June 2007

INTRODUCTION

Atanta State Park lies on the southern edge of Wright Patman Lake. The park is covered with mixed hardwood and pine forest with excellent views of the lake.

Inside the park, woodland birds can be found in the camping and picnic areas and from the hiking trails on the east side of the park. Brown-headed Nuthatches and Pine Warblers are resident in the trees overhead. In winter, the picnic area provides one of the best viewing areas of the lake for Bufflehead, Ruddy Duck, and other duck species, along with the many American White Pelicans and Double-crested Cormorants found on the water.

The dam area of the lake just west of U.S. 59 offers other birding opportunities. In the winter, gull enthusiasts will enjoy the numerous Bonaparte's Gulls mixed with lesser numbers of Ring-billed and the occasional Herring Gulls swirling below the dam when water is flowing from the spillway. Rarities such as Little and Black-headed Gulls have been found here. Red-necked Grebes have been found at the Clear Springs Campground. The dam area and the campgrounds are all worth investigation.

This checklist was compiled by Hazel Bluhm and Mike Dillon of Marshall, Texas and is based on observations by Billy Heldt and members of the Northeast Texas Field Ornithologists along with visiting birders. This checklist includes species observed within the park as well as other locations around Wright Patman Lake.

You can contribute to this checklist by reporting new and unusual sightings or changes in status. You may leave your sightings at the park headquarters or mail them to the Natural Resources Program, Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744. Nomenclature and organization for this checklist follow the 7th edition of the American Ornithologists Union *Check-list of North American Birds* as currently supplemented.

Please help us protect the natural avian communities in our parks by refraining from using playback tapes of bird songs. Frequent use of these tapes disrupts normal avian activity patterns, including essential territorial behavior, and may lead to nest failure. Thank you for your cooperation.

LEGEND

- c - Common (present, easy to find)
 f - Fairly common (present, should see or hear)
 u - Uncommon (present, harder to find)
 r - Rare (may not occur every year)
- Sp - March, April, May
 Su - June, July, August
 F - September, October, November
 W - December, January, February

CITATION

Bluhm, Hazel and Mike Dillon. June 2007. Birds of Atlanta State Park: A Field Checklist. Texas Parks and Wildlife Department, Natural Resources Program, Austin, Texas.

In 1983, the Texas Legislature created the Special Nongame and Endangered Species Conservation Fund. This fund may be used for nongame wildlife and endangered species research and conservation, habitat acquisition and development and dissemination of information pertaining to nongame management. Money for this fund is obtained through private donations and sale of nongame wildlife art prints and stamps. This fund now gives Texans a unique opportunity to help support this state's valuable and sensitive nongame resources. Your individual contributions and purchases of nongame art prints and stamps will help determine the level of nongame conservation activities in Texas. For more information call toll-free (1-800-792-1112) or contact: **Nongame and Endangered Species Program, Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744.**
