RECEIVED  
OCT 16 10:31  
U.S. DEPARTMENT OF ENERGY

The Honorable A.J. Eggenberger  
Chairman  
Defense Nuclear Facilities Safety Board  
625 Indiana Avenue, NW, Suite 700  
Washington, DC 20004-2901

Dear Mr. Chairman:

This is to inform you that the Savannah River (SR) Operations Office has completed its final commitment associated with the Implementation Plan (IP) for Defense Nuclear Facilities Safety Board Recommendation 2000-1, *Prioritization for Stabilizing Nuclear Materials*. Commitment 220, "Complete stabilization of pre-existing Np-237 solution", consisted of the stabilization of the pre-existing neptunium solutions that were stored in H-Canyon by converting them into a more stable oxide form in the HB-Line facility, packaging them into shipping containers for shipment to the Idaho National Laboratory.

This commitment was completed more than three months ahead of schedule, and was the last of 54 Savannah River Site commitments in the Department's IP responding to Recommendation 2000-1.

I am extremely proud of our team's hard work and dedication in completing the commitments at SR. If you have any comments or feedback, please call me on (202) 586-0738, or Mr. Dae Y. Chung, Deputy Assistant Secretary for Safety Management and Operations, on (202) 586-5151.

Sincerely,

A handwritten signature in cursive script that reads "Inés R. Triay".

Dr. Inés R. Triay  
Chief Operating Officer for  
Environmental Management
