

Table 357. U.S. Wetland Resources and Deepwater Habitats by Type: 1998 to 2004

[In thousands of acres (148,618.8 represents 148,618,800). Wetlands and deepwater habitats are defined separately because the term wetland does not include permanent water bodies. Deepwater habitats are permanently flooded land lying below the deepwater boundary of wetlands. Deepwater habitats include environments where surface water is permanent and often deep, so that water, rather than air, is the principal medium within which the dominant organisms live, whether or not they are attached to the substrate. As in wetlands, the dominant plants are hydrophytes; however, the substrates are considered nonsoil because the water is too deep to support emergent vegetation. In general terms, wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plant and animal communities living in the soil and on its surface. The single feature that most wetlands share is soil or substrate that is at least periodically saturated with or covered by water. Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water. For more information on wetlands, see the "Classification of Wetlands and Deepwater Habitats of the United States" at <http://www.fws.gov/wetlands/_documents/gNSDI/ClassificationWetlandsDeepwaterHabitatsUS.pdf>]

| Wetland or deepwater category | Estimated area, 1998 | Estimated area, 2004 | Change, 1998 to 2004 |
|---|----------------------|----------------------|----------------------|
| All wetlands and deepwater habitats, total | 148,618.8 | 149,058.5 | 439.7 |
| All deepwater habitats, total | 41,046.6 | 41,304.5 | 247.9 |
| Lacustrine ¹ | 16,610.5 | 16,773.4 | 162.9 |
| Riverine ² | 6,765.5 | 6,813.3 | 47.7 |
| Estuarine Subtidal ³ | 17,680.5 | 17,717.8 | 37.3 |
| All wetlands, total | 107,562.3 | 107,754.0 | 191.8 |
| Intertidal wetlands ⁴ | 5,328.7 | 5,300.3 | -28.4 |
| Marine intertidal | 130.4 | 128.6 | -1.9 |
| Estuarine intertidal nonvegetated | 594.1 | 600.0 | 5.9 |
| Estuarine intertidal vegetated | 4,604.2 | 4,571.7 | -32.4 |
| Freshwater wetlands | 102,233.6 | 102,453.8 | 220.2 |
| Freshwater nonvegetated | 5,918.7 | 6,633.9 | 715.3 |
| Freshwater vegetated | 96,414.9 | 95,819.8 | -495.1 |
| Freshwater emergent ⁵ | 26,289.6 | 26,147.0 | -142.6 |
| Freshwater forested ⁶ | 51,483.1 | 52,031.4 | 548.2 |
| Freshwater shrub ⁷ | 18,542.2 | 17,641.4 | -900.8 |

¹ The lacustrine system includes deepwater habitats with all of the following characteristics: (1) situated in a topographic depression or a dammed river channel; (2) lacking trees, shrubs, persistent emergents, emergent mosses or lichens with greater than 30 percent coverage; (3) total area exceeds 20 acres (8 hectares).

² The riverine system includes deepwater habitats contained within a channel, with the exception of habitats with water containing ocean derived salts in excess of 0.5 parts per thousand.

³ The estuarine system consists of deepwater tidal habitats and adjacent tidal wetlands that are usually semi-enclosed by land but have open, partly obstructed, or sporadic access to the open ocean, and in which ocean water is at least occasionally diluted by freshwater runoff from the land. Subtidal is where the substrate is continuously submerged by marine or estuarine waters.

⁴ Intertidal is where the substrate is exposed and flooded by tides. Intertidal includes the splash zone of coastal waters.

⁵ Emergent wetlands are characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants.

⁶ Forested wetlands are characterized by woody vegetation that is 20 feet tall or taller.

⁷ Shrub wetlands include areas dominated by woody vegetation less than 20 feet tall. The species include tree shrubs, young trees, and trees or shrubs that are small or stunted because of environmental conditions.
