

# 2005 Data Profiles: Lubbock County, Texas

## Demographic

Sex and Age, Race, Relationship, Household by Type

Selected Social Characteristics: 2005

Data Set: 2005 American Community Survey

Survey: 2005 American Community Survey

**Demographic** - Sex and Age, Race, Relationship, Household by Type

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

General Demographic Characteristics: 2005	Estimate	Margin of Error
<b>Total population</b>	<b>241,947</b>	<b>*****</b>
<b>SEX AND AGE</b>		
Male	118,000	+/-411
Female	123,947	+/-411
Under 5 years	19,240	+/-119
5 to 9 years	15,465	+/-1,463
10 to 14 years	18,626	+/-1,445
15 to 19 years	16,497	+/-550

<b>General Demographic Characteristics: 2005</b>	<b>Estimate</b>	<b>Margin of Error</b>
20 to 24 years	27,326	+/-529
25 to 34 years	36,498	+/-1,010
35 to 44 years	30,146	+/-796
45 to 54 years	30,498	+/-596
55 to 59 years	10,680	+/-1,179
60 to 64 years	9,967	+/-1,164
65 to 74 years	14,516	+/-333
75 to 84 years	10,807	+/-805
85 years and over	1,681	+/-579
Median age (years)	30.9	+/-0.5
18 years and over	179,019	+/-65
21 years and over	165,936	+/-1,666
62 years and over	32,896	+/-904
65 years and over	27,004	+/-392
<b>General Demographic Characteristics: 2005</b>	<b>Estimate</b>	<b>Margin of Error</b>
18 years and over	179,019	+/-65
Male	85,836	+/-209
Female	93,183	+/-207
65 years and over	27,004	+/-392
Male	11,586	+/-365
Female	15,418	+/-111
<b>RACE</b>		
One race	238,380	+/-919

Two or more races	3,567	+/-919
<b>Total population</b>	<b>241,947</b>	<b>*****</b>
One race	238,380	+/-919
White	192,302	+/-3,010
Black or African American	17,879	+/-292
American Indian and Alaska Native	984	+/-571
Cherokee tribal grouping	N	N
Chippewa tribal grouping	N	N
Navajo tribal grouping	N	N
Sioux tribal grouping	N	N
Asian	4,032	+/-824

<b>General Demographic Characteristics: 2005</b>	<b>Estimate</b>	<b>Margin of Error</b>
Asian Indian	N	N
Chinese	N	N
Filipino	N	N
Japanese	N	N
Korean	N	N
Vietnamese	N	N
Other Asian	N	N
Native Hawaiian and Other Pacific Islander	0	+/-288
Native Hawaiian	N	N
Guamanian or Chamorro	N	N
Samoan	N	N
Other Pacific Islander	N	N
Some other race	23,183	+/-2,819
Two or more races	3,567	+/-919
White and Black or African American	727	+/-549
White and American Indian and Alaska Native	1,412	+/-440
White and Asian	203	+/-188
Black or African American and American Indian and Alaska Native	0	+/-288
<b><i>Race alone or in combination with one or more other races</i></b>		
<b>Total population</b>	<b>241,947</b>	<b>*****</b>
White	195,254	+/-3,113

<b>General Demographic Characteristics: 2005</b>	<b>Estimate</b>	<b>Margin of Error</b>
Black or African American	18,894	+/-564
American Indian and Alaska Native	2,396	+/-603
Asian	4,562	+/-681
Native Hawaiian and Other Pacific Islander	N	N
Some other race	24,408	+/-2,917
<b>HISPANIC OR LATINO AND RACE</b>		
<b>Total population</b>	<b>241,947</b>	<b>*****</b>
Hispanic or Latino (of any race)	73,243	*****
Mexican	57,317	+/-3,362
Puerto Rican	298	+/-275
Cuban	219	+/-253
Other Hispanic or Latino	15,409	+/-3,331
Not Hispanic or Latino	168,704	*****
White alone	145,361	+/-182
Black or African American alone	17,775	+/-264
American Indian and Alaska Native alone	373	+/-229
Asian alone	3,155	+/-488
Native Hawaiian and Other Pacific Islander alone	0	+/-288
Some other race alone	185	+/-198
Two or more races	1,855	+/-626

<b>General Demographic Characteristics: 2005</b>	<b>Estimate</b>	<b>Margin of Error</b>
Two races including Some other race	327	+/-526
Two races excluding Some other race, and Three or more races	1,528	+/-389
<b>RELATIONSHIP</b>		
<b>Household population</b>	<b>241,947</b>	<b>*****</b>
Householder	98,238	+/-2,217
Spouse	46,643	+/-2,443
Child	67,196	+/-2,233
Other relatives	15,230	+/-2,687
Nonrelatives	14,640	+/-2,369
Unmarried partner	4,907	+/-1,346
<b>HOUSEHOLDS BY TYPE</b>		
<b>Total households</b>	<b>97,696</b>	<b>+/-1,904</b>
Family households (families)	63,344	+/-2,714
With own children under 18 years	29,962	+/-2,102
Married-couple families	45,658	+/-2,806
With own children under 18 years	19,274	+/-1,833
Male householder, no wife present	4,595	+/-1,282
With own children under 18 years	2,634	+/-1,013
Female householder, no husband present	13,091	+/-1,749
With own children under 18 years	8,054	+/-1,574

General Demographic Characteristics: 2005	Estimate	Margin of Error
Nonfamily households	34,352	+/-2,494
Householder living alone	27,206	+/-2,195
65 years and over	7,518	+/-1,241
Households with one or more people under 18 years	34,569	+/-1,922
Households with one or more people 65 years and over	19,618	+/-894
Average household size	2.48	+/-0.05
Average family size	3.04	+/-0.10

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

#### Notes:

- The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.
- For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, Overview of Race and Hispanic Origin, issued March 2001. (pdf format)

#### Explanation of Symbols:

1. An '\*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '\*\*' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
9. An '(X)' means that the estimate is not applicable or not available.

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

- Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).
- The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the ACS Subject Definitions for Disability.
- Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

#### Explanation of Symbols:

1. An '\*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '\*\*' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
9. An '(X)' means that the estimate is not applicable or not available.

Other relatives	12,736	+/-2,526
Nonrelatives	13,576	+/-2,329
Unmarried partner	4,339	+/-1,246
<b>HOUSEHOLDS BY TYPE</b>		
<b>Total households</b>	<b>81,291</b>	<b>+/-2,477</b>
Family households (families)	51,180	+/-2,620
With own children under 18 years	24,485	+/-1,988
Married-couple families	35,738	+/-2,728
With own children under 18 years	15,106	+/-1,783
Male householder, no wife present	3,882	+/-1,154
With own children under 18 years	2,164	+/-920
Female householder, no husband present	11,560	+/-1,653
With own children under 18 years	7,215	+/-1,475
Nonfamily households	30,111	+/-2,464
Householder living alone	23,636	+/-2,118
65 years and over	6,090	+/-950

<b>General Demographic Characteristics: 2005</b>	Estimate	Margin of Error
Households with one or more people under 18 years	28,319	+/-1,824
Households with one or more people 65 years and over	15,518	+/-1,313
Average household size	2.46	+/-0.06
Average family size	3.05	+/-0.11

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

#### Notes:

- The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.
- For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, Overview of Race and Hispanic Origin, issued March 2001. (pdf format)

#### Explanation of Symbols:

1. An '\*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '\*\*' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
9. An '(X)' means that the estimate is not applicable or not available.

# 2005 Data Profiles: City of Lubbock, TX

## Social

Social - Education, Marital Status, Fertility, Grandparents...

Selected Social Characteristics: 2005

Data Set: 2005 American Community Survey

Survey: 2005 American Community Survey

**Social** - Education, Marital Status, Fertility, Grandparents...

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Selected Social Characteristics in the United States: 2005	Estimate	Margin of Error
<b>SCHOOL ENROLLMENT</b>		
<b>Population 3 years and over enrolled in school</b>	<b>65,836</b>	<b>+/-3,313</b>
Nursery school, preschool	3,990	+/-994
Kindergarten	2,791	+/-970
Elementary school (grades 1-8)	22,929	+/-1,477
High school (grades 9-12)	9,511	+/-1,126
College or graduate school	26,615	+/-2,486
<b>EDUCATIONAL ATTAINMENT</b>		
<b>Population 25 years and over</b>	<b>116,795</b>	<b>+/-2,812</b>
Less than 9th grade	8,145	+/-1,726
9th to 12th grade, no diploma	13,501	+/-1,988
High school graduate (includes equivalency)	30,410	+/-2,906
Some college, no degree	26,021	+/-2,345
Associate's degree	6,426	+/-1,357
Bachelor's degree	20,330	+/-2,490
Graduate or professional degree	11,962	+/-1,842
Percent high school graduate or higher	81.50%	+/-1.9
Percent bachelor's degree or higher	27.60%	+/-2.5

<b>Selected Social Characteristics in the United States: 2005</b>	Estimate	Margin of Error
<b>MARITAL STATUS</b>		
<b>Males 15 years and over</b>	<b>73,210</b>	<b>+/-2,202</b>
Never married	24,702	+/-2,143
Now married, except separated	38,547	+/-2,673
Separated	1,652	+/-674
Widowed	1,695	+/-583
Divorced	6,614	+/-1,410
<b>Females 15 years and over</b>		
<b>Females 15 years and over</b>	<b>82,055</b>	<b>+/-1,658</b>
Never married	25,063	+/-2,280
Now married, except separated	37,179	+/-2,535
Separated	2,224	+/-737
Widowed	7,548	+/-1,110
Divorced	10,041	+/-1,535
<b>FERTILITY</b>		
<b>Number of women 15 to 50 years old who had a birth in the past 12 months</b>	<b>3,168</b>	<b>+/-1,183</b>
Unmarried women (widowed, divorced, and never married)	1,023	+/-562
Per 1,000 unmarried women	34	+/-18
Per 1,000 women 15 to 50 years old	57	+/-21
Per 1,000 women 15 to 19 years old	56	+/-52
Per 1,000 women 20 to 34 years old	85	+/-35
Per 1,000 women 35 to 50 years old	14	+/-15
<b>GRANDPARENTS</b>		
<b>Number of grandparents living with own grandchildren under 18 years in households</b>	<b>5,951</b>	<b>+/-1,384</b>
Responsible for grandchildren	4,379	+/-1,147
<b>Years responsible for grandchildren</b>		
Less than 1 year	847	+/-623
1 or 2 years	1,358	+/-709

<b>Selected Social Characteristics in the United States: 2005</b>	Estimate	Margin of Error
3 or 4 years	1,010	+/-686
5 or more years	1,164	+/-587
Characteristics of grandparents responsible for own grandchildren under 18 years

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

#### Notes:

- Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).
- The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the ACS Subject Definitions for Disability.
- Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

#### Explanation of Symbols:

1. An '\*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '\*\*' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
9. An '(X)' means that the estimate is not applicable or not available.
