

FY 1999 Inventory of Programs

**Interagency Working Group on U.S.
Government-Sponsored International
Exchanges and Training (IAWG)**

INVENTORY OF PROGRAMS

The FY 1999 Inventory of U.S. Government-Sponsored International Exchanges and Training Programs is prepared by the Interagency Working Group (IAWG) in response to Executive Order 13055, issued by President Clinton on July 15, 1997, and the FY 1999 Omnibus Consolidated and Emergency Appropriations Act (Public Law 105-277, Section 2414). The inventory, which features a wide variety of programs and federal government organizations, can be used as a resource for international exchanges and training activities.

The Presidential and Congressional mandates of the IAWG define USG-sponsored international exchanges and training as the “movement of people between countries to promote the sharing of ideas, to develop skills, and to foster mutual understanding and cooperation, financed wholly or in part, directly or indirectly, with United States Government funds.” This definition, as originally interpreted by the IAWG, excludes individuals trained in their home countries with U.S. Government funds. It also excludes cost-saving methodologies -- such as distance learning or videoconferencing -- used to stretch government training and exchange funds to yield maximum results. The IAWG now believes that these exclusions prevent an accurate presentation of the breadth and depth of USG-sponsored international exchanges and training activities. The IAWG would like to slowly phase in consideration of these previously excluded categories of activities.

To address this issue and improve on previous years’ data collection and reporting efforts, the IAWG revised its data reporting guidelines. For FY 1999 inventory submissions, the IAWG encouraged USG organizations to provide information on previously excluded categories of activities, such as in-country training as well as distance learning and other technology-based experiences. While several organizations currently collect data on these types of activities, others do not. Those organizations that do not will include this information only in the narrative descriptions of their programs. If numerical data on non-traveling participants is included in an organization’s inventory, it will be so noted.

Another improvement to our efforts to collect data is the launching of FEDS/www -- our updated data collection system. It looks similar in form and function to the FEDS/dc system used for collecting FY 1998 data. However, the new FEDS system enables all users to submit data electronically to the IAWG through the Internet and retrieve data submitted by other USG entities. Several enhancements made to the system ease data entry and improve the amount of summary information available to users.

INVENTORY OF PROGRAMS

The combination of modified reporting requirements and an improved electronic data collection mechanism has enabled the IAWG to continue to refine and improve the annual inventory. However, the inventory remains a work in progress. Many agencies continue to face data management challenges that inhibit their ability to fully report international exchanges and training activities. Additionally, many agencies do not routinely collect information on non-U.S. Government contributions to programs or do not compile financial data for exchanges and training components of larger programs.

The FY 1999 inventory presents information on activities reported by the agencies, indicates whether the information is complete, and provides any additional comments relevant to the nature of the information collected. The following categories of information appear in the Inventory of Programs:

- Summary of participant information: Charts show U.S. and foreign participants by federal sponsor, world region, and region/country.
- Summary information on program classifications and national interests addressed.
- Agency contact information: Mailing addresses, public inquiry phone numbers, and website information for each agency.
- Total USG funding: The sum of all USG funds (agency appropriation and interagency transfers) expended for a given program/activity, as reported to the IAWG.
- Agency appropriation: USG funds allocated for implementing programs and activities from the agency's appropriated budget. This category excludes staff salaries and overhead costs.
- Interagency transfers: USG funds provided for program/activity implementation by an agency other than the implementing agency.
- Financial contributions or cost sharing provided by non-USG sources, such as foreign governments, the private sector (U.S. and foreign), and international organizations. (Many agencies do not quantify or collect this information.)
- Total funding: The combination of all reported sources of funding.
- Total number of U.S. and foreign participants: Separate totals of U.S. and foreign participants in reported USG programs and activities. Depending on the department/agency, these numbers may include program participants who did not travel outside their country of residence. U.S. participants can include, but are not limited to, government employees, contractors, grant recipients, and private sector partners. Several agencies did not report information on U.S. trainers and technical advisers.
- National interests addressed: The FY 1999 Omnibus Consolidated and Emergency Appropriations Act mandated that the IAWG identify how each government-sponsored international exchanges and training program promotes U.S. foreign policy. The State Department, through its International Affairs Strategic Plan, has identified the following fundamental objectives that directly affect Americans: National Security; Economic Prosperity; American Citizens and Borders; Law Enforcement; Democracy and Human Rights; Humanitarian Response; and Global Issues. Many programs implemented by the U.S. Government serve a number of these national interests. Each program summary includes information on the national interests addressed by the program.

INVENTORY OF PROGRAMS

(Agencies supplied their own definitions of national interests for programs that did not fit within the State Department's designations.)

The seven national interests listed below appeared in State Telegram 049508: *Mission Program Plan -- Substantive Guidance* (March 1998). Strategic goals, as articulated by the Department of State, are included as examples if they further define the stated national interests.

1. National Security: The operational definition of national security refers to threats or potential threats of a military nature by nation states or groups of nation states against the United States or "vital" U.S. interests abroad (e.g., access to vital oil supplies). Deployment of U.S. Forces (e.g., for peacekeeping activities or securing a humanitarian operation) does not by itself indicate that U.S. national security is at stake. Goals include:

- Ensuring that local and regional instabilities do not threaten the security and well-being of the United States or its allies.
- Eliminating the threat to the United States and its allies from weapons of mass destruction or destabilizing conventional arms.

2. Economic Prosperity: The strategies for promoting U.S. prosperity include, but are not limited to, opening markets through international, regional, and bilateral agreements; promoting market reforms and growth in developing and transitional economies, particularly in the big emerging markets; promoting global economic stability and growth; and directly promoting U.S. exports.

3. American Citizens and Borders: The U.S. Government prepares the nation for emergency situations, promotes host government respect for the rights of American citizens, helps reduce hazards to those traveling abroad, warns Americans living or traveling abroad of potential threats to their security and safety, and, when necessary, protects and assists U.S. citizens residing in or visiting a foreign country.

Also included in this category is the control of U.S. borders. While permitting and facilitating certain kinds and levels of interest in travel and immigration to the United States, the government enforces restrictions and prohibitions designed to preclude or restrict entry or residence not deemed to be in the U.S. national interest.

4. Law Enforcement: The U.S. Government believes in the protection of the nation and its citizens from drugs, international crime, and/or terrorism. In some countries improving the rule of law and the ability of host governments to combat crime may be essential elements of a strategy to secure democracy, establish an environment for investment and economic growth, or protect U.S. national security interests.

5. Democracy and Human Rights: The U.S. supports democracy building abroad both for its own sake -- because it is consistent with our values -- and to advance other national interests. One of its goals is to increase foreign government adherence to democratic practices and respect for human rights.

6. Humanitarian Response: U.S. values emphasize the need for a humanitarian response to certain situations. The United States will invest resources abroad to minimize human suffering, even when no other national interest is at stake. For example, programs may be directed to avert future humanitarian crises in a country or to improve local health conditions unrelated to any global infectious disease threat.

INVENTORY OF PROGRAMS

7. Global Issues -- Environment, Population, and Infectious Diseases: Activities under this category are developed to have an impact on the global or U.S. environment, global population growth, and/or curtailing the risk of infectious disease to the U.S. population.

Goals include:

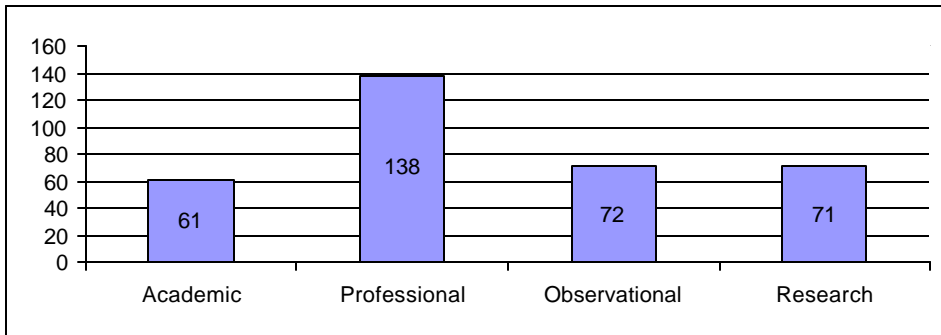

- Securing a sustainable global environment in order to protect the United States and its citizens from the effects of international environmental degradation.
- Stabilizing world population growth.
- Protecting human health and reducing the spread of infectious diseases.

DEPARTMENT OF AGRICULTURE

1400 Independence Avenue, SW • Washington, DC 20250
 Office of Communications: 202-720-4623 • www.usda.gov

The **Department of Agriculture (USDA)** works to improve and maintain farm income and to develop and expand markets abroad for agricultural products. The Department helps to curb and to cure poverty, hunger, and malnutrition. It works to enhance the environment and to maintain production capacity by helping landowners protect the soil, water, forests, and other natural resources. Rural development, credit, and conservation programs are key resources for carrying out national growth policies. Department research findings directly or indirectly benefit all Americans. The Department, through inspection and grading services, safeguards and ensures standards of quality in the daily food supply.

* * * * *

Foreign Agriculture Service (FAS)

The Foreign Agricultural Service has primary responsibility for USDA's overseas market information, access, and development programs. It also administers USDA's export assistance and foreign food assistance programs. The Service carries out its tasks through its network of agricultural counselors, attaches, and trade officers stationed overseas and its U.S.-based team of analysts, marketing specialists, negotiators, and other professionals.

The **USDA Scientific Cooperation Program** provides financial support for international cooperation in research efforts that benefit U.S. agriculture and forestry. The program funds scientific exchanges and longer-term collaborative research between U.S. and foreign scientists. Scientists submitting proposals must be affiliated with U.S. universities, federal or state agencies, or private nonprofit organizations.

DEPARTMENT OF AGRICULTURE

In FY 1999, the Scientific Cooperation Program promoted international cooperation on economically and environmentally sustainable agricultural and forestry systems to help secure safe and adequate food supplies. Mutual benefit was attained through a variety of activities, from short-term exchange visits of U.S. and foreign scientists to longer-term collaborative research. American and foreign researchers cooperated on projects directed at potential threats to U.S. agriculture and forestry, development of new technologies, and enhancement of trade in foreign markets. Examples of funded proposals included collaborative research on food safety, small farmer needs, water and soil quality environmental issues, value-added products, and phytosanitary barriers to trade.

National Interests Addressed:	Economic Prosperity; Global Issues; Food Security	

* * * * *

The **Cochran Middle Income Fellowship Program** provides short-term training in the United States for agriculturalists from 67 eligible countries (middle income, emerging democracies, and emerging markets). Training programs are developed for mid- to senior-level agricultural specialists and administrators from public and private sectors concerned with agricultural trade, management, marketing, policy, and technology transfer. The program works closely with USDA agencies, U.S. agricultural trade and market development associations, universities, and agribusinesses to implement training.

The program is administered in collaboration with USDA Agricultural Affairs Officers in American embassies abroad. The program's major Government Performance and Results Act goals are to assist with developing sustainable long-term markets for U.S. agricultural products, and to assist, through training and education, with resolving market access and World Trade Organization (WTO) policy issues, specifically sanitary and phytosanitary (SPS) topics.

In FY 1999, the program initiated new activities in six new countries, provided training for 797 international participants from 67 countries, and had a direct link to export sales of over \$25 million in U.S. agricultural commodities. In addition to U.S. Government funding (direct appropriations and budget transfers from the U.S. Agency for International Development), the Cochran Program leveraged over \$660,000 in nongovernmental contributions in order to extend the program to additional participants.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$7,245,000	0	797
National Interests Addressed:	Economic Prosperity; Democracy and Human Rights; Humanitarian Response; Global Issues; Agricultural Food Self-Sufficiency	

* * * * *

The **Food and Agriculture Organization (FAO) Fellowship Training Program** arranges academic and technical training programs for FAO participants in a wide range of agricultural subjects including resource management, crop production, forestry, animal science, aquaculture, nutrition, food safety, agricultural policy, management, and agribusiness development. In addition, U.S. study tours for senior- and mid-level government officials are arranged to familiarize them with the latest developments in agriculture, exchange views with U.S. counterparts, visit laboratories, and attend scientific meetings and seminars.

Utilizing the expertise of USDA agencies, agricultural universities, agribusinesses, and other private sector entities, USDA successfully arranged and provided training in the United States for 255 participants. These programs help establish scientific and business linkages with U.S. agriculture.

In addition to scientific and technical upgrading in their area of expertise, many foreign university agricultural faculty involved in nonacademic programs arranged by USDA collaborated with U.S. universities in the development of course outlines and materials for use upon their return to their home universities. For many of these programs the U.S. Land Grant universities and other training providers made in-kind contributions such as salary and benefits of their professors and researchers, laboratory costs, waiver of indirect costs, etc. In some cases, these in-kind contributions amounted to one-third to one-half of the total program costs.

In close collaboration with FAO, USDA will continue to increase emphasis on tailoring academic and training programs to better meet the specific needs of each Fellow in the most cost-effective way.

* * * * *

The **Visiting Scientist Program** facilitates the exchange of U.S. and international scientists who partake in joint research, conferences, and programs. The Visiting Scientist Program participants are provided travel services, visa applications, maintenance allowance, and insurance. During FY 1999, the Visiting Scientist Program had over \$2.2 million in agreements, exchanging more than 200 visitors/travelers.

DEPARTMENT OF AGRICULTURE

AgLink promotes U.S. trade and investment activities with emerging market countries while enhancing the entrepreneurial skills of foreign managers. The program provides financial and administrative support for U.S. managers to visit these markets, identifies potential partners for joint activities, and offers practical on-the-job training to their foreign counterparts. After a foreign partner is identified, USDA funds the travel expenses and provides visa support and a daily stipend for the foreign manager's training in the U.S. company.

DEPARTMENT OF COMMERCE

14th and Constitution Avenue, NW • Washington, DC 20230
 Office of Public Affairs: 202-482-4883 • www.doc.gov

The **Department of Commerce (DOC)** fosters and promotes the foreign and domestic commerce of the United States. The Department provides a wide variety of programs through the competitive free enterprise system. It offers assistance and information to increase America's competitiveness in the world economy; administers programs to prevent unfair foreign trade competition; provides social and economic statistics and analyses for business and government planners; provides research and support for the increased use of scientific, engineering, and technological development; works to improve our understanding and benefits of the Earth's physical environment and oceanic resources; grants patents and registers trademarks; develops policies and conducts research on telecommunications; provides assistance to promote domestic economic development; and assists in the growth of minority businesses.

The Department's international activities are designed to encourage international economic development and technological advancement through cooperative research and the training of business, science, and technology professionals.

* * * * *

Bureau of the Census (BUCEN)

International Programs Center (IPC)

The U.S. Bureau of the Census began its program of international technical assistance in the 1930s; its formal training program began in 1947. Over the years, BUCEN's international programs have helped establish official statistical offices in a number of countries. In response to requests from developing countries worldwide, the International Programs Center provides technical assistance, training and training materials, methodological development and materials,

and statistical software in all aspects of censuses, surveys, and information systems (including sample design, data collection, data processing, analysis, and dissemination).

Specifically, the IPC:

- Offers short- and long-term technical assistance to developing countries.
- Provides practical, applied training in statistics and related topics to participants from developing country statistical offices around the world. The training takes place both in the United States and overseas.
- Distributes statistical software designed and developed by BUCEN to meet the needs of statistical agencies.
- Develops and distributes training and methodological materials to developing countries.
- Evaluates, analyzes, produces estimates and projections, and makes available demographic data for all countries of the world.
- Compiles and assesses data on HIV/AIDS prevalence in countries in Asia, Africa, and Latin America.
- Hosts 350-400 foreign visitors annually, including many from the developing world.
- Exchanges statistical publications with 130 countries and several international organizations.

\$3,105,000*	138*	418*
National Interests Addressed:	Economic Prosperity; Democracy and Human Rights; Global Issues	

* * * * *

Bureau of Economic Analysis (BEA)

The BEA, a major federal statistical agency, produces the national, international, and regional economic accounts of the United States, including such statistics as the gross domestic product, state personal income, and the balance of payment accounts. BEA's **Foreign Training Program** focuses on national accounts. The training seminars run for eight weeks and cost about \$300 per week. BEA holds the courses in Washington and will tailor special programs in Washington to specific needs. The BEA Foreign Training Program does not receive an annual appropriation to conduct its activities. The BEA does not charge sponsors for its short-term casual programs (in response to drop-in visitors) and appointments. Formal training seminars are funded by sponsor governments. The BEA bills foreign sponsors \$2,400 a person per training seminar. The applicants are selected by their foreign government sponsors. In addition to the participants noted below, BEA hosted an additional 150 international visitors.

* * * * *

Bureau of Export Administration (BXA)

The **Nonproliferation and Export Control Cooperation (NEC) Program** focuses on pro-active initiatives with the New Independent States (NIS), Baltic Republics, and Central Europe. Funded under the Cooperative Threat Reduction Program (Department of Defense) and the Nonproliferation and Disarmament Fund (Department of State), these initiatives include technical exchanges in all five export control functional areas of legislative and regulatory framework, licensing procedures, preventive enforcement mechanisms, industry-government relations, and automation support. The establishment and strengthening of foreign export control systems will increase opportunities for U.S. trade in high-tech goods and technology with these countries. Additionally, it will enhance the effectiveness of U.S. export enforcement by extending into these countries improved capabilities to stop the proliferation of materials and technologies needed to make nuclear, biological, and chemical weapons and their delivery systems.

During FY 1999, the NEC team, in conjunction with other BXA organizations as well as representatives from the U.S. Customs Service and the Departments of State, Defense, Energy, and, on occasion, Justice hosted, coordinated, or sponsored 42 technical exchange workshops and multilateral events. These activities included cooperative bilateral workshops with Armenia, Bulgaria, Georgia, Hungary, Kazakhstan, Kyrgyzstan, Moldova, Poland, Romania, Russia, Tajikistan, and Ukraine, as well as multilateral technical workshops with Kyrgyzstan and Uzbekistan, and with Russia and Ukraine. Three major multilateral conferences were convened, two of them regional conferences, and one a plenary conference. The technical exchange workshops sought to familiarize the countries with the elements that constitute an effective export control system and to assist them in developing and enhancing their own export control systems. Toward this goal the workshops described legal authorities, shared licensing procedures and processes, explained preventive enforcement techniques, emphasized and demonstrated the need for government and industry cooperation on export control matters, and presented automation program techniques to simplify a country's national export control system and make it more reliable and accessible.

In FY 1999, the NEC Program saw major strides in the development of national export control systems by the NIS and by some countries in Central Europe. The workshops resulted in the reduction of the proliferation threat from and through the participating countries. The NEC team coordinates the participation of export control experts from all areas of BXA and the Office of Chief Counsel for Export Administration (OCC). Because BXA holds responsibility in all technical areas of export controls, it takes the lead in a wide range of technical exchange workshops.

Patent and Trademark Office (PTO)

The PTO offers various programs to provide technical assistance to developing countries and to countries moving to a market economy. Programs focus on establishing adequate systems in these countries for the protection of intellectual property rights. They also provide intellectual protection enforcement training. The programs provide advice and expertise to these countries with the desired goal being the reduction of losses resulting from piracy of U.S. intellectual property. The FY 1999 Visiting Scholars Program provided participants from China, Estonia, Laos, Latvia, Liberia, Lithuania, Namibia, Peru, Philippines, Saudi Arabia, Singapore, Suriname, Tanzania, Thailand, Ukraine, and Vietnam with two weeks of classroom and hands-on study of various aspects of the administration of intellectual property law, patent and trademark examination and copyright protection, and an opportunity to gain an understanding of the important role of intellectual property protection as a tool for economic development. Other highlights included an Intellectual Property Enforcement Training Program and co-sponsored programs with the World Intellectual Property Organization (WIPO) in Mombassa, Kenya. The programs in Kenya included an "African Sub-Regional Symposium on International Standards for Protecting Intellectual Property and Intellectual Property in the Digital Age" and a "Regional Consultation on Electronic Commerce and Intellectual Property." These programs usually last one week. (Note: Data below include in-country training.)

The **American Management and Business Internship Training Program (AMBIT)** administered by the ITA in collaboration with the International Fund for Ireland, helps

to improve the productive abilities of industry in Northern Ireland and the Border Counties of Ireland. The program provides hands-on training in U.S. firms for managers and technical experts from the Northern Ireland region. It represents one of several USG economic initiatives announced by President Clinton in November 1994 to demonstrate America's interest in supporting the economic development of the region. Participating U.S. firms provide interns with a three-week to six-month training or development program relating to management or production techniques.

To date, over 65 U.S. companies and 80 managers and technical experts from the region have participated in the program. According to participant feedback, the AMBIT program has spawned at least 10 joint ventures.

National Oceanic and Atmospheric Administration (NOAA)

NOAA is comprised of the National Ocean Service; National Weather Service; National Marine Fisheries Service; National Environmental Satellite Data and Information Service; and Office of Oceanic and Atmospheric Research. NOAA warns of dangerous weather, charts our seas and skies, guides our use and protection of ocean and coastal resources, and conducts research to improve understanding and stewardship of the environment.

National Marine Fisheries Service (NMFS)

The NMFS has been working extensively on many fronts, with resource managers, nongovernmental organizations (NGOs), and in-country scientists to build capacity to enhance marine turtle conservation and recovery. Through the **Capacity Building for Marine Turtle Conservation and Recovery Program**, NMFS scientific staff have traveled to developing countries in Latin America, the Caribbean, southeast Asia, the Middle East, and Africa. Staff have hosted nationals from these areas and provided information exchange/capacity building programs. Efforts have focused on enhancing resource survey efforts, improving enforcement capabilities, and transferring biological technology such as satellite telemetry techniques for monitoring sea turtle movements. NMFS has been providing funds for these activities from its Recover Protected Species funds.

The goal of the Capacity Building for Marine Turtle Conservation and Recovery Program is to build capacity, internationally, and to enhance marine turtle protection and survival. The program focuses on training and information exchange to enhance resource survey efforts and to transfer biological technology. Improving the capability of persons charged with managing and protecting marine turtles, especially in developing countries, is paramount to the effective recovery and conservation of these long-lived, highly migratory species. NMFS has no data to report for FY 1999.

* * * * *

The NMFS **International Turtle Excluder Device (TED) Technology Transfer Program** provides technical assistance to foreign nations on the correct installation and use of TEDs in the shrimp industry to protect sea turtles from drowning in shrimp nets. TEDs are inserted into the back end of shrimp trawlers for the purposes of releasing sea turtles. TED training activities normally take four to seven days. Participants (mostly gear specialists and shrimp fishermen) receive classroom instruction in the design and operational characteristics of TEDs. They participate in a hands-on construction and installation demonstration. And, finally, depending on logistics, the participants get to see how to deploy and retrieve nets while aboard a commercial shrimp trawler. TED training activities took place in Bahrain, Costa Rica, Indonesia, Thailand, and Suriname.

During a meeting in Australia, representatives from about 20 nations in the Indian Ocean region discussed the possible development of an Indian Ocean sea turtle conservation agreement. Were such an agreement to be developed, TEDs would be an integral part of it.

Office of Oceanic and Atmospheric Research

On January 31, 1979, the United States and China signed the U.S.-China Science and Technology Agreement in Washington, D.C. More than twenty years later, this umbrella agreement contains over 30 individual protocols for science and technology cooperation based on mutual benefit. Two of these protocols -- also signed in 1979 -- are administered on behalf of the U.S. Government by the National Oceanic and Atmospheric Administration: the Marine and Fishery (M&F) Science and Technology Protocol and the Protocol for Cooperation in Atmospheric Sciences. The Office of Oceanic and Atmospheric Research administers the M&F protocol, whose activities span the following five scientific areas: (1) Data and Information Exchange, (2) Marine Environmental Services, (3) Understanding the Role of the Oceans in Climate Change, (4) Living Marine Resources, and (5) Marine and Coastal Management. In 1999, the **U.S.-China Marine and Fisheries Science and Technology Protocol Program** sponsored the following exchanges: One Chinese graduate student went to the U.S. Food and Drug Administration for six months to study techniques for detecting and managing Harmful Algal Blooms (HABs). One Chinese scientist went to the University of Arizona for four months to study shrimp diseases. The researcher brought with her shrimp brood stock to be used to create a reserve stock of disease-free shrimp. In July 1999, the National Ocean Service supported a two-week exchange visit of two Chinese lawyers to Washington D.C., on marine and coastal management, legislation, and enforcement.

Since its creation in 1964, the **U.S.-Japan Cooperative Program in Natural Resources (UJNR)** has been a forum for U.S.-Japan applied science and technology cooperation for the conservation of natural resources. To this end, the UJNR program supports communication and collaboration among technical specialists as well as the exchange of equipment, data, and samples. Over the years the program has supported hundreds of bilateral study missions. In 1999, the UJNR program supported a six-month exchange of two Japanese students to conduct flounder research in the United States. The Japanese government paid the \$10,000 cost of the exchange.

The **National Sea Grant College Program** consists of a network of 29 university-based programs in coastal and Great Lakes states involving more than 300 institutions nationwide in research, education, and outreach concerning coastal, marine, and aquatic issues. The Department of Commerce supports the program, in partnership with the states and private industry. No exchanges occurred in FY 1999.

* * * * *

National Environmental Satellite Data and Information Services (NESDIS)

The NESDIS mission is to provide and ensure timely access to global environmental data from satellites and other sources to promote, protect, and enhance the U.S. economy, security, environment, and quality of life. To fulfill its responsibilities NESDIS acquires and manages America's national environmental satellites, provides data and information services, and conducts related research. **NESDIS International Activities** support the NOAA strategic goals of providing advance short-term warnings and forecast services, implementing seasonal to interannual climate forecasts, assessing and predicting decadal to centennial change by operating environmental observation satellites, and providing data to weather services and researchers in the United States and around the world. Since climate and the environment are global issues, much of the work involves collaborating with foreign governments, academics, and researchers.

The **U.S.-Russia Cooperation in Meteorological and Climate Data Exchange** is carried out through the work of the National Climatic Data Center. The Center, which is part of NESDIS, exchanges meteorological and climate data and prepares high quality data sets for global change research. Activities include exchanging data, preparing computer software systems to quality control the data, and researching observation practices to adjust data for biases and making resulting data sets available for research. The Center seeks to make meteorological/climate data available to the research community worldwide using a common quality control procedure for research studies in climate global change and the monitoring of long-term change in the environment. No FY 1999 data has been submitted.

* * * * *

U.S.-People's Republic of China Protocol on Cooperation in the Field of Atmospheric Sciences and Technology was developed in 1979 between NOAA and the China Meteorological Administration. Other U.S. participants in this agreement include the National Aeronautics and Space Administration, the National Science Foundation, and various academic institutions. Areas of cooperation include climate/monsoon studies, mesoscale meteorology, satellite meteorology, atmospheric chemistry, meteorological modernization, and training/participation. The program's objective is to identify and promote projects of benefit to both countries and forge closer ties with the People's Republic of China in the area of science.

The **Cooperative Institute for Research in the Atmosphere (CIRA)** seeks to increase NOAA satellite data utilization.

Regional Meteorology Training Centers (RMTTC) in Costa Rica and Barbados: The demonstration project for Satellite Meteorological Training Centers in Costa Rica and Barbados was undertaken in the spirit of the 45th World Meteorological Organization (WMO) Executive Council Report, which stated that it strongly "supported the proposal that each satellite operator or group of satellite operators participating in the space-based sub-system of the Global Observing System cooperate with at least one of the specialized satellite applications training centers strategically located around the globe with regard to the satellite training program, facilities, and

expertise required.” Through this effort, NESDIS and the National Weather Service have utilized CIRA and the Cooperative Institute for Meteorological Satellite Studies (CIMSS) to initiate a demonstration project for satellite-focused training and joint research in Costa Rica and Barbados. FY 1999 accomplishments include a two-week training seminar held at the RMTC in Costa Rica in December 1999; development of joint research case studies that highlight the use of Geostationary Operational Environmental Satellite (GOES-8) imagery in the RMTC areas of interest; and visits from RMTC staff to CIRA to obtain additional information and training on the development of computer-aided training modules. Both Costa Rica and Barbados have incorporated use of satellite imagery in their meteorology courses offered at local universities.

U.S.-India Project No. 3 -- Tropical Cyclones: Project goals include: (1) developing operational techniques to predict the intensity and movement of cyclone storms and associated surges and (2) utilizing satellite data for analysis and forecasting of tropical cyclones and tropical cyclone prediction using numerical models. Major accomplishments for FY 1999 include: finalization of a three-year project Work Plan for a 1999 Workshop in New Delhi, India; designation of Co-Principal Investigators: USA: Raymond M. Zehr, NOAA/NESDIS RAMM Team, Fort Collins, CO. INDIA: S. R. Kalsi, India Meteorological Department (IMD), Mausam Bhavan, Lodi Road, New Delhi 110003, India; and partial assembly of satellite data sets and completion of preliminary analyses for three 1999 North Indian Ocean tropical cyclones.

Hurricane Mitch Relief Effort: A team of scientists and computer systems personnel visited Nicaragua, El Salvador, Honduras, Guatemala, and Costa Rica in December 1999 to prepare for installation of a central satellite data ingest system and remote computers to receive real-time satellite data from the ingest. Hardware installation will begin in the fall of 2000. Training is provided for foreign scientists on site at Regional Meteorological Training Centers in Costa Rica and Barbados.

National Weather Service (NWS)

The National Weather Service provides daily forecasts and warnings for severe weather events such as hurricanes, tornadoes, winter storms, floods, and tsunamis.

The National Weather Service International Activities Office responds to requests for training in meteorology, operational hydrology, and related disciplines. These requests are sent by the United Nations World Meteorological Organization and are funded by the United States under the **WMO Voluntary Cooperation Program**. Fellowships are awarded to candidates designated by their respective governments, through the Permanent Representative with WMO, who is usually the director of the National Meteorological or Hydrometeorological Service in the requesting country concerned. The studies and training fall into the following broad categories: basic university studies, postgraduate studies, nondegree university studies, specialized training courses, on-the-job training, as well as technical training for operation and maintenance of

equipment. The majority of requests involve short-term training (specialized training courses and on-the-job training).

Four-month fellowships at the International Desks of the National Centers for Environmental Prediction (NCEP) in Camp Springs, Md., provide an excellent on-the-job training forum for visiting operational meteorologists. Students at the South American, Tropical (for Central American and Caribbean countries), and African Desks gain insight into interpretation of NCEP's numerical weather prediction model output and provide useful model verification and operational feedback. During the training, the visiting Fellows learn about a broad spectrum of meteorological products, as well as analysis and forecasting techniques.

The United States gains from the participation of these visiting students. Our global weather prediction models undergo constant revision, with each change requiring a thorough evaluation. A change or modification in the model that reaps some benefits over a particular region, could result in less than favorable benefits over other regions of the globe. The visiting Fellows bring knowledge and expertise from their region, which the United States uses to subjectively evaluate the models, thus allowing us to identify and correct substantial problems with the models. A cadre of well-trained meteorologists provide innumerable benefits. For example, the United States consumes considerable produce from these regions, which directly depend on accurate forecasting for successful harvests. These forecasters contribute to the safety and protection of U.S. interests abroad. Hundreds of flights, local and international carriers, originate daily in the Caribbean Basin and South America. The safety of U.S. citizens depends on proper aviation support, as provided by the International Desks.

Sixty-three students have received training at the South American Desk since 1988; 41 at the Tropical Desk since 1992; and 24 at the African Desk since 1995.

The World Meteorological Organization's Voluntary Cooperation Program ensures, through collaborative efforts of member nations, the enhancement and development of the capabilities of the national Meteorological and Hydrological Services so that they can contribute to, and participate efficiently in, the implementation of WMO programs, for the benefit of the global community and in support of national socioeconomic development activities.

National Telecommunications and Information Administration (NTIA)

Office of Spectrum Management

The Office of Spectrum Management conducts training in radio frequency spectrum management for citizens of developing countries. Most participants work for their governments as regulators and technical specialists in radio frequency spectrum management; others work for

telecommunications carriers or private industry. The program seeks to improve international goodwill and understanding by educating and training the spectrum management personnel of developing nations in modern spectrum management techniques. Training courses facilitate future negotiations and foster future support for U.S. policy positions on international spectrum management issues. The Office had no data to report on training programs in FY 1999.

* * * * *

National Institute of Standards and Technology (NIST)

The mission of NIST is to foster, promote, and develop the foreign as well as the domestic commerce of the United States. Over the years, this effort has expanded into a broader responsibility to serve and promote international economic development and technological advancement through cooperative research and exchange of international visitors.

The Office of International and Academic Affairs (OIAA) is responsible for the general policy and oversight of the international activities of NIST. With funding from international organizations and other countries or as part of Agreements or Protocols for Cooperation, NIST brings scientists from institutions of many countries as exchange visitors.

These exchange visitors come to NIST under the **Foreign Guest Researcher Program**. This research is typically at the Ph.D. level in the areas of chemistry, physics, and engineering measurement sciences. The average length of stay for an exchange visitor is approximately one year. The Foreign Guest Researcher Program provides foreign scientists with opportunities to work with NIST scientists and engineers on projects of mutual interest. NIST accepts foreign guest researchers into its program for a number of reasons, including to gain access to unique foreign technical knowledge and skill, to develop working relationships with and insight into the character and quality of the work in foreign institutions, and to carry out coordinated work with foreign institutions. NIST plays a worldwide role in the coordination and improvement of measurement methods for science and engineering to support enhanced commercial, engineering, and scientific relationships; and to support a U.S. Government policy of providing certain countries with economic development assistance. NIST also participates in the programs of other U.S. governmental and international agencies such as UNIDO.

The **Foreign Visitor Program** provides international visitors with opportunities to learn about the U.S. standards and metrology systems, as well as the NIST extramural programs. It also provides opportunities for NIST staff to learn about similar institutions/programs in other countries, foreign metrology and standards activities, and to promote cooperation. The average program length for foreign visitors is one day. In Fiscal Year 1999, NIST hosted 786 international visitors

from 87 countries. NIST welcomes visitors from around the world, particularly those from foreign national metrology institutes.

The **Special American Business Internship Training (SABIT) Standards Program**, which has been in operation since 1995 and is authorized on an annual basis, focuses on standards as a basis for exchanging knowledge of manufacturing practices, standards, testing, and other conformity assessment procedures between U.S. companies and NIS countries, as a means of increasing U.S. trade in the region. The program provides opportunities for U.S. companies to foster effective business relationships in the NIS region.

Each six-week session focuses on a vital sector of the economy and is comprised of 20-25 experts from throughout the NIS. Each group spends two weeks at NIST, meeting with U.S. regulatory and technical agencies and with private sector organizations, followed by four weeks to individual companies, testing laboratories, and professional organizations.

FY 1999 accomplishments: In collaboration with SABIT, NIST trained 66 NIS experts in standardization, product certification, laboratory accreditation, and regulations in three sessions under its comprehensive standards program. During the workshops, 46 U.S. representatives provided training and technical assistance. Additionally, two U.S. Government representatives traveled to Russia and Uzbekistan to provide technical assistance. A total of 48 U.S. representatives participated in the technical assistance projects. The FY 1999 program included a substantial number of participants from the Central Asian Republics and the Caucasus. A program on oil and gas, as well as a program on construction, was presented for the second time in response to requests from NIS organizations and U.S. business interests. A program on food packaging was the first effort. NIS countries and U.S. companies remain interested in this program.

National Interests Addressed:	Economic Prosperity	

* * * * *

The **Standards in Trade Program** assists U.S. industry in overcoming technical barriers to trade caused by restrictive normative standards, testing, or other conformity assessment procedures, and by measurement problems in major existing or developing markets. It also encourages adoption of U.S. technology and concepts into standards and conformity assessment rules to facilitate and enhance trade. Technical assistance to countries through workshops and

seminars has proven effective in promoting U.S. influence throughout the world. This program was originally authorized in 1989, expanded in 1995, and is funded on an annual basis.

The program directly addresses the technical trade barriers encountered by U.S. companies; provides technical assistance to government and private sector organizations through workshops, seminars, technical information, and meetings of technical experts; promotes the harmonization of standards and conformity assessment procedures; participates in and influences the standards development process in other countries; promotes the recognition and acceptance of U.S. standards and product certifications; provides training, advice, and consultations to U.S. industry, foreign governments, and private sector organizations; and establishes and strengthens links between the U.S. Government and private sector organizations with their counterparts in other countries.

In FY 1999, 107 foreign representatives from 38 countries received training at NIST headquarters in three two-week workshops and two one-week workshops. In addition, three three-day laboratory accreditation seminars took place in the WHA region: Argentina -- 118 in-country participants plus 2 from Paraguay; El Salvador -- 26 in-country participants, 3 from Costa Rica, 2 from Guatemala, 2 from Honduras, 2 from Nicaragua, and 2 from Panama; and Venezuela -- 45 in-country participants, 1 from Peru. In March 1999, 300 in-country participants in China attended a seminar supported by \$210,000 in U.S. private funding. Three U.S. Government representatives and 34 U.S. private-sector representatives traveled to China from the United States. Eight U.S. private sector representatives from offices in China also participated. A total of 168 U.S. representatives participated in technical assistance workshops; 117 participated in workshops conducted in the United States. The foreign representatives in an individual workshop usually come from several different countries. Fifty-one U.S. representatives participated in technical assistance sessions conducted outside the United States. A total of 610 foreign representatives participated in all of the technical assistance sessions.

Technology Administration

The **U.S. - Japan Manufacturing Technology Fellowship (MTF) Program** aims to strengthen the bilateral relationship between our countries and companies and to address the disparity between the number of Japanese engineers studying and working in the United States versus the number of U.S. engineers able to study and work in Japan.

The MTF Program has created new business opportunities and strengthened preexisting relationships between American and Japanese customers and suppliers. It offers American companies the opportunity to establish long-term relationships with their Japanese manufacturing counterparts. The MTF Fellow can open the channels of communication to the Japanese firm that can then be extended to senior management. Typically, Fellows spend six months to a year in this

DEPARTMENT OF COMMERCE

work-study internship program. The Society of Manufacturing Engineers (SME) and Vanderbilt University have shared operational responsibilities. The program has no data to report for FY 1999.

DEPARTMENT OF DEFENSE

The Pentagon • Washington, DC 20301

Public Affairs: • www.defenselink.mil

The mission of the **Department of Defense (DOD)** is to provide the forces needed to deter war and protect the security of the United States. The Department of Defense maintains and employs armed forces to support and defend the Constitution of the United States against all enemies; ensures, by timely and effective military action, the security of the United States, its possessions, and areas vital to its interests; and upholds and advances the national policies and interests of the United States.

The major elements of these forces are the Army, Navy, Air Force, and Marine Corps. Under the President, who is also Commander in Chief, the Secretary of Defense exercises authority, direction, and control over the Department, which includes the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Military Departments, the Unified Combatant Commands, the DOD Inspector General, the Defense Agencies, and the DOD Field Activities. To accomplish this mission the Department employs approximately 1.4 million service men and women, and some 724,000 civilian employees. In addition, there are 1.35 million National Guard and Reserve personnel that are fully integrated into the National Military Strategy as part of the total force.

~ACADEMIC TRAINING~

National Defense University

The **National Security Education Program (NSEP)** addresses areas and languages of the world critical to U.S. national security and underrepresented in U.S. study. The program awards scholarships to U.S. undergraduates to study abroad in geographic areas critical to U.S.

national security in which U.S. students are traditionally underrepresented. The NSEP also awards fellowships to U.S. graduate students for the study of foreign areas, languages, and other international fields crucial to U.S. national security.

Separately, NSEP awards grants to U.S. institutions of higher education to build or enhance programs of study in foreign areas, languages, and other fields critical to U.S. national security. This portion of the program reaches an estimated 800 participants (not reflected in the table below) through a variety of formats, including direct instruction and distance learning.

Office of the Under Secretary of Defense (Personnel and Readiness)

The **Service Academy Foreign Student Program** reserves a maximum of 40 billets for foreign students at each Service Academy. Applicants must be academically qualified. Foreign students from selected nations are admitted to all U.S. service academies as regular cadets and midshipmen. They complete a four-year course of instruction and receive a bachelor's degree in a major field of study. Students usually return to their home countries to serve in their same branch of military service as the academy which they attended. Of the available 120 slots, 106 and 105 slots were filled in FY 1998 and FY 1999, respectively.

Office of the Joint Chiefs of Staff

The **Olmsted Scholar Program** annually provides educational grants for two years of graduate study and other educational experiences in a foreign country to three competitively selected career officers with regular commissions (one from each of the three military departments). The spouses of married Scholars also receive grants for language training and to defray other expenses connected to their participation in their spouses' educational endeavors.

The Olmsted Scholars are nominated by their military services to study in foreign universities chosen by the grantees and approved by their services. The Olmsted Foundation Board of Directors has final say regarding these decisions. The Olmsted Scholars enroll as full-time

students and study in a language other than English while interacting with the residents of the countries in which they are living. They must live on the economies of their host countries, and contact American military installations and embassies for necessary administrative and medical services only.

The Olmsted Program originated with the 1960 class of military officers. Its purpose then and now is to broadly educate those young career military officers who exhibit extraordinary potential for becoming this country's future military leaders. Becoming immersed in a foreign culture not only challenges young officers, but helps them mature and increases their sensitivity to the interests, viewpoints, and concerns of people around the world. This sensitivity is invaluable as the officer receives increased responsibility and becomes ever more involved with the leaders, both civilian and military, of the United States and other countries.

The Scholars are a growing body of talented and uniquely educated officers with the added dimension of their Olmsted Scholar experience. They have been assigned to high level staffs of their services, including NATO, command assignments, and the Joint Chiefs. As a group, they have followed a pattern of early promotion; many of the Scholars have achieved general officer and flag rank.

If an Olmsted Scholar has not earned an advanced degree after two years of study abroad, the Scholar, with Service permission, is eligible for partial assistance from the Foundation in completing requirements for an advanced degree at a university in the United States, at any time, either immediately upon return from overseas or later between assignments.

Through the end of 1999, 328 Scholars, representing 41 Olmsted Scholar classes, have completed, are completing or are preparing for two years of study abroad. Their studies to date have been in 27 languages at 117 different foreign universities in 40 countries.

~TECHNICAL/PROFESSIONAL TRAINING~

Office of the Joint Chiefs of Staff

The Office of the Joint Chiefs of Staff delegates operational control for many training and exchange programs to Services and Commands while retaining oversight responsibility. Those programs are coordinated by the George C. Marshall European Center for Security Studies, the Asia-Pacific Center for Security Studies, and the Center for Hemispheric Defense Studies.

The mission of the **George C. Marshall European Center for Security Studies** is to create a more stable security environment by advancing democratic defense institutions and

relationships; promoting active, peaceful engagement; and enhancing enduring partnerships among the nations of the Americas, Europe, and Eurasia. This is accomplished through tailored advanced professional education and training of military and civilian officials and by applied research. The Center consists of five programs: Department of Defense and Security Studies, Foreign Area Officers Program, Foreign Language Training Center, Conference Center, and the Research Program.

The Department of Defense and Security Studies offers three executive education courses. These courses consist of postgraduate-level studies that focus on how national security is formulated and maintained in democratic societies. There is a 2-week Senior Executive Course for parliamentarians/general officers and their civilian equivalents, a 15-week Executive Course for lieutenant colonels, colonels, and their civilian equivalents, and a 9-week course entitled "Leaders for the 21st Century" for majors and captains and their civilian equivalents.

The 18-month Foreign Area Officers Program prepares U.S. and foreign military officers and Defense Department civilians for key assignments involving Central, Eastern, and Southern Europe; Russia; and Eurasian countries. The training includes advanced studies in Russian, Ukrainian, and other languages; political-military, military, and regional studies; and internships living and working in the countries of interest. Foreign Area Officer students gain additional experience through close interaction with executive course participants and attendance at selected Marshall Center conferences.

The Foreign Language Training Center offers classroom, in-country, and computerized language instruction in nine languages for military and civilian linguists. In addition to refresher training, specialized interpretation courses in technical vocabulary for on-site inspection compliance, peacekeeping, and joint and combined exercise participation prepare linguists for specific assignments. English and German as a Second Language are electives popular with Defense and Security Studies executive course participants.

The Conference Center organizes 15 conferences per fiscal year on a variety of security-related topics designed to engage participants in constructive discussion. The program includes multinational, regional, and bilateral conferences and seminars. Part of the program is under the purview of the Partnership Support Program. Marshall Center Conference Teams work closely with the Marshall Center faculty and requesting countries to ensure that the conference purpose, objectives, and scope of attendance fulfill the needs of the participants.

The objectives of the Research Program are to conduct long-term, interdisciplinary international research projects; establish and maintain contacts and research networks in Central, Eastern, and Southern Europe, Russia, and Eurasia; engage academia of the region; assist in the development of materials that support course curricula and the conference program; and publish scholarly articles and books. The research program includes research workshops involving renowned scholars from throughout Europe and Eurasia.

The Marshall Center programs and activities support the U.S. National and Military Strategies by directly reinforcing the U.S. European Command Theater Engagement Strategy. Many of the course curricula and conference materials address the improvement of democracy, human rights, civilian control of the military, crime prevention, environmental issues, and other areas of interest in the International Affairs Strategic Plan.

* * * * *

The **Asia-Pacific Center for Security Studies** is a regional studies, conference, and research center, whose mission is to enhance cooperation and build relationships through mutual understanding and study of comprehensive security issues among military and civilian representatives of the United States and Asia-Pacific nations. The Center provides a focal point where national officials and policy makers can gather to exchange ideas, explore pressing issues, and achieve a greater understanding of the challenges that shape the region's security environment. The Center is a complement to the U.S. Pacific Command's strategy of constructive engagement and builds on USPACOM's strong bilateral relationships by focusing on a broader multilateral approach to addressing regional security issues.

The Center has three primary academic elements: the College of Security Studies, which is the central focus, and the Research and Conference Divisions. College participants come from all nations in the region and consist of senior military and government civilian equivalents in security-related positions. They participate in either the 12-week Executive course (offered three times per year) or the one-week Senior Executive course geared to senior leaders at the Major General (O-8) level or equivalent (currently offered once per year). In Fiscal Year 1999, the College graduated three classes and commenced a fourth. The Conference Division hosted/co-hosted ten conferences: the 3rd Annual U.S.-Japan Security Relations Conference, the ASEAN Inter-Sessional Meeting on Confidence-Building Measures, Energy Security in the Asia-Pacific (seminar), Globalization and Regional Security: Asian Perspectives, 1999 Pacific Symposium, Islam in Asia (seminar), the Role of Nuclear Weapons in East Asia, Island State Security, the Biennial Conference of the Asia-Pacific Center for Security Studies, and Water and Conflict in Asia (seminar).

Fiscal Year 2000 will bring graduation of three College classes, one Senior Executive class, and ten conferences. Through its College and conference program, which engages both current and future decision makers within the region on a multitude of contemporary issues impacting the regional security environment, the Center's program actively helps achieve a broad range of U.S. national interests.

~PERSONNEL EXCHANGES~

**Office of the Under Secretary of Defense
(Personnel and Readiness)**

The **Reserve Officers Exchange Program** maintains an active relationship with countries that depend on cooperation in crisis and war. Every year Reserve officers from the armed forces of the United States, United Kingdom, and the Federal Republic of Germany receive training in their mobilization duties and have the opportunity to experience the host nation's sense of life. The officers familiarize themselves with the structure, organization, equipment, and operational doctrine of the armed forces of another country. The result is a Reservist better prepared to deal with his or her mobilization assignment, and a citizen who returns to the community with a better understanding of the people and policies of a major alliance partner. Many FY 1999 participants emphasized that the exchange gave them the opportunity to observe different aspects of their allies' military culture and to establish lasting professional relationships with the Reserve officers of the host nations.

The Office of the Assistant Secretary of Defense for Reserve Affairs and the German Ministry of Defense initiated the Reserve Officer exchange by a Memorandum of Understanding (MOU) in 1985. The exchange with the United Kingdom began in 1989 with a signed MOU. The first German exchange involved seven officers from each nation. This number was increased to 15 in 1986 and has stabilized at approximately 20 since 1987 for both the Federal Republic of Germany and the United Kingdom.

Office of the Deputy Under Secretary of Defense (Policy Support)

The **Defense Personnel Exchange Program**. Since World War II, the U.S. Military Departments and their counterparts in friendly foreign governments have entered into agreements establishing military personnel exchange programs. These agreements require each party to provide a reciprocal assignment of military personnel to substantially equivalent positions within the defense establishment of each participating government. Similar agreements call for the exchange of civilian personnel in programs covering scientists and engineers, intelligence analysts, and administrative and professional personnel. The Military Departments, the Office of the Secretary of Defense staff elements, and Defense Agencies participate in these civilian personnel exchange programs. These military and civilian personnel exchanges are designed to foster mutual understanding and cooperation between governments by familiarizing exchange program participants with the organization, administration, and operations of the other party. All such personnel exchange programs established by the DOD Components constitute the Defense Personnel Exchange Program.

Defense Security Cooperation Agency (DSCA)

The **International Military Education and Training Program (IMET)** exposes foreign students to U.S. military organizations, procedures, and the manner in which they function under civilian control. IMET's Information Program teaches students the American way of life, regard for democratic values, respect for an individual's civil and human rights, and belief in the rule of law. IMET seeks to improve foreign military justice systems and procedures to bring them into agreement with internationally recognized human rights. IMET teaches military and civilian participants how elements of American democracy work together to produce a commitment to basic principles of human rights. IMET nurtures professional and personal relationships that inject American values into important parts of foreign societies, which are often critical in their transitions to democracy.

IMET courses cover the U.S. judicial system, the two-party system, the role of a free press and other communications media, minority issues, the purpose and scope of labor unions, the U.S. economic system, and educational institutions. IMET fosters healthier civil-military relations by teaching key military and civilian leaders how to break down barriers that often exist between their armed forces, civilian officials, and legislators of competing political parties. In short, IMET presents a model that students can use to mold their unique civil-military mechanisms into a democracy.

The **Foreign Military Sales/Foreign Military Financing Program** is a non-appropriated program through which eligible foreign governments purchase training available for sale from the U.S. Government. The purchasing government pays all training costs.

Foreign Military Financing (FMF) is a grant and loan program and is distinct from Foreign Military Sales (FMS). In general, FMF provides financing for FMS sales to selected countries. FMF enables key friends and allies to improve their defense capabilities by financing acquisition of U.S. military training. As FMS/FMF helps countries provide for their legitimate defense training needs, it promotes U.S. national security interests by enhancing interoperability with U.S. forces, strengthening coalitions with friends and allies, and cementing strong foreign military relationships with the U.S. armed forces.

Although the FMS/FMF program also encompasses military equipment sales, this report reflects only those foreign funds that purchased training from the U.S. Government. Therefore, the \$402,976,520 reported to the IAWG represent U.S. Government income from the sale of military training, not expenditures. By law the FMS program must not generate a profit.

The **State Partnership Program**. The National Guard Bureau (NGB) engages in training or related exercise activities through its National Interagency Civil-Military Institute (NICI), which implements the National Guard (NG) State Partnership Program (SPP). These activities are designed to promote NG and Reserve Component (RC) interoperability with the U.S. Active Components and with allied forces while relieving heavy operational commitments in the Active Component. In addition, NGB-sponsored activities help maintain NG integration into the regional Commander-in-Chief's peacetime engagement plans and can often offer unique experience in peacekeeping and other noncombat skills that the NG is increasingly called upon to perform.

The foreign and security policy justification for these activities include (1) the need to engage NG and RC personnel in Active Component activities to maintain a unified U.S. fighting force, (2) the ability to ease operational tempo pressures on the Active Component through NG and RC participation, and (3) the growing ability of the NG and RC to provide specialized skills and expertise (civil affairs and certain other military specializations have been tasked in increasing quantity to the RC, for example).

Department of the Air Force

The **Aviation Leadership Program (ALP)** provides specialized undergraduate pilot training (SUPT) to a small number of select international students from friendly, less-developed countries. ALP consists of English language training, SUPT and necessary related training, as well as programs to promote better awareness and understanding of democratic institutions and the social framework of the United States. The foreign and national security policy justification for the program centers on fostering military-to-military relations with potential air force leaders from

participating countries. The ALP program was suspended for FY 1999 and FY 2000 due to a shortfall of SUPT quotas for overall Air Force requirements. The U.S. Air Force plans to restart the program in FY 2001.

Office of Postsecondary Education

International Education and Graduate Programs Service (IEGPS)

The IEGPS administers 14 programs to expand the international dimension of American education and to increase U.S. capabilities in the less commonly taught foreign languages and related area studies. IEGPS’ mission includes the funding of foreign language and area training, curriculum development, research, and a wide range of international education activities.

Nine programs are conducted primarily in the United States: National Resource Centers, Foreign Language and Area Studies Fellowships, International Research and Studies, Language Resource Centers, Undergraduate International Studies and Foreign Language, Business and International Education, Centers for International Business Education, Technological Innovation and Cooperation for Foreign Information Access, and the Institute for International Public Policy. These programs are authorized by Title VI of the Higher Education Act (HEA) of 1965, as amended.

Five programs are conducted overseas. Four of these programs are authorized by the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act): Doctoral Dissertation Research Abroad (DDRA), Faculty Research Abroad (FRA), Group Projects Abroad (GPA), and Seminars Abroad (SA). These programs favor projects that focus on any world area

other than Western Europe. The American Overseas Research Centers program is authorized by Title VI of the HEA.

The **Fulbright-Hays Doctoral Dissertation Research Abroad (DDRA) Program**, through U.S. institutions of higher education, provides fellowships to doctoral candidates to go abroad to conduct full-time dissertation research in modern foreign languages and area studies.

The program trains U.S. academic specialists interested in teaching about world areas and foreign languages critical to the U.S. national interest.

For a detailed description of the program and its requirements, consult the Code of Federal Regulations, Title 34, Chapter VI, part 662; the Federal Register, Volume 63, Number 168, Monday, August 31, 1998, pp. 46358-46363; or the Catalog of Federal Domestic Assistance, Program Number 84.022.

Office of Educational Research and Improvement (OERI)

The **International Education Exchange Program** provides support for education exchange activities in civics and government education and economic education between the United States and eligible countries in Central and Eastern Europe, the Commonwealth of Independent States, and any country that was formerly a republic of the Soviet Union. Award recipients make available to educators from eligible countries exemplary curriculum and teacher training programs in civics and economic education developed in the United States. The grantees help these countries to translate and adapt curricular programs in civics and economic education for students and teachers, and to translate and adapt training programs for teachers. Grantees provide for the exchange of ideas and experiences among educators and leaders through seminars on the basic principles of U.S. constitutional democracy and economics, and through visits to school systems, institutions of higher education, and nonprofit organizations conducting exemplary programs in civics and economic education. Grantees are also responsible for determining the

DEPARTMENT OF EDUCATION

effects of educational programs on students' development of the knowledge, skills, and character traits essential for the improvement of constitutional democracy.

The program is designed and implemented in collaboration with the United States Information Agency (consolidated into the Department of State on October 1, 1999), which is specifically charged with ensuring that the assistance provided is not duplicative of other efforts. The appropriated funds for this program totals \$5 million for FY 1999. Congress provided a supplement of \$2 million for program activities and resources geared to Northern Ireland and the Republic of Ireland, Bosnia-Herzegovina, and other developing countries. The funds are divided equally between activities in civics and government education, and activities in economic education.

The **Civics and Government Education Program** provides for a series of exchanges among educators and leaders in civics education in the United States and countries in Central and Eastern Europe and the NIS; Northern Ireland, the Republic of Ireland, and other developing countries such as Indonesia, Macedonia, Mexico, Nigeria, and Egypt. This program provides students, educators, and leaders with opportunities to learn civics education and to assist each other in improving education for democracy in their respective nations.

DEPARTMENT OF ENERGY

1000 Independence Avenue, SW • Washington, DC 20585
 Public Information: 202-586-4670 • www.energy.gov

The **Department of Energy (DOE)**, in partnership with its customers, is entrusted to contribute to the welfare of the nation by providing the technical information and the scientific and educational foundation for the technology, policy, and institutional leadership necessary to achieve efficiency in energy use, diversity in energy sources, a more productive and competitive economy, improved environmental quality, and a secure national defense.

The Department of Energy's international activities promote international cooperation consistent with U.S. energy policy and foreign affairs/national security concerns. This collaboration benefits the United States in science and technology research and development through cost sharing and scarce resource leveraging, enhances energy security, improves environmental quality, reduces the threat of nuclear proliferation, and improves the comparative position of U.S. industry in world trade.

Information provided on international activities has been divided by organizational element within the Department of Energy. The data provided capture international travel for Department of Energy programs and include exchanges and training efforts. Other travel may also be included in the data. The Department did not provide financial data.

* * * * *

Energy Efficiency and Renewable Energy Programs involve research, development, and demonstration activities that promote the increased use of energy efficiency and renewable energy technologies in various sectors, such as building, industrial, transportation, and utility. Activities include the following: providing information on advanced technologies, systems, and partnership opportunities that promote energy efficiency, renewable energy, and pollution prevention; assisting U.S. industry to develop clean, renewable, and more economical sources of electricity; and providing case studies about technologies, such as solar thermal, biomass, fuel-cells, hydrogen, and high-temperature superconductors.

The **NIH Visiting Program** is the largest of the NIH scientific exchange programs. Program participants must be invited to the NIH by a senior intramural investigator who will sponsor the visitor's research training or experience. Visiting Program participants are funded by the NIH and are placed in one of two subcategories:

Fellows -- junior scientists with less than five years of relevant postdoctoral research experience, who come to NIH for research training. They receive a stipend and are not considered employees of the NIH.

Scientists -- scientists with more that three years of relevant postdoctoral research experience, who come to NIH to conduct collaborative research. They receive a salary, and are considered employees.

The **International Research Fellowship (IRF) Program** provides opportunities for postdoctoral biomedical and behavioral scientists who are in the formative stages of their careers to extend their research experience in a laboratory in the United States. These fellowships serve to forge relationships between scientists in the United States and qualified scientists in other countries in order to solve health-related problems of mutual interest. The fellowship duration is one or two years with the majority of Fellows receiving a two-year fellowship.

Due to a steady expansion in recent years of a number of other Fogarty International Center programs that provide postdoctoral research experiences in the United States for developing country scientists, as well as opportunities for research collaboration under the FIRCA program, the FIC has decided to phase out the IRF program.

National Institute on Neurological Disorders and Stroke (NINDS)

The **International Neurological Science Fellowship Program** provides opportunities for junior or mid-career health professionals and scientists in the neurological sciences to enhance their basic or clinical science research skills in a research setting in the United States. Preference is given to applicants from developing countries who are currently working, or planning careers, in health organizations or health professional schools. Applicants must demonstrate that upon completion of the fellowship they will have the opportunity to use their newly acquired skills to teach or direct others, or to pursue research, upon return to their home country. The objective of this fellowship program is to prepare candidates for leadership positions in research, academic, and public health institutions. Three 12-month fellowships are available each year. They are awarded only to applicants of the highest quality.

During FY 1999, the NINDS supported two International Neurological Science Fellowships for individuals from Kenya and Turkey.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

451 Seventh Street, SW, Room 8118 • Washington, DC 20410
 Office of International Affairs: 202-708-0770 • www.hud.gov

The **Department of Housing and Urban Development (HUD)** is the principal federal agency responsible for programs concerned with the nation's housing needs, fair housing opportunities, and improvement and development of the nation's communities.

* * * * *

Office of International Affairs

In FY 1999, the Department of Housing and Urban Development (HUD) extended the reach of its international visitor programs, primarily through new or expanded bilateral work with governments in China, Mexico, and South Africa. Through collaboration with other nations and partnering with various stakeholder groups, HUD's Office of International Affairs undertook a variety of cooperative activities of mutual interest and benefit. By exchanging policy and management experiences and data on topics related to housing finance and construction, community economic development, and urban planning and administration, HUD furthered the urban policy research agendas of the U.S. and other nations. For example, there is great international interest in America's extensive experience fostering public-private partnerships, particularly those that include both nongovernmental organizations and private businesses, to improve the housing and living conditions for low-income families. Beyond its formal exchange programs, the Office arranged appointments for a large number of foreign government officials and technical experts interested in America's urban development policies. The international visitors were funded by either their home governments, international organizations, or by the State Department/U.S. Agency for International Development without HUD financial support.

DEPARTMENT OF THE INTERIOR

1849 C Street, NW • Washington, DC 20240
Office of International Affairs: 202-208-3048 • www.doi.gov

The mission of the **Department of the Interior (DOI)** is to protect and provide access to America's natural and cultural heritage and honor the nation's federal trust responsibilities to Native American tribes. The Department manages the nation's public lands and minerals, national parks, national wildlife refuges, and western water resources and upholds federal trust responsibilities to Native American tribes. It is responsible for migratory wildlife conservation; historic preservation; endangered species; surface-mined lands protection and restoration; mapping; and geological, hydrological, and biological science.

The Department has conducted international activities for almost 100 years for the following four purposes:

- To meet the Department's domestic responsibilities to protect migratory wildlife, reduce off-shore oil spills, and obtain foreign science and technology beneficial to domestic programs (e.g., cross-border firefighting)
- To meet the Department's Congressionally mandated international activities (e.g., elephant, rhino, and tiger protection, migratory bird preservation)
- To meet U.S. treaty obligations, such as the:
 - Convention on International Trade in Endangered Species of Wild Fauna and Flora
 - Convention Concerning Protection of the World Cultural and Natural Heritage
 - Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere
 - 1909 U.S.-Canada Boundary Waters Treaty
 - 1944 Mexican Water Treaty
 - Convention on Wetlands of International Importance
 - U.S.-Canada Migratory Bird Convention
- To support U.S. foreign policy objectives at the request of the White House, the State Department, or the U.S. Trade Representative; provide technical and scientific advisers in wildlife, water, and park management; assess minerals, hazards, and natural resources (e.g.,

water issues in the Middle East Peace Talks, the U.S.-South Africa and U.S.-Russia Binational Commissions, which are chaired by the Vice President).

* * * * *

U.S. Geological Survey (USGS)

The U.S. Geological Survey (USGS), through its **International Visitor Exchange Program**, provides research, study, and training opportunities for selected international academia and professionals. Participation in projects includes, but is not limited to, the following disciplines: biology, cartography, chemistry, engineering, geochemistry, geology, geophysics, hydrology, remote sensing, seismology, volcanology, and other related technical, managerial, and administrative support activities. In FY 1999, the USGS hosted a total of 106 foreign visitors in its International Exchange Program. USGS made arrangements for program participants to be placed not only at USGS installations, but at other federal and nonfederal locations in the United States. The majority of these international visitors participated in important scientific research coordinated by USGS scientists. A summary of these activities follows:

- Visitors from China, Japan, New Zealand, and Taiwan performed collaborative studies of groundwater quality; geophysical studies of crust and upper mantle structures; geochemistry of coal related to health problems associated with domestic use; characterization of coal samples; structural geology studies; lifeline earthquake engineering; debris flow hazard studies; and research studies of the following sciences: biology, ecology, mathematics, paleoseismology, and seismology.
- Visitors from Austria, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain, Switzerland, Turkey, and the United Kingdom performed collaborative studies in geology and sedimentology; land-use historical studies of the Petrified National Forest; groundwater studies in developing a new approach to the fate and transportation of pesticides of groundwater; biological studies in diseases of Eider ducks and grouse, endangered birds, prairie dogs, and the black-footed ferret; fish and wildlife studies in applying techniques relating to fish cultural activities, including disease control, breeding, sorting, sampling, and grading of fish; Geographical Information System (GIS) applications to landslide hazards in the western United States; mineral research related to the interaction of trace metals to natural organic materials in environmental systems; geologic mapping studies of the Great Smoky National Park; coastal and marine research on installation and support of bathymetric survey located offshore of the South Carolina coast; and additional studies in the following areas: geology, geophysics, gravimetry, minerals, photogrammetry, seismology, and water quality.
- A visitor from Morocco performed mineral research study on the genesis of carbon tested lead zinc areas of Morocco Touissit, and participated in volcanology and seismology studies.
- Visitors from Russia participated in research related to geoscience, GIS, geophysics, and seismology; performed laboratory studies mineral deposits; and participated in the development of a database on nonindigenous plants for biological research.

- Visitors from Brazil, Canada, and Ecuador participated in biological research studies on invasive non-native plants in the Hawaiian Islands; conducted studies of exposure of birds to pesticides in orchards; performed bird netting, bird banding, and the surveying of birds; carried out amphibian monitoring and research in Shenandoah National Park; and completed collaborative mineral deposit studies of gold deposits.

The National Park Service (NPS)

The **National Park Service Exchange Visitor Program** has continued to grow as more U.S. national parks have begun to participate. Training programs were developed and conducted for 154 exchange visitors in 61 national parks. Exchange visitors were given training in wildlife management, Geographical Information Systems, cultural resource management, interpretation, and many other park related fields. They contributed over 112,648 hours to the Park Service mission, an estimated savings to the federal government of \$1.6 million. This fiscal year saw a 31 percent increase over last year's program in the number of visitors hosted by the Park Service. Although the program continues to attract and place a large majority of Europeans, this year the NPS was able to place participants from other countries such as Afghanistan, Croatia, Jordan, Nicaragua, South Africa, and Slovakia.

During FY 2000, the Service plans to launch an Internet site explaining its participation in the exchange visitor program, and has already begun to meet with nonparticipating parks to explain the benefits of their involvement. Each park is responsible for integrating the exchange visitor into cross-cultural activities. All parks hold some type of introductory training to acquaint visitors with American culture, and will usually make field trips available to various historical or natural sites so that the visitors can have a wide range of experiences. Parks will also pair mentors with exchange visitors to assist in their understanding of American culture. Reciprocally, 352 National Park Service staff traveled abroad to attend conferences and/or provide training.

DEPARTMENT OF JUSTICE

950 Pennsylvania Avenue, NW • Washington, DC 20530
 Office of Public Affairs: 202-616-2777 • www.usdoj.gov

The **Department of Justice (DOJ)**, under the Attorney General, enforces federal laws and contributes to the fair and efficient administration of the federal justice system. The Department is responsible for detecting, apprehending, prosecuting, and incarcerating criminal offenders; upholding the civil rights of all Americans; enforcing laws to protect the environment; ensuring healthy business competition in America’s free enterprise system; safeguarding the consumer from fraudulent activity; enforcing the immigration laws of the United States; and representing the American people in all legal matters involving the U.S. Government.

The Department’s international training activities assist the law enforcement and judicial communities of foreign nations in their efforts to develop self-sustaining institutions that will ensure open, reliable, and impartial justice for an entire population. Various entities within the Department of Justice apply their specialized expertise to offer international training, which supports specific U.S. foreign policy goals.

* * * * *

Antitrust Division

The Antitrust Division promotes and maintains competition in the American economy by enforcing federal civil and criminal antitrust laws. The antitrust laws affect virtually all industries and apply to every phase of business, including manufacturing, transportation, distribution, and marketing. They prohibit a variety of practices that restrain trade, such as price-fixing conspiracies, corporate mergers likely to reduce the competitive vigor of particular markets, and predatory acts designed to achieve or maintain monopoly power.

With funding from the U.S. Agency for International Development (USAID), and in conjunction with the Federal Trade Commission (FTC), the Antitrust Division conducts

international training activities to transfer U.S. knowledge and experience in competition policy and law enforcement, to facilitate the development of sound competition policy and antitrust law enforcement, and to promote the application of free market principles in transition economies. Technical assistance is provided by placing two-person attorney/economist teams from the Antitrust Division and FTC in foreign competition offices for extended periods, and short-term missions on specific competition issues, economic sectors, or current cases. The Antitrust Division also assists competition offices in developing and refining competition laws and related policies, and trains competition office staff on investigative techniques, legal and economic concepts, and analytical methods.

In FY 1999, the Antitrust Division, with the FTC, provided technical assistance to several competition agencies, including South Africa, Brazil, Argentina, Romania, and Slovakia, and participated in an OECD sponsored seminar which provided assistance to Belarus, Croatia, Ukraine, Russia, Bulgaria, Uzbekistan, Slovenia, Romania, Kyrgyzstan, and Georgia. USAID provided funding for most programs, with some costs funded by the Antitrust Division. The Antitrust Division and the FTC placed resident advisers in South Africa and Argentina to provide advice and assistance in competition enforcement.

* * * * *

Criminal Division

The **Office of Overseas Prosecutorial Development, Assistance, and Training (OPDAT)** works in coordination with and is funded by the Department of State's Bureau of International Narcotics and Law Enforcement Affairs (DOS/INL) and the U.S. Agency for International Development. OPDAT has been a key participant in U.S. efforts to strengthen democratic governments by helping to build justice systems that promote the rule of law and serve the public interest. OPDAT provides global assistance for prosecutors and judicial officials by offering technical assistance, legal training, resources, and academic support. In addition to training personnel, OPDAT stations experienced prosecutors, called Resident Legal Advisors, in countries where OPDAT provides long-term rule of law programs.

OPDAT also serves as the Department's liaison with various private and public agencies that sponsor visits by foreign officials who want to closely examine the U.S. federal legal system. Visitors with specific interests can meet with practitioners from specialized components of the Justice Department to discuss such issues as money laundering, organized crime, asset forfeiture, narcotics and other drugs, ethics and public corruption, juvenile justice and delinquency prevention, civil rights, and international judicial assistance and extradition. The opportunity for comparative law dialogue, which the visitors' program presents, aids the Department in its efforts to promote international legal assistance and cooperation.

DEPARTMENT OF JUSTICE

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$18,731,449**	244*	8,137*
National Interests Addressed:	Democracy and Human Rights; Law Enforcement	

* * * * *

The **International Criminal Investigative Training Assistance Program (ICITAP)** supports U.S. foreign policy by providing developmental assistance to foreign criminal justice systems. ICITAP projects are developed under the policy direction of the Departments of Justice and State, with funding from the latter, to advance mid- and long-term U.S. policy objectives in promoting democracy and respect for human rights and combating international crime. All ICITAP efforts are based on internationally recognized human rights and democratic principles. ICITAP conducts five principle types of assistance projects: (1) law enforcement training and development programs within international peacekeeping operations, (2) counter-crime programs in emerging democracies, (3) developmental assistance to established democracies in maintaining/or improving internal security, (4) comprehensive academy development programs, (5) directed training courses at the request of the State Department.

In the context of international peacekeeping missions following internal civil conflict or outside intervention, it is often necessary to effect rapid and radical change to the police as an institution. This involves changing the institutional orientation from a police agency that functions in service to the State to one that adheres to the democratic principles as a service to protect the people. ICITAP projects in Albania, Bosnia, El Salvador, Guatemala, Haiti, Kosovo, and Panama feature these types of projects.

In other programs, ICITAP provides technical assistance and training to one or more discrete aspects of a country's existing law enforcement organization, such as enhancement of forensic capabilities, expansion of criminal investigation skills and techniques, and development of internal discipline mechanics. ICITAP's programs in Bolivia, Colombia, Honduras, South Africa, and the NIS fall into this category. The vast majority of the participants represent federal, state, or local law enforcement. In FY 1999, ICITAP trained approximately 7,800 foreign law enforcement officials in-country.

Drug Enforcement Administration (DEA)

The mission of the DEA is to enforce the controlled substances laws and regulations of the United States and bring to the criminal and civil justice system of the United States, or any other competent jurisdiction, those organizations and principal members of organizations involved in the

growing, manufacture, or distribution of controlled substances appearing in, or destined for, illicit traffic in the United States; and to recommend and support nonenforcement programs aimed at reducing the availability of illicit controlled substances on the domestic and international markets. DEA's International Training Section (TRI) operates in coordination with the Department of State's Bureau of International Narcotics and Law Enforcement Affairs to plan, develop, and conduct counternarcotics training to police officials worldwide. The DEA Country Office/U.S. Mission and the host country collaborate with each other in order to customize the training programs and maximize exposure to those areas that will be most beneficial to the DEA/U.S. Mission objectives.

TRI's objectives include upgrading drug law enforcement capabilities of foreign law enforcement agencies, encouraging and assisting key countries in the development of self-sufficient drug investigative training programs, and providing foreign officials with the necessary motivation, skills, and knowledge required to initiate and continue high-level drug investigations. Objectives also include increasing and fostering regional cooperation and communication between countries and between foreign police and DEA personnel.

During FY 1999, TRI completed 34 international training seminars, training 1,298 foreign law enforcement officials from 59 countries. The majority of these seminars, held in-country, took place in basic and advanced drug enforcement schools. Additionally, TRI conducted numerous specialized training courses, such as asset forfeiture/financial investigations, airport operations, clandestine lab investigations, and intelligence analysis. TRI also conducted five Sensitive Investigative Unit (SIU) training sessions. The purpose of SIU training is to identify and train DEA foreign counterparts from Mexico, Pakistan, Thailand, and countries in South America to work in sensitive bilateral investigations. TRI conducts the five-week SIU training programs at the Justice Training Center in Quantico, Virginia. TRI also conducted eight training sessions at its two International Law Enforcement Academies (ILEAs) located in Budapest, Hungary, and Bangkok, Thailand.

DEA holds the directorship at ILEA Bangkok, which opened on March 8, 1999. DEA conducted the first training course, a two-week specialized program on International Chemical Control and Methamphetamine. DEA serves as the lead agency in providing the specialized counternarcotics courses. DEA also provides two weeks of instruction during the six-week Supervisory Criminal Investigator Course (SCIC), which is ILEA Bangkok's core program of instruction, and one week of instruction during the eight-week core program at ILEA Budapest. DEA also participated in several training seminars sponsored by other agencies.

Federal Bureau of Investigation (FBI)

The Federal Bureau of Investigation serves as the principal investigative arm of the United States Department of Justice. The FBI detects and investigates crimes against the United States and

performs other duties connected with national security. In response to the unprecedented growth in transnational crime, the FBI now maintains an active overseas presence that fosters the establishment of effective working relationships with foreign law enforcement agencies. Additionally, the FBI trains law enforcement officers in both basic and advanced investigative techniques and principles in an effort to promote country-to-country cooperation. Besides its participation in international working groups, the FBI is involved in the exchange of mid-level supervisory personnel from police agencies, and with INTERPOL, which facilitates the rapid exchange of criminal investigative information on drug smuggling and other international crimes.

The International Training and Assistance Units (ITAU) I and II provide operational investigative support and infrastructure building for the U.S. Government through the training of foreign law enforcement officials in all world regions. The FBI's Legal Attaches, the American Embassies, and foreign law enforcement representatives identify the training needs of foreign law enforcement agencies. The FBI International Training and Assistance Units formulate and coordinate country-specific training and assistance.

International training opportunities include in-country training, practical case training, U.S.-based training (at the FBI Academy in Quantico, Virginia), and the International Law Enforcement Academies training in Budapest and Bangkok.

FBI special agents, other federal law enforcement officers, and state/local police officers with specific course expertise, travel to ILEA to instruct foreign law enforcement officials in short courses, one- to two-week training seminars, and the eight-week course. Training usually focuses on the areas of financial crime, organized crime, and violent crime. FY 1999 FBI ITAU I and ITAU II highlights: Number of courses: ITAU I - 56; ITAU II - 63 = 119; Number of students: ITAU I - 2,763; ITAU II - 2,390 = 5,153; Number of countries: ITAU I - 91; ITAU II - 67 = 158.

Immigration and Naturalization Service (INS)

The INS conducts training for foreign law enforcement professionals on a variety of topics, including intelligence, alien smuggling prevention, fraudulent document detection, and border patrol operations. In-country training takes place in different world regions and at established academies such as ILEA in Budapest. The training is funded by a transfer from the Department of State, Bureau of International Narcotics and Law Enforcement Affairs. No training was conducted during FY 1999.

The **National Institute of Justice's International Activities** fostered cooperation and collaboration between researchers and practitioners in the United States and its companion criminal justice agencies in other countries in the research, development, evaluation, and operational use of law enforcement technologies and to allow participants to share ideas, develop skills, and foster mutual understanding in areas of mutual interest. Program activities included Crime Mapping Research, International Visiting Fellowships, partnerships with the Home Office in the United Kingdom, and standardizing an international drug surveillance system through the International Arrestee Drug Abuse Monitoring (I-ADAM) program.

DEPARTMENT OF LABOR

200 Constitution Avenue, NW • Washington, DC 20210
 Office of Public Affairs: 202-693-4650 • www.dol.gov

The purpose of the **Department of Labor (DOL)** is to foster, promote, and develop the welfare of the wage earners of the United States, to improve their working conditions, and to advance their opportunities for profitable employment. In carrying out this mission, the Department administers a variety of federal labor laws guaranteeing workers' rights to safe and healthful working conditions, a minimum hourly wage and overtime pay, freedom from employment discrimination, unemployment insurance, and workers' compensation. The Department also protects workers' pension rights; provides for job training programs; helps workers find jobs; works to strengthen free collective bargaining; and keeps track of changes in employment, prices, and other national economic measurements. As the Department seeks to assist all Americans who need and want to work, special efforts are made to meet the unique job market problems of older workers, youths, minority group members, women, the handicapped, and other groups.

* * * * *

Bureau of International Labor Affairs (ILAB)

National Administrative Office (NAO)

The NAO was established as mandated by the North American Agreement on Labor Cooperation (NAALC), a supplement to the North American Free Trade Agreement (NAFTA). NAALC promotes cooperative activities between the signatories in many labor areas including, but not limited to, workers' rights, occupational safety and health, human resource development, labor statistics, and labor-management relations. In addition to its many other functions under the NAALC, the NAO coordinates trilateral labor cooperative activities with Canada and Mexico. These activities can consist of seminars, training sessions, working groups and conferences, joint

DEPARTMENT OF LABOR

research projects, technical assistance projects, and any other such activities agreed upon by the Agreement signatories. In FY 1999, the NAO's Cooperative Activities Program featured the following projects:

- Labor-Management Relations in North American Multinationals -- October 29, 1998, in Washington, D.C. This conference examined the operations and experiences of multinational companies in the area of employer-union relations in North America. The conference also examined the extent to which national legal structures and customs, as well as a country's political and economic environment, affect labor relations in the United States, Canada, and Mexico. Other issues discussed were the manner in which a multinational's labor relations system reflects the diversity among countries while maintaining the international uniformity and the extent to which differences in production are affected by negotiation of wages, employee benefits, and job security.
- Conference on Contracting Out -- December 7-8, 1998, in Toronto, Canada. The conference enabled an exchange of views and an examination of new forms of employment in the context of the industrial relations system in the United States, Canada, and Mexico.
- Protecting the Labor Rights of Working Women -- March 1-2, 1999, in Merida, Mexico. The conference was the product of ministerial consultations resulting from U.S. NAO Submission 9701. The conference explored protections for women from employment discrimination, including discrimination on the basis of pregnancy. The conference also sought to raise women's awareness of their labor rights by discussing programs and policies that support them by helping to ensure compliance with laws against gender discrimination.
- Safety and Health on the Job -- May 27-28, 1999, in Monterrey, Mexico. This conference was the highlight of North American Occupational Safety and Health Week. Issues discussed included noise control and the safe use of biological and chemical agents in the workplace.
- Conference on Safety and Health in the Bottling Industry -- June 21-23, 1999, in Mexico City, Mexico. The conference identified common hazards associated with the bottling industry and measures being taken to prevent or lessen these hazards. Specific attention was given to inspection mechanisms, safety and health prevention programs, noise control, and the safe use of chemical agents.
- Women in the Workplace: Know Your Rights! -- August 17-18, 1999, in McAllen, Texas, and Reynosa, Mexico. The outreach sessions disseminated information to workers, employers, government representatives, and nongovernmental organizations on the rights and protections afforded women workers in the United States and Mexico. These training sessions were in accordance with the Ministerial Consultations Agreement (US 9701).
- The Future Culture of Mining Safety and Health in North America -- September 21-24, 1999, in Manitoba, Canada. The conference was a sharing of best practices and lessons learned in the prevention of exposure to hazards in the mining industry. The conference also explored evolving technologies in enhancing protection in the mining industry.
- Occupational Safety and Health Laws in the United States, Mexico, and Canada: An Overview -- published report. This document updates an existing 1992 publication on OSH standards in Mexico and the United States.

Bureau of Labor Statistics (BLS)

International Labor Statistics Center (ILSC)

The ILSC of the Bureau of Labor Statistics (BLS) conducts several seminars of 4-6 weeks' duration each year. The seminars are designed to strengthen the participants' abilities to collect and analyze economic and labor statistics. Participants include statisticians, economists, analysts, and other data users from countries all over the world. The Center will also arrange programs to meet the specific needs of individuals or groups. A course on Training of Trainers (TOT) is offered after several scheduled seminars as well. The Bureau charges tuition for participation in the seminars and special programs. Participants are sponsored by their own governments; the United Nations and its affiliated agencies; international organizations such as the Asia Foundation; or, in some cases, by the U.S. Agency for International Development's country missions.

In FY 1999, the International Labor Statistics Center cooperated with the Bureau of International Labor Affairs in offering statistical training as part of larger technical assistance efforts of the Department of Labor in Central and Eastern Europe, Egypt, and South Africa. Seminars offered by the ILSC include: Labor Market Information, Measuring Compensation, Managing Information Technology, Constructing Price Indexes, Measuring Productivity, Measuring Employment and Unemployment, Projecting Tomorrow's Workforce Needs, Economic Indicators, and Analyzing Labor Statistics. The BLS may conduct seminars overseas on request or provide experts to serve as consultants. In addition, the ILSC arranges appointments for international visitors to the Bureau. In FY 1999, the Center arranged appointments for approximately 300 short-term visitors. These visitors were not funded with Department of Labor appropriated funds. (Please note: these visitors are not reflected in statistical data compiled in this inventory.)

*Funding for the ILSC is generated from the tuition paid by outside organizations for participants to attend the seminars offered. No monies appropriated to the BLS are used to fund participation in the ILSC seminars.

DEPARTMENT OF STATE

2201 C Street, NW • Washington, DC 20520
 Public Information Line: 202-647-6575 • www.state.gov

The **Department of State (DOS)** advises the President in the formulation and execution of foreign policy. As Chief Executive, the President has overall responsibility for the foreign policy of the United States. The Department of State's primary objective in the conduct of foreign relations is to promote the long-range security and well-being of the United States. The Department determines and analyzes the facts relating to American overseas interests, makes recommendations on policy and future action, and takes the necessary steps to carry out established policy. In so doing, the Department engages in continuous consultations with the American public, the Congress, other U.S. departments and agencies, and foreign governments; negotiates treaties and agreements with foreign nations; speaks for the United States in the United Nations and in more than 50 major international organizations in which the United States participates; and represents the United States at more than 800 international conferences annually.

* * * * *

Bureau of Intelligence and Research (INR)

The **Program for the Study of Eastern Europe and the Independent States of the Former Soviet Union (Title VIII)** was created by legislation in 1983 to redress the diminishing supply of U.S. experts on this region by providing stable, long-term financing on a national level. The program supports advanced research; graduate and language training (domestic and on-site); public dissemination of research data, methods, and findings; and contact and collaboration among government and private specialists.

The Title VIII program operates on the basis of a competitive two-stage award process with the assistance of a legislatively mandated federal advisory committee. By strengthening and sustaining in the United States a cadre of experts on Eastern Europe and the independent states of

the former Soviet Union, the program contributes to the overall objectives of the Freedom Support and Support for Eastern European Democracy programs. Funding is provided by the U.S. Agency for International Development.

Foreign Service Institute (FSI)

The **Foreign Diplomatic Training Program** at FSI continues to provide training for foreign diplomats from Micronesia under an agreement with the Department of the Interior, which has the mandate for this program. Over the past 10 years, the program has provided training to more than 100 Micronesian diplomats. The average duration of the program has been at least two weeks. The goal is to provide the training necessary to establish and improve diplomatic services for the Freely Associated States.

The Compact of Free Associated States itself meets the national security needs of the United States, and at the same time provides support for Democracy and Human Rights. It also is a humanitarian response to the conditions in the Freely Associated States. This diplomatic training program is an integral part of the Compact treaty relationship.

DEPARTMENT OF TRANSPORTATION

400 7th Street, SW • Washington, DC 20590
Office of Public Affairs: 202-366-5580 • www.dot.gov

The **Department of Transportation (DOT)** is at work for America building a safe transportation system for the 21st century -- one that is international in reach, intermodal in form, intelligent in character, and inclusive in service. With a proposed budget of \$54.9 billion for Fiscal Year 2001, the DOT vision of leading the way to transportation excellence is carried out by its nearly 100,000 employees nationwide. Established by an act of Congress on October 15, 1966, the Department's first official day of operation was April 1, 1967. The mission of the DOT is to serve the United States by ensuring a fast, safe, efficient, accessible, and convenient transportation system that meets vital national interests and enhances the quality of life of the American people, today and into the future.

The DOT consists of the Office of the Secretary and 12 individual operating administrations, which include:

- Bureau of Transportation Statistics
- United States Coast Guard
- Federal Aviation Administration
- Federal Highway Administration
- Federal Railroad Administration
- Federal Transit Administration
- Maritime Administration
- National Highway Traffic Safety Administration
- Research and Special Programs Administration
- Saint Lawrence Seaway Development Corporation
- Surface Transportation Board
- Transportation Administrative Services Center

A number of the Department's modal administrations are engaged in international cooperation, training, and exchange activities.

* * * * *

Office of International Transportation and Trade

The **TRANSPORT Project**, along with other cooperative projects, is administered under the auspices of the United States-Saudi Arabian Joint Economic Commission (JEC). The Department of the Treasury is the lead agency for the JEC. The TRANSPORT Project is a cooperative effort between the Department of Transportation and the Saudi Arabian Ministry of Communications (MOC). It is designed to provide technical assistance and training in support of Saudi Arabia's transportation program and to foster exchange between the two countries. The Project has been successful in attracting U.S. products and technology to Saudi Arabia. The Project is funded by the Government of Saudi Arabia, with funds deposited in the United States Treasury.

Eighteen engineers from Saudi Arabia received on-the-job training (OJT) in the United States in highway and maritime transportation. Each OJT participant received four weeks of personal mentoring and instruction in various engineering disciplines in various state, local, and federal agencies in the United States. This one-on-one interface generated a good deal of information exchange that resulted in some of the U.S. host agencies benefiting technologically from their Saudi Arabian guests. Such exchanges have created the environment for applying and selling U.S. products and technology in Saudi Arabia.

Technical training was also provided in 1999 to approximately 262 Saudi Arabian Ministry of Communications engineers on-site in Saudi Arabia. (These individuals are included in the data submitted for this inventory.) Three U.S. professionals stationed in Saudi Arabia serve as training coordinators and advisers to the MOC.

In 1999, the culmination of a decade of TRANSPORT Project technical assistance resulted in the implementation of new MOC General Specifications for road and bridge construction. These general and companion supplemental maintenance specifications are based on the latest U.S. design and construction standards and road building technology.

Federal Aviation Administration (FAA)

The **Office of International Aviation International Training Program** provides training to foreign aviation officials under government-to-government agreements, generally between the FAA and the Civil Aviation Authority in the recipient country. The recipient country

DEPARTMENT OF TRANSPORTATION

usually reimburses the FAA for the costs associated with the training. Funding for some training programs may be arranged through international organizations, such as the International Civil Aviation Organization, or other agencies. The FAA provides training to foreign aviation officials through its International Training Services Center (ITSC) at the FAA Academy in Oklahoma City and also arranges training at universities, colleges, technical schools, and industry training facilities throughout the United States. Familiarization and on-the-job training can often be arranged in conjunction with formal training programs. The FAA offers various aviation-related courses, including air traffic control, airworthiness and operations, maintenance and installation of equipment, aviation security, and instructor training. The ITSC can also design training courses to meet the aviation needs of a particular country or region.

* * * * *

The **International Visitors Program** is designed to facilitate cooperation and exchange in the field of aviation. The program's stated goals are to exchange information and experience, encourage and sustain international cooperation, promote acceptance of FAA policies and procedures as well as U.S. standards and equipment, and avoid duplication of research and study efforts. In FY 1999, 792 visitors participated in the program. The majority of international visitors hosted by the FAA are government officials. Many are air traffic controllers interested in visiting FAA air traffic control facilities throughout the country. However, a significant number of visitors are senior-level policy and technical officials who meet with their counterparts to discuss issues pertinent to aviation safety. All costs associated with the FAA International Visitors Program are covered by foreign aviation authorities, privatized government entities, or sponsoring corporations.

Federal Highway Administration (FHWA)

The Office of International Programs administers the **International Technology Scanning Program (ITSP)**, which serves as a means for identifying, assessing, and importing foreign highway technologies and practices that can be cost-effectively adapted to U.S. federal, state, and local highway programs. Ultimately, the goal of the program is to provide better, safer, and more environmentally sound roads for the American public by implementing the best practices developed abroad. The ITSP includes two components: scanning team reviews and technical information management. Scanning team reviews involve teams of specialists in a particular discipline that are dispatched to consult with foreign counterparts in selected advanced developed countries. Participants usually represent the FHWA, state highway departments, local governments, and, where appropriate, transportation trade and research groups, the private sector, and academia. Scanning team reviews are conducted in cooperation with the American Association of State Highway Transportation Officials (AASHTO), the Transportation Research Board (TRB), and the National Cooperative Highway Research Program (NCHRP) Panel 20-36. Since the program was launched in 1990, approximately 26 reviews have been completed.

Exchange Program. The Office of International Programs assists its foreign counterparts with setting up long-term exchange programs for their employees who would like to spend 6 to 12 months with the FHWA. Generally speaking, the FHWA does not spend USG funding on these long-term exchange programs. All support comes from foreign sources.

Visitors Program. The Office of International Programs also provides short-term, ad hoc international visitor programs for its foreign counterparts who would like to meet with officials in other elements within FHWA and the Department of Transportation. The FHWA also refers such requests to appropriate associations and state and local transportation organizations.

Federal Railroad Administration (FRA)

The Federal Railroad Administration's **International Program** is an unfunded program designed to facilitate and assist cooperative efforts between foreign government-owned and -operated rail systems and the U.S. rail industry, including manufacturers, suppliers, and service providers. In Washington, D.C., FRA representatives provide visiting foreign government and/or foreign or U.S. Government-sponsored and supported delegations with technical briefings, economic briefings, and discussions about the U.S. rail industry. To support specific DOT and/or Administration initiatives, FRA representatives occasionally travel overseas to provide and discuss this type of information. In the year 2000, FRA will support selected, planned rail restructuring projects (Kenya, Malawi, Mozambique, Nigeria, and Uganda) of the Secretary's overall Africa Initiative. Also, with expenses paid for in their entirety by foreign governments, FRA occasionally provides on-the-job rail safety inspection training, both in headquarters and in the field.

United States Coast Guard (USCG)

U.S. Coast Guard Academy Programs. The U.S. Coast Guard Academy (USCGA) offers a four-year program with an intensive undergraduate curriculum leading to a Bachelor of Science degree. This, coupled with military and leadership training, enables graduates to assume responsible roles as officers in comparable maritime services in their home countries. The academic program consists of eight majors: civil engineering, electrical engineering, marine engineering and naval architecture, mechanical engineering, operations research, marine and environmental sciences, government, and management. The professional program consists of training in navigation and law enforcement, supplemented by summer programs that include general shipboard training, seagoing experience aboard the sail training ship Eagle, military training, and other operational experience. Rigorous physical exercise is an integral part of the program. International nominees must be sponsored by their government through the U.S. diplomatic mission and may apply by meeting all age, academic, language, and interview requirements. Federal Statute 14 U.S.C. 195 requires countries of accepted nominees to agree in advance to reimburse the USCG for the cost of instruction. A limited number of full or partial waivers may be granted based upon the most recent World Bank list of high income countries; however, countries may opt to pay full tuition to this prestigious military academy. The USCGA is limited statutorily to a maximum of 36 enrolled international cadets. An annual solicitation with detailed information is sent to all posts in the August-September timeframe.

U.S. Coast Guard Training Programs. The U.S. Coast Guard provides training or technical assistance to officer, enlisted, and civilian personnel from foreign military and civilian agencies when Coast Guard operational and training requirements permit, when in compliance with applicable laws and authorities, and when funded by or through another U.S. Government agency that does have the authority. The majority of training is funded through the Security Assistance International Military Education and Training (IMET) Program and Foreign Military Sales (FMS); International Narcotics and Law Enforcement Affairs programs; or through other U.S. assistance programs or host country funds. Training is available through resident courses at Coast Guard Training Centers, On-the-Job Training (OJT) at operational units, ship transfer OJT, the Caribbean Support Tender (CST), and through deployable teams of Coast Guard personnel that conduct tailored training and maritime assessments in the host country via Mobile Education and Training Teams (MET/MTT). Training is available in all Coast Guard core missions and competencies of Maritime Law Enforcement, Search and Rescue, Marine Environmental Protection, Waterways Management, National Security, and the operation and maintenance of Coast Guard platforms. Courses in highest demand are in the areas of Maritime Law Enforcement, Search and Rescue, Crisis Command and Control for Managers, and professional leadership development through the International Maritime Officer Course. The data below include individuals trained in their home country.

The Coast Guard participates in **International Personnel Exchange Programs** with the United Kingdom, Canada, and Australia. Agreements with the United Kingdom and Canada provide for the reciprocal exchange of pilots with the Royal Air Force, the Royal Navy, and the Canadian Armed Forces. An agreement with Australia established a reciprocal exchange program with the Australian Navy. In addition to the experience Coast Guard officers gain, the Coast Guard derives benefit from the experience provided by officers from other countries who serve with Coast Guard units. These exchanges offer partner services and the Coast Guard a better understanding of how each operates. No special funds are allocated for these exchanges. Personnel are supported by their home organization's operational budgets.

International Visitors Program. The Coast Guard hosts over 600 international visitors each year, including approximately 250 visitors to Coast Guard Headquarters alone, through the International Visitors Program. These visits are conducted as part of an effort to build strong working relationships between the Coast Guard and counterpart organizations. These visits range from Service Chief meetings with the Coast Guard Commandant to working meetings with officials from maritime agencies. At these meetings, the Coast Guard addresses policy and operational issues, and explores opportunities for increased cooperation with other maritime services. The International Visitors Program is managed by the Coast Guard International Affairs staff, which hosts visitors to Coast Guard headquarters and coordinates visits to USCG field units across the country. In FY 1999, with the exception of two visits from the New Independent States, all visits to the Coast Guard were funded by the visiting agency. Only visitors to Coast Guard Headquarters are reflected in data submitted to the IAWG.

DEPARTMENT OF THE TREASURY

1500 Pennsylvania Avenue, NW • Washington, DC 20220
 Public Information: 202-622-2000 • www.treas.gov

The **Department of the Treasury (TREAS)** performs four basic functions: formulating and recommending economic, financial, tax, and fiscal policies; serving as financial agent for the U.S. Government; enforcing the law; and manufacturing coins and currency.

* * * * *

Federal Law Enforcement Training Center (FLETC)

FLETC is a partnership of federal law enforcement organizations. Its mission is to provide quality, cost-effective training for law enforcement professionals. FLETC uses law enforcement and training experts; provides quality facilities, support services, and technical assistance; conducts law enforcement research and development; and shares law enforcement technology as means to accomplish its mission.

The Advanced Drug and Financial Investigations Training Program (ADFIT) is a two-week specialized training program created for hands-on investigators and prosecutors who work cases involving drugs, money laundering, and related financial crimes. This is not a course for managers unless they participate in the actual investigations/prosecutions.

Instructors from the following federal agencies conduct appropriate blocks of training: Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, U.S. Customs Service, Financial Crimes Enforcement Network (FinCEN), and the Department of Justice's Office of Overseas Prosecutorial Development, Assistance, and Training (DOJ-OPDAT). This training is intended to be a challenging program, requiring class participation, and oral presentations. Instruction is in English with simultaneous translation into Spanish.

These programs met the Department of Treasury Strategic Plan Goal to combat financial crimes and money laundering. They met the objectives of strengthening the capability to fight drug crimes and money laundering, and strengthening the capability to fight drug trafficking, counterfeiting, and other criminal threats to U.S. financial systems. They also met the Treasury goal to maintain U.S. leadership on global economic issues by meeting the objective of promoting the implementation of sound economic policies in developing and emerging market economies.

The programs met the FLETC's goal of providing high quality training for law enforcement by meeting the objectives of expanding international training capabilities, improving and strengthening relationships, and providing continuing career-enhancing training programs for law enforcement officials. Major accomplishments/highlights in FY 1999: The program was presented to eight Central American countries in response to requests from agencies in those countries. The program received favorable evaluations from the participants, who stated that the overall program met their needs.

The **International Criminal Investigations and Security Training Program (ILCISTP)** is a one-week internationally exported program designed to provide fundamental information and training on methods of detecting, investigating, and prosecuting computer-related crimes to include Internet intrusion, child pornography, money laundering, and financial fraud crimes using the computer. The topics of instruction covered under the program included Telephony/Profiles of Hackers, Internet Investigations, Navigating the Internet, Internet/Computer-Related Crime Investigations, Traps and Traces, Trends in Telecommunications/Computer Crime Investigations, and Seizure of Computer Evidence and Electronic Sources of Information. Software used during the course included File Viewers (Quick View), EnCase, ThumbsPlus, and Forensic Suite.

The programs met the FLETC's goal of providing high quality training for law enforcement by meeting the objectives of expanding international training capabilities, improving and strengthening relationships, and providing continuing career-enhancing training programs for law enforcement officials. Major accomplishments/highlights in FY 1999: The program was presented to three cities in Russia in response to requests from agencies there. The programs received favorable evaluations from the participants, stating that the overall program met their needs.

* * * * *

The **International Banking and Money Laundering Training Program** was developed to address trends and current developments in these areas. A task force consisting of representatives from law enforcement agencies, intelligence agencies, the banking industry, and the Police Executive Research Forum (PERF) developed the program curriculum. FLETC's Financial Fraud Institute manages the training program, which is a working example of interagency cooperation. Staff members from the Federal Reserve Board Bank, Financial Crimes Enforcement Network, the Internal Revenue Service, the U.S. Customs Service, and the Department of Justice's Office of International Affairs and Office of U.S. Attorneys provide instructional support.

Participants receive training on recognizing money laundering and cash flow indicators in foreign banking. Among the courses taught are the Bank Secrecy Act, Money Laundering Statutes, RFPA, FinCEN, International Banking Framework, Tracing Money Through Financial Networks, Tax Havens, Case Studies, and Mechanics of International Money Movements.

The program is designed for criminal investigators and law enforcement intelligence analysts involved in financial investigations. These programs met the Department of the Treasury Strategic Plan Goal to combat financial crimes and money laundering. They met the objectives of strengthening the capability to fight money laundering, and strengthening the capability to fight counterfeiting and other criminal threats to U.S. financial systems. They also met the Treasury goal to maintain U.S. leadership on global economic issues by meeting the objective of promoting the implementation of sound economic policies in developing and emerging market economies.

The programs met FLETC's goal of providing high quality training for law enforcement by meeting the objectives of expanding international training capabilities, improving and strengthening relationships, and providing continuing career-enhancing training programs for law enforcement officials.

The program was presented to four cities in Russia in FY 1999 in response to requests from agencies there. The programs received favorable evaluations from the participants, who stated that the overall program met their needs.

The **International Small Craft Enforcement Training Program** provides law enforcement officers assigned to inland marine law enforcement specialized training in the areas of marine regulation and law enforcement.

The major emphasis of this comprehensive training program focuses on the operations and navigation of highly specialized enforcement watercraft, safe and proper operation of marine patrol vessels, with specific training in law enforcement operations. The subject areas included in the training program are Inland Navigation and Aids to Navigation, Emergency Boat Operations Boarding Procedures, Underwater Search and Recovery, Marine Survival Operations, Rules of the Road, Boating Under the Influence, and Waterborne Arrests.

DEPARTMENT OF THE TREASURY

Students receive written and practical exercises throughout the program. Students participate in hands-on laboratories during both on-water and classroom periods. All applicants must be graduates of basic law enforcement programs or academies, and be involved in marine law enforcement duties.

This program met the Department of the Treasury goal to reduce the trafficking, smuggling, and use of illicit drugs by meeting the objective of strengthening the capability to interdict illegal drugs. This program met FLETC's goal of providing high quality training for law enforcement by meeting the objectives of expanding international training capabilities, improving and strengthening relationships, and providing continuing career-enhancing training programs for law enforcement officials.

Major accomplishments/highlights in FY 1999: This program met the needs of the Abu Dhabi and Uganda participants and satisfied the State Department, which requested it.

The **International State Department Physical Security Training Program** is designed to provide participants with an in-depth knowledge of physical security systems and procedures. The training modules are presented systematically to form a common thread for conducting and developing surveys. The final practical exercise includes student development of a survey, a briefing on the results, and critique. Subjects included in this training program are Access Control, Closed Circuit Television Systems, Domestic Terrorism, Guard Force, Operations Security, Protective Lighting, Security Design, Security Legal Considerations, Security Survey Process, Survey -- Practical Exercise, Violence in the Workplace, Computer Security, Bombs and Explosives, Contingency Planning, Fire Safety, Intrusion Detection Systems, Perimeter Security, Risk Assessment, Security Information Resources, Security Locks and Locking Devices, Special Events Security, and Weapons/Explosives Detection.

For acceptance into the program, the applicant must be a full time law enforcement officer or investigator presently assigned to duties requiring knowledge of the subject matter to be presented.

This program met the Department of the Treasury goal to fight violent crime by meeting the objective of strengthening the capability to fight terrorist threats to the United States. This program met the FLETC's goal of providing high quality training for law enforcement by meeting the objectives of expanding international training capabilities, improving and strengthening relationships, and providing continuing career-enhancing training programs for law enforcement officials.

Major accomplishments/highlight in FY 1999: This program was presented to 72 students from Burundi, Uganda, and Tanzania at the request of the State Department and agencies within

these countries. From the favorable evaluations given by the participants, the programs as presented met their needs.

Bureau of Alcohol, Tobacco, and Firearms (ATF)

The **Explosives Detection K-9 Training Program**, funded by the Department of State, Antiterrorism Assistance Program, is designed to train canines in the detection of explosive compounds in minute amounts to aid foreign governments in their fight against terrorism. In addition, ATF instructs the police agencies of the foreign governments on how to train their own K-9 trainers and K-9 handlers in the ATF methodologies of canine explosives detection. The objective is for the foreign governments to be able to duplicate this methodology without having to rely on ATF or the United States Government.

The course involves 45 days of imprinting, the time the explosives odors are presented to the canines. This is followed by ten weeks of training the handlers with the canines in numerous scenarios involving trains, airplanes, automobiles, and water vessels. The training is conducted at the United States Customs Canine Training Facility in Front Royal, Virginia.

The **Firearms and Explosives Identification** (Basic) course provides international students with an overview of ATF's history and function, the U.S. firearms industry, and laws and regulations relating to the illegal purchase and trafficking of firearms and explosives, as well as how ATF identifies and documents commercial and military firearms and explosives for tracing purposes. The **Firearms and Explosives Identification** (Advanced) course is an in-depth continuation of the Basic course, designed to show the participants how the tracing techniques taught in the Phase I of the training are applied in "real time."

Visits to the ATF National Tracing Centers (North Carolina) and the firearms manufacturing plant offer a unique view as to how firearms are identified and controlled, from start to finish. The **Firearms Trafficking Seminar** provides a forum for the upper management levels of law enforcement agencies to be involved in the control and accountability of firearms in their respective jurisdiction. These are ongoing programs, five days' duration, designed for the law enforcement community.

The training conducted at the International Law Enforcement Academy, Budapest, Hungary, and the International Postblast training at FLETC as well as the Regulatory (alcohol and tobacco industries) training are included in this report. IPBI is a two-week course. Regulatory training in-country is a four-day course. Training in the United States lasts approximately four weeks. At ILEA Budapest, ATF teaches two days and possibly one-half day on Saturdays if the class votes to have an optional session.

Internal Revenue Service (IRS)

Office of Overseas Operations and Tax Administration Advisory Services

The Office of Overseas Operations and Tax Administration Advisory Services supports U.S. foreign policy through sharing IRS technical expertise with foreign governments. The long-term goal is to assist foreign governments in improving tax administration as a means of developing their economic infrastructure. The IRS provides a variety of U.S.-based training courses and other short- and long-term assistance for foreign officials which lay the groundwork for encouraging tax treaties and exchange of information, facilitating mutual compliance efforts, detecting noncompliance, and improving U.S. knowledge of global tax administration.

The **Overseas Assistance Program** includes needs assessments of tax administration organizational or functional areas, as well as specialized in-country advisers under short- or long-term contracts. All costs are borne by the foreign government or international agency funding source. In the training area, the IRS currently conducts ten stateside programs. The courses reflect a range of technical and management areas. For example, the IRS annually conducts the Middle Management INTAX Seminar, the Training Center Management and Administration Seminar, the Computer Audit Specialist Seminar, the Transfer Pricing Seminar, the Financial Products Seminar, the Gaming Industry Audit Techniques Seminar, and four financial fraud and seized computer training programs. The courses vary in length from one to five weeks. Many of these programs can also be conducted in-country if there are a sufficient number of trainees. The IRS does not budget for participant funding to support these programs. The participant's government or an international agency must cover course fees and travel expenses. Under the International Visitors Program (IVP), the IRS provides a central coordination point for visitation and/or information requests from foreign tax and government officials with the objective to provide quality tax administration briefings.

United States Customs Service

Office of International Affairs

The United States Customs Service, primarily through its Office of International Affairs, conducts a variety of international training and assistance activities. Training dealing with the control of international narcotics trafficking and other international crime and training directed against the proliferation of weapons of mass destruction are the two major subjects of this training and assistance.

Almost all the funding and statutory authorization for these activities comes from other agencies -- primarily the Department of State, the Department of Defense, and the U.S. Agency for International Development (USAID). The Department of State's Bureau for International Narcotics and Law Enforcement Affairs (INL), funds most antinarcotics and anticrime training through the authority of the Foreign Assistance Act, the Freedom Support Act, and the Support for Eastern European Democracy Act. Training and assistance dealing with the control of weapons of mass destruction is funded mainly by the Department of Defense -- Defense Special Weapons Agency and Defense Threat Reduction Agency. The Department of State's Nonproliferation Affairs and Politico-Military Bureaus also fund this second type of training. In the cases of both agencies, the Economy Act is the basic legislative authority.

Long-term assistance programs are often funded by the host countries where the programs are conducted -- as is the case with those in Saudi Arabia, Kuwait, and Trinidad and Tobago. USAID is the original source of funds for advisory programs in Georgia, Macedonia, Southeastern Europe, and Haiti. Projects in Guatemala and Moldova derive funding from the Department of State/INL. The Foreign Assistance Act and the Support for Eastern European Democracy Act are usually the authority for USAID and INL funding of these projects.

Customs international training normally is conducted by a team of U.S. Customs officers for border control officers in the host country for a period of one to two weeks. The advisory assistance programs usually place one or more advisers in a host nation for a year or more. Much less commonly, foreign participants are brought to the United States for training or executive observations.

This training and assistance is intended to support United States Government and the U.S. Customs goals of interdicting illegal narcotics; and encouraging the development of modern customs operations and the facilitation of trade. Short-term training programs are offered in support of all of these objectives. Advisory assistance usually addresses a number of these goals. The broadest objective of all of the Customs international training and assistance activities is to

strengthen the border control agencies of the nations we cooperate with so that they can better meet the goals stated above, which we hope are common to their governments' and ours.

During FY 1999, Customs successfully continued implementation of the Department of State/INL-sponsored antinarcotics and anticrime training; the Department of Defense and Department of State-funded counter-proliferation programs; assistance programs in Georgia, Southeastern Europe, Guatemala, and Trinidad and Tobago; and commercial processing training funded by Asia Pacific Economic Cooperation international funds. Major assistance programs in Saudi Arabia and Kuwait were effectively wound down for termination in FY 2000. During FY 1999, approximately 60 training programs and assessments were provided in nearly 40 countries. Funds for this program are expended for larger programs that include exchanges and training components.

Office of the Comptroller of the Currency (OCC)

The primary objective of the **Foreign Technical Assistance (FTA) Program** is to help foreign supervisory organizations develop, improve, and refine their banking supervisory systems, while fostering the OCC's reputation around the world. The FTA program at the OCC promotes a safe and sound international banking system by maintaining the OCC's relationship with the international financial community and providing technical advice and assistance to foreign bank supervisory authorities.

The International Banking and Finance (IB&F) area coordinates requests from foreign bank supervisory authorities to provide foreign technical assistance. This assistance includes visits and training sessions hosted by IB&F staff in Washington, D.C., participation on-site with OCC examiners, as well as participation by OCC staff on technical assistance missions in foreign countries. The majority of assistance is provided through short (less than one day) meetings with technical experts held at OCC's headquarters in Washington, D.C. More intensive training (of up to two weeks) may be provided through participation in internal OCC schools, as well as through direct participation with field examining staff.

In FY 1999, the OCC hosted 30 visits/meetings with representatives from 23 different countries. In addition, the OCC staffed 6 different FTA assignments and hosted 3 on-site examination training sessions. (Note: The OCC does not have any specific funding or appropriations for any of the activities captured in this report. Each request is evaluated on a case-by-case basis with full reimbursement required.)

Office of Thrift Supervision

Foreign Exchange Program. The Office of Thrift Supervision (OTS) meets with representatives of various governments and/or their banking systems to share ideas and experiences, develop skills, and build a greater understanding of the respective financial services industries. The interest and frequency of foreign delegation visits to the OTS have increased during the past few years. Problems in many of the foreign nations still persist in their financial services industries. They see OTS' experiences and lessons learned from the thrift industry crisis of the 1980s and early 1990s, as well as the rapid technological changes and the growth in nontraditional banking entities, as directly relevant to many issues they currently face.

Discussions basically relate to:

- Restructuring troubled bank systems.
- Bank liquidation.
- Problem bank restructuring.
- Overview of regulatory/legislative activities.
- Community Reinvestment Act requirements.
- Interest rate risk management.
- Supervision issues.
- Interrelationships/differences between banks and thrifts.
- General discussion of the U.S. financial sector structure.
- Examination process and procedures.
- General/administrative operating needs.

And the importance of:

- Realistic business/strategic long-term plans.
- Consistent comprehensive examinations.
- Annual audits utilizing chartered/certified accountants.
- Responsible management/internal control systems.
- Capital standards.
- Insurance fund adequacy and insolvency guidelines.
- Liquidation and mergers.
- The future of banking.

The OTS staff has assisted several countries in major areas regarding their respective financial services industries. Albania, as well as other nations, has, in fact, adopted many of our statutes, policies, and regulations. Several countries are either modeling their depository insurance programs and/or regulatory systems after those of the United States.

In FY 1999, OTS enhanced its Foreign Exchange Program to allow 72 bank examiners from Pakistan to shadow actual examinations and/or receive extensive banking examination training module equivalents.

United States Secret Service

The Secret Service continues to be extensively involved in training foreign officials in the areas of counterfeit U.S. currency and financial fraud schemes. With approximately 450 billion U.S. dollars in circulation worldwide and two-thirds of it outside of the United States, the U.S. Dollar continues to be the most popular currency to counterfeit.

This past year, the Secret Service briefed foreign officials on counterfeit U.S. currency and its impact worldwide. Specific financial fraud schemes involving credit cards, debit cards, electronic fund transfers, false financial institutions, “419” fraud, cellular phone fraud, money laundering, and other types of fraud schemes were also taught. Training programs have varied depending on the targeted foreign participants. Foreign government officials and financial institutions were briefed on applicable fraud schemes and assisted in the identification of systemic weaknesses in their financial system that lead to fraudulent financial activity.

In training foreign law enforcement officials, the Secret Service conducted comprehensive training programs that included additional subjects such as standard and new investigative techniques to confront these crimes. The goal of the Secret Service **Foreign Training Program** is not only to train and assist the foreign participants with their financial system, but also to establish a permanent conduit for information exchange and liaison. The objective of this training is to foster cooperation between countries in a joint effort to combat counterfeit U.S. currency and financial crimes worldwide. During FY 1999, the Secret Service conducted a variety of training activities:

- Using funds provided by the State Department’s Bureau of International Narcotics Law Enforcement Affairs, the Secret Service conducted training to foreign law enforcement and financial institutions in Ghana, Hungary, Nigeria, Romania, Thailand, and Ukraine.
- The Counterfeit Division, in conjunction with other U.S. Treasury agencies, conducted briefings on the International Currency Awareness Program in Hong Kong, Israel, and Japan.
- The Investigative Divisions, which include the Counterfeit Division, Financial Crimes Division, Forensic Services Division, and 15 Secret Service overseas offices, conducted investigative initiatives in the following countries: Australia, Bulgaria, Canada, Chile, China, Germany, Italy, Moldova, Palau, Peru, the Philippines, South Africa, and United Kingdom.

DEPARTMENT OF VETERANS AFFAIRS

810 Vermont Avenue, NW • Washington, DC 20420
Office of Human Resources Management: 202-273-4919 • www.va.gov

The **Department of Veterans Affairs (VA)** operates programs to benefit veterans and members of their families. Benefits include compensation payments for disabilities or death related to military service; pensions; education and rehabilitation; home loan guaranty; burial; and a medical care program incorporating nursing homes, clinics, and medical centers.

* * * * *

The Department of Veterans Affairs employs more than 200,000 personnel in a network of 172 medical centers, 57 regional offices, and 115 national cemeteries across the United States.

Each year a number of VA employees travel to other countries to participate in conferences, symposia, and various types of training activities. A significant majority of these individuals are health care professionals (physicians, dentists, nurses, medical researchers, etc.) attending the conferences or symposia to present papers, meet with peers, and advance their professional knowledge.

VA does not itself administer the conferences, symposia, and other activities that VA employees attend in other countries. These programs are administered by various non-VA entities, including professional organizations, institutions of higher learning, international organizations, and government agencies.

Each year some 50 to 100 VA employees, however, do receive funding support from the VA to attend conferences, symposia, and other job-related activities. Generally, this support covers transportation and/or lodging. In some instances, employees may attend the conferences on government time; in others, they must use personal leave.

ENVIRONMENTAL PROTECTION AGENCY

1300 Pennsylvania Avenue, NW • Washington, DC 20004
Office of Management Operations: 202-564-6613 • www.epa.gov

The **Environmental Protection Agency (EPA)** strives to ensure that all Americans, from communities, individuals, and businesses to state, local, and tribal governments, be protected from significant risks to human health and the environment. The Agency's mission is to make communities and ecosystems diverse, sustainable, and economically productive by safeguarding the natural environment, using the best available science and technologies.

* * * * *

Office of International Activities

Ecosystems and transboundary pollutants do not respect international boundaries. As a result, unilateral domestic actions by the United States are inadequate to achieve some of EPA's most important environmental goals, one of which is the reduction of global and cross-border environmental risks to the United States that originate in other countries and undermine U.S. investments in environmental protection. To facilitate multilateral cooperation in achieving EPA's environmental goals, foreign visitors are invited to observe U.S. environmental protection facilities and procedures. Continued leadership by the United States and the EPA is necessary in building the international cooperation and technical capacity needed to address these issues successfully. Where the accomplishment of U.S. environmental goals requires the cooperation and coordination of other countries, the Office of International Activities works with the Department of State, other federal agencies, states, tribes, and nongovernmental organizations to ensure that U.S. environmental interests are appropriately addressed. Legislation and international agreements supporting these operations include: Clean Water Act, Clean Air Act, North American Agreement on Environmental Cooperation, Pollution Prevention Act, Toxic Substances Control Act, 1989 U.S./USSR Agreement on Pollution, World Trade Organization Agreement, and the North American Free Trade Agreement.

ENVIRONMENTAL PROTECTION AGENCY

* EPA provides coordination and facilitation services for its International Visitors Program. No U.S. Government funds are expended. Foreign and private sources that fund costs associated with international visitors are not tracked.

FEDERAL COMMUNICATIONS COMMISSION

445 12th Street, SW • Washington, DC 20554
Office of Media Relations: 202-418-0500 • www.fcc.gov

The **Federal Communications Commission (FCC)** regulates interstate and foreign communications by radio, television, wire, satellite, and cable. It is responsible for the orderly development and operation of broadcast services and the provision of rapid, efficient nationwide and worldwide telephone and telegraph services at reasonable rates. Its responsibilities also include the use of communications for promoting safety of life and property and for strengthening the national defense.

* * * * *

International Bureau

The International Bureau was established on October 11, 1994. It handles all international telecommunications and satellite programs and policies. The Bureau also has the principal representational role on behalf of the Commission at international conferences, meetings, and negotiations. The Telecommunications Division develops, recommends, and administers policy, rules, and procedures for the authorization and regulation of international telecommunications facilities and services. The International Bureau was established to help develop and implement the FCC's international telecommunications, broadcasting, and satellite policies and regulations.

The **International Visitors Program (IVP)** is part of the Telecommunications Division of the International Bureau. The IVP enables foreign delegations to interact in informal discussions with FCC personnel who provide legal, technical, and economic perspectives on a wide range of communications issues involving broadcasting, cablecasting, and telecommunications. Issues discussed during IVP briefings include the FCC's organizational structure; its multiple roles

FEDERAL COMMUNICATIONS COMMISSION

as an independent regulatory agency including licensing, enforcement, and rule making procedures; and its statutory powers, regulations, and current proceedings. Such interdisciplinary exchanges are intended to benefit all parties who have a unique opportunity to gain insight into each others' regulatory policies and procedures. These meetings are increasingly important as telecommunications networks become global in scope and many countries seek to modify their regulatory approaches to foster privatization and competition in the telecommunications marketplace. IVP briefings can assist in this process by providing delegations with an opportunity to examine firsthand the U.S. regulatory model as one possible approach. Furthermore, IVP briefings can be useful opportunities for exchanging information and perspectives as the U.S. Government and other governments negotiate international agreements to reflect these marketplace and regulatory changes. Although the numbers of visitors may vary substantially from year to year, the IVP conducted briefings for an estimated 269 visitors during the course of the 1999 calendar year. FCC charges no fees to its visitors, who receive funding for travel and expenses from a variety of governmental and nongovernmental sources.

FEDERAL EMERGENCY MANAGEMENT AGENCY

500 C Street, SW • Washington, DC 20472
 Public Information: 202-646-4600 • www.fema.gov

The **Federal Emergency Management Agency (FEMA)** engages in international cooperative activities to help the international community to better prepare for and respond to natural and man-made disasters in order to reduce the loss of life and property. The exchange of emergency management information and expertise saves lives, prevents economic losses, and builds local emergency management capabilities. Building local emergency management capabilities helps stabilize governments when major disasters occur. It also provides constructive methods to foster global understanding and working relationships with evolving governments and societies.

* * * * *

International Programs

Emergency Preparedness and Disaster Management Visitors Program. In FY 1999, FEMA Headquarters and regional offices hosted more than 604 foreign government emergency preparedness and disaster management officials who sought information on disaster preparedness, response, recovery and mitigation policies, programs, methods and techniques. These officials were primarily from Pacific Rim nations who face similar risk management issues resulting from earthquakes, typhoons, and river basin flooding. These international officials represented over 50 countries in Africa, Asia, Europe, and North and South America. The three key countries, China, Japan, and Korea, had more than 125 visitors, 130 visitors, and 25 visitors, respectively.

FEMA's cooperative relationships in emergency preparedness and disaster management have been institutionalized with several countries, including Azerbaijan, Bulgaria, Canada, Japan, Kazakhstan, Kyrgyzstan, Mexico, Russian Federation, Turkey, Turkmenistan, and Ukraine. Many countries use the disaster management capabilities of the United States as a benchmark for their own. This international cooperation helps nations save lives and reduce loss of property; reduces the high cost of foreign disaster relief for American taxpayers; builds critical infrastructure for sustainable economic development; and supports social well-being and political stability. Cooperative activities include expert exchanges, participation in FEMA's Emergency Management Institute (EMI) courses and train-the-trainer courses, participation in professional and scientific meetings, and international distribution of FEMA publications. International visitors are funded entirely from sources in their home countries or by other U.S. Government organizations.

In FY 1999, FEMA hosted 45 international visitors from 25 countries on how it was assisting state and local emergency management organizations in preparing for Y2K. FEMA held briefings for the visitors and provided them with Y2K awareness materials. The transition to the Year 2000 came with no report of significant Y2K issues in key infrastructure areas for our international partners.

Cooperation with the Russian Federation Program. In July 1996, Vice President Gore and Russian Prime Minister Chernomyrdin signed a ten-year Memorandum of Understanding (MOU) between the United States and Russia on Cooperation in Natural and Technological Disaster Prevention and Response. FEMA and the Russian Ministry for Civil Defense, Emergencies, and Disaster Response (EMERCOM of Russia) are the executive agents responsible for implementing the MOU. In addition to the MOU, three Working Protocols and three annual Work Plans have been signed to implement the cooperative program. A joint committee, consisting of FEMA (Co-Chair), the U.S. Agency for International Development (USAID), and the Departments of Agriculture, Defense, Energy, Health and Human Services, State, and Transportation, are responsible for implementing the MOU.

Through the MOU, FEMA and EMERCOM of Russia have cooperated in the areas of mitigation, emergency preparedness, and response and recovery. In 1999, the meetings and exchange activities were limited due to the devaluation of the Russian currency and the Russian reaction to NATO activities in Yugoslavia. EMERCOM's Far East Region delegation participated in the National Association of State Floodplain Managers annual conference, Project Impact meetings, and discussions with state and local emergency managers in Seattle, Washington, and Portland, Oregon, in May 1999.

FEMA and the state of Arizona co-sponsored the September 1999 annual meeting of the U.S.-Russian Joint Committee. The meeting took place in Phoenix and in Tucson, where officials signed the new 1999-2000 Work Plan at the University of Arizona. Under this new Work Plan, cooperative exchanges are increasing again in this very important initiative.

National Emergency Training Center

FEMA's National Emergency Training Center (NETC) in Emmitsburg, Maryland, houses the Emergency Management Institute (EMI) and the National Fire Academy (NFA). At the NETC emergency managers, firefighters, and elected officials can take classes in many areas of emergency management, including emergency planning, exercise design and evaluation, disaster management, hazardous materials response, and fire service management.

The **Emergency Management Institute** enhances U.S. emergency management practices and minimizes the impact of disasters on the American public through a nationwide residential and nonresidential training program. EMI curricula are structured to meet the needs of a diverse audience with an emphasis on how the various elements work together in emergencies to save lives and protect property. Instruction focuses on four phases of emergency management: mitigation, preparedness, response, and recovery. A significant portion of the training is conducted by state emergency management agencies under cooperative agreements with FEMA. In FY 1999, 14 individuals from 5 countries enrolled in EMI training courses. (For more information, see the EMI website at www.fema.gov/EMI/.)

* * * * *

The **National Fire Academy** enhances the ability of fire and emergency services and allied professionals to deal more effectively with fire and related emergencies. Courses are provided at the resident facility in Maryland, and throughout the country in cooperation with state and local fire training organizations, colleges, and universities. Any person with substantial involvement in fire prevention and control, emergency medical services, or fire-related emergency management activities is eligible to apply for Academy courses. In FY 1999, 36 individuals from 7 countries enrolled in NFA training courses. More than 50 students benefited from in-country independent study programs designed by the NFA.

* * * * *

In addition to the programs listed above, FEMA offers technical assistance to develop and strengthen emergency management systems abroad. In February 1999, FEMA entered into an agreement with the government of Argentina to provide technical assistance to help develop an integrated emergency management system and to help build prototype disaster resistant communities. After several months of bilateral consultation, the new Federal Emergency Management System (SIFEM) was established by Presidential decree. SIFEM creates a system of cooperation among government agencies and a central coordinating body for national government disaster activities. Project Impact pilot programs have been established in three Argentine communities.

In September 1999, FEMA entered into an interagency agreement with USAID to assist countries devastated by Hurricane Mitch. The purpose of this agreement is to help strengthen national and regional emergency management systems in the Central American countries of Guatemala, El Salvador, Honduras, Nicaragua, Dominican Republic, and Haiti. FEMA experts are assisting them in reducing their socio-economic vulnerability to future natural disasters and enhancing their capabilities to respond effectively to natural disasters.

FEMA, along with USAID's Office of Foreign Disaster Assistance, will help to review these countries' existing national emergency management authorities and plans, hazard prevention programs, and federal, provincial/department, and local emergency management capabilities; to design or provide recommendations for improvement of Emergency Operations Centers; and to establish two or three pilot disaster resistant communities (Project Impact) in each country.

Please note: Project Impact, which is noted above under the Cooperation with the Russian Federation Program and as part of FEMA's technical assistance package for Hurricane Mitch relief, is one of FEMA's most ambitious mitigation initiatives ever. This program uses a common sense approach to build disaster resistant communities. Experience has shown that lives can be saved, property damage reduced, and economic recovery after a disaster accelerated by consistently building safer and stronger buildings, enforcing building codes, and making sound choices in community planning. Project Impact is a locally driven process that empowers the community to determine its own needs and priorities, and act on those of greatest importance. The program is based on four simple principles:

- Building community partnerships
- Identifying hazards and community vulnerabilities
- Prioritizing hazard risk reduction actions
- Building and communicating successes

The incentive is clear: disaster resistant communities can bounce back quicker from a natural disaster with far less loss of property and consequently lower repair costs. For every dollar spent in damage preventions, two are saved in repair.

FEDERAL ENERGY REGULATORY COMMISSION

888 First Street, NE • Washington, DC 20426
 External Affairs: 202-208-0004 • www.ferc.fed.us

The **Federal Energy Regulatory Commission (FERC)** oversees America's electric utilities, natural gas industry, hydroelectric projects, and oil pipeline transportation system. The Commission chooses regulatory approaches that foster competitive markets whenever possible, assures access to reliable service at a reasonable price, and gives full and fair consideration to environmental and community impacts in assessing the public interest of energy projects.

* * * * *

Through its **International Visitors Program**, FERC shares its regulatory approach and lessons learned with professional counterparts from around the world. Individual or group meetings and briefings are arranged upon request for foreign professionals who are seeking more information on U.S. domestic energy regulatory issues. All international visitors to FERC are funded by their home governments, international organizations, or other USG programs. In addition to hosting international visitors, FERC representatives occasionally speak to international visitor groups hosted by other U.S. Government organizations.

FEDERAL MEDIATION AND CONCILIATION SERVICE

2100 K Street, NW • Washington, DC 20427
Office of Public Information: 202-606-8080 - www.fmcs.gov

The **Federal Mediation and Conciliation Service (FMCS)** assists labor and management in resolving disputes in collective bargaining contract negotiation through voluntary mediation and arbitration services; provides training to unions and management in cooperative processes to improve long-term relationships under the Labor Management Cooperation Act of 1978, including federal sector partnership training authorized by Executive Order 12871; provides alternative dispute resolution services and training to government agencies, including the facilitation of regulatory negotiations under the Administrative Dispute Resolution Act and the Negotiated Rulemaking Act of 1996; and awards competitive grants to joint labor-management committees to encourage innovative approaches to cooperative efforts.

* * * * *

Alternate Dispute Resolution (ADR) / International Affairs

An important goal of the **Alternate Dispute Resolution International Affairs Program** is to strengthen democratic institutions by helping labor, management, and government professionals in foreign countries develop their capacity to engage in collective bargaining and other forms of labor-management cooperation. This goal is accomplished by providing training and mentoring to foreign professionals in mediation, various forms of workplace collaboration, as well as cooperation on an institutional level. The program also furthers this goal by assisting stakeholders in friendly foreign countries in the design of systems to permanently institutionalize such cooperation. Occasionally, FMCS officials have honored requests to serve as third-party neutrals to resolve particular disputes abroad. Finally, in response to increasing requests from abroad for training in the application of FMCS' dispute resolution techniques beyond the labor-management context, FMCS has also provided training in conflict management to assist foreign governments and individuals in resolving inter-ethnic and other public-policy related disputes.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Accomplishments for FY 1999 included briefing and training individuals from over 50 different countries. The scope of the programs ranged from providing simple briefings for foreign visitors on U.S. labor-relations and the work of FMCS, to training foreign individuals in both the United States and in-country, to creating an independent mediation service (based on the FMCS model) for a foreign government. It is difficult to estimate an average duration of program activities, since they range from one-day briefings to multi-year training/system design programs. That being said, most projects last about one to two weeks. Two intermittent programs that began prior to FY 1999 continued into the fiscal year. Two others are ongoing multi-year programs. (**Note: An additional 152 Americans and 1,850 foreign in-country participants are included in this program.)

FEDERAL TRADE COMMISSION

600 Pennsylvania Avenue, NW • Washington, DC 20580
Office of Public Affairs (Press Office): 202-326-2180 • www.ftc.gov

The objective of the **Federal Trade Commission (FTC)** is to maintain competitive enterprise as the keystone of the American economic system, and to prevent the free enterprise system from being fettered by monopoly or restraints on trade or corrupted by unfair or deceptive trade practices. The Commission is charged with keeping competition both free and fair.

* * * * *

International Visitors Program

The Federal Trade Commission's **International Visitors Program** helps to keep competition in the free enterprise system fair. The Bureau of Competition, International Antitrust Division supports the FTC's antitrust advocacy in multilateral organizations and in bilateral relationships by arranging visits between FTC staff and representatives of foreign governments, academia, and business to help them learn how the FTC fulfills its enforcement mission. Through this public outreach, the Commission hopes to foster understanding of its approach to antitrust, nurture cooperation with enforcement efforts, and potentially bring convergence with federal laws and approaches to antitrust. The Bureau of Consumer Protection aims to (1) develop cooperative relationships with foreign law enforcement authorities, (2) provide advice and a point of liaison to litigating staff when international issues arise in investigations and enforcement actions, (3) contribute to U.S. foreign policy initiatives in areas within FTC expertise, and (4) offer outreach to visitors from abroad, particularly with respect to ongoing FTC activities and policies. The Bureau of Economics provides economic support to the Commission's antitrust and consumer protection activities. Through international technical assistance, FTC attorneys and economists work with competition and consumer protection agencies in Central and Eastern Europe, the former Soviet Union, Central and South America, and South Africa. These staff members explain the principles of competitive markets, help draft competition and consumer protection laws, train counterparts in

FEDERAL TRADE COMMISSION

investigative techniques, offer advice about pending cases in host countries, and assist in establishing consumer education systems. The international technical assistance program receives funding from the U.S. Agency for International Development (USAID).

FTC does not receive any specific appropriations to conduct the International Visitors Program. However, FTC does receive funds through Inter-Agency Agreements (IAA) with USAID for international technical assistance.

GENERAL SERVICES ADMINISTRATION

1800 F Street, NW • Washington, DC 20405
 Office of Intergovernmental Solutions, Office of Government-Wide Policy: 202-501-0291 •
www.gsa.gov

The **General Services Administration (GSA)** establishes policy for, and provides economical and efficient management of, federal government property and records, including the construction and operation of buildings; procurement and distribution of supplies; utilization and disposal of real and personal property; management of transportation, traffic, and communications; and management of the government-wide automatic data processing resources program. Its functions are carried out at three levels of organization: the central office, regional offices, and field activities.

* * * * *

Office of Governmentwide Policy (OGP)

Part of the mission of the **Office of Intergovernmental Solutions (OIS)** is to facilitate worldwide sharing of information and experiences regarding intergovernmental management and information technology issues. In support of this mission, OIS plays a key role in two international programs, the G8 Government Online (G8-GOL) and the International Council for Information Technology in Government Administration (ICA). OIS also hosts foreign visitors from countries around the world for short sessions with their U.S. Government counterparts in public administration. In these sessions, the foreign visitors learn about the U.S. Government's experiences and share their own experiences in topics as diverse as electronic procurement, government reinvention, and electronic delivery of social services. Among the highlights of FY 1999 was the 11th G8 Government Online meeting in Washington, D.C., hosted by OIS. Delegates from 13 nations attended the three-day meeting. In addition, GSA had the opportunity to share best practices with officials from about 10 nations. OIS provided an updated online directory of International Government Information Technology (IT) Officials featuring more than 300 IT

GENERAL SERVICES ADMINISTRATION

officials from over 80 foreign governments. This directory is located at: <http://policyworks.gov/org/main/mg/intergov/internationalframe.html>. Also, the government of Jamaica sought out OIS assistance in developing a strategic plan for IT in Jamaica. OIS assisted them by developing a strategic planning process that involved the participation of key Jamaican officials and gave Jamaica ownership of the strategic plan.

JAPAN-UNITED STATES FRIENDSHIP COMMISSION

1120 Vermont Avenue, NW • Washington, DC 20005
 Telephone: 202-418-9800 • www.jusfc.gov/commissn/commissn.html

The **Japan-United States Friendship Commission (JUSFC)** was established as an independent federal agency by the U.S. Congress in 1975 under PL 94-118. The Commission's principal activities are divided into three areas: (1) Research, (2) Education and Training, and (3) Cultural Affairs. The Commission sponsors individual research on emerging policy issues of critical importance in the U.S.-Japan relationship and dissemination of results to the policymaking community. Education programs are designed to train American specialists in Japan in both the scholarly and the nonacademic professions. Education projects are funded in such areas as broadcast media, language training, counterpart exchanges, acquisition and management of library and information resources, and faculty exchanges for the purpose of curriculum development. The Commission also provides support to cultural institutions for collaborative productions and individual artist exchanges.

* * * * *

Policy-Oriented Research Programs. The Commission's Research programs help identify interests in policy issues of critical importance in the U.S.-Japan relationship. The Commission gives preference to studies by highly qualified researchers of demonstrated achievement that seek to explain fundamental issues of change in the structure of the economy, the nature of the political leadership, Japan's international role, and other contemporary issues in the U.S.-Japan relationship. Proposals are judged on the degree of criticality of the problem to be studied in terms of its potential impact on the U.S.-Japan relationship; the extent and effectiveness of plans for dissemination of the results to the policy-making communities as well as to other communities of interest; the quality of scholarship and breadth of viewpoint represented by the participants committed to the project; the extent of support from other funding sources; and the reasonableness of budget levels and administrative support costs. The Commission believes that the American research capacity on Japan that has been developed in recent decades is underused by the

policy-making communities and seeks to help bridge the two. The Commission encourages participation of a full range of American cultural and ethnic diversity in its research programming in Japan.

Major accomplishments in FY 1999 include support for the following projects: a research project looking at Japan's structural rigidities by the Brookings Institution; support to the Economic Strategy Institute for the projects "A WTO Competition Policy Agreement and U.S.-Japan Trade Relations" and "Japan and the U.S. Reconsidered: The Evolution of Japanese Security and Economic Strategy Since 1960"; the Edwin O. Reischauer Center for East Asian Studies for a project entitled "Bridging the Antitrust Divide in U.S.-Japan Relations"; the Japan Information Access Project for a Pentagon study group on Japan and Northeast Asia; the Mansfield Center for Public Affairs for a research project on the rule of law and its acceptance in Asia; the Research Institute for Peace and Security for a strategic studies fellowship; the University of Colorado at Boulder for a project "Patent Systems, Licensing Agreement, and Joint Ventures in the Context of U.S.-Japan Competition Policy"; and the University of Georgia for a research project entitled "Efforts to Control Weapons Proliferation: Japan, the U.S. and China."

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$452,565	75**	10**
National Interests Addressed:	Economic Prosperity; National Security	

* * * * *

Education and Training Programs. The Commission believes that American public understanding of Japan, as well as a more balanced relationship between Japan and the United States in terms of economic, political, and security matters, requires the development and strengthening of the next generation of American area specialists in Japan, trained to a high level of linguistic and disciplinary competence, and adequately represented in both the scholarly and the nonacademic professions.

The Commission provides seed money to assist those start-up projects that have good prospects of converting to a self-funding basis within a reasonable period of time. The Commission gives block grants to certain institutions; those institutions then "retail" these grants to individuals. Those projects that serve a broad range of disciplines and geographic regions are given precedence over those that serve only a single discipline, institution, project, or region.

The Commission also wishes to assure the continued vitality and growth of basic national resources for the study of Japan. In its library support, the Commission supports projects and organizations that help organize acquisitions of research materials on a national scale and help expand access to research materials in both printed and electronic format. In its support for language training, the Commission supports institutions that have a broad national scope of programs.

In addition, the Commission believes that new and imaginative efforts are required to broaden understanding by the American public at large of current and future issues in the broad political and economic relationship between the two countries. Such understanding, and the opportunities for creating it, remains seriously underdeveloped when measured against the

Japanese people’s general knowledge of the United States. Therefore, the Commission supports projects from public affairs organizations and media groups that have a national or major regional impact in the United States and that encourage a better understanding between the Japanese and U.S. ethnic communities and geographical regions, which historically have had little interaction with one another.

In 1999, the JUSFC supported the American Studies Association for a curriculum and faculty development program to bring American Studies into the disciplinary heart of the Japanese undergraduate curriculum; the Organization of American Historians for short-term residences in Japan for U.S. historians; the Association of Teachers of Japanese to establish a clearinghouse to encourage study abroad in Japan by American undergraduate students; the University of Pennsylvania for support of a faculty and curriculum development seminar on Japan; the National Coordinating Committee on Japanese Library Resources for infrastructure support; the Northeast Asia Council of the Association of Asian Studies (NEAC/AAS) for grants for Japanese studies; and the Social Science Research Council to support its program of grants for advanced research on Japan. Also in 1999, the Commission supported the Congressional Economic Leadership Institute for the 1999 Japan educational exchange program for Congressional staff; KCTS Television for infrastructure support for a multimedia production center designated to promote significant coverage of Japanese political, economic, and cultural concerns for American markets; and the U.S. Association of Former Members of Congress for the “Congressional Study Group on Japan.”

* * * * *

Cultural Affairs Programs. The Commission has always believed that the arts are at the heart of a people’s creative genius. Therefore, it is pleased to see the rapidly growing demand in the United States and Japan for expanded artistic exchange. The Commission notes, however, that the presence of American artists in Japan has been limited both in terms of diversity and geographical coverage. American performing and visual artists presentations in Japan have often been conducted on a limited and sporadic basis, frequently the subject of commercial interests of individual promoters. To counteract this trend, the Commission has determined that, until further notice, it will focus on bringing American art, both visual and performing, to Japan. The Commission’s goals in this endeavor are to increase both qualitatively and quantitatively the presence of American art and artists in Japan.

In 1999, the Commission supported the following projects: The Smithsonian Institution’s National Museum of Natural History for partial costs of the publication of a catalogue accompanying the exhibition “Ainu-Spirit of a Northern People,” and the visit of American film director Rob Nilsson to Japan for a series of collaborative workshops.

LIBRARY OF CONGRESS

1st and Independence Avenue, SE • Washington, DC 20540-4000
 Public Affairs Office: 202-707-2905 • www.loc.gov

The **Library of Congress (LOC)** is the world's largest library, serving the Congress and the public for nearly 200 years. Founded in 1800 to serve the reference needs of Congress, the Library has grown into an unparalleled treasure house of information and creativity, gathering and sharing knowledge for America's good. As the chief copyright deposit library of the United States, the Library of Congress receives about one million new items each year, half of which are selected for the permanent research collections. Additional items come through gifts and donations, exchanges with national and international institutions, and purchases. The systematic acquisition, preservation, organization, and service of Library of Congress' collections are an immense undertaking.

The Library provides numerous free services to the U.S. libraries, including books for the blind and physically handicapped and the creation of catalog records which, distributed to all states, save American libraries hundreds of millions of dollars. Through the National Digital Library Program, the Library of Congress is creating free online access to its catalog, exhibitions, unique American collections, and Congressional information on its website. In the year 2000, the Library will make accessible electronically millions of items from its collections and those of its institutional partners. The goal of the Library's digital program is a public-private partnership that will create an informed citizenry through universal access to knowledge and through the generous support of the U.S. Congress and the private sector.

Law Library

Electronic access to primary sources of the law of all nations is becoming a worldwide imperative. To that end, the Law Library of the Library of Congress and a group of similarly interested legislative information centers around the world have joined to share their expertise and know-how in the hope of making this access a reality.

The **Global Legal Information Network (GLIN)** is a cooperative not-for-profit federation of government agencies or their designees that contribute national legal information to the GLIN database. This automated database contains statutes, regulations, and related material that originate from countries in the Americas, Europe, Africa, and Asia. A central server at the Library of Congress in Washington, D.C., stores the data temporarily. All participating national GLIN stations can access the data. GLIN envisions a distributed network. The database will reside on servers in other member nations as well as the Law Library of the Library of Congress.

When completed, the national GLIN stations will capture, process, and distribute legal information in electronic format. This may include statutes, constitutions and codes, regulations and selected ordinances, judicial decisions, and scholarly writings, as well as related material such as statistics. The original sources are protected to preserve authenticity. Consequently, these texts are available in the official languages of authorized users.

The standards for selecting the texts, analyzing them, producing summaries, assigning index terms, and the testing of applicable hardware and software were developed originally as an international initiative with contributions of the Law Library of the Library of Congress. Agencies and institutions, including the National Aeronautics and Space Administration, the World Bank, and the Inter-American Development Bank, have provided support for various aspects of the project.

Library of Congress Soros Foundation

Since 1992, the three-month Soros Foundation **Visiting Fellows Program** has introduced seventy-four librarians and information specialists from Central and Eastern Europe and the New Independent States to the mission, organization, and operations of the Library of Congress, librarianship in America, and various types of American libraries. The program includes three weeks of general orientation, Internet training, and a management skills workshop at the Library of Congress; a week-long field experience at the Mortenson Center for International Library Programs, University Library, University of Illinois at Urbana-Champaign; and two months of work experience at a Washington, D.C.-area library similar to the participant's home institution.

The main objectives of the program are (1) to expose foreign librarians to the specific role of the Library of Congress as a national and parliamentary library, (2) to expose participants to libraries in a democratic (i.e., open) society that provide access to information to all persons and, (3) to encourage professional cooperation among librarians worldwide.

In FY 1999, 12 librarians and information specialists participated in the program. For the first time Fellows from Mongolia, Kazakhstan, Georgia, Armenia, and Azerbaijan participated in the program. The program emphasized preparing the Fellows to train their colleagues upon return to their home institutions. Otherwise, the curriculum remained the same as in previous years: classroom presentations by prominent members of the American library community were complemented by visits to various area libraries; and, Internet training prepared the Fellows for their work experience in Washington, D.C.-area libraries.

Luso-Hispanic and Iberian Scholars Program

The Hispanic Division of the Library of Congress serves as a center for Luso-Hispanic studies. By maintaining close ties to academic and research institutions in the United States and

abroad, it provides an ideal location for foreign and American scholars to pursue research projects. The Hispanic Division hosts Fulbright, Guggenheim, and other scholars from the United States and abroad.

The Division's area specialists facilitate the use of the Library's rich collections on the Iberian Peninsula, Latin America, and the Caribbean. The Hispanic Division provides study facilities, as well as information, on how to use the vast collections. The Division also assists the foreign scholars with establishing contact with other academic and research institutions.

Scholars typically spend about six months in the Hispanic Division Reading Room and use the many different collections within the Library. The Hispanic Division also arranges for lectures, seminars, and other academic activities for the visiting scholars.

Regional and Cooperative Cataloging Division, Cataloging Directorate, Library Services

The **Program for Cooperative Cataloging (PCC)**, an international cooperative effort aimed at expanding access to library collections, provides useful, timely, and cost-effective cataloging that meets mutually accepted standards of libraries around the world. The PCC Program consists of three components: (1) NACO: the name authority program, (2) SACO: the subject authority program, and (3) BIBCO: the bibliographic record program.

In FY 1999, a PCC representative conducted training for four weeks in the United Kingdom. Program participants received NACO and SACO training, as well as NACO and expansion training. The training encourages the cataloging librarians at visited institutions to contribute authority records for names, uniform titles, and series to the national authority file housed at the Library of Congress. NACO participants agreed to follow a common set of standards and guidelines when creating or changing authority records in order to maintain the integrity of a large shared authority file. This file will help the global library community to work more efficiently and effectively, allowing it to maximize its resources.

The Library of Congress acts as the Secretariat for the Program for Cooperative Cataloging. It is chiefly responsible for producing the training documentation for the three program components, especially the NACO program. In this regard, Library of Congress employees produce a NACO training manual in Portuguese. The Library has made the first inroads into having a South American participant in the PCC.

Office of the Librarian

The **Russian Leadership Program “Open World” (RLP)** promotes understanding among U.S. and Russian public policy decision makers, political leaders, and citizens. In FY 1999, the pilot program brought 2,150 of Russia’s emerging political leaders to experience America firsthand as the Russian Federation seeks to establish democratic reforms.

The RLP was inspired by and modeled on the small but critical part of the Marshall Plan that brought large numbers of emerging German political and societal leaders to the United States after World War II to observe the workings of America’s democratic government and market economy. The RLP pilot achieved similar goals, which included improving relations and mutual understanding between the two participating nations, enabling Russian visitors to observe the workings of American democracy and its free market system, and enabling them to see firsthand how Americans from all walks of life conduct their business, professional, and private lives.

To the extent possible, the program matched Russian participants with hosts in the same profession -- members of the Russian State Duma (Russia’s lower legislative house) with U.S. House of Representative members, mayors with mayors, and so on. The vast majority stayed with American families in their homes and shared in their daily lives, activities, and recreation. They spent time with their professional counterparts, observing them in action.

MARINE MAMMAL COMMISSION

4340 East-West Highway • Bethesda, MD 20814
Telephone: 301-504-0087

The **Marine Mammal Commission (MMC)** is mandated by the Marine Mammal Protection Act to undertake or cause to be undertaken such research as it deems necessary or desirable in connection with marine mammal conservation and protection domestically and internationally, maintain a continuing review of research programs conducted or proposed to be conducted under authority of the Act, and take steps feasible to prevent wasteful duplication of research. To do this, the Commission contracts for studies to identify, define, and develop solutions to domestic and international problems affecting the conservation of marine mammals and their habitats; recommends steps to prevent unnecessary duplication and improve the quality of research conducted or supported by other agencies; convenes meetings and workshops to review, plan, and coordinate marine mammal research; and conducts an annual survey of federally-funded marine mammal research. Many marine mammal species have ranges that cross international boundaries; thus, the issues with which the Marine Mammal Commission deals often involve a number of countries.

* * * * *

The Commission contracts for U.S., and occasionally foreign, citizens to conduct scientific research on marine mammals in foreign countries, travel to other nations to gather information, attend professional conferences and workshops, and meet with foreign researchers and government officials. At times, the Commission undertakes activities at the request of another federal agency with support through an interagency transfer of funds.

There is no longer any doubt that significant changes in climate have occurred in the Arctic over the past few decades. However, there exists considerable uncertainty about the nature and extent of future changes and how these will affect the Arctic physical and biological environment and those who live there.

MARINE MAMMAL COMMISSION

In FY 1999, one American participated in an International Arctic Science Committee's Workshop on "Impact of Global Change in Norway" from April 25-26, 1999. The purpose of the workshop was to help identify needs and requirements for an assessment of the potential impact of climate changes in Arctic regions and to lay the foundation for summarizing existing knowledge. A report from the workshop on the Impacts of Global Change was published in August 1999.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

300 E Street, SW • Washington, DC 20546
 Public Information: 202-358-0330 • www.hq.nasa.gov

The **National Aeronautics and Space Administration (NASA)** conducts research to advance and communicate scientific knowledge about the Earth, the solar system, and the universe; to explore and enable the development of space for human enterprise; and to develop advanced aeronautics, space, and related technologies. NASA enters into international agreements and conducts international exchanges and training programs that complement and enhance its space programs and support U.S. space policy objectives.

* * * * *

The **Resident Research Associate Program** places international postdoctoral researchers in summer intern positions or one- to three-year assignments at U.S. research facilities. From its appropriations, NASA provides funding to the National Research Council (NRC) annually to support program administration and to provide a stipend for researchers assigned to NASA facilities. In FY 1999, 132 NASA-sponsored international research associates commenced assignments at a NASA Center. The NRC also places research associates in several other government agencies, including the Department of Defense, Environmental Protection Agency, National Institutes of Health, National Institute of Standards and Technology, National Oceanic and Atmospheric Administration, and U.S. Geological Survey.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

8601 Adelphi Road • College Park, MD 20740-6001
Office of Communications: 301-713-7070 • www.nara.gov

The **National Archives and Records Administration (NARA)**

ensures, for citizens and federal officials, ready access to essential evidence that documents the rights of American citizens, the actions of federal officials, and the national experience. It establishes policies and procedures for managing U.S. Government records and assists federal agencies in documenting their activities, administering records management programs, scheduling records, and retiring noncurrent records. NARA arranges, describes, preserves, and provides access to the essential documentation of the three branches of the U.S. Government; manages the Presidential Libraries system; and publishes the laws, regulations, and Presidential and other public documents. It also assists the Information Security Oversight Office, which manages federal classification and declassification policies, and the National Historical Publications and Records Commission, which makes grants nationwide to help nonprofit organizations identify, preserve, and provide access to materials that document American history.

* * * * *

International Visitors Program

Although NARA statutes contain no enabling legislation authorizing the agency to conduct international activities, NARA's Presidential Libraries, regional facilities, and Washington, D.C., offices routinely host international government officials, researchers, and scholars for the purpose of sharing information regarding archival policies and procedures. NARA staff travel internationally to participate in meetings and conferences related to the field of records and archives management.

NATIONAL ENDOWMENT FOR THE ARTS

1100 Pennsylvania Avenue, NW • Washington, DC 20506
Office of Communications: 202-682-5570 • www.arts.endow.gov

The **National Endowment for the Arts (NEA)** supports the visual, literary, and performing arts to benefit all Americans by fostering artistic excellence, preserving and transmitting our diverse cultural heritage, making the arts more accessible to all Americans, and making the arts intrinsic to education.

* * * * *

International Partnerships Programs

The International Partnerships Programs of the National Endowment for the Arts bring the benefits of international exchange to arts organizations, artists, and audiences nationwide through its collaborative initiatives with other funders, both private and federal. The Endowment’s support of international activities showcases U.S. arts abroad and broadens the scope of experience of American artists to enrich the art that they create. International activities help increase worldwide recognition of the excellence, diversity, and vitality of the arts of the United States and build a foundation of trust among differing cultures. Through its work, the International Partnerships Programs help American artists and arts organizations develop international ties that strengthen the many art forms of the United States. The principal international activities supported by NEA include the following: the ArtsLink Program, the U.S.-Ireland-Northern Ireland Community Residencies Exchange, the Fund for U.S. Artists at International Festivals and Exhibitions, and the U.S.-Japan Creative Artists Fellowship Program.

ArtsLink encourages artistic interchange with Central and Eastern Europe and the New Independent States of the former Soviet Union. Under ArtsLink Collaborative Projects, support is provided for U.S. artists to work on mutually beneficial projects with colleagues from the region. The ArtsLink Residencies enable U.S. arts organizations to host visiting artists or managers for a

NATIONAL ENDOWMENT FOR THE ARTS

five-week period. In addition to the 16 grants supported through ArtsLink in FY 1999 with NEA money, 42 other projects were supported in FY 1999 through contributions of other partners in the ArtsLink initiative.

NATIONAL ENDOWMENT FOR DEMOCRACY

1101 15th Street, NW • Washington, DC 20005
 Reception Desk: 202-293-9072 • www.ned.org

The **National Endowment for Democracy (NED)** is a nonprofit grant-making organization established by Congress in 1983 and funded by an annual congressional appropriation. The Endowment seeks to strengthen democratic electoral processes in cooperation with indigenous democratic forces; to foster cooperation with those abroad dedicated to the cultural values, institutions, and organizations of democratic pluralism; and to encourage the establishment and growth of democratic development in a manner consistent both with the broad concerns of U.S. national interests and with specific requirements of democratic groups in other countries.

* * * * *

International Forum for Democratic Studies

The **Visiting Fellows Program** of NED's International Forum for Democratic Studies enables scholars, journalists, and practitioners of democracy from around the world to spend from three to ten months in residence at the Forum's offices in Washington, D.C., exploring the theory and practice of democracy. The program is open to accomplished scholars, political leaders, democratic activists, and journalists of all nationalities. It seeks to reflect a wide geographical and professional diversity each year. Fellows are provided with use of an office, computer (including access to the Internet), telephone, and other office equipment, as well as the Forum's Democracy Resource Center (including inter-library loan privileges and other research services).

The Forum does not provide salaries or stipends for visiting Fellows. Most past and current Fellows have come with funding from other public and private sources, or have used personal resources to support their stays in Washington, D.C.

NATIONAL ENDOWMENT FOR DEMOCRACY

The primary goal of the program is to give leading democratic scholars and activists the time and nonfinancial resources to study recent literature in their fields of interest, to conduct original research, to acquire new knowledge and skills, and to write for publication.

A secondary goal of the program is to promote mutually beneficial interaction among scholars and practitioners of democracy from all parts of the world by exposing them to the academic, policy-making, and activist communities in Washington, D.C., and elsewhere in the United States.

*See notes below.

NATIONAL ENDOWMENT FOR THE HUMANITIES

1100 Pennsylvania Avenue, NW • Washington, DC 20506
 Public Affairs: 202-606-8446 • www.neh.fed.us

The **National Endowment for the Humanities (NEH)** supports scholarship, education, and public programs in the humanities. The Endowment funds research, education, museum exhibitions, documentaries, preservation, and activities of the state humanities councils. As part of the Endowment's support for research, funding for fellowship programs is provided to selected U.S. institutions that support humanities research in foreign countries. This funding helps to widen access to the resources of these institutions and ensures opportunities for humanities scholars in the arena of international research, where other public and private funders often give higher priority to projects in the social sciences, policy studies, or economic development.

* * * * *

Eligibility for **Fellowship Programs at Independent Research Institutions** is limited to tax-exempt, nonprofit institutions that are financed, governed, and administered independently of institutions of higher education. Since the purpose of Endowment support is to enhance existing fellowship programs by providing additional fellowships for humanities scholars, eligibility is further limited to institutions that have established and maintained fellowship programs with their own or other private funding. Grantee institutions are expected to award NEH fellowships through competitive selection procedures, according to NEH guidelines. Priority is given to programs that provide long-term fellowship opportunities (four months or longer in duration). The program is ongoing.

The program seeks to increase opportunities for humanities scholars to conduct research on foreign cultures and gain access to resources provided by independent libraries, research centers, and international research organizations. NEH fellowships awarded by grantee institutions

NATIONAL ENDOWMENT FOR THE HUMANITIES

enable individual scholars to pursue their own research and to participate in the interchange of ideas with other scholars.

FY 1999 awards for fellowship programs included a grant to one U.S. international research organization and three U.S. overseas research centers and amendments to grants made in previous years to three other U.S. international research organizations and one U.S. overseas research center; the increased funding will enable these institutions to offer the equivalent of 48 year-long fellowships over the next three years.

During FY 1999, NEH funds awarded in previous years supported 64 humanities scholars conducting research in libraries, archives, and museums in 21 countries. Private gifts generated by NEH offers of matching funds supported the equivalent of four additional fellowships. NEH Fellows have pursued research on topics in history, literature, philosophy, the history of religion, and the history of art and have published numerous books and articles. Recent publications by NEH Fellows include: *Mass Culture and Modernism in Egypt*, by Walter Ambrust; *Peasant Dreams and Market Politics: Labor Migration and the Russian Village, 1861-1905*, by Jeffrey Burds; *Environment, Production, and Social Difference in the Kalahari Thornveld, c. 1750-1829*, by Nancy Jacobs; *Bernini and the Art of Architecture*, by Tod Marder; *Secluded Scholars: Women's Education and Muslim Social Reform in Colonial India*, by Gail Minault; *Rewriting Sovereignty: Fiscal Decentralization and the Constitution of the Ottoman Ancient Regime, 1695-1807*, by Ariel Salzman; and *Palestine in the Early Islamic Period*, by Robert Schick.

Note re Dept/Agency Appropriation: There is no separate appropriation for fellowship programs at U.S. institutions supporting research abroad. The amount shown is the agency's allocation of funds for this purpose.

Note re Private Sector (U.S.) Funding: The amount in private funds represents only those amounts of private gifts certified in response to NEH offers of federal matching funds. The actual level of private contributions to the fellowship program is significantly higher and includes grantee institutions' costs for administration of the fellowship competitions, staff, services to Fellows, and, in the case of residential centers, maintenance of facilities. NEH grants support only stipends for Fellows and a small portion of the institutions' cost of advertising the fellowship competitions and the costs of the selection procedures.

Note re Participants: Statistics regarding participants reflect those NEH Fellows who traveled abroad in FY 1999 with support from grants made to institutions in previous years. Grants awarded to institutions in FY 1999 support fellowship competitions conducted by those institutions in the academic years 1999-2000, 2000-2001, and 2001-2002, for fellowships to be held in the following years. At the time of submission of this report, the competitions had not yet concluded, and the recipients of fellowships supported by FY 1999 funds had not yet been identified. Information about Fellows conducting research abroad in FY 1999 is provided as an example of the activity supported by the program.

NATIONAL SCIENCE FOUNDATION

4201 Wilson Boulevard • Arlington, VA 22230
 NSF Information Center: 703-292-5111 • www.nsf.gov

The **National Science Foundation (NSF)** promotes the progress of science and engineering through the support of research and education programs. Its major emphasis is on high-quality, merit-selected research -- the search for improved understanding of the fundamental laws of nature upon which our future well-being as a nation depends. NSF support of international activities is an integral part of its mission to promote the progress of U.S. science and engineering. In particular, the NSF recognizes the importance of 1) enabling U.S. researchers and educators to advance their work through international collaboration, and 2) helping to ensure that future generations of U.S. scientists and engineers gain professional experience early in their careers. Consistent with the international character of science and engineering, disciplinary programs throughout the NSF offer support to U.S. scientists and engineers for the international aspects of their research. NSF spends approximately \$350 million on international activities.

* * * * *

The Division of International Programs (INT)

The INT supports an array of targeted programs worldwide to promote new partnerships between U.S. scientists and engineers and their foreign colleagues. The regions covered by INT include: (1) Africa, the Near East, and South Asia, (2) the Americas, (3) East Asia and the Pacific, (4) Central and Eastern Europe and the New Independent States, and (5) Western Europe. These programs have three principal objectives: human resource development, expanding cooperative research opportunities, and ensuring U.S. involvement in advanced research worldwide. Programs involving young scientists or new collaborative efforts are given preference. In FY 1999, more than \$13 million was spent on targeted regional programs, the International Research Fellows Program, and NSF's contribution to the Human Frontier Science Program. The regional programs include the following types of activities: cooperative research projects, dissertation enhancement awards, joint seminars and workshops, planning visits, and undergraduate and graduate student

activities. The data include only participants in programs that are supported by INT. Other NSF programs that involve international exchanges, but which are administered and supported by NSF divisions other than INT, are not included here as those data are not available.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$13,493,832	3,328	See Note Below
National Interests Addressed:	Global Issues; Advancement of Science	

* * * * *

Cooperative Research Projects are planned and carried out in partnership with foreign colleagues. Typical awards cover two to three years of cooperation and are intended to initiate international cooperation involving new foreign partners or new types of activities with established partners. Long-standing cooperative activities are expected to have established an adequate track record to be competitive within NSF's disciplinary research programs.

* * * * *

Dissertation Enhancement Awards support dissertation research at overseas sites by graduate students enrolled in U.S. institutions. These awards cover funds for international travel, living expenses, and other items not normally available from the student's university. Priority is given to applicants who are U.S. citizens or permanent residents. Since these awards are intended to encourage the development of international experience and outlook among new generations of U.S. scientists and engineers, recipients are expected to work in close cooperation with their host country institutions.

* * * * *

Graduate Student Activities receive support from the Division of International Programs in a number of ways. In addition to providing assistance to graduate students in cooperative research projects, the Division funds a small number of special programs for U.S. graduate students in science and engineering. The **Summer Institute for Graduate Students** in Japan and Korea provides graduate students in science and engineering (including bio-medical sciences) with firsthand experience in a Japanese or Korean research environment, intensive language training, and an introduction to science and science policy infrastructure in these two countries. The **Research Experiences for Graduate Students** program is designed to introduce small groups of U.S. graduate students to Western European science and engineering in the context of a research laboratory and to initiate personal relationships that will foster the students' capability to engage in future international cooperative activities.

* * * * *

International Research Fellow Awards are designed to introduce scientists and engineers in the early stages of their careers to opportunities abroad for periods of 3 to 24 months, thereby furthering NSF's goal of establishing productive, long-term relationships between U.S. and foreign science and engineering communities. These awards are available in any field of science or engineering supported by NSF. Award recipients must be U.S. citizens or permanent residents who have earned a doctoral degree within six years before the date of application, who expect to receive the doctoral degree by the award date, or who have equivalent experience beyond the master's degree level.

* * * * *

Joint Seminars and Workshops involving groups of U.S. and foreign counterpart investigators are intended to provide opportunities to identify common priorities in specific, well-defined research areas and, ideally, to begin preparation of cooperative research proposals. Generally, such meetings involve no more than 30 participants. Usually they involve 10 to 15 U.S. and 10 to 15 foreign participants, with no more than 2 U.S. participants from any single institution. Foreign participants may come from more than one country. Meetings must be organized in cooperation with appropriate foreign institutions, including universities or equivalent organizations, professional societies, or multilateral organizations.

* * * * *

Planning Visits of one to two weeks' duration provide U.S. investigators with opportunities to consult with prospective foreign partners to finalize plans for a cooperative activity eligible for support by the Division of International Programs. Proposals for such visits are considered only in the following instances: (1) there is evidence that substantial progress has already been made in planning the prospective joint activity, (2) the Division judges that face-to-face discussion is essential to complete plans, and (3) other likely sources of travel support are unavailable.

* * * * *

Research Experience for Undergraduates (REU) Program. Active research experience is one of the most effective techniques for attracting talented undergraduates to and retaining them in careers in mathematics, science, and engineering. Projects supported by the REU program provide opportunities for undergraduate students to participate in active mathematics, science, and engineering research experiences. REU projects involve students in meaningful ways in ongoing research programs or in research projects specially designed for this purpose. Projects may also provide opportunities for undergraduate students to participate in research opportunities in non-U.S. settings. International activities are eligible for support from the Division of International Programs either on the basis of proposals submitted to it or in conjunction with proposals submitted to disciplinary research divisions.

* * * * *

*Note: Many of NSF's international programs are jointly funded with foreign research organizations that support the costs of their own researchers. NSF does not maintain statistics on foreign researchers involved in NSF-supported projects.

NUCLEAR REGULATORY COMMISSION

1555 Rockville Pike • Rockville, MD 20852
 Office of Public Affairs: 301-415-8200 • www.nrc.gov

The **Nuclear Regulatory Commission (NRC)** licenses and regulates civilian use of nuclear energy to protect public health and safety and the environment. This is achieved by licensing persons and companies to build and operate nuclear reactors and other facilities and to own and use nuclear materials. The Commission makes rules and sets standards for these types of licenses. It also carefully inspects the activities of the licensed persons and companies to ensure that they do not violate the Commission's safety rules.

* * * * *

The NRC maintains a program of international nuclear safety activities in support of U.S. domestic and foreign policy interests in the safe, secure, and environmentally acceptable use of nuclear materials, energy, and in nuclear nonproliferation, as well as in support of NRC's mandates regarding public health and safety and national security. Cooperation with foreign countries in the area of nuclear safety provides a considerably larger operational experience base than exists in the U.S. alone, enables the NRC to identify and resolve safety issues in an economical manner, and supports and enhances nuclear safety worldwide.

The NRC participates in a wide range of mutually beneficial programs involving information exchange with counterparts in the international nuclear community. The NRC currently maintains arrangements with regulatory authorities in 34 countries. These arrangements provide communications channels that ensure the prompt reciprocal notification of power reactor safety problems that could affect both U.S. and foreign power plants. They are an important component of the NRC's mandates and provide the foundation for bilateral cooperation with other nations in nuclear safety, physical security, materials control and accounting, waste management, environmental protection, and other areas to which the parties agree. Finally, they establish the means through which the NRC provides health and safety information and assistance to other

countries attempting to develop or improve their regulatory organizations and their overall nuclear safety cultures. In addition to its program of bilateral cooperation with other countries, the NRC also works closely in the area of nuclear safety with organizations such as the International Atomic Energy Agency (IAEA) in Vienna, Austria, and the Nuclear Energy Agency (NEA) of the Organization for Economic Cooperation and Development (OECD) in Paris, France.

Regional Programs

New Independent States of the Former Soviet Union

The NRC conducts programs with Russia, Ukraine, Armenia, and Kazakhstan. These programs have been funded through interagency agreements between the NRC, the Defense Threat Reduction Agency (DTRA), and the U.S. Agency for International Development (USAID). For the NIS, as well as for Central and Eastern Europe (see below), the NRC coordinates a range of safety and safeguards assistance and some cooperative activities, as appropriate, to develop and strengthen independent nuclear regulatory authorities through training, information exchanges, cooperative efforts, and through purchasing of equipment.

Central and Eastern Europe

The NRC also conducts programs with Hungary, Czech Republic, Slovak Republic, Bulgaria, and Lithuania. These programs have been funded through interagency agreements between the NRC and USAID.

Advanced Nuclear Countries

The NRC ensures cooperation with advanced nuclear countries through bilateral regulatory exchange arrangements and international visits. These exchanges obtain information on foreign regulatory approaches and operational experience that will assist the NRC's domestic nuclear regulation. The NRC also participates in activities to enhance domestic and global nuclear safety, both through bilateral and multilateral organizations such as the International Atomic Energy Agency (IAEA) and the Nuclear Energy Agency (NEA).

Developing Nations

The NRC conducts a range of safety and safeguards assistance and cooperative activities with countries with less well-established nuclear programs in Asia, Latin America, and Africa for the purpose of developing and strengthening independent nuclear regulatory authorities through training, information exchange, and cooperative efforts.

OFFICE OF PERSONNEL MANAGEMENT

FEDERAL EXECUTIVE INSTITUTE

1301 Emmet Street • Charlottesville, VA 22903

Office of Public Liaison: 804-980-6200 • <http://www.leadership.opm.gov/lc80.html>

The **Office of Personnel Management (OPM)** administers a merit system to ensure compliance with personnel laws and regulations. It assists agencies in recruiting, examining, and promoting people on the basis of their knowledge and skills, regardless of their race, religion, gender, political influence, or other nonmerit factors.

OPM's role is to provide guidance to agencies in operating human resources programs that effectively support their missions and to provide an array of personnel services to applicants and employees. It supports government program managers in their human resources management responsibilities and provides benefits to employees, retired employees, and their survivors.

* * * * *

Federal Executive Institute (FEI)

The FEI, located in Charlottesville, Virginia, was established in 1968. FEI is the principal training facility for senior U.S. Government officers. Since its founding, over 14,000 senior American and foreign government executives have participated in its programs.

OPM's Federal Executive Institute and Management Development Centers conduct training for government executives and managers on a fee-for-service basis. The FEI and Centers do not receive appropriated funds; government agencies reimburse OPM for training received. Over the past two years, participants from foreign governments attended programs offered by the FEI and Centers.

The **Leadership for a Democratic Society Program**, which is conducted by the FEI, develops the career executive corps. It links individual development to improved agency performance. Conducted for an interagency audience many times each fiscal year, hundreds of

OFFICE OF PERSONNEL MANAGEMENT

government executives can attend this four-week residential training program. Program fees are paid to OPM by each executive's agency. Foreign government executives may attend this program. During FY 1999, 22 international executives attended the program, and OPM received \$133,500.

PEACE CORPS

1111 20th Street, NW • Washington, DC 20526
 Press Office: 202-692-2230 • www.peacecorps.gov

The **Peace Corps**' purpose is to promote world peace and friendship, to help other countries in meeting their needs for trained men and women, and to promote understanding between the American people and other peoples served by the Peace Corps. The Peace Corps Act emphasizes the Peace Corps' commitment toward programming to meet the basic needs of those living in the countries where Peace Corps Volunteers work.

* * * * *

Peace Corps Volunteers. The agency fulfills the Peace Corps' mission of providing people-to-people development assistance at the grassroots level and cross-cultural exchange by fielding as many Volunteers around the world as it can appropriately recruit, train, program and support at the budget level approved by Congress and requested by the host country government.

Through their service, Volunteers have cultivated people-to-people relationships that help establish a foundation for peace among nations. They continue the tradition of working in partnership with people worldwide to improve basic conditions and create new opportunities. They speak the local languages and live in the communities where they work. In this process, Volunteers share and represent the culture and values of the American people and in doing so, earn a respect and admiration for our country. Upon their return, they help expand Americans' understanding of the world by bringing a keen understanding of the cultures, customs, languages, and traditions of other people.

The Peace Corps is charting a course for the millennium that builds upon the lessons learned over the past 39 years in a way that makes sense for today's circumstances. Today, in 76 countries, 7,174 Peace Corps Volunteers and Trainees are living and working alongside local people trying to build a better future. In 1999, the Peace Corps began a multiyear plan to reach 10,000 Volunteers -- a goal that Congress enacted into law in 1985 "as the policy of the United States and a purpose of the Peace Corps."

PEACE CORPS

* Note: Figures submitted to the IAWG represent the average number of Volunteers for FY 1999. These numbers do not include Peace Corps Trainees, Crisis Corps, or United Nations Volunteers. The numbers of individuals trained by or benefiting from the programs offered by Peace Corps Volunteers are not included in this report.

SECURITIES AND EXCHANGE COMMISSION

450 Fifth Street, NW • Washington, DC 20549
 Office of Public Affairs: 202-942-0020 • www.sec.gov

The **Securities and Exchange Commission (SEC)** administers federal securities laws that seek to provide protection for investors; to ensure that securities markets are fair and honest; and, when necessary, to provide the means to enforce securities laws through sanctions.

* * * * *

The **International Training Programs** aim to assist emerging securities markets in developing the regulatory infrastructure necessary to promote investor confidence in their markets. The SEC's programs are comprised primarily of courses offered at the SEC's headquarters, where a broad range of topics are addressed to a wide audience in a cost-effective manner. The SEC's Office of International Affairs coordinates the program.

Each year, the SEC hosts the International Institute for Securities Market Development (Market Development Institute), an intensive two-week, management-level training program covering a full range of topics relevant to the development and oversight of securities markets. The Market Development Institute is intended to promote market development, capital formation, and the building of sound regulatory structures in emerging market countries. The ninth annual Market Development Institute was held in the spring of 1999, with 98 delegates from 61 countries in attendance. The SEC also offers a one-week International Institute for Securities Enforcement and Market Oversight (Enforcement Institute) for foreign securities regulators. This program promotes market integrity and the development of closer enforcement cooperation, and includes practical training sessions on SEC enforcement investigations, investment company and adviser inspections,

SECURITIES AND EXCHANGE COMMISSION

broker-dealer examinations, and market surveillance. One hundred and three individuals representing 49 countries attended the Enforcement Institute during FY 1999.

In addition, for the past three years, the SEC has offered specialized training programs covering enforcement and market development issues for smaller groups of securities professionals from the New Independent States of the former Soviet Union and Central and Eastern Europe. The cost of delivering these programs is fully reimbursable under an interagency agreement with the United States Agency for International Development (USAID).

In FY 1997, the SEC and USAID entered into interagency agreements that extend the SEC's reimbursable global technical assistance program. The global agreement allows any USAID mission worldwide to draw upon the SEC's assistance. For FY 2000, the SEC will continue its technical assistance program and will further its work under its interagency agreements with USAID. The SEC tracks funding only for participants funded through the SEC's interagency agreements and Participating Agency Service Agreements (PASAs).

Participants involved in the training generally obtain their own funding, either through self-funding, local USAID missions, the World Bank, nongovernmental organizations, or other sources. In fact, the majority of participants receiving SEC training obtain funding separate from the SEC's interagency agreements and PASA. The SEC does not track these sources of outside funding.

SOCIAL SECURITY ADMINISTRATION

1308 West High Rise, 6401 Security Boulevard • Baltimore, MD 21235
Office of International Programs: 410-965-3558 • www.ssa.gov

The **Social Security Administration (SSA)** manages the nation's social insurance program, which consists of retirement, survivors, and disability insurance programs, commonly known as social security. It also administers the Supplemental Security Income program for the aged, blind, and disabled. The Administration studies the problems of poverty and economic insecurity among Americans and makes recommendations on effective methods for solving these problems through social insurance. The Administration also assigns social security numbers to U.S. citizens and maintains earnings records for workers under their social security numbers.

* * * * *

Office of International Programs (OIP)

The OIP of the SSA arranges programs for briefings and consultations and coordinates visits between foreign government and nongovernment officials and the Social Security Administration on social security and social security related issues.

The **International Visitors Program** provides foreign social security officials and experts in related fields an opportunity to consult with SSA staff experts on a wide variety of issues. Programs of consultation and observation can be arranged for individuals and groups with an interest in developing and/or redesigning social security systems. Observation of various SSA operations at headquarters or in one of the field facilities may be scheduled, time permitting.

In FY 1999, SSA developed 74 programs of consultation and observation for a total of 635 international visitors (including 32 U.S. escorts) from 50 countries. (Data on escorts were not reported to the IAWG.)

SOCIAL SECURITY ADMINISTRATION

The Social Security Administration does not provide funding for international visitors traveling to the United States. Participants in SSA's International Visitors Program are generally sponsored by their own government or by one of the international aid organizations.

TENNESSEE VALLEY AUTHORITY

400 West Summit Hill Drive • Knoxville, TN 37902
 Media Relations Office: 865-632-8033 • www.tva.gov

The **Tennessee Valley Authority (TVA)**, a U.S. Government-owned corporation, was established by Congress through the TVA Act in 1933 to provide a reliable supply of power at the lowest feasible price and to strengthen the regional economy. TVA's core businesses of electricity generation, electricity transmission, and integrated resource management reflect the unique nature and mission of TVA. TVA's program activities include flood control, navigation development, electric power production, recreation improvement, and forestry and wildlife development.

* * * * *

The **International Visitors Program** of the TVA received 307 international visitors in 1999. Visitors went to TVA for information gathering (including technical information), study trips, etc. TVA has long been cooperative in sharing technical information with the world. TVA does not receive appropriated funds to support this program. Official government visitors are not charged any fees to participate. However, TVA may charge a nominal fee to privately sponsored visitors to cover costs of presentations.

TRADE AND DEVELOPMENT AGENCY

1621 North Kent Street, Suite 200 • Arlington, VA 22209-2131
 General Information: 703-875-4357 • www.tda.gov

The **Trade and Development Agency (TDA)** assists in the creation of jobs for Americans by helping U.S. companies pursue overseas business opportunities. Through the funding of feasibility studies, specialized training grants, business workshops, and various forms of technical assistance, TDA helps American businesses compete for infrastructure and industrial projects in emerging markets.

* * * * *

Orientation Visits, averaging approximately one week in duration, give U.S. suppliers a way to introduce their products to foreign procurement officials. TDA sponsors visits to the United States by foreign officials, including procurement and technical specialists, interested in obtaining American goods and services for specific projects. These officials represent both the public and private sectors. U.S. suppliers who participate can showcase their products and expertise, while making valuable international contacts -- all on their own home turf. In 1999, TDA sponsored 36 orientation visits that brought foreign procurement officials interested in American goods and services to the United States. The number of orientation visits in 2000 will probably be about the same or slightly higher.

UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT

1300 Pennsylvania Ave, NW • Washington, DC 20523
Center for Human Capacity Development: 202-712-0236 • www.usaid.gov

The **United States Agency for International Development**

(USAID) was established in 1961 as an independent government agency that provides social and economic development and humanitarian assistance to advance U.S. economic and political interests overseas. USAID’s participatory development activities lead to many direct benefits here in the United States. USAID focuses its activities in six primary areas: Economic Growth and Agricultural Development; Democracy and Governance; Education and Training (Human Capacity Development); Population, Health, and Nutrition; Environment; and Humanitarian Assistance. This report includes information regarding individuals who have traveled to the United States to receive training. All figures contained herein do not include the considerable number of foreigners trained by USAID abroad nor U.S. technical advisers traveling overseas.

Language from this Agency’s Strategic Plan is used throughout this report, and is in italicized text. Readers are encouraged to review the USAID Strategic Plan (www.usaid.gov/pubs/strat_plan) for a detailed review of where and how USAID works and the Agency goal areas.

* * * * *

Economic Growth and Agricultural Development

Broad-based, equitable economic growth is the most effective means of bringing poor, disadvantaged, and marginalized groups into the mainstream of an expanding economy. USAID helps the people of developing nations become participants in the economic and political lives of their nations, thus reducing global poverty and creating markets for the United States and regional

stability for all. USAID supports policy reforms in key sectors by strengthening economic and political institutions critical to good governance; by encouraging the effective functioning of markets; by supporting emerging markets and micro-enterprise; by investing in human resources; and by aiding projects to promote sustainable growth.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$24,877,456*	Not Reported	2,115**
National Interests Addressed:	Economic Prosperity; Humanitarian Response	

* * * * *

Democracy and Governance

Broad-based participation and democratic processes are integral elements of sustainable development. Because democratic regimes contribute to peace and security in the world and because democracy and respect for human rights coincide with fundamental American values, the Clinton Administration has identified the promotion of democracy as a primary objective of U.S. foreign policy. Democratization is an essential part of sustainable development. Faltering democracies and persistent oppression pose serious threats to the security of the United States and other nations. Stable democratic nations make the best trading partners for the United States and help promote international security.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$21,405,421*	Not Reported	1,608**
National Interests Addressed:	National Security; Law Enforcement; Democracy and Human Rights	

* * * * *

Human Capacity Development

The development of human capacity enables people to participate effectively in matters affecting their lives. Increasing human capacity through education, training, and improved access to information is essential for sustained social and economic progress. A nation's ability to contribute to the world economy, as well as to manage its own, is directly related to the development of its human resources. The Center for Human Capacity Development, in collaboration with regional bureaus and field missions, is responsible for implementing the Agency's goal of "Building Human Capacity Through Education and Training." The Center provides field support, technical leadership, and research to help nations and field missions improve education and training and to help develop stable, democratic countries with thriving market economics, and healthy, well-educated families.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$3,188,053*	Not Reported	204**
National Interests Addressed:	Economic Prosperity; Democracy and Human Rights; Global Issues	

* * * * *

Population, Health, and Nutrition

Stabilization of rapid population growth and improved health, nutrition, and education (particularly for mothers and children) are essential to sustainable development. USAID supports population, health, and nutrition programs in more than 67 countries in Asia, Africa, Latin America, the Middle East, and Eastern Europe. Programs focus on family planning, child survival, prevention of HIV/AIDS and other sexually transmitted infections, maternal health and nutrition, and health system reforms. The strategy for attaining USAID's goal in world population and health relies on achieving four closely related objectives: reduction in abortion and unintended pregnancies; reduction in child mortality; reduction in maternal mortality; and reduction in the transmission of sexually transmitted infections and HIV. Nutrition programs, often linked with the Agency's agricultural development activities, promote child survival and adult health goals via nutritional food development and distribution.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$8,223,634*	Not Reported	651**
National Interests Addressed:	Global Issues	

* * * * *

Environment

Environmental degradation threatens human health, undermines long-term economic growth and impairs critical ecological systems upon which sustainable development depends. Environmental problems increasingly threaten the economic and political interests not only of the country where the problems exist, but also of neighboring countries and the world at large. Both industrial and developing nations contribute to environmental deterioration. America's own well-being is directly threatened by worldwide environmental degradation through global climate change, biodiversity loss, and natural resource depletion. In the long run, we cannot escape the effects of this degradation. USAID's programs are designed to help meet these global challenges.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$7,412,201*	Not Reported	618**
National Interests Addressed:	Global Issues	

* * * * *

Humanitarian Assistance

The United States traditionally has viewed humanitarian assistance as both an act of national conscience and as an investment in the future. The United States has a long and generous tradition of providing both humanitarian and development assistance programs to the victims of man-made and natural disasters. *Small U.S. investments in crisis prevention and mitigation may reduce the need for more substantial investments in crisis resolution where U.S. interests are directly at risk.*

Food Programs: USAID’s Food for Peace programs (Public Law 480) support both humanitarian and sustainable development assistance in the form of U.S. agricultural commodities. The Public Law 480 program is operated jointly with the U.S. Department of Agriculture. The Title II program is managed by the Food for Peace office. It provides the vast majority of U.S. food assistance used to respond to emergencies and disasters around the world. Title II also provides resources to implement sustainable development programs targeted to improve the food security of needy people, either by the direct distribution of agricultural commodities or the use of local currencies generated by the sale of these commodities in the recipient country.

International Disaster Assistance: These programs support emergency relief and transition efforts, but are also used to improve the capacity of foreign nations to prepare and plan for disasters, mitigate their effect, and teach prevention techniques, thereby increasing the skills available locally to respond when disaster strikes. Funding also underwrites longer-term rehabilitation and recovery efforts

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$9,322,177*	Not Reported	801**
National Interests Addressed:	Humanitarian Response	

* * * * *

Note: The most accurate data available were used to calculate breakouts among these six programs for U.S.-based training for each country. Where data were not available, USAID-wide averages were used. In the aggregate, participant counts for each country, and for USAID as a whole, are believed to be accurate.

The number of U.S.-based participant trainees dropped during FY 1999. Training programs undertaken in each developing country appear to be increasing as it is significantly less expensive to provide in-country training instead of U.S.-based training. The nature of each U.S.-based training program was modified to encompass the actual needs of the employer in the developing country. A greater emphasis was made to identify “performance gaps” and to develop programs specifically designed to fill those gaps. Therefore, the number of training months increased accordingly to provide longer periods of training. (USAID training programs range in length from 1 month to 48 months, and include both technical and academic programs.) The actual cost of training for FY 1999 is estimated to be \$74,428,942. Data suggest that the increase in the total amount spent on U.S. training, relative to the significant decrease in trainees, can be explained by the increased program length, different structure of training, and level of cost sharing reported by individual contractors.

UNITED STATES INFORMATION AGENCY

301 4th Street, SW • Washington, DC 20547
 Public Information Line: 202-647-6575 • usinfo.state.gov

The **United States Information Agency (USIA)** is an independent foreign affairs agency within the executive branch of the U.S. Government. USIA explains and supports American foreign policy and promotes U.S. national interests through a wide range of overseas information programs. The Agency promotes mutual understanding between the United States and other nations by conducting educational and cultural activities. USIA maintains 190 posts in 142 countries. Overseas, USIA is known as USIS, the U.S. Information Service.

[Note: Pursuant to the Foreign Affairs Reform and Restructuring Act of 1998, the United States Information Agency was integrated into the Department of State on October 1, 1999. As a result of the merger, the International Broadcasting Bureau became an independent entity. The State Department's Bureau of Educational and Cultural Affairs and the Office of International Information Programs now administer the majority of the exchanges and training programs formerly administered by USIA. The language used in this entry describes the programs as they existed in FY 1999, when USIA was an independent agency. Programs currently listed under USIA in this report will be incorporated into the Department of State's entry in the IAWG's FY 2000 Annual Inventory of Programs. For now, readers of this FY 1999 report may visit the State Department's website at www.state.gov/index.html, for information on activities sponsored by the former USIA.

* * * * *

Bureau of Educational and Cultural Affairs

The mission of educational and cultural exchange is to promote friendly, sympathetic, and peaceful relations between the United States and other countries by fostering mutual understanding through a wide range of international programs, as authorized by the Fulbright-Hays Act. Mutual understanding is achieved by exposing foreign participants to U.S. values, language, ideas, and policies, and by increasing Americans' knowledge of foreign societies

and cultures, as well as international issues important to U.S. interests. The Bureau's programs are administered overseas in cooperation with USIS posts, Fulbright binational commissions, and U.S.-based nongovernmental organizations (NGOs). These institutions are essential to fulfilling the Bureau's mission.

Fulbright Academic Exchange Programs. The J. William Fulbright Educational Exchange Program, established in 1946 in the aftermath of World War II, has become an integral part of U.S. bilateral relations with some 140 countries. Over the past five decades, more than 230,000 people identified as emerging and current leaders in their academic fields have participated in the Fulbright Program. The Fulbright Program remains America's premier vehicle for intellectual engagement with the rest of the world.

With policy guidelines from the Presidentially-appointed J. William Fulbright Foreign Scholarship Board, the Bureau of Educational and Cultural Affairs plans and administers the J. William Fulbright Educational Exchange Program in cooperation with the bilateral Fulbright commissions and foundations operating in 51 countries, the U.S. academic community, NGOs, U.S. diplomatic missions, foreign governments, and educational institutions. Cooperating private institutions also play a critical role in the administration of the program and, among other things, help secure private sector collaboration and financial support.

Fulbright Academic Exchanges consists of five separate programs including the **Fulbright American Studies Program, the Fulbright Scholars, the Fulbright Students, the Fulbright Teacher Exchange, and the Hubert H. Humphrey Fellowship Program.** The Fulbright Program annually awards about 5,000 fellowships and scholarships to American and foreign university professors, school teachers, and graduate students to study, teach, lecture, or conduct research abroad and in the United States. The American Studies Program improves foreign participant understanding of the history, culture, and values of the United States, primarily through the hosting of short-term institutes for foreign teachers, university faculty, and government officials. Mid-career professionals from developing countries combine graduate-level academic training with practical professional experiences in the United States as Humphrey Fellows.

Countries critically important to U.S. security and economic interests strongly support the Fulbright Program and play an active role in shaping its goals and activities. Their support sometimes exceeds U.S. financial contributions. Consequently, Fulbright exchanges are among the more cost-effective of USG exchange activities. In FY 1999, the Fulbright Program generated approximately half of its gross support through private sector and NGO partnerships, as well as by cost sharing with foreign governments and other USG agencies. The Bureau's long-term goal for the program is to achieve parity in financial support from foreign government partners.

* * * * *

Global and Special Academic Programs. These programs represent another aspect of the wide range of international academic exchange programs authorized by the Fulbright-Hays

Act. Global Academic Programs provide programs and services, and disseminate information that help foster mutual understanding. Special Academic Programs represent mandated programs that reinforce the goals of the Fulbright-Hays Act in very specific ways or in specific parts of the world.

Global Academic Programs include **Institutional Linkage Programs**, **Educational Information and Resources**, and the **English Language Program**. The linkage programs include the **College and University Affiliations Program**, which promotes U.S.-foreign university partnerships through faculty and staff exchanges, and similar programs that fund partnerships with the New Independent States (NIS). Educational Information and Resources promotes U.S. higher education by advising prospective foreign students, scholars, ministry officials, and others on U.S. study opportunities. A network of 450 advising centers worldwide responds to 4 million inquiries annually, providing information to 60 percent of newly arriving foreign students. The nearly 500,000 foreign students in the United States make a major contribution to the U.S. economy, resulting in over 100,000 U.S. jobs and an export services industry worth \$8.9 billion. Finally, English Language Programs, including the **English Teaching Fellows Program** and the **English as a Foreign Language Fellows Program**, support efforts to improve overseas target audiences' knowledge of the language and culture of the United States. Cost sharing is fundamental to all projects. Proceeds from direct teaching programs and the sale of English teaching materials are recycled.

Special Academic Programs include the **Edmund S. Muskie Fellowship Program**; the **American Overseas Research Center (AORC) Programs**; the **South Pacific, East Timor, and Tibet** special exchanges; and the **Disability Exchange Clearinghouse**. The Muskie Program provides scholarships for study and internships in the United States to mid-career professionals from the NIS and the Baltic states. The Bureau of Educational and Cultural Affairs supports American Overseas Research Centers through a grant to the Council of American Overseas Research Centers (CAORC). The Bureau has supported ORCs and graduate and postdoctoral study by U.S. scholars since 1961.

Special exchanges for the South Pacific, East Timor, and Tibet provide scholarships for undergraduate, postgraduate, and professional exchanges. Finally, the Disability Exchange Clearinghouse, developed through a cooperative agreement with Mobility International USA (MIUSA), helps ensure that international exchange opportunities are adequately promoted among individuals with disabilities.

The International Visitor Program (IVP). American embassies invite selected current and emerging foreign leaders in government, business, trade, media, education, science, and other fields to visit the United States under the International Visitor Program. Participants meet with their U.S. counterparts and obtain firsthand knowledge about the United States, its people, politics, and culture. Simultaneously, the program provides Americans with opportunities to network and develop contacts with their overseas counterparts.

Officially established in 1948, the International Visitor Program emphasizes both professional and cultural learning experiences addressing the perceptions of U.S. society held by foreign decision makers and opinion shapers.

Typically, International Visitor Program alumni advance to positions of authority and responsibility in their countries. In 1999 the heads of government of Germany, France, Hungary, the Netherlands, Ukraine, Korea, and Colombia were among the more than 185 current and former foreign chiefs of state who have participated in the IV program. More than 600 cabinet-level ministers around the world are counted as IV alumni. In the United Kingdom, 19 alumni held cabinet or ministerial-level positions, including the prime minister. In Russia, two deputy prime ministers and the national security adviser (former speaker of the Russian parliament) are alumni. Twenty-five members of the Japanese parliament are program alumni.

The International Visitor Program benefits from a nationwide network of independent nongovernmental and community-based organizations. These nonprofit groups provide a variety of services, including professional programs and cultural activities. These 98 organizations, in 43 states, depend on a corps of 80,000 individuals who serve as professional resources and mentors -- all of whom contribute their time and services to meet with the International Visitors. Significant cost sharing for the program is generated at the local level from individual, corporate, state, and local government support.

* * * * *

Professional and Citizen Exchange Programs. To increase the understanding and acceptance of U.S. strategic goals by foreign decision makers, opinion leaders, and the general public, the Professional and Citizen Exchange Programs expose participants to American values, ideas, models, and traditions. This exposure provides target audiences with accurate and authoritative information; these audiences then share this information with others in their societies.

Citizen exchanges provide flexible tools for dealing with often contentious U.S. foreign policy issues. They bolster U.S. strategic goals and traditional alliances through merit-based grants to nonprofit institutions, including local community organizations, professional associations, and universities, aimed at addressing these goals. The grants involve a wide variety of American citizens, from judges to scientists to grass-roots volunteers, from artists to business leaders to high school students. The impact of this program is far-reaching, as many thousands of U.S. and foreign citizens exchange ideas, address conflicts, and construct solutions to global problems.

Professional exchanges expose foreign citizens to American policy, values, and systems, and allow Americans to share their expertise and broaden U.S. society's participation in global issues and events. Themes address policy goals, bilateral and regional objectives of U.S. missions, and the concerns of Congress. Moreover, these exchanges provide fertile ground for public-private

partnerships, such as creative joint efforts with the American Council for Young Political Leaders, Sister Cities International, and Partners of the Americas.

Cultural exchanges support American overseas presence in visual arts, performing arts, film, and literature, with emphasis on regions with little knowledge of the United States and its creativity. Cultural exchanges demonstrate the vitality of U.S. society. Tools include exhibitions and performances funded by the private sector, U.S. participation in international arts festivals and exhibitions, partnerships with the film industry to provide American feature films for international festivals and official ambassadorial screenings, and artist exchanges.

Youth exchanges, primarily for secondary school students, largely consist of an academic-year in the United States for young people from the former Soviet Union and Germany. Living with American host families across the nation opens the door to understanding the U.S. populace and system of government. Foreign youth return home speaking English and having affection for America, democracy, and American life. Young Americans also study and live in Germany and participate in short-term exchanges in the NIS.

Special professional/cultural programs feature programs of special interest to the U.S. Congress. The **Congress-Bundestag Youth Exchange Program (CBYX)**, for example, is an official exchange program of the governments of the United States and Germany. Since FY 1983, both national legislatures have provided funding to enable the participation of more than 10,700 American and German high school students and young professionals to improve their career skills through formal study and work experience in one another's country. Other special programs include the **Mike Mansfield Fellowship Program**, the **Central European Executive Education Program**, the **U.S./Mexico Conflict Resolution Center**, the **Institute for Representative Government**, the **1999 Women's World Cup**, the **Special Olympics**, and the **National Youth Science Camp of the Americas**.

Interagency Appropriation Transfer Programs. Under the auspices of the Freedom for Russia and Emerging Eurasian and Open Markets Support Act of 1992, known as the Freedom Support Act, USIA administers a host of training and exchange programs geared toward providing current and emerging NIS leaders with the experience and skills necessary to help build democratic infrastructures and market economies in their societies. USIA programs target high school, university, postgraduate, and professional audiences to embrace the widest possible number of emerging leaders. The length and scope of these programs range from short-term visits to full academic degree programs. These programs include: **Graduate Exchanges, Undergraduate Exchanges, Young Leaders Program, Junior Faculty Development Program, Fellowships in Contemporary Issues, Future Leaders Exchange Program (FLEX), Teacher Exchange Program, Freedom Support Grants, Community Connections, Presidential Management Training Initiative, Productivity Enhancement Program, Professional Training Programs,**

U.S./European Union Democracy Programs, University Partnerships, Secondary School Linkage Program, Teaching Excellence Awards, Civics for Secondary Education, and the Internet Access Training Program (IATP).

Freedom Support Act programs provide opportunities for citizens of Russia and the New Independent States to familiarize themselves with the U.S. educational, political, and economic systems and the American way of life by visiting the United States; equip a broad base of current and future leaders and professionals in the NIS with specialized skills and practical experience needed to develop and support free enterprise and democratic governance; and build sustainable U.S.-NIS personal and institutional linkages that can facilitate trade, investment, technology transfer, and cooperation on global issues of mutual concern.

The **Ron Brown Fellowship Program** was established in 1994 as the Central and Eastern European graduate fellowship program. It is an assistance program funded under the Support for Eastern European Democracy (SEED) Act of 1989. The program provides potential future leaders from Central and Eastern European countries with education and training in fields considered critical to assisting in their transition to democratic practices and free-market economies.

Citizen Exchange Programs funded under the SEED Act (**Freedom Grants**) provide training to an array of business and media professionals in Central and Eastern Europe. USIA's Office of International Visitors has also hosted visitors from Bosnia-Herzegovina, Croatia, and Serbia-Montenegro under the auspices of SEED. Participants primarily included representatives of the ruling and opposition political parties, the media, academia, and NGOs. The IV Office conducted group projects -- planned by USIA staff in collaboration with nongovernmental programming organizations -- that focused on political pluralism and ethnic tolerance in the United States. Program participants also examined media coverage of elections. Finally, **English Language Programs** under SEED support the transition to a market-based economy by developing and improving the capacity of English language teachers in Central and Eastern Europe. These programs provide students with the appropriate knowledge of English needed to function in the areas of business and government.

The **Cyprus-American Scholarship Program (CASP)**, established in 1981, assists in the economic and social development of Cyprus through the provision of scholarships for Cypriot graduate and undergraduate students to study in the United States and through short-term professional training for Cypriot leaders. Since 1989, USIA has signed annual Interagency Agreements with the U.S. Agency for International Development for the transfer of funds and responsibility to USIA for the implementation of the CASP program. The Cyprus Fulbright Commission and the America-MidEast Educational and Training Services, Inc., administer the program.

Other Appropriation Programs. The **Eisenhower Exchange Fellowships Program**, created in 1953 in honor of President Dwight Eisenhower, promotes international understanding and productivity through the exchange of information, ideas, and perspectives among emerging leaders throughout the world. The Eisenhower Fellowship Act of 1990 authorized a permanent endowment for the program and established a trust fund. The 1992 Appropriations Act provided \$5 million to establish the endowment and to appropriate the interest and earnings to Eisenhower Exchange Fellowships, Inc. In 1995, the Appropriations Act made an additional payment of \$2.5 million to the endowment. The Eisenhower Program brings professionals who are rising leaders in their respective countries to the United States, and sends their U.S. counterparts abroad on a program custom-designed for each participant. Three major components comprise the fellowships program: (1) the Multi-Nation Program, which brings one Fellow each from two dozen countries to the United States, (2) the Single Nation or Single Area Program, which enables 10 or more Fellows from a single country or area representing a variety of disciplines to visit the United States, and (3) the USA Program, which sends U.S. citizens abroad primarily to study in the emerging democracies of Eastern Europe.

The **Center for Cultural and Technical Interchange Between East and West (East-West Center)**, established by Congress in 1960 as a national and regional educational research institution, promotes better relations and understanding between the United States and nations in the Asia-Pacific region through cooperative study, training, and research. The Center addresses issues of contemporary policy relevance in U.S. relations with Asia and the Pacific. It offers an interdisciplinary research program, dialogue and professional enrichment programs, and educational programs and opportunities, including undergraduate and graduate degree student programs. Approximately 1,000 scholars, government and business leaders, journalists, young political leaders, and other professionals participate each year in Center programs.

The **Dante Fascell North-South Center**, established in 1984, serves as a national and hemispheric source of information and analysis about Western Hemisphere policy issues. It promotes better relations between the United States and the nations of Latin America, the Caribbean, and Canada by combining programs of public policy, cooperative study, research, and training. In 1990, Congress authorized the North-South Center Act, which provided federal funding for the Center. The Center contributes to more effective policy making on social, political, and economic issues through publications, conferences, research, graduate-level education and training, policy issues discussion, and the **Capacity and Institution Building Program**, which provides in-country education and training.

The **Israeli-Arab Scholarship Program**, funded by an interest-paying, Congressionally-mandated endowment established in 1991, enables highly qualified Arab citizens of Israel to study in institutions of higher learning in the United States. The program provides graduate education and an overview of American society and culture. Students are selected through a merit-based competition administered by the U.S. Embassy in Tel Aviv.

The Bureau of Information

The Bureau of Information promotes the national interest by providing innovative information products and services to the Agency's overseas offices in order to increase international support for U.S. policies and understanding of U.S. society. The Bureau directs the U.S. Speakers, Specialists, and the Professionals-in-Residence programs, implementing them through individual travel abroad, Digital Video Conferencing (DVC), and Teleconferencing (TPC).

U.S. Speakers, Specialists, and the Professionals-in-Residence Programs.

U.S. Speakers/Specialists who travel abroad serve from two days to two weeks, and are drawn from both the public and private sectors. Individuals are recruited to speak and consult on such matters as international security, trade policy, narcotics, the environment, and U.S. society and values. Professionals-in-Residence are recruited for tours of up to ten months as consultants to media outlets, government ministries, educational institutions, parliaments, and other organizations promoting the development of democratic institutions. Tele- and video-conference program links to foreign audiences enable American officials and experts to participate in, or even initiate, foreign press conferences, lectures, interactive seminars, and one-on-one interviews. (NOTE: Totals for participants are estimates. Under the U.S. Speakers/Specialists Program, one speaker may be programmed in multiple countries and on several different topics. Also, these figures do not include in-country training participants.)

The Bureau of Broadcasting

The Bureau of Broadcasting utilizes effective and timely methods to reach a global audience. The U.S. Information Agency's radio and TV services -- the Voice of America, WORLDNET Television and Film Service, and Radio and TV Marti -- broadcast world, regional, and U.S. news; commentaries; editorials; roundtable discussions; features; and programs about the United States, its people, and its foreign and domestic policies.

International Media Training Program. The International Media Training Center (IMTC) is an element of the Office of Affiliate Relations, Media Training, and Research of the International Broadcasting Bureau, USIA. The IMTC actively supports the mission of developing and maintaining democracy throughout the world through the development of a free and independent media. The IMTC places special emphasis on providing training to indigenous media of emerging or developing democracies. IMTC provides programs in media-related skills and subjects to key media personnel. Programs generally consist of workshops held in the host country

UNITED STATES INFORMATION AGENCY

or in Washington, D.C. Workshops include topics such as sales, management, news writing, editing, production, and the concept of balanced newscasts. Each workshop consists of approximately 8 to 10 participants.

UNITED STATES INSTITUTE OF PEACE

1550 M Street, NW • Washington, DC 20005
 Public Affairs: 202-457-1700 • www.usip.org

The **United States Institute of Peace (USIP)** is an independent, nonpartisan federal institution created and funded by Congress to strengthen the nation’s capacity to promote the peaceful resolution of international conflict. Established in 1984, the Institute has its origins in the tradition of American statesmanship that seeks to limit international violence and to achieve just peace based on freedom and human dignity. The Institute seeks to expand knowledge about ways to achieve a more peaceful world through an array of programs, including those listed below. The Institute is governed by a bipartisan, 15-member board of directors, including ex officio members in federal service and 11 individuals appointed from outside federal service by the President of the United States and confirmed by the Senate.

The Institute’s legal counsel does not consider the Institute to be an agency, establishment, or instrumentality falling within the parameters of Executive Order 13055. However, the Institute’s policy is to cooperate to the extent possible with governmental requests for information.

* * * * *

The United States Institute of Peace’s **Balkans Initiative** aims to promote peace and reconciliation in Bosnia and Herzegovina, Kosovo, and Croatia, where violent conflicts have been ended by internationally supported peace agreements; to prevent conflict and instability in other areas, including Serbia, Montenegro, Macedonia, and Albania; to build consensus on Balkans policy in Washington, D.C., through discussion among administration, Congressional, and nongovernmental players; and to develop greater understanding among the American people of the U.S. role in preventing conflict and maintaining peace in the Balkans.

The Institute sponsors in-depth analyses of key policy issues -- like repression in Serbia, conflict prevention in Macedonia and Montenegro, and reintegration in Bosnia and Croatia -- and seeks to prevent and resolve conflict through grants to civil society organizations, training in

cooperation with groups established in the region (including the UN, NATO, and the U.S. Army), and facilitated dialogues. Programs have included all major ethnic groups and religions in the region.

* * * * *

The **Jennings Randolph Fellowship Program** helps to fulfill the Institute's mandate in building a worldwide network of international affairs experts who can contribute to resolving the daunting problems of the post-Cold War world. The program supports the basic mission of the Institute by seeking to develop knowledge about the sources and nature of international conflict; about ways to prevent, manage, and resolve violent conflicts on the world scene; and about how to promote reconciliation and sustain peace. Through the projects it supports, the program seeks to further the Institute's goal of supporting policy assessments and applying such knowledge to discussion of policy; to the facilitation of dialogue among competing parties in international conflicts; to the training of practitioners; to the education of teachers and students; and to improving public understanding of international affairs.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants

* * * * *

International Conflict Resolution Skills Training (ICREST) seminars are intended to increase the store of knowledge and practical skills available to political, military, and humanitarian professionals for preventing, managing, and working toward the resolution of violent international conflict. Drawing on the best national and international talent from governments, research institutions, academia, international and nongovernmental organizations, ICREST participants are exposed to leading methods and techniques. Seminars, which are held in Washington and abroad, typically include both governmental and nongovernmental professionals from the United States and abroad. In addition to sharing expertise and lessons learned with one another, teaching methods include presentation and discussion sessions, working groups, case-studies, role-plays, and simulation exercises. In this manner, participants are provided an opportunity to: (1) apply concepts and principles when developing strategies for dealing with complex problems, (2) test new techniques and further practice particular skills, and (3) analyze conditions under which one or another conflict resolution approach may be most appropriate.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants

National Interests Addressed:	Law Enforcement; Global Issues; National Security; Humanitarian Response	

* * * * *

The **Research and Studies Program** analyzes, conceptualizes, and disseminates policy-relevant knowledge on salient issues affecting international conflict and peace-building. It bridges the gap between cutting-edge academic research and the pressing concerns of the policy community. A broad range of short- and long-term projects explore a spectrum of conflicts and their underlying causes. In so doing, they illuminate the instruments of diplomacy, civil society, and the rule of law in a rapidly changing and complex information age.

The Research and Studies program utilizes a combination of internal and external experts to help create analytical frameworks for long-term projects. It also convenes a range of topical workshops, conferences, and seminars, which bring together both practitioners and academics, governmental and nongovernmental officials, and domestic and foreign audiences.

All of the program's work is closely integrated with other Institute efforts, most notably the Institute's special initiatives, as well as the Fellowship, Grant, Education, and Training Programs and the Office of Communications.

U.S. Government Funding	Number of U.S. Participants	Number of Foreign Participants
\$1,008,000	21	22

* * * * *

The **Rule of Law Initiative** focuses on the proposition, as declared by the 52-nation Organization for Security and Cooperation in Europe (OSCE), that "societies based on...the rule of law are prerequisites for...the lasting order of peace, security, justice, and cooperation." The Rule of Law Initiative seeks to build upon and refine principles on the rule of law articulated by the OSCE and other bodies and to provide practical guidance for their implementation. Program activities include research, conferences, consultation, and writing focusing on such issues as transitions from authoritarian to democratic governance, the treatment of war crimes, principles of constitutionalism, and the translation of international standards or norms into national laws and practices.

\$372,000	10	0
National Interests Addressed:	Law Enforcement; Economic Security; Democracy and Human Rights	

* * * * *

The **Special Initiative on Religion, Ethics and Human Rights (REHR)** was established by the Institute in 1989 to explore the significance of religion and ideology as both sources of conflict and sources of peace. The program was suspended in FY 1999.

* * * * *

The Institute's **Grant Program** has two principal grantmaking components (unsolicited grants and solicited grants). Through this program the Institute offers financial support for research, education, and training, and the dissemination of information on international peace and conflict resolution. It is not feasible to extract funding and participant information targeting only the international exchange and training components of USIP grants. Therefore, data regarding grants for this program are not included in this inventory.

UNITED STATES POSTAL SERVICE

1735 Lynn Street, Suite 2044 • Arlington, VA 22209
 Telephone: 703-292-3635; Fax: 703-292-4030; • ewittman@email.usps.gov

The **United States Postal Service (USPS)** provides mail processing and delivery services to individuals and businesses within the United States. The Service is committed to serving customers through the development of efficient mail-handling systems and operates its own planning and engineering programs. It is also the responsibility of the Postal Service to protect the mails from loss or theft and to apprehend those who violate postal laws.

* * * * *

Through its **Visitors Program**, the United States Postal Service arranges appointments, briefings, and technical discussions and coordinates visits of its postal facilities for representatives of foreign postal administrations interested in studying the USPS policies and programs and in getting information on technical developments in the area of postal automation. The foreign postal representatives come from all parts of the world with a majority coming from the East Asia/Pacific area, the Western Hemisphere area, and the European area. The average length of stay is from one to two days.

WOODROW WILSON INTERNATIONAL CENTER FOR SCHOLARS

1300 Pennsylvania Avenue, NW • Washington, DC 20004-3027
 Public Inquiries: 202-691-4188 • wwics.si.edu

The Woodrow Wilson International Center for Scholars

(WWICS) is a public/private institution. As a nonpartisan research institution that investigates important issues in the humanities, social sciences, and public policy, the Woodrow Wilson Center holds a unique place in the United States. Established by Congress in 1968 as the nation's official and living memorial to the 28th President, the Center provides a link between the worlds of ideas and policy making. An international institute for advanced study, it is an intellectual haven where scholars, policy makers, and business leaders investigate and discuss public policy issues, their deep historical backgrounds, and their effect on the world.

* * * * *

The Wilson Center emphasizes three major themes: governance, the United States' role in the world, and future national challenges. Fellowships at the Center largely, though not exclusively, focus on these thematic areas or on issues that are of interest to and provide critical context for the world of public affairs. In FY 1999 the Wilson Center hosted a total of 141 scholars on programs lasting from 1 to 10 months. Fifty-five percent of the scholars in residence at the Center in FY 1999 were researchers and professionals from outside the United States.

International scholars come to the Wilson Center on a variety of programs, all of which are aimed at advanced Ph.D. students, postgraduate researchers, and practitioners of equivalent rank. These programs include the Center's Fellowship and Public Policy Scholar programs, which bring distinguished scholars and practitioners to the Center for 3 to 12 months to conduct their own research. In addition, the Center's regional programs bring international scholars there for shorter periods of time.

The **Kennan Institute** funds young scholars from the former Soviet Union for six-month research scholarships in Washington, D.C. Private funds allow the Kennan Institute to support one-month exchange stays for scholars from any country who need to use the resources of the Washington, D.C., area to complete their research on the former Soviet Union. In addition, the **Latin America Program** uses private funds to bring junior scholars to the United States for six-month periods; and the **East European Studies Program** cooperates with the Central European University and the ACLS to host Short-term Scholars (two-month grants for advanced Ph.D. students) and Research Scholars (three-month grants for postdoctoral research).
