

# AcuMine Collision Avoidance Safety System (ACASS)

The Unique Safety System for Heavy Vehicles

## THE PROBLEM

## THE OPTIMUM SOLUTION

### Keep Haulage Vehicles Safe with ACASS

- Automatically:
  - Assesses level of risk
  - Warns operator in time to prevent accidents
  - Provides uninterrupted 360° view in all adverse conditions, fog, dust and night.
  - Maps roads and context areas
  - Supplies Aerial view of working trucks
  - Prevents False alarms
- Fleet Management & Logging system to replay incidents identify risks hazards speeding & training requirements
- Decentralised Operation:
  - Guarantees total detection and full functionality of whole mine
  - Eliminates inherent delays/dropouts
- Fully redundant, robust, easy to retrofit and maintain in any vehicle
