Scope and Content

The materials in FOIA 2006-0224-F are a selective, not necessarily all inclusive, body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials.

FOIA request 2006-0224-F contains materials from White House staff offices and individuals; White House Office of Records Management (WHORM) Subject Files; the Automated Records Management System [Email]; and the NSC Cable System. This collection consists largely of the First Lady's Press Office files that include drafts schedules, press clippings, memos, and event attendee lists. However, the collection also consists of records of White House staff members making reference to Hillary Clinton's campaign or bid for senate election in a letter, memo, or email. The collection further includes some correspondence to and from the President concerning the First Lady's senate campaign.

In 1999, Hillary Clinton formed an exploratory committee to pursue the possibility of running for the U.S. Senate seat in New York. The seat was resigned by long-time New York Senator, Daniel Patrick Moynihan. In February 2000, the First Lady officially launched her senate campaign with an

announcement at the State University of New York. Hillary Clinton first faced opposition in Republican candidate, Rudolph Giuliani, the Republican mayor of New York. Giuliani abandoned the race to focus on his treatment for prostate cancer. New York Congressman, Rick Lazio, followed Giuliani as the Republican candidate for the senate seat. Hillary Clinton won the election on November 7, 2000, with 55 percent of the vote. The First Lady was sworn in as United States Senator on January 3, 2001.

System of Arrangement

Records that were responsive to this FOIA request were found in four collection areas – Clinton Presidential Records: WHORM Subject Files, Clinton Presidential Records: White House Staff and Office Files, Clinton Presidential Records: ARMS Emails, and Clinton Presidential Records: NSC Cable, Email, and Records Management Systems. As policy, Staff and Office files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. WHORM Subject files are processed at the document level. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.

The WHORM Subject file was compiled by the White House Office of Records Management and is a series of categories designed by a letter/number combination. A complete listing of the categories with detailed descriptions is provided in our research room.

The Automated Records Management System (ARMS) is a database that contains email records of the Executive Office of the President. This system maintained unclassified Presidential record email. The ARMS dataset is comprised of 6 sub-series of email records called “Buckets.” The buckets include NPR, OPD, POTUS, WHO, CEA, and Default. ARMS emails are arranged chronologically by creation date.
