Glen Canyon National Recreation

Zebra Mussel-Free Certification

Save Time and Self-Certify!

You are required to comply with Glen Canyon National Recreation Area's zebra mussel prevention program before you may launch your boat into Lake Powell. For most boaters, this will be a simple process.

TT 9 1 4		1 - 1 6		1 1.
Here's what you	l need to d	io before	you can .	iaunch:

- Look at the questions on the other side of this page. (Over)
- If your answers to these questions tell you to get your boat professionally decontaminated before launching in Lake Powell, you must do so!
- If your boat is ready to launch now, just complete the self certification statement. Be sure to display the certificate on your dashboard while your vehicle is parked in Glen Canyon National Recreation Area! You can use the certificate all summer long, but you must ensure that your boat is clean each time you launch in Lake Powell. Don't let zebra mussels hitchhike on your boat!

In January 2007, quagga mussels were discovered in Lakes Mead, Mohave, and Havasu. This is the first time zebra or quagga mussels have been discovered west of the Rocky Mountains. Zebra and quagga mussels have already invaded much of the Eastern U.S.

Fortunately, Lake Powell is free of zebra and quagga mussels. It depends on you – and all of us – to keep it this way.

Zebra and quagga mussels can be spread by your boat, but they cannot live out of the water for long periods of time. Simply washing boats and equipment and allowing it to fully dry is an effective way to reduce the risk of spreading these aquatic hitchhikers.

Zebra mussels and other harmful plants and animals may be hiding under your trim tabs, in your engine, or even on your anchor chain! Zebra and quagga mussels are microscopic in their earliest life stages, making them impossible to detect with a visual inspection.

Zebra and quagga mussels have the potential to:

- Disrupt the food chain and fishing
- Foul facilities like docks and ramps
- Encrust boats and clog engines
- Litter beaches with sharp smelly shells

If you have any questions, check with a park ranger or call 928-608-6404.

Glen Canyon National Recreation

Zebra Mussel-Free Certification

Save Time and Self-Certify!

Has your boat been used in Lakes Mead, Mohave or Havasu or waters east of the Rocky Mountains in the last 30 days?

You are ready to launch! Sign the certificate on page 4 and display it on your dashboard at all times while your vehicle and boat trailer are in Glen Canyon.

Was your boat and trailer thoroughly washed and allowed to completely dry for at least 5 days since you last launched? You must have removed all dirt, organic material, or grit from the boat. You must have drained and flushed all live wells and bilge areas. The boat must be allowed to dry for at least 5 days.

You are ready to launch! Sign the certificate on page 4 and display it on your dashboard at all times while your vehicle and boat trailer are in Glen Canyon.

You are required to get a professional decontamination at any Glen Canyon approved Zebra Mussel Station.

Decontamination locations are on page 3 of this packet.

Zebra Mussel Decontamination Stations in Glen Canyon

Antelope Point Decontamination Station is located in the Antelope Point Marina Maintenance Yard. An escort is required, check-in at the entrance station.

Bullfrog Decontamination Station is located next to the Sinclair gas station approximatly one mile southwest of the entrance station.

At Halls Crossing, continue north on Hwy 276 past the marina and take a left to enter the dry boat storage yard. Go into the dry boat storage office in order to redeem your boat wash coupon.

Glen Canyon National Recreation

Zebra Mussel Prevention Program

This Certificate Must Be Placed On Your Dashboard

MUSSEL FREE

Failure to display this certificate on the dashboard of your vehicle while parked with an empty boat trailer could result in a citation

Zebra and Quagga Mussels Pose a Major Threat to Lake Powell!

Mussels in Lake Powell could:

- Disrupt the food chain and fishing
- Foul facilities like docks and ramps
- Encrust boats and clog engines
- Litter beaches with sharp smelly shells

These invasive species from Eastern Europe are spreading at a fast rate across the United States. They are transported to new areas attached to boats or harbored in tiny amounts of water.

I affirm that that my vessels do not threaten Lake Powell with zebra or quagga mussels.
