

## Annual Industry Accounts

### Advance Statistics on GDP by Industry for 2011

By Donald D. Kim, Teresa L. Gilmore, and William A. Jolliff

**D**URABLE-GOODS manufacturing, professional, scientific, and technical services, and information services were the leading contributors to U.S. economic growth in 2011, according to advance statistics on the breakout of real gross domestic product (GDP) by industry from the Bureau of Economic Analysis (BEA). Real GDP growth decelerated to 1.7 percent from 3.0 percent in 2010, reflecting decelerations in durable-goods manufacturing, retail trade, and finance and insurance (chart 1). Overall, 15 of 22 industry groups contributed to real GDP growth.

The advance statistics on GDP by industry were released by BEA on April 26, 2012. These statistics provide a first look at the distribution of growth in real GDP and inflation by industry in 2011.

Highlights for 2011 include the following:

- Manufacturing grew 4.3 percent in 2011 after growing 11.2 percent in 2010. Durable-goods manufacturing, the largest contributor to growth in GDP, grew 7.9 percent after growing 17.0 percent in 2010.

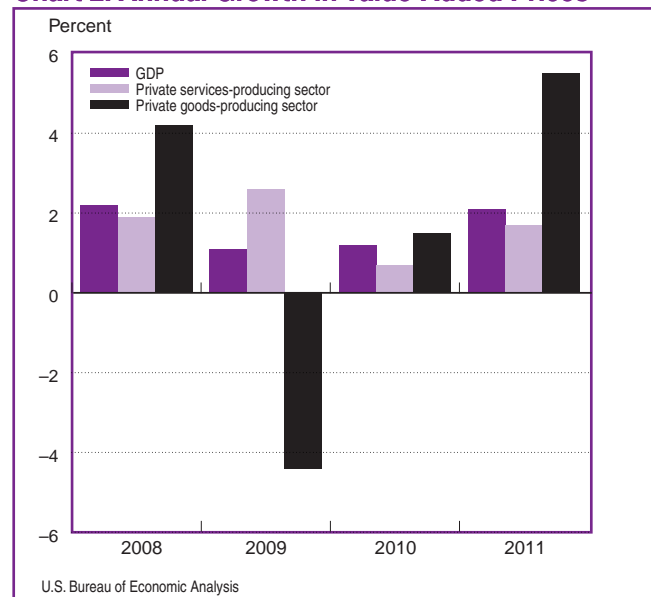

Nondurable-goods manufacturing grew 0.3 percent in 2011 after growing 5.1 percent in 2010.

- The private services-producing sector grew 1.6 percent in 2011 after growing 3.0 percent in 2010. Professional, scientific, and technical services grew 4.9 percent in 2011, matching its 2010 growth rate. Information services, which includes publishing and telecommunications, accelerated in 2011, growing 5.1 percent after growing 3.0 percent in 2010.
- Growth in the GDP price index accelerated to 2.1 percent from 1.2 percent in 2010. Growth in value-added prices for the goods-producing sector accelerated in 2011, increasing 5.5 percent after increasing 1.5 percent in 2010, primarily reflecting an acceleration in prices for nondurable-goods manufacturing. Growth in value-added prices for the private services-producing sector accelerated in 2011, growing 1.7 percent after growing 0.7 percent in 2010. This growth reflects upturns in prices for retail trade and real estate and rental and leasing.

**Chart 1. Annual Growth in Real GDP**

**Chart 2. Annual Growth in Value-Added Prices**

These advance statistics were prepared for major industry groups using a methodology that incorporates summary source data from the March 2012 update of the national income and product accounts (NIPAs). (See “Methodology for the Advance Statistics.”)

The advance statistics provide reliable information on the direction of change in real growth for major industry groups and an indication of whether industries’ real growth was well-above, well-below, or about average with respect to overall GDP growth.

The statistics presented in this article will be revised in the fall of 2012 as part of the annual revision of the annual industry accounts. This annual revision will incorporate more detailed industry source data as well as the results from the 2012 annual revision of the NIPAs.

### Data Availability

The advance statistics on value added by industry are presented in current dollars, chained (2005) dollars, chain-type quantity indexes, and chain-type price indexes. Annual input-output accounts for 2011 will be available in the fall of 2012. The statistics for 2011 and the full set of annual industry accounts are available interactively on BEA’s Web site.

For more information, visit [www.bea.gov/industry/index.htm#annual](http://www.bea.gov/industry/index.htm#annual).

For a guide to the annual industry accounts, see *Measuring the Nation’s Economy: An Industry Perspective: A Primer on BEA’s Industry Accounts* [www.bea.gov/industry/pdf/industry\\_primer.pdf](http://www.bea.gov/industry/pdf/industry_primer.pdf).

### Acknowledgments

Edward T. Morgan, Chief of the Inter-Industry Statistics Branch of the Industry Applications Division (IAD) supervised the preparation of the statistics. Carol E. Moylan, Associate Director for the Industry Economic Accounts, Erich H. Strassner, Chief of IAD, and David B. Wasshausen, Chief of the Industry Sector Division (ISD), provided overall guidance. Thomas F. Howells III, Chief of the Input-Output Systems Branch in IAD, managed the economic information systems used to produce and review the statistics.

The statistics for 2011 were prepared by Brian M. Lindberg and William A. Jolliff. The following staff provided guidance and contributed to the preparation of the industry statistics and analysis: Paul V. Kern, Chief of the Information, Business Services and the Travel and Tourism Satellite Accounts Branch in ISD, Kevin J. Muck, Chief of the Goods and Distributive Services Branch in ISD, and Patricia A. Washington, Chief of the Personal Services and Government Branch in ISD. Robert J. McCahill, Program Coordinator in ISD, Gabriel W. Medeiros in IAD, and William H. Nicolls IV in IAD, provided valuable assistance. Maxine V. Tiggler and Pat A. Wilkinson provided administrative and program assistance.

The following staff also contributed to the preparation of the advance statistics:

*Agriculture, mining, construction, and manufacturing:*

Matthew M. Donahoe, Aaron A. Elrod, Donald D. Kim, Mariana Matias, and Simon N. Randrianarivelo.

*Distributive services:* Ricky L. Stewart, Anna M. Jacobson, Patrick H. Martin, and Justin H. Settles.

*Information, professional, and management services:* Robert J. Corea, Olympia Belay, Erin M. Ludlow, and Mandy C. Roberts.

*Finance, insurance, real estate, rental and leasing:* Matthew B. Schroeder, James M. Green, Lolita V. Jamison, and Ricci L. Reber.

*Government enterprises, arts, entertainment, accommodation and food services, and health services:* Daniel W. Jackson and Alexander M. Eisenmann

*Education, general government, and other services:* Tameka R.L. Harris and Darlene C. Robinson-Smith.

*Value added and research and development:* Jennifer Lee, Teresa L. Gilmore, William A. Jolliff, and Brian M. Lindberg.

*International trade and inventory:* Matthew R. Russell, Peter D. Kuhbach, Gregory R. Linder, and Sarah B. Osborne.

*Operations:* Amanda S. Lyndaker, Jeffrey M. Bellone, Rajeshwari R. Bhosale, Kathleen M. Karlton, Douglas B. Leung, and Jeffrey A. Young.

*Balancing and reconciliation:* Ahmad Z. Yusuf.

*Travel and Tourism Satellite Accounts:* Steven L. Zemanek.

## Real Value Added

**Table A. Percent Changes in Real Value Added by Industry Group**

	2008	2009	2010	2011
<b>Gross domestic product</b> .....	-0.3	-3.5	3.0	1.7

<b>Government</b> .....	<b>1.8</b>	<b>0.9</b>	<b>0.6</b>	<b>-0.5</b>
Federal .....	2.7	3.7	3.2	0.7
State and local .....	1.4	-0.4	-0.7	-1.0
<b>Addenda:</b>				
Private goods-producing industries <sup>1</sup> .....	-5.1	-6.4	5.6	2.5
Private services-producing industries <sup>2</sup> .....	0.2	-3.9	3.0	1.6
Information-communications-technology-producing industries <sup>3</sup> .....	6.1	1.7	14.7	6.9

Real GDP increased 1.7 percent in 2011, reflecting increases in 15 of the 22 major industry groups.

Agriculture, forestry, fishing, and hunting declined 12.4 percent in 2011, the largest drop among the 22 major industry groups.

Mining grew 6.4 percent after declining 6.1 percent in 2010, continuing a recent pattern of volatility.

Utilities declined 6.2 percent in 2011 after growing 3.3 percent in 2010.

Construction declined for the eighth consecutive year, decreasing 0.3 percent.

Manufacturing rose 4.3 percent in 2011, the second consecutive year of growth.

Durable-goods manufacturing rose 7.9 percent after increasing 17.0 percent in 2010.

Nondurable-goods manufacturing rose 0.3 percent after increasing 5.1 percent in 2010.

Information services growth accelerated in 2011, growing 5.1 percent after increasing 3.0 percent in 2010.

Professional, scientific, and technical services grew 4.9 percent in 2011, matching its increase in 2010.

Private goods-producing industries growth decelerated, increasing 2.5 percent in 2011 after increasing 5.6 percent in 2010.

Private services-producing industries growth decelerated, increasing 1.6 percent in 2011 after increasing 3.0 percent in 2010.

Information-communications-technology-producing industries growth decelerated, increasing 6.9 percent in 2011 after increasing 14.7 percent in 2010.

1. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

2. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

## Real Value Added

<b>Addenda:</b>				
Private goods-producing industries <sup>2</sup> .....	-1.00	-1.18	0.97	0.45
Private services-producing industries <sup>3</sup> .....	0.13	-2.64	2.09	1.07
Information-communications-technology-producing industries <sup>4</sup> .....	0.25	0.07	0.62	0.31

Durable-goods manufacturing, professional, scientific, and technical services, and information services were among the leading contributors to real GDP growth in 2011.

Durable-goods manufacturing accounted for about 30 percent of the increase in real GDP in 2011, contributing 0.49 percentage point to the 1.7 percent increase in real GDP. This is the second consecutive year it accounted for the largest part of the increase.

Retail trade accounted for 0.12 percentage point of the increase in real GDP in 2011 after accounting for 0.60 percentage point in 2010. The industry was the largest contributor to the deceleration in real GDP growth.

Professional, scientific, and technical services accounted for about 25 percent (or 0.37 percentage point) of GDP growth in 2011.

Information-communications-technology-producing industries accounted for 20 percent (or 0.31 percentage point) of real GDP growth in 2011.

1. The estimates of gross domestic product under the contributions columns are percent changes.

2. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

3. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

4. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

NOTE: Percentage-point contributions do not sum to the percent change in real gross domestic product because the contribution of the "Not allocated by industry" line is excluded.

## Value-Added Prices

Educational services, health care, and social assistance .....	2.4	3.9	2.2	1.7
Educational services .....	4.6	5.4	3.9	4.8
Health care and social assistance .....	2.1	3.6	2.0	1.2
Arts, entertainment, recreation, accommodation, and food services .....	3.1	4.3	-0.4	2.0
Arts, entertainment, and recreation .....	2.4	2.1	0.5	0.3
Accommodation and food services .....	3.3	5.0	-0.7	2.6
Other services, except government .....	4.1	4.8	2.5	3.5
<b>Government</b> .....	3.5	2.7	1.9	1.9
Federal .....	2.4	1.8	2.6	2.1
State and local .....	4.0	3.1	1.6	1.8
<b>Addenda:</b>				
Private goods-producing industries <sup>1</sup> .....	4.2	-4.4	1.5	5.5
Private services-producing industries <sup>2</sup> .....	1.9	2.6	0.7	1.7
Information-communications-technology-producing industries <sup>3</sup> .....	-3.9	-1.3	-3.4	-2.2

Growth in the GDP price index accelerated in 2011, as prices rose in 21 of 22 major industry groups.

Value-added prices for agriculture, forestry, fishing, and hunting accelerated, rising 29.2 percent in 2011 after rising 15.7 percent in 2010.

Value-added prices for mining decelerated, rising 12.9 percent in 2011 after rising 19.6 percent in 2010.

Value-added prices for construction turned up, rising 2.0 percent in 2011 after falling 2.5 percent in 2010. Prices for construction have risen in 18 of the last 19 years.

Manufacturing price growth turned up, increasing 3.5 percent in 2011 after decreasing 0.7 percent in 2010. Prices increased in both durable-goods and nondurable-goods manufacturing.

Transportation and warehousing price growth turned up, rising 3.8 percent in 2011 after falling 0.7 percent in 2010.

Value-added prices for educational services increased 4.8 percent in 2011. Prices for educational services have increased every year since 1947—the first year for which these statistics are available.

Value-added prices for the private goods-producing sector accelerated, increasing 5.5 percent in 2011 after increasing 1.5 percent in 2010.

Value-added prices for the private services-producing sector accelerated slightly, rising 1.7 percent in 2011 after rising 0.7 percent in 2010.

1. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

2. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

The largest contributors to the 2.1 percent increase in the GDP price index in 2011 were nondurable-goods manufacturing, agriculture, forestry, fishing, and hunting, mining, and real estate and rental and leasing.

Agriculture, forestry, fishing, and hunting contributed 0.29 percentage point to the growth in GDP prices in 2011 after contributing 0.15 percentage point in 2010.

Mining contributed 0.22 percentage point to GDP price growth in 2011 after contributing 0.29 percentage point in 2010.

Nondurable-goods manufacturing contributed 0.40 percentage point to GDP price growth in 2011 after contributing 0.07 percentage point in 2010. In 2011, the industry was the largest contributor to price growth and a leading contributor to the acceleration.

Finance and insurance was the only major industry group to subtract from GDP price growth, subtracting 0.05 percentage point in 2011.

Real estate and rental and leasing contributed 0.22 percentage point to GDP price growth in 2011 after subtracting 0.13 percentage point in 2010. Along with retail trade, the industry was the largest contributor to the acceleration in GDP price growth in 2011.

The private services-producing sector contributed over 50 percent to the price growth in GDP.

Value-added prices for information-communications-technology-producing industries continued to fall, marking the 20<sup>th</sup> consecutive year, since 1992, that prices for these industries have subtracted from GDP price growth.

1. The estimates of gross domestic product under the contributions columns are percent changes.  
 2. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.  
 3. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.  
 4. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.  
 NOTE: Percentage-point contributions do not sum to the percent change in the chain-type price index for gross domestic product because the contribution of the "Not allocated by industry" line is excluded.

## Current-Dollar Value Added

**Table E. Value Added by Industry Group  
as a Percentage of Current-Dollar GDP**

	2008	2009	2010	2011
<b>Gross domestic product</b> .....	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

Private industries' share of current-dollar GDP increased slightly to 86.8 percent, increasing for a second consecutive year.

Construction's share of current-dollar GDP shrank to 3.4 percent, its lowest level since 1947, the first year for which these statistics are available.

Manufacturing's share of current-dollar GDP increased for a second consecutive year, to its highest share since 2006, as the shares of GDP accounted for by both durable-goods and nondurable-goods manufacturing increased.

Real estate and rental and leasing's share of current-dollar GDP fell to 11.6 percent in 2011, its smallest share since 1982.

Government's share of current-dollar GDP fell, reflecting a decrease in the share of both federal and state and local governments.

The information-communications-technology-producing sector's share of 4.6 percent matched its share in 2010, equaling its highest level since 1987, the first year for which these statistics are available.

1. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

2. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

## Methodology for the Advance Statistics

The advance statistics for 2011 were prepared for broad industry groups using a methodology that was developed to incorporate summary source data. The advance statistics are published at approximately the two-digit sector level of the 2002 North American Industry Classification System (NAICS). The preparation of the statistics uses a methodology that draws heavily on data from the national income and product accounts (NIPAs) for both current-dollar and real value added by industry statistics. This methodology and level of industry detail differ from the methodology and level of detail found in the annual industry accounts.<sup>1</sup>

### Current-dollar statistics

The advance statistics on current-dollar value added by industry for 2011 are prepared by extrapolating the major components of value added by industry, compensation of employees, “taxes on production and imports less

---

1. The annual industry accounts for 1998–2010 are published at the NAICS three-digit industry level using a more comprehensive methodology. For more information, see Teresa L. Gilmore, Amanda S. Lyndaker, Sarah J. Pack, and Simon N. Randrianarivelo, “Annual Industry Accounts: Revised Statistics for 2003–2010,” *SURVEY OF CURRENT BUSINESS* 91 (December 2011): 15.

subsidies,” and gross operating surplus for 2010 forward, using published and unpublished industry source data from the NIPAs, other government agencies, and private institutions. Statistics for farms and general government are obtained directly from the NIPAs.

### Real statistics

The advance statistics on chain-type price and quantity indexes and the advance statistics on chained-dollar value added by industry are prepared using the single-deflation method. An industry’s current-dollar value-added statistics are divided by the industry’s gross output price index.<sup>2</sup> A Fisher aggregation of the detailed industries yields the chain-type price and quantity indexes for industry groups. The gross output price indexes for detailed industries are implicit price deflators that are computed as current-dollar gross output divided by chained-dollar gross output.

---

2. Single deflation approximates the results obtained by double deflation when the prices of an industry’s intermediate inputs increase at about the same rate as its output prices. For more information, see Robert E. Yuskavage, “Gross Domestic Product by Industry: A Progress Report on Accelerated Estimates,” *SURVEY* 82 (June 2002): 21.

1. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The value of the "Not allocated by industry" line reflects the difference between the first line and the sum of the most detailed lines, as well as the differences in source data used to estimate GDP by industry and the expenditures measure of real GDP.

2. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

3. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

4. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

49	Information and data processing services .....	0.03	0.01	-0.01	.....						

1. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

2. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

NOTE: Percentage-point contributions do not sum to the percent change in real gross domestic product because the contribution of the "Not allocated by industry" line is excluded.

1. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

2. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

NOTE: Percentage-point contributions do not sum to the percent change in real gross domestic product because the contribution of the "Not allocated by industry" line is excluded.
