

Table 915. Demonstrated Coal Reserves by Major Producing State: 2007 and 2008

[In millions of short tons (489,395 represents 489,395,000,000), except as number of mines. As of January 1. The demonstrated reserve base represents the sum of coal in both measured and indicated resource categories of reliability. Measured resources of coal are estimates that have a high degree of geologic assurance from sample analyses and measurements from closely spaced and geological well-known sample sites. Indicated resources are estimates based partly from sample and analyses and measurements and partly from reasonable geologic projections]

State	2007				2008			
	Number of mines	Total reserves	Method of mining		Number of mines	Total reserves	Method of mining	
			Under-ground	Surface			Under-ground	Surface
United States ¹	1,374	489,395	333,277	156,118	1,458	487,678	332,553	155,124
