

Publications of the Volcano Hazards Program 2005

2007

**U.S. Department of the Interior
U.S. Geological Survey**

The Volcano Hazards Program of the U.S. Geological Survey (USGS) is part of the Geologic Hazards Assessments subactivity as funded by Congressional appropriation. Investigations are carried out in the Geology and Hydrology Disciplines of the USGS and with cooperators at the Alaska Division of Geological and Geophysical Surveys, University of Alaska Fairbanks Geophysical Institute, University of Hawaii Hilo, University of Utah, and University of Washington Geophysics Program. This report lists publications from all these institutions.

This report contains only published papers and maps; numerous abstracts produced for presentations at scientific meetings have not been included. Publications are included based on date of publication with no attempt to assign them to Fiscal Year.

Volcano Hazards Bibliography 2005

- Adleman, J. N., 2005, Analysis of composition and chronology of dome emplacement at Black Peak volcano, Alaska utilizing ASTER remote sensing data and field-based studies: University of Alaska Fairbanks MS thesis, 139 p., available at <http://www.avo.alaska.edu/downloads/>
