U.S. ELECTION ASSISTANCE COMMISSION

2010 EAVS UOCAVA Data File Codebook

Introduction

The 2010 Election Administration and Voting Survey data are available in three data formats – Microsoft Excel, SPSS, and .DBF. This codebook presents the variable name, a brief description of the variable, and the variable type (text or numeric) for all variables in the data. For most numeric variables, we present the minimum and maximum reported values as well as the frequency and percent of missing values and blank responses. Missing values indicate “Data Not Available”. In all data formats (i.e. Microsoft Excel, SPSS, and .DBF) a value of -999999 indicates that a jurisdiction reported “Data Not Available”. Variable names in the .DBF format of a few variables are abbreviated due to character limits.

Additional information about the 2010 Election Administration and Voting Survey and a copy of *The Uniformed and Overseas Citizens Absentee Voting Act Survey Findings* report are available at www.eac.gov.

State State in which the Jurisdiction is located
