

## **Section 12: Federal Department Direct Awards & Spending** 2/25/2010

The Federal Department Direct Awards & Spending column of the spreadsheet is by far the broadest funding category in the ARRA Funds County Distribution for North Carolina Report. This category encompasses discretionary awards and expenditures made by more than a dozen federal agencies.

The various projects included below are organized in two separate ways. The first table displays federal awards and spending by county to show where the actual work funded by the ARRA will be done. This method most closely tracks the organization in the 100-county report.

The second table displays federal awards and spending by recipient or project site. This method of organization is useful in determining what entity or project has actually received an award, and where additional opportunities for contracting work or jobs may exist.

### **Sources**

The OERI has used several sources for the information summarized here. Primarily, data has come from federal agency press releases, reports to Congress, information from recipient institutions and federal Web sites such as [www.USAspending.gov](http://www.USAspending.gov). Please note that “Project Description” information exists only where the entity receiving the funds is the Prime Recipient as defined in the ARRA.
