7 CFR 3419.1 defines matching funds as funds from non-Federal sources made available by the State to the eligible institutions ... [for] programs or activities that fall within the purposes of agricultural research and cooperative extension under sections 1444 and 1445 of NARETPA ... or [for] qualifying educational activities. Matching funds means cash contributions and excludes in-kind matching contributions. It defines non-Federal sources as funds made available by the State to the eligible institution either through direct appropriation or under any authority (other than authority to charge tuition and fees paid by students) provided by a State to an eligible institution to raise revenue, such as gift acceptance authority or user fees. Finally, it defines qualifying educational activities as programs that address food and agricultural sciences components of an eligible institution.

7 CFR 3419.6 states that The required matching funds for the formula programs shall be used by an eligible institution for agricultural research and extension activities that have been approved in the plan of work required under sections 1444(d) and 1445(c) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977... or for .. qualifying education activities.

3. SMITH-LEVER 3(d):

(a) Expanded Food and Nutrition (EFNEP) (ENUT Nutrition Education) (FORMULA)

Section 7116 of the Food, Conservation, and Energy Act of 2008 (FCEA) amended Section 1425 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3175) to accomplish the following:

Notwithstanding section 3(d) of the Smith-Lever Act of May 8, 1914 (7 U.S.C. 343(d)) for administration, technical, and other services for coordinating the extension work of the Department and the several States, Territories, and possessions the remainder shall be allocated among the States as follows:

1. 1862 Institutions shall receive a base in an amount equaling their FY 1981 allocation.
2. Four percent (4%) shall be available for administrative expenses.
3. \$100,000 will be distributed to each 1862 and 1890 Land-Grant Institution including the University of the District of Columbia.
4. For fiscal year (FY) 2009 10 percent of funds appropriated for EFNEP in excess of funds appropriated in FY 2007 will be allocated to the 1890 Institutions in an amount that bearing the same ratio to the population living at or below 125 percent of the poverty level (as prescribed by the Office of Management and Budget and as adjusted pursuant to section 673(2) of the Community Services Block Grant Act (42 U.S.C.9902(2))) in the State where the 1890 Institution is located; bears to the total population living at or below 125 percent of the poverty level in all States where 1890 Institutions are located; as determined by the most recent decennial census at the time when the appropriated amount first exceeds levels appropriated for EFNEP in FY 2007. This FY 2009 rate of 10 percent is to increase by 1 percentage point annually until FY 2014 maxing out at 15 percent and remaining at that level for every year thereafter.
5. The remainder will be allocated to each 1862 Land-Grant Institutions in an amount that bears the same ratio to the total amount allocated as the population living at or below 125 percent of the poverty level in the State; bears to the total population living at or below 125 percent of poverty level in all States; as determined by the most recent decennial census at the time at which each such additional amount is first appropriated.

4. OTHER EXTENSION ACTIVITIES:

(a) Renewable Resources Extension Act

The majority of the appropriated funds are distributed to eligible institutions based on a formula that considers the geographic extent, ecosystem productivity, economic contribution, and population for each state. Since FY 2002, a small amount of these funds have been used to fund National Focus Fund Projects.

NIFA does not require matching support for this program and matching resources will not be factored into the review process as evaluation criteria. Section 7132 of the Food, Conservation, and Energy Act amended section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310), increasing the limit on recovery of indirect costs from 20 percent to 22 percent of total Federal funds provided under the award. Therefore, the recovery of indirect costs on awards made by NIFA under this program area may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 22 percent of total Federal funds awarded.

(b) Rural Health and Safety

The Rural Health and Safety Education Competitive Grants Program provides funds to meet national goals for addressing the health and access needs of rural Americans.

NIFA does not require matching or cost sharing support for this program and matching resources will not be factored into the review process as evaluation criteria.

NIFA has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of research, education, or extension space; the purchase or installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

Section 7132 of the Food, Conservation, and Energy Act amended section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310), increasing the limit on recovery of indirect costs from 20 percent to 22 percent of total Federal funds provided under the award. Therefore, the recovery of indirect costs on awards made by NIFA under this program area may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 22 percent of total Federal funds awarded.

(c) Extension Services at the 1994 Institutions

Appropriated funds are to be awarded to the 1994 Land-Grant Institutions for

Extension work and funds are to be distributed on the basis of a competitive application process.

NIFA does not require matching support for this program, and matching resources will not be factored into the review process as evaluation criteria.

Under the TCEP, the use of grant funds to plan, acquire, or construct a building or facility, or to acquire land, is not allowed. With prior approval, in accordance with the cost principles set forth in OMB Circular No. A-21, grant funds may be used to purchase equipment, or for improvements, alterations, renovations, or repairs to land, buildings, or equipment, deemed necessary to retrofit existing spaces and resources in order to carry out a funded project under this grant. However, requests to use grant funds for such purposes must demonstrate that such expenditures are incidental to the major purpose for which the grant request is made and no more than twenty-five percent of the project budget may be used to purchase equipment. Any equipment purchased with Federal funds is the property of the grantee or the subgrantee, as appropriate. Indirect costs are unallowable costs, and no funds will be approved for this purpose. Costs that are a part of the institutions indirect cost pool may not be reclassified as direct costs for the purpose of making them allowable.

(d) Grants to Youth Serving Institutions

Title IV of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7630) authorized the Secretary of Agriculture to make grants to the Girl Scouts of the United States of America (GSUSA), the Boy Scouts of America (BSA), the National 4-H Council (4-H Council), and the National FFA Organization (FFA). Section 7309 of the Food, Conservation, and Energy Act (FCEA) of 2008 reauthorized 7 U.S.C. 7630, which was also amended to provide additional flexibility in content delivery to each organization receiving funds and to allow recipients to redistribute all or part of the funds to individual councils or local chapters without further need of approval from the Secretary. In FY 2009, Terms and Conditions of these awards should facilitate the redistribution without further need of approval. The Omnibus Appropriations Act, 2009 (Pub. L. 111-8) appropriates funds under Division A, Title I for grants to youth organizations pursuant to 7 U.S.C. 7630.

There are no matching requirements associated with the Rural Youth Development program, and matching resources will not be factored into the review process as evaluation criteria.

NIFA has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of facility space; the purchase or installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

Section 7132 of the Food, Conservation, and Energy Act of 2008, amended the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310(a)), limiting indirect costs to 22 percent of the total Federal funds provided under each award. Therefore, when preparing budgets, applicants should limit their requests for recovery of indirect costs to the lesser of their institutions official negotiated indirect cost rate or the equivalent of 22 percent of total Federal funds awarded. If no rate has been established the applicant may indicate "Nonewill negotiate" and a reasonable dollar amount for indirect costs may be requested, which will be subject to approval by USDA. In the latter case, if a proposal is recommended for funding, an indirect cost rate proposal must be submitted prior to award to support the amount of indirect costs requested. NIFA will request an indirect cost rate proposal and provide instructions, as necessary. An applicant may elect not to charge indirect costs and, instead, use all grant funds for direct costs. If indirect costs are not charged, the phrase "None requested" should be written in this space.

(e) Food Animal Residue Avoidance Database Program (FARAD)

Pursuant to Sec. 604 of the Agricultural research extension and Education Reform Act of 1998 [7 USC 7642(d)], applicants requesting recovery of indirect costs should limit their requests to the lesser of their institutions official negotiated indirect costs rate or the equivalent of 19 percent of total Federal funds awarded.

(f) Federal Administration (DIRECT APPROPRIATION)

Pertinent details will be provided at a future date.

(g) 1890 Facilities (Section 1447)

NIFA assessed four percent (4%) of the appropriated amount for Federal Administration, distributed sixty percent (60%) of the balance equally, and distributed the remaining forty percent (40%) based on the formula found in Section 1444 of NAREPTA of 1977, as amended (Pub. L. No. 95-113). Within each institution, the research, teaching and extension programs must each receive at least 20 percent of the annual allocation. The remaining 40 percent may be allocated based on institutional needs for research, teaching, or extension. No more than 60 percent of the total allocation should be directed to research, teaching, or extension. However, if there are unique situations in your institution which warrant a deviation from these guidelines, we will consider requests for reallocation. Such reallocations must be justified by the submission of a situation statement which describes the research, teaching, and extension facilities needs in your institution and how previously available Federal funds were utilized.

NIFA does not require matching support for this program and matching resources will not be factored into the review process as evaluation criteria. The obligation and expenditure of funds awarded under these grants are limited to equipment, land, buildings and other related costs which are or will be used in the administration and conduct of approved research, teaching and extension activities. In accordance with NAREPTA Section 1447 (e), funds provided for this program may not be used for the payment of any overhead costs of the eligible institutions.

MOE requirements are not applicable to this program.

4. OTHER EXTENSION ACTIVITIES:

(a) Renewable Resources Extension Act

Grantees are required to submit initial project information and annual and summary reports to NIFA's Current Research Information System (CRIS). The CRIS database contains narrative project information, progress/impact statements, and final technical reports that are made available to the public. For applications recommended for funding, instructions on preparing and submitting project documentation will be provided to the applicant by the agency contact. Documentation must be submitted to CRIS before NIFA funds will be released. Project reports will be requested by the CRIS office when required. For more information about CRIS, visit <http://cris.nifa.usda.gov>.

Annually, each grantee must submit a CRIS AD-421 Progress Report (OMB No. 0524-0042) and a one-page popular accomplishment report, prepared in Word or PDF format. The format and guidelines regarding the content of the popular report will be provided by the RREA Program Managers to the Project Directors of funded projects.

Additionally, when the project is complete, the grantee is required to submit a Final Technical Report to the NIFA National Program Leaders, Renewable Resources Extension Act. The Final Technical Report should summarize all work conducted and detail the outcomes, accomplishments and outputs of the funded project. This report should not exceed 15 single-spaced, typed pages.

At a minimum, Project Directors are expected to attend and present their projects and accomplishments as submitted papers to the appropriate Biennial Conference of the Association of Natural Resources Extension Professionals (ANREP). Additional conference presentations may also be utilized, but not substituted for the ANREP Conference without submitting a specific request to do so to the Program Contact.

Additional annual reports may be requested to provide timely information for the Secretary of Agriculture and Congress. The agency contact below will request additional reports as needed.

(b) Rural Health and Safety

Grantees are required to submit initial project information and annual and summary reports to NIFAs Current Research Information System (CRIS). Annual Performance Report

In the case of Increase Extension Program Capacity continuation grants, annual performance reports are due 90 days prior to the anniversary date of the award and should be submitted to the NIFA Current Research Information System (CRIS). In the case of Extension Special Emphasis projects, annual performance reports are due 90 days after the anniversary date of the award and should be submitted to CRIS. Annual performance reports must include the following information: (a) a comparison of actual accomplishments with the goals established for the reporting period (where the output of the project can be expressed readily in numbers, a computation of the cost per unit of output should be submitted, if the information is considered useful); (b) if established goals were not met, the reasons; and (c) additional pertinent information including, when appropriate, analysis and explanation of cost overruns or unexpectedly high unit costs.

Final Technical Report

A final technical report must be submitted to CRIS within 90 days after the expiration date of the project. The expiration date is specified in the award documents and modifications thereto, if any. Generally, the final technical report should be a summary of the completed project, including: (a) a review of project objectives and accomplishments; (b) a description of outcomes resulting from the project and activities undertaken to disseminate these outcomes; (c) an explanation of partnerships and collaborative ventures that resulted from the project, including future initiatives that are planned as a result of the project; (d) a description of the projects impact on the PD(s), the institution(s) involved, and the community; and (e) any pertinent data on project personnel and beneficiaries. The final technical report also must contain any other information specified in the terms and conditions of the award.

(d) Grants to Youth Serving Institutions

Previously funded Rural Youth Development applicants must prepare an annual report to NIFA that details all significant activities towards achieving the outputs and outcomes of the project as supported by evaluation methodologies. Provide tables, graphs and figures to facilitate comparing targeted results with actual results. Include success stories and pictures. Reports should include sections that will report:

Outcomes for youth, adults and community stakeholders as indicated in the Rural Youth Development program Logic Model (See RFA) and other organization specific outcomes.

Location of funded projects (could be shown on a map of the United States).

Summarized outputs of participants and programs as contained in the Output Measures Report that was developed and used by funded organizations

Examples (program descriptions) of community capital built in one or more areas of human, social, civic, natural, built (infrastructures), financial, and cultural. Information can be used from the Community Action report that was developed and used by the funded organizations.

Anecdotal quotes from participants and supporting information.

Summary reports shall be by year and cumulative.

1) Performance Reports:

Awardees of Federal funds are responsible for monitoring day-to-day project performance to ensure that project goals and performance schedules are met, contain costs, and accurately report progress to NIFA. An annual performance report is due in NIFA 90 days after completion of the first 12 months of the initial grant award and annually thereafter during the project period. Please report all work performed during the previous 12-month period, including any funded or unfunded time extensions. The performance report is to be submitted through the CRIS system as described below and should not exceed five (5) pages in length and shall include the following information:

A comparison of actual accomplishments against the goals and/or objectives established for the facilities program during the reporting period, including relevant percentage-of-completion data and a computation of square footage costs for all projects undertaken;

The reason for slippage if approved goals were not met;

Include additional pertinent information including for example, analysis and explanation of cost overruns or unexpectedly high unit costs. Report and explain any favorable or adverse conditions, changes, or situations which are expected to impact the scope, size, cost, or completion schedule for the project, along with a discussion of proposed or actual actions taken by your institution to resolve any problems encountered;

In subsequent years, if the proposal represents any changes to your approved Five-Year Plan, please provide a description of, and justification for, the change so that our records can be updated;

A summary of activities to be undertaken during the next 12-month period;

A listing of architectural, engineering, and construction contracts entered into during this reporting period only for each program component in the format provided in the RFA and/or FGO.

10.553 SCHOOL BREAKFAST PROGRAM

School Breakfast Program

FEDERAL AGENCY:

Food and Nutrition Service, Department of Agriculture

AUTHORIZATION:

Child Nutrition Act of 1966, as amended, 42 U.S.C. 1773, 1779, Public Laws 104-193, 100-435, 99-661, 97-35. American Recovery and Reinvestment Act of 2009, Public Law 111-5.

OBJECTIVES:

To assist States in providing a nutritious nonprofit breakfast service for school children, through cash grants and food donations.

TYPES OF ASSISTANCE:

Formula Grants (Apportionments)

USES AND USE RESTRICTIONS:

Federally appropriated School Breakfast Program funds are available to reimburse participating public and nonprofit private schools, of high school grade and under and residential child care institutions, for breakfasts, meeting the nutritional requirements prescribed by the Secretary of Agriculture, served to eligible children. The rates of reimbursement are adjusted on an annual basis to reflect changes in the Food Away From Home series of the Consumer Price Index for all Urban Consumers. For the period July 1, 2009 through June 30, 2010, the rates of reimbursement are 26.0 cents for paid breakfasts, 116.0 cents for each reduced price breakfast, and 146.0 cents for each free breakfast. The maximum reduced price charged for breakfast is 30 cents. Schools serving 40 percent or more free and reduced price lunches in the second preceding school year get up to 144.0 cents and 174.0 cents for each breakfast served to children qualifying, respectively, for a reduced price and a free breakfast. All participating schools must agree to serve free and reduced price meals to eligible children, and to operate the program on a nonprofit basis for all children regardless of race, sex, color, National origin, age, or disability. School aged children receive one of three benefit levels based on an application used to determine need.

Please refer to Program Regulations (CFR)
Part 210 -- National School Lunch Program
Part 215 -- Special Milk Program
Part 220 -- School Breakfast Program
Part 235 -- State Administrative Expense
Part 245 -- Free and Reduced Price Eligibility.

Applicant Eligibility:

State and U.S. Territory agencies; (except territories subject to the requirements to the Compact of Free Association) public and nonprofit private schools of high school grade and under; public and nonprofit private residential child care

institutions, except Job Corps Centers. Schools desiring to participate must agree to operate a nonprofit breakfast program that is available to all children regardless of race, sex, color, National origin, age, or disability.

Beneficiary Eligibility:

All children attending schools where the breakfast program is operating may participate. Breakfast is served free to children who are determined by local educational agencies to have household income levels at or below 130 percent, and at a reduced price to children from households with incomes higher than 130 but at or below 185 percent of the federal poverty line, respectively. Meals served to non-needy children also get cash assistance. Such determinations are made in accordance with income eligibility guidelines prescribed by the Secretary and cross reference household income with household size. The Secretary prescribes these income eligibility guidelines by July 1; the statistical source used in making such revisions is the Federal Income Poverty Guidelines. Children from households certified to receive Supplemental Nutrition Assistance Program (SNAP), the Food Distribution Program on Indian Reservations, Temporary Assistance for Needy Families and some children in Head Start Programs are automatically eligible for free meals. Homeless children, children in certain runaway and homeless youth grant programs, and migrant children are automatically eligible for free meals.

Formula and Matching Requirements:

Statutory Formula: Federal funds are made available for breakfast assistance in accordance with Section 4 of the Child Nutrition Act on a performance basis by: (1) multiplying the number of paid breakfasts served to eligible children during the fiscal year by a National Average Payment (NAP) prescribed by the Secretary; (2) multiplying the number of breakfasts served free to eligible children by a NAP prescribed by the Secretary for free breakfasts; and, (3)

multiplying the number of reduced price breakfasts served to eligible children by a NAP prescribed by the Secretary for reduced-priced breakfasts. The amount of Federal funds given the grantee is the sum of the products obtained from these three computations, plus an additional 6 cents for every breakfast served. Schools with a high percentage of needy may receive additional payments. The statistical factors used in this formula are: (1) The NAP's; (2) the number of paid breakfasts served; and (3) the number of breakfasts served free or at reduced price to eligible children. The NAP's are prescribed by the Secretary and adjusted each July 1, in accordance with the Food Away From Home component of the Consumer Price Index for All Urban Consumers. The source of this adjustment factor is the Bureau of Labor Statistics. The source of the numbers of breakfasts served, including the number served free or at reduced price, is the monthly programmatic reports submitted to Food and Nutrition Service. This program has no maintenance of effort (MOE) requirements.

Matching requirements are not applicable to this program. This program does not have MOE requirements.

Length and Time Phasing of Assistance:

For the period covered by the agreement on a fiscal-year basis. Method of awarding/releasing assistance: by letter of credit.

Schools and institutions must submit final meal claims to the State no later than 60 days after claiming month. States must submit final program reports to Food and Nutrition Service no later than 90 days after the claiming month. No cash reports are required. No progress reports are required. States must submit a final fiscal year grant closeout report to the Food and Nutrition Service no later than 120 days after the end of the fiscal year to which they pertain. Performance monitoring is not applicable.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

Records:

Schools must maintain full and accurate records of the breakfast program. Such records shall be retained for a period of 3 years after the end of the fiscal year to which they pertain, except that if audit findings have not been resolved, records shall be retained beyond the 3 year period until audit findings have been resolved.

Such determinations are made in accordance with income eligibility guidelines prescribed by the Secretary and cross reference household income with household size. The Secretary announces these income eligibility guidelines by July 1. The statistical source used in making such revisions is the Federal Income Poverty Guidelines. Children from households certified to receive Supplemental Nutrition Assistance Program (SNAP) benefits, the Food Distribution Program on Indian Reservations, Temporary Assistance for Needy Families and some children in Head Start Programs are automatically eligible for free meals. Homeless children, children in certain runaway and homeless youth grant programs, and migrant children are also automatically eligible for free meals.

Appeals:

The State agency or FNSRO, where applicable, is responsible for determining a school's eligibility.

Renewals:

Permanent, amended as necessary.

Formula and Matching Requirements:

Statutory Formula: The funding formula for the general cash for food assistance phase of the program is set forth in Section 4 of the National School Lunch Act, as amended; the formula for special cash assistance is described in Section 11 of the Act. The program is funded on a performance basis. For every lunch served during the applicable fiscal year, the State receives a payment from funds made available under Section 4. In addition, the State receives a payment from Section 11 funds for each lunch served to a child eligible for free or reduced price lunches. The amounts of such per-lunch payments are determined by "National Average Payment" (NAP) factors. The amount due the State under this program is obtained by: (1) multiplying the total number of eligible paid lunches and free and reduced price lunches served during the fiscal year by the Section 4 NAP factor for lunches; (2) multiplying the number of free lunches served by the Section 11 NAP factor for free lunches; (3) multiplying the number of lunches served at reduced price by the Section 11 NAP factor for reduced price lunches; (4) multiplying the total number of lunches served during the fiscal year in school food authorities which served 60 percent or more free or reduced price lunches in the second preceding school year by \$.02; and (5) adding together the four products obtained thereby. The NAP factors are prescribed by the Secretary in accordance with Sections 4 and 11, respectively, of the Act; the numbers of lunches are obtained from programmatic reports submitted to Food and Nutrition Service. In addition, the funding formula for snacks in after school care programs is described in Section 17 A of the Act. Section 11(a)(3) of the Act requires that the NAP factors be adjusted annually, according to changes in the Food Away From Home series of the Consumer Price Index for All Urban Consumers; the source is the Bureau of Labor Statistics. Each State must appropriate from State revenues and use, for program purposes, an amount equal to 30 percent of the Section 4 funds made available to the State in the 1980-81 school year. Also, commodity schools are eligible to receive donated commodities equal in value to the sum of section 6 and section 4 assistance rates, except that up to 5 cents of this amount may be received in cash for processing and handling commodities. In addition, commodity schools are eligible for Section 11 free and reduced price meal reimbursements.

The Child Nutrition Amendments of 1986 expanded eligibility in the program to include children in split session kindergarten and pre-kindergarten programs in nonprofit schools and institutions who do not have access to the

Federal meal service program operating in schools the children attend. Disbursement to States is made on the basis of the number of half pints of milk served to non-needy children, using a reimbursement rate specified by law. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: In its continuing effort to advance new technologies, FNS awarded approximately \$5.2 million in Electronic Benefits Transfer (EBT) grants to 6 WIC State agencies in FY 2007, in support of EBT projects. The WIC Program State Agency Model (SAM) Project is a FNS initiative to plan, develop and deploy model information systems (IS) in WIC State agencies. The SAM project was initiated by FNS at the request of the Office of Management and Budget, with the expectation that these modern, state-of-the-art systems will be transferred to other WIC State agencies at a lower cost than regular development/transfer efforts. FNS has awarded funding to 3 State Agency Model (SAM) consortia across the country. Funding in FY 2006 totaled \$20,214,463; an additional \$553,433 was awarded in FY 2007. As part of its efforts to revitalize quality nutrition services, in FY 2007 FNS continued to take steps to increase training and technical assistance opportunities and facilitate communication among its partners. In collaboration with the National Agricultural Library-Food and Nutrition Information Center, FNS continues to enhance the WIC Works Resource System (WWRS), an on-line system for WIC educators to talk, share successes, receive training on counseling strategies, and find educational materials and tools for assessment, and review current research. A new feature of WWRS is the WIC Bulletin Board Exchange; a database of ideas collected from WIC local agencies. The data base contains over 40 ideas many with photos from the waiting rooms and offices. The goal is to allow WIC staff to share ideas on how to reinforce nutrition messages through bulletin board displays. The on line staff learning modules were enhanced with the addition of 3 modules on the topic of infant feeding (Infant Formula Basics, Feeding Infants 0-6 Months, and Feeding Infants 6-12 Months). Additionally a series of Web pages were created to post resources that assist State and local agencies in planning, developing and implementing the Value Enhanced Nutrition Assessment initiative. As part of our ongoing commitment to promote breastfeeding to WIC participants and their families through the USDA national breastfeeding promotion campaign, Loving Support Makes Breastfeeding Work, a marketing project, Partnering with WIC for Breastfeeding Success, was launched. This project invites stakeholders and health care professionals to partner with WIC to create a national environment that encourages mothers to breastfeed. Fiscal Year 2009: Unavailable. TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Funds are made available for disbursement to eligible institutions to reimburse their costs in providing meals and snacks to children and adults enrolled in nonresidential day care, children attending afterschool care programs, and

children residing in emergency shelters. Disbursement is made on the basis of the number of breakfasts, lunches, suppers, and snacks served, using annually adjusted reimbursement rates specified by law. The program allows reimbursement for up to two meals and one snack served each day to children through the age of 12, children of migrant workers through the age of 15, and persons with disabilities, in child care centers and day care homes. Adult day care centers receive reimbursement for up to three meals served each day to enrolled adults who are functionally impaired or 60 and older. The program also provides reimbursement to emergency shelters for up to three meals served to residents through age 18. In at-risk afterschool care programs, reimbursement is available for one snack served each day to children through age 18. Reimbursement may also be available for one additional meal in afterschool care programs in eligible states. All program meals must meet minimum requirements of the United States Department of Agriculture (USDA). Funds are also paid to participating State agencies for administrative expenses related to program staffing and oversight.

Applicant Eligibility:

The State or U.S. Territory agency applies for and signs an agreement to receive Federal funds for disbursement. Where the State does not currently administer the program, an applicant institution may sign an agreement and receive funds directly from USDA.

Beneficiary Eligibility:

Approved institutions providing nonresidential day care services may participate in the program. Eligible public and nonprofit private organizations may include day care centers, outside-school-hours care centers, settlement houses, family and group day care homes, Head Start programs, and institutions providing day care services to children with disabilities. Private for-profit centers may also participate if at least 25 percent of the children in care (enrolled or licensed capacity, whichever is less) are eligible for free or reduced price school meals or receive benefits under Title XX (of the Social Security Act). Also eligible for participation are nonprofit centers which provide nonresidential adult day care, and private for-profit centers if the center receives compensation under Title XIX (of the Social Security Act) or Title XX, and at least 25 percent of the adults enrolled in the center receive benefits under Title XIX, Title XX, or a combination of both. Emergency shelters which provide shelter and meals to children experiencing homelessness, and at-risk afterschool care programs in low-income areas are also eligible. Any eligible institution may participate in the Child and Adult Care Food Program upon request with State agency approval.

Credentials/Documentation:

The allowability of costs incurred by States in administering the program will be determined in accordance with USDA Uniform Federal Assistance Regulations (7 CFR Parts 3016 and 3019). Applicants that are not public or proprietary institutions must furnish evidence of tax-exempt status under the Internal Revenue Code of 1986. OMB Circular No. A-87 applies to this program.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Institutions apply to the responsible State agency. Where the State does not administer the program, the application is submitted to the USDA Food and Nutrition Service (FNS) Regional Office. This program is subject to the provisions of USDA Uniform Federal Assistance Regulations (7 CFR Parts 3016 and 3019).

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Not Applicable.

Appeals:

The administering agency must provide a hearing procedure for local institution grievances.

Renewals:

Not less frequently than every three years.

Formula and Matching Requirements:

Statutory Formula: Program funds are provided to the States through letters of credit to reimburse institutions for costs of food service operations, including administrative expenses. Appropriate rates of reimbursement, multiplied by the number of meals served to enrolled participants, represent the basic program payment that an institution receives for each meal served. The assigned rates of reimbursement are adjusted annually on July 1. For child care centers, adult day care centers, emergency shelters, and at-risk afterschool care programs, the annual adjustment reflects changes in the Food Away from Home series of the Consumer Price Index for All Urban Consumers. For day care homes, the adjustment reflects changes in the Food at Home series of the Consumer Price Index for All Urban Consumers. Donated foods or cash in lieu of donated foods are also made available. Program payments to child care or adult day care centers depend on the number and types of meals served to enrolled participants, multiplied by the appropriate rate of reimbursement. Rates for meals served to enrolled children and eligible adults in day care centers are determined by the participants' eligibility for free, reduced price, or paid meals using USDA Income Eligibility Guidelines. All resident children through age 18 in eligible emergency shelters receive free meals without application. At-risk afterschool care programs, which must be located in low-income areas, are reimbursed at the free rate for all snacks--and meals in eligible States--served to children through age 18. Sponsoring organizations of day care homes are reimbursed at a gradational administrative rate based on the number of homes they operate. The level of reimbursement for meals served to enrolled children in day care homes is determined by economic need based on either the location of the day care home, the income of the day care provider, or the income of an individual child's household. Meals served in day care homes to the provider's own children are reimbursable only if those children are determined eligible for free and reduced price meals, and at least one other nonresident child is participating in the meal service. The reimbursement for food service is passed on by the sponsoring organization to the day care facility. Matching requirements are not applicable to this program. This program does not have MOE requirements.

Length and Time Phasing of Assistance:

For the period covered by the agreement. Method of awarding/releasing assistance: by letter of credit.

Reports:

Institutions file monthly reports on program operations to claim reimbursement for meals served. They must submit final meal claims no later than 60 days after the claiming month. States must then submit final program reports to FNS no later than 90 days after the claiming month. No cash reports are required. No progress reports are required. No expenditure reports are required. No performance monitoring is required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Audits may be conducted less frequently under conditions specified in OMB Circular No. A-133. For-profit institutions are subject to audit by their administering State agencies.

Records:

Institutions must maintain full and accurate records of program operations for a period of 3 years after the end of the fiscal year to which they pertain. However, where there are unresolved audit findings, records must be retained

until there is satisfactory resolution of all audit issues.

Farmers' Market Grants

FEDERAL AGENCY:

Food and Nutrition Service, Department of Agriculture

AUTHORIZATION:

WIC Farmers' Market Nutrition Act of 1992, Public Law 102-314, 106 Stat. 281; Child Nutrition Act of 1966, as amended, Section 17(m), 42 U.S.C. 1786.

OBJECTIVES:

To provide fresh, nutritious unprepared locally grown fruits and vegetables from farmers markets to women, infants, and children who participate in the Special Supplemental Nutrition Program for Women, Infants and Children (WIC); and to expand the awareness and use of farmers' markets and increase sales at such markets.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Grants are made to State health, agriculture and other agencies (or Indian tribes, bands, or intertribal councils or groups recognized by the Department of the Interior, or the Indian Health Service of the Department of Health and Human Services.) Participating State agencies must provide program income or State, local, or private funds for the program in an amount that is equal to at least 30 percent of the administrative cost of the program except Indian Tribal Organizations which may receive a negotiated match contribution that is less than 30 percent but not less than 10 percent. The matching requirement may be satisfied from State contributions that are made for similar programs. Federal FMNP benefits (coupons) may be issued only to participants in the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) or to persons who are on a waiting list to receive WIC benefits. Participating State agencies must provide program income or State, local, or private funds for the program in an amount that is equal to at least 30 percent of the administrative cost of the program except Indian Tribal Organizations which may receive a negotiated match contribution that is less than 30 percent but not less than 10 percent. The matching requirement may be satisfied from State contributions that are made for similar programs.

Applicant Eligibility:

All State agencies that desire to receive a FMNP grant must submit, for each fiscal year, a State plan to the Food and Nutrition Service (FNS), USDA. States that received Federal assistance under the Farmers' Market Coupon Demonstration Project, which was administered by FNS from 1989-1992, were "grandfathered" into the FMNP by Public Law 102-314. Other States interested in participating in the FMNP must first submit a State plan to the appropriate FNS regional office for approval. Approved plans are then reviewed and evaluated by the National office (Supplemental Food Programs Division). New State agencies are then selected based on the evaluation and the availability of funds. Local FMNP sites are selected by participating State agencies based on concentration of eligible WIC participants and access to farmers' markets.

Beneficiary Eligibility:

WIC participants (i.e., pregnant, postpartum or breastfeeding women; infants over 4 months of age; and children up to 5 years of age) and (at the State's discretion) those who are on a waiting list to receive WIC benefits are eligible to receive FMNP coupons. State agencies may also designate subcategories of WIC participants, e.g., pregnant and breastfeeding women only, to be FMNP recipients.

Credentials/Documentation:

WIC participants (except infants under 4 months of age) and persons on WIC waiting lists certified for WIC eligibility who live in areas with a FMNP are eligible to receive benefits. A signed and executed Federal/State Agreement is necessary before funds can be allocated to a participating FMNP State agency. Costs will be determined in accordance with 7 CFR Part 3016, and FNS guidelines and instructions. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Application is made through submission of a "State Plan of Program Operation and Administration" as required by law. This program is excluded from coverage under E.O. 12372. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Farmers or farmers' markets (depending on whether State agencies have agreements with farmers or markets) located in communities with WIC Program sites may apply to be authorized to accept FMNP coupons under the program. The State agency reviews the applications for completeness and compliance with authorization requirements. The State agency contacts the farmer/farmers' market to inform them of qualification. Individual participants apply for FMNP benefits at approved local WIC agencies.

Award Procedure:

Funds are awarded by the Department on the basis of funding formulas to State agencies.

Deadlines:

Nov 15, 2009 A State plan for the next fiscal year is required by November 15.

Range of Approval/Disapproval Time:

An eligibility determination will be made within 30 days of submission.

Appeals:

Farmer/farmers' market appeals: The State agency shall provide a hearing procedure whereby a farmer/farmers' market adversely affected by a State agency action may appeal the action. The right of appeal shall be granted when a farmer/farmers' market is denied or, during the course of the contract or agreement, when a farmer/farmers' market is disqualified or any other adverse action which affects participation is taken.

Renewals:

This Program is authorized through September 30, 2009.

Formula and Matching Requirements:

Statutory Formula: Statutory formula can be found at Section 17(m)(3) of the Child Nutrition Act. As a prerequisite to the receipt of Federal funds, a State agency must agree to contribute program income or State, local or private funds equal to at least 30 percent of its administrative program cost. Indian Tribal Organizations may receive a negotiated match contribution that is less than 30 percent but not less than 10 percent. State contributions for similar programs may satisfy the State matching requirement. Provided that sufficient funds are available, each current State agency will be funded at its most recent year's level. Remaining funds are divided between current States for expansion and new States, based on a 75 to 25 percent ratio, respectively.

Matching Requirements: Percent: 10.%. As a prerequisite to the receipt of Federal funds, a State agency must agree to contribute program income or State, local or private funds equal to at least 30 percent of its administrative program cost. Senior Farmers Market

FEDERAL AGENCY:

Food and Nutrition Service, Department of Agriculture

AUTHORIZATION:

Farm Security and Rural Investment Act of 2002, Public Law 107-171, 116 Stat. 334; Section 4402, 7 U.S.C. 3007.

OBJECTIVES:

(1) To provide fresh, nutritious, unprepared, locally grown fruits, vegetables and herbs from farmers markets, roadside stands and community supported agriculture programs to low-income seniors, and (2) to increase the consumption of agricultural commodities by expanding, developing, or aiding in the development and expansion of domestic farmers markets, roadside stands, and community supported agriculture programs.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants are made to State departments such as health, agriculture and aging, United States territories and Federally-recognized Indian tribal governments, or any other agency approved by the chief executive officer of the State. Grant funds may be used only to support the costs of the foods that are provided under the SFMNP; no administrative funding is available. Grant funds may be used only to support the costs of the foods that are provided under the SFMNP; no administrative funding is available.

Applicant Eligibility:

All States, United States territories, and federally recognized Indian tribal governments are eligible to apply for a grant.

Beneficiary Eligibility:

Persons eligible for the program are low-income seniors, generally defined as individuals who are at least 60 years old and who have household incomes of not more than 185% of the federal poverty income guidelines (published each year by the Department of Health and Human Services). Some State agencies accept proof of participation or enrollment in another means-tested program, such as the Commodity Supplemental Food Program or Food Stamps, for SFMNP eligibility.

Credentials/Documentation:

In addition to submitting an application based on the requirements of the grant solicitation, potential grantees must submit a standard SF-424, Application for Federal Assistance, form. In addition, potential grantees must submit forms in which they agree to comply with USDA regulations and Office of Management and Budget circulars, including: Uniform Federal Assistance Regulations, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, Government-wide Debarment and Suspension; Government-wide Requirements for Drug-free Workplace; and, New Restrictions on Lobbying. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Each State applying for a SFMNP grant must designate a lead State agency. Each State may only submit one application on behalf of all interested State agencies, local governments, and non-profit organizations in the State. However, the lead State agency may make subgrants to other State agencies, Indian tribal governments, local governments, and non-profit organizations. Also, Indian tribal governments may make subgrants to local governments and non-profit organizations in the areas they serve. Interested agencies are encouraged to contact the Governor's office or Indian tribal governments to work together on an application. If multiple applications are received from more than one agency within the same State, FNS reserves the right to contact the Governor's office in that State for a final designation of the lead State agency. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Under the competitive grant process, FNS announces the opportunity for States, including territories and Federally recognized Indian tribal governments, to submit grant applications for the SFMNP for each fiscal year in which funds are available. All applications are due by a specified date to FNS Headquarters.

Award Procedure:

Applications are reviewed and evaluated by a panel of FNS staff to determine the technical merit of each grant application. Two separate panels evaluate applications; one panel reviews applications from current State agencies that are seeking expansion funds and another panel reviews applications from new State agencies. In the event that all available SFMNP funds for a given year are needed to provide base grants to currently participating State agencies, applications for program expansion or new programs will not be solicited by FNS. If the available funds are insufficient to meet the base grant levels for current SFMNP grantees, a pro-rata reduction will be applied to the grant levels awarded to all participating SFMNP State agencies. If additional funds become available for the SFMNP, such funds would first be distributed evenly among the current grantees to make whole their base grants for that fiscal year. Grant payments are made by a letter of credit.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

In general, FNS will announce SFMNP awards, and notify each State agency that did not receive an award, approximately 60 days after the date applications are due to FNS.

Appeals:

All decisions by the FNS selecting officials are final. However, unsuccessful applicants are offered a debriefing to discuss the strengths and weaknesses of their proposals.

Renewals:

Current State agencies are required to submit updated information annually. Will be discussed in the announcement.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program. Matching requirements are not applicable to this program. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Cash reports are not applicable. Grantees are required to submit two financial status reports and two progress reports to FNS. Grantees are required to submit two financial status reports. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

SBP: To assist States in providing a nutritious nonprofit breakfast service for school children, through cash grants and food donations. SMP: To provide subsidies to schools and institutions to encourage the consumption of fluid milk by children. CACFP: To assist States, through grants-in-aid and other means, to initiate and maintain nonprofit food service programs for children, elderly or impaired adults in nonresidential day care facilities and children in emergency shelters. TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Determined by the legislation providing the grants. Examples of grants in this category include the Child Nutrition and WIC Reauthorization Act of 2004 (Public Law 108-265) which authorized funds for State agencies to perform administrative reviews and training of selected local education agencies participating in the NSLP. The purpose of these funds is to improve program integrity and administrative accuracy by decreasing administrative errors in those local education agencies identified by the States as having problems or where problems are likely to arise. The funds cannot be used to replace or augment funding allocated for existing review requirements and they cannot be used for local level expenses associated with administrative reviews or training activities. In addition, Public Law 108-265 authorized funding for grants under the SFSP to increase participation at congregate feeding sites through innovative approaches for overcoming limited transportation resources in rural areas. These multi-year grants were awarded in December 2005 on a competitive basis to Mississippi (6 sponsors), New York (7 sponsors), Oregon (8 sponsors), Texas (2 sponsors), and West Virginia (7 sponsors). The projects may not comprise pre-award costs associated with the development of a grant application or the cost of obtaining food. Over the course of 3 years, \$4 million will be available to the 5 States. Additional examples of grants in this category include the Consolidated Appropriations Resolution for Fiscal Year 2003 (Public Law 108-7) which provided funds for eligible schools to cover costs associated with implementing the SBP. The purpose of these grants was to increase the number of schools participating in the SBP, particularly those serving low-income children. The grants were used for State level costs associated with the administration of the SBP grant activities and local level costs that were allowable, reasonable, and necessary for an approved school to implement the SBP. The State agency could retain no more than 17.5 percent of the grant award for State level costs associated with the administration of the grant activities.

AUTHORIZATION:

Public Law 105-277, Div. A, Section 101(e) Title III, Section 343, 112 Stat. 2681-231, 2681-297; Cooperative Forestry Assistance Act of 1978, as amended, 16 USC 2101 et, seq.; Forest and Rangeland Renewable Resources Act of 1978, as amended, 6 USC 1600-1614.

OBJECTIVES:

To provide funds, on a cost-share basis, for projects that focus on enhancing opportunities for sustained forest products production for primary and secondary hardwood industries located in the eastern hardwood forest region. In order to maintain and improve the health and stewardship of our eastern hardwood forests, local wood-using industries need to be vibrant and able to utilize a wide variety of resources from the forest. Priorities include: Maintain the economic competitiveness of hardwood industries. Examples include encouraging the adoption of new technology to improve competitiveness and profitability. Bring information and technology about processing, marketing and business-related skills to existing and emerging businesses involved in the development and manufacturing of wood products. Bring information and technology to existing and emerging businesses that focus on urban wood utilization, hazardous fuels reductions, utilization options geared to improving stewardship, forest health, or the use of low value woody biomass. Develop technology and markets to address emergency (global or domestic) issues including: 1. Phytosanitation of wood packaging materials, firewood and similar products to eliminate these pathways for the transport of insect and disease pests, and 2. Development of markets for and utilization of unpredicted increases in volume of urban and rural wood due to incidents like new pest introductions (e.g., Emerald ash borer) and weather events (e.g., tornados, ice storms). Increase the sustainable use of woody biomass to meet our nation's energy and raw materials needs. Examples include public/private partnerships for the use of woody biomass in heating and cooling, process energy, cogeneration, district energy systems, and solid and liquid fuel production. Projects may also develop or maintain local markets and forest industry infrastructure through the increased utilization of woody biomass for both energy and value-added products. Provide key information to address the economic, social and ecological aspects of woody biomass production and use: including sustainable supplies, harvesting techniques, forest management, plantation development, and environmental implications.

To provide basic human amenities, alleviate health hazards and promote the orderly growth of the rural areas of the nation by meeting the need for new and improved rural water and waste disposal facilities.

TYPES OF ASSISTANCE:

Direct Loans; Project Grants

USES AND USE RESTRICTIONS:

Funds may be used for the installation, repair, improvement, or expansion of a rural water facility including distribution lines, well pumping facilities and costs related thereto, and the installation, repair, improvement, or expansion of a rural waste disposal facility including the collection, and treatment of sanitary, storm, and solid wastes. Grant funds may not be used to pay: interest on loans, operation and maintenance costs, or acquisition or refinancing of an existing system. No maximum loan amount is established by statute. The maximum term on all loans is 40 years. However, no repayment period will exceed any statutory limitation or the organization's borrowing authority or the useful life of the improvement or facility to be financed. There are currently three interest rates for direct loans: a poverty rate that is 60 percent of market rate when the loan is required to meet health or sanitary standards and the median household income of the service area is below the higher of the poverty line or 80 percent of the statewide nonmetropolitan median household income; an intermediate rate that is 80 of market rate if the median household income of the service area is not more than 100 percent of the nonmetropolitan median household income of the State; and a market rate for those applicants that do not qualify for the poverty rate or the intermediate rate. The law authorizing the program allows a maximum repayment period of 40 years. However, the repayment period cannot exceed the useful life of the facilities financed or any statutory limitation on the applicants borrowing authority.

Applicant Eligibility:

Plans and specifications must be developed to comply with State and local health and pollution regulations and other requirements. Grants are made only when necessary to reduce the average annual benefited user charges to a reasonable level. Normally, grants are considered only when the debt service portion of the cost to grant eligible users exceeds the following percentages of median household incomes (MHI) for the applicant service area: 0.5 percent when the MHI of the service area is below the poverty line or below 80 percent (whichever is higher) of the State's non-metropolitan household income (NMHI); 1.0 percent when the NMHI of the service area exceeds the 0.5 percent requirement but is not more than 100 percent of the State's NMHI; no RUS grant funds will be used in any project when the MHI of the service area is above the poverty line and more than 100 percent of the State's NMHI. The RUS grant may not exceed 75 percent of the eligible project development cost when the MHI of the service area is below the poverty line or below 80 percent (whichever is higher) of the State's NMHI and the project is necessary to alleviate a health or sanitary problem; 45 percent when the MHI of the service area exceeds the 75 percent requirements, but is not more than 100 percent of the State's NMHI. 10.787 BROADBAND INITIATIVES PROGRAM

Broadband Initiatives Program (BIP)

FEDERAL AGENCY:

Rural Utilities Service, Department of Agriculture

AUTHORIZATION:

The American Recovery and Reinvestment Act of 2009, . Public Law 111-5, 123 Stat. 115, 7 U.S.C 901.

OBJECTIVES:

The purpose of the Broadband Initiatives Program (BIP) to make loans and grants for the purpose of facilitating broadband deployment in rural communities.

TYPES OF ASSISTANCE:

Direct Loans; Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Under BIP, RUS will award grants, loans, and loan/grant combinations for broadband infrastructure. Grants under BIP are to be used to fund applications proposing to exclusively serve remote, unserved, rural areas. BIP loan and loan/grant combination funds are to be used to provide funding to applications proposing to serve non-remote and underserved rural areas. Projects which include non-remote and remote areas will be funded by loans or loan/grant combinations. The size of the grant portion of any loan/grant combination award is determined by the applicant, but cannot exceed the amount of the loan portion of the award. RUS will favor applications that propose a higher percentage of loan funds. Applicants may request 100 percent loan funding. RUS will seek to make the extension of broadband infrastructure into difficult-to-serve areas affordable a key objective of BIP funding through

substantial grant funds and attractive loan terms with reasonable security requirements. The following terms shall apply to the loans, as well as other terms that are specified in the loan documents:

i. Interest rate. Loans shall bear interest at a rate equal to the cost of borrowing to the Department of Treasury for obligations of comparable maturity. The applicable interest rate will be set at the time of each advance.

ii. Repayment period. Unless the applicant requests a shorter repayment period, broadband loans must be repaid with interest within a period that, rounded to the nearest whole year, is equal to the expected Composite Economic Life of the assets to be financed, as determined by RUS based upon acceptable depreciation rates.

iii. Amortization period. Interest begins accruing on the date of each loan advance and interest payments are due monthly. Upon completion of the buildout, or a date certain that is determined at closing, whichever occurs first, monthly principal payments will be established in an amount that amortizes the outstanding balance over the remaining term of the loan.

iv. Fidelity bonding. Applicants must agree to obtain a fidelity bond for 15 percent of the loan amount. The fidelity bond must be obtained as a condition of loan closing. RUS may reduce the percentage required if it determines that 15 percent is not commensurate with the risk involved.

v. Security. The loan portion of the award must be adequately secured, as determined by RUS.

10.861 PUBLIC TELEVISION STATION DIGITAL TRANSITION GRANT PROGRAM

(Public Television Station Digital Transition Grant Program)

FEDERAL AGENCY:

Rural Development, Department of Agriculture

AUTHORIZATION:

Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2006; Title III, Rural Development Programs; Rural Utilities Service; Distance Learning, Telemedicine, and Broadband Program; Public Law 109-97.

OBJECTIVES:

The Federal Communications Commission (FCC) has ordered all television broadcasters to initiate the broadcast of a digital television signal and to cease analog television broadcasts. The result of this conversion will be a new, high performance television system that is highly efficient in its use of the radio spectrum. This will free spectrum to enable the introduction of new wireless telecommunications services such as mobile wireless Internet access. Before spectrum can be reallocated to new uses, all television stations must make the transition to the new broadcast system. Lagging far behind in this transition are the rural public television stations, which depend on viewer donations and public funds to buy the expensive digital equipment. A significant number of stations have not completed the transition, and many are rural stations that have no funding to proceed. The deadline for initiating digital broadcasting was May 2003, and all waivers of that date have expired. These stations are in violation of their FCC licenses. On February 17, 2009, all analog broadcasting is scheduled to cease, meaning that stations that have not transitioned will stop broadcasting any television signal. In addition to the public losing the benefits of public television programming, this will leave many school systems without educational programming they count on for curriculum compliance. This grant program assists rural public television stations in making the transition to digital television signal broadcasting.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants may be used to install digital television facilities through purchase or lease (up to three years of lease costs); and for associated engineering and environmental studies. All broadcast facilities acquired under this program must be capable of delivering both digital television (DTV, sometimes called standard definition) and high definition television (HDTV) at both the interim and final channel power authorizations. Grant funds may be used to fund facilities directly connected to the digital transition of the broadcast signal such as: digital transmitters; digital translators; transmitting antennas; new towers or improvements to existing towers necessary for antenna installation; tower ground infrastructure such as land, buildings, fencing, standby power, and where commercial power is unreliable, power generation and conditioning facilities; studio to transmitter/translator communication links; television program production and management equipment; datacasting equipment; and subject to RUS approval, other facilities directly necessary for the digital

transition of the broadcast signal. Grants shall not be used: to fund operations or for facilities not owned by the applicant (except for leased facilities as described above); for salaries, wages, and other public television employee benefits; for construction performed or expenditures made prior to the application deadline; or for facilities funded under other grants.

Applicant Eligibility:

The applicant must be a public television station that serves a rural area regardless of whether they also serve an urban area. (Rural area means any area of the United States not included within the boundaries of any incorporated or unincorporated city, village, or borough having a population in excess of 20,000 inhabitants.) The applicant must also be required to convert from analog to digital transmission under the rules of the FCC. For the purpose of this grant program, a public television station must be an organization which (1) qualifies for Federal funding under Section 396(k) of the Public Broadcasting Act of 1967, and (2) which is either: (a) under the rules and regulations of the FCC in effect on November 2, 1978, eligible to be licensed as a noncommercial educational broadcast station and which is owned and operated by a public agency or nonprofit private foundation, corporation, or association; or (b) owned and operated by a municipality and which transmits only noncommercial programs for education purposes.

Beneficiary Eligibility:

Anyone who receives the improved digital television signal from a rural public television station or attends an educational institution that uses public television in its curriculum.

Credentials/Documentation:

The applicant must provide evidence demonstrating that it meets the definition of a public television station in section 81, above. The applicant must also provide evidence that the FCC has authorized the initiation of digital broadcasting at each of the Applicant's transmitter and translator sites. This program is excluded from coverage under OMB Circular No. A-87.

In addition to Government-wide requirements, the applicant shall provide a description of the project including: an executive summary, a project cost spreadsheet, broadcast coverage maps, a complete narrative description, and an environmental assessment.

Award Procedure:

All complete applications from eligible applicants that meet the application deadline will be scored in a competitive process to determine which projects are funded. There are three scoring categories. The first is rurality, a measure of the rural character of the applicant's digital television coverage area. Up to 50 points can be earned in this category. The second uses the National School Lunch Program eligibility percentage as a measure of the economic need of the people in the applicant's coverage area. This category earns up to 25 points. Finally, up to 25 points can be awarded based on critical need.

RELATED PROGRAMS:

10.902 Soil and Water Conservation

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: No Current Data Available Fiscal Year 2009: NRCS and the Two Rivers RC&D Council in Georgia created a program to help utility companies cut maintenance expenses on more than 150,000 acres of utility transmission rights-of-way while protecting and enhancing the environment. Project WINGS (Wildlife Incentives for Nongame and Game Species) is a utility-based wildlife initiative offering technical and financial incentives to

groups and individuals interested in creating wildlife habitat along electrical transmission rights-of-way. The use of customized management plans prepared by resource management professionals offers WINGS participants an opportunity to transform eroded brush land into productive wildlife lands. To date, more than 1000 individuals have been awarded corporate grants to convert over 7,000 acres of rights-of-way brush land to productive habitat. WINGS is a project that can be replicated, and has already been started in South Carolina where it is called Powerful Wildlife. The Rolling Hills RC&D in partnership with Georgia Department of Human Resources, Department of Family and Children's Services, and Department of Rehabilitative Services has implemented an innovative program called "Wheels to Work" that is helping people get off public assistance (welfare) and back to work. Many of these individuals who participate are single mothers that have never been independent before, never owned a vehicle, and are unable to obtain credit in order to purchase a vehicle of their own. The Rolling Hills RC&D Council has placed 110 vehicles with clients in the nine county region. These individuals are now off of the welfare roles and back to work. The funding for these clients was obtained through an appropriation from the Georgia General Assembly and the Lieutenant Governor. Rolling Hills received over \$582,000 to purchase vehicles, pay staff, and other needed expenses. These funds were offset by car donations, assistance from local businesses and partners, and volunteer assistance. In Idaho homes that lie on the fringe of forests and rangeland face a continuing threat of fire that knows no boundary between private property and wildland. The West Central Highlands RC&D Council obtained funds to develop a Fire Education Corps. Five RC&Ds areas contracted with the Student Conservation Association (SCA) to put the Corps together. Fire Education Corps teams spent the summer of 2001 conducting home safety evaluations and providing homeowners with fire prevention techniques, using the nationally recognized FIREWISE protocol, a program for fire education sponsored by a coalition of state and federal agencies. The teams concentrated their efforts in interface areas where fires might start and spread to homes that were surrounded by dense dry fuels. The Northeast Iowa Resource Conservation and Development (RC&D) Council obtained \$105,000 for Spectrum Industries, Inc to provide quality vocational training. Spectrum Industries, Inc., is a wood workshop serving over 135 physically and mentally challenged people from throughout the Northeast Iowa and Southern Minnesota area. This project has provided quality jobs for persons with disabilities, added value to the lower quality hardwoods in the area, and provided a model that can be replicated anywhere in the United States. The goal of Spectrum Industries is to have this woodworking program continue to grow in ways that allow individuals to move into competitive jobs, and provide high quality products. The RC&D Council worked with many different partners to implement the project. The overall value of the project including grant funds, matching funds, and in-kind contribution is estimated at \$300,000 dollars. The Central Mississippi RC&D Council, City of Carthage, NRCS, MS Department of Environmental Quality, and a group of consulting engineers teamed up to help the City of Carthage meet current water quality standards for the State of Mississippi. Carthage has a population of 4,300 and a watershed that drains into the Pearl River. Wastewater treatment for the city was inadequate to meet new water quality standards. Expensive options were provided that were not feasible for a small rural town. Traditional methods needed to meet new water quality standards for the city were estimated to cost \$1.8 million, resulting in increased taxes for the local citizens. Through assistance from the Central Mississippi RC&D Council, another cost-effective alternative was provided to the city. The alternative was a natural wastewater treatment system costing approximately \$650,000. This system saved the town more than \$1.1 million and provides clean water releases into the Pearl River. The Erie Basin RC&D Council in Ohio has been managing a Revolving Loan Fund for several years. The success of this ongoing project has resulted in three other RC&D Areas in Ohio establishing revolving loan funds to serve the citizens in their areas. These revolving loan funds provide money to new and existing businesses primarily in the area of natural resource development. They are designed to create private sector job opportunities and to boost the economy of an area. Partnerships were established with USDA Rural Development, local planning agencies and banks in RC&D areas. Loans have been made to a variety of businesses including a campground in Huron County for improvements which resulted in higher use of the facilities; a company which recycles 1,000,000 pounds of plastic a week which would otherwise be headed for the landfill; and a charter boat service on Lake Erie which is equipped to handle physically and mentally disadvantaged individuals. These

loans have helped businesses in the RC&D areas and have helped create new jobs. This is a project that can be easily duplicated throughout the country. In Pennsylvania NRCS, along with seven RC&D Councils, local Conservation Districts, the Pennsylvania Department of Environmental Protection (DEP), and 27 landowners collaborated with solar component suppliers to demonstrate the use of photovoltaic (PV) solar technology on livestock farms. Twenty-seven solar pump systems were installed on a variety of livestock operations. The primary objective was to advance the concept of intensive rotational grazing and reduce the need for mechanical harvesting and its inherent consumption of fossil fuels. Water is available on most Pennsylvania farms, but it is seldom located where it will support properly designed and managed grazing systems. Therefore it must be moved via pipelines using either gravity or mechanical means. Water for use in most rotational grazing systems in Pennsylvania generally needs to be pumped. Since most under-utilized grazing lands are often very remote and at great distances from grid-power sources, alternative energy sources must be used to power the pumps. Solar arrays proved to be very durable and dependable for production of power to pump water despite Pennsylvania's intermittent overcast skies. It was found that solar power is a cost effective and a viable alternative to conventional power sources for water pumping in remote areas if it is properly designed, installed, and maintained. Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

10.920 GRASSLAND RESERVE PROGRAM

(Grassland Reserve Program (GRP))

FEDERAL AGENCY:

Natural Resources Conservation Service, Department of Agriculture

AUTHORIZATION:

Farm Security and Rural Investment Act of 2002., Public Law 107-171, 16 U.S.C 3838n-3838q; The Food, Conservation, and Energy Act of 2008, Public Law 110-246.

OBJECTIVES:

To assist landowners and operators in restoring and protecting eligible grazing lands, including rangeland, pastureland and certain other lands through rental contracts and easements.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE

USES AND USE RESTRICTIONS:

GRP easements and rental contracts emphasize support for working grazing lands. All participants are subject to the Adjusted Gross Income Provision set forth in 7 CFR Part 1400. This limitation provides that individuals and entities that have an average adjusted gross income exceeding \$1 million for the three tax years immediately preceding the year the contract is approved are not eligible to receive program benefits, unless 66.6 percent of the adjusted gross income is derived from farming, ranching, or forestry operations. Easements and rental contracts will (1) permit grazing on the land in a manner that is consistent with maintaining the viability of the native and natural grass, shrub, forest, and wildlife species adapted to the locality; (2) permit haying, mowing, or harvesting for seed production, except during the nesting and brood-rearing seasons for birds in the area that are in significant decline; (3) allow for fire rehabilitation and construction of firebreaks, fences, watering facilities and practices that protect and restore the grasslands functions and values; and (4) prohibit the production of row crops, fruit trees, vineyards, or any other agricultural commodities. Both easements and rental contracts will require that the land is managed to maintain the viability of the plant community as described in the conservation or grazing management plan.

Applicant Eligibility:

GRP is available on privately owned lands. Eligible land includes grassland, land that contains forbs, or shrubs (including rangeland and pasture land; or land that is located in an area that has historically been dominated by grassland, forbs, and shrubs; and has potential to provide habitat for animal or plant populations of significant ecological value. Incidental lands, in conjunction with eligible land, may also be considered for enrollment to allow for the efficient administration of an easement or rental contract.

Beneficiary Eligibility:

Only landowners may submit applications for easements; landowners and others who have general control of the acreage may submit applications for rental contracts. Easements may also be acquired by eligible entities based on a 50 percent cost-share with the Federal government. Eligible entities are defined as units of State, local or Tribal government or nongovernmental organizations that have a charter describing a commitment to conserving ranchland, agricultural land, or grassland for grazing and conservation purposes.

Credentials/Documentation:

Eligible entities must demonstrate it has the relevant experience and resources to administer a GRP easement. Its charter or mission describes its long term commitment to conserving ranchland, agricultural land, or grassland for grazing and conservation purposes. NRCS evaluates an entity's capacity to acquire, manage and enforce easements; its staffing and the ability of an entity to provide matching funds before entering into a cooperative agreement. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Any owner or operator or tenant meeting eligibility criteria may submit an application for participation. Applications are accepted in local USDA service centers at any time. USDA will establish criteria to evaluate and rank applications for easement and rental contract enrollment. Ranking criteria will emphasize support for high quality grasslands and shrublands; grazing operations; plant and animal biodiversity; and grasslands under threat of conversion to cropping or development. Individual project selection will be made by State level USDA officials. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Applicants are required to provide general information about the location of the project, contact information for the applicant, and designate the type of enrollment desired by the applicant (i.e. permanent easement or maximum allowed by State law, 10-year, 15-year, or 20-year rental contract). Applications can be obtained through local USDA service centers or the website of the

Natural Resources Conservation Service Office. See www.nrcs.usda.gov. Select Programs from the menu, then select Grassland Reserve Program.

Award Procedure:

NRCS State Offices rank the individual parcels in the applications based on ranking criteria established by the State Technical Committee. The ranking factors are developed based on national and state priorities.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Within a Federal fiscal year (October 1 September 30) based on funding availability.

Appeals:

Applicants or participants may appeal decisions regarding this program in accordance with 7 CFR Part 614 and Parts 11 and 780.

Renewals:

Not Applicable.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program.

Matching Requirements: Percent: 50%. For GRP acquisitions made through a Cooperative Agreement, each eligible entity is required to provide, in cash, at least 50 percent of the purchase price of the conservation easement. Purchase price is defined as the appraised fair market value minus any landowner donation. The landowner donation is not a cash donation, but is merely the reduction in value the landowner will accept as payment for the sale of the conservation easement. Each eligible entity is required to fund its own administrative costs in acquiring easements, such as surveys, appraisals, deed preparation, title searches, and costs incurred in restoring, managing and enforcing the easements. MOE requirements are not applicable to this program.

No cash reports are required. Annual reports on the status of the easements acquired will be prepared by the eligible entity and submitted to the NRCS State Office. Fund disbursement reports are prepared by NRCS. Expenditure reports are not applicable. No performance monitoring is required.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. An audit may be made in accordance with the Office of Management and Budget (OMB) Circular No. A-102 Uniform Administrative Requirements for Grants and Cooperative Agreements to State and local governments and other related Circulars.

10.904 Watershed Protection and Flood Prevention

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: NRCS made a major effort to accelerate the work during fiscal year 2006. The objective for NRCS and our local, State and federal partners is to finish all dead tree removal work in the priority areas by the end of calendar year 2007. This has been communicated to all our partners and plans are being put into place to accomplish this goal. Alabama: Hurricane Recovery Efforts -- Alabama has been very aggressively responding to municipalities and local units of government to assist with repair of damages caused by recent hurricanes, Dennis and Katrina. For traditional Emergency Watershed Protection Program (EWP) efforts, Alabama received and approved requests from 34 sponsors for \$18,893,975 to address damages at 205 sites. The potential fire hazards resulting from downed timber from hurricane damage needed to be addressed. For removal of downed timber resulting from hurricane damage from Hurricanes Dennis and Katrina, Alabama recently obligated \$14.6 million dollars to implement emergency measures to relieve imminent hazards to life and property. Alabama received requests from 1,050 landowners to address damages on 295,114 acres. Priority was given in areas with a high risk for wildfire and associated smoke concerns near transportation corridors and fire concerns near urban interface areas. Five counties designated as limited resource areas were assisted with the Program. In addition, the Poarch Band of Creek Indian Reservation has EWP contracts totaling \$779,000 to repair 16 hurricane-damaged sites. This is the first time the tribe has participated in the EWP Program. Florida: Hurricane Recovery Efforts -- Hurricane Charley - City of Punta Gorda: On October 24, 2005 Hurricane Wilma hit Broward County. With over 2,000 miles of canals and waterways in Broward County, most were damaged from debris and erosion. NRCS provided financial and technical assistance to 31 local units of government to remove debris from waterways and repair erosion damage to streambanks. Several sites are completed with the remainder of the work in progress. Massachusetts: Whittenton Pond Dam, Taunton -- NRCS used EWP funding to alleviate the threat to public safety and property through a controlled draw-down of water due to the high risk of dam failure due to flooding The wooden portion of the dam was removed as part of the draw-down and rock was used to stabilize the site to stop further erosion. Without immediate action by NRCS the dam could have failed flooding business and residences in Taunton. Massachusetts: Millpond Dam, Rockport -- A dam in Rockport partially collapsed after heavy rain and was in jeopardy of failing. NRCS immediately responded and place rock to stabilize the dam until sponsors could inspect and determine the best course of action to rebuild or remove the dam. Without NRCS action the dam could have failed damaging water and sewer lines immediately downstream along with other businesses and residences. Since the dam is in close proximity of Rockport Harbor rupture of

the sewer line could have caused serious contamination. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

EWP projects are eligible when it is determined that the current condition of the land or watershed impairment poses a threat to health, life, and property. Assistance includes EWP practices that provide runoff retardation and soil erosion prevention, safeguard lives and property, and relieve an imminent threat that is a result of a sudden impairment of a watershed due to a natural disaster.

Extension requests will be considered by the federal program office only if the recipient has submitted all required performance reports. At least sixty days prior to the end of the award, recipients must discuss with their federal program officer expected reprogramming and extensions requests. After preliminary negotiation on proposed projects and extensions, formal written reprogramming and extension requests should be received by the federal program office 45 days prior to the end date of the award. The federal program office will not recommend approval for any retroactive extension request (received after the end date of the award). Recipients should make every effort to submit one extension request for all projects needing an extension (when possible, multiple extension requests should be avoided). With sufficient justification, the federal program office will recommend approval of a six-month extension for the first extension request. First time or cumulative extension requests for more than six months but less than 12 months, will need more compelling justification as to why the project was not completed on time or could not be completed within the first six-month extension. Although the federal program office discourages extensions of more than 12 months, the federal program office will recommend approval in cases where the funds are already obligated. Renewal of an award to increase funding or extend the period of performance is at the total discretion of the Department.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: (Under other CFDA's) NOAA initiated a merit-based funding process in 2007 to develop and enhance regional coastal ocean observing systems and to achieve three long-term outcomes: establishing coordinated regional observing and data management infrastructures, developing applications and products for regional stakeholders, and crafting regional and national data management and communications protocols. Funds are provided annually to regional partners to meet these objectives.

For example, The Alliance for Coastal Technologies (ACT) is a NOAA-funded partnership of research institutions, resource managers, and private sector companies dedicated to fostering the development and adoption of effective and reliable sensors and platforms. ACT priorities include: transitioning emerging technologies to operational use rapidly and effectively; maintaining a dialogue among technology users, developers, and providers; identifying technology needs and novel technologies; documenting technology performance and potential, and; providing the Integrated Ocean Observing System (IOOS) with information required for the deployment of reliable and cost-effective networks.

The Great Lakes Observing System (GLOS), also a NOAA-funded initiative, focused on four tasks that support regional observation priorities: 1) implementation of prototype nearshore buoys on lakes Superior, Michigan, Erie and Ontario to collect meteorological, wave information, and vertical lake temperature observations; 2) development of public domain 3D hydrodynamic modeling for the lakes Huron-to-Erie Corridor (HEC), including Lake St. Clair; 3) expansion of the development, user assessments and market analysis of customized integrated harbor specific products (Great Lakes HarborView), and; 4) implementation of the Great Lakes Modeling and Assessment Center (GLMAC).

The Alaska Ocean Observing System (AOOS) is focused on four key issues: climate change and its impacts, sustainability of fisheries and marine ecosystems, mitigation of natural hazards, especially coastal erosion, and safety of marine operations and health of coastal communities. Priorities in FY09 include continued development of the Prince William Sound (PWS) Ocean Observing System pilot project that collects observations for use by stakeholders and develops and tests forecast models as a demonstration of an end-to-end observing system in Alaska. The high-resolution wind, wave, and ocean current forecast products provide improved marine safety for recreational and commercial vessel operators and enhance the security to oil tanker traffic in PWS, and will ultimately be expanded to the northern Gulf of Alaska. In addition, AOOS will work to establish its data and web portal as the regional coastal and ocean information system for Alaska, furthering statewide capacity in data management, modeling, and product visualization. Credentials/Documentation:

To be considered for EDA investment assistance, applicants must first submit a complete EDA application package. If EDA determines that the proposed Public Works project merits further consideration, EDA will request: a copy of the region's Comprehensive Economic Development Strategy (CEDS); letters of commitment to document matching funds; a USGS map of the site; letter of commitment from private beneficiaries of the project; comments from the metropolitan area review/clearinghouse agency; a legal opinion and other documentation, as necessary, verifying the applicant's answer to questions regarding project ownership, operation, maintenance, and management; an engineering report; an environmental narrative (and possibly an Environmental Impact Statement if deemed necessary); and documented approval from the State Historic Preservation Officer (SHPO). 11.302 ECONOMIC DEVELOPMENT_SUPPORT FOR PLANNING ORGANIZATIONS

Planning Investments and Comprehensive Economic Development Strategies

FEDERAL AGENCY:

Economic Development Administration, Department of Commerce

AUTHORIZATION:

Public Works and Economic Development Act of 1965, as amended (42 U.S.C. 3121 et seq.).

OBJECTIVES:

The Economic Development Administration (EDA) provides Planning assistance to provide support to Planning Organizations (as defined in 13 CFR 303.2) for the development, implementation, revision, or replacement of a Comprehensive Economic Development Strategy (CEDS), short-term planning efforts, and State plans designed to create and retain higher-skill, higher-wage jobs, particularly for the unemployed and underemployed in the nation's most economically distressed regions.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Planning investment assistance helps bear the direct and indirect costs incurred by a Planning Organization in developing and implementing a CEDS. Alternatively, it can be used by a State for statewide planning purposes, or it may be used for short-term planning activities to include updating a portion of a CEDS, economic analysis, development of economic development policies and procedures, and development of economic development goals. Planning activities supported by these Investments must be part of a continuous process involving the active participation of Private Sector Representatives, public officials and private citizens, and include:

- (a) Analyzing local economies;
- (b) Defining economic development goals;

11.303 ECONOMIC DEVELOPMENT_TECHNICAL ASSISTANCE

National Technical Assistance; Local Technical Assistance; University Centers

FEDERAL AGENCY:

Economic Development Administration, Department of Commerce

AUTHORIZATION:

Public Works and Economic Development Act of 1965, as amended (42 U.S.C. 3121 et seq.).

OBJECTIVES:

EDA oversees three technical assistance programs (National, Local and University Center) that promote economic development and alleviate unemployment, underemployment, and out-migration in distressed regions. These programs provide grants or cooperative agreements (to: (1) invest in institutions of higher education to establish and operate University Centers to provide technical assistance to public and private sector organizations with the goal of enhancing local economic development; (2) support innovative approaches to stimulate economic development in distressed regions; (3) disseminate information and studies of economic development issues of national significance; and (4) finance feasibility studies and other projects leading to local economic development. These programs aid the long-range economic development of regions with severe unemployment and low per capita income.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Technical assistance is used to provide information, data, and know-how in evaluating, shaping and implementing specific projects and programs that promote economic development in economically distressed regions. EDA may identify specific training, research or technical assistance Projects it will fund under National Technical Assistance, which will be subject to competition. Ordinarily, these Projects are specified in an FFO, which will provide the specific requirements, timelines and the appropriate points of contact and addresses.

EDA-sponsored University Centers conduct research; provide technical assistance to tribal entities, local governments, and public and private sector organizations; and undertake other activities with the goal of enhancing regional economic development by promoting a favorable business environment to attract private capital investment and higher-skill, higher-wage jobs. University Center recipients specialize in a diverse spectrum of services, ranging from a legal clinic for entrepreneurs to a horticultural institute focusing on linking organic producers to the worldwide marketplace to a center focused on commercializing research in the field of alternative energy. Others focus on technology transfer programs or services for manufacturers. EDA University Center competitions are held once every three years in each EDA Region. The

project must be consistent with the CEDS of the region in which it is located, if applicable.

At least eighty (80) percent of EDA funding under a University Center Economic Development award must be allocated to direct costs of program delivery; unrecovered indirect costs are not chargeable to the award without EDAs express approval. All EDA grants are discretionary. EDA does not award formula grants.

Applicant Eligibility:

Most technical assistance recipients are private or public nonprofit organizations and educational institutions. As defined in 13 CFR 300.3, 'eligible recipients' include a State, city, county, or other political subdivision of a State, including a special purpose unit of a State or local government engaged in economic or infrastructure development activities, or a consortium of such political subdivision, an institution of higher education or a consortium of institutions of higher education, an Economic Development District organization, a private or public nonprofit organization or association, including a faith-based nonprofit organization, acting in cooperation with officials of a political subdivision of a State, or an Indian Tribe, or a consortium of Indian Tribes. Individuals, companies, corporations, and associations organized for profit are not eligible. As used in this paragraph, 'State' includes the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau. Program funds cannot be awarded to individuals and for profit organizations to start or expand a private enterprise.

Beneficiary Eligibility:

None. Investments are intended to finance projects that would be useful in alleviating or preventing conditions of excessive unemployment or underemployment.

Credentials/Documentation:

To be considered for EDA investment assistance, applicants must first submit a complete EDA application package. Additional documentation requirements are set forth in the applicable FFO, but generally include the resumes of key personnel on research/training projects. For University Center competitions, these generally also include a project narrative; budget, budget narrative, and staffing plan; and organizational summary. Non-profit applicants applying for technical assistance will be asked to provide additional documentation. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Except for applications that have a national or multi-regional focus, applications are subject to the requirements of Executive Order 12372, "Intergovernmental Review of Federal Programs" and implementing regulations at 13 CFR 302.9.

Award Procedure:

EDA will award investment assistance in accord with the procedures set forth in the applicable announcement of federal funding opportunity (FFO).

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

For National Technical Assistance and University Center competitions, the deadlines are set forth in the applicable FFO. For Local Technical Assistance, regional offices accept applications on a rolling basis. Approval or disapproval of an application is generally made within 4 months; in many cases, the timeline for award announcement is set forth in the applicable FFO.

Appeals:

Not Applicable.

Renewals:

Each fiscal year, two EDA regional offices will provide a three-year project period for each University Center selected for funding under the requisite competition, with the initial award being made for the first year of the project period. Funding beyond the initial year is dependent upon the availability of funds and satisfactory performance, as determined by EDA and expressed in written notice. The servicing EDA regional office will contact current University Center operators regarding the procedures for applying for continuation funding. National and Local Technical Assistance projects are typically funded for a single project period without any pre-set expectation of renewal. Renewal of an award to increase funding or extend the period of performance is at EDA's sole discretion.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: Generally, the amount of the EDA award may not exceed fifty (50) percent of the total cost of the project. Projects may receive an additional amount that shall not exceed thirty (30) percent, based on the relative needs of the region in which the project will be located, as determined by EDA. See section 204(a) of PWEDA (42 U.S.C. 3144) and 13 C.F.R. 301.4(b)(1). The Assistant Secretary of Commerce for Economic Development has the discretion to establish a maximum EDA investment rate of up to one-hundred (100) percent where the project (i) merits and is not otherwise feasible without an increase to the EDA investment rate; or (ii) will be of no or only incidental benefit to the recipient. See section 204(c)(3) of PWEDA (42 U.S.C. 3144) and 13 C.F.R. 301.4(b)(4). In-kind contributions, fairly evaluated by EDA, may provide the non-federal share of the total project cost. This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Generally, the University Center Program funds applications on a three-year basis with continuation awards made for each of the three years within a project period. The length of the project period for National and Local Technical Assistance projects varies, but is usually for a period of one year. Funds are disbursed as required. See the following for information on how assistance is awarded/released: In accordance with the grant terms and conditions.

Reports:

No program reports are required. No cash reports are required. As specified in the terms and conditions of the award, and as stated in the applicable FFO. EDA requires the submission of the SF-425 Federal Financial Report. EDA reserves the right to conduct site visits as required. In addition, University Centers are subject to an annual peer review.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. The applicant is reminded that EDA or the Department of Commerce's Office of Inspector General also may conduct an audit of an award at any time.

Records:

All financial and programmatic records, supporting documents, statistical reports, and other records of recipients and sub-recipients are required to be maintained by the terms of the agreement.

11.313 TRADE ADJUSTMENT ASSISTANCE FOR FIRMS

Trade Adjustment Assistance for Firms

FEDERAL AGENCY:

Economic Development Administration, Department of Commerce

AUTHORIZATION:

Trade Act of 1974, as amended (19 U.S.C. 2341 et seq.).

OBJECTIVES:

To provide trade adjustment assistance to firms and industries adversely affected by increased imports.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Under Chapter 3 of Title II of the Trade Act of 1974, a firm may apply to the Economic Development Administration (EDA) of the Department of Commerce for certification of eligibility to apply for trade adjustment assistance (TAA). Interested firms that believe they meet the requirements set forth in 13 CFR part 315 may contact EDA or one of the EDA-funded Trade Adjustment Assistance Centers (TAACs). TAACs will assist firms, at no cost, in completing and submitting a petition (Form ED-840P or any successor form) to EDA. Before a firm receives technical assistance under the program, the firm must have an adjustment proposal approved by EDA. Usually the adjustment proposal, which includes an unbiased diagnostic of the firm's strengths, weaknesses, opportunities and threats, is prepared by the TAAC in cooperation with the certified firm. The adjustment proposal also identifies technical assistance tasks, which when implemented, will guide the firm toward economic recovery. The adjustment proposal must also demonstrate that the implementation of the technical assistance tasks has a reasonable chance helping the firm recover. The firm must pay at least 25 percent of the cost of preparing the adjustment proposal. After a firm's adjustment proposal is accepted by EDA, the firm is authorized to apply for technical assistance to implement the recovery strategy. The technical assistance is usually provided by a private consultant, who is jointly hired by the certified firm and the TAAC. The certified firm and the TAAC each typically pay one half of the consultant's fees. Actual provision of TAA will depend on the feasibility of the firm's adjustment proposal, compliance with the requirements of the Trade Act, EDA's regulations and guidelines, and the availability of funds. Organizations representing trade-injured industries are eligible under the Trade Act to apply to EDA for industry-wide assistance.

Applicant Eligibility:

Section 253 of the Trade Act (19 U.S.C. 2343(b)) provides that grants may be

awarded to "intermediary organizations (including Trade Adjustment Assistance Centers)" to provide assistance to trade-injured firms. For an industry association or other organizations to be eligible for industry assistance under section 265 of the Trade Act (19 U.S.C. 2355(a)), the applicant must submit evidence demonstrating that the industry faces import competition and includes a substantial number of Trade Act-certified firms or worker groups.

Beneficiary Eligibility:

Only firms certified by EDA on behalf of the Secretary of Commerce are eligible for assistance under the TAA program. Industries that can demonstrate they have been injured by imports and have a substantial number of Trade Act certified firm or worker groups may also benefit. The principal benefit is cost-shared technical assistance: the TAA program pays up to one-half of the cost of assistance by private-sector consultants and contractors for operational improvements at certified firms.

Credentials/Documentation:

The TAACs act as intermediaries for this program between EDA and the firm. Entities seeking industry-wide assistance must contact EDA staff to discuss their needs, describe the import injury and determine if funding is available for industry-wide projects. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Industry associations or other organizations seeking industry assistance must submit an application (SF-424) if invited to do so by EDA.

Award Procedure:

Awards to TAACs are made based upon submitted applications, previous performance under cooperative agreements with EDA, and the availability of funds. Acceptance of an application or amended application for a cooperative agreement does not ensure funding by EDA.

Contact the headquarters or regional office, as appropriate, for application deadlines.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: Coastal management programs have been actively involved in protecting wildlife and fisheries habitats, and regulating land use impacts on water quality. In addition, coastal programs have taken the leadership of nationwide beach clean-ups; marshes are protected in South Carolina and development along the State's 2,876 mile shoreline is now subject to pollution and storm water guidelines; CZM studies led to State bonds to rebuild coastal fishing piers and facilities; in California, the permit for a marina was conditioned to provide at least 80 percent of berthing for commercial fishing vessels, thus assuring them a permanent base. Coastal land valued acquired for public access in the ten States and territories cited; land obtained for recreation in California, Massachusetts, and Guam; access ways to the water have been designated in Rhode Island and California. Coral funded programs include the creation of the East End Marine Park in St. Croix, USVI and abatement of land based sources of pollution in Florida. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

While 80 to 90 percent of the appropriated funds are allocated to States through a formula based on coastal population and shoreline mileage, the tasks in the State application are reviewed for relevance to program objectives and cost effectiveness. The remainder of the funds are allocated according to criteria published by the Coastal Program Division. CELP and Coral Reef funds are distributed through a competitive process, subject to availability of funds for competitive awards.

11.426 FINANCIAL ASSISTANCE FOR NATIONAL CENTERS FOR COASTAL OCEAN SCIENCE

FEDERAL AGENCY:

National Oceanic and Atmospheric Administration (NOAA), Department of Commerce

AUTHORIZATION:

Marine Protection, Research, and Sanctuaries Act of 1972, Title II, Section 201, Public Law 095-532; National Ocean Pollution Planning Act of 1978, Section 6, Public Law 095-273; Executive Order 13158.

OBJECTIVES:

To determine the long-term consequences of human activities which affect the coastal and marine environment; to assess the consequences of these activities in terms of ecological, economic, and social impacts upon human, physical and biotic environments, and to define and evaluate management alternatives which minimize adverse consequences of human use of the coastal and marine environments and resources. Executive Order 13158 directs Federal agencies to work collaboratively with public and private interests to develop a science-based framework for the national system of marine protected areas (MPAs). To insure compliance with this order, NCCOS is intending to conduct an integrated assessment (IA) examining the impacts of various marine resources uses on sustainable fisheries, biodiversity, and submerged cultural artifacts and looking at how a network of MPAs can be used to manage those impacts. The assessment is intended to provide scientific information that can be used to evaluate the existing system, evaluate options for future potential action, and identify gaps in our understanding of this issue. The IA will give stakeholders in the area a process for evaluating alternative methods of implementing E.O. 13158 and a product that 1) identifies objectives and priorities for marine protection and habitat enhancement, 2) outlines agreed-upon actions and implementation plans to achieve marine protection and habitat enhancement benefits, 3) serves as a tool for subsequent IAs, and 4) maintains or improves ecosystem health and the health of high priority, at-risk species. This assessment will be conducted in collaboration with NOAA's MPA Center, National Marine Sanctuaries (NMS), Non-Governmental Offices (NGO) and academic partners. Integrated assessments serve as a formal bridge between science and management to integrate the best existing scientific information for use by coastal managers. Integrated assessments 1) document status and trends of ecosystem and cultural resource conditions, 2) relate those trends to their environmental and economic causes and consequences, 3) predict outcomes of alternative management actions, and 4) review means to implement those alternatives. A successful IA is responsive to policy-relevant questions, based on peer review and public participation, broadly integrated and synthetic, based on high-quality existing information, and predictive.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: Alaska Region: Development of programs seeking to stabilize and restore fisheries access to the Gulf of Alaska community-based small boat fleets and assist in the creation of new fisheries opportunities. Provide research assistance to aid in run forecasting and restoration of Yukon River salmon. These activities are carried out by 5 grants to Alaska recipients. Northeast Region: Work in 2005 focused on: A 6-day research video cruise to the northern portion of Nantucket Lightship Closed area (NLCA). The survey concentrated on both high and low density of scallops. A multistage centric systematic survey on two spatial scales was compared to a simple random survey with 300 stations. This work allows for statistical comparisons between the two survey designs including comparisons of densities and size frequencies of sea scallops, other macroinvertebrate and sediment compositions; Conduct research on a turtle excluder dredge in two phases. In phase 1, design and fabricate a prototype scallop dredge frame, field test the frame on commercial trips, and modify the design as appropriate. The dredge will consist of two components; (1) a chain mat that had previously designed and tested that prevents turtles from entering the bag dredge and (2) a new concept for construction of the dredge frame to keep turtles from snagging on top of the dredge. The second phase will commence when an acceptable design has been achieved and will consist of extensive scientific field testing of the dredge. Southeast Region: Development of programs to better document fishing effort in the shark fishery, south Atlantic snapper-grouper fisheries, and the U.S. Virgin Islands commercial fisheries. Development of a Gulf of Mexico shrimp trawl bycatch device testing project. Continuation of king mackerel stock research. Cooperative research to study the life histories of various reef fish in the Southeast. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

Award funds must be spent in the indicated budget period and in accordance with DOC/NOAA finance and reporting procedures. See the following for information on how assistance is awarded/released: Funds are released in advance or by reimbursement, as agreed to in the Standard Terms and Conditions document required for each grant.

Reports:

Program reports are not applicable. Cash reports are not applicable. Semi-annual progress and financial reports are due six months after the start date of the award. Progress reports should summarize all work accomplished during the six months following the start date of the award and the financial reports should reflect the use of funds. A final report is due 90 days after completion of the project. Expenditure reports are not applicable. Performance monitoring is not applicable.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Meteorological Services to Aviation, 49 U.S.C 44720; Weather Service Organic

Act, 15 U.S.C 313.

OBJECTIVES:

To maintain a cooperative university/Federal partnership to conduct joint research and development on pressing surface water hydrology issues common to National, regional, local operational offices, private consulting hydrologists, and academics.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Funds can be used to support research and development on issues related to the forecasting of surface hydrologic conditions. Specific restrictions, other than those mandated for grants, are evaluated on an individual grant or program basis. The program office may support non-competitive awards by direction from legislative language or unsolicited projects that are individually qualified.

Applicant Eligibility:

Eligible applicants are Federally recognized institutions of higher learning, agencies of State or local governments, quasi-public institutions such as water supply or power companies, hydrologic consultants and companies involved in using and developing hydrologic forecasts (either for reducing flood damages or for water management decisions).

Beneficiary Eligibility:

Since the benefits of the overall program are for a reduction in loss of life and damage resulting from flooding and drought, and improved utilization of water supply and water dependent industries, benefits accrue from these projects to:

- (1) Federal agencies responsible to forecast, assess, manage, disperse, project economic conditions based on projections of water supply for agriculture and industry, and control water resources;
- (2) interstate commissions to control and allocate surface waters;
- (3) State agencies responsible for allocating and controlling water resources and for making projections for the use of water for industry and agriculture and for planning and developing infrastructure within the State that is impacted by rivers and lakes;
- (4) local agencies dependent on water for economic planning, emergency preparedness, and public water supply;
- (5) all businesses and industries depending all or in part upon surface water supplies or adequate water in lakes for recreation, in rivers to generate power, or in production or dispersion of products or who must take action in order to ameliorate damage during flood situations,
- (6) wildlife interests at all levels that are dependent upon water management for managing the environment;
- (7) homeowners or farmers who must plan for proper responses to flooding or inadequate water supply; and
- (8) academic institutions which are funded for programs dealing with the studies of hydrologic science.

Credentials/Documentation:

Proposals with statement of work, estimated budget, and curriculum vitae. Costs will be determined in accordance with OMB Circular Nos. CWPPRA projects require a 15 percent match by the State of Louisiana at this time. Under the Community-based Restoration Program guidelines, projects are encouraged to demonstrate a minimum nonfederal match of 50 percent of the total cost needed to complete the proposed project to be most competitive. A 1:1 match is required for the General and International Coral Reef Conservation Grant Programs and grants under the Marine Debris Research, Prevention, and Reduction Act, although the MDRPR Act allows the NOAA Administrator to waive all or part of the matching requirement in certain instances. The ARRA has no statutory matching requirement.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Awards are normally for 12-24 month periods, and vary by specific funding opportunity. Award funds must be spent in the indicated budget period and expended in accordance with DOC/NOAA finance and reporting procedures. See the following for information on how assistance is awarded/released: Funds are released as needed through the automated treasury process (ASAP) or by reimbursement, as indicated in the Standard Terms and Conditions document required for each grant.

Reports:

Program reports are not applicable. Cash reports are not applicable. Reports are due in accordance with the terms and conditions of the award. The Department's Financial Assistance Standard Terms and Conditions may require that financial and performance reports be submitted semi-annually or on some other agreed upon schedule. Records:

Generally, a recipient is required to retain records relating to a particular grant for three years from the date of submission of the final financial report. In cases where litigation, claim or an audit is initiated prior to expiration of the three-year period, records must be retained until the action and resolution of any issues associated with it are complete or until the end of the three-year retention period; whichever is latest.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: In fiscal year 2008, cooperative agreements for coastal restoration projects in Louisiana under the CWPPRA program resulted in funding engineering and design for the Bioengineered Oyster Reef Demonstration and the Bayou Dupont Ridge and Marsh Creation Project. The program continued to fund crevasse cuts through the Delta Wide Crevasse Project. Under the NOAA Community-based Restoration Program (CRP) and the Open Rivers Initiative, 9 awards were funded in FY 08 ranging from \$40,000 to \$240,000 for a total of \$935,000. Over \$7 million went to the continued support of 17 national and regional habitat restoration partnerships (funded between \$100,000 and \$1.6 million) that provide subawards for individual habitat restoration projects. These projects leverage between \$3 and \$5 for every NOAA dollar invested, have significant community support and hands-on participation, and typically have an associated outreach or informal education component. In 2008 the Community-based Marine Debris Prevention and Removal Project Grants funded 10 applications ranging from \$40,000 to \$175,000 for a total of 868,700. NOAA's Coral Reef Conservation Grant Program launched a new international coral reef program in 2002, pursuant to the Coral Reef Conservation Act of 2000. During Fiscal Year 2008, the International Coral Reef Conservation Grant Program invested \$ 437,321 in 10 projects in 10 countries that leveraged \$ 488,785 in matching funds. Funds were distributed among the following four themes: (1) Promote Watershed Management in the Wider Caribbean, Brazil, and Bermuda; (2) Regional Enhancement of Marine Protected Area Management Effectiveness ; (3) Encourage the Development of National Networks of Marine Protected Areas in the Wider Caribbean, Bermuda, Brazil, Southeast Asia, and the South Pacific; and (4) Promote Regional Socio-Economic Training and Monitoring in Coral Reef Management in the Wider Caribbean, Brazil, Bermuda, the Western Indian Ocean, the Red Sea, the South Pacific, South Asia, and Southeast Asia. In 2008, the General Coral Reef Conservation Grant Program funded 12 applications ranging from \$35,000 to \$50,000 for a total of \$503,024. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2008: NOAA's restoration programs provide funding to implement a wide variety of on-the-ground habitat restoration projects to benefit marine, estuarine and riparian habitats, including but not limited to salt marshes, seagrass beds, coral reefs, mangrove forests, and freshwater habitat important to diadromous fisheries, predominantly in coastal areas around the United States. The Office of Habitat Conservation also provides funding for coral reef conservation activities. The General Coral Reef Grant Program supports on-the-ground efforts that: (1) help preserve, sustain and restore the condition of coral reef ecosystems, (2) promote the wise management and sustainable use of coral reef resources, (3) increase public knowledge and awareness of coral reef ecosystems and issues regarding their conservation and (4) develop sound scientific information on the condition of coral reef ecosystems and the threats to such ecosystems. Fiscal Year 2009: No Current Data Available Fiscal Year 2010: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Applications are received and projects selected from several sources: Unsolicited proposals; responses to special solicitations in the Federal Register and Grants.gov; or congressionally directed projects. For CWPPRA, the projects to be funded are selected through an annual, publicly-vetted process and ultimately approved by a multi-agency Task Force. Applications submitted through competitions are reviewed based on NOAA's standard criteria which are weighted as announced in specific funding opportunities. These criteria include: Importance and Applicability; Technical/Scientific Merit; Overall Qualifications of Applicants; Project Costs; and Outreach and Education. Regardless of source, applications must undergo rigorous technical review and comply with all OMB, DOC, and NOAA grants policies and procedures. Any financial assistance announcements must be made in the Federal Register; announcement on Grants.gov only is not sufficient.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2008: Through a 2007 grant recommended by the Coastal Services Center/Pacific Services Center, the Hawaii Nature Center developed a watershed education program for Title I students on Maui, Oahu, and Kauai under the Bay Watershed and Education Training (B-WET) Hawai'i Program. Through this innovative program, students participated in a day-long cultural and ecological program featuring hands-on activities related to the aspects of island watersheds. Students participated in three modules: the forests role in the watershed; the unique role of wetlands and marshes; and the role of humans in altering the natural environment from the mountains to the sea. More than 2500 Title I students have participated in the Nature Centers watershed program since 2004. The NOAA Integrated Ocean Observing System (IOOS) Program has funded a number of competitive awards supporting the Regional Coastal Ocean Observing Systems and Regional Associations that are working to integrate national and regional ocean and coastal observations, data, and models. These efforts provide the data, information, and products needed to address estuarine and coastal issues of importance to the nations ocean and coastal regions and the Great Lakes. In addition, they are intended to address regional and national priorities, such as climate change, alternative energy, harmful algal bloom forecasting, coastal marine ecosystem assessments, and coastal inundation modeling. The Oceans and Human Health Initiative (OHHI) Program has funded a variety of projects targeted toward development of early warning indicators for ocean health threats. For example, in the Great Lakes, OHHI researchers developed a hydrodynamic models focused on how particles play a role in transporting biological contaminants and how sediments may serve as either a reservoir or final sink for pathogens. In the Gulf of Mexico, OHHI-supported researchers have identified, modeled, and mapped key environmental factors related to risk of pathogenic bacteria (*Vibrio parahaemolyticus*) in oysters in the Mississippi Sound. OBJECTIVES:

To manage and dispose of multifamily housing projects that are owned by the Secretary or that are subject to a mortgage held by the Secretary in a manner that is consistent with the National Housing Act; protect the financial interests of the Federal government, and will, in the least costly fashion among reasonable available alternatives: preserve certain housing so that it can remain available to and affordable by low-income persons; preserve and revitalize residential neighborhoods; maintain the existing housing stock in a decent, safe and sanitary condition; minimize the involuntary displacement of tenants; maintain housing for the purpose of providing rental housing, cooperative housing, and home ownership opportunities for low-income persons; supporting fair housing strategies; and dispose of such projects in a manner consistent with local housing market conditions.

TYPES OF ASSISTANCE:

SALE, EXCHANGE, OR DONATION OF PROPERTY OR GOODS

USES AND USE RESTRICTIONS:

This section only applies to multifamily housing projects owned by the Secretary or that are subject to a mortgage held by the Secretary for which a foreclosure sale is to be held. A property can be sold with its current project-based Section 8 contract assigned to the new owner so that contract and its requirements stay in place. A property can be sold with tenant-based Housing Choice Vouchers (14.871) being provided to eligible tenants, which give the tenants the ability to stay on-site in units that meet HUD standards, or move to another location. In both cases, the residents must meet the eligibility requirements of those programs, which are defined elsewhere. A HUD-owned property may be sold with an up-front grant to assist in paying for rehabilitation or rebuilding provided funds have been appropriated by Congress. To be eligible, in addition to the property being HUD-owned, it must have more than 50 percent of the units in the project occupied by very low-income residents at

the time a disposition plan is approved by HUD, or HUD must determine it is essential, as affordable housing, to the revitalization of its community; it must be located in a housing market or submarket in which there is not sufficient habitable, affordable, rental housing, as defined in 24 CFR 290.3; it will generate, after rehabilitation or rebuilding, sufficient rental income in a competitive market to cover all operating expenses, meet after sale debt service requirements, fund required reserves and throw off positive cash flow; will provide affordable housing for at least 20 years, after the rehabilitation and/or rebuilding is completed; meets such other requirements, including deed restrictions, loan provisions, and monetary penalties for non-performance, as HUD may determine are appropriate on a case-by-case basis. The maximum that HUD will fund per project in an up-front grant or loan is 50 percent of total development cost (TDC), or \$40,000 per affordable, finished unit, whichever amount is less (not to exceed the current number of residential units in the project).

Applicant Eligibility:

These properties can be purchased by governmental entities, private individuals, corporations, or nonprofit organizations who have the requisite qualifications and agree to abide by the conditions set by HUD for the particular property sale.

Beneficiary Eligibility:

The ultimate beneficiary of those properties sold for continued use as affordable housing are low-income individuals and families.

Credentials/Documentation:

Interested parties must file HUD form 2530, "Previous Participation Clearance Application," and certify to HUD that any properties owned by the purchaser in the same geographical area of the property being purchased meet all applicable standards and housing codes. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. There is no application process. Foreclosure sales are conducted on an open, oral bid process, with sealed bids also being permitted. HUD-owned properties may be purchased without competition by governmental entities. HUD can sell some properties non-competitively to nonprofits. All other HUD-owned properties are sold through a full and open competition, usually sealed bids, auctions, or a Request for Proposals. HUD maintains a mailing list of individuals and firms interested in buying these projects, and maintains a website which lists all properties currently available for sale.

Award Procedure:

Properties sold at foreclosure are sold to the highest responsive and responsible bidder. HUD-owned projects may be sold to governmental entities who agree to meet HUD's requirements. Certain HUD-owned projects can be sold to nonprofits who agree to meet HUD's requirements. HUD-owned properties can be sold to the highest responsive and responsible bidder, and some are sold to the proposer with the best experience and plan for the future operation of the property.

OBJECTIVES:

To develop viable urban communities by providing decent housing, a suitable living environment, and expanding economic opportunities, principally for persons of low and moderate income.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Recipient communities may undertake a wide range of activities directed toward neighborhood revitalization, economic development, and community services, facilities, and improvements. Entitlement communities develop their programs and set their funding priorities in conformance with the statutory standards, program regulations, and other federal requirements. Specific activities that can be carried out with Community Development Block Grant

(CDBG) funds include acquisition of real property; relocation; clearance and demolition; rehabilitation of residential and nonresidential structures; provision of public facilities and improvements, such as water and sewer facilities (which require reviews by the State single point of contact or a Regional Planning Agency in accordance with Executive Order 12372), streets, and neighborhood centers. Within program limitations, CDBG funds can also pay for public services. Recipients may provide assistance to microenterprises or other for-profit entities when the recipient determines that such assistance is appropriate to carry out an economic development project. Community-based development organizations may carry out neighborhood revitalization, community economic development, or energy conservation activities. Each CDBG eligible activity must meet one of three national objectives: benefit low- and moderate-income persons, aid in the prevention or elimination of slums or blight, or meet other community development needs having a particular urgency that the grantee is unable to finance on its own. Recipients may only carry out eligible activities as listed in 24 CFR 570.201-207 or the statute.

Applicant Eligibility:

Cities in Metropolitan Areas designated by OMB as a central city of the Metropolitan Area; other cities over 50,000 in Metropolitan Areas; and qualified urban counties of at least 200,000 (excluding the population in entitlement cities located within the boundaries of such counties) are eligible to receive CDBG entitlement grants determined by a statutory formula.

Beneficiary Eligibility:

The principal beneficiaries of CDBG funds are low- and moderate-income persons (generally defined as a member of a family having an income equal to or less than the Section 8 low income limit established by HUD). The grantee must certify that at least 70 percent of the grant funds received during a 1, 2, or 3-year period, that it designates, are expended for activities that will principally benefit low- and moderate-income persons.

Recipients must certify to meet program requirements and applicable federal requirements. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Executive Order 12372 is applicable only where a recipient proposes to use funds for the planning or construction (reconstruction or installation) of water or sewer facilities. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Recipients submit a 5-year Consolidated Plan, an annual action plan, SF Form 424, and certifications to HUD. The Consolidated Plan and annual action plan cover four major formula-distribution HUD Community development programs, including CDBG. The annual action plan must include the local community development objectives and show the proposed use of the funds. If the grantee makes a complete submission within the established deadlines, the Department will make a grant award unless a determination is made by HUD that the grantee's performance is unsatisfactory. HUD will approve the submission generally within 45 days of receipt of the annual action plan and required certifications unless a determination has been made that the grantee has failed to carry out its CDBG program in a timely manner or has failed to conform to the requirements of the statute or other applicable laws. Under such circumstances, HUD may take appropriate actions, including a reduction in the amount of the original formula-allocated grant.

Award Procedure:

None.

14.228 COMMUNITY DEVELOPMENT BLOCK GRANTS/STATE'S PROGRAM AND NON-ENTITLEMENT GRANTS IN HAWAII

State CDBG

FEDERAL AGENCY:

Office of Community Planning and Development, Department of Housing and Urban Development

AUTHORIZATION:

Housing and Community Development Act of 1974, Title I, Section 101-122, Public Law 93-383, 88 Stat. 633, 42 U.S.C 5301-5322.

OBJECTIVES:

The primary objective of this program is the development of viable urban communities by providing decent housing, a suitable living environment, and expanding economic opportunities, principally for persons of low- and moderate-income. Each activity funded must meet one of the program's National Objectives by: Benefiting low- and moderate-income families; aiding in the prevention or elimination of slums or blight; or meeting other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

Thirty percent of funds available for distribution under each annual appropriation for the Community Development Block Grant (CDBG) program is allocated among the States and Puerto Rico (which is considered to be a state for the State CDBG program) for use in areas which are not a metropolitan city or part of an urban county (nonentitlement areas). All States except Hawaii have elected to administer these CDBG funds for areas that do not receive CDBG entitlement grants (14.218). HUD awards the formula grants to these States under the CDBG/State Program. In Hawaii, HUD awards the state's share of these funds to three non-entitlement counties. States must distribute CDBG funds to units of general local government (counties, towns, etc.) in nonentitlement areas. States develop their own programs and funding priorities. Units of general local government then carry out community development activities funded by the State. Eligible activities are directed toward neighborhood revitalization, economic development, or provision of improved community facilities and services. Specific activities that can be carried out with block grant funds include: Acquisition, rehabilitation or construction of certain public works facilities and improvements, such as streets, water and sewer facilities, neighborhood centers, recreation facilities, and other public works; demolition and clearance; rehabilitation of public and private buildings including housing; code enforcement; relocation payments and assistance; economic development; planning activities; certain public services with some restrictions; and administrative expenses. The projected use of funds must be developed to ensure that all activities will meet one of the three national objectives described under "OBJECTIVES". Communities receiving CDBG funds from a state may select subgrantees to carry out approved projects. Such subgrantees may include: Neighborhood-based nonprofit organizations; local development corporations; Small Business Investment Companies; or other nonprofit organizations serving the development needs of nonentitlement areas. Grant recipients may provide assistance to for-profit entities when the recipient determines that the provision of such assistance is appropriate to carry out an economic development project. Communities are restricted from constructing or rehabilitating public facilities for the general conduct of government and from making housing allowances or other income maintenance-type payments. Each State may use a limited portion of its grant, subject to a matching requirement, to administer the program. Each State may also use a limited portion of its grant, with no matching requirement, to provide technical assistance to local governments and nonprofit program recipients. At least seventy percent of the funds received must benefit low and moderate income

persons.

Applicant Eligibility:

Forty-nine State governments and the Commonwealth of Puerto Rico receive funds from HUD under this program. The state of Hawaii does not participate and HUD allocates the state's share of funds to the three Hawaii non-entitled counties. Funds are allocated to each state based on a statutory formula. States must distribute the funds to units of general local government in nonentitlement areas.

Beneficiary Eligibility:

The principal beneficiaries of CDBG funds are low and moderate income persons. For non-metropolitan areas, low and moderate income is generally defined as 80 percent of the median income for non-metropolitan areas of the State or of the county, whichever is higher, adjusted for family size. For eligible localities in metropolitan areas, low- and moderate-income is generally defined as 80 percent of the median income for the metropolitan area, adjusted for family size.

Credentials/Documentation:

Grantees must certify that they will comply with program requirements specified in 24 CFR Part 91. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. States must follow the fiscal requirements contained in 24 CFR 570.489. Each state and non-entitled Hawaii county must submit a Consolidated Plan, an annual action plan and certifications to HUD. The Consolidated Plan and annual action plan cover four major formula-distribution HUD community development programs, including CDBG. The annual action plan must contain the method by which the State will distribute its CDBG funds.

Award Procedure:

HUD will provide funds after the State or non-entitled Hawaii county submits its Consolidated Plan, annual action plan and Certifications.

Deadlines:

Nov 15, 2008 to Aug 16, 2009 Consolidated Plans may be submitted between November 15 and August 16 of each fiscal year in which the grantee will administer funds.

Range of Approval/Disapproval Time:

HUD will review plan submissions for completeness and consistency with the purposes of the Act, within 45 days of receipt from a grantee.

Appeals:

The procedure is described in regulations (24 CFR Part 570 Subpart I for states and 24 CFR Part 570 Subpart O for non-entitlement counties in Hawaii).

Renewals:

Not Applicable.

Formula and Matching Requirements:

Statutory Formula: Title 24, Chapter V, Part 570, Subpart A, Public Law 93-383.

Matching Requirements: For state administration of the program, after an initial allowance of \$100,000 with no match, states may take an additional allowance of up to 3% of the grant amount but must match such expenditures on a dollar for dollar basis. There is no matching requirement for the non-entitlement counties in Hawaii.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Assistance is provided to States and non-entitlement counties in Hawaii on an annual basis. Individual States may impose time limitations on the implementation of grants to recipients. Method of awarding/releasing assistance: by letter of credit.

Reports:

Annual performance report covering all programs included in the Consolidated Plan as prescribed at 24 CFR 91.520. For Hawaii counties, SF-272 Federal Cash Transactions Report. Annual Performance and Evaluation Report details the state's performance in completing activities undertaken with each allocation of funds. Disbursement reports are a standard feature of the Integrated Disbursement and Information System used to access the grantee's line of credit. Program performance monitoring is conducted by field office staff based on risk analysis factors.

State grant amounts are determined by formula. Of the 50 grants awarded to states under the State CDBG program in FY 2009, the average (mean) grant amount was \$21,703,659. Grant amounts ranged from \$2,028,182 to \$73,017,739. These totals do not include Hawaii's allocation awarded to its 3 non-entitled counties. Hawaii's share of the 2009 allocation is \$5,307,115.

Allocations among the territories are based on their populations. If, according to the formula, an eligible government receives less than 05. percent of the yearly appropriation, then that grant is added to the allocation for that State. A State must allocate to its local government or to nonprofit organizations the entire grant, except for the up to five percent used to administer the grant. The administrative funds must be shared with local government grantees in that State. Grantees must match grant funds with an equal amount of funds from other sources including donated material or a building, leasehold value, additional staff salaries, and volunteer time.

14.255 COMMUNITY DEVELOPMENT BLOCK GRANTS/STATE'S PROGRAM AND NON-ENTITLEMENT GRANTS IN HAWAII (RECOVERY ACT FUNDED)

FEDERAL AGENCY:

Department of Housing and Urban Development

AUTHORIZATION:

Housing and Community Development Act of 1974, Title I, as amended, Public Law 93-383; American Recovery and Reinvestment Act of 2009 (ARRA), Title XII, Public Law 111-5.

OBJECTIVES:

The primary objective of this program is the development of viable urban communities by providing decent housing, a suitable living environment, and expanding economic opportunities, principally for persons of low and moderate income. Each activity funded must meet one of the program's National Objectives by: Benefiting low and moderate income families; aiding in the prevention or elimination of slums or blight; or meeting other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available. State CDBG-R program funds are to be used to maximize job retention and creation, and economic benefit, carry out infrastructure improvements on an expedited basis, carry out activities to encourage energy efficiency, and provide assistance to unemployed persons.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Thirty percent of funds available for distribution under each annual appropriation for the Community Development Block Grant (CDBG) program is allocated among the States and Puerto Rico (which is considered to be a state for the State CDBG program) for use in areas which are not a metropolitan city or part of an urban county (nonentitlement areas). All States except Hawaii have elected to administer these CDBG funds for areas that do not receive CDBG entitlement grants. HUD awards the formula grants to these States under the CDBG/State Program. In Hawaii, HUD awards the state's share of these funds to three non-entitlement counties. States (outside of Hawaii) must distribute CDBG funds to units of general local government (counties, towns, etc.) in nonentitlement areas. States develop their own programs and funding priorities. Units of general local government then carry out community development activities funded by the State. The three Hawaii counties directly carry out eligible CDBG activities. Eligible activities are directed toward neighborhood revitalization, economic development, or provision of improved community facilities and services. Specific activities that can be carried out with block grant funds include: Acquisition, rehabilitation or construction of certain public

works facilities and improvements, such as streets, water and sewer facilities, neighborhood centers, recreation facilities, and other public works; demolition and clearance; rehabilitation of public and private buildings including housing; code enforcement; relocation payments and assistance; economic development; planning activities; certain public services with some restrictions; and administrative expenses. The projected use of funds must be developed to ensure that all activities will meet one of the three national objectives described under "OBJECTIVES". Communities receiving CDBG funds from a state or the three Hawaii non-entitlement counties may select sub grantees or other entities to carry out approved projects. Such sub grantees may include: Neighborhood-based nonprofit organizations; local development corporations; Small Business Investment Companies; or other nonprofit organizations serving the development needs of nonentitlement areas. Grant recipients may provide assistance to for-profit entities when the recipient determines that the provision of such assistance is appropriate to carry out an economic development project. Communities are restricted from constructing or rehabilitating public facilities for the general conduct of government and from making housing allowances or other income maintenance-type payments. Each State and the three Hawaii counties may use a limited portion of its grant to administer the program. Each State may also use a limited portion of its grant to provide technical assistance to local governments and nonprofit program recipients. At least seventy percent of the funds received must benefit low and moderate income persons. At least seventy percent of the funds received must benefit low and moderate income persons.

USES AND USE RESTRICTIONS:

The Single Family Property Disposition Program is the marketing and sale of one to four unit properties acquired by HUD after foreclosure of an FHA-insured mortgage. Within the general program there are special disposition programs through which a portion of the property inventory is sold. These programs are referred to collectively as the Good Neighbor Initiatives and include Good Neighbor Next Door Sales program for law enforcement officer, pre-K through 12 teachers and firefighters/emergency medical technicians, Discount Sales to Nonprofits and Local Governments program and Dollar HOME Sales to Local Governments program. Information for each of these programs is covered separately. The majority of foreclosed one to four unit properties are sold through the general disposition program. HUD contracts with private companies to manage and market the properties. Properties are listed for sale by each company for the company's contract area; generally, a state. The listings may be viewed by going directly to the contractor's website or visiting HUD's website at <http://www.hud.gov/momes>, where you will be directed to the listings for your state. The listings provide the appraised value of the property, the property address, a brief description of the property and access to a Property Condition Report prepared by the contractor. Complete information explaining the sales process and earnest money requirements is also available. Bids must be submitted electronically by a real estate broker. An earnest money deposit is required with each bid submitted. Special opportunities are available for bidders who intend to occupy the purchased property as their personal residence. Properties not purchased during this Exclusive Listing Period are then available for the general public, including investors, during an Extended Listing Period. FHA financing may be available for purchasing many homes, including the FHA 203(k) and 203 Special (k) program providing a loan to purchase a property and pay for repairs or improvements as permitted by FHA rules. Interested persons should contact their FHA approved lender. Refer to <http://www.hud.gov/ll/code/llplcrit.html> for assistance in locating a lender.

14.314 ASSISTED LIVING CONVERSION FOR ELIGIBLE MULTIFAMILY HOUSING PROJECTS

(ALCP)

FEDERAL AGENCY:

Office of Housing-Federal Housing Commissioner, Department of Housing and Urban Development

AUTHORIZATION:

Section 202b of the Housing Act of 1959, as amended and the Consolidated Appropriations Act, 2008 (Public Law 110-161; approved December 26, 2007).

OBJECTIVES:

To preserve the current elderly housing stock by converting units with a grant into Assisted Living Facilities (ALFs) for the frail elderly, as defined in Section 232(B)(6) of the National Housing Act and 202(k). The program is expected to promote aging in place and prevent premature institutionalization of the target

population.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Assisted living facilities (ALFs) are designed to accommodate frail elderly persons and people with disabilities who can live independently but need assistance with activities of daily living (that is, assistance with eating, bathing, grooming, dressing and home management activities.) ALFs must provide support services such as personal care, transportation, meals, housekeeping, and laundry. Typical funding will cover basic physical conversion of existing project units, as well as related common and services space. The ALCP provides funding for the physical costs of converting some or all of the units of an eligible development into an ALF, including unit configuration, common and services space and any necessary remodeling, consistent with HUD or the State's statute/regulations (whichever is more stringent). There must be sufficient community space to accommodate a central kitchen or dining facility, lounges, recreation and other multiple-areas available to all residents of the project, or office/staff spaces in the ALF. Funding for the supportive services must be provided by the owners, either directly or through a third party.

Applicant Eligibility:

Only private nonprofit owners of eligible multifamily assisted housing developments specified in Section 683(2)(B), (C), (D), (E), and (F) (Section 202 projects for the elderly, Rural Housing Section 515 projects receiving Section 8 rental assistance, projects receiving project-based rental assistance under Section 8, projects financed by a below-market interest rate loan or mortgage insured under Section 221(d)(3) of the Housing Act, or housing financed under Section 236 of the National Housing Act) that have been in occupancy for at least five years are eligible for funding. To be eligible, owners must meet the following criteria: (1) Must be in compliance with Loan Agreement, Capital Advance Agreement, Regulatory Agreement, Housing Assistance Payment Contract, Project Rental Assistance Contract, Rent Supplement or LMSA Contract, or any other HUD grant or contract document; (2) Must be in compliance with all fair housing and civil rights laws, statutes, regulations, and executive orders as enumerated in 24 CFR 5.105(a).

Beneficiary Eligibility:

Eligible residents who meet the admissions/discharge requirements as established for assisted living by State and local licensing, or HUD frailty requirements under 24 CFR 891.205 if more stringent. The residents must be able to live independently but may need assistance with activities of daily living (that is, assistance with eating, bathing, grooming, dressing and home management activities).

Credentials/Documentation:

The assisted living facility must be licensed and regulated by the State (or if there is no State law providing such licensing and regulation, by the municipality or other subdivision in which the facility is located). The application must include a firm commitment for the supportive services to be offered at the ALF as part of the application. The Notice of Funding Availability contains all the necessary information for applicants to apply for the grant. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Applicants must have contacted the State licensing agency for such a project to determine if the proposed project will meet state licensing requirements. A Supportive Service Plan (SSP) for the services and coordination of the supportive services which will be offered in the ALF must be developed and submitted to the appropriate State or local organization. Applicants must comply with all applicable statutory requirements and statutory requirements under Section 232(b)(6) prior to application submission. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Applications are only accepted in response to the Notice of Funding Availability which is published in the Federal Register each fiscal year. Applicants responding to the NOFA should ensure that their application is complete before submitting it to HUD. Applications must be submitted in accordance with requirements of the NOFA. All applications received by the deadline will be screened for curable deficiencies. After the completeness review, HUD reviews the application to determine whether it meets the threshold requirements. Only those applications that meet all of the threshold requirements will be eligible to receive an award. Applications submitted in response to the NOFA that are eligible, pass threshold and have a total score of 75 points (or more) are eligible for ranking and selection.

Award Procedure:

Applications are reviewed and selected for funding within the funding allocation of the geographical Hub area. At the end of the technical review, all applications will be either rated or technically rejected. If an application meets all program eligibility requirements after completion of the technical review, it will be rated according to the rating selection factors. The number of points that an application receives will depend on the extent to which the application is responsive to the information requested in the selection criteria. The maximum number of points an application may receive under this program is 102.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

A processing schedule is developed for each funding round. Applicants are provided with a decision by the end of the schedule, after approximately 4-6 months from processing start date.
