## FISCAL YEARS 92–99

### SUMMARY

During FY92–99, Congress appropriated more than \$1.1 billion for the programs managed by the Office of the Congressionally Directed Medical Research Programs (CDMRP). As steward of the appropriated funds, the Department of Defense (DOD) is responsible and accountable for the disbursement of each taxpayer dollar. Based on directives of the Congress and the DOD, in addition to recommendations from the Integration Panels, research priorities are established and implemented. These funding strategies and program emphases guide the review of proposals submitted to the CDMRP and have resulted in 2,770 awards in FY92–99. An overview of the appropriations, proposals received, and awards made for FY92–99 is shown in Table A–1. A detailed breakdown for how each taxpayer dollar was spent can be found in Appendix B for the FY99–00 programs and in the September 1999 DOD CDMRP Annual Report for FY92–98 programs.
