

## LANDFIRE Event Attributes

| Attribute                     | Description   |
|-------------------------------|---|
| DB_ID                         | Unique identifier for the management activity or disturbance event. If the data exist in an agency-maintained enterprise database the unique identifier for this polygon within that source.  |
| DB_Source                     | Name of the local GIS database or agency-maintained enterprise database within which the full record associated with this polygon can be found, if applicable.  |
| Event_Type<br><i>Required</i> | <p>Type of event represented by the polygon. Examples of events types are listed below:</p> <ul style="list-style-type: none"> <li>Development</li> <li>Clearcut</li> <li>Harvest</li> <li>Thinning</li> <li>Mastication</li> <li>Other Mechanical</li> <li>Wildfire</li> <li>Wildland Fire Use</li> <li>Prescribed Fire</li> <li>Wildland Fire</li> <li>Weather</li> <li>Insecticide</li> <li>Chemical</li> <li>Insects</li> <li>Disease</li> <li>Insects/Disease</li> <li>Herbicide</li> <li>Biological</li> <li>Planting</li> <li>Reforestation</li> <li>Seeding</li> <li>Exotic Plants</li> </ul> |
| Event_Name                    | Additional information regarding the mapped event. Some examples include: name of disturbance or management activity event, primary agent of damage if insects, disease, or weather, pertinent plant species if seeding or planting event.  |
| Year<br><i>Required</i>       | Year (YYYY) in which the event occurred.  |
| Start_Date                    | Date (MMDDYY) on which the event began.   |
| End_Date                      | Date (MMDDYY) on which the event ended.   |
| Severity                      | <p>Severity of management activity or disturbance event, in terms of biomass reduction. Use one of the following terms to indicate the effects of the event on the above-ground vegetation within a polygon:</p> <ul style="list-style-type: none"> <li>Low = &lt;20% above-ground biomass removed</li> <li>Moderate = 20-80% above-ground biomass removed</li> <li>High = &gt;80% above-ground biomass removed</li> </ul>  |
| Agency                        | Reporting agency (or non-governmental organization) for event.  |
| Comments                      | General notes or comments, or any additional information regarding the vegetation and/or fuel characteristics within the polygons, including summaries of pertinent changes resulting from the management activities or disturbances or notes on the overall efficacy of the treatments.  |
