

2010: Emphasis on
Health IT solutions
to improve patient
care and establish
interoperability

The vehicles for
this will be EHR
(and EDR), Vista
Imaging, and
Telemedicine
(Telehealth)

Our role is to provide
the infrastructure to
make that possible:
Upgraded routers,
bandwidth, and
upgraded servers
and software

Congratulations
and ***thank you***
for completing
Interconnection
Security
Agreements!
