

Fifth Annual RadWaste Summit – September 6-9th, 2011

From: Shelley Cimon

To: All Hanford Advisory Board Members

The volume of information from this Summit was just too great. Below is a list of topics and presentations that I thought you would be most interested in seeing. My intent is to have everyone get their arms around a more global (international and national) perspective of the management of nuclear material.

Tammie Holm will e-mail the following presentations. Just ask her. Some power points were 30 pages long – just too much to copy. Please see the list below and let her know what you are interested in.

Thanks – Shelley
