

National Institutes of Health Office of Science Education Curriculum Supplements

The *NIH Curriculum Supplement Series* are interactive teaching units that combine cutting-edge science research discoveries from the National Institutes of Health, one of the world's foremost medical research centers, with state-of-the-art instructional materials. Each supplement is a teacher's guide to two weeks of lessons on science and human health. This series (is):

- FREE to Science Teachers and School Administrators
- Consistent with National Science Education Standards
- Targets grades K-12
- Incorporates real scientific data

Alignment of the supplements to individual state standards in science, mathematics, English Language Arts, and (when available) health are available for download. More state alignments will be added as they are completed. Supplements can be found at <http://science.education.nih.gov/>.
