Wildlife Rehabilitation Manager Position Description

The mission of the Hawai'i Wildlife Center (HWC), a 501(c)(3) nonprofit organization, is to protect, conserve, and aid in the recovery of Hawai'i's native wildlife through hands-on treatment, research, training, science, education, and cultural programs. The HWC will provide for the best achievable medical and husbandry care for sick, injured and orphaned indigenous and endemic wildlife, including those affected by natural and man-made disasters, returning those successfully treated back to the wild. Our wildlife service area extends more than 1,000 nautical miles, up to and including the Papahānaumokuākea Marine National Monument, which covers roughly 140,000 square miles of islets, reefs and waters—an area larger than all of America's National Parks combined.

QUALIFICATIONS:

The Wildlife Rehabilitation Manager is responsible for the efficient development and management of animal care operations at HWC and for maintaining the highest possible quality of care. This is an excellent opportunity to work in a brand-new, purpose-built facility and with an exciting one-of-a-kind wildlife conservation, response and rehabilitation organization in the Pacific islands region. The Rehabilitation Manager will play an important role in the preservation of Hawai'i's native wildlife, its natural richness and cultural heritage.

The Rehabilitation Manager reports directly to the Center Director. Candidates must be able to handle individual animals in a caring, safe and humane manner. Candidates must work maturely and respectfully with diverse groups of people and maintain highly effective customer/public relations. Conflict resolution skills are required to support the office administration staff with challenging phone calls or walk-in customers as needed. Candidates must represent HWC professionally at all times including; clearly communicating HWC's mission, the professional care and treatment of wildlife, and the safety of the public and other employees. Candidates should possess the ability to act decisively regarding constantly changing animal cases and situations for which there may be no existing protocols. Candidates must work quickly, efficiently and calmly under stressful conditions and be able to handle multiple responsibilities. A keen interest in wildlife conservation issues and native Hawaiian wildlife is a must. Leadership, management skills and a team player mentality are vital in working cooperatively with HWC's small staff. Exceptional verbal and written communication skills are essential. An understanding of Hawai'i and its people is preferred. Candidates must be willing and able to travel Statewide and nationally on occasion.

SPECIFIC DUTIES INCLUDE BUT NOT LIMITED TO:

- Train and supervise animal care staff to set and maintain high quality of care standards, develop and refine species protocols and oversee rehabilitation treatment plans including, but not limited to, stabilization procedures, nutritional aspects (diets and formulas fed), pre-release conditioning, housing, release preparation, euthanasia, etc.
- Assists animal care staff with day-to-day care of animals. Oversee and move animals through the rehabilitation process in a timely manner, and ensure that animal care needs are being met.
- Work closely with the wildlife veterinary team to carry out care plans and determine final disposition of animals undergoing veterinary care. Provides medical team with assistance as needed.
- Work with animal care staff to determine final disposition of wild patients, to evaluate and ensure timely and appropriate release of all wildlife patients.
- Keep Center Director apprised of animal intake, in-house patients and their status, animal care needs, quality of animal care, patient procedures, and programmatic needs.
- Ensure that animals are being handled in a manner that maximizes human and animal safety and that staff are trained and following safety procedures.
- Monitor and identify enclosure and facility construction and maintenance needs, and assist in planning future wildlife rehabilitation operations.
- Ensure that protocols for infection control are being followed by animal care staff.
