## Please Send Us Your Feedback!

The **Install. Inspect. Protect. Campaign** is a new campaign developed by the United States Fire Administration for our Fire Service partners and all organizations and communities interested in encouraging residents to install working smoke alarms and residential fire sprinklers, which can help save the lives of residents and firefighters, practice fire escape plans, and perform a home safety walk-through to remove fire hazards from the home. Working together, we can help save lives.

This Campaign Toolkit disc includes campaign and media outreach materials that can also be found on the campaign Web site: [www.usfa.dhs.gov/smokealarms](http://www.usfa.dhs.gov/smokealarms). The materials are free and can be copied as many times as you would like.

We would love to hear from you. Our materials are produced to help you reach out into the community through presentations and work with the media. Please provide us with the following information, including any suggestions or comments about the **Install. Inspect. Protect. Campaign**.
