

Dear Health Care Professional:

EMD Serono, Inc. has made a decision to discontinue marketing of Luveris[®] (lutropin alfa for injection) 75 IU in the United States. The company has made this decision due to the level of customer demand for this product, and not due to any efficacy or safety concerns.

When current supply is exhausted, but no later than July 16, 2012, EMD Serono will cease shipment of the Luveris[®] 75 IU to wholesalers and pharmacies. This will allow health care professionals to continue therapy for patients immediately in need, while allowing time to plan alternate treatments for future patients.

EMD Serono continues to offer all other drugs in the portfolio, including Gonal-f[®] (follitropin alfa for injection), Cetrotide[®] (cetrotorelix acetate for injection) and Ovidrel[®] (choriogonadotropin alfa injection).

On behalf of EMD Serono, I regret any inconvenience this business decision may have to your practice, and we very much appreciate your support for Luveris[®] and the patients we have had the honor of helping. If you have any questions, you should contact EMD Serono Medical Information representatives at 1-888-275-7376.

Sincerely,

James Hoyes
President
EMD Serono, Inc.
