TYPES OF ASSISTANCE:

DIRECT PAYMENTS WITH UNRESTRICTED USE; FORMULA GRANTS

USES AND USE RESTRICTIONS:

The states have the direct responsibility for establishing and operating their own unemployment insurance programs, while the Federal Government finances the cost of administration. State unemployment insurance tax collections are used solely for the payment of benefits. Federal unemployment insurance tax collections are used to finance expenses deemed necessary for proper and efficient administration of the state unemployment insurance laws; to reimburse state funds for one-half the costs of extended benefits paid under the provisions of state laws which conform to the provisions of the Social Security Act and the Federal Unemployment Tax Act; and to make repayable advances to states when needed to pay benefit costs. Funds used for benefit payments may not be used for any program administration costs nor for training, job search, and job relocation payments. Disaster Unemployment Assistance (DUA) is paid out of funds provided by the Federal Emergency Management Agency (FEMA). Benefits for former Federal civilian employees, including postal workers, and former members of the Armed Forces are paid out of the Federal Employees Compensation Account (FECA) in the Unemployment Trust Fund, subject to reimbursement by the former employing agency.

Applicant Eligibility:

State workforce agencies, including those in the District of Columbia, Puerto Rico and the Virgin Islands.

Beneficiary Eligibility:

All workers whose wages are subject to State unemployment insurance laws, Federal civilian employees, ex-service members, trade readjustment allowance for workers who become unemployed or underemployed because of the adverse effect of increased imports or because of shifts in production outside the U.S., and workers whose unemployment is caused by a Presidentially declared disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, are eligible if they are involuntarily unemployed, able to work, available for work, meet the eligibility and qualifying requirements of the state law, and are free from disqualifications. Individual State information on eligibility requirements is available from local One-Stop Career Centers. The American Recovery and Reinvestment Act (ARRA) provides for a temporary \$25 increase in weekly benefit amounts. The temporary emergency unemployment compensation program was also extended in ARRA.

Credentials/Documentation:

Awards of grants to states are conditioned on the Secretary of Labor's determination that the states' unemployment compensation laws are in conformity with the Social Security Act and the Federal Unemployment Tax Act and that State practices substantially comply with these laws. RELATED PROGRAMS:

17.258 WIA Adult Program; 17.260 WIA Dislocated Workers

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: The Employment and Training Administration makes grant awards available to 50 states, the District of Columbia, Puerto Rico, the Northern Mariana Islands, American Samoa, Guam, and Virgin Islands, along with 18 national non-profit organizations. A variety of organizational arrangements are used to administer the SCSEP projects. Many of the grantees have contractual relationships and agreements with local government and non-profit organizations. In many cases the SCSEP program is operated by the state aging agency and within sub-state areas by area agencies on aging. Some of the national grantee organizations administer the SCSEP local projects directly through their affiliates, while others sub-grant funds to local agencies. Most of the projects operated under the auspices of the SCSEP provide service through host agencies to the community at large or to the elderly community.

Some of the activities have included transportation for the elderly, serving the community as librarians, teachers' aides, nutritional aides, etc. The dual purpose of the program is to foster individual economic self sufficiency and promote useful opportunities in community service activities. Fiscal Year 2009: See above. Fiscal Year 2010: See above.

CRITERIA FOR SELECTING PROPOSALS:

The Department annually renews grant agreements. The Department may have an open competition from time to time to select national grantees. National grants were competed in 2003 and 2006. The next competition opportunity, as specified in the authorizing legislation, will be no sooner than 2011. When such a competition occurs, a notice will be published in the Federal Register.

17.245 TRADE ADJUSTMENT ASSISTANCE

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Trade Act of 1974, as amended, Title II, Public Law 93-618, 88 Stat. 1979, 19 U.S.C 2271-2322, as amended by Trade and Globalization Adjustment Assistance Act of 2009 (Division B, Title I of the American Recovery and Reinvestment Act of 2009), Public Law 111-5, as amended by Deficit Reduction Act of 1984, as amended, Public Law 98-369, as amended by Foreign Assistance and Related Programs Appropriations Act, 1986., Public Law 99-190, as amended by Third Continuing Resolution for Fiscal Year 1986 Funds, as amended, as amended by Miscellaneous Revenue Act of 1983, as amended, Public Law 97-362, as amended by North American Free Trade Agreement Implementation Act, Title V, Public Law 103-182, as amended by Omnibus Budget Reconciliation Act of 1981, as amended, Title XXV, Public Law 97-35, as amended by Omnibus Trade and Competitiveness Act of 1988, Title I, Public Law 100-418, as amended by Consolidated Appropriations Act of 2000, Public Law 106-113, as amended by Trade Act of 2002, Title I-II, Public Law 107-210, as amended by Amendment to the International Coffee Agreement Act of 1980, as amended, Public Law 98-120, as amended by Consolidated Omnibus Budget Reconciliation Act of 1985, Title XIII, Public Law 99-272.

OBJECTIVES:

To provide adjustment assistance to qualified workers adversely affected by foreign trade which will assist them to obtain suitable employment.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

State Workforce Agencies (SWAs) serve as agents of the United States for administering the worker adjustment assistance benefit provisions of the Trade Act. SWAs, through the local offices, provide testing, counseling, and job placement services; job search and relocation assistance; training; and payment of weekly trade readjustment allowances (TRA). State unemployment compensation and extended benefits must generally be exhausted before TRA is paid to eligible claimants. Trade impacted workers are eligible to receive job search and relocation allowances in addition to the costs of training. They may be paid subsistence and transportation allowances to attend approved training outside the normal commuting distance of a worker's regular place of residence.

Applicant Eligibility:

A petition for Trade Adjustment Assistance (TAA) may be filed by a group of adversely affected workers and be signed by at least three workers; alternatively, a petition may be filed by a company official, one-stop operators or one-stop partners, including State employment security agencies or the State dislocated worker unit, union representative, or other authorized representatives, requiring only one signature. After receiving a TAA petition, Division of Trade Adjustment Assistance (DTAA) investigators will establish if the workers' company produces a product and that a required minimum of the workforce has been laid off in the 12 months preceding the date of the petition or is threatened with layoffs (3 workers in groups of fewer than 50, 5 percent of the workforce in groups of 50 or more, or at least 50 workers in groups of 1000 or more). Additionally, DTAA will analyze facts contributing to the workers' layoffs or work reductions in order to determine one of the following sets of conditions have been met: (1) Increased imports contributed importantly to an

actual decline in sales or production and to a layoff or threat of a layoff; or (2) There has been a shift in production to certain countries which contributed to a layoff or threat of a layoff; or (3) there has been a shift in production outside of the United States and there has been or is likely to be an increase in the import of like or similar articles; or (4) loss of business as a supplier of component parts, a final assembler, or a finisher where workers were TAA certified and contributed importantly to an actual decline in sales or production, and to a layoff or threat of a layoff. In accordance with the requirement of Section 246 of the Trade Adjustment Assistance Reform Act of 2002, the Secretary implemented on August 6, 2003, the Alternative Trade Adjustment Assistance (ATAA) for Older Workers. A request for ATAA consideration is part of the TAA petition and is filed at the same time the TAA petition is filed. In order for the Department to certify a worker group eligible to apply for the ATAA, the petitioning worker group must be determined eligible to apply for TAA. The criteria that the Department must consider for ATAA certification are: (1) a significant number of workers in the firm must be 50 years of age or older, (2) whether the workers possess skills that are easily transferable in the local area, and (3) the competitive conditions within the workers' industry.

Beneficiary Eligibility:

A TAA beneficiary must: (1) be found by the Labor Department to have been adversely affected by increased imports or a shift in production to certain countries, (2) be certified by the Secretary of Labor as eligible to apply for adjustment assistance, and (3) meet the following individual requirements: (a) his or her unemployment or underemployment must have begun on or after the impact date specified in the Secretary's certification as the beginning of the import-impacted unemployment or underemployment; (b) his or her unemployment must begin before the expiration of the two-year period beginning on the date on which the Secretary issued the certification for his or her group or before the termination date, if any, specified in the certification. In addition, to be eligible for weekly trade readjustment allowance (TRA) payments he or she must: (1) have been employed with wages at a minimum of \$30 per week by the import-affected firm for at least 26 of the previous 52 weeks including the week of total layoff (up to seven weeks of employer-authorized leave may be counted as qualifying weeks of employment or up to 26 weeks of disability compensation); and (2) be enrolled in or have completed a TAA approved job training program, unless the determination is made that training is either not feasible or not appropriate, in which case a waiver of the training requirement may be issued. To receive TRA, the claimant must be enrolled in an approved training program within eight weeks of the Secretary's issuance of the certification or within 16 weeks of the worker's most recent qualifying separation, whichever is later.

Credentials/Documentation:

No Credentials or documentation are required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. To apply for TAA under the Trade Act of 1974, as amended, a "Petition for Trade Adjustment Assistance" must be filed directly with the Division of Trade Adjustment Assistance at the address listed below and with the State official or organization designated by the Governor of the State in which the workers' firm or subdivision is located. DTAA and State contact information, as well as petition forms in English and Spanish, are available through the State Workforce Agencies or from the Division of Trade Adjustment Assistance listed below. The Petition forms may also be downloaded from our web-site at: <http://www.doleta.gov/tradeact>. Petitions must be filed with both the DTAA and the State agency in which the worker group's plant is located. Notice of such filing shall be promptly published in the Federal Register. Within 10 days after publication, the petitioner or any other person found by the Secretary to have a substantial interest may request a hearing and be afforded the opportunity to be present, to present evidence, and to be heard.

Award Procedure:

A Certification of Eligibility to apply for worker adjustment assistance may be issued by the Secretary of Labor to groups of workers who have been found by the Department of Labor to have met the requirements concerning foreign trade-affected separations from employment. Individual workers covered by the certification can apply to the local office of their State Workforce Agency for individual determinations of eligibility to receive benefits.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

> 180 Days. For the TAA program, eligibility investigations begun by the receipt of a valid petition are completed, and a determination issued, within 40 calendar days of the receipt of the petition.

Appeals:

From 30 to 60 days. There are two courses of appeal, one administrative and the other judicial. Petitioners aggrieved by a final determination by the Secretary may, within 30 days after notice of such determination is published in the Federal Register, file an application for reconsideration with the Director of the Division of Trade Adjustment Assistance. If the determination following reconsideration is negative, they may, within 60 days after notice of the negative determination upon reconsideration, file a petition for review of such determination with the United States Court of International Trade in New York City. Aggrieved petitioners may request judicial appeal without first seeking administrative reconsideration, within 60 days after notice of such determination is published in the Federal Register.

For TAA certifications on petitions filed on or after May 18, 2009, the maximum number of weeks of State unemployment compensation, extended benefits and trade readjustment allowances cannot exceed 52 weeks except that up to 78 additional weeks may be paid to workers while participating in approved training and an additional 26 weeks for workers whose approved training program includes pre-requisite and/or remedial education. Participation in RTAA allows older workers, for whom retraining may not be appropriate, to accept reemployment at a lower wage and receive a wage subsidy instead of benefits under the regular TAA program. The RTAA allows for payments of 50 percent of the wage difference between old employment and new employment, not to exceed \$12,000 for up to two years. The individual must earn not more than \$55,000 a year in wages in reemployment, and must not return to employment from which the worker was separated. Base formula funding grants for training services are provided to States at the beginning of the year; additional funds may be requested by States based on additional needs above the base funding provided. Method of awarding/releasing assistance: lump sum.

This program is designed to increase employment, as measured by entry into unsubsidized employment, retention in unsubsidized employment after entry into employment, and earnings. For cross-cutting goals, the program intends to enhance customer satisfaction for participants and for employers. The employment goals will be measured using Unemployment Insurance Wage Records systems and customer satisfaction goals will be measured by sampling. USES AND USE RESTRICTIONS:

The Act specifies that most services for adults will be provided through One Stop Career Centers. The Act authorizes three levels of service which are available to all jobseekers. "Core" services include outreach, job search, placement assistance, and labor market information, and are available to all jobseekers. Consistent with the allowable activities in the statute.

Applicant Eligibility:

Under WIA, the organizations eligible to receive funding from the Department are the 50 States, Puerto Rico, the District of Columbia and the outlying areas. FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Workforce Investment Act of 1998, Title I, Subtitle B, Chapter 5, Title I, Public Law 105-220, 20 U.S.C 9201; The American Reinvestment and Recovery Act of 2009, Title VIII, Public Law 111-5.

OBJECTIVES:

The purpose of the WIA Dislocated Worker program is to reemploy dislocated

workers, improve the quality of the workforce, and enhance the productivity and competitiveness of the nation's economy by providing workforce investment activities that increase the employment, retention, and earnings of participants, and increase occupational skill attainment by the participants. This program is designed to increase employment, as measured by entry into unsubsidized employment, retention in unsubsidized employment after entry into employment, and extent of recovery of prior earnings. For cross cutting goals, the program intends to enhance customer satisfaction for participants and for employers. The employment goals will be measured using Unemployment Insurance Wage Records systems and customer satisfaction goals will be measured by sampling. The purpose of National Emergency Grants (NEGs) are to temporarily expand service capacity at the state and local levels by providing time-limited funding assistance in response to significant dislocation events. Significant events are those that create a sudden need for assistance that cannot reasonably be expected to be accommodated within the on-going operations of the formula-funded Dislocated Worker program, including the discretionary resources reserved at the state level.

TYPES OF ASSISTANCE:

FORMULA GRANTS; Project Grants

USES AND USE RESTRICTIONS:

The Act authorizes three levels of service, which are available to all job seekers. "Core" services include outreach, job search and placement assistance, and labor market information, and are available to all jobseekers. "Intensive" services include more comprehensive assessments, development of individual employment plans and counseling, and career planning, and are available to those who could not find employment through core services. Those customers who cannot find employment through intensive services may receive "training" services linked to job opportunities in their communities, including both occupational training and training in basic skills. To promote customer choice and involvement in career decisions, participants use an "individual training account" to select an appropriate training program from an eligible training provider. The Act also authorizes the provision of supportive services (e.g., transportation and child care assistance) to enable an individual to participate in the program. Funds reserved by the Secretary are also used for technical assistance and training and demonstration programs. Eligible circumstances for NEG funding include: Plant closures; mass layoffs affecting 50 or more workers; and special assistance, including health insurance coverage assistance to trade impacted workers and other individuals eligible under the Trade and Globalization Adjustment Assistance Act of 2009. Currently, CFDA number 17.260 represents both the WIA Dislocated Worker formula grants and the National Emergency Grants (NEGs). Beginning in Program Year (PY) 2010 CFDA number 17.260 will be archived and any new funds allocated through these two programs will be referenced using two new CFDA numbers: 17.277 for NEGs and 17.278 for WIA Dislocated Worker Formula Grants. All subsequent information listed here under 17.260 refers to WIA Dislocated Worker Formula Grants. For further information on NEGs please see the entry under CFDA number 17.277. Funds must be used in accordance with the statute and regulations.

Applicant Eligibility:

Under WIA, the organizations eligible to receive formula-based funding from the Department are the 50 states, Puerto Rico, the District of Columbia, and the outlying areas. Funds are allotted based on a statutory formula and states in turn allocate funds to local workforce investment boards (approximately 600), by formula prescribed by the governor. Applicants for NEGs may be states, outlying areas, local workforce boards, and non-profit and private organizations whose purpose is to provide targeted services to eligible beneficiaries.

Beneficiary Eligibility:

Individuals eligible for assistance through the applicants receiving the funds include workers who have lost their jobs, including those dislocated as a result of plant closings or mass layoffs, and are unlikely to return to their previous industry or occupation; formerly self-employed individuals; and displaced homemakers who have been dependent on income of another family member, but are no longer supported by that income. Priority of Service is given to veterans and other covered persons. The NEGs have identical eligibility to the above and also includes certain military personnel and defense employees. Services through NEGs are targeted on individuals affected by mass layoffs, natural disasters, Federal government actions, and other circumstances specified

by the Secretary.

17.266 WORK INCENTIVE GRANTS

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Workforce Investment Act Sections 121, 134(c), 189(c) (29 U.S.C 2841, 2864 (c), and 2939(c)). Key regulations governing the Workforce Investment Act (WIA) program are at 20 CFR Parts 651-652 and 660-671. , 29 U.S.C ; Wagner-Peyser Act. Key regulations governing the Wagner-Peyser Act program are at 20 CFR Parts 651-652 and 660-671., 29 U.S.C 49f.

OBJECTIVES:

Work Incentive Grants (WIGs) and Disability Program Navigators (DPNs) were established to increase the labor force participation and career advancement of persons with disabilities by effecting systemic change in the One Stop Career Centers. These programs support the capacity of the One Stop Career Center system to achieve integrated, seamless, and comprehensive services for people with disabilities, thereby increasing their employment, retention, and earnings. The competitive WIG Program has been reoriented from a competitive solicitation to the Disability Program Navigator (DPN) cooperative agreement, thereby assuring that the essential goals of the WIGs are achieved in the Workforce Investment System. The Department of Labor (DOL) and the Social Security Administration (SSA) jointly established a new position, the Disability Program Navigator (DPN), in One Stop Career Centers. The DPN guides the One Stop Career Center staff in helping people with disabilities access and navigate the various programs that impact upon their ability to gain/retain good jobs. Complex rules surrounding entitlement programs, along with the fear of losing cash assistance and health benefits, can often discourage people with disabilities from working. Consequently, the DPN initiative was established to better inform beneficiaries and other people with disabilities about the work support programs now available at the DOL-funded One Stop Career Centers. The major objectives of the DPN initiative are: (1) creating systemic change and transforming the culture of how the One Stop Career Center system serves customers with disabilities; (2) promoting meaningful and effective access, both physical and programmatic, to the One Stop Career Center system for all customers, including persons with disabilities; (3) creating attitudinal change about the abilities of people with disabilities to work in a variety of jobs and industries; (4) developing new/ongoing partnerships to achieve comprehensive services to people with disabilities; (5) expanding and enhancing the workforce development system's capacity to serve customers with disabilities and employers through the implementation of effective DPN strategies and practices; and (6) increasing the number of people with disabilities served under the WIA and achieving quality employment outcomes for job seekers with disabilities through accessing WIA Title I and Wagner-Peyser Programs.

For cross cutting goals, the program intends to enhance customer satisfaction for participants and for employers. The employment goals will be measured using Unemployment Insurance Wage Records systems and customer satisfaction goals will be measured by sampling.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

The Act authorizes three levels of service, which are available to all job seekers. "Core" services include outreach, job search and placement assistance, and labor market information, and are available to all jobseekers. Those customers who cannot find employment through intensive services may receive "training" services linked to job opportunities in their communities, including both occupational training and training in basic skills. To promote customer choice and involvement in career decisions, participants use an "individual training account" to select an appropriate training program from an eligible training

provider. The Act also authorizes the provision of supportive services (e.g., transportation and child care assistance) to enable an individual to participate in the program. Funds reserved by the Secretary are also used for technical assistance and training and demonstration programs. Funds must be used in accordance with the statute and regulations.

Applicant Eligibility:

Under WIA, the organizations eligible to receive formula-based funding from the Department are the 50 states, Puerto Rico, The District of Columbia and the outlying areas. Additional standards apply to child labor; to wage payment standards for professional performers and related or supporting professional employees of productions assisted by grants from the National Endowments for the Arts and Humanities; to curtail employer use of lie detector tests, including polygraph tests for pre-employment screening or during the course of employment; to enforce contractual obligations regarding wages and other working conditions between certain temporary, alien agricultural workers (H-2A) and their employers; to enforce worker protection provisions applicable to nonimmigrant workers in "specialty occupations" (H-1B) and foreign crew members performing longshore work; to require private employers with 50 or more employees and all schools and public employers to provide eligible employees up to 12 weeks of unpaid leave, job restoration, and continued employer provided health insurance due to the employee's serious health condition, the birth of or placement for adoption/foster care of a child, for the care of a child, spouse or parent with a serious health condition or for any "qualifying exigency" arising out of the fact that the employee's spouse, son, daughter, or parent is on active military duty, or has been notified of an impending call or order to active military duty in support of a contingency operation (provided the active duty relates to a military member of the National Guard or Reserves), or require these same employers to provide up to 26 weeks of unpaid leave, job restoration, and continued employer provided health insurance to an eligible employee who is a spouse, son, daughter, parent, or next of kin of a covered service member with a serious injury or illness.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

Federal wage and hour standards apply generally to employees engaged in interstate or foreign commerce or in the production of goods for such commerce or in enterprises so engaged and, in addition, to employees of Federal, State and local governments, hospitals, businesses providing medical or nursing care for residents, schools and preschools. Generally, for covered employment the minimum wage is \$6.55 per hour (\$7.25 per hour effective July 24, 2009) with time and one-half the regular rate of pay required for hours worked over 40 in a workweek. There are special rules applicable to employees of State and local governments, including provisions concerning volunteer work, compensatory time-off, and outside employment. To the extent necessary to prevent curtailment of employment opportunity, certificates authorizing special minimum wage rates are issued for learners, workers with disabilities, full-time students, student workers, and apprentices. In nonagricultural employment, the basic minimum age is 16 years for general employment, 14 for work outside school hours in certain occupations under specified conditions, and 18 in occupations found hazardous by the Secretary. In agricultural employment, the basic minimum age is 16 years during school hours and in occupations found hazardous by the Secretary; otherwise, age 14 for work outside school hours except for 12- and 13-year-olds with written parental consent or on farms where

their parents are employed, or under age 12 with written parental consent on a farm not subject to Federal minimum wage or under a limited waiver for local 10- and 11-year-old hand-harvesters of short-season crops under specified conditions. Failure to comply with the child labor provisions of the Fair Labor Standards Act or regulations issued there under may generally result in an assessment of a civil money penalty not to exceed \$11,000 for each minor involved in violations; however, a penalty of up to \$50,000 may be assessed for each violation that caused the death of or serious injury to a working youth, and this penalty may be increased to \$100,000 where the employer's violation is repeated or willful. Employees of contractors performing on most federally financed or assisted construction projects, or providing services under contract to Federal agencies, are subject to special standards. These special standards require that employees receive no less than the wages and fringe benefits prevailing in the locality as determined by the Secretary of Labor, and that overtime compensation, with few exceptions, be paid for hours worked on such contracts in excess of 40 in a week. The standards apply to performance on direct Federal contracts and also to most construction projects financed in whole or in part by the Federal Government (e.g., projects under the National Housing Act). Under current law, for Federal and federally assisted construction contracts over \$2,000 and Federal service contracts over \$2,500 subject to prevailing wage requirements, contracting agencies must obtain a wage determination issued by the Wage and Hour Division. Also under current law, employees working on Federal contracts in excess of \$10,000 calling for the manufacture or furnishing of supplies are required to be paid not less than the Federal minimum wage and overtime pay for hours worked in excess of 40 a week. Labor standards are set under the Arts and Humanities Act which require the payment of the prevailing minimum compensation as determined by the Secretary of Labor to professional performers or supporting personnel who work on projects or productions assisted by grants from the National Endowments for the Arts and Humanities. The Employee Polygraph Protection Act prohibits most private employers from administering lie detector tests to employees or prospective employees but permits the use of polygraph tests under certain conditions. The H-2A provisions of the Immigration and Nationality Act provide for the enforcement of contractual obligations concerning wages and other working conditions between certain temporary, alien agricultural workers and their employers. Section 203 of the Immigration Act of 1990 places limitations on the performance of Longshore work by alien crew members in U.S. ports; Section 212(n) places limitations on the employment of nonimmigrant workers in H-1B Specialty Occupations. The Family and Medical Leave Act requires a private employer of 50 or more employees and all public employers and schools to grant up to 12 weeks of unpaid leave in a 12-month period to any employee who was employed at least 12 months for 1,250 hours of service during the preceding 12 months, and is employed at a work site where there are 50 employees within 75 miles for certain qualifying events related to self and family care, and up to 26 weeks to care for a qualified service member with a serious injury or illness.

Applicant Eligibility:

Any covered employee, unless specifically exempt, is entitled to be paid in accordance with applicable monetary standards in the United States, District of Columbia, Puerto Rico, Virgin Islands, American Samoa, Guam, Wake Island, Johnston Island, and the Outer Continental Shelf Lands defined in the Outer Continental Shelf Lands Act. (Geographic application varies under the respective statutes and eligibility is dependent upon specific statutory language.) For family and medical leave, coverage includes any employer with 50 or more employees but excludes any employer at a worksite with fewer than 50 employees within a 75-mile radius.

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

The general rules for applying the Federal restrictions on garnishment are: If an individual's weekly disposable earnings are \$196.50 or less, no amount may be garnished; if the weekly disposable earnings are more than \$196.50 but less than \$262.00 (\$290.00 effective July, 24, 2009), only the amount in excess of \$196.50 (\$217.50 effective July 24, 2009) may be garnished; and if the weekly disposable earnings are in excess of \$262.00 or more, 25 percent of disposable earnings may be garnished. The Act, as amended, limits court orders for the support of any person to 50 percent of the disposable earnings of an individual supporting another spouse or child and to 60 percent of disposable earnings if not. An additional 5 percent may be garnished for support payments more than 12 weeks in arrears. The order must be issued by a court of competent jurisdiction or in accordance with an administrative procedure, which is established by law, which affords substantial due process, and which is subject to judicial review. The restrictions do not apply under Federal bankruptcy proceedings for wage-earners, nor do they apply to debts due for State or Federal taxes. In addition, garnishments issued under the laws of any State may be exempted from the operation of the Federal law where the Secretary of Labor determines that such laws provide substantially similar restrictions. Under no circumstances may an employee be discharged from employment by reason of garnishment for any one indebtedness, although State laws may provide additional protection.

Applicant Eligibility:

Any person whose earnings have been subjected to garnishment is entitled to the protection provided by the Act in the United States, the District of

Columbia, Puerto Rico, the Virgin Islands; Outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act (Chapter 345, 67 Stat. 462); American Samoa, Guam, Wake Island; and Johnston Island. Under the law, earnings are defined as compensation paid or payable for personal services, including wages, salary, commissions, bonuses, and including periodic payments pursuant to a pension or retirement program.

Preapplication Coordination:

Application process is regulated by DOT, FTA. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. The grant is submitted to DOL, FTA. The FTA then forwards the application to DOL, Office of Labor Management Standards (OLMS), Division of Statutory Programs (DSP) for review and certification of employee protections.

Award Procedure:

Pursuant to the Guidelines, DOL refers for review the grant application received from FTA and the proposed terms and conditions to unions representing transit employees in the service area of the project and to the applicant and/or recipient. No referral is made if the application falls under one of the following exceptions: (1) employees in the service area are not represented by a union; (2) the grant is for routine replacement items, (3) the grant amends a previous grant in a manner that is not material, (4) the grant is for a Job Access project serving populations less than 200,000; (5) the grant capitalizes a State Infrastructure Bank account; or (6) the grant is for the Over-the-Road Bus or Other Than Urbanized program. When a grant application is referred to the parties, DOL recommends the terms and

conditions to serve as the basis for certification. The parties have 15 days to inform DOL of any objections to the recommended terms including reasons for such objections. If no objections are registered, or if objections are found not sufficient, DOL certifies the project on the basis of the recommended terms. If DOL determines that the objections are sufficient, the parties are directed to negotiate for up to 30 days, limited to issues defined by DOL. If the parties are unable to reach agreement within 30 days, DOL will review the final proposals and issue an interim certification permitting FTA to release funds, provided that no action is taken relating to the issues in dispute that would irreparably harm employees. Following the interim certification, the parties may continue negotiations. If they are unable to reach agreement, DOL sets the terms for Final Certification within 60 days. DOL may request briefs on the issues in dispute before issuing the final certification. Employees who believe they have been adversely affected as a result of Federal transit assistance may file claims under the procedures set forth in the protective arrangements certified by DOL. DOL transmits certification letter containing protective terms to be applied to the grant application to FTA, thereby allowing the release of assistance to grantees.

Deadlines:

Jul 01, 2009 The DOT, FTA has encouraged grantees to submit applications to them by July 1, 2009.

Fiscal Year 2008: During Fiscal Year 2008, the Women's Bureau continued to support and develop on-going projects; several additional projects were designed and implemented in its effort to promote an environment responsive to the demands and challenges of the 21st century workforce. These targeted initiatives were designed to enhance opportunities for women under the Department's goals of A Competitive Workforce, A Prepared Workforce, and Strengthened Economic Protections. The following examples are highlights of the Bureau's accomplishments: A COMPETITIVE WORKFORCE -- The Women's Bureau continued its Flex-Options for Women project, which started in January 2004. The project links mentors who have experience in developing flexible workplace policies and procedures with women business owners who want to develop flexible workplace policies and procedures. A PREPARED WORKFORCE -- The Bureau's Working Women in Transition (WWIT) program continued its efforts in support of women who are making a transition in their work lives. Building on the best practices of Better Jobs! projects, WWIT implemented the Bureau's unique high-touch and high-tech strategy that combines online and face-to-face resources. Participants were provided access to online mentors (e-mentoring), online employment tools, and distance learning opportunities while working with local service providers. A SECURE WORKFORCE -- Wi\$eUp is a financial education demonstration project targeted to Generation X women ages 22 to 35. The centerpiece of the program is an eight-module curriculum offered online, as well as in a classroom setting in educational institutions and other organizations. In the online program, the curriculum is complemented by an "Ask the Experts" feature, which permits participants to send questions by e-mail to volunteers with financial expertise. Another feature available to participants in both the online and classroom-based versions is a series of monthly one-hour teleconference calls with featured

speakers and a question and answer session. The Women's Bureau also continued to host financial security and education events throughout the country. OUTREACH -- Through its National and Regional offices, web page, speaking engagements, and publications, the Women's Bureau continued to provide up-to-date, consistent, and relevant information and resources to employees, employers, and interested constituents on a variety of work-related topics, including job options, training and employment, flexible work schedules, and women's employment-related statistics. PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: ODEP managed DisabilityInfo.gov, expanding the number of Federal partners to create a governing board that broadened the range of Federal, state and local disability information available to citizens. ODEP also continued collaborating with the Bureau of Labor Statistics (BLS) to begin collecting, for the first time ever, data to determine the employment rate of people with disabilities in the Current Population Survey (CPS).

Focusing on Workforce Systems policy, ODEP produced the Knowledge, Skills and Abilities of Youth Service Practitioners, a professional development tool created to assist One-Stop Career Centers and the juvenile justice and foster care systems with the professional development of staff leads to improve program quality and increase positive youth outcomes. ODEP also documented how self-identification and the use of accommodations and financial literacy training impact post-secondary education and employment outcomes of youth with disabilities. ODEP partnered with the Employment and Training Administration (ETA) to integrate elements of the Guideposts for Success into ETAs Strategic Youth Vision guidance and provided technical assistance, training, and capacity building support to states.

ODEP developed models of comprehensive and coordinated employment preparation service delivery, including customized and self-employment strategies to adults with disabilities, in a range of economic, geographic and structural environments. Collaboration led by ODEP between the Small Business Administration (SBA), ETA, and the Veterans Employment and Training Service (VETS) resulted in the development and provision of technical assistance to workforce and small business development systems to support entrepreneurship for people with disabilities. Finally, ODEP validated models of customized employment strategies that include the leveraging of resources and funds across various separate but related systems. ODEP worked with ETA to ensure that issues related to aging and disability were integrated into the Federal Task Force on the Aging of the American Workforces activities to build capacity for serving seniors with disabilities.

With regard to Employers and the Workplace policy, ODEP facilitated dialogue on workplace health and productivity issues among private and public sector experts in healthcare and employment. ODEP developed and disseminated strategies to employers for reducing the barriers to recruitment and hiring with regard to electronic recruiting and credentialing processes for job seekers with disabilities. Finally, ODEP worked with the Office of Personnel Management (OPM) and the Equal Employment Opportunity Commission (EEOC) to disseminate effective employment practices and partnered on EEOCs Leadership for the Employment of Americans with Disabilities (LEAD) initiative and other Federal hiring efforts, including outreach on the Schedule A hiring authority and activities related to compliance with EEOCs Management Directive 715 on the recruitment, hiring, flexible work policies, such as flexible schedules, flexiplace, and telework.

In Employment-Related Supports policy, ODEP conducted policy analysis and provided technical assistance to workforce systems (including the One-Stops/Disability Program Navigators) to improve health care-related competency. ODEP fostered a dialogue among advocacy organizations and provider associations on employment-related health care options to reduce disincentives to employment for people with disabilities by strengthening understanding and awareness of work-related personal assistance services (PAS) alternatives. With regard to employment-related transportation, ODEP continued its successful partnerships with the Department of Transportation (DOT) on the United We Ride initiative to assist communities in meeting the mobility needs of workers with disabilities and, under the auspices of the White Houses Interagency Council on the Homeless, with the Department of Housing and Urban Development (HUD) to test and pilot coordinated employment and housing services models for people who are chronically homeless. Finally, ODEP collaborated with the Departments of Education (ED), Commerce, and Defense (DOD), the Department of Labor VETS, the U.S. Access Board and the Veterans Administration (VA) to develop policy and provide technical assistance regarding the provision of personal recovery and employment assistance to the nations disabled service members, including those returning from Iraq and Afghanistan. Fiscal Year 2009: TBD. Fiscal Year 2010: TBD.

17.806 VETERAN'S PREFERENCE IN FEDERAL EMPLOYMENT

FEDERAL AGENCY:

Veteran's Employment and Training Service, Department of Labor

AUTHORIZATION:

Veterans Preference Act of 1944, Public Laws 78-359, 93-508, 94-502, 95-520, 95-454, 97-72, 97-306, 98-543, 99-576, 101-237, 102-16, 102-568, 105-339, and 106-117; 109-163; Executive Order 11521, March 26, 1970.

OBJECTIVES:

To provide assistance to preference eligible individuals who believe that their rights under veterans' preference statutes and regulations have been violated. Recognizing their sacrifice, Congress enacted laws to prevent veterans seeking Federal employment from being penalized for their time in military service. Veterans' preference recognizes the economic loss suffered by citizens who have served their country in uniform, restores veterans to a favorable competitive position for Government employment, and acknowledges the larger

obligation owed to disabled veterans. Veterans' preference is not so much a reward for being in uniform as it is a way to help make up for the economic loss suffered by those who answered the nation's call to arms. Historically, preference has been reserved by Congress for those who were either disabled or who served in combat areas. Eligible veterans receive many advantages in Federal employment, including preference for initial employment and a higher retention standing in the event of layoffs. However, the veterans' preference laws do not guarantee the veteran a job, nor do they give veterans' preference in internal agency actions such as promotion, transfer, reassignment, and reinstatement. By law, veterans who are disabled or who served on active duty in the Armed Forces during certain specified time periods or in military campaigns are entitled to preference over others in hiring from competitive lists of eligibles and also in retention during reductions-in-force. Preference applies in hiring for virtually all Federal jobs, whether in the competitive or excepted service. In addition to receiving preference in competitive appointments, veterans may be considered for special noncompetitive appointments for which only they are eligible.

TYPES OF ASSISTANCE:

FEDERAL EMPLOYMENT

USES AND USE RESTRICTIONS:

To assist persons who perform service in the uniformed services to secure Federal employment and to ensure a higher retention standing in the event of a reduction-in-force. To provide information and assistance to veterans, employers, labor organizations, and other elements of the community concerned with veterans' preference in Federal employment and retention. The Department of Labor - Veterans' Employment and Training Service investigates complaints with the goal of voluntary resolution of veterans' preference problems. Unresolved complaints can be pursued by the complainant veteran to the Merit Systems Protection Board.

Applicant Eligibility:

(1) Five-point preference is given to those honorably separated veterans (this means an honorable or general discharge) who served on active duty (not active duty for training) in the Armed Forces: During any war (this means a war declared by Congress, the last of which was World War II); during the period April 28, 1952, through July 1, 1955; for more than 180 consecutive days, any part of which occurred after January 31, 1955, and before October 15, 1976; during the Gulf War period beginning August 2, 1990, and ending January 2, 1992; for more than 180 consecutive days, any part of which occurred during the period beginning on September 11, 2001, and ending on the date prescribed by Presidential proclamation or by law as the last date of Operation Iraqi Freedom; or in a campaign or expedition for which a campaign medal has been authorized, such as El Salvador, Lebanon, Granada, Panama, Southwest Asia, Somalia, and Haiti. Medal holders and Gulf War veterans who originally enlisted after September 7, 1980, or entered on active duty on or after October 14, 1982, without having previously completed 24 months of continuous active duty, must have served continuously for 24 months or the full period called or ordered to active duty. Effective on October 1, 1980, military retirees at or above the rank of major or equivalent, are not entitled to preference unless they qualify as disabled veterans. Ten-point preference is given to those honorably separated veterans who: (1) Qualify as disabled veterans because they have served on active duty in the Armed Forces at any time and have a present service-connected disability or are receiving compensation, disability retirement benefits, or pension from the military or the Department of Veterans Affairs; or (2) are Purple Heart recipients; the spouse of a veteran unable to work because of a service-connected disability; the unmarried widow of certain deceased veterans; and the mother of a veteran who died in service or who is permanently and totally disabled. When applying for Federal jobs, eligible veterans should claim preference on their application or resume. Applicants claiming 10-point preference must complete form SF- 15, Application for 10-Point Veteran Preference. Veterans who are still in the service may be granted 5 points tentative preference on the basis of information contained in their applications, but they must produce a DD Form 214 prior to appointment to document entitlement to preference. Note: Reservists who are retired from the Reserves but are not receiving retired pay are not considered "retired military" for purposes of veterans' preference. (2) Veterans who have been separated from the armed forces under honorable conditions shortly before completion of 3 years, or completion of 3 years or more of active duty military service are

eligible to compete for vacant Federal positions for which the agency making the announcement will accept applications from individuals outside its own workforce under merit promotion procedures. This does not make them preference eligible, but allows access to certain Federal job openings for which they would otherwise not be entitled to apply. (3) Public Law 94-502 authorizes Federal agencies to provide unpaid training or work experience, as a part of the Department of Veterans Affairs vocational rehabilitation for a disabled veteran. Such training may be designed to provide noncompetitive appointment.

Beneficiary Eligibility:

Non-disabled veterans, disabled veterans and certain wives or husbands, widows, widowers, and mothers of veterans.

Credentials/Documentation:

For veterans' preference, general proof of honorable separation such as discharge certificate or DD Form 214. In addition, for 10-point preference, a letter from the Department of Veterans Affairs or military department certifying existence of service-connected disability. When the 10-point preference is based on the award of a Purple Heart, official documentation of the award is sufficient. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

None. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Application forms are available from Service Centers of the Office of Personnel Management and from Federal agency personnel offices. Veterans eligible for noncompetitive appointment should make personal contact with the Federal agency where they would like to be considered for employment. Veterans who believe that they have not been properly accorded their rights have several different avenues of complaint, depending upon the nature of the complaint and the individual's veteran status: The Veterans Employment Opportunities Act of 1998 allows preference and other eligibles to file a complaint with the Department of Labor's Veterans' Employment and Training Service (VETS) when the person believes an agency has violated his or her rights under any statute or regulation relating to veterans' preference. Eligible veterans seeking employment who believe that an agency has not properly accorded them their veterans' preference, or failed to provide special placement consideration noted above, may file a complaint with the local Department of Labor VETS representative (located at State employment service offices). To be eligible to file a complaint a veteran must: Have served on active duty for more than 180 days and have other than a dishonorable discharge; have a service-connected disability; or served on active duty during a period of war, or received a campaign badge or expeditionary medal (e.g., the Southwest Asia Service Medal). The Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA) prohibits discrimination in employment, retention, promotion, or any benefit of employment on the basis of a person's service in the uniformed services. Complaints under this law should also be filed with the local Department of Labor VETS representative (located at State employment service offices). Since a willful violation of a provision of law or regulation pertaining to veterans' preference is a Prohibited Personnel Practice, a preference eligible who believes his or her veterans' preference rights have been violated may file a complaint with the local department of Labor VETS representative, as noted above. A disabled veteran who believes he or she has been discriminated against in employment because of his or her disability may file a handicapped discrimination complaint with the offending agency under regulations administered by the Equal Employment Opportunity Commission.

Award Procedure:

None.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Under Public Law 95-454, retired members of the armed forces will no longer

be considered preference eligible as of October 1, 1980, unless they are disabled veterans or retired below the rank of Major or the equivalent. Under Public Law 97-306, enacted October 14, 1982, a 2-year minimum active duty service condition for those entering military service after September 7, 1980, or the full period for which called or ordered to active duty, must be met, unless they are disabled veterans.

OBJECTIVES:

There are more than 140,000 Burmese refugees in nine camps along the Thailand-Burma border. The role of the United Nations High Commissioner for Refugees (UNHCR) in the Burmese border camps is limited to the provision of protection; therefore, Non-Governmental Organizations (NGOs) conduct all refugee assistance activities and address needs not covered by UNHCR or other international organizations, including health and psychosocial programs, gender-based violence (GBV) prevention and response, water and sanitation, food, fuel, and clothing, as well as microenterprise development. In FY 08 and FY 09, the Bureau of Population, Refugees, and Migration (PRM) also supported a project to improve access to services for people with disabilities. In addition to assistance to Burmese refugees on the Thailand-Burma border in FY 09, PRM supported health, nutrition, education, vocational training, sanitation, conflict resolution, and community mobilization programming for Burmese Rohingya in Bangladesh and Indonesia. PRM also supported a GBV project for Burmese women and girls in Malaysia and North Korean refugees across the region, and assistance to the Lao Hmong in Petchabun and Nongkhai, Thailand. Please note that funding for FY 10 is expected to be extremely limited.

19.519 OVERSEAS REFUGEE ASSISTANCE PROGRAM FOR NEAR EAST AND SOUTH ASIA

Overseas Refugee Assistance Program for Near East and South Asia

FEDERAL AGENCY:

Bureau of Population, Refugees, and Migration, U.S. Department of State

AUTHORIZATION:

The Migration and Refugee Assistance Act of 1962, as amended (MRA), 22 U.S.C. 2601 et seq., 22 U.S.C 2601.

OBJECTIVES:

In the Near East: Providing protection and assistance to Iraqi refugees, conflict victims, internally displaced persons (IDPs) and returnees remains a high priority to the Bureau. Programs will assist refugee populations in neighboring countries, while supporting return and reintegration activities for voluntary returnees. Programs inside Iraq will also help strengthen local structures so that Iraqi government policies and programs will be responsive to refugee, IDP and returnee needs. The Bureau supports United Nations (UN) programs that provide some stability in the lives of the 4.7 million Palestinian refugee population in an increasingly difficult environment and contributes to building a climate conducive to a peaceful resolution of regional problems. In South Asia:

The Bureau will continue support for the unprecedented, large-scale return and reintegration programs for Afghan refugees and IDPs, although at reduced financial levels. The Bureau will also continue supporting protection and assistance activities for many of the 3.5 million refugees who remain in Pakistan and Iran and who may not repatriate in 2006 due to the security situation, persecution of certain ethnic groups, and Afghanistan's limited capacity to absorb additional returnees. Over 125,000 Tibetans live outside Tibet today, most in Central Tibetan Administration (CTA)-sponsored refugee settlements in India, Nepal, and Bhutan. Congressional interest in this population has resulted in \$2.5 million in annual funds through the Bureau to provide reception, healthcare, education, and livelihood services to Tibetan refugees, efforts which are undertaken in concert with the CTA and United Nations High Commissioner for Refugees (UNHCR) activities in the region. Regional contributions to UNHCR and the International Committee of the Red Cross (ICRC) for their South Asia appeals provide support to programs for refugee populations in Sri Lanka, India, and Nepal. In FY09, the Bureau of Population, Refugees and Migration (PRM) also contributed to UNHCR's supplementary budget for Sri Lanka, in response to the ongoing humanitarian situation there. In addition, PRM provides funds to support the more than 60,000 Sri Lankan refugees in Tamil Nadu, which offers reception, sanitation, and health services to refugees in those camps. PRM's regional contribution to UNHCR includes support for protection, care and maintenance for the nearly 108,000 Bhutanese refugees registered in southeastern Nepal in 2008, and the Bureau supports the robust resettlement of Bhutanese refugees through the U.S. Refugee Admissions Program.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: In FY 08, PRM supported Catholic Relief Services (CRS) Pudhu Vazhvu (New Life) program, serving the more than 60,000 Sri Lankan Tamil refugees in Tamil Nadu, India. In coordination with the Government of Tamil Nadu, CRS has provided support to (1) improve reception services for newly arrived Sri Lankan refugees and (2) improve care and maintenance for Sri Lankan refugees in targeted camps. Specific activities included the distribution of food, water, and reception information for newly arrived refugees and the construction of bore wells and toilet blocks in targeted camps. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

The Bureau's main objective is to help ensure that refugees and victims of conflict have access to basic life-sustaining resources in ways that meet internationally accepted standards of care in shelter, food supply, nutrition, water supply, sanitation, and public health. NGO proposals should clearly use SPHERE standards as the basis for design, implementation, and evaluation, including proposed objectives and indicators. Underlying PRM's support for humanitarian assistance is a commitment to protection, targeted support to women, vulnerable individuals, coordination with relevant UN agencies and other NGOs, sustainability of programming, security, and capacity building. NGOs in search of Bureau funding would do well to address these specific areas in any proposals sent for funding.

19.520 OVERSEAS REFUGEE ASSISTANCE PROGRAMS FOR EUROPE

Overseas Refugee Assistance Programs for Europe

FEDERAL AGENCY:

Bureau of Population, Refugees, and Migration, U.S. Department of State

AUTHORIZATION:

The Migration and Refugee Assistance Act of 1962, as amended (MRA), 22 U.S.C. 2601 et seq., 22 U.S.C 2601.

OBJECTIVES:

Funding of organizations that assist refugees and internally displaced persons (IDPs) in Europe and Central Asia will be significantly less than in FY09. Discounting the surge in funding required to respond to the humanitarian crisis in Georgia following the August 2008 conflict, funding for FY10 remains at or near the FY09 level. In the North and South Caucasus, the Bureau, in conjunction with International Organizations (IOs), non-governmental organizations (NGOs), and the international community, will continue to provide life-sustaining assistance to the most vulnerable IDPs and refugees produced by the continuing conflict in Chechnya and the frozen conflicts in Georgia, Armenia, and Azerbaijan. In the Balkans, programs that assist minority IDP returns to Kosovo from Serbia-Montenegro and Macedonia, and local integration of refugees and IDPs in Serbia are the focus of our funding, and, through international organizations, we will provide protection to refugees, asylum seekers, and individuals at risk for statelessness. In Central Asia, through IOs, the Bureau will continue support for refugees, IDPs, asylum seekers and stateless people.

OBJECTIVES:

To assist sponsors, owners, or operators of public-use airports in the development of a nationwide system of airports adequate to meet the needs of civil aeronautics. The purpose of the law includes the preservation and creation of jobs. Additional objectives are the promotion of economic recovery, and investment in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants can be made for integrated airport system planning in a specific area; and airport master planning, construction, or rehabilitation at a public-use airport or portion thereof. Authorizing legislation refers to an airport as any area of land or water used or intended to be used for the landing or taking off of aircraft and includes, within the five categories of airports listed below, special types of facilities such as seaplane bases and heliports. The statute further defines airports by categories which include commercial service, primary, cargo service, reliever, and general aviation airports. They are defined as follows: Commercial Service Airports are publicly owned airports that have at least 2,500 passenger boarding each year and receive scheduled passenger service. Passenger boarding refer to revenue passenger boarding on an aircraft in service in air commerce. The definition also includes passengers who continue on an aircraft in international flight that stops at an airport in any of the 50 states for a non traffic purpose. Passenger boarding at airports that receive scheduled passenger service are also referred to as Enplanements. Nonprimary Commercial Service Airports are Commercial Service Airports that have at least 2,500 and no more than 10,000 passenger boarding each year. Primary Airports are Commercial Service Airports that have more than 10,000 passenger boarding each year. These airports are further categorized as Hub Airports, based on the level of passenger boarding. Hub categories for Primary Airports are defined as a percentage of total passenger boarding in the most current calendar year ending before the start of the current fiscal year. The definition and formulae used for designating Primary Airports by Hub Type and Percentage of Annual Passenger Boarding are: Large 1 percent or more; Medium - at least 0.25 percent, but less than 1 percent; Small - at least 0.05 percent, but less than 0.25 percent; and Non hub - more than 10,000, but less than 0.05 percent. Cargo Service Airports are airports that, in addition to any other air transportation services that may be available, are served by aircraft providing air transportation of only cargo with a total annual landed weight of more than 100 million pounds. Reliever Airports are airports designated by the FAA to relieve congestion at a Commercial Service Airport and to provide more general aviation access to the overall community. The remaining airports, while not specifically defined in Title 49 U.S.C., are referred to as General Aviation Airports and comprise the largest single group of airports in the U.S. airport system. Eligible work at airports consists of: (1) airport master plans; (2) airport noise compatibility plans; (3) land acquisition; (4) site preparation; (5) construction, alteration, and rehabilitation of runways, taxiways, aprons, and certain roads within airport boundaries; (6) construction and installation of airfield lighting, navigational aids, and certain offsite work; (7) safety equipment required for certification of airport facility; (8) security equipment required of the sponsor by the Secretary of Transportation by rule or regulation for the safety and security of persons and property on the airport; (9) snow-removal equipment; (10) terminal development; (11) aviation-related weather reporting equipment; (12) equipment to measure runway surface

friction; (13) burn area training structures and land for that purpose, on or off airport; (14) agency-approved noise compatibility projects; (15) relocation of air traffic control towers and navigational aids (including radar) if they impede other projects funded under AIP; (16) land, paving, drainage, aircraft deicing equipment and structures for centralized deicing areas; and (17) projects to comply with the Americans with Disabilities Act of 1990, Clean Air Act, and Federal Water Pollution Control. Under limited criteria construction of hangars and automobile parking is eligible. Grants may not be made for the construction of hangars, most automobile parking facilities, buildings not related to the safety of persons on the airport, decorative landscaping or artwork, or routine maintenance and repair. Technical advisory services are also provided. Formula funds are available to primary commercial service airports and to cargo service airports. Discretionary funds may be used at any eligible facility.

Applicant Eligibility:

States, counties, municipalities, U.S. Territories and possessions, other public agencies including an Indian tribe or pueblo, the republics of the Marshall Islands and Palau, and the Federated States of Micronesia, are eligible for airport development grants if the airport on which the development is required is listed in the National Plan of Integrated Airport Systems (NPIAS). Certain units of local government may be eligible for grants to implement noise compatibility projects. Private owners of public-use reliever airports or airports having at least 2,500 passenger boarding annually and receiving scheduled passenger aircraft service are eligible.

Beneficiary Eligibility:

States, counties, municipalities, U.S. Territories and possessions, and other public agencies including an Indian tribe or pueblo, the republics of the Marshall Islands and Palau, The Federated States of Micronesia, and private owners of reliever airports or airports having at least 2,500 passenger boarding annually and receiving scheduled passenger aircraft service.

Federal-aid Highway Program: To assist State transportation agencies in the planning and development of an integrated, interconnected transportation system important to interstate commerce and travel by constructing and rehabilitating the National Highway System (NHS), including the Eisenhower Interstate System; and for transportation improvements to most other public roads; to provide aid for the repair of Federal-aid highways following disasters; to foster safe highway design; to replace or rehabilitate deficient or obsolete bridges; and to provide for other special purposes. This program also provides

for the improvement of roads in Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa, the Northern Mariana Islands, and the Alaska Highway. The Federal Lands Highway Program (FLHP), as an adjunct to the Federal Aid Highway Program, provides assistance to the Federal Land Management Agencies (FLMAs) for Federally owned roads. It provides transportation engineering services for planning, design, construction, and rehabilitation of the highways and bridges providing access to federally owned lands. The Federal Lands Highway organization also provides training, technology, deployment, engineering services, and products to other customers.

TYPES OF ASSISTANCE:

FORMULA GRANTS; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Federal-aid highway funds are generally apportioned by statutory formulas to the States. They are generally restricted to roads open to the public and not functionally classified as rural minor collectors or local. Exceptions to this highway functional classification restriction include: planning and research activities; bridge, bicycle and pedestrian, and safety improvements that may be on any public road; transportation enhancement activities; the recreational trails program (see program 20.219); safe routes to school, nonmotorized transportation, the FLHP, and public transportation improvement. The FLHP is not a grant program. For highway projects, funds may be used forenvironmental studies, engineering and design services, right-of-way acquisition and relocation assistance, and construction for capital improvement projects classified as new construction, reconstruction, restoration, rehabilitation, and resurfacing, or for functional, geometric, or safety reasons. Funds may also be used for planning; research, development, and technology transfer; intelligent transportation systems projects; roadside beautification; wetland and natural habitat mitigation, traffic management and control improvements; improvements necessary to accommodate other transportation modes, development and establishment of transportation management systems; billboard removal; construction of bicycle facilities and pedestrian walkways; fringe and corridor parking; car pool and van pool projects; transportation enhancements such as scenic and historic highway improvements; and recreational trails. Funds generally cannot be used for routine highway operational activities, such as police patrols, mowing, snow plowing, or maintenance, unless it is preventative maintenance. Also, funds authorized for the NHS, Surface Transportation Program (STP), Congestion Mitigation and Air Quality (CMAQ) Improvement Program, Equity Bonus (BE) program, and some additional programs may be used for mass transportation improvements; CMAQ funds are limited to projects and programs in air quality, non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter that reduce transportation related emissions. Eligibility criteria for the programs differ, so program guidance should be consulted. Projects in urban areas of 50,000 or more population must be based on a transportation planning process carried out by a Metropolitan Planning Organization (MPO) in cooperation with the State and transit operators, and the projects must be included in metropolitan transportation plans and improvement programs. Projects in non-metropolitan areas of a State must be consistent with a statewide transportation plan. Projects in both metropolitan and non-metropolitan areas must also be included in a fiscally constrained Statewide Transportation Improvement Program (STIP) developed as part of the required statewide transportation planning process. The FHWA and the Federal Transit Administration (FTA) must approve the STIP jointly.

Applicant Eligibility:

By law, the Federal-aid highway program is a federally assisted State program that requires each State to have a suitably equipped and organized transportation department. Therefore, most projects are administered by or through State transportation departments (State DOTs). Projects to be funded under the Federal-aid highway program are generally selected by State DOTs or MPOs, in cooperation with appropriate local officials, as specified in 23 U.S.C. and implementing regulations. Territorial highway projects are funded in the same manner as other Federal aid highway projects, with the territorial transportation agency functioning in a manner similar to a State transportation department. Most FLHP projects are administered by the FHWA Office of Federal Lands Highway and its Divisions or by the various FLMAs. Under the FLHP, projects in the Indian Reservation Road (IRR) Program are selected by Tribal governments and are approved by the Bureau of Indian Affairs (BIA)

and the Federal Highway Administration. Due to recent legislation, Tribal governments meeting certain requirements may now administer various IRR projects on behalf of the BIA and FHWA. The Fish and Wildlife Service (FWS) and the National Park Service (NPS) select projects in the Refuge Road and Park Roads and Parkways programs, respectively. For the Forest Highway Program, the Forest Service, the States and the Federal Highway Administration jointly select projects.

Beneficiary Eligibility:

State transportation departments, and in some instances, Federal agencies, other State agencies, local agencies, and private, community-based organizations.

Credentials/Documentation:

Eligible activities and allowable costs will be determined in accordance with Title 23 and the OMB cost principles applicable to the recipient/sub-recipient. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

An environmental impact assessment is required for most projects under this program, although the level of review varies with the project. Projects under the FLHP have similar requirements; however, an interested applicant would need to contact the designated FLMA or the local FLH Division for more information. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. In general, projects/programs proposed for funding must be included in a fiscally constrained STIP, submitted by the State DOT, and approved jointly by the FHWA and the FTA. In addition, the State DOT may need to submit statements of work or plans, specifications, and estimates for certain proposed projects to the FHWA division office located in each State for approval. The FHWA has an agreement with each State that details the extent to which the State assumes the responsibilities of the FHWA for projects in that State. For projects on the Interstate System costing more than \$1 million, FHWA oversight of design and construction is required. For projects that are on the National Highway System but not on the Interstate System, the State may assume the responsibilities of the FHWA for oversight of design and construction, unless the State or the FHWA determines that such assumption is not appropriate. For projects that are not on the National Highway System, the State shall assume the responsibilities of the FHWA for oversight of design and construction, unless the State determines that such assumption is not appropriate. For the discretionary portion of public lands highways, State DOTs submit desired projects to the FHWA division office located in each State. Following the appropriate project selection process, a Transportation Improvement Program (TIP) for the Park Roads and Parkways, Forest Highway and Refuge Road programs is developed by one of the Federal Lands Highway Division offices, and forwarded to the respective State for inclusion in the appropriate MPO TIP and STIP. For the Indian Reservation Roads program, a TIP is submitted to the FHWA Office of Federal Lands Highway for approval and then forwarded to the respective State for inclusion in the appropriate MPO TIP and STIP. Projects under the FLHP are subject to the metropolitan and statewide planning requirements.

Award Procedure:

The State DOTs generally decide which projects will be developed within funding levels but the FHWA division office located in each State makes the final decision on the eligibility of specific projects. There are several categories where funding is allocated at the discretion of the Secretary of Transportation and administered by the FHWA. Candidate projects for discretionary allocations are usually solicited before the start of the Federal fiscal year (October 1) and must be submitted by the State DOTs. FHWA approval of a project and execution of a project agreement constitute a commitment to pay the Federal share of the project's allowable costs. Projects administered by the FHWA Office of FLH or the FLMAs are subject to procurement processes identified in the Federal Acquisition Regulations. Project awards are subject

to the availability of funds.

This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

Federal-aid highway funds generally become available at the beginning of the fiscal year for which they are authorized and must be obligated within 3 years after the close of that fiscal year. However, some categories of funds are available until expended. Method of awarding/releasing assistance: lump sum.

Reports:

No program reports are required. No cash reports are required. No progress reports are required. No expenditure reports are required. Except for projects that a state has oversight responsibility for, the FHWA division office in each State monitors and reviews State projects and programs during highway project location, design and construction. After the project is completed State maintenance of the project is reviewed periodically. Certain non-construction activities, such as transportation planning, require periodic progress reports. Similar procedures apply to the FLMAs and FLHP projects with the FHWA Office of FLH providing the mandatory stewardship and oversight. A value engineering analysis or other cost-reduction analysis is required for each project on the Federal-aid system with an estimated total cost of \$25,000,000 or more, a bridge project with an estimated total cost of \$20,000,000 or more; and any other project determined to be appropriate. Annual financial plans are required for projects with an estimated total cost of \$100,000,000 or more. In addition, a project management plan must be submitted for projects with an estimated total cost of \$500,000,000 or more.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

Records:

Project records and documents must be retained by the State or other governmental recipients/ subrecipients as specified in 49 CFR Part 18 or by non-profit recipients/subrecipients as specified in 49 CFR Part 19. For the Federal Lands Highway Program, the Federal Lands Highway Divisions maintain the project records.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: The Federal-aid Highway Program has made significant contributions to the safer operation of the nation's highways, to the better intermodal connectivity of roads to other forms of transportation, and to the improvement of pavement and bridge conditions throughout the country, while helping to safeguard environmental conditions. It has provided funding for a

wide range of alternatives to traditional highway construction projects to better serve transportation needs. It has developed and advanced critical new technologies, such as Intelligent Transportation Systems, and shared them with the States. The FLHP works to create the best transportation system in balance with the values of the Federal and tribal lands. The mission of the program is to improve transportation access to and within Federal and tribal lands and provide technical services to the highway community. 20.237 COMMERCIAL VEHICLE INFORMATION SYSTEMS AND NETWORKS

CVISN

FEDERAL AGENCY:

Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation

AUTHORIZATION:

Safe, Accountable, Flexible, Efficient Transportation Equity Act Legacy for Users (SAFETEA LU), Section 4123, Public Law 109-59.

OBJECTIVES:

The Commercial Vehicle Information Systems and Networks (CVISN) Program is a key component of the Federal Motor Carrier Safety Administrations (FMCSA) drive to improve commercial motor vehicle safety, and is directly aligned with both the United States Department of Transportation (U.S. DOT) and FMCSAs performance goals. The goals and objectives for the CVISN program include:

Improve highway safety and security CVISN will enable safety inspectors to target their resources on the highest risk carriers, drivers, and vehicles. These changes are expected to reduce the frequency and severity of accidents that involve commercial vehicles. CVISN also will support future initiatives in security, recognizing that homeland security is a more critical issue for the nations transportation system.

Streamline credentials and tax administration CVISN will enable government agencies and motor carriers to conduct business transactions electronically, enabling reduced administrative costs, paperwork, and time.

Reduce congestion costs for motor carriers Automated vehicle screening systems will reduce congestion and delays at weigh stations and international border crossings. These changes are expected to improve freight mobility and reduce delivery costs.

Ensure regulatory compliance and equitable treatment Motor carrier compliance with credentials and tax regulations is expected to increase as the process is made less burdensome by CVISN. In addition, automated screening systems and better targeted safety inspections are expected to catch a greater number of non-compliant or unsafe drivers. As all carriers are brought into regulatory compliance, the playing field industry-wide will become more level.

The CVISN Program supports these goals by focusing safety enforcement on high-risk operators; integrating data systems to improve the accuracy, integrity, and verifiability of credentials; improving efficiency through electronic screening of commercial vehicles; and enabling on-line application and issuance of credentials.

Deadlines:

Range of Approval/Disapproval Time:

Not Applicable.

Appeals:

Not Applicable.

Renewals:

Renewals or request for extensions to the grant period of performance can be made through the FMCSA State Division Offices.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: Percent: 50%. Matching Funds:

SAFETEA LU dictates that Federal CVISN deployment funds may not be used to fund more than 50 percent of a projects total budget. As such, if a State wishes to apply for \$1,000,000 in Federal CVISN funding for which it is eligible, it must identify \$1,000,000 in state or private-sector funding that can be used to match the Federal contribution. FMCSAs match requirements are very flexible and allow states to include many types of funds as match. Federal CVISN match sources may be:

Direct funds/resources that offset the costs of the specific project towards which the grant is applied; or

Indirect funds/resources that are related to the States CVISN program but do not offset the costs associated with the specific project towards which the grant is applied.

Eligible sources of direct matching funds include:

State/private sector funds applied to the project funded by the Federal CVISN Deployment Grant;

State-funded staff salaries associated with the Federally-funded project (e.g., project management, subject matter experts, developer/IT resources); and

State-funded capital expenses for the Federally-funded project (e.g., hardware/software, roadside equipment, e-screening equipment).

Eligible sources of indirect matching funds include:

State/private sector funds associated with another CVISN project;

Staff salaries associated with another CVISN project (e.g., CVISN program management, project management, subject matter experts, developer/IT resources); and

Capital expenses associated with another CVISN project (e.g., hardware/software, roadside equipment, e-screening equipment).

At this time, the following may not be used as match towards a Federal CVISN Deployment Grant:

Monies received from other Federal programs (e.g., MCSAP, PRISM, SaDIP, Border Enforcement, CDL);

Toll credits; and

Funds/resources previously used as match towards another Federal grant.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

The funds are available for expenditure for as long as the period of performance stipulated in the grant agreement negotiated between the state and its FMCSA State Administrator. The funds are "NO-YEAR" money; they do not expire. If a state wants to use the funds after the period of performance, it may do so after it negotiates a no-cost extension of the grant agreement with its FMCSA State Administrator. Method of awarding/releasing assistance: lump sum.

Reports:

No program reports are required. No cash reports are required. State grant recipients must provide quarterly progress reports to FMCSA. One electronic file of the quarterly progress report must be submitted to the states FMCSA Division Administrator, and the FMCSA Office of Research and Technology, Technology Division on or before the 20th of the month following the end of the quarter being reported. At a minimum, the quarterly reports must be completed using forms SF-PPR and SF-269 and containing the following:

The project number, project name, a brief description of the project, major project partners, names and phone numbers of the partners project contacts, and the reporting period.

Budget and scheduling information, including the date the project was initiated, the estimated completion date, cost estimate, and expenditures during the reporting period.

A brief description of the activities conducted during the reporting period, including any milestones attained and significant events.

A discussion of any problems encountered or anticipated (e.g., scope changes, changes in project limits, funding requirements, technological constraints, institutional issues, project schedule delays) together with recommended solutions to such problems. No expenditure reports are required. No performance monitoring is required.

Audits:

No audits are required for this program.

Records:

Upon request, the State will provide copies of technical documents and/or procurement documents to FMCSA.

Account Identification:

Obligations:

(Project Grants) FY 08 \$22,500,000; FY 09 est \$25,000,000; FY 10 est not reported. - FY 2010 information is currently not known.

Range and Average of Financial Assistance:

States eligibility for CVISN deployment funding is based on the Federal funds it received for its CVISN program under the Transportation Equity Act for the 21st Century (TEA-21), and SAFETEA-LU as well as its current CVISN deployment status. Awards range from \$100,000 to \$3,500,000.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: Since the inception of the Federal CVISN grant program in 2006, 80 grants were awarded and \$60,547,563 in funds were expended. It is anticipated that 35 applications will be received and 35 awards will be granted in Fiscal Year 2009. Fiscal Year 2009: No Current Data Available

USES AND USE RESTRICTIONS:

A qualified project is a planning or capital project in or in the vicinity of a Federally-owned or managed park, refuge, or recreational area that is open to the general public and meets the goals of the program. (1) Planning Projects: Activities to comply with metropolitan and statewide planning provisions. (49 U.S.C. 5320(b)(5)(A) referencing 49 U.S.C. 5303, 5304, and 5305). (49 U.S.C. 5320(b)(5)(A) referencing 49 U.S.C. 5309(b).)

(4) Purchase of rolling stock that incorporates clean fuel technology or the replacement of buses of a type in use on August 10, 2005, with clean fuel vehicles;

- Prevents or mitigates an adverse impact on a natural resource;
- Improves Federal land management agency resource management;
- Improves visitor mobility and accessibility and the visitor experience;
- Reduces congestion and pollution (including noise pollution and visual pollution); or
- Conserves a natural, historical, or cultural resource (excluding rehabilitation or restoration of a nontransportation facility).

Applicant Eligibility:

Eligible applicants are:(1) The following Federal land management agencies: The National Park Service, the Fish and Wildlife Service, the Bureau of Land management, the Forest Service, and the Bureau of Reclamation; and (2) State, tribal and local governments with jurisdiction over land in the vicinity of an eligible area acting with the consent of a Federal land management agency, alone or in partnership with a Federal land management agency or other governmental or non-governmental participant.

Beneficiary Eligibility:

General public, including persons with disabilities.

Credentials/Documentation:

Any project sponsor must be acting with the consent of a Federal land management agency. Any project proposed must be consistent with the metropolitan and statewide planning and public participation requirements found in 49 U.S.C 5303, 5304, and 5307(d). If the project is a capital project in contrast with a planning project, the capital project must be in the metropolitan Transportation Improvement Program (TIP) or State Transportation Improvement Program (STIP), or, if selected, will not receive funds until it is incorporated into the TIP or STIP. Projects also must be consistent with Federal land management agency plans. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

The program allows the Department of Transportation to spend up to 10 percent of program funds to carry out planning, research and technical assistance activities. Funds allocated to technical assistance will be used to assist program participants in planning, implementing, and evaluating alternative transportation projects. In addition, the Federal Transit Administration will provide planning guidance and will disseminate research findings. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Project proposals must be submitted to the designated contact person at the headquarters office of the Federal land management agency that manages the park or public land involved. This list can be found in the Notice of Funding Availability published in the Federal Register Vol. 71, No. 233, December 5, 2006. If the project involves more than one Federal land management agency, a proposal template must be submitted to all agencies involved. The project proposal must be 10 or fewer pages in length at 10 point font or larger. If a proposal is greater than 10 pages, only the first 10 pages will be considered during the evaluation process. Submission by email is preferred. Mail and fax submissions will also be accepted. If applicants would like to apply for funds appropriated for future fiscal years, applicants must reapply each year.

Award Procedure:

Proposals will first be reviewed and screened by the headquarters office of the relevant Federal land management agency (or agencies if the project involves more than one). Following this initial review, proposals will be evaluated by an interagency team which includes representatives from FTA, each of the Federal land management agencies, and the Department of the Interior.

After evaluating the projects on the basis of criteria in the law and further explained in Section 180 of this program description, the team will provide a recommendation to the Secretary of the Interior. The Secretary of the Interior, after consultation with and in cooperation with the Secretary of Transportation, will determine the final selection and amount of funding for each project. The Department of the Interior will notify each Federal land management agency of projects awarded for sites under the agency's jurisdiction. FTA will publish the list of all selected projects and funding levels in the Federal Register, as well as in FTAs annual report to Congress on the Alternative Transportation in Parks and Public Lands program submitted as part of FTAs Annual Report on New Starts in early February 2008. Criteria and application procedures may be reassessed for subsequent years.

Once proposals have been reviewed and projects have been chosen on the basis of selection criteria, the cognizant Federal agency (or agencies), will award funds to the proposing entity to implement the project. These funds will be administered according to Federal requirements as well as the appropriate policies, guidelines and rules of the pertinent agencies. For projects directly administered by a Federal land management agency, these funds will be administered by interagency agreement between the FTA and the respective agency. For programs administered by a State, tribal, or local Governmental authority, these funds will be administered through a grant administered by FTA. With regard to interagency agreement and grant requirements, 49 U.S.C. 5320(i) authorizes the Secretary to apply the requirements of 49 U.S.C. 5307 (Urbanized Area Formula Grant) and 5333(a) (Prevailing Wages Requirement) to the extent the Secretary deems appropriate.

Additionally, each recipient (Federal land management agency, and State, tribal, and local governments) of Federal funds must comply with requisite Federal guidelines governing the management of Federal funds and specific program requirements. Program Oversight, as defined by FTA, will ensure that projects meet the basic statutory, administrative, and regulatory requirements as stipulated by the conditions for accepting Federal funds.

CRITERIA FOR SELECTING PROPOSALS:

The Federal/State relationship for the highway safety grant program is a partnership. Each State is given flexibility in the administration of its own highway safety program. Federal funds are obligated in support of a highway safety program based on problems identified by the State. States have latitude in determining projects upon which they spend their Federal monies.

USES AND USE RESTRICTIONS:

Incentive grant funds are available to States to implement effective programs to reduce drunk and drugged driving, in compliance with established criteria.

Applicant Eligibility:

States, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. States are provided with two alternative means to qualify for a Section 410 grant. Under the first alternative, States may qualify as a low fatality rate State if they have an alcohol-related fatality rate of 0.5 or less per 100 million vehicle miles traveled (VMT). Under the second alternative, States may qualify as a programmatic State if they demonstrate that they meet three of eight grant criteria for fiscal year 2006, four of eight grant criteria for fiscal year 2007, and five of eight grant criteria for fiscal years 2008 and 2009. Qualifying under both alternatives would not entitle the State to receive additional grant funds. SAFETEA-LU directs that States with low alcohol-related fatality rates, based on the agency's Fatality Analysis Reporting System (FARS), be awarded grants without the need to satisfy any of these programmatic criteria. There is also an additional Section 410 grant available to assist the 10 States with the highest impaired driving related fatalities as determined by the most recent FARS data.

Formula and Matching Requirements:

This program has no statutory formula. Matching Requirements: Percent: 80.%. This program has no statutory formula. The Federal Pipeline Safety Law authorizes Federal reimbursement of up to 80 percent of a State's expenditure during the year for personnel, equipment, and activities reasonably required by the State agency for the conduct of its pipeline safety program. The Law further stipulates that the State expenditures in any given year, without Federal assistance, cannot be less than the average amount expended by the State for gas and hazardous liquid safety programs for the 3 fiscal years prior to the fiscal year in which the Secretary makes the payment, except when the Secretary waives this requirement. The State agency must also agree to provide the remaining cost of the safety program(s). Within these limitations, the available funds are allocated by a method designed to reflect the degree to which a State has met certain goals established. The allocation is determined by assigning point values to the States for having achieved certain levels of program participation, dividing this point score by the sum of the States' point scores, and multiplying this ratio by the amount available for the distribution. PHMSA distributed the remaining funds according to certain criteria designed to seek improvements in State programs. The criteria used by PHMSA were the extent of intrastate jurisdiction, inspector qualifications, recommended number of inspection person-days, State adoption of applicable Federal regulations, and other relevant criteria. In 2008, the Federal allocations represented 41 percent of the estimated State requests in the natural gas program (range: 37 to 43 percent) and the Federal allocations represented 42 percent of the estimated State requests in the hazardous liquid program (range: 37 to 41 percent).

This program does not have MOE requirements.

TYPES OF ASSISTANCE:

USES AND USE RESTRICTIONS:

The Construction Reserve Fund (CRF), authorized under Section 511 of the Act, is a financial assistance program which provides tax deferral benefits to U.S. flag operators. Also the CRF

allows the accumulation of earnings from operations of vessels documented in the U.S., or the earnings from the investment of the Fund. APPALACHIAN REGIONAL COMMISSION

23.001 APPALACHIAN REGIONAL DEVELOPMENT (SEE INDIVIDUAL APPALACHIAN PROGRAMS)

(Appalachian Program)

FEDERAL AGENCY:

Appalachian Regional Commission

AUTHORIZATION:

Appalachian Regional Development Act of 1965, Public Law 89-4, as amended, 40 U.S.C. 14101-14704.

OBJECTIVES:

To help the regional economy become more competitive by putting in place the building blocks for self-sustaining economic development, while continuing to provide special assistance to the Region's most distressed counties and areas. This program focuses on activities which support ARC's mission to be a strategic partner and advocate for sustainable community and economic development. Activities funded must advance ARC's strategic plan. Specific program goals are: (1) Increase job opportunities and per capita income in Appalachia to reach parity with the nation; (2) Strengthen the capacity of the

people of Appalachia to compete in the global economy; (3) Develop and improve Appalachia's infrastructure to make the Region economically competitive; and (4) Build the Appalachian Development Highway System to reduce Appalachia's isolation. Specific objectives were developed for each goal. Grants are made either directly by the Commission or grants may supplement other Federal grants.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Appalachian funds enable the States and local areas to develop networks of facilities and services. Individual programs following this description illustrate the types of investments that can be made. In considering programs and projects to be given assistance under this Act, and in establishing a priority ranking of the requests for assistance presented to the Commission (ARC), the ARC follows procedures insuring consideration of the following factors: (1) The relationship of the project or class of projects to overall regional development and the reduction of economic distress; (2) the population and area to be served including the relative per capita income and the unemployment rates in the area; (3) the relative financial resources available to the State or political subdivision or instrumentalities thereof which seek to undertake the project; (4) the importance of the project or class of projects in relation to other activities which may compete for the same funds; (5) the prospects that the project for which assistance is sought will improve the opportunities for sustained employment, income growth, or socioeconomic development of the area; and (6) the degree and manner of private sector involvement. No financial assistance can be used to assist establishments relocating from one area to another. Each State is required to file a State Appalachian development plan, appraising prospects for development in its Appalachian area and relating to them a strategic program for which Appalachian funding is requested in that year. Once an application is submitted for the individual projects and given final approval, the grant is administered either by the basic Federal agency involved in that type of program or directly by the ARC. The counties (including any political subdivision located within such area) in which investment under the Appalachian Act (40 U.S.C. 14102) can be made are: in Alabama, the counties of Bibb, Blount, Calhoun, Chambers, Cherokee, Chilton, Clay, Cleburne, Colbert, Coosa, Cullman, DeKalb, Elmore, Etowah, Fayette, Franklin, Hale, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Limestone, Macon, Madison, Marion, Marshall, Morgan, Pickens, Randolph, Saint Clair, Shelby, Talladega, Tallapoosa, Tuscaloosa, Walker, and Winston; in Georgia, the counties of Banks, Barrow, Bartow, Carroll, Catoosa, Chattooga, Cherokee, Dade, Dawson, Douglas, Elbert, Fannin, Floyd, Forsyth, Franklin, Gilmer, Gordon, Gwinnet, Habersham, Hall, Haralson, Hart, Heard, Jackson, Lumpkin, Madison, Murray, Paulding, Pickens, Polk, Rabun, Stephens, Towns, Union, Walker, White, and Whitfield; in Kentucky, the counties of Adair, Bath, Bell, Boyd, Breathitt, Carter, Casey, Clark, Clay, Clinton, Cumberland, Edmonson, Elliott, Estill, Fleming, Floyd, Garrard, Green, Greenup, Harlan, Hart, Jackson, Johnson, Knott, Knox, Laurel, Lawrence, Lee, Leslie, Letcher, Lewis, Lincoln, McCreary, Madison, Magoffin, Martin, Menifee, Metcalfe, Monroe, Montgomery, Morgan, Nicholas, Owsley, Perry, Pike, Powell, Pulaski, Robertson, Rockcastle, Rowan, Russell, Wayne, Whitley, and Wolfe; in Maryland, the counties of Allegany, Garrett, and Washington; in Mississippi, the counties of Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Itawamba, Kemper, Lee, Lowndes, Marshall, Montgomery, Monroe, Noxubee, Oktibbeha, Panola, Pontotoc, Prentiss, Tippah, Tishomingo, Union, Webster, Winston, and Yalobusha; in New York, the counties of Allegany, Broome, Cattaraugus, Chautauq, Chemung, Chenango, Cortland, Delaware, Otsego, Schoharie, Schuyler, Steuben, Tioga, and Tompkins; in North Carolina, the counties of Alexander, Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Cherokee, Clay, Davie, Forsyth, Graham, Haywood, Henderson, Jackson, McDowell, Macon, Madison, Mitchell, Polk, Rutherford, Stokes, Surry, Swain, Transylvania, Watauga, Wilkes, Yadkin, and Yancey; in Ohio, the counties of Adams, Ashtabula, Athens, Belmont, Brown, Carroll, Clermont, Columbiana, Coshocton, Gallia, Guernsey, Harrison, Highland, Hocking, Holmes, Jackson, Jefferson, Lawrence, Mahoning, Meigs, Monroe, Morgan, Muskingum, Noble, Perry, Pike, Ross, Scioto, Trumbull, Tuscarawas, Vinton, and Washington; in Pennsylvania, the counties of Allegheny, Armstrong, Beaver, Bedford, Blair, Bradford, Butler, Cambria, Cameron, Carbon, Centre, Clarion, Clearfield, Clinton, Columbia, Crawford, Elk, Erie, Fayette, Forest, Fulton, Greene,

(See individual Appalachian program descriptions.). OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

The following describes the general nature and Administration of Appalachian Regional Development Program. The Appalachian Regional Development program is a joint Federal-State partnership for the development of the Appalachian region. Responsibility for the development of plans and programs authorized under the Act is vested in the ARC, composed of the 13 State Governors (who may appoint alternates) and a Federal Co-Chairman. General policies and procedures, and the allocation of Appalachian funds among the various programs and States are established by the ARC. Application for assistance may only be made through a State member of the ARC. The State Alternate's Offices are the coordinators for the Governors for Appalachian investments. Preapplication conferences can determine within a few weeks if the project conforms to the State Appalachian Development Plan. The appropriate local development district director should be the first contact. The State Alternate's Offices will provide guidance on specific problems and technical assistance in the preparation of applications. (See individual Appalachian program descriptions.)

Only infrastructure projects require an environmental review. Please see 40 U.S.C. 14507. An environmental impact statement is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Applications for individual projects must be submitted through and with the approval of the State Alternate to the Appalachian Regional Commission (listed in the appendix). (See individual Appalachian program description.)

Award Procedure:

Upon receipt of project applications approved by the State, the Federal Co-Chairman determines that the project satisfies all requirements for assistance under the Act and approves the application. If a basic Federal agency will administer the project, it is then notified and will disburse funds when appropriate. The ARC notifies Congressional offices and the office of the Governor of grant awards. (See individual Appalachian program descriptions.).

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

(See individual Appalachian program descriptions.).

Appeals:

There are no appeal procedures as such, project review allows for full and free interchange with applicants.

Renewals:

Generally renewals are not applicable except for administrative expenses, including technical services, of local development districts (23.009).

For projects in counties designated as At Risk, this limit can be raised to 70% and in economically Distressed counties, it can be raised to 80%. For projects in counties designated as Competitive (those approaching national economic norms), funding is usually limited to 30% of project costs. Funding is usually not available for projects located in counties that have attained or exceeded national economic norms.

For the Appalachian Development Highway System, funding for work is allowed at 80%, wherever the project is located. Administrative grants to Local Development Districts are generally funded at 50%. These grants may be increased to 75% upon request by a state in Districts where distressed counties are located. See the ARC Code for additional information.

23.002 APPALACHIAN AREA DEVELOPMENT

(Supplemental and Direct Grants)

FEDERAL AGENCY:

Appalachian Regional Commission

AUTHORIZATION:

Appalachian Regional Development Act of 1965, Public Law 89-4, as amended, 40 U.S.C. 14101-14704.

OBJECTIVES:

To help the regional economy become more competitive by putting in place the building blocks for self-sustaining economic development, while continuing to provide special assistance to the Region's most distressed counties and areas. This program focuses on activities which support ARC's mission to be a strategic partner and advocate for sustainable community and economic development. Activities funded must advance ARC's strategic plan. Specific program goals are: (1) Increase job opportunities and per capita income in Appalachia to reach parity with the nation; (2) Strengthen the capacity of the people of Appalachia to compete in the global economy; (3) Develop and improve Appalachia's infrastructure to make the Region economically competitive; and (4) Build the Appalachian Development Highway System to reduce Appalachia's isolation. Specific objectives were developed for each goal. Grants are made either directly by the Commission or grants may supplement other Federal grants.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

The grants may be used for providing supplemental funds under Federal grant-in-aid programs. To be eligible for special basic grants, projects must be of high priority in the State's Appalachian development plan and be either of critical importance to a phased investment and development program for a multicounty area, or of unusual economic benefit to such area. Refer to "General Provisions for Area Development Program" of the Appalachian Regional Commission Code and ARC Project Guidelines for additional use restrictions. Also, please see www.arc.gov. The Appalachian Regional Commission awards grants and contracts from funds appropriated to the Commission annually by Congress. At least half of ARC's Area Development grant funding is directed to projects that benefit counties and areas in the Appalachian Region designated by ARC as economically distressed. Most program grants originate at the state level. Potential applicants should contact their state ARC program manager to request a preapplication package.

Applicant Eligibility:

States, their subdivisions and instrumentalities and private nonprofit agencies.

Beneficiary Eligibility:

General public.

Credentials/Documentation:

Any finding, report, certification, or documentation required to be submitted to the head of the department, agency, or instrumentality of the Federal Government responsible for the administration of the basic Federal grant-in-aid program shall be accepted by the Federal Co-chairman with respect to a supplemental grant for any project under such program. Projects must conform to the ARC Code, the ARD Act, the State Appalachian Plan and annual State Strategy Statement. The Appalachian State Development Plan and the annual State Strategy Statement must be submitted by the Governors and approved by the Commission. Costs will be determined in accordance with OMB Circular applicable to the grantee. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

The State Alternate's Office is the coordinator for Appalachian investments. Preapplication conferences with the Appalachian local district director or the State Alternate's Office can determine within a few weeks if the project can be related to the State Appalachian development plan. The State Alternate's Office will provide guidance on specific problems and technical assistance in preparation of applications. An environmental impact statement may be required for this program, depending on the basic Federal grant-in-aid program being assisted. The standard application forms as furnished by the Federal agency and required by OMB Circular No. A-102 must be used for this program.

Only infrastructure projects require an environmental review. Please see 40 U.S.C. 14507. An environmental impact statement is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Application must be submitted and approved by the State member of the ARC. All proposed projects must conform to the State Strategy Statement submitted annually prior to the Fall Commission meeting. Guidelines and forms for funding Appalachian development projects are available from the local development district director and the State Alternate's Office. A letter of transmittal signed by the State member and an executed ARC Form 1 is required with the submission.

Award Procedure:

Upon determination that the State approved project is eligible within a Commission approved Appalachian State Development Plan and Strategy Statement, the Federal Co-Chairman determines that the project satisfies all Federal requirements. If a basic Federal agency will administer the project it is then notified and will disburse the grant funds when appropriate. The ARC notifies Congressional Offices and the Office of the Governor of grant awards.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 30 to 60 days after the receipt of the application at the Commission.

Appeals:

None.

Renewals:

None.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program. Matching Requirements: Generally grants are limited to 50% of project costs. For projects in counties designated as At Risk, this limit can be raised to 70%, and in economically distressed counties, it can be raised to 80%. For projects in counties designated as competitive (those that are approaching national economic norms), funding is usually limited to 30% of project costs. Funding is usually not available for projects located in counties that have attained or exceeded national economic norms. If otherwise eligible for funding, projects involving construction assistance for housing under the Appalachian Regional Development Act (ARDA) (40 U.S.C. 14503) cannot exceed 10% of total project costs regardless of location. The ARC Code and "Appalachian Regional Commission Project Guidelines" furnish details. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Assistance is provided until completion; funds are transferred to the basic Federal agency and disbursed as appropriate. ARC reserves the right to withdraw grants for projects not under contract within 18 months of approval. See the following for information on how assistance is awarded/released: Generally, most funds are awarded on a quarterly basis. Grant monies are released in a timely fashion through coordination with the applicant.

Reports:

No program reports are required. No cash reports are required. Grantees of non-construction projects submit quarterly reports outlining progress throughout the award period. Grantees of non-construction projects submit

quarterly expenditure reports along with their progress reports. Grantees of non-construction assess performance in their final closing report. Performance is measured against estimated projections in the initial application.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

Records:

Records as required by the basic Federal agency. Under the total audit concept, audits will be made on an organization-wide basis (rather than grant-by-grant) under GAO guidelines, Standards for Audit of Governmental Organizations, Programs, Activities and Functions, and for programs covered by A-102, Attachment P.

30.011 EMPLOYMENT DISCRIMINATION TITLE I OF THE AMERICANS WITH DISABILITIES ACT

FEDERAL AGENCY:

Equal Employment Opportunity Commission

AUTHORIZATION:

Americans with Disabilities Act, Title I & V, as amended Public Law 101-336, 42 u.S.C. 12101-12117; 12201-12213d; Rehabilitation Act of 1973, as amended, 29 U.S.C. 791-794a.

OBJECTIVES:

The Americans with Disabilities Act (ADA) prohibits employment discrimination against applicants or employees based on disability. The ADA also prohibits retaliation against applicants or employees who oppose

employment practices that discriminate based on disability or who file a discrimination charge, testify, or participate in any way in an investigation, proceeding, or litigation under the ADA.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

Individuals are protected from discrimination on the basis of disability by employers with 15 or more employees, including Federal, state, and local governments, employment agencies, and labor organizations. The EEOC Assessment System, available at <https://apps.eeoc.gov/eas/>, enables individuals to determine whether EEOC is the appropriate agency to contact regarding discrimination, harassment or retaliation. Charges of discriminatory employment practices by or on behalf of an individual or group of individuals claiming to be aggrieved are received. Mediation of the dispute may be offered. If mediation is not used or is not successful, investigations may ensue. If reasonable cause is not found, the Commission issues a right to sue letter. If reasonable cause is found, the charge is conciliated. If conciliation proves to be unsuccessful and the employer is not a State or local government, the Commission may bring a civil action against respondent(s) named in the charge or issue a right to sue letter. If conciliation fails on a charge against a State or local government, EEOC refers the case to the Department of Justice for consideration of litigation or issuance of a right to sue letter.

Applicant Eligibility:

Any aggrieved individual, or any individual, or any labor union, association, legal representative, or organization filing on behalf of an aggrieved individual, who has reason to believe that an unlawful employment practice within the meaning of Title I of the ADA has been committed by an employer with 15 or more employees, an employment agency, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining.

Beneficiary Eligibility:

Applicants, current employees, and former employees of the named respondents in a charge who have been subjected to unlawful employment practices.

Credentials/Documentation:

An allegation of unlawful employment practice(s) may be made in person or by mail. An allegation must be in writing, signed, and notarized (only when necessary to meet State or local requirements) or supported by an unsworn declaration in writing under penalty of perjury. Charge forms (EEOC Form 5, Charge of Discrimination) are available to all persons from all field offices of the Commission. This program is excluded from coverage under OMB Circular No. A-87.

Charges may be filed either by mail or in person at the appropriate field office of the EEOC.

Award Procedure:

A charge is sufficient when the Commission receives from the person making the charge a written statement that includes an allegation of discrimination, the name(s) of the parties involved, and a request that the EEOC act to protect the applicant or employees rights or otherwise settle a dispute between the applicant or employee and the employer.

Deadlines:

Range of Approval/Disapproval Time:

If the evidence does not establish that discrimination occurred, charging parties will be given written notice of their right to sue. Persons can also ask for a notice of right to sue before EEOC finishes its investigation. When a right to sue is issued on request, EEOC usually stops investigating. Suit must be brought within 90 days of receipt of the notice of right to sue letter. A charging party may file a lawsuit within 90 days after receiving a notice of a right to sue from EEOC, as stated above. Under ADA, a charging party also can request a notice of right to sue from EEOC 180 days after the charge was first filed with the Commission, and may then bring suit within 90 days after receiving this notice.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Regular SAA Partnership Agreements support four components: 1) the state arts plan for priorities identified at the state level; 2) elements of the state plan that address arts education; 3) elements of the state plan that foster the arts in underserved communities; and 4) projects that strengthen a state's program of support for the folk & traditional arts. RAO Partnership Agreements offer support for: 1) a regional arts plan; 2) touring intended to give all Americans access to excellent, live performing arts; and 3) projects that strengthen a region's program of support for the folk & traditional arts. Limited Partnership funds also are available for national services provided by membership organizations of SAAs and RAOs. Arts Endowment Partnership Agreement funds must be used to supplement and not to supplant non-Federal funds.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: A singular achievement of Federal/State Partnership has been the establishment, in all 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, the Northern Marianas, American Samoa, and Guam of 56 continuing nonprofit organizations which have succeeded at serving as the link between the humanities and the interests and concerns of the States' citizens. In the last year, councils supported thousands of programs that reached millions of Americans. Councils are continuing to design and sponsor programs and produce materials that reach new audiences. Council-funded exhibitions attracted close to eleven million visitors, while council-funded media projects attracted 500 million viewers. Finally, 1.7 million K-12 students participated in council-funded projects. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: Humanities Washington has developed an expanded grantmaking program that, in remote and rural areas especially, may support the only humanities programs that take place in a town or county. The Idaho

Humanities Council sponsored an interdisciplinary teacher development institute that explored environmental literature. The North Carolina Humanities Council expanded the reach and content of its publications and website as well as supported the Museum on Main Street exhibition, New Harmonies: Celebrating American Roots Music. The We Are California: Stories of Immigration and Change website of the California Council for the Humanities is the first to be devoted to the history of California immigration and migration as well as the first where Californians can tell their own coming-to-California stories. The Ohio Humanities Council is planning for the Sesquicentennial of the Civil War as well as public television programs on Ohio's historic places. Thirty-eight councils support literacy programming and all sponsor discussion programs, many of which are based on the common reading of texts. To ensure depth and seriousness of reflection, some councils have selected topics of specific concern to citizens of their states and shaped year-long events to explore each topic. The Illinois Humanities Council conducted such an initiative on the meaning of the genetics revolution, involving 34 partner organizations. The council is following up this year with a one-year series of programs entitled All Consuming: Conversations on Oil and Water, which invites citizens of the state to join the council in using the humanities to ask how access to, control and consumption of oil and water play out in the past, current, and future geopolitical environment. The Virginia Foundation for the Humanities uses electronic media to initiate discussions through their Backstory radio call-in show, which features three prominent historians to provide perspective on events happening around us every day. Recent programs have featured discussions of the history of presidential transitions and the history of financial crisis. 64.116 VOCATIONAL REHABILITATION FOR DISABLED VETERANS

(Vocational Rehabilitation)

FEDERAL AGENCY:

Veterans Benefits Administration, Department of Veterans Affairs

AUTHORIZATION:

Veterans' Rehabilitation and Education Amendments of 1980, Public Law 96-466, 38 U.S.C 3102.

OBJECTIVES:

To provide all services and assistance necessary to enable service-disabled veterans and service persons hospitalized or receiving outpatient medical care services or treatment for a service-connected disability pending discharge to get and keep a suitable job. When employment is not reasonably feasible, the program can provide the needed services and assistance to help the individual achieve maximum independence in daily living.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; DIRECT LOANS; DIRECT PAYMENTS FOR A SPECIFIED USE; DIRECT PAYMENTS WITH UNRESTRICTED USE

USES AND USE RESTRICTIONS:

The program offers the services and assistance necessary for an individual to increase their level of independence in daily living, or obtain and retain suitable employment. This is employment that matches the individual's aptitudes, interests, and abilities and does not worsen the individual's disabilities. An individual may reach an employment goal directly by receiving job seeking and job placement services. If direct placement is not possible, the program provides education or training to qualify the individual for employment. If the individual requires education or training, the program provides for direct payment to service providers for the entire cost of tuition, books, fees, supplies, and other services. As part or all of a rehabilitation program, individuals may receive services and training designed to help them increase their level of independence in their homes and communities. Counseling services are provided to the individual throughout his or her participation in the program. In addition to disability compensation, the veteran receives a monthly subsistence allowance when participating in training at least half-time. Advances of up to \$1,041.48 may be made to veterans to meet unexpected financial difficulties. These advances do not bear interest and are repaid out of future VA benefit payments. Although no set repayment period is established, the monthly rate of repayment may not generally be less than 10 percent. In general, a new advance may not be made until a previous advance has been fully repaid. Usually, the training phase of the rehabilitation program may not exceed the equivalent of 48 months of full-time benefits nor may training be provided more than 12 years after the individual becomes eligible to apply for the program. Following training, or sometimes as the whole of a rehabilitation program, the veteran may also receive up to 18 months of counseling, job placement and post-placement services. The veteran may receive an employment adjustment allowance equal

to 2 months of subsistence during this period of services, but only if employability was achieved as a result of services received in a program which included training. Veterans who meet certain requirements may receive assistance to become self-employed.

Applicant Eligibility:

Veterans of World War II and later service with a service-connected disability or disabilities rated at least 20 percent compensable and certain service-disabled servicepersons pending discharge or release from service if VA determines the servicepersons will likely receive at least a 20 percent rating and they need vocational rehabilitation because of an employment handicap. Veterans with a 10 percent service-connected disability may be eligible if they first applied for vocational rehabilitation prior to November 1, 1990, and they have an employment handicap. In addition, veterans with compensable ratings of 10 percent may also be eligible if they are found to have a serious employment handicap.

Beneficiary Eligibility:

Veterans of World War II and later service with a service-connected disability or disabilities rated at least 20 percent compensable and certain service-disabled servicepersons pending discharge or release from service if VA determines the servicepersons will likely receive at least a 20 percent rating and they need vocational rehabilitation because of an employment handicap. ENVIRONMENTAL PROTECTION AGENCY

66.001 AIR POLLUTION CONTROL PROGRAM SUPPORT

FEDERAL AGENCY:

Office of Air and Radiation, Environmental Protection Agency

AUTHORIZATION:

Clean Air Act of 1990, Section 105, Public Law 101-549.

OBJECTIVES:

The objectives of the 105 program are to assist State, Tribal, Municipal, Intermunicipal, and Interstate agencies in planning, developing, establishing, improving, and maintaining adequate programs for the continuing prevention and control of air pollution and/or in the implementation of national primary and secondary air quality standards. Funding Priority - Fiscal Year 2009: By nature, much of the work occurring in FY 2008 will continue into FY 2009. However, several new developments will alter the priorities for the program across the country in FY 2009 the response to the new national ambient air quality standards (NAAQS) for ozone, lead, and fine particulates (PM2.5). Recipients will continue to review air quality reports and take appropriate actions dealing with new violating attainment areas with any of the NAAQS; submit re-designation requests including maintenance plans for areas with clean air quality data as appropriate; work with local area stakeholders to support innovative and voluntary initiatives; continue to implement 8-hr ozone SIPs; and submit any outstanding ozone SIP elements (including prior commitments). Recipients will also begin preparing recommendations on designations for the revised ozone and lead NAAQS. For PM2.5, recipients will submit any outstanding PM2.5 SIP elements as needed and implement PM2.5 plans designed to attain the 1997 NAAQS. They will also take any final actions needed in the 2006 PM2.5 NAAQS designations process, and begin SIP planning for attaining the 2006 standards. Some states will work with local agencies to implement woodstove change-out programs in areas where change-outs could significantly reduce ambient particle concentrations. Areas

may also explore feasibility of changing out existing outdoor wood-fired boilers to significantly reduce PM2.5 concentrations. As in FY 2008, for ambient monitoring, all state/local primary quality assurance organizations operate monitors and submit NAAQS pollutant data, Photochemical Assessment Monitoring Stations (PAMS), and quality assurance (QA) data to AQS directly or indirectly through another organization according to schedule in 40 CFR Part 58. Data must also meet quality assurance requirements according to Appendix A to 40 CFR Part 58. These organizations will also submit their required annual (monitoring) network plans by July 1 of 2009. They must also certify their 2008 NAAQS pollutant data in AQS and provide supporting documentation by July 1, 2009 (state/local only, unless tribal work plan requirement). Additionally monitoring organizations will report real time ozone and PM2.5 data to AirNOW system for cities required to report the Air Quality Index (AQI) (state/local only); will continue the 5-year-cycle network assessment required by July 1, 2010; (state/local only, unless tribal work plan requirement), and include final NCore siting plan in Annual Monitoring Network Plan due July 1, 2009. Air quality reporting, including particle pollution forecasting, will be expanded to additional cities. States affected by the NOx SIP Call will continue to contribute a portion of their grant funds to support a centrally-administered emissions budget and trading program as part of their NOx State Implementation Plan. For regional haze, States and other stakeholders will continue to work with EPA on issues related to submitted regional haze SIPs and will continue to implement Best Available Retrofit Technology (BART) requirements. As in FY 2008, funds for air toxics purposes are provided to: expand existing air toxics monitoring networks operated by State, Tribal, and local agencies in order to better characterize air toxics risks and assess the effectiveness of control strategies. In FY 2009 this includes an increased focus on monitors located at schools. Recipients will collect data for the integrated 2008 hazardous air pollutant (HAP) emissions inventory; implement delegated or approved section 112, 111(d) and 129 standards, as appropriate, for major sources and area sources; implement delegated residual risk standards; and work with communities to develop and implement voluntary air toxics programs that address outdoor, indoor, and mobile sources with emphasis on areas with potential environmental justice concerns. State and local air pollution control agencies work with EPA to operate the national fine particulate (PM2.5) monitoring network to accurately assess and characterize the nature and extent of fine particulates (PM2.5) across the country. This assessment is necessary to determine the air quality status of an area in relation to the national PM2.5 ambient air quality standard. At least three years of quality-assured data are required in order to determine an area's attainment status. The air quality status of an area will determine the nature and complexity of its attainment plan, its associated control strategies, and its implementation schedule. The immediate goals of this multi-year program are: appropriate spatial characterization of PM2.5 NAAQS; public reporting of PM2.5 in the Air Quality Index; characterization of PM2.5 chemical speciation data for long term trends; development and accountability of emission control programs and tracking of regional haze, and limited support of health studies; implementation of NCore CO, SO2, NO2/NOy trace-level monitoring to support characterization of PM precursors; assessment of PM2.5 data quality; and procurement and testing of PM2.5 filters. Grant funds are used to provide support to eligible state and local air agencies for continued operation of high value federal reference method (FRM) and speciation monitoring sites; additional investments in PM2.5 mass and speciation continuous monitoring and associated data management systems for timely reporting of high quality data; and continued investments in precursor gas analyzers, data analyses, and quality assurance activities that will support better understanding of particle formation.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: The Clean Air Act does not prescribe a specific statutory funding formula but does direct that the factors of population, the extent and severity of the air pollution problem, and financial need, be considered in the allocation of available resources by the Agency. The current allocation approach is currently under review for updating by the Agency. EPA is undertaking the review in consultation with eligible recipients. State, Interstate, and Local programs may receive up to 60 % Federal funding for the total approved program costs. The Grantee must contribute a minimum of 40% as well as meet a maintenance of effort (MOE) requirement. The amount of Federal share of grant costs should be determined by reference to the criteria set forth in Section 105 of the Clean Air Act and in 40 CFR 35.145, 40 CFR 35.146, and 40 CFR 147. Not more than 10 % of the funds available shall be granted for air pollution control programs in any one State. Not less than one-half of one % of the funds are to be made available as a minimum to a State (overall) for application. However, award of these levels of funds will be made only if the agencies within the State meet the requirements of the Act and grant regulations. For Indian Tribes establishing eligibility pursuant to Section 35.573, the Regional Administrator may provide financial assistance in an amount up to 95 % of the approved costs of planning, developing, establishing, or improving an air pollution control program, and up to 95 % of the approved costs of maintaining that program. After 2 years from the date of each Tribe's initial grant award, the Regional Administrator will reduce the maximum federal share to 90 %, as long as the Regional Administrator determines that the Tribes meet certain economic indicators that would provide an objective assessment of the tribe's ability to increase its share. This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

The terms of the grant shall be determined at time of award. See the following for information on how assistance is awarded/released: Assistance agreements may be fully funded by a lump sum or funded incrementally (quarterly).

Range and Average of Financial Assistance:

In FY 2008 - From approximately \$69,550 to \$6,862,000 per recipient; average approximately \$1,500,000.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: In FY 2008, approximately 110 applications were received from State, Local and Tribal agencies to help support their continuing air quality programs were funded. This same level is expected to be received and funded in FY 2009. These programs plan and implement measures to improve, protect, monitor and report air quality in their communities. The plans integrate state and local measures with federal measures - including advances in environmental technologies (e.g., cleaner fuels, vehicle and industrial technology), in addressing and reducing air pollution and in meeting National Ambient Air Quality Standards (NAAQS). The NAAQS are regularly reassessed to assure that public health and welfare is being adequately protected. The most recent designations for ozone occurred in 2004 and 89 of the original 126 ozone areas are now meeting that NAAQS based on data collected during 2004-2006. Thirteen of the 14 Early Action Compact areas will have been designated attainment by April 15, 2008. For PM, the Agency designated 86 areas, with a total population of 35.8 million people, as nonattainment for PM10 in 1992 and 46 of those areas remain in nonattainment. In 4/05, EPA designated 39 areas as nonattainment for the PM2.5 based on air quality data collected during 2001-2003. Some PM2.5 design values in designated nonattainment areas are improving slightly, especially in the western U.S violated the annual and not the 24-hour NAAQS. As the new standards for ozone and PM2.5 take affect, updates on in designations and progress in air quality status will be provided. States have achieved widespread attainment of standards for several of the criteria pollutants: CO, SO2, NO2 and Lead. Specifically: for carbon monoxide EPA originally designated 78 areas, affecting 69.8 million people, as nonattainment for CO in 1992 with 3 nonattainment areas, affecting 719 thousand people remaining. For sulfur dioxide (SO2), EPA designated 54 areas, with a total population of 9.8 million people, as nonattainment for SO2 in 1992 with 10 nonattainment areas remaining affecting a total population of 1.1 million. All 10 areas have monitoring data measuring attainment of the SO2 NAAQS. For nitrogen Dioxide (NO2), there are no designated NO2 nonattainment areas and all areas continue to meet the NAAQS. For the previous lead (Pb) NAAQS, EPA designated 13 areas, with a total population of 1.8 million people as nonattainment for Pb in 1992 and 2 nonattainment areas remain. Areas failing to meet the new lower lead NAAQS

have not been designated as nonattainment. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

66.600 Environmental Protection Consolidated Grants for the Insular Areas - Program Support

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: Continuing program grants are provided to State, Local and Tribal air pollution control agencies for the purpose of operating programs that plan and implement activities to achieve ambient air quality standards. These programs cover: planning for attainment of updated national air quality standards including fine particulates and ozone; state implementation plan development; ambient monitoring; emission inventories; air and emissions modeling; source permitting; certain compliance and enforcement activities related to mobile and non-Title V stationary and area sources; public outreach and education activities; development and implementation of air quality regulations; implementation of market-based, early action compacts and other innovative air pollution reduction or prevention strategies; technical training; risk and data analyses; information management; and program evaluation, progress reporting and other program operation and maintenance activities. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

The criteria for awarding air pollution control program assistance grants are provided in the 1990 Clean Air Act, Section 105, and set forth in State and local assistance grant regulations (40 CFR 35). Some of the criteria considered for award include the following: 1) No grant may be awarded unless the program contained in the grant application meets the requirements of Section 35.140 (program purposes and associated regulations) and has been approved by the Regional Administrator. Sections 35.104 and 35.107 describe what an agency needs to do to prepare an adequate application. This usually includes the use of annual program technical and grant guidance from EPA and is generally done in consultation with the EPA Regional Office. 2) No grant may be awarded until the Regional Administrator has consulted with the official designated by the Governor(s) of the State(s) affected by such award pursuant to Section 105(b) of the Clean Air Act. Such consultation should consider the role of the applicant in the enforcement of any applicable implementation plan and confirm that the applicant's program will be generally compatible with the objectives of the applicable implementation plan. 3) The requirements of this Section shall not apply to Indian Tribes that have established eligibility pursuant to Section 35.573 and intertribal agencies made up of such Tribes. 4) No grant may be awarded unless the Regional Administrator has determined that the agency has adequate air pollution control authority and necessary regulations to implement such authority. The evaluation and selection criteria for competitive awards under this CFDA description will be described in the competitive announcement.

66.032 STATE INDOOR RADON GRANTS

(SIRG)

FEDERAL AGENCY:

Office of Air and Radiation, Environmental Protection Agency

AUTHORIZATION:

Indoor Radon Abatement Act, Section 306, 15 U.S.C 2661; Toxic Substances Control Act, Title I, Section 10(a).

OBJECTIVES:

The Indoor Radon Abatement Act (IRAA), Section 306, and the Toxic Substances Control Act (TSCA), Section 10(a), authorizes EPA to assist States and Federally Recognized Indian Tribes develop and implement programs to assess and mitigate radon-related lung cancer risk. Funding Priority -- Fiscal Year 2009: In FY 2009 the SIRG program will emphasize radon risk reduction through increased action by consumers, homeowners, real estate professionals, homebuilders, tribes and state-local governments. Projects funded by SIRG should have the following results:

Building homes with radon-resistant new construction,

Reducing radon in existing homes, and

Reducing radon in existing schools and building new schools with radon-reducing features.

To achieve these outcomes and increase results, the SIRG program aims to: (1) improve the effectiveness of state-local/tribal radon programs; (2) focus on high radon potential areas, especially for new home building and code adoption; (3) encourage testing and mitigation within residential property transfers; and (4) encourage SIRG recipients to be strategic in their risk reduction efforts, e.g., by institutionalizing risk reduction practices and policies; utilizing best practices; and, developing better data and information sources.

TYPES OF ASSISTANCE:**PROJECT GRANTS****USES AND USE RESTRICTIONS:**

The following activities are eligible for funding under SIRG: radon surveys, public information and educational materials, radon control programs, purchase of radon measurement equipment or devices, purchase and maintenance of analytic equipment, training, program overhead and administration, data storage and management, mitigation demonstrations, and toll-free hotlines. Funding for these eligible activities may be used to develop State radon response programs. States may, at the Governor's direction, provide assistance to local governments for public information and educational materials, radon control programs and training. **RESTRICTIONS:** The statute places the following restrictions on the use of Federal funds: 1) SIRG recipients must perform satisfactorily in the preceding budget period to be eligible to receive additional funding; 2) State expenditures for measurement equipment/devices and mitigation demonstrations cannot exceed 50 percent of the grant amount in a budget period; 3) State expenditures for general overhead and program administration cannot exceed 25 percent in a budget period; and 4) SIRG applicants may use grant funds for financial assistance to persons only to the extent that such assistance is related to demonstration projects or the purchase and analysis of radon measurement devices.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: This program has no statutory formula. EPA may provide States with up to 60 percent of allowable costs of approved SIRG Program activities. TSCA Section 306 requires a progressive match for States and Tribes in the first, second and third year of participation in the SIRG program. (25%, 40%, and 50% respectively). However, in FY 2005 Congress changed the recipient match requirement to be a minimum of 40 percent for participants with three or more years in the program. Under TSCA 10(a) authority, Federally Recognized Indian Tribes are not required to provide a cost share match, but competition is required.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Under TSCA Section 306, EPA normally funds grants and cooperative agreements for a period of 12-36 months. EPA negotiates project periods appropriate to the specific project, and encourages 3 year grant periods. However, EPA project periods are limited to a maximum of 5 years. Grants and cooperative agreements are fully funded or incrementally funded. Successful applicants under a competitive funding announcement are notified via U.S. mail or electronic mail. Method of awarding/releasing assistance: lump sum.

Reports:

Grantees are required to submit program reports in accordance with Agency policy and the Monitoring and Reporting Program Performance requirements stated in Federal Grant Regulations 40 CFR Part 31 and OMB Circular No.A-102. Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Grants and cooperative agreements are subject to inspections and audits by the Comptroller General of the United States, the EPA Office of Inspector General, other EPA staff, or any authorized representative of the Federal government. Reviews by the EPA Project Officer and the Grants Specialist may occur each year.

Records:

Recipients must keep financial records, including all documents supporting entries in accounting records and to substantiate changes in grants available to personnel authorized to examine EPA recipient grants and cooperative agreement records. Recipients must maintain all records until 3 years from the date of submission of the final expenditure reports. If questions, such as those raised as a result of an audit remain following the 3-year period, recipients must retain records until the matter is completely resolved.

Obligations:

(Project Grants) FY 08 \$7,948,000; FY 09 est \$8,074,000; FY 10 est \$8,074,000

Range and Average of Financial Assistance:

Federal funding can range from \$15,000 to a maximum of 10% of the annual appropriation amount per State applicant and \$10,000 to \$80,000 per Tribal applicant. The average Federal funding per applicant is \$150,000 for States and \$30,000 per Tribe. Minimum awards are \$10,000.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: In FY08, SIRG awarded approximately 42 assistance agreements (38 states, 4 tribes) totaling \$7,948,000. In calendar 2008 an estimated 129,500 additional homes included radon-reducing features (latest data; 62,500 new homes and 67,000 existing homes). Much of this progress resulted from the work of coalitions and partnerships comprised of local governments, national and local nonprofit organizations, advocates and other leaders. The SIRG program continues to stress the importance of achieving and measuring results in the number of homes, schools, and other buildings tested and mitigated for radon; in the number of new homes built with radon-reducing features, and existing homes mitigated within real estate transactions (disclosure and property condition). Recipients are required to include the SIRG results measures template in their work plans, and projects with clear risk reduction benefits are to be preferred over projects projected to have lesser risk reducing results. Persons and organizations looking for ways to participate in the national radon risk-reduction effort should visit RadonLeaders.org. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: The State and Tribal Indoor Radon Grant (SIRG) program has awarded grants to States and Tribes to: (1) establish effective radon programs among states, territories, and federally recognized Indian tribes; (2) increase the number of homes, schools, and other buildings tested and mitigated from radon; (3) implement radon resistant construction standards in high risk areas; (4) encourage radon testing and disclosure in connection with real estate transfers; and (5) promote environmental justice through programs and outreach efforts directed at low-income and/or culturally-diverse populations. The Agency encourages recipients to partner with other public health and environmental organizations to increase program effectiveness. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

The EPA will base its review of SIRG applications on whether they reflect the program's goals and promote integrity in States' use of grant funds. Pursuant to

TSCA Section 306(e), if State applications exceed the funds appropriated for award in a fiscal year, EPA will prioritize State activities based on the following criteria: (1) the seriousness and extent of the radon contamination problem to be addressed; (2) the potential for the activity or project to bring about reduction in radon levels; (3) the potential for the development of innovative radon assessment techniques, mitigation measures as approved by the Administrator, or program management approaches which may be of use to other States; (4) the potential for the activity to implement EPA's model radon-resistant building standards; (5) the potential for the development of radon programs in high-risk areas; and (6) the potential for the activity to improve the effectiveness and viability of the State program. The evaluation and selection criteria for competitive awards under this CFDA description will be described in the competitive announcement. Under the TSCA 10(a) authority, Tribes are authorized to receive grants for demonstration projects. However, under this authority, SIRG funding is awarded competitively. EPA may establish additional criteria related to demonstration activities or other aspects of the SIRG program. All other requirements of the SIRG program are applicable to the States and Tribes unless otherwise stated in TSCA 306 or TSCA 10(a).

66.034 SURVEYS, STUDIES, RESEARCH, INVESTIGATIONS, DEMONSTRATIONS, AND SPECIAL PURPOSE ACTIVITIES RELATING TO THE CLEAN AIR ACT

FEDERAL AGENCY:

Office of Air and Radiation, Environmental Protection Agency

AUTHORIZATION:

National Environmental Policy Act of 1969, Section 102(2)(F), Public Law 91-190, 42 U.S.C 4332; Clean Air Act of 1963, Section 103, Public Law 95-95, 42 U.S.C 7401.

OBJECTIVES:

To support Surveys, Studies, Research, Investigations, Demonstrations and Special Purpose assistance relating to the causes, effects (including health and welfare effects), extent, prevention, and control of air pollution to include such topics as air quality, acid deposition, climate change, global programs, indoor environments, radiation, mobile source technology and community-driven approaches to transportation and emissions reduction. Funding Priority - Fiscal Year 2009: (1) Indoor Environments. This activity will support surveys, studies, research, and/or investigations or demonstrations, performed by concerned, national, non-profit organizations that lead to effective outreach strategies to educate key audiences about indoor air pollutants and their associated health risks, and convince them to adopt effective mitigation and control strategies. Currently, the Program focuses on several critical aspects of indoor air quality that pose significant risks to public health, and in particular, to children and to other disproportionately impacted segments of society. These include: reducing the exposure of children and others with asthma to indoor triggers that worsen their condition; promoting the adoption of operation and maintenance practices in schools throughout the nation to reduce the harmful effects of poor indoor air quality on the health of students and staff; promoting voluntary radon testing by homeowners to identify elevated levels and fix them when they are found, as well as working with homebuilders to incorporate radon resistant construction features into new homes; and encouraging adult smokers to protect their children from the adverse health effects of environmental exposure to secondhand smoke by making a conscious decision to smoke outside and keep their homes and cars smokefree. (2) Radiation. The Radiation Program supports technical, outreach, and educational activities relating to environmental radiation. This activity currently manages a national environmental radiation monitoring program, is prepared for and responds to incidents involving nuclear or radiological material, oversees the safe disposal of radioactive waste, maintains two laboratories that perform radiological sampling and analyses, and provides standards for protecting human health and the environment from radioactive material. Activities could include performance testing and evaluation, development of analytical procedures, and purchasing of radiation laboratory equipment. This demonstration laboratory pilot activity supports and enhances radiological laboratory capability and capacity across the nation to reduce the gap in analyzing environmental samples following a significant national radiological incident. Key activities include audits and proficiency testing, provision of radiological instrumentation, supplies, training, and limited facilities upgrades. (3) Community-Scale Air Toxics Ambient Monitoring (CSATAM). The CSATAM Grant Program results in discreet two-year projects designed to assist state, local and tribal communities in identifying and profiling air toxics sources, characterizing the degree and extent of local air toxics problems, and tracking progress of air toxics reduction activities in specific local areas without reliance on often uncertain estimates of emissions and air dispersion models. Further, these grants typically allow the recipient state,

local, and tribal air pollution control agencies to establish or enhance hazardous air pollutant monitoring networks, thus providing long term capability to investigate and assess specific local air quality scenarios of concern. Note that from year to year, this program may establish categories of projects and funding targets within those categories. (4) Mobile Sources Technologies. Grants will encompass studies and investigations utilizing state-of-the-art experimental techniques in advanced engine development technology, including hydraulic hybrid drivetrains, to optimize fuel economy, reduce exhaust emissions (including PM and NOx), and improve performance. Additional grants will support studies identifying barriers to technological innovation, analyzing innovative strategies for overcoming these barriers, and encouraging the development and adoption of new vehicle and fuel technologies for the control of emissions. (5) Heavy Duty Truck Fuel Consumption and Emissions Reductions. This program will study and analyze fuel consumption and emissions reductions associated with the use of innovative technologies for heavy duty diesel trucks. Studies and evaluations will involve truck fleets that operate under varying conditions, so as to evaluate the effectiveness of the various technologies. (6) National Internet-based On-Board Diagnostic (OBD) Information Exchange. This program will support activities that maintain, update, and improve the Internet-based information clearinghouse to facilitate the accurate and timely exchange of technical information related to on-board diagnostic (OBD) between state inspection/maintenance programs, the automotive industry, and the general public. (7) Climate Change. The Climate Change Division supports activities relating to improving economic, technical and programmatic understanding of climate change. The Climate Change Division supports projects relating to technical, outreach, and education about climate change impacts, mitigation and adaptation options so that the private and public sectors may more effectively and comprehensively address their climate goals. The Climate Change Division supports projects that break down market barriers that limit investment in technologies that reduce methane and non-CO2 greenhouse gases; projects that address the technical issues surrounding sequestration and carbon storage; projects that address collection and analyses of economic data relating to climate change; and programs such as Methane to Markets that support climate technology transfer in developing and transition countries. (8) Climate Protection Partnerships. EPA funds Global climate Change programs which are voluntary government/industry partnership programs designed to capitalize on the opportunities that consumers, businesses, and organizations have for making sound investments in efficient equipment, policies and practices. During FY 2009, the Global Climate Change program will manage a number of efforts to remove barriers in the marketplace and to deploy technology faster in the residential, commercial, and industrial sectors of the economy. Our programs work by overcoming widely acknowledged barriers to energy efficiency: lack of clear, reliable information on technology opportunities; lack of awareness of energy efficient products and services; lack of financing options to turn lifecycle energy savings into initial cost savings for consumers; low incentives to manufacturers for efficiency research and development. In addition, our Global Climate Change programs will provide technical assistance, training, information exchange and other forms of cooperation to enhance the capabilities of governments and other stakeholders to protect human health and the environment regionally and globally. (9) Sustainable Skylines Initiative. The Sustainable Skylines Initiative (SSI) is intended to result in projects that: maximize federal, state, regional, and local resources to provide tangible cross-cutting projects that result in specific air, water, waste and livability benefits; provide economy of scale to amplify media attention, level of support, and outreach ability for specific projects while showing a larger sustainability effort; and bridge city and regional sustainability efforts to re-energize existing programs and developing key emerging priorities. A project must be in the nature of research, investigation, study, experiment or demonstration designed to advance the state of the knowledge in the chosen area. The overall goal of the SSI is to work in partnership with the funded entity to create a locally-led, self-sustaining, community-based partnership that will continue to improve the local environment, even after the funding agreement ends. During FY 2009, the program will initiate efforts with new communities selected for the SSI.

Range and Average of Financial Assistance:

There is no minimum amount of assistance. Cooperative agreements awarded based on Level I agreements will range from \$75,000 to \$100,000 with an average Level I award of \$90,000. Level II agreements will range from \$150,000 to \$300,000 with an average Level II award of \$275,000.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: The CARE program uses two sets of cooperative agreements. In the smaller Level I agreements, the community, working with EPA, creates a collaborative problem solving group made up of the various stakeholders in the community. In FY06, OAR received 110 applications in response to the CARE assistance agreement competition, and 17

were selected to receive cooperative agreements funding in October 2006. In FY07 we received 130 applications and funded 22 projects, including two of the FY 05 Level I projects who successfully completed their project and competed for and received a Level II grant. In FY 08 we received 140 applications and funded 18 projects, including two of previously funded Level I projects who successfully completed their project, competed for and received a Level II grant. Fiscal Year 2009: In FY 2009 we received over 233 applications and estimate awarding 9 grants. CARE communities have implemented a variety of EPA Voluntary Programs and reduced citizen's exposure to toxics including lead, diesel emissions, mercury and environmental tobacco smoke. The communities have also reduced emissions of green house gases. Fiscal Year 2010: No Current Data Available

REGULATIONS, GUIDELINES, AND LITERATURE:

Environmental Policy and Innovation grants and cooperative agreements are subject to EPA's General Grant Regulations (40 CFR Part 30 and 40 CFR Part 31). CRITERIA FOR SELECTING PROPOSALS:

Competitive applications and proposals will be selected in accordance with announced criteria. Non-competitive proposals are judged for (a) technical merit in terms of: (1) strengths and weaknesses of the project; (2) adequacy of overall project design; (3) competency of proposed staff; (4) suitability of applicant's available resources; (5) appropriateness of the proposed project period and budget; and (6) probability that the project will accomplish stated objectives and; for (b) program interest in terms of: (1) the need for the proposed project; and (2) relationship to program objectives.
