1 The electric power sector (electric utilities and independent power producers) comprises electricity-only and combined-heat-and-power (CHP) plants whose primary business is to sell electricity, or electricity and heat, to the public -- for producing electricity and useful thermal output.

2 Industrial combined-heat-and-power (CHP) and a small number of industrial electricity-only plants. The reported coal consumption is the total for producing electricity and useful thermal output.

3 All industrial sector fuel use other than in "Coke Plants" and "Industrial CHP."

4 Includes commercial combined-heat-and-power (CHP) and a small number of commercial electricity-only plants,

such as those at hospitals and universities. The reported coal consumption is the total for producing electricity and useful thermal output.

5 All commercial sector fuel use other than that in "Commercial CHP" and residential sector.

Note: · Total may not equal sum of components because of independent rounding.
