

## Notes

### **Public Social Welfare Expenditures, Fiscal Year 1986**

by Ann Kallman Bixby\*

In fiscal year 1986, Federal, State, and local governments in the United States spent \$770.5 billion on the cash benefits, services, and administrative costs for public programs of direct benefit to individuals and families. Such social welfare expenditures included income maintenance, health, education, housing, and veterans' programs. These expenditures represented 18.4 percent of the gross national product (GNP) in 1986, and more than half of total government spending at all levels.

The social welfare expenditure data for 1986 differed little from those of previous years, and they reinforced a pattern that has been evident in the series since the late 1970's. The relative level of spending for social welfare remained generally stable over the years 1977-86, but its direction or emphasis changed. Table 1 shows this pattern with regard to the GNP.

With the exceptions of 1979 and 1983, total social welfare expenditures accounted for between 18.0 and 19.0 percent of the GNP from 1977 through 1986. However, the contribution of various kinds of social welfare programs to that stable percentage changed considerably. Table 2 shows several components of social welfare

expenditures as percentages of the total and reflects the changes that occurred from 1977 to 1986.

The Old-Age, Survivors, and Disability Insurance (OASDI) program and the combined programs of Medicare and Medicaid represented growing shares of total expenditures during this period. In fact, publicly financed health care expenditures increased nearly 60 percent when measured as a percentage of all social welfare expenditures. At the same time, public aid (other than medical services) spending for such programs as Aid to Families with Dependent Children, Food Stamps, and Supplemental Security Income, declined from 9.7 percent of total expenditures to 7.2 percent. Unemployment Insurance expenditures declined from 4.3 percent to 2.4 percent, although the rate of unemployment was the same in 1977, 1980, and 1986. The increases in U.S. social welfare spending were thus primarily in the areas of retirement and health care programs, which reflects the national emphasis on programs for elderly and disabled persons during the past 20 years. The elderly, in particular, represent an increasing proportion of the population, and have greater need for health care than do younger age groups. The increasing age of the elderly is also a factor in the increase in health

---

care costs: In 1986, nearly 5 percent of the population was aged 75 or older.

The amount of public social welfare expenditures increased \$40.1 billion, or 5.5 percent, from 1985 to 1986 (table 3). Of that increase, 45 percent was in the category of social insurance, 30 percent in education, and 16 percent in public aid. Social insurance includes the OASDI and Medicare programs, and public aid includes the Medicaid program. Thus, the increases followed the pattern of observed growth in retirement and health costs noted above. Public housing, which received a decreasing share of resources in the 1980's, was the only category in which expenditures decreased from 1985 to 1986. Chart 1 illustrates the changes in the composition of social welfare expenditures by category from 1970 to 1986.

An examination of social welfare

expenditure data in per capita constant dollars—that is, with the effects of price and population changes removed—shows that expenditures in the "Health and medical programs" category increased the most from 1985 to 1986, 5 percent, followed by education at 4 percent (table 4). Health care costs in this series are distributed by the program category under which the expenditures are met. Thus, the Medicare program is assigned to the social insurance category, veterans' hospital care to the veterans' category, and so forth. The combination of all medical costs from all categories appears under the rubric of "All health and medical care." In 1986, this combination of health and medical care costs represented 24 percent of all social welfare expenditures and 4.5 percent of the GNP.

The Federal Government share of social welfare expenditures declined slightly in most categories in 1986

(table 5). The overall apportionment of responsibility showed little change, however. Education continued to be primarily a State-local responsibility, as social insurance and veterans' programs remained in the Federal domain. The broad category of "All health and medical care" continued to be more than 70 percent federally financed.

The years since 1980 have shown a decline in the percentage of government expenditures for social welfare purposes (table 6). Trust fund expenditures remained relatively stable over the period 1980-86; the decline in spending occurred in the area of discretionary funds. This is consistent with the observation of increased spending for the OASDI and publicly financed health care programs, which are paid for largely or entirely from trust fund monies.

Health care costs have become an important element of the U.S.

**Table 1.**—Social welfare expenditures under public programs as percent of gross national product, selected fiscal years, 1950-86

Fiscal year	Gross national product (in billions)	All programs <sup>1</sup>			Program category

<sup>1</sup> Includes housing, not shown separately here.

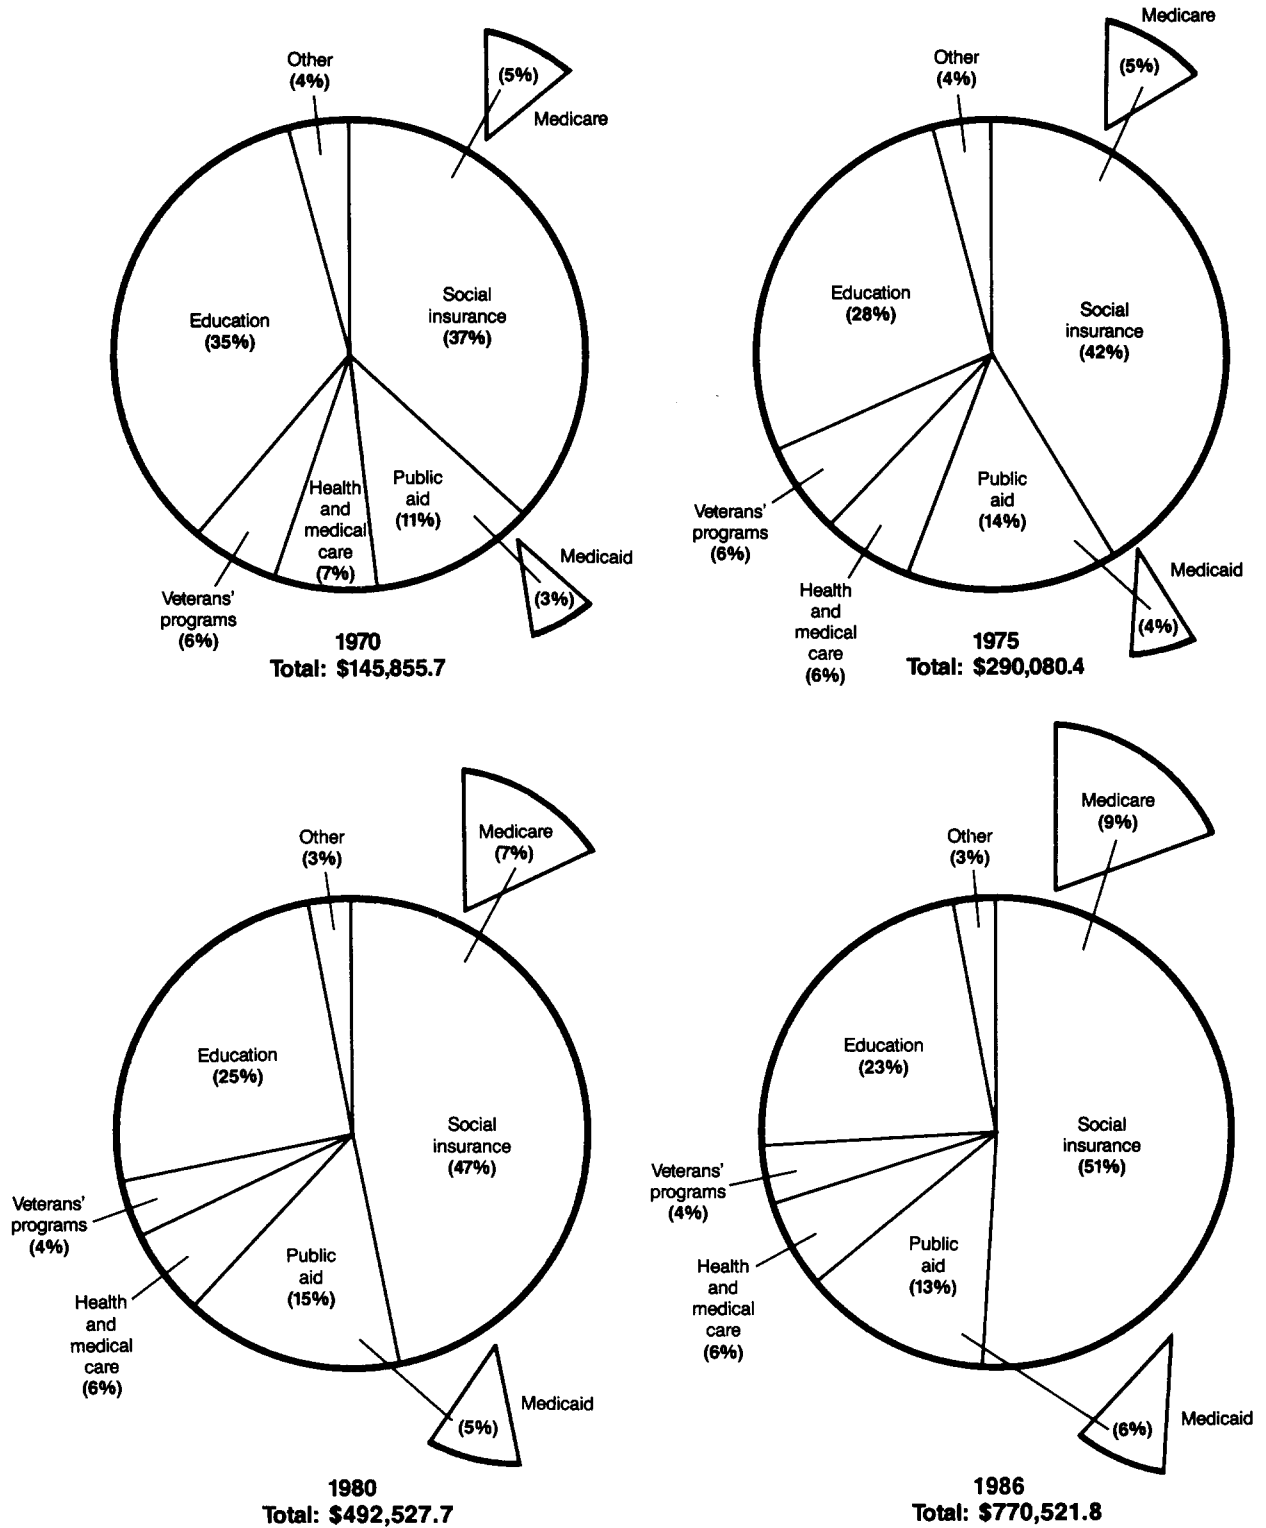

<sup>2</sup> Combines "health and medical programs" with medical services provided in connection with social

insurance, public aid, veterans', and "other social welfare" programs.

<sup>3</sup> Preliminary estimates.

**Chart 1.—Percentage distribution of social welfare expenditures, selected fiscal years, 1970-86**

[Amounts in millions]

economy during the 1970's and 1980's. Table 7 shows that in 1986 the United States spent \$454 billion on public and private health care, an amount equal to more than 10 percent of the GNP. The increase in health and medical spending from 1985 to 1986 once again outdistanced the increase in the general cost of living—8.2 percent, compared with 1.9 percent. Private health care spending continued to account for nearly 60 percent of the total, with the bulk of that money going for health and medical services.

**Table 2.—Percent of total social welfare expenditures for selected programs, by selected years**

<sup>1</sup>Expenditures from Federal, State, and local revenues under public law; including capital outlay and administrative expenditures unless otherwise noted. Includes some payments abroad. Until 1977, fiscal years for the Federal Government ended June 30; subsequently they ended September 30.

<sup>2</sup>Preliminary figures.

<sup>3</sup>Includes Part A (Hospital Insurance) and Part B (Supplementary Medical Insurance).

<sup>4</sup>Excludes financial interchange between OASDHI and Railroad Retirement programs.

<sup>5</sup>Excludes refunds of employee contributions; includes payments to retired military personnel and their survivors. Administrative expenses for Federal noncontributory retirement not available.

<sup>6</sup>Includes unemployment compensation under State programs; programs for Federal employees and ex-servicemen; trade adjustment and cash training allowances; and payments under extended, emergency, disaster, and special Unemployment Insurance programs.

<sup>7</sup>Cash and medical benefits in five geographical areas. Includes private plans, where applicable, and State costs of administering State plans and overseeing private plans. Administrative expenses of all private plans and all data for Hawaii not available.

<sup>8</sup>Included in total directly above; excludes administrative expenses not available separately but included for entire program in preceding line.

<sup>9</sup>Cash and medical benefits paid under Federal and State laws by private insurance carriers, State funds, and self-insurers. Includes Alaska and Hawaii beginning 1960. Administrative cost of private carriers and self-insurers not available. Starting 1970, Federal expenditures include Black Lung benefit program.

<sup>10</sup>Represents categorical cash and medical payment programs under the Social Security Act and general assistance. Starting 1969, includes work incentive activities.

<sup>11</sup>Included in public assistance total above; includes administrative expenses of Medicaid program.

<sup>12</sup>Work relief, other emergency aid, surplus food for the needy, repatriate and refugee assistance, temporary and emergency employment assistance, and employment training programs under OEO. Starting 1981, includes Low-Income Home Energy Assistance program.

<sup>13</sup>Excludes State and local expenditures for domiciliary care in institutions other than those for mental or tuberculosis patients. Services in connection with OASDHI, State Temporary Disability Insurance, Workers' Compensation, public assistance, vocational rehabilitation, and veterans' and antipoverty programs are included in total expenditures for these programs.

<sup>14</sup>Includes medical care for military dependent families.

<sup>15</sup>Includes services for crippled children.

<sup>16</sup>Includes burial awards. Starting 1965, includes special allowances for survivors of veterans who did not qualify under OASDHI. Starting 1973, includes clothing allowances.

<sup>17</sup>Excludes the servicemen's group life insurance program.

<sup>18</sup>Federal expenditures for administrative costs (Department of Education) and research included in total only.

<sup>19</sup>Construction for vocational and adult education included with elementary-secondary school

construction. For 1981 and 1982, higher education construction expenditures are Federal only.

<sup>20</sup>Starting 1986, included with elementary and secondary school expenditures.

<sup>21</sup>Medical research included in vocational rehabilitation total. Starting 1981, no longer available separately.

<sup>22</sup>Federal expenditures represent primarily surplus food for institutions.

<sup>23</sup>Surplus food for schools and programs under National School Lunch and Child Nutrition Acts. State and local funds represent direct appropriations through 1979, all such expenditures starting in 1980.

<sup>24</sup>Represents primarily child welfare services under the Social Security Act. Starting 1969, excludes administrative expenses. State and local data not available after 1980.

<sup>25</sup>Includes domestic programs consolidated in fiscal year 1972 under ACTION and special OEO programs consolidated in fiscal year 1974 under Community Services Administration. Other OEO programs listed in appropriate subsections under public aid and education.

<sup>26</sup>Federal expenditures include administrative and related expenses of the Secretary of Health and Human Services, Indian welfare and guidance, aging and juvenile delinquency activities, and certain manpower and human development activities. State and local expenditures include amounts for antipoverty and manpower programs, day care, child placement and adoption services, foster care, legal assistance, care of transients, and other unspecified welfare services; before 1970, these amounts included with institutional care.

**Table 4.—Total and per capita social welfare expenditures under public programs in current and constant (1986) dollars, selected fiscal years, 1950-86**
