Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Termination for Esperion Therapeutics, Inc, Ann Arbor, MI

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: Dr. Peter J. Lee, Decommissioning Branch, Division of Nuclear Materials Safety, U.S. Nuclear Regulatory Commission, Region III, 2443 Warrenville Road, Lisle, Illinois 60532-4352. Telephone: 630-829-9870; fax number: 630-515-1259; e-mail: pjl2@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuing a license termination of Material License No. 21-32115-01 issued to Esperion Therapeutics, Inc. (the licensee), to authorize release of its Ann Arbor facility for unrestricted use.

The NRC staff has prepared an Environmental Assessment (EA) in support of this amendment in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

II. EA Summary

The purpose of the proposed action is to terminate Byproduct Material License No. 21-32115-01 issued to Esperion Therapeutics, Inc., and release its Ann Arbor, Michigan facility for unrestricted use. On September 24, 1998, the NRC authorized the licensee to use labeled compounds such as hydrogen-3, carbon-14, phosphorus-32, phosphorus-33, sulfur-35, etc. for research and development. On May 17, 2006, the licensee submitted a license termination request to release its Ann Arbor facility for unrestricted use. The licensee has conducted surveys of the facility and provided information to the NRC to demonstrate that the site meets the license termination criteria in 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use."

The staff has examined the licensee's request and the information provided in support of its request, including the surveys performed to demonstrate compliance with the release criteria. The staff has found that the radiological environmental impacts from the proposed action are bounded by the impacts evaluated in the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Facilities" (NUREG-1496). Additionally, no non-radiological or cumulative impacts were identified. Based on its review, the staff has determined that there are no additional

remediation activities necessary to complete the proposed action and a Finding of No Significant Impact is appropriate.

III. Finding of No Significant Impact

On the basis of the EA, the NRC concluded that there are no significant environmental impacts from the proposed amendment and determined not to prepare an environmental impact statement.
