Challenge Goals:

- To produce a MITA 3.0 compliant shared service solution to assist States in conducting screening of enrolling providers and the revalidation of existing providers to determine if the provider should become or remain a Medicaid/CHIP provider.

- Have the solution be successfully implemented in multiple State Medicaid programs.

- To demonstrate that open source technology can reduce costs to States and the federal government.

- To assist in better driving alignment of the Medicaid Information Technology Architecture (MITA) framework to the Information and Technology Architecture levels.

Start Date: May 30, 2012, 6:00 PM EST

Provider Screening Challenge Team:

- NASA (http://community.topcoder.com/coeci/)

- Harvard Business School

- TopCoder (http://community.topcoder.com/coeci/)

- Minnesota

- States

- CMS (www.cms.gov)

- Partnership Fund for Program Integrity Innovation (http://partner4solutions.gov/)

Funding: Partnership Fund for Program Integrity Innovation
