Fiscal Year 2008: No Current Data Available Fiscal Year 2009: Cephalic phase of insulin secretion is a well documented physiological response that is regulated by autonomic and endocrine responses to food-related sensory stimulation such as sight, smell and taste. Human taste perception comprises of at least five distinct qualities: bitterness, saltiness, sourness, sweetness, and umami. Umami is a sensation elicited by glutamate, commonly found in protein such as meat, fish, and legumes as well as flavor enhancers such as monosodium glutamate (MSG). Both the sweet and and umami taste stimuli had been shown to illicit cephalic-phase insulin release in rats. Oral sensory stimulation in human with modified sham feeding (MSF - where food is smelled, tasted, and chewed, but not swallowed) had been shown to elicit the same response. The loss of this cephalic phase in insulin response has been shown to impair glucose tolerance. Furthermore, patients with type 2 diabetes and their first degree relatives had been shown to have impairment of sweet taste. Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).

In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement:

1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or
2. an audit that meets the requirements of OMB Circular No. A-133.

In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

The NIH will maintain applicant records for 3 years after rejection and participant records for 6 years after completion of final service obligation.

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year

retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants.

In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

93.233 NATIONAL CENTER ON SLEEP DISORDERS RESEARCH

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

NIH Reauthorization Act of 1993, Public Health Service Act, Section 503: Subpart 2, Part C, Title IV, Section 424, 42 U.S.C. 285b et seq.

OBJECTIVES:

The purpose of the Center is to support research, training, health information dissemination and other activities with respect to sleep and sleep disorders, including biological and circadian rhythm research, basic understanding of sleep, chronobiological and other sleep related research; and to coordinate the activities of the Center with related activities of other Federal agencies, public and nonprofit organizations.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants may support salaries, equipment, supplies, travel, and patient hospitalization as required to perform the research effort. Restrictions or limitations are imposed against the use of funds for entertainment, foreign travel, general-purpose equipment, alterations and renovations, and other items not regularly required for the performance of research. National Research Service Awards (NRSAs) are made directly to individuals for research training in specified biomedical shortage areas. Grants may be made to institutions to enable them to make NRSAs to individuals selected by them. Certain service and payback provisions apply to individuals upon termination of the award. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application.

Applicant Eligibility:

Any nonprofit organization engaged in biomedical research, as well as institutions or companies organized for profit, may apply for grants with the exception of NRSAs. An individual may apply for a NRSA or, in some cases, may qualify for a research grant if adequate facilities in which to perform the research are available. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company or institution engaged in biomedical research.

Credentials/Documentation:

Applicants for individual National Research Service Awards must be citizens of the United States or have been admitted for permanent residency; must hold a

doctoral degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D. Eng., or equivalent domestic or foreign degree); and must designate a desire for training in one of the health or health-related areas specified by the National Institutes of Health. Each applicant must be sponsored by an accredited public or private nonprofit institution engaged in such training. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Effective for the December 1, 2005 submission date and beyond, all SBIR and STTR Phase I, Phase II, and Fast-Track grant applications must be submitted electronically through Grants.gov (<http://www.grants.gov>) using the SF424 (R&R) forms and Application Instruction Guide. Complete SBIR and STTR application instructions, including requirements for electronic submission, can be found at <http://grants.nih.gov/grants/funding/sbir.htm>. OMB Circular No. A-87 applies to this program.

SBIR and STTR grant applications should be submitted to the Center for Scientific Review, 6701 Rockledge Drive, Room 1040 - MSC 7710, Bethesda, MD 20892-7710. NIH is transitioning to an electronic application by grant mechanism. Details, including the appropriate application form, can be found at <http://era.nih.gov/ElectronicReceipt/>.

Award Procedure:

All accepted applications are evaluated by an appropriate initial review group (study section). All grant applications receive a final secondary review by the National Heart, Lung, and Blood Advisory Council. Staff informs applicants of the results of the review. If support is contemplated, staff initiates preparation of awards for grants. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

93.242 MENTAL HEALTH RESEARCH GRANTS

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Small Business Research and Development Enhancement Act of 2000; Public Health Service Act, Title III, Section 301, 42 U.S.C 241.

OBJECTIVES:

To increase knowledge of basic brain and behavioral processes that underlie mental and behavioral disorders; to support epidemiological studies of biological and environmental risk factors; to translate basic and epidemiological research into the development of new diagnostics and interventions for preventing and treating mental disorders; to conduct clinical trials for testing the efficacy and effectiveness of interventions in controlled and real-world settings; and to conduct research to improve mental health service delivery and use. Research supported by the National Institute of Mental Health may employ theoretical, laboratory, clinical, epidemiological, and field studies. Studies may involve individuals with a mental disorder diagnosis, individuals with symptom levels that do not meet diagnostic thresholds, and healthy individuals of all ages. Research also may involve animal, computational, and mathematical models appropriate to the system being investigated and the state of the field. Areas eligible for research support are: basic and clinical neuroscience; genetics; geriatrics research; adult psychopathology; experimental therapeutics; developmental, behavioral, clinical, and epidemiological research relevant to mental disorders, behavioral disorders, and HIV/AIDS, in terms of the causes, prevention, treatment, and service delivery; basic (brain and behavior), clinical, and services research on the mental health problems of women, minorities, and rural populations; and research designed to eliminate mental health disparities.

TYPES OF ASSISTANCE:

Cooperative Agreements; Project Grants

USES AND USE RESTRICTIONS:

(1) Research project grants provide support for clearly defined projects by a named investigator in an area representing his/her specific interests and competencies. (2) Exploratory/Development and Clinical Exploratory/Developmental Grants encourage the development of new research activities in categorical program areas; (3) Small Research Grants provide research support specifically limited in time and amount for studies in categorical program areas; (4) Collaborative Clinical Research Grants support evaluations of various methods of therapy and/or prevention; (5) Program Project and Center grants support large-scale, broad-based programs of research, usually interdisciplinary, consisting of several projects with a common focus; and (6) Cooperative Agreements support single or a group of related research activities with greater involvement of federal staff. Standard small grants are limited to \$50,000 direct costs for a period of 2 years or less,

while other small grants are for less time and funds. SBIR and STTR grants are awarded in two stages: Phase I grants are awarded to establish the technical merit and feasibility of a proposed research and development effort; only Phase I awardees are eligible to receive Phase II support.

Applicant Eligibility:

Public, private, profit, or nonprofit agencies (including State and local government agencies), eligible Federal agencies, universities, colleges, hospitals, and academic or research institutions may apply for research grants. SBIR grants can be awarded only to domestic small businesses, and STTR grants can be awarded only to domestic small businesses which "partner" with a research institution in cooperative research and development. For further definitions, requirements, and restrictions see the SBIR and STTR Omnibus Solicitations of the NIH, CDC, and FDA for SBIR and STTR Grant Applications.

Beneficiary Eligibility:

Public, private, profit, or nonprofit organizations.

Credentials/Documentation:

Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. For-profit organizations' costs will be determined in accordance with 48 CFR, Subpart 31.2 of the Federal Acquisition Regulations. For all other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Instructions for electronic submission may be found with the federal SF424 (R&R) form packages that are found in the SBIR/STTR funding opportunity announcements. Instructions are provided for SBIR Phase I and Phase II awards, respectively; as well as for STTR Phase I and Phase II awards, respectively. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. OMB Circular No. A-110 applies to this program. Most applications must be prepared and submitted electronically. Most applicants use the SF 424 (Research & Related) for electronic submission. Information about the SF 424 form may be found on <http://grants.nih.gov/grants/funding/424/index.htm>, but application packages should be accessed through the appropriate funding opportunity announcement, found either on the NIH Guide to Grants and Contracts (<http://grants1.nih.gov/grants/guide/index.html>) or through the Grants.gov website (<http://www.grants.gov/>). Some institutions may submit the grant data directly (using what is called a system-to-system transfer). For further details, see grants.gov or eRA Commons. Application forms for SBIR and STTR grants may be obtained through the SBIR/STTR funding announcements posted on the NIH Guide to Grants and Contracts and the Grants.gov sites (see URLs listed above). All SBIR and STTR applications must be submitted electronically. The timeline for transition to electronic applications and the new forms may be found at: <http://era.nih.gov/ElectronicReceipt/>. For further assistance contact GrantsInfo, Telephone (301) 435-0714, Email: GrantsInfo@nih.gov. Applications for the Resource-related Research Projects (R24) and Cooperative Agreement applications ("U" applications) must be prepared using the PHS 398 research grant application instructions and forms (Revised 11/2007). The PHS 398 is available at <http://grants1.nih.gov/grants/funding/phs398/phs398.html> in an interactive format. Consultation on a proposed project may be obtained from the NIMH branch or office responsible for the research area of interest. Applications are reviewed by principally nonfederal consultants recruited nationwide from the mental health field. The amounts of the award and period of support are determined on the basis of merit of the project and the nature of the grant mechanism. Electronic applications are submitted through the Grants.gov website. Completed PHS 398 applications should be submitted to the National Institutes of Health, Center for Scientific Review, 6701 Rockledge

Drive, Room 1040 - MSC 7710, Bethesda, MD 20892-7710 or Bethesda, MD 20817 (for express/courier service). All applications for research grants, cooperative agreements, SBIR and STTR grants are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by the National Advisory Mental Health Council (excepting Small Grants). All competitive applications compete for available funds on the basis of scientific and technical merit, program relevance, and program balance. All SBIR and STTR applications receiving a priority score compete for set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: No Current Data Available Fiscal Year 2009: The nation's childhood immunization coverage rates are at record high levels for most vaccines and for all the vaccination series measures. As childhood immunization coverage rates increase, cases of vaccine preventable disease decline significantly. One performance measure is used to ensure that children are appropriately vaccinated by age two. For the past five years, the 90 percent coverage target has been exceeded for four of the seven routinely recommended childhood vaccine (Hib, MMR, hepatitis B, and polio) and reached the 90 percent target for varicella in 2007. Data for two recently recommended vaccines (HepA and rotavirus) are not yet available. Another performance measure is used to ensure that adolescents receive recommended vaccinations that were missed during childhood. In 2007, hepatitis B and MMR coverage among adolescents aged 13-15 years was at or near the 90% target. Three new vaccines have been recommended for adolescents since 2005: meningococcal vaccine (MCV4); tetanus, diphtheria, acellular pertussis vaccine (Tdap); and human papillomavirus vaccine (HPV4). In 2007, coverage among adolescents aged 13-17 years had reached 32% for MCV4, 30% for Tdap (72% for Td or Tdap), and 25% for initiating the 3-dose HPV4 series. Another important performance measure is the increased proportion of adults who are vaccinated annually against influenza and ever vaccinated against pneumococcal disease among persons 65 years of age and older. Influenza vaccination coverage levels among the elderly have increased from 30 percent in 1989 to 67 percent in 2008 and pneumococcal vaccination levels have increased from 15 percent in 1989 to 60 percent in 2008. Small Business Technology Transfer (STTR) program: To stimulate and foster scientific and technological innovation and technology transfer through cooperative research and development carried out between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

(1) Research Project Grants provide support for clearly defined projects or a small group of related activities, and when appropriate, support of conferences; (2) Program Project Grants are for large-scale, broad-based programs of research, usually interdisciplinary, consisting of several projects with a common focus; (3) Small Grants are for small-scale exploratory and pilot studies or exploration of an unusual research opportunity; Small Grants are limited to \$50,000 for direct costs for a period of up to 2 years; and (4) Exploratory/Developmental Grants are limited for a period of up to 2 years, and a maximum of \$275,000 for direct costs for the entire 2-year period. Funds may be used only for expenses directly related to the approved research project. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or processes. Phase II grants are for the continuation of the research initiated in Phase I, and that are likely to result in commercial products or processes. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application.

Applicant Eligibility:

Public or private profit and nonprofit agencies, including State, local, or regional government agencies, universities, colleges, hospitals, academic or research institutions may apply for research grants. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase

I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO). In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

ATR I, ATR II

FEDERAL AGENCY:

Substance Abuse and Mental Health Services Administration, Department of Health and Human Services

AUTHORIZATION:

The Public Health Act, Section 501(d)(5), 509, Public Law 106-310, 42 U.S.C 290aad5-290bb-2.

OBJECTIVES:

To implement voucher programs for substance abuse clinical treatment and recovery support services pursuant to sections 501 (d)(5) and 509 of Public Health Service Act (42 U.S.C. sections 290aa(d)(5) and 290bb-2). This new program, called Access to Recovery (ATR), is part of a Presidential initiative to provide client choice among substance abuse clinical treatment and recovery support service providers, expand access to a comprehensive array of clinical treatment and recovery support options (including faith-based programmatic options), and increase substance abuse treatment capacity. Monitoring outcomes, tracking costs, and preventing waste, fraud and abuse to ensure accountability and effectiveness in the use of Federal funds are also important elements of the ATR program. Through the ATR grants, States, Territories, the District of Columbia and Tribal Organizations (hereinafter collectively referred to as "States") will have flexibility in designing and implementing voucher programs to meet the needs of clients in the State. The key to successful implementation of the voucher programs supported by the ATR grants will be the relationship between the States and clients receiving services, to ensure that clients have a genuine, free, and independent choice among eligible providers. States are encouraged to support any mixture of clinical treatment and recovery support services that can be expected to achieve the program's goal of achieving cost-effective, successful outcomes for the largest number of people.

AUTHORIZATION:

Public Health Service Act, Title IV, Section 487, 42 U.S.C 288.

OBJECTIVES:

To ensure a continuing and adequate supply of well-trained scientists who are able to conduct research on mental health problems. The program provides training grants to institutions and fellowships to individuals at both the predoctoral and postdoctoral levels. There are awards to medical students proposing to acquire doctoral research degrees in addition to their medical degrees. Awards are made for training in the areas of basic and clinical neuroscience, genetics, developmental, behavioral, clinical, epidemiological, prevention, treatment and services research relevant to mental illnesses, behavioral disorders, and HIV/AIDS; and programs designed to increase the number of individuals in mental health research who are from underrepresented racial and ethnic groups, individuals with disabilities, or individuals disadvantaged because of educational or other circumstances that have inhibited their ability to pursue such a career.

TYPES OF ASSISTANCE:

Training

USES AND USE RESTRICTIONS:

Individual fellowships are made to students seeking predoctoral or postdoctoral support for full-time research training or who are enrolled in an formal M.D./Ph.D. program. An institutional allowance will be provided to the sponsoring institution for each awardee. In addition, any domestic public or nonprofit institution may apply for an institutional research training grant in a specified area of research from which a number of stipend awards will be made to individuals selected by the training program director at the institution. Support is available for both predoctoral and postdoctoral trainees and will include an amount for institutional expenses. Indirect costs may be requested at 8 percent of total direct costs, exclusive of tuition and related fees and expenditures for equipment, or actual indirect costs, whichever is less. Postdoctoral students receiving fellowships or stipend support under either individual or institutional grants for 12 months or less are obligated to pay back this support through an equivalent period of continued postdoctoral training or a period of health related research and/or teaching activities after the completion of their training. Postdoctoral individuals in their thirteenth and subsequent months of support will incur no further obligation, and such support will be considered acceptable postdoctoral payback service. Annual FY 09 stipend levels will be \$20,976 for predoctoral awards and \$37,368 to \$51,552 for postdoctoral awards dependent upon the number of years of relevant postdoctoral experience. Research training support may not be used for internships or other clinical training. COR Honors Undergraduate institutional training grants are designed to increase the number of well-prepared students from institutions with substantial minority enrollments who can compete successfully for entry into Ph.D. programs relevant to the mission of the NIMH. Stipends of \$11,064 per year may be requested for each full-time, junior/senior level trainee and other related institutional costs may be requested as described in the applicable program announcement.

, Title IV, Part G, Section 487F, Public Law 106-310, 42 U.S.C 288-6.

OBJECTIVES:

To attract and retain health professionals to pediatric research careers by offering educational loan repayment for participants who agree by written contract to engage in pediatric research in a qualifying nonprofit institution for a minimum of 2 years.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE

USES AND USE RESTRICTIONS:

To provide repayment of extant educational loans incurred by health professionals engaged in pediatric research in a qualified nonprofit institution or Federal or other domestic government agency (State or local), and who are engaged in research that is supported by a nonprofit foundation, nonprofit professional association, or other nonprofit entity, or a Federal or other domestic government agency (State, local). Recipients must agree by written contract to engage in such research, initially, for a minimum of 2 years; individuals who have conflicting service obligations may not participate in this program until those obligations are satisfied or have been deferred during the period of program service. Participants may apply for and the Secretary may grant extension contracts for one-year or two-year periods, as determined by the Secretary, if the individual continues to engage in qualifying research. Renewal applications are competitively reviewed and the submission of a renewal application does not assure the award of benefits. Maximum program benefit is \$35,000 per year in loan repayments and \$13,650 per year in Federal tax reimbursements, plus discretionary state and local tax reimbursements. Recipients must have qualified educational debt in excess of 20 percent of their annual salary, which is referred to as their "debt threshold." An amount equal to half of this "debt threshold" will not be repaid by NIH and must be paid by the program participants.

Applicant Eligibility:

Eligible applicants must: (1) be a U.S. citizen, U.S. national, or permanent resident of the United States; (2) have a Ph.D., M.D., D.O., D.D.S., D.M.D.,

Full-time employees of Federal Government agencies are ineligible to apply for LRP benefits. Part-time Federal employees who engage in qualifying research as part of their non-Federal duties for at least 20 hours per week based on a 40 hour week, and who are not compensated as Federal employees for their research, are eligible to apply for loan repayment if they meet all other eligibility requirements.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Research Grant funds may be used for salaries, consultation, equipment, travel and other usual costs, subject to Federal regulations applicable to the grant. Individual National Research Service Awards (NRSA) are made directly to individuals for research training in specified areas related to the mission of NIBIB. Institutional NRSA may be made to institutions to enable them to accept individuals for research training. Each individual who receives a NRSA postdoctoral fellowship or traineeship is obligated upon termination of the award to comply with certain service and payback provisions. Small Business Innovation Research (SBIR) Phase I grants are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Only Phase I awardees are eligible to apply for Phase II support. Small Business Technology Transfer (STTR) Phase I grants are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase

II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

Applicant Eligibility:

Any corporation, public or private institution or agency, or other legal entity, either nonprofit or for-profit, may apply for a research grant. An applicant for an individual NRSA must be a citizen of the United States or lawfully admitted for permanent residence. Those on temporary or student visas are not eligible. An eligible institution for an institutional NRSA must be capable of providing predoctoral and/or postdoctoral research training opportunities for engineers, bioengineers or other. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit; are not dominant in the field in which research is being proposed; and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the United States or its possessions. To be eligible for funding, a grant application must be reviewed for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research.

Credentials/Documentation:

Credentials/Documentation: Each applicant for research projects must present a research plan and furnish evidence that scientific competence, facilities, equipment, and supplies are appropriate to carry out the plan. For an individual NRSA, the applicant's academic record, research experience, citizenship, and institutional sponsorship should be documented in the application. For an institutional NRSA, the applicant organization must show the objectives, methodology and resources for the research training program, the qualifications and experience of directing staff, the criteria to be used in selecting individuals for awards, and detailed budget justification for the amount of grant funds requested. Costs will be determined in accordance with OMB Circular No. A-21, Cost Principles for Educational Institutions and OMB Circular No. A-87 for State and local governments. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined by HHS Regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Use of PHS 398 (Rev. 11/2007) and associated forms are required for all applications submitted to the NIH. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

SBIR and STTR grant applications should be submitted electronically through Grants.gov (<http://www.grants.gov>) using the SF424 Research and Related (R&R) forms and the SF424 (R&R) SBIR/STTR Application Guide.

Award Procedure:

All applications for research or training are reviewed for scientific merit by an appropriate initial review group and then by a national advisory council. All applications favorably recommended compete for available funds on the basis of scientific merit and program emphasis. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

**93.307 MINORITY HEALTH AND HEALTH DISPARITIES RESEARCH
FEDERAL AGENCY:**

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Title III and IV, Part A and Part E, Sections 485E, 485F, 485G; Public Law 99-158 and Public Law 106-525; 42 U.S.C. 287c-31, 42 U.S.C. 287c-32, 42 U.S.C. 287c-33, 42 U.S.C. 241 and 285; Small Business Research and Development Enhancement Act of 1992, Public Law 102-564.

OBJECTIVES:

To support basic, clinical, social, and behavioral research, promote research infrastructure and training; foster emerging programs; disseminate information; and reach out to minority and other health disparity communities. The National Center on Minority Health and Health Disparities (NCMHD) has established programs to pursue these goals: (1) The Centers of Excellence Program promotes research to improve minority health, and/or reduce and eliminate health disparities, build research capacity for minority health and health disparities research in minority-serving and other institutions; encourages the participation of health disparity groups and communities in biomedical and behavioral research and prevention and intervention activities; and brings together investigators from relevant disciplines in a manner that will enhance and extend the effectiveness of their research; (2) NCMHD Research Endowment Program: builds research capacity and infrastructure at eligible Section 736 health professions schools (42 U.S.C. 293) to facilitate minority health and other health disparities research to close the disparity gap in the burden of illness and death experienced by racial and ethnic minority Americans and other health disparity populations; promotes a diverse and strong scientific, technological and engineering workforce; and emphasizes the recruitment and retention of underrepresented minorities and other socio-economically disadvantaged populations in the fields of biomedical, and behavioral research and other areas of the scientific workforce; (3) Health Disparities Research Loan Repayment Program (HDR-LRP): recruits and retains highly qualified health professionals to research careers that focus on minority health or other health disparities issues; (4) Extramural Clinical Research Loan Repayment Program for Individuals from Disadvantaged Backgrounds (ECR-LRP), also referred to as the Disadvantaged Individuals Loan Repayment Program within this document: recruits and retains highly qualified health professionals from disadvantaged backgrounds to conduct clinical research. This nucleus of clinical investigators has the potential to improve medical care within their respective communities by promoting clinical programs that address the health problems associated with these communities; (5) Research Infrastructure in Minority Institutions (RIMI) Program: assists non-doctoral degree institutions in developing their research infrastructure primarily through collaborations with research-intensive universities thereby enabling the institutions to develop and enhance their capacity and competitiveness to conduct biomedical or behavioral research; (6) Minority Health and Health Disparities International Research Training Program (MHIRT), awards enable U.S. institutions to tailor short-term basic science, biomedical and behavioral mentored student international research training opportunities to address global issues related to understanding, reducing, and eliminating health disparities; (7) Community-Based Participatory Research (CBPR) program: this program supports the development, implementation and evaluation of intervention research using the community-based participatory research (CBPR) principles and methods in targeting diseases of major public health importance in health disparity communities. CBPR awards promote participatory research collaboration between scientific researchers and their community partners. This initiative starts with a three-year research planning grant followed by a competitive five-year intervention research grant and concludes with a three-year research dissemination grant. The CBPR initiative engages the community in all phases of the research process and is directed to specific diseases/health conditions in a particular health disparity population. (8) Small Business Innovation Research (SBIR) Program: increases private sector commercialization of innovations derived from Federal research and development; encourages small business participation in Federal research and development; and fosters and encourages participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation; (9) Small Business Technology Transfer (STTR) Program: to stimulate and foster scientific and technological innovation through cooperative research development carried out between small business concerns and research institutions; fosters technology transfer between small business concerns and research institutions; increases private sector commercialization of innovations

derived from Federal research and development; and fosters and encourages participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. (10) Research Project Grants (RPG): supports investigators whose current research focuses on diseases/conditions that disproportionately affect racial/ethnic minorities and other underserved populations.

TYPES OF ASSISTANCE:**PROJECT GRANTS****USES AND USE RESTRICTIONS:**

Grants are intended to support the direct costs of a project in accordance with an approved budget, plus appropriate amount for indirect costs. Grantees must agree to administer the grant in accordance with the regulations and policies governing the research grants program of the Public Health Service.

Endowment grants: Some qualifying institutions may use income earned from a research endowment corpus to support institutions in their effort to expand and add teaching programs in the biomedical and behavioral sciences and related areas, to improve facilities, to enhance student and faculty recruitment and retention, to develop instructional delivery systems and information technology in areas that will enhance minority health and other health disparities research activities, and to establish endowed chairs and programs. Other qualifying institutions must use income earned from a research endowment corpus to increase the institutions' investments in the recruitment and retention of underrepresented minority students and students from other health disparity populations that matriculate at such institutions. This includes activities such as increasing student recruitment and retention, creating merit-based and need-based scholarships, establishing or enhancing tutoring, providing counseling, and designing student service programs to improve academic success, and faculty recruitment and retention. Health Disparities Loan Repayment and Disadvantaged Individuals Loan Repayment contracts: Contracts provide repayment of existing educational loan debt incurred by health professionals that have agreed to conduct minority health or other health disparities research; or highly qualified health professionals from disadvantaged backgrounds whom plan to conduct clinical research. Health Disparities Loan Repayment and Disadvantaged Individuals Loan Repayment contracts recipients must execute a written contract agreeing to engage in qualified research for a minimum of two years. Contracts may be renewed for a one- or two-year period after the completion of the initial two-year contract, provided that the participant applies for a competitive renewal contract, continues to engage in qualified research, and has eligible repayable debt remaining. Program payments are made directly to the participants' lenders following each quarter and a verification of satisfactory research service, unless otherwise agreed upon by the participant and the Director, NCMHD. SBIR grants: SBIR Phase I grants are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. SBIR Phase II grants are for the continuation of the research initiated in Phase I and are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR grants: STTR Phase I grants are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. STTR Phase II grants are based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application. See Program Announcements: PA-07-280 and PA-07-281. As specified in each of the program announcements.

TYPES OF ASSISTANCE:

Direct Payments for Specified Use

USES AND USE RESTRICTIONS:

To provide repayment of existing educational loan debt incurred by health professionals from disadvantaged backgrounds engaged in clinical research. Recipients must execute a written contract agreeing to engage in such research for a minimum of two years. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).

Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants.

FEDERAL AGENCY:

Health Resources and Services Administration, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Title VIII, Section 831, 42 U.S.C. 296p, as amended; Nurse Reinvestment Act of 2002, Public Law 107-205.

OBJECTIVES:

Nurse Education, Practice and Retention Program (NEPR)
Grants are awarded to eligible applicant organizations for projects to strengthen and enhance the capacity for nurse education, practice and retention to address the nursing shortage. There are three major priority areas (Education, Practice and Retention) and nine purposes associated with the three priority areas. Applicants must select and focus on one of these nine purposes in the grant application.

The education priority areas are: Purpose E1) expanding enrollment in baccalaureate nursing programs; Purpose E2) developing and implementing internship and residency programs to encourage mentoring and the development of specialties; Purpose E3) providing education in new technologies, including distance learning methodologies.

The practice priority areas are: Purpose P1) establishing or expanding nursing practice arrangements in non-institutional settings to demonstrate methods to improve access to primary health care in medically underserved communities; Purpose P2) providing care for underserved populations and other high-risk groups such as the elderly, individuals with HIV/AIDS, substance abusers, the homeless, and victims of domestic violence; Purpose P3) providing managed care, quality improvement, and other skills needed to practice in existing and emerging organized health care systems; Purpose P4) developing cultural competencies among nurses.

The retention priority areas are: Purpose R1) career ladder bridge programs which promote career advancement for nursing personnel and registered nurses and; Purpose R2) enhancing patient care delivery systems through improving the retention of nurses and enhancing patient care.

Faculty Development: Integrated Technology into Nursing Education and Practice Initiative (Faculty Development: ITNEP).

The purpose of this initiative is to provide support to nursing collaboratives for faculty development in the use of information and other technologies in order to expand the capacity of collegiate schools of nursing to educate students for 21st century health care practice. Nursing collaboratives will use healthcare information systems to enhance nursing education and practice, optimize patient safety, and drive improvements in health care quality.

For this initiative, use of information and other technologies in nursing education and practice, includes, but is not limited to, informatics, telehealth, mannequin-based and patient simulators, computer-based instructions, virtual simulation, interactive simulated case studies, advanced 3D graphics, e-Learning technology, and other simulated or virtual methods to enhance nursing education and practice. Since no institution or organization currently offers the full spectrum of information and other technologies necessary to carry out this initiative, the nursing collaboratives must develop linkages and partnerships to undertake this initiative.

93.361 NURSING RESEARCH

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Section 301, 464, 487, 42 U.S.C 285q; Public Health Service Act, Public Law 102-564; Public Health Service Act, Public Law 99-158.

OBJECTIVES:

The National Institute of Nursing Research (NINR) supports clinical and basic research to build the scientific foundation for clinical practice, prevent disease and disability, manage and eliminate symptoms caused by illness, and enhance end-of-life and palliative care. NINR seeks to extend nursing science by integrating the biological and behavioral sciences, employing new technologies to research questions, improving research methods, and developing the scientists of the future. NINR accomplishes its mission through research on preventing, delaying the onset, and slowing the progression of disease and disability. This includes (a) finding effective approaches to achieving and sustaining a healthy lifestyle and preventing diseases and disability; (b) improving the quality of life for patients, families, and informal caregivers by enhancing the individual's role in managing disease and disability, relieving symptoms, and improving outcomes; (c) eliminating health disparities, including disparities based on race/ethnicity, gender, socio-economic status, geography, cultural factors, and disability, and (d) addressing issues at the end of life, improving palliative care, enhancing the quality of life for the dying patient, and supporting family and informal caregivers. These efforts are crucial in translating scientific advances into cost-effective health care that does not compromise quality. NINR accomplishes its mission by supporting grants to universities and other research organizations as well as by conducting research intramural at laboratories in Bethesda, Maryland. The research fosters interdisciplinary collaborations to ensure a comprehensive approach to research on illness and disabling conditions. This approach is especially relevant in research aimed at developing interventions that address the needs of diverse populations across the life span, adapting and generating new technologies, integrating biological and behavioral science, improving methods for future scientific discoveries. In addition, the Institute supports comprehensive research training programs to prepare individuals with requisite interdisciplinary skills to conduct nursing research. Small Business Innovation Research (SBIR) program: NINR seeks to expand and improve the SBIR program; to increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation Small Business Technology Transfer (STTR) program: Through this program, NINR seeks to stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Centers Program: To promote interdisciplinary research, offer an environment for research training and career development, and concentrate research through Centers for Nursing Research.

Program areas are as follows: Chronic conditions and infectious diseases, including health issues of individuals with arthritis, diabetes, urinary incontinence, digestive disorders, and musculoskeletal disorders; Health behavior and minority health, including studies of health disparities, women's health, men's health, and health and risk behaviors research; Cardiopulmonary

and critical care science, including research on responses to acute cardiovascular events, chronic management of cardiovascular disease, and responses to acute and chronic pulmonary conditions such as COPD, asthma, and other non-infection-caused conditions; Neuroscience, including research on symptom management and/or prevention of cognitive deficits, neurological conditions, and informal caregiving for persons with these conditions; HIV/AIDS and oncology, including symptom management, self-management, and caregiving of patients with cancer, HIV/AIDS, and immune disorders; Reproductive, child, and family health, including reproduction and child bearing issues, infant development and illness, child and adolescent health promotion and risk reduction, and family health; End of life and long term care, including clinical management of physical and psychological symptoms, communication, ethics and clinical decision-making, caregiver support, and care delivery issues at the end of life.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133, but records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).

In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement:

1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or
2. an audit that meets the requirements of OMB Circular No. A-133.

In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See

45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants.

In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

CRITERIA FOR SELECTING PROPOSALS:

The major elements in evaluating proposals include assessments of: (1) Significance: Does this study address an important problem? If the aims of the application are achieved, how will scientific knowledge or clinical practice be advanced? What will be the effect of these studies on the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field? (2) Approach: Are the conceptual framework, design, methods, and analyses adequately developed, well-integrated, well-reasoned, and appropriate to the aims of the project? Does the applicant acknowledge potential problem areas and consider alternative tactics? For applications designating multiple PIs, is the leadership approach, including the designated roles and responsibilities, governance, and organizational structure, consistent with and justified by the aims of the project and the expertise of each of the PIs? (3) Innovation: Is the project original and innovative? Does the project challenge existing paradigms or clinical practice; address an innovative hypothesis or critical barrier to progress in the field? Does the project develop or employ novel concepts, approaches or methodologies, tools, or technologies for this area? (4) Investigators: Are the PD/PIs and other key personnel appropriately trained and well suited to carry out this work? Is the work proposed appropriate to the experience level(s) of the principal investigator(s) and other researchers? Do the PD/PIs and investigative team bring complementary and integrated expertise to the project (if applicable)? (5) Environment: Do(es) the scientific environment(s) in which the work will be done contribute to the probability of success? Do the proposed studies benefit from unique features of the scientific environment(s), or subject populations, or employ useful collaborative arrangements? Is there evidence of institutional support? In addition to the above criteria, the following items will continue to be considered in the determination of scientific merit and the priority score: Resubmission Applications (formerly revised/amended applications): Are the responses to comments from the previous scientific review group adequate? Are the improvements in the resubmission application appropriate? Protection of Human Subjects from Research Risk: The involvement of human subjects and protections from research risk relating to their participation in the proposed research will be assessed. Inclusion of Women, Minorities and Children in Research: The adequacy of plans to include subjects from both genders, all racial and ethnic groups (and subgroups), and children as appropriate for the scientific goals of the research will be assessed. Plans for the recruitment and retention of subjects will also be evaluated. Care and Use of Vertebrate Animals in Research: If vertebrate animals are to be used in the project, the adequacy of the plans for care and use of vertebrate animals to be used in the project will be assessed. Biohazards: If materials or procedures are proposed that are potentially hazardous to research personnel and/or the environment, determine if the proposed protection is adequate. Applications compete for available funds with all other recommended applications. The following will be considered in making funding decisions: Scientific merit of the proposed project as determined by peer review; Availability of funds; Relevance of program priorities. The following criteria will be used in considering the scientific and technical merit of all SBIR/STTR grant applications: Significance: Does the proposed project have commercial potential to lead to a marketable product, process or service? Does this study address an important problem? What may be the anticipated commercial and societal benefits that may be derived from the proposed research? If the aims of the application are achieved, how will scientific knowledge or clinical practice be advanced? What will be the effect of these studies on the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field? Does the application lead to enabling technologies (e.g., instrumentation, software) for further discoveries? Will the technology have a competitive advantage over existing/alternate technologies that can meet the market needs? Approach: Are the conceptual or clinical framework, design, methods, and analyses adequately developed, well-integrated, well-reasoned, and appropriate to the aims of the project? Is the proposed plan a sound approach for establishing technical and commercial feasibility? Are the milestones and evaluation procedures appropriate? Does the applicant acknowledge potential problem areas and consider alternative tactics? For applications designating multiple PDs/PIs, is the leadership approach, including the designated roles and responsibilities,

governance, and organizational structure, consistent with and justified by the aims of the project and the expertise of each of the PDs/PIs? Innovation: Is the project original and innovative? For example: Does the project challenge existing paradigms or clinical practice; address an innovative hypothesis or critical barrier to progress in the field? Does the project develop or employ novel concepts, approaches, methodologies, tools, or technologies for this area? Investigator(s): Are the PD/PI(s) and other key personnel appropriately trained and well suited to carry out this work? Is the work proposed appropriate to the experience level of the PD/PI(s) and other researchers, including consultants and subcontractors (if any)? Do the PD/PIs and investigative team bring complementary and integrated expertise to the project (if applicable)? Are the relationships of the key personnel to the small business and to other institutions appropriate for the work proposed? Environment: Do(es) the scientific and technological environment in which the work will be done contribute to the probability of success? Do the proposed studies benefit from unique features of the scientific environment, or subject populations, or employ useful collaborative arrangements? Is there evidence of institutional support? Is there sufficient access to resources (e.g., equipment, facilities)? In addition to the above criteria, Phase II grant applications will be reviewed based upon the following criteria: 1. How well did the applicant demonstrate progress toward meeting the Phase I objectives, demonstrating feasibility, and providing a solid foundation for the proposed Phase II activity? 2. Did the applicant submit a concise Commercialization Plan that adequately addresses the specific areas described in the SF424 (R&R) SBIR/STTR Application Guide and the SBIR/STTR Information component? 3. Does the project carry a high degree of commercial potential, as described in the Commercialization Plan? In addition to the above criteria, the following items will continue to be considered in the determination of scientific merit and the priority score: Resubmission Applications: Are the responses to comments from the previous scientific review group adequate? Are the improvements in the resubmission application appropriate? Protection of Human Subjects from Research Risk: The involvement of human subjects and protections from research risk relating to their participation in the proposed research will be assessed. Inclusion of Women, Minorities and Children in Research: The adequacy of plans to include subjects from both genders, all racial and ethnic groups (and subgroups), and children as appropriate for the scientific goals of the research will be assessed. Plans for the recruitment and retention of subjects will also be evaluated. Care and Use of Vertebrate Animals in Research: If vertebrate animals are to be used in the project, the adequacy of the plans for their care and use will be assessed. Biohazards: If materials or procedures are proposed that are potentially hazardous to research personnel and/or the environment, determine if the proposed protection is adequate. SBIR/STTR applications compete for available funds with all other recommended SBIR/STTR applications. The following will be considered in making funding decisions: Scientific and technical merit of the proposed project as determined by peer review; Availability of funds; Relevance of the proposed project to program priorities.

93.389 NATIONAL CENTER FOR RESEARCH RESOURCES

(DBT, DCRR, DCM, DRI)

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Title IV, Section 479-480 487, Public Law 99-158; Small business research and Development Enhancement Act of 1992, Public Law 102-564; Public Health Service Act, Title III, Section 301, Public Law 780-410, U.S.C 341, 287-288.

OBJECTIVES:

The National Center for Research Resources (NCRR) provides laboratory scientists and clinical researchers with the environments and tools they need to understand, detect, treat, and prevent a wide range of diseases. This support enables discoveries that begin at a molecular and cellular level, move to animal-based studies, and then are translated to patient-oriented clinical research, resulting in cures and treatments for both common and rare diseases. NCRR connects researchers with one another and with patients and communities across the nation to harness the power of shared resources and research.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

The Division of Biomedical Technology supports research, development and access to sophisticated technologies at resource centers nationwide which assist academic, nonprofit organizations in the development, use, and dissemination of innovative technologies useful for the advancement of biomedical science. Awards are provided under a variety of funding mechanisms composed of Biomedical Technology Resource(BTR) grants, Research Project Grants, Shared Instrumentation Grants (SIG), High End Instrumentation (HEI) Program and other mechanisms, such as Exploratory Grants to develop new technologies for biomedical research, Small Business Innovation Research (SBIR) grants, and Small Business Technology Transfer (STTR) grants. The Division for Clinical Research Resources makes it possible to apply knowledge gained through basic research to the development of lifesaving drugs, devices, and therapies that protect the health of our nation's citizens by providing research infrastructure for clinical investigators. These specialized institutional resources

are equipped to be flexible and responsive to changing scientific and economic environments and to unforeseen research challenges. The Division for Clinical Research Resources helps translate scientific knowledge into effective patient care through General Clinical Research Centers (GCRC), Research Career Development (K23, K24), Clinical Research Curriculum Award (CRCA, K30), Mentored Clinical Research Scholar (CRS) Program (K12), National Gene Vector Laboratories (NGVL), Clinical Research-related activities, Small Business Innovation Research (SBIR) grants and Small Business Technology Transfer (STTR) grants; and improves pre-college science education and the public's understanding of science through the Science Education Partnership Award (SEPA) Program. Additionally, a new consortium, funded through Clinical and Translational Science Awards (CTSAs), will transform how clinical and translational research is conducted, ultimately enabling researchers to provide new treatments more efficiently and quickly to patients. The Division of Comparative Medicine supports research and resource projects, as well as centers that enable biomedical scientists to use high quality, disease-free animals effectively in research on human health problems. Support is also available for the development of a wide range of other research models, particularly marine invertebrates and lower vertebrates, and access to an array of important biological materials. These objectives are accomplished through activities of National Primate Research Centers (NPRC), Laboratory Animal Science (LAS), and Biological Models and Materials Research (BMMR). The Division of Research Infrastructure addresses the under representation of minority investigators; enhances the research environment at minority colleges and universities in the health sciences; broadens the geographic distribution of research grant funding to states with historically low NIH success rates; and improves biomedical research facilities through matching grants for construction and renovation. These objectives are accomplished through activities of the Research Centers in Minority Institutions (RCMI) program, the RCMI Clinical Research Infrastructure Initiative (RCRII), the Institutional Developmental Award (IDeA), the Research Facilities Improvement Program (RFIP), and the Animal Facilities Improvement program.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement: 1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or 2. an audit that meets the requirements of OMB Circular No. A-133. In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance

with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

93.393 CANCER CAUSE AND PREVENTION RESEARCH

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Sections 301 (c) and 410, Public Law 78-410, as amended, 42 U.S.C. 241; Small Business Research and Development Enhancement Act of 1992, Public Law 102-564.

OBJECTIVES:

To identify those factors that cause cancer in man and to develop mechanisms for preventing cancer in man. The following research programs are included: epidemiology, chemical and physical carcinogenesis, biological carcinogenesis, nutrition, immunology, field studies and statistics, chemoprevention and organ site studies. Small Business Innovation Research (SBIR) program: To expand and improve the SBIR program; to increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation on socially and economically disadvantaged small business concern and women-owned small business concern in technological innovation. Small Business Technology Transfer (STTR) program: To stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development and economically disadvantage small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants and cooperative agreements may be made to eligible institutions for the support of cancer research projects. The grants and cooperative agreements may be used for personnel, consultant costs, equipment, supplies, travel, patient costs, animals, alterations and renovations, miscellaneous items, and indirect costs. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I, and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application. The SBIR Fast-Track Initiative provides additional assistance to applicants by expediting the decision and award of SBIR Phase II funding for scientifically meritorious applications for projects that have a high potential for commercialization. Fast-Track is a parallel review option whereby Phase I and Phase II projects are reviewed concurrently with the aim of reducing or eliminating the funding gap between Phase I and Phase II.

Applicant Eligibility:

The awardee will be a university, college, hospital, public agency, nonprofit research institution or for-profit organization that submits an application and receives a grant or cooperative agreement for support of research by a named principal investigator. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concern (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant applicant must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research on cancer.

Credentials/Documentation:

Costs will be determined by OMB Circular No. A-87 for State and local governments. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74, Subpart Q. For-profit organizations' costs are determined in accordance with 48 CFR, Subpart 31.2 of the Federal Acquisition Regulations. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan and idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

Subject to availability, they may be obtained by contacting the NIH support services contractor: Phone: (301) 206-9385; Fax: (301) 206-9722; E-mail: a2y@cu.nih.gov. The Solicitations include submission procedures, review considerations, and grant application or contract proposal forms. SBIR and STTR grant applications should be submitted to the Center for Scientific Review, 6701 Rockledge Drive, Room 1040 - MSC 7710, Bethesda, MD 20892-7710.

Award Procedure:

Grants and cooperative agreements are funded based on scientific merit, program relevance and program balance and are made annually. Initial award provides funds for the first budget period (usually 12 months) and Notice of Grant Award (Form PHS 1533-2) indicates support recommended for the remainder of the project period, allocation of Federal funds by budget categories, and special conditions, if any. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

93.395 CANCER TREATMENT RESEARCH

Cancer Treatment Research

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Sections 301, 410, and 411, Public Law 78-410, 42 U.S.C. 241, as amended, Public Law 100-607, 42 U.S.C 285(a); Small Business Research and Development Enhancement Act of 1992, Public Law 102-564.

OBJECTIVES:

To develop the means to cure as many cancer patients as possible and to control the disease in those patients who are not cured. Cancer Treatment Research includes the development and evaluation of improved methods of cancer treatment through the support and performance of both fundamental and applied laboratory and clinical research. Research is supported in the discovery, development, and clinical testing of all modes of therapy including: surgery, radiotherapy, chemotherapy, and biological therapy including molecularly targeted therapies, both individually and in combination. In addition, research is carried out in areas of nutritional support, stem cell and bone marrow transplantation, image guided therapies and studies to reduce toxicity of cytotoxic therapies, and other methods of supportive care that may supplement and enhance primary treatment. Small Business Innovation Research (SBIR) program: To expand and improve the SBIR program; to increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. Small Business Technology Transfer (STTR) program: To stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:**PROJECT GRANTS****USES AND USE RESTRICTIONS:**

Grants and cooperative agreements may be made to eligible institutions for the support of cancer research projects. The grants may be used for personnel, consultant costs, equipment, supplies, travel, patient costs, animals, alterations and renovations, miscellaneous items, and indirect costs. SBIR Phase I grants (of approximately 6-months duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I, and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to receive Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application. The SBIR Fast-Track Initiative provides additional assistance to applicants by expediting the decision and award of SBIR Phase II funding for scientifically meritorious applications for projects that have a high potential for commercialization. Fast-Track is a parallel option whereby Phase I and Phase II projects are reviewed concurrently with the aim of reducing or eliminating the funding gap between Phase I and Phase II.

Applicant Eligibility:

The awardee will be a university, college, hospital, public agency, nonprofit research institution, or for-profit organization that submits an application and receives a grant or cooperative agreement for support of research by a named principal investigator. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned, and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company, or institution engaged in biomedical research.

Cancer Control

FEDERAL AGENCY:

National Institutes of Health, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, as amended, Sections 301 and 412, Public Law 78-410; 42 U.S.C. 241; Public Law 100-607; 42 U.S.C. 285a-1; Public Law

OBJECTIVES:

To reduce cancer incidence, morbidity, and mortality through an orderly sequence from research on interventions and their impact in defined populations to the broad, systematic application of the research results through dissemination and diffusion strategies. Primary emphasis is on the inclusion of a cancer prevention and control intervention in any proposed study. Cancer Prevention and Cancer Control research studies are classified into one of five phases that represent the orderly progression noted in the definition: (1) Hypothesis development; (2) methods development and testing; (3) controlled intervention trials to establish cause-and-effect relationships; (4) research in defined populations; and (5) demonstration and implementation studies. Primary interests are in research on cancer control interventions in Phases 2 through 5, and on cancer prevention research in all phases. Cancer Prevention and Control programs include those in the following areas: (1) chemoprevention; (2) cancer communications; (3) nutrition, diet, and physical activity; (4) screening and early detection, including biomarker development and validation; (5) biobehavioral mechanisms; (6) tobacco control; (7) health disparities research; (8) symptom management, cancer rehabilitation and survivorship; (9) health services and outcomes research; and (10) surveillance research. Both Cancer Prevention and Cancer Control use the Small Business Innovation Research (SBIR) and the Small Business Technology Transfer (STTR) programs to encourage research participation by the small business community. The goals of each program are as follows. SBIR: To expand and improve the SBIR program; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation. STTR: To stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants and cooperative agreements may be made to eligible institutions for the support of cancer research projects. The grants and cooperative agreements may be used for personnel, consultant costs, equipment, supplies, travel, patient costs, animals, alterations and renovations, miscellaneous items, and indirect costs. Restrictions are imposed against the use of funds for entertainment, foreign travel (unless specifically authorized), office equipment, and other items not normally necessary for the effective prosecution of such research. SBIR Phase I grants (of approximately 6- months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I, and that are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application. The SBIR Fast-Track Initiative provides additional assistance to applicants by expediting the decision and award of SBIR Phase II funding for scientifically meritorious applications for projects that have a high potential for commercialization. Fast-Track is a parallel review option whereby Phase I and Phase II projects are reviewed concurrently with the aim of reducing or eliminating the funding gap between Phase I and Phase II.

Applicant Eligibility:

The awardee will be a university, college, hospital, public agency, nonprofit research institution or for-profit organization that submits an application and receives a grant or cooperative agreement for support of research by a named principal investigator. SBIR grants can be awarded only to domestic small

businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principle investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

University, college, hospital, public agency, nonprofit research institutions or for-profit organizations will benefit.

Credentials/Documentation:

Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. For-profit organizations' costs are determined in accordance with 48 CFR, Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS Regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods, facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. OMB Circular No. A-110 applies to this program. Application form PHS-398 (Rev. April 1998) is the standard form that can be obtained from the Division of Extramural Outreach and Information Resources, National Institutes of Health, 6701 Rockledge Drive, MSC 7910, Bethesda, MD 20892-7910. Telephone: (301) 435-0714, E-mail: ASKNIH@odrockml.od.nih.gov. The standard application forms as furnished by DHHS and required by 45 CFR Part 92 for State and local governments, must be used for this program. This program is subject to the provisions of 45 for State and local governments and OMB Circular No. A-110 for nonprofit organizations. Subject to availability, they may be obtained by contacting the NIH support services contractor: Telephone: (301) 206-9385; Fax: (301) 206-9722; E-mail: a2y@cu.nih.gov. The Solicitations include submission procedures, review considerations, and grant application or contract proposal forms. SBIR and STTR grant applications should be submitted to the Center for Scientific Review, 6701 Rockledge Drive, Room 1040 - MSC 7710, Bethesda, MD 20892-7710.

Award Procedure:

Grants and cooperative agreements are funded based on scientific merit, program relevance, and program balance and are made annually. Initial award provides funds for first budget period (usually 12 months) and Notice of Grant Award (Form PHS 1533) indicates support recommended for remainder of project period, allocation of Federal funds by budget categories, and special

FEDERAL AGENCY:

Health Resources and Services Administration, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Public Law 111-5.

OBJECTIVES:

As funded under the American Recovery and Reinvestment Act of 2009 (ARRA), the objective of NELRP is to assist in the recruitment and retention of professional registered nurses (RN) in approved critical shortage areas to increase access to quality health care by offering loan repayment in return for full-time service at an eligible health care facility with a critical shortage of nurses.

TYPES OF ASSISTANCE:

USES AND USE RESTRICTIONS:

The program offers RNs substantial economic assistance to repay their qualifying educational loans in exchange for full-time service at a health care facility with a critical shortage of nurses. NELRP participants enter into a contract agreeing to provide full-time service at an approved Critical Shortage Facility (CSF) for two years. In return, NELRP will pay 30 percent of the Participant's total qualifying loan balance each year (total of 60 percent). A participant may be eligible to amend his/her two-year NELRP contract to serve for a third (optional) year at a CSF. If a participant works full-time for a third year in a CSF, the NELRP will pay an additional 25 percent of the participant's original qualifying loan balance, bringing the total up to 85 percent of eligible loan balances. For specific service-obligated educational loan repayment. Loan repayments for 2 years of obligated service will be made no later than the end of the Federal fiscal year in which the individual completes such year of service.

Applicant Eligibility:

As provided in section 846(e) of the PHS Act, as amended, a funding preference will be given to qualified applicants with greatest financial need, which the NELRP defines as those qualified applicants whose total qualifying educational loans are 40% or greater than their gross salary. In addition, a funding preference is given to RNs working in the types of health care facilities that have the most severe nursing shortage. The State Partnership grants fund EMS state agencies to focus on the following performance measures:

1. Ensure operational capacity to provide pediatric emergency care by guaranteeing pre-hospital provider agencies have on-line and off-line pediatric medical direction; pre-hospital providers agencies have essential pediatric equipment and supplies; implement a state-wide, territorial, or regional facility recognition program for hospitals that are able to stabilize and/or manage pediatric emergencies; and hospitals have written inter-facility transfer guidelines and agreements that specify alternate sites that have the capabilities to meet the clinical needs of critically ill and injured pediatric patients.
2. Adopt requirements by states/territories for pediatric emergency education for the recertification of paramedics.
3. Establish permanence of EMSC in each state/territory

National EMSC Data Analysis Resource Center

NEDARC provides technical assistance, training workshops, and site visits in order to assist EMSC projects and state EMS offices develop their capabilities to collect, analyze, and utilize EMS data. NEDARC provided the foundation from which the NEMSIS Technical Assistance Center was created and is an example of collaboration between EMSC and the National Highway Traffic Safety Administration (NHTSA)

Targeted Issues Grants

Targeted Issues grants are intended to address specific needs or concerns in the field of pediatric emergency care that transcend state boundaries. Typically the projects result in a new product or resource or the demonstration of the effectiveness of a model system component or service of value to the nation. Types of projects that have been funded within this category include developing model pediatric components for state disaster plans, screening and secondary prevention for psychological sequelae of pediatric injury, basic emergency lifesaving skills in schools, and emergency preparedness for infants with significant heart disease.

Network Development Demonstration Project (NDDP)

Projects are cooperative agreements that demonstrate a system of regional applied pediatric emergency medical services centers designed to expand and improve emergency services for children who need treatment for trauma or critical care. 93.558 TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF)

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Social Security Act, Title IV, Part A, 42 U.S.C 601 et seq.

OBJECTIVES:

To provide grants to States, Territories, the District of Columbia, and Federally-recognized Indian Tribes operating their own Tribal TANF programs to assist needy families with children so that children can be cared for in their own homes; to reduce dependency by promoting job preparation, work, and marriage; to reduce and prevent out-of-wedlock pregnancies; and to encourage the formation and maintenance of two-parent families.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

States, Territories, the District of Columbia, and Federally-recognized Indian Tribes operating their own TANF programs have broad flexibility to use the grant funds in any manner that meets the purposes of the program (including providing low-income households with assistance in meeting home heating and cooling costs) and in ways that the State, Territory, and Tribe was authorized to use funds received under the predecessor Aid to Families with Dependent Children (AFDC), Job Opportunities and Basic Skills Training (JOBS), and Emergency Assistance (EA) programs. States and Territories may also transfer a limited portion of their assistance grant funds to the Child Care and Development Block Grant (CCDBG) and Social Services Block Grant (SSBG) Programs. Not more than 15 percent of any State grant may be spent on administrative costs, exclusive of certain computerization and information technology expenses. Cash grants, work opportunities, and other services are made directly to needy families with children. For Tribal programs, ACF will negotiate a limitation on administrative costs for the first year of the program's operation not to exceed 35 percent, for the second year of the program's operation not to exceed 30 percent, and then for the third and subsequent years of the program's operation not to exceed 25 percent. For the TANF program, there are certain prohibitions, restrictions, and limitations on the provision of assistance. For example, families may only receive Federally-funded assistance for five years. In addition, Federal funds may not be used to provide medical services, unless it is pre-pregnancy family planning services (Tribes, however, may use Federal funds for medical services if they are job-related).

Applicant Eligibility:

In general, all States, Territories, the District of Columbia, and all federally-recognized Tribes in the lower 48 States and 13 specified entities in Alaska are eligible. State and local agencies and Tribes that operate TANF programs must do so under plans determined to be complete or approved by the Department of Health and Human Services (DHHS). For Contingency Funds, all States and the District of Columbia are eligible if they are determined to be a "needy State" by satisfying either an unemployment trigger or a food stamp trigger. Territories and Tribes are not eligible for Contingency Funds.

Beneficiary Eligibility:

Needy families with children, as determined eligible by the State, Territory, or Tribe in accordance with the State or Tribal plan submitted to the Department of Health and Human Services (HHS).

Credentials/Documentation:

Federal funds go to the State, Territory, or Tribal agency certified by the Chief Executive Officer. Needy families must meet State or Tribal eligibility requirements. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Each State, Territory, and the District of Columbia must develop a State plan and include the certifications signed by the Executive Officer (Governor). Applicants must consult with local governments and private organizations and provide them 45 days to comment on the plan. The State plan and certifications must be submitted to the Secretary of HHS. Tribes may apply to the Secretary to receive funds and to administer the TANF block grant. Tribes would submit a 3-year family assistance plan. The Secretary, in consultation with the Tribe, would set program requirements and time-limits for receipt of welfare-related services, consistent with the purposes of the program and economic conditions/resources of each Tribe. Tribes should contact the OFA Regional TANF Program Manager for further Tribal plan submittal procedures. For Contingency Funds, each State must request these funds monthly for each month they meet either the unemployment or food stamp triggers. For Supplemental Grants, there is no application. Supplemental Grants are awarded annually and issued quarterly to the States (in number 17) with exceptionally high population growth in the early 1990s, historic (1994) welfare grants per poor person lower than 35 percent of the national average, or a combination of above average population growth and below average historic welfare grants per poor person.

Award Procedure:

Once a plan is determined complete, or in the case of a Tribe the plan is approved, by the DHHS, Family Assistance Grants are awarded in quarterly payments. Supplemental Grants are also awarded in quarterly payments. Contingency Fund awards will be made monthly.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

States, Territories, the District of Columbia, and Tribes implement their assistance programs according to their State and Tribal plans. The Secretary does not have authority to approve or disapprove a State plan, only to determine its completeness. Tribal plans are subject to approval by the Secretary. For Contingency Funds, approval/disapproval will be from 30 to 60 days after receipt of the request for funds.

Appeals:

States, Territories, the District of Columbia, and Tribes facing an adverse action by the Secretary may appeal under both administrative and judicial procedures. In addition, States, Territories, the District of Columbia, and Tribes must provide opportunities for recipients who have been adversely affected to be heard in a State or Tribal administrative or appeal process.

For Contingency Funds, grant awards are issued monthly to States meeting the eligibility criteria stipulated under Section 101. Method of awarding/releasing assistance: quarterly.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Section 2604(g) of the LIHEAP statute, as amended in 1994 by Public Law 103-252, allows the Secretary of Health and Human Services to allocate any funds made available under Section 2602(e) to one or more grantees, taking into account the extent to which the grantee was affected by the emergency or disaster, the availability of other resources to the grantees under LIHEAP or any other program, and such other factors that are deemed relevant.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

In the Fiscal Year 2009 Omnibus Appropriations Act, Congress directs that funds appropriated for the Child Care and Development Block Grant (CCDBG or Discretionary Funds) must be used to supplement, not supplant, State general revenue funds for child care assistance for low-income families. Lead Agencies must use Discretionary Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG. Certain amounts of Discretionary Funds must be used for specific purposes: quality expansion; infant and toddler quality improvement; and child care resource and referral, including a national toll-free hotline; and school-age child care activities. A portion of the Discretionary Funds is also designated for the U.S. Department of Health & Human Services to carry-out research, demonstration, and evaluation projects. Not more than five percent of the aggregate amount of CCDF Funds expended by the State or Territory (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State or Territory to carry-out all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State or Territory shall use not less than four percent of the CCDF Funds to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. Except for approved construction of child care facilities by tribal grantees, no Discretionary Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement of any building or facility (other than for minor remodeling and for upgrading facilities to meet State and local child care standards). No Discretionary Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction. However, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of faith-based or community child care providers. No Discretionary Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school. Lead Agencies shall assure that a substantial portion of the Discretionary Funds will be used to provide assistance to low-income working families who are not receiving assistance under the Temporary Assistance for Needy Families program, attempting through work activities to transition off of temporary assistance programs, nor at risk of becoming dependent on temporary assistance programs.

Applicant Eligibility:

Eligibility: All 50 States, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and Federally recognized Tribal Governments, including Alaskan Native Corporations.

Beneficiary Eligibility:

In advance of the hearing, the Lead Agency must make the content of the plan available to the public. The Lead Agency must also coordinate the provision of services under the program with other Federal, State, and local child care and early childhood development programs. Also, the Lead Agency must consult with appropriate representatives of local governments. Tribal Lead Agencies submitting applications for construction must submit an environmental impact assessment. Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Social Security Act, Title IV, Section 418, 42 U.S.C 618; Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193); Child Care and Development Block Grant Act of 1990, as amended (Public Law 101-508, 42 USC 9858, et seq); Balanced Budget Act of 1997 (Public Law 105-33); and the Deficit Reduction Act of 2005 (Public Law 105-171).

OBJECTIVES:

The Child Care Mandatory and Matching Funds are a part of the Child Care and Development Fund (CCDF) program, along with the Child Care and Development Block Grant Act (CCDBG) or Discretionary Funds (see CFDA 93.575). To make grants to States, Tribes, and tribal organizations for child care assistance for low-income families and to: (1) allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within such State; (2) promote parental choice to empower working parents to make their own decisions on the child care that best suits their family's needs; (3) encourage States to provide consumer education information to help parents make informed choices about child care; (4) assist States to provide child care to parents trying to achieve independence from public assistance; and (5) assist States in implementing the health, safety, licensing, and registration standards established in State regulations.

TYPES OF ASSISTANCE:**FORMULA GRANTS****USES AND USE RESTRICTIONS:**

Title IV of the Social Security Act appropriates funds (Mandatory and Matching Funds) for the purpose of providing child care assistance. Lead Agencies must use Mandatory and Matching Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG Act. Lead Agencies must ensure that not less than 70 percent of the total amount of Mandatory and Matching Funds are used to provide child care assistance to families who are receiving assistance under the Temporary Assistance for Needy Families program, families who are attempting through work activities to transition off of temporary assistance programs, and families who are at risk of becoming dependent on temporary assistance programs. Not more than five percent of the aggregate amount of CCDF Funds expended by the State (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State to carry-out all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State shall use not less than four percent of the CCDF Funds to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. Except for approved construction of child care facilities by tribal grantees, no Mandatory or Matching Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement of any building or facility (other than for minor remodeling and for upgrading of facilities to meet State and local child care standards.) No Mandatory or Matching Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction. However, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of faith-based or community child care providers. No Mandatory or Matching Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school.

In conjunction with the development of the CCDF plan, the Lead Agency must hold at least one public hearing no earlier than nine months before the CCDF plan becomes effective and after at least 20 days of statewide public notice, to provide the public an opportunity to comment on the provision of child care services under the plan. In advance of the hearing, the Lead Agency must make the content of the plan available to the public. The Lead Agency must also coordinate the

provision of services under the program with other Federal, State, and local child care and early childhood development programs. Also, the Lead Agency must consult with appropriate representatives of local governments. Tribal Lead Agencies submitting applications for construction must submit an environmental impact assessment. Renewals:

CCDF plans must be submitted every two years.

Formula and Matching Requirements:

Statutory Formula: Title 45 CFR, Part 98.53.

Matching Requirements: Allocations of the Mandatory Funds are based on a State's Federal share of the expenditures for the now-repealed AFDC-linked child care programs (AFDC/JOBS Child Care, Transitional Child Care, and At-Risk Child Care) in 1994 or 1995, or the average of 1992 through 1994, whichever was greater. A State is not required to expend any State funds in order to receive its share of the Mandatory Funds. The remaining funds are Matching Funds and are distributed based on the number of children under age 13 in a State compared with the national total of children under age 13. To access Matching Funds, a State must obligate all of its Mandatory Funds allotted in a fiscal year and maintain 100 percent of the State's share of expenditures for the former programs in fiscal year 1994 or fiscal year 1995, whichever is greater. Matching Funds must be matched at the applicable FMAP rate, which is the Medicaid Program matching rate. Not less than one percent, but not more than two percent of the total Mandatory and Matching Funds are reserved for Tribes and tribal organizations based on the number of children living on or near tribal reservations or other appropriate area served by the tribal grantee. Tribes and tribal organizations are not required to provide matching funds. The District of Columbia is treated as a State for purposes of receiving its share of Mandatory and Matching Funds. Territories are not eligible to receive Mandatory or Matching Funds.

This program has MOE requirements, see funding agency for further details.

Matching Funds must be obligated by the end of the first fiscal year

and liquidated by the second fiscal year. State funds expended toward the Maintenance of Effort requirement must be both obligated and expended by the end of the first fiscal year. Mandatory and Matching Funds awarded to Tribes and tribal organizations must be obligated by the end of the second fiscal year and liquidated by the end of the third fiscal year. Method of awarding/releasing assistance: quarterly.

Territories are required to report estimates and expenditures for the Discretionary Fund only on a quarterly basis. TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Applicant Eligibility:

Applications are not required. The States, including Puerto Rico and the District of Columbia, may receive payments. The Children's Bureau shall determine the numbers of foster child adoptions, the special needs adoptions, and the older child adoption in a State on the basis of AFCARS data as reported by each State and accepted by the Children's Bureau no later than May 15 of the fiscal year subsequent to the fiscal year in which the adoptions were finalized (i.e., the "earning year").

Beneficiary Eligibility:

Beneficiaries are those children and families eligible under Title IV-B and Title IV-E of the Social Security Act, as amended.

Credentials/Documentation:

The Children's bureau shall determine the numbers of foster child adoptions, the special needs adoptions, and the older child adoptions, as well as the highest ever foster child adoption rate in a State on the basis of data reported by each State to the Adoption and Foster Care Analysis and Reporting System (AFCARS) data and accepted by the Children's Bureau no later than May 15 of

the fiscal year subsequent to the fiscal year in which the adoptions were finalized (i.e., the "earning year"). OMB Circular No. A-87 applies to this program.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Not Applicable.

Renewals:

Each "earning year" (fiscal years 2008 - 2012), State adoption data received through AFCARS will be considered on its own merit.

Formula and Matching Requirements:

Statutory Formula:

Matching Requirements: The adoption incentive payment payable to a State for a fiscal year shall be equal to the sum of (a) \$4,000, multiplied by the number of foster child adoptions in the State during the fiscal year which exceeds the base number of foster child adoptions for the State for the fiscal year; (b) \$8,000 multiplied by the number of foster child adoptions of children age 9 or older in the State during the fiscal year in which exceeds the base number of foster child adoption of children age 9 or older for the State for the fiscal year; and (c) \$4,000, multiplied by the number of special needs adoptions of children under age nine in the State during the fiscal year which exceeds the base number of special needs adoptions of children under age 9 for the State for the fiscal year, if the state receives a bonus under (a) or (b). Awards are pro-rated if insufficient funds are available to make the full awards. In addition, if funds remain available after making the above awards, a State is eligible to earn an additional incentive award by exceeding the highest ever foster child adoption rate in the State between FY 2002 and the immediately preceding fiscal year. The incentive is calculated by multiplying the State's highest ever foster child adoption rate times the number of children in foster care on the last day of the preceding fiscal year and subtracting that number from the number of foster child adoptions in the State in that fiscal year. That number is rounded to the nearest whole number and then multiplied by \$1,000. There are no matching requirements for these funds.

Resolution of their claims may result in release, granting of an immigration status (such as special immigrant juvenile or asylum), voluntary departure, or removal.

TYPES OF ASSISTANCE:

Project Grants (Cooperative Agreements or Contracts)

USES AND USE RESTRICTIONS:

Funds may be used only for the purposes set forth in the grant and/or contract. Services may be provided only to unaccompanied alien children who are apprehended by agents of the Department of Homeland Security or referred by other federal agencies or departments.

Any exemption requires documentation by the grants or contracting officer of the justification for any one of the circumstances listed above. This program is excluded from coverage under E.O. 12372. In the case of emergency, staff will review on the basis of specific evaluation criteria to determine applicant qualification based upon published review criteria, quality of services to be rendered, and the likelihood of the program success.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

93.710 ARRA - COMMUNITY SERVICES BLOCK GRANT

CSBG, Recovery Act.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Community Services Block Grant Act (CSBG Act), as amended by the Community Opportunities, Accountability, Training, and Educational Services Act of 1998, Public Law 105-285; American Recovery and Reinvestment Act of 2009, Public Law 111-5.

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well-being of children, youth, families and communities. Objectives are to provide assistance to States and local communities, working through a network of community action agencies and other neighborhood-based organizations, for the reduction of poverty, revitalization of low-income communities, and empowerment of low-income families and individuals in rural and urban areas to become fully self-sufficient (particularly families who are attempting to transition off a State program carried out under part A of Title IV of the Social Security Act). Additional objectives are (1) to provide services and activities having a measurable and potential major impact on causes of poverty in the community or those areas of the community where poverty is a particularly acute problem; (2) to provide activities designed to assist low-income participants, including the elderly poor, to: (a) secure and retain meaningful employment; (b) attain an adequate education; (c) make better use of available income; (d) obtain and maintain adequate housing and a suitable living environment; (e) obtain emergency assistance through loans or grants to meet immediate and urgent individual and family needs, including health services, nutritious food, housing, and employment-related assistance; (f) remove obstacles and solve problems which block the achievement of self-sufficiency; (g) achieve greater participation in the affairs of the community; and (h) make more effective use of other related programs; (3) to provide on an emergency basis for the provision of such supplies and services, nutritious food, and related services, as may be necessary to counteract conditions of starvation and malnutrition among the poor; and (4) to coordinate and establish linkages between governmental and other social services programs to assure the effective delivery of such services to low-income individuals.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Uses and restrictions for CSBG Recovery Act funds differ from the uses and restrictions that apply to allotments to States from regular CSBG annual appropriations with regard to use and percentage of funds retained by the States. As with regular CSBG grants, States receive CSBG Recovery Act funds to ameliorate the causes of poverty in communities. The block grant approach gives the States flexibility to tailor their programs to the particular services needs in their communities. States are required to pass through 99 percent of their Recovery Act allocations for grants to eligible entities, as defined in the CSBG Act and use the remaining one percent of funds for benefits enrollment coordination activities relating to the identification and enrollment of eligible individuals and families. See Above.

Applicant Eligibility:

The Secretary is authorized to make grants to States. This includes each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Island, American Samoa, and the Commonwealth of the Northern Mariana Islands. The Secretary also provides assistance directly to the governing body of an Indian Tribe or Tribal organization upon application by the tribe. Only State-recognized tribes, as evidenced by a statement to that effect by the Governor, or tribes formally recognized by the Secretary of the Interior, under the procedure for such recognition in 25 CFR 54, are eligible to receive direct grants.

Beneficiary Eligibility:

States make grants to qualified locally-based nonprofit community anti-poverty agencies and other eligible entities which provide services to low-income individuals and families. The official poverty line, as established by the

Secretary of Health and Human Services, is used as a criterion of eligibility in the Community Services Block Grant program. When a State determines that it serves the objectives of the block grant, it may revise the income limit, not to exceed 200 percent of the official poverty line.

Credentials/Documentation:

No Credentials or documentation are required. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Under the regularly-funded CSBG Program, each State desiring to receive an allotment for a fiscal year is required to submit an application to the Secretary of HHS. For Recovery Act funds, States will receive a separate allotment of funds based on the statutory formula. Within 30 days of receiving new grant allotments, each State must submit an application amendment outlining the intended use of Recovery Act funds, to include how the State will carry out the assurances in Section 676(b) of the CSBG Act. The application amendment must be a separate document from the original application and must contain assurances by the Chief Executive Officer of the State that the State will comply with the allowable uses of funds under Section 675C of the CSBG Act, with modifications to allowable uses specified in the Recovery Act. The application amendment must set forth the general purposes for which funds will be used, including a description of the State intended use for benefits enrollment coordination activities relating to the identification and enrollment of eligible individuals and families in Federal, State, and local benefit programs. The State also must describe how it will incorporate monitoring of Recovery Act funds into its regular monitoring of CSBG eligible entities. This includes descriptions of how the State will monitor restrictions on administrative expenses, eligible recipients, board requirements for community action agencies and other nonprofit organizations, fiscal control, monitoring, and Federal investigation provisions, coordination between antipoverty programs in each community and certain prohibitions on political activities. States also must include a description of how they plan to track CSBG funds from ARRA separately from CSBG funds provided through the regular FY 2009 and 2010 appropriations process. In addition, States must indicate how they plan to evaluate the effectiveness of ARRA CSBG funds, including tracking the number of jobs created. This program is excluded from coverage under 45 CFR Part 1050.

Award Procedure:

HHS determines the amount of funds to be allocated as block grants to each State in accordance with the formula set forth in the CSBG Act. The Office of Management and Budget (OMB) has the authority to apportion to HHS through the course of a year the Congressional appropriation for block grants. Consistent with OMB's apportionment of funds, HHS will assign allotments to the States through individual awards or a series of awards.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Not Applicable.

Appeals:

Funds may be withheld from any State which does not utilize its allotment substantially in accordance with the provisions of the CSBG Act, the American Recovery and Reinvestment Act, and the assurances provided in its application. This may be done only after adequate notice and an opportunity for a hearing conducted within the affected State.

Renewals:

Not Applicable.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program.

This program has no matching requirements.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Formula grant awards will be made in FY 2009. Grant funds allotted to the State will be awarded in accordance with apportionment of funds from OMB. Amounts unobligated by the State at the end of a fiscal year remain available for obligation during the succeeding fiscal year. See the following for information on how assistance is awarded/released: Formula grant awards will be made in FY 2009.

Reports:

Funded grantees must submit quarterly reports required by Section 1512 of the Recovery Act. Cash reports are not applicable. Progress reports are not applicable. Expenditure reports are not applicable. Performance monitoring is not applicable.

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. States must conduct financial and compliance audits of block grant funds annually in accordance with Section 678D of the CSBG Act.

Records:

States are required to keep records sufficient to permit preparation of the required reports and to permit tracking of funds to a level of expenditure adequate to ensure that funds have not been spent unlawfully.

93.711 ARRA STRENGTHENING COMMUNITIES FUND

SCF, Recovery Act.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 , Public Law 111-5.

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well-being of children, youth, families, and communities.

The objectives of the Strengthening Communities Fund (SCF) are to (1) fund entities to provide training, technical assistance, and financial assistance to local faith-based and community organizations enabling them to more fully participate in economic recovery and (2) build the capacity of State, Local, and Tribal governments to provide outreach to faith-based and community-based organizations. The funding is used to build capacity of government and nonprofit organizations to partner with local faith-based and community-based organizations, with a focus on expanding economic recovery efforts, increasing community access to public benefits (including ARRA benefits), and helping low- and moderate-income people secure and retain employment.

SCF is composed of two programs:

(1) SCF Nonprofit Capacity Building Program

The focus of the SCF Nonprofit Capacity Building Program is to fund organizations that provide training, technical assistance, and competitive financial assistance to faith-based and community-based nonprofit organizations to help them address the broad economic recovery issues present in their communities, including helping low-income individuals secure and retain employment, earn higher wages, obtain better-quality jobs, and increase access to State and Federal benefits and tax credits.

(2) SCF Government Capacity Building Program

The focus of the SCF State, Local, and Tribal Government Capacity Building Program is to build the sustainability and effectiveness of the government entities that provide outreach to faith-based and community-based organizations. Ultimately, these partnerships will enable local nonprofit organizations to better serve those in need and to increase nonprofit organizations' involvement in the economic recovery. Government entities or their designees will use program funds to develop their capacity to serve as a resource to nonprofit organizations and other government agencies regarding ARRA funding/benefits to ensure that disadvantaged and hard-to-serve populations are aware of and understand how to access the benefits and services described in the ARRA. Grantees also will use program funds to offer free capacity building services to nonprofit organizations to improve awareness of and access to ARRA efforts/benefits, improve nonprofits organizational capacities to be active participants in ARRA efforts, and facilitate partnerships between and among nonprofits and other government agencies. For example, grantees could establish a beneficiary benefits clearinghouse for individuals and a funding opportunities clearinghouse for nonprofit organizations, provide outreach and education, and deliver training and technical assistance.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Under the SCF Nonprofit Capacity Building Program, lead organizations assist nonprofit project partners in distressed communities with capacity building activities in four critical areas: (1) organizational development, (2) program development, (3) collaboration and community engagement (4) leadership development and (5) evaluating their effectiveness. Capacity building activities are designed to increase an organization's sustainability and effectiveness, enhance its ability to provide social services, and create collaborations to better serve those in need. Lead organizations use the award funds to provide two services within their communities: (1) training and technical assistance to

nonprofit organizations; and (2) competitive financial assistance to some subset of the nonprofit organizations receiving training and technical assistance.

Training and technical assistance activities are conducted at no cost to interested nonprofit organizations. Each organization will also provide subawards to local non-profits to help these organizations build the capacity to expand and strengthen programs and services related to helping low-income individuals secure and retain employment, earn higher wages, and obtain better-quality jobs. Examples of these capacity building activities include staff training, technical assistance, and materials and equipment to enhance efficiency or enable the ability to provide a new service. Funds also help organizations build capacity to expand and strengthen programs aimed at increasing low- and moderate-income individuals access to the state and Federal benefits and tax credits for which individuals are eligible. Examples include developing organizational capacity to offer a counselor-assisted centralized electronic screening and application tool, establishing procedures to assess eligibility of prospective and current clients for benefits and tax credits, developing referral protocols with other local service providers, developing a guide/clearinghouse of benefits and tax credits, and developing the capacity to offer free tax preparation assistance.

Under the SCF State, Local, and Tribal Government Capacity Building Program, funds are awarded to State, city, county and tribal government offices (e.g., offices responsible for outreach to faith-based and community organizations or those offices interested in initiating such an effort) or their designees for the purpose of building the sustainability and effectiveness of the government entities, other government agencies and ultimately local nonprofits to better serve those in need. Specifically, funds are used to build the capacity of organizations that are contributing to the economic recovery and help Federal, State, and local governments ensure that the information and services described in the ARRA reach disadvantaged and hard-to-serve populations. Grantees use program funds to provide free capacity building services to nonprofit organizations, such as developing a funding opportunities clearinghouse and/or training and technical assistance to improve access to ARRA funding/benefits and to improve organizational capacity to be competitive applicants for ARRA funding/benefits. Grantees also will use program funds to build their own capacity to provide these services to nonprofits. Priority for awards will be given to State and Indian/Native American Tribal governments and such governments designees. Grantees must also use funds to measure their own effectiveness and help non-profit organizations develop ways to measure their effectiveness. Costs of organized fund raising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions, are unallowable under this program. Awards will not allow reimbursement of pre-award costs. Construction is not an allowable activity or expenditure under this program. Purchase of real property is not an allowable activity or expenditure under this program. The SCF grantees and project partners (including subawardees) may not use funds for direct social service provisions. Direct Federal grants, financial assistance funds, or contracts under the Department of Health and Human Services shall not be used to support inherently religious activities such as religious instruction, worship, or proselytization. Organizations that receive HHS funds may not engage in inherently religious activities, such as worship, religious instruction, or proselytization, as part of the programs or services funded with HHS funds. An organization receiving a SCF award shall not, in providing Federally-funded services, discriminate against a program beneficiary or prospective program beneficiary on the basis of religion or religious belief. SCF program funding may not pay for capacity building activities that support medical and/or health care related activities or items such as medical equipment or supplies or medically-oriented trainings, certifications, or licensures. SCF Nonprofit Capacity Building Program lead organizations may not provide competitive financial assistance to a health care organization. A grantee is not to use award funds to provide a contract to organizations that provide the grantee with a cost share match..

Beneficiary Eligibility:

Funds are used to build the capacity of organizations that are contributing to the economic recovery and help Federal, State, and local governments ensure that the information and services described in the ARRA reach disadvantaged and hard-to-serve populations. Funds help organizations build the capacity to expand and strengthen programs and services related to helping low-income individuals secure and retain employment, earn higher wages, and obtain better-quality jobs. Funds also help organizations build the capacity to expand and strengthen programs that increase low- and moderate-income individuals access to the state and federal benefits and tax credits for which individuals are eligible, such as by offering counselor-assisted use of a centralized electronic eligibility screening tool that simplifies the benefit application process. A nonprofit organization receiving training, technical or financial assistance under this program could operate a one-stop center where individuals can obtain free, customized benefits information, tax information, information on ARRA, and/or apply for benefits and file tax returns.

Credentials/Documentation:

The ARRA SCF Funding Opportunity Announcements will specify the required documentation that must be submitted with the applications and by time of the award. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

An applicant should consult the office or official designated as the single point of contact in his or her state for more information on the process the state requires to be followed in applying for assistance, if the state has selected the program for review. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." Prepare and submit applications according to the instructions provided in the applicable ARRA SCF Funding Opportunity Announcement which can be found online at Grants.gov or on the ACF website: <http://www.acf.hhs.gov/grants/>.

Award Procedure:

Applications received by the due date will be reviewed and scored competitively. Experts in the field, generally persons from outside the Federal government, will use the evaluation criteria listed in Part V of the Program Announcement to review and score the applications. The results of the review will be a primary factor in making funding decisions. ACF also may solicit comments from Regional Office staff and other Federal agencies. ACF may consider a variety of factors in addition to the review criteria identified above, including geographic diversity/coverage and types of applicant organizations, in order to ensure that the interests of the federal government are met in making the final selections. Furthermore, ACF may limit the number of awards made to the same or affiliated organizations although they would service different geographic areas. The successful applicants will be notified through issuance of a Financial Assistance Award document which sets forth the amount of funds granted, the terms and conditions of the grant, the budget period for which initial support will be given, the non-Federal share to be provided, and the total project period for which support is contemplated. The Financial Assistance

Award will be signed by the Grants Officer.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: No Current Data Available Fiscal Year 2009: The Section 317 Program remains a significant source of federal funding for most jurisdictional vaccine program operations. During Fiscal Year 2008, CDC awarded 64 grants through the Section 317 Program, which supported vaccine distribution/administration, the integration of new vaccines into routine medical care, front-line public health professionals, immunization information systems, disease surveillance systems, education and outreach activities, and post-licensure vaccine safety surveillance and research activities.

Because of this program and its sister program, The Vaccines for Children Program, the nation's childhood immunization coverage rates are at record high levels for most vaccines and for all the vaccination series measures. While the VFC program provides vaccine to uninsured children, underinsured children are not covered nor is there sufficient infrastructure to launch adult activities. Section 317 funds target this gap and for the past five years, our 90 percent coverage target has been exceeded for four of the seven routinely recommended childhood vaccine (Hib, MMR, hepatitis B, and polio) and has almost reached the 90 percent target for varicella (currently at 89 percent). Another program accomplishment is the increased proportion of adults who are vaccinated

annually against influenza and ever vaccinated against pneumococcal disease among persons 65 years of age and older. Influenza vaccination coverage levels among the elderly have increased from 30 percent in 1989 to 64 percent. Pneumococcal vaccination levels have increased from 15 percent in 1989 to 57 percent in 2006.

The estimated 16,000 serious pneumococcal infections from resistant strains that have been prevented among older adults since childhood immunization with PCV was initiated in 2000 is another program accomplishment. New adolescent and adult vaccines can prevent individuals from suffering or dying from vaccine-preventable diseases, and Section 317 funds not only the vaccines but the crucial infrastructure needed to deliver them.

Lastly, various highly focused health services projects have been implemented using 317 funds. One of these projects was a joint collaboration with CMS that evaluated and then assisted in moving forward standing orders vaccination programs for influenza in long term care facility residents. Other projects supported included working traditional and nontraditional partners, including national minority organizations, universities, and health officials of various political subdivisions. 93.713 ARRA CHILD CARE AND DEVELOPMENT BLOCK GRANT Child Care and Development Block Grant (CCDBG), Recovery Act Funds.

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Public Law 111-5, 42 U.S.C 9858; Child Care and Development Block Grant Act of 1990, Public Law 101-508, 42 U.S.C 9858.

OBJECTIVES:

The ARRA - CCDBG is a part of the Child Care and Development Fund (CCDF) program, along with Child Care Discretionary Funds (CFDA number 93.575) the Child Care Mandatory and Matching Funds (CFDA number 93.596). This supplemental FY 2009 CCDBG funding was appropriated under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5). This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well being of children, youth, families, and communities. Objectives under the CCDBG Act are: To make grants to States, Territories, Tribes, and tribal organizations for child care assistance for low-income families and to: (1) allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within such State; (2) promote parental choice to empower working parents to make their own decisions on the child care that best suits their family's needs; (3) encourage States to provide consumer education information to help parents make informed choices about child care; (4) assist States to provide child care to parents trying to achieve independence from public assistance; and (5) assist States in implementing the health, safety, licensing, and registration standards established in State regulations.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Congress directs that Recovery Act funds appropriated for the CCDBG must be used to supplement, not supplant, State general revenue funds for child care assistance for low-income families. Lead Agencies must use CCDBG Recovery Act Funds for child care services on a sliding fee scale basis, activities that improve the quality or availability of such services, and other activities that realize the goals of the CCDBG Act. Not more than 5 percent of the aggregate amount of CCDF Funds, including CCDBG Recovery Act Funds, expended by the State or Territory (15 percent for Tribes or tribal organizations) may be expended for administrative costs incurred by the State or Territory to carryout all of its functions and duties. The term "administrative costs" does not include the costs of providing direct services. A State or Territory shall use not less than 4 percent of the aggregate CCDF Funds, including CCDBG Recovery Act Funds, to improve child care quality and availability including comprehensive consumer education, activities to increase parental choice, and other activities such as resource and referral services, provider grants and loans, monitoring and enforcement of requirements, training and technical assistance, and improved compensation for child care staff. In addition to the minimum four percent quality expenditures, \$255,186,000 of the CCDBG Recovery Act Funds shall be reserved by the States for quality improvement activities, of which \$93,587,000 shall be for activities that improve the quality of infant and toddler care. Except for approved construction of child care facilities by Tribal Grantees, no CCDBG Recovery Act Funds may be used for the purchase or improvement of land, or for the purchase, construction, or permanent improvement of any building or facility (other than for minor remodeling and for upgrading facilities to meet State and local child care standards). No CCDBG Recovery Act Funds provided directly to child care providers through grants or contracts may be expended for any sectarian purpose or activity, including sectarian worship or instruction; however, Grantees must give parents the option of receiving vouchers or certificates to allow parents the choice of

faith-based or community child care providers. No CCDBG Recovery Act Funds may be provided for any services provided to students enrolled in grades 1 through 12 during the regular school day; for any services for which such students receive academic credit toward graduation; or for any instructional services which supplant or duplicate the academic program of any public or private school. Lead Agencies shall assure that a substantial portion of the total CCDBG (CCDF Discretionary) Funds will be used to provide assistance to low-income working families who are not receiving assistance under the Temporary Assistance for Needy Families program, attempting through work activities to transition off of temporary assistance programs, nor at risk of becoming dependent on temporary assistance programs.

Beneficiary Eligibility:

In conjunction with the development of the CCDF plan, the Lead Agency must hold at least one public hearing no earlier than nine months before the CCDF plan becomes effective and after at least 20 days of statewide public notice, to provide the public an opportunity to comment on the provision of child care services under the plan. In advance of the hearing, the Lead Agency must make the content of the plan available to the public. The Lead Agency must also coordinate the provision of services under the program with other Federal, State, and local child care and early childhood development programs. Also, the Lead Agency must consult with appropriate representatives of local governments. Tribal Lead Agencies submitting applications for construction must submit an environmental impact assessment. State, Tribal, and Territorial Lead Agencies already receiving FY 2009 funds under the CCDBG Act (i.e., Discretionary Funds) will receive CCDBG Recovery Act Funds. Separate applications for the CCDBG Recovery Act Funds are not required. However, should a Grantee decide to make a substantial change to its approved CCDF plan in FY 2009 as a result of the availability of CCDBG Recovery Act Funds, the Lead Agency must submit an amendment to its existing approved FY 2008-2009 CCDF plan within 60 days of making the change. A decision on the approval of the amendment will be made by ACF within 90 days from the date the amendment is received. (An extension of the time period may be made by a written agreement.)

To receive funds under the CCDBG Act, a Lead Agency desiring to receive an allotment for a fiscal year is required to submit a two-year CCDF plan to ACF, as well as, financial and other information necessary for the grants process. Each plan must contain certifications and assurances by the Lead Agency that it will comply with the requirements of the CCDBG Act. The plan must also include: the designation of a Lead Agency; the provision of assurances regarding policies and procedures as stated in Section 658E(c)(2) of the

CCDBG Act; an outline of the intended use of block grant funds in compliance with Section 658E(c)(3) of the CCDBG Act; the provision of certification regarding payment rates as stated in Section 658E(c)(4) of the CCDBG Act; and the establishment of a sliding fee scale. Additional requirements are specified by 45 CFR Parts 98 and 99.

To receive CCDBG Act Funds, CCDF plans must be submitted for approval every two years. FY 2010-2011 CCDF plans will be approved by ACF within 90 days after the due date.

Appeals:

Guidelines for appeals of disapprovals of CCDF plans or plan amendments are specified in regulations (45 CFR Part 99).

Renewals:

To receive CCDBG Act Funds, CCDF plans must be submitted to ACF for approval every two years.

93.714 ARRA EMERGENCY CONTINGENCY FUND FOR TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF) STATE PROGRAM

TANF Emergency Fund, Recovery Act

FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

TANF Emergency Fund, Recovery Act, Title IV, Part A, Section 2101, Public Law 111-5, 42 U.S.C 603(c).

OBJECTIVES:

This funding will provide economic stimulus to the nation while furthering the ACF mission to promote the economic and social well being of children, youth,

families, and communities. The objective of the program is to provide up to \$5 billion for jurisdictions (States, Territories, and Tribes) in fiscal year (FY) 2009 and FY 2010 that have an increase in assistance caseloads and/or certain types of expenditures. This Emergency Fund is in addition to the TANF Contingency Fund in section 403(b) of the Act that currently gives money to qualifying States (but not Territories or Tribes) during an economic downturn.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Emergency Fund grants are Federal TANF funds. Jurisdictions must use these funds in accordance with section 404 of the Act. This does not include authority to transfer emergency funds to either the Social Services Block Grant (SSBG) or the Child Care and Development Block Grant (CCDBG) because that transfer authority is limited to grants made under section 403(a) of the Act. Emergency funds are available until expended.

Jurisdictions may carry over emergency funds for use in a succeeding fiscal year as authorized under section 404(e) of the Act. Section 403(c)(5) of the Act imposes a cumulative cap on the amount of emergency funding that a jurisdiction can receive for the two-year period. The capped amount consists of the cumulative combined grants from the existing Contingency Fund (section 403(b)) and the Emergency Fund (section 403(c)) and the total of the two cannot exceed 50 percent of the jurisdictions annual Federal TANF family assistance grant.

The same financial and programmatic rules pertaining to the appropriate use of the jurisdictions Federal TANF block grant funds also apply when using the emergency funds. This also means that all TANF requirements, including work participation requirements and time limits, apply to families receiving assistance with emergency funds exactly as they do to families receiving other Federal TANF-funded assistance. See above.

Grant funds will be available in FYs 2009 and 2010 for costs necessary to carry out an approved project. Unallowable costs, as well as those for which prior written approval is required, are indicated in the HHS Grants Policy Statement. Grantees must comply with all Recovery Act reporting requirements. 93.716 ARRA TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF) SUPPLEMENTAL GRANTS

Supplemental Grants for Population Increases in Certain States, Recovery Act
FEDERAL AGENCY:

Administration for Children and Families, Department of Health and Human Services

AUTHORIZATION:

Supplemental Grants for Population Increases in Certain States, Recovery Act, Title IV, Part A, Section 2102, Public Law 111-5, 42 U.S.C 603(a)(3).

OBJECTIVES:

These funds will help promote the economic and social well being of children, youth, families, and communities. The objective of the program is to provide supplemental TANF funds for States with exceptionally high population growth in the early 1990s, historic (1994) welfare grants per poor person lower than 35 percent of the national average, or a combination of above average population growth and below average historic welfare grants per poor person.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

The Federal TANF Supplemental Grants are in addition to the States annual Federal TANF block fund. Thus, these funds are subject to the same uses and restrictions as the States annual Federal TANF block grant (see CFDA 93.558 Temporary Assistance for Needy Families), and repeated below.

Each State designs and operates its own TANF program, and establishes the specific eligibility criteria that must be met to receive financial assistance

payments or other types of benefits and services. Each State has broad flexibility to use the grant funds in any manner that is reasonably calculated to accomplish a purpose of the TANF program (including providing low-income households with assistance in meeting home heating and cooling costs). The purposes of the TANF program are to assist needy families to care for their children in their own homes; reduce dependency of needy parents by promoting job preparation, work and marriage; prevent and reduce the incidence of out-of-wedlock pregnancies; and encourage the formation and maintenance of two-parent families. A State may also use the funds in ways that had been authorized and allowable under its former approved Aid to Families with Dependent Children (AFDC), Job Opportunities and Basic Skills Training (JOBS), and Emergency Assistance (EA) plans. A State may also transfer a limited portion of its Federal TANF funds to the Child Care and Development Block Grant (CCDBG) and Social Services Block Grant (SSBG) Programs. No State may spend more than 15 percent of its Federal TANF funds on administrative costs, exclusive of certain computerization and information technology expenses. See above.

Applicant Eligibility:

None.

Beneficiary Eligibility:

None.

Credentials/Documentation:

Federal funds go to the State (the grantee). States decide the objective eligibility criteria and verification required to determine eligibility and payment of TANF benefits. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110.

Award Procedure:

Supplemental Grants, like the annual Federal TANF block grant, are awarded in quarterly payments.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Varies by State (usually within 45 days).

Appeals:

States must provide opportunities for recipients who have been adversely affected to be heard in a State administrative or appeal process.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.
Matching Requirements: Percent: 75.%. The TANF program, which includes the standard TANF block grant and the additional Supplemental Grants for 17 States, has an annual cost-sharing requirement known as maintenance-of-effort (MOE). This means that every fiscal year, each State receiving Federal TANF funds must spend an applicable percentage of its own money to help eligible families in ways that are consistent with the purposes of the TANF program. The applicable percentage depends on whether the State meets the minimum work participation rate requirements for that fiscal year. If the State does not meet the work participation rates, then it must spend 80 percent of the amount it spent for fiscal year 1994 on AFDC and AFDC-related programs. If the State meets the work participation rates, then the applicable percentage is 75 percent of the amount it spent for fiscal year 1994 on AFDC and AFDC-related programs.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

States are awarded Supplemental Grants in quarterly payments. Once awarded,

the funds are available to the State until expended. See the following for information on how assistance is awarded/released: No information provided.

Reports:

States receiving the TANF block grant and Supplemental Grants must submit quarterly data reports on families receiving assistance. States must also report expenditures of grant funds on a quarterly basis. Expenditure data related to Supplemental Grants will be reported in a separate category on the quarterly TANF expenditure report for FY 2010. Funded grantees must submit reports as required by Section 1512 of the Recovery Act. Cash reports are not applicable. Progress reports are not applicable. Expenditure reports are not applicable. Performance monitoring is not applicable.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. The TANF program (including the additional TANF supplemental grants) is subject to the Single Audit Act under Chapter 75 of Title 31, United States Code.

Records:

States are subject to the uniform administrative requirements in 45 CFR Part 92. In particular, the regulations at 45 CFR 92.20 require that all grantees have a financial management system that can adequately trace expenditures to ensure that the funds have been used appropriately, and not in violation of any programmatic restrictions and prohibitions; and require that accounting records are supported by source documentation to support all expenditures. Also, the regulations at 45 CFR 92.42 and TANF Program Instruction TANF-ACF-PI-2003-1, dated January 28, 2003 (<http://www.acf.hhs.gov/programs/ofa/policy/pi-ofa/2003/pi2003-1.PDF>), address record retention and access requirements applicable to all financial and programmatic records, supporting documents, statistical records, and other records of grantees or subgrantees.

Range and Average of Financial Assistance:

State Supplemental Grants are from \$1,132,701 to \$60,405,668.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: Grants were authorized at \$800 million over FY 1998 through FY 2001, and annual grants grew from \$79 million in FY 1998 to \$319 million in FY 2001. Congress froze supplemental funds at the \$319 million annual level when it extended them for FY 2002 and subsequent years. The Deficit Reduction Act of 2005 (P.L. 109-171), which extended most TANF grants through FY 2010, continued supplemental funds only through FY 2008. However, the Medicare Improvements for Patients and Providers Act of 2008, P.L. 110-275 extended supplemental funds through FY 2009. The American Recovery and Reinvestment Act (ARRA) of 2009 extends supplemental funding through FY 2010. The 17 States that qualify for supplemental funds are: Alabama (\$11,093,254), Alaska (\$6,887,803), Arizona (\$23,924,877), Arkansas (\$6,218,375), Colorado (\$13,569,691), Florida (\$60,405,668), Georgia (\$37,283,228), Idaho (\$3,498,046), Louisiana (\$17,027,012), Mississippi (\$9,035,674), Montana (\$1,132,701), Nevada (\$3,733,534), New Mexico (\$6,553,104), North Carolina (\$36,109,948), Tennessee (\$21,565,141), Texas (\$52,707,774), Utah (\$8,704,396). Reinvestment Act of 2009, Public Law 111-5, Public Law 111-5, 42 U.S.C
241(a).

OBJECTIVES:

This funding was appropriated under the American Recovery and Reinvestment
Act of 2009 (Public Law 111-5). The ARRA funds are intended to reduce
preventable healthcare-associated infections through State health department
efforts to prevent HAIs including leveraging the National Health Care Safety
Network to support the dissemination of HHS evidence-based practices within
hospitals (\$40 million). Specific goals include: (1) progress towards prevention
targets (e.g., 50-70% reduction in bloodstream infections); (2) use of the
metrics and supporting systems to assess progress towards meeting the targets;
(3) broad implementation of current evidence-based prevention guideline
recommendations; (4) develop and implement state public health-healthcare
HAI prevention collaboratives to implement prioritized HAI prevention
recommendations using CDC's NHSN as the measurement system; (5) enhance
and expand participation by hospitals and other healthcare facilities in the
NHSN to facilitate reporting of appropriate HAI metrics and progress toward
five-year prevention targets to state health departments and CDC, HHS, and
other HHS OPDIVs; (6) build a public health workforce in health departments
who can coordinate state-wide initiatives to ensure progress towards five-year
national prevention targets; (7) assist States in the development and submission
of state HAI prevention plans; (8) quickly expand its infrastructure to address a
broader array of HAI epidemiology; (9) provide additional training for EIP state
staff on HAI epidemiology and surveillance; (10) develop and implement
enhanced surveillance tools and methods, and add staff for targeted two year
projects.

TYPES OF ASSISTANCE:

USES AND USE RESTRICTIONS:

CDC will provide 99.5% of the funds to eligible states using the following
existing Cooperative Agreements: the Epidemiology and Laboratory Capacity
for Infectious Disease program, and the Emerging Infections Program. Project
funds may be used for costs associated with planning, organizing, conducting
and supporting programs directed toward preventing healthcare associated
infections, and for the implementation of other program elements as described
in Section :050: above. These funds may be used for the preservation of jobs
necessary to build capacity in state and local health departments related to
healthcare associated infection prevention. See above.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: The Epidemiology and Laboratory Capacity (ELC) for Infectious Disease program plays a critical role in strengthening our nations infrastructure for preventing and controlling infectious diseases. The program builds epidemiology, laboratory, and information systems capacity in all 50 states to assist frontline state programs respond to infectious disease outbreaks, address the increasing threat of antimicrobial resistance, and detect and respond to new and emerging infectious diseases. As states are in different stages of implementing HAI monitoring and prevention programs, ELC funding would be flexible in its applications; however monies would be directed specifically toward the goals of preventing healthcare associated infections.

The Emerging Infections Programs (EIPs) are a critical part of our nations infrastructure for public health work in infectious diseases. Established in 1995, the EIPs consist of 10 centers of excellence across the US that are collaborations among state health agencies, academic institutions, CDC, and other federal agencies. Collectively, they form a specialized network of research centers for infectious disease work that goes beyond the routine functions of health departments. The EIP networks unique strength and contribution lies in its ability to quickly translate surveillance and research activities into informed policy and public health practice.

CDC has supported and been an active participant in the collaborative effort led by HHS to develop the HHS Action Plan to Prevent Healthcare Associated Infections. The HHS Action Plan sets specific targets for monitoring and preventing HAIs nationally and represents a national blueprint for prevention. CDC has played an integral role in the development and implementation of the HHS Action Plan, including chairing the Prevention and Implementation working group and co-chairing the Information Systems and Technology working group, while actively participating in the three other workgroups. In September 2008, CDC hosted a meeting of experts to help define prevention targets and metrics for the Action Plan. CDC continues to work closely with HHS and the other agencies to implement the plan. CDC has a broad range of activities that are crucial to successfully implement the HHS plan. These activities can be categorized as: 1) tracking and monitoring HAIs; 2) developing guidelines for prevention; 3) implementation of prevention strategies; 4) developing new strategies for prevention; 5) identifying and responding to new and emerging threats.

CDCs NHSN is a tool for tracking and prevention of HAIs that incorporates HICPAC practice guidelines, uses validated standardized definitions and protocols, and allows facilities to analyze, share, and compare their data with that of others. NHSN is used by over 2000 healthcare facilities in all 50 states, and continues to expand. Since 1990, facilities reporting to NHSN have seen significant reductions of up to 70% in rates of catheter associated urinary tract infections (CAUTI) in ICUs. From 1997 to 2007, hospitals participating in CDCs NHSN have decreased bloodstream infections by up to 50%. A total of 10,600 device-associated infections are estimated to have been prevented, and at least 1,300 lives are estimated to have been saved.

CDC has demonstrated dramatic success in preventing and reducing HAIs through implementation of CDC guidelines. Through CDC supported efforts in Southwestern Pennsylvania, local hospitals have successfully reduced bloodstream infections by as much as 70 percent by fully implementing CDC prevention recommendations. Similar success was observed when Michigan fully implemented CDC guidelines in more than 100 ICUs. CDC funded and collaborated with the Pittsburgh VA Medical Center to prevent MRSA infections using CDC recommendations. These efforts led to greater than 60%

reductions in MRSA rates, and to collaboration among healthcare facilities in southwestern Pennsylvania on a regional MRSA initiative. The Veterans Health Administration launched a national MRSA prevention initiative involving every Veterans Health Administration hospital in the country modeled after Pennsylvania's success. These and other prevention implementation examples demonstrate the savings in lives and healthcare costs that can result from national implementation of evidence-based HAI prevention programs. CRITERIA FOR SELECTING PROPOSALS:

Funding would be specifically directed to state health departments for HAI activities and would not be available for other non-related infectious disease activities. For state applicants to be eligible they will have to outline a plan for reporting progress toward HHS Action Plan Prevention Targets using specified metrics, either by participating in NHSN or by using NHSN definitions and surveillance methods in systems compatible with NHSN.

CDC will require state applicants to specifically address in their applications state plans for sustaining the impact of ARRA investments beyond the federal funding provided in the next two years. Specifically, states will need to demonstrate a continued plan for progress toward meeting HHS Action Plan prevention targets as demonstrated through reporting metrics outlined in the Plan. Other criteria will be listed in individual funding opportunity announcements.

The Secretary has determined that a 50 percent cost-share requirement on an annual basis is not in the best interest of the program. Instead, the Secretary has structured a funding partnership between HHS and recipients, as indicated in the Program Announcement.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

PHSA 3012(c)(5), as added by ARRA, specifies that the Secretary may provide financial support to any regional center created under PHSA 3012(c) for a period not to exceed 4 years. FEDERAL AGENCY:

Indian Health Service, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 (ARRA), Public Law 111-5; Indian Self-Determination and Education Assistance Act, Title 1, Section 102, Public Law 93-638, Title 1, Section 102, Public Law 93-638.

OBJECTIVES:

\$500 Million in Recovery Act Funds to Improve Health Care and Boost Economy in Indian Country. These funds will be obligated both through tribal agreements and under contracts subject to the Federal Acquisition Regulation, as summarized in the Agency implementation plans.

The Recovery Act health facility construction funds will be used to complete the construction of the new IHS Eagle Butte Health Center in Eagle Butte, South Dakota and the Norton Sound Regional Hospital in Nome, Alaska. The

Eagle Butte Health Center will serve approximately 9,300 American Indians residing on the Cheyenne River Reservation. The facility will replace the existing Eagle Butte IHS Hospital which, at approximately one-third the size of the new facility, is stressed to meet the needs of the entire service population. The new Norton Sound facility replaces a 61-year-old hospital that is stretched to serve an estimated 10,000 users. The project will create a substantial number of new jobs in construction, transportation, and other professions and help fight unemployment in Nome.

Sanitation facilities funds will be used to complete 169 sanitation facilities projects constructed in 24 states. These projects will provide potable water, wastewater disposal and solid waste systems to American Indian and Alaska Native homes and communities. An estimated 16,000 homes will be served by these projects, which will also help foster economic growth and create jobs.

The ARRA will also fund 302 maintenance and improvement projects. Many IHS and tribal facilities require structural renovations, additional space, and design updates to accommodate modern health care delivery practices. These projects will help maintain and improve facilities, which will improve patient care. These projects will also result in enhanced energy conservation and provide local jobs and economic stimulus.

Finally, Recovery Act funds will be used to purchase over 200 pieces of medical equipment, including 35 ambulances and 10 Computed Tomography (CT) scanners, all of which will contribute substantially to patient care. Other equipment to be purchased includes cardiac monitoring equipment, equipment for integration of electronic patient records, blood chemistry analyzers, dental equipment, emergency defibrillators, x-ray systems, among other items. The equipment will be distributed across 24 states.

TYPES OF ASSISTANCE:

93.725 ARRA - COMMUNITIES PUTTING PREVENTION TO WORK: CHRONIC DISEASE SELF-MANAGEMENT PROGRAM

CDSMP

FEDERAL AGENCY:

Administration on Aging, Department of Health and Human Services

AUTHORIZATION:

The statutory authority for cooperative agreements under this program announcement is contained in Division A, Title VIII of the American Recovery and Reinvestment Act (Recovery Act) of 2009 (Public Law 111-5). , Title VIII, Public Law 111-5.

OBJECTIVES:

The American Recovery and Reinvestment Act of 2009 (Recovery Act), signed into law February 17, 2009, is designed to stimulate economic recovery in various ways: to preserve and create jobs; to promote economic recovery; to assist those most impacted by the recession, to stabilize state, territorial and local government budgets to minimize and avoid reductions in essential services and counterproductive state, territorial, and local tax increases; to strengthen the Nations healthcare infrastructure; and to reduce healthcare costs through prevention activities. The Recovery Act includes \$650 million for evidence-based clinical and community-based prevention and wellness strategies that deliver specific, measurable health outcomes. The legislation provides an important opportunity for communities, States, territories, cities, rural areas, and tribes to advance public health across the lifespan and to eliminate health disparities. Of the \$650 million appropriated for this initiative (Communities Putting Prevention to Work), \$32.5 million will support States and territories in promoting wellness by deploying evidence-based chronic

disease self-management programs targeted at older adults with chronic conditions. AoA, in collaboration with CDC, is providing Recovery Act funding under this announcement to support state efforts to deploy evidence-based chronic disease self-management (CDSMP) programs that empower older people with chronic diseases to maintain and improve their health status. The community-based collaborative networks setup through these efforts will provide the foundation for an infrastructure and statewide distribution system that States can use for delivering CDSMP and other evidence-based prevention programs to older adults. These statewide distribution systems will include a quality assurance component to ensure the evidence-based prevention programs are being delivered with fidelity and achieving results comparable to those produced in the original research. The ultimate goal is to have States and communities embed these structures into their statewide systems that provide community-based services and supports to older adults to help them maintain their health and independence in the community.

TYPES OF ASSISTANCE:

Cooperative Agreements (Discretionary Grants)

USES AND USE RESTRICTIONS:

In general, the use of these funds is to support state efforts to deploy evidence-based chronic disease self-management (CDSMP) programs that empower older people with chronic diseases to maintain and improve their health status. These funds are not to be used for free standing CDSMP programs that are not part of a states larger systems development effort to delivery community-based evidence-based prevention programs to older adults. In using funds for this award for infrastructure investment, recipients shall give preference to activities that can be started and completed expeditiously, including a goal of using at least 50 percent of the funds for activities that can be initiated not later than 120 days after the date of the enactment of Recovery Act. Recipients shall also use grant funds in a manner that maximizes job creation and economic benefit (Recovery Act Sec. 1602). The following activities are not fundable: construction and/or major rehabilitation of buildings; basic research (e.g. scientific or medical experiments); and, continuation of existing projects without expansion. Furthermore, none of the funds appropriated or otherwise made available in the Recovery Act may be used by any State or local government, or any private entity, for any casino or other gambling establishment, aquarium, zoo, golf course, or swimming pool. (Recovery Act Sec. 1604). These funds are not to be used for free standing CDSMP programs that are not part of a states larger systems development effort to delivery community-based evidence-based prevention programs to older adults. Applicant Eligibility:

Eligible applicants include all 56 States and territories as follows: in the 24 States with existing AoA Evidence-Based Disease Prevention cooperative agreements, eligibility is limited to the recipient State agency of those existing cooperative agreements; in the 32 States and territories that do not have existing AoA Evidence-Based Disease Prevention cooperative agreements, only State units on aging and State health departments are eligible to apply. Regardless of which agency applies, both the State unit on aging and State health department must be full partners in the development and implementation of the proposed program. The State Medicaid Agency must also be involved in the development and implementation of the program. Only one application will be permitted for each State or territory.

Beneficiary Eligibility:

In general, older adults with chronic diseases. Within this population grantees will be asked to define how they will specifically target low-income, minority, and limited English speaking older adults with chronic diseases.

Preapplication Coordination:

Only one application will be accepted from each State or territory, and a letter of support from the Governor must be included with the States application. States are expected to coordinate with tribal entities in their jurisdiction, and give special attention to serving low-income, minority and limited English speaking seniors. States are encouraged to link with other community-based efforts with special attention to leveraging other public and private sector resources, including federally funded (including Recovery Act, Older Americans Act, Public Health Services Act, Medicare, and Medicaid funded) activities, State revenue programs, and private philanthropy. This funding opportunity is an opportunity for State units on aging and State health departments to collaborate on the development of distribution and delivery systems for CDSMP and eventually other evidence-based prevention programs that have the potential to improve the quality of life for millions of seniors and reduce health care costs. A State governments State unit on aging or health department will be the lead agency for this cooperative agreement. 93.728 ARRA - STRATEGIC HEALTH IT ADVANCED RESEARCH PROJECTS (SHARP)

SHARP

FEDERAL AGENCY:

Office of the Secretary, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009 (Public Law 111-5) (Recovery Act), Title XIII, Part A, Section 3011.

OBJECTIVES:

This Funding Opportunity Announcement (FOA) will result in new competitively-awarded cooperative agreements to establish Strategic Health IT Advanced Research Projects (SHARP). The awardees will conduct research focusing on where breakthrough advances are needed to address well-documented problems that have impeded adoption of health IT and to accelerate progress towards achieving nationwide meaningful use of health IT in support of a high-performing, learning health care system.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

ONC expects to award four cooperative agreements to support establishment of Strategic Health IT Advanced Research Projects (SHARP) sites for a project period of four years. Each such research site will have a two-part mission:

- (1) to implement a collaborative, interdisciplinary program of research addressing a specific focus area from the list provided below, addressing short-term as well as long-term challenges; and
- (2) to develop and implement a cooperative program between researchers, patient groups, health care providers, and other health IT sector stakeholders to transition the results of research into practice.

Each site will focus on areas where breakthrough improvements are needed to address well-documented problems that have impeded adoption of health IT and thereby accelerate progress on the pathway towards achieving the goals outlined in the strategic plan for health IT developed by the National Coordinator pursuant to PHSA Section 3001(c)(3) as added by the Recovery Act, specifically including the nationwide achievement of meaningful use of health IT to achieve transformational improvement of the health care system.

Each site will implement a collaborative, inter-disciplinary research program addressing one of the specific focus area(s) listed below. An eligible entity may, apply for funding in separate applications to establish more than one site, and thus it is possible a single eligible entity (institution) may receive more than one award under this program. Regardless of the total number of institutions funded to establish sites under this program, it is expected that the all of the awardees will collaborate with each other, as there will be numerous points of intersection among the sites' agendas.

Within its focus (listed below) area, each site will carry out at least the following set of activities:

Initially define and subsequently update or redefine on a yearly basis, the key issues and research challenges within their respective area(s) of focus. The research areas identified will be those that significantly address barriers and solutions to achieving widespread adoption and meaningful use of health IT. Projects to address the identified issues will be mapped to either a short-term (< 2 years) or long-term (4 years) timeframe. Because this is a cooperative agreement, recipients shall plan and allow for collaboration with ONC and other federal staff with relevant expertise as identified or approved by ONC in establishing and updating the definition of key issues and research challenges in the sites focus area;

Conduct ambitious research addressing these key issues and challenges. This work will draw on the scientific methods and expertise of researchers and practitioners in diverse fields;

Collect specific, uniform data about the research activities and track progress toward milestones;

Facilitate practical and efficient processes that enable translation of research into health care and public health innovations, facilitating the transition of multidisciplinary research outcomes into new healthcare products and services both the short- and long-term;

Partner with industry to rapidly transfer short term results of this research into health IT products;

Publish and otherwise disseminate these research findings, preferably in open source journals that maximize the accessibility of this knowledge to the entire

health IT community

Participate in an external evaluation; and

Select desired, measurable outcomes specific to the chosen research issue and methods for attaining results.

Research focus areas

In no particular order, the four foci for research identified below will be addressed by this program. The areas have been assigned numbers for ease of reference. Appendix B provides further detail about each of these areas.

1. Security of Health Information Technology This research area addresses the challenges of developing security and risk mitigation policies and the technologies necessary to build and preserve the public trust as health IT systems become ubiquitous.

This research area is responsive to paragraphs (1), (4), (5), and (6) of the PHSA 3011(a), as added by the Recovery Act, through the following activities:

Promoting the development and implementation of health information technology solutions that will support the electronic exchange and use of health information in a secure, private manner;

Promoting the development and implementation of technologies and best practices that enhance the protection of health information by all holders of individually identifiable health information;

Enhancing the capabilities and functionalities of tools to support privacy and security of individually identifiable health information as it is exchanged and used; and,

Supporting and enhancing the assurance of privacy needed providers and patients widespread acceptance of telemedicine and robust participation in clinical data repositories and registries.

2. Patient-Centered Cognitive Support This research area addresses the challenge of harnessing the power of health IT so that it integrates with, enhances and supports clinicians reasoning and decision making, rather than forcing them into a mode of thinking that is natural to machines but not to people.

PHSA 3011(a), as added by the Recovery Act, directs the support of health IT architecture that will support the use of health information in an accurate manner. Additionally, paragraphs (3) and (5) of the same subsection of the statute authorize use of funding appropriated under PHSA Section 3018, as added by the Recovery Act, to disseminate training and information on best practices to integrate health IT into a providers delivery of care, and to promote the use of clinical data repositories and registries. All of these paragraphs ((1), (3), and (5) of PHSA 3011(a) as added by the Recovery Act) point to longstanding challenges that require new and creative research related to the accurate and effective use of electronic health information to enhance the safety, quality, efficacy, and thus the overall value of care.

3. Healthcare Application and Network Platform Architectures This research area focuses on the development of architectures that are necessary to achieve electronic exchange and use of health information in a secure, private and accurate manner.

PHSA 3011(a)(1), as added by the Recovery Act, authorizes support of health IT architecture that will support the nationwide electronic exchange and use of health information in a secure, private, and accurate manner. This research focus specifically supports the development of new and improved architectures and technology infrastructure needed to achieve the goals outlined in the plan for health IT by the National Coordinator in support of PHSA 3001(c)(3), as added by the Recovery Act, and to support measures for determination of meaningful use of health IT by providers over time (required by Social Security Act (SSA) Sections 1848(o) and 1866(n), as added by Title IV in Division B of the Recovery Act).

4. Secondary Use of EHR Data This research area focuses on strategies to enhance the use of health IT in improving the overall quality of health care.

PHSA 3011(a), as added by the Recovery Act, states that the Secretary shall invest in the infrastructure necessary to allow for and promote the electronic exchange and use of health information for each individual in the United States consistent with the goals outlined in the strategic plan developed by the National Coordinator. PHSA 3001(c)(3), as added by the Recovery Act, directs

that the National Coordinator shall, in consultation with other appropriate Federal agencies (including the National Institute of Standards and Technology), update the Federal Health IT Strategic Plan (developed as of June 3, 2008) to include specific objectives, milestones, and metrics with respect to a specific set of topic areas. The current Federal Health IT Strategic Plan (developed as of June 3, 2008), as referenced in the statute, advances secondary use as a key mode of information technology use to transform health care. This is consistent with, and will be updated and expanded upon pursuant to the direction of PHSA 3001(c)(3)(i), (vii) and (vii), as added by the Recovery Act, to add to the updated strategic plan such objectives, milestones, and metrics with respect to:

(Reference: PHSA 3001(c)(3)(i)) the electronic exchange and use of health information and the enterprise integration of such information.

(Reference: PHSA 3001(c)(3)(vii)) strategies to enhance the use of health IT in improving the quality of health care, reducing medical errors, reducing health disparities improving public health, increasing prevention and coordination with community resources, and improving the continuity of care among health care settings.

(Reference: PHSA 3001(c)(3)(viii)) the specific plans for ensuring that populations with unique needs, such as children, are appropriately addressed in the technology design, as appropriate.

93.767 CHILDREN'S HEALTH INSURANCE PROGRAM

(CHIP; SCHIP)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Children's Health Insurance Program Reauthorization Act of 2009.

OBJECTIVES:

1. To provide funds to States to enable them to maintain and expand child health assistance to uninsured, low-income children, and at a state option, low-income pregnant women and legal immigrants, primarily by three methods: (1) obtain health insurance coverage that meets the requirements in Section 2103 relating to the amount, duration, and scope of benefits; (2) expand eligibility for children under the State's Medicaid program; or 3) a combination of the two.
2. To provide funds to Indian health programs operated by Indian Health Service, urban Indian organizations operating a health program under the IHCA (P.L. 94-437, as amended) and tribes or tribal organizations operating a health program under the ISDEAA (P.L. 93-638, as amended) to find eligible, not enrolled Indian children, ensure they are enrolled in Medicaid and CHIP programs and ensure they retain coverage as long as they remain eligible..

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

No State is eligible for payments for child health assistance for coverage provided prior to October 1, 1997. Standards used to determine eligibility may include those related to geographic areas to be served by the plan. Age, income and resources, residency, disability status (as long as the standard does not restrict eligibility), access to or coverage under other health coverage, and duration of eligibility are factors. Standards may not discriminate on the basis of diagnosis. Eligibility standards must not cover higher-income children without covering lower-income children, and must not deny eligibility based on a child having a preexisting medical condition. The State must ensure that only targeted low-income children are furnished child health assistance under the plan. Children found through screening to be eligible for Medicaid are to be enrolled in Medicaid. The insurance provided under the State plan does not substitute for coverage under group health plans. Coordination with other public and private programs providing creditable coverage for low-income children should occur. Child Health Assistance (other than Medicaid), must consist of any of the following: Benchmark coverage; benchmark equivalent coverage (which can be FEHBP-equivalent coverage); State employee coverage or coverage offered through the HMO with the largest insured commercial non-Medicaid enrollment in the State; existing comprehensive State-based coverage; or Secretary-approved coverage. A State child health plan must include a description of the amount (if any) of cost-sharing and must be in accordance with a public schedule. Cost-sharing may be varied in a way that

does not favor higher-income children over lower-income children. No cost-sharing is permitted for well-baby and well-child care, including age-appropriate immunizations. Cost-sharing for children at 150 percent of poverty must be consistent with Medicaid; Cost-sharing for children at 150 percent of poverty and above must be based on an income-related sliding scale.

The aggregate for all children in a family cannot exceed 5 percent of the family's income. The State child health plan may not impose pre-existing condition exclusions for covered benefits. States that provide for benefits through a group health plan or group health insurance coverage may permit pre-existing condition exclusions as allowed under the applicable Section of the Employee Retirement Income Security Act (ERISA) and the Health Insurance Portability and Accountability Act (HIPAA). Funds provided to a State under this Title may only be used to carry out the purposes of this Title. Health insurance coverage provided may include coverage of abortion only if necessary to save the life of the mother or if the pregnancy is the result of an act of rape or incest. States may spend up to 10 percent of their total CHIP expenditures (Federal and State) on non-benefit activities, including: outreach conducted to identify and enroll eligible children in CHIP; administration costs; health services initiatives; and other child health assistance. These expenditures are matched at the enhanced CHIP matching rate and counted against both the 10 percent limit and the allotment. Monetary amounts provided by the Federal government or services assisted or subsidized to any significant extent by the Federal government, may not be included in determining the amount of nonfederal contributions required for State matching purposes.

Indian health programs eligible under this title must use funds to provide outreach, enrollment and retention for targeted, low-income children who are Indian. The funds may not be used to provide direct benefits of the CHIP program or to supplant existing activities funded under federal programs.

Applicant Eligibility:

All States and Territories may apply.

Indian health programs operated by Indian Health Service, urban Indian organizations operating a health program under the IHCA (P.L. 94-437, as amended) and tribes or tribal organizations operating a health program under the ISDEAA (P.L. 93-638, as amended) may apply.

Beneficiary Eligibility:

Targeted low-income children will benefit. Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Section 2106 of the Law, specifies that a State plan is considered approved unless the Secretary notifies the State in writing, within 90 days after receipt of the plan, that the plan is disapproved (and the reasons for disapproval) or that specific additional information is needed. Informal clarification and discussion between the State and the DHHS review team is permitted and encouraged during the review period. This does not stop the "90-day clock." The 90-day review period may be stopped by formal written requests for additional information and clarification. The 90-day review period may be stopped as many times as necessary to obtain completed information necessary to disapprove or approve the plan. The 90-day period will resume when the finalized additional information is received by CMS.

Grants to Indian health programs will be 3 year grants from April 15, 2010 through April 14, 2013.

Appeals:

If a State wishes to appeal a disapproval, it may petition for a reconsideration of this decision within 60 days after the date of receipt of the disapproval letter, by submitting a written request for reconsideration to the project officer and the regional office. States also have the option to submit a new application following the disapproval, starting a new 90-day review clock.

Renewals:

An approved State child health plan shall continue in effect unless the State amends that plan or the Secretary finds substantial noncompliance of the plan in accordance with the requirements of Title XXI.

The Indian health program grants are one-time grants for a period of three (3) years.

Formula and Matching Requirements:

Statutory Formula:

Matching Requirements: Section 2105(b), Title XXI, provides for an "enhanced Federal Matching Assistance Percentage (FMAP)" for child health assistance provided under Title XXI that is equal to the current FMAP for the fiscal year in the Medicaid Title XIX program, increased by 30 percent of the

difference between 100 and the current FMAP for that fiscal year. The enhanced FMAP may not exceed 85 percent. CHIPRA implemented a limitation on matching rates for states that propose to cover children with effective family income that exceeds 300 percent of the poverty line to FMAP rather than EMAP, unless a waiver or State Plan Amendment or state law was in place to cover this population before the enactment of CHIPRA. The formula for determining the final allotment includes: determining the number of States with approved State Plans as the end of the fiscal year. In order for a State to receive a final allotment for a fiscal year, CMS must approve the CHIP State Plan for that State by the end of the fiscal year. Only States with approved State Plans by the end of the fiscal year will be included in the final allotment calculation. The Childrens Health Insurance Program Reauthorization Act of 2009 (CHIPRA) was enacted on February 4, 2009 and provided appropriations through FY 2013.

The States' FY 2009 final allotments are calculated as 110 percent of the highest of the following three amounts:

- Total Federal payments under title XXI to the State for FY 2008, multiplied by an allotment increase factor for FY 2009;
- FY 2008 CHIP allotment multiplied by the allotment increase factor for FY 2009; or
- The projected Federal payments under title XXI for FY& 2009 as determined on the basis of the February 2009 estimates submitted and certified by the States no later than March 31, 2009.

The State FY 2010 allotment will be calculated as the sum of the following four amounts, multiplied by the applicable growth factor for the year.

- the FY 2009 CHIP allotments;
- FY 2006 unspent allotments redistributed to and spent by shortfall states in FY 2009;
- spending of funds provided to shortfall sates in the first half of FY2009; and
- spending of Contingency Fund payments in FY2009, although there may be none.

For FY 2011 and FY 2013 the allotments will be rebased , on prior year spending. This will be done by multiplying the states growth factor for the year by the new base, which will be the prior years federal CHIP spending. For FY 2012, the allotment for a state will be calculated as the FY 2011 allotment and any FY 2011 contingency fund spending, multiplied by the states growth factor for the year. The amount of the state allotment for previous fiscal year and the amount of any payments made to the State under subsection (k), (l), or (n) for the previous fiscal year multiplied by the allotment increase factor for the current year.

This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

Enrolled children receive medical services as necessary. Federal funds are obligated to the States by issuing Title XXI grant awards. To ensure that all of the appropriated funds are available to States, CMS will issue grant awards to all States with Title XXI State plans approved by the end of the fiscal year equaling the national amount available for allotment to the 50 States, the District of Columbia, and the Commonwealths and Territories for that fiscal year. Grant awards must be issued by the time the CMS/HHS accounting system closes with respect to that fiscal year. Method of awarding/releasing assistance: lump sum.

Reports:

No program reports are required. No cash reports are required. Section 2108 of the Law specifies that States must develop annual reports assessing the operation of their State Plan for each fiscal year, including the progress made in reducing the number of uncovered low-income children and report to the Secretary by January 1, of the following year the results of the assessment. By March 31, 2000, each State with a child health plan must submit to the Secretary an evaluation that includes an assessment of the effectiveness of the State Plan in increasing the number of children with creditable health coverage, in increasing the availability of affordable quality individual and family health insurance for children, and in coordinating recommendations for improving the program under this Title. By December 31, 2001, the Secretary must submit to

Congress and make available to the public, a report based on the evaluations submitted by the States recommendations and conclusions. No expenditure reports are required. No performance monitoring is required.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. A State child health plan under Title XXI must include an assurance that the State will afford the Secretary access to any records or information relating to the plan for the purposes of review or audit.

Records:

A State child health plan must include an assurance that the State will collect the data, maintain the records, and furnish the report to the Secretary at the times and in standardized format (as the Secretary requires), in order to enable the Secretary to monitor State program administration and compliance and to evaluate and compare the effectiveness of State Plans under this Title.

93.768 MEDICAID INFRASTRUCTURE GRANTS TO SUPPORT THE COMPETITIVE EMPLOYMENT OF PEOPLE WITH DISABILITIES

(Ticket To Work Infrastructure Grants)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Ticket to Work and Work Incentives Improvement Act of 1999, Section 203, Public Law 106-170.

OBJECTIVES:

To support State efforts to enhance employment options for people with disabilities by building Medicaid infrastructure. Funding may be used to develop a Medicaid buy-in, increase availability of Personal Assistance Services, or for State-to-State technical assistance. In addition, States may use funding to develop a comprehensive approach to bridge Medicaid services with other key supports and programs used by employed people with disabilities.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

While the proposals submitted by the States may vary, States participating in this grant program will use the funds to remove the barriers to employment of persons with disabilities, by creating health systems change through the Medicaid program. The development or enhancement of certain core Medicaid components in each State would enable people with disabilities not only to work, but to sustain adequate health coverage if they find they need to relocate to another State for employment purposes. An adequate personal assistance services benefit and a Medicaid buy-in for employed people with disabilities are significant components of the Ticket to Work and Work Incentives Improvement Act. The infrastructure grants program provides money to the States to develop these core elements. In addition, States may use funding to develop a comprehensive approach to bridge Medicaid services with other key supports and programs used by employed people with disabilities. Funds may not be used for the direct provision of services to people with disabilities except on a one-time, last resort, emergency basis for the purpose of sustaining the individual's competitive employment.

Applicant Eligibility:

Either of the following may apply: (a) the single state medicaid agency; or (b) any other agency or instrumentality of a state(as determined under State law) in partnership, agreement and active participation with the single state medicaid agency, the State Legislature, or the office of the Governor.

Beneficiary Eligibility:

There are two groups of potentially eligible beneficiaries, as defined by the Ticket to Work and Work Incentives Improvement Act of 1999. The first group consists of persons with disabilities between the ages of 16 and 65 years old, employed, and who meet income, asset, and resource standards established by the State. The second group of potential beneficiaries consists of persons between the ages of 16 and 65 years old, employed, and who cease to be eligible for Medical Assistance because of medical improvements determined at the time of a regularly scheduled disability review, but who also continue to have a severe medically determinable impairment.

Credentials/Documentation:

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: Through FY 2007, a total of 50 entities (49 States and the District of Columbia) have been approved for funding from the Infrastructure Grant Program section 203 since its inception. There are 33 States with Medicaid buy-ins and one additional State has a plan amendment under review. As of September 30, 2006, there were just over 78,402 workers receiving Medicaid benefits under the buy-in options. A total of 26 States and the District of Columbia have applied for and will receive continuation grant awards in FY 2007. Nine States received new competitive grant awards in FY 2006. In addition, five States, South Carolina, Missouri, Iowa, Indiana and Arkansas will continue to carry out employment goals for the working disabled population by spending previous grant awards in FY 2007 through a no-cost extension of funding. Of the \$42.8 million (FY 2007) that has been appropriated for the upcoming grant year, \$34.7 million was granted to the States. The reason for the large discrepancy in the FY 2007 appropriation, and the funding amount is that States are enrolling fewer participants in Medicaid buy-in programs than Congress originally anticipated. Higher levels of funding are legislatively related to the yearly amount of Medicaid buy-in service costs expended by a State. (Medicare Part A)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

American Recovery and Reinvestment Act of 2009, Public Law 111-5.

OBJECTIVES:

To provide hospital insurance protection for covered services to persons age 65 or above, to certain disabled persons and to individuals with chronic renal disease.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE

USES AND USE RESTRICTIONS:

Hospital insurance benefits are paid to participating and emergency hospitals, skilled nursing facilities, home health agencies, and hospice agencies to cover the prospective payment amount or reasonable cost of medically necessary services furnished to individuals entitled under this program.

Applicant Eligibility:

Persons age 65 or over and certain disabled persons are eligible for hospital insurance protection. Nearly everyone who reached 65 before 1968 is eligible for hospital insurance, including people not eligible for cash Social Security benefits. A person reaching age 65 in 1968 or after, who is not eligible for cash benefits, needs some work credit to qualify for hospital insurance benefits. The amount of work credit needed depends on age. Hospital insurance (Medicare Part A) is also available to persons, age 65 or over, not otherwise eligible through payment of a monthly premium which is currently \$393. A reduced Part A premium of \$216 per month in 2006 is available to persons with 30 or more quarters paid into the social security system, as well as to their spouse, surviving spouse or divorced spouse. The reduction in Part A premium payments would also apply to the surviving spouse, or divorced spouse of an individual who had at least 30 quarters of coverage under the social security system. Federal employees began contributing toward Medicare hospital insurance coverage beginning January 1983. Employees who worked prior to 1983 and who were employed during January 1983 can receive credit toward establishing Medicare eligibility, if necessary, for prior non-contributory quarters of Federal employment. State and local government employees not already in Social Security-covered positions and hired on or after April 1, 1986 also contribute toward Medicare hospital insurance coverage. Although States may request agreements to cover individuals employed prior to April 1, 1986, no credit is given toward establishing Medicare entitlement for prior employment. Persons under age 65, who have been entitled for at least 24 months to Social Security disability benefits, or for 29 consecutive months to railroad retirement benefits based on disability, are eligible for hospital insurance benefits.

These grants are awarded are in the form of research grants and cooperative agreements; Hispanic health services grants; historically black colleges and university grants. For fiscal years 2008 and 2009, the Centers for Medicare & Medicaid Services (CMS) has identified a number of areas where specific information or experience is necessary to improve program effectiveness or guide decisions anticipated in the near future. These priority areas for CMS' discretionary contracts, cooperative agreements and grants include: (1) protecting and empowering specific populations; (2) pay for performance for multiple provider settings; (3) understanding health differences and disparities--closing the gaps; (4) preventing disease, illness, and injury; (5) agency-specific priorities.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Under all authorizations, all applications must meet standards of excellence in research or evaluation design. Funds may not be used for construction or renovation of buildings. Funds authorized by Section 1115 of the Social Security Act are limited to State agencies administering the Medicaid program.

The research issues and/or hypotheses identified by a project should be clearly stated and realistic and should reflect the issues of interest to CMS and, where appropriate, HHS, Federal Government, and the broader health services research community.

The research design should clearly identify the measures that will be collected and analyzed to address the issues and/or hypotheses. These proposed measures should reflect concepts and variables that are consistent with the stated issues and hypotheses.

The research design should also address the reliability of measures i.e., a measurement should not change when the concept being measured remains constant in value. A common reliability concern is the level of inter-rater reliability of an instrument, determined by the extent to which two or more persons measuring the same characteristic would assign the same score.

The research design should address the validity of proposed measures i.e., the extent to which differences in scores on variable or the measuring instrument represent true differences in the characteristic we are trying to measure, rather than constant or random errors or the influence of other factors.

For the Small Business Innovation Research Grant Program, only for-profit organizations may apply. Awards cannot be made directly to individuals.

93.789 ALTERNATIVES TO PSYCHIATRIC RESIDENTIAL TREATMENT FACILITIES FOR CHILDREN

(Demonstration Projects Regarding Home and Community-Based Alternatives to Psychiatric Residential Treatment Facilities for Children)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Section 6063, Deficit Reduction Act of 2005, Public Law 109-171.

OBJECTIVES:

Over the last decade, Psychiatric Residential Treatment Facilities (PRTFs) have become the primary provider for youth with serious emotional disturbances requiring an institutional level of care. However, since they are not recognized as hospitals, nursing facilities or intermediate care facilities for the mentally retarded, many States have been unable to use the 1915(c) waiver authority to provide home and community-based alternatives to care, which would keep the youth in their homes and with their families. Section 6063 of the Deficit Reduction Act of 2005 addresses this issue by providing up to \$218 million to up to 10 States to develop demonstration programs that provide home and community-based services to youth as alternatives to PRTFs. CMS anticipates awarding each successful applicant between \$5 and \$60 million. The PRTF Demonstration is authorized for up to 5 years. Payments may not be made to States after fiscal year 2011. CMS will review and approve each State's Implementation Plan prior to allowing States to access funds for Federal reimbursement of services under this grant. Section 6063 also provides \$1 million for a National Demonstration Evaluation.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Budget Neutrality: In conducting these demonstration projects, The Secretary of Health and Human Services shall ensure that the aggregate payments made by the Secretary under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) do not exceed the amount which the Secretary estimates would have been paid under the title, if the demonstration projects under Section 6063 had not been implemented. Any funding allocated for the Federal match for home and community-based services provided under the demonstration for the first year of this grant that remain unspent will be carried over to the next year of the Grant. **Indirect Costs:** The provisions of the OMB Circular A-87 govern reimbursement of indirect costs under this solicitation. A copy of OMB Circular A-87 is available online at: <http://www.whitehouse.gov/omb/circulars/a087/a087.html>.

Applicant Eligibility:

Any single State Medicaid Agency, State Mental Health Agency, or instrumentality of the State may apply for this Demonstration Grant. Only one application can be submitted for a given State. By "State" we refer to the definition provided under 45 CFR 74.2 as "any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of local governments." By "territory or possession" we mean Guam, the U.S. Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Beneficiary Eligibility:

The level of care for Medicaid eligible individuals for this demonstration at a minimum must be under the age of 21 and require the need for a PRTF as defined in the State's Medicaid State Plan. For the purposes of this demonstration, youth are defined as "any child, adolescent or young adult under the age of 21". States shall ensure that each participant under the demonstration meets this level of care criterion to participate in the demonstration. Further, States may elect to add additional criteria to carve out or target a specific sub-population to receive home and community-based services under this demonstration. As a part of the application process, States shall submit a copy of the level of care assessment used to assess eligibility for participation in this demonstration. PRTFs are defined as any non-hospital facility with a provider agreement with a State Medicaid Agency to provide the inpatient services benefit to Medicaid-eligible individuals under the age of 21 (CFR 42 441.150 - 441.182). The facility must be accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) or any other accrediting organization with comparable standards recognized by the State. Additionally PRTFs must comply with Conditions of Participation on the use of restraint and seclusion (CFR 483.350 - 483.376).

Credentials/Documentation:

Each application for this Demonstration Grant must include a letter of endorsement from the Director of the Mental Health Authority and the State Medicaid Director, if the applicant is not the single State Medicaid Agency/State Agency. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Applicants must submit their applications electronically through <http://www.grants.gov>. Please note when submitting your application electronically, you are required, additionally, to mail a signed SF 424 to Nicole Nicholson, Centers for Medicare & Medicaid Services, Office of Operations Management, Acquisition and Grants Group, C2-21-15 Central Building, 7500 Security Boulevard, Baltimore, MD 21244-1850. The mailed SF 424 form may be received at the Centers for Medicare & Medicaid Services within 2 business days of the application closing date.

Award Procedure:

How the Merit of Applications Will Be Determined: CMS will employ a multiphase review process to determine the applications that will be reviewed and the merit of the applications that are reviewed. The multiphase review process includes the following: "Applications will be screened by Federal staff to determine eligibility for further review using the criteria detailed in the "Eligibility Information" section of the solicitation. Applications that are received late or fail to meet the eligibility requirements as detailed in the "Applicant Eligibility" section of this solicitation will not be reviewed." Applications will be objectively reviewed by a panel of experts, the exact number and composition of which will be determined by CMS at its discretion, but may include private sector subject matter experts, beneficiaries of Medicaid supports, and Federal and Applicant policy staff. The review panels will utilize the objective criteria described in the "Application Review Criteria Information" section of the solicitation to establish an overall numeric score for each application. The results of the objective review of applications will be used to advise the approving CMS official. Additionally, CMS staff will make final recommendations to the approving official after ranking applications using the scores and comments from the review panel and weighing other factors as described below. **Factors Other than Merit that May be Used in Selecting Applications for Award:** CMS may assure reasonable balance among the grants to be awarded in terms of key factors such as geographic distribution and broad target group representation. CMS may redistribute grant funds (as detailed in the "Award Information" section of the solicitation) based upon the number and quality of applications received. (e.g., to adjust the minimum or maximum awards permitted or adjust the aggregate amount of Federal funds allotted to a particular category of grants).

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Successful applicants will receive a Financial Assistance Award (FAA) signed and dated by the CMS Grants Management Officer. The FAA is the document authorizing the grant award and will be sent through the U.S. Postal Service to the applicant organization as listed on its SF 424. Any communication between CMS and applicants prior to issuance of the FAA is not an authorization to begin performance of a project.

Appeals:

Appeals are governed by Title 45--Public Welfare. SUBTITLE A--DEPARTMENT OF HEALTH AND HUMAN SERVICES PART 16--PROCEDURES OF THE DEPARTMENTAL GRANT APPEALS BOARD.

Renewals:

Any funding allocated for the Federal match for home and community-based services provided under the demonstration for the first year of this grant that remain unspent will be carried over to the next year of the Grant. The Secretary may grant a waiver of this provision of the Act in order to permit a State to limit the operation of a waiver to specified geographic areas of the State; and 1902(a) (10) (C) (i) (III) (Income and Resources for the Medically Needy). A State may

request a waiver of this provision in order to apply institutional income and resources rules for the medically needy to persons in the community who otherwise qualify for waiver services. Additionally, States program design under this demonstration shall comply with existing Medicaid statutory and regulatory requirements governing the administration and operation of a section 1915 (c) waiver program, especially the six statutory assurances that are located in 42 CFR 441.302. 93.791 MONEY FOLLOWS THE PERSON REBALANCING DEMONSTRATION

(Money Follows the Person Demonstration)

FEDERAL AGENCY:

Centers for Medicare and Medicaid Services, Department of Health and Human Services

AUTHORIZATION:

Section 6071, Public Law Deficit Reduction Act of 2005, Public Law 109-171.

OBJECTIVES:

For more than a decade, States have been asking for the tools to modernize their Medicaid programs. With the enactment of the Deficit Reduction Act (DRA) of 2005, States now have new options to rebalance their long-term support programs to allow their Medicaid programs to be more sustainable while helping individuals achieve independence. The Money Follows the Person (MFP) Rebalancing Demonstration (MFP Demo), created by section 6071 of the Deficit Reduction Act of 2005 (P.L. 109-171), supports State efforts to "rebalance" their long-term support systems by offering \$1.75 billion over 5 years in competitive grants to States. Specifically, the demonstration will support State efforts to: "Rebalance their long-term support system so that individuals have a choice of where they live and receive services." Transition individuals from institutions who want to live in the community. Promote a strategic approach to implement a system that provides person centered services and a quality management strategy that ensures the provision of, and improvement of such services in both home and community-based settings and institutions. The demonstration provides for enhanced federal medical assistance percentage (FMAP) for 12 months for qualified home and community-based services for each person transitioned from an institution to the community during the demonstration period. Eligibility for transition is dependent upon residence in a qualified institution. The State may establish the minimum timeframe for residence between 6 months and two years as required by Section 6071(b)(2)(A) of the DRA. The State must continue to provide community-based services after the 12 month period for as long as the person needs community services and is Medicaid eligible. Demonstration grants will be awarded to States from January 1, 2007 through September 30, 2011. CMS will accept one proposal from each State interested in participating in the demonstration program. The State Medicaid Agency must be the lead applicant. States must propose a demonstration period of no less than two consecutive fiscal years but no greater than five years. The State will indicate in its application the targeted group(s) and number of individuals it intends to transition. In making awards, CMS will give preference to States if they include multiple target groups including older individuals, and if they propose to deliver self-directed services. The number of demonstration projects approved by CMS depends largely on the scope (i.e., proposed enrollment and breadth of services) and quality of the proposed projects. Under the demonstration project, the State must propose a system of Medicaid home and community-based care that will be sustained after the demonstration period and is deemed qualified by the Secretary. Specifically, the program must be conducted in conjunction with a "qualified HCBS program" which is a program that is in operation (or approved) in the State for such individuals in a manner that assures continuity of Medicaid coverage of services in the qualified HCBS program for eligible individuals. States may also propose to enhance the services they will provide

during the demonstration period to achieve greater success with transition. States will be required to participate in a national qualitative and quantitative evaluation conducted by CMS. Data collected on a national level will help evaluate the core objectives of the statute that are listed below.

The assistance consideration for the increased FMAP will be provided from Money Follows the Person grant demonstration funding and not through funding from the Recovery Act of 2009. The enhanced FMAP provided by the DRA of 2005 (Enhanced Rate up to 50% of the State Match capped at 90%) will be applied to the increased FMAP that results from the formula available to States under the Recovery Act. 93.824 BASIC/CORE AREA HEALTH EDUCATION CENTERS (AHEC)

FEDERAL AGENCY:

Health Resources and Services Administration, Department of Health and Human Services

AUTHORIZATION:

Public Health Service Act, Title VII, Section 751(a)(1), as amended; Health Professions Education Partnerships Act of 1998, Public Law 105-392.

OBJECTIVES:

The Basic/Core Area Health Education Centers (BAHEC) Program and Model State Supported Area Health Education Centers (MAHEC) Program goals are to assist schools to improve the distribution, diversity, supply, and quality of health personnel in the health services delivery system, and to attract and retain health personnel in underserved areas. The AHEC Program awardees link the academic resources of medical schools and participating health professions schools with local educational and clinical sites, and thereby establish a network of community-based training sites to provide educational services to health professions students, faculty-preceptors and health care providers in

underserved areas, and ultimately, to improve the delivery of health care in an underserved region or in an entire state. Emphasis is placed on community-based training of health professions students, primary care-oriented medical residents, local providers, and also 9-12 grade students. The BAHEC program assists schools in the initial planning, development and implementation of community-based Area Health Education Centers (AHECs) which assist schools and organize the training of at least three health professions disciplines at training-service delivery sites in rural and underserved areas, of a region or an entire state. Schools which complete Basic AHEC Program development, then compete for Model AHEC Program awards in partnership with affiliated (contracted) AHEC Centers to maintain and enhance/expand training programs and training sites responsive to local, State and Federal needs and priorities. The BAHEC and MAHEC programs embrace the goal of increasing the number of health professions graduates who ultimately practice in underserved areas. Both AHEC programs carry out health careers recruitment and enhancement activities to attract high school students from underserved areas into health careers.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants may support salaries, equipment, supplies, travel, and patient hospitalization as required to perform the research effort. Restrictions or limitations are imposed against the use of funds for entertainment, foreign travel, general-purpose equipment, alterations and renovations, and other items not regularly required for the performance of research. Individual Predoctoral and Postdoctoral National Research Service Awards (NRSAs) are made directly to individuals for research training in specified biomedical shortage areas. Institutional NRSA awards may be made to eligible institutions to enable them to appoint individuals selected by the institution. Certain service and payback provisions may apply to postdoctoral individuals upon termination of the award or termination of the appointment. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of research initiated in Phase I that is likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. Some Phase II awardees may be eligible to apply for funds to continue research for up to three years beyond the original Phase II award. Eligible projects involve assessment and improvement of drugs or devices or propose to conduct preclinical studies of drugs or devices that ultimately require: 1) clinical evaluation and/or 2) approval of a Federal regulatory agency. The product being developed must be one for which Federal regulatory approval (e.g., FDA) is a required step toward commercialization. Prospective applicants are strongly encouraged to contact NIH staff to determine eligibility. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of Phase II application.

Applicant Eligibility:

To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. Any nonprofit organization engaged in biomedical research and institutions or companies organized for profit may apply for almost any kind of grant. Only domestic, non-profit, private or public institutions may apply for NRSA Institutional Research Training Grants. An individual may apply for an NRSA or, in some cases, for a research grant if adequate facilities to perform the research are available. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is being proposed, and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. or its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500

employees) that formally collaborate with a university or other non-profit research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions.

Award Procedure:

All accepted applications are evaluated by an appropriate initial review group (study section). All grant applications receive a final secondary review by the National Heart, Lung, and Blood Advisory Council. Staff inform applicants of the results of the review. If support is contemplated, staff initiate preparation of awards for grants. All accepted SBIR/STTR applications are evaluated for scientific and technical merit by an appropriate scientific peer review panel and by a national advisory council or board. All applications receiving a priority

score compete for available SBIR/STTR set-aside funds on the basis of scientific and technical merit and commercial potential of the proposed research, program relevance, and program balance among the areas of research.

Final reports are required within 120 days of termination. Reports are required after termination of NRSAs to ascertain compliance with the service and payback provisions. No performance monitoring is required.

Audits:

This program is excluded from coverage under OMB Circular No. A-133. In accordance with OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend \$500,000 or more in a year in Federal awards shall have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).

In accordance with 45 Code of Federal Regulations, Part 74.26, for-profit (commercial) organizations are subject to audit requirements for a non-Federal audit if, during its fiscal year, it expended \$500,000 or more under HHS awards and at least one award is a HHS grant or subgrant. The regulation incorporates the thresholds and deadlines of OMB Circular No. A-133, but provides for profit organizations with two options for the type of audit that will satisfy the audit requirement:

1. a financial related audit of the HHS awards in accordance with Government Auditing Standards, or
2. an audit that meets the requirements of OMB Circular No. A-133.

In accordance with NIH grants policy, Foreign grantees are subject to the same audit requirements as for-profit (commercial) organizations.

Records:

Grantees generally must retain financial and programmatic records, supporting documents, statistical records, and all other records that are required by the terms of a grant, or may reasonably be considered pertinent to a grant, for a period of 3 years from the date the annual FSR is submitted. For awards under SNAP (other than those to foreign organizations and Federal institutions), the 3-year retention period will be calculated from the date the FSR for the entire competitive segment is submitted. Those grantees must retain the records pertinent to the entire competitive segment for 3 years from the date the FSR is submitted to NIH. Foreign organizations and Federal institutions must retain records for 3 years from the date of submission of the annual FSR to NIH. See 45 CFR 74.53 and 92.42 for exceptions and qualifications to the 3-year retention requirement (e.g., if any litigation, claim, financial management review, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken). Those sections also specify the retention period for other types of grant-related records, including F&A cost proposals and property records. See 45 CFR 74.48 and 92.36 for record retention and access requirements for contracts under grants. In accordance with 45 Code of Federal Regulations, Part 74.53(e), the HHS Inspector General, the U.S. Comptroller General, or any of their duly authorized representatives have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to awards in order to make audits, examinations, excerpts, transcripts, and copies of such documents. This right also includes timely and reasonable access to a recipients personnel for the purpose of interview and discussion related to such documents. The rights of access are not limited to the required retention period, but shall last as long as records are retained.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants may support salaries, equipment, supplies, travel, and patient hospitalization as required to perform the research effort. Restrictions or limitations are imposed against the use of funds for entertainment, foreign travel, general-purpose equipment, alterations and renovations, and other items not regularly required for the performance of research. National Research Service Awards (NRSAs) are made directly to individuals for research training in specified biomedical shortage areas. Grants may be made to institutions to enable them to make NRSAs to individuals selected by them. Certain service and payback provisions apply to individuals upon termination of the award. SBIR Phase I grants (of approximately 6-months' duration) are to establish the technical merit and feasibility of a proposed research effort that may lead to a commercial product or process. Phase II grants are for the continuation of the research initiated in Phase I and which are likely to result in commercial products or processes. Only Phase I awardees are eligible to apply for Phase II support. STTR Phase I grants (normally of 1-year duration) are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential on Phase II application.

Applicant Eligibility:

Any nonprofit organization engaged in biomedical research, as well as institutions or companies organized for profit, may apply for grants with the exception of NRSAs. An individual may apply for a NRSA or, in some cases, may qualify for a research grant if adequate facilities in which to perform the research are available. SBIR grants can be awarded only to domestic small businesses (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees). Primary employment (more than one-half time) of the principal investigator must be with the small business at the time of award and during the conduct of the proposed project. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council. STTR grants can be awarded only to domestic small business concerns (entities that are independently owned and operated for profit, are not dominant in the field in which research is proposed and have no more than 500 employees) which "partner" with a research institution in cooperative research and development. At least 40 percent of the project is to be performed by the small business concern and at least 30 percent by the research institution. In both Phase I and Phase II, the research must be performed in the U.S. and its possessions. To be eligible for funding, a grant application must be approved for scientific merit and program relevance by a scientific review group and a national advisory council.

Beneficiary Eligibility:

Any nonprofit or for-profit organization, company or institution engaged in biomedical research. Only domestic for-profit small business firms may apply for SBIR and STTR programs.

Credentials/Documentation:

Applicants for individual National Research Service Awards must be citizens of the United States or have been admitted for permanent residency; must hold a doctoral degree (M.D., Ph.D., D.D.S., D.O., D.V.M., Sc.D., D. Eng., or equivalent domestic or foreign degree); and must designate a desire for training in one of the health or health-related areas specified by the National Institutes of Health. Each applicant must be sponsored by an accredited public or private nonprofit institution engaged in such training. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. For-profit organizations' costs are determined in accordance with Subpart 31.2 of the Federal Acquisition Regulations. For other grantees, costs will be determined in accordance with HHS regulations 45 CFR, Part 74, Subpart Q. For SBIR and STTR grants, applicant organization (small business concern) must present in a research plan an idea that has potential for commercialization and furnish evidence that scientific competence, experimental methods,

facilities, equipment, and funds requested are appropriate to carry out the plan. Grant forms PHS 6246-1 and PHS 6246-2 are used to apply for SBIR Phase I and Phase II, respectively. Grant forms PHS 6246-3 and PHS 6246-4 are used to apply for STTR Phase I and Phase II, respectively. OMB Circular No. A-87 applies to this program.
