252	<i>Equals:</i> Personal saving .....	144.4	-102.7	-61.1	592.8	

1. In these descriptions, "new" indicates this is the first time that data from the specific source are being incorporated into the component estimate for the given year, and "revised" indicates that data from the specific source were incorporated previously and now revised data from that source are being incorporated.

2. Revisions also reflect revisions to earlier years. Revised estimates begin with 2003, based on revised Census Bureau data from the Annual Retail Trade Survey and the Service Annual Survey that were benchmarked to the 2007 Economic Census, and on updated merchandise-line data from the 2007 Economic Census.

3. Revisions also reflect revisions to earlier years. Revised estimates begin with 2003, reflecting revised benefits-to-premiums ratios based on new trade source data on insurance.

4. For more information on the revisions to the International Transactions Accounts, see Mai-Chi Hoang and Erin M. Whitaker, "Annual Revision of the U.S. International Transactions Accounts," SURVEY OF CURRENT BUSINESS 91 (July 2011): 47–61.

5. The statistical discrepancy is gross domestic product (GDP) less gross domestic income (GDI); it is also the difference between gross national product (GNP) and gross national income (GNI), which is GDI plus net income receipts from the rest of the world. The statistical discrepancy arises because the product-side measures of GDP and GNP are estimated independently from the income-side measures of GDI and GNI.
