

June 1, 2012

Dear Valued Customer,

This letter is to inform you of an important update regarding **CHROMITOPE® Sodium (Sodium Chromate Cr 51 Injection USP)**.

CHROMITOPE will be available only through **July 15, 2012**, which will be the final selling date. Once the current residual stock is depleted, the product will no longer be available from Bracco Diagnostics Inc. **CHROMITOPE will be discontinued, effective July 15, 2012.**

Bracco is committed to our customers and the patients we serve. However, owing to the significant decline over the last several years in medical examinations requiring CHROMITOPE, and the recent discontinuation of Bracco A-C-D Solution Modified™, which is the complementary product for the performance of those examinations, we can no longer offer CHROMITOPE to the healthcare community.

Product Code	Product Name/Description	Clinical Use Description	Additional Commentary
05920	Chromitope Sodium 1.00 mCi	Chromitope Sodium (Sodium Chromate Cr 51 Injection USP) is indicated for use in determining red blood cell volume or mass, studying red blood cell survival time (in conditions such as hemolytic anemia), and evaluating blood loss.	There are no substitution products available

If you have any questions or require additional assistance, please contact us. Thank you for your ongoing support of Bracco and our clinically valued products.

Regards,

Kim Giordano  
Vice President and General Manager
