type and whose language and grade levels are of a similar type to those which the program is intended to address, after consultation with appropriate private school officials, provision has been made for the participation of such children on a basis comparable to that provided for public school children;

"(3) student evaluation and assessment procedures in the program are valid, reliable, and fair for limited English proficient students, and that limited English proficient students who are disabled are identified and served in accordance with the requirements of the Individuals with Disabilities Education Act;

"(4) Federal funds made available for the project or activity will be used so as to supplement the level of State and local funds that, in the absence of such Federal funds, would have been expended for special programs for children of limited English proficient individuals and in no case to supplant such State and local funds, except that nothing in this paragraph shall be construed to preclude a local educational agency from using funds under this title for activities carried out under an order of a court of the United States or of any State respecting services to be provided such children, or to carry out a plan approved by the Secretary as adequate under title VI of the Civil Rights Act of 1964 with respect to services to be provided such children;

"(5) the assistance provided under the application will contribute toward building the capacity of the applicant to provide a program on a regular basis, similar to that proposed for assistance, which will be of sufficient size, scope, and quality to promise significant improvement in the education of students of limited-English proficiency, and that the applicant will have the resources and commitment to continue the program when assistance under this subpart is reduced or no longer available; and

"(6) the applicant provides for utilization of the State and national dissemination sources for program design and in dissemination of results and products.

**"(i) PRIORITIES AND SPECIAL RULES.—**

"(1) **PRIORITY.**—The Secretary shall give priority to applications which provide for the development of bilingual proficiency both in English and another language for all participating students.

"(2) **SPECIAL ALTERNATIVE INSTRUCTIONAL PROGRAM.**—Grants for special alternative instructional programs under this subpart shall not exceed 25 percent of the funds provided for any type of grant under any section, or of the total funds provided, under this subpart for any fiscal year.

"(3) **SPECIAL RULE.**—Notwithstanding paragraph (2), the Secretary may award grants under this subpart for special alternative instructional programs if an applicant has demonstrated that the applicant cannot develop and implement a bilingual education program for the following reasons:

"(A) Where the diversity of the limited English proficient students' native languages and the small number of students speaking each respective language makes bilingual education impractical.

"(B) Where, despite documented efforts, the applicant has not been able to hire qualified instructional personnel

who are able to communicate in the students' native language.

"(4) **CONSIDERATION.**—In approving applications under this subpart, the Secretary shall give consideration to the degree to which the program for which assistance is sought involves the collaborative efforts of institutions of higher education, community-based organizations, the appropriate local and State educational agency, or businesses.

"(5) **DUE CONSIDERATION.**—The Secretary shall give due consideration to applications providing training for personnel participating in or preparing to participate in the program which will assist such personnel in meeting State and local certification requirements and that, to the extent possible, describe how college or university credit will be awarded for such training.

**"SEC. 7117. INTENSIFIED INSTRUCTION.**

20 USC 7427.

"In carrying out this subpart, each grant recipient may intensify instruction for limited English proficient students by—

"(1) expanding the educational calendar of the school in which such student is enrolled to include programs before and after school and during the summer months;

"(2) expanding the use of professional and volunteer aids;

"(3) applying technology to the course of instruction; and

"(4) providing intensified instruction through supplementary instruction or activities, including educationally enriching extracurricular activities, during times when school is not routinely in session.

**"SEC. 7118. CAPACITY BUILDING.**

20 USC 7428.

"Each recipient of a grant under this subpart shall use the grant in ways that will build such recipient's capacity to continue to offer high-quality bilingual and special alternative education programs and services to children and youth of limited-English proficiency once Federal assistance is reduced or eliminated.

**"SEC. 7119. SUBGRANTS.**

20 USC 7429.

"A local educational agency that receives a grant under this subpart may, with the approval of the Secretary, make a subgrant to, or enter into a contract with, an institution of higher education, a nonprofit organization, or a consortium of such entities to carry out an approved program, including a program to serve out-of-school youth.

**"SEC. 7120. PRIORITY ON FUNDING.**

20 USC 7430.

"The Secretary shall give priority to applications under this subpart that describe a program that—

"(1) enrolls a large percentage or large number of limited English proficient students;

"(2) takes into account significant increases in limited English proficient children and youth, including such children and youth in areas with low concentrations of such children and youth; and

"(3) ensures that activities assisted under this subpart address the needs of school systems of all sizes and geographic areas, including rural and urban schools.
