

NOAA Earth System Research Laboratory and NCAR Societal Impacts Program *Seminar Series*

NCAR Societal Impacts Program (SIP) and Weather and Society Integrated Studies (WAS*IS)

David Skaggs Research Center (DSRC - NOAA Building)
325 Broadway
Boulder, Colorado 80305-3328
Room GC402 (Multipurpose Room)

Monday, May 4, 2009 2:00 - 3:00pm
discussion following / refreshments will be served

*Integrating Social Science into Meteorology:
Progress in Moving from WAS to IS with Evidence
from Remarkable WAS*IS Voyages into a New World*

Eve Gruntfest

WAS*IS Organizer and
Director - Social Science Woven into Meteorology (SSWIM) Initiative
National Weather Service - Norman, Oklahoma

Abstract

In just a few years the WAS*IS movement has informed and transformed ways that agencies, university departments, and other organizations work. This presentation will summarize some of these remarkable changes through the career trajectories and activities of some of the 171 official WAS*ISers. Recommendations for monitoring these changes as metrics to show what would not have happened without WAS*IS and suggestions for ways to accelerate the integration of social science will be offered for discussion.

Off-Site Guests Attending

Mention the WAS*IS Seminar
when checking in through
DSRC security.
