.3%
Total Occupied Housing Units	380,468	87.5%	5.1%
Owner-Occupied Units	280,896	73.8%	6.0%
Renter-Occupied Units	99,572	26.2%	3.7%

Source: 2000 Census

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 380,765 households in the region, 100,479 owners and renters have housing problems; this represents 26.4 percent of all households.

Region 4 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	27,100	12,500	9,142	4,443	1,015
Lacking Kitchen and/or Plumbing	2,108	724	425	363	135
Overcrowding	8,851	1,951	1,688	2,215	2,997
Owner Households					
Extreme Cost Burden	49,419	15,258	11,379	11,530	11,152
Lacking Kitchen and/or Plumbing	2,742	775	429	508	187
Overcrowding	10,259	1,233	1,477	2,496	5,053
Total	100,479	32,441	24,540	21,555	20,539

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 43 percent indicated that housing assistance was their first priority need, with 29 percent ranking energy assistance as their priority need. Approximately 17 percent of respondents indicated that the development of apartments was the first priority need, 11 percent indicated that capacity building assistance was their top need, and 0 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 53 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 34 percent indicated that the need for construction and rehabilitation was the same, while 11 percent indicated that there was a minimal need for rental development in their areas and 11 percent had no opinion on the subject. When considering energy assistance activities, 41 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 40 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

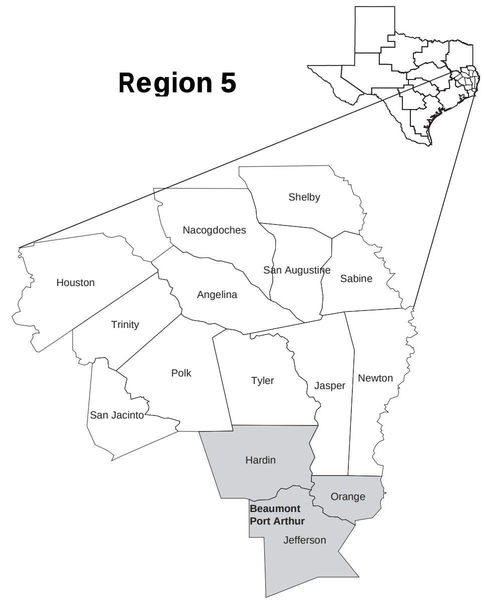
Region 4 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	5,367	25.5%	2.9%
HUD Units	3,577	17.0%	3.5%
PHA Units	2,252	10.7%	4.1%
Section 8 Vouchers	5,988	28.4%	4.1%
USDA Units	3,872	18.4%	14.6%
HFC Units*	1,160		
Total	21,056		4.1%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 5

Region 5 encompasses a 15-county area in east Texas including the urban areas of Beaumont and Port Arthur. According to the 2000 Census, the total population in Region 5 is 740,952, which represents 3.6 percent of the state's total population.



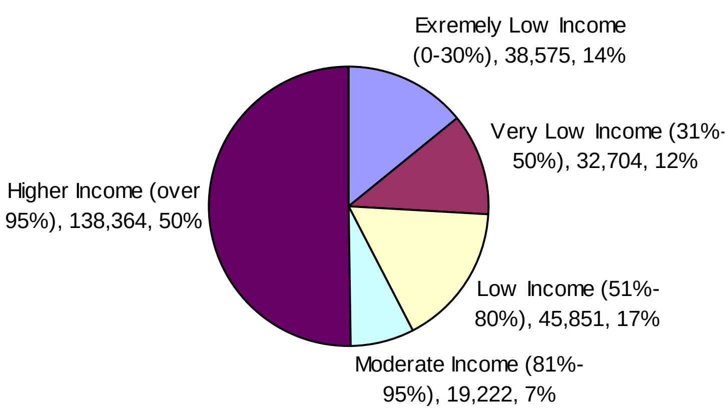
Region 5 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	740,952		3.6%
Persons with Disabilities	150,529	20.3%	4.2%
Elderly Persons (without disabilities)	53,148	7.2%	4.9%
Individuals in Poverty	120,585	16.3%	3.9%

Source: 2000 Census

The population in Region 5 is split, with 50 percent living in urban and 50 percent living in rural areas.

Region 5 Household Incomes



The pie chart to the left depicts the income breakdown of the 274,543 households in the region. Approximately 43 percent of households are low income. There are 120,585, or 16.3 percent, individuals living in poverty in the region. 2007 Multiple Listing Service data records the median home prices for Beaumont and Port Arthur as $130,900 and $112,700, respectively.[21]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 150,529 persons with disabilities residing in the region, which is 20.3 percent of the total region population. In addition, there are 53,148 elderly individuals without disabilities in the region, which is 7.2 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[22] but figures vary. According to the 2000 Census, there are 672 people in noninstitutional group homes, which include shelters, in the region. In its tabulation on emergency and transitional shelters, the Census did not count homeless persons in metropolitan areas.

[22] Texas Interagency Council for the Homeless, "Key Facts."

Region 5 also experienced significant damage from Hurricane Rita, which hit the southeast Texas area in September 2005. According to FEMA, $190,251,194.22 worth of damage was reported. Households affected by the hurricane have unexpected needs.

HOUSING SUPPLY

According to 2000 Census data, of the 325,047 housing units in the region, 275,233 are occupied, which is an 84.7 percent occupancy rate. Of the total housing stock, 69.3 percent are one unit; 11 percent are over two units; and the rest are mobile homes, boats, and RVs. Approximately 73.4 percent are owner occupied and 26.6 percent are occupied by renters.

Region 5 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	325,047		4.0%
Total Occupied Housing Units	275,233	84.7%	3.7%
Owner-Occupied Units	201,971	73.4%	4.3%
Renter-Occupied Units	73,262	26.6%	2.7%

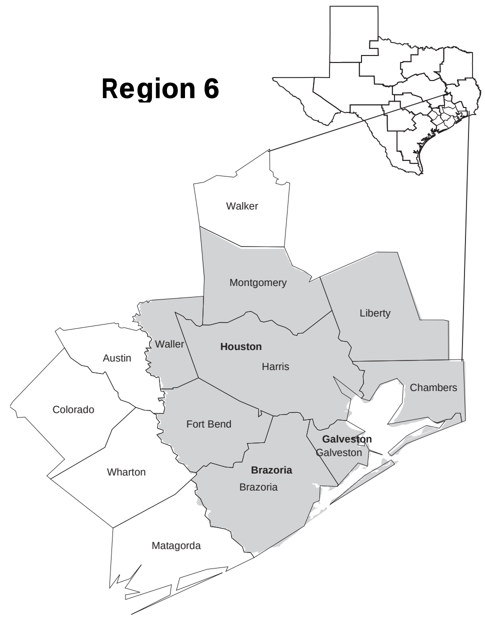
*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 6

Region 6 includes the urban areas of Houston, Brazoria, and Galveston. According to the 2000 Census, the total population in Region 6 is 4,854,454, which represents 23.3 percent of the state's total population.



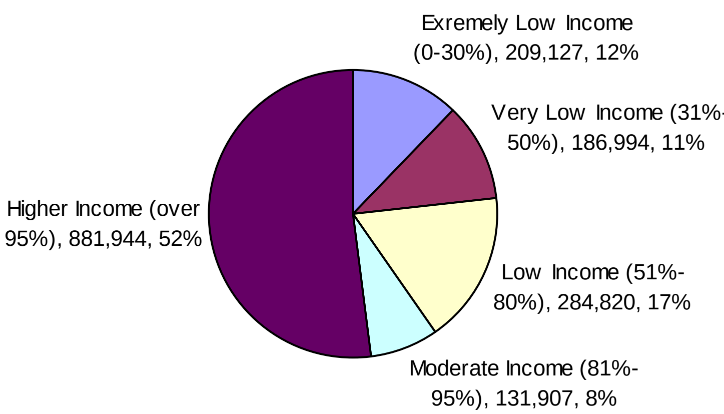
Region 6 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	4,854,454		23.3%
Persons with Disabilities	801,436	16.5%	22.2%
Elderly Persons (without disabilities)	206,438	4.3%	19.0%
Individuals in Poverty	656,239	13.5%	21.0%

Source: 2000 Census

Approximately 92 percent of the populations lives in the urban areas of Region 6.

Region 6 Household Income



The pie chart to the left depicts the income breakdown of the 1,691,811 households in the region. Approximately 40 percent of households are low income. There are 656,239, or 13.5 percent, individuals living in poverty in the region. 2007 Multiple Listing Service data records the median home prices for Houston and Galveston as $157,000 and $182,200, respectively.[24]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 801,436 persons with disabilities residing in the region, which is 16.3 percent of the total region population. In addition, there are 206,438 elderly individuals without disabilities in the region, which is 4.3 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[25] but figures vary. According to the 2000 Census, there are 7,792 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 1,756 homeless persons in the Houston area. Region 6 also experienced damage from Hurricane Rita, which hit the southeast Texas area in September

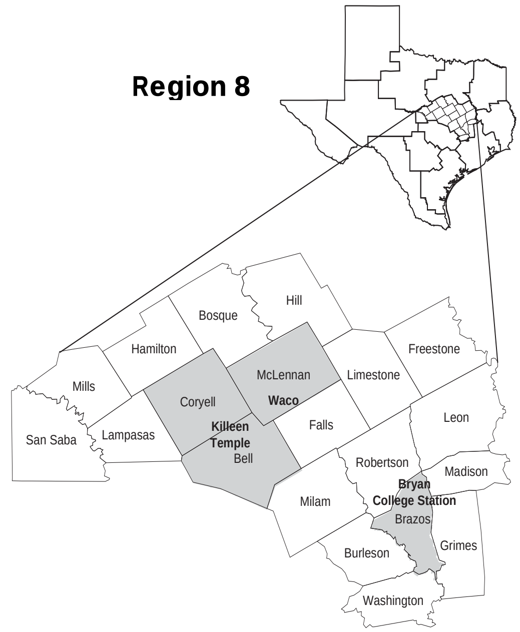
Total	34,466	100.0%	6.7%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 8

Region 8, located in the center of the state, surrounds the urban areas of Waco, Bryan, College Station, Killeen, and Temple. According to the 2000 Census, the total population in Region 8 is 963,139 which represents 4.6 percent of the state's total population.



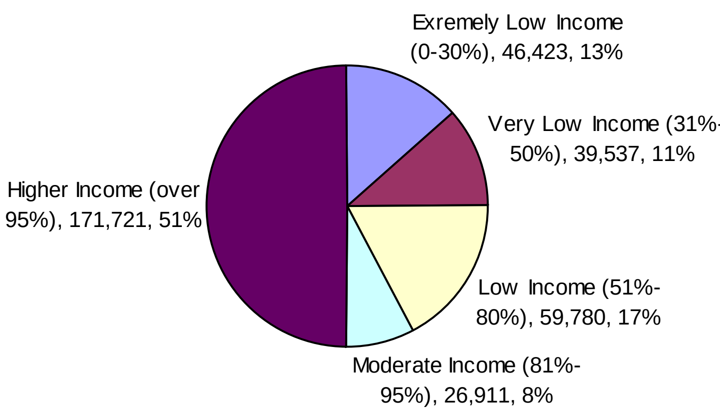
Region 8 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	963,139		4.6%
Persons with Disabilities	160,743	16.7%	4.5%
Elderly Persons (without disabilities)	55,854	5.8%	5.1%
Individuals in Poverty	149,480	15.5%	4.8%

Source: 2000 Census

Approximately 75 percent of the population lives in the urban areas of Region 8.

Region 8 Household Income



The pie chart to the left depicts the income breakdown of the 343,856 households in the region. Approximately 41 percent of households are low income. There are 149,480, or 15.5 percent, individuals living in poverty in the region. 2007 Multiple Listing Service data records the median home price for Bryan-College Station as $144,800.[30]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 160,743 persons with disabilities residing in the region, which is 16.7 percent of the total region population. In addition, there are 55,854 elderly individuals without disabilities in the region, which is 5.8 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[31] but figures vary. According to the 2000 Census, there are 1,003 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 129 homeless persons in the Killeen area.

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 343,856 households in the region, 103,864 owners and renters have housing problems; this represents 30.2 percent of all households.

Region 8 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	42,797	20,028	12,657	8,285	1,826
Lacking Kitchen and/or Plumbing	1,831	601	354	355	92

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 26 percent indicated that housing assistance was their first priority need, with 22 percent ranking energy assistance as their priority need. Approximately 19 percent of respondents indicated that the development of apartments was the first priority need, 22 percent indicated that capacity building assistance was their top need, and 11 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 48 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 40 percent indicated that their community's greatest need was the construction of new rental units, while 20 percent indicated that there was a minimal need for rental development in their areas and 9 percent had no opinion on the subject. When considering energy assistance activities, 60 percent indicated that utility assistance was the greatest need followed by weatherization and minor home repairs with 34 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

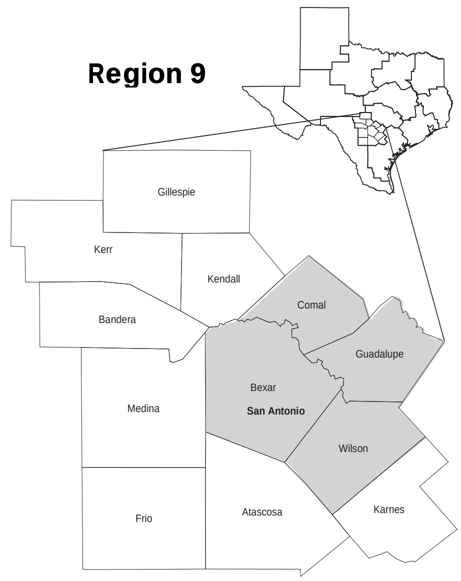
Region 8 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	5,906	25.3%	3.1%
HUD Units	4,178	17.9%	4.1%
PHA Units	2,780	11.9%	5.0%
Section 8 Vouchers	7,621	32.7%	5.2%
USDA Units	2,820	12.1%	10.7%
HFC Units*	304		
Total	23,305		4.5%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 9

San Antonio is the main metropolitan area in Region 9. According to the 2000 Census, the total population in Region 9 is 1,807,868, which represents 8.7 percent of the state's total population.



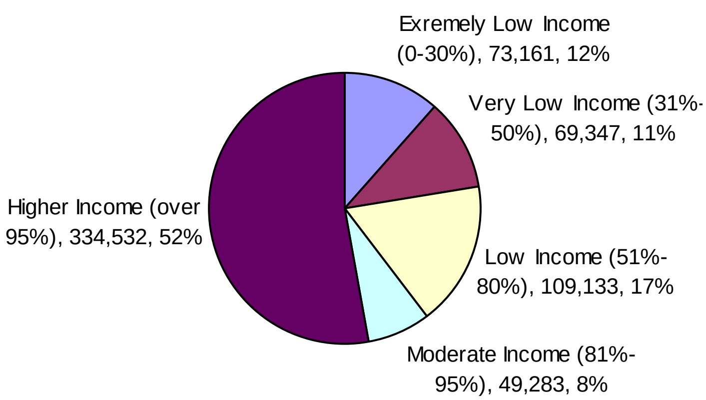
Region 9 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,807,868		8.7%
Persons with Disabilities	337,541	18.7%	9.4%
Elderly Persons (without disabilities)	107,974	6.0%	9.9%
Individuals in Poverty	267,118	14.8%	8.6%

Source: 2000 Census

Approximately 89 percent of the population lives in urban areas.

Region 9 Household Income



The pie chart to the left depicts the income breakdown of the 635,280 households in the region. Approximately 40 percent of households are low income. There are 267,118, or 14.8 percent, individuals living in poverty in the region. The 2007 Multiple Listing Service records the median home price for San Antonio as $154,200.[33]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 337,541 persons with disabilities residing in the region, which is 18.7 percent of the total region population. In addition, there are 107,974 elderly individuals without disabilities in the region, which is 6.0 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[34] but figures vary. According to the 2000 Census, there are 2,919 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 850 homeless persons in San Antonio.

HOUSING SUPPLY

According to 2000 Census data, of the 689,862 housing units in the region, 636,796 are occupied, which is a 92.3 percent occupancy rate. Of the total housing stock, 69 percent are one unit; 22 percent are over two units; 8 percent are mobile homes; and the rest are boats and RVs. Approximately 65.0 percent are owner occupied and 35.0 percent are occupied by renters.

Region 9 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	689,862		8.5%
Total Occupied Housing Units	636,796	92.3%	8.6%
Owner-Occupied Units	414,009	65.0%	8.8%
Renter-Occupied Units	222,787	35.0%	8.3%

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 635,280 households in the region, 194,512 owners and renters have housing problems; this represents 30.6 percent of all households.

Region 9 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	62,012	24,095	19,495	14,458	3,964
Lacking Kitchen and/or Plumbing	3,284	1,137	484	751	241
Overcrowding	28,877	7,296	6,160	7,359	8,062
Owner Households					
Extreme Cost Burden	71,630	17,316	14,240	17,201	22,873
Lacking Kitchen and/or Plumbing	3,270	713	667	624	297
Overcrowding	25,439	2,644	4,107	6,555	12,133
Total	194,512	53,201	45,153	46,948	47,570

Source: 2000 CHAS

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 67 percent indicated that housing assistance was their first priority need, with 20 percent ranking energy assistance as their top need. Approximately 7 percent of respondents indicated that the development of apartments was the first priority need, 0 percent indicated that capacity building assistance was their top need, and 7 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 53 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 34 percent indicated that the need for construction and rehabilitation was the same, while 18 percent indicated that there was a minimal need for rental development in their areas and 18 percent had no opinion on the subject. When considering energy assistance activities, 41 percent indicated that weatherization and minor home repairs was the greatest need followed by utility assistance with 29 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see “Assisted Housing Inventory” under “State of Texas” in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

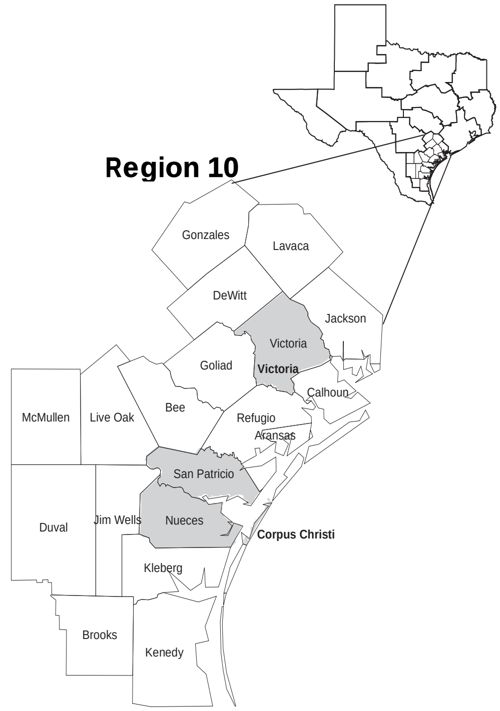
Region 9 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	15,455	30.3%	8.2%
HUD Units	12,080	23.7%	11.8%
PHA Units	7,458	14.6%	13.5%
Section 8 Vouchers	15,046	29.5%	10.3%
USDA Units	1,007	2.0%	3.8%
HFC Units*	22,382		
Total	51,046	100.0%	9.9%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 10

Region 10, including the urban areas of Corpus Christi and Victoria, is located in the south eastern part of the state on the Gulf of Mexico. According to the 2000 Census, the total population in Region 10 is 732,917, which represents 3.5 percent of the state's total population.



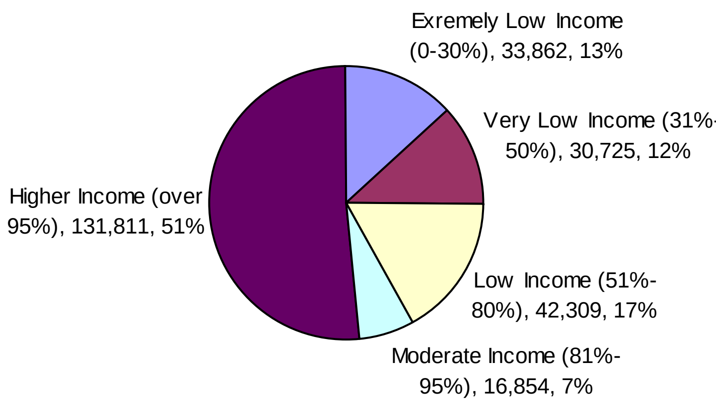
Region 10 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	732,917		3.5%
Persons with Disabilities	141,592	19.3%	3.9%
Elderly Persons (without disabilities)	46,900	6.4%	4.3%
Individuals in Poverty	132,214	18.0%	4.2%

Source: 2000 Census

In Region 10, 62 percent live in urban areas.

Region 10 Household Income



The pie chart to the left depicts the income breakdown of the 255,493 households in the region. Approximately 42 percent of households are low income. There are 132,214, or 18.0 percent, individuals living in poverty in the region. The 2007 Multiple Listing Service records the median home price for Corpus Christi as $147,800.[36]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 141,592 persons with disabilities residing in the region, which is 19.3 percent of the total region population. In addition, there are 46,900 elderly individuals without disabilities in the region, which is 6.4 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[37] but figures vary. According to the 2000 Census, there are 1,456 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 272 homeless persons in Corpus Christi.

REGION 11

Region 11 is a 16-county area along the border of Mexico. The main urban areas in the region are Brownsville-Harlingen, McAllen-Edinburg, Del Rio, and Laredo. According to the 2000 Census, the total population in Region 11 is 1,343,330, which represents 6.4 percent of the state's total population.

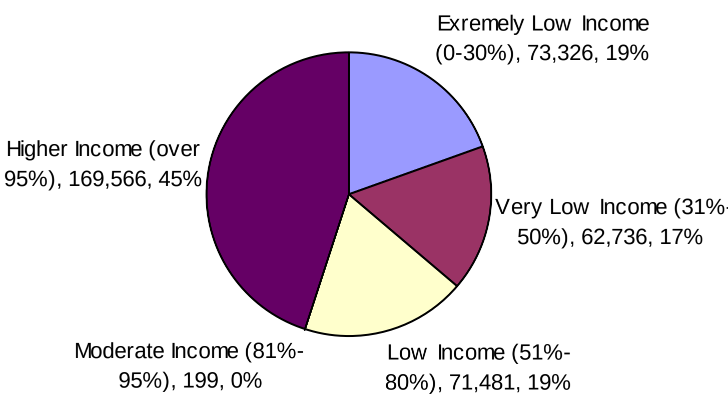
Region 11 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	1,343,330		6.4%
Persons with Disabilities	257,838	19.2%	7.2%
Elderly Persons (without disabilities)	67,505	5.0%	6.2%
Individuals in Poverty	455,366	33.9%	14.6%

Source: 2000 Census

About 68 percent of the population lives in urban areas.

Region 11 Household Income



The pie chart to the left depicts the income breakdown of the 377,276 households in the region. Approximately 55 percent of households are low income.[39] There are 455,366, or 33.9 percent, individuals living in poverty in the region. 2007 Multiple Listing Service data records the median home prices for Brownsville as $131,400 and McAllen as $124,200.[40]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 257,838 persons with disabilities residing in the region, which is 19.2 percent of the total region population. In addition, there are 67,505 elderly individuals without disabilities in the region, which is 5.0 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[41] but figures vary. According to the 2000 Census, there are 1,211

[39] The CHAS figures for moderate and higher income households in Region 11 indicate that there are only 199 persons with incomes between 80-95 percent of the AMFI. TDHCA has been unable to get more accurate information for this segment of the population. However, the planning impact for the SLIHP is relatively low because, except for the first time homebuyer program which is done through a network of participating lenders, TDHCA programs serve persons below 80 percent AMFI.

Section 8 Vouchers	3,058	30.7%	2.1%
USDA Units	735	7.4%	2.8%
HFC Units*	24		
Total	9,970	100.0%	1.9%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGION 13

El Paso is the main urban area in Region 13. The region spreads along the Texas-Mexico border in the southwestern tip of the state. According to the 2000 Census, the total population in Region 13 is 524,884, which represents 2.5 percent of the state's total population.

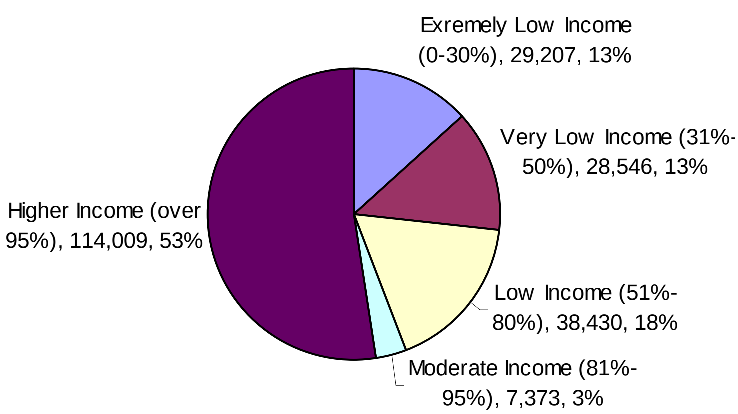
Region 13 Population Figures

	Region Total	Percent in Region	Region Percent of State
Total Population	704,318		3.4%
Persons with Disabilities	128,000	18.2%	3.6%
Elderly Persons (without disabilities)	35,421	5.0%	3.3%
Individuals in Poverty	165,122	23.4%	5.3%

Source: 2000 Census

Approximately 92 percent of the region population lives in the urban area of El Paso.

Region 13 Household Income



The pie chart to the left depicts the income breakdown of the 216,861 households in the region. Approximately 44 percent of households are low income. There are 165,122, or 23.4 percent, individuals living in poverty in the region. The 2007 Multiple Listing Service data records the median home price for El Paso as $138,900.[46]

SPECIAL NEEDS POPULATIONS

According to 2000 Census data, there are 128,000 persons with disabilities residing in the region, which is 18.2 percent of the total region population. In addition, there are 35,421 elderly individuals without disabilities in the region, which is 5.0 percent of the region.

Data on the number of homeless individuals in the region is difficult to collect because of the migratory nature of this population. The Texas Interagency Council for the Homeless estimates that there are 200,000 homeless individuals in Texas,[47] but figures vary. According to the 2000 Census, there are 1,022 people in noninstitutional group homes, which include shelters, in the region. In its special tabulation on emergency and transitional shelters, the Census counted 356 homeless people in El Paso.

HOUSING SUPPLY

According to 2000 Census data, of the 236,572 housing units in the region, 219,261 are occupied, which is a 92.7percent occupancy rate. Of the total housing stock, 68 percent are one unit; 23 percent are over two units; 8 percent are mobile homes; and the rest are boats and RVs. Approximately 63.8 percent are owner occupied and 36.2 percent are occupied by renters.

Region 13 Housing Units by Occupation

	Region Total	Percent in Region	Region Percent of State
Total Housing Units	236,572		2.9%
Total Occupied Housing Units	219,261	92.7%	3.0%
Owner-Occupied Units	139,842	63.8%	3.0%
Renter-Occupied Units	79,419	36.2%	3.0%

Source: 2000 Census

HOUSING NEED

The housing need indicators analyzed in this section include housing cost burden, substandard housing conditions, and housing overcrowding for renter and owner households. The following information comes from the 2000 CHAS database. Of the total 216,861 households in the region, 81,248 owners and renters have housing problems; this represents 37.5 percent of all households.

Region 13 Households with Housing Problems

	Region Total	Extremely Low Income (0-30%)	Very Low Income (31-50%)	Low Income (51-80%)	Higher Incomes (81% and up)
Renter Households					
Extreme Cost Burden	22,151	8,941	7,159	4,652	1,399
Lacking Kitchen and/or Plumbing	1,679	470	539	297	24
Overcrowding	15,170	4,214	3,728	3,575	3,653
Owner Households					
Extreme Cost Burden	26,451	6,254	5,872	7,268	7,057
Lacking Kitchen and/or Plumbing	1,879	366	411	523	84
Overcrowding	13,918	1,296	2,037	3,263	7,322
Total	81,248	32,497	19,746	19,578	19,539

REGIONAL INPUT ON HOUSING NEEDS

Of respondents ranking their community's need for general assistance in the 2006 CNS, approximately 47 percent indicated that housing assistance was their first priority need, with 0 percent ranking energy assistance as their priority need. Approximately 20 percent of respondents indicated that the development of apartments was the first priority need, 13 percent indicated that capacity building assistance was their top need, and 20 percent indicated that homeless assistance was the top need.

In terms of housing assistance, 41 percent indicated that home repair assistance was the greatest need. Regarding rental development activities, 46 percent indicated that their community's greatest need was the construction of new rental units, while 12 percent indicated that there was a minimal need for rental development in their areas. When considering energy assistance activities, 52 percent indicated that weatherization and minor home repairs was the greatest need followed by utility assistance with 24 percent.

ASSISTED HOUSING INVENTORY

The following table shows the number of total multifamily units in the region financed through state and federal sources, including TDHCA; HUD; PHAs; Section 8 Housing Choice Vouchers; USDA; and local HFCs, which includes the Texas State Affordable Housing Corporation. For information on the data sources, see "Assisted Housing Inventory" under "State of Texas" in this section. Please note that because some developments layer funding from multiple sources, there may be double counting.

Region 13 Assisted Multifamily Units

	Region Total	Percent in Region	Percent of State Total
TDHCA Units	4,502	23.0%	2.4%
HUD Units	2,395	12.3%	2.3%
PHA Units	6,228	31.9%	11.3%
Section 8 Vouchers	6,117	31.3%	4.2%
USDA Units	298	1.5%	1.1%
HFC Units*	689		
Total	19,540	100.0%	3.8%

*HFC units are not included in the final total, because HFC developments report total units rather than specifying assisted units, and because the majority of HFC-financed developments also receive housing tax credits from TDHCA.

REGIONAL PLANS SUMMARY

This section summarizes the information from the regional plans in the previous section.

POPULATION CHARACTERISTICS

The most populous regions of the state according to the 2000 Census are Regions 3 and 6, together representing almost 50 percent of the state. Regions 3, 6, 7, and 11 are the fastest growing regions.

Population and Poverty, 2000

The number of rental units lacking complete plumbing and/or kitchen facilities is one of the indicators of housing need that does not follow the pattern of population. Regions 3 and 6 have the highest number of units lacking facilities and are also the regions with the highest number of renter households. Region 11, however, is ranked sixth in terms of renter population and third in number of renter units lacking kitchen and/or plumbing facilities.

The table below shows the number of owner units that are lacking kitchen and/or plumbing facilities. Region 11, with the sixth highest number of owner households, has the highest number of physically inadequate owner housing units. Region 6, the second most populous region, has the second highest number of units lacking kitchen and/or plumbing facilities.

Number of Owner Units Lacking Kitchen and/or Plumbing, 2000

Service Region	All Incomes	0% to 30%	31% to 50%	51% to 80%	80% and Above

12	3,269	1,763	1,145	3,058	735	24	9,970
13	4,502	2,395	6,228	6,117	298	689	19,540
State	188,107	102,349	55,098	145,416	26,435	96,001	517,405

*Because HFC developments report total units and do not specify assisted units, and that the majority of HFC-financed developments also receive housing tax credits from TDHCA, these units are not included in the final total.

SECTION 4: ACTION PLAN

In response to the housing needs identified in the previous section, this plan outlines TDHCA's course of action designed to meet those underserved housing needs. This section discusses the following:

- Policy Focuses
- Program Plans
- TDHCA Allocation Plans
- TDHCA Goals and Objectives

FAIR HOUSING

Through program requirements and compliance monitoring, TDHCA works to ensure that housing programs benefit individuals without regard to race, ethnicity, sex, or national origin, as outlined in 10 TAC 1.60. Complaints involving all forms of housing discrimination are also referred to the Texas Workforce Commission Human Rights Division, which oversees the Texas Fair Housing Act. Additionally, it is the policy of TDHCA to not require its nonprofit recipients of funds to verify, as a condition of receiving federal funds, the citizenship or immigration status of applicants for funds. This policy is subject to change if the US Department of Housing and Urban Development revises its policy. This policy does not apply to the Section 8 Housing Choice Voucher Program.

The Texas Fair Housing Act of 1989 enables the State to remedy discriminatory public policies affecting housing affordability and access. The Act prohibits discrimination against individuals in their pursuit of homeownership or rental housing opportunities based on race, color, national origin, sex, religion, familial status, and physical or mental handicaps. Recent state activities or current objectives relating to fair housing are discussed below:

- Comply with the Texas Fair Housing Act in TDHCA administered programs.
- Coordinate fair housing efforts with the Texas Workforce Commission, Human Rights Division, which was created under the Texas Fair Housing Act to directly address public grievances related to fair housing.
- Section 8 Admittance Policy: The policy adopted by the TDHCA Board is a follows:
  - Managers and owners of HTC properties are prohibited from having policies, practices, procedures and/or screening criteria that have the effect of excluding applicants because they have a Section 8 voucher or certificate.
  - The verification of such an exclusionary practice on the part of the owner or the manager by TDHCA will be considered a violation and will result in the issuance of a Notice of Violation and, if appropriate, issuance of a Form 8823 to the Internal Revenue Service.
  - Any violation of program requirements relative to this policy will also impact the Owner's ability to participate in future TDHCA programs.

POLICY PRIORITIES

This section describes policies TDHCA will use to address specific types of housing need in each uniform state service region, including meeting the underserved needs of extremely low income households, the homeless, persons with disabilities, and other special needs populations. This section also discusses rural needs, energy efficiency, and lead-based paint.

EXTREMELY LOW INCOME INDIVIDUALS AND HOUSEHOLDS

While one of the Department's charges is to serve the State's populations from extremely low income to moderate income, funding priority is given to those populations that are most in need of services: low, very low, and extremely low income individuals and households. Additionally, the Texas Legislature, through 2006-2007 Appropriations Act Rider 4 (Rider 5 in the 2008-2009 Appropriations Act), specifically calls upon TDHCA to focus funding toward individuals and families that are earning less than 60 percent of the area median family income. This rider directs TDHCA to apply $30,000,000 annually towards assisting extremely low income households; and no less than 20 percent of the Department's total housing funds towards assisting very low income households. TDHCA works to meet these goals, by providing incentives for applicants to set aside units for very low and extremely low income households.

The data presented in the Housing Analysis section of this report shows that households with lower incomes have higher incidences of housing problems. There are minimal differences between the incidences of housing problems between the two lowest income groups (0-30 percent and 31-50 percent of median income). While incidences of housing problems for these two groups are significantly higher than those of the other low income group, households with incomes at 51-80 percent of median income have significant needs as well. Therefore, households at 0-80 percent of median income have been given higher priority than households above 80 percent of median income. This prioritization will allow the State to target resources to those households most in need, regardless of household type.

Poverty

According to the 2000 US Census, Texas has the ninth highest poverty rate among the states: 15.4 percent compared to the national rate of 12.4 percent. The US Department of Health and Human Services defines the 2007 poverty guideline as $20,650 in income for a family of four,[49] and many poor families make substantially less than this. Poverty can be self-perpetuating, creating barriers to education, health, and the financial stability provided by homeownership.

TDHCA has an important role in addressing Texas poverty. The Department seeks to reduce the number of Texans living in poverty, thereby providing a better future for all Texans. This means (1) trying to provide long-term solutions to the problems facing people in poverty and (2) targeting resources to those with the greatest need. The Department provides low income persons with energy, emergency, and housing assistance to meet the basic necessities.

An asset development approach to addressing poverty emphasizes the use of public assistance to facilitate long-term investments rather than incremental increases in income. In housing, this can mean gaining equity through homeownership. Several of TDHCA programs introduce the option of homeownership to lower income populations: the HOME Program offers down payment assistance and closing cost assistance, and the Single Family Bond Program offers below-market-rate loans.

Programs administered through TDHCA's Office of Colonia Initiatives (OCI) can be instrumental in creating self sufficiency in the colonias. OCI coordinates programs that improve the living conditions of

[49] US Department of Health and Human Services, "The 2005 HHS Poverty Guidelines," http://aspe.hhs.gov/poverty/05poverty.shtml (accessed July 28, 2006).

the state's colonias. The Texas Bootstrap Loan program provides loans for self-help housing initiatives; the Contract for Deed Conversion Initiative facilitates homeownership by converting contracts for deed into traditional mortgages; the Colonia Model Subdivision Program provides loans to develop residential subdivisions as alternatives to colonias; and the Colonia Self-Help Centers provide outreach, education, and technical assistance to colonia residents.

SPECIAL NEEDS POPULATIONS

According to HUD, in addition to the homeless, special needs populations include persons with disabilities, the elderly, persons with alcohol and/or drug addictions, persons with HIV/AIDS, and public housing residents. TDHCA also considers colonia residents and migrant farmworkers as special needs populations.

The following sections describe each type of special need and actions taken by TDHCA to try to address the specific issues of the different special needs groups.

HOMELESS POPULATIONS

The Stewart B. McKinney Homeless Assistance Act of 1987, the legislation that created a series of homeless assistance programs, defined the term "homeless." The following definition is used by the US Department of Housing and Urban Development (HUD) and all other federal agencies responsible for administering McKinney programs:

The term "homeless" or "homeless individual" includes

- an individual who lacks a fixed, regular, and adequate night time residence; or
- an individual who has a primary nighttime residency that is
    - a supervised publicly or privately-operated shelter designed to provide temporary living accommodations;
    - an institution that provides a temporary residence for individuals intended to be institutionalized; or
    - a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

Estimates of homeless populations vary widely. The migratory nature of the homeless population, the stigma associated with homelessness, and the fact that many homeless individuals lack basic documentation all contribute to the difficulty of making an accurate count. Most homeless counts are "point in time" estimates, which do not capture the revolving-door phenomenon of persons moving in and out of shelters over time. Furthermore, the homeless population can be classified into three categories: literally homeless, which describes those who have no permanent residence and stay in shelters or public places; marginally homeless, which includes those who live temporarily with other people and have no prospects for housing; and people at risk of homelessness. People at risk of homelessness generally have incomes below the poverty level, rely on utility and rental assistance, and may be unable to absorb unexpected events such as the loss of a job or serious illness.

[68] Technical Assistance Collaborative Inc. and Consortium for Citizens with Disabilities Housing Task Force, *Priced Out in 2004*, by Ann O'Hara and Emily Cooper (Boston, MA: Technical Assistance Collaborative Inc., August 2005), 37,

Specific Strategies for Meeting Homeless Needs

The following TDCHA activities are targeted to meet the needs of homeless populations.

Emergency Shelter Grants Program

Through the Emergency Shelter Grants Program (ESGP), TDHCA funds organizations that provide shelter and related services for homeless persons, as well as intervention services to persons threatened with homelessness. Activities include renovating buildings for use as shelters; medical and psychological counseling; assistance in obtaining permanent housing; and homeless prevention services, such as rent and utility assistance. For 2007, TDHCA anticipates that it will receive $5,076,683 in funding to address homelessness, and disperses those funds according to a regional allocation formula based on the poverty percentage of each uniform state service region. Demonstrating the need for homeless shelter and services, for the 2006 ESGP application cycle, the Department received 123 applications and was able to fund only 76.

Community Services Block Grant Program

TDHCA provides administrative support funds to community action agencies (CAAs) that offer emergency and poverty-related programs to lower income persons. CAA services include child care, health and human services, job training, migrant farmworker assistance, nutrition services, and emergency assistance. These services can be instrumental in preventing homelessness in the lowest income populations.

HTC Program

The HTC Program (HTC) is a multifamily program that encourages the development of affordable multifamily housing. In addition to the construction, acquisition, and/or rehabilitation of new, existing, at-risk, and rural housing, this program can also be used to develop transitional housing. TDHCA gives scoring preferences for special needs activities, including transitional housing.

Texas Interagency Council for the Homeless

The Texas Interagency Council for the Homeless (TICH) was created in 1989 to coordinate the State's homeless resources and services. TICH consists of representatives from all state agencies that serve the homeless. The council receives no funding and has no full-time staff, but receives clerical and advisory support from TDHCA. The council holds public hearings in various parts of the state to gather information useful to its members in administering programs. The Council's major functions include:

- evaluating and helping coordinate the delivery of services for the homeless in Texas;
- increasing the flow of information among separate providers and appropriate authorities;
- providing technical assistance to TDHCA in assessing the need for housing for people with special needs;
- developing, in coordination with TDHCA and the Health and Human Services Commission, a strategic plan to address the needs of the homeless;
- maintaining a central resource and information center for the homeless.

PERSONS WITH DISABILITIES

According to the 2000 US Census, there are approximately 3,605,542 disabled, civilian, non-institutionalized persons over the age of five (or approximately 19 percent of total population) in Texas. Of this figure, 663,300 have a sensory disability (severe vision or hearing impairment), 1,428,580 have a physical disability (condition that substantially limits a physical activity such as walking or carrying), 816,185 have a mental disability (learning or remembering impairment), 487,120 have a self-care disability (dressing, bathing, or getting around inside the home), 1,359,848 have a "going outside the home disability," and 1,651,821 have an employment disability.

Housing opportunities for people with disabilities may be complicated by low incomes. The 2000 census estimates that 553,934 disabled individuals over age five live below the poverty level in Texas. Many people with disabilities may be unable to work, and receive Supplemental Security Income (SSI) or Social Security Disability Insurance (SSDI) benefits as their principal source of income. According to Priced Out in 2004, an SSI recipient would have to pay an average of 102.7percent (calculated as $569) of his or her $564 monthly payment to rent a one-bedroom apartment in Texas.[68] According to the HUD definition of affordability that estimates that a household should pay no more than 30 percent of its income on housing expenses, an SSI recipient can afford a monthly rent of no more than $169.

The Olmstead Supreme Court decision maintained that unnecessary segregation and institutionalization of people with disabilities is unlawful discrimination under the Americans with Disabilities Act (ADA). Furthermore, the Fair Housing Act, Section 504 of the Rehabilitation Act, ADA, and Section 2306.514 of the Texas Government Code all provide mandates for accessible residential housing for persons with disabilities. Housing developers may choose to provide "adaptive design" or "universal access" housing, which promotes basic, uniform standards in the design, construction, and alteration of structures that include accessibility or simple modification for disabled individuals. While an "adaptable" unit may not be fully accessible at time of occupancy, it can easily and inexpensively be modified to meet the needs of any resident. Another option is to equip homes with special features designed for persons with disabilities, including ramps, extra-wide doors and hallways, hand rails and grab bars, raised toilets, and special door levers.

Advocates for the elderly and persons with disabilities continue to stress that the primary goal of these populations is to live independently and remain in their own homes. Access to rehabilitation funds for single family housing—to perform minor physical modifications such as extra handrails, grab bars, wheelchair-accessible bathrooms, and ramps, thus making existing units livable and providing a cost-effective and consumer-driven alternative to institutionalization—was considered as a priority. Likewise, the availability of rental vouchers that provide options beyond institutional settings was found to be a high priority.

The following TDHCA activities are targeted to meeting the needs of persons with disabilities.

Disability Advisory Workgroup

TDHCA has found that directly involving program beneficiary representatives, community advocates, and potential applicants for funding in the process of crafting its policies and rules is extremely helpful. This process is often done through a "working group" format. The working groups provide an opportunity for staff to interact with various program stakeholders in a more informal environment than that provided by the formal public comment process. TDHCA has actively maintained a "Disability Advisory Workgroup" which provides ongoing guidance to the Executive Director on how TDHCA's programs can most effectively serve persons with disabilities.

Promoting Independence Advisory Committee

With the advent of the *Olmstead* decision, the Health and Human Services Commission (HHSC) initiated the Promoting Independence Initiative and appointed the Promoting Independence Advisory Board, as directed by then-Governor George Bush's Executive Order GWB 99-2. Governor Rick Perry's Executive Order RP 13 complements GWB 99-2. Now known as the Promoting Independence Advisory Committee, the PIAC assists the Health and Human Services Commission in creating the State's response to the *Olmstead* decision through the biannual Promoting Independence Plan. This plan highlights the State's efforts to assist those individuals desirous of community placement, appropriate for community placement as determined by the state's treatment professionals, and who do not constitute a fundamental alteration in the state's services, to live in the community. TDHCA participates in PIAC meetings and is a member of the Housing subcommittee.

Project Access

TDHCA has taken a leadership role in the provision of funding for rental assistance to address the housing needs of persons seeking community-based alternatives to institutionalization. In 2002, TDHCA received 35 Section 8 Housing Choice rental vouchers to administer to the Olmstead population as part of a national pilot called "Project Access."

Integrated Housing Rule

An issue of particular concern for advocates for persons with disabilities involved the Department's policies related to integrated housing. Integrated housing, as defined by SB 367 and passed by the 77th Texas Legislature, is "housing in which a person with a disability resides or may reside that is found in the community but that is not exclusively occupied by persons with disabilities and their care providers." The Department, with the assistance of the TDHCA Disability Advisory Workgroup, developed an integrated housing rule to address this concern. The Integrated Housing Rule for use by all Department housing programs, is found at 10 TAC 1.15 and is summarized as follows

- A housing development may not restrict occupancy solely to people with disabilities or people with disabilities in combination with other special needs populations.
- Large housing developments (50 units or more) shall provide no more than 18 percent of the units of the development set aside exclusively for people with disabilities. The units must be dispersed throughout the development.
- Small housing developments (less than 50 units) shall provide no more than 36 percent of the units of the development set aside exclusively for people with disabilities. These units must be dispersed throughout the development.
- Set-aside percentages outlined above refer only to the units that are to be solely restricted for persons with disabilities. This section does not prohibit a property from having a higher percentage of occupants that are disabled.
- Property owners may not market a housing development entirely, nor limit occupancy to, persons with disabilities.

Exceptions to the above rule include (1) scattered site development and tenant-based rental assistance is exempt from the requirements of this section; (2) transitional housing that is time-limited with a clear and convincing plan for permanent integrated housing upon exit from the transitional situation; (3) housing developments designed exclusively for the elderly: (4) housing developments designed for other special needs populations; and (5) Board waivers of this rule to further the purposes or policies of Chapter 2306, Texas Government Code, or for other good cause.

HOME Program

As established in Section 2306.111(c) of the Texas Government Code shown below and subject to the submission of qualified applications, 5 percent of the annual HOME Program allocation shall be allocated for applications serving persons with disabilities living in any part of the state.

Additionally, in accordance with 10 TAC 53, applicants applying for HOME funds under the Tenant-Based Rental Assistance programs should propose targeting at least 5 percent of the number of units proposed in the application, to persons who meet the definition of persons with disabilities.

HTC, HTF and Multifamily Bond Programs

HTC, HTF and Multifamily Bond developments that are new construction must conform to Section 504 standards, which require that at least 5 percent of the development's units be accessible for persons with physical disabilities and at least 2 percent of the units be accessible for persons with hearing and visual impairments.

Comprehensive Energy Assistance and Weatherization Assistance Programs

Priority for assistance through these programs is given to the elderly, persons with disabilities, and families with young children; households with the highest energy costs in relation to income; and households with high energy consumption. Local providers must implement special outreach efforts for these special needs populations.

ELDERLY POPULATIONS

According to the 2000 US Census, 9.9 percent (approximately 2 million) of people in Texas are 65 years of age or older. The State of Texas Senior Housing Assessment found that 91 percent of survey respondents expressed a desire to stay in their own homes as long as possible, and two-thirds believed that they would always live in their homes.[73] Of all elderly households nationwide, 73 percent owned their own homes free and clear.[74] However, elderly homeowners generally live in older homes than the majority of the population; the median year of construction for homes owned by elderly households was 1965 and 5.3 percent had physical problems.[75] Due to their age, homes owned by the elderly are often in need of repair and weatherization.

Owner-occupied housing assistance through the HOME Program provides funds for the repair and rehabilitation of homes owned by very low income households in mainly rural areas of the state, many of the assisted households are elderly. The Department's weatherization and utility assistance programs give preference to the elderly, persons with disabilities, and families with young children.

ALCOHOL AND DRUG ADDICTION

The Texas Commission on Alcohol and Drug Abuse (TCADA), now part of the Texas Department of State Health Services (DSHS), estimated that approximately 1.8 million, or 12 percent, of adults in Texas have an alcohol-related problem, another 227,000 have drug-related problems, and an additional 495,000

[73] Texas Department of Aging and Disability Services, *The State of Our State on Aging 2005* (Austin, TX: Texas Department of Aging and Disability Services, May 2005), 27, http://www.dads.state.tx.us/news_info/publications/studies/2005_sos_exec_summary.pdf (accessed July 28, 2006).
[74] US Department of Health and Human Services, *A Profile on Older Americans: 2005,* 11.
[75] US Department of Health and Human Services, *A Profile on Older Americans: 2005*, 11.

have both alcohol and drug-related problems.[77] Of the 56,858 total admissions to DSHS-funded treatment programs during 2005, admitted individuals were 58.3 percent male with an average age of 31.6, an average 11th grade education, and an average annual income of $5,753.[78] Furthermore, 22.4 percent were employed, 9.7 percent were homeless, 52.4 had family or marital problems, and 45 percent reported psychological and emotional problems. The population of persons with alcohol or other drug addiction is diverse and often overlaps with the mentally disabled or homeless populations.

Supportive housing programs needed for persons with alcohol and/or other drug addiction problems range from short-term, in-patient services to long-term, drug-free residential housing environments for recovering addicts. Better recovery results may be obtained by placing individuals in stable living environments.

PERSONS WITH HIV/AIDS

Human Immunodeficiency Virus, or HIV, is the virus that causes AIDS (Acquired Immunodeficiency Syndrome). HIV infects cells and attacks the immune system, which weakens the body and makes it especially susceptible to other infections and diseases. According to DSHS, in 2005, there were 56,012 reported persons living with HIV/AIDS in Texas.[79] The majority of these cases were located in Bexar, Dallas, Harris, Tarrant, and Travis Counties. Because of increased medical costs or the loss of the ability to work, people with HIV/AIDS may be at risk of losing their housing arrangements.

DSHS addresses the housing needs of AIDS patients through the Housing Opportunities for Persons with AIDS Program (HOPWA), which is a federal program funded by HUD. In Texas, HOPWA funds provide emergency housing assistance, which funds short-term rent, mortgage, and utility payments to prevent homelessness; and tenant-based rental assistance, which enables low income individuals to pay rent and utilities until there is no longer a need or until they are able to secure other housing. In addition to the TDH statewide program, the cities of Austin, Dallas, Fort Worth, Houston, and San Antonio receive HOPWA funds directly from HUD.

PUBLIC HOUSING RESIDENTS

According to HUD data, there are 55,098 units of public housing and 145,416 Section 8 Housing Choice Vouchers in Texas.[80]

TDHCA believes that the future success of public housing authorities (PHAs) will center on ingenuity in program design, emphasis on resident participation towards economic self-sufficiency, and partnerships with other organizations to address the needs of this population. While TDHCA does not have any direct or indirect jurisdiction over the management or operations of public housing authorities, it is important to maintain a relationship with these service providers.

TDHCA has developed a strong relationship with the Texas Housing Association and the Texas chapter of the National Association of Housing and Redevelopment Officials, which represent the public housing authorities of Texas. TDHCA has worked to promote programs that will repair substandard housing and develop additional affordable housing units.

Colonia Residents

According to Section 2306.581 of the Texas Government Code:

> "Colonia" means a geographic area located in a county some part of which is within 150 miles of the international border of this state, that consists of 11 or more dwellings that are located in close proximity to each other in an area that may be described as a community or neighborhood, and that
>
> - has a majority population composed of individuals and families of low income and very low income, based on the federal Office of Management and Budget poverty index, and meets the qualifications of an economically distressed area under Section 17.921, Water Code; or
> - has the physical and economic characteristics of a colonia, as determined by the department.

The Texas Secretary of State reports that there are more than 2,294 Texas colonias with 400,000 residents.[81] Colonia residents are generally unskilled, lack a formal education, and do not have stable employment. The majority of colonia residents do fieldwork, construction work, or factory work, and the unemployment rate ranges from 20 to 60 percent.[83]

According to 2000 US Census data, colonias have a 75 percent homeownership rate. Despite this rate, however, colonia homes are inadequate; 4.9 percent of colonia dwellings lack kitchen facilities and 5.3 percent lack plumbing facilities. Some of these properties may have been purchased with contracts for deed, which are seller-financed transactions that do not transfer the title and ownership of the property to the buyer until the purchase price is paid in full.

The Office of Colonia Initiatives at TDHCA provides programs that assist colonia residents with their housing needs, including increased affordable housing opportunities, such as down payment assistance and low-interest-rate loans, homeowner education, construction education and assistance, owner-occupied home repair, access to adequate infrastructure, and the conversion of remaining contracts for deed to conventional mortgages.

Migrant Farmworkers

According to the US Department of Health and Human Services *Migrant and Seasonal Farmworker Enumeration Profiles Study*, a seasonal farmworker describes an individual whose principal employment (at least 51 percent of time) is in agriculture on a seasonal basis and who has been so employed within the preceding twenty-four months; a migrant farmworker meets the same definition, but establishes temporary housing for purposes of employment.[84] The US Department of Health and Human Services estimates that there are 362,724 migrant and seasonal farm workers and families residing in Texas.[85]

Farmworkers have a particularly difficult time finding available, affordable housing because of extremely low and sporadic incomes and frequent mobility. Many of the small, rural communities where migrant workers may seek employment do not have the rental units available for the seasonal influx. Overcrowding and substandard housing are significant housing problems for farmworkers.[87] In addition,

migrant workers may not be able to afford security deposits, pass credit checks, or commit to long-term leases.

In HB 1099, the 79th Texas Legislative Session transferred the license and inspection of migrant farmworker housing facilities from the Texas Health and Human Services Commission to TDHCA. Additionally, the bill directed TDHCA to complete a study on quantity, availability, need, and quality of migrant farm labor housing facilities in Texas, see http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm#reports for a copy of the report.

RURAL NEEDS

As the migration of populations and industries continues to urban and suburban areas, the less-populous areas of the state are left with a dilapidated housing stock and households with lower incomes than their urban or suburban counterparts. According to HUD, for FY 2007, the median income for Texas metropolitan statistical areas is $54,800 compared to $41,800 for non-metro households.[88]

The Department works closely with several rural-based affordable housing organizations, private lenders, nonprofits, and units of local government in order to give funding priority to rural areas. It requires more effort to generate affordable housing activity in rural areas as the number of organizations available to assist with these activities is significantly fewer. With this in mind, the Department has developed specific strategies to address the needs of the rural populations of the state, which include rural allocations for housing program funds, prioritization of activities that are most needed in rural areas, and increasing awareness of TDHCA programs in rural areas.

With the exception of the 5 percent of the annual HOME Program allocation which shall be allocated for applicants serving persons with disabilities in any area of the state (as required by Section 2306.111(c) of the Texas Government Code), the TDHCA HOME funds primarily serve persons in rural areas. Participating jurisdictions are those large metropolitan counties and places that receive their HOME funds directly from HUD.

Section 2306.111(d) of the Texas Government Code requires that the TDHCA Regional Allocation Formula consider rural and urban areas in its distribution of program funding. Because of this, allocations for the HTC and HOME programs in allocated by rural and urban areas within each region. Additionally, the HTC Regional Allocation Formula provides for a minimum of $500,000 rural allocation in each uniform state service region and a minimum of 20 percent of the state's tax credit amount is reserved for rural areas.

TDHCA and the Office of Rural Community Affairs (ORCA) administer the HTC Program rural regional allocation. ORCA assists in developing all thresholds, scoring, and underwriting criteria for rural regional allocation, and must approve the criteria. ORCA also participates in the evaluation and site inspection of rural developments proposed under the rural allocation.

The TDHCA Section 8 Housing Choice Voucher Program specifically serves households in small cities and rural communities that are not served by similar local or regional housing voucher programs.

ENERGY EFFICIENCY

Energy and water costs are often the largest single housing expense after food and shelter for lower income families. Utility costs typically represent 13 to 44 percent of lower income annual gross incomes and can account for nearly one-fourth of total housing costs. Proper use of existing technologies and

[88] HUD, "Estimated Median Family Incomes for FY 2006," http://www.huduser.org/datasets/il/il06/MedianNotice_2006.pdf (accessed July 28, 2006).

management practices can reduce these utility costs significantly at a relatively low initial cost, thereby greatly increasing housing affordability for low and moderate income families.

The Department encourages, in each uniform state service region, energy efficiency in the construction of affordable housing by offering training, workshops, conferences, and other opportunities to learn about energy efficiency construction, and by encouraging applicants for Department programs to consider energy efficiency in their developments.

The HTC and HOME Programs require applicants for multifamily developments to adhere to the statewide energy code and provide Energy Star Rated appliance. The HTC Program also gives points for the use of energy-efficient alternative construction materials including R-15 wall and R-30 ceiling insulation, structurally insulated panels, and 14 SEER (seasonal energy efficiency ratio) cooling units.

The Weatherization Assistance Program allocates funding regionally, to help households in each region control energy costs through the installation on weatherization measures and energy conservation education. Weatherization services include the installation of storm windows, attic and wall insulation, and weather-stripping and sealing.

LEAD-BASED PAINT

The Consumer Product Safety Commission banned the use of lead-based paint in housing in 1978. According to the 2000 Census, there are 3,344,406 housing units in Texas that were built before 1979, many of which potentially contain lead-based paint. Of these homes, 2,764,745 are occupied by low income households and 579,661 are occupied by moderate income households. According to the National Safety Council, approximately 38 million US homes contain lead paint.[89]

The HOME Program, administered by TDHCA, requires lead screening in housing built before 1978. Requirements for acquisition and tenant-based rental assistance activities are distribution of the pamphlet “Protect Your Family from Lead in Your Home” prior to receipt of assistance; notification to property owners within 15 days if a visual assessment observes chipping, peeling or flaking paint; and, if detected, the paint must be stabilized using safe work practices and clearance must be provided. Requirements for rehabilitation activities fall into three categories based on the amount of federal assistance.

[89] National Safety Council, “Lead Poisoning,” (December 2004) http://www.nsc.org/library/facts/lead.htm (accessed August 9, 2006).

DISASTER INITIATIVES

In the event of disasters TDHCA is committed to quickly, efficiently, and responsibly locating funds and developing programs and initiatives to assist affected households and communities. Below are descriptions of the disaster recovery initiatives the Department has developed.

Community Development Block Grant Disaster Recovery Funds

In August 2005, Hurricane Katrina made landfall in Louisiana, and then in September 2005, Hurricane Rita made landfall near Sabine Pass on the southeast Texas Gulf coast. Texas experienced an influx of evacuees from Louisiana escaping Hurricane Katrina, and over 75,000 homes in southeast Texas were severely damaged or destroyed as a result of Rita. According to the Federal Emergency Management Agency (FEMA), 640,968 Katrina and Rita applicants for assistance were residing in Texas as of February 1, 2006.

As the lead agency in partnership with ORCA, the city of Houston, Harris County, and southeast Texas, TDHCA is the administrator of two Community Development Block Grants (CDBG) for disaster recovery funding in Texas under the Department of Defense Appropriations Act, 2006, Public Laws 109-148 and 109-234.

Under Public Law 109-148, a total of $74.5 million was awarded to Texas to rebuild the southeast Texas region devastated by Hurricane Rita. In July 2006, the TDHCA Board approved awards to three councils of governments (COGs) in the region to rebuild damaged homes, and in August 2006 funds were awarded to four COGs that applied for the CDBG funds on behalf of cities, counties, and Indian tribes for infrastructure repairs. Of all funds awarded, 56.8 percent is dedicated to housing activities including home rehabilitation, reconstruction, and other eligible activities to help the residents of southeast Texas recover from this disaster.

In August 2006, under Public Law 109-234, HUD announced that Texas would receive an additional $428 million in CDBG disaster funding to promote long-term recovery in the areas affected by the disaster. The action plan for the second round of CDBG funding was approved by HUD on April 13, 2007. The funds of the second round will be used to provide assistance to homeowners of low to moderate income whose houses were damaged by Hurricane Rita, restore and protect owner occupied housing stock in the community of Sabine Pass which was severely damaged by the storm, to repair, rehabilitate and reconstruct affordable rental housing stock in the impacted areas, to restore critical infrastructure damaged by the hurricane where no other funds were available, and to provide assistance to the City of Houston and Harris County for increased demands in public services, law enforcement and judicial services, and community development in areas that have experienced a dramatic population increase due to an influx of Katrina activities.

HOME Program

In the unfortunate event of a natural disaster, the Department may use deobligated HOME funds for disaster relief awards to communities in Texas that are non-Participating Jurisdictions. A Participating Jurisdiction receives HOME funds directly from the federal government and, therefore, would be ineligible for this assistance.

In accordance with Texas Administrative Code, Title 10, Part 1 Chapter 1, subchapter A §1.19, and TAC Section 2306.111, the Department may use HOME deobligated funds for disaster relief through its HOME Owner Occupied Housing Assistance Program. HOME disaster funds are designed specifically to assist eligible homeowners in the repair, rehabilitation and reconstruction of their existing home affected by the natural disaster, with emphasis on assisting those who have no other means of assistance, or as gap financing after any federal assistance. Assisted homeowners must have an income that is below 80% of the Area Median Family Income (AMFI), as defined by HUD, must occupy the property as their principal residence and must have been directly affected by the disaster.

There are two types of disaster declarations, a Federal declared disaster and a State declared disaster. Communities in federally declared disaster areas must first apply to the federal government in order to allow counties to access any available federal funds to provide assistance to eligible victims of the disaster. After 90 days, the Department's HOME deobligated funds may be made available to these areas. For State declared disasters, the Department receives a State disaster declaration from the Governor's Office. The Department will notify county officials in the affected areas of the availability of disaster relief funds for which they may apply.

Housing Trust Fund

In September 2007, the TDHCA Governing Board approved the allocation of $1 million in the 2008 Housing Trust Fund Plan toward the Disaster Recovery Homeowner Repair Gap Financing Program. The purpose of the program is to assist otherwise qualified households, who are lacking only a small portion of funds to fulfill their full cost of construction to participate in the Community Development Block Grant (CDBG) Disaster Recovery Program, to reconstruct or complete their home from damages sustained during Hurricane Rita.

Single Family Bond

In June 2007, TDHCA announced the release of $15.6 million in home loans made available to qualified homebuyers wishing to purchase a home within the 22 East Texas counties designated under the Gulf Opportunity Zone Act of 2005. In September 2007, an additional $32 million in First Time Homebuyer Program funds were released for use within targeted areas including the 22-county area known as the Rita Go Zone.

Office of Colonia Initiatives

TDHCA released a NOFA in December 2005 for approximately $1,800,000 of State of Texas Housing Trust Funds to organizations assisting individuals or families that were victims of Hurricane Rita. The funds were intended to help very low and extremely low income individuals and/or families (owner-builders), including persons with special needs purchase or refinance real property on which to build new residential or improve existing residential housing through self-help construction. Office of Colonia Initiatives staff continues to work with the nonprofit organizations awarded contracts to assist victims of Hurricane Rita.

Community Affairs Division

The Department reserves a portion of the State's Community Services Block Grant (CSBG) funds to provide emergency disaster relief to assist low-income persons at 125% and below of the Federal Poverty Income Guidelines that live in communities impacted by a natural or man-made disaster. The CSBG emergency disaster relief funds are distributed to CSBG eligible entities and are to be utilized to provide persons with emergency shelter, food, clothing, pharmaceutical supplies, bedding, cleaning supplies, personal hygiene items, and replacement of essential appliances including stoves, refrigerators and water heaters. In the event of a disaster, persons should contact the local CSBG eligible entity in the affected area.

TDHCA PROGRAM PLANS

The following TDHCA programs govern the use of available housing resources in meeting the housing needs of low income Texans. Program descriptions include information on the funding source, type of assistance, recipients, targeted beneficiaries, program activities, set-asides, and special initiatives.

HOME INVESTMENT PARTNERSHIPS PROGRAM

The HOME Investment Partnerships (HOME) Program is authorized under the Cranston-Gonzalez National Affordable Housing Act (42 USC Section 12701 et. seq.) and receives funding from the US Department of Housing and Urban Development (HUD).

The purpose of the HOME Program is to expand the supply of decent, safe, and affordable housing for extremely low, very low, and low income households, and to alleviate the problems of excessive rent burdens, homelessness, and deteriorating housing stock. HOME strives to meet both the short-term goal of increasing the supply and the availability of affordable housing and the long-term goal of building partnerships between state and local governments and private and nonprofit organizations in order to strengthen their capacity to meet the housing needs of lower income Texans. To achieve this purpose, the HOME Program provides loans and grants to units of local government, public housing authorities (PHAs), community housing development organizations (CHDOs), nonprofit organizations, and for-profit entities. TDHCA provides technical assistance to all recipients of the HOME Program to ensure that all participants meet and follow state implementation guidelines and federal regulations.

According to §2306.111, Texas Government Code, in administering federal housing funds provided to the state under the Cranston-Gonzalez National Affordable Housing Act (Act), the Department shall expend 95 percent of these funds for the benefit of non-participating areas that do not qualify to receive funds under the Act directly from the United States Department of Housing and Urban Development. The remaining 5 percent of HOME funds may be expended in any area of the state, but only if the funding serves persons with disabilities. Additionally, this section mandates the allocation of HOME funds to each Uniform State Service Region using a regional allocation formula.

Description of Activities

There are four major activities in the HOME program including: Owner-Occupied (OCC) Rehabilitation Housing Assistance, Tenant-Based Rental Assistance (TBRA), Homebuyer Assistance (HBA), and Rental Housing Development (RHD).

Owner-Occupied Rehabilitation (OCC)

OCC Rehabilitation or reconstruction cost assistance is provided to homeowners for the repair or reconstruction of their existing home, which must be the principal residence of the homeowner. At the completion of the assistance, all properties must meet the Texas Minimum Construction Standards, the International Residential Code (IRC) and local building codes. If a home is reconstructed, the applicant must also ensure compliance with the universal design features in new construction, established by §2306.514, Texas Government Code.

Tenant Based Rental Assistance (TBRA)

TBRA provides rental subsidy, security, and utility deposit assistance. TBRA allows the assisted tenant to live in and move to any dwelling unit with a right to continued assistance, in accordance with written tenant selection policies, for a period not to exceed 24 months. The tenant should also participate in a self-sufficiency program while receiving TBRA assistance.

Homebuyer Assistance (HBA)

HBA includes down payment and closing cost assistance and is provided to homebuyers for the acquisition of affordable single family housing. This activity may also be used for the following:

- Construction costs associated with architectural barrier removal in assisting homebuyers with disabilities by modifying a home purchased with HOME assistance to meet their accessibility needs.
- Acquisition costs associated with Contract for Deed conversions to serve colonia residents.
- Acquisition or new construction costs for the replacement of manufactured housing.

Rental Housing Development (RHD)

RHD funds are awarded to eligible applicants for the development of affordable rental housing. Owners are required to make the units available to extremely low, very low, and low income families, and must meet long-term rent restrictions as defined by HUD.

Regional Allocation Formula

All HOME funding awards under this plan are subject to Texas Government Code §2306.111 and as such will be distributed according the established Regional Allocation Formula (RAF). The 2008 RAF distributes funding for all HOME-funded activities except federal and state mandates for set-asides for Community Housing Development Organizations (CHDO), Housing Programs for Persons with Disabilities, Contract for Deed Conversion, and Colonia Model Subdivision Loan Programs. The following table demonstrates the combined regional funding distribution for all of the HOME activities distributed under the RAF.

Targeted Distribution of Funds under the RAF

Region	Large MSA within Region for Geographical Reference	Regional Funding Amount	Regional Funding %	Rural Funding Amount	Rural Funding %	Urban Funding Amount	Urban Funding %
1	Lubbock	$1,806,138	5.6%	$1,805,803	100.0%	$335	0.0%
2	Abilene	$1,185,677	3.7%	$1,160,586	97.9%	$25,091	2.1%
3	Dallas/Fort Worth	$5,659,827	17.7%	$1,737,644	30.7%	$3,922,182	69.3%
4	Tyler	$4,068,199	12.7%	$3,172,779	78.0%	$895,420	22.0%
5	Beaumont	$1,880,350	5.9%	$1,702,882	90.6%	$177,468	9.4%
6	Houston	$2,272,433	7.1%	$932,492	41.0%	$1,339,941	59.0%
7	Austin/Round Rock	$1,361,443	4.3%	$766,555	56.3%	$594,888	43.7%
8	Waco	$1,501,825	4.7%	$798,792	53.2%	$703,033	46.8%
9	San Antonio	$1,633,550	5.1%	$1,025,036	62.7%	$608,514	37.3%
10	Corpus Christi	$2,314,752	7.2%	$1,917,919	82.9%	$396,832	17.1%
11	Brownsville/Harlingen	$5,624,379	17.6%	$4,078,419	72.5%	$1,545,960	27.5%
12	San Angelo	$1,624,679	5.1%	$1,133,886	69.8%	$490,793	30.2%
13	El Paso	$1,066,747	3.3%	$592,177	55.5%	$474,570	44.5%
	Total	$32,000,000	100.0%	$20,824,970	65.1%	$11,175,030	34.9%

See the *State of Texas Consolidated Plan: One Year Action Plan* at http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm#consolidated for further details on the HOME Program. The HOME Program rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/home-division/index.htm. For more information regarding HOME single family activities, contact Sandy Garcia, Production Manager, at (512) 475-1391 or sandy.garcia@tdhca.state.tx.us. For HOME multifamily activity information, contact Barbara Skinner, Multifamily Program Specialist, at (512) 475-1643 or barbara.skinner@tdhca.state.tx.us.

HOUSING TRUST FUND

The Housing Trust Fund (HTF) receives several sources of funding from the State of Texas including: multifamily bond issuance fees, loan repayments and other funds that are received and appropriated by the Department or Legislature. HTF is the only State-authorized program for affordable housing development. Funding is awarded as loans and grants to nonprofits; units of local government; public housing agencies; and for-profit entities. The targeted beneficiaries of the program are low, very low, and extremely low income households. Eligible program activities for the Housing Trust Fund include, but are not limited to the following:

- The acquisition, rehabilitation, and new construction of affordable rental housing. Housing Trust Funds have typically been used as gap financing in developments and combined with other Department programs, like the HOME Program and Housing Tax Credit Program. Refinancing or rehabilitation of properties constructed within the past 5 years and previously funded by the Department are not eligible;
- The acquisition, rehabilitation, and new construction of affordable homeownership developments. Developments may be completed by a contracted developer or through Self-Help Construction; and
- Tenant-based rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. Tenant-based rental assistance also includes security and utility deposits for rental of dwelling units.

While all of these are eligible activities under the program's rule, not all of these activities will occur each year and Notices of Funding Availability (NOFAs) will be released identifying the activities for which funds can actually be applied.

Pursuant to §2306.111(d-1) of the Texas Government Code, HTF programs will be regionally allocated unless the funding allocation for that program is mandated by state statute and the program's allocation represents less than 10 percent of the annual allocation for HTF; or serves people with disabilities; or do not exceed $3 million.

Housing Trust Fund Program RAF

Region	Large MSA within Region for Geographical Reference	Regional Funding Amount	Regional Funding %	Rural Funding Amount	Rural Funding %	Urban Funding Amount	Urban Funding %
1	Lubbock	$47,052	4.7%	$19,531	41.5%	$27,520	58.5%
2	Abilene	$20,175	2.0%	$12,087	59.9%	$8,089	40.1%
3	Dallas/Fort Worth	$222,580	22.3%	$15,039	6.8%	$207,541	93.2%
4	Tyler	$65,181	6.5%	$34,450	52.9%	$30,731	47.1%
5	Beaumont	$26,664	2.7%	$16,327	61.2%	$10,337	38.8%
6	Houston	$185,413	18.5%	$13,634	7.4%	$171,779	92.6%
7	Austin/Round Rock	$35,475	3.5%	$3,116	8.8%	$32,358	91.2%
8	Waco	$55,523	5.6%	$13,932	25.1%	$41,591	74.9%
9	San Antonio	$73,831	7.4%	$9,422	12.8%	$64,409	87.2%
10	Corpus Christi	$49,076	4.9%	$21,585	44.0%	$27,491	56.0%
11	Brownsville/Harlingen	$146,542	14.7%	$57,775	39.4%	$88,767	60.6%
12	San Angelo	$33,137	3.3%	$13,255	40.0%	$19,882	60.0%
13	El Paso	$39,352	3.9%	$5,713	14.5%	$33,639	85.5%
	Total	$1,000,000	100.0%	$235,867	23.6%	$764,133	76.4%

Note: At the time of publishing this document there were not sufficient funds in the Housing Trust Fund to require allocation under the formula. This formula and estimate of $1,000,000 is merely a model of what the RAF would be for Housing Trust Fund dollars if the program funds were increased.

The HTF Rule and Funding Plan may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/home-division/htf/index.htm. For more information on the HTF program, contact the HOME division at (512) 463-8921.

HOUSING TAX CREDIT PROGRAM

The Housing Tax Credit (HTC) Program receives authority from the US Treasury Department to provide tax credits to nonprofits, for-profit developers, and syndicators or investors. The targeted beneficiaries of the program are very low and extremely low income families at or below 60 percent Area Median Family Income (AMFI). The program's purpose is to encourage the development and preservation of rental housing for low income families, provide for the participation of for-profit and nonprofit organizations in the program, maximize the number of units added to the state's housing supply, and prevent losses in the state's supply of affordable housing.

The HTC Program was created by the Tax Reform Act of 1986 and is governed by the Internal Revenue Code of 1986 (the "Code"), as amended, 26 USC Section 42. It authorizes tax credits in the amount of $1.95 per capita of the state population. Tax credits are also awarded to developments with tax-exempt bond financing and are made independent of the state annual tax credit allocation. TDHCA is the only entity in the state with the authority to allocate housing tax credits under this program. The State's distribution of the credits is administered by TDHCA's *Qualified Allocation Plan and Rules* (QAP), as required by the Code. Per Section 2306.67022, the Governor shall approve, reject, or modify and approve the Board-approved QAP not later than December 1 of each year.

To qualify for tax credits, the proposed development must involve new construction or undergo substantial rehabilitation of residential units, which is defined as at least $12,000 per rental unit of construction hard costs, unless financed with TX-USDA-RHS, in which case the minimum is $6,000. The credit amount for which a development may be eligible depends on the total amount of depreciable capital improvements, the percentage of units set aside for qualified tenants, and the funding sources available to finance the total development cost. Pursuant to the Code, a low income housing development qualifies for residential rental occupancy if it meets one of the following two criteria: (1) 20 percent or more of the residential units in the development are both rent-restricted and occupied by individuals whose income is 50 percent or less of AMFI; or (2) 40 percent or more of the residential units in the development are both rent-restricted and occupied by individuals whose income is 60 percent or less of AMFI. Typically, 60 to 100 percent of a development's units will be set aside for qualified tenants in order to maximize the amount of tax credits the development may claim.

Credits from the state annual tax credit allocation are awarded through a competitive application process. Each application must satisfy a set of threshold criteria and is scored based on selection criteria. The selection criteria referenced in the QAP is approved by the TDHCA Board each year. The board considers the recommendations of the TDHCA staff and determines a final award list. Tax credits to developments with tax-exempt bond financing are awarded through a similar application review process, but because these credits are not awarded from a limited credit pool, the process is noncompetitive and the selection criteria are not part of the application.

The Department requires recipients of tax credits to document the participation of minority-owned businesses in the development and management of tax credit developments, and has established a minimum goal of 30 percent participation. The selection criteria awards extra points to developments owned by historically underutilized businesses (HUBs) or that have a plan in place for utilizing HUBs, and also development location criteria including areas located in colonias. Efforts are made in the planning process and allocation of funds to ensure the involvement of housing advocates, community-based institutions, developers, and local municipalities. The Department also encourages the participation of community development corporations and other neighborhood-based groups.

Regional Allocation Formula

In accordance with Senate Bill 264, TDHCA allocates HTC Program funds to each region using a need-based formula developed by the Department. Please see "2007 Regional Allocation Formula" in this section for further explanation. Using the 2007 Regional Allocation Formula, each region will receive the following amount of funding for use with activities subject to the formula. Funding figures will be included in the final document.

HTC Program RAF

Region	Large MSA within Region for Geographical Reference	Regional Funding Amount	Regional Funding %	Rural Funding Amount	Rural Funding %	Urban Funding Amount	Urban Funding %
1	Lubbock	$1,747,065	4.4%	$613,023	35.1%	$1,134,042	64.9%
2	Abilene	$924,236	2.3%	$512,937	55.5%	$411,299	44.5%
3	Dallas/Fort Worth	$8,702,058	21.8%	$615,708	7.1%	$8,086,350	92.9%
4	Tyler	$2,087,620	5.2%	$1,204,415	57.7%	$883,205	42.3%
5	Beaumont	$966,742	2.4%	$577,144	59.7%	$389,598	40.3%
6	Houston	$8,582,808	21.5%	$712,927	8.3%	$7,869,882	91.7%
7	Austin/Round Rock	$2,187,352	5.5%	$525,404	24.0%	$1,661,948	76.0%
8	Waco	$2,512,174	6.3%	$534,363	21.3%	$1,977,811	78.7%
9	San Antonio	$2,940,389	7.4%	$532,411	18.1%	$2,407,978	81.9%
10	Corpus Christi	$1,701,220	4.3%	$737,767	43.4%	$963,454	56.6%
11	Brownsville/Harlingen	$4,980,069	12.5%	$1,792,170	36.0%	$3,187,899	64.0%
12	San Angelo	$1,051,645	2.6%	$515,859	49.1%	$535,786	50.9%
13	El Paso	$1,566,623	3.9%	$525,873	33.6%	$1,040,749	66.4%
	Total	$39,950,000	100.0%	$9,400,000	23.5%	$30,550,000	76.5%

The estimated total tax credit ceiling for this table is $43 million. As required by state statute, 15% ($6,450,000) of that ceiling is deducted for the At-Risk Set-Aside, which is not awarded regionally. The balance of the estimated ceiling, $36,550,000 is regionally allocated using this formula.

Projected HTC Program Funding for FY 2008: $46,000,000

The Qualified Allocation Plan and Rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/multifamily/htc/index.htm. For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

MULTIFAMILY BOND PROGRAM

The Multifamily Bond Program issues tax-exempt and taxable housing mortgage revenue bonds (MRBs) under the Private Activity Bond Program (PAB) to fund loans to nonprofit and for-profit developers. The proceeds of the bonds are used to finance the construction, acquisition, or rehabilitation of multifamily properties with the targeted beneficiaries being very low, low, and moderate income households. Owners elect to set aside units in each development according to §1372, Texas Government Code. Rental developments must comply with Section 504 unit standards. Property owners are also required to offer a variety of services to benefit the residents of the development. Specific tenant programs must be designed to meet the needs of the current tenant profile and must be approved annually by TDHCA.

TDHCA issues tax-exempt, multifamily MRBs through two different authorities defined by the Internal Revenue Code. Under one authority, tax-exempt bonds used to create housing developments are subject to the State's private activity volume cap. The State will set aside 22 percent of the annual private activity volume cap for multifamily developments. Approximately $440 million in issuance authority will be made available to various issuers to finance multifamily developments, of which 20 percent, or approximately $88 million, will be made available exclusively to TDHCA. On August 15th of each year, any allocations in the subcategories of the bond program that have not been reserved pool into one allocation fund. This is an opportunity for TDHCA to apply for additional allocation and which allows TDHCA to issue more bonds than the set-aside of $88 million. PAB Issuance authority per individual development is allocated and administered by the Texas Bond Review Board (BRB). Initially, applications submitted to the BRB are allocated by a lottery. TDHCA, local issuers, local housing authorities, and other eligible bond issuers submit applications for specific developments on behalf of development owners. Applications submitted to TDHCA for the private activity bond program will be scored and ranked by priority and highest score. TDHCA will be accepting applications throughout the 2008 program year. Developments that receive 50 percent or more of their funding from the proceeds of tax-exempt bonds under the private activity volume cap are also eligible to apply for Housing Tax Credits.

Under the second authority, TDHCA may issue tax-exempt MRBs to finance properties that are owned entirely by nonprofit organizations. Bonds issued under this authority are exempt from the private activity volume cap. This is a noncompetitive application process and applications may be received at any time throughout the year. In addition to the set-asides above, 75 percent of development units financed under the 501(c)(3) authority must be occupied by households earning 80 percent or less of the area median income.

Projected Multifamily Bond Program Funding for FY 2007: $140,000,000

The Multifamily Housing Revenue Bond Rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/multifamily/bond/index.htm. For more information, contact the Multifamily Finance Production Division at (512) 475-3340.

FIRST TIME HOMEBUYER PROGRAM

The First Time Homebuyer Program receives funding from tax-exempt and taxable mortgage revenue bonds. The program offers 30-year fixed-rate mortgage financing at below-market rates for very low, low, and moderate income residents purchasing their first home or residents who have not owned a home within the preceding three years. Qualified applicants access First Time Homebuyer Program funds by contacting any participating lender, which is then responsible for the loan application process and subsequent loan approval. After closing, the lender transfers the mortgage loan to a Master Servicer designated by TDHCA.

The First Time Homebuyer Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI (area median family income) limitations, based on IRS adjusted income limits, and the purchase price of the home must not exceed stipulated maximum purchase price limits. A minimum of 30 percent of program funds will be set aside to assist Texans earning 60 percent or less of program income limits. A portion of the funds will also be set-aside for borrowers earning between 61% and 80% of the program income limits.

Income limits for the program are set by the IRS Tax Code (1986) based on income figures determined by the US Department of Housing and Urban Development. The first time homebuyer restriction is established by federal Internal Revenue Service regulations, which also require that program recipients may be subject to a recapture tax on any capital gain realized from a sale of the home during the first nine years of ownership. Certain exceptions to the first time homebuyer restriction, income ceiling, and maximum purchase price limitation apply in targeted areas. Such targeted areas are qualified census tracts in which 70 percent or more of the families have an income of 80 percent or less of the statewide median income and/or are areas of chronic economic distress as designated by the state and approved by the Secretaries of Treasury and Housing and Urban Development, respectively.

Projected Texas First Time Homebuyer Program funding for FY 2007: $125,000,000

For more information, contact Eric Pike, Texas Homeownership Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

GRANT ASSISTANCE PROGRAM

The Texas Department of Housing and Community Affairs offers grant funds for down payment and closing cost assistance on a first-come, first-served basis for mortgage loans originated through the First Time Homebuyer Program. The Grant Assistance Program (GAP) currently provides up to 5 percent of the amount of the mortgage loan, but may vary depending on the program. Assistance is available to eligible borrowers whose incomes do not exceed 80 percent of the program income limits.

Projected Grant Assistance Program funding for FY 2007: Varies by bond issuance.

The Texas First Time Homebuyer Program Rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/homeownership/index.htm. For more information, contact Eric Pike, Texas Homeownership Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us. To request a First Time Homebuyer information packet, please call 1-800-792-1119.

MORTGAGE CREDIT CERTIFICATE PROGRAM

A mortgage credit certificate (MCC) provides a tax credit that will reduce the federal income taxes, dollar-for-dollar, of qualified buyers purchasing a qualified residence. As a result, the MCC effectively reduces the monthly mortgage payment and increases the buyer’s disposable income by reducing his or her federal income tax obligation. This tax savings provides a family with more available income to qualify for a loan and meet mortgage payment requirements.

The amount of the annual tax credit may equal 35 percent of the annual interest paid on a mortgage loan; however, the maximum amount of the credit cannot exceed $2,000 per year. The credit cannot be greater than the annual federal income tax liability, after all other credits and deductions have been taken into account. MCC tax credits in excess of a borrower’s current year tax liability may, however, be carried forward for use during the subsequent three years.

The MCC Program provides homeownership opportunities for qualified individuals and families whose gross annual household income does not exceed 115 percent of AMFI limitations, based on IRS adjusted income limits. In order to participate in the MCC Program, homebuyers must meet certain eligibility requirements and obtain a mortgage loan through a participating lender. The mortgage loan must be financed from sources other than tax-exempt revenue bonds. The mortgage may be a conventional, FHA, VA, or RHS loan at prevailing market rates, but may not be used in connection with the refinancing of an existing loan.

Projected Mortgage Credit Certificate Program funding for FY 2008: $0

The Texas First Time Homebuyer Program Rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/homeownership/index.htm. For more information, contact Eric Pike, Texas Homeownership Division, at (512) 475-3356 or eric.pike@tdhca.state.tx.us.

LOAN STAR LOAN PROGRAM

The Loan Star Mortgage Program offers conventional, conforming first lien purchase mortgage loans, at market level interest rates, with second lien amortizing loans providing 8 percent down payment assistance. Target populations include low and moderate income households who may or may not have previously owned a home and require down payment assistance and seek minimal paperwork. Participating lenders statewide originate the mortgage loans.

The program is offered in conjunction with CitiMortgage Inc. using external market sources, and is intended to serve segments of the Texas homebuyer market not currently served by TDHCA's present tax-exempt bond program. An essential component of the Loan Star Mortgage Program is the down payment assistance achieved through a Fannie Mae MyCommunity second lien mortgage.

Projected Loan Star Lone Program funding for FY 2008: $20,000,000

The Texas First Time Homebuyer Program Rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/homeownership/index.htm. For more information, contact Martha Sudderth, Texas Homeownership Division, at (512) 475-3444 or martha.sudderth@tdhca.state.tx.us.

TEXAS STATEWIDE HOMEBUYER EDUCATION PROGRAM

The Texas Statewide Homebuyer Education Program (TSHEP) offers provider certification training to nonprofit organizations including Texas Agriculture Extension Agents, units of local government, faith-based organizations, CHDOs, community development corporations, community-based organizations, and other organizations with a proven interest in community building. In addition, a referral service for individuals interested in taking a homebuyer education class is available through TDHCA. The targeted beneficiaries of the program include extremely low, very low, low, and moderate income individuals; minority populations; and persons with disabilities.

To ensure uniform quality of the homebuyer education provided throughout the state, TDHCA contracts with training professionals to teach local nonprofit organizations the principles and applications of comprehensive pre- and post-purchase homebuyer education. The training professionals and TDHCA also certify the participants as homebuyer education providers.

Projected Texas Statewide Homebuyer Education Program funding for FY 2008: $70,000.

For more information, contact Dina Gonzalez, Texas Homeownership Division at (512) 475-3993 or dina.gonzalez@tdhca.state.tx.us.

OFFICE OF COLONIA INITIATIVES

In 1996, in an effort to place more emphasis on addressing the needs of colonias, the Office of Colonia Initiatives (OCI) was created and charged with the responsibility of coordinating all Department and legislative initiatives involving border and colonia issues and managing a portion of the Department's existing programs targeted at colonias. The fundamental goal of the OCI is to improve the living conditions and lives of border and colonia residents, and to educate the public regarding the services that the Department has to offer.

Projected Office of Colonia Initiatives funding for FY 2007: $7,200,000.

See the 2008-2009 Colonia Action Plan in Section 6 of this document for more information on the specific programs and activities of the Office of Colonia Initiatives. For additional information, contact Homero V. Cabello, Office of Colonia Initiatives, at 1-800-462-4251 or homero.cabello@tdhca.state.tx.us.

COMPREHENSIVE ENERGY ASSISTANCE PROGRAM

The Comprehensive Energy Assistance Program (CEAP) is funded by the U.S. Department of Health and Human Services' Low Income Home Energy Assistance Program (LIHEAP). TDHCA administers the program through a network of 49 CEAP Subrecipients. The Subrecipients consist of community action agencies, nonprofit entities, and units of local government. The targeted beneficiaries of the CEAP in Texas are households with an income at or below 125 percent of federal poverty guidelines, with priority given to the elderly; persons with disabilities; families with young children; households with the highest energy costs or needs in relation to income (highest home energy burden); and households with high energy consumption. Subrecipients must conduct outreach activities for these special needs populations.

The purpose of the CEAP is to provide utility assistance to eligible households. Additionally, some households qualify for repair, replacement, or retrofit of inefficient heating and cooling appliances. An applicant seeking utility assistance applies to the local CEAP subrecipient for assistance. The subrecipient determines income-eligibility, prioritizes status (this includes a review of billing history to determine energy burden and consumption), and determines which CEAP component is most appropriate for the eligible applicant. If the CEAP applicant is eligible and meets program priorities, the CEAP subrecipient makes a utility payment to a utility company through a vendor agreement with utility providers.

Services to Clients

There are four CEAP components:

- The Elderly and/or Disabled Component is designed to assist households with at least one member who is elderly and/or disabled. Households can receive up to four utility payments in a program year. Assistance is based on energy consumption in the previous 12 months, energy burden (percentage of income used for energy), and the income category for which the household qualifies.
- The Co-Payment Component is designed to assist households by providing client education, budget counseling, and assisting households with utility payments for six to twelve months.
- The Heating and Cooling Component is designed to address inefficient heating and cooling appliances through repair, replacement, or retrofit for households that have high energy consumption
- The Energy Crisis Component is designed to provide one-time utility assistance to households during a period of extreme temperatures or an energy supply shortage. In some instances, Energy Crisis funds can be used to address natural disasters.

The allocation formula for the Comprehensive Energy Assistance program uses the following five factors and corresponding weights to distribute its funds by county: county non-elderly poverty household factor (40 percent); county elderly poverty household factor (40 percent); county inverse poverty household density factor (5 percent); county median income variance factor (5 percent); and county weather factor (10 percent).

Comprehensive Energy Assistance Program funding for FY 2008: $38,700,738.

The Energy Assistance plans and rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/ea/index.htm. For more information contact the Energy Assistance Section at (512) 475-3951. To apply for CEAP, call 1-877-399-8939, toll free, using a land phone.

WEATHERIZATION ASSISTANCE PROGRAM

The Weatherization Assistance Program (WAP) is funded by the U.S. Department of Energy and the U.S. Department of Health and Human Services' Low Income Home Energy Assistance Program (LIHEAP). The Texas Department of Housing and Community Affairs (the Department) administers the WAP through a network of 33 WAP Subrecipients. The Subrecipients consist of community action agencies, nonprofit entities, and units of local government. The targeted beneficiaries of the CEAP in Texas are households with an income at or below 125 percent of federal poverty

The purpose of the WAP is to provide cost effective weatherization measures to improve the energy efficiency of eligible client households. Typical weatherization measures include attic and wall insulation, weather-stripping and air sealing measures, heating and cooling unit repair and/or replacement, refrigerator replacement, and minor roof repair.

Partnerships between the Department and the following Investor Owned Utility companies: Entergy, El Paso Electric, Southwest Electric Power Company, Southwest Public Service provide weatherization measures to low income utility customers. These partnerships increase the total number of low-income households that receive weatherization services and allow the Department to leverage the federal weatherization funds with the utility company funds.

Services to Clients

To help consumers control energy costs, WAP funds the installation of weatherization measures such as attic and wall insulation, energy efficient appliances, weather-stripping, caulking, and replacement of inefficient heating and cooling units. WAP also provides energy conservation education. In order to provide weatherization measures for a dwelling, the household must meet income-eligibility criteria and the measures must meet specific energy-savings goals.

The allocation formula for the Weatherization Assistance program uses the following five factors and corresponding weights to distribute its funds by county: county non-elderly poverty household factor (40 percent); county elderly poverty household factor (40 percent); county inverse poverty household density factor (5 percent); county median income variance factor (5 percent); and county weather factor (10 percent).

Projected Weatherization Assistance Program funding for FY 2007: $13,484,871.

The Energy Assistance plans and rules may be accessed from the TDHCA website at http://www.tdhca.state.tx.us/ea/index.htm. For more information, contact the Energy Assistance Section at (512) 475-3951. To apply for weatherization, call 1-888-606-8889, toll free, using a land phone.

EMERGENCY SHELTER GRANTS PROGRAM

The Emergency Shelter Grants Program (ESGP) receives funding from the US Department of Housing and Urban Development and awards grants to units of local government and private nonprofit entities that provide shelter and related services to homeless persons and/or intervention services to persons at risk of homelessness. Activities eligible for ESGP funding include the rehabilitation or conversion of buildings for use as emergency shelters for the homeless; the provision of essential services to the homeless; costs related to the development and implementation of homeless prevention activities; costs related to operation administration; and costs related to maintenance, operation, rent, repairs, security, fuel, equipment, insurance, utilities, food and furnishings.

ESGP funds are reserved according to the percentage of poverty population identified in each of the 13 state service regions. The top scoring applications in each region are recommended for funding, based on the amount of funds available for that region. Any application that receives a score below 70 percent of the highest raw score from the region is not considered for funding.

Projected Emergency Shelter Grants Program funding for FY 2008: TBD.

See the *State of Texas Consolidated Plan: One Year Action Plan* at http://www.tdhca.state.tx.us/ppa/housing-center/pubs.htm#consolidated for further details on the ESG Program. For more information, contact the Community Services Section at (512) 475-3905.

COMMUNITY SERVICES BLOCK GRANT PROGRAM

The Community Services Block Grant Program (CSBG), received from the U.S. Department of Health and Human Services (USHHS), is utilized to fund CSBG-eligible entities and to fund activities that support the intent of the CSBG Act. Ninety-percent of the funds are targeted to low income individuals and funds are also utilized to provide assistance to Native Americans and migrant and seasonal farmworkers. Income eligibility is for persons at or below 125 percent of the current federal income poverty guidelines issued by USHHS.

CSBG provides administrative support to 46 CSBG-eligible entities. The funding assists in providing essential services, including access to child care, health and human services, nutrition, transportation, job training and employment services, education services, activities designed to make better use of available income, housing services, emergency assistance, activities to achieve greater participation in the affairs of the community, youth development programs, information and referral services, activities to promote self-sufficiency; and other related services.

Five percent of the State's CSBG allocation is used to fund innovative projects that address the causes of poverty, promote client self-sufficiency, or promote community revitalization; to provide emergency disaster relief assistance to persons impacted by a natural or man-made disaster; to provide funding to organizations serving Native Americans and migrant or seasonal farm workers; and to provide funding for other eligible discretionary activities as authorized by the Department's Board.

Allocations to the 46 CSBG–eligible entities are based on two factors: (1) the number of persons living in poverty within the designated service delivery area for each organization and (2) a calculation of population density. Poverty population is given 98 percent weight, and the ratio of inverse population density is given 2 percent weight. The formula also includes a base award for each organization before the factors are applied, as well as a floor, or minimum award. In FY 2008, the Department will utilize the 2000 Census population figures at 125 percent of poverty, a base of $50,000, and a floor at $150,000.

Community Services Block Grant Program funding for FY 2008: TBD.

Additional documentation, including the CSBG Plan, may be accessed at the TDHCA website at http://www.tdhca.state.tx.us/pubs.htm#cs. For more information, contact the Community Services Section at (512) 475-3905.

SECTION 8 HOUSING CHOICE VOUCHER PROGRAM

The Section 8 Housing Choice Voucher Program provides rental assistance payments on behalf of low income individuals and families, including the elderly and persons with disabilities. The program provides financial assistance for decent, safe and sanitary housing to eligible households whose gross income does not exceed 50% of HUD's median income guidelines. HUD requires 75% of all new households admitted to the program be at or below 30% of the area median income. Eligibility is based on several factors, including the household's income, size and composition, citizenship status, assets, medical and childcare expenses. Qualified households may select the best available housing through direct negotiations with landlords to ensure accommodations that meet their needs. TDHCA pays approved rent amounts directly to property owners.

The Section 8 Housing Choice Voucher Program currently contracts with units of local governments, community action agencies and public housing authorities to assist with the administration of approximately 1,000 housing choice vouchers. The Department administers vouchers in 28 counties.

Projected Section 8 Program funding for FY 2008: *The dollar amount will be included in the final version of this document*

Additional documentation, including the Section 8 Plan, may be accessed at the TDHCA website at http://www.tdhca.state.tx.us/pubs.htm#sec8. For more information, contact the Section 8 Program at (512) 475-3892.

MANUFACTURED HOUSING DIVISION

The Manufactured Housing Division regulates the manufactured housing industry in Texas by ensuring that manufactured homes are well constructed, safe, and correctly installed; by providing consumers with fair and effective remedies; and by providing economic stability to manufacturers, retailers, installers, and brokers. The Division licenses manufactured housing professionals and maintains records of the ownership, location, real or personal property status, and lien status (on personal property homes) on manufactured homes. It also records tax liens on manufactured homes. Because of its regulatory nature, the Division has its own governing board and executive director.

Relying on a team of trained inspectors operating from eight locations around the state, the Division inspects manufactured homes throughout the state. Those inspectors also assist TDHCA by inspecting properties for the Portfolio Management and Compliance Division and by inspecting and processing license applications for migrant farm worker housing facilities. The Division also handles approximately 1,200 consumer complaints a year, many of those requiring investigation and enforcement action.

For more information, contact the Manufactured Housing Division at 1-800-500-7074.

TDHCA ALLOCATION PLANS

The Department has developed allocation formulas for many TDHCA programs in order to target available housing resources to the neediest households in each uniform state service region. These formulas are based on objective measures of need in order to ensure an equitable distribution of funding.

2008 REGIONAL ALLOCATION FORMULA

Sections 2306.111(d) and 2306.1115 of the Government Code require that TDHCA use a Regional Allocation Formula (RAF) to allocate its HOME, HTC, and HTF funding. This RAF objectively measures the affordable housing need and available resources in 13 State Service Regions used for planning purposes. Within each region, the RAF further targets funding to rural and urban areas.

As a dynamic measure of need, the RAF is revised annually to reflect updated demographic and resource data; respond to public comment; and better assess regional housing needs and available resources. The RAF is submitted annually for public comment.

Slightly modified versions of the RAF are used for HOME, HTC, and HTF because the programs have different eligible activities, households, and geographical service areas. For example, because 95 percent of HOME funding must be set aside for non-PJs, the HOME RAF only uses need and available resource data for non-PJs.

For the 2008 fiscal year, the RAF uses the following 2000 US Census data to calculate this regional need distribution:

- Poverty: Number of persons in the region who live in poverty.
- Cost Burden: Number of households with a monthly gross rent or mortgage payment to monthly household income ratio that exceeds 30 percent.
- Overcrowded Units: Number of occupied units with more than one person per room.
- Units with Incomplete Kitchen or Plumbing: Number of occupied units that do not have all of the following: sink with piped water; range or cook top and oven; refrigerator, hot and cold piped water, flush toilet, and bathtub or shower.

There are a number of other funding sources that can be used to address affordable housing needs. To mitigate any inherent inequities in the regional allocation of these funds, the RAF compares each region's level of need to its level of resources. In the 2007 fiscal year, resources from the following sources were used in the RAF: HTC, HTF, HUD (HOME, Housing Opportunities for Persons with AIDS (HOPWA), public housing authority (PHA) capital funding, and Section 8 funding), Bond Financing, and United States Department of Agriculture (USDA) housing programs.

Please see the HOME, HTC, and HTF program sections for distribution figures. For more information on the RAF and further description of the formula, please contact the Housing Resource Center, at (512) 475-3976.

TDHCA GOALS AND OBJECTIVES

The Strategic Plan goals reflect program performance based upon measures developed with the State's Legislative Budget Board and Governor's Office of Budget and Planning. The goals are also based upon Riders attached to the Department's Appropriations. The Department believes that the goals and objectives for the various TDHCA programs should be consistent with its mandated performance requirements.

The State's Strategic Planning and Performance Budgeting System (SPPB) is a goal-driven, results-oriented system. The system has three major components including strategic planning, performance budgeting, and performance monitoring. As an essential part of the system, performance measures are part of TDHCA's strategic plan, are used by decision makers in allocating resources, are intended to focus the Department's efforts on achieving goals and objectives, and are used as monitoring tools providing information on accountability. Performance measures are reported quarterly to the Legislative Budget Board.

The State's Strategic Planning and Performance Budgeting System is based on a two-year cycle; goals and targets are revisited each biennium. The targets reflected in this document are based on the Department's requests for 2006–2007.

Because all applicants for funding are encouraged to apply for and leverage funds from multiple agency programs, HUD funds are frequently leveraged along with funds from other federal and State sources. TDHCA HOME Program funds may be used in conjunction with other TDHCA programs, however, each program area reports its performance separately.

AFFORDABLE HOUSING GOALS AND OBJECTIVES

The following goals address performance measures established by the 79th Legislature. Refer to program-specific statements outlined in the Action Plan portion of this document for strategies that will be used to accomplish the goals and objectives listed below. Included for each strategy are the target numbers for the 2007 goal, the 2007 actual performance, and the goal for 2008.

Goals one through five are established through interactions between TDHCA, the Legislative Budget Board, and the Legislature. They are referenced in the General Appropriations Act enacted during the most recent legislative session.

GOAL 1: TDHCA will increase and preserve the availability of safe, decent and affordable housing for very low, low, and moderate income persons and families.

Strategy 1.1
Provide mortgage financing and homebuyer assistance through the Single Family Mortgage Revenue Bond Program

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of single family households assisted through the First Time Homebuyer Program	1,727	2,727	158%	2,016

Explanation of Variance: Loan originations were higher in 2007 than anticipated due to the receipt of additional volume cap. Additionally, increased market interest rates generated higher demand for the Department's lower interest rate products.

Strategy 1.2
Provide funding through the HOME Program for affordable single family housing

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of single family households assisted with HOME funds	1,834	413	22.5%	1,255

Explanation of Variance: The total number of assisted units was lower than anticipated in 2007 due to a biennial funding cycle for 2006-2007 which resulted in fewer applications for the homebuyer assistance and tenant-based rental assistance activities.

Strategy 1.3
Provide funding through the HTF program for affordable single family housing

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of single family households assisted through the Housing Trust Fund	100	115	115%	228

Explanation of Variance: Performance was higher than anticipated in 2007 due to the closing out of previous fiscal year contracts and an elevated amount of technical assistance provided by the Department to ensure that the nonprofit organizations are meeting their performance benchmarks.

Strategy 1.4
Provide tenant-based rental assistance through Section 8 certificates

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted with tenant-based rental assistance	2,100	1,064	51%	1,494

Explanation of Variance: The targeted number was developed prior to a change in how the U.S. Department of Housing and Urban Development provides Section 8 Housing Assistance Program (HAP) funds. Provided funds are no longer based on the number of Housing Choice Vouchers available. In addition, the target was developed prior to the transfer of 560 vouchers to a local public housing authority.

Strategy 1.5 Provide federal tax credits to develop rental housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted with HTCs	18,832	12,998	69%	12,291

Explanation of Variance: Approximately $3.7 million credits out of the 2007 credit allocation were awarded to developments that had previously received credits in 2004. These additional credits were due to substantial increases in construction costs associated with hurricane disasters. Because of the increase in construction costs, fewer units are produced on an annual basis.

Strategy 1.6 Provide funding through the HOME Program for affordable multifamily housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted with HOME funds	647	144	22.3%	500

Explanation of Variance: The HOME and Housing Tax Credit programs operated concurrent application cycles. Due to the competitiveness of the cycle, not all applicants that applied for both sources of funds were competitive in the Housing Tax Credit round and eligible for an award. Therefore, the awarding of HOME funds was limited to those applications that were competitive and received a Housing Tax Credit award.

Strategy 1.7 Provide funding through the Housing Trust Fund for affordable multifamily housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of multifamily households assisted through the Housing Trust Fund	255	0	0%	784

Explanation of Variance: The 2007 funding for the HTF was utilized to meet the statutorily required minimum of $3,000,000 funding for the Bootstrap Loan Program.

Strategy 1.8 Provide funding through the Mortgage Revenue Bond Program for affordable multifamily housing				
Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of households assisted through the Mortgage Revenue Bond Program	3,500	2,997	86%	2,393

Explanation of Variance: Due to overall market and economic conditions, the bond program has not been as attractive as it has been in the past. This lead to a reduction in the applications submitted. In the past, the Department has received several applications towards the end of the year which enable the Department to CarryForward additional allocation into the following year. In 2006, the Department did not receive additional applications at the end of the year and therefore did not have the additional allocation to CarryForward into 2007. This reduced the total amount of bond allocation issued by the Department. The increase in construction costs also affected the bond program, by reducing the number of units produced due to higher costs.

GOAL 2: TDHCA will promote improved housing conditions for extremely low, very low, and low income households by providing information and technical assistance.

Strategy 2.1
Provide information and technical assistance to the public through the Public Affairs Division and the Housing Resource Center

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of information and technical assistance requests completed	5,400	3,824	70.8%	4,900

Explanation of Variance: A new toll free number for the entire agency has resulted in more calls being directly routed to the appropriate division instead of being forwarded to the Housing Resource Center. The Department has also continued to improve its website so that potential requests can be resolved via the internet instead of through the Housing Resource Center.

Strategy 2.2
To provide technical assistance to colonias through field offices

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of on-site technical assistance visits conducted annually from the field offices	600	963	160.5%	800

Explanation of Variance: Technical assistance visits to units of local government and nonprofit organizations continued to increase due to various changes to the programs administered through the field offices.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target*
Number of colonia residents receiving assistance	1,700	827	48.6%	7,650

Explanation of Variance: The Border Field Offices focus on empowering the non-profit organizations to work with the colonia residents on a one-on-one basis. The units of local government and non-profit organizations provide the direct assistance to colonia residents on behalf of the Department. Therefore, the number of direct contacts between the Department and the colonia residents has decreased.

*Note that the definition of the measure has changed for 2008 and now includes assistance provided through the Colonia Self-Help Centers as well as the Colonia field offices.

Strategy Measure (C)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of entities and/or individuals receiving informational resources	1,200	631	52.5%	1,000

Explanation of Variance: Marketing of Colonia Initiatives, including the number of entities and/or individuals requesting and receiving information resources is a key performance goal. These figures were expected to increase upon the release of the Texas Bootstrap Loan Program NOFA in 2007. However, the new Texas Bootstrap Reservation System has delayed the release of the NOFA.

GOAL 3: TDHCA will improve living conditions for the poor and homeless and reduce the cost of home energy for very low income Texans.

Strategy 3.1
Administer homeless and poverty-related funds through a network of community action agencies and other local organizations so that poverty-related services are available to very low income persons throughout the state.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of persons assisted through homeless and poverty related funds.	440,000	565,822	128.6%	512,244

Explanation of Variance: This measure is impacted by the number of persons assisted through the Community Services Block Grant (CSBG) and Emergency Shelter Grants Program (ESGP). The Department revised the reporting procedures for CSBG subrecipients allowing subrecipients to report all individuals assisted by all programs operated by the CSBG subrecipient. As a result of this change, CSBG subrecipients reported a higher number of persons assisted through homeless and poverty related funds.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of persons assisted that achieve incomes above poverty level.	2,000	3,087	154.4%	2,200

Explanation of Variance: Each year, CSBG subrecipients make improvements in the self-sufficiency case management programs they operate and this enables them to be able to transition a larger number of persons out of poverty. The Department expects that annually, CSBG contractors will assist more persons to transition out of poverty. However, it is difficult to estimate several years in advance how many persons CSBG subrecipients will enroll in self-sufficiency case management programs and how many of them will complete the program and finally transition out of poverty.

Strategy Measure (C)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of shelters assisted through the Emergency Shelter Grant Program.	70	76	108.5%	73

Explanation of Variance: This measure represents the number of contracts issued under the Emergency Shelter Grants Program (ESGP). At the time the measure was established, the Department anticipated funding fewer subrecipients than the number actually funded. It is difficult to determine how many contracts will be awarded. The number of contracts awarded varies by the amount of funds requested and awarded and the ranking of the applications based upon their score.

Strategy 3.2
Administer the state energy assistance programs by providing grants to local organizations for energy related improvements to dwellings occupied by very low income persons and for assistance to very low income households for heating and cooling expenses and energy related emergencies.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of households assisted through the Comprehensive Energy Assistance Program.	63,200	83,529	132%	51,502

Explanation of Variance: High home energy prices contributed to higher demand for energy assistance.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of dwelling units weatherized through the Weatherization Assistance Program.	4,800	5,404	112%	3,004

Explanation of Variance: The Department is above target for the year as a result of advantageous weather enabling higher weatherization production.

GOAL 4: TDHCA will ensure compliance with the Texas Department of Housing and Community Affairs' federal and state program mandates.

Strategy 4.1
The Portfolio Management and Compliance Division will monitor and inspect for Federal and State housing program requirements.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Total number of monitoring reviews conducted.	4,554	5,555	122%	5,072

Explanation of Variance: More onsite monitoring reviews were scheduled than were anticipated.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Total number of units administered	237,195	229,744	96.9%	242,766

Strategy 4.2
The Portfolio Management and Compliance Division will administer and monitor federal and state subrecipient contracts for programmatic and fiscal requirements.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Total number of monitoring reviews conducted	9,220	11,474	124.5%	12,715

Explanation of Variance: All monitoring requests received by the Department require a review. Monitoring reviews include set up and draw reviews. As contracts near their expiration date, contractors submit more set up and draw reviews in order to complete them before contract expiration. Because several contracts expired during the quarter, the Department received a larger number of draw requests than projected.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of contracts administered	350	358	102.3%	430

GOAL 5: To protect the public by regulating the manufactured housing industry in accordance with state and federal laws.

Strategy 5.1
Provide titling and licensing services in a timely and efficient manner.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of manufactured housing statements of ownership and location issued.	89,000	86,035	96.7%	90,000

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of licenses issued	4,435	2,602	58.7%	4,000

Explanation of Variance: Performance is under the targeted projection due to receiving fewer applications for new and renewed licenses.

Strategy 5.2
Conduct inspections of manufactured homes in a timely manner.

Strategy Measure (A)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of routine installation inspections conducted	8,000	4,603	57.5%	6,000

Explanation of Variance: The Department has experienced a higher level of non-routine inspection activity including an increased amount of affordable housing property inspections and complaint/investigative inspections. In addition, there have been several inspectors out on extended leave due to injuries. Although the measure is below the targeted number, the Department is meeting the program's statutory requirement to inspect at least 25% of installation inspections received. The actual year-to-date inspection rate is 30.76%.

Strategy Measure (B)	2007 Target	2007 Actual	% of Goal	2008 Target
Number of non-routine installation inspections conducted	2,500	2,100	84%	2,200

Explanation of Variance: Education and enforcement keep the number of inspections with deviations low, which is desirable.

Strategy 5.3
To process consumer complaints, conduct investigations, and take administrative actions to protect the general public and consumers.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Number of complaints resolved	1,700	1,052	61.9%	1,250

Explanation of Variance: The Department has made an effort to encourage the informal resolution of customer concerns prior to their issues becoming official complaints. The effort has helped to reduce the number of complaints officially received, which reduces the number of complaints resolved.

Goals Six through Eight are established in legislation as riders to TDHCA's appropriations, as found in the General Appropriations Act.

GOAL 6: TDHCA will target its housing finance programs resources for assistance to extremely low income households.*

Strategy 6.1
The housing finance divisions shall adopt an annual goal to apply $30,000,000 of the division's total housing funds toward housing assistance for individuals and families earning less than 30 percent of median family income.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Amount of housing finance division funds applied towards housing assistance for individuals and families earning less than 30 percent of median family income.	$30,000,000	$19,535,526	65.12%	$30,000,000

Explanation of Variance: Fewer Section 8 vouchers and a lower than anticipated number of units assisted by the HOME program contributed to the 2007 performance for this target. HUD transferred a large number of Section 8 vouchers to a large consortium and also adjusted the methodology for distributing Section 8 funds. Both of these contributed to the lower than anticipated assistance for households earning less than 30 percent of median family income. In addition, a double funding cycle for the HOME single family funds resulted in fewer applications for 2007, the second year of the double year cycle.

Note: For more information, see Rider 4 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.

GOAL 7: TDHCA will target its housing finance resources for assistance to very low income households.*

Strategy 7.1
The housing finance divisions shall adopt an annual goal to apply no less than 20% of the division's total housing funds toward housing assistance for individuals and families earning between 31% and 60% of median family income.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Percent of housing finance division funds applied towards housing assistance for individuals and families earning between 31% and 60% of median family income.	20%	50.5%	253%	20%

Explanation of Variance: The majority of TDHCA housing programs serve households under 60% of median family income.

GOAL 8: TDHCA will provide contract for deed conversions for families who reside in a colonia and earn 60 percent or less of the applicable area median family income

Strategy 8.1
Help colonia residents become property owners by converting their contracts for deed into traditional mortgages.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Amount of TDHCA funds applied towards contract for deed conversions for colonia families earning less than 60% of median family income.	$2,000,000	$0	0%	$2,000,000

Explanation of Variance: TDHCA has delayed the release of additional funds pending changes to encourage the efficient allocation of program funds. TDHCA has updated the program rules and anticipates the release of a NOFA for the 2006 and 2007 funding in FY 2008.

Note: For more information, see Rider 11 of TDHCA's Appropriations as found in HB 1 (General Appropriations Act), 79th Legislature, Regular Session.

The following TDHCA-designated goal addresses the housing needs of persons with special needs.

GOAL 9: TDHCA will work to address the housing needs and increase the availability of affordable and accessible housing for persons with special needs.

Strategy 9.1
Dedicate no less than 20% of the HOME project allocation for applicants that target persons with special needs.

Strategy Measure	2007 Target	2007 Actual	% of Goal	2008 Target
Percent of the HOME project allocation awarded to applicants that target persons with special needs.	20%	24%	122%	20%

Strategy 9.2:
Compile information and accurately assess the housing needs of and the housing resources available to persons with special needs.

Strategy Activities:

- Assist counties and local governments in assessing local needs for persons with special needs.
- Work with State and local providers to compile a statewide database of available affordable and accessible housing.
- Set up a referral service to provide this information at no cost to the consumer.
- Promote awareness of the database to providers and potential clients throughout the State through public hearings, the TDHCA web site as well as other provider web sites, TDHCA newsletter, and local informational workshops.

Strategy 9.3:
Increase collaboration between organizations that provide services to special needs populations and organizations that provide housing.

Strategy Activities:

- Promote the coordination of housing resources available among State and federal agencies and consumer groups that serve the needs of special needs populations.

- Continue working with agencies, advocates, and other interested parties in the development of programs that will address the needs of persons with special needs.
- Increase the awareness of potential funding sources for organizations to access, to serve special needs populations, through the use of TDHCA planning documents, web site, and newsletter.

Strategy 9.4:
Discourage the segregation of persons with special needs from the general public.

Strategy Activities:

- Increase the awareness of the availability of conventional housing programs for persons with special needs.
- Support the development of housing options and programs, which enable persons with special needs to reside in noninstitutional settings.

SECTION 5: PUBLIC PARTICIPATION

TDHCA strives to include the public in policy, program, and resource allocation decisions that concern the Department. This section outlines how the public is involved with the preparation of the plan and includes a summary of public comment.

- *Participation in TDHCA Programs*: Discusses efforts to ensure that individuals of low income and their community-based institutions participate in TDHCA programs
- *Citizen Participation in Program Planning*: Discusses affirmative efforts to ensure the involvement of individuals of low income and their community-based institutions in the allocation of funds and the planning process

PARTICIPATION IN TDHCA PROGRAMS

Texas is an economically, regionally, and demographically diverse state. The Department recognizes this by establishing criteria to distribute funds based on the priorities established in TDHCA's governing statute. It is incumbent upon TDHCA to increase the public's awareness of available funding opportunities so that its funds will reach those in need across the state.

Below are the approaches taken by TDHCA to achieve this end:

- Throughout the year, the TDHCA staff reaches out to interested parties at informational workshops and conferences across the state to share information about TDHCA programs. Organizations interested in becoming affordable housing providers are actively encouraged to contact TDHCA for further technical assistance in accessing TDHCA programs.
- The Department's Division of Public Affairs is responsible for media releases, attends conferences and maintains conference information booths on behalf of TDHCA, as well as coordinates media interviews and speaking events.
- The TDHCA *Program Guide* provides a comprehensive, statewide housing resource guide for both individuals and organizations across the state. The *Program Guide* provides a list of housing and housing-related programs operated by TDHCA, HUD, and other federal and state agencies.
- The TDHCA website, through its provision of timely information to consumers, is one of TDHCA's most successful marketing tools and affordable housing resources.
- TDHCA also operates a listserv e-mail service, where subscribed individuals and entities can receive email updated on TDHCA information, announcements, and trainings.
- TDHCA is involved with a wide variety of committees and workgroups, which serve as valuable resources to gather input from people working at the local level. These groups share information on affordable housing needs and available resources and help TDHCA to prioritize these needs.

CITIZEN PARTICIPATION IN PROGRAM PLANNING

The Department values and relies on community input to direct resources to meet its goals and objectives. In an effort to provide the public with an opportunity to more effectively give input on The Department's policies, rules, planning documents, and programs, the Department has consolidated its public hearings. In addition to these annual public hearings, individual program sections hold various hearings and program workshops throughout the year. Furthermore, the TDHCA Board accepts extensive public comment on programmatic and related policy agenda items at monthly board meetings.

The Department ensures that all programs follow the citizen participation and public hearing requirements as outlined in the Texas Government Code. Hearing locations are accessible to all who choose to attend and are held at times accessible to both working and non-working persons. The Department maintains a voluntary membership e-mail list which it uses to notify all interested parties of public hearings and public comment periods. Additionally, pertinent information is posted as an announcement in the *Texas Register*, in *Breaking Ground* (the TDHCA newsletter), and on TDHCA's website. Participation and comments are encouraged and can be submitted either at a public hearing or in writing via mail, fax, or email.

PREPARATION OF THE PLAN

Section 2306.0722 of the Texas Government Code mandates that the Department meet with various organizations concerning the prioritization and allocation of the Department's housing resources prior to preparation of the Plan. As this is a working document, there is no time at which the Plan is static. Throughout the year, research was performed to analyze housing needs across the state, focus meetings were held to discuss ways to prioritize funds to meet specific needs, and public comment was received at program-level public hearings as well as at every Governing Board meeting.

The Department met with various organizations concerning the prioritization and allocation of the Department's resources, and all forms of public input were taken into account in its preparation. Several program areas conducted workgroups and public hearings in order to receive input that impacted policy and shaped the direction of TDHCA programs.

Communication between TDHCA and numerous organizations results in a participatory approach towards defining strategies to meet the diverse affordable housing needs of Texans. In March 2006, TDHCA mailed out the 2006 Community Needs Survey to approximately 2,500 state representatives and senators, mayors, county judges, city managers, housing/planning departments, USDA local offices, public housing authorities, councils of governments, community action agencies, and Housing Opportunities for Persons with AIDS (HOPWA) agencies to gather preliminary input on local perceptions of housing, community affairs, and community development needs. TDHCA uses this input when preparing the Plan and in program planning and development.

PUBLIC HEARING

From October to December 2007, TDHCA worked on the draft version of the *2008 State of Texas Low Income Housing Plan and Annual Report.* The draft was submitted to the TDHCA Board of Directors for approval at the December 2007 Board meeting, and was then released for public comment in accordance with §2306.0732 and §2306.0661. The hearing notice was published in the January 4, 2008, edition of the *Texas Register*. The formal citizen participation process for the *2008 State of Texas Low Income Housing Plan and Annual Report* began January 4, 2008, and ended February 6, 2008. During the comment period, the public was encouraged to submit input toward the Plan in writing via mail, fax, or e-mail or in person at the public hearing held in Austin. The hearing was attended by staff from the TDHCA Housing Resource Center, as well as representatives from the Texas State Affordable Housing Corporation. The time and location were as follows:

Tuesday, January 8, 2008
10:00am
Rusk Building
208 E. 10th St.
Austin, TX 78701

PUBLIC COMMENT

The Department received no comment from the public regarding the SLIHP during the designated comment period.

SECTION 6: 2008-2009 COLONIA ACTION PLAN

POLICY GOALS

In 1996, in an effort to place more emphasis on addressing the needs of colonias, the TDHCA Office of Colonia Initiatives (OCI) was established to administer and coordinate efforts to enhance living conditions in colonias along the Texas-Mexico border region. OCI's fundamental goal is to improve the living conditions of colonia residents, and to educate the public regarding the services that TDHCA has to offer.

The OCI Division was created to do the following:

- Expand housing opportunities to colonia and border residents living along the Texas-Mexico border.
- Increase knowledge and awareness of programs and services available through the Department.
- Implement initiatives that promote improving the quality of life of colonia residents and border communities.
- Empower and enhance organizations that serve the targeted colonia population.
- Provide consumer education to colonia and border residents.
- Develop cooperative working relationships between other state, federal, and local organizations to leverage resources and exchange information.
- Promote comprehensive planning of communities along the Texas-Mexico border to meet current and future community needs.
- Solicit input from colonia residents on major funding decisions that will affect border communities.

OVERVIEW

The US-Mexico border region is dotted with hundreds of rural subdivisions called colonias, which are characterized by high levels of poverty and substandard living conditions. Several different definitions of colonias are used by various funding sources and agencies due to differing mandates. Generally, these definitions include the concepts that colonias are rural and lacking services such as public water and wastewater systems, paved streets, drainage, and safe and sanitary housing. Colonias are mostly unincorporated communities located along the US-Mexico border in the states of California, Arizona, New Mexico, and Texas, with the vast majority located in Texas

While new colonias continue to develop, many have been in existence for over 40 years. A few colonia developments began as small communities of farm laborers employed by a single rancher or farmer while others originated as town sites established by land speculators as early as the 1900s. A majority of the colonias, however, emerged in the 1950s as developers discovered a large market of aspiring homebuyers who could not afford to purchase in cities or who did not have access to conventional financing mechanisms.

POPULATION AND POVERTY

Data updated in 2006 by the Texas Office of the Attorney General recorded 2,060 colonias in 30 counties within 150 miles of the Texas-Mexico border. However, approximately 1,700 of those colonias are concentrated in just seven counties directly abutting the international boundary. It should be noted that these figures represent only the documented colonias. There may be many small, rural colonias that have gone unidentified. Currently, Hidalgo County has the largest number of colonias, with 847 counted in

2006. The 13 counties running along the Texas-Mexico border have an average Hispanic or Latino population of 74.2 percent, as compared to the statewide average of 34.6 percent.

Between 2000 and 2005 many Texas border counties experienced rapid population growth. El Paso, Maverick, Webb, Zapata, Starr, Hidalgo, and Cameron counties have shown an average increase in population of 12.3 percent, surpassing the state average increase of 9.6 percent. Simultaneously, a 5.4 percent average decrease in population has actually occurred in several counties that are adjacent to the border counties over the same time period. Counties experiencing large decreases include Hudspeth, Reeves, Pecos, Terrell, Edwards, Kinney, Duval, Jim Hogg, and Brooks.[90]

2003 US Census data placed the median household income for Texas at $39,967, while the median household income for the Texas-Mexico border counties averaged a much lower $26,606. Zavala County, near the border, posted the lowest median household income at $18,553. In the larger border-region cities El Paso, McAllen, Brownsville, Corpus Christi, and Laredo, the average median values of owner-occupied housing units in 2000 was $69,640. Laredo had the highest home values at $77,900.[2]

The particular need for affordable housing in the border region can be largely attributed to the poverty level of the rapidly growing population. Counties along the Texas-Mexico border shoulder some of the highest poverty rates in the state. According to 2003 US Census data, the poverty level in the state of Texas stood at 16.2 percent, while the average poverty level of counties along the Texas-Mexico border was 25.3 percent. Furthermore, the four counties with the greatest number of colonias (Hidalgo, El Paso, Starr, and Cameron), had an average poverty level of 31.5 percent, nearly double the state rate. Counties like Dimmit and Starr, at 32.7 percent and 36.2 percent respectively, were even higher.

HOUSING

According to a review completed by the Texas Comptroller's Office, most homebuilders would have a difficult time constructing houses for a sale price of less than $60,000 to $70,000. Houses in this price range would typically be affordable to workers earning $12 to $14 an hour (assuming a housing debt to income ratio of 33 percent with no additional debts). Some builders indicate that it is difficult to build lower-priced homes because many of the construction costs, including the cost of acquisition and site development, are fixed, regardless of the size of the home.[3] Land acquisition and development can add $10,000 to $20,000 to the cost of a house. For a new subdivision, the acquisition cost may be only a few thousand dollars per lot. But the 1998 cost of infrastructure—such as streets, power, and water—could be as much as $15,000 per lot or higher in some areas.[4]

Owner-builder construction in colonias can face additional significant obstacles. First, federal rules, such as those that govern the HOME Program, prohibit the use of affordable housing funds to acquire land unless the affordable structure is to be built within a short, sometimes impractical time. Second, lenders are typically reluctant to lend funds for owner-builder construction because these borrowers may have little or no collateral. Third, owner-builders may not be sufficiently skilled and may end up building substandard housing without appropriate supervision or guidance. Some governmental housing programs limit the private housing market from serving border residents because they offer no profit incentive for housing professionals, builders, lenders, and real estate agents to serve low-wage workers. Program administrators acknowledge profit as an ingredient in encouraging home construction.

COLONIA NEEDS ASSESSMENT

The following table displays housing quality data from 14 of the 28 colonias served by the Department's Self-Help Center Program. This sample of data, reported by the participating counties as part of their colonia needs assessments, provides a representation of the acute need for housing-related assistance in these communities. Each county conducted its own needs assessment by different methods, and not all counties reported specific data figures. As a result, the table below contains only the data that is available. For the purposes of this assessment, "substandard homes" refers to structures in need of repair or rehabilitation, while "dilapidated homes" refers to structures necessitating total replacement.

Housing Structural Quality by Colonia, Selected Border Counties

County	Colonia Name	Total Number of Homes	Number of Substandard Homes	Number of Dilapidated Homes
Hidalgo	Chula Vista Acres	34	15	5
Hidalgo	El Flaco Chiquito	105	37	13
Hidalgo	El Charro	143	81	15
Hidalgo	Schroeder	210	90	22
Hidalgo	Southside	59	24	30
Val Verde	Val Verde Park Estates	865	113	22
Val Verde	Cienegas Terrace	510	108	36
Val Verde	Villareal	12	3	0
Val Verde	Escondido Estates	33	0	0
Starr	Casita/Garciasville	28	3	7
Starr	Camargito	91	32	13
Starr	La Puerta 1 & 2	210	43	33
Starr	Refugio	54	16	5
Starr	West Alto Bonito	174	41	35
	TOTAL	2528	606 24% of total	236 9.3% of total

PROGRAM PLAN

TDHCA, through its Office of Colonia Initiatives, administers various programs designed to improve the lives of colonia residents. This action plan outlines how various initiatives and programs will be implemented for 2008.

FY 2008 and 2009 Office of Colonia Initiatives Funding

	Estimated Available Funding for FY 2008	Estimated Available Funding for FY 2009
Texas Bootstrap Loan Program	$6,500,000	$3,000,000
Colonia Self-Help Centers	$1,800,000	$1,800,000
Total	$8,300,000	$4,800,000

TEXAS BOOTSTRAP LOAN PROGRAM

The Texas Bootstrap Loan Program is a statewide loan program that funds certified non-profit organizations and enables owner-builders to purchase real estate, and construct or renovate a home. In 2001 the 77th Legislature amended this program under Senate Bill 322 with a legislative directive requiring continuation of an Owner Builder Loan Program through 2010.TDHCA is required under Section 2306.753(d) of the Texas Government Code, to set aside two-thirds of the available funds for owner-builders whose property is located in a county that is eligible to receive financial assistance under Subchapter K, Chapter 17, of the Water Code. The Texas Water Development Board has determined that eligible areas are Economically Distressed Areas (EDA) which have a median household income that is not greater than 75% of the median state household income. For the purposes of the Texas Bootstrap Loan Program EDAs will be identified by census tracts. The eligible census tracts are listed on the TDHCA website. The remaining one-third will be available statewide.

The program promotes and enhances homeownership for low income Texans by providing funds to purchase or refinance real property on which to build new residential housing, construct new residential housing or improve existing residential housing throughout Texas. Participating owner-builders must provide a minimum of 60 percent of the labor required to build or rehabilitate the home. Section 2306.753(a) of the Texas Government Code directs TDHCA to establish a priority in directing funds to Owner-Builders with an annual income of less than $17,500. The maximum loan amount using TDHCA funds may not exceed $30,000 per Owner-Builder. The total amount of loans made with TDHCA and any other source may not exceed a combined $60,000 per household. The Department committed over $8.4 million over the biennium (FY 2006-2007) to implement this initiative from the Housing Trust Fund. TDHCA released another NOFA in the amount of $6,500,000 for FY 2008, the funding for which will be available starting November 1, 2007 .

In an effort to increase the Department's ability to more promptly assist households and expend funds, and to better disseminate Bootstrap funds across a broader network of providers, the Office of Colonia Initiatives (OCI) Division of TDHCA is utilizing a new reservation system concept similar to the TDHCA First Time Homebuyer Bond Program in order to distribute the new allocation of funding. This type of system will allow program funds to be expended more rapidly and efficiently. Under the reservation system, participating nonprofit organizations must be certified by TDHCA as a Nonprofit Owner-Builder Housing Program (NOHP) in accordance with Section 2306.755 of the Texas Government Code and must execute a Loan Origination Agreement with the Department in order to assure full compliance with program rules and guidelines. After being certified as an NOHP, the NOHP will then be able to submit individual loan applications to TDHCA on behalf of the owner-builder applicant on a first-come, first-served basis. A nonprofit will be allowed to have up to ten reservations at any given time. Funds may be reserved up to twelve months for each reservation; however, the nonprofits are required to meet specific performance benchmarks within that time period in order to retain the funding. The Department is actively working with Bootstrap recipients to garner feedback on the new system to ensure the ongoing success of the program.

COLONIA SELF-HELP CENTERS

In 1995, the 74th Legislature passed Senate Bill 1509 (Texas Government Code Subchapter Z §2306.581 - §2306.591), a legislative directive to establish colonia self-help centers (SHCs) in Cameron/Willacy, Hidalgo, Starr, Webb, and El Paso counties. This program also allows the Department to establish a colonia SHC in any other county if the county is designated as an economically distressed area. Five colonias in each county are identified to receive concentrated attention from its respective SHC. Operation of the colonia SHCs is managed by a local nonprofit organization, local community action agency, or local housing authority that has demonstrated the capacity to operate a center.

These colonia SHCs provide concentrated on-site technical assistance to low and very low income individuals and families in a variety of ways including housing, community development activities, infrastructure improvements, outreach, and education. In addition, on-site technical assistance is provided to colonia residents. Key services to the designated colonias within each county receive technical assistance in the areas of housing rehabilitation; new construction; surveying and platting; construction skills training; tool library access for self-help construction; housing finance; credit and debt counseling; grant writing; infrastructure constructions and access; contract for deed conversions; and capital access for mortgages to improve the quality of life for colonia residents in ways that go beyond the provision of basic infrastructure. The three OCI border field offices provide technical assistance to the counties and SHCs.

The Colonia SHC program serves 28 colonias in the five counties designated by statute and two additional counties of Maverick and Val Verde, which were added to the program at the discretion of the Department. Each county has approximately 10,000 colonia residents who qualify as beneficiaries of these services. The Department contracts with the counties, which in turn subcontract with nonprofit organizations to administer the Colonia SHC program or specific activities. The counties oversee the implementation of contractual responsibilities and ensure accountability. Before selecting subcontractor organizations, County officials conduct a needs assessment to prioritize needed services within the colonias and publish a Request for Proposal (RFP) to provide these services.

The Department designates a geographic area to receive the services provided by the Colonia SHCs based upon funding proposals submitted by the counties. In consultation with the Colonia Residents Advisory Committee (C-RAC) and the appropriate unit of local government, the Department designates up to five colonias in each service area to receive concentrated attention from the Colonia SHCs. The C-RAC is a committee of colonia residents appointed by the TDHCA Governing Board which advises the Board regarding the needs of colonia residents and the types of programs and activities which should be undertaken by the Colonia SHCs. Each county nominates two colonia residents to serve on the committee, one of whom must reside in a colonia being serviced by the county's SHC. The committee also includes a primary and secondary representative from each county. The Department's Board of Directors appointed the current members to the C-RAC on September 19, 2001.The C-RAC meets thirty days before a contract is scheduled to be considered for award by the Board in order for their concerns, if any, to be relayed to and evaluated by the Board.

Each SHC is allocated sufficient funds to provide services within the designated colonias, and if applicable, can provide limited assistance outside the service area.

The operations of the colonia SHCs are funded by HUD through the Texas Community Development Block Grant Program 2.5 percent colonia set-aside, which is approximately $2.2 million per year. The CDBG funds are transferred to the Department through a memorandum of understanding with the Office of Rural Community Affairs. CDBG funds can only be provided to eligible units of general local governments. Therefore, the Department must enter into a contract with each participating county government. The Department provides administrative and general oversight to ensure programmatic and contract compliance. In addition, colonia SHCs are encouraged to seek funding from other sources to help them achieve their goals and performance measures.

Border Field Offices

OCI manages three border field offices located in El Paso, Laredo, and Edinburg. These border field offices administer, at the local level, various OCI programs and services and provide technical assistance to nonprofits, for profits, units of general local government, other community organizations and colonia residents along the Texas-Mexico border region. Current funding for the border field offices is partially funded from General Revenue, Bond Funds, and the HOME and CDBG programs. OCI will continue to maintain these three border field offices and will continue to act as a liaison between non-profit organizations and units of local government.

Occasionally, there is funding available to communities and organizations in the colonias to support local programs. Technical assistance is provided to help non-profit organizations locate funding and learn to write successful grant proposals. However, the most important aspect in seeking funding is the ability of the communities or organizations to manage the funding within its rules and program guidelines. Many communities and organizations struggle to deliver services to their colonia residents due to capacity and financial issues. Therefore, the Border Field Offices anticipate approximately 800 technical assistance visits for FY 2008 to nonprofit organizations and units of local government.

The Department recognizes the need for consumer education on topics such as filing homestead exemptions, knowing one's property rights under Contract for Deed, and the challenges of homeownership. The Department will provide homebuyers under its Contract for Deed Conversion and Texas Bootstrap Loan Programs a form to file their homestead exemption at the time of closing on their homes. The Department will create an educational campaign regarding House Bill 1823, which was passed during the 79th Regular Legislative Session (2005) and allows residential contract for deed buyers to have their contacts converted from a deed to a deed in trust. The educational campaign will be directed to colonia residents along the Texas-Mexico Border Region. Education services are available through the colonia SHCs and OCI Border Field Offices.

Border Field Offices and Colonia Self Help Centers

SECTION 7: TEXAS STATE AFFORDABLE HOUSING CORPORATION ANNUAL ACTION PLAN

According to Section 2306.0721(h), the Texas State Affordable Housing Corporation (TSAHC) Annual Action Plan must be included as part of the 2008 SLIHP.

OVERVIEW

This report is prepared in accordance with SB 284, Legislative 78th Session, which requires the Texas Department of Housing and Community Affairs ("TDHCA") and the Texas State Affordable Housing Corporation ("Corporation") to coordinate regarding the State Low Income Housing Plan ("SLIHP"). The bill amends Section 2306.0722(b) to require TDHCA to provide the needs assessment information compiled for the report and plan to the Corporation. Section 2306.566 is added to require the Corporation to then review the information and develop a plan to meet "the state's most pressing housing needs identified in the needs assessment information" and provide the plan to TDHCA for incorporation into the resource allocation plan in the SLIHP. The Corporation's plan must include specific proposals to help serve rural and other underserved areas of the state. The bill also adds Section 2306.0721(h) to require TDHCA to incorporate the specific results of the Corporation's programs in TDHCA's estimate and analysis of housing supply in each uniform state service region under Section 2306.0721(c)(9).

Sec. 2306.566 of the Texas Government Code reads:

> *COORDINATION REGARDING STATE LOW INCOME HOUSING PLAN.*
>
> *The corporation shall review the needs assessment information provided to the corporation by the department under Section 2306.0722(b).*
>
> The corporation shall develop a plan to meet the state's most pressing housing needs identified in the needs assessment information and provide the plan to the department for incorporation into the state low income housing plan.
>
> *The corporation's plan must include specific proposals to help serve rural and other underserved areas of the state.*

HISTORY OF THE CORPORATION

The Texas State Legislature created the Corporation as a self-sustaining non-profit entity to facilitate the provision of affordable housing for low income Texans who do not have comparable housing options through conventional financial channels. Enabling legislation, as amended, may be found in the Texas Government Code, Chapter 2306, Subchapter Y, Sections 2306.551 et seq. All operations of the Corporation are conducted within the state of Texas. Corporate offices are located in Austin, Texas. A five-member board of directors appointed by the Governor with the advice and consent of the Senate oversees the business of the Corporation.

The Corporation issues mortgage revenue bonds and private activity bonds to finance the creation of affordable multifamily housing units, and to finance the purchase of single family homes under three separate programs: (1) the Professional Educators Home Loan Program, (2) the Fire Fighter, Law Enforcement or Security Officer, and Emergency Medical Services Personnel Home loan Program (more commonly referred to as the Homes for Texas Heroes Program), and (3) the Home Sweet Texas Loan Program. Since April 2001, the Corporation has issued over $291 million in single family and approximately $540 million in multifamily mortgage revenue bonds. To date, the Corporation has provided over 9,362 units of affordable multifamily rental housing to low income Texans. The Corporation has also served 2650 income eligible individuals and/or families through its single family first-time homebuyer programs. This affordable housing has been provided at no cost to the state and its taxpayers. The Corporation does not receive any state funding, and is not subject to the legislative appropriations process.

The Corporation is organized, operated, and administered in accordance with its enabling legislation as a 501(c)(3) nonprofit corporation in order to access additional sources of funding to accomplish its mission. The Corporation is an approved originating seller/servicer for single family loans with Fannie Mae, Freddie Mac, Ginnie Mae, U.S. Rural Development, FHA, and VA. The Corporation has conduit sales agreements with Countrywide Home Loans, Inc., and Wells Fargo Funding, and with the Community Development Trust, Inc., for multifamily mortgage loans. The Corporation is also a associate member borrower of the Federal Home Loan Bank of Dallas.

NEEDS ASSESSMENT REVIEW

According to an analysis of the Texas Department of Housing and Community Affairs' (TDHCA) Needs Assessment and other published studies on the subject, the following represent the most pressing housing needs in the state:

GENERAL HOUSING NEEDS

- By 2000, Texas had the second largest total population, 20.9 million, among the states in the United States. By 2010, the population is projected to be between 24.2 and 25.9 million and by 2040 between 35.0 and 50.6 million.[91]
- As a result of the growing population, housing demands will change substantially in the coming years with both owner and renter housing growing at nearly equal rates.[92]
- Affordable housing is in short supply for the extremely low, very low, low, and moderate income brackets, which was caused primarily by the private sector's concentration of development, both single family and multifamily development, in larger metropolitan areas and targeting higher income individuals and families.[93]
- Many HUD-financed or HUD-subsidized properties, which represent a significant portion of the state's affordable housing portfolio, are at risk of becoming market rate properties.[94]

SINGLE FAMILY HOUSING NEEDS

- Texas may add nearly 3.8 million more students over the next 40 years creating a high demand for educators.[95]
- Population growth will mean increased public service demands and expanding markets for Texas.[96] The Texas nursing education system is operating close to capacity and faces several impediments to producing more graduates—faculty shortages due to retirement, inadequate salaries, and fewer faculty applicants.[97]

- Lack of funds for down payment and closing costs has created one of the greatest obstacles that prevents first-time homebuyers of low-to-moderate-income families, such as the teachers, police officers, and firefighters, from achieving the American dream of owning a home.[98]
- The Texas Education Code establishes a state minimum salary schedule that must be accommodated by all Texas schools for specific public education professionals. The state minimum salary for 2007-2008 ranges from $27,320 per year for 0 years experience to $44,270 per year for 20 or more years of experience.[99]
- The base salary for Texas fire fighters differs across the State, but on average ranges from $19,400 per year to $58,214.[100]
- The base salary for Texas police officers ranges across the State, but on average ranges from $29,969 per year to $61,438. [101]
- The base salary for Texas correctional officers ranges from $20,844 per year to $42,127.[102]
- The base salary for Texas juvenile correctional officers ranges from $20,844 per year to $47,529.[103]

MULTIFAMILY HOUSING NEEDS

- Renter households are, on average, a lower income group than owner households. More than 37 percent of renter households earn less than 50 percent of the Area Median Family Income, compared to only 16.3 percent of owner households. As a result, renter households are more likely to be in need of housing assistance.[104]
- According to the results of the 2003 Community Needs Survey distributed by TDHCA to cities, counties, local housing departments, public housing authorities, and the US Department of Agriculture/Rural Development field offices, approximately 78 percent of respondents felt that there was a severe or significant affordable housing problem in their area and that new rental housing development and the renovation of existing multifamily housing are more important than rental payment assistance.[105]
- The lack of affordable housing opportunities leads to severe and extreme housing cost burdens for lower-income groups; in particular, extremely low-income renter households.[106]
- Overcrowding may indicate a general lack of affordable housing in a community and lower income renter households experience overcrowded conditions more frequently than higher income households.[107]
- In the 2005-2009 State of Texas Consolidated Plan, it is estimated that 2 million people or 9.9% of the total population are 65 years of age and older. The Texas Department of Aging and Disability Services estimates that by year 2040, individuals age 60 and over will comprise 23 percent of the population in Texas. Though the majority of the elderly Texans live in urban areas, rural areas have a higher percentage of elderly relative to the local population. According to the 2000 Census,

[107] Ibid.

13.1 percent of seniors age 65 and over in Texas live below the poverty level. Approximately 30% of all elderly households pay more than 30% of their income on housing with 14% paying more than 50% of their income on housing. Lower incomes combined with rising healthcare costs contribute to the burden of paying for housing.[108]

- There is a shortage of affordable housing in the extremely low, very low, low and moderate income brackets. This is primarily caused by the private sector's concentration of development in larger metropolitan areas and targeting higher income individuals and families.[109] Cities with populations between 20,000 and 50,000 have a particularly hard time accessing funds. They cannot access USDA funding and are too small to effectively compete for other funding opportunities.[110]
- According to the US Census Related Comprehensive Housing Affordability Strategy (CHAS) Data, there are approximately 2,903,671 people living in rural areas of Texas. Of these, 574,843 people or 20% are living below the poverty level; 83,454 low income households live with the cost burden of paying more than 30% of their income on housing expenses; 26,999 occupied units are "overcrowded"; and 5,211 units were found to have substandard conditions such as lack of piped water, utilities, and waste facilities.[111]
- Preservation of existing affordable and subsidized housing stock is an important element of providing safe, decent and affordable housing. The explosive population growth in the metropolitan areas as well as the lack of new construction during the late 80's and early 90's created a huge demand for housing at all income levels. Adding to this problem is the loss of units in the federally subsidized Section 8 portfolio, the USDA/Rural Development portfolio and the pools of tax credit units that have reached their 15 year affordability periods. The USDA/Rural Development portfolio contains smaller rural rental properties which, in many cases, represent the sole affordable housing stock in Texas' smallest towns.[112]
