

Avian Specialist.

Temporary, full-time job with the Avian Influenza Surveillance project on Oahu. Start date asap to March 2011. Duties: sampling of specific wild migratory birds, expand morbidity/mortality investigations, and expand education/outreach campaigns, if deemed necessary. Project is time sensitive and has to be done now due to the migratory movement of the birds in the winter. Sampling must follow the specific procedures identified. Data/reports are required. Must have a Bachelor's degree in a biological science (biology, ecology, zoology, or similar field). Also, one to three (1-3) years experience in field ornithology, including capturing, handling, and banding birds. Pay rate is contingent on qualifications.

Please send resume to Aaron Works at [works.aaron@yahoo.com](mailto:works.aaron@yahoo.com) (preferred) or call cell: (702) 340-3311, if a must.
