NOTE: (1) Totals may not equal the sum of the components due to independent rounding. Percentages are also calculated on numbers subject to independent rounding. (2) For oil, both the Federal OCS and U.S. Total are based on the sum of crude oil and condensate. DOE data is multiplied X 30 to get the monthly figure. (3) For gas, Federal OCS is based on the sum of gas well gas and casinghead gas, including vented and flared gas. U.S. gas is based on Marketed Production. ** Vented and flared for U.S. gas was not available for CY 2010 at the time of publication of this table. (4) Monthly data is subject to revision for both Federal and Total U.S.
