

Wisconsin is

- a very low cost state
- in health care
- has a low % of uninsured
- already has  
the home based care  
& community based care  
that will work
- has the best  
worker comp plan in the  
48 state jurisdictions

Without some add long  
term <sup>core</sup> ~~term~~ <sup>components</sup>

eg voluntary reduce  
buyers to pre purchase  
LTD gas of nursing  
home care

there will be nothing to  
gate persons.

~~Drug tax~~

Prescription drugs went up 100%  
(esp. Catastrophic)

but so the major there will  
pay great the insurance  
& small business injury

Wis needs solidly major long term

a state to opt out on charging workers comp

Dr. Wisconsin the  
Unions don't matter.  
The grassroots workers  
now can get  
any doctor and  
they get all cases paid  
for.

You are offering them  
this.

Don't ask me to  
vote for a package  
that doesn't fix  
these two problems.

Oh
