SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory
Commission (NRC) is considering the
issuance of a license amendment to
Defense Logistics Agency, Defense
National Stockpile Center (DLA/DNSC)
for Materials License No. STC-133, to
authorize release of its facility in Scotia,
New York for unrestricted use. NRC has
prepared an Environmental Assessment
(EA) in support of this proposed action
in accordance with the requirements of
10 CFR Part 51. Based on the EA, the
NRC has concluded that a Finding of No
Significant Impact (FONSI) is
appropriate. The amendment will be
issued following the publication of this
Notice.

II. EA Summary

The purpose of the proposed action is
to authorize the release of the licensee's
Scotia, New York facility for
unrestricted use. DLA/DNSC was
authorized by NRC from 1970 to use
radioactive materials for storage and
sampling purposes at the Scotia site. On
January 8, 2005, DLA/DNSC requested
that NRC release the facility for
unrestricted use. DLA/DNSC has
conducted surveys of the facility and
provided information to the NRC to
demonstrate that the site meets the
license termination criteria in Subpart E

of 10 CFR Part 20 for unrestricted
release.

The NRC staff has prepared an EA in
support of the license amendment. The
facility was remediated and surveyed
prior to the licensee requesting the
license amendment. The NRC staff has
reviewed the information and final
status survey submitted by DLA/DNSC.
Based on its review, the staff has
determined that there are no additional
remediation activities necessary to
complete the proposed action.
Therefore, the staff considered the
impact of the residual radioactivity at
the facility and concluded that since the
residual radioactivity meets the
requirements in Subpart E of 10 CFR
part 20, a Finding of No Significant
Impact is appropriate.

III. Finding of No Significant Impact

The staff has prepared the EA
(summarized above) in support of the
license amendment to release the
facility for unrestricted use. The NRC
staff has evaluated DLA/DNSC's request
and the results of the surveys and has
concluded that the completed action
complies with the criteria in Subpart E
of 10 CFR part 20. The staff has found
that the radiological environmental
impacts from the action are bounded by
the impacts evaluated by NUREG-1496,
Volumes 1-3, "Generic Environmental
Impact Statement in Support of
Rulemaking on Radiological Criteria for
License Termination of NRC-Licensed
Facilities" (ML042310492,
ML042320379, and ML042330385).
Additionally, no non-radiological or
cumulative impacts were identified. On
the basis of the EA, the NRC has
concluded that there are no significant
environmental impacts from the
proposed action, and has determined
not to prepare an environmental impact
statement for the proposed action.

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-05222]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for The E. R. Squibb and Sons, Inc. Facility in Hamilton, NJ

AGENCY: Nuclear Regulatory
Commission.

ACTION: Notice of availability.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory
Commission (NRC) is considering the
issuance of a license amendment to E.
R. Squibb and Sons, Inc. (Squibb) for
Materials License No. 29-00139-02, to
authorize release of its facility in
Hamilton, New Jersey, for unrestricted
use. NRC has prepared an
Environmental Assessment (EA) in
support of this proposed action in
accordance with the requirements of 10
CFR part 51. Based on the EA, the NRC

has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

II. EA Summary

The purpose of the proposed action is to authorize the release of the licensee's Hamilton, New Jersey, facility for unrestricted use. Squibb was authorized by NRC from 1998 to use radioactive materials for research and development purposes at the site. On September 29, 2005, Squibb requested that NRC release the facility for unrestricted use. Squibb has conducted surveys of the facility and provided information to the NRC to demonstrate that the site meets the license termination criteria in subpart E of 10 CFR part 20 for unrestricted release.

The NRC staff has prepared an EA in support of the license amendment. The facility was remediated and surveyed prior to the licensee requesting the license amendment. The NRC staff has reviewed the information and final status survey submitted by Squibb. Based on its review, the staff has determined that there are no additional remediation activities necessary to complete the proposed action. Therefore, the staff considered the impact of the residual radioactivity at the facility and concluded that since the residual radioactivity meets the requirements in Subpart E of 10 CFR part 20, a Finding of No Significant Impact is appropriate.

III. Finding of No Significant Impact

The staff has prepared the EA (summarized above) in support of the license amendment to terminate the license and release the facility for unrestricted use. The NRC staff has evaluated Squibb's request and the results of the surveys and has concluded that the completed action complies with the criteria in subpart E of 10 CFR part 20. The staff has found that the radiological environmental impacts from the action are bounded by the impacts evaluated by NUREG-1496, Volumes 1-3, "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Facilities" (ML042310492, ML042320379, and ML042330385). Additionally, no non-radiological or cumulative impacts were identified. On the basis of the EA, the NRC has concluded that there are no significant environmental impacts from the proposed action, and the license amendment does not warrant the preparation of an environmental impact

statement for the proposed action. Accordingly, it has been determined that a Finding of No Significant Impact is appropriate.

IV. Further Information

The EA and other documents related to this action, including the application for the license amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents.
