

## Master of Health Administration 2009-2010 Academic Year

The master of health administration program is designed to prepare students with competencies needed to assume management positions in health services organizations throughout the world. The 57 credit hour program is designed for aspiring and committed professionals who are interested in careers in health services administration in such settings as hospitals, managed care organizations, medical group practices, ambulatory, long-term care, insurance and pharmaceutical companies, consulting firms, government agencies, for profit, and nonprofit sector organizations. Emphasis is placed on theoretical bases in three areas: organization and operations, economics and finance, and policy analysis. Through an internship and a final integrative experience, students are asked to incorporate, synthesize, and apply their knowledge within both an operational and a community context. The result is an organizational perspective that encourages students to integrate knowledge from a range of management disciplines while emphasizing accountability for effective performance. By the conclusion of the M.H.A. program, students will be able to:

1. Apply financial knowledge to help optimize resource allocation to support organizational viability
2. Use information technology to assist in managerial decision making
3. Manage a diverse staff
4. Demonstrate knowledge of ethical values necessary for managerial decisions
5. Develop knowledge of important federal and state health policy issues
6. Identify important regulatory and legal issues that impact health service management decision making
7. Show a level of leadership that relies on important written and oral communication skills
8. Possess a familiarity with the fundamentals of biostatistics and epidemiology necessary to analyze community needs
9. Understand the application of expert economic statistical and legal analysis in the support of management decision making
10. Understand the concept of productivity and how to measure it using tools from economics, finance and management science.
