

Brazoria County Health Department

Get your child immunized early to avoid the back-to-school rush!

The State of Texas made several changes in the requirements for immunizations for children and students in Texas Public and Private Schools. The changes affect mainly students entering kindergarten and seventh grade with changes regarding the Hepatitis A, MMR, Varicella, Tetanus (Tdap) and Meningococcal vaccines. Please bring your child in early to avoid the back-to-school rush in August.

Current up-to-date shot record is required!
