

Office of Scientific and Technical Information

U.S. Department of Energy

**A Wealth of Research Information
From the Manhattan Project to the Present**

OSTI

- Leads DOE's E-gov initiatives for R&D information dissemination
- Coordinates DOE's scientific and technical information program
- Provides state-of-the-art information collection, access, and delivery
- Protects national security-related information
- Provides stewardship for legacy classified and unclassified documents
- Represents DOE in interagency and international information exchanges
